Cause: A call to define was not performed before doing a fetch.

Action: Call the define service before fetch.

DIA-48229: Invalid Relation Handle Provided [*string*] [*string*]

Cause: An invalid or corrupt relation handle was used.

Action: Possible memory corruption.

DIA-48230: Expression arguments must match types

Cause: Incorrect type semantics for fields in the predicate.

Action: Correct the predicate.

DIA-48231: Predicate syntax error

Cause: A syntax error exists in the predicate string.

Action: Correct the predicate.

DIA-48232: Debug command syntax error [string]

Cause: An invalid debug command has been specified.

Action: Correct the debug command.

DIA-48233: Invalid Field Handle [string] [string] [string]

Cause: The field handle is invalid.

Action: Possible memory corruption.

DIA-48238: Invalid Surrogate Length Specified [string] [string]

Cause: An invalid length during create field was specified

Action: Specify a correct length

DIA-48239: Invalid Predicate Handle Provided [string] [string]

Cause: An invalid or corrupt relation handle was used.

Action: Possible memory corruption.

DIA-48240: Field is NOT NULL but NULL value supplied

Cause: A field [%s] declared to not allow nulls contains a null value.

Action: Specify a correct value

DIA-48242: Fields that are NOT NULL can not use surrogates

Cause: NOT NULL fields can not have surrogates specified.

Action: Either remove the constraint or the surrogate.

DIA-48243: Additional Fields must be declared nulls allowed

Cause: A field can not be added to a relation that is defined NOT NULL

Action: Do not specify NOT NULL

DIA-48244: Purge for Retention can't be called while in an Query

Cause: A query is already running - purge for retention can't be invoked

Action: Fix call sequence

DIA-48245: Attempt to Update/Delete when at EOF

Cause: The fetch operation is positioned at EOF - can not update/delete

Action: Do not call update/delete after fetch has returned EOF

DIA-48246: Illegal Operation on External Relation

Cause: An illegal call was made using an external relation

Action: Do not perform the API Call

DIA-48247: Predicate Conversion Error string

-
- Cause:** A time conversion failed
Action: Fix the input
- DIA-48248: Function *string* type check error; ityp = *string* typ = *string* arg = *string***
Cause: Invalid inputs to the specified function
Action: Change the inputs
- DIA-48251: Failed to open relation due to following error**
Cause: See error below in the error stack
Action: See error below in the error stack
- DIA-48252: Relation does not require migration**
Cause: Relation on disk is compatible with the current code
Action: Don't run the migration services
- DIA-48258: AMS Corrupt Page Found - Rebuild Relation**
Cause: A corrupted page has been found.
Action: Do a rebuild of the relation
- DIA-48259: AMS Relation not Created Correctly**
Cause: Create relation failed
Action: Recreate the relation
- DIA-48260: Function *string* not found**
Cause: A reference to a function that is not valid was found
Action: Fix the function name
- DIA-48262: Sequence references not allowed in predicates**
Cause: References to currval or nextval not allowed
Action: Remove these references
- DIA-48263: Currval not set yet - use nextval**
Cause: References to currval can't occur until a nextval is done
Action: Remove the reference
- DIA-48265: Incorrect number of arguments (*string*) provided - expected (*string*)**
Cause: Number of arguments to function is incorrect
Action: Specify the correct number of arguments
- DIA-48291: Field name *string* can't be unique resolved**
Cause: Field name appears in more than one relation
Action: Prefix the field name with the relation name
- DIA-48292: Can't use outer join syntax mixed with inner join syntax**
Cause: The join condition was specified using both inner and outer join elements"
Action: Specify the join condition correctly
- DIA-48293: Outer join syntax not allowed without a join**
Cause: Using outer join syntax in the predicate without doing a join
Action: Fix the predicate

-
- DIA-48300: Incident Record Already Exists**
Cause: trying to create an incident that already exists
Action: retry operation with new incident ID
- DIA-48301: An Invalid Incident ID was specified**
Cause: the specified incident ID was invalid
Action: retry operation with correct incident ID
- DIA-48302: Incident Directory does not exist**
Cause: the incident directory was not found
Action: retry operation with a different incident ID
- DIA-48303: Exceeded max Incident Sequence Value**
Cause: the maximum supported incident sequence value was exceeded
Action: reset incident sequence and retry operation
- DIA-48304: incident staging file not found**
Cause: the incident staging file is missing
Action: retry with a different incident ID
- DIA-48305: incident ID range is too large**
Cause: the maximum incident sequence value was exceeded
Action: retry operation with a smaller range
- DIA-48309: illegal incident state transition, [*string*] to [*string*]**
Cause: the incident cannot be moved to the new state
Action: retry operation with a valid incident status
- DIA-48310: Incident *string* staging file not found**
Cause: the incident staging file does not exist
Action: retry operation with a valid incident ID
- DIA-48311: Invalid field name [*string*]**
Cause: the specified field name is invalid
Action: retry operation with a valid field name
- DIA-48312: Sweep incident *string* staging file failed**
Cause: the sweep action of incident staging file failed
Action: check the incident ID and retry
- DIA-48313: Updates not allowed on ADR relation [*string*] of Version=*string***
Cause: Update operations not supported on this version of ADR relation
Action: check ADR version and retry
- DIA-48314: Invalid ADR Control parameter [*string*]**
Cause: the specified control parameter is invalid
Action: check parameter and reissue command
- DIA-48315: ADR unavailable**
Cause: the ADR directory is not available
Action: enable ADR and retry operation

-
- DIA-48316: relation [string] unavailable or cannot be created**
Cause: the ADR relation is not available
Action: check ADR directory and retry operation
- DIA-48317: ADR Relation [string] of version=string is obsolete**
Cause: the version of ADR relation is too old and not supported
Action: check the ADR version and retry
- DIA-48318: ADR Relation [string] of version=string cannot be supported**
Cause: the version of ADR relation is too new and cannot be supported
Action: need to use a newer release to access the ADR
- DIA-48319: Update operation on ADR relation [string] not allowed**
Cause: updates to foreign ADR relation cannot be supported
Action: verify ADR location and reissue command
- DIA-48320: Too many incidents to report**
Cause: the result set of incidents is too large to handle
Action: use a predicate to reduce the number of incidents and retry
- DIA-48321: ADR Relation [string] not found**
Cause: the required ADR relation is missing, ADR may be corrupted
Action: check ADR directory and retry
- DIA-48322: Relation [string] of ADR V[string] incompatible with V[string] tool**
Cause: the tool version is incompatible with the ADR version
Action: use another version of tool and retry
- DIA-48323: Specified pathname [string] must be inside current ADR home**
Cause: file outside of ADR home not allowed as incident file
Action: check the file name and retry
- DIA-48324: Incompatible staging file encountered**
Cause: sweep incident failed because staging file is incompatible
Action: check the incident ID and version of ADR and retry
- DIA-48339: view [string] does not exist**
Cause: view has not been created
Action: verify view name and reissue command
- DIA-48340: operation not supported on view [string]**
Cause: unsupported (dml) operation on views
Action: verify relation name and reissue command
- DIA-48341: Field [string] not a grouping field**
Cause: the field name specified is not a grouping field
Action: verify field names and groupby clause and reissue command
- DIA-48342: Field [string] cannot be mixed with string fields**
Cause: the specified field is incompatible with other grouping fields *A8
Action: verify this and other field names and reissue command

Action: None

DIA-48343: invalid field [*string*] reference in *string* clause

Cause: the specified field in the specified clause is invalid

Action: verify this field name and reissue command

DIA-48344: Invalid Name [*string*] specified

Cause: Either the name refers to an existing object or violates the reserved namespace rules.

Action: Pick another name

DIA-48345: Timeout encountered during operation

Cause: The attempted operation conflicted with another operation that was already being executed.

Action: Retry operation at a later time.

DIA-48400: ADRCI initialization failed

Cause: The ADR Base directory does not exist

Action: Either create an ADR Base directory or point to an existing one

DIA-48401: SET command requires arguments

Cause: No arguments are input for the SET command

Action: Input the arguments

DIA-48402: Variable is not defined

Cause: No substitution value is input.

Action: Input the substitution value following after the variable name.

DIA-48403: DEFINE or UNDEFINE command has no arguments

Cause: DEFINE and UNDEFINE command need users to input the substitution variable name.

Action: Input the variable name follow after the DEFINE or UNDEFINE

DIA-48404: RUN or @ command has no arguments

Cause: RUN and @ commands need users to input script filename

Action: Input script filename after RUN and @ commands

DIA-48405: The option in the command is invalid

Cause: The option is not allowed in the command

Action: Check the command syntax

DIA-48406: ECHO or TERMOUT status must be set to ON or OFF

Cause: the status of ECHO and TERMOUT commands must be ON or OFF

Action: input ON or OFF

DIA-48407: DESCRIBE and QUERY commands need at least relation name argument

Cause: This is no relation name is input as argument

Action: Need users to input at least the relation name

DIA-48408: The incident number exceeds the maximum number [*string*]

Cause: The input incident number exceeds the maximum number

Action: Input less incidents

DIA-48409: The ADR homes exceeds the maximum number [string]

Cause: The input ADR homes number exceeds the maximum number

Action: Input less ADR home string

DIA-48410: The trace path exceeds the maximum number [string]

Cause: The input trace path exceeds the maximum number

Action: Input less trace path

DIA-48411: The trace files exceeds the maximum number [string]

Cause: The input trace file path number exceeds the maximum number

Action: Input less trace file path

DIA-48412: The parameters exceeds the maximum number [string]

Cause: The input parameter number exceeds the maximum number

Action: Input less parameter number or increase the upper bound

DIA-48413: The number of orderby fields exceeds maximum number [string]

Cause: The orderby field number exceeds the maximum number

Action: Input less fields

DIA-48414: The string in the execution option exceeds maximum length [string]

Cause: The string length is too long

Action: Divide the commands into two sets or use adrci scripts.

DIA-48415: Syntax error found in string [string] at column [string]

Cause: Parsing error found in the user input string

Action: Validate the input string

DIA-48419: Illegal arguments

Cause: The input argument is illegal

Action: Check the input arguments and make sure it is not null

DIA-48421: Predicate string in the command must be single or double quoted

Cause: The predicate string is not single or double quoted

Action: Put single or double quotes around the predicate string

DIA-48423: IMPORT command must have a filename

Cause: File name is missing from the command

Action: Input the import file name after the IMPORT keyword

DIA-48424: SHOW TRACE command needs argument

Cause: SHOW TRACE command needs arguments

Action: Input arguments

DIA-48426: The initialization filename is too long

Cause: The initialization filename length exceeds the maximum length

Action: This is really an internal setting parameter of the ADRCI, report it as a bug. Alternatively move the initialization file to the current working directory

-
- DIA-48428: Input command string exceeds max length [*string*]**
Cause: The current command string is too long and exceeds the limit
Action: Input less characters
- DIA-48429: Variable name [*string*] is an invalid identifier**
Cause: The substitution variable name is not a valid identifier
Action: Input the valid identifier defined by ADRCI
- DIA-48431: Must specify at least one ADR home path**
Cause: The command syntax requires at least one ADR home path to be input
Action: Check the command syntax and input the home path
- DIA-48432: The ADR home path [*string*] is not valid**
Cause: The adr home user inputs is not valid, which may due to the path does not exist.
Action: Check if the input home path exists
- DIA-48433: Unknown help topic**
Cause: The input topic is unknown
Action: Check if the topic is valid
- DIA-48434: No DDE commands are input**
Cause: No DDE commands are input
Action: Input a DDE command
- DIA-48435: Input a trace file**
Cause: Show trace expects a trace file
Action: Input a trace file
- DIA-48436: File [*string*] does not exist**
Cause: the file does not exist
Action: Validate the trace file name
- DIA-48437: No IPS commands are input**
Cause: No IPS commands are input
Action: Input a IPS command
- DIA-48438: [*string*] is not a valid number**
Cause: The input number is not valid
Action: Check the input number
- DIA-48439: The input path name exceeds the maximum length [*string*]**
Cause: The input path name is too long
Action: Report as a bug to change the limit
- DIA-48440: Variable [*string*] is already defined**
Cause: The variable name is defined previously
Action: Use another variable name
- DIA-48441: The function parameter number exceeds the maximum number [*string*]**
Cause: The function parameter number exceeds the maximum number

-
- Action:** Report it as bug to change the maximum number
- DIA-48442: The control parameter number exceeds the maximum number** [*string*]
Cause: The control parameter number exceeds the maximum number
Action: Report it as bug to change the maximum number
- DIA-48443: Trace Record type appears in the middle of the path**
Cause: The trace record cannot be in the middle of the path
Action: Validate the input
- DIA-48444: The single "." and "*" cannot appear in the middle of the path**
Cause: The single "." and "*" appears in the middle of the path
Action: Validate the input
- DIA-48445: Path expression only supports one bucket dump type**
Cause: The path expression only supports one bucket dump"
Action: Change the path expresison syntax
- DIA-48446: The command needs path input**
Cause: No path is input as a parameter
Action: Input the path
- DIA-48447: The input path** [*string*] **does not contain any ADR homes**
Cause: The input path does not contain ADR homes
Action: Validate the path
- DIA-48448: This command does not support multiple ADR homes**
Cause: There are multiple homes in the current adr setting.
Action: Use command SET HOMEPATH to set a single home
- DIA-48449: Tail alert can only apply to single ADR home**
Cause: There are multiple homes in the current setting
Action: Use command SET HOMEPATH to set a single home
- DIA-48457: ADRCI core dumped**
Cause: It is adrci internal error.
Action: Report to Oracle
- DIA-48458: "show incident" failed due to the following errors**
Cause: There could be a bug or users do not have the access permission
Action: Report to Oracle if the errors are not due to ADR permission settings
- DIA-48459: "describe" command only supports one ADR home path**
Cause: Multiple ADR home paths in the command
Action: put one ADR home path
- DIA-48460: The home path** [*string*] **is not valid**
Cause: The input home path is not valid home path
Action: Verify the homepath
- DIA-48461: "describe" failed due to the following errors**

-
- Cause:** Underlying code failed
Action: If it is not due to permission issue, report to Oracle
- DIA-48462: Fatal error encountered in [string]**
Cause: Fatal error encountered
Action: Report to Oracle
- DIA-48463: The value buffer reached the maximum length [string]**
Cause: The value buffer is full
Action: Report to Oracle
- DIA-48464: The predicate buffer reached the maximum length [string]**
Cause: The predicate buffer is too small
Action: Report to Oracle
- DIA-48465: The specified type [string] is undefined**
Cause: The purge type specified is undefined
Action: Check the type name
- DIA-48466: Internal failure, the report context is not initialized**
Cause: Internal problem failure.
Action: Report to Oracle
- DIA-48467: "string" for the keyword "string" is not a valid number**
Cause: The keyword value is not a valid number
Action: Check the value
- DIA-48468: "string" is not a valid keyword**
Cause: The keyword is not defined for the command
Action: Check the available keywords
- DIA-48469: Keyword "string" cannot be duplicated**
Cause: The command can only allow one key with the name
Action: Remove one keyword name from the command
- DIA-48470: Unknown "string" command**
Cause: The command is not valid
Action: Use help manual to check the command syntax
- DIA-48472: Invalid product name**
Cause: The product name provided does not exist
Action: Specify a product name, see HELP SHOW BASE
- DIA-48473: Internal failure, unknown return code [string]**
Cause: Internal program failure
Action: Report to Oracle
- DIA-48474: Syntax error specifying product, must not be NULL**
Cause: The product clause is being used, but no product name is provided
Action: Supply the product name

DIA-48475: [string] is not a valid timestamp

Cause: The input timestamp string is not in valid format

Action: None

DIA-48476: Cannot write the results out to a file, please check if the environment variable TMPDIR is set or the current directory is not writable

Cause: The current path may not be writable

Action: If the current path is writable, report to Oracle

DIA-48477: The input path does not contain any valid ADR homes

Cause: The input path does not contain any valid ADR homes

Action: Check the path if it is valid

DIA-48478: No alert messages are created

Cause: No alert messages are created

Action: No action

DIA-48479: No HM runs are created

Cause: There is no hm runs

Action: No action

DIA-48480: No incidents are created

Cause: There is no incident

Action: No action

DIA-48481: Report is not available

Cause: The requested report does not exist"

Action: Check the report ID

DIA-48482: Report is not generated

Cause: The requested report is not ready to be generated

Action: Check the report ID

DIA-48483: Spooling failed, it may be because the spool file cannot be created due to a permission issue

Cause: The spooling filename may not be valid or the file cannot be created

Action: Check the permissions of the target directory and verify the filename

DIA-48484: Run script failed, it may be because the script file does not exist

Cause: The script file may not exist

Action: Check if the script file exist

DIA-48485: The file exceeds the maximum length [string]

Cause: The filename is too long

Action: Report to Oracle

DIA-48486: The file [string] exceeds the maximum length [string]

Cause: The filename is too long

Action: Report to Oracle

DIA-48487: The internal predicate string exceeds the maximum length [string]

-
- Cause:** The predicate string exceeds the maximum length
Action: Report to Oracle
- DIA-48488: The predicate string exceeds the maximum length [string]**
Cause: The input predicate string exceeds the maximum length
Action: Report to Oracle
- DIA-48489: The input exceeds the maximum length [string]**
Cause: The input exceeds the maximum length
Action: Report to Oracle
- DIA-48490: The field number exceeds the maximum number [string]**
Cause: The input field number exceeds the maximum number
Action: Input less field names
- DIA-48491: The program name is too long, exceeds the maximum length [string]**
Cause: the program name length exceeds the maximum length setting
Action: Report to Oracle
- DIA-48492: The report component name is not defined**
Cause: the report component name does not exist
Action: Check the component name to ensure it is registered
- DIA-48493: Sweep command needs parameters**
Cause: sweep command needs parameter
Action: Check the syntax of the command
- DIA-48494: ADR home is not set, the corresponding operation cannot be done**
Cause: The adr home is not set in the current adrci session
Action: Set the adr home using the adrci command "set base" and "set homepath"
- DIA-48495: Interrupt requested**
Cause: User requested to interrupt the current action
Action: No action is needed
- DIA-48496: "string" is a mandatory keyword for the command**
Cause: The keyword is not specified for the command
Action: Input the keyword
- DIA-48497: "string" is an invalid product type**
Cause: The product type is not registered
Action: Check the product type
- DIA-48499: The value of the keyword "string" exceeds the maximum length string**
Cause: The keyword value is too long
Action: Check the limit and input again
- DIA-48500: File Write Error [string] [string]**
Cause: Number of bytes written differs from number requested. Possibly due to out of disk space.
Action: Ensure sufficient disk space.

DIA-48501: File Read Error [string] [string]

Cause: Number of bytes read differs from number requested. Possibly due due to corrupted file.

Action: Recreate the file.

DIA-48502: Invalid Command Line - Missing Required Elements

Cause: Missing required command line arguments.

Action: Review the help message and supply the required arguments.

DIA-48503: Invalid Parameter Specified

Cause: Invalid input parameter supplied.

Action: Review the help message and correct the invalid input parameter.

DIA-48504: Relation Parameter Must be Specified

Cause: Relation parameter must be specified during adrexp.

Action: Supply the relation parameter.

DIA-48505: File Parameter Must be Specified

Cause: File parameter must be specified during adrimp.

Action: Supply the file parameter.

DIA-48506: Existing Relation at different version than export [string] [string]

Cause: Attempting to import into an existing relation and the schema version of that relation differs from the schema of the relation that was exported.

Action: Drop the existing relation if you still wish to import the relation.

DIA-48507: Predicate Not Allowed during Import

Cause: The predicate option is not allowed during adrimp.

Action: Remove the predicate argument.

DIA-48508: Export File Version [string] Can Not be Used by Import [string]

Cause: The version of the export file is not able to be read by this version of adrimp.

Action: Rerun the export using the current version of adrexp.

DIA-48509: Error occurred during operation. See the following errors

Cause: An underlying error has occurred.

Action: Review and correct the underlying error.

DIA-48510: Can not export an in memory relation

Cause: In memory relations can not be exported.

Action: Pick a different relation.

DIA-48600: HM run with name [string] already exists

Cause: The specified run name already existed.

Action: Specify different run name and re-run the check

DIA-48615: Parameter [string] value not specified

Cause: Run was invoked without specifying the parameter and its value

Action: Specify the needed parameter and its value

-
- DIA-48800: "string" for the keyword "string" is not in the right format of timestamp**
Cause: The value format is not right
Action: Check the format ADRCI supports
- DIA-48801: The option "string" is duplicated**
Cause: The option has been specified more than once
Action: Check the input
- DIA-48802: The options "string" and "string" are mutual exclusive**
Cause: These two options cannot be specified together
Action: Only specify one of them
- DIA-48803: The keyword "string" is not defined for this command**
Cause: The keyword is invalid
Action: Check the valid keywords for the command
- DIA-48804: The command needs at least one file input**
Cause: No files are specified to view
Action: Input the files
- DIA-48805: BEGIN BACKUP issued already - must do an END BACKUP first**
Cause: A begin backup was already issued.
Action: Issue END BACKUP
- DIA-48806: Unknown Function Reference (string)**
Cause: The function reference is not a valid function
Action: Change the reference
- DIA-48900: Illegal Input Argument [string]**
Cause: The input argument is invalid
Action: Check the input parameter
- DIA-48906: Parser context is not valid**
Cause: The parser context is not initialized
Action: Call the initialization routine first before using the context
- DIA-48907: The end of file is reached**
Cause: The end of file is reached
Action: Handle the end of file
- DIA-48908: No trace files are found**
Cause: This is no file in the navigator context, either it is done with parsing, or no file is pushed
Action: Check if the file is added to the context
- DIA-48909: Scan context is not initialized**
Cause: The scan context is not initialized
Action: call the initialization routine of the scan context
- DIA-48912: The specified trace filename is too long**
Cause: The resulting trace filename length exceeds the maximum length

Action: Use a smaller trace filename suffix or move ADR higher in the directory hierarchy

DIA-48913: Writing into trace file failed, file size limit [string] reached

Cause: An attempt was made to write into a trace file that exceeds the trace's file size limit

Action: increase the trace's file size limit.

DIA-48914: File position is not in right format

Cause: The file position format is not right

Action: Check if the file format string is the right one

DIA-48928: The predicate exceeds the max limit string

Cause: The predicate is too long, exceeds the max limit

Action: Use a shorter predicate

DIA-48929: The trace record size exceeded the max size that can be read [string]

Cause: A trace record is too large to be read by the ADR viewer

Action: Report to Oracle

DIA-48930: Cannot allocate memory for processing traces

Cause: A memory allocation request failed

Action: Report to Oracle

DIA-48934: invalid input for the file name identifier

Cause: An invalid input was given for the file name identifier. The file name is not allowed to have slashes ('/') and is not allowed to refer to the parent directory using the '..' characters.

Action: Check the file name and provide a valid input.

DIA-48936: The number of relations exceeds maximum number [string]

Cause: Too many relations listed

Action: Reduce the number

DIA-48937: Feature (string) currently not allowed for SELECT

Cause: Feature is not allowed

Action: Remove feature

DIA-48938: View select column count differs from select alias list

Cause: The view alias list has a different number of fields than the select list"

Action: Change the alias list or view select statement

DIA-48939: Select * not allowed in a CREATE VIEW

Cause: * is currently not allowed for a create view select list

Action: List the fields explicitly

DIA-49315: Invalid incident type specified [string]

Cause: The specified incident type is not defined in this ADR.

Action: Specify an available incident type.

DIA-49404: No such package [string]

Cause: The specified package does not exist.

Action: Specify an existing package.

DIA-49405: Cannot change package name [string] [string]

Cause: Attempted to change package name after package generation.

Action: Use current name, or create a new package with the desired name.

DIA-49406: Undefined configuration parameter specified [string]

Cause: The specified configuration parameter was not found in ADR.

Action: Specify an existing parameter. Re-populate parameters if necessary.

DIA-49407: No unpacking history in this home

Cause: No packages were unpacked into this home.

Action: Verify the current home. Unpack a package if necessary.

DIA-49408: Invalid home specified [string]

Cause: An invalid ADR_HOME was specified.

Action: Verify that the directory exists, and has the correct structure.

DIA-49409: Incremental package provided when complete expected

Cause: No packages were unpacked into this home.

Action: Provide a complete package, or use FORCE option.

DIA-49410: Not an IPS package

Cause: The specified file was not an IPS package.

Action: Verify that the file is a valid zip file with expected contents.

DIA-49412: Package ID does not match existing ID [string] [string]

Cause: The package ID in package file did not match previously unpacked packages.

Action: Use the correct location for unpacking the package.

DIA-49413: Package name does not match existing name [string] [string]

Cause: The package name in package file did not match previously unpacked packages.

Action: Use the correct location for unpacking the package.

DIA-49414: Package sequence later than expected [string] [string]

Cause: The package sequence in package file was later than expected.

Action: Apply packages in correct order, or use FORCE option.

DIA-49415: Package sequence earlier than expected [string] [string]

Cause: The package sequence in package file was earlier than expected.

Action: Apply packages in correct order, or use FORCE option.

DIA-49416: Earlier package sequence applied with FORCE option [string] [string]

Cause: An earlier package sequence was applied using the FORCE option.

Action: Apply a complete sequence which is later than any already applied, or use FORCE option to apply an incremental package.

DIA-49417: Cannot modify already generated package

Cause: Attempted to change package attributes after package generation.

Action: Create a new package with the desired name.

DIA-49420: Package too large [string] [string]

Cause: The package is too large.

Action: Remove some files or incidents from the package, or try using incremental mode.

DIA-49421: Maximum number of package files generated [string]

Cause: The command generated the maximum number of package files.

Action: Remove some files or incidents from the package, or use incremental mode to generate additional files.

DIA-49423: File outside ADR not allowed

Cause: The specified file is not within the ADR directory structure.

Action: Specify a file inside ADR.

DIA-49424: Directory outside ADR not allowed

Cause: The specified directory is not within the ADR directory structure.

Action: Specify a directory inside ADR.

DIA-49425: File inside ADR not allowed

Cause: The specified file is within the ADR directory structure.

Action: Specify a file outside ADR.

DIA-49426: Directory inside ADR not allowed

Cause: The specified directory is within the ADR directory structure.

Action: Specify a directory outside ADR.

DIA-49427: No such file or file not accessible [string]

Cause: The specified file does not exist or cannot be accessed.

Action: Create the file or verify file permissions.

DIA-49428: No such directory or directory not accessible [string]

Cause: The specified directory does not exist or cannot be accessed.

Action: Create the directory or verify directory permissions.

DIA-49429: File already exists and OVERWRITE option not specified [string]

Cause: The client attempted to create a file that already exists.

Action: Either remove the file or use the OVERWRITE option.

DIA-49430: No such problem [string]

Cause: The specified problem does not exist.

Action: Specify a problem that exists in this repository.

DIA-49431: No such incident [string]

Cause: The specified incident does not exist.

Action: Specify an incident that exists in this repository.

DIA-49432: Problem not part of package [string]

Cause: The specified problem is not included in the package.

Action: Specify a problem that is included in the package.

-
- DIA-49433: Incident not part of package** [*string*]
Cause: The specified incident is not included in the package.
Action: Specify an incident that is included in the package.
- DIA-49434: Invalid date format**
Cause: An invalid format was used to specify a date
Action: Specify the date in a supported format.
- DIA-49435: Flood-controlled incident not allowed here** [*string*]
Cause: A flood-controlled incident cannot be included in a package
Action: Specify an incident that is not flood-controlled
- DIA-49436: Date conversion error** [*string*]
Cause: An invalid format was used to specify a date
Action: Specify the date in a supported format.
- DIA-49440: Warnings while unpacking package, details in file** *string*
Cause: There were some non-fatal errors when unpacking a package
Action: Review the specified unpacking log file
- DIA-49441: Warnings while finalizing package, details in file** *string*
Cause: There were some non-fatal errors when finalizing a package
Action: Review the specified finalize log file
- DIA-49450: Non-zero return code from archiving utility** [*string*] [*string*]
Cause: The archiving utility (zip/unzip) returned a warning or error.
Action: Verify that the file and directory exist and are readable, and that the file is a valid zip file.
- DIA-49451: Archive file structure error** [*string*] [*string*]
Cause: The archiving utility (zip/unzip) returned an error indicating that the archive file structure is incorrect.
Action: Verify that the file was transferred correctly and that the file is a valid zip file.
- DIA-49452: Archiving utility out of memory** [*string*] [*string*]
Cause: The archiving utility (zip/unzip) returned an error indicating that it was unable to allocate enough memory.
Action: Check for operating system limitations on process memory usage.
- DIA-49453: Invalid command invoking archiving utility** [*string*] [*string*]
Cause: The archiving utility (zip/unzip) was invoked with an invalid command line, or with invalid options.
Action: Verify that there are no operating system settings affecting the behavior of the archiving utility..
- DIA-49454: Archive is missing or empty** [*string*] [*string*]
Cause: The specified archive does not exist, or is empty.
Action: Check if the specified archive exists.
- DIA-49455: Archive I/O failed** [*string*] [*string*]

-
- Cause:** An attempt to create, write to or read from an archive failed.
- Action:** Verify that operating system I/O operations are working correctly.
- DIA-49456: Operation failed due to insufficient disk space [string] [string]**
- Cause:** An operation on an archive failed due to insufficient disk space.
- Action:** Verify that there is sufficient disk space. Check for operating system quotas or other restrictions.
- DIA-49601: syntax error: found "string": expecting one of: "string" etc..**
- Cause:** Syntax error discovered when processing event specification
- Action:** Enter correct event specification
- DIA-51001: check [string] not found in HM catalog**
- Cause:** checker name might have been misspelled
- Action:** retry running check with proper checker name
- DIA-51003: run parameters not formatted correctly**
- Cause:** Run parameters were given in a wrong format
- Action:** Correct the run params text and try again
- DIA-51004: Check doesn't take any input params**
- Cause:** run params were passed to the check, which doesn't take any inputs
- Action:** don't pass any run params and try again
- DIA-51006: unexpected delimiter ';' in the run params text**
- Cause:** run params were not properly formatted.
- Action:** correct the run params format and try again
- DIA-51007: parameter [string] not registered with this check**
- Cause:** Wrong inputs were given to this check.
- Action:** correct the run params and try the check again
- DIA-51008: parameter [string] value is not a proper number**
- Cause:** the given parameter value is a not a proper number
- Action:** correct the run params and try again
- DIA-51025: check name should be non NULL value**
- Cause:** NULL value was passed for check name
- Action:** give a proper check name and retry again
- DIA-51035: invalid timeout value**
- Cause:** User specified an invalid timeout value
- Action:** None
- DIA-51036: check [string] can only be executed in database instance**
- Cause:** An attempt was made to run database-specific check in ASM environment
- Action:** Don't run the check in ASM environment
- DIA-51037: check [string] can only be executed in ASM instance**
- Cause:** An attempt was made to run ASM-specific check in a database environment

Action: Don't run the check in database environment

DIA-51102: cannot change priority of a critical failure *string*

Cause: An attempt was made to change priority of a failure with CRITICAL priority.

Action: No action is required.

DIA-51103: cannot change priority of a closed failure *string*

Cause: An attempt was made to change priority of a closed failure.

Action: No action is required.

DIA-51105: cannot change priority of a failure to CRITICAL

Cause: An attempt was made to change priority of a failure to CRITICAL.

Action: No action is required.

DIA-51106: check failed to complete due to an error. See error below

Cause: While executing the check, an unexpected error occurred.

Action: Check the errors below and try rerunning the check.

DIA-51107: failures are changing too rapidly - retry command

Cause: Failures were added or closed during a Data Recovery Advisor command.

Action: Retry the command.

DIA-51108: unable to access diagnostic repository - retry command

Cause: A lock or timeout error occurred when trying to read failure or repair data from the Automatic Diagnostic Repository.

Action: Retry the command.

DIA-51109: repair script file is too large

Cause: Data Recovery Advisor generated a repair script file that was too large.

Action: Retry the command with fewer failures selected.

DIA-51110: buffer size [*string*] is too small - [*string*] is needed

Cause: An internal buffer was too small.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51111: failure revalidation timed out

Cause: Data Recovery Manager was unable to revalidate all failures before timing out.

Action: Increase timeout and retry the command.

DIA-51190: Internal error [*string*], [*string*] from DBMS_IR

Cause: An unexpected error occurred while executing a routine in the DBMS_IR package.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51191: Too many files opened

Cause: Data Recovery Advisor attempted to open too many files using the DBMS_IR package.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51192: File not open

Cause: Data Recovery Advisor attempted to read or write from a file that was not open.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51193: invalid parameter value

Cause: An invalid parameter value was supplied in a call to the DBMS_IR package.

Action: Fix the parameter value and retry the call.

DIA-51303: illegal check mask value specified

Cause: An illegal check mask value was specified.

Action: Specify one of the following legal values: COLUMN_CHECKS, ROW_CHECKS, REFERENTIAL_CHECKS, or ALL.

DIA-51316: No check meta-data found on specified table *string*

Cause: No check meta-data was found for the object

Action: Table may not exist or no checks currently defined for the table

DIA-51700: Invalid file URL

Cause: A URL with invalid syntax was provided, either directly to the function or through an XML IMPORT or INCLUDE.

Action: Check the URL.

DIA-51701: Invalid file URL or path prefix

Cause: Either a URL or path prefix with invalid syntax was provided.

Action: Check the URL.

DIA-51702: Could not find file at URL provided

Cause: The file requested could not be found in the given location.

Action: Check the URL provided.

DIA-51703: Missing <body> tag from HTML

Cause: An HTML document was passed to the function missing its <body> tag.

Action: Check the HTML source.

DIA-51704: Error *string* received from XPath engine

Cause: An error was received from the XPath library during an XPath operation.

Action: Check xmlerr.h to understand the cause of the error and correct the relevant client code.

DIA-51705: XML *string* error: *string "string"*

Cause: An error was received from an underlying XDK API and is being resignalled.

Action: Check xmlerr.h to understand the cause of the error and correct the relevant client code.

LCD-00100 to LCD-00219

LCD-00100: internal error, argument [*number*]

Cause: An internal error has occurred

Action: Report it to your System Administrator immediately

LCD-00111: value not in legal range [*string*]

Cause: The value of the parameter is outside bounds

Action: Refer to the manual for the bounds on the parameter

LCD-00112: illegal integer radix specification [*string*]

Cause: Self Explanatory

Action: valid characters are 'd', 'h', 'D' and 'H'

LCD-00113: integer conversion error or negative integer [*string*]

Cause: A bad or negative integer was assigned to an integer parameter

Action: Self explanatory

LCD-00114: illegal boolean response [*string*]

Cause: You a value than TRUE or FALSE to a boolean parameter

Action: Boolean parameters only take TRUE or FALSE

LCD-00122: unrecognized keyword [*string*]

Cause: You have misspelled the parameter name

Action: Spell the parameter name correctly

LCD-00128: invalid positional parameter value [*string*]

Cause: An invalid positional parameter value has been entered

Action: Remove the invalid positional parameter

LCD-00161: ORACLE error (possible syntax error) parameter [*string*]

Cause: Possible syntax error. Additional messages follow.

Action: Correct the parameter in error.

LCD-00201: could not open specified filename [*string*]

Cause: The file specified does not exist

Action: Create an appropriate parameter file

LCD-00203: missing keyword [*string*]

Cause: A keyword is expected but none was found

-
- Action:** Add a keyword followed by an '=' sign and a parameter value
- LCD-00204: left parenthesis and no parameter specified [string]**
Cause: A parameter list was started but no parameter was specified
Action: Add an appropriate list of values and close the parameter list
- LCD-00205: unbalanced parentheses [string]**
Cause: Self explanatory
Action: Balance the parentheses
- LCD-00206: positional parameter entered after keyword [string]**
Cause: An '=' sign is missing
Action: All keywords must be followed by '=' signs
- LCD-00207: nested parentheses encountered [string]**
Cause: Only one set of parentheses is permitted
Action: Remove the nested parentheses
- LCD-00208: unexpected keyword in value list [string]**
Cause: A keyword was found instead of a value
Action: Insert an appropriate value for the given parameter
- LCD-00209: missing value for keyword at end of string [string]**
Cause: A keyword is specified with no value
Action: Specify a valid value for the keyword
- LCD-00210: illegal assignment operator [string]**
Cause: You used a sign other than '=' to assign a keyword a value
Action: Use only the '=' sign
- LCD-00211: unexpected delimiter [string]**
Cause: An invalid delimiter was found between values
Action: A comma or a space is a valid delimiter
- LCD-00212: runaway quoted string [string]**
Cause: The parameter value was quoted on the left side but not on the right
Action: Quote the parameter value on both sides
- LCD-00215: parameter files nested too deep [string]**
Cause: Too many levels of indirection of file parameters. Maximum is 3.
Action: Reduce the level of indirection to less than 3
- LCD-00217: failure while processing file parameter [string]**
Cause: An error occurred while processing the specified file parameter
Action: Specific details will appear in other messages
- LCD-00218: error in file [string]**
Cause: An error occurred in the particular file.
Action: Refer to the other messages for the specific error.
- LCD-00219: nested include file [string] is too large**

Cause: There is a limit on the size of a parameter file, and it was exceeded. This limit is now 8192 bytes.

Action: Remove characters from the file to make it smaller, or use another level of nesting.

OCI-00601 to OCI-31199

OCI-00601: cleanup lock conflict

Cause: PMON process runs into lock conflict trying to recover processes.

Action: This is trapped internally, no action necessary.

OCI-00602: internal programming exception

Cause: Internal programming exception.

Action: Report as a bug. Caution: The following error code is not relocatable.

OCI-00972: identifier is too long

Cause: An identifier with more than 30 characters was specified.

Action: Specify at most 30 characters.

OCI-01841: (full) year must be between -4713 and +9999, and not be 0

Cause: Illegal year entered

Action: Input year in the specified range

OCI-01854: julian date must be between 1 and 5373484

Cause: An invalid Julian date was entered.

Action: Enter a valid Julian date between 1 and 5373484.

OCI-01858: a non-numeric character was found where a numeric was expected

Cause: The input data to be converted using a date format model was incorrect. The input data did not contain a number where a number was required by the format model.

Action: Fix the input data or the date format model to make sure the elements match in number and type. Then retry the operation.

OCI-01859: a non-alphabetic character was found where an alphabetic was expected

Cause: The input data to be converted using a date format model was incorrect. The input data did not contain a letter where a letter was required by the format model.

Action: Fix the input data or the date format model to make sure the elements match in number and type. Then retry the operation.

OCI-01861: literal does not match format string

Cause: Literals in the input must be the same length as literals in the format string (with the exception of leading whitespace). If the "FX" modifier has been toggled on, the literal must match exactly, with no extra whitespace.

Action: Correct the format string to match the literal.

OCI-01862: wrong number of digits for this format item

Cause: The number of digits used for this format item is not equal to the number necessary for this format when specifying Format eXact ("FX") for this item.

Action: Fill out this format item with leading zeros to the number necessary for this format. (This is generally the number of characters in the format code--DD needs 2 digits, for example. The exceptions are HH24 & HH12, which both need 2, and J, which needs 9.)

OCI-01864: the date is out of range for the current calendar

Cause: Your calendar doesn't extend to the specified date.

Action: Specify a date which is legal for this calendar.

OCI-01865: not a valid era

Cause: Era input does not match a known era.

Action: Provide a valid era on input.

OCI-01867: the interval was invalid

Cause: The character string you specified is not a valid interval.

Action: Please specify a valid interval.

OCI-01868: the leading precision of the interval was too small

Cause: The leading precision of the interval is too small to store the specified interval.

Action: Increase the leading precision of the interval or specify an interval with a smaller leading precision.

OCI-01870: the intervals or datetimes were not mutually comparable

Cause: The intervals or datetimes are not mutually comparable.

Action: Specify a pair of intervals or datetimes that are mutually comparable.

OCI-01871: the number of seconds must be less than 60

Cause: The number of seconds specified was greater than 59.

Action: Specify a value for seconds that is 59 or smaller.

OCI-01873: the leading precision of the interval was too small

Cause: The leading precision of the interval is too small to store the specified interval.

Action: Increase the leading precision of the interval or specify an interval with a smaller leading precision.

OCI-01874: time zone hour must be between -12 and 14

Cause: The time zone hour specified was not in the valid range.

Action: Specify a time zone hour between -12 and 14.

OCI-01875: time zone minute must be between -59 and 59

Cause: The time zone minute specified was not in the valid range.

Action: Specify a time zone minute between -59 and 59.

OCI-01876: year must be at least -4713

Cause: The specified year was not in range.

Action: Specify a year that is greater than or equal to -4713.

OCI-01878: specified field not found in datetime or interval

Cause: The specified field was not found in the datetime or interval.

Action: Make sure that the specified field is in the datetime or interval.

OCI-01879: the hh25 field must be between 0 and 24

Cause: The specified hh25 field was not in the valid range.

Action: Specify an hh25 field between 0 and 24.

OCI-01880: the fractional seconds must be between 0 and 999999999

Cause: The specified fractional seconds were not in the valid range.

Action: Specify a value for fractional seconds between 0 and 999999999.

OCI-01881: time zone region ID is invalid

Cause: The region ID referenced an invalid region.

Action: Contact Oracle Support Services.

OCI-01882: time zone region not found

Cause: The specified region name was not found.

Action: Contact Oracle Support Services.

OCI-01883: overlap was disabled during a region transition

Cause: The region was changing state and the overlap flag was disabled.

Action: Contact Oracle Support Services.

OCI-01884: divisor is equal to zero

Cause: An attempt was made to divide by zero.

Action: Avoid zero divisor.

OCI-01890: NLS error detected

Cause: An NLS error was detected.

Action: Look for additional error messages and take appropriate action. If there are no additional errors, call Oracle Support Services.

OCI-01898: too many precision specifiers

Cause: While trying to truncate or round dates, extra data was found in the date format picture

Action: Check the syntax of the date format picture and retry.

OCI-02083: database name has illegal character '*string*'

Cause: Supplied database name can contain only A-Z, 0-9, '_', '#', '\$' '.' and '@' characters.

Action: None

OCI-02084: database name is missing a component

Cause: Supplied database name cannot contain a leading '.', trailing '.' or '@', or two '.' or '@' in a row.

Action: None

OCI-04020: deadlock detected while trying to lock object

stringstringstringstringstring

Cause: While trying to lock a library object, a deadlock is detected.

Action: Retry the operation later.

OCI-04021: timeout occurred while waiting to lock object

stringstringstringstringstring

Cause: While waiting to lock a library object, a timeout is occurred.

Action: Retry the operation later.

OCI-04022: nowait requested, but had to wait to lock dictionary object

Cause: Had to wait to lock a library object during a nowait request.

Action: Retry the operation later.

OCI-04028: cannot generate diana for object *stringstringstringstringstring*

Cause: Cannot generate diana for an object because of lock conflict.

Action: Please report this error to your support representative.

OCI-04029: error ORA-*string* occurred when querying *stringstringstring*

Cause: The table or view being queried might be missing. The error number indicates the error.

Action: Fix the error.

OCI-04030: out of process memory when trying to allocate *string* bytes

(string,string)

Cause: Operating system process private memory has been exhausted

Action: None

OCI-04031: unable to allocate *string* bytes of shared memory

("string","string","string")

Cause: More shared memory is needed than was allocated in the shared pool.

Action: Either use the `dbms_shared_pool` package to pin large packages, reduce your use of shared memory, or increase the amount of available shared memory by increasing the value of the `init.ora` parameter `"shared_pool_size"`.

OCI-04054: database link *string* does not exist

Cause: During compilation of a PL/SQL block, an attempt was made to use a non-existent database link.

Action: Either use a different database link or create the database link.

OCI-04060: insufficient privileges to execute *string*

Cause: Attempt to execute a stored procedure without sufficient privileges.

Action: Get necessary privileges.

OCI-04061: existing state of *string* has been invalidated

Cause: Attempt to resume the execution of a stored procedure using the existing state which has become invalid or inconsistent with the stored procedure because the procedure has been altered or dropped.

Action: Try again; this error should have caused the existing state of all packages to be re-initialized.

OCI-04062: timestamp of *string* has been changed

Cause: Attempt to execute a stored procedure to serve an RPC stub which specifies a timestamp that is different from the current timestamp of the procedure.

Action: Recompile the caller in order to pick up the new timestamp.

OCI-04063: *string* has errors

Cause: Attempt to execute a stored procedure or use a view that has errors. For stored procedures, the problem could be syntax errors or references to other, non-existent procedures. For views, the problem could be a reference in the view's defining query to a non-existent table.

Action: Fix the errors and/or create referenced objects as necessary.

OCI-04064: not executed, invalidated *string*

Cause: Attempt to execute a stored procedure that has been invalidated.

Action: Recompile it.

OCI-04065: not executed, altered or dropped *string*

Cause: Attempt to execute a stored procedure that has been altered or dropped thus making it not callable from the calling procedure.

Action: Recompile its dependents.

OCI-04066: non-executable object, *string*

Cause: Attempt to execute a non-procedure.

Action: Make sure that a correct name is given.

OCI-04067: not executed, *string* does not exist

Cause: Attempt to execute a non-existent stored procedure.

Action: Make sure that a correct name is given.

OCI-04068: existing state of packages *stringstringstring* has been discarded

Cause: One of errors 4060 - 4067 when attempt to execute a stored procedure.

Action: Try again after proper re-initialization of any application's state.

OCI-19200: Invalid column specification

Cause: All input arguments must be valid columns

Action: Specify a valid list of columns

OCI-19201: Datatype not supported

Cause: The particular datatype is not supported in the XMLGEN operator

Action: Specify only supported datatypes as arguments to the XMLGEN operator

OCI-19202: Error occurred in XML processing *string*

Cause: An error occurred when processing the XML function

Action: Check the given error message and fix the appropriate problem

OCI-19203: Error occurred in DBMS_XMLGEN processing *string*

Cause: An error occurred when processing the DBMS_XMLGEN functions

Action: Check the given error message and fix the appropriate problem

OCI-19204: Non-scalar value '*string*' is marked as XML attribute

Cause: Only scalar values (i.e. values which are not of object or collection type) can be marked as XML attribute, i.e. is prefixed by '@'. In this case, a non-scalar value was prefixed with '@'

Action: Remove the '@' sign, or make the value a scalar.

OCI-19205: Attribute '*string*' qualifies a non-scalar value in the select list

Cause: The attribute immediately follows a value of object or collection type in the select list or type definition.

Action: Remove the '@' sign, or make the previous value a scalar.

OCI-19206: Invalid value for query or REF CURSOR parameter

Cause: The queryString argument passed to DBMS_XMLGEN.newContext was not a valid query, or REF CURSOR.

Action: Rewrite the query so that the queryString argument is a valid query or REF CURSOR.

OCI-19207: scalar parameter *string* of XMLELEMENT cannot have an alias.

Cause: The scalar parameter to XMLELEMENT has been qualified with an alias.

Action: Remove the AS clause of the scalar element.

OCI-19208: parameter *string* of function *string* must be aliased

Cause: The indicated parameter of the XML generation function has not been aliased, although it is an expression.

Action: Specify an alias for the expression using the AS clause.

OCI-19209: invalid or unsupported formatting argument

Cause: An invalid or unsupported formatting argument was supplied

Action: Change the formatting argument to legal supported values

OCI-19210: column '*string*', specified to be a key or update column for DBMS_XMLSTORE, does not exist in table '*string*'

Cause: The column specified using setKeyColumn()/setUpdateColumn() did not exist in the table.

Action: Change the column specified to be a column in the table

OCI-19211: column '*string*', specified as key using DBMS_XMLSTORE.setKeyColumn() , must be of scalar type

Cause: The column specified using setKeyColumn() was a non-scalar type column.

Action: Change the column specified to be a scalar column in the table

OCI-19212: no key columns specified before call to DBMS_XMLSTORE.updateXML()

Cause: No columns were specified as key columns before the call to DBMS_XMLSTORE.updateXML.

Action: Use DBMS_XMLSTORE.setKeyColumn() to specify key columns

OCI-21300: objects option not installed

Cause: The objects option is not installed at this site. Object types and other object features are, therefore, unavailable.

Action: Install the objects option. The objects option is not part of the Oracle Server product and must be purchased separately. Contact an Oracle sales representative if the objects option needs to be purchased.

OCI-21301: not initialized in object mode

Cause: This function requires the oci process to be initialized in object mode.

Action: Specify OCI_OBJECT mode when calling OCIInitialize().

OCI-21500: internal error code, arguments: *[string], [string], [string], [string], [string], [string], [string], [string], [string]*

Cause: This is the generic error number for the OCI environment (client-side) internal errors. This indicates that the OCI environment has encountered an exceptional condition.

Action: Report as a bug - the first argument is the internal error number.

OCI-21501: program could not allocate memory

Cause: The operating system has run out of memory.

Action: Take action to make more memory available to the program.

OCI-21503: program terminated by fatal error

Cause: A program is in an unrecoverable error state.

Action: Report as a bug.

OCI-21520: database server driver not installed

Cause: User attempted to access a database server through an object-mode OCI environment but the necessary driver for supporting such access to the database server is not installed or linked in.

Action: Check if the driver corresponding to the database server has been installed/linked in and entered in the server driver table.

OCI-21521: exceeded maximum number of connections in OCI (object mode only)

Cause: User exceeded the maximum number of connections (255) that can be supported by an OCI environment in object mode.

Action: Close some of existing and unused connections before opening more connections.

OCI-21522: attempted to use an invalid connection in OCI (object mode only)

Cause: User attempted to use an invalid connection or a connection that has been terminated in an OCI environment (object mode), or user attempted to dereference a REF obtained from a connection which has been terminated.

Action: Ensure that the connection exists and is still valid.

OCI-21523: functionality not supported by the server (object mode only)

Cause: User attempted to use a functionality that the server does not support.

Action: Upgrade the server

OCI-21524: object type mismatch

Cause: The object type of the object is different from what is specified.

Action: Check the type of the object and correct it.

OCI-21525: attribute number (or collection element at index) *string* violated its constraints

Cause: Attribute value or collection element value violated its constraint.

Action: Change the value of the attribute or collection element such that it meets its constraints. The constraints are specified as part of the attribute or collection element's schema information.

OCI-21526: initialization failed

Cause: The initialization sequence failed. This can happen, for example, if an environment variable such as NLS_DATE_FORMAT is set to an invalid value.

Action: Check that all NLS environment variables are well-formed.

OCI-21527: internal OMS driver error

Cause: A process has encountered an exceptional condition. This is the generic internal error number for Oracle object management services exceptions.

Action: Report this as a bug to Oracle Support Services.

OCI-21560: argument *string* is null, invalid, or out of range

Cause: The argument is expecting a non-null, valid value but the argument value passed in is null, invalid, or out of range. Examples include when the LOB/FILE positional or size argument has a value outside the range 1 through (4GB - 1), or when an invalid open mode is used to open a file, etc.

Action: Check your program and correct the caller of the routine to not pass a null, invalid or out-of-range argument value.

OCI-21562: column *string* has unsupported data type *string*

Cause: A data type was specified which is currently unsupported.

Action: Choose another data type which is supported.

OCI-21563: Error *string* while calling *string* for column *string* with datatype *string*

Cause: OCI Error encountered while performing data type conversion.

Action: Check the OCI Error code

OCI-21570: current *string* LCR has unreceived chunk data

Cause: The client did not receive all the chunk data for the current LCR.

Action: If OCIXStreamOutLCRCallbackReceive is used in your program then modify your callback functions to return OCI_CONTINUE while OCI_XSTREAM_MORE_ROW_DATA flag is set; otherwise, modify your program to call OCIXStreamOutChunkReceive until all the chunks are received (that is, the flag returned by OCIXStreamOutChunkReceive API does not have OCI_XSTREAM_MORE_ROW_DATA bit set).

OCI-21571: must provide a LOB WRITE, LOB TRIM or LOB ERASE LCR in *string* call (input LCR=*string*)

Cause: An attempt was made to invoke the specified function without providing a piece-wise LOB LCR (for example, LOB WRITE, LOB TRIM or LOB ERASE LCR).

Action: Correct the 'row_lcrp' argument in the call.

OCI-21572: Invalid LCR type (*string*) in *string* call

Cause: An attempt was made to invoke the specified function with an incorrect logical change record (LCR) type.

Action: Provide an LCR of the correct type.

OCI-21573: Invalid command type (*string*) when sending a chunk.

Cause: An attempt was made to send a chunk when the command type for the current LCR was not INSERT, UPDATE, or LOB WRITE.

Action: Check your program and provide an LCR with a valid command type to OCIXStreamInChunkSend call or to OCICallbackXStreamInChunkCreate callback.

OCI-21574: Invalid data type (*string*) specified for LOB chunk.

Cause: Invalid data type specified for LOB chunk in OCIXStreamInChunkSend call.

Action: Check your program and provide either `SQLT_CHR` or `SQLT_BIN` for 'coldty' argument to `OCIXStreamInChunkSend` call.

OCI-21577: Input *string* LCR has no LOB column.

Cause: An attempt was made to invoke `OCILCRlobInfoGet` call with an LCR that had no LOB column.

Action: Replace the input LCR to `OCILCRlobInfoGet` call.

OCI-21578: Only one LOB column allowed per *string* LCR.

Cause: An attempt was made to set multiple LOB columns on a piece-wise LOB LCR.

Action: Check your program and make sure `OCIXStreamInChunkSend` is called for only one column per piece-wise LOB LCR.

OCI-21579: Input LCR must have at least one old or new column.

Cause: An attempt was made to call `OCIXStreamInChunkSend` with an LCR that had empty column lists.

Action: Use `OCILCRRowColumnInfoSet` to add one or more columns to the input LCR before calling `OCIXStreamInChunkSend`.

OCI-21580: The LOB operation length (value=*string*) for column (*string*) must be an even number of bytes.

Cause: An attempt was made to call `OCIXStreamInChunkSend` with an odd number of bytes for a column flagged as `AL16UTF16` or `NCLOB`.

Action: Correct either the LOB column length or 'column_flag' argument to `OCIXStreamInChunkSend` call.

OCI-21583: invalid XStream server name '*string*'

Cause: An attempt was made to attach to an XStream server with a nonexistent server name.

Action: Correct the server name in the attach call.

OCI-21600: path expression too long

Cause: The path expression that is supplied by the user is too long. The path expression is used to specify the position of an attribute in an object. This error occurs when one of the intermediate elements in the path expression refers to an attribute of a built-in type. Thus, the OCI function cannot proceed on to process the rest of the elements in the path expression.

Action: User should pass in the correct path expression to locate the attribute.

OCI-21601: attribute is not an object

Cause: The user attempts to perform an operation (that is valid only for an object) to an attribute of a built-in type. An example of such an illegal operation is to dynamically set a null structure to an attribute of a built-in type.

Action: User should avoid performing such operation to an attribute of built-in type.

OCI-21602: operation does not support the specified typecode

Cause: The user attempts to perform an operation that does not support the specified typecode.

Action: User should use the range of valid typecodes that are supported by this operation.

OCI-21603: property id [*string*] is invalid

Cause: The specified property id is invalid.

Action: User should specify a valid property id. Valid property ids are enumerated by OCIObjectPropId.

OCI-21604: property [*string*] is not a property of transient or value instances

Cause: Trying to get a property which applies only to persistent objects.

Action: User should check the lifetime and only get this property for persistent objects.

OCI-21605: property [*string*] is not a property of value instances

Cause: Trying to get a property which applies only to persistent and transient objects.

Action: User should check the lifetime and only get this property for persistent and transient objects.

OCI-21606: can not free this object

Cause: Trying to free an object that is persistent and dirty and the OCI_OBJECTFREE_FORCE flag is not specified.

Action: Either flush the persistent object or set the flag to OCI_OBJECTFREE_FORCE

OCI-21607: memory cartridge service handle not initialized

Cause: Attempt to use the handle without initializing it.

Action: Initialize the memory cartridge service handle.

OCI-21608: duration is invalid for this function

Cause: Attempt to use a duration not valid for this function.

Action: Use a valid duration - a previously created user duration or OCI_DURATION_STATEMENT or OCI_DURATION_SESSION. For callout duration or external procedure duration, use OCIExtProcAllocCallMemory.

OCI-21609: memory being resized without being allocated first

Cause: Attempt to resize memory without allocating it first.

Action: Allocate the memory first before resizing it.

OCI-21610: size [*string*] is invalid

Cause: Attempt to resize memory with invalid size.

Action: Pass in a valid size (must be a positive integer).

OCI-21611: key length [*string*] is invalid

Cause: Attempt to use an invalid key length.

Action: Key length is invalid and valid range is 0 to 64

OCI-21612: key is already being used

Cause: Attempt to use a key that is already used.

Action: Use a new key that is not yet being used.

OCI-21613: key does not exist

Cause: Attempt to use a non-existent key

Action: Use a key that already exists.

OCI-21700: object does not exist or is marked for delete

Cause: User attempted to perform an inappropriate operation to an object that is non-existent or marked for delete. Operations such as pinning, deleting and updating cannot be applied to an object that is non-existent or marked for delete.

Action: User needs to re-initialize the reference to reference an existent object or the user needs to unmark the object.

OCI-21701: attempt to flush objects to different servers

Cause: User attempted to flush objects to different servers in one function call. These objects are obtained by calling a callback functions provided by the program.

Action: User should avoid performing such operation.

OCI-21702: object is not instantiated or has been de-instantiated in cache

Cause: User attempted to perform an inappropriate operation to a transient object that is not instantiated in the object cache. Operations that cannot be applied to a not-instantiated transient object include deleting or pinning such an object.

Action: User should check their code to see if they are performing such an operation without instantiating the object first, or performing such an operation after the allocation duration of the object has expired.

OCI-21703: cannot flush an object that is not modified

Cause: See the error message.

Action: The object should not be flushed.

OCI-21704: cannot terminate cache or connection without flushing first

Cause: See the error message.

Action: The transaction should be aborted or committed before terminating the cache or connection.

OCI-21705: service context is invalid

Cause: The service context that is supplied by the user is not valid.

Action: User needs to establish the service context.

OCI-21706: duration does not exist or is invalid

Cause: The duration number that is supplied by the user is not valid.

Action: User needs to establish the duration or use a correct predefined duration.

OCI-21707: pin duration is longer than allocation duration

Cause: The pin duration supplied by the user is longer than the allocation duration. This affects operations such as pinning and setting default parameters.

Action: User should use a shorter pin duration or use the null duration.

OCI-21708: inappropriate operation on a transient object

Cause: User attempted to perform an inappropriate operation on a transient object. Operations that cannot be applied to a transient object include flushing and locking.

Action: User should avoid performing such operation on a transient object.

OCI-21709: cannot refresh an object that has been modified

Cause: User attempted to refresh an object that has been marked for delete, update or insert (new).

Action: User should unmark the object before refreshing it.

OCI-21710: argument is expecting a valid memory address of an object

Cause: The object memory address that is supplied by the user is invalid. The user may have passed in a bad memory address to a function that is expecting a valid memory address of an object.

Action: User should pass in a valid memory address of an object to the function.

OCI-21779: duration not active

Cause: User is trying to use a duration that has been terminated.

Action: User should avoid performing such operation.

OCI-22053: overflow error

Cause: This operation's result is above the range of Oracle number.

Action: Decrease the input value(s) so that the result is in the range of Oracle number.

OCI-22054: underflow error

Cause: This operation's result is below the range of Oracle number.

Action: Increase the input value(s) so that the result is in the range of Oracle number.

OCI-22055: unknown sign flag value [*string*]

Cause: Signed flag used is not OCI_NUMBER_SIGNED or OCI_NUMBER_UNSIGNED.

Action: Use either OCI_NUMBER_SIGNED or OCI_NUMBER_UNSIGNED as sign flag.

OCI-22056: value [*string*] is divided by zero

Cause: Given value is divided by zero.

Action: Modify divisor value to be non-zero.

OCI-22057: bad integer length [*string*]

Cause: The length of the integer (ie number of bytes) to be converted to or from an Oracle number is invalid.

Action: Use integer length 1, 2, 4 or 8 bytes only.

OCI-22059: buffer size [*string*] is too small - [*string*] is needed

Cause: The buffer to hold the resulting text string is too small.

Action: Provide a buffer of the required size.

OCI-22060: argument [*string*] is an invalid or uninitialized number

Cause: An invalid or uninitialized number is passed in.

Action: Use a valid number. To initialize number call OCINumberSetZero().

OCI-22061: invalid format text [*string*]

Cause: The numeric format string for converting characters to or from an Oracle number is invalid.

Action: Use valid format string as documented in OCI Programmer's Guide.

OCI-22062: invalid input string [*string*]

Cause: The text string for converting to numbers is invalid.

Action: Use a valid input string as documented in OCI Programmer's Guide.

OCI-22063: reading negative value [*string*] as unsigned

Cause: Attempt to convert a negative number to an unsigned integer.

Action: Use the sign flag ORLTSB to convert a signed number.

OCI-22064: invalid NLS parameter string [*string*]

Cause: The NLS parameter string for converting characters to or from an Oracle number is invalid.

Action: Use valid format string as documented in OCI Programmer's Guide.

OCI-22065: number to text translation for the given format causes overflow

Cause: Rounding done due to the given string format causes overflow.

Action: Change the format such that overflow does not occur.

OCI-22130: buffer size [*string*] is less than the required size [*string*]

Cause: The size of the buffer into which the hexadecimal REF string is to be written is too small.

Action: Provide a buffer of the required size.

OCI-22131: hexadecimal string length is zero

Cause: The given hexadecimal string length must be greater than zero.

Action: Specify a length greater than zero.

OCI-22132: hexadecimal string does not correspond to a valid REF

Cause: The given hexadecimal string is invalid.

Action: Provide a valid hexadecimal string which was previously returned by a call to OCIRefToHex().

OCI-22140: given size [*string*] must be in the range of 0 to [*string*]

Cause: The given resize size is invalid.

Action: Ensure that the given size is in the required range.

OCI-22141: given size [*string*] must be even in UTF-16 environment

Cause: The given resize size is odd. In a UTF-16 environment, all characters are 2 bytes in length.

Action: Ensure that the given size is even.

OCI-22150: variable-length array has not been initialized

Cause: An un-initialized variable-length array is being operated upon.

Action: Initialize the variable-length array prior to calling this function.

OCI-22151: cannot resize non-zero variable-length array to zero elements

Cause: Trying to resize a non-zero variable-length array to 0 elements.

Action: Specify a non-zero size.

OCI-22152: destination variable-length array is not initialized

Cause: The variable-length array on the right-hand-side of an assignment or the destination array of an append is not initialized.

Action: Initialize the destination variable-length array prior to calling this function.

OCI-22153: source variable-length array is not initialized

Cause: The variable-length array on the left-hand-side of an assignment or the source array of an append is not initialized.

Action: Initialize the destination variable-length array prior to calling this function.

OCI-22160: element at index [*string*] does not exist

Cause: Collection element at the given index does not exist.

Action: Specify the index of an element which exists.

OCI-22161: type code [*string*] is not valid

Cause: Given type code is not valid.

Action: Use one of the typecodes enumerated in OCITypeCode.

OCI-22162: element at index [*string*] has been previously deleted

Cause: Trying to delete a non-existent collection element.

Action: Check for the existence of the element prior to calling this function.

OCI-22163: left hand and right hand side collections are not of same type

Cause: Left hand and right side collections are not of same type.

Action: Ensure that the same collection type is passed for both left hand and right hand side of this function.

OCI-22164: delete element operation is not allowed for variable-length array

Cause: Trying to delete an element of a variable-length array.

Action: Ensure that the collection is not a variable-length array prior to calling this function.

OCI-22165: given index [*string*] must be in the range of [*string*] to [*string*]

Cause: Given index is not in the required range.

Action: Ensure that the given index is in the required range.

OCI-22166: collection is empty

Cause: Given collection is empty.

Action: Test if collection is empty prior to invoking this function.

OCI-22167: given trim size [*string*] must be less than or equal to [*string*]

Cause: Given trim size is greater than the current collection size.

Action: Ensure that the given size is less than or equal to the collection size prior to calling this function.

OCI-22275: invalid LOB locator specified

Cause: There are several causes: (1) the LOB locator was never initialized; (2) the locator is for a BFILE and the routine expects a BLOB/CLOB/NCLOB locator; (3) the locator is for a BLOB/CLOB/NCLOB and the routine expects a BFILE locator; (4) trying to update the LOB in a trigger body -- LOBs in trigger bodies are read only.

Action: For (1), initialize the LOB locator by selecting into the locator variable or by setting the LOB locator to empty. For (2) and (3), pass the correct type of locator into the routine. For (4), remove the trigger body code that updates the LOB value.

OCI-22276: invalid locator for LOB buffering

Cause: There are several causes: (1) the locator was never enabled for buffering (2) it is not an updated locator but is being used for a write/flush operation

Action: For (1) enable the locator for buffering; (2) ensure that only an updated locator is used for a LOB update operation

OCI-22277: cannot use two different locators to modify the same LOB

Cause: LOB buffering is enabled and an attempt was made to modify the LOB using two different LOB locators.

Action: When using LOB buffering, modify the LOB through one LOB locator only.

OCI-22278: must update the LOB only through the LOB buffers

Cause: LOB buffering is enabled for this LOB and there are buffers for this LOB in the buffer pool. Thus, updating the LOB through means other than the LOB buffers is not allowed.

Action: Update the LOB through the LOB buffers using the locator that has LOB buffering enabled. If this operation is required, buffers associated with this LOB should either be flushed as necessary or buffering should be disabled. Once this is done, reissue the command.

OCI-22279: cannot perform operation with LOB buffering enabled

Cause: The operation attempted is not allowed when LOB buffering is enabled.

Action: If the operation is required, LOB buffering should not be used. In this case, flush buffers associated with the input LOB locator as necessary, disable buffering on the input LOB locator and reissue the command.

OCI-22280: no more buffers available for operation

Cause: There are two causes: (1) All buffers in the buffer pool have been used up by previous operations (2) Attempt to flush a LOB without any previous buffered update operations.

Action: For (1), flush the LOB(s) through the locator that is being used to update the LOB. For (2), write to the LOB through a locator enabled for buffering before attempting to flush buffers.

OCI-22281: cannot perform operation with an updated locator

Cause: The input locator has buffering enabled and was used to update the LOB value through the LOB buffering subsystem. The modified buffer has not been flushed since the write that was performed by the the input locator; thus, the input locator is considered an updated locator. Updated locators cannot be the source of a copy operation. Only one locator per LOB may be used to modify the LOB value through the LOB buffering subsystem.

Action: Depending on whether the modifications made through the input locator to the LOB buffering subsystem should be written to the server, either flush the buffer to write the modifications, or, disable buffering on the locator to discard the modifications. Then, reissue the command.

OCI-22282: non-contiguous append to a buffering enabled LOB not allowed

Cause: The buffered write operation has an input offset value more than one byte or character past the end of the LOB.

Action: Specify an input offset value which is exactly one character or byte greater than the length of the LOB that you are attempting to update through a buffered write operation.

OCI-22285: non-existent directory or file for *string* operation

Cause: Attempted to access a directory that does not exist, or attempted to access a file in a directory that does not exist.

Action: Ensure that a system object corresponding to the specified directory exists in the database dictionary, or make sure the name is correct.

OCI-22286: insufficient privileges on directory or file to perform *string* operation

Cause: The user does not have the necessary access privileges on the directory alias and/or the file for the operation.

Action: Ask the database/system administrator to grant the required privileges on the directory alias and/or the file.

OCI-22287: invalid or modified directory occurred during *string* operation

Cause: The directory alias used for the current operation is not valid if being accessed for the first time, or has been modified by the DBA since the last access.

Action: If you are accessing this directory for the first time, provide a valid directory name. If you have been already successful in opening a file under this directory before this error occurred, then close the file and retry the operation with a valid directory alias as modified by your DBA. Oracle recommends that directories should be modified only during quiescent periods.

OCI-22288: file operation *string* failed *string*

Cause: The operation attempted on the file failed.

Action: See the next error message for more detailed information. Also, verify that the file exists and that the necessary privileges are set for the specified operation. If the error still persists, report the error to the DBA.

OCI-22289: cannot perform *string* operation on an unopened file

Cause: The file is not open for the required operation to be performed.

Action: Check that the current operation is preceded by a successful file open operation.

OCI-22290: operation would exceed the maximum number of opened files

Cause: The number of open files has reached the maximum limit.

Action: Close some of the opened files and retry the operation.

OCI-22303: type "*string*"."*string*" not found

Cause: The user is trying to obtain information for a type that cannot be found.

Action: Check that the schema is correct and that the type has been created correctly.

OCI-22305: attribute/method/parameter "*string*" not found

Cause: Type element with the given name is not found in the type.

Action: Check to make sure that the type element exists.

OCI-22306: type "*string*"."*string*" already exists

Cause: The user is trying to create a type that already exists.

Action: Check to make sure that the type has not been created prior to this.

OCI-22307: type to alter is not a user-defined type

Cause: The user is trying to alter a built-in type.

Action: Check to make sure that only user-defined types are being altered.

OCI-22309: attribute with name "*string*" already exists

Cause: The user is attempting to create an object type where more than one attributes have the same name.

Action: Check to make sure that all attribute names are unique.

OCI-22311: type for attribute "*string*" does not exist

Cause: The type of the attribute does not exist.

Action: No types were created/modified for this DDL transaction. Redo the DDL transaction and add the creation of the attribute's type in the DDL transaction.

OCI-22313: cannot use two versions of the same type "*string*"

Cause: The version of this type conflicts with the version of this type used by another library that was linked in with the application. An application may only use one version of a type.

Action: Check that the libraries being linked with this application and use the same versions of the type.

OCI-22314: method information mismatch in ALTER TYPE

Cause: The number of methods or the method signature do not match that of the original type declaration. This is not supported.

Action: Make sure the method signature stay identical for the previously declared method. Do not drop existing methods.

OCI-22315: type "*string*" does not contain a map or order function

Cause: The input type does not contain a map or order function so one cannot be returned.

Action: Add a map or order function to the type or catch this error.

OCI-22316: input type is not a collection type

Cause: The user is trying to obtain information for collection types on a non-named collection type.

Action: Use a named collection type for the function.

OCI-22317: typecode *number* is not legal as a number type

Cause: The user is trying to use a number typecode that is not valid.

Action: Use only OCI_TYPECODE_SMALLINT, OCI_TYPECODE_INTEGER, OCI_TYPECODE_REAL, OCI_TYPECODE_DOUBLE, OCI_TYPECODE_FLOAT, OCI_TYPECODE_NUMBER, or OCI_TYPECODE_DECIMAL.

OCI-22318: input type is not an array type

Cause: The user is trying to obtain the number of elements for a non-array type.

Action: Pass in only a named collection type which is an array.

OCI-22319: type attribute information altered in ALTER TYPE

Cause: The type attribute information does not match that of the original type declaration when altering type. Attributes cannot be altered during ALTER TYPE. Only new methods can be added.

Action: Check that all type alterations are legal.

OCI-22321: method does not return any result

Cause: OCITypeResult() was called on a method that does not return any results.

Action: Check that you are passing in the correct method descriptor, or that your method creation was done correctly.

OCI-22337: the type of accessed object has been evolved

Cause: The type of the accessed object has been altered and the client's object is based on an earlier type definition.

Action: The user needs to exit application and modify application to accommodate the type change. From SQL/PLUS, reconnect and resubmit statement.

OCI-22369: invalid parameter encountered in method *string*

Cause: An invalid parameter is being passed to this method of SYS.RowType or SYS.RowSet.

Action: Check the parameters being passed to this method and make sure that the parameters are allowed.

OCI-22370: incorrect usage of method *string*

Cause: This method of SYS.RowType or SYS.RowSet is being used inappropriately.

Action: Check the documentation for correct usage.

OCI-22600: encountered 8.0.2 (Beta) VARRAY data that cannot be processed

Cause: Production Oracle8 (8.0.3 and beyond) encounters some VARRAY data which was created and stored by Oracle8 8.0.2 (Beta 2). Production Oracle8 cannot understand or process such VARRAY data.

Action: Delete the VARRAY data from the table by dropping the table, deleting the rows, or nulling out the VARRAY columns, and then re-insert the VARRAY data. There is no provided script or tool to help automate this conversion.

OCI-22601: pickler TDS context [*string*] is not initialized

Cause: Attempt to use the pickler TDS context without initializing it.

Action: Use OCIPicklerTdsCtxInit to initialize the context.

OCI-22602: pickler TDS handle [*string*] is not well-formed

Cause: Attempt to use the pickler TDS handle without initializing/ constructing it.

Action: Use OCIPicklerTdsInit to initialize the handle before it is constructed. Use OCIPicklerTdsGenerate to generate the TDS before its attributes can be accessed.

OCI-22603: cannot add an attribute to the already generated TDS handle

Cause: Attempt to add an attribute to the already constructed TDS.

Action: Use a TDS handle that is initialized but not yet constructed.

OCI-22604: TDS handle already generated

Cause: Attempt to generate TDS that is already generated.

Action: Use a TDS handle that is initialized but not yet generated.

OCI-22605: FDO handle [*string*] is not initialized

Cause: Attempt to use an uninitialized FDO handle.

Action: Use OCIPicklerFdoInit to initialize FDO handle".

OCI-22606: pickler image handle [*string*] is not well-formed

Cause: Attempt to use the image handle without initializing/ constructing it.

Action: Use OCIPicklerImageInit to initialize the handle before it is constructed. Use OCIPicklerImageGenerate to generate the image before its attributes can be accessed.

OCI-22607: image handle already generated

Cause: Attempt to generate image that is already generated.

Action: Use a image handle that is initialized but not yet generated.

OCI-22608: cannot add an attribute to the already generated image handle

Cause: Attempt to add an attribute to the already constructed image.

Action: Use an image handle that is initialized but not yet constructed.

OCI-22609: error *string* during initialization of FDO

Cause: Error during FDO initialization.

Action: Take an action based on the specified error.

OCI-22626: Type Mismatch while constructing or accessing OCIAnyData

Cause: Type supplied is not matching the type of the AnyData. If piece wise construction or access is being attempted, the type supplied is not matching the type of the current attribute.

Action: Make sure the type supplied matches the type of object to be constructed or accessed.

OCI-22975: cannot create a PRIMARY KEY-based REF to this object view

Cause: The object view specified in the MAKE_REF function does not have a PRIMARY KEY-based object identifier. A PRIMARY KEY-based REF cannot be created for such a view.

Action: Specify an object view that has a PRIMARY KEY-based object identifier in the MAKE_REF function.

OCI-22976: incorrect number of arguments to MAKE_REF

Cause: Number of arguments for MAKE_REF is different from the number of PRIMARY KEY attributes of the object view.

Action: Specify all the necessary arguments for MAKE_REF.

OCI-30100: internal error [*number*]

Cause: An internal error has occurred.

Action: Contact Oracle Worldwide Support and report the error.

OCI-30101: unknown parameter name '*string*'

Cause: You have misspelled the parameter name.

Action: Spell the parameter name correctly.

OCI-30102: '*string*' is not in the legal range for '*string*'

Cause: The value of the parameter is not within the legal range.

Action: Refer to the manual for the allowable values for this parameter.

OCI-30103: '*string*' contains an illegal integer radix for '*string*'

Cause: An illegal integer radix specification was found.

Action: Only 'd', 'h', 'D', and 'H' may be used as radix specifications.

-
- OCI-30104: 'string' is not a legal integer for 'string'**
Cause: The value is not a valid integer.
Action: Specify only valid integers for this parameter.
- OCI-30105: 'string' is not a legal boolean for 'string'**
Cause: The value is not a valid boolean.
Action: Refer to the manual for allowable boolean values.
- OCI-30107: parameter name abbreviation 'string' is not unique**
Cause: The abbreviation given was not unique.
Action: Use a longer abbreviation to make the parameter name unique.
- OCI-30108: invalid positional parameter value 'string'**
Cause: An invalid positional parameter value has been entered.
Action: Remove the invalid positional parameter.
- OCI-30109: could not open parameter file 'string'**
Cause: The parameter file does not exist.
Action: Create an appropriate parameter file.
- OCI-30110: syntax error at 'string'**
Cause: A syntax error was detected.
Action: Change the input so that the correct syntax is used.
- OCI-30111: no closing quote for value 'string'**
Cause: A quoted string was begun but not finished.
Action: Put a closing quote in the proper location.
- OCI-30112: multiple values not allowed for parameter 'string'**
Cause: You attempted to specify multiple values for a parameter which can take only one value.
Action: Do not specify more than one value for this parameter.
- OCI-30113: error when processing file 'string'**
Cause: A problem occurred when processing this file.
Action: Examine the additional error messages and correct the problem.
- OCI-30114: error when processing from command line**
Cause: A problem occurred when processing the command line.
Action: Examine the additional error messages and correct the problem.
- OCI-30115: error when processing an environment variable**
Cause: A problem occurred when processing an environment variable.
Action: Examine the additional error messages and correct the problem.
- OCI-30116: syntax error at 'string' following 'string'**
Cause: A syntax error was detected.
Action: Change the input so that the correct syntax is used.
- OCI-30117: syntax error at 'string' at the start of input**
Cause: A syntax error was detected.

-
- Action:** Change the input so that the correct syntax is used.
- OCI-30118: syntax error at '*string*' at the end of input**
Cause: A syntax error was detected.
Action: Change the input so that the correct syntax is used.
- OCI-30119: unable to obtain a valid value for '*string*'**
Cause: No valid value was obtained for this parameter.
Action: Rerun the application and enter a valid value.
- OCI-30120: '*string*' is not a legal oracle number for '*string*'**
Cause: The value is not a valid oracle number.
Action: Refer to the manual for allowable oracle number values.
- OCI-30121: '*string*' is not an allowable value for '*string*'**
Cause: The value is not a legal value for this parameter.
Action: Refer to the manual for allowable values.
- OCI-30122: value '*string*' for '*string*' must be between '*number*' and '*number*'**
Cause: The value of the parameter is not within the legal range.
Action: Specify a value that is within the legal range.
- OCI-30129: invalid function argument received**
Cause: A function received an invalid argument
Action: Check function calls, make sure correct arguments are being passed.
- OCI-30130: invalid parameter key type received**
Cause: A function received an invalid parameter key type
Action: Check parameter key types in function calls
- OCI-30131: number of keys being set exceeds allocation**
Cause: Number of parameter keys being set exceeds allocation
Action: Reduce the number of keys being set or increase allocation
- OCI-30132: invalid key index supplied**
Cause: The key index specified was not within bounds
Action: Change key index to ensure it lies within bounds
- OCI-30135: OCI Thread operation fails**
Cause: An OCI Thread function call has failed.
Action: Check the function call to make sure that the correct parameters are being passed and take the appropriate action.
- OCI-30150: Invalid argument passed to OCIFile function**
Cause: An invalid argument is passed to the OCIFile function. The most common cause is that a NULL pointer is passed where a non-NULL pointer is expected.
Action: Make sure that the values passed as arguments are valid. Esp check for NULL pointers.
- OCI-30151: File already exists**
Cause: Tried to open a file with OCI_FILE_EXCL flag and the file already exists.

Action: OCIFile is supposed throw this exception in this case.

OCI-30152: File does not exist

Cause: The OCIFile function requires the file to exist, but it does not.

Action: Make sure that the file exists.

OCI-30153: An invalid File Object is passed to the OCIFile function

Cause: An invalid File Object is passed to the OCIFile function.

Action: Make sure that the file object is a valid one. Create a new file object by calling OCIFileOpen if needed.

OCI-30154: The memory address given as buffer for OCIFileRead/Write is invalid

Cause: An invalid memory address is given as the buffer pointer for OCIFileRead/Write.

Action: Make sure that the required memory is allocated and pass a valid memory address as buffer pointer.

OCI-30155: An I/O Error occured during an OCIFile function call

Cause: An I/O error occurred at the system level.

Action: This is a system error and the action will depend on the error.

OCI-30156: Out of disk space

Cause: The disks associated with the underlying file system are full.

Action: Create more disk space.

OCI-30157: An invalid argument was given to operating system call

Cause: The OS call was called with an invalid argument.

Action: Check the values passed. If unsuccessful to solve the problem contact ORACLE support.

OCI-30158: The OCIFileWrite causes the file to exceed the maximum allowed size

Cause: There is no space to write to the file. Its size is at the maximum limit.

Action: Up to the user.

OCI-30159: OCIFileOpen: Cannot create the file or cannot open in the requested mode

Cause: The create flag was specified in OCIFileOpen such that the file was to be created. But unable to do so. Or the file already exists and the permissions on it doesn't allow the file to be opened in in the requested open mode

Action: Check whether the user has permissions to create the specified file or if the file exists whether the permissions on it allow the requested open mode.

OCI-30160: Unable to access the file

Cause: The function was unable to access the existing the file.

Action: Check if the user has the required permissions on the file.

OCI-30161: A system error occurred during the OCIFile function call

Cause: A system error occurred while executing the OCIFile function.

Action: Depend on the error.

OCI-30162: The OCIFile context is not initialized

Cause: The function OCIFileInit need to be called before calling any other OCIFile function to initialize the OCIFile context.

Action: Call the function OCIFileInit need to be called before calling any other OCIFile function.

OCI-30163: The thread safety initialization failed

Cause: The call to SlgInit failed in OCIFileInit.

Action: Contact support

OCI-30175: invalid type given for an argument

Cause: There is an argument with an invalid type in the argument list.

Action: Use the correct type wrapper for the argument.

OCI-30176: invalid format code used in the format string

Cause: There is an invalid format code in the format string.

Action: Replace the invalid format code with a valid one.

OCI-30177: invalid flag used in a format specification

Cause: There is an invalid flag in a format specification.

Action: Replace the invalid flag with a valid one.

OCI-30178: duplicate flag used in a format specification

Cause: There is a duplicate flag in a format specification.

Action: Remove the duplicate flag.

OCI-30179: invalid argument index used in a format code

Cause: Zero or negative argument index or index not following (."

Action: Replace the invalid argument index with a valid one.

OCI-30180: argument index is too large

Cause: An argument index exceeds actual number of arguments supplied.

Action: Fix format string or pass additional arguments.

OCI-30181: integer in argument index is not immediately followed by)

Cause: Missing closing parenthesis in argument index.

Action: Fix the format specification.

OCI-30182: invalid precision specifier

Cause: Period in format specification not followed by valid format.

Action: Replace the invalid precision specifier with a valid one.

OCI-30183: invalid field width specifier

Cause: Invalid field width supplied.

Action: Replace the invalid field width with a valid one.

OCI-30184: argument type not compatible with a format code

Cause: Bad argument type given for a format code.

Action: Make format and arguments be compatible.

OCI-30185: output too large to fit in the buffer

Cause: The buffer is not large enough to hold the entire output string.

Action: Fix the buffer size and length passed in.

OCI-30191: missing argument list

Cause: No argument list supplied.

Action: Modify the argument list to have at least OCIFormatEnd in it.

OCI-30930: XML node '*string*' (type=*string*) does not support this operation

Cause: The given node's type is not supported for this operation. For example, trying to add children to an attribute node, or passing in a document node as a child, are unsupported operations.

Action: Use a valid node type for the operation.

OCI-30931: Element '*string*' cannot contain mixed text

Cause: XML elements must be declared mixed to contain multiple text nodes

Action: Declare this element type as mixed in its schema

OCI-30932: Reference node '*string*' not contained in specified parent node '*string*'

Cause: When using a reference node, it must have the specified parent node

Action: Use a node in the specified parent as the reference

OCI-30933: Element '*string*' may not appear at this point within parent '*string*'

Cause: The ordering specified by the content model of the parent does not allow for this element to occur at this position.

Action: Reorder the child elements to conform with the content model of the parent element

OCI-30934: '*string*' (*string* node) cannot be inserted in parent '*string*' (*string* node)

Cause: The schema does not allow a child node of this type to be inserted into a parent node of this type. For example, only element nodes may only be inserted into a document

Action: Insert only child nodes that make sense for this node type

OCI-30935: XML maxoccurs value (*string*) exceeded

Cause: An attempt was made to insert more than maxoccurs values into a schema-based XML document.

Action: Do not insert more than maxoccurs values into the document.

OCI-30936: Maximum number (*string*) of '*string*' XML node elements exceeded

Cause: An attempt was made to insert more than the allowed number of elements (specified by the maxoccurs facet) into an XML document.

Action: Do not attempt to add more than the maximum number of elements to XML documents.

OCI-30937: No schema definition for '*string*' (namespace '*string*') in parent '*string*'

Cause: The schema definition for the parent node being processed does not allow for the specified child node in its content model. Note that any typecasting via `xsi:type` must occur before the schema definitions for the new type can be used.

Action: Only insert elements and attributes declared in the schema. Check to make sure that `xsi:type` (if used) is specified first.

OCI-30938: No prefix defined for namespace '*string*' (particle *string*)

Cause: An XML namespace mapping (xmlns:<prefix>=<namespace URL>) must be defined for each particle (element or attribute) stored in an schema-constrained XMLType document.

Action: Add an xmlns attribute definition (attribute name="xmlns:prefix" and value="namespace URL") to the current XMLType document. The safest place to add this attribute is in the root node of the document to ensure that the mapping will be in scope.

OCI-30939: Order violation: Element '*string*' may not follow element '*string*'

Cause: The XML schema specifies a content model that is sequential, where the order of nodes in the instance must follow the order specified by the schema, and this instance relies on the schema validity to avoid maintaining instance order information

Action: Insert elements only in the order specified in the schema

OCI-30940: Cannot resolve prefix '*string*' for QName node '*string*'

Cause: An attempt was made to store a QName value without having a valid namespace in scope for that prefix.

Action: Declare the namespace for the prefix used

OCI-30941: Cannot specify empty URI for non-default namespace '*string*'

Cause: An attempt was made to insert a namespace declaration for a non-default namespace using an empty URI string.

Action: Specify a non-empty URI for namespace declarations other than the default namespace.

OCI-30942: XML Schema Evolution error for schema '*string*' table *string* column '*string*'

Cause: The given XMLType table/column which conforms to the given schema had errors during evolution. For more information, see the more specific error below this one

Action: Based on the schema, table and column information in this error and the more specific error below, take corrective action

OCI-30943: XML Schema '*string*' is dependent on XML schema '*string*'

Cause: Not all dependent schemas were specified and/or the schemas were not specified in dependency order, i.e., if schema S1 is dependent on schema S, S must appear before S1.

Action: Include the previously unspecified schema in the list of schemas and/or correct the order in which the schemas are specified. Then retry the operation.

OCI-30944: Error during rollback for XML schema '*string*' table *string* column '*string*'

Cause: The given XMLType table/column which conforms to the given schema had errors during a rollback of XML schema evolution. For more information, see the more specific error below this one

Action: Based on the schema, table and column information in this error and the more specific error below, take corrective action

OCI-30945: Could not create mapping table '*string*'

Cause: A mapping table could not be created during XML schema evolution. For more information, see the more specific error below this one

Action: Ensure that a table with the given name does not exist and retry the operation

OCI-30946: XML Schema Evolution warning: temporary tables not cleaned up

Cause: An error occurred after the schema was evolved while cleaning up temporary tables. The schema evolution was successful

Action: If the user needs to remove the temporary tables, use the mapping table to get the temporary table names and drop them.

OCI-30951: Element or attribute at Xpath *string* exceeds maximum length

Cause: An attempt was made to insert a node of length exceeding the maximum length (specified by the maxLength facet) into an XML document.

Action: Do not attempt to add a node exceeding the maximum length to XML documents.

OCI-30990: insufficient privileges to change owner of resource *string*

Cause: An attempt was made to change the <Owner> field of an XML DB resource without sufficient privileges to do so.

Action: Switch to SYS before performing the ownership change, or have the intended recipient of the resource perform the transfer.

OCI-30991: cannot use DOM to add special attribute to schema-based parent

Cause: An attempt was made to add or remove an xsi:schemaLocation, xsi:noNamespaceSchemaLocation, xsi:type, or xsi:nil attribute to or from a schema-based XML node using DOM.

Action: Use the updateXML operator instead of DOM.

OCI-31000: Resource '*string*' is not an XDB schema document

Cause: The given schema URL does not refer to a registered XDB schema

Action: Make sure the specified schema has been registered in XDB

OCI-31001: Invalid resource handle or path name "*string*"

Cause: An invalid resource handle or path name was passed to the XDB hierarchical resolver.

Action: Pass a valid resource handle or path name to the hierarchical resolver.

OCI-31002: Path name *string* is not a container

Cause: XDB expected the given path name to represent a container.

Action: Pass a path name or resource handle that represents a container.

OCI-31003: Parent *string* already contains child entry *string*

Cause: An attempt was made to insert a duplicate child into the XDB hierarchical resolver.

Action: Insert a unique name into the container.

OCI-31004: Length *string* of the BLOB in XDB\$H_INDEX is below the minimum *string*

Cause: In the XDB\$H_INDEX table, the CHILDREN column, a BLOB, must have a certain minimum length without being chained. The calculated length of the LOB was less than the stated minimum.

Action: Set the value of the init.ora parameter db_block_size to at least 2K. For XDB to run at its fastest, set db_block_size to 8K.

OCI-31005: Path name length *string* exceeds maximum length *string*

Cause: The length of a path name passed to the XDB hierarchical resolver exceeded the maximum length.

Action: Choose a shorter path name.

OCI-31006: Path name segment length *string* exceeds maximum length *string*

Cause: The length of a path name segment passed to the XDB hierarchical resolver exceeded the maximum length of a path name segment.

Action: Choose a shorter path name segment.

OCI-31007: Attempted to delete non-empty container *string/string*

Cause: An attempt was made to delete a non-empty container in the XDB hierarchical resolver.

Action: Either perform a recursive deletion, or first delete the contents of the container.

OCI-31009: Access denied for property *string*

Cause: An attempt was made to access a property you don't have access to

Action: Check the ACL to see what privileges you have for this property

OCI-31010: XML element index *string* exceeds maximum insertion index *string*

Cause: An attempt was made to insert an XML element at an invalid index location in the node.

Action: Choose a new index that falls within the allowed range.

OCI-31011: XML parsing failed

Cause: XML parser returned an error while trying to parse the document.

Action: Check if the document to be parsed is valid.

OCI-31012: Given XPATH expression not supported

Cause: XPATH expression passed to the function is currently unsupported.

Action: Check the xpath expression and change it to use a supported expression.

OCI-31013: Invalid XPATH expression

Cause: XPATH expression passed to the function is invalid.

Action: Check the xpath expression for possible syntax errors.

OCI-31014: Attempted to delete the root container

Cause: An attempt was made to delete the root container in the hierarchical index.

Action: Do not delete the root container.

OCI-31015: Attempted to insert entry without name

Cause: An attempt was made to insert an entry into the hierarchical resolver without a child name.

Action: Supply a child name and try inserting again.

OCI-31016: Attempted to delete entry without name

Cause: An attempt was made to delete an entry from the hierarchical resolver without a child name.

Action: Supply a child name and try deleting again.

OCI-31017: Error generating unique OID for XML document

Cause: An error occurred while generating a globally unique OID for storing an XML document.

Action: None

OCI-31018: Error deleting XML document

Cause: The XMLType object pointed to by the given REF could not be deleted because either the REF was invalid or it pointed to a non-existent table.

Action: Either use FORCE deletion or supply a valid REF.

OCI-31019: Recursive deletion snapshot too old for *string/string*

Cause: Changes were made to the structure of a directory while it was being recursively deleted.

Action: Try deleting the directory again.

OCI-31020: The operation is not allowed, Reason: *string*

Cause: The operation attempted is not allowed

Action: See reason and change to a valid operation.

OCI-31021: Element definition not found

Cause: The element definition was not found.

Action: Supply the definition for the element or use a defined element.

OCI-31022: Element not found

Cause: The element was not found.

Action: Make sure the specified element exists.

OCI-31023: Index size error

Cause: The index is greater than the allowed value.

Action: Make sure the index is less than allowed value.

OCI-31025: Invalid document element

Cause: An attempt was made to replace the data at an invalid index number in the XML document

Action: Supply a correct occurrence number and try again.

OCI-31027: Path name or handle *string* does not point to a resource

Cause: An attempt was made to retrieve a resource based on a path name or resource handle that points to an entity other than a resource.

Action: Do not attempt to retrieve a resource based on that path name or resource handle.

OCI-31028: Resource metadata length *string* exceeded maximum length *string*

Cause: An attempt was made to insert resource metadata that exceeded the maximum length of that type of metadata.

Action: Keep resource metadata within its allowed length.

OCI-31029: Cannot bind to unsaved resource

Cause: An attempt was made to bind to a resource that had not been saved to disk.

Action: Bind only to saved resources.

OCI-31030: Unable to retrieve XML document

-
- Cause:** The resource had an invalid (dangling) REF to an XML document.
- Action:** Rebind the resource using a valid XMLType REF.
- OCI-31033: Requested number of XML children *string* exceeds maximum *string***
- Cause:** An attempt was made to add more than the maximum number of allowable children in an XML element.
- Action:** Redefine the schema to allow breaking up of the children among siblings.
- OCI-31035: Could not bind locked resource to path *string/string***
- Cause:** An attempt was made to bind an existing resource to a new location in the hierarchy, but a lock could not be obtained on the resource.
- Action:** Commit or roll back the transaction that has the lock on the resource.
- OCI-31037: Invalid XML attribute name *string***
- Cause:** The attribute name in the XML document did not match anything in the associated schema.
- Action:** Supply only schema-defined or XML standard attributes.
- OCI-31038: Invalid *string* value: "*string*"**
- Cause:** The text in the XML document did not represent a valid value given the datatype and other constraints in the schema.
- Action:** Ensure that the specified value in XML documents is valid with respect to the datatype and other constraints in the schema.
- OCI-31039: XML namespace length *string* exceeds maximum *string***
- Cause:** The length of the disk-formatted XML namespace exceeded the maximum.
- Action:** Keep XML namespace declarations below the maximum length.
- OCI-31040: Property *string*: XML type (*string*) not compatible with internal memory type (*string*)**
- Cause:** The XML datatype given is inconsistent with the database datatype, and a conversion cannot be made.
- Action:** This is an internal error, generally resulting from corruption of the compiled XML schema. Re-register schemas, or contact Oracle support.
- OCI-31041: Property *string*: Memory type (*string*) not compatible with database type (*string*)**
- Cause:** The memory type associated with this property is mapped to an incompatible database type, and a conversion cannot be made.
- Action:** This is an internal error, generally resulting from corruption of the compiled XML schema. Re-register schemas, or contact Oracle support.
- OCI-31042: Too many properties in type '*string*'**
- Cause:** The type can only have the same number of properties (elements and attributes) as a table can have columns.
- Action:** Modify the XML schema to move properties into subelements that are not inlined.
- OCI-31043: Element '*string*' not globally defined in schema '*string*'**
- Cause:** The specified element name has not been defined at the top level of the XML schema (i.e. globally). Elements must be defined globally to be the root of an XMLType object.

Action: Check the XML schema definition to make sure the specified element name has been defined at the top level.

OCI-31044: Top-level prefix length *string* exceeds maximum *string*

Cause: An attempt was made to save to disk a top-level XML namespace prefix whose length exceeded the maximum.

Action: Do not define XML namespace prefixes that exceed the maximum length.

OCI-31045: Cannot store more than *string* extras outside the root XML node

Cause: An attempt was made to store more than the maximum number of XML extras (e.g. comments and processing instructions) either before or after the document's root node.

Action: Keep the number of extras outside the root node below the maximum.

OCI-31046: Incorrect argument(s) specified in the operator

Cause: One or more of the arguments specified in the operator in the query are incorrect

Action: Correct the arguments specified in the operator

OCI-31047: Could not retrieve resource data at path *string*

Cause: An error occurred while retrieving the contents and/or metadata of a resource.

Action: Contact Oracle customer support.

OCI-31048: Unsaved resources cannot be updated

Cause: An attempt was made to update a resource that was never saved to disk.

Action: Perform a resource insertion instead.

OCI-31050: Access denied

Cause: The requested access privileges have not been granted to the current user. User must be granted privileges prior to resource access.

Action: Check the set of requested access privileges to make sure that they are included in the set of access privileges granted to the user.

OCI-31051: Requested access privileges not supported

Cause: The requested access privileges are not supported for the specified resource.

Action: Ensure that the set of requested access privileges are valid access privileges for the specified resource.

OCI-31052: Cannot delete ACL with other references

Cause: The requested deletion of an ACL resource cannot proceed. The ACL is in use by other resources.

Action: Remove the resources that are making reference to the ACL in question and try again.

OCI-31053: The value of the depth argument in the operator cannot be negative

Cause: The value of the depth argument passed to the primary operator is not a positive integer

Action: Pass a positive value of the depth argument

OCI-31054: The *string* operator cannot have an ancillary operator

Cause: An ancillary operator was used with an operator which does not support ancillary operators

Action: Remove the ancillary operator in the query

OCI-31055: A null XMLType element cannot be inserted into RESOURCE_VIEW

Cause: The element which is being inserted into the RESOURCE_VIEW is NULL

Action: Specify a non-null XMLType element to insert into RESOURCE_VIEW

OCI-31056: The document being inserted does not conform to *string*

Cause: The XMLType element being inserted into the RESOURCE_VIEW does not conform to the specified Schema

Action: Insert an element which conforms to the specified Schema

OCI-31057: Display Name of the element being inserted is null

Cause: The Display Name of the element which is being inserted into the RESOURCE_VIEW is null

Action: Specify the Display Name and insert the element into RESOURCE_VIEW

OCI-31058: cannot modify read-only XOBs

Cause: Read-Only XOBs cannot be modified.

Action: Use only read operations on such a XOB.

OCI-31059: Cannot insert root XML document node if it already exists

Cause: An attempt was made to insert a root node into an XML document that already had a root node.

Action: Call the appropriate replace function to replace the node instead of inserting it anew.

OCI-31060: Resource at path *string* could not be deleted

Cause: An error occurred while deleting the named resource. The specific error can be found one lower on the error stack.

Action: Look at the next error on the stack and take appropriate action.

OCI-31061: XDB error: *string*

Cause: The specified error occurred in XDB.

Action: Correct the error or contact Oracle Support Services.

OCI-31062: Cannot delete an unsaved resource

Cause: An attempt was made to delete a resource that had not been saved to disk.

Action: Delete only saved resources.

OCI-31065: Cannot modify read-only property [*string*]

Cause: An attempt was made to modify an immutable XML node.

Action: Use only read operations on such properties.

OCI-31066: Insertion of *string* into *string* creates a cycle

Cause: An attempt was made to insert a link into the XDB hierarchy that would create a cycle in the tree.

Action: Ensure that links to existing resources do not cause cycles.

OCI-31067: XML nodes must be updated with nodes of the same type

Cause: An attempt was made to use updateXML to update an XML node with a node of another type.

Action: Ensure that the node specified by the XPath matches the type of new data provided.

OCI-31068: updateXML expected data format [*string*] instead of [*string*]

Cause: An attempt was made to use updateXML to update data with a node of the incorrect type. Text and attribute nodes must be updated with string data, whereas element nodes must be updated with XMLType data.

Action: Use CREATEXML or getStringVal to coerce the new data to the proper format.

OCI-31069: Cannot apply typed changes to non-schema-based XMLType nodes

Cause: An attempt was made to insert, delete, or update a non-schema-based XMLType node using an XML schema definition.

Action: Make changes to non-typed nodes only by referencing their tag names.

OCI-31070: Invalid database user ID *string*

Cause: An attempt was made set an invalid user ID into an XDB resource metadata property.

Action: Verify the validity of the user ID and try again.

OCI-31071: Invalid database username or GUID *string*

Cause: An attempt was made to set an invalid username or GUID into an XDB resource metadata property.

Action: Verify the validity of the username or GUID and try again.

OCI-31072: Too many child nodes in XMLType fragment for updateXML

Cause: An attempt was made to pass an XMLType fragment with multiple children as new data for the updateXML operator.

Action: Extract the desired child from the XMLType before passing it to updateXML as the desired new XML node.

OCI-31073: Resource not retrieved using path name

Cause: An attempt was made to access the path name of a resource that was either never saved to disk or was loaded using a method other than with its path name.

Action: Perform path name operations only on resources obtained using a path name.

OCI-31075: invalid *string* declaration in XML Schema

Cause: The XML schema contains an invalid declaration identified by the message.

Action: Fix the identified error and try again.

OCI-31076: required attribute "*string*" not specified

Cause: The XML schema does not specify a required attribute.

Action: Specify a value for the required attribute.

OCI-31077: invalid attribute "*string*" specified

Cause: The XML schema specifies an invalid attribute.

Action: Remove specification of the invalid attribute.

OCI-31078: error in SQL mapping information

Cause: There is an error in the SQL type and table specification within the XML Schema.

Action: Ensure that all specified SQL types and tables are valid and compatible with the corresponding XML types.

OCI-31079: unable to resolve reference to *string* "*string*"

Cause: The identified type or attribute or element could not be resolved.

Action: Make sure that the name corresponds to a valid XML (simple/complex) type or attribute or element and try again.

OCI-31080: type not specified for attribute or element "*string*"

Cause: The identified attribute or element does not have a type.

Action: Make sure that every attribute and element has a valid type specification.

OCI-31081: name not specified for global declaration

Cause: The XML schema does not specify the name for the global declaration of attribute or element or simpleType or complexType.

Action: Specify names for all global declarations.

OCI-31082: invalid attribute "*string*" specified in declaration of "*string*"

Cause: The XML schema specifies an invalid attribute.

Action: Remove specification of the invalid attribute.

OCI-31083: error while creating SQL type "*string*".*string*"

Cause: An error occurred while trying to create the SQL type based on the specification of a complex type.

Action: Fix the identified error and try again.

OCI-31084: error while creating table "*string*".*string*" for element "*string*"

Cause: An error occurred while trying to create the table based on the declaration for the identified element.

Action: Fix the identified error and try again.

OCI-31085: schema "*string*" already registered

Cause: An attempt was made to register a schema with the same URL as a previously registered schema.

Action: Register the schema with a different URL.

OCI-31086: insufficient privileges to register global schema "*string*"

Cause: An attempt was made to register a global schema without sufficient privileges.

Action: Make sure that the user has sufficient privileges to register a global schema.

OCI-31087: insufficient privileges to delete schema "*string*"

Cause: An attempt was made to delete a schema resource without sufficient privileges.

Action: Make sure that the user has sufficient privileges to delete the schema.

OCI-31088: object "*string*".*string*" depends on the schema

Cause: An attempt was made to delete a schema which has dependent objects.

Action: Either drop the dependent objects prior to deleting the schema or use the CASCADE or FORCE options.

OCI-31089: schema "*string*" does not target namespace "*string*"

Cause: The schema document contains references (via include and import definitions) to other schemas that do not belong to valid namespaces.

Action: Make sure that all schemas referenced via include definitions target the same namespace as the parent schema. Further make sure that the namespace specified in the import definition matches the actual target namespace of the specified schema.

OCI-31090: invalid database schema name "*string*"

Cause: The XML schema document contains an invalid database schema name. For example, the value of attribute SQLSchema

Action: Make sure that all database user/schema names specified in the XML schema document refer to existing database users/schemas.

OCI-31091: empty string specified as a SQL name

Cause: The XML schema document contains a null SQL name. For example, the values of attributes SQLName, SQLType, defaultTable.

Action: Make sure that all names of SQL schema objects specified in the XML schema document are valid SQL names. Otherwise, remove such attributes from the schema and try again.

OCI-31092: invalid SQL name "*string*"

Cause: The XML schema document contains an invalid SQL name. For example, the values of attributes SQLName, SQLType, defaultTable.

Action: Make sure that all names of SQL schema objects specified in the XML schema document are valid SQL names. This implies that the database length and other restrictions on names be satisfied.

OCI-31093: null or invalid value specified for parameter : *string*

Cause: The argument value passed for the given parameter is null or invalid.

Action: Make sure that all the input argument values are valid.

OCI-31094: incompatible SQL type "*string*" for attribute or element "*string*"

Cause: The SQL type information provided in the XML schema is not compatible with the XML datatype for the specified attribute or element.

Action: Make sure that the specified SQL types are compatible with the declared XML datatypes.

OCI-31095: cannot generate *string* : "*string.string*" already exists

Cause: The type/table name specified in the XML schema document cannot be generated because it is already being used.

Action: Use different names for types/tables or use the NOGEN mode so that schema compiler does not generate new types/tables.

OCI-31096: validation failed for schema

Cause: The XML Schema could not be validated.

Action: Make sure that the SQLType and other datatype mapping is valid.

OCI-31097: Hierarchical Index not empty

Cause: An attempt was made to rebuild the hierarchical index which is not empty.

Action: Delete all rows in the hierarchical index and then rebuild it.

OCI-31099: XDB Security Internal Error

Cause: An XDB Security internal error has occurred.

Action: Contact Oracle Support.

OCI-31100: XDB Locking Internal Error

Cause: An XDB Locking Internal error has occurred.

Action: Contact Oracle Support.

OCI-31101: Token "*string*" not given while locking resource "*string*"

Cause: Locking attempted on resource when the principal already owns a lock given by the token above.

Action: Reattempt the lock with the token.

OCI-31102: Already locked in exclusive mode. Cannot add lock.

Cause: The resource is already locked in exclusive mode. Cannot add another lock.

Action: Unlock the existing lock.

OCI-31103: Resource locked in shared mode. Cannot add exclusive lock

Cause: The resource is locked in shared mode. Cannot add a shared lock.

Action: Try locking in shared mode or unlocking the existing lock.

OCI-31104: Cannot find lock with token "*string*" on "*string*" for unlock

Cause: The lock may have been unlock or it may have expired.

Action: No action needed. Unlock already successful.

OCI-31105: User does not own lock "*string*"

Cause: The lock to be unlocked is not owned by the user.

Action: None

OCI-31107: Action failed as resource "*string*" is locked by name lock

Cause: Lock requests cause the whole request URI to be locked

Action: Supply lock token or unlock the lock

OCI-31108: Action failed as resource *string* is locked

Cause: Delete/Rename failed because of an existing lock

Action: Do lockdiscovery to find the lock and delete it.

OCI-31109: Action failed as parent resource *string* is locked

Cause: Delete/Rename failed because of an lock on parent resource

Action: Do lockdiscovery to find the lock and delete it.

OCI-31110: Action failed as resource *string* is locked by name

Cause: Delete/Rename failed because one of the children is locked.

Action: Do lockdiscovery to find the lock and delete it.

OCI-31111: table *string* cannot be hierarchically enabled

Cause: Trigger <tabname>_xdb_pittrigger already exists

Action: Delete all rows in the hierarchical index and then rebuild it.

OCI-31112: fail to *string* for *string* port using xdb configuration

Cause: port number for the defined presentation is not valid

Action: Either the port number is already in use or it is protected. Specify another port number.

OCI-31113: XDB configuration may not be updated with non-schema compliant data

Cause: An attempt was made to update the XDB configuration resource with non-schema or non-schema compliant data.

Action: Check the document to make sure it is schema based and schema compliant.

OCI-31114: XDB configuration has been deleted or is corrupted

Cause: The XDB configuration resource has been deleted or corrupted.

Action: Reinstall XDB, or reinsert a valid configuration document.

OCI-31115: XDB configuration error: *string*

Cause: An error related to XDB configuration has occurred.

Action: Make sure the configuration resource contains valid data.

OCI-31116: Tablespace not specified correctly

Cause: XDB cannot be moved to the specified tablespace.

Action: Specify a valid tablespace.

OCI-31121: The *string* operator can not be FALSE

Cause: The value of the operator that is specified is FALSE

Action: Specify an operator that evaluates to TRUE

OCI-31122: The *string* operator has incorrect RHS value

Cause: The right hand side value that has been specified for the operator does not evaluate to TRUE

Action: Specify value on the right hand side that evaluate to TRUE

OCI-31151: Cyclic definition encountered for *string*: "*string*"

Cause: The schema definition for this type has cycles.

Action: Remove cyclic definition and re-compile schema.

OCI-31153: Cannot create schema URL with reserved prefix

"http://xmlns.oracle.com/xdb/schemas/"

Cause: This prefix is reserved for XDB extended schema URLs and cannot be used in a user specified URL.

Action: Modify the prefix to a different one.

OCI-31154: invalid XML document

Cause: The XML document is invalid with respect to its XML Schema.

Action: Fix the errors identified and try again.

OCI-31155: attribute *string* not in XDB namespace

Cause: The specified attribute should be prefixed with XDB's namespace.

Action: Ensure that all XDB specified attributes are prefixed with XDB's namespace and try again.

OCI-31157: Invalid Content-Type charset

Cause: HTTP Content-Type header had a charset that Oracle does not understand.

Action: Fix the Content-Type header in the HTTP request.

OCI-31158: schema "*string*" currently being referenced

Cause: The specified schema URL is currently being referenced by the same session. This could happen because of PLSQL XMLType variables still in scope.

Action: Ensure all references to this schema in this session are released and try the operation again.

OCI-31159: XML DB is in an invalid state

Cause: XML DB's internal tables are in an invalid state, probably because the database was not upgraded or the upgrade was not successful

Action: Ensure that the database is upgraded successfully. If the problem persists, contact Oracle Support

OCI-31160: max substitution group size *string* exceeded by "*string*" (*string*) for head element "*string*" (*string*)

Cause: The maximum limit on nested substitution groups has been exceeded by an element.

Action: Delete specified schema and re-register it after removing the offending substitution element.

OCI-31161: element or attribute "*string*" cannot be stored out of line

Cause: An element or attribute of a simple type has SQLInline=false

Action: Remove the SQLInline=false qualification for the offending element or attribute

OCI-31162: element or attribute "*string*" has no SQLType specified

Cause: Schema registration was invoked with GENTYPES=false without specifying a SQLType for some element or attribute

Action: Specify a SQLType for the offending element or attribute and register the schema again

OCI-31163: element or attribute "*string*" has invalid attribute value "*string*" (should be "*string*")

Cause: An element or attribute for a complex type derived by restriction has an attribute whose value is different from that in the base type

Action: Remove the mismatched attribute values from the offending element or attribute

OCI-31164: cannot load object-relational XML attribute using direct path

Cause: The table being loaded contains a xml column with object-relational storage. The xmltype column contains a type with subtypes. This type of attribute cannot be loaded with direct path.

Action: Perform the load with conventional path mode.

OCI-31165: cannot load object-relational XML attribute using direct path

Cause: The table being loaded contains a xml column with object-relational storage. The xmltype column either contains an out-of-line partitioned table or the

table itself is partitioned by one of the attributes of xmltype. This type of table cannot be loaded with direct path.

Action: Perform the load with conventional path mode.

OCI-31167: XML nodes over 64K in size cannot be inserted

Cause: An attempt was made to insert an XML Text Node with a size greater than 64K. This is not supported.

Action: Create text nodes under 64K.

OCI-31168: Node localname and namespace values should be less than 64K

Cause: An attempt was made to specify an XML Node with localname or namespace value greater than or equal to 64K. This is not supported.

Action: Node localnames and namespace values should be under 64K.

OCI-31180: DOM Type mismatch in invalid PL/SQL DOM handle

Cause: The specified PL/SQL DOM handle is referencing a DOM Node whose DOM Type that does not match the one available in the session. This could happen because the pl/sql handle was reused, or the original document is no longer available.

Action: Ensure that the pl/sql handle for the target node is valid and try the operation again.

OCI-31181: PL/SQL DOM handle accesses node that is no longer available

Cause: The specified pl/sql handle is referencing a node in a DOM Document that is no longer available.

Action: Ensure that the pl/sql handle for the target node is valid and try the operation again.

OCI-31182: Too many PL/SQL DOM handles specified

Cause: An attempt was made to create a PL/SQL DOM handle that exceeded the maximum allowable number of PL/SQL DOM handles.

Action: Free PL/SQL DOM handles and try the operation again.

OCI-31185: DOM Nodes do not belong to the same DOM Document

Cause: The specified PL/SQL DOM Node does not belong to the parent DOM Document of the referring DOM Node.

Action: Ensure that both the DOM Nodes are part of the same DOM Document.

OCI-31190: Resource *string* is not a version-controlled resource

Cause: Either one of the following is the cause:

- Checkout is requested for a resource that isn't under version control". Only version-controlled resource can be checked out.

- Checkout is requested for a row of a non-versioned table.

Action: put the resource under version-control before checking out.

OCI-31191: Resource *string* is already checked out

Cause: Either one of the following is the cause:

- Checkout is requested for a resource that is already checked out to the workspace by the same of different user.

Action: checked in the resource from the workspace before checking out

OCI-31192: Resource *string* has not been checked out

Cause: Either one of the following is the cause:

- Checkin or uncheckout is requested for a resource that has not been checked out to the workspace by any user in a workspace

Action: checked in the resource from the workspace before checking out

OCI-31193: This versioning feature isn't supported for resource *string*

Cause: Either one of the following is the cause:

- Container cannot be put under version-controlled.

Action: Avoid using these features.

OCI-31194: Resource *string* is already deleted

Cause: Access a version-controlled resource that is already deleted.

Action: Remove the cyclic definitions in the type and retry compilation.

OCI-31195: XML node '*string*' (type=*string*) does not support this operation

Cause: The given node's type is not supported for this operation. For example, trying to add children to an attribute node, or passing in a document node as a child, are unsupported operations.

Action: Use a valid node type for the operation.

OCI-31196: XML nodes over *string* in size cannot be printed

Cause: An attempt was made to use an XML Text Node with a size greater than 64K, or an XML Comment Node with a size greater than 4K. These cannot be printed. For example, trying to add children to an attribute node, or passing in a document node as a child, are unsupported operations.

Action: Use getClobVal() or getStringVal() to print the Document.

OCI-31197: Error in processing file *string*

Cause: An error occurred while operating on the specified file. The possible causes are the file header is corrupt or check the next error on stack

Action: Ensure that the specified file is correct. Look at the next error on the stack and take appropriate action.

OCI-31198: Mismatch in number of bytes transferred due to non-binary mode

Cause: An error occurred while reading the specified file. The most probable cause is that the transfer was initiated in ASCII mode.

Action: Ensure that the transfer mode is set to BINARY

OCI-31199: Warning in processing file *string*

Cause: A warning was raised while operating on the specified file. However, the current operation was completed successfully.

Action: This is primarily an informational message. Look at the next error on the stack to obtain further information.

QSM-00501 to QSM-03120

QSM-00501: unable to initialize Summary Advisor environment

Cause: The Summary Advisor external procedure initialization process failed.

Action: Contact Oracle Worldwide Support.

QSM-00502: OCI error

Cause: A OCI callback routine reported an error

Action: Contact Oracle Worldwide Support.

QSM-00503: out of memory

Cause: Summary Advisor failed to allocate the necessary memory.

Action: Contact Oracle Worldwide Support.

QSM-00504: internal error

Cause: An internal error occurred.

Action: Contact Oracle Worldwide Support.

QSM-00505: syntax error

Cause: A syntax error occurred.

Action: Correct syntax error if possible or contact Oracle Worldwide Support.

QSM-00506: no fact-tables could be found

Cause: The fact-filter is not specified, and there are no fact-tables in the warehouse. A fact-table is a table having foreign-key constraints to one or more of the dimension-tables in the data warehouse.

Action: Check the fact-filter is correctly specified; check that appropriate constraints exist; and the user has privileges to access the tables

QSM-00507: no dimensions could be found

Cause: The database does not have any dimensions

Action: Create the dimensions in your warehouse

QSM-00508: statistics missing on tables/columns

Cause: The system metadata does not contain statistics on one or more tables or columns. The Advisor needs cardinalities of all fact-tables, and of the level-keys of all dimensions in the data warehouse.

Action: Run ANALYZE on the tables and summaries in the warehouse to collect statistics

QSM-00509: invalid parameter

Cause: The indicated parameter has an invalid value

Action: Supply a value in the proper range

QSM-00510: statistics missing on materialized views

Cause: The system metadata does not contain statistics on one or more materialized views. The Advisor needs cardinalities of all materialized views in the data warehouse.

Action: Run ANALYZE on the tables and materialized views in the warehouse to collect statistics.

QSM-00511: invalid fact-tables specified in fact-filter

Cause: The tables specified in the fact-filter are not valid fact-tables. A fact-table must have foreign-key constraints to one or more of the dimension-tables in the data warehouse.

Action: Check the fact-filter is correctly specified; check that appropriate constraints exist; and the user has privileges to access the tables

QSM-00512: invalid summaries specified in the retention-list

Cause: The summaries specified in the retention-list are not valid.

Action: Check the spelling of the summary-names; check that they are valid; and the user has privileges to access them.

QSM-00513: one or more of the workload tables is missing

Cause: One or both of the workload tables are missing. The two workload tables which should be present in the user's schema are V_192216243_F_5_E_14_8_1 and V_192216243_F_5_E_15_8_1; the former is mapped to WORK\$_IDEAL_MVIEW and the latter to WORK\$_MVIEW_USAGE. The workload tables are created by the Oracle Trace Formatter when the data-collection-file (oraclesm.dat) is formatted by the user.

Action: Check whether the Formatter succeeded in formatting the data collection. Sometimes the V_192216243_F_5_E_14_8_1 (i.e WORK\$_IDEAL_MVIEW) may not be created whereas the other table is created. The most likely cause of this is the init.ora parameters needed to invoke mview-rewrite are not enabled. Check your documentation for all the init.ora parameters which need to be set for mview-rewrite to occur. Another possibility is no GROUP BY queries were issued during the time the data was collected, in which case, run the Trace collection for a longer time to get a representative sampling of the queries issued in the data warehouse.

QSM-00514: the size of must-retain summaries exceeds specified space limit

Cause: The specified space limit is greater than the size of must-retain summaries.

Action: Reduce the number of must-retain summaries or increase the space limit

QSM-00515: operation cancelled by user

Cause: The operation has been cancelled by the user

Action: None

QSM-00516: illegal status detected for run

Cause: The run has encountered an illegal value in the status field of the mview\$_adv_log table. This could be internal error or an application error.

Action: Contact Oracle Worldwide Support.

QSM-00517: Summary Advisor requires a COMPATIBLE setting of 8.1.0.0 or greater

Cause: The current database has a compatibility setting that is earlier than the supported server version.

Action: Adjust the instance parameter COMPATIBLE to 8.1.0.0 or greater.

QSM-00518: Java is not enabled. Please execute INITJVM.SQL and INITQSMA.SQL

Cause: The current database has not been created or upgraded to support Java stored procedures. Summary Advisor requires Java stored procedures.

Action: Log into the database with SYSDBA privileges. Execute the INITJVM.SQL script which is found in the ORACLE home directory under JAVAVM. Next, execute the INITQSMA.SQL script found in the ADMIN directory under the ORACLE home.

QSM-00519: Summary Advisor is not installed. Please execute INITQSMA.SQL.

Cause: The current database has not been created or upgraded to support Summary Advisor. Summary Advisor requires several Java stored procedures.

Action: Log into the database with SYSDBA privileges. Execute the INITQSMA.SQL script found in the ADMIN directory under the ORACLE home.
**** ** Messages 520-700 are in the 9i Summary Advisor Java modules 701-708 are Hypothetical Workload generator journal messages

QSM-00710: data access error in module *string*

Cause: SQL Access Advisor detected a severe error while accessing the advisor repository.

Action: See the accompanying error message for appropriate actions.

QSM-00750: the specified value *string* for parameter *string* is invalid or contains an invalid item

Cause: The user attempted to set a task parameter using invalid data.

Action: Adjust the data value and retry the operation.

QSM-00751: the file *string* could not be opened for write access

Cause: Access Advisor could not create the script or report due to a file system error.

Action: Verify the location for file write access and retry the operation.

QSM-00752: the parameter *string* contains an invalid combination of options *string*

Cause: The user specified correct option keywords, but entered a combination that is not supported within Access Advisor.

Action: Validate the correct option usage and retry the operation.

QSM-00753: the specified value *string* is out of the acceptable range of *string* to *string* for parameter *string*

Cause: The user attempted to set a task parameter using invalid data.

Action: Adjust the data value and retry the operation.

QSM-00754: task *string* does not reference a valid workload and therefore cannot be executed

Cause: The user attempted to execute a advisor task that requires a workload.

Action: Specify a workload for the task and retry the operation.

QSM-00755: a set of workload statements already exists for workload *string*

Cause: The user attempted to save workload data into an existing workload that already contains data without specifying APPEND or REPLACE.

Action: Validate the import mode retry the operation.

QSM-00756: the specified workload *string* is being used by one or more advisor tasks

Cause: The user attempted to modify or delete a workload that is currently being used by another task.

Action: Remove the workload reference from the advisor task and retry the operation.

QSM-00757: the specified workload *string* is not referenced by task *string*

Cause: The user attempted to delete invalid workload reference from the task.

Action: Validate the workload reference and retry the operation.

QSM-00758: the specified parameter *string* is not valid for workload *string*

Cause: The user attempted to access a workload parameter that does not exist for the specified workload. The parameter may be misspelled or the user selected a parameter that is not supported by the particular advisor.

Action: Validate the parameter name and retry the operation.

QSM-00759: the user *string* does not exist for the specified workload statement

Cause: The user attempted to add a new SQL statement with an invalid username.

Action: Adjust the name and retry the operation.

QSM-00760: the import mode *string* is invalid for the current operation

Cause: The user attempted to store data in the repository with an invalid import mode.

Action: Use one of the following valid values: NEW, APPEND, or REPLACE.

QSM-00761: the priority *string* is invalid for the current operation

Cause: The user attempted to store data in the repository with an invalid priority.

Action: Use one of the following valid values: 1, 2, 3.

QSM-00762: the specified Summary Advisor workload *string* does not exist

Cause: The user attempted to import an advisor workload from an invalid or non-existent Summary Advisor workload.

Action: Validate the Summary Advisor workload identifier and retry the operation.

QSM-00763: the owner *string* was not found while validating user-defined workload *string.string*

Cause: The user attempted to import an advisor workload from a user who may not access to the table.

Action: Validate the location of the user-defined workload.

QSM-00764: the column *string* was not found in the user-defined workload table *string.string*

Cause: The user attempted to import an advisor workload from a user table that does not contain the required column.

Action: Validate the user-defined workload table and retry the operation.

QSM-00765: cannot validate user-defined workload because table *string.string* is invalid.

Cause: The user attempted to import an advisor workload from a table that is not accessible.

Action: Validate the location of the user-defined workload.

QSM-00766: a SQL statement is required for the current workload operation

Cause: The user attempted to create an entry in a workload collection without specifying a SQL statement.

Action: Validate the SQL statement and retry the operation.

QSM-00767: a SQL cache is not available to user *string*

Cause: The user attempted to collect a workload from the SQL without having authorization.

Action: Validate the user account and retry the operation.

QSM-00768: the search condition is invalid for the requested operation

Cause: The user provided a invalid SEARCH argument to an Access Advisor workload operation. A search condition must be a valid SQL search condition using only the column names specified in the procedure documentation.

Action: Correct the search condition and retry the operation.

QSM-00769: the SQL statement *string* was not found for workload *string*

Cause: The user attempted to access a SQL statement that does not exist in the workload.

Action: Validate the SQL statement identifier and retry the operation.

QSM-00770: the specified workload *string* is already referenced by task *string*

Cause: The user attempted to add a workload reference to a task when the task already contains the reference.

Action: Validate the workload reference and retry the operation.

QSM-00771: the specified SQL statement cannot be stored in the workload because it has no valid table references

Cause: The user attempted to add a workload statement that contains table references that are either system-specified or user-specified invalid tables.

Action: Validate the workload statement and retry the operation.

QSM-00772: the specified SQL statement cannot be stored in the workload due to a statement error

Cause: The user attempted to add a workload statement that contains invalid SQL syntax or an invalid column reference.

Action: Validate the workload statement and retry the operation.

QSM-00773: the parameter *string* contains the invalid *string* name *string*

Cause: The task or workload parameter contains a name that is either too long or does not exist in the database.

Action: Validate the parameter value and retry the operation.

QSM-00774: there are no SQL statements to process for task *string*

Cause: While executing, the specified task found no valid SQL statements to analyze. Possible causes are: an empty workload, table filtering, or username filtering.

Action: Validate the workload and the appropriate task parameters and retry the operation.

QSM-00775: the specified SQL statement cannot be stored in the workload due to invalid table references

Cause: The user attempted to add a workload statement that contains one or more invalid identifier for the parsing user.

Action: Validate the workload statement and retry the operation.

QSM-00776: the user-defined workload *string* is missing the following column: *string*

Cause: The user attempted to import a workload from an external table; however, the table does not contain all of the required columns.

Action: Adjust the target workload table and retry the operation.

QSM-00777: the specified directive *string* is unsupported at this time

Cause: The user attempted to create a directive that is not currently supported.

Action: Check the advisor documentation for valid directives.

QSM-00778: the specified output filename *string* is invalid or cannot be accessed

Cause: The user attempted to create a report or script in a file that cannot be written or created.

Action: Adjust the file name or directory and retry the operation.

QSM-00779: the specified directive conflicts with the existing directive *string*

Cause: The user attempted to add a directive that cannot operate with an existing directive.

Action: Check the advisor documentation for valid directives.

QSM-00780: the task *string* could not be executed because the workload *string* is being modified

Cause: While attempting to execute a task, Access Advisor checks for exclusive access to all of the referenced workloads. If any cannot be reserved, then the execution fails.

Action: Wait until the referenced workloads are free for exclusive access retry the operation.

QSM-00781: the specified value *string* is invalid for parameter *string*. Valid keywords are *string*

Cause: The user attempted to set a task parameter using invalid data.

Action: Adjust the data value and retry the operation

QSM-00782: the specified value *string* is an invalid date format for parameter *string*

Cause: The user attempted to set a task parameter using invalid date formatting directives.

Action: See the Oracle documentation for valid date-formatting and retry the operation.

QSM-00783: the specified value *string* contains an invalid date for parameter *string*

Cause: The user attempted to set a task parameter using invalid date formatting.

Action: A date literal must be in the form DD/MM/YYYY HH24:MI:SS.

QSM-00784: the *string string* referenced in the list *string* is invalid for parameter *string*

Cause: The user attempted to set a task parameter using an invalid username or table specification.

Action: Validate the object name and retry the operation.

QSM-00785: the directive *string* is not supported for task *string* at this time

Cause: The user attempted to add an invalid directive to the current task.

Action: Validate the directive and retry the operation.

QSM-00786: the name *string* is invalid for directive *string*

Cause: The user attempted to add a directive that contains an empty or invalid object name.

Action: Correct the name and retry the operation.

QSM-00787: the tablespace *string* is invalid for directive *string*

Cause: The user attempted to add a directive that contains an empty or invalid tablespace name.

Action: Correct the name and retry the operation.

QSM-00788: The requested recommendation does not support direct implementation

Cause: The user attempted to use the DBMS_ADVISOR.IMPLEMENT_TASK procedure to implement a SQL Access Advisor recommendation that cannot be implemented due to its complexity.

Action: The user must generate a script and implement the recommendation outside of the SQL Access Advisor.

QSM-00789: The requested recommendation requires user editing and cannot be implemented

Cause: The user attempted to use the DBMS_ADVISOR.IMPLEMENT_TASK procedure to implement a SQL Access Advisor recommendation that cannot be implemented because it requires additional scripting information from the user.

Action: The user must generate a script and edit the results.

QSM-00790: the workload *string* cannot be modified or changed because it is being used by task *string*

Cause: The user attempted to change or delete a workload that is referenced by an active task.

Action: Remove references to a workload from any tasks that reference that workload, unless the task is in its initial task state.

QSM-00791: the specified SQL statement cannot be stored in the workload because it contains unsupported statement type

Cause: The user attempted to add a workload statement that contains an invalid statement type. Supported statement types are INSERT, DELETE, UPDATE, SELECT and MERGE.

Action: Validate the workload statement and retry the operation.

QSM-00792: the specified SQL statement cannot be stored in the workload because one or more tables have missing statistics

Cause: The user attempted to add a workload statement that contains a table without statistics. Access Advisor requires all referenced tables to have valid statistics.

Action: Validate the workload statement and retry the operation.

QSM-00793: the specified SQL Tuning Set *string* does not exist

Cause: The user specified a SQL Tuning Set that has not been defined in the SQL Tuning Set repository.

Action: Correct the SQL Tuning Set name and retry the operation.

QSM-00794: the statement can not be stored due to a violation of the *string* filter

Cause: The user attempted to manually add a workload statement that failed a filter test. Manual statements must meet the same filtering guidelines as imported statements.

Action: Adjust the attributes or the filter and retry the operation.

QSM-00795: the SQL Tuning Set repository has not been implemented

Cause: The user attempted to collect a workload from a SQL Tuning Set repository that has not yet been implemented or enabled.

Action: Validate the existence of the repository and retry the operation.

QSM-00796: the specified SQL statement cannot be stored in the workload because table *string* does not have valid statistics

Cause: The user attempted to add a workload statement that references a table with missing statistics.

Action: Gather statistics for the referenced table and retry the operation.

QSM-00797: the specified workload *string* does not exist for the current user

Cause: The user attempted to reference an Access Advisor workload using a name that does not exist in the Advisor repository.

Action: Adjust the name and retry the operation.

QSM-00798: the specified workload *string* already exists

Cause: The user attempted to create the specified workload using a name that already exists in the Advisor repository. Task names must be unique to the database user.

Action: Adjust the name and retry the operation.

QSM-00799: the user-defined workload table *string* cannot be found

Cause: The user has attempted to import a workload from an external table that does not exist or cannot be accessed.

Action: Adjust the target workload table and retry the operation.

QSM-00800: the specified workload name *string* is invalid

Cause: The user has specified an invalid workload name.

Action: Adjust the target workload name and retry the operation.

QSM-00801: the specified username *string* is invalid

Cause: The user has specified an invalid username.

Action: Adjust the target username and retry the operation.

QSM-00802: An error occurred while implementing action *string* (*string*) *string*.

Cause: While performing IMPLEMENT_TASK, a specific action operation failed.

Action: Make the necessary adjustments as specified in the secondary message and retry the operation.

QSM-00803: The STORAGE_CHANGE parameter value *string* cannot be zero or negative for partial workloads.

Cause: While performing EXECUTE_TASK, the user specified a STORAGE_CHANGE value that is incompatible with the type of workload data.

Action: Set a positive STORAGE_CHANGE value.

QSM-00804: not enough space for mandatory access structures

Cause: While performing EXECUTE_TASK, the user specified a STORAGE_CHANGE value that leaves no space for mandatory access structures, such as primary key indexes.

Action: Set a greater STORAGE_CHANGE value.

QSM-00805: the specified recommendation *string* value *string* is invalid

Cause: The user has specified an invalid value when attempting to change a recommendation attribute.

Action: Adjust the target attribute value and retry the operation.

QSM-00806: the *string* parameter value must be specified when STORAGE_MODE is set to TOTAL

Cause: While performing EXECUTE_TASK, the user specified a STORAGE_MODE of TOTAL, but failed to set the DEF_MVIEW_OWNER and DEF_INDEX_OWNER to valid owner names.

Action: Set the specified owner to a valid name

QSM-00807: the ANALYSIS_SCOPE parameter value contains an incomplete or invalid combination of options.

Cause: Though the ANALYSIS_SCOPE parameter supports several options, some combination are not supported.

Action: Enter a valid combination of options.

QSM-00808: parameter *string* only permits a single keyword. Choose one of the following: *string*

Cause: The user attempted to set a task parameter using multiple keywords.

Action: Adjust the data value and retry the operation

QSM-00809: the selected number of recommendations exceeds the maximum value of *string*

Cause: While executing GET_TASK_SCRIPT, an attempt was made to fetch a script having too many recommendations. The limit has been set in order to avoid possible performance and out-of-memory errors.

Action: Select a small set of recommendations prior to fetching the script

QSM-00999: Advisor feature is not currently implemented

Cause: The user attempted to execute an unsupported advisor operation.

Action: Verify the availability of the operation.

QSM-01001: query rewrite not enabled

Cause: When query rewrite is disabled, no query rewrite will take place.

Action: Enable query rewrite with ALTER SESSION SET QUERY_REWRITE ENABLE command.

QSM-01002: no query rewrite when OPTIMIZER_MODE is rule based

Cause: Query rewrite did not occur because the OPTIMIZER_MODE was set to RULE.

Action: Change the optimizer mode using the OPTIMIZER_MODE parameter.

QSM-01003: no query rewrite on DDL queries

Cause: If query contains any data definition operations, no query rewrite will take place.

Action: None

QSM-01004: no query rewrite before view merging

Cause: Internal session parameter _QUERY_REWRITE_2 is set to FALSE

Action: Change session parameter with ALTER SESSION command.

QSM-01005: no query rewrite when query has slave SQL

Cause: Current process is a kxfx slave

Action: None

QSM-01006: query rewrite disabled for this query block

Cause: During query rewrite, certain view query blocks cannot be rewritten.

Action: None

QSM-01007: query has NOREWRITE hint

Cause: When query contains a NOREWRITE hint, no query rewrite will take place for that query block.

Action: Remove the NOREWRITE hint from the query

QSM-01008: no query rewrite for update queries

Cause: If a query or part of it has any DML update operations, no query rewrite will take place.

Action: None

QSM-01009: query rewritten with materialized view, *string*, using text match algorithm

Cause: The query was rewritten using a materialized view, because query text matched the definition of the materialized view

Action: None

QSM-01010: table(s) in the query not found in materialized view, *string*

Cause: If the materialized view does not reference the base tables found in the query, it cannot be used for rewrite

Action: None

QSM-01011: when heuristic rewrite not set, rewrite hint required

Cause: When using a stored outline, a rewrite hint is required for query rewrite

Action: None

QSM-01012: SAMPLE clause present in FROM

Cause: If a query contains a SAMPLE clause, query rewrite will not take place

Action: None

QSM-01013: nested aggregates or CONNECT BY/START WITH clause present

Cause: If the query contains nested aggregates, CONNECT BY clause, or START WITH clause, query rewrite will not take place

Action: None

QSM-01014: top level operator in WHERE clause of the query is an OR

Cause: If the top-level operator in the WHERE clause is an OR and there is more than one table in the FROM list, then query rewrite will not take place.

Action: None

QSM-01015: GROUP BY clause has non-columns

Cause: No query rewrite, if there is no valid column in the GROUP BY clause.

Action: None

QSM-01016: Query rewrite does not support, aggregate, *string*

Cause: No query rewrite, if the query contains any DISTINCT aggregates other than COUNT, MIN or MAX.

Action: None

QSM-01017: aggregate argument cannot be converted to canonical form

Cause: Argument of each aggregate in the query needs to be convertible into a canonical form for query rewrite.

Action: None

QSM-01018: single table materialized join view rewrite not required

Cause: Materialized join view is more expensive for rewrite than using the base table

Action: None

QSM-01019: no suitable materialized view found to rewrite this query

Cause: There doesn't exist any materialized view in the dataware house that can be used to rewrite this query.

Action: Consider creating a new materialized view.

QSM-01020: materialized view, *string*, is ineligible

Cause: Materialized view is probably disabled or stale.

Action: Consider enabling the materialized view for rewrite or refreshing it.

QSM-01021: materialized view, *string*, not found in the hint list

Cause: There is a rewrite hint list specified in the query, but this materialized view is not among the hinted ones.

Action: Include this materialized view in the rewrite hint list.

QSM-01022: a more optimal materialized view than *string* was used to rewrite

Cause: Query Rewrite always chooses the most optimal materialized view based on certain parameters, such as cardinality of the materialized view, number of joins etc. The materialized view specified was found to be less optimal.

Action: To force using a materialized view, consider using a rewrite hint.

QSM-01023: materialized view, *string*, has GRANT errors

Cause: Materialized view probably has some metadata errors.

Action: Consider recreating it.

QSM-01024: materialized view, *string*, has unknown compile errors

Cause: Materialized view probably has some metadata errors.

Action: Consider recreating it.

QSM-01025: materialized view, *string*, not found

Cause: The specified materialized view is not found in the database.

Action: Check the spelling or create a new materialized view

QSM-01026: query rewrite is disabled for, *string*

Cause: Query rewrite could not use this materialized view, because query rewrite was not enabled for it.

Action: Enable query rewrite for the materialized view with ALTER MATERIALIZED VIEW "mv" ENABLE QUERY REWRITE command, where "mv" is the name of the materializev view.

QSM-01027: materialized view, *string*, is unusable

Cause: Materialized view probably has some metadata errors.

Action: Consider recreating it.

QSM-01028: materialized view, *string*, is currently being refreshed

Cause: Materialized view cannot be used for query rewrite while it is being refreshed

Action: Rerun the query, after the refresh operation is completed.

QSM-01029: materialized view, *string*, is stale in ENFORCED integrity mode

Cause: A stale materialized view cannot be used for query rewrite when the query rewrite integrity mode is set to ENFORCED.

Action: Refresh the materialized view or alter the rewrite integrity mode with ALTER SESSION QUERY_REWRITE_INTEGRITY = STALE TOLERATED command.

QSM-01030: materialized view, *string*, has PL/SQL functions in ENFORCED integrity mode

Cause: A materialized view with PL/SQL functions in its definition cannot be used for query rewrite when query rewrite integrity is set to ENFORCED.

Action: Consider running the query in STALE TOLERATED mode.

QSM-01031: materialized view, *string*, is stale in TRUSTED integrity mode

Cause: A stale materialized view cannot be used for query rewrite when the query rewrite integrity mode is set to TRUSTED.

Action: Refresh the materialized view or alter the rewrite integrity mode with ALTER SESSION QUERY_REWRITE_INTEGRITY = STALE TOLERATED command.

QSM-01032: materialized view, *string*, not found

Cause: There was no associated metadata for the materialized view.

Action: Check the spelling and re-run the query.

QSM-01033: query rewritten with materialized view, *string*

Cause: The specified materialized view was used to rewrite the given query.

Action: None

QSM-01034: materialized view, *string*, needs a dimension level to join table, *string*

Cause: One or more hierarchical relationship(s) in the table(s) could not be established.

Action: Consider adding a level in the dimension to provide the missing intra-table relationships.

QSM-01035: a row level security policy exists on this table

Cause: Any row level security policy that may exist on a base-table prevents exact text match query rewrite.

Action: None

QSM-01036: unmatched column, *string*, present in query after view merging

Cause: Clearing the columns after view merging failed due to some reasons - bug??

Action: None

QSM-01037: Query Rewrite failed to allocate the necessary query join graph

Cause: Join graph allocation and initialization failed, possibly due to one or more undetermined operand(s) in the query expression.

Action: None

QSM-01038: logical operator(s) could not be processed

Cause: One or more logical operator(s) in the query predicates could not be processed, possibly due to invalid operator(s).

Action: None

QSM-01039: selection present on right hand side of an outer join

Cause: Query cannot be rewritten if any predicate contains a selection on the right hand side of an outer join.

Action: None

QSM-01040: match between the materialized view (*string*) and query join graphs failed

Cause: Query rewrite will not take place if the joins in the query and the materialized view do not have any match.

Action: None

QSM-01041: materialized view, *string*, does not match with a measure in the query

Cause: If a measure (such as SUM, AVERAGE) in the query cannot be matched or computed from the materialized view, it will not be used for rewrite.

Action: None

QSM-01042: anchor and matching join arc check failed for *string*

Cause: If there is a lossy join in the materialized view that doesn't exist in the query, query rewrite will not take place.

Action: None

QSM-01043: join back attempted on a table to the RHS of a semi or anti join for *string*

Cause: Query Rewrite will not occur if a join back is required to a table that appears to the right hand side of a semi or anti-join.

Action: None

QSM-01044: join back attempted on a view for *string*

Cause: Query Rewrite will not occur if a join back to a table is required to find any missing columns.

Action: None

QSM-01046: complex join back on correlated columns not allowed (*string*)

Cause: Query Rewrite will not occur if a join back is required on a column that is referenced by a sub-query.

Action: None

QSM-01047: complex join back on non-MAV rewrite not allowed (*string*)

Cause: Query Rewrite can occur by means of a complex join back only during a MAV rewrite.

Action: None

QSM-01048: join back level(s) not present (*string*)

Cause: Query Rewrite requires joining back to a level of a dimension to find a missing information.

Action: Consider creating a dimension.

QSM-01049: semi-join check failed for materialized view, *string*

Cause: If there is a semi join in the query, then Query Rewrite will create (select distinct <pk-list>, <ref-col> from mjev) where <pk-list> is the list of rowids/pk of all mjev tables that don't correspond to a right side of a semi-join and <ref-col> are their columns. Query Rewrite will not occur if a join from the materialized view cannot match the semi-join from the query.

Action: None

QSM-01050: roll-up check failed for materialized view, *string*

Cause: A column in the query cannot be computed from the materialized view.

Action: Consider creating a dimension to supply the missing information

QSM-01051: no support for rollup when a window function is present on the column

Cause: No query rewrite if a window function is present on a column that requires a roll-up to compute a measure.

Action: None

QSM-01052: referential integrity constraint on table, *string*, not VALID in ENFORCED integrity mode

Cause: A join present in the materialized view requires validated primary/foreign key constraints in ENFORCED query rewrite integrity mode.

Action: Validate the constraint or change the integrity mode with ALTER SESSION SET QUERY_REWRITE_INTEGRITY = STALE_TOLERATED command.

QSM-01053: NORELY referential integrity constraint on table, *string*, in TRUSTED/STALE TOLERATED integrity mode

Cause: A join present in the materialized view requires RELY mode to be set on the primary/foreign key constraints.

Action: Set the RELY mode with ALTER TABLE <table> MODIFY CONSTRAINT <constraint> RELY command. Alternatively validate the constraint with ALTER TABLE <table> VALIDATE CONSTRAINT <constraint>.

QSM-01054: no join match between query and summary, *string*

Cause: There are no common joins between the query and the the materialized view

Action: None

QSM-01055: Query Rewrite failed to allocate the necessary materialized view join graph

Cause: Join graph allocation and initialization failed, possibly due to one or more undetermined operand(s).

Action: None

QSM-01056: no query rewrite for this DDL expression

Cause: Some SELECT statements which are part of a DDL expression may be eligible for rewrite. These include CREATE AS SELECT and CREATE OUTLINE statements. The given query expression is a DDL expression, which doesn't fall in this category.

Action: None

QSM-01057: no query rewrite for this DML expression

Cause: Current DML is being done using an updatable view, so it is not eligible for rewrite.

Action: None

QSM-01058: MV, *string*, does not have column, *string*, for a joinback

Cause: A GROUP BY column in the query is not present in the GROUP BY clause of of the materialized view. This usually requires a join back to a third table.

Action: None

QSM-01059: HAVING clause in the query block is malformed

Cause: An illegal HAVING clause has been specified in the query.

Action: Correct the query syntax and run the query again.

QSM-01060: illegal subquery in the HAVING clause

Cause: When a HAVING clause has a subquery, then any references to the tables in the outer query should only reference the tables in the GROUP BY clause.

Action: Correct error in the syntax and rerun the query.

QSM-01061: illegal query expression

Cause: An illegal query was specified. Specifically one of the following criteria was not satisfied: (a) All (non-constant, non-aggregate) SELECT expressions in the query should be made up of group expressions. (b) All column references in the HAVING clause should come from the GROUP BY expressions. (c) If there is an ORDER BY clause, then all column references should come from the GROUP BY or SELECT clause, depending on whether the query selects DISTINCT.

Action: Correct error in the syntax and rerun the query.

QSM-01062: query has one or more manual partition(s)

Cause: Query rewrite is not possible if query has any manual partitions.

Action: None

QSM-01063: query has a dictionary table or view

Cause: Query rewrite is not allowed if query references any dictionary tables/views.

Action: None

QSM-01064: query has a fixed table or view

Cause: Query rewrite is not allowed if query references any fixed tables/views

Action: None

QSM-01065: materialized view, *string*, cannot compute measure, *string*, in the query

Cause: If the materialized view cannot compute a measure in the query using the measures in its definition, then query rewrite will not occur.

Action: None

QSM-01066: materialized view, *string*, does not have the column, *string*, from query

Cause: Query rewrite will not occur, if the materialized view cannot provide all the columns that the query has

Action: None

QSM-01067: materialized view, *string*, cannot support the query measure, *string*

Cause: An attempt was made to push a grouping function through an expression specified in the query to transform a measure. Query rewrite will not occur if this measure transformation failed.

Action: None

QSM-01068: no dimensions present

Cause: An attempt was made to load a dimension from the dataware house, but there were no dimensions present.

Action: None

QSM-01069: summary join graph for, *string*, does not have table, *string*

Cause: An attempt to locate an object that is part of a join failed.

Action: None

QSM-01070: equivalence class manager was not found

Cause: An equivalence class manager is required to compute the transitive closure for the columns in an equivalence class.

Action: None

QSM-01071: query rewrite not possible because a join in materialized view % with table % has eliminated some rows found in query

Cause: All lossy joins in the materialized view must be present in the query for query rewrite to occur.

Action: None

QSM-01072: materialized view, *string*, and query have different joins between tables, *string*

Cause: Anchors, if any, in the MV and query match. But the joins between these anchors in the MV and query are different.

Action: None

QSM-01073: query rewrite not possible because materialized view, *string*, has a join not found in query

Cause: Query rewrite may not be possible if the materialized view has some joins that query does not have

Action: None

QSM-01074: query rewrite not possible because materialized view, *string*, and query have different number of joins between tables, *string*

Cause: Query rewrite may not be possible if the query has some joins that the materialized view does not have between the same pair of tables.

Action: None

QSM-01075: materialized view, *string*, does not support aggregate function, *string*

Cause: The specified aggregate function is not found in the materialized view.

Action: None

QSM-01076: no materialized join view was found

Cause: To support an MJV rewrite, we require a materialized join view.

Action: None

QSM-01077: materialized view, *string*, is grouping at a higher level than query

Cause: If a query column, which is not present in the materialized view, can be obtained by a rollup within the materialized view, then it should group at a higher level than the materialized view.

Action: None

QSM-01078: materialized view, *string*, is marked invalid

Cause: The materialized view's kglobsta field has KGLSINV bit set.

Action: none ??

QSM-01079: DML operation occurred on a table referenced by MV, *string*

Cause: If any dependent tables of a materialized view undergoes a DML operation, query rewrite may be restricted depending on the query rewrite integrity mode for the session. In this situation, query rewrite will take place only if the rewrite integrity mode is STALE_TOLERATED.

Action: Consider refreshing the materialized view changing the rewrite integrity mode to STALE_TOLERATED.

QSM-01080: invalid dimension, *string*

Cause: This dimension table has authorization or compilation problems.

Action: None

QSM-01081: no primary key or row id found for table, *string*, in MV, *string*

Cause: In order to obtain a missing column, the materialized view needs to join back to the above table. But it lacks the primary key or rowid for the table.

Action: None

QSM-01082: Joining materialized view, *string*, with table, *string*, not possible

Cause: A column in the query is not found in the summary. To obtain the column, a join back of materialized view to the table by means of either the primary key, foreign key or rowid of the table is required. The specified materialized view does not have the primary key, foreign key or rowid of the table to perform the join operation.

Action: Consider building a dimension-table to provide the missing information.

QSM-01083: query text not available - possible inline view

Cause: During the query rewrite transformation, original query was possibly transformed into an inline view.

Action: None

QSM-01084: materialized view *string* has an anchor table *string* not found in query

Cause: A table in a materialized view is an anchor, (a) if it is not joined to any other table or (b) joined to other tables but each of its joins is either lossy or lossless with the above table being child-side table. If an anchor which is present in the materialized view is not found in the query, then query rewrite will not take place.

Action: None

QSM-01085: materialized view, *string*, has a lossy join between tables, *string*

Cause: There are no primary key, foreign key constraints between these tables. But query rewrite is still possible if the lossy join between the above tables also appear in the query

Action: None

QSM-01086: dimension(s) not present or not used in ENFORCED integrity mode

Cause: Query rewrite does not use dimensions in ENFORCED query rewrite integrity mode. If a suitable dimension is present, consider changing the current integrity mode to either TRUSTED or STALE_TOLERATED by using ALTER SESSION SET QUERY_REWRITE_INTEGRITY = command.

Action: None

QSM-01087: query grouping on a column that cannot be derived from materialized view, *string*

Cause: Query is grouping on undetermined columns.

Action: None

QSM-01089: an inline view in the query does not have a materialized view

Cause: General query rewrite is not possible if an inline view in the query does not have a matching materialized view in the meta data.

Action: None

QSM-01090: no query rewrite after view merging

Cause: Internal session parameter `_QUERY_REWRITE_1` is set to FALSE

Action: Change session parameter with ALTER SESSION command.

QSM-01091: cost based optimizer found query rewrite is more expensive

Cause: When cost based optimizer is ON, cost of the rewritten cursor is compared to the cursor generated without query rewrite, and the cheaper one is chosen for execution.

Action: None

QSM-01092: mjev tries to rewrite a semi-join and primary key or rowid missing

Cause: Materialized join view tries to rewrite a semi-join (IN sub-query) and the primary keys or rowids of left tables of semi-joins are missing from MJV.

Action: None

QSM-01093: anti-join marker not found in materialized join view

Cause: Materialized join view has outer join while the query inner join. For rewrite to succeed MV must have an anti-join marker like the rowid or primary key of the right tables of outer join

Action: None

QSM-01094: outer-join filter not found in materialized join view

Cause: Materialized join view has outer join while the query inner join. For rewrite to succeed MV must have an anti-join marker like the rowid or primary key of the right tables of outer join

Action: None

QSM-01095: no suitable grouping_id found in MV with grouping sets

Cause: If materialized aggregate view contains grouping sets, then it also must contain the grouping_id() function. This function must contain all columns in the MV GROUP BY.

Action: None

QSM-01096: Materialized view with grouping sets contains duplicates

Cause: Materialized view with grouping sets contains duplicates and no rewrite is supported for it. For example, GROUP BY GROUPING SET ((a), (a)) is not supported for rewrite.

Action: None

QSM-01097: Materialized view with grouping sets has too long key

Cause: Materialized view with grouping sets has more than 64 different keys in its GROUP BY. No rewrite is supported then.

Action: None

QSM-01098: mv string clause more restrictive than query string clause

Cause: The materialized view contains a selection condition in the WHERE or HAVING clause that is more restrictive than the corresponding selection condition in the request query.

Action: Change the selection criteria in the request query to be at least as restrictive as the selection criteria in the materialized view, or drop and recreate the materialized view using less restrictive selection criteria.

QSM-01099: non-tolerated reference to stale portion of mv for table string

Cause: The materialized view is partially stale. It is stale with respect to one or more partitions in one or more of its detail tables. The request query references one or more such detail partitions.

Action: (1) Change the selection criteria of the request to restrict the query to only the fresh portion of the materialized view, or (2) ALTER {SYSTEM | SESSION} QUERY_REWRITE_INTEGRITY = STALE_TOLERATED or (3) refresh the materialized view.

QSM-01100: containment check failed for mv, *string*

Cause: The materialized view contains a selection condition in the WHERE or HAVING clause that is more restrictive than the corresponding selection condition in the request query.

Action: Change the selection criteria in the request query to be at least as restrictive as the selection criteria in the materialized view, or drop and recreate the materialized view using less restrictive selection criteria.

QSM-01101: rollup(s) took place on mv, *string*

Cause: If query's GROUP BY has one of the higher levels of columns found in the materialized view, then the lower level columns in the materialized view will be rolled up to compute the desired results.

Action: None

QSM-01102: materialized view, *string*, requires join back to table, *string*, on column, *string*

Cause: A column in the query does not appear in the materialized view. Query rewrite will try to obtain this column from the base table, by doing a join back to that column with the MV.

Action: None

QSM-01103: there is a remote table, *string*, referenced in the query

Cause: Query rewrite does not support query with remote tables.

Action: None

QSM-01104: query is using flashback

Cause: Query rewrite does not support flashback.

Action: None

QSM-01105: no primary key or row id in MV, *string*, is found for table, *string*

Cause: In order to obtain a missing column, the materialized view needs to join back to the above table. But it lacks the primary key or rowid for the table.

Action: None

QSM-01106: materialized view, *string*, is stale with respect to some partition(s) in the base table(s)

Cause: Query is requesting some data from the MV that are stale with respect to some partitions in the base tables due to some updates.

Action: refresh the stale partitions and rerun the query

QSM-01107: Partition Containment Tracking (PCT) rewrite is not allowed

Cause: Query rewrite is disabled for PCT through a session parameter

Action: None

QSM-01108: maximum number of disjuncts exceeded in the query *string*

Cause: Query rewrite engine cannot process the query if the number of disjuncts (OR's) in the WHERE clause exceeds the maximum allowed number. The number of disjuncts in the query and the maximum allowed disjuncts are given at the end of the message in the form of (no of disjuncts in query, maximum disjuncts allowed).

Action: None

QSM-01109: while rewriting with MV, *string*, table, *string*, migrated to query delta

Cause: There was an unmatched join on the MV, so a table involved in the join was pushed to the query delta to see if the query can be rewritten

Action: None

QSM-01110: query rewrite not possible with materialized view *string* because it contains a join between tables (*string*) that is not present in the query and that potentially eliminates rows needed by the query

Cause: All lossy joins in the materialized view must be present in the query for query rewrite to occur.

Action: None

QSM-01111: no partition key or partition marker found in MV, *string*

Cause: In order to do query rewrite with fresh partitions of an MV, the MV should have a partition key or partition marker.

Action: None

QSM-01112: WHERE clause of mv, *string*, is more restrictive than query

Cause: The materialized view contains a selection condition in the WHERE clause that is more restrictive than the corresponding selection condition in the request query.

Action: Change the selection criteria in the request query to be at least as restrictive as the selection criteria in the materialized view, or drop and recreate the materialized view using less restrictive selection criteria.

QSM-01113: HAVING clause of mv, *string*, is more restrictive than query

Cause: The materialized view contains a selection condition in the HAVING clause that is more restrictive than the corresponding selection condition in the request query.

Action: Change the selection criteria in the request query to be at least as restrictive as the selection criteria in the materialized view, or drop and recreate the materialized view using less restrictive selection criteria.

QSM-01115: rollup took place on a column with a window function

Cause: There was a rollup to aggregate the data on a column with a window function.

Action: None

QSM-01116: window function computability checks failed

Cause: The window function in the query could not be computed from the materialized view.

Action: None

QSM-01120: recursive rewrite not allowed here

Cause: This query was possibly rewritten with an equivalence which doesn't allow further rewrites.

Action: None

QSM-01121: materialized view, *string*, is TRUSTED in ENFORCED integrity mode

Cause: A stale materialized view created with USING TRUSTED CONSTRAINTS clause cannot be used when the query rewrite integrity mode is set ENFORCED.

Action: Alter materialized view such that it has the ENFORCED CONSTRAINTS ALTER MATERIALIZED VIEW <mv> REFRESH USING ENFORCED CONSTRAINTS

QSM-01123: self-join algorithm could not resolve multiple instances

Cause: The generalized self-join algorithm could not resolve the multiple instances, likely due to mismatch in joins or measures

Action: Consider using aliases in the query to match with the aliases in the materialized view

QSM-01124: set operator materialized view, *string*, doesn't have a marker column

Cause: The specified set operator materialized view does not have a marker column.

Action: Add a marker column to the specified materialized view.

QSM-01125: a more optimal set operator materialized view than *string* was used to rewrite

Cause: Query Rewrite always chooses the most optimal set operator materialized view based on parameters, such as cardinality of the set operator materialized view, number of branches that the set operator materialized view can rewrite etc. The set operator materialized view specified was found to be less optimal.

Action: To force using a set operator materialized view, consider using a rewrite hint.

QSM-01126: query rewritten with set operator materialized view, *string*

Cause: The specified set operator materialized view was used to rewrite the given query.

Action: None

QSM-01127: query rewritten with materialized view(s), *string*

Cause: The query was successfully rewritten with multiple MVs

Action: None

QSM-01128: Multi MV rewrite is disabled

Cause: When multimv query rewrite is disabled, no multimv query rewrite will take place.

Action: Enable multimv query rewrite with ALTER SESSION SET "_MULTIMV_QUERY_REWRITE_ENABLED" = true .

QSM-01129: query has NO_MULTIMV_REWRITE hint

Cause: When the query has this hint no multimv rewrite will be tried for this query

Action: Remove hint from query

QSM-01130: Multi MV rewrite not allowed if at least one query block has no MVs

Cause: When only multimv query rewrite is enabled, every query block should have at least one MV in its from clause

Action: Disable only multimv query rewrite with ALTER SESSION SET "_ONLY_MULTIMV_QUERY_REWRITE_ENABLED" = false .

QSM-01131: query has ONLY_MULTIMV_REWRITE hint

Cause: When the query has this hint no multimv rewrite will be done if the query has a query block with no MVs in the from clause

Action: Remove hint from query

QSM-01132: query has a named array type column

Cause: When the query has a column of named array type, query rewrite cannot be done

Action: None

QSM-01133: query has an ADT column

Cause: When the query has a column of ADT type, query rewrite cannot be done

Action: None

QSM-01134: query has a hidden or nested table column

Cause: When the query has a hidden or nested table column, query rewrite cannot be done

Action: None

QSM-01135: query has an LOB column

Cause: When the query has a column stored in LOB, query rewrite cannot be done

Action: None

QSM-01136: query has a nested table column

Cause: When the query has a nested table column, query rewrite cannot be done

Action: None

QSM-01137: dimension level, *string*, marked as SKIP WHEN NULL

Cause: Join back is not possible on a level marked as SKIP WHEN NULL in a dimension

Action: None

QSM-01150: query did not rewrite

Cause: See the other messages from explain_rewrite() for explanation"

Action: None

QSM-01168: query rewrite not possible when Fine Grain Auditing is present on a base table

Cause: Query rewrite could not take place because Fine Grain Auditing (FGA) was present on a base table in the query

Action: None

QSM-01169: query rewrite not possible for a CREATE or ALTER VIEW statement

Cause: Query rewrite could not take place because the incoming query was either a CREATE or ALTER VIEW statement

Action: None

QSM-01202: query rewrite not possible when OPTIMIZER_MODE is set to rule based

Cause: Query rewrite did not occur because the OPTIMIZER_MODE was set to RULE.

Action: Change the optimizer mode using the OPTIMIZER_MODE parameter.

QSM-01203: query rewrite not possible on DDL queries

Cause: If query contains any data definition operations, no query rewrite will take place.

Action: None

QSM-01204: query rewrite not possible before view merging

Cause: Internal session parameter `_QUERY_REWRITE_2` is set to FALSE

Action: Change session parameter with ALTER SESSION command.

QSM-01205: query rewrite not possible when query has slave SQL

Cause: Current process is a kxfx slave

Action: None

QSM-01207: query rewrite not possible when query has a NOREWRITE hint

Cause: When query contains a NOREWRITE hint, no query rewrite will take place for that query block.

Action: Remove the NOREWRITE hint from the query

QSM-01208: query rewrite not possible for update queries

Cause: If a query or part of it has any DML update operations, no query rewrite will take place.

Action: None

QSM-01209: query rewritten with materialized view, *string*, using text match algorithm

Cause: The query was rewritten using a materialized view, because query text matched the definition of the materialized view

Action: None

QSM-01210: query rewrite not possible because no common table(s) found between materialized view *string* and query

Cause: If the materialized view does not reference the base tables found in the query, it cannot be used for rewrite

Action: None

QSM-01211: query rewrite not possible when stored outline does not have a rewrite hint

Cause: When using a stored outline, a rewrite hint is required for query rewrite

Action: None

QSM-01212: query rewrite not possible when SAMPLE clause is present in FROM

Cause: If a query contains a SAMPLE clause, query rewrite will not take place

Action: None

QSM-01213: query rewrite not possible when nested aggregates or CONNECT BY clause or START WITH clause or recursive WITH clause is present

Cause: If the query contains nested aggregates, CONNECT BY clause, or START WITH clause, or recursive with clause, query rewrite will not take place

Action: None

QSM-01214: query rewrite not possible if OR is the top level operator in query WHERE clause

Cause: If the top-level operator in the WHERE clause is an OR and there is more than one table in the FROM list, then query rewrite will not take place.

Action: None

QSM-01215: query rewrite not possible when query GROUP BY clause has non-columns

Cause: No query rewrite, if there is no valid column in the GROUP BY clause.

Action: None

QSM-01218: query rewrite is likely more expensive due to a single table match between materialized view and query

Cause: Materialized join view is more expensive for rewrite than using the base table

Action: None

QSM-01219: no suitable materialized view found to rewrite this query

Cause: There doesn't exist any materialized view in the database that can be used to rewrite this query.

Action: Consider creating a new materialized view.

QSM-01220: materialized view, *string*, is disabled, stale or unusable

Cause: Materialized view is probably disabled or stale.

Action: Consider enabling the materialized view for rewrite or refreshing it.

QSM-01222: materialized view *string* is less optimal than *string*

Cause: Query Rewrite always chooses the most optimal materialized view based on certain parameters, such as cardinality of the materialized view, number of joins etc. The materialized view specified was found to be less optimal.

Action: To force using a materialized view, consider using a rewrite hint.

QSM-01241: query measure cannot be derived from the materialized view *string*

Cause: If a measure (such as SUM, AVERAGE) in the query cannot be matched or computed from the materialized view, it will not be used for rewrite.

Action: None

QSM-01244: join back could not be done on a view for *string*

Cause: Query Rewrite will not occur if a join back to a table is required to find any missing columns.

Action: None

QSM-01246: join back on correlated columns not allowed (*string*)

Cause: Query Rewrite will not occur if a join back is required on a column that is referenced by a sub-query.

Action: None

QSM-01247: join back cannot be done on a materialized view that does not have an aggregate (*string*)

Cause: Query Rewrite can occur by means of a complex join back only during a MAV rewrite.

Action: None

QSM-01248: materialized view does not have the join back level(s) (*string*)

Cause: Query Rewrite requires joining back to level of a dimension to find missing information.

Action: Consider creating a dimension.

QSM-01251: query rewrite cannot perform rollup due to the presence of a window function

Cause: No query rewrite if a window function is present on a column that requires a roll-up to compute a measure.

Action: None

QSM-01256: query rewrite not possible for this DDL statement

Cause: Some SELECT statements which are part of a DDL expression may be eligible for rewrite. These include CREATE AS SELECT and CREATE OUTLINE statements. The given query expression is a DDL expression, which doesn't fall in this category.

Action: None

QSM-01257: query rewrite not possible for this DML statement

Cause: Current DML is being done using an updatable view, so it is not eligible for rewrite.

Action: None

QSM-01263: query rewrite not possible when query references a dictionary table or view

Cause: Query rewrite is not allowed if query references any dictionary tables/views.

Action: None

QSM-01271: query rewrite not possible because a join in materialized view *string* with table *string* has eliminated some rows found in query

Cause: A join from the materialized view to any table that eliminates some rows should be present in the query. Otherwise query rewrite will not occur.

Action: None

QSM-01273: query rewrite not possible because materialized view *string* has a join not found in query

Cause: Query rewrite may not be possible if the materialized view has some joins that query does not have

Action: None

QSM-01274: query rewrite not possible because materialized view *string* and query have different number of joins between tables *string*

Cause: Query rewrite may not be possible if the query has some joins that the materialized view does not have between the same pair of tables.

Action: None

QSM-01279: query rewrite not possible because DML operation occurred on a table referenced by materialized view *string*

Cause: If any dependent tables of a materialized view undergoes a DML operation, query rewrite may be restricted depending on the query rewrite integrity mode for the session. In this situation, query rewrite will take place only if the rewrite integrity mode is STALE_TOLERATED.

Action: Consider refreshing the materialized view changing the rewrite integrity mode to STALE_TOLERATED.

QSM-01281: query rewrite not possible because either a primary key or a row id is required to join table *string* with MV *string*

Cause: In order to obtain a missing column, the materialized view needs to join back to the above table. But it lacks the primary key or rowid for the table.

Action: None

QSM-01284: materialized view *string* has an anchor table *string* not found in query

Cause: A table in a materialized view is an anchor, (a) if it is not joined to any other table or (b) joined to other tables but each of its joins is not guaranteed to provide all the rows or joined with the above table being child-side table. If an anchor which is present in the materialized view is not found in the query, then query rewrite will not take place.

Action: None

QSM-01293: anti-join marker not found in materialized view with joins

Cause: Materialized view has outer join while the query has inner join. For rewrite to succeed MV must have an anti-join marker like the rowid or primary key of the right tables of outer join

Action: None

QSM-01295: no suitable grouping_id found in materialized view with grouping sets

Cause: If materialized view contains grouping sets, then it also must contain the grouping_id() function. This function must contain all columns in the MV GROUP BY.

Action: None

QSM-01296: query rewrite not possible because materialized view contains duplicate grouping sets

Cause: Materialized view with grouping sets contains duplicates and no rewrite is supported for it. For example, GROUP BY GROUPING SET ((a), (a)) is not supported for rewrite.

Action: None

QSM-01297: query rewrite not possible because materialized view with grouping sets has more than 176 different keys

Cause: Materialized view with grouping sets has more than 176 different keys in its GROUP BY. No rewrite is supported then.

Action: None

QSM-01298: materialized view *string* clause more restrictive than query *string* clause

Cause: The materialized view contains a selection condition in the WHERE or HAVING clause that is more restrictive than the corresponding selection condition in the request query.

Action: Change the selection criteria in the request query to be at least as restrictive as the selection criteria in the materialized view, or drop and recreate the materialized view using less restrictive selection criteria.

QSM-01299: query rewrite not possible because materialized view *string* is partially stale

Cause: The materialized view is partially stale. It is stale with respect to one or more partitions in one or more of its detail tables. The request query references one or more such detail partitions.

Action: (1) Change the selection criteria of the request to restrict the query to only the fresh portion of the materialized view, or (2) ALTER {SYSTEM | SESSION} QUERY_REWRITE_INTEGRITY = STALE_TOLERATED or (3) refresh the materialized view.

QSM-01303: query rewrite not possible because query references a remote table *string*

Cause: Query rewrite does not support query with remote tables.

Action: None

QSM-01304: query rewrite not possible because query is using flashback

Cause: Query rewrite does not support flashback.

Action: None

QSM-01307: Partition Containment Tracking (PCT) rewrite is not allowed

Cause: Query rewrite is disabled for PCT through a session parameter

Action: None

QSM-01308: number of 'OR's in query exceeded the maximum value *string*

Cause: Query rewrite engine cannot process the query if the number of disjuncts (OR's) in the WHERE clause exceeds the maximum allowed number. The number of disjuncts in the query and the maximum allowed disjuncts are given at the end of the message in the form of (no of disjuncts in query, maximum disjuncts allowed).

Action: None

QSM-01316: window function could not be computed from materialized view *string*

Cause: The window function in the query could not be computed from the materialized view.

Action: None

QSM-01321: query rewrite not possible because materialized view *string* has TRUSTED constraints in ENFORCED integrity mode

Cause: A stale materialized view created with USING TRUSTED CONSTRAINTS clause cannot be used when the query rewrite integrity mode is set ENFORCED.

Action: Alter materialized view such that it has the ENFORCED CONSTRAINTS ALTER MATERIALIZED VIEW <mv> REFRESH USING ENFORCED CONSTRAINTS

QSM-01332: query rewrite not possible because query has a named array type column

Cause: When the query has a column of named array type, query rewrite cannot be done

Action: None

QSM-01333: query rewrite not possible because query has an ADT column

Cause: When the query has a column of ADT type, query rewrite cannot be done
Action: None

QSM-01334: query rewrite not possible because query has a hidden or nested table column

Cause: When the query has a hidden or nested table column, query rewrite cannot be done
Action: None

QSM-01335: query rewrite not possible because query has an LOB column

Cause: When the query has a column stored in LOB, query rewrite cannot be done
Action: None

QSM-01336: the materialized view you specified (*string*) was not used to rewrite the query

Cause: A materialized view specified by the user in the input was not used to rewrite the query, either because query rewrite failed or another more optimal materialized view was used to rewrite.
Action: None

QSM-01339: rewrite not supported on inline view aggregate

Cause: Query has an inline view with an aggregate. Such inline views cannot be matched to any inline views in materialized views.
Action: None

QSM-01340: no inline view match found between query and materialized view(s)

Cause: Query's inline view does not have a match with any inline views in the materialized view
Action: None

QSM-01341: joins between materialized view *string* and query inline views are different

Cause: There is a mismatch between the joins in the query and materialized view inline views
Action: None

QSM-01342: query rewrite not possible because query has full outer join

Cause: When query block has a table involved in full outer join, query rewrite cannot be done
Action: None

QSM-01343: general inline view rewrite not possible on remote objects

Cause: The general inline view rewrite could not take place because the query had remote objects
Action: None

QSM-01344: general inline view rewrite not possible on this WHERE clause construct

Cause: The general inline view rewrite was not supported with this WHERE clause construct
Action: None

-
- QSM-01345: general inline view rewrite not possible when inline view has subquery**
Cause: The general inline view rewrite could not take place because there were subqueries
Action: None
- QSM-01346: general inline view rewrite not possible with nested inline views**
Cause: General inline view rewrite cannot take place with nested inline views
Action: None
- QSM-01347: a query inline view could not be matched with any materialized view inline view**
Cause: No materialized view inline views were found to match with a query inline view
Action: None
- QSM-01348: an invalid predicate was found in an inline view**
Cause: An inline view in the query contained an invalid WHERE clause predicate
Action: None
- QSM-01349: general inline view cannot be supported on this inline view**
Cause: Certain inline views are unsupported in general inline view rewrite
Action: None
- QSM-01350: query rewrite cannot support this inline view**
Cause: Certain inline views are unsupported in general inline view rewrite
Action: None
- QSM-01351: query inline view has no matching objects with any materialized view inline views**
Cause: There were no matching objects between the query inline view and materialized view inline views
Action: None
- QSM-01352: SELECT lists of the query and materialized view inline views do not match**
Cause: Query inline view's and materialized view inline view's SELECT list items did not match.
Action: None
- QSM-01353: no query rewrite on remote objects unless integrity mode is set to stale_tolerated**
Cause: Query rewrite's integrity mode should be set to stale_tolerated for query rewrite to occur on queries with remote objects
Action: Set the session parameter, QUERY_REWRITE_INTEGRITY to stale_tolerated
- QSM-01354: query rewrite is disabled for remote objects**
Cause: Query rewrite was disabled internally for queries referencing remote objects.
Action: None

QSM-01355: multi-mv rewrite not possible in the presence of remote objects

Cause: Multi-MV rewrite not possible for queries referencing remote objects.

Action: None

QSM-01356: query rewrite against cube-organized materialized views not possible when OLAP option is off

Cause: Query rewrite against cube-organized materialized views was not possible because the OLAP option was off.

Action: None

QSM-01509: equivalence, *string*, matched query text

Cause: The query was rewritten using an equivalence, because query text matched the source statement for this equivalence.

Action: None

QSM-01522: a more optimal equivalence than *string* was used to rewrite

Cause: Query Rewrite always chooses the most optimal equivalence based on certain parameters, such as cardinality of the equivalence, number of joins etc. The equivalence view specified was found to be less optimal.

Action: None

QSM-01526: query rewrite is disabled for equivalence, *string*

Cause: Query rewrite could not use this equivalence, because this equivalence was created as disabled.

Action: Enable this equivalence using `alter_rewrite_equivalence` procedure from package, `dbms_advanced_rewrite`.

QSM-01533: query rewritten with equivalence, *string*

Cause: The specified equivalence was used to rewrite the given query.

Action: None

QSM-01565: equivalence, *string*, cannot compute measure, *string*, in the query

Cause: If a measure in the query cannot be computed using the measures in the equivalence, then query rewrite will not occur.

Action: None

QSM-01567: equivalence, *string*, cannot support the query measure, *string*

Cause: An attempt was made to push a grouping function through an expression specified in the query to transform a measure. Query rewrite will not occur if this measure transformation failed.

Action: None

QSM-01572: equivalence, *string*, and query have different joins between tables, *string*

Cause: Anchors, if any, in the equivalence and query match. But the joins between these anchors in the equivalence and query are different.

Action: None

QSM-01582: Joining equivalence, *string*, with table, *string*, not possible

Cause: A column in the query is not found in the equivalence. To obtain the column, a join back of equivalence to the table by means of either the primary key,

foreign key or rowid of the table is required. But join backs are not allowed for equivalence rewrite

Action: None

QSM-01584: equivalence, *string*, has anchor, *string*, not found in query

Cause: If an anchor which is present in the equivalence is not found in the query, then query rewrite will not take place.

Action: None

QSM-01601: rollup(s) took place on equivalence, *string*

Cause: If query's GROUP BY has one of the higher levels of columns found in the equivalence, then the lower level columns in the equivalence will be rolled up to compute the desired results.

Action: None

QSM-01602: equivalence, *string*, requires join back to table, *string*, on column, *string*

Cause: A column in the query does not appear in the equivalence. Query rewrite will try to obtain this column from the base table, by doing a join back to that column with a materialized view. But join backs are not allowed for equivalence rewrite as the required constraints are not guaranteed to be found on the tables in the destination statement of the equivalence.

Action: None

QSM-01610: a lossy join in equivalence, *string*, between tables, *string*, not found in query

Cause: All lossy joins in the equivalence must be present in the query for query rewrite to occur.

Action: None

QSM-01617: equivalence definition is disabled

Cause: There is an equivalence definition that could have been probably used by query rewrite to rewrite the query. But this equivalence is disabled.

Action: None

QSM-01618: equivalence, *string*, is enabled for text match rewrite only

Cause: This equivalence was created for text match rewrite only

Action: None

QSM-01619: equivalence cannot be used in ENFORCED integrity mode

Cause: An equivalence cannot be used for query rewrite when the query rewrite integrity mode is set to ENFORCED.

Action: None

QSM-01621: join backs to base tables not allowed with an equivalence

Cause: Query rewrite needs to do a join back to a base table column to answer this query. But join back is not allowed for an equivalence rewrite

Action: None

QSM-01709: query rewritten with equivalence, *string*, using text match algorithm

Cause: The query was rewritten using an equivalence because query text matched the definition of the equivalence

Action: None

QSM-01784: equivalence *string* has an anchor table *string* not found in query

Cause: A table in an equivalence is an anchor, if (a) it is not joined to any other table or (b) it is joined to other tables but each of its joins is not guaranteed to provide all the rows or joined with the above table being child-side table. If an anchor which is present in the equivalence is not found in the query, then query rewrite will not take place.

Action: None

QSM-01837: recursive query rewrite on equivalence, *string*, not permitted

Cause: The source and destination statements of this equivalence MV are possibly identical. A recursive rewrite on this equivalence can lead to an infinite loop and thus not permitted.

Action: None

QSM-01838: semijoin transformation not supported on equivalence

Cause: There was a semijoin transformation attempted on an equivalence rewrite. Currently this is not allowed

Action: None

QSM-02001: clustered mv container table

Cause: The capability in question is not supported on a materialized view that has a clustered container table.

Action: Recreate the materialized view using a conventional container table.

QSM-02002: DISTINCT aggregate measure in SELECT list

Cause: The capability in question is not supported when the materialized view uses the DISTINCT qualifier on an aggregate function.

Action: Remove the DISTINCT qualifier.

QSM-02003: aggregate function nested within an expression

Cause: The capability in question is not supported when the materialized view contains an aggregate function invocation nested within an outer expression.

Action: Re-phrase the expression such that the aggregate function invocation is not nested.

QSM-02004: grouping column omitted from SELECT list

Cause: The capability in question is not supported when the materialized view contains a column or expression in the GROUP BY clause that is not also present in the list of output select expressions.

Action: Include all GROUP BY expressions in the output select list.

QSM-02005: named view in FROM list

Cause: The capability in question is not supported when a named view appears in the FROM list.

Action: Remove the named view from the FROM list.

QSM-02006: subquery in FROM list

Cause: The capability in question is not supported when a subquery appears in the FROM list.

Action: Remove the subquery from the FROM list.

QSM-02007: multiple instances of the same table or view

Cause: The capability in question is not supported when the same table or view occurs more than once in the FROM list.

Action: Re-phrase the query to avoid multiple instances of the same table. For instance,

QSM-02008: non-join filter condition in WHERE or HAVING clause

Cause: The capability in question is not supported when the materialized view has a selection condition (an expression not representing a join) in the WHERE or HAVING clauses.

Action: Remove the selection filter expression.

QSM-02009: non-inner join

Cause: The capability in question is only supported with inner joins.

Action: Re-phrase the query using an inner join. Remove any outer joins.

QSM-02010: join predicate with operator other than equals (=)

Cause: The capability in question is not supported when the materialized uses a relationship operator other than equals ("=") in a join in the WHERE clause. This is known as a non-equijoin.

Action: Re-phrase the query to avoid the non-equijoin.

QSM-02011: a HAVING clause is present

Cause: The capability in question is not supported when the materialized view uses a HAVING clause.

Action: Remove the HAVING clause.

QSM-02012: a CONNECT BY clause is present

Cause: The capability in question is not supported when the materialized view uses a CONNECT BY clause.

Action: Re-phrase the query to avoid use of the CONNECT BY clause.

QSM-02013: SELECT list includes a RAW data type expression

Cause: The capability in question is not supported when the materialized view uses RAW data type in an expression.

Action: Remove the reference to the RAW expression.

QSM-02014: GROUP BY expression other than a column

Cause: The capability in question is not supported when the materialized view uses an expression other than a simple column reference in the GROUP BY clause.

Action: Re-phrase the query to use only simple column expressions in the GROUP BY clause.

QSM-02015: Index Organized Table (IOT) present in FROM list

Cause: The capability in question is not supported when the materialized view references an Index Organized Table in the FROM list.

Action: Remove the reference to the Index Organized Table.

QSM-02016: clustered table in FROM list

Cause: The capability in question is not supported when the materialized view references a clustered table in the FROM list.

Action: Remove the reference to the clustered table in the FROM list.

QSM-02017: subquery present in the HAVING clause

Cause: The capability in question is not supported when the materialized view uses a subquery in the HAVING clause.

Action: Re-phrase the query to avoid the subquery in the HAVING clause.

QSM-02018: subquery present in the WHERE clause

Cause: The capability in question is not supported when the materialized view uses a subquery in the WHERE clause.

Action: Re-phrase the query to avoid the subquery in the WHERE clause.

QSM-02019: mv references another mv in FROM clause

Cause: The capability in question is not supported when the materialized view is nested (i.e., when it references another materialized view in its FROM list).

Action: Re-phrase the query to avoid reference to the other materialized view.

QSM-02020: container column not in SELECT list with NOT NULL constraint

Cause: The capability in question is not supported when the materialized view's container table has a column that does not correspond to an output expression in the select list, and that column has a NOT NULL constraint. This situation can result in problems during refresh since any new rows inserted into the materialized view will set that column to NULL.

Action: Disable or remove the NOT NULL constraint.

QSM-02021: set operator encountered in mv

Cause: The capability in question is not supported when the materialized view uses set operators such as UNION, UNION ALL, MINUS, etc.

Action: Re-phrase the query to avoid the use of set operators.

QSM-02022: aggregate selections

Cause: The capability in question is not supported when the materialized view uses an aggregate expression in the HAVING clause.

Action: Re-phrase the query to avoid the use of an aggregate in the HAVING clause.

QSM-02023: nested cursor

Cause: The capability in question is not supported when the materialized view uses a nested cursor expression.

Action: Re-phrase the query to avoid use of a nested cursor expression.

QSM-02024: no GROUP BY clause

Cause: The capability in question is not supported when the materialized view does not use a GROUP BY clause.

Action: Re-phrase the query to use a GROUP BY clause.

QSM-02025: no aggregate functions

Cause: The capability in question is not supported when the materialized view uses no aggregate functions.

Action: Re-phrase the query to use aggregate functions.

QSM-02026: non-AND conjunction in WHERE clause

Cause: The capability in question is not supported when the materialized view uses a conjunction other than AND (such as OR) in the WHERE clause.

Action: Re-phrase the query to avoid use of the non-AND conjunction.

QSM-02027: group by ROLLUP

Cause: The capability in question is not supported when the materialized view uses the ROLLUP operator in the GROUP BY clause.

Action: Re-phrase the query to avoid use of the ROLLUP operator.

QSM-02028: group by CUBE

Cause: The capability in question is not supported when the materialized view uses the CUBE operator in the GROUP BY clause.

Action: Re-phrase the query to avoid use of the CUBE operator.

QSM-02029: PL/SQL function invocation

Cause: The capability in question is not supported when the materialized view invokes a PL/SQL function.

Action: Re-phrase the query to avoid use of PL/SQL functions.

QSM-02030: reduced precision specified for prebuilt mv

Cause: The capability in question is not supported when the materialized view is created with the WITH REDUCED PRECISION clause.

Action: DROP the materialized view and re-create it without using the WITH REDUCED PRECISION clause.

QSM-02031: materialized view cannot support any type of query rewrite

Cause: of the problem.

Action: Examine the other messages and documentation to determine the

QSM-02032: no joins are present in the WHERE clause

Cause: The capability in question is not supported when the materialized view includes no join conditions in the WHERE clause.

Action: Re-phrase the query to include a join.

QSM-02033: no filter conditions are present in the WHERE clause

Cause: The capability in question is not supported when the materialized view includes no filter selection conditions in the WHERE clause.

Action: Add a filter condition.

QSM-02034: no joins are present in the HAVING clause

Cause: The capability in question is not supported when the materialized view includes no joins in the HAVING clause.

Action: Re-phrase the query to include a join.

QSM-02035: no filter conditions are present in the HAVING clause

Cause: The capability in question is not supported when the materialized view includes no filter condition in the HAVING clause.

Action: Re-phrase the query to include a join.

QSM-02036: in-list present in mv

Cause: The capability in question is not supported when the materialized view uses an IN list.

Action: Re-phrase the query to avoid the use of IN lists.

QSM-02037: cannot evaluate constant expression at compile time

Cause: The capability in question is not supported when the materialized view uses a compile-time non-constant expression in a filter condition in the WHERE or HAVING clauses. For example, WHERE X=1 uses a compile-time constant expression in a filter condition. WHERE X=MY_PLSQL_FUNCTION() uses a compile-time non-constant expression in a filter condition.

Action: Re-phrase the query to avoid the use of a compile-time non-constant expressions in filter conditions.

QSM-02038: Partition Change Tracking (PCT) is enabled

Cause: The Partition Change Tracking (PCT) capability is supported for this materialized view.

Action: No action is needed.

QSM-02039: top level mv query uses grouping sets

Cause: The capability in question is not supported when the materialized view use grouping sets.

Action: Re-phrase the query to avoid use of grouping sets.

QSM-02040: top level query contains GSets and the key is too long for rewrite

Cause: The capability in question is not supported when the materialized view uses a grouping set with too many keys.

Action: Reduce the number of grouping set keys.

QSM-02041: nested aggregate function

Cause: The capability in question is not supported when the materialized view nests an aggregate function invocation as an argument to another aggregate function.

Action: Re-phrase the query to avoid the nested aggregate function invocation.

QSM-02042: view or subquery in from list

Cause: The capability in question is not supported when the materialized view references a view or subquery in the FROM list.

Action: Re-phrase the query to avoid the use of views or subqueries in the FROM list.

QSM-02044: ORDER BY clause in mv

Cause: The capability in question is not supported when the materialized view includes an ORDER BY clause.

Action: Remove the ORDER BY clause.

QSM-02045: START WITH clause in mv

Cause: The capability in question is not supported when the materialized view includes a START WITH clause.

Action: Re-phrase the query to avoid the use of the START WITH clause.

QSM-02047: window function in mv

Cause: The capability in question is not supported when the materialized view uses a window function.

Action: Re-phrase the query to avoid the use of window functions.

QSM-02048: outer join in mv

Cause: The capability in question is not supported when the materialized view uses an outer join.

Action: Re-phrase the query to avoid the use of outer joins.

QSM-02049: subquery using the ANY clause in mv

Cause: The capability in question is not supported when the materialized view uses the ANY clause with a subquery.

Action: Re-phrase the query to avoid the use of the ANY clause.

QSM-02050: subquery using the ALL clause in mv

Cause: The capability in question is not supported when the materialized view uses the ALL clause with a subquery.

Action: Re-phrase the query to avoid the use of the ALL clause.

QSM-02051: subquery using the NOT EXISTS clause in mv

Cause: The capability in question is not supported when the materialized view uses the NOT EXISTS with a subquery.

Action: Re-phrase the query to avoid the use of the NOT EXISTS clause.

QSM-02052: subquery using a select list in mv

Cause: The capability in question is not supported when the materialized view uses a select list.

Action: Re-phrase the query to avoid the use of a select list.

QSM-02053: collection subquery in mv

Cause: The capability in question is not supported when the materialized view uses a collection subquery.

Action: Re-phrase the query to avoid the use of collection subqueries.

QSM-02054: DISTINCT clause in select list in mv

Cause: The capability in question is not supported when the materialized view uses the DISTINCT clause in the select list.

Action: Re-phrase the query to avoid the use of the DISTINCT clause.

QSM-02055: mv references a packed object table or view

Cause: The capability in question is not supported when the materialized view references a packed object table or view.

Action: Re-phrase the query to avoid the use of the packed object tables or views.

QSM-02056: correlated variable and outer join in mv

Cause: The capability in question is not supported when the materialized view uses a correlated variable and an outer join.

Action: Re-phrase the query to avoid the use of the correlated variables or outer joins.

QSM-02057: ROWNUM referenced in mv

Cause: The capability in question is not supported when the materialized view references the ROWNUM function.

Action: Re-phrase the query to avoid the use of the ROWNUM function.

QSM-02058: set operator in mv and compatibility mode is less than 9.0

Cause: The capability in question is not supported when the materialized view uses a set operator and the compatibility mode is less than 9.0.

Action: Re-phrase the query to avoid the use of set operators or set the compatibility mode to 9.0 or greater.

QSM-02059: join may produce duplicate rows in mv

Cause: The capability in question is not supported when the materialized view contains a join condition that can result in duplicate rows in the materialized view.

Action: Re-phrase the query to avoid the occurrence of duplicate rows in the materialized view.

QSM-02061: one or more joins present in mv

Cause: The capability in question is not supported when the materialized view contains joins.

Action: Re-phrase the query to avoid the use of the joins.

QSM-02062: GROUP BY clause in mv

Cause: The capability in question is not supported when the materialized view uses the GROUP BY clause.

Action: Re-phrase the query to avoid the use of the GROUP BY clause.

QSM-02063: aggregate function in mv

Cause: The capability in question is not supported when the materialized view uses an aggregate function.

Action: Re-phrase the query to avoid the use of the aggregate functions.

QSM-02064: subquery in mv

Cause: The capability in question is not supported when the materialized view uses a subquery.

Action: Re-phrase the query to avoid the use of the subqueries.

QSM-02066: Oracle error: see RELATED_NUM and RELATED_TEXT for details

Cause: The capability in question is not supported because an attempt to create the materialized view would result in an error.

Action: Examine the associated Oracle error code in the RELATED_NUM column and the Oracle error text in the RELATED_TEXT column and address the problem.

QSM-02067: no partition key or PMARKER or join dependent expression in select list

Cause: The capability in question is not supported when the materialized view unless the select list (and group by list if a GROUP BY clause is present) includes the partition key or PMARKER function reference to the table in question or an expression join dependent on the partitioning column of the table in question.

Action: Add the partition key or a PMARKER function reference or a join dependent expression to the select list (and the GROUP BY clause, if present).

QSM-02068: relation is not a partitioned table

Cause: The capability in question is not supported when the relation in question is not a partitioned table.

Action: Change the query to reference a partitioned table.

QSM-02069: PCT not supported with multi-column partition key

Cause: The capability in question is not supported when the table in is partitioned on a multi-column key.

Action: Re-phrase the query to reference a table partitioned on a single column key.

QSM-02070: PCT not supported with this type of partitioning

Cause: The capability in question is not supported when the table in question uses certain types of partitioning.

Action: Re-phrase the query to reference a table that is uses a type of partitioning that is supported for this capability.

QSM-02071: internal error: undefined PCT failure code

Cause: An internal Oracle error has occurred.

Action: Report the problem through your normal support channels.

QSM-02072: requirements not satisfied for fast refresh of nested mv

Cause: The capability in question is not supported because one or more of the requirements for this capability have not been satisfied.

Action: Examine the relevant nested materialized view documentation in the Warehouse Guide and address the problem.

QSM-02073: non-primary key RepAPI mv is not fast refreshable

Cause: Fast refresh is supported for RepAPI materialized views only if it is also a primary key materialized view.

Action: Re-design the materialized view to be a primary key materialized view.

QSM-02074: materialized view over Heterogeneous Services link

Cause: The capability in question is not supported when the materialized view uses a heterogeneous link.

Action: Re-design the materialized view to avoid the use of the heterogeneous links.

QSM-02075: materialized view on synonym

Cause: The capability in question is not supported when the materialized view references a synonym, if the compatible parameter is earlier than 10.2.0.

Action: Re-phrase the query to avoid the use of the synonyms.

QSM-02076: sequence number in the mv log is newer than last refresh

Cause: The timestamp of the sequence number in the mv log was after the last refresh time.

Action: A complete refresh is required before the next fast refresh.

QSM-02077: mv log is newer than last full refresh

Cause: The capability in question is not supported when the relevant materialized view log was created after the creation or most recent complete refresh of the materialized view.

Action: Perform a complete refresh of the materialized view.

QSM-02078: mv log must have new values

Cause: The capability in question is not supported when the relevant materialized view log omits new values.

Action: Re-create the materialized view log using the NEW VALUES clause.

QSM-02079: mv log must have ROWID

Cause: The capability in question is not supported when the relevant materialized view log omits ROWIDs.

Action: Re-create the materialized view log using the ROWID clause.

QSM-02080: mv log must have primary key

Cause: The capability in question is not supported when the relevant materialized view log omits primary keys.

Action: Re-create the materialized view log using the PRIMARY KEY clause.

QSM-02081: mv log does not have all necessary columns

Cause: The capability in question is not supported when the relevant materialized view log omits columns referenced in the select list of the materialized view.

Action: Re-create the materialized view log and include all columns referenced in the select list.

QSM-02082: problem with mv log

Cause: The capability in question is not supported because of a problem the materialized view log in question.

Action: Examine the relevant materialized view log and fast refresh documentation in the Warehouse Guide and address the problem.

QSM-02083: mv references PL/SQL function that maintains state

Cause: The capability in question is not supported when the materialized view references a PL/SQL function that maintains state and which may not return the same value every time it is invoked against the same set of rows.

Action: Re-phrase the query to avoid such a PL/SQL function. Or modify the PL/SQL function to avoid state maintenance and change its declaration accordingly.

QSM-02084: DISTINCT clause on a duplicate sensitive aggregate function

Cause: The capability in question is not supported when the materialized view uses the DISTINCT clause in this context.

Action: Re-phrase the query to avoid the use of the DISTINCT clause.

QSM-02086: mv uses the MIN or MAX aggregate functions

Cause: The capability in question is not supported when the materialized view uses the MIN or MAX function.

Action: Re-phrase the query to avoid the use of the MIN or MAX functions.

QSM-02088: mv omits at least one grouping key from the select list

Cause: The capability in question is not supported when the materialized view omits any grouping expressions from the select list.

Action: Include all GROUP BY expressions in the select list.

QSM-02090: SELECT includes an expression that is not just a column

Cause: The capability in question is not supported when the materialized view uses an expression in the select list that is not a simple column reference.

Action: Re-phrase the query to avoid the use of the expressions that are not simple column references.

QSM-02091: mv references a non-repeatable or session-sensitive expression

Cause: The capability in question is not supported when the materialized view uses an expression that may not return the same value each time it is invoked against the same set of rows or that may return different values depending on session parameters.

Action: Re-phrase the query to avoid the use of such expressions.

QSM-02092: mv references a sequence number

Cause: The capability in question is not supported when the materialized view references a sequence number.

Action: Re-phrase the query to avoid the reference to sequence numbers.

QSM-02093: mv uses an object REF clause

Cause: The capability in question is not supported when the materialized view uses an object REF clause.

Action: Re-phrase the query to avoid the use of an object REF clause.

QSM-02096: mv references a named view

Cause: The capability in question is not supported when the materialized view references a view.

Action: Re-phrase the query to avoid references to views.

QSM-02099: mv references a remote table or view in the FROM list

Cause: The capability in question is not supported when the materialized view references a remote table or view in the FROM list.

Action: Re-phrase the query to avoid references to remote tables or views.

QSM-02101: mv references a synonym in the FROM list

Cause: The capability in question is not supported when the materialized view references a synonym in the FROM list.

Action: Re-phrase the query to avoid the reference to the synonym.

QSM-02102: mv FROM list references an object in the SYS schema

Cause: The capability in question is not supported when the materialized view references an object in the SYS schema.

Action: Re-phrase the query to avoid the reference to the SYS schema.

QSM-02104: aggregate function in a filter condition in the HAVING clause

Cause: The capability in question is not supported when the materialized view references an aggregate function in a filter condition in the HAVING clause.

Action: Re-phrase the query to avoid the use of aggregates in filter conditions in the HAVING clause.

QSM-02106: mv uses a filter condition in the WHERE or HAVING clause

Cause: The capability in question is not supported when the materialized view includes a filter condition in the WHERE or HAVING clause.

Action: Re-phrase the query to avoid the use of filter conditions in the WHERE or HAVING clauses.

QSM-02112: top level query has LEFT OUTER, RIGHT OUTER or FULL OUTER join

Cause: The capability in question is not supported when the materialized view uses these types of joins.

Action: Re-phrase the query to avoid the use of these types of joins.

QSM-02113: expression in select list references multiple tables or views

Cause: The capability in question is not supported when the materialized view includes an expression in the select list that references multiple tables or views.

Action: Re-phrase the query to avoid the use of the such expressions.

QSM-02114: no GROUP BY clause, no aggregates and not >= 9.0 compatibility

Cause: The capability in question is not supported when the materialized view has no GROUP BY clause, no aggregates and compatibility mode is less than 9.0.

Action: Re-phrase the query to avoid the include a GROUP BY clause or an aggregate function. Or set compatibility mode to 9.0 or greater.

QSM-02115: mv references a remote object and is refreshed ON COMMIT

Cause: The capability in question is not supported when the materialized view references a remote object and is refreshed ON COMMIT.

Action: Re-phrase the query to avoid the reference to the remote object or alter the materialized view to be refreshed ON DEMAND.

QSM-02116: multiple master sites

Cause: The capability in question is not supported when the materialized view references multiple remote objects that reside at different remote instances.

Action: Re-phrase the query to avoid the use of multiple master sites.

QSM-02117: missing GROUPING_ID or GROUPING functions on GROUP BY column(s)

Cause: The capability in question is not supported when the materialized view uses grouping sets but omits the relevant GROUPING_ID or GROUPING functions.

Action: Re-phrase the query to include the relevant GROUPING_ID or GROUPING functions.

QSM-02118: duplicate grouping sets

Cause: The capability in question is not supported when the materialized view redundantly references grouping sets.

Action: Re-phrase the query to avoid the use of the redundant grouping sets.

QSM-02119: internal error while analyzing required supporting aggregates

Cause: An internal Oracle error has occurred.

Action: Report the problem through your normal support channels.

QSM-02120: compatibility mode must be 9.0 or higher

Cause: The capability in question is not supported when the compatibility mode is less than 9.0.

Action: Set the compatibility mode to 9.0 or higher.

QSM-02121: set operator in a context not supported for fast refresh

Cause: The capability in question is not supported when the materialized view uses a set operator in this context.

Action: Re-phrase the query to avoid the use of the set operator.

QSM-02122: compatibility mode must be 8.1 or higher

Cause: The capability in question is not supported when the compatibility mode is less than 8.1.

Action: Set the compatibility mode to 8.1 or higher.

QSM-02123: subquery and UNION mv's must be primary key mv's

Cause: The capability in question is not supported when the materialized view is not a primary key materialized view and uses subqueries or the union operator in this context.

Action: Re-create the materialized view as a primary key materialized view.

QSM-02124: object type in WHERE clause

Cause: The capability in question is not supported when the materialized view references an object type in the WHERE clause.

Action: Re-phrase the query to avoid the reference to the object type.

QSM-02125: subquery join conditions don't meet requirements for capability

Cause: The capability in question is not supported when the materialized view uses a subquery in a join in this way.

Action: Examine the relevant replication documentation concerning subquery materialized views and address the problem.

QSM-02126: no rowid at master site

Cause: The capability in question is not supported when the materialized view references a remote site that does not support rowids.

Action: Re-phrase the query to avoid the reference to the remote site.

QSM-02127: not supported for this type mv by Oracle version at master site

Cause: The capability in question is not supported when the materialized view uses certain constructs and references an older version, remote Oracle instance.

Action: Re-phrase the query to avoid the use of the construct or upgrade the remote Oracle instance.

QSM-02128: does not meet the requirements of a primary key mv

Cause: The capability in question is not supported when the materialized view fails to meet the requirements of a primary key materialized view.

Action: Examine the relevant primary key materialized view replication documentation and address the problem.

QSM-02129: join or filter condition(s) are complex

Cause: The capability in question is not supported when the materialized view uses a complex join or filter condition.

Action: Re-phrase the query to simplify the join or filter condition.

QSM-02130: expression not supported for fast refresh

Cause: The capability in question is not supported when the materialized view references certain, complex expressions.

Action: Re-phrase the query to simplify the expression.

QSM-02131: agg(expr) requires correspondng SUM(expr) function

Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the SUM function on the same argument.

Action: Add the SUM function to the select list.

QSM-02132: agg(expr) requires corresponding COUNT(expr) function

Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the COUNT function on the same argument.

Action: Add the COUNT function to the select list.

QSM-02133: agg(expr) requires corresponding MIN(expr) function

Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the MIN function on the same argument.

Action: Add the MIN function to the select list.

QSM-02134: agg(expr) requires corresponding MAX(expr) function

Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the MAX function on the same argument.

Action: Add the MAX function to the select list.

QSM-02135: agg(expr) requires corresponding AVG(expr) function

Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the AVG function on the same argument.

Action: Add the AVG function to the select list.

QSM-02136: agg(expr) requires corresponding VARIANCE(expr) function

Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the VARIANCE function on the same argument.

Action: Add the VARIANCE function to the select list.

QSM-02137: agg(expr) requires corresponding STDDEV(expr) function

Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the STDDEV function on the same argument.

Action: Add the STDDEV function to the select list.

QSM-02138: agg(expr) requires corresponding agg(expr*expr) function

Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of that same aggregate function on the square of the same argument.

Action: Add an invocation of the same aggregate function on the square of the same argument (that is, the argument multiplied by itself).

QSM-02139: agg(expr) requires corresponding agg(expr+expr) function

Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of that same aggregate function on the same argument added to the same argument.

Action: Add the indicated aggregate function to the select list.

QSM-02140: agg(expr) requires corresponding SUM(expr*expr) function

Cause: The capability in question is not supported when the materialized view uses certain aggregate functions but omits an invocation of the SUM function on the square of the same argument (the argument multiplied by itself).

Action: Add the SUM function on the square of the argument.

QSM-02141: the reason why the capability is disabled has escaped analysis

Cause: The EXPLAIN_MV analysis engine has failed to capture the reason why the given capability is not possible.

Action: Report the problem through your normal problem reporting channels.

QSM-02142: COUNT(*) is not present in the select list

Cause: The materialized view query omits COUNT(*) from the select list.

Action: Add COUNT(*) to the select list.

QSM-02143: SUM(expr) without COUNT(expr)

Cause: SUM(expr) occurs in the select list without a corresponding COUNT(expr).

Action: Add COUNT(expr) to the select list.

QSM-02144: aggregate functions are present without a GROUP BY clause

Cause: One or more aggregate functions are present in the select list but a GROUP BY clause is not used.

Action: Add a GROUP BY clause.

QSM-02145: GROUP BY clause is present but no aggregate functions are used

Cause: A GROUP BY clause is used but no aggregate functions are present in the select list.

Action: Add an aggregate function to the select list.

QSM-02146: see the reason why REFRESH_FAST_AFTER_INSERT is disabled

Cause: REFRESH_FAST_AFTER_ONETAB_DML is disabled for the same reason that REFRESH_FAST_AFTER_INSERT is disabled.

Action: Correct the problem with REFRESH_FAST_AFTER_INSERT.

QSM-02147: default date format is sensitive to session settings

Cause: You have specified a date conversion operation using either the default format or an incomplete format. The default date format or an incomplete format is sensitive to session settings, and therefore may not be reproducible across different environments.

Action: Specify a complete date format string.

QSM-02148: many to many subquery joins require 9.0 compatibility or higher

Cause: You have specified a many to many join in your materialized view while running in less than 9.0 compatibility mode.

Action: Set your compatibility mode to 9.0 or higher or restructure the materialized view query.

QSM-02149: ON COMMIT with this MV requires 9.0 compatibility or higher

Cause: You have specified a materialized view that uses some combination of the following: joins aggregation filter conditions in the WHERE clause a remote relation in the FROM list a SUM(x) function without a corresponding COUNT(x) function an omitted COUNT(*) aggregate function a MIN() or MAX() aggregate

function in combination with the REFRESH ON COMMIT option while running in less than 9.0 compatibility mode.

Action: Set your compatibility mode to 9.0 or higher or restructure the materialized view query.

QSM-02150: select lists must be identical across the UNION operator

Cause: You have specified a materialized view using the UNION operator and the respective queries on each side of the UNION operator do not have the same select list. The RELATED_NAME column shows the alias of the first different select list item. The RELATED_NUM column shows the offset from the SELECT keyword to the start of this select list item.

Action: Restructure the materialized view query such that the respective sides of the UNION operator have identical select lists.

QSM-02151: subquery or named view in FROM list and < 9.0 compatibility

Cause: You have specified a materialized view that references a subquery or named view in its top level FROM list while running in less than 9.0 compatibility mode.

Action: Set compatibility mode to 9.0 or higher or restructure the materialized view query.

QSM-02152: subquery or named view in FROM list even after view merging

Cause: You have specified a materialized view that references a subquery or named view in its top level FROM list that could not be merged during the view merging process.

Action: Restructure the materialized view query.

QSM-02153: inline view or subquery in FROM list not supported for this type MV

Cause: You have specified a materialized view that references an inline view or a subquery. The indicated capability is not supported for this type of materialized view.

Action: Restructure the materialized view query.

QSM-02154: MV is not fast refreshable even with view merging

Cause: You have a materialized view with view in the FROM clause, however it does not meet the criteria for fast refresh after view merging.

Action: Restructure the materialized view query to remove the offending view or the complex construct in the view.

QSM-02161: see the reason why REFRESH_FAST_AFTER_ONETAB_DML is disabled

Cause: REFRESH_FAST_AFTER_ANY_DML is disabled for the same reason that REFRESH_FAST_AFTER_ONETAB_DML is disabled.

Action: Correct the problem with REFRESH_FAST_AFTER_ONETAB_DML.

QSM-02162: the detail table does not have a materialized view log

Cause: The fast refresh cannot be performed because the master table does not contain a materialized view log.

Action: Use the CREATE MATERIALIZED VIEW LOG command to create a materialized view log on the master table.

QSM-02163: cannot use object id columns from materialized view log

Cause: The materialized view log either does not have object id columns logged, or the timestamp associated with the object id columns is more recent than the last refresh time.

Action: A complete refresh is required before the next fast refresh. Add object id columns to the materialized view log, if required.

QSM-02169: the materialized view contains partition extended table name

Cause: Fast refresh of materialized aggregate views and/or materialized join views are not supported if they were defined using partition extended table names.

Action: Create the fast refreshable materialized view without using partition extended table names or create the materialized view as a complete refresh materialized view.

QSM-02170: tables must be identical across the UNION operator

Cause: You have specified a materialized view using the UNION operator and the tables on each side of the UNION operator do not match. Fast refresh is not supported in this context.

Action: Restructure the materialized view query such that the respective sides of the UNION operator have the same table.

QSM-02171: the materialized view has a join operation in the outer UNION block

Cause: Fast refresh is not supported if a materialized view having the UNION operator contains a join operation.

Action: Rewrite the materialized view query without the join.

QSM-02173: the unique constraints does not exist on the join columns of the inner table

Cause: If there are outer joins, unique constraints must exist on the join columns of the inner table. Otherwise, the materialized view can not be fast refreshable.

Action: None

QSM-02174: the materialized view does not have a UNION ALL marker column

Cause: For a materialized view with UNION ALL to be fast refreshable, it must have a UNION ALL marker column. This is a constant column, at the same ordinal position in each query block and must have distinct values in each query block.

Action: Add a UNION ALL marker column to each query block in the UNION ALL query defining the materialized view.

QSM-02175: some query block in UNION ALL MV is not fast refreshable

Cause: For a materialized view with UNION ALL to be fast refreshable, each query block must conform to a fast refreshable materialized join view or materialized aggregate view.

Action: Check each query block in the UNION ALL to ensure it is either a materialized view with joins or aggregates.

QSM-02176: MV with UNION ALL in a view is too complex

Cause: If a materialized view has a view whose definition involves a UNION ALL query, then the materialized view's defining query cannot have any clauses other than SELECT or FROM. Other clauses such as WHERE, HAVING, CONNECT BY, or GROUP BY are not allowed. Further more, the FROM clause should have only one item.

Action: Remove any clauses besides SELECT and FROM from the materialized view's defining query.

QSM-02177: MV with UNION ALL in a view must match the view's SELECT list

Cause: If a materialized view has a view whose definition involves a UNION ALL query, then the materialized view's select list must match the underlying view's select list exactly. It must not have any expressions and must not have add/drop/reorder columns from the underlying view.

Action: Use select * when defining a materialized view with a UNION ALL in a view.

QSM-02178: MV has a view with UNION ALL that is not fast refreshable

Cause: The materialized view has a view whose definition involves a UNION ALL query that does not satisfy the requirements for fast refresh.

Action: Check that the defining query of the view being referenced in the materialized view satisfies conditions for fast refresh of a UNION ALL materialized view.

QSM-02179: MV with UNION ALL requires compatibility >= 9.2

Cause: The setting of the COMPATIBLE initialization parameter is less than 9.2.0.

Action: Set COMPATIBLE to 9.2.0 or higher.

QSM-02180: no primary key constraint in the master table

Cause: The explain_mvview assumes that the materialized view is going to be created as the Primary Key materialized view. A Primary Key materialized view can not be created if the base table does not have a primary key constraint.

Action: Add a primary key constraint to the base table, or create the materialized view as Rowid MV by specifying the WITH ROWID option. If the materialized view is a Rowid MV, then it should be able to do complete refresh and even fast refresh, given that the materialized view log on the master table has a rowid.

QSM-02181: a SPREADSHEET clause is present

Cause: The capability in question is not supported when the materialized view uses a SPREADSHEET clause.

Action: Remove the SPREADSHEET clause.

QSM-02182: PCT is enabled through a join dependency

Cause: The capability in question is not supported when the materialized view does not contain some expression join dependent on the partitioning key of relation in question in the select list. For definition of join dependency, please look at Oracle documentation.

Action: Change the query to contain the partitioning key

QSM-02183: Expression to enable PCT not in PARTITION BY of analytic function or SPREADSHEET

Cause: The capability in question is not supported when the expression is not in the PARTITION BY clause

Action: Change the query so that the expression is in the PARTITION BY

QSM-02184: Expression to enable PCT cannot be rolled up

Cause: The capability in question is not supported when the expression is rolled up

Action: Change the query so that the expression is not rolled up

QSM-02185: no partition key or PMARKER in select list

Cause: The capability in question is not supported when the materialized view unless the select list (and group by list if a GROUP BY clause is present) includes either the partition key of or a PMARKER function reference to the table in question.

Action: Add the partition key or a PMARKER function reference to the select list (and the GROUP BY clause, if present).

QSM-02186: PARTITIONED OUTER JOIN is present

Cause: The capability in question is not supported when the materialized view has PARTITIONED OUTER JOIN.

Action: Remove PARTITIONED OUTER JOIN.

QSM-02187: materialized view on external table

Cause: The capability in question is not supported when the materialized view references an external table.

Action: Re-phrase the query to avoid the use of the external tables.

QSM-02188: named view in FROM list not supported for this type MV

Cause: You have specified a materialized view that references a named view The indicated capability is not supported for this type of materialized view.

Action: Restructure the materialized view query.

QSM-02189: materialized view definition changes

Cause: The definition of the materialized view has changed. Usually redefining the synonym or table in the definition can cause this. The materialized view can not be fast refreshed.

Action: Complete refresh or recreate the materialized view.

QSM-02190: SQL PIVOT or UNPIVOT is present

Cause: The capability in question is not supported when the materialized view has sql PIVOT or UNPIVOT operation.

Action: Remove sql PIVOT or UNPIVOT.

QSM-02191: types of MV logs are not compatible

Cause: The capability in question is not supported when the materialized view is defined on detail tables which do not have a compatible type of materialized view logs, either all timestamp based or commit SCN based.

Action: Complete refresh or recreate materialized view logs.

QSM-02192: commit SCN based MV log is not in consistent state

Cause: The capability in question is not supported when the relevant materialized view log is not in consistent state due to the failure when populating the mapping table of SYS.SNAP_XCMT\$.

Action: Perform a complete refresh of the materialized view.

QSM-02193: unsupported MV on commit SCN based MV logs

Cause: The capability in question is not supported when the relevant materialized view is not supported to be defined on detail tables which have commit SCN based MV logs.

Action: None

QSM-02194: CASE expressions present in materialized view

Cause: The capability in question is not supported when the materialized view contain CASE expressions.

Action: Re-phrase the query to avoid the use of CASE expressions.

QSM-02195: PCT FAST REFRESH is not possible if query contains a named view

Cause: The capability in question was not supported because the materialized view query contained a named view.

Action: Rephrase the query to avoid the use of named views.

QSM-02196: PCT FAST REFRESH is not possible if query contains an inline view

Cause: The capability in question was not supported because the materialized view query contained an inline view.

Action: Rephrase the query to avoid the use of an inline view.

QSM-02197: PCT FAST REFRESH is not possible if query contains a remote table

Cause: The capability in question was not supported because the materialized view query contained a remote table.

Action: Rephrase the query to avoid the use of a remote table.

QSM-02198: PCT FAST REFRESH is not possible if HAVING clause includes a subquery

Cause: The capability in question was not supported because the materialized view query HAVING clause included a subquery.

Action: Rephrase the query to avoid the use of a subquery in the HAVING clause.

QSM-02199: PCT FAST REFRESH is not possible if WHERE clause includes a subquery

Cause: The capability in question was not supported because the materialized view query WHERE clause included a subquery.

Action: Rephrase the query to avoid the use of a subquery in the WHERE clause.

QSM-02200: PCT FAST REFRESH is not possible if query contains LEFT OUTER, RIGHT OUTER or FULL OUTER JOIN

Cause: The capability in question was not supported because the materialized view query contained LEFT OUTER, RIGHT OUTER or FULL OUTER JOIN.

Action: Rephrase the query to avoid the use of LEFT OUTER, RIGHT OUTER or FULL OUTER JOIN.

QSM-02201: PCT FAST REFRESH is not possible if there is a self join or self cartesian product in query

Cause: The capability in question was not supported because the materialized view query contained self join or self cartesian product in the query.

Action: Rephrase the query to avoid the use of self joins or self cartesian product in the query.

QSM-02202: PCT FAST REFRESH is not possible if query has ORDER BY clause

Cause: The capability in question was not supported because the materialized view query contained an ORDER BY clause.

Action: Rephrase the query to avoid the use of the ORDER BY clause.

QSM-02203: PCT FAST REFRESH is not possible if query has set operand query blocks

Cause: The capability in question was not supported because the materialized view query contained set operand query blocks.

Action: Rephrase the query to avoid the use of set operand query blocks.

QSM-02204: PCT FAST REFRESH is not possible if query has an inner query

Cause: The capability in question was not supported because the materialized view query contained an inner query.

Action: Rephrase the query to avoid the use of the inner query.

QSM-02205: PCT FAST REFRESH is not possible if there is a subquery inside select-list

Cause: The capability in question was not supported because the materialized view query contained a subquery inside a select-list.

Action: Rephrase the query to avoid the use of a subquery inside a select-list.

QSM-02206: PCT FAST REFRESH is not possible because this query join may produce extra duplicate rows

Cause: The capability in question was not supported because the materialized view contained a join condition that can result in duplicate rows in the materialized view.

Action: Rephrase the query to avoid the occurrence of duplicate rows in the materialized view.

QSM-02207: PCT FAST REFRESH is not possible for complex queries

Cause: The capability in question was not supported because the materialized view query was too complex.

Action: No action is necessary.

QSM-02208: subquery using the NOT IN clause in materialized view

Cause: The capability in question was not supported when the materialized view uses NOT IN with a subquery.

Action: Rephrase the query to avoid the use of the NOT IN clause.

QSM-03112: Invalid CREATE MATERIALIZED VIEW statement *string*

Cause: The CREATE MATERIALIZED VIEW statement that was passed into the procedure was not a valid one.

Action: Check the reason(s) following the error or the statement and retry the operation.

QSM-03113: Cannot tune the MATERIALIZED VIEW statement *string*

Cause: The MATERIALIZED VIEW statement could not be tuned.

Action: Check the reason(s) following the error or the statement and retry the operation.

QSM-03114: Cannot tune FOR UPDATE materialized view

Cause: The materialized view was created with the FOR UPDATE option.

Action: Rephrase the statement to avoid the use of the FOR UPDATE option.

QSM-03115: Cannot tune materialized view ON PREBUILT table

Cause: The materialized view was created on a prebuilt table.

Action: Rephrase the statement to avoid the use of the ON PREBUILT option.

QSM-03116: The materialized view is already optimal and cannot be tuned any further

Cause: The materialized view has the capabilities that are specified in the statement.

Action: None

QSM-03117: Cannot tune the materialized view to be fast refreshable

Cause: The materialized view could not be tuned or decomposed to be fast refreshable.

Action: Run the dbms_mview.explain_mview to find out the reason.

QSM-03118: Cannot tune the materialized view for general rewrite

Cause: The materialized view could not be tuned for supporting general rewrite.

Action: Run the dbms_mview.explain_mview to find out the reason.

QSM-03119: The WHERE/HAVING clause is too complex for general query rewrite

Cause: The WHERE/HAVING was too complex for general rewrite.

Action: Try to simplify the WHERE/HAVING clause in the materialized view defining query.

QSM-03120: Cannot create materialized view log on encrypted columns

Cause: There were encrypted columns in materialized view defining query.

Action: Try to remove the encrypted columns in the materialized view defining query.

RMAN-00201 to RMAN-20514

RMAN-00201: Do you really want to execute the above repair (enter YES or NO)?

Cause: This is a user prompt.

Action: Answer the question to proceed.

RMAN-00202: Do you want to open the database (enter YES or NO)?

Cause: This is a user prompt.

Action: Answer the question to proceed.

RMAN-00203: Do you want to open resetlogs the database (enter YES or NO)?

Cause: This is a user prompt.

Action: Answer the question to proceed.

RMAN-00204: Do you really want to delete the above objects (enter YES or NO)?

Cause: This is a user prompt.

Action: Answer the question to proceed.

RMAN-00205: Do you really want to drop all backups and the database (enter YES or NO)?

Cause: This is a user prompt.

Action: Answer the question to proceed.

RMAN-00206: Do you really want to drop the database (enter YES or NO)?

Cause: This is a user prompt.

Action: Answer the question to proceed.

RMAN-00207: Do you really want to unregister the database (enter YES or NO)?

Cause: This is a user prompt.

Action: Answer the question to proceed.

RMAN-00208: Want to unregister the database with target db_unique_name (enter YES or NO)?

Cause: This is a user prompt.

Action: Answer the question to proceed.

RMAN-00209: Do you really want to change the above failures (enter YES or NO)?

Cause: This is a user prompt.

Action: Answer the question to proceed.

RMAN-00210: Do you really want to catalog the above files (enter YES or NO)?

-
- Cause:** This is a user prompt.
Action: Answer the question to proceed.
- RMAN-00211: Error occurred getting response - assuming NO response**
Cause: An error occurred reading user response.
Action: No action is required, this is an informational message only.
- RMAN-00212: "string" is an invalid response - please re-enter.**
Cause: An incorrect response was entered.
Action: Enter a correct response.
- RMAN-00550: parser package failed to load**
Cause: lploadpkg() return an error indication.
Action: This message should be accompanied by other error message(s) indicating the cause of the error.
- RMAN-00551: initialization of parser package failed**
Cause: The parser package initialization routine returned an error.
Action: This message should be accompanied by other error message(s) indicating the cause of the error.
- RMAN-00552: syntax error in command line arguments**
Cause: The arguments supplied to RMAN could not be parsed, or no arguments were supplied at all.
Action: This message should be accompanied by other error message(s) indicating the cause of the error.
- RMAN-00553: internal recovery manager package failed to load**
Cause: lploadpkg() return an error indication.
Action: This message should be accompanied by other error message(s) indicating the cause of the error.
- RMAN-00554: initialization of internal recovery manager package failed**
Cause: The internal package initialization routine returned an error.
Action: This message should be accompanied by other error message(s) indicating the cause of the error.
- RMAN-00555: target database connect string must be specified**
Cause: The TARGET parameter was not specified.
Action: Supply the necessary parameter.
- RMAN-00556: could not open CMDFILE "string"**
Cause: An error occurred when trying to open the file.
Action: Check that the file name was specified correctly and that the file exists and that the user running RMAN has read permission for the file.
- RMAN-00557: could not open MSGLOG "string"**
Cause: An error occurred when trying to open the file.
Action: Check that the file name was specified correctly and that the file exists and that the user running RMAN has write permission for the file.
- RMAN-00558: error encountered while parsing input commands**

Cause: The parser detected a syntax error.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-00562: username too long

Cause: The specified user name exceeds the maximum allowable username length.

Action: Correct the username.

RMAN-00563: password too long

Cause: The specified password exceeds the maximum allowable password length.

Action: Correct the password.

RMAN-00564: host data too long

Cause: The SQL*NET host connect string exceeds the maximum allowable length.

Action: Correct the host string.

RMAN-00565: unable to read input file

Cause: An error occurred while trying to read from STDIN or from the CMDFILE.

Action: Ensure that the cmdfile is readable. The cmdfile must be a text file with 1 line per record.

RMAN-00566: could not open TRACE "*string*"

Cause: An error occurred when trying to open the file.

Action: Check that the file name was specified correctly and that the user running RMAN has write permission for the file.

RMAN-00567: Recovery Manager could not print some error messages

Cause: An error occurred while trying to print the error message stack.

Action: If the associated error message indicates a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-00568: user interrupt received

Cause: The user typed ^C or ATTN.

Action: No action is required.

RMAN-00569: ===== ERROR MESSAGE STACK FOLLOWS

=====

Cause: This message precedes an error message stack.

Action: The errors are printed in last-in first-out order. To interpret them correctly, read from the bottom to the top.

RMAN-00570: **end-of-file**

Cause: The end of an inline cmdfile was reached. This is just an informational message.

Action: No action is required.

RMAN-00571:

=====

Cause: Displayed to highlight the error message stack.

Action: The errors are printed in last-in first-out order. To interpret them correctly, read from the bottom to the top.

RMAN-00572: waiting for DBMS_PIPE input

Cause: This message is used only when the PIPE option was specified.

Action: enqueue some RMAN input into the pipe

**RMAN-00573: DBMS_PIPE.NEXT_ITEM_TIME returned unknown type code:
*number***

Cause: This is an internal error.

Action: contact Oracle Support Services.

RMAN-00574: rman aborting due to errors reading/writing DBMS_PIPE

Cause: RMAN was run with input/output being sent to DBMS_PIPE. An error was encountered while reading from or writing to the pipe. This error should be preceded by information describing the error.

Action: RMAN terminates. Refer to the cause/action for the preceding errors.

RMAN-00575: timeout while trying to write to DBMS_PIPE

Cause: d by death of the process that was talking to rman.

Action: RMAN will abort.

RMAN-00576: PIPE cannot be used with CMDFILE

Cause: The PIPE and CMDFILE options cannot be used together. When using the PIPE option, RMAN must obtain its input from the input pipe.

Action: Remove either the PIPE or CMDFILE option.

RMAN-00577: PIPE requires that TARGET be specified on the command line

Cause: The PIPE option obtains its input from, and writes its output to, an Oracle database pipe in the target database. Therefore, the target database connection must be specified on the command line, so that RMAN can connect to the target database to receive its input from the pipe.

Action: Specify the TARGET option on the RMAN command line.

RMAN-00578: pipe *string* is not private and owned by SYS

Cause: The pipe that RMAN needs to use for its input or output is either a public pipe or a private pipe that is not owned by SYS. This is a potential security problem, because it allows a non-SYS user to issue commands to RMAN or to retrieve the RMAN output.

Action: If you are attempting to put data on the RMAN input pipe prior to starting RMAN, so RMAN will process the data on the pipe as soon as it starts, you must be connected as SYS and you must first use the DBMS_PIPE.CREATE_PIPE function to explicitly create the pipe as a private pipe.

RMAN-00579: SCRIPT cannot be used with CMDFILE

Cause: The SCRIPT and CMDFILE options cannot be used together. When using the SCRIPT option, RMAN executes only the specified script.

Action: Remove either the SCRIPT or CMDFILE option.

RMAN-00600: internal error, arguments [*string*] [*string*] [*string*] [*string*] [*string*]

Cause: An internal error in recovery manager occurred.

Action: Contact Oracle Support Services.

RMAN-00601: fatal error in recovery manager

Cause: A fatal error has occurred.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-00700: SCRIPT requires that TARGET be specified on the command line

Cause: A SCRIPT option was included on the RMAN command line without a specified TARGET database.

Action: Specify the TARGET option on the RMAN command line.

RMAN-00701: SCRIPT requires that CATALOG be specified on the command line

Cause: A SCRIPT option was included on the RMAN command line without a specified CATALOG recovery catalog.

Action: Specify the CATALOG option on the RMAN command line.

RMAN-00702: The command has no syntax errors

Cause: This is an informational message only.

Action: No action is required.

RMAN-00703: The cmdfile has no syntax errors

Cause: This is an informational message only.

Action: No action is required.

RMAN-01006: error signaled during parse

Cause: An error was signaled during parsing.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-01007: at line *number* column *number* file: *string*

Cause: This is an informational message indicating the line and column where a syntax error was detected.

Action: No action is required.

RMAN-01008: the bad identifier was: *string*

Cause: This is an informational message indicating the identifier token that caused a syntax error.

Action: No action is required.

RMAN-01009: syntax error: found "*string*": expecting one of: "*string*"

Cause: A syntax error was signaled during parsing.

Action: Correct the input.

RMAN-02000: wrong message file version (msg *number* not found)

Cause: The rmanxx.msb file is not the correct version.

Action: Check that the installation was done correctly. The RMAN binary (executable, load module, whatever it is called on your O/S) and the rmanxx.msb file must be from the same version, release, and patch level.

RMAN-02001: unrecognized punctuation symbol "*string*"

Cause: An illegal punctuation character was encountered.

Action: Remove the illegal character.

RMAN-02002: unexpected end of input file reached

Cause: This is probably caused by failure to supply the closing quote for a quoted string.

Action: Correct the input.

RMAN-02003: unrecognized character: *string*

Cause: An input character that is neither an alpha, digit, or punctuation was encountered.

Action: Remove the character.

RMAN-02004: quoted string too big

Cause: A quoted string longer than 2000 bytes was encountered.

Action: This may be caused by a missing close quote. If so, add the missing quote, otherwise shorten the string.

RMAN-02005: token too big

Cause: A token longer than 1000 bytes was encountered

Action: Tokens must be separated by whitespace or punctuation. Either add the missing whitespace or punctuation, or shorten the token.

RMAN-02006: script line too long

Cause: a line longer than 500 bytes was encountered

Action: break the line up into shorter lines

RMAN-02007: Integer value overflow

Cause: Parser failed to convert input string to integer

Action: Acceptable values for integer are from 0 to 2147483648. Retry command using valid integer value.

RMAN-02008: no value exists for variable "*string*"

Cause: The RMAN variable specified was either undefined or null

Action: Verify that a proper value has been given to that variable.

RMAN-02009: unexpected end of command file reached

Cause: This is probably caused by failure to supply the closing brace for a stored script in a command file.

Action: Correct the input.

RMAN-03000: recovery manager compiler component initialization failed

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-03001: recovery manager command sequencer component initialization failed

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-03002: failure of *string* command at *string*

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-03003: command not implemented yet: *string*

Cause: The command is not implemented in the current release.

Action: Avoid using the command.

RMAN-03004: fatal error during execution of command

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-03008: error while performing automatic resync of recovery catalog

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-03009: failure of *string* command on *string* channel at *string*

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-03010: fatal error during library cache pre-loading

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-03011: Recovery Manager *string*

Cause: This is the RMAN banner

Action: No action is required.

RMAN-03012: fatal error during compilation of command

Cause: A fatal error occurred during compilation of a command.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-03013: Copyright (c) 1995, 2003, Oracle Corporation. All rights reserved.

Cause: This is the copyright banner

Action: No action is required.

RMAN-03014: implicit resync of recovery catalog failed

Cause: of the failure.

Action: No action is required.

RMAN-03015: error occurred in stored script *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-03017: recursion detected in stored script *string*

Cause: A stored script is calling itself or another script which calls itself.

Action: Remove the recursion.

RMAN-03018: asynchronous RPCs are working correctly

Cause: This is an informational message only.

Action: No action is required.

RMAN-03019: asynchronous RPCs are NOT working

Cause: The RPCTEST command has determined that RPCs are not executing asynchronously. Instead, they are blocking. This is caused by using a SQL*NET driver that does not support non-blocking UPI.

Action: Try using a different SQL*NET driver.

RMAN-03020: asynchronous RPC test will take 1 minute

Cause: This is an informational message only.

Action: No action is required.

RMAN-03023: executing command: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-03028: fatal error code for command *string : number*

Cause: Informational message. This precedes error 3012.

Action: No action is required.

RMAN-03029: echo set on

Cause: a SET ECHO ON command was issued

Action: No action is required.

RMAN-03030: echo set off

Cause: a SET ECHO OFF command was issued

Action: No action is required.

RMAN-03031: this option of set command needs to be used inside a run block

Cause: The option used with the SET command is not valid outside a run block.

Action: Change the SET command or place it inside a run block.

RMAN-03032: this option of set command needs to be used outside of a run block

Cause: The option used with the SET command is not valid inside of a run block.

Action: Change the SET command or place it outside a run block.

RMAN-03033: current log archived

Cause: "ALTER SYSTEM ARCHIVE LOG CURRENT" command completed successfully.

Action: None, this is an informational message.

RMAN-03034: LEVEL *number* is invalid. LEVEL must be between *string* and *string*

Cause: An invalid DEBUG LEVEL was used.

Action: Change the DEBUG LEVEL argument.

RMAN-03035: Debugging turned off

Cause: a DEBUG OFF command was issued

Action: No action is required.

RMAN-03036: Debugging set to level=*number*, types=*string*

Cause: a DEBUG command was issued

-
- Action:** No action is required.
- RMAN-03037: Spooling started in log file:** *string*
Cause: a SPOOL LOG TO ... command was issued
Action: No action is required.
- RMAN-03038: Spooling started in trace file:** *string*
Cause: a SPOOL TRACE TO ... command was issued
Action: No action is required.
- RMAN-03039: Spooling for log turned off**
Cause: a SPOOL LOG OFF command was issued
Action: No action is required.
- RMAN-03040: Spooling for trace turned off**
Cause: a SPOOL TRACE TO ... command was issued
Action: No action is required.
- RMAN-03042: error while analyzing automatic repair options**
Cause: of the failure.
Action: No action is required.
- RMAN-03090: Starting *string* at *string***
Cause: This is an informational message only.
Action: No action is required.
- RMAN-03091: Finished *string* at *string***
Cause: This is an informational message only.
Action: No action is required.
- RMAN-03098: *string*RMAN-number: *stringstring***
Cause: This is the message prefix with a possible indentation.
Action: No action is required.
- RMAN-03099: job cancelled at user request**
Cause: The user interrupted the current job.
Action: None
- RMAN-03999: Oracle error occurred while while converting a date: ORA-number:
*string***
Cause: Internal error converting a date.
Action: Contact Oracle Support Services.
- RMAN-04000: memory allocation failure**
Cause: A memory allocation request could not be satisfied.
Action: Increase the amount of memory available to RMAN.
- RMAN-04001: heap initialization failure**
Cause: This message should be accompanied by other error message(s) indicating the cause of the error.
Action: Check the accompanying errors.

RMAN-04002: OCIPI failed, ORA-string

Cause: OCI process level initialization failed.

Action: This error should not normally occur.

RMAN-04003: OCIINIT failed

Cause: The call to OCIEnvInit failed.

Action: This error should not normally happen. Contact Oracle Customer Support.

RMAN-04004: error from recovery catalog database: string

Cause: Oracle error signaled by catalog database. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-04005: error from target database: string

Cause: Oracle error signaled by target database. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-04006: error from auxiliary database: string

Cause: Oracle error signaled by auxiliary database. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-04007: WARNING from recovery catalog database: string

Cause: Non fatal Oracle error signaled by catalog database. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-04008: WARNING from target database: string

Cause: Non fatal Oracle error signaled by target database. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-04009: WARNING from auxiliary database: string

Cause: Non fatal Oracle error signaled by auxiliary database. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-04010: target database Password:

Cause: No password was provided for the target database.

Action: Provide target database password.

RMAN-04011: recovery catalog database Password:

Cause: No password was provided for the recovery catalog database.

Action: Provide recovery catalog database password.

RMAN-04012: auxiliary database Password:

Cause: No password was provided for the auxiliary database.

Action: Provide auxiliary database password.

RMAN-04013: must connect before startup

Cause: A STARTUP command was attempted before connecting to the database.

Action: Connect to database before attempting STARTUP command.

RMAN-04014: startup failed: *string*

Cause: The database failed to startup.

Action: The cause of the failure is included in the error message. Correct the cause of the failure and retry the startup command.

RMAN-04015: error setting target database character set to *string*

Cause: An error was received while setting the session character set in the target database.

Action: This error should not normally happen. Contact Oracle Customer Support.

RMAN-04016: could not get OCI error handle

Cause: An error was received while initializing the OCI layer.

Action: This error should not normally happen. Contact Oracle Customer Support.

RMAN-04017: startup error description: *string*

Cause: of failure.

Action: No action is required.

RMAN-04020: target database name "*string*" does not match channel's name: "*string*"

Cause: The CONNECT clause in the ALLOCATE command has resulted in a connection to a database which is not the same as the one used to connect to the target database.

Action: Verify that the CONNECT string connects to the same database as the one specified in the TARGET connection for the CONNECT command.

RMAN-04021: target database DBID *string* does not match channel's DBID *string*

Cause: The CONNECT clause in the ALLOCATE command has resulted in a connection to a database which is not the same as the one used to connect to the target database.

Action: Verify that the CONNECT string connects to the same database as the one specified in the TARGET connection for the CONNECT command.

RMAN-04022: target database mount id *string* does not match channel's mount id *string*

Cause: The CONNECT clause in the ALLOCATE command has resulted in a connection to a database which is not the same as the one used to connect to the target database.

Action: Verify that the CONNECT string connects to the same database as the one specified in the TARGET connection for the CONNECT command.

RMAN-04024: starting Oracle instance without parameter file for retrieval of spfile

Cause: The instance could not be started because no default parameter file (either PFILE or SPFILE) could be found. The instance will be started in restricted mode with default parameters.

Action: None - this is an informational message.

RMAN-04025: unable to generate a temporary file

Cause: Creation of a temporary file failed. It could be that the system does not have enough resources (disk space, memory or similar).

Action: Verify and free some system resources memory and try again.

RMAN-04026: unable to open a temporary file: "string"

Cause: Opening of a temporary file failed. It could be that the system does not have enough resources (disk space, memory or similar).

Action: Verify and free some system resources memory and try again.

RMAN-04027: unable to write to a temporary file: "string"

Cause: Writing to a temporary file failed. It could be that the system does not have enough resources (disk space, memory or similar).

Action: Verify and free some system resources memory and try again.

RMAN-04031: initialization parameters used for automatic instance: string

Cause: This is an informational message only.

Action: No action is required.

RMAN-04032: using contents of file string

Cause: The specified file was included as part of the auxiliary database parameter file. This is an informational message.

Action: No action is required.

RMAN-04033: cannot open auxiliary parameter file string

Cause: An auxiliary parameter file was specified with SET AUXILIARY INSTANCE PARAMETER FILE command but the specified file cannot be found.

Action: Set the parameter file to an existent file or retry the command without setting AUXILIARY INSTANCE PARAMETER FILE.

RMAN-04034: source recovery catalog database Password:

Cause: A password was not provided for the source recovery catalog database.

Action: Provide source recovery catalog database password.

RMAN-04035: error from source recovery catalog database: string

Cause: Oracle error signaled by source recovery catalog database. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-04036: WARNING from source recovery catalog database: string

Cause: Nonfatal Oracle error signaled by source recovery catalog database. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-05000: CONFIGURE AUXNAME required for datafile string

Cause: Either: -) The control file mounted by the auxiliary database does not have an entry for this datafile, therefore file name conversion is not possible. -) A COPY DATAFILE TO AUXNAME command was issued, but no auxname was set for this datafile.

Action: Use the CONFIGURE AUXNAME command to specify a file name that the auxiliary database can use as a restore destination.

RMAN-05001: auxiliary file name *string* conflicts with a file used by the target database

Cause: RMAN is attempting to use the specified file name as a restore destination in the auxiliary database, but this name is already in use by the target database.

Action: Use the CONFIGURE AUXNAME command to specify a name for the data file that does not conflict with a file name in use by the target db.

RMAN-05002: aborting Tablespace Point-in-Time Recovery

Cause: Previously encountered error(s) were issued which require corrective action.

Action: Resolve the error conditions, and then re-issue the RECOVER command.

RMAN-05003: Tablespace Point-in-Time Recovery is not allowed for tablespace *string*

Cause: The SYSTEM, SYSUAX or a tablespace containing rollback segments is not allowed in Tablespace Point-in-Time Recovery.

Action: Remove the indicated tablespace from the recovery set and retry the operation.

RMAN-05004: target database log mode is NOARCHIVELOG

Cause: An attempt was made to apply Tablespace Point-in-Time Recovery to a database that is in NOARCHIVELOG mode.

Action: If all required archived log files are available for Tablespace Point-in-Time Recovery, alter the target database log mode to ARCHIVELOG and retry the Tablespace Point-in-Time Recovery operation. Otherwise, Tablespace Point-in-Time Recovery cannot be applied to this database.

RMAN-05005: Tablespace Point-in-Time Recovery is not allowed for re-created tablespace *string*

Cause: The requested tablespace has been re-created and is not allowed in Point-in-Time Recovery.

Action: Remove the indicated tablespace from the recovery set and retry the operation.

RMAN-05006: cannot recover clone standby single tablespaces

Cause: Standby recover can only be performed for the whole database.

Action: Change the tablespace list to a database specification.

RMAN-05007: no channel allocated

Cause: A command was entered that requires a channel, and no channel is allocated.

Action: Use ALLOCATE CHANNEL before using the command

RMAN-05009: Block Media Recovery requires Enterprise Edition

Cause: The RECOVER...BLOCK command was specified.

Action: Remove the RECOVER...BLOCK command.

RMAN-05010: target database must be opened in READ WRITE mode for Tablespace Point-in-Time Recovery

Cause: The target database was not opened in read write mode.

Action: Open the database in read write mode.

RMAN-05011: auxiliary instance must be in NOMOUNT state for Tablespace Point-in-Time Recovery

Cause: The Auxiliary instance was not in NOMOUNT state.

Action: Open the auxiliary instance in NOMOUNT state.

RMAN-05013: auxiliary control file name *string* conflicts with a file used by the target database

Cause: RMAN is attempting to use the specified control file name for Tablespace Point-in-Time Recovery as a restore destination in the auxiliary database, but this name is already in use by the target database.

Action: Set control_files parameter in the auxiliary instance to a name that does not conflict with a file name in use by the target database.

RMAN-05014: Tablespaces with undo segments were not found in recovery catalog

Cause: The recovery catalog did not have information about tablespaces with undo segments.

Action: Manually specify the tablespaces with undo segments in the optional UNDO tablespaces clause of the RECOVER command.

RMAN-05015: WARNING: not enough information in recovery catalog for specified point-in-time recovery

Cause: The recovery catalog did not have information about the tablespaces with undo segments at the specified Point-in-Time. This happened because the current recovery catalog was not in use at the specified Point-in-Time. A list of tablespaces with undo segments was supplied.

Action: RMAN assumes that the current set of tablespaces with undo segments is the same set that was in use at the specified Point-in-Time. If the set of tablespaces with undo segments changes, the recovery fails. If recovery fails, use the optional UNDO TABLESPACE clause of the RECOVER command to specify the correct set of tablespaces.

RMAN-05016: failover to previous backup

Cause: This is an informational message to indicate the RMAN could not successfully restore the files using the specified backups. An attempt was made to restore the datafile/archived logs/ control file/SPFILE using a previous existing backup.

Action: See accompanying additional error messages indicating the cause of the failover.

RMAN-05017: no copy of datafile *number* found to recover

Cause: A RECOVER COPY command was not able to proceed because no copy of indicated file was found to recover. Possible causes include the following:

1. no copy of indicated file exists on disk that satisfy the criteria specified in the user's recover operands.
2. copy of indicated datafile exists on disk but no incremental backup was found to apply to the datafile copy.

Action: One of the following:

1. Use or correct TAG specification to recover a different datafile copy.
2. Use BACKUP FOR RECOVER OF COPY command to create necessary incremental backup or copy.

RMAN-05018: some datafile copies cannot be recovered, aborting the RECOVER command

Cause: This error message can follow one or more RMAN-5017 or RMAN-5019 error messages.

Action: See RMAN-5017 or RMAN-5019 error messages documentation for more information.

RMAN-05019: WARNING: no channel of required type allocated to recover copy of datafile *number*

Cause: A RECOVER COPY command could not proceed because incremental backup sets exist on a device type that has not been allocated.

Action: Use the LIST command to determine which device type is needed, then allocate a channel of that type.

RMAN-05020: cannot specify AUXILIARY DESTINATION option for normal recovery

Cause: The AUXILIARY DESTINATION option was specified for a normal recovery. It is only allowed for Tablespace Point-in-Time Recovery.

Action: Remove the AUXILIARY DESTINATION option and re-run the RECOVER command.

RMAN-05021: this configuration cannot be changed for a BACKUP or STANDBY control file

Cause: The user attempted to modify the configuration which cannot be changed for a BACKUP or STANDBY control file while the mounted control file was either BACKUP or STANDBY. The following configurations can be changed only when connected to primary database instance that has CURRENT/CREATED control file type mounted: CONFIGURE RETENTION POLICY CONFIGURE EXCLUDE CONFIGURE ENCRYPTION CONFIGURE DB_UNIQUE_NAME

Action: Connect to primary database instance and execute the command.

RMAN-05022: TRANSPORT TABLESPACE may not be used with user-managed auxiliary instance

Cause: A user-managed auxiliary instance was specified.

Action: Retry the operation with an RMAN-managed auxiliary instance.

RMAN-05023: TABLESPACE DESTINATION required

Cause: A required TABLESPACE DESTINATION was not specified.

Action: Specify a TABLESPACE DESTINATION and retry the operation.

RMAN-05024: List of tablespaces presumed to have UNDO segments

Cause: Accompanying message to 5015.

Action: See action of message 5015.

RMAN-05025: Tablespace *string*

Cause: Accompanying message to 5015.

Action: See action of message 5015.

RMAN-05026: WARNING: presuming following set of tablespaces applies to specified point-in-time

Cause: RMAN assumes that the current set of tablespaces with undo segments is the same set that was in use at the specified Point-in-Time. If the set of tablespaces

with undo segments changes, the recovery fails. If recovery fails, use the optional UNDO TABLESPACE clause of the RECOVER command to specify the correct set of tablespaces.

Action: RMAN assumes that the current set of tablespaces with undo segments is the same set that was in use at the specified Point-in-Time. If the set of tablespaces with undo segments changes, the recovery fails. If recovery fails, use the optional UNDO TABLESPACE clause of the RECOVER command to specify the correct set of tablespaces.

RMAN-05027: List of tablespaces expected to have UNDO segments

Cause: Accompanying message to 5026.

Action: See action of message 5026.

RMAN-05028: Tablespace *string*

Cause: Accompanying message to 5026.

Action: See action of message 5026.

RMAN-05029: UNDO TABLESPACE clause is only valid for Tablespace Point-in-Time Recovery

Cause: The UNDO TABLESPACE clause was specified for non-Tablespace Point-in-Time Recovery.

Action: Remove the UNDO TABLESPACE clause.

RMAN-05030: CLONE clause cannot be used with Tablespace Point-in-Time Recovery

Cause: The CLONE clause was specified for a Tablespace Point-in-Time Recovery.

Action: Remove the CLONE clause.

RMAN-05031: cannot specify UNDO TABLESPACE clause for normal recovery

Cause: The UNDO TABLESPACE clause was specified for a normal recovery. It is only allowed for Tablespace Point-in-Time Recovery.

Action: Remove the UNDO TABLESPACE clause and re-run the RECOVER command.

RMAN-05032: datafile *string* will be created automatically during restore operation

Cause: The specified datafile did not have an available backup.

Action: None. This is an informational message displayed for VALIDATE or PREVIEW option of the RESTORE command.

RMAN-05033: Media recovery start SCN is *string*

Cause: The above system change number (SCN) would be starting media recovery SCN, if the specified files are restored.

Action: None. This is an informational message displayed for PREVIEW option of the RESTORE command.

RMAN-05034: Recovery must be done beyond SCN *string* to clear datafile fuzziness

Cause: The above system change number (SCN) identifies the minimum SCN beyond which the media recovery must be performed on the specific datafile to clear the media recovery fuzziness for all datafile.

Action: None. This is an informational message displayed for PREVIEW option of the RESTORE command.

RMAN-05035: archived logs generated after SCN *string* not found in repository

Cause: The recovery catalog or target database control file did not have a record of archived logs containing the redo generated after the specified system change number (SCN).

Action: None. To avoid this message, perform a log switch if the database is in open mode.

RMAN-05036: FOR DB_UNIQUE_NAME option cannot be used for this configuration

Cause: An attempt was made to set the configuration which cannot be used with FOR DB_UNIQUE_NAME option.

Action: Remove FOR DB_UNIQUE_NAME option and execute the command.

RMAN-05037: FOR DB_UNIQUE_NAME option cannot be used in nocatalog mode

Cause: An attempt was made to set the remote configuration in nocatalog mode.

Action: Connect to recovery catalog and execute the command.

RMAN-05038: unable to determine UNTIL SCN for TRANSPORT

Cause: No archived logs were found in the control file.

Action: Add UNTIL clause to TRANSPORT command and retry.

RMAN-05039: One or more auxiliary set datafiles could not be removed

Cause: There was an error while performing Tablespace Point-in-Time Recovery. Some of the restored datafiles had OMF names and were not deleted.

Action: Manually remove the auxiliary set datafiles that were not removed.

RMAN-05040: List of tablespaces that have been dropped from the target database:

Cause: One or more tablespaces in the recovery set were not found in the control file of the target database.

Action: None. Informational message.

RMAN-05041: Error during export of metadata

Cause: Export of metadata received an error from Data Pump.

Action: This message is accompanied by other error message(s) indicating the cause of the error.

RMAN-05042: Error during import of metadata

Cause: Import of metadata received an error from Data Pump.

Action: This message is accompanied by other error message(s) indicating the cause of the error.

RMAN-05043: Tablespace *string*

Cause: Accompanying message to 5040.

Action: See Action of message 5040.

RMAN-05044: Performing export of metadata...

Cause: This is an informational message only.

Action: No action is required.

RMAN-05045: Performing import of metadata...

Cause: This is an informational message only.

Action: No action is required.

RMAN-05046: Export completed

Cause: This is an informational message only.

Action: No action is required.

RMAN-05047: Import completed

Cause: This is an informational message only.

Action: No action is required.

RMAN-05048: specified file name *string* conflicts with a file used by the target database

Cause: The specified file name was already in use by another datafile in the database.

Action: Use SET NEWNAME command to specify a different name for the datafile that does not conflict with a file name in use by the target database.

RMAN-05049: datafile *string* is an Oracle Managed File, DB_CREATE_FILE_DEST not set at target

Cause: A Tablespace Point-in-Time Recovery was attempted but the datafile is an Oracle Managed File and DB_FILE_CREATE_DEST is not currently set for the target database.

Action: Specify DB_FILE_CREATE_DEST for the target database or provide a NEWNAME for the specified datafile.

RMAN-05050: flashing back control file to SCN *string*

Cause: RESTORE command was issued with a SET UNTIL clause and Flashback Database enabled. The control file was flashed back to the SET UNTIL time.

Action: This is an informational message only.

RMAN-05051: analyzing automatic repair options; this may take some time

Cause: This is an informational message only.

Action: No action is required.

RMAN-05052: Repair *string* is not compatible with this version of RMAN.

Cause: The specified repair was not compatible with this version of Recovery Manager (RMAN).

Action: Use a newer version of the RMAN executable.

RMAN-05053: AUXILIARY DESTINATION is only valid when using a RMAN-managed auxiliary instance

Cause: AUXILIARY DESTINATION clause was specified while using an user-managed auxiliary instance.

Action: Do not specify AUXILIARY DESTINATION clause and retry the operation or use a RMAN-managed auxiliary instance.

RMAN-05054: recover block operand *string* cannot be used to recover datafile

Cause: The specified operand could not be used with RECOVER datafile command.

Action: Delete the invalid operand and retry the command.

RMAN-05055: recover datafile operand *string* cannot be used to recover block

Cause: The specified operand could not be used with RECOVER block command.

Action: Delete the invalid operand and retry the command.

RMAN-05060: block specifier must be specified to recover block

Cause: Block Specifier was not specified in the command.

Action: Specify block specifier and resubmit the command.

RMAN-05061: analyzing automatic repair options complete

Cause: This is an informational message only.

Action: No action is required.

RMAN-05062: image copy needs no roll forward

Cause: The image copy that would be rolled forward by the RECOVER COPY command is already more recent than the specified UNTIL time or system change number (SCN).

Action: Usually this is the result of a recent OPEN RESETLOGS operation, and no action is needed, because the daily backup strategy will start rolling this copy forward after it becomes old enough to be eligible for rolling forward. To force the copy to be rolled forward, specify a more recent UNTIL time or system change number (SCN).

RMAN-05070: Running TRANSPORT_SET_CHECK on recovery set tablespaces

Cause: This is an informational message only.

Action: No action is required.

RMAN-05071: TRANSPORT_SET_CHECK completed successfully

Cause: This is an informational message only.

Action: No action is required.

RMAN-05072: TRANSPORT_SET_CHECK failed

Cause: SYS.TS_PITR_CHECK was not empty for recovery set tablespaces.

Action: Fix dependencies before attempting TSPITR again.

RMAN-05073: Tablespace *string* creation SCN *string* is ahead of point-in-time SCN *string*

Cause: The tablespace was found in the control file but the creation system change number (SCN) of the datafile(s) is after the specified point-in-time. This can happen if a previous tablespace point-in-time recovery was performed, for the tablespace.

Action: If a previous TSPITR has been performed drop the tablespace and retry the command. Otherwise, verify the name of the tablespace and/or the point-in-time and resubmit the command.

RMAN-05074: Tablespace *string* does not exist at specified point-in-time SCN *string*

Cause: The tablespace was found in the control file but the creation system change number (SCN) of the datafile(s) is after the specified point-in-time.

Action: Verify the name of the tablespace and/or the point-in-time and resubmit the command.

RMAN-05115: Cross-platform INSTANT RESTORE is not supported.

Cause: An instant restore was specified using a data file copy from a different platform.

Action: Specify a different data file copy that is formatted for the same platform where the restore is taking place.

RMAN-05116: feature was not enabled: *string*

Cause: The specified feature is not enabled.

Action: Do not attempt to use this feature.

RMAN-05500: the auxiliary database must be not mounted when issuing a DUPLICATE command

Cause: A DUPLICATE command was issued, but the auxiliary database is mounted.

Action: Dismount the auxiliary database.

RMAN-05501: aborting duplication of target database

Cause: Previously encountered errors require corrective action.

Action: Resolve the error conditions, and reissue the DUPLICATE command.

RMAN-05502: the target database must be mounted when issuing a DUPLICATE command

Cause: A DUPLICATE command was issued, but the target database control file is not mounted.

Action: Mount the target database control file by issuing ALTER DATABASE MOUNT via Enterprise Manager or Server Manager.

RMAN-05503: at least one auxiliary channel must be allocated to execute this command

Cause: No auxiliary channels were allocated.

Action: Allocate an auxiliary channel.

RMAN-05504: at least two redo log files or groups must be specified for this command

Cause: Only one redo log file or group was specified

Action: Specify at least one more redo log file or group

RMAN-05505: auxiliary file name conversion of '*string*' exceeds maximum length of *string*

Cause: When the given file name is converted to the name used for the auxiliary database, the converted name is larger than the maximum allowed file name.

Action: Change initialization parameter DB_FILE_NAME_CONVERT to convert to a valid file name.

RMAN-05506: error during recursive execution

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-05507: standby control file checkpoint (*string*) is more recent than duplication point-in-time (*string*)

Cause: A DUPLICATE FOR STANDBY command was issued, but the checkpoint of the control file is more recent than the last archived log or the specified point-in-time.

Action: If an explicit point-in-time was specified, change it to be at least the control file checkpoint; otherwise archive (and backup/copy) the current log.

RMAN-05510: Duplicate finished

Cause: This is an informational message only.

Action: No action is required.

RMAN-05511: Datafile *string* skipped by request

Cause: This is an informational message only.

Action: No action is required.

RMAN-05512: Tablespace *string* cannot be skipped from duplication

Cause: The SYSTEM and SYSAUX tablespaces were not included in the DUPLICATE DATABASE. They must be present.

Action: Remove the SYSTEM and/or SYSAUX tablespace from the SKIP list and retry the operation.

RMAN-05513: cannot duplicate, control file is not current or standby

Cause: Target database did not have a current or standby control file. DUPLICATE requires the target database to have a current or standby control file.

Action: Open database to make control file current or connect to a different database before retrying the command.

RMAN-05514: Tablespace *string* has undo information, cannot skip

Cause: All tablespaces that have undo information must be included in the duplication.

Action: Remove the specified tablespace from the SKIP list and retry the operation.

RMAN-05515: Duplicate for standby does not allow the use of SET UNTIL

Cause: A SET UNTIL clause was specified for the command.

Action: Remove the SET UNTIL clause and try again.

RMAN-05516: duplicate operand specified: *string*

Cause: The specified operand appears more than once in the same DUPLICATE option list

Action: Delete the duplicated operand.

RMAN-05517: tempfile *string* conflicts with file used by target database

Cause: RMAN attempted to use the specified tempfile as a restore destination in the auxiliary database, but this name was already in use by the target database.

Action: Use the SET NEWNAME FOR TEMPFILE command to specify a name for the indicated tempfile, making sure that the new name does not conflict with a file name in use by target database. Alternatively, use DB_FILE_NAME_CONVERT and retry the command.

RMAN-05518: Automatically adding tablespace *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-05519: WARNING: tablespace *string* is always included when duplicating

Cause: The SYSTEM and SYSAUX tablespaces were included in the DUPLICATE TABLESPACE command. They were automatically included by the command and did not need to be explicitly named.

Action: To avoid this warning,, remove the SYSTEM and/or SYSAUX tablespace from the tablespaces list and retry the operation.

RMAN-05520: database name mismatch, auxiliary instance has *string*, command specified *string*

Cause: The database name specified in the initialization parameter was not the same as the database name provided in the DUPLICATE command.

Action: Correct the database name in the command or adjust the database name of the auxiliary instance.

RMAN-05521: DUPLICATE without CATALOG and TARGET not open requires that UNDO TABLESPACE is specified

Cause: A DUPLICATE was attempted when target database was not open without connection to a recovery catalog. It is necessary that the list of tablespaces with undo segments is provided with the UNDO TABLESPACE clause.

Action: Retry the command specifying the list of tablespaces with undo segments using the UNDO TABLESPACE clause.

RMAN-05522: Skipping tablespace *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-05523: Tablespace *string* is read only and SKIP READONLY was specified

Cause: Conflicting parameters were provided.

Action: Remove SKIP READONLY or remove read-only tablespace from list of tablespaces to duplicate.

RMAN-05524: Tablespace *string* is offline

Cause: It was not possible to duplicate offline tablespaces.

Action: Remove offline tablespace from list or online tablespace to duplicate it.

RMAN-05525: SKIP TABLESPACE cannot be used when using DUPLICATE TABLESPACE

Cause: A SKIP TABLESPACE clause was specified for the command.

Action: Remove the SKIP TABLESPACE clause and try again.

RMAN-05526: datafile *number* not processed because file is OFFLINE IMMEDIATE

Cause: A DUPLICATE command omitted processing the indicated datafile because it is offline immediate. The tablespace to which this datafile belongs will also not be included. See message 5528.

Action: None, informational message only.

RMAN-05527: Tablespace *string* has one or more OFFLINE IMMEDIATE datafiles

Cause: It was not possible to duplicate a tablespace who had offline immediate tablespaces.

Action: Remove offending tablespace from list or recover datafile which are offline immediate in the tablespace before attempting the command again.

RMAN-05528: datafile *number* not processed because file belongs to tablespace with one or more offline immediate datafile (*string*)

Cause: A DUPLICATE command omitted processing the indicated datafile because it is part of a tablespace that has offline immediate datafile. See message 5526.

Action: No action is required. This is an informational message only.

RMAN-05529: WARNING: DB_FILE_NAME_CONVERT resulted in invalid ASM names; names changed to disk group only.

Cause: It was not possible to convert ASM Oracle Managed Files names using DB_FILE_NAME_CONVERT parameter. RMAN changed these invalid names to the converted disk group name instead.

Action: No action is required. This is an informational message only. If the automatic change is incorrect, use one of the following options instead of using DB_FILE_NAME_CONVERT for ASM Oracle Managed Files: 1) use RMAN command SET NEWNAME for each Oracle Managed File. 2) set DB_CREATE_FILE_DEST initialization parameter in auxiliary instance and not specify DB_FILE_NAME_CONVERT.

RMAN-05530: an UNTIL TIME or SCN cannot be specified with FROM ACTIVE DATABASE

Cause: A DUPLICATE with FROM ACTIVE DATABASE was specified along with either a SET UNTIL statment or UNTIL clause on the command. This is not supported. A DUPLICATE FROM ACTIVE DATABASE always creates a copy as of the current time.

Action: Check the statement and remove the use of UNTIL.

RMAN-05531: a mounted database cannot be duplicated while datafiles are fuzzy

Cause: A DUPLICATE with FROM ACTIVE DATABASE command was specified while the database was mounted or open read-only. Unless the database is open read/write, the datafiles cannot be fuzzy.

Action: Open the database read/write, then shutdown cleanly before mounting.

RMAN-05532: PASSWORD FILE specified without FROM ACTIVE DATABASE

Cause: The PASSWORD FILE clause of the DUPLICATE command was specified but the FROM ACTIVE DATABASE clause was not. A password file can only be duplicated if the FROM ACTIVE DATABASE clause has been used.

Action: Remove the PASSWORD FILE clause from the command, or perform an online duplicate of the database by specifying the FROM ACTIVE DATABASE clause.

RMAN-05533: *string* is not supported on *string* database

Cause: The specified command is not supported on this type of database. The type of database can be STANDBY, CLONE, or RAC.

Action: Do not use the specified command against this database.

RMAN-05534: WARNING: LOG_FILE_NAME_CONVERT resulted in invalid ASM names; names changed to disk group only.

Cause: It was not possible to convert ASM Oracle Managed Files names using LOG_FILE_NAME_CONVERT parameter. RMAN changed these invalid names to the converted disk group name instead.

Action: If the automatic change is incorrect, use one of the following options instead of using LOG_FILE_NAME_CONVERT for ASM Oracle Managed Files: 1)

Use the LOGFILE clause for online log files. 2) After DUPLICATE completes, create standby log files using the SQL ALTER DATABASE ADD STANDBY LOGFILE command.

RMAN-05535: WARNING: All redo log files were not defined properly.

Cause: It was not possible to define all the redo log files. This can occur when LOG_FILE_NAME_CONVERT initialization parameter is defined but fails to match all the names or causes names to be created that are not in valid directories.

Action: Query the V\$LOGFILE view to see what redo log files are defined after DUPLICATE has completed. Use the ALTER DATABASE RENAME FILE SQL command to correctly name the existing redo log files.

RMAN-05536: auxiliary logfile name *string* conflicts with a file used by the target database

Cause: RMAN attempted to use the specified logfile name as a standby redo log file in the auxiliary database, but this name was already in use by the target database.

Action: Use or alter LOG_FILE_NAME_CONVERT so that unique logfile names can be generated. Or wait for the command to complete and create standby logfiles using the SQL ALTER DATABASE ADD STANDBY LOGFILE command.

RMAN-05537: DUPLICATE without TARGET connection when auxiliary instance is started with spfile cannot use SPFILE clause

Cause: A DUPLICATE was attempted when the auxiliary database was started with a server parameter file and the SPFILE sub-clause was specified. RMAN cannot restore the server parameter file if the auxiliary database is already started with a server parameter file.

Action: Start the auxiliary database with a client parameter file or do not specify SPFILE sub-clause and retry.

RMAN-05538: WARNING: implicitly using DB_FILE_NAME_CONVERT

Cause: The duplicated SPFILE had DB_FILE_NAME_CONVERT set and it has been used to produce datafile names for the new database.

Action: No action is required. This is an informational message only. If this behavior was not intended, then do not duplicate the server parameter file, or explicitly set DB_FILE_NAME_CONVERT in the DUPLICATE command and retry the operation.

RMAN-05539: DUPLICATE TARGET DATABASE cannot be used without connecting to the TARGET

Cause: A DUPLICATE TARGET DATABASE was attempted and no connection to the TARGET database was established.

Action: Connect to TARGET or use DATABASE <db_name> clause.

RMAN-05540: no archived logs found in repository for database *string*

Cause: Recovery catalog did not have archived log records for the specified database. If database is running in NOARCHIVELOG mode, then specify NOREDO.

Action: Specify NOREDO for NOARCHIVELOG databases. Cannot duplicate an ARCHIVELOG database unless the recovery catalog or target database control file has archived redo log information about it.

RMAN-05541: no archived logs found in target database

Cause: Target database was running in archived log mode, but control file did not have any archived log records.

Action: Archive current log before retrying command.

RMAN-05542: Only UNTIL TIME can be used with DUPLICATE without TARGET and CATALOG connections

Cause: A DUPLICATE without TARGET and CATALOG connections was attempted specifying an UNTIL clause that was not TIME based.

Action: Retry the command with an UNTIL TIME clause or without an UNTIL clause.

RMAN-05543: DUPLICATE without TARGET connection requires that DATABASE is specified

Cause: A DUPLICATE without TARGET connection was attempted without specifying the database to duplicate.

Action: Retry the command specifying the DATABASE to duplicate.

RMAN-05544: Cannot specify ACTIVE DATABASE when not connected to target database

Cause: DUPLICATE from ACTIVE DATABASE required a connection to the target database.

Action: Connect to target database or remove from ACTIVE DATABASE and retry the command.

RMAN-05545: WARNING: Until SCN *string* is ahead of SCN of last full resync of recovery catalog: *string*

Cause: The specified point-in-time for duplication without a target connection was ahead of the last time that the datafile information was resynced to the recovery catalog. Information about offline and read-only datafiles might be incorrect.

Action: If duplication fails due to incorrectly identified offline and/or read-only datafiles, specify a point-in-time before the last resync of the recovery catalog and retry the command. Or perform full resync of the target database and retry the command.

RMAN-05546: DUPLICATE without TARGET and CATALOG connections requires that BACKUP LOCATION is specified

Cause: A DUPLICATE without TARGET and CATALOG connections was attempted without specifying BACKUP LOCATION.

Action: Retry the command specifying a BACKUP LOCATION.

RMAN-05547: Checking that duplicated tablespaces are self-contained

Cause: This is an informational message only.

Action: No action is required.

RMAN-05548: The set of duplicated tablespaces is not self-contained

Cause: A DUPLICATE TABLESPACE has specified a set of tablespaces that cannot function independently.

Action: Retry the command without incomplete tablespaces or add other tablespaces to make the set self-contained.

RMAN-05549: The following SYS objects were found in skipped tablespaces

Cause: This is an informational message only.

Action: No action required.

RMAN-05550: TARGET database not open, cannot verify that set of tablespaces being duplicated does not have SYS objects

Cause: This is an informational message only.

Action: No action is required.

RMAN-05551: Not connected to TARGET, cannot verify that set of tablespaces being duplicated does not have SYS objects

Cause: This is an informational message only.

Action: No action is required.

RMAN-05552: Object *string* on tablespace *string*

Cause: A SYS object was found in one of the skipped tablespaces.

Action: Remove object if possible or include tablespace in duplicated tablespaces.

RMAN-05553: SYS objects in skipped tablespaces prevent duplication

Cause: Objects owned by SYS were found in the tablespaces that would not be duplicated.

Action: If using SKIP TABLESPACE, do not skip tablespaces that contain SYS objects. If using DUPLICATE TABLESPACE, make sure to specify all tablespaces containing SYS objects.

RMAN-05554: cannot specify INCARNATION when duplicating without TARGET and CATALOG connections

Cause: A DUPLICATE without TARGET and CATALOG connections was attempted when INCARNATION was also specified.

Action: Retry the command without specifying INCARNATION.

RMAN-05555: Not connected to TARGET or TARGET not open, cannot verify that subset of tablespaces is self-contained

Cause: This is an informational message only.

Action: No action is required.

RMAN-05556: not all datafiles have backups that can be recovered to SCN *string*

Cause: One or more datafiles being duplicated could not be restored as no available backups were found.

Action: Change the system change number (SCN) or make backups available for the specified datafiles and retry the command.

RMAN-05557: Target instance not started with server parameter file

Cause: SPFILE clause was used but target instance was not started with a server parameter file.

Action: Do not specify SPFILE clause, or restart target instance with server parameter file.

RMAN-05558: Must specify DB_UNIQUE_NAME with FOR STANDBY clause

Cause: A DUPLICATE FOR STANDBY ... SPFILE command was issued but DB_UNIQUE_NAME was not provided for the standby database.

Action: Specify a DB_UNIQUE_NAME in the SPFILE clause for the standby database.

RMAN-05559: error converting parameter *string*, string larger than *number*

Cause: While attempting to apply a PARAMETER_VALUE_CONVERT to the specified parameter value, the resulting string exceeded the maximum length for a value.

Action: Change the PARAMETER_VALUE_CONVERT so that, when converting the parameter, the maximum length is not reached.

RMAN-05560: Using previous duplicated file *string* for datafile *number* with checkpoint SCN of *string*

Cause: A datafile copy from a previous duplicate attempt matching the duplicate name requested was found for the specified datafile and will be used instead of restoring the datafile from a backup.

Action: No action needed unless this behavior is not desired. In that case, either use a different name for the datafile or use NORESUME to avoid using previous datafile copies for all the datafiles.

RMAN-05561: CATALOG did not return information about tablespaces with undo segments

Cause: A DUPLICATE with no target connection was attempted, but the recovery catalog did not have information about the tablespaces with undo segments at the specified point in time. It is necessary that the list of tablespaces with undo segments is provided with the UNDO TABLESPACE clause.

Action: Retry the command specifying the list of tablespaces with undo segments using the UNDO TABLESPACE clause.

RMAN-05562: SPFILE backup not found for database *string* with DBID *number* created before *string* in *string*

Cause: RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05563: SPFILE backup not found for database with DBID *number* created before *string* in *string*

Cause: RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05564: SPFILE backup not found for database *string* created before *string* in *string*

Cause: RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05565: SPFILE backup created before *string* not found in *string*

Cause: RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05566: SPFILE backup not found for database *string* with DBID *number* in *string*

Cause: RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05567: SPFILE backup not found for database with DBID *number* in *string*

Cause: RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05568: SPFILE backup not found for database *string* in *string*

Cause: RMAN could not locate a backup of the SPFILE in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05569: SPFILE backup not found in *string*

Cause: RMAN could not locate a backup of the SPFILE in the specified location.

Action: Provide a different location and retry the command.

RMAN-05570: Duplicate for standby does not allow the use of LOGFILE

Cause: A LOGFILE clause was specified for the command.

Action: Remove the LOGFILE clause and try again.

RMAN-05571: DORECOVER specified for non standby duplication

Cause: A DORECOVER clause was specified and the duplicate did not specify FOR STANDBY.

Action: Remove the DORECOVER clause or add FOR STANDBY and try again.

RMAN-05572: Controlfile backup not found for database *string* with DBID *number* created before *string* in *string*

Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05573: CONTROLFILE backup not found for database with DBID *number* created before *string* in *string*

Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05574: CONTROLFILE backup not found for database *string* created before *string* in *string*

Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05575: CONTROLFILE backup created before *string* not found in *string*

Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05576: CONTROLFILE backup not found for database *string* with DBID *number* in *string*

Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05577: CONTROLFILE backup not found for database with DBID *number* in *string*

Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05578: CONTROLFILE backup not found for database *string* in *string*

Cause: RMAN could not locate a backup of the control file in the specified location that satisfied the specified parameters.

Action: Change the parameters, or provide a different location and retry the command.

RMAN-05579: CONTROLFILE backup not found in *string*

Cause: RMAN could not locate a backup of the control file in the specified location.

Action: Provide a different location and retry the command.

RMAN-05580: Duplicate for standby does not allow the use of SKIP READONLY

Cause: A SKIP READONLY clause was specified for the command.

Action: Remove the SKIP READONLY clause and try again.

RMAN-05581: Duplicate for standby does not allow the use of SKIP TABLESPACE

Cause: A SKIP TABLESPACE clause was specified for the command.

Action: Remove the SKIP TABLESPACE clause and try again.

RMAN-05582: Duplicate for standby does not allow the use of OPEN RESTRICTED

Cause: An OPEN RESTRICTED clause was specified for the command.

Action: Remove the OPEN RESTRICTED clause and try again.

RMAN-05583: Duplicate for standby does not allow the use of TABLESPACE

Cause: A TABLESPACE clause was specified for the command.

Action: Remove the TABLESPACE clause and try again.

RMAN-05584: Duplicate for standby does not allow the use of NOREDO

Cause: A NOREDO clause was specified for the command.

Action: Remove the NOREDO clause and try again.

RMAN-05585: Duplicate for standby does not allow the use of UNDO TABLESPACE

Cause: A UNDO TABLESPACE clause was specified for the command.

Action: Remove the UNDO TABLESPACE clause and try again.

RMAN-05586: The following materialized objects were found in skipped tablespaces

Cause: This is an informational message only.

Action: No action required.

RMAN-05587: Materialized table *string* on tablespace *string*

Cause: A materialized table was found in one of the skipped tablespaces.

Action: Remove object if possible or include tablespace in duplicated tablespaces.

RMAN-05588: Materialized index *string* on tablespace *string*

Cause: A materialized index was found in one of the skipped tablespaces.

Action: Remove object if possible or include tablespace in duplicated tablespaces.

RMAN-05589: Materialized objects in skipped tablespaces prevent duplication

Cause: Materialized objects found in the tablespaces that would not be duplicated.

Action: If using SKIP TABLESPACE, do not skip tablespaces that contain materialized objects. If using DUPLICATE TABLESPACE, make sure to specify all tablespaces containing SYS objects.

RMAN-05590: Reenabling controlfile options for auxiliary database

Cause: This is an informational message only.

Action: No action is required.

RMAN-05591: Ignoring error, reattempt command after duplicate finishes

Cause: A sql error was received during the execution of command.

Action: Check the accompanying errors.

RMAN-05592: Dropping offline and skipped tablespaces

Cause: This is an informational message only.

Action: No action is required.

RMAN-05593: Could not drop tablespace *string* due to constraints, will reattempt removal after other tablespaces are removed

Cause: This is an informational message only.

Action: No action is required.

RMAN-05594: Could not drop tablespace *string* due to constraints

Cause: The tablespace failed to be dropped several times, no more attempts will be made.

Action: Drop the tablespace manually after duplicate finishes.

RMAN-05595: Leaving database unopened, as requested

Cause: User requested that the new database was not open.

Action: After the database is opened with resetlogs you might want to:

- Catalog datafilecopies of readonly datafiles

-
- Switch readonly datafiles to the cataloged datafilecopies
 - Online read only tablespaces
 - Drop skipped tablespaces
 - Enable supplemental logging
 - Enable force logging
 - Enable change tracking

RMAN-05596: Error while removing created server parameter file

Cause: Server parameter file was not deleted. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors. Remove file manually.

RMAN-05597: Database started with server parameter file and PFILE clause used in command

Cause: A PFILE clause was specified for duplicate command, but database was started with a server parameter file causing a conflict.

Action: Remove PFILE clause from command or restart database without using a server parameter file.

RMAN-05598: SPFILE and PFILE clause specified in command

Cause: SPFILE and PFILE clauses were specified for duplicate command causing a conflict.

Action: Remove either one of the clauses and retry the command.

RMAN-05599: PASSWORD clause is not needed when duplicating for standby database from active database

Cause: PASSWORD clause was specified when creating a standby database from active database. This is not needed, it is automatic.

Action: No action is required. This is an informational message only.

RMAN-05600: Cannot specify UNTIL clause when duplicating from active database

Cause: An UNTIL clause in the command or with a SET UNTIL was in effect for an active database duplication.

Action: Remove UNTIL clause and reattempt duplication.

RMAN-05601: Failed to restore original settings to server parameter file

Cause: An error was received while duplicating the database after the server parameter file was modified by RMAN. An attempt was made to restore original settings to the server parameter file, but the original error was such that it was not possible to restore the settings.

Action: Before reattempting database duplication, the server parameter file needs to be fixed manually with the original values.

RMAN-05602: restarting auxiliary database without server parameter file

Cause: This is an informational message only.

Action: No action is required.

RMAN-05621: password file location could not be found for the target database

Cause: The password file location did not exist for the target database instance.

Action: Set the password file location for the target database instance.

RMAN-05622: password file location could not be found for the auxiliary database

Cause: The password file location did not exist for the auxiliary database instance.

Action: Set the password file location for the auxiliary database instance.

RMAN-06000: could not open recovery manager library file: *string*

Cause: The "recover.bsq" file could not be opened.

Action: Check that the file was installed correctly and that the user running RMAN has authority to read the file.

RMAN-06001: error parsing job step library

Cause: A syntax error was encountered while parsing "recover.bsq".

Action: Ensure that the correct version of the file is installed and that it has not been modified in any way.

RMAN-06002: command not allowed when not connected to a recovery catalog

Cause: A command that is allowed only when a recovery catalog connect string was supplied was attempted.

Action: Avoid using the command, or restart RMAN and supply a recovery catalog connect string via the CATALOG parameter.

RMAN-06003: ORACLE error from target database: *string*

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-06004: ORACLE error from recovery catalog database: *string*

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-06005: connected to target database: *string* (DBID=*string*)

Cause: This is an informational message only.

Action: No action is required.

RMAN-06006: connected to target database: *string* (not mounted)

Cause: This is an informational message only.

Action: No action is required.

RMAN-06007: target database not mounted and db_name not set in init.ora

Cause: The target database has not mounted the control file, and its "init.ora" file does not specify the DB_NAME parameter.

Action: MOUNT the target database, or add the DB_NAME parameter to its "init.ora" and restart the instance.

RMAN-06008: connected to recovery catalog database

Cause: This is an informational message only.

Action: No action is required.

RMAN-06009: using target database control file instead of recovery catalog

Cause: This is an informational message only.

Action: No action is required.

RMAN-06010: error while looking up datafile: *string*

Cause: An error occurred while looking up the specified datafile in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure. Ensure that the file name is entered correctly. If the datafile was added recently, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06011: invalid level specified: *number*

Cause: An invalid incremental backup level was specified.

Action: Incremental backup level must be between 0 and 4.

RMAN-06012: channel: *string* not allocated

Cause: A RELEASE command was found for a channel identifier that was not yet allocated.

Action: Correct the channel identifier, or add an ALLOCATE CHANNEL command.

RMAN-06013: duplicate channel identifier found: *string*

Cause: A channel identifier was reused without first releasing the channel.

Action: Add a RELEASE CHANNEL command.

RMAN-06014: command not implemented yet: *string*

Cause: Not all commands are implemented for the beta release.

Action: Avoid using the command.

RMAN-06015: error while looking up datafile copy name: *string*

Cause: An error occurred while looking up the specified datafile copy name in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure. Ensure that the file name is entered correctly. If the datafile copy was created when the recovery catalog was not available, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06016: duplicate backup operand specified: *string*

Cause: The specified operand appears more than once in the same backup specifier or backup command.

Action: Delete the duplicated operand.

RMAN-06017: initialization of parser failed

Cause: The parser package initialization routine returned an error.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-06018: duplicate operand specified in backup specification: *string*

Cause: A backup specification operand appears more than once in a backup specification.

Action: Delete the duplicate operand.

RMAN-06019: could not translate tablespace name "*string*"

Cause: An error occurred while looking up the specified tablespace name in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure. Ensure that the tablespace is entered correctly. If the tablespace was added recently, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06020: connected to auxiliary database (not started)

Cause: This is an informational message only.

Action: No action is required.

RMAN-06021: FROM DATAFILECOPY/BACKUPSET may not be specified with archived logs

Cause: The FROM DATAFILECOPY/BACKUPSET option applies only to datafile and control file restores.

Action: Use this option only for datafile and control file restores.

RMAN-06022: invalid level specified for image copy: *number*

Cause: An invalid incremental backup level was specified for an image copy.

Action: Incremental backup level must be 0 for image copies.

RMAN-06023: no backup or copy of datafile *number* found to restore

Cause: A datafile, tablespace, or database restore could not proceed because no backup or copy of the indicated file was found. It may be the case that a backup or copy of this file exists but does not satisfy the criteria specified in the user's restore operands.

Action: None - this is an informational message. See message 6026 for further details.

RMAN-06024: no backup or copy of the control file found to restore

Cause: A control file restore could not proceed because no backup or copy of the control file was found. It may be the case that a backup or copy of this file exists but does not satisfy the criteria specified in the user's restore operands.

Action: None - this is an informational message. See message 6026 for further details.

RMAN-06025: no backup of archived log for thread *number* with sequence *number* and starting SCN of *string* found to restore

Cause: An archived log restore could not proceed because no backup of the indicated archived log was found. It may be the case that a backup of this file exists but does not satisfy the criteria specified in the user's restore operands.

Action: None - this is an informational message. See message 6026 for further details.

RMAN-06026: some targets not found - aborting restore

Cause: Some of the files specified for restore could not be found. Message 6023, 6024, or 6025 is also issued to indicate which files could not be found. Some common reasons why a file can not be restored are that there is no backup or copy of the file that is known to recovery manager, or there are no backups or copies that fall within the criteria specified on the RESTORE command, or some datafile copies have been made but not cataloged.

Action: The Recovery Manager LIST command can be used to display the backups and copies that Recovery Manager knows about. Select the files to be restored from that list.

RMAN-06027: no archived logs found that match specification

Cause: An archived log record specifier did not match any archived logs in the recovery catalog or target database control file.

Action: Resubmit the command with a different archived log record specifier. The Recovery Manager (RMAN) LIST command can be used to display all archived logs that RMAN knows about.

RMAN-06028: duplicate operand specified in restore specification: *string*

Cause: The CHANNEL, TAG, FROM, PARMS, VALIDATE, DEVICE TYPE, CHECK READONLY or DB_UNIQUE_NAME option was specified more than once in the restore command or in one of the restore specifications.

Action: Correct and resubmit the command.

RMAN-06029: the control file may be included only in a datafile backup set

Cause: The "include current/standby control file" option was specified for an archived log backup set.

Action: Use this option only for datafile backup sets.

RMAN-06030: the DELETE [ALL] INPUT option may not be used with a datafile backup set

Cause: The DELETE [ALL] INPUT option was specified for a backup that contains the current control file or datafile.

Action: Remove the option and resubmit the command.

RMAN-06031: could not translate database keyword

Cause: An error was received when calling DBMS_RCVMAN

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-06032: at least 1 channel of TYPE DISK must be allocated to execute a COPY command

Cause: No channel of TYPE DISK was allocated.

Action: Allocate a channel of TYPE DISK and re-issue the command.

RMAN-06033: channel *string* not allocated

Cause: An rman command requests a specific channel, but the requested channel has not been allocated.

Action: ALLOCATE the channel, or correct the channel identifier.

RMAN-06034: at least 1 channel must be allocated to execute this command

Cause: No channels were allocated.

Action: ALLOCATE a channel.

RMAN-06035: wrong version of recover.bsq, expecting *string*, found *string*

Cause: The "recover.bsq" file is incompatible with the RMAN executable.

Action: Install the correct version of recover.bsq.

RMAN-06036: datafile *number* is already restored to file *string*

Cause: A SET NEWNAME command was issued to restore a datafile to a location other than the original datafile, and Recovery Manager determined that the best candidate for restoring the file is the datafile copy with the same name, therefore the file is already restored and no action need be taken.

Action: None - this is an informational message.

RMAN-06038: recovery catalog package detected an error

Cause: A call to DBMS_RCVMAN returned an error.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-06039: SET NEWNAME command has not been issued for datafile *string*

Cause: A SWITCH command was specified for a datafile, but no destination was specified and no SET NEWNAME command has been previously issued for that file. An explicit file to switch to must be specified if no SET NEWNAME command has been issued.

Action: Correct and resubmit the SWITCH command.

RMAN-06040: control file is already restored to file *string*

Cause: The best candidate control file for restoration is the one that is named in the RESTORE CONTROLFILE command, hence no action need be taken.

Action: None - this is an informational message.

RMAN-06041: cannot switch file *number* to copy of file *number*

Cause: An attempt was made to switch a datafile to a copy of a different datafile.

Action: Correct and resubmit the SWITCH command.

RMAN-06042: PLUS ARCHIVELOG option is not supported with non-datafile backups

Cause: The PLUS ARCHIVELOG option was supplied but does not apply to this type of backup.

Action: Remove the PLUS ARCHIVELOG operand and re-enter the command.

RMAN-06043: TAG option not supported for archived log copies

Cause: The tag option was supplied but does not apply to this type of copy.

Action: Remove the TAG operand and re-enter the command

RMAN-06045: LEVEL option not supported for archived log or current/standby control file copies

Cause: The LEVEL option was supplied but does not apply to this type of copy.

Action: Remove the LEVEL operand and re-enter the command.

RMAN-06046: archived log name: *string*

Cause: An error occurred while translating an archived log name to its recovery catalog RECID/time stamp. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-06047: duplicate datafile *number* specified for restoration from copy

Cause: The indicated datafile was specified more than once in the same restore command.

Action: Correct and resubmit the RESTORE command.

RMAN-06048: duplicate control file specified for restoration from copy

Cause: The control file was specified more than once in the same RESTORE command.

Action: Correct and resubmit the RESTORE command.

RMAN-06049: CHECK LOGICAL option not supported for archived log or current/standby control file copies

Cause: The check logical option was supplied but does not apply to this type of copy.

Action: Remove the CHECK LOGICAL operand and re-enter the command

RMAN-06050: archived log for thread *number* with sequence *number* is already on disk as file *string*

Cause: An archived log which was requested to be restored (either explicitly or via a range specification) does not need to be restored because it already exists on disk.

Action: None - this is an informational message

RMAN-06051: DELETE INPUT option not implemented yet

Cause: This option was specified in a backup specification.

Action: Remove the DELETE INPUT option.

RMAN-06052: no parent backup or copy of datafile *number* found

Cause: An incremental backup at level 1 or higher could not find any parent backup or copy of the indicated datafile. A level 0 backup of the datafile will be taken automatically.

Action: This is an informational message only.

RMAN-06053: unable to perform media recovery because of missing log

Cause: This message is accompanied with another message identifying the missing log. The log would be needed to perform the media recovery, but the log is not on disk and no backup set containing the log is available.

Action: Determine if a backup set containing the log can be made available. If so, then use the CHANGE command to make the backup set available and retry the command. If not, then a point-in-time recovery up to the missing log is the only alternative.

RMAN-06054: media recovery requesting unknown archived log for thread *string* with sequence *string* and starting SCN of *string*

Cause: Media recovery is requesting a log whose existence is not recorded in the recovery catalog or target database control file.

Action: If a copy of the log is available, then add it to the recovery catalog and/or control file via a CATALOG command and then retry the RECOVER command. If not, then a point-in-time recovery up to the missing log is the only alternative and database can be opened using ALTER DATABASE OPEN RESETLOGS command.

RMAN-06055: could not find archived log with sequence *string* for thread *string*

Cause: A log which was on disk at the start of media recovery or which should have been restored from a backup set could not be found.

Action: Check the Recovery Manager message log to see if the log was restored by a previous job step. If so, then check the V\$ARCHIVED_LOG view to see if the log is listed in the control file. If so, then validate that the log exists on disk and is readable. If the log was not restored, or was restored but no record of the log exists in V\$ARCHIVED_LOG, then contact Oracle Support Services.

RMAN-06056: could not access datafile *number*

Cause: A backup or copy could not proceed because the datafile header could not be read or the header was not valid.

Action: Make the datafile accessible or skip it.

RMAN-06057: a standby control file cannot be included along with a current control file

Cause: "current control file" was specified along with "standby control file".

Action: Remove "current control file" or "standby control file" from backup specification.

RMAN-06058: a current control file cannot be included along with a standby control file

Cause: "standby control file" was specified along with "current control file".

Action: Remove "standby control file" or "current control file" from backup specification.

RMAN-06059: expected archived log not found, loss of archived log compromises recoverability

Cause: The archived log was not found. The recovery catalog or target database control file thinks it does exist. If the archived log has in fact been lost and there is no backup, then the database is no longer recoverable across the point-in-time covered by the archived log. This may occur because the archived log was removed by an outside utility without updating the recovery catalog or target database control file.

Action: If the archived log has been removed with an outside utility and the archived log has already been backed up, then you can synchronize the recovery catalog or target database control file by running CROSSCHECK ARCHIVELOG ALL. If the archived log has not been previously backed up, then you should take a full backup of the database and archived logs to preserve recoverability. Previous backups are not fully recoverable.

RMAN-06060: WARNING: skipping datafile compromises tablespace *string* recoverability

Cause: SKIP INACCESSIBLE or SKIP OFFLINE option resulted in skipping datafile during BACKUP. If the datafile has in fact been lost and there is no backup, then the tablespace is no longer recoverable without ALL archived logs since datafile creation. This may occur because the datafile was deleted by an outside utility or the datafile is made OFFLINE [DROP].

Action: If there is no backup of skipped datafile and the tablespace has to be recoverable without ALL archived logs since datafile creation, then you should make these datafile available for backup.

RMAN-06061: WARNING: skipping archived log compromises recoverability

Cause: SKIP INACCESSIBLE option resulted in skipping archived logs during BACKUP. If the archived log has in fact been lost and there is no backup, then the database is no longer recoverable across the point-in-time covered by the archived log. This may occur because archived log was removed by an outside utility without updating the recovery catalog or target database control file.

Action: If the archived log has been removed with an outside utility and the archived log has already been backed up, then you can synchronize the recovery catalog or target database control file by running CROSSCHECK ARCHIVELOG ALL. If the archived log has not been previously backed up, then you should take a full backup of the database and archived logs to preserve recoverability. Previous backups are not fully recoverable.

RMAN-06062: can not backup SPFILE because the instance was not started with SPFILE

Cause: A backup command requested a backup of the SPFILE, but no SPFILE was used to startup the instance.

Action: Create an SPFILE and re-start the instance using the SPFILE or modify the command.

RMAN-06063: DBID is not found in the recovery catalog

Cause: DBID is not found in the recovery catalog.

Action: Verify that the DBID is correct and restart the command.

RMAN-06064: creating datafile file number=*string* name=*string*

Cause: RESTORE/RECOVER command was issued and there were no backup available for the datafile.

Action: This is an informational message only.

RMAN-06065: The backup operand [*string*] conflicts with another specified operand.

Cause: The user attempted to use two (or more) conflicting operands within the same statement.

Action: Remove one or both of the conflicting operands.

RMAN-06066: the target database must be mounted when issuing a RECOVER command

Cause: A RECOVER command was issued, but the target database control file is not mounted.

Action: Mount the target database control file by issuing ALTER DATABASE MOUNT via Enterprise Manager or Server Manager.

RMAN-06067: RECOVER DATABASE required with a backup or created control file

Cause: The control file has been restored from a backup or was created via ALTER DATABASE CREATE CONTROLFILE.

Action: Use the RECOVER DATABASE command to perform the recovery.

RMAN-06068: recovery aborted because of missing datafiles

Cause: This error should be accompanied by one or more instances of message ORA-06094.

Action: Refer to message ORA-06094.

RMAN-06069: the file name for datafile *string* is missing in the control file

Cause: Media recovery of a backup control file added this datafile to the control file, but it does not set the file name because that is unsafe.

Action: If the datafile is on disk, then issue ALTER DATABASE RENAME to correct the control file. Otherwise, RESTORE the datafile, and then use SWITCH to make it known to the control file. If the tablespace containing this datafile will be dropped, then reissue the RECOVER command with a SKIP clause to skip recovery of this tablespace.

RMAN-06070: DBWR could not identify datafile *string*

Cause: DBWR could not find the specified datafile.

Action: Ensure that the datafile exists and is accessible.

RMAN-06071: could not open datafile *string*

Cause: An error was encountered when trying to open the specified datafile.

Action: Ensure that the datafile exists and is accessible.

RMAN-06073: file header is corrupt for datafile *string*

Cause: ORACLE detected a corruption in the file header. A media failure has probably occurred.

Action: RESTORE the datafile to a new location, then do a SWITCH, and then retry the RECOVER command.

RMAN-06074: file *string* is not an ORACLE datafile

Cause: The file header indicates that this file is not a datafile. The file may have been overlaid or corrupted.

Action: RESTORE the datafile to a new location, then do a SWITCH, and then retry the RECOVER command.

RMAN-06075: datafile *string* does not belong to this database

Cause: The file header indicates that this file belongs to some other ORACLE database.

Action: RESTORE the datafile to a new location, then do a SWITCH, and then retry the RECOVER command.

RMAN-06076: datafile *string* contains wrong datafile

Cause: The datafile header indicates the file contains a different datafile number.

Action: RESTORE the datafile, and then retry the RECOVER command.

RMAN-06077: datafile *string* is a different version than contained in the control file

Cause: The control file entry for this datafile specifies a different version of this datafile. Different versions of a datafile can exist when a tablespace is dropped, and a new tablespace is created which reuses the same datafile numbers.

Action: If the datafile is correct, fix the control file by using the SWITCH command. Otherwise, RESTORE the correct version of this datafile and retry the RECOVER command.

RMAN-06078: the control file is older than datafile *string*

Cause: The control file appears to be older than the specified datafile, but it is not marked as a backup control file. This indicates that the control file has been replaced with an older version. This error does not occur when a backup control file which was created via Recovery Manager or the ALTER DATABASE BACKUP CONTROLFILE command is restored because such control files are marked as backups.

Action: RESTORE a control file and perform RECOVER DATABASE.

RMAN-06079: database must be mounted to perform recovery

Cause: A RECOVER command was issued, but the target database is not mounted.

Action: Issue ALTER DATABASE MOUNT.

RMAN-06080: SWITCH required for datafile *string*

Cause: The control file record for this datafile is for an older incarnation of the datafile. A SWITCH command must be issued to update the control file before doing RECOVER.

Action: Issue SWITCH command then retry RECOVER.

RMAN-06081: error reading datafile header for datafile *string*, code *string*

Cause: X\$KCVFH returned the specified code in the HXERR column when it was queried for the specified datafile.

Action: Ensure the datafile exists and is readable. Using a newer release of Recovery Manager may return a more meaningful error message. If you have no newer version of Recovery Manager, contact Oracle Support Services.

RMAN-06082: datafile copy tag *string* is ambiguous

Cause: The specified tag refers to multiple datafile copies belonging to different datafiles.

Action: Specify the datafile copy by file name rather than by tag.

RMAN-06083: error when loading stored script *string*

Cause: The recovery catalog database returned an error. This error explains the cause of the problem.

Action: Correct the problem and retry.

RMAN-06084: the target database may not be mounted when issuing REPLICATE

Cause: A REPLICATE command was issued, but the target database is already mounted.

Action: dismount the target database control file by issuing ALTER DATABASE CLOSE and ALTER DATABASE DISMOUNT via Enterprise Manager or Server Manager.

RMAN-06085: must use SET NEWNAME command to restore datafile *string*

Cause: A RESTORE command for the specified datafile could not find a destination name for the specified datafile.

Action: Add a SET NEWNAME command prior to the RESTORE command to specify the restore destination for this file.

RMAN-06086: offline files may only be skipped in a datafile backup set

Cause: The SKIP OFFLINE option was specified for an archived log backup set.

Action: Use this option only for datafile backup sets.

RMAN-06087: read-only files may only be skipped in a datafile backup set

Cause: The SKIP READONLY option was specified for an archived log backup set.

Action: Use this option only for datafile backup sets.

RMAN-06088: datafile copy *string* not found or out of sync with catalog

Cause: The indicated file is not found, or is found but is not the same file that the recovery catalog thinks it is. It is likely that some operation outside of Recovery Manager has altered the file, or that Recovery Manager has not resynced with the target database.

Action: Re-catalog the file and retry the operation.

RMAN-06089: archived log *string* not found or out of sync with catalog

Cause: The indicated file is not found, or is found but is not the same file that the recovery catalog thinks it is. It is likely that some operation outside of Recovery Manager has altered the file, or that Recovery Manager has not resynced with the target database.

Action: Re-catalog the file and retry the operation.

RMAN-06090: error while looking up control file copy: *string*

Cause: An error occurred while looking up the specified control file copy in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure. Ensure that the file name is entered correctly. If the control file copy was created when the recovery catalog was not available, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06091: no channel allocated for maintenance (of an appropriate type)

Cause: A command was entered that requires a maintenance channel, and no maintenance channel is allocated, or none of the appropriate type.

Action: Use ALLOCATE CHANNEL FOR MAINTENANCE before deleting backup pieces, or using the CROSSCHECK or DELETE EXPIRED commands. Proxy copies require a non-DISK channel.

RMAN-06092: error while looking up backup piece

Cause: An error occurred while looking up the specified backup piece in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure. Ensure that the name or key is entered correctly. If the backup piece was created when the recovery catalog was not available, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06093: recovery catalog contains obsolete version of datafile *string*

Cause: The specified datafile number was dropped and then reused. The control file mounted by the target database contains the newer version of the datafile, but the recovery catalog contains information about only the older version.

Action: Issue a RESYNC command to update the recovery catalog, then reissue the failing command. If the error persists, contact Oracle Support Services.

RMAN-06094: datafile *string* must be restored

Cause: A RECOVER command was issued, and the recovery catalog indicates the specified datafile should be part of the recovery, but this datafile is not listed in the control file, and cannot be found on disk.

Action: Issue a RESTORE command for this datafile, using the same UNTIL clause specified to the RECOVER command (if any), then reissue the RECOVER.

RMAN-06095: a backup control file must be restored to recover datafile *string*

Cause: The control file currently mounted by the target database contains a newer incarnation of the datafile than the recovery catalog indicates is appropriate for the Point-in-Time being recovered to.

Action: Restore the control file, using the same UNTIL clause specified on the failing RECOVER command, then reissue the command. If no control file can be restored, then you should issue a CREATE CONTROLFILE command.

RMAN-06096: SWITCH required for newname of datafile *string* to take effect

Cause: A SET NEWNAME was issued for this datafile, but no SWITCH command was issued before the RECOVER command.

Action: Issue a SWITCH command to make the newname take effect before doing RECOVER.

RMAN-06098: the target database must be mounted when issuing a BACKUP command

Cause: A BACKUP command was issued, but the target database control file is not mounted.

Action: Mount the target database control file by issuing ALTER DATABASE MOUNT via Enterprise Manager or Server Manager.

RMAN-06099: error occurred in source file: *string*, line: *number*

Cause: See accompanying error.

Action: See accompanying error.

RMAN-06100: no channel to restore a backup or copy of datafile *number*

Cause: A datafile, tablespace, or database restore could not proceed because the backup of the indicated file exists on a device type that was not allocated for restore.

Action: None - this is an informational message. See message 6026 for further details.

RMAN-06101: no channel to restore a backup or copy of the control file

Cause: A control file restore could not proceed because the backup of the indicated file exists on a device type that was not allocated for restore.

Action: None - this is an informational message. See message 6026 for further details.

RMAN-06102: no channel to restore a backup or copy of archived log for thread *number* with sequence *number* and starting SCN of *string*

Cause: An archived log restore could not proceed because the backup of the indicated file exists on a device type that was not allocated for restore.

Action: None - this is an informational message. See message 6026 for further details.

RMAN-06103: duplicate qualifier found in REPORT command: *string*

Cause: The indicated qualifier appears more than once in a REPORT qualifier list.

Action: delete the duplicate qualifier

RMAN-06105: duplicate qualifier found in LIST command: *string*

Cause: The indicated qualifier appears more than once in a LIST qualifier list.

Action: delete the duplicate qualifier

RMAN-06106: this command requires that target database be mounted

Cause: A command was issued that requires the target database to be mounted, but the target database is not mounted.

Action: Mount the target database control file by issuing ALTER DATABASE MOUNT via Enterprise Manager or Server Manager.

RMAN-06107: WARNING: control file is not current for REPORT NEED BACKUP DAYS

Cause: The REPORT NEED BACKUP DAYS command may report some files as requiring backups when they really do not, because the most current online status of the file is not known unless a current control file is mounted.

Action: No action is required, however, a current control file should be mounted, if possible, to get the most accurate REPORT output.

RMAN-06108: changed datafile copy unavailable

Cause: This is an informational message only.

Action: No action is required.

RMAN-06109: changed archived log unavailable

Cause: This is an informational message only.

Action: No action is required.

RMAN-06110: changed control file copy unavailable

Cause: This is an informational message only.

Action: No action is required.

RMAN-06111: changed backup piece unavailable

Cause: This is an informational message only.

Action: No action is required.

RMAN-06112: changed datafile copy available

Cause: This is an informational message only.

Action: No action is required.

RMAN-06113: changed archived log available

Cause: This is an informational message only.

Action: No action is required.

RMAN-06114: changed control file copy available

Cause: This is an informational message only.

Action: No action is required.

RMAN-06115: changed backup piece available

Cause: This is an informational message only.

Action: No action is required.

RMAN-06116: cannot crosscheck unavailable object

Cause: An attempt was made to crosscheck an object which is unavailable.

Action: Make object available and try again or don't crosscheck object.

RMAN-06117: cannot do DELETE EXPIRED on an object which is not expired

Cause: An attempt was made to DELETE EXPIRED an object which is not expired.

Action: Remove EXPIRED keyword, crosscheck object, or don't delete object.

RMAN-06118: a backup control file older than SCN *string* must be used for this recovery

Cause: An attempt was made to recover the database, but some files had no backup, and were not present in the control file at the beginning of the restore. This happens when the control file used during the recovery is a backup control file taken before the creation of some of the files that had no backup. In this situation, the control file that is used must be taken before the creation of all files that have no backup. This will enable RMAN to automatically re-create all of the files that had no backup.

Action: Restore a control file that was backed up before the specified system change number (SCN). The following RMAN commands can be used to do this: SET UNTIL SCN <x>; (where <x> is the SCN displayed in the message) RESTORE CONTROLFILE;

RMAN-06119: uncataloged datafile copy

Cause: This is an informational message only.

Action: No action is required.

RMAN-06120: uncataloged archived log

Cause: This is an informational message only.

Action: No action is required.

RMAN-06121: uncataloged control file copy

Cause: This is an informational message only.

Action: No action is required.

RMAN-06122: CHANGE .. UNCATALOG not supported for BACKUPSET

Cause: The CHANGE BACKUPSET .. UNCATALOG command was entered. The UNCATALOG operation is not supported with backup set.

Action: Use CHANGE BACKUPSET .. DELETE instead.

RMAN-06123: operation not supported without the recovery catalog or mounted control file

Cause: A command was used which requires a connection to a recovery catalog database or the target database to be mounted. The command cannot be used when no backup repository is available.

Action: If a recovery catalog database is available, then connect to the recovery catalog and retry the command, otherwise enter a different command.

RMAN-06124: error while looking up datafile copy key: *number*

Cause: An error occurred while looking up the specified datafile copy key in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure.

RMAN-06125: error while looking up archived log key: *number*

Cause: An error occurred while looking up the specified archived log key in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure.

RMAN-06126: skipping offline file *string*

Cause: The indicated file will not be included in the backup set because it is offline and the SKIP OFFLINE option was specified.

Action: No action is required.

RMAN-06127: skipping read-only file *string*

Cause: The indicated file will not be included in the backup set because it is read only and the SKIP READONLY option was specified.

Action: No action is required.

RMAN-06128: skipping inaccessible file *string*

Cause: The indicated file will not be included in the backup set because it could not be read, and the SKIP INACCESSIBLE option was specified.

Action: No action is required.

RMAN-06129: invalid reserved channel ID: *string*

Cause: The specified channel id is invalid. DELETE and DEFAULT are reserved channel names and may not be specified by users.

Action: Specify a different channel ID.

RMAN-06131: SKIP OFFLINE/READONLY only allowed with current control file

Cause: The SKIP OFFLINE and SKIP READONLY options are only permitted when the target database control file is current. When the target control file is not current, it is not possible to obtain a datafile's offline/read only status.

Action: Remove the skip option or mount a current control file on the target database.

RMAN-06132: cannot backup datafile *string* because it is not in the control file

Cause: A backup command was issued that includes the specified datafile, but the datafile is not listed in the control file. The control file is not current (it is a backup or a created control file).

Action: Recover the control file to make it current, then retry the backup command.

RMAN-06133: recovery catalog may have obsolete data for datafile *string*

Cause: A RESTORE UNTIL was issued, and the recovery catalog choose an older incarnation of the datafile than is listed in the control file.

Action: If the recovery catalog has correct data for the datafile, then restore a backup control file using the same UNTIL clause, then retry the datafile restore. Otherwise, restore a backup of the incarnation of the datafile listed in the control file.

RMAN-06134: host command complete

Cause: An operating system command has completed.

Action: None - this is an informational message.

RMAN-06135: error executing host command: *string*

Cause: A host command returned a non-zero return code.

Action: Correct the offending command.

RMAN-06136: ORACLE error from auxiliary database: *string*

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-06137: must have recovery catalog for REPORT SCHEMA AT TIME

Cause: A 'REPORT SCHEMA at_clause' command was issued, but there is no recovery catalog database.

Action: If you are not using a recovery catalog, then you may only issue the 'REPORT SCHEMA' command with no at_clause.

RMAN-06138: control file not mounted - must specify AT clause with REPORT command

Cause: A 'REPORT SCHEMA' with no at_clause was issued, and there is no recovery catalog, and there is also no control file mounted at the target database, so there is no place to get the information about the current list of files comprising the database.

Action: Use a recovery catalog or mount a control file at the target database.

RMAN-06139: WARNING: control file is not current for REPORT SCHEMA

Cause: A 'REPORT SCHEMA' with no at_clause was issued, and there is no recovery catalog, and the control file mounted by the target instance is not current, so the information about the current list of datafiles may not be current.

Action: Use a recovery catalog or mount a current control file.

RMAN-06140: cannot specify TAG option with LIST INCARNATION

Cause: The TAG option was specified with LIST INCARNATION. This is not permitted because there is no TAG associated with a database incarnation.

Action: Remove the TAG option and re-run the LIST command.

RMAN-06141: cannot specify ARCHIVELOG LIKE option with RESTORE

Cause: The ARCHIVELOG LIKE option was specified with RESTORE. This is not permitted because recovery catalog contains only those records that are not deleted from disk.

Action: Remove the ARCHIVELOG LIKE option and re-run the command.

RMAN-06142: DEVICE TYPE cannot be specified with this command

Cause: The DEVICE TYPE option was specified with a command that does not support it.

Action: Remove the DEVICE TYPE option and re-run the command.

RMAN-06143: LIKE may only be specified with COPY

Cause: The LIKE option was specified with a RMAN command. This is not permitted because only copies of datafiles, control files or archived logs have file names that may be tested with a LIKE operand.

Action: Remove the LIKE option and re-run the RMAN command.

RMAN-06144: FROM or UNTIL may not be specified with LIST INCARNATION

Cause: The FROM or UNTIL option was specified with LIST INCARNATION. This is not permitted because there is no time associated with a database incarnation.

Action: Remove the FROM or UNTIL option and re-run the LIST command.

RMAN-06145: control file is not current - obsolete file list may be incomplete

Cause: A CHANGE or REPORT command needs to compute the list of backups that are redundant and may be deleted. If the mounted control file is not current, it may not be possible to determine if a satisfactory backup exists for files which have been offline since the last OPEN RESETLOGS.

Action: No action need be taken - this is an informational message only. To ensure a complete report of obsolete backups, mount a current control file.

RMAN-06146: changes found for file *number* beyond offline SCN

Cause: A CHANGE or REPORT command needs to compute the list of backups that are redundant and may be deleted. A backup was found for a file which is shown as offline in the target database control file, but the backup contains changes beyond the system change number(SCN) when the file went offline. This is most likely because the target database control file is not really current, but is a restored copy of an older control file.

Action: Mount a current control file or a backup control file.

RMAN-06147: no obsolete backups found

Cause: A CHANGE or REPORT command could find no files that meet the specified criteria for obsolescence.

Action: None - this is an informational message.

RMAN-06148: redundancy count must be greater than zero

Cause: The REDUNDANCY operand specified for a CHANGE or REPORT OBSOLETE command was zero.

Action: Specify a REDUNDANCY operand of 1 or greater.

RMAN-06150: auxiliary name for datafile *number* set to: *string*

Cause: This message is issued in response to a CONFIGURE AUXNAME command.

Action: None - this is an informational message.

RMAN-06151: datafile *string* creation SCN *string*

Cause: This is an informational message. It should be accompanied by other messages.

Action: None

RMAN-06153: validation failed for datafile copy

Cause: The CHANGE DATAFILECOPY VALIDATE command discovered that the datafile copy could not be found or no longer contains the same data, so its record was deleted from the recovery catalog or target database control file.

Action: None - this is an informational message.

RMAN-06154: validation succeeded for datafile copy

Cause: The CHANGE DATAFILECOPY VALIDATE command discovered that the datafile copy still matches its data in the recovery catalog or target database control file.

Action: None - this is an informational message.

RMAN-06155: validation failed for control file copy

Cause: The CHANGE CONTROLFILECOPY VALIDATE command discovered that the control file copy could not be found or no longer contains the same data, so its record was deleted from the recovery catalog or target database control file.

Action: None - this is an informational message.

RMAN-06156: validation succeeded for control file copy

Cause: The CHANGE CONTROLFILECOPY VALIDATE command discovered that the control file copy still matches its data in the recovery catalog or target database control file.

Action: None - this is an informational message.

RMAN-06157: validation failed for archived log

Cause: The CROSSCHECK ARCHIVELOG command determined that the archived log could not be found or no longer contained the same data, so its record was marked expired.

Action: None - this is an informational message.

RMAN-06158: validation succeeded for archived log

Cause: The CROSSCHECK ARCHIVELOG command or VALIDATE HEADER option determined that the archived log still matches its data.

Action: None - this is an informational message.

RMAN-06159: error while looking up backup set

Cause: An error occurred while looking up the specified backup set in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure. Ensure that the key is entered correctly. If the backup set was created when the recovery catalog was not available, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06160: no backup pieces found for backup set key: *number*

Cause: No backup pieces for the requested backup set were found in the recovery catalog, or the target database control file.

Action: Specify an existing backup set.

RMAN-06161: error when inspecting auxiliary file name: *string*

Cause: This error is accompanied by other errors explaining the cause.

Action: Correct the auxiliary file name if it is wrong via the CONFIGURE AUXNAME command.

RMAN-06162: sql statement: *string*

Cause: This is the sql statement about to be executed for a SQL command.

Action: None, informational message only.

RMAN-06163: some datafiles cannot be recovered, aborting the RECOVER command

Cause: This message should be followed by one or more 6162 or 6164 messages.

Action: Check the accompanying errors.

RMAN-06164: WARNING: no channel of required type allocated to recover datafile *number*

Cause: A RECOVER command could not proceed because incremental backup sets or archived log backup sets exist on a device type that has not been allocated.

Action: Use the LIST command to determine which device type is needed, then allocate a channel of that type.

RMAN-06165: datafile *string* is too old to recover, restore a more recent copy

Cause: The archived logs and/or incremental backup sets required to recover the datafile do not exist, but a more recent backup of the datafile exists which can be recovered.

Action: Issue a RESTORE for the datafile, then reissue the RECOVER command.

RMAN-06166: datafile *string* cannot be recovered

Cause: Incremental backups or archived redo logs needed to recover the datafile cannot be found, and no recoverable full backup or datafile copy exists.

Action: Use the LIST command to see if there is a backup set or datafile copy that can be made AVAILABLE. If not, then the datafile is unrecoverable. If a full or datafile copy exists, then a Point-in-Time Recovery may be possible.

RMAN-06167: already connected

Cause: a CONNECT command was issued, but RMAN is already connected to the specified database.

Action: RMAN has no DISCONNECT command, so to connect to a different instance, exit RMAN and start it again.

RMAN-06168: no backup pieces with this tag found: *string*

Cause: A tag was used to specify a list of backup pieces, but no backup pieces with this tag could be found.

Action: Make sure the tag is specified correctly.

RMAN-06169: could not read file header for datafile *string* error reason *string*

Cause: The specified datafile could not be accessed. The reason codes are: 1 - file name is MISSINGxx in the control file 2 - file is offline 3 - file is not verified 4 - DBWR could not find the file 5 - unable to open file 6 - I/O error during read 7 - file header is corrupt 8 - file is not a datafile 9 - file does not belong to this database 10 - file number is incorrect 12 - wrong file version 15 - control file is not current

Action: If the error can be corrected, do so and retry the operation. The SKIP option can be used to ignore this error during a backup.

RMAN-06170: no control file copy found with offline range RECID *string* STAMP *string* datafile *string*

Cause: This offline range is needed for recovering the specified data file, but the offline range record has aged out of the current control file and no control file copy with the record could be accessed. At least 1 control file copy containing the offline range was found in the recovery catalog and was in AVAILABLE status.

Action: Query the RC_CONTROLFILE_COPY view for the names of all control file copies, then issue a CHANGE CONTROLFILECOPY ... VALIDATE; command for them. Then reissue the RECOVER command.

RMAN-06171: not connected to target database

Cause: A command was issued but no connection to the target database has been established.

Action: Issue a CONNECT TARGET command to connect to the target database.

RMAN-06172: no AUTOBACKUP found or specified handle is not a valid copy or piece

Cause: A restore could not proceed because no AUTOBACKUP was found or specified handle is not a valid copy or backup piece. In case of restore from AUTOBACKUP, it may be the case that a backup exists, but it does not satisfy the criteria specified in the user's restore operands. In case of restore from handle, it may be the handle is not a backup piece or control file copy. It may be that it does not exist.

Action: Modify AUTOBACKUP search criteria or verify the handle.

RMAN-06173: SET NEWNAME command has not been issued for datafile *string* when restore auxiliary

Cause: Auxiliary type was specified for the control file, but no SET NEWNAME command has been previously issued for a datafile.

Action: Issue SET NEWNAME command for every datafile in the recovery set.

RMAN-06174: not connected to auxiliary database

Cause: An auxiliary command was issued but no connection to a auxiliary database has been established.

Action: Issue a CONNECT AUXILIARY command to connect to the auxiliary database.

RMAN-06175: deleted script: *string*

Cause: A DELETE SCRIPT command was executed.

Action: None, informational message only.

RMAN-06176: no recovery required; all files are read only or offline

Cause: A RECOVER DATABASE command does not need to recover any files because all of the files to be recovered are offline or read only. This can only occur when the SKIP clause includes the SYSTEM tablespace.

Action: None, informational message only

RMAN-06177: restore not done; all files read only, offline, or already restored

Cause: A RESTORE command does not need to restore any files, because all of the files to be restored are offline, read-only, or are already restored to their correct destinations.

Action: None, informational message only

RMAN-06178: datafile *number* not processed because file is offline

Cause: A RESTORE DATABASE or RECOVER DATABASE command omitted processing the indicated datafile because it is offline clean at the desired point-in-time.

Action: None, informational message only

RMAN-06179: datafile *number* not processed because file is read-only

Cause: A RESTORE DATABASE or RECOVER DATABASE command omitted processing the indicated datafile because it is part of a read-only tablespace at the desired point-in-time.

Action: None, informational message only

RMAN-06180: incremental backups require Enterprise Edition

Cause: A BACKUP command with INCREMENTAL LEVEL > 0 was specified.

Action: Use FULL, or INCREMENTAL LEVEL 0.

RMAN-06181: multiple channels require Enterprise Edition

Cause: Attempt to allocate more than 1 channel in a job.

Action: Remove all except one ALLOCATE CHANNEL command.

RMAN-06182: archived log *string* of thread *string* with sequence *string* larger than MAXSETSIZE

Cause: A BACKUP ARCHIVELOG command specified the MAXSETSIZE operand too low. The specified archived log is larger than MAXSETSIZE will allow.

Action: Increase MAXSETSIZE limit.

RMAN-06183: datafile or datafile copy *string* (file number *string*) larger than MAXSETSIZE

Cause: A BACKUP DATAFILE(copy) command specified the MAXSETSIZE operand too low. The specified datafile is larger than MAXSETSIZE will allow.

Action: Increase MAXSETSIZE limit.

RMAN-06184: duplicate object in backup specifier: *string string*

Cause: A backup command specifies the same datafile or copy of a data file multiple times.

Action: Eliminate the duplicates.

RMAN-06185: Recovery Manager incompatible with *string* database: RMAN *number.number.number.number* to *number.number.number.number* required

Cause: This version of recovery manager was incompatible with the indicated database or the DBMS_BACKUP_RESTORE package installed in the indicated database.

Action: If the database has been upgraded from an earlier version, ensure that the catxxx.sql script has been run successfully. Re-install dbmsbkrs.sql and prvtbkrs.plb if necessary. Otherwise, use a version of RMAN within the range specified in the error message.

RMAN-06186: PL/SQL package *string.string* version *string* in *string* database is too old

Cause: The specified PL/SQL package is a version that is too old to work with this version of the Recovery Manager (RMAN).

Action: If the database indicated is CATALOG, then you can use the UPGRADE CATALOG command to upgrade the recovery catalog to the most current version. If the database is TARGET or AUXILIARY, then you must either upgrade the specified database or use an older version of RMAN.

RMAN-06187: control file copy *string* not found or out of sync with catalog

Cause: The indicated file is not found, or is found but is not the same file that the recovery catalog thinks it is. It is likely that some operation outside of Recovery Manager has altered the file, or that Recovery Manager has not resynced with the target database.

Action: Re-catalog the file and retry the operation.

RMAN-06188: cannot use command when connected to a mounted target database

Cause: An attempt was made to issue a command that can be used only when there is no connection to the target database or when the target database is not mounted.

Action: Dismount the database or restart RMAN and use the command before connecting to the target database.

RMAN-06189: current DBID *number* does not match target mounted database (*number*)

Cause: SET DBID was used to set a DBID that does not match the DBID of the database to which RMAN is connected.

Action: If the current operation is a restore to copy the database, do not mount the database. Otherwise, avoid using the SET DBID command, or restart RMAN.

RMAN-06190: PL/SQL package *string.string* version *string* in *string* database is not current

Cause: RMAN detected an old version of the specified package. RMAN will execute in backwards-compatible mode.

Action: No action is required, but certain features and bug-fixes may not be available when RMAN runs in backwards-compatible mode. If the database is CATALOG, then you can use the UPGRADE CATALOG command to upgrade the recovery catalog to the most current version. If the database is TARGET or AUXILIARY, then you must either upgrade the specified database or use an older version of RMAN. The files that must be run to upgrade the target or auxiliary database are dbmsrman.sql and prvtrman.plb.

RMAN-06191: PL/SQL package *string.string* version *string* in *string* database is too new

Cause: RMAN detected an incompatible version of the specified package.

Action: Use a newer version of recovery manager. Message 6439 indicates the minimum required version of recovery manager.

RMAN-06192: maximum value for MAXPIECESIZE or MAXSETSIZE must be between 1 Kb and 2048 Gb

Cause: Input size for MAXPIECESIZE or MAXSETSIZE was out of range.

Action: Specify a valid size and retry the command.

RMAN-06193: connected to target database (not started)

Cause: This is an informational message only.

Action: The database must be started before any other RMAN commands are issued.

RMAN-06194: target database instance not started

Cause: A command was issued that requires the target database instance be started.

Action: Issue a STARTUP command to start the instance.

RMAN-06195: auxiliary database not started

Cause: A command was issued that requires the auxiliary database instance be started.

Action: Issue a STARTUP AUXILIARY command.

RMAN-06196: Oracle instance started

Cause: A STARTUP command completed successfully.

Action: None, this is an informational message.

RMAN-06197: Total System Global Area *string* bytes

Cause: This is an informational message only.

Action: No action is required.

RMAN-06198: *string string* bytes

Cause: This is an informational message only.

Action: No action is required.

RMAN-06199: database mounted

Cause: This is an informational message only.

Action: No action is required.

RMAN-06200: Changed *string* objects to AVAILABLE status

Cause: This is an informational message only.

Action: No action is required.

RMAN-06201: Deleted *string* objects

Cause: This is an informational message only.

Action: No action is required.

RMAN-06202: Deleted *string* EXPIRED objects

Cause: This is an informational message only.

Action: No action is required.

RMAN-06203: Changed KEEP options for *string* objects

Cause: This is an informational message only.

Action: No action is required.

RMAN-06204: Changed *string* objects to UNAVAILABLE status

Cause: This is an informational message only.

Action: No action is required.

RMAN-06205: Uncataloged *string* objects

Cause: This is an informational message only.

Action: No action is required.

RMAN-06206: Crosschecked *string* objects

Cause: This is an informational message only.

Action: No action is required.

RMAN-06207: WARNING: *string* objects could not be deleted for *string* channel(s) due

Cause: This is an informational message only.

Action: No action is required.

RMAN-06208: to mismatched status. Use CROSSCHECK command to fix status

Cause: This is an informational message only.

Action: No action is required.

RMAN-06209: List of failed objects

Cause: This is an informational message only.

Action: No action is required.

RMAN-06210: List of Mismatched objects

Cause: This is an informational message only.

Action: No action is required.

RMAN-06211: =====

Cause: This is an informational message only.

Action: No action is required.

RMAN-06212: Object Type Filename/Handle

Cause: This is an informational message only.

Action: No action is required.

RMAN-06213: -----

Cause: This is an informational message only.

Action: No action is required.

RMAN-06214: *string string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06215: List of objects that must perform same operation at other database

Cause: This is an informational message only.

Action: The specified list of objects were not accessible at connected target database. Re-run the CROSSCHECK command after connecting to database that has DB_UNIQUE_NAME displayed in output for the specified object.

RMAN-06216: WARNING: db_unique_name mismatch - *string* objects could not be updated

Cause: This is an informational message only.

Action: Run CROSSCHECK command after connecting to a primary or physical standby database that can access the specified objects.

RMAN-06217: not connected to auxiliary database with a net service name

Cause: A command that moves files from the target instance to the auxiliary instance was requested. Such a command requires a net service name be present in the connect string used to connect to the auxiliary instance.

Action: Issue a CONNECT AUXILIARY command and include a net service name in the connect string. That service name must be valid on the target instance.

RMAN-06218: List of objects requiring same operation on database with db_unique_name *string*

Cause: This is an informational message only.

Action: The specified list of objects were not accessible by the target database. Re-run the same command after connecting to database that has DB_UNIQUE_NAME displayed in output for the specified object.

RMAN-06219: List of objects not associated with all known db_unique_names

Cause: This is an informational message only.

Action: The specified list of objects were not accessible by the target database. Re-run the same command after connecting to primary database or physical standby database that can access the specified objects.

RMAN-06220: Creating automatic instance, with SID=*'string'*

Cause: No connection to the auxiliary instance was provided, but the command requires an auxiliary instance.

Action: No action is required unless you want to create a permanent database, in which case you should stop the command and re-run it, providing an auxiliary instance connection.

RMAN-06221: Removing automatic instance

Cause: RMAN is removing the automatic auxiliary instance that was created for this command.

Action: No action is required.

RMAN-06223: starting up automatic instance *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06224: Automatic instance created

Cause: This is an informational message only.

Action: No action is required.

RMAN-06225: shutting down automatic instance *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06226: Automatic instance removed

Cause: This is an informational message only.

Action: No action is required.

RMAN-06230: List of Stored Scripts in Recovery Catalog

Cause: This message is issued in response to a LIST SCRIPT NAMES command. The following fields are shown for each script that is stored in the recovery catalog: Header indicating to what database the script belongs. Script Name: name of the script. Description: comment associated with this script.

Action: No action is required.

RMAN-06238: List of Databases

Cause: This message is issued in response to a LIST DB_UNIQUE_NAME command. The following fields are shown for each database that is known to the recovery catalog: DB Key: This is the unique key which identifies this database in the recovery catalog. DB Name: The name of the database. DB ID: The database ID. This is a number which remains the same for the life of the database, even if the database name is changed. DB_UNIQUE_NAME: db_unique_name value for the database.

Action: No action is required.

RMAN-06246: List of Database Incarnations

Cause: This message is issued in response to a LIST INCARNATION OF DATABASE command. The following fields are shown for each database that is registered with the recovery catalog: DB Key: This is the unique key which identifies this database in the recovery catalog. Inc Key: This is the unique key which identifies this incarnation of the database in the recovery catalog. DB Name: The name of the database. DB ID: The database ID. This is a number which remains the same for the life of the database, even if the database name is changed. Status: 'YES' if this is the current incarnation of this database, otherwise 'NO'. Reset SCN: system change number (SCN) of the most recent RESETLOGS operation. Reset Time: Time of the most recent RESETLOGS operation.

Action: No action is required.

RMAN-06250: Report of files that need backup due to unrecoverable operations

Cause: An unlogged change (such as 'create table unrecoverable') has been made to this file, and the most recent backup of the file does not contain those changes.

Action: Take a backup of this file. If this file is lost before a backup is taken, then the unlogged modifications will be lost. The message indicates whether a full backup is required or whether an incremental backup will suffice.

RMAN-06263: *string string string*

Cause: This message is issued in response to the REPORT NEED BACKUP INCREMENTAL command, for those files which would use more than the specified number of incrementals during recovery.

Action: To reduce the number of incremental backups which would be used during recovery of this datafile, take a new full backup of this file now.

RMAN-06270: Report of files whose recovery needs more than *number* days of archived logs

Cause: This message is issued in response to the REPORT NEED BACKUP DAYS command for those files which need more than the specified number of days' archived logs for recovery.

Action: To reduce the number of log files needed for recovery of this datafile, take a new full or incremental backup now.

RMAN-06274: Report of files that must be backed up to satisfy *number* days recovery window

Cause: This message is issued in response to the REPORT NEED RECOVERY WINDOW OF n DAYS command for those files that must be backed up to satisfy specified retention policy.

Action: To satisfy specified recovery window for this datafile, take a new full or incremental backup now.

RMAN-06275: invalid number of days specified for report : *string* days

Cause: This message is issued in response to the REPORT NEED RECOVERY WINDOW OF n DAYS or REPORT NEED BACKUP DAYS n command when an invalid number of days was specified in input command.

Action: The number of days specified in REPORT command must be greater than zero.

RMAN-06280: Report of obsolete backups and copies

Cause: This message is issued in response to the REPORT OBSOLETE command. Each of the files listed is obsolete because it is more redundant than the level of redundancy specified in the REPORT command.

Action: Depending on your needs, you might need to take new backups.

RMAN-06290: Report of database schema for database with *db_unique_name string*

Cause: This message is issued in response to the REPORT SCHEMA command. The report shows the physical schema of the database at the indicated time. The following fields are shown for each datafile and tempfile: File: The file number. Size(MB): The size of the file in mega bytes. Tablespace: The name of the tablespace which contains this file. RB segs: YES if this file is part of a tablespace containing rollback segments, otherwise NO. Datafile/Tempfile Name: The file name. Maxsize(MB): Maximum file size to which file can be extended

Action: No action is required.

RMAN-06300: Report of files with less than *number* redundant backups

Cause: This message is issued when the REPORT NEED BACKUP REDUNDANCY command is used for those files which have less than the specified number of backups which can be used for recovery.

Action: Take another backup of the datafiles listed.

RMAN-06306: =====

Cause: This message is issued in response to a LIST BACKUP DATABASE/TABLESPACE/DATAFILE command when some backups were taken with the PROXY option. If a recovery catalog is in use, then the information comes from the recovery catalog, otherwise it comes from the target database control file. The following fields are shown for each proxy datafile backup. Key: This is the unique key which identifies this proxy backup in the recovery catalog. This value can be used in a CHANGE command to change its status. If the target database control file is being used as the recovery catalog, then this field uniquely identifies this copy in the control file. File: The file number that this file was copied from. Status: This is the status of the file. Possible values are: A - Available U - Unavailable D - Deleted X - Expired Status 'U' will not be used if the target database control file is being used as the recovery catalog. Completion time: This is the date and time when the backup was created. This column will be printed in the default Oracle date format, unless overridden with a NLS_DATE_FORMAT environment variable. Ckp SCN: This is the checkpoint system change number (SCN) of the backup. The file contains all changes made at or before this SCN. Ckp time: This is the time that the file was last checkpointed. Handle: This is the media manager handle of the proxy backup.

Action: No action is required.

RMAN-06378: List of Backup Sets

Cause: This message is issued in response to a LIST BACKUP command.

Action: No action is required.

RMAN-06400: database opened

Cause: This is an informational message only.

Action: No action is required.

RMAN-06401: database is already started

Cause: A STARTUP command without the FORCE option was issued, but the target database is already started.

Action: Use the FORCE option if you want to restart the database.

RMAN-06402: Oracle instance shut down

Cause: This is an informational message only.

Action: No action is required.

RMAN-06403: could not obtain a fully authorized session

Cause: The most likely cause of this error is that one of the databases to which RMAN had previously connected is not started or has has been shutdown. Other error messages should identify exactly which database is the problem.

Action: Startup the database causing the problem.

RMAN-06404: database dismounted

Cause: This is an informational message only.

Action: No action is required.

RMAN-06405: database closed

Cause: This is an informational message only.

Action: No action is required.

RMAN-06406: deleted archived log

Cause: This is an informational message only.

Action: No action is required.

RMAN-06407: auxiliary instance file *string* deleted

Cause: This is an informational message only.

Action: No action is required.

RMAN-06408: recovery catalog upgraded to version *string*

Cause: This is an informational message issued by the UPGRADE CATALOG command. It indicates the version of the recovery catalog schema to which the recovery catalog was just upgraded. Note that this version number may not reflect the version number of your rman executable or target database, because the recovery catalog schema is not changed with each Oracle release.

Action: No action is required.

RMAN-06409: LIKE clause in LIST BACKUP OF ARCHIVELOG is not supported

Cause: LIST BACKUP OF ARCHIVELOG LIKE was used, which is not supported.

Action: Remove LIKE clause from command.

RMAN-06410: cannot use command when channels are allocated

Cause: An attempt was made to issue a command that can be used only when there are no allocated channels.

Action: Do not use the command, or de-allocate channels and use the command when no channels are allocated.

RMAN-06411: backup copies setting out of range (1-4): *number*

Cause: An attempt was made to set backup copies to an invalid value.

Action: Use a value in the specified range.

RMAN-06412: no proxy copy channel found

Cause: A proxy copy was started, but no allocated channel supports proxy copy. This could be because the media management software used by the target database does not support proxy copy, or because all of the allocated channels are of type DISK, which never support proxy copy.

Action: If this is a backup, then either allocate a non-disk channel, or do not use the PROXY option. If this is a restore, then a channel of the same type which created the proxy backup was allocated, but now does not support proxy copy. If proxy copy is no longer supported by the media management software at the target database, the CROSSCHECK or CHANGE commands should be used so that those backups will not be considered for further restores.

RMAN-06413: channel *string* does not support proxy copy

Cause: The channel which was specified for this backup or restore does not support proxy copy. This could be because the media management software used by the target database does not support proxy copy, or because the channel is of type DISK, which never supports proxy copy.

Action: If this is a backup, then either allocate a non-disk channel, or do not use the PROXY option. If this is a restore, then a channel of the same type which created the proxy backup was allocated, but now does not support proxy copy. If proxy copy is no longer supported by the media management software at the target database, the CROSSCHECK command should be used so that those backups will not be considered for further restores.

RMAN-06414: target database COMPATIBLE option does not support proxy copy

Cause: PROXY was specified, and the target database uses a media manager that supports proxy copy, but the COMPATIBLE initialization parameter of the target database must be 8.1.0 or greater to create proxy backups. If the database is downgraded to the earlier release that is specified in the COMPATIBLE parameter, then it will no longer be able to restore proxy backups.

Action: Either take a non-proxy backup or change the target database COMPATIBLE parameter.

RMAN-06415: file *string* cannot be proxy backed up

Cause: The PROXY option was specified, but the media management software used by the target database cannot back up the specified file using proxy copy. If PROXY ONLY was specified, then the backup is terminated. If PROXY was specified, then this file will be placed into a non-proxy backup set.

Action: Remove the ONLY option to place the files into a regular backup set, or contact the media management vendor if you believe that the media management software should support proxy copy of this file.

RMAN-06416: PROXY ONLY was specified and some files could not be proxy copied

Cause: PROXY ONLY was specified, and some of the files to be backed up could not be backed up by the media management software used by the target database. Message 6415 is issued for each file that cannot be proxy copied.

Action: Remove the ONLY option to place the files into a regular backup set, or contact the media management vendor if you believe that the media management software should support proxy copy of these files.

RMAN-06417: command not allowed when connected to a virtual private catalog

Cause: The command that was entered cannot be used while connected to a virtual private catalog.

Action: Connect to the base catalog and re-execute the command.

RMAN-06418: proxy incremental backups with level > 0 not supported

Cause: PROXY was specified for a non-level-zero incremental backup. Proxy backups may only be full or level 0 backups.

Action: Remove one of the conflicting options.

RMAN-06419: file *string* cannot be proxy restored from handle *string*

Cause: The media management software used by the target database indicated that it cannot restore the specified file from the specified backup handle.

Action: Consult the media management software documentation to find out why this restriction exists or contact the media management vendor.

RMAN-06420: some files could not be proxy restored - aborting restore

Cause: Some of the files to be restored could not be restored by the media management software used by the target database. Message 6419 is issued for each file that cannot be restored.

Action: Contact the media management vendor if you believe that the media management software should support proxy copy of these files. The CROSSCHECK or CHANGE commands can be used to remove these proxy copies from the catalog to prevent the RESTORE command from trying to restore from them.

RMAN-06421: sent command to channel: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06422: no channels found for SEND command

Cause: No channels with the specified names or device types were found. If no channel qualifiers were specified, then no channels were allocated.

Action: Specify a different channel type or allocate a channel of the desired type.

RMAN-06423: requested limit of *number* exceeds vendor limit of *number*

Cause: A command was used to set the backup piece size limit, but the media management software used by the target database cannot create backup pieces that large.

Action: Specify a smaller backup piece limit.

RMAN-06424: error while looking up proxy copy

Cause: An error occurred while looking up the specified proxy copy in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure. Ensure that the name or key is entered correctly. If the proxy copy was created when the recovery catalog was not available, then a RESYNC CATALOG must be done to update the recovery catalog.

RMAN-06425: <datafile pathname not available>

Cause: This is an informational message only.

Action: No action is required.

RMAN-06426: RECOVERY_CATALOG_OWNER role must be granted to user *string*

Cause: The CREATE CATALOG or UPGRADE CATALOG command was used, but the USERID that was supplied in the CATALOG connect string does not have the RECOVERY_CATALOG_OWNER role granted as a DEFAULT role.

Action: Grant the RECOVERY_CATALOG_OWNER role to the recovery catalog owner.

RMAN-06427: recovery catalog already exists

Cause: The CREATE CATALOG command cannot be used when the recovery catalog already exists.

Action: Use the UPGRADE CATALOG command to upgrade your recovery catalog to the most current release without losing any existing backup data. Use the DROP CATALOG command to remove an existing recovery catalog.

RMAN-06428: recovery catalog is not installed

Cause: A recovery catalog database connection has been made, but the recovery catalog tables and views have not been installed.

Action: If you mis-typed the recovery catalog owner USERID, then correct the USERID and reconnect to the recovery catalog. If this is the first time that you have signed on to Recovery Manager with this recovery catalog owner USERID, then use the CREATE CATALOG command to create the recovery catalog schema. Alternatively, exit RMAN and connect without specifying a recovery catalog connection.

RMAN-06429: *string* database is not compatible with this version of RMAN

Cause: The indicated database is not compatible with this version of the Recovery Manager (RMAN). Other messages have also been issued which detail the cause of the error.

Action: See the other messages. If the database is CATALOG, then you may be able to use the CREATE CATALOG or UPGRADE CATALOG commands to correct the problem. If the database is TARGET or AUXILIARY, then you must either upgrade the target database or use a newer version of the RMAN executable.

RMAN-06430: recovery catalog USERID cannot be SYS

Cause: A recovery catalog connection was made to USERID SYS. The recovery catalog must be created in a USERID other than SYS.

Action: Specify a different USERID in the CATALOG connect string.

RMAN-06431: recovery catalog created

Cause: This is an informational message issued by the CREATE CATALOG command.

Action: No action is required.

RMAN-06432: recovery catalog dropped

Cause: This is an informational message issued by the DROP CATALOG command.

Action: No action is required.

RMAN-06433: error installing recovery catalog

Cause: An error was received from the recovery catalog database while it was being installed. Another error message shows the error message from the server.

Action: The most common reasons for failure to install the recovery catalog are:

- Lack of space in the recovery catalog database: allocate more space, use the DROP CATALOG command to remove any partially installed recovery catalog, and retry the command.

- Object already exists: This is caused by a partial recovery catalog installation. Use the DROP CATALOG command to remove the partially installed recovery catalog and retry the command.

RMAN-06434: some errors occurred while removing recovery catalog

Cause: Some errors were received from the recovery catalog database while removing the recovery catalog.

Action: Correct the error(s) and retry the command. Note that Recovery Manager intercepts and ignores common errors, such as 'object not found', which can happen while removing a partially installed recovery catalog. Only serious errors will be displayed while removing the recovery catalog.

RMAN-06435: recovery catalog owner is *string*

Cause: This is an informational message issued by the UPGRADE CATALOG and DROP CATALOG commands.

Action: No action is required.

RMAN-06436: enter DROP CATALOG command again to confirm catalog removal

Cause: The DROP CATALOG command deletes the recovery catalog, rendering all database backups unusable, and should be used with care. The command must be entered twice to ensure that this is really what you want to do.

Action: If you really want to remove the recovery catalog, then enter the DROP CATALOG command again.

RMAN-06437: cannot drop catalog - catalog is newer than this RMAN

Cause: The DROP CATALOG command was entered, but the recovery catalog was created by a newer version of the Recovery Manager (RMAN). This version of RMAN may not be able to drop the entire recovery catalog.

Action: Use the version of RMAN which most recently created or upgraded the recovery catalog.

RMAN-06438: error executing package DBMS_RCVMAN in *string* database

Cause: Recovery Manager requires the DBMS_RCVMAN package in the SYS schema of the indicated database. Normally this package is installed during database creation. To re-create the package, run the files dbmsrman.sql and prvtrmns.plb.

Action: re-create the DBMS_RCVMAN package in the SYS schema.

RMAN-06439: RMAN must be upgraded to version *string* to work with this package

Cause: This message indicates the minimum version of recovery manager required to use the package which was specified in message 6191.

Action: A newer version of RMAN must be used with this package.

RMAN-06440: virtual catalog dropped

Cause: This is an informational message issued by the DROP CATALOG command, when connected to a virtual private catalog. Note that dropping a virtual private catalog does not delete any data, because the catalog data is owned by the base catalog.

Action: No action is required.

RMAN-06441: cannot upgrade catalog - catalog is already newer than this RMAN

Cause: The recovery catalog is already at a version level that is greater than this version of the Recovery Manager. The UPGRADE CATALOG command is not needed.

Action: Either upgrade to a more recent Recovery Manager, or continue to use the current version. Message 6191 will be issued if the recovery catalog is too new to work with this version of Recovery Manager.

RMAN-06442: enter UPGRADE CATALOG command again to confirm catalog upgrade

Cause: The UPGRADE CATALOG command alters the recovery catalog schema. Although the recovery catalog is designed to be compatible with older versions of the Recovery Manager (RMAN), it is possible that an upgrade will remove support for older versions of RMAN.

Action: If you really want to upgrade the recovery catalog, then enter the UPGRADE CATALOG command again. If you are not going to use an older version of RMAN with this recovery catalog, then compatibility is not an issue. If you plan to also continue using an older version of RMAN with this recovery catalog then, before upgrading, consult the Migration Guide for the current Oracle release to determine if upgrading to the current version of the recovery catalog will remove support for older versions of RMAN.

RMAN-06443: error upgrading recovery catalog

Cause: An error was received from the recovery catalog database while upgrading the recovery catalog.

Action: Correct the error and retry the command. Note that the Recovery Manager intercepts and ignores common errors, such as 'column already exists,' which can happen if the recovery catalog has already been partially upgraded. Only serious errors will be displayed while upgrading the recovery catalog.

RMAN-06444: error creating *string*

Cause: During the CREATE CATALOG or UPGRADE CATALOG command, the indicated object could not be created due to errors.

Action: Make sure that the RECOVER.BSQ file has not been modified or damaged, and then if this error persists, contact Oracle support. If the error refers to one of the RMAN PL/SQL packages, connect to the recovery catalog owner and query the USER_ERRORS view to find out the details of the compilation errors.

RMAN-06445: cannot connect to recovery catalog after NOCATALOG has been used

Cause: The CONNECT CATALOG command was used after the user had already specified the NOCATALOG option.

Action: Re-start rman if you wish to use a recovery catalog.

RMAN-06446: changed proxy copy unavailable

Cause: This is an informational message only.

Action: No action is required.

RMAN-06447: changed proxy copy available

Cause: This is an informational message only.

Action: No action is required.

RMAN-06448: uncataloged proxy copy

Cause: This is an informational message only.

Action: No action is required.

RMAN-06449: deleted proxy copy

Cause: This is an informational message only.

Action: No action is required.

RMAN-06450: crosschecked proxy copy: found to be '*string*'

Cause: This is an informational message only.

Action: No action is required.

RMAN-06451: proxy copy handle=*string* RECID=*string* STAMP=*string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06452: *string* package upgraded to version *string*

Cause: This is an informational message issued by the UPGRADE CATALOG command. It indicates the version to which the indicated package was just upgraded. Note that this version number may not reflect the version number of your rman executable or target database, because the recovery catalog packages are not changed with each Oracle release.

Action: No action is required.

RMAN-06453: RECOVERABLE may only be used with datafile objects

Cause: An attempt was made to use LIST ... RECOVERABLE .. with OF CONTROLFILE or OF ARCHIVELOG.

Action: Remove the RECOVERABLE keyword and try again.

RMAN-06454: duplexed backups require Enterprise Edition

Cause: The SET COPIES or CONFIGURE BACKUP COPIES command was used to create more than one copy of each backup piece, but Enterprise Edition is not installed.

Action: Do not attempt to create more than one copy of each backup piece.

RMAN-06455: Tablespace Point-in-Time Recovery requires Enterprise Edition

Cause: Tablespace Point-in-Time Recovery was attempted, but Enterprise Edition is not installed.

Action: Do not attempt Tablespace Point-in-Time Recovery.

RMAN-06456: command is obsolete

Cause: This is an informational message only.

Action: No action is required.

RMAN-06457: UNTIL SCN (*string*) is ahead of last SCN in archived logs (*string*)

Cause: UNTIL SCN cannot be more than the last system change number (SCN) of the last archived log

Action: Check the UNTIL SCN.

RMAN-06458: AS COPY option cannot be used with RECOVERY FILES, RECOVERY AREA or DB_RECOVERY_FILE_DEST

Cause: The RECOVERY FILES, RECOVERY AREA or DB_RECOVERY_FILE_DEST was specified with AS COPY.

Action: Remove the AS COPY option and resubmit the command.

RMAN-06459: BACKUP <VALIDATE|DURATION> is not supported with PROXY

Cause: BACKUP <VALIDATE|DURATION> and PROXY were specified in the same backup command.

Action: Remove the incompatible option.

RMAN-06460: control file copy *string* cannot be backed up by proxy.

Cause: The PROXY option was specified, but proxy copy of control file is not supported. This file will be placed into a non-proxy backup set.

Action: No action required, this is an informational message.

RMAN-06461: current control file cannot be backed up by proxy.

Cause: The PROXY option was specified, but proxy copy of control file is not supported. This file will be placed into a non-proxy backup set.

Action: No action required, this is an informational message.

RMAN-06462: no backup sets found on device DISK that match specification

Cause: A backup set record specifier did not match an backup set on device DISK in the recovery catalog.

Action: Resubmit the command with a different backup set record specifier. The Recovery Manager (RMAN) LIST command can be used to display all backup sets that RMAN knows about.

RMAN-06463: Backup set key *string* cannot be backed up by proxy.

Cause: The PROXY option was specified, but proxy copy of backup set is not supported. This file will be placed into a non-proxy backup set.

Action: No action required, this is an informational message.

RMAN-06464: BACKUP BACKUPSET is not supported with VALIDATE option

Cause: BACKUP BACKUPSET and VALIDATE were specified in the same backup command.

Action: To VALIDATE BACKUPSET use 'validate' or 'restore validate' command.

RMAN-06465: configuration not implemented: *string*

Cause: The configuration is not implemented in the current release.

Action: Avoid using the command.

RMAN-06466: error parsing configuration string (*string*)

Cause: Unsupported configuration string is stored in recovery catalog or target database control file.

Action: Check compatibility matrix rman executable and target database and recover catalog. Use DBMS_BACKUP_RESTORE.DELETECONFIG to remove problematic configuration.

RMAN-06467: could not translate DBA: *number*

Cause: An error was received when calling DBMS_RCVMAN

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-06468: Invalid Data Block Address: *number*

Cause: The DBA specified doesn't belong to the mentioned tablespace

Action: Check the DBA

RMAN-06469: could not translate corruption list

Cause: An error was received when calling DBMS_RCVMAN

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-06470: DEVICE TYPE is supported only when automatic channels are used

Cause: The DEVICE TYPE option was specified with a BACKUP, RESTORE, RECOVER, DUPLICATE, CHANGE, VALIDATE, CROSSCHECK, or DELETE EXPIRED command. This option is allowed only when automatically allocated channels are used.

Action: Remove the DEVICE TYPE option and re-run the command. Or Remove all ALLOCATE commands and re-run the script so that channels are automatically allocated.

RMAN-06471: no configuration found to allocate channels for *string*

Cause: Device type configuration was not found in recovery catalog

Action: Setup device type configuration using configure command for required device type

RMAN-06472: channel id *string* is automatically allocated

Cause: Channel id was used on ALLOCATE/RELEASE command.

Action: Use other channel id that does not belong to reserved channel id's name space

RMAN-06473: SET DATABASE can only be used in case of DUPLICATE without TARGET connection

Cause: A SET DATABASE command was specified when connected to target database or not connected to an auxiliary instance.

Action: Specify the command only when not connected to a target database and when connected to an auxiliary instance in preparation to DUPLICATE without TARGET connection.

RMAN-06474: maintenance channels are not allocated

Cause: RELEASE CHANNEL was used without allocating any maintenance channels.

Action: Allocate maintenance channel before executing this command.

RMAN-06475: parallelism setting out of range (1-254): *number*

Cause: Parallelism for the device type in CONFIGURE PARALLELISM command is out of range

Action: Enter value of parallelism that are within the allowed range.

RMAN-06476: channel number out of range (1-254): *number*

Cause: Channel number entered in CONFIGURE CHANNEL command is out of range.

Action: Enter channel number within allowed range and retry the command. for this device and retry the command

RMAN-06477: configuration value length exceeds 1024

Cause: CONFIGURE CHANNEL command entered has configuration value greater than 1024 bytes.

Action: Reduce the length of CONFIGURE CHANNEL command options

RMAN-06478: WARNING: datafile copy '*string*' cannot be found on disk

Cause: The CHANGE DATAFILECOPY AVAILABLE command was used, but the datafile copy cannot be found on disk.

Action: If the storage containing the datafile copy has been removed from the host, restore it and retry the command. If the datafile copy is permanently gone, then issue the CHANGE DATAFILECOPY DELETE command for this datafile.

RMAN-06479: WARNING: control file copy '*string*' cannot be found on disk

Cause: The CHANGE CONTROLFILECOPY AVAILABLE command was used, but the control file copy cannot be found on disk.

Action: If the storage containing the control file copy has been removed from the host, restore it and retry the command. If the control file copy is permanently gone, then issue the CHANGE CONTROLFILECOPY DELETE command for this control file.

RMAN-06480: WARNING: archived log '*string*' cannot be found on disk

Cause: The CHANGE ARCHIVELOG AVAILABLE command was used, but the archived log cannot be found on disk.

Action: If the storage containing the archived log has been removed from the host, restore it and retry the command. If the archived log is permanently gone, then issue the CHANGE ARCHIVELOG DELETE command for this archived log.

RMAN-06481: WARNING: backup piece '*string*' cannot be found on the storage medium

Cause: The CHANGE BACKUPPIECE AVAILABLE command was used, but the backup piece cannot be found on the storage medium.

Action: If the storage containing the backup piece has been removed from the host, restore it and retry the command. If the backup piece is permanently gone, then issue the CHANGE BACKUPPIECE DELETE command for this backup piece.

RMAN-06482: WARNING: proxy copy '*string*' cannot be found on the storage medium

Cause: The CHANGE PROXY AVAILABLE command was used, but the proxy copy cannot be found on disk.

Action: If the storage containing the proxy copy has been removed from the host, restore it and retry the command. If the proxy copy is permanently gone, then issue the CHANGE PROXY DELETE command for this proxy copy.

RMAN-06483: changed datafile copy expired

Cause: This is an informational message only.

Action: No action is required.

RMAN-06484: changed control file copy expired

Cause: This is an informational message only.

Action: No action is required.

RMAN-06485: changed archived log expired

Cause: This is an informational message only.

Action: No action is required.

RMAN-06486: changed backup piece expired

Cause: This is an informational message only.

Action: No action is required.

RMAN-06487: changed proxy copy expired

Cause: This is an informational message only.

Action: No action is required.

RMAN-06488: restore from AUTOBACKUP does not allow any other modifiers

Cause: A control file or SPFILE restore from AUTOBACKUP was attempted and other restore options were used.

Action: Do not specify any other options for the control file AUTOBACKUP restore.

RMAN-06489: no configuration found to allocate clone channel *number* for device type *string*

Cause: Target channel configuration could not be used for clone channel as it contains CONNECT option.

Action: Setup clone channel configuration using CONFIGURE CLONE command for required number and type of channels.

RMAN-06490: WARNING: limit of AUTOBACKUPS for the day has been reached

Cause: No more control file AUTOBACKUPS are possible in this day.

Action: This is a warning message, no action is required.

RMAN-06491: control file AUTOBACKUP format "*string*" contains more than one "*string*" format specifier

Cause: A CONTROLFILE AUTOBACKUP FORMAT cannot have more than one reserved format specifier.

Action: Specify only one reserved format specifier or use an alternative format.

RMAN-06492: control file AUTOBACKUP format "*string*" must specify a "*string*" format specifier

Cause: A reserved format specifier was not specified for the CONTROLFILE AUTOBACKUP FORMAT

Action: Add a specifier to the CONTROLFILE AUTOBACKUP FORMAT

RMAN-06493: only UNTIL TIME clause is allowed when performing a restore from AUTOBACKUP, found: *string*

Cause: For restoring a control file AUTOBACKUP only SET UNTIL TIME can be used. It is not possible to translate the others to a precise day.

Action: Specify SET UNTIL TIME to indicate the day to start the restore of a control file AUTOBACKUP.

RMAN-06494: *string* = *string* is out of range (*string-string*)

Cause: The specified parameter for restoring a control file AUTOBACKUP is out of the valid range.

Action: Change the parameter value to a valid number or do not specify it.

RMAN-06495: must explicitly specify DBID with SET DBID command

Cause: Restore of a control file AUTOBACKUP or ADVISE FAILURE was attempted when the database is not mounted.

Action: Specify the DBID of the database using SET DBID or mount the database.

RMAN-06496: must use the TO clause when the database is mounted or open

Cause: A control file restore was attempted when the database is mounted or open and no alternate destination was specified.

Action: Specify an alternate destination with the TO clause or dismount the database.

RMAN-06497: WARNING: control file is not current, control file AUTOBACKUP skipped

Cause: Control file AUTOBACKUP is not possible without a current control file.

Action: This is a warning message, no action is required.

RMAN-06498: skipping datafile *string*; already backed up *string* time(s)

Cause: The indicated datafile will not be included in the backup set. It is already backed up on the device requested and file is offline/read-only datafile. Use the FORCE option to override backup optimization.

Action: No action is required.

RMAN-06499: skipping archived log file *string*; already backed up *string* time(s)

Cause: The indicated log file will not be included in the backup set because it is already backed up on the device requested. Use FORCE option to override backup optimization.

Action: No action is required.

RMAN-06500: skipping backup set key *string*; already backed up *string* time(s)

Cause: The indicated backup set will not be copied because it is already backed up on the device requested. Use FORCE option to override backup optimization.

Action: No action is required.

RMAN-06501: skipping datafile *string*; already backed up on *string*

Cause: The indicated datafile will not be included in the backup set. It is already been backed up once, or before the since time specified.

Action: No action is required.

RMAN-06502: skipping archived log file *string*; already backed on *string*

Cause: The indicated log file will not be included in the backup set. It is already been backed up once, or before the since time specified.

Action: No action is required.

RMAN-06503: skipping backup set key *string*; already backed up on *string*

Cause: The indicated backup set will not be backed up. It has already been backed up on the device once, or before the since time specified.

Action: No action is required.

RMAN-06504: PROXY option with multiple backup copies is not supported

Cause: Multiple backup copies and PROXY option were specified in BACKUP command.

Action: Resolve the conflict.

RMAN-06505: specified DATABASE: *string* does not match previous DATABASE: *string*

Cause: SET DBID was used to set a DBID that translated into a database name that does not match newly specified database name or a previous SET DATABASE set a different database name.

Action: Verify that the correct DBID was specified or avoid using the SET DATABASE command.

RMAN-06506: the MAXSETSIZE option cannot be used with a backup backup set

Cause: The MAXSETSIZE option was specified for a backup backup set command.

Action: Remove the option and resubmit the command.

RMAN-06507: trying alternate file for archived log of thread *number* with sequence *number*

Cause: This is an informational message, appearing when an archived log was found out of sync with catalog database.

Action: No action is required.

RMAN-06508: MAXSETSIZE *string* KBYTES should be greater than block size *string* bytes

Cause: MAXSETSIZE configured or specified in backup command should be greater than database block size.

Action: Specify a larger MAXSETSIZE limit.

RMAN-06509: only SPFILE or control file can be restored from AUTOBACKUP

Cause: A datafile or archived log restore from AUTOBACKUP was attempted.

Action: Do not specify DATAFILE or ARCHIVELOG for restore from AUTOBACKUP.

RMAN-06510: RMAN retention policy is set to recovery window of *number* days

Cause: This is an informational message only.

Action: No action is required.

RMAN-06511: RMAN retention policy is set to redundancy *number*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06512: copy will be obsolete on date *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06513: copy will never be obsolete

Cause: This is an informational message only.

Action: No action is required.

RMAN-06514: archived logs required to recover from this copy will not be kept

Cause: This is an informational message only.

Action: No action is required.

RMAN-06515: archived logs required to recover from this copy will expire when this copy expires

Cause: This is an informational message only.

Action: No action is required.

RMAN-06516: time specified in KEEP UNTIL clause must be after today

Cause: KEEP UNTIL support only a future time.

Action: Correct the time and retry the command.

RMAN-06517: KEEP option is not supported for archived log backups

Cause: The KEEP option is not supported for archived logs.

Action: Either remove KEEP option and retry the command or don't specify archived logs for this backup.

RMAN-06518: backup will be obsolete on date *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06519: backup will never be obsolete

Cause: This is an informational message only.

Action: No action is required.

RMAN-06520: archived logs will not be kept or backed up

Cause: This is an informational message only.

Action: No action is required.

RMAN-06521: archived logs required to recover from this backup will expire when this backup expires

Cause: This is an informational message only.

Action: No action is required.

RMAN-06522: KEEP FOREVER option is not supported without the recovery catalog

Cause: The KEEP FOREVER option was used, but it requires a connection to a recovery catalog database. The KEEP FOREVER option cannot be used when the backup repository is the target database control file. This is because information about this backup cannot be permanently stored. (If information is stored just in the control file it will be aged out depending on CONTROL_FILE_RECORD_KEEP_TIME initialization parameter.)

Action: If a recovery catalog database is available, then connect to the recovery catalog and retry the command, otherwise use a different KEEP option. 6523, 1, "unused"

RMAN-06524: RMAN retention policy will be applied to the command

Cause: This is an informational message only.

Action: No action is required.

RMAN-06525: RMAN retention policy is set to none

Cause: Command DELETE OBSOLETE and REPORT OBSOLETE requires that either:

* RMAN retention policy is not NONE or,

* RMAN retention policy is specified with REPORT/DELETE command.

Action: Either configure RMAN retention policy with CONFIGURE command or specify it at the end of DELETE/REPORT command.

RMAN-06526: KEEP option cannot be used with incremental backup

Cause: The KEEP option was specified for a incremental backup.

Action: Remove the option and resubmit the command.

RMAN-06527: KEEP option is not supported for backup of backup sets

Cause: The KEEP option is not supported for backup of backup sets.

Action: Either remove KEEP option and retry the command or don't specify backup sets for this backup.

RMAN-06528: CHANGE ... KEEP not supported for BACKUPPIECE

Cause: The CHANGE BACKUPPIECE ... KEEP command was entered. KEEP attributes cannot be specified for backup pieces.

Action: Use CHANGE BACKUPSET ... KEEP instead.

RMAN-06529: CHANGE ... KEEP not supported for ARCHIVELOG

Cause: The CHANGE ARCHIVELOG ... KEEP command was entered. KEEP attributes cannot be specified for archived logs.

Action: Use CHANGE BACKUPSET ... KEEP instead.

RMAN-06530: CHANGE ... KEEP LOGS not supported for backup set which contains archived logs

Cause: The CHANGE BACKUPSET ... KEEP command was entered, but the BACKUPSET contains archived logs. Backup sets with archived logs cannot have KEEP attributes.

Action: Do not specify backup set with archived logs for the CHANGE BACKUPSET ... KEEP command.

RMAN-06531: CHANGE ... KEEP not supported for incremental BACKUPSET

Cause: The CHANGE BACKUPSET ... KEEP command was entered, but the BACKUPSET is an incremental backup set. Incremental backup sets cannot have KEEP attributes.

Action: Do not specify a backup set with archived logs for the CHANGE BACKUPSET ... KEEP command.

RMAN-06532: redundancy count must be greater than zero

Cause: The REDUNDANCY operand specified for the retention policy was zero.

Action: Specify a REDUNDANCY operand of 1 or greater.

RMAN-06533: KEEP ... NOLOGS option cannot be used when datafiles are fuzzy

Cause: The KEEP ... NOLOGS option was specified for a backup or copy of files in a fuzzy state. This kind of backup requires archived logs for recovery, so archived logs must be kept.

Action: Remove the KEEP ... NOLOGS option or make sure the files are not in a fuzzy state and resubmit the command.

RMAN-06534: archived logs required to recover from this backup will be backed up

Cause: This is an informational message only. An archivelog backup will be created and kept so the specified backup can be recovered to a consistent state.

Action: No action is required.

RMAN-06535: LIST COPY OF SPFILE is not supported

Cause: LIST COPY OF SPFILE was used, which is not supported because SPFILE cannot have a copy.

Action: Remove SPFILE from the command.

RMAN-06536: BACKED UP ... TIMES option is supported only for archived logs

Cause: The BACKUP UP ... TIMES option was used as a qualifier. This option is supported only for archived logs.

Action: Remove the option and resubmit the command.

RMAN-06537: CHANGE ... KEEP not supported for BACKUP

Cause: The CHANGE BACKUP... KEEP command was entered. KEEP attributes cannot be specified for copies and backup pieces in a single command.

Action: Use CHANGE BACKUPSET ... KEEP instead.

RMAN-06538: The expected DB_UNIQUE_NAME is *string*, but found *string*

Cause: This is an informational message.

Action: Check other error messages associated with this message.

RMAN-06540: Tablespace *string* will be excluded from future whole database backups

Cause: This is an informational message only.

Action: No action is required.

RMAN-06541: Tablespace *string* will be included in future whole database backups

Cause: This is an informational message only.

Action: No action is required.

RMAN-06542: file *string* is excluded from whole database backup

Cause: The indicated file will not be included in the backup set because its tablespace is configured as excluded from backup.

Action: No action is required.

RMAN-06543: duplicate or conflicting LIST options: *string* and *string*

Cause: The indicated options conflict with each other or appear more than once in a LIST command.

Action: remove the duplicate/conflicting option from the command.

RMAN-06547: SYSTEM tablespace cannot be excluded from whole database backup

Cause: The SYSTEM tablespace must be included in whole database backup.

Action: Remove the SYSTEM tablespace from the CONFIGURE ... EXCLUDE and retry the operation.

RMAN-06548: connected to auxiliary database: *string* (DBID=*string*)

Cause: This is an informational message only.

Action: No action is required.

RMAN-06549: connected to auxiliary database: *string* (not mounted)

Cause: This is an informational message only.

Action: No action is required.

RMAN-06550: clone database not mounted and db_name not set in init.ora

Cause: The clone database "init.ora" file does not specify the DB_NAME parameter.

Action: Add the DB_NAME parameter to the clone database "init.ora" and restart the instance.

RMAN-06551: error while looking up datafile copy for file number: *string*

Cause: An error occurred while looking up the specified datafile copy in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure. If the datafile copy was created during a RESTORE with a new name, ensure that the RESTORE completed successfully.

RMAN-06552: newname for datafile *number* was set to NEW, but file was not restored

Cause: A SWITCH command was specified for a datafile, but the newname was set to NEW and the file was not restored. If newname is set to NEW, the file must be restored before issuing a SWITCH command.

Action: Correct and resubmit the SWITCH command.

RMAN-06553: DB_CREATE_FILE_DEST must be set for SET NEWNAME ... TO NEW

Cause: The SET NEWNAME ... TO NEW option was specified but the OMF destination init parameter DB_CREATE_FILE_DEST is not set.

Action: Supply a full name to the SET NEWNAME command or set DB_CREATE_FILE_DEST at the target database.

RMAN-06554: WARNING: file *string* is in backup mode

Cause: A file which is being backed up or copied is in backup mode. RMAN will back up the file anyway, but files do not need to be put into backup mode before backing them up with RMAN.

Action: Use the ALTER TABLESPACE ... END BACKUP statement, at the target database server, to take the files out of backup mode.

RMAN-06555: datafile *string* must be restored from backup created before *string*

Cause: An incomplete recovery session was started, but the file is newer than the UNTIL TIME clause.

Action: Check the UNTIL TIME clause or restore the file from a sufficient old backup.

RMAN-06556: datafile *string* must be restored from backup older than SCN *string*

Cause: An incomplete recovery session was started, but the file is newer than the UNTIL clause.

Action: Check the UNTIL clause or restore the file from a sufficient old backup.

RMAN-06557: unable to restore archived log of thread *number* with sequence *number*

Cause: Restore of the specified archived log failed because the size of the archived log is larger than available disk space.

Action: One of the following: 1) Increase the MAXSIZE parameter and retry the command. 2) Free up disk space in the recovery area.

RMAN-06558: archived log size of *number* kb is bigger than available space of *number* kb

Cause: This message should be followed by one or more 6557 messages.

Action: Check the accompanying errors.

RMAN-06559: MAXSIZE must be larger than 1 kb

Cause: The MAXSIZE parameter is out of range.

Action: Specify a valid size and retry the command.

RMAN-06560: WARNING: backup set with key *number* will be read *number* times

Cause: This message should be followed by one or more 6562 messages.

Action: Check the accompanying messages.

RMAN-06561: available space must be larger than *number* kb

Cause: The recovery failed because it requires more disk space. One of the following could have caused this error: 1) The MAXSIZE option is used but is not large enough to restore files. 2) Files should be restored to recovery area, but available disk space is not large enough to restore files.

Action: One of the following: 1) Increase the MAXSIZE parameter and retry the command. 2) Free up disk space in the recovery area.

RMAN-06562: available space of *number* kb needed to avoid reading the backup set multiple times

Cause: A backup set is read more than once. Multiple reads of a backup set can slow restore performance. One of the following could have caused this: 1) The MAXSIZE option is used but is not large enough to restore files. 2) Files should be restored to a recovery area, but the available disk space is not large enough to restore files.

Action: One of the following: 1) Increase the MAXSIZE parameter and retry the command. 2) Free up disk space in the recovery area.

RMAN-06563: control file or SPFILE must be restored using FROM AUTOBACKUP

Cause: RESTORE CONTROLFILE or RESTORE SPFILE was specified without the FROM AUTOBACKUP option when RMAN is not connected to the recovery catalog.

Action: If the recovery catalog is available, connect to the recovery catalog and retry the restore. If the recovery catalog is not available, following is the procedure to restore control file or SPFILE:

1. Specify the DBID of the database with the SET DBID command.
2. If the AUTOBACKUP was created with non-default AUTOBACKUP format, then specify the AUTOBACKUP format using the SET CONTROLFILE AUTOBACKUP FORMAT command.
3. If the backup was created with SBT device, then allocate an SBT channel using the ALLOCATE CHANNEL command.
4. Restore control file or SPFILE by starting the RESTORE ... FROM AUTOBACKUP command.

RMAN-06564: must use the TO clause when the instance is started with SPFILE

Cause: A restore of the SPFILE from AUTOBACKUP was attempted when the instance is started with SPFILE and no alternate destination was specified.

Action: Specify an alternate destination with the TO clause.

RMAN-06565: WARNING: *string*: sqlcode *number* was caught, automatic retry #*number*

Cause: The RMAN client caught a transient error and will automatically retry several times.

Action: No action required, this is an informational message.

RMAN-06566: target database incarnation not found in control file

Cause: RESETLOGS CHANGE# and/or time of the target database doesn't match any database incarnation in the control file.

Action: One of the following actions can be taken to resolve this error 1) Restore the control file from the incarnation. 2) To populate the new incarnation, inspect or restore an archived log/datafile/datafile copy/backup set from the target incarnation

RMAN-06567: connected to auxiliary database: *string* (DBID=*string*, not open)

Cause: This is an informational message only.

Action: No action is required.

RMAN-06568: connected to target database: *string* (DBID=*string*, not open)

Cause: This is an informational message only.

Action: No action is required.

RMAN-06569: DATABASE: *string* does not match previous DATABASE: *string*

Cause: SET DBID or SET DATABASE was used to specify the target database name which does not match specified database name in DUPLICATE command.

Action: Verify that the correct DBID or the correct DATABASE was specified or avoid specifying DATABASE in DUPLICATE command.

RMAN-06570: datafile *number* switched to datafile copy "*string*"

Cause: This message was issued in response to a SWITCH command.

Action: No action is required, this is an informational message.

RMAN-06571: datafile *number* does not have recoverable copy

Cause: The SWITCH command with the option TO COPY was specified but the datafile has no valid copy to switch to.

Action: Verify whether the datafile has a valid datafile copy.

RMAN-06572: database is open and datafile *number* is not offline

Cause: The SWITCH command with the option TO COPY was specified, but datafile is not offline and database is open.

Action: Either make sure the datafile is offline or the database must be mounted but not opened.

RMAN-06573: specified DBID: *string* does not match previous DBID: *string*

Cause: The DBID in the DUPLICATE command did not match the previously specified DBID in the SET DBID command.

Action: Verify that the correct DBID was specified or avoid using DBID in the DUPLICATE command.

RMAN-06575: platform id *number* found in datafile *string* header is not a valid platform id

Cause: The platform id found in the datafile header was not recognized.

Action: Verify that this is a valid datafile.

RMAN-06576: platform '*string*' (*number*) found in header of datafile *string* does not match specified platform name '*string*' (*number*)

Cause: The platform specified in the command did not match the platform found in the datafile header.

Action: Specify the correct platform name and retry the command.

RMAN-06577: FROM TAG option may only be used with datafile copies

Cause: The FROM TAG option was specified for datafiles.

Action: Remove the option and resubmit the command.

RMAN-06578: INCREMENTAL LEVEL > 0 must be specified with FOR RECOVER OF

Cause: The FOR RECOVER OF option was specified without specifying INCREMENTAL LEVEL > 0.

Action: Specify INCREMENTAL LEVEL > 0 and resubmit the command.

RMAN-06580: the *string* option cannot be used with AS COPY

Cause: The specified option was specified for a backup as copy command.

Action: Remove the option and resubmit the command.

RMAN-06581: option *string* not supported

Cause: This option was specified and it is not supported.

Action: Remove the specified option.

RMAN-06582: AS COPY option cannot be used when backing up backup sets

Cause: The backup set was specified with AS COPY.

Action: Remove the AS COPY option or remove the backup sets.

RMAN-06583: at least 1 channel of TYPE DISK must be allocated to use AS COPY option

Cause: No channel of TYPE DISK was allocated.

Action: Allocate a channel of TYPE DISK and re-issue the command or remove AS COPY.

RMAN-06584: WARNING: AS BACKUPSET option added due to allocation of multiple channel types

Cause: DISK and non DISK channels were allocated for a backup command. Configuration indicates to produce image copies to DISK, however due to the mixed channel types BACKUPSETS will be created on DISK.

Action: Do not allocate non DISK channels to produce image copies to DISK or allocate only non DISK channels to produce BACKUPSETS only.

RMAN-06585: no copy of datafile *number* found

Cause: An available datafile copy for the specified datafile could not be found.

Action: make sure that all specified datafiles have a copy available.

RMAN-06586: no copy of datafile *number* with tag *string* found

Cause: An available datafile copy for the specified datafile could not be found.

Action: make sure that all specified datafiles have a copy available.

RMAN-06587: one or more datafile copies were not found

Cause: This error message was accompanied by an additional error message or messages indicating the cause of the error.

Action: Follow the recommended actions of the additional error message or messages.

RMAN-06588: number of patterns (*number*) to DB_FILE_NAME_CONVERT should be even

Cause: An uneven number of patterns was specified.

Action: Specify one more or one less pattern.

RMAN-06589: cannot specify DB_FILE_NAME_CONVERT option without AS COPY

Cause: The DB_FILE_NAME_CONVERT option was specified without AS COPY. This is not permitted for backup set backups where multiple files are combined into a set.

Action: Remove the DB_FILE_NAME_CONVERT option and re-run the BACKUP command.

RMAN-06590: Tablespace *string* cannot be converted

Cause: The system tablespaces could not be transported to other platforms.

Action: Remove the specified tablespace from the CONVERT command and retry the operation.

RMAN-06593: platform name '*string*' specified in FROM PLATFORM is not valid

Cause: The platform name was not recognized.

Action: Specify a valid platform name.

RMAN-06594: platform name '*string*' specified in TO PLATFORM is not valid

Cause: The platform name was not recognized.

Action: Specify a valid platform name.

RMAN-06595: platform name '*string*' does not match database platform name '*string*'

Cause: The platform name specified did not match the name of the database performing the conversion.

Action: Specify the correct platform name.

RMAN-06596: *string* requires target database compatibility *string*, currently set to *string*

Cause: A command or option was used that requires a higher database compatibility than is currently set at the target database.

Action: Raise the compatibility of the database before attempting the command again.

RMAN-06597: conversion between platforms '*string*' and '*string*' is not implemented

Cause: Conversion of Oracle datafiles between the specified platforms was not supported.

Action: Do not do the conversion.

RMAN-06599: Tablespace *string* is not read-only

Cause: A conversion was attempted on a tablespace which is not read-only.

Action: Change the tablespace to read-only and retry the operation.

RMAN-06600: old RMAN configuration parameters:

Cause: This message is issued in response to a CONFIGURE command.

Action: No action is required, this is an informational message only.

RMAN-06601: new RMAN configuration parameters:

-
- Cause:** This message is issued in response to a CONFIGURE command.
Action: No action is required, this is an informational message only.
- RMAN-06602: TO DESTINATION option can be used only for disk device**
Cause: The TO DESTINATION option was specified for non-disk device.
Action: Remove the TO DESTINATION option and resubmit the command.
- RMAN-06603: TO DESTINATION option must be specified with RECOVERY AREA, RECOVERY FILES or DB_RECOVERY_FILE_DEST on disk device**
Cause: RECOVERY FILES, RECOVERY AREA or DB_RECOVERY_FILE_DEST option was specified in BACKUP command on disk device without specifying TO DESTINATION option.
Action: Specify TO DESTINATION option and retry the command.
- RMAN-06604: new RMAN configuration parameters are successfully stored**
Cause: This message is issued in response to a CONFIGURE command.
Action: No action is required, this is an informational message only.
- RMAN-06605: old RMAN configuration parameters are successfully deleted**
Cause: This message is issued in response to a CONFIGURE command.
Action: No action is required, this is an informational message only.
- RMAN-06606: RMAN configuration parameters are successfully reset to default value**
Cause: This message is issued in response to a CONFIGURE command.
Action: No action is required, this is an informational message only.
- RMAN-06607: RMAN configuration parameters for database with db_unique_name string are:**
Cause: This message is issued in response to a SHOW command.
Action: No action is required, this is an informational message only.
- RMAN-06608: RMAN configuration has no stored or default parameters**
Cause: This message is issued in response to a SHOW command.
Action: No action is required, this is an informational message only.
- RMAN-06609: AS COPY can be configured only for disk device**
Cause: The AS COPY option was specified for non-disk device.
Action: Remove the AS COPY option and resubmit the command.
- RMAN-06610: For record type string RECIDS from number to number are re-used before resync**
Cause: This messages is issued when the control file records were re-used before resyncing to catalog database.
Action: Increase control_file_keep_record_time setting or issue BACKUP command that it will generate fewer control file records, e.g., backup few tablespaces instead of the complete database in one BACKUP command.
- RMAN-06611: Following RMAN configuration applied before deleting logs:**
Cause: This message is issued in response to a DELETE command.
Action: No action is required, this is an informational message only.

RMAN-06612: Incompatible options were specified for archivelog deletion policy

Cause: Incompatible options were specified on CONFIGURE ARCHIVELOG DELETION POLICY command.

Action: Remove incompatible options and retry the command. BACKED UP option can be used individually or combined with SHIPPED or APPLIED option. Following are invalid combination of options: a) TO NONE cannot be used with other options b) SHIPPED ON STANDBY and SHIPPED ON ALL STANDBY cannot be used together. c) APPLIED ON STANDBY and APPLIED ON ALL STANDBY cannot be used together. d) SHIPPED and APPLIED cannot be used together.

RMAN-06613: Connect identifier for DB_UNIQUE_NAME string not configured

Cause: The connect identifier for the specified DB_UNIQUE_NAME initialization parameter was not configured.

Action: Do one of the following:

- If the DB_UNIQUE_NAME belongs to a connected target database, then define the DB_UNIQUE_NAME parameter in LOG_ARCHIVE_DEST_n at the remote database from where the resynchronization is performed. Otherwise, define DB_UNIQUE_NAME parameter in LOG_ARCHIVE_DEST_n at the target database.
Or,

- Configure the appropriate connect identifier using the CONFIGURE DB_UNIQUE_NAME RMAN command and rerun the command.

RMAN-06614: DB_UNIQUE_NAME string is too long

Cause: The DB_UNIQUE_NAME initialization parameter string was too long.

Action: Configure the appropriate DB_UNIQUE_NAME initialization parameter string and re-run the command.

RMAN-06615: resyncing from database with DB_UNIQUE_NAME string

Cause: Resync was performed remotely for the specified DB_UNIQUE_NAME initialization parameter without connecting to it as target database. This type of remote resync has limitations. For example, RMAN output cannot be resynced. Please refer to RMAN documentation for a complete set of limitations.

Action: This is an informational message.

RMAN-06616: RMAN output not resynced for database with DB_UNIQUE_NAME string

Cause: V\$RMAN_OUTPUT contents were not resynced when the RESYNC CATALOG FROM DB_UNIQUE_NAME command was executed."

Action: This is an informational message.

RMAN-06617: UNTIL TIME (string) is ahead of last NEXT TIME in archived logs (string)

Cause: UNTIL TIME was more than the last NEXT TIME of the last archived log.

Action: Check the UNTIL SCN.

RMAN-06700: error parsing text script in file string

Cause: Incorrect syntax or invalid commands were found.

Action: Fix text script and retry the command.

RMAN-06701: could not construct path for file: "string"

Cause: An error was encountered when trying to construct the full pathname for the specified file.

Action: Ensure that the path is correct.

RMAN-06702: could not initialize for input file: "string"

Cause: An error was encountered when trying to initialize the specified file for input.

Action: Ensure that the file exists.

RMAN-06703: could not open file: "string" (reason=string)

Cause: An error was encountered when trying to open the specified file.

Action: Ensure that the file has correct permissions.

RMAN-06705: text script line is too long (>1024)

Cause: A text script contained a line longer than the permitted maximum length.

Action: Split the line in smaller lines and retry the operation.

RMAN-06706: could not close file: "string" (reason=string)

Cause: An error was encountered when trying to close the specified file.

Action: Ensure that the file has correct permissions and still exists.

RMAN-06707: could not initialize for output file: "string"

Cause: An error was encountered when trying to initialize the specified file for output.

Action: Ensure that the file exists.

RMAN-06708: short write while writing file "string". Wrote *string* bytes instead of *string* bytes

Cause: An attempt was made to write to a file system that was full.

Action: Ensure that the file system has room for the file. Check system logs.

RMAN-06709: No scripts in recovery catalog

Cause: An attempt was made to list the scripts in the catalog, but no scripts could be found in the specified recovery catalog.

Action: No action required, this is an informational message only.

RMAN-06710: script *string* not found in catalog

Cause: An attempt was made to call a script that could not be found in the target database or as a global script in the specified catalog.

Action: Verify the script name and retry the command.

RMAN-06711: global scripts require a TARGET connection

Cause: Connection to a TARGET database was not specified.

Action: Provide a TARGET connection and retry the command.

RMAN-06716: skipping datafile *number*; already restored to file *string*

Cause: Recovery Manager determined that this file is already restored. Use FORCE option to override this optimization.

Action: No action required, this is an informational message only.

RMAN-06717: Could not delete auxiliary instance file *string*

Cause: Auxiliary instance file was not deleted. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-06724: backup not done; all files already backed up

Cause: A BACKUP command does not need to backup any files, because all of the files to backup are already backed up.

Action: No action required, this is an informational message only.

RMAN-06725: database not open: sort area size too small

Cause: sort area size too small to execute RMAN commands.

Action: open the database or increase sort_area_size.

RMAN-06726: could not locate archived log *string*

Cause: The specified archived log could not be found on any allocated channel.

Action: Allocate additional channels on other nodes of the cluster or, if the archived logs has been deleted, use the CROSSCHECK ARCHIVELOG command to correct the recovery catalog or target database control file entries.

RMAN-06727: could not locate datafile copy *string*

Cause: The specified datafile copy could not be found on any allocated channel.

Action: Allocate additional channels on other nodes of the cluster or if the datafile copy has been deleted, use the CROSSCHECK DATAFILECOPY command to correct the recovery catalog or target database control file entries.

RMAN-06728: could not locate control file copy *string*

Cause: The specified control file copy could not be found on any allocated channel.

Action: Allocate additional channels on other nodes of the cluster or if the control file copy has been deleted, use the CROSSCHECK CONTROLFILECOPY command to correct the recovery catalog or target database control file entries.

RMAN-06729: no backup of the SPFILE found to restore

Cause: A SPFILE restore could not proceed because no backup of the SPFILE was found. It may be the case that a backup of this file exists but does not satisfy the criteria specified in the user's restore operands.

Action: Modify options for the SPFILE restore.

RMAN-06730: no channel to restore a backup of the SPFILE

Cause: A SPFILE restore could not proceed because the backup on a device type that was not allocated for restore.

Action: No action required, this is an informational message only. See message 6026 for further details.

RMAN-06731: command *string:string%* complete, time left *number:number:number*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06732: database dropped

Cause: This is an informational message only.

Action: No action is required.

RMAN-06733: database unregistered from the recovery catalog

Cause: This is an informational message only.

Action: No action is required.

RMAN-06737: database name "*string*" does not match target database name "*string*"

Cause: The UNREGISTER DATABASE command was used with a database name that does not match the name of the database to which RMAN is connected.

Action: Specify the correct database name or avoid specifying the database name when connected to the target database.

RMAN-06738: database name "*string*" is not unique in the recovery catalog

Cause: The UNREGISTER DATABASE command was used with a database name that is ambiguous.

Action: Use the SET DBID command to specify the database id and resolve the ambiguity.

RMAN-06739: database "*string*" is not found in the recovery catalog

Cause: The UNREGISTER DATABASE command was used with a database name that was not found in the recovery catalog.

Action: Make sure the database name specified in the DROP DATABASE command syntax is correct.

RMAN-06740: database name is not specified

Cause: The command failed because of the following:

- o RMAN is not connected to the target database
- o The database name is not specified in the command
- o DBID is not set with the SET DBID command

Action: Any one of the following actions will fix the problem: o Connect to the target database o Specify database name o Set DBID with SET DBID command

RMAN-06741: database name is "*string*" and DBID is *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06742: platform name '*string*' longer than *number*

Cause: The specified platform name exceeds the maximum allowable platform name.

Action: Correct the platform name.

RMAN-06743: specification does not match any backup set in the repository

Cause: The specified backup sets were not found in the recovery catalog or target database control file.

Action: Verify backup set existence and retry the command.

RMAN-06744: specification does not match any datafile copy in the repository

Cause: The specified datafile copies were not found in the recovery catalog or target database control file.

Action: Verify datafile copy existence and retry the command.

RMAN-06745: skipping datafile copy *string*; already backed up *string* time(s)

Cause: The indicated datafile copy was not included in the backup set because it was already backed up on the device requested.

Action: Use FORCE option to override backup optimization.

RMAN-06746: backup cancelled because there are no files to backup

Cause: There were no files or all files were skipped for this backup set, therefore no backup set was created.

Action: This message is informational only.

RMAN-06747: at least 1 channel of tertiary storage must be allocated to execute this command

Cause: The executed command requires a SBT channel, but no channels of type SBT were configured or allocated.

Action: ALLOCATE or CONFIGURE a SBT channel.

RMAN-06748: more than one channel types were allocated

Cause: RECOVERY FILES, RECOVERY AREA or DB_RECOVERY_FILE_DEST option was specified in BACKUP command, but more than one channel types was used and no DEVICE TYPE or CHANNEL option was specified.

Action: Specify CHANNEL or DEVICE TYPE option and retry the command.

RMAN-06749: restore point *string* does not exist.

Cause: The specified restore point does not exist in v\$restore_point table of the target database.

Action: Check the name of restore point and retry the command.

RMAN-06750: SPFILE cannot be backed up by proxy.

Cause: The PROXY option was specified, but proxy copy of SPFILE is not supported. This file will be placed into a non-proxy backup set.

Action: No action required, this is an informational message only.

RMAN-06751: ASM file *string* cannot be proxy backed up.

Cause: The PROXY option was specified, but proxy copy of ASM file is not supported. This file will be placed into a non-proxy backup set.

Action: No action required, this is an informational message only.

RMAN-06752: error while looking up tempfile: *string*

Cause: An error occurred while looking up the specified tempfile in the recovery catalog or target database control file.

Action: This error is accompanied by other errors describing the reason for the failure; see those error messages for further information. One possible problem is that the tempfile name was not entered correctly.

RMAN-06753: tempfile not found in the repository

Cause: The specified tempfile is not found in the control file or recovery catalog.

Action: Make sure that the tempfile name is correct and retry

RMAN-06754: INCREMENTAL FROM SCN option is not supported with [*string*]

Cause: The INCREMENTAL FROM SCN option was supplied but does not apply to this type of backup.

Action: Remove the INCREMENTAL FROM SCN operand and re-enter the command.

RMAN-06755: WARNING: datafile *string*: incremental-start SCN is too recent; using checkpoint SCN *string* instead

Cause: The incremental-start system change number (SCN) which was specified when starting an incremental datafile backup is greater than the datafile checkpoint SCN, which could cause some blocks to be missed.

Action: Specify a smaller incremental-start system change number (SCN).

RMAN-06756: cannot flashback database to non-guaranteed restore point *string* when flashback is off

Cause: The indicated restore point was not guaranteed and flashback was disabled. When flashback is disabled, Oracle can flashback only to guaranteed restore point.

Action: Specify a guaranteed restore point or turn on flashback and retry the command. the command.

RMAN-06757: DB_UNIQUE_NAME "*string*" does not match target database ("*string*")

Cause: The value specified in the FOR DB_UNIQUE_NAME option did not match the DB_UNIQUE_NAME parameter setting of the target database.

Action: Use the RMAN STARTUP command, with no parameter file option, to start the target database without a parameter file, then run the RESTORE SPFILE command again.

RMAN-06758: DB_UNIQUE_NAME is not unique in the recovery catalog

Cause: RMAN could not identify which SPFILE to restore for this target database, because the recovery catalog contained two or more different instances of this database, each with different DB_UNIQUE_NAME values.

Action: Use the FOR DB_UNIQUE_NAME option to specify the name of the instance whose parameter file you want to restore.

RMAN-06759: skipping datafile copies that are already backed up

Cause: Some datafile copies were not be backed up because they were already backed up on the device requested.

Action: No action is required. You can use the FORCE option to override backup optimization and force these files to be backed up.

RMAN-06760: skipping archived logs that are already backed up

Cause: Some archived logs were not be backed up because they were already backed up on the device requested.

Action: No action is required. You can use the FORCE option to override backup optimization and force these files to be backed up.

RMAN-06761: skipping backup sets that are already backed up

Cause: Some backup sets were not be backed up because they were already backed up on the device requested.

Action: No action is required. You can use the FORCE option to override backup optimization and force these files to be backed up.

RMAN-06762: ignoring encryption for proxy or image copies

Cause: This information message is displayed when the RMAN client is generating proxy or image copies and encryption was enabled for the input files.

Action: This is an informational message only.

RMAN-06763: specified encryption algorithm not supported

Cause: An encryption algorithm not supported by the database is specified during backup.

Action: Refer to contents of v\$rman_encryption_algorithms view for the list of supported encryption algorithm. Specify a valid encryption algorithm and retry the command.

RMAN-06764: *string*

Cause: An error occurred when processing user request.

Action: None

RMAN-06765: Tablespace *string* will be encrypted in future backup sets

Cause: This is an informational message only.

Action: No action is required.

RMAN-06766: Tablespace *string* will not be encrypted in future backup sets

Cause: This is an informational message only.

Action: No action is required.

RMAN-06767: Tablespace *string* will default to database encryption configuration

Cause: This is an informational message only.

Action: No action is required.

RMAN-06768: duplicate or conflicting options are specified: *string* and *string*

Cause: An error occurred when processing the command because user specified two duplicate options or the two options are not allowed to be used together.

Action: Remove one of the above options and retry the command.

RMAN-06769: length of password must be greater than zero

Cause: Zero length password was specified for encrypted backups.

Action: Retry the command using a password with non-zero length.

RMAN-06770: backup encryption requires Enterprise Edition

Cause: The backup command tried to create encrypted backups, but Enterprise Edition is not installed.

Action: Do not create encrypted backups.

RMAN-06771: cannot do IMPORT CATALOG after NOCATALOG has been used

Cause: The IMPORT CATALOG command was used after the NOCATALOG option was already specified.

Action: Restart RMAN and connect to recovery catalog if you wish to IMPORT CATALOG.

RMAN-06772: cannot do IMPORT CATALOG before connecting to recovery catalog

Cause: The IMPORT CATALOG command was used before connecting to the recovery catalog.

Action: Connect to recovery catalog using CONNECT CATALOG command if you wish to IMPORT CATALOG.

RMAN-06773: connected to source recovery catalog database

Cause: This is an informational message only.

Action: No action is required.

RMAN-06774: must specify a TNS service name for source recovery catalog database

Cause: The connect string does not contain TNS service name. IMPORT CATALOG without TNS service name is not supported.

Action: Specify a service name and resubmit the command.

RMAN-06775: not connected to source recovery catalog database

Cause: IMPORT CATALOG command was issued but no connection to the source recovery catalog database has been established.

Action: Resubmit IMPORT CATALOG command with correct connect string.

RMAN-06776: source recovery catalog database not started

Cause: IMPORT CATALOG command was issued which requires the source recovery catalog to be open.

Action: Open the source recovery catalog database and re-submit the command.

RMAN-06777: ORACLE error from source recovery catalog database: *string*

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-06778: WARNING: *string*: sqlcode *number* was caught, automatic retry #*string*

Cause: The RMAN client caught a transient error during temporary resource allocate for IMPORT CATALOG command and will automatically retry several times.

Action: No action required, this is an informational message.

RMAN-06779: import validation complete

Cause: This is an informational message only.

Action: No action required.

RMAN-06780: database unregistered from the source recovery catalog

Cause: This is an informational message only.

Action: No action is required.

RMAN-06781: *string* package version *string* in source database is not of version *string*

Cause: The catalog schema version of the source recovery catalog is not the same as the target recovery catalog. The two catalog

Action: UPGRADE source recovery catalog schema and recovery catalog schema to same version and retry the command.

RMAN-06782: Datafile headers of locally managed datafiles need to be updated.

Cause: This is an informational message only.

Action: No action is required.

RMAN-06783: Update of datafile headers of locally managed datafiles finished.

Cause: This is an informational message only.

Action: No action is required.

RMAN-06784: One or more datafile headers of locally managed datafiles were not updated.

Cause: Errors prevented the update of one or more datafile headers.

Action: See trace file for details of the problem.

RMAN-06785: This operation might take some time.

Cause: This is an informational message only.

Action: No action is required.

RMAN-06786: could not read file header for datafile *string* to do FLASHBACK.

Cause: The indicated datafile header could not be read to do FLASHBACK DATABASE.

Action: If the database must be taken back in time then a restore and incomplete recovery must be performed.

RMAN-06787: WARNING: TAG *string* option is ignored; backups will be tagged with *string*

Cause: WITH TAG option and TAG option were used together. When WITH TAG option is used, all the backups created by the command will have tag specified with WITH TAG option.

Action: The TAG option can be removed to not display the message.

RMAN-06791: changed the DB_UNIQUE_NAME value from *string* to *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06792: database db_unique_name is "*string*", db_name is "*string*" and DBID is *string*

Cause: UNREGISTER DB_UNIQUE_NAME or CHANGE DB_UNIQUE_NAME command was executed, hence RMAN displayed the database information for which DB_UNIQUE_NAME the metadata will be removed/renamed in the recovery catalog.

Action: No action required, this is an informational message only.

RMAN-06793: database with db_unique_name *string* unregistered from the recovery catalog

Cause: UNREGISTER DB_UNIQUE_NAME command was executed.

Action: No action required, this is an informational message only.

RMAN-06795: Flashback database logging is not on.

Cause: A FLASHBACK DATABASE command was tried but flashback database logging has not been enabled.

Action: Flashback database logging must be enabled via the ALTER DATABASE FLASHBACK ON command before a FLASHBACK DATABASE command can be tried. If the database must be taken back in time then a restore and incomplete recovery must be performed.

RMAN-06796: Not enough flashback database log data to do FLASHBACK.

Cause: There was not enough flashback database log data to do the FLASHBACK DATABASE.

Action: If the database must be taken back in time then a restore and incomplete recovery must be performed.

RMAN-06797: Grant succeeded.

Cause: This is an informational message issued in response to a GRANT command.

Action: No action required.

RMAN-06798: Revoke succeeded.

Cause: This is an informational message issued in response to a REVOKE command.

Action: No action required.

RMAN-06799: found eligible base catalog owned by *string*

Cause: When creating a virtual private catalog, an 11g base catalog was found, owned by the specified user, and the currently connected catalog user has been granted privileges on this catalog, and can therefore create a virtual private catalog using this base catalog. This is an informational message issued in response to a CREATE VIRTUAL CATALOG command.

Action: No action required.

RMAN-06800: found ineligible base catalog owned by *string*

Cause: When creating a virtual private catalog, an 11g base catalog was found, owned by the specified user, and the currently connected catalog user has not been granted any privileges on this catalog. This is an informational message issued in response to a CREATE VIRTUAL CATALOG command.

Action: No action required.

RMAN-06801: no base catalog found

Cause: When trying to create a virtual catalog, either no base catalog was found, or this user has no privilege to create a virtual catalog against any existing base catalog.

Action: Establish the correct privileges and re-create the virtual catalog.

RMAN-06802: too many eligible base catalogs found

Cause: When trying to create a virtual catalog, more than one base catalog was found that is eligible to be the base catalog for this virtual catalog.

Action: Revoke privileges so that the current catalog user has privileges on only one base catalog, then re-issue the CREATE VIRTUAL CATALOG command.

RMAN-06803: created virtual catalog against base catalog owned by *string*

Cause: A virtual private catalog was created, where the base catalog data is owned by the specified user. This is an informational message issued in response to a CREATE VIRTUAL CATALOG command.

Action: No action required.

RMAN-06804: Enter value for *string*:

Cause: This is a user prompt.

Action: Enter a substitution value to proceed.

RMAN-06805: SET NEWNAME command has not been issued for tempfile *string*

Cause: A SWITCH command was specified for a tempfile, but no destination was specified and no SET NEWNAME command has been previously issued for that file. An explicit file to switch to must be specified if no SET NEWNAME command has been issued.

Action: Correct and resubmit the SWITCH command.

RMAN-06806: compression algorithm '*string*' of release *string* not found

Cause: An unsupported compression algorithm was specified for the backup.

Action: Query the V\$RMAN_COMPRESSION_ALGORITHM view for the list of supported compression algorithms. Specify a valid compression algorithm and retry the command.

RMAN-06807: compression algorithm '*string*' of release *string* cannot be used because database compatibility is less than *string*

Cause: The compression algorithm is not supported because the current compatibility level of the database is too low.

Action: Query the V\$RMAN_COMPRESSION_ALGORITHM view for the list of supported compression algorithms. Specify a valid compression algorithm and retry the command.

RMAN-06808: SECTION SIZE cannot be used when piece limit is in effect

Cause: The SECTION SIZE backup option was used together with the MAXPIECESIZE channel limit. These options are mutually exclusive, because they are independent methods of creating multiple backup pieces with one backup command.

Action: Use one option or the other, but not both.

RMAN-06809: compression algorithm '*string*' of release *string* requires advanced compression option

Cause: The compression algorithm was not supported because it requires advanced compression option to be enabled.

Action: Enable advanced compression option by setting advanced_compression_option_usable=true or specify a different compression algorithm.

RMAN-06810: specification does not match any datafile copy in the repository

Cause: No datafile copies were found that match specification in the recovery catalog or target database control file.

Action: Check the specifier.

RMAN-06811: specification does not match any control file copy in the repository

Cause: No control file copies were found that match specification in the recovery catalog or target database control file.

Action: Check the specifier.

RMAN-06812: specification does not match any backup in the repository

Cause: No backups were found that match specification in the recovery catalog or target database control file.

Action: Check the specifier.

RMAN-06818: WARNING: last archived log from primary database not received at standby database

Cause: An archived log was switched at the primary database during backup at the standby database and this log was not shipped to the standby database. The backup created at the standby database will need more logs to recover.

Action: Check whether the standby database is configured correctly to receive logs from the primary database.

RMAN-06819: current log archived at primary database

Cause: The ALTER SYSTEM ARCHIVE LOG CURRENT command completed successfully at the primary database because the connected target instance was a physical standby database. The switched archived logs were included in the backup so that the backed files could be recovered to a consistent point-in-time.

Action: None. This is an informational message.

RMAN-06820: WARNING: failed to archive current log at primary database

Cause: An attempt to switch the archived log at the primary database failed.

Action: Resolve the error messages associated with this message to avoid the warning.

RMAN-06898: recovery catalog is partially upgraded to *string*

Cause: The recovery catalog database was not completely upgraded to the specified version. Either there were some errors during execution of UPGRADE CATALOG or UPGRADE CATALOG was cancelled before completion.

Action: Execute UPGRADE CATALOG again.

RMAN-06899: updating recovery catalog with new database incarnation

Cause: The target database has a new incarnation that has not already been seen by the recovery catalog. This usually happens because a Point-in-Time Recovery was done. RMAN has made the necessary updates to the recovery catalog.

Action: This is an informational message only.

RMAN-06900: WARNING: unable to generate V\$RMAN_STATUS or V\$RMAN_OUTPUT row

Cause: The routine createRmanStatusRow() or createRmanOutputRow() could add new row into V\$RMAN_STATUS or V\$RMAN_OUTPUT.

Action: Check the associated error messages. If the associated error message indicates a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-06901: WARNING: disabling update of the V\$RMAN_STATUS and V\$RMAN_OUTPUT rows

Cause: Informational message only.

Action: No action required.

RMAN-06902: AS COMPRESSED BACKUPSET option cannot be used when backing up backup sets

Cause: The backup set was specified with AS COMPRESSED BACKUPSET.

Action: Remove the AS COMPRESSED BACKUPSET option.

RMAN-06903: backup of datafile *string* was cancelled

Cause: This is an informational message displayed when PARTIAL option of DURATION option was specified on the BACKUP command and backup could not be completed within the given duration time.

Action: Run the BACKUP command to backup cancelled files, or let the next backup window backup the cancelled files. It should be noted that the files that were skipped in the current job will be given preference to other files for next the BACKUP command with DURATION option.

RMAN-06904: backup of archived log for thread *number* with sequence *number* and starting SCN of *string* was cancelled

Cause: This is an informational message displayed when PARTIAL option of DURATION option was specified on the BACKUP command and backup could not be completed within the given duration time.

Action: Run BACKUP command to backup cancelled files, or let the next backup window backup the cancelled files. It should be noted that the files that were skipped in the current job will be given preference to other files for next the BACKUP command with DURATION option.

RMAN-06905: backup of backup set key *number* was cancelled

Cause: This is an informational message displayed when PARTIAL option of DURATION option was specified on the BACKUP command and backup could not be completed within the given duration time.

Action: Run BACKUP command to backup cancelled files, or let the next backup window backup the cancelled files. It should be noted that the files that were skipped in the current job will be given preference to other files for next the BACKUP command with DURATION option.

RMAN-06906: backup of control file was cancelled

Cause: This is an informational message displayed when PARTIAL option of DURATION option was specified on the BACKUP command and backup could not be completed within the given duration time.

Action: Run BACKUP command to backup cancelled files, or let the next backup window backup the cancelled files. It should be noted that the files that were skipped in the current job will be given preference to other files for next the BACKUP command with DURATION option.

RMAN-06907: MINIMIZE LOAD option not allowed for the specified input files

Cause: This option was specified in a backup command specification for BACKUP BACKUPSET or BACKUP CURRENT CONTROLFILE command.

Action: Remove the MINIMIZE LOAD option and retry the command.

RMAN-06908: WARNING: operation will not run in parallel on the allocated channels

Cause: RMAN allocated more than one channel for a job, but the job will not run in parallel on these channels because parallelism require Enterprise Edition.

Action: None

RMAN-06909: WARNING: parallelism require Enterprise Edition

Cause: RMAN allocated more than one channel for a job, but the job will not run in parallel on these channels because parallelism require Enterprise Edition.

Action: None

RMAN-06910: can not invoke parallel recovery for test recovery

Cause: Recover database was called with TEST and PARALLEL option

Action: Call recover database with either just the TEST or PARALLEL option

RMAN-06911: only one PARALLEL or NOPARALLEL clause may be specified

Cause: Recover database was called with PARALLEL and NOPARALLEL option

Action: Call recover database with either just the PARALLEL or NOPARALLEL option.

RMAN-06912: backup of spfile was cancelled

Cause: This is an informational message displayed when PARTIAL option of DURATION option was specified on the BACKUP command and backup could not be completed within the given duration time.

Action: Run BACKUP command to backup cancelled files, or let the next backup window backup the cancelled files. It should be noted that the files that were skipped in the current job will be given preference to other files for next the BACKUP command with DURATION option.

RMAN-06913: validate cancelled because there are no files to validate

Cause: All files for this validate command were skipped, therefore no files to validate.

Action: This message is informational only.

RMAN-06914: BLOCK *string* must be greater or equal to BLOCK *string*

Cause: The value of TO block number was less than the value of from block number.

Action: Increase the value of TO BLOCK past the value of from BLOCK and retry the command.

RMAN-06915: restore point *string* already exists

Cause: The specified restore point already exists on this database.

Action: Use LIST RESTORE POINT to see existing names and retry the command with a unique restore point name.

RMAN-06918: WARNING: allocated SBT channel to Oracle Availability Machine in NOCATALOG mode

Cause: Oracle Availability Machine might have run out of resources because congestion control could not be enabled in NOCATALOG mode.

Action: Use the CATALOG mode to connect RMAN to an Oracle Availability Machine instance.

RMAN-06920: database *string* is not open read-only

Cause: CONVERT DATABASE attempted on a database that was not open read-only.

Action: Open the database in read-only mode and retry the operation.

RMAN-06921: Convert database check failed

Cause: This database could not be transported because DBMS_TDB.CHECK_DB returned FALSE.

Action: None

RMAN-06922: External table *string.string* found in the database

Cause: An external table was found in the database.

Action: Redefine the table in the transported database.

RMAN-06923: Directory *string.string* found in the database

Cause: A directory object was found in the database.

Action: Redefine the directory in the transported database.

RMAN-06924: BFILE *string.string* found in the database

Cause: A BFILE was found in the database.

Action: Redefine the BFILE in the transported database.

RMAN-06925: BFILEs are used in the system, please redefine them in the transported database

Cause: BFILEs may or may not exist in the database. Automatically performed BFILE check failed because database was open read-only and could not allocate temporary space. This does not affect CONVERT DATABASE operation.

Action: Use DBMS_TDB.CHECK_EXTERNAL to perform BFILE check when the database is open in read/write mode.

RMAN-06926: User *string* with *string* privilege found in password file

Cause: Password file was used.

Action: Re-create the password file on the target platform using ORAPWD for the transported database.

RMAN-06927: Cannot specify NEW DATABASE clause more than once

Cause: NEW DATABASE clause specified more than once

Action: Remove redundant NEW DATABASE clause and retry the operation.

RMAN-06928: Cannot specify ON TARGET PLATFORM clause more than once

Cause: ON TARGET PLATFORM clause specified more than once

Action: Remove redundant ON TARGET PLATFORM clause and retry the operation.

RMAN-06929: Cannot specify TRANSPORT SCRIPT clause more than once

Cause: TRANSPORT SCRIPT clause specified more than once

Action: Remove redundant ON TARGET PLATFORM clause and retry the operation.

RMAN-06930: Cannot specify SKIP clause more than once

Cause: SKIP clause specified more than once

Action: Remove redundant SKIP clause and retry the operation.

RMAN-06931: Cannot specify FROM PLATFORM clause

Cause: CONVERT DATABASE command cannot use FROM PLATFORM clause.

Action: Change FROM PLATFORM clause and retry.

RMAN-06932: Database name '*string*' longer than *number*

Cause: The specified database name exceeded the maximum allowable database name length.

Action: Correct the database name.

RMAN-06933: Transport script name too long

Cause: The specified transport script name exceeded the maximum allowable script name length.

Action: Correct the script name.

RMAN-06934: Format string too long

Cause: The specified format string exceeded the maximum allowable format string length.

Action: Correct the format string.

RMAN-06935: Convert script name too long

Cause: The specified convert script name exceeded the maximum allowable script name length.

Action: Correct the script name.

RMAN-06941: Database must be closed and mounted EXCLUSIVE and RESTRICTED.

Cause: DROP DATABASE was attempted while the database was open or not mounted EXCLUSIVE and RESTRICTED.

Action: Change the database state to mounted EXCLUSIVE and RESTRICTED.

RMAN-06942: OPTION *number* is invalid; OPTION must be between *string* and *string*

Cause: An invalid OPTION was used.

Action: Change the OPTION argument.

RMAN-06943: no automatic repair OPTION *number* was listed in ADVISE FAILURE

Cause: The OPTION specified was not one of the automatic repair options listed by ADVISE FAILURE or there were no options listed by the ADVISE FAILURE command.

Action: Change the OPTION argument or resubmit ADVISE FAILURE with a different set of failures.

RMAN-06944: contents of repair script:

Cause: This is an informational message only.

Action: No action is required.

RMAN-06945: no repair script present for REPAIRID *string*

Cause: REPAIRID option specified in the command was invalid or the repair script had been purged from Automated Diagnostic Repository.

Action: Retry REPAIR FAILURE command with a different OPTION number.

RMAN-06946: executing repair script

Cause: This is an informational message only.

Action: No action is required.

RMAN-06947: searching flashback logs for block images until SCN *string*

Cause: Starting the flashback log search for RECOVER...BLOCK command. The log is searched until the indicated system change number (SCN).

Action: None. This is an informational message displayed for RECOVER...BLOCK command.

RMAN-06948: searching flashback logs for block images

Cause: Starting the flashback log search for RECOVER...BLOCK command. The log is searched until the end of the log.

Action: None. This is an informational message displayed for RECOVER...BLOCK command.

RMAN-06949: finished flashback log search, restored *string* blocks

Cause: Flashback log search finished for RECOVER...BLOCK command.

Action: None. This is an informational message displayed for RECOVER...BLOCK command.

RMAN-06950: invalid validate option specified: *string*

Cause: The specified object was invalid with VALIDATE command.

Action: Delete the invalid operand.

RMAN-06951: repair failure complete

Cause: This is an informational message only.

Action: No action is required.

RMAN-06952: database needs to be restarted

Cause: The target database control file was missing.

Action: Restart the instance and repair the database.

RMAN-06953: no automatic repairs were listed by ADVISE FAILURE

Cause: There were no automatic repairs listed by the ADVISE FAILURE command.

Action: Choose a different failure, submit ADVISE FAILURE command, and then submit REPAIR FAILURE command.

RMAN-06954: REPAIR command must be preceded by ADVISE command in same session

Cause: The ADVISE command was not issued in the same session as the REPAIR command.

Action: Submit ADVISE command and then submit the REPAIR command in same session.

RMAN-06955: Network copies are only supported for image copies.

Cause: An attempt was made to specify BACKUP AUXILIARY FORMAT without specifying the AS COPY clause. A network copy is only supported with an image copy.

Action: Seek an alternate method of copying the desired files.

RMAN-06956: create datafile failed; retry after removing *string* from OS

Cause: An attempt was made to re-create a database file. This attempt failed.

Action: If the indicated file already exists, remove the file from operating system and retry the RMAN command.

RMAN-06957: finished standby search, restored *string* blocks

Cause: Standby search finished for RECOVER...BLOCK command.

Action: None. This is an informational message displayed for RECOVER...BLOCK command.

RMAN-06958: Executing: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-06959: WARNING: repair completed but could not verify that failures were fixed by it

Cause: RMAN repair command successfully completed but could not check if the failures were fixed.

Action: Use LIST FAILURE command to verify repair results.

RMAN-06960: EXPDP> *string*

-
- Cause:** This is an informational message only.
Action: No action is required.
- RMAN-06961: IMPDP> *string***
Cause: This is an informational message only.
Action: No action is required.
- RMAN-06962: Error received during export of metadata**
Cause: Data Pump could not perform export of tablespace metadata.
Action: See accompanying datapump messages indicating the cause of the error.
- RMAN-06963: Error received during import of metadata**
Cause: Data Pump could not perform import of tablespace metadata.
Action: See accompanying datapump messages indicating the cause of the error.
- RMAN-06964: option *string* cannot be used with *string***
Cause: Incompatible options were specified that caused the command to fail.
Action: Remove one of the options from the command and retry.
- RMAN-06965: Datapump job has stopped**
Cause: A Data Pump error has caused the job to stop.
Action: See accompanying datapump messages or look for a Data Pump trace file for the cause of the error.
- RMAN-06966: Invalid release number *string***
Cause: An incorrectly formatted release number was specified.
Action: Specify a valid release number in n.n.n.n.n format.
- RMAN-06967: finished primary search, recovered *string* blocks**
Cause: Primary Database search finished for RECOVER...BLOCK command.
Action: None. This is an informational message displayed for RECOVER...BLOCK command.
- RMAN-06970: NEWNAME '*string*' for database must include %f or %U format**
Cause: The newname in SET NEWNAME FOR DATABASE did not include a format specifier to produce different newnames for the datafiles.
Action: Include %f or %U in the newname or use SET NEWNAME FOR DATABASE TO NEW to ensure datafiles get different datafile names.
- RMAN-06971: NEWNAME '*string*' for tablespace must include %f or %U format**
Cause: The newname in SET NEWNAME FOR TABLESPACE did not include a format specifier to produce different newnames for the datafiles.
Action: Include %f or %U in the newname or use SET NEWNAME FOR TABLESPACE ... TO NEW to ensure datafiles get different datafile names.
- RMAN-06980: The following errors need to be fixed before performing this command**
Cause: The tablespaces failed validation by DBMS_TTS.TRANSPORT_SET_CHECK.
Action: Fix accompanying violations before attempting the command again.
- RMAN-06981: Violation: *string***

Cause: This message was issued to show a violation obtained from the DBMS_TTS.TRANSPORT_SET_CHECK.

Action: Fix violation before attempting the command again.

RMAN-07000: List of SPFILE Backups

Cause: This message is issued in response to a LIST BACKUP OF SPFILE command.

Action: No action is required.

RMAN-07025: *string* is not supported for foreign archived log

Cause: The specified option was not supported for foreign archived log.

Action: Do not use the specified command for foreign archived log.

RMAN-07200: no failures found that match specification

Cause: A failure specifier did not match any failures in the Automated Diagnostic Repository.

Action: Resubmit the command with a different failure specifier. You can use the LIST FAILURE ALL command in Recovery Manager to display all failures known to RMAN.

RMAN-07207: changed *string* failures to HIGH priority

Cause: This is an informational message only.

Action: No action is required.

RMAN-07208: changed *string* failures to LOW priority

Cause: This is an informational message only.

Action: No action is required.

RMAN-07209: closed *string* failures

Cause: This is an informational message only.

Action: No action is required.

RMAN-07210: new failures after most recent LIST FAILURE command

Cause: New failures were found since last LIST FAILURE command in this RMAN session.

Action: No action is required. This is an informational message only.

RMAN-07211: failure option not specified

Cause: ALL, CRITICAL, HIGH, LOW, or list of failure numbers was not specified.

Action: Specify a failure option and resubmit the command.

RMAN-07212: skipping failure *string* because it was CLOSED

Cause: The specified failure has been already closed, so ADVISE FAILURE or CHANGE FAILURE cannot be executed on this failure.

Action: This is an informational message only. No action is required.

RMAN-07213: Mandatory Manual Actions

Cause: This is an informational message only.

Action: No action is required.

RMAN-07215: Automated Repair Options

Cause: This is an informational message only.

Action: No action is required.

RMAN-07220: no manual actions available

Cause: This is an informational message only.

Action: No action is required.

RMAN-07222: =====

Cause: This is an informational message only.

Action: No action is required.

RMAN-07251: Repair script: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-07252: =====

Cause: This is an informational message only.

Action: No action is required.

RMAN-07253: =====

Cause: This is an informational message only.

Action: No action is required.

RMAN-07255: priority change for failure *string* failed

Cause: An attempt was made to change the priority of a child failure.

Action: Specify the parent failure ID to change the child failure.

RMAN-07256: cannot change priority of child failure

Cause: An attempt was made to change the priority of child failure.

Action: This message should be followed by one or more 7255 messages.

RMAN-07259: *string* critical failures exist; cannot exclude from ADVISE FAILURE

Cause: ADVISE FAILURE was executed for HIGH or LOW priority failures when CRITICAL failures existed.

Action: Execute ADVISE FAILURE with the CRITICAL or ALL options.

RMAN-07262: no automatic repair options available

Cause: This is an informational message only.

Action: No action is required.

RMAN-07500: searching for all files that match the pattern *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-07501: searching for all files in the recovery area

Cause: This is an informational message only.

Action: No action is required.

RMAN-07502: List of Files Unknown to the Database

Cause: This message is issued in response to a CATALOG command.

Action: No action is required.

RMAN-07505: no files found to be unknown to the database

Cause: This is an informational message displayed by the CATALOG command. The command either found no files, or all files that matched the specified search pattern were already present in the target database control file.

Action: No action is required.

RMAN-07507: cataloging files...

Cause: This is an informational message only.

Action: No action is required.

RMAN-07508: cataloging done

Cause: This is an informational message only.

Action: No action is required.

RMAN-07509: List of Cataloged Files

Cause: This message is issued in response to a CATALOG command.

Action: No action is required.

RMAN-07513: List of Files Which Where Not Cataloged

Cause: This message is issued in response to a CATALOG command.

Action: No action is required.

RMAN-07514: =====

Cause: This is an informational message only.

Action: No action is required.

RMAN-07515: File Name: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-07516: Reason: Error reading

Cause: This is an informational message only.

Action: No action is required.

RMAN-07517: Reason: The file header is corrupted

Cause: Either the file is not an Oracle file or the file header is corrupted.

Action: Delete the file using OS utility.

RMAN-07518: Reason: Foreign database file DBID: *string* Database Name: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-07519: Reason: Error while cataloging. See alert.log.

Cause: This is an informational message only.

Action: No action is required.

RMAN-07520: Reason: Data pump dump file

Cause: This is an informational message only.

Action: No action is required.

RMAN-07521: cannot create recovery catalog in database version *string*; version *string* required

Cause: An attempt was made to use a version of the recovery catalog schema that was incompatible with the version of the database.

Action: Upgrade the catalog database to at least the required version or install the catalog schema in a different database which is of at least the required version.

RMAN-07522: CREATE TYPE privilege must be granted to user *string*

Cause: The CREATE CATALOG or UPGRADE CATALOG command was used, but the USERID that was supplied in the CATALOG connect string does not have the CREATE TYPE privilege granted.

Action: Grant CREATE TYPE privilege to the recovery catalog owner.

RMAN-07523: List of files in Recovery Area not managed by the database

Cause: This message was issued in response to a CATALOG RECOVERY AREA command.

Action: No action is required.

RMAN-07524:

=====

Cause: This is an informational message only.

Action: No action is required.

RMAN-07525: Reason: File is not a supported file type in Recovery Area

Cause: This message should be accompanied by other message(s) indicating the name of file that was not supported in recovery area. Any file other than current control file, online log, archived log, RMAN backups and flashback log is not supported in recovery area. This is an informational message only.

Action: No action is required.

RMAN-07526: Reason: File is not an Oracle Managed File

Cause: This message should be accompanied by other message(s) indicating the name of file that was not a oracle managed file. This is an informational message only.

Action: No action is required.

RMAN-07527: Reason: File was not created using DB_RECOVERY_FILE_DEST initialization parameter

Cause: This message should be accompanied by other message(s) indicating the name of file that was not created using DB_RECOVERY_FILE_DEST initialization parameter. One of the following scenarios caused this error: 1) This is an archived log file and was created when the LOG_ARCHIVE_DEST_n initialization parameter was set explicitly to recovery area location. For example, LOG_ARCHIVE_DEST_1='location=+FRA' where '+FRA' was also your DB_RECOVERY_FILE_DEST value. 2) This is an RMAN backup file and was created in a recovery area using the FORMAT option of the BACKUP command. 3) This is an online log file or current control file and was created prior to setting the recovery area. 4) This file fits none of the above scenarios and is not supported by the recovery area.

Action: All of following actions will resolve future occurrences of this error: 1) To create archived logs in recovery area, set the LOG_ARCHIVE_DEST_n initialization parameter to 'location=USE_DB_RECOVERY_FILE_DEST'. Do not explicitly set the LOG_ARCHIVE_DEST_n initialization parameter to a recovery

area location. 2) To create RMAN backups in recovery area, do not use the FORMAT option of the BACKUP command. All of following actions will resolve current problem: 1) If this is an archived log file or an RMAN backup file, use the CATALOG command to re-catalog the files. 2) If this is an online log file or a current control file to be managed by the recovery area, re-create the file using the DB_RECOVERY_FILE_DEST initialization parameter.

RMAN-07528: number of files not managed by recovery area is *string*, totaling *string*

Cause: This message should be accompanied by other message(s) indicating the list of files. Either the files listed are not known to the database or not managed by recovery area. The number and size of the files are shown. This is an informational message only.

Action: No action is required.

RMAN-07529: Reason: catalog is not supported for this file type

Cause: The CATALOG command encountered one or more files of types that cannot be cataloged. These file types include online redo logs, flashback logs, block change tracking files, and data pump files. This message will be accompanied by other messages indicating the names of the file's that could not be cataloged.

Action: No action is required.

RMAN-07530: Reason: This file type is not requested for cataloging

Cause: This is an informational message only.

Action: No action is required.

RMAN-08000: channel *string*: copied datafile *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08001: restore not complete

Cause: All of the backup pieces have been successfully applied, but DBMS_BACKUP_RESTORE package indicates that the restore conversation is not complete. This usually means that the backup set contained corrupt data.

Action: Restore the files from a different backup set, if possible. The Recovery Manager CHANGE BACKUPPIECE UNAVAILABLE can be used to prevent Recovery Manager from attempting to restore from the corrupt backup piece(s).

RMAN-08002: starting full resync of recovery catalog

Cause: This is an informational message only.

Action: No action is required.

RMAN-08003: channel *string*: reading from backup piece *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08004: full resync complete

Cause: This is an informational message only.

Action: No action is required.

RMAN-08005: new incarnation of database registered in recovery catalog

Cause: This is an informational message only.

Action: No action is required.

RMAN-08006: database registered in recovery catalog
Cause: This is an informational message only.
Action: No action is required.

RMAN-08007: channel *string*: copied datafile copy of datafile *string*
Cause: This is an informational message only.
Action: No action is required.

RMAN-08008: channel *string*: starting full datafile backup set
Cause: This is an informational message only.
Action: No action is required.

RMAN-08009: channel *string*: starting archived log backup set
Cause: This is an informational message only.
Action: No action is required.

RMAN-08010: channel *string*: specifying datafile(s) in backup set
Cause: This is an informational message only.
Action: No action is required.

RMAN-08011: including current control file in backup set
Cause: This is an informational message only.
Action: No action is required.

Cause: This is an informational message only.
Action: No action is required.

RMAN-08015: datafile *string* switched to datafile copy
Cause: This is an informational message only.
Action: No action is required.

RMAN-08016: channel *string*: starting datafile backup set restore
Cause: This is an informational message only.
Action: No action is required.

RMAN-08017: channel *string*: starting archived log restore to default destination
Cause: This is an informational message only.
Action: No action is required.

RMAN-08018: channel *string*: starting archived log restore to user-specified destination

Cause: This is an informational message only.

Action: No action is required.

RMAN-08019: channel *string*: restoring datafile *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08020: including standby control file in backup set

Cause: This is an informational message only.

Action: No action is required.

RMAN-08021: channel *string*: restoring control file

Cause: This is an informational message only.

Action: No action is required.

RMAN-08022: channel *string*: restoring archived log

Cause: This is an informational message only.

Action: No action is required.

RMAN-08023: channel *string*: restored backup piece *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08025: channel *string*: copied control file copy

Cause: This is an informational message only.

Action: No action is required.

RMAN-08026: channel *string*: copied archived log

Cause: This is an informational message only.

Action: No action is required.

RMAN-08027: channel *string*: copied current control file

Cause: This is an informational message only.

Action: No action is required.

RMAN-08028: channel *string*: copy current control file failed

Cause: This is an informational message only.

Action: No action is required.

RMAN-08029: snapshot control file name set to default value: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08030: allocated channel: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08031: released channel: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08032: channel *string*: RECID *string* STAMP *string* does not match recovery catalog

Cause: The record that identifies the source file for a copy or backup database does not contain the same data as is stored in the recovery catalog.

Action: Perform a full resync and retry the operation. If the problem persists, then contact Oracle.

RMAN-08033: channel *string*: including datafile copy of datafile *string* in backup set

Cause: This is an informational message only.

Action: No action is required.

RMAN-08034: full resync skipped, target database not mounted

Cause: This is an informational message only.

Action: No action is required.

RMAN-08035: partial resync skipped, target database not mounted

Cause: This is an informational message only.

Action: No action is required.

RMAN-08036: channel *string*: could not create control file record for *string string*

Cause: The record identifying the named file was no longer present in the target database control file, and repeated attempts to inspect the file were unsuccessful in creating the record. This could be because the circular-reuse section of the control file which holds information about the specified type of file is too small and there is other database activity which is causing the record to be overwritten before it can be used.

Action: Try increasing either the size of the control file circular-reuse section for this file type (datafile copy or archived log, as indicated in the error message, or the CONTROL_FILE_RECORD_KEEP_TIME initialization parameter. If neither of those remedies works then contact Oracle.

RMAN-08037: channel *string*: unexpected validation return code *string*

Cause: This is an internal error that should never be issued.

Action: Contact Oracle Support.

RMAN-08038: channel *string*: starting piece *string* at *string*

Cause: This is an informational message only.

RMAN-08103: channel *string*: could not locate backup piece: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08104: channel *string*: input backup set: count=*string*, stamp=*string*, piece=*string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08105: channel *string*: backup cancelled because no pieces were found

Cause: All backup sets specified has no pieces. Therefore, no backup set is created.

Action: This is an informational message only.

RMAN-08106: channel *string*: restoring block(s)

Cause: This is an informational message only.

Action: No action is required.

RMAN-08107: skipping inaccessible backup set count=*string* STAMP=*string*

Cause: The indicated backup set will not be backed up because one or more pieces of the backup set could not be read, and the SKIP INACCESSIBLE option was specified.

Action: No action is required.

RMAN-08108: channel *string*: specifying block(s) to restore from backup set

Cause: This is an informational message only.

Action: No action is required.

RMAN-08109: channel *string*: restored block(s) from backup piece *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08110: failover to next copy of backup piece

Cause: This is an informational message only.

Action: No action is required.

RMAN-08111: some blocks not recovered: See trace file for details

Cause: Some blocks not recovered due to errors.

Action: See trace file for details of the problem.

RMAN-08112: archived log failover was done on *string*, check alert log for more info

Cause: This is an informational message to indicate the server found a corrupted block in an archived log and had to switch to another copy of the same archived log in an alternate archived log destination to get corresponding un-corrupted block.

Action: If backup is done with delete input option, nothing needs to be done. Otherwise delete the archived log that has corrupted block(s) as recovery on applying this log would fail. Alert log contains name of the log that has corrupted block(s).

RMAN-08113: including current SPFILE in backup set

Cause: This is an informational message only.

Action: No action is required.

RMAN-08114: channel *string*: restoring SPFILE to PFILE

Cause: This is an informational message only.

Action: No action is required.

RMAN-08115: channel *string*: restoring SPFILE

Cause: This is an informational message only.

Action: No action is required.

RMAN-08116: output file name is original SPFILE location

Cause: This is an informational message only.

Action: No action is required.

RMAN-08117: channel *string*: the AUTOBACKUP does not contain an SPFILE

Cause: The requested AUTOBACKUP does not contain a SPFILE. This is because the instance was not started with a SPFILE when the AUTOBACKUP was created.

Action: No action is required. RMAN will try three older AUTOBACKUPS before signaling ORA-19687.

RMAN-08118: WARNING: could not delete the following archived redo log

Cause: The routine deleteArchivedLog() could not delete an archived redo log on the target instance.

Action: Check the accompanying file specification and the associated error messages. The file specification indicates what archived redo log on the target instance RMAN was trying to delete and the error messages indicate why RMAN was unable to delete it. Resolve the problem by first confirming that the archived redo log in question has been backed up, do the deletion manually, and then do a crosscheck so that RMAN is aware of the deletion.

RMAN-08119: skipping backup piece handle *string*; already exists

Cause: A BACKUP command does not need to backup control file AUTOBACKUP pieces, because they already exists.

Action: This is an informational message, no action is required.

RMAN-08120: WARNING: archived log not deleted, not yet applied by standby

Cause: This is an informational message to alert the user that an archived log that should have been deleted was not as it has not been applied to the standby database. The next message identifies the archived log

Action: Archivelog can be deleted after it has been applied to standby database.

RMAN-08121: keep attributes for the backup are deleted

Cause: This is an informational message only.

Action: No action is required.

RMAN-08122: keep attributes for the backup are changed

Cause: This is an informational message only.

Action: No action is required.

RMAN-08123: keep attributes for the datafile/control file copy are deleted

Cause: This is an informational message only.

Action: No action is required.

RMAN-08124: keep attributes for the datafile/control file copy are changed

Cause: This is an informational message only.

Action: No action is required.

RMAN-08125: keep attributes for the proxy copy are deleted

Cause: This is an informational message only.

Action: No action is required.

RMAN-08126: keep attributes for the proxy copy are changed

Cause: This is an informational message only.

Action: No action is required.

RMAN-08127: cataloged backup piece

Cause: This is an informational message only.

Action: No action is required.

RMAN-08128: uncataloged backup piece

Cause: This is an informational message only.

Action: No action is required.

RMAN-08129: failover to piece handle=*string* tag=*string*

Cause: This is an informational message to indicate the server found a corrupted block in a piece and had to switch to another copy of piece to get corresponding un-corrupted block.

Action: See alert log for information on corruption block(s) and the name of the piece that has the corrupted block(s).

RMAN-08130: failover to copy on device type *string*

Cause: This is an informational message to indicate the RMAN could not successfully restore the database using the specified backups. An attempt was made to restore the datafiles/archived logs/ control file/SPFILE using the same backup set on a different device type.

Action: See accompanying additional error messages indicating the cause of the failover.

RMAN-08131: channel *string*: specifying datafile copies to recover

Cause: This is an informational message only.

Action: No action is required.

RMAN-08132: WARNING: cannot update recovery area reclaimable file list

Cause: This error should be accompanied by other errors giving the cause of failure to update reclaimable file list.

Action: Check the accompanying error.

RMAN-08133: channel *string*: the AUTOBACKUP does not contain a standby control file.

Cause: The requested AUTOBACKUP did not contain a standby control file.

Action: No action is required, RMAN will try three older AUTOBACKUPS before signaling ORA-19687.

RMAN-08135: some corrupt blocks found during conversion of file *string*

Cause: While converting the specified file from one platform to another, some corrupt blocks were discovered in the specified file. Details about the corruption have been written to a server trace file.

Action: If these corrupt blocks are unexpected, you may be able to use Block Media Recovery at the source database to fix the problem, then re-convert the files.

RMAN-08136: channel *string*: deleting incremental backup(s)

Cause: This is an informational message only.

Action: No Action Required.

RMAN-08137: WARNING: archived log not deleted, needed for standby or upstream capture process

Cause: An archived log that should have been deleted was not as it was required by upstream capture process or Data Guard. The next message identifies the archived log.

Action: This is an informational message. The archived log can be deleted after it is no longer needed. See the documentation for Data Guard to alter the set of active Data Guard destinations. See the documentation for Streams to alter the set of active streams.

RMAN-08138: WARNING: archived log not deleted - must create more backups

Cause: An archived log that should have been deleted was not as it did not meet the user specified archive log deletion policy of number of backups required before deleting the logs.

Action: This is an informational message. The archived log can be deleted after more backups are created to satisfy archivelog deletion policy.

RMAN-08139: WARNING: archived redo log not deleted, needed for guaranteed restore point

Cause: An archived log that should have been deleted was not because it is required for guaranteed restore point.

Action: This is an informational message. The archived redo log can be deleted after backups are created or after deleting the guaranteed restore point that requires the log.

Cause: This is an informational message only.
Action: No action is required.

RMAN-08163: validation succeeded for backup piece

Cause: The VALIDATE HEADER option determined that the backup piece still matches its data.

Action: None - this is an informational message.

RMAN-08164: validation succeeded for proxy copy

Cause: The VALIDATE HEADER option determined that the proxy copy still matches its data.

Action: None - this is an informational message.

RMAN-08165: could not locate proxy copy *string*

Cause: The specified proxy copy could not be found on proxy channel.

Action: If the proxy copy has been deleted, use the CROSSCHECK BACKUP command to correct the recovery catalog or target database control file entries.

RMAN-08166: validation succeeded for datafile copy and control file copy

Cause: The VALIDATE HEADER option discovered that the datafile copy and control file copy still matches its data in the recovery catalog or target database control file.

Action: None - this is an informational message.

RMAN-08167: WARNING: *string* encountered a piece that was in use

Cause: The backup piece is currently in use by another BACKUP, RESTORE or DELETE operation.

Action: Use LIST to determine if backup has been deleted. If not deleted, then check if any process is hung while accessing the piece and terminate them before retrying DELETE. If using SBT device, then check Media Manager as well. Alternatively, consider the command DELETE FORCE.

Cause: This is an informational message only.
Action: No action is required.
- RMAN-08547: channel *string*: no AUTOBACKUPS found in the recovery area**
Cause: The recovery area does not have desired AUTOBACKUP.
Action: Check the option UNTIL TIME in case an existing AUTOBACKUP does satisfy the criteria specified in the restore command. Otherwise, verify the init.ora parameters DB_RECOVERY_FILE_DEST and DB_UNIQUE_NAME to verify whether the recovery area location is set correctly. Note that the parameters can be specified as options to the restore command.
- RMAN-08548: recovery area destination: *string***
Cause: This is an informational message only.
Action: No action is required.
- RMAN-08549: database name (or database unique name) used for search: *string***
Cause: This is an informational message only.
Action: No action is required.
- RMAN-08550: AUTOBACKUP search with format "*string*" not attempted because DBID was not set**
Cause: Restore of a control file AUTOBACKUP was attempted without DBID being set.

Action: If you want to search for AUTOBACKUP with the indicated format, then specify the DBID of the database using SET DBID and retry the command.

RMAN-08551: recovering datafile copy file number=*string* name=*string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08552: backup and output file names are identical: *string*

Cause: The backup file name chosen was identical to output file name specified for a restore operation.

Action: This is an informational message only. RMAN will failover to next available backup.

RMAN-08553: channel *string*: restoring control file from AUTOBACKUP *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08554: channel *string*: restoring spfile from AUTOBACKUP *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08555: channel *string*: restoring section *string* of *string*

Cause: This is an informational message only

Action: No action is required.

RMAN-08556: channel *string*: backup piece complete, elapsed time: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08580: channel *string*: starting datafile copy

Cause: This is an informational message only.

Action: No action is required.

RMAN-08581: channel *string*: datafile copy complete, elapsed time: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08582: channel *string*: starting archived log copy

Cause: This is an informational message only.

Action: No action is required.

RMAN-08583: channel *string*: archived log copy complete, elapsed time: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08584: copying current control file

Cause: This is an informational message only.

Action: No action is required.

RMAN-08585: copying standby control file

Cause: This is an informational message only.

Action: No action is required.

RMAN-08586: output file name=*string* tag=*string* RECID=*string* STAMP=*string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08587: input is copy of datafile *string*: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08588: converted datafile=*string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08589: channel *string*: starting datafile conversion

Cause: This is an informational message only.

Action: No action is required.

RMAN-08590: channel *string*: datafile conversion complete, elapsed time: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08591: WARNING: invalid archived log deletion policy

Cause: An invalid ARCHIVELOG DELETION POLICY was supplied. The archived log deletion policy was APPLIED but there was no mandatory archived log destinations.

Action: One of the following: 1) Change archived log deletion policy using CONFIGURE command 2) Make one or more of standby destination as MANDATORY.

RMAN-08592: output file name=*string* tag=*string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08599: channel *string*: throttle time: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08600: ASM disk group to search: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08601: channel *string*: AUTOBACKUP *string* found in ASM disk group *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08602: channel *string*: no AUTOBACKUPS found in ASM disk group *string*

Cause: The specified ASM area does not have desired AUTOBACKUP.

Action: Check the option UNTIL TIME in case an existing AUTOBACKUP does satisfy the criteria specified in the restore command. Otherwise, verify the values used for the format of the CONFIGURE CONTROLFILE AUTOBACKUP

FORMAT command and DB_UNIQUE_NAME to verify whether the ASM area location is set correctly. Note that the DB_UNIQUE_NAME can be specified as option to the restore command.

RMAN-08603: skipping *string*; file in use by another process

Cause: The indicated file was not included in the backup because it is part of another restore or delete operation.

Action: No action is required. Wait for the other operation to complete, then retry.

RMAN-08604: skipping *string*; file deleted from recovery area to reclaim disk space

Cause: The indicated file was not included in the backup because it was deleted from the recovery area to reclaim disk space for other operations.

Action: No action is required.

RMAN-08605: channel *string*: SID=*string* instance=*string* device type=*string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08606: WARNING: The change tracking file is invalid.

Cause: Backup found changed blocks that were not marked in the change tracking file. See alert log for more information.

Action: Do not use any of the incremental backups taken since the last full backup.

RMAN-08607: List of remote backup files

Cause: RESTORE command detected that one or more remote backup files were required to perform restore operation.

Action: Recall the media from remote site that contains the specified backup files before actual restore operation. The message should be accompanied with the list of remote backup files.

RMAN-08608: Initiated recall for the following list of remote backup files

Cause: This is an informational message displayed when the specified RECALL option of the RESTORE command detected that one or more remote backup files were required to perform the restore operation. The message indicated that RMAN had initiated the request on SBT channel to recall the remote backup files.

Action: No action required.

RMAN-08609: channel *string*: starting incremental datafile backup set

Cause: This is an informational message only.

Action: No action is required.

RMAN-08610: channel *string*: restoring datafile *string* to *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08611: channel *string*: piece handle=*string* tag=*string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08612: channel *string*: failover to duplicate backup on device *string*

Cause: This is an informational message to indicate the RMAN could not successfully restore the files using the specified backups. An attempt was made to restore the datafiles/archived logs/ control file/SPFILE using a previous existing backup.

Action: See accompanying additional error messages indicating the cause of the failover.

RMAN-08613: channel *string*: failover to piece handle=*string* tag=*string*

Cause: This is an informational message to indicate the server found a corrupted block in a backup piece and had to switch to another copy of the piece to get the same block.

Action: See alert log for information on corruption block(s) and the name of the backup piece that has the corrupted block(s).

RMAN-08614: channel *string*: errors found reading piece handle=*string*

Cause: This is an informational message to indicate the server found a corrupted block in a backup piece. Accompanying error will describe the action taken.

Action: See alert log for more information.

RMAN-08615: channel *string*

Cause: This is an informational message to indicate the server could not perform the restore due to the included errors. A least recent backup set will be used to perform the restore.

Action: See alert log for information on corruption block(s) and the name of the backup piece that has the corrupted block(s).

RMAN-08616: validating blocks *string* through *string*

Cause: This is an informational message only

Action: No action is required.

RMAN-08617: validation failed for foreign archived log

Cause: The CROSSCHECK FOREIGN ARCHIVELOG command determined that the foreign archived log could not be found or no longer contained the same data, so its record was marked expired.

Action: None - this is an informational message.

RMAN-08618: validation succeeded for foreign archived log

Cause: The CROSSCHECK FOREIGN ARCHIVELOG command determined that the foreign archived log still matches its data.

Action: None - this is an informational message.

RMAN-08619: foreign archived log file name=*string* RECID=*string* STAMP=*string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-08620: uncataloged foreign archived log

Cause: This is an informational message only.

Action: No action is required.

RMAN-08621: deleted foreign archived log

Cause: This is an informational message only.

Action: No action is required.

RMAN-08629: waiting for resources on Oracle Availability Machine for *string* channels

Cause: The number of channels required to complete this operation was not available. Channels will be allocated when they become available.

Action: No action is required. This is an informational message only.

RMAN-08630: allocating the required resources on Oracle Availability Machine

Cause: The required resources were allocated on Oracle Availability Machine.

Action: No action is required. This is an informational message only.

RMAN-10000: error parsing target database connect string "*string*"

Cause: An invalid target connect string was supplied.

Action: Specify a valid connect string and re-run the job.

RMAN-10001: error parsing recovery catalog connect string "*string*"

Cause: An invalid recovery catalog connect string was supplied.

Action: Specify a valid connect string and re-run the job.

RMAN-10002: ORACLE error: *string*

Cause: The specified Oracle error was received. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-10003: unable to connect to target database

Cause: Recovery manager was unable to connect to the target database. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Ensure that that the target database is started, and that the connect string is valid.

RMAN-10004: unable to connect to recovery catalog

Cause: Recovery manager was unable to connect to the recovery catalog

Action: Ensure that that the recovery catalog is started, and that the connect string is valid. This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-10005: error opening cursor

Cause: An error was received while trying to open a cursor. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: If the associated Oracle error message indicates a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-10006: error running SQL statement: *string*

Cause: An error message was received while running the SQL statement shown.

Action: If the associated Oracle error message indicates a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-10007: error closing cursor

Cause: An error was received while trying to close a cursor. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: If the associated Oracle error message indicates a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-10008: could not create channel context

Cause: An error was received while trying create a channel context. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: If the associated Oracle error message indicates a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-10009: error logging off of Oracle

Cause: An error was received while disconnecting from Oracle. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: This is an informational message only.

RMAN-10010: error while checking for RPC completion

Cause: Recovery Manager's channel context had an error while checking to see if a remote procedure call had completed. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: If other error messages indicate a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-10011: synchronization error while polling for rpc number, action=string

Cause: Recovery Manager could not synchronize properly with a remote procedure call.

Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10012: KGU error: string

Cause: An error occurred while initializing the KGU subsystem

Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10013: error initializing PL/SQL

Cause: An error occurred while initializing the PL/SQL subsystem.

Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10014: PL/SQL error number on line number column number: string

Cause: PL/SQL error

Action: The text of this message will be issued by the PL/SQL subsystem. See the PL/SQL error message manual.

RMAN-10015: error compiling PL/SQL program

Cause: An error occurred while compiling a PL/SQL program.

Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10018: error cleaning up channel context

Cause: An error was received during inter-step cleanup of a channel context.

Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10020: error initializing Recovery Manager execution layer

Cause: An error was received while initializing the Recovery Manager execution layer in preparation for running a job. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: If other error messages indicate a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-10022: error in system-dependent sleep routine

Cause: An error was received while waiting for a remote RPC to complete. The error occurred in the system-dependent sleep routine.

Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10023: RPC attempted to unrecognized package

Cause: The Recovery Manager internal RPC router received a package name that it could not understand.

Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10024: error setting up for rpc polling

Cause: The Recovery Manager could not create the RPC polling context which is required to test for RPC completion. This message should be accompanied by other error message(s) indicating the cause of the error.

Action: If other error messages indicate a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-10025: connection is already registered for events

Cause: The Recovery Manager could not enable the target database connection to test for RPC completion.

Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10026: network error *number-number* occurred registering connection

Cause: An network error occurred while attempting to register the target database connection to test for RPC completion.

Action: This is an internal error that should not be issued. The message numbers are issued by the Sql*Net layer. Contact Oracle Support.

RMAN-10027: could not locate network layer context

Cause: Recovery Manager could not locate a necessary context area while attempting to register the target database connection to test for RPC completion.

Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10028: network error *number-number* occurred during remote RPC

Cause: An network error occurred while waiting for a remote RPC to complete.

Action: This is an internal error that should not be issued. The message numbers are issued by the Sql*Net layer. Contact Oracle Support.

RMAN-10029: unexpected return code *number* from PL/SQL execution

Cause: PL/SQL returned an unexpected return code while executing one channel program.

Action: This is an internal error that should not be issued. Contact Oracle Support.

RMAN-10030: RPC call appears to have failed to start on channel *string*

Cause: An RPC to a target database instance was issued, but was not observed to start within 5 timeouts.

Action: This error is probably accompanied by other error messages giving the precise cause of the failure.

RMAN-10031: RPC Error: ORA-*number* occurred during call to *string.string*

Cause: An RPC to the target database or recovery catalog database encountered an error.

Action: This error is accompanied with the error message from the server where the error occurred.

RMAN-10032: unhandled exception during execution of job step *number: string*

Cause: An unhandled PL/SQL exception occurred during a job step.

Action: This error is accompanied by the error messages describing the exception.

RMAN-10033: error during compilation of job step *number: string*

Cause: PL/SQL detected a problem during the compilation of a job step

Action: This error message is accompanied by the error messages describing

RMAN-10034: unhandled exception during execution of job step *number*, error unknown

Cause: PL/SQL detected an unhandled exception during execution of a job step, but no further information available

Action: None

RMAN-10035: exception raised in RPC: *string*

Cause: A call to a remote package resulted in an exception.

Action: The exception should indicate what went wrong.

RMAN-10036: RPC call OK on channel *string*

Cause: This is just an informational message. It should be preceded by message 10030.

Action: No action is required.

RMAN-10037: RPC anomaly detected on channel *string*, UPINBLT=*number*

Cause: This is a debugging message and can be ignored.

Action: No action is required.

RMAN-10038: database session for channel *string* terminated unexpectedly

Cause: The database connection for the specified channel no longer exists. Either the session was terminated by some external means or the channel terminated because of an internal error.

Action: Check for an oracle trace file for detailed information on why the session terminated.

RMAN-10039: error encountered while polling for RPC completion on channel *string*

Cause: This error should be accompanied by other errors giving the cause of the polling error.

Action: Check the accompanying errors.

RMAN-10040: asynchronous support not detected, RMAN will run synchronously

Cause: The database connection does not support asynchronous operation, so RMAN will not multi-task work among multiple channels. Multiple channels can still be allocated, but they will not run work concurrently.

Action: Use a connection type that supports asynchronous operations.

RMAN-10041: Could not re-create polling channel context following failure.

Cause: The RPC polling context, which is required to test for RPC completion, failed and Recovery Manager could not re-create this channel. This message should be accompanied by other error messages indicating the cause of the error.

Action: If other error messages indicate a condition that can be corrected, do so, otherwise contact Oracle.

RMAN-11000: message number *number* not found in recovery manager message file

Cause: Recovery manager message file is out of date.

Action: Make sure that the recovery manager error message file is current and installed in the correct location.

RMAN-11001: Oracle Error: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-11002: could not open a cursor to the target database

Cause: This is an informational message only.

Action: No action is required.

RMAN-11003: failure during parse/execution of SQL statement: *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-11004: format requires %c when duplexing

Cause: SET_DUPLEX=ON was specified, but %c was not part of the format.

Action: Include %c in format, or use %U.

RMAN-11005: conflicting media information for piece "*string*"

Cause: While restoring the specified backup piece, RMAN received conflicting information about the physical location of the piece from the Media Management software. This can cause poor restore performance.

Action: If RMAN does not parallelize the restore from all of the available channels, then you should contact the Media Management vendor.

RMAN-11006: WARNING: test recovery results: *string*

Cause: User called recover database with the test option

Action: None required

RMAN-12000: execution layer initialization failed

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-12001: could not open channel *string*

Cause: An ALLOCATE CHANNEL command could not be processed.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

RMAN-12005: error during channel cleanup

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-12007: cannot allocate more than *number* channels

Cause: The maximum number of RMAN channels has been exceeded. Note that one channel is reserved for RMAN.

Action: Allocate fewer channels. Contact Oracle if you have a need for more channels in a single job.

RMAN-12008: could not locate backup piece *string*

Cause: There was at least 1 backup set that could not be accessed by any of the allocated channels.

Action: Allocate additional channels on other nodes of the cluster

RMAN-12009: command aborted because some backup pieces could not be located

Cause: Same as 7008.

Action: Refer to 7008.

RMAN-12010: automatic channel allocation initialization failed

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

RMAN-12011: multiple records for default device type found in repository

Cause: Configuration for default device type was not consistent.

Action: Re-run CONFIGURE DEFAULT DEVICE TYPE command to set device type.

RMAN-12012: multiple records for *string* parallelism found in repository

Cause: Configuration for device parallelism was not consistent.

Action: Re-run CONFIGURE PARALLELISM command for device to set parallelism.

RMAN-12013: multiple records for *string* channel *number* found in repository

Cause: Configuration for the channel was not consistent.

Action: Re-run CONFIGURE CHANNEL command to configure this channel.

RMAN-12014: multiple records for default channel configuration for *string* found in repository

Cause: Configuration for the channel was not consistent.

Action: Re-run CONFIGURE CHANNEL command to configure the channel.

RMAN-12015: configuration for *string* channel *number* is ignored

Cause: This is an informational message only. Parallelism for the device is less than associated channel number.

Action: To use this configuration increase parallelism for this device. To clear this configuration use CONFIGURE CHANNEL... CLEAR command.

RMAN-12016: using channel *string*

Cause: This is an informational message only.

Action: No action is required.

RMAN-12017: could not locate pieces of backup set key *string*

Cause: Copies of the specified backup set key could not be accessed on any of the allocated channels.

Action: Allocate additional channels on other nodes of the cluster or, if the backup pieces has been deleted, use the CROSSCHECK BACKUP command to correct the recovery catalog or target database control file entries.

RMAN-12018: channel *string* disabled, job failed on it will be run on another channel

Cause: This is an informational message displayed whenever a retryable error occurs for the job and there are channels available to run this step.

Action: No action is required.

RMAN-12019: continuing other job steps, job failed will not be re-run

Cause: This is an informational message displayed whenever there is a non-retryable error occurred for the job.

Action: No action is required.

RMAN-12020: error on step filtered for normal output *string*

Cause: This message is added when stacking errors for failed jobs after channel failover was performed. It will be filtered from normal output.

Action: No action is required.

RMAN-20000: abnormal termination of job step

Cause: A job step encountered an error and could not recover. This error should be followed by other errors indicating the cause of the problem.

Action: Check the accompanying error.

RMAN-20001: target database not found in recovery catalog

Cause: target database is not found in the recovery catalog

Action: make sure that the target database is registered in the recovery recovery catalog

RMAN-20002: target database already registered in recovery catalog

Cause: target database is already registered in the recovery catalog

Action: if the target database is really registered, there is no need to register it again. Note that the recovery catalog enforces that all databases have a unique DBID. If the new database was created by copying files from an existing database, it will have the same DBID as the original database and cannot be registered in the same recovery catalog.

RMAN-20003: target database incarnation not found in recovery catalog

Cause: RESETLOGS CHANGE# and/or time of the target database doesn't match any database incarnation in the recovery catalog.

Action: if target database was opened with RESETLOGS option then use 'reset database' to register the new incarnation.

RMAN-20004: target database name does not match name in recovery catalog

Cause: name of the target database doesn't match the one stored in the recovery catalog

Action: This is an internal error.

RMAN-20005: target database name is ambiguous

Cause: two or more databases in the recovery catalog match this name

Action: None

RMAN-20006: target database name is missing

Cause: target database instance is not started or db_name initialization parameter is not set

Action: startup the instance and make sure that db_name parameter is set

RMAN-20009: database incarnation already registered

Cause: this incarnation is already registered in the recovery catalog

Action: No action is required.

RMAN-20010: database incarnation not found

Cause: database incarnation does not match any database incarnation in the recovery catalog

Action: specify a valid database incarnation key

RMAN-20011: target database incarnation is not current in recovery catalog

Cause: the database incarnation that matches the RESETLOGS CHANGE# and time of the mounted target database control file is not the current incarnation of the database

Action: If 'reset database to incarnation <key>' was used to make an old incarnation current then restore the target database from a backup that matches the incarnation and mount it. You will need to do 'STARTUP NOMOUNT' before you can restore the control file using RMAN. Otherwise use 'reset database to incarnation <key>' make the intended incarnation current in the recovery catalog.

RMAN-20012: not authorized to register new database

Cause: You attempted to register a new database with this recovery catalog, but you are using a virtual private catalog, and you have not been granted permission by the catalog administrator to register this database with this recovery catalog

Action: Ask the catalog administrator to grant permission for you to register this database.

RMAN-20013: error upgrading virtual private catalog

Cause: An error occurred while automatically upgrading a virtual private catalog.

Action: Ensure that the virtual private catalog userid has all of the required privileges, such as being granted the RECOVERY_CATALOG_OWNER role.

RMAN-20014: virtual private catalog owner must be granted RECOVERY_CATALOG_OWNER role

Cause: An attempt was made to establish a virtual private RMAN catalog in a schema that is not granted the RECOVERY_CATALOG_OWNER role.

Action: Grant RECOVERY_CATALOG_OWNER to the virtual private catalog owner.

RMAN-20015: not authorized to share this catalog

Cause: You attempted to share a recovery catalog but were not authorized to do this by the catalog administrator.

Action: Ask the catalog administrator to grant permission for you to share this catalog.

RMAN-20016: virtual private catalog user cannot modify global scripts

Cause: A virtual private catalog user attempted to create, delete, or modify a global script. Virtual private catalog users cannot modify global scripts.

Action: Connect to the catalog owner userid and retry the global script operation.

RMAN-20017: illegal script update operation

Cause: An illegal script operation was performed.

Action: None

RMAN-20018: database not found in recovery catalog

Cause: An attempt was made to grant or revoke catalog access to a database whose name was not registered in the recovery catalog.

Action: Correct the database name and re-issue the GRANT or REVOKE command. If this is an attempt to grant or revoke access to a database that is not yet registered, then re-issue the command using the database ID of the desired database.

RMAN-20019: database name not unique in recovery catalog

Cause: An attempt was made to grant or revoke catalog access to a database whose name is not unique in the recovery catalog.

Action: Re-issue the command specifying the database ID of the desired database.

RMAN-20022: user not found

Cause: An attempt was made to grant a privilege to a user that does not exist.

Action: Reissue the command specifying a user that exists.

RMAN-20029: cannot make a snapshot control file

Cause: another operation that needs the snapshot control file is in progress

Action: try again later if necessary

RMAN-20030: resync in progress

Cause: this procedure cannot be called while a resync is in progress

Action: This is an internal error.

RMAN-20031: resync not started

Cause: this procedure can only be called in a resync

Action: This is an internal error.

RMAN-20032: checkpoint CHANGE# too low

Cause: the checkpoint change# is less than the one of the previous resync or the checkpoint change# is null

Action: make sure that the right control file is used

RMAN-20033: control file SEQUENCE# too low

Cause: the control file sequence is less than the one of the previous resync

Action: make sure that the right control file is used

RMAN-20034: resync not needed

Cause: the control file has not changed since the previous resync

Action: nothing since the recovery catalog is in sync

RMAN-20038: must specify FORMAT for CONVERT command

Cause: No FORMAT was specified when using CONVERT command.

Action: Resubmit the command using FORMAT clause.

RMAN-20039: format requires *character* when duplexing

Cause: SET_DUPLEX=ON was specified, but %c was not part of the format.

Action: Include %c in format, or use %U.

RMAN-20045: must specify FORMAT for BACKUP INCREMENTAL FROM SCN command

Cause: No FORMAT was specified when using BACKUP INCREMENTAL FROM SCN command.

Action: Resubmit the command using FORMAT clause.

RMAN-20079: full resync from primary database is not done

Cause: Resync from standby detected that a full resync from primary database is required. One of the following events on primary database may have caused this error: 1) one or more tablespaces or datafiles were added 2) one or more tablespaces or datafiles were dropped 3) one or more datafiles status changed

Action: Perform full resync after connecting to primary database.

RMAN-20081: change stamp for the record

Cause: A record with same recid and stamp is already known to catalog.

Action: None. This error is automatically handled by RMAN client by changing the stamp in control file during resync.

RMAN-20108: control file for remote database cannot be updated

Cause: RESYNC CATALOG FROM DB_UNIQUE_NAME command was attempted, but the control file at the database with DB_UNIQUE_NAME needs to be resynced directly instead of through the current target.

Action: Directly connect as target to the remote database with the specified DB_UNIQUE_NAME and resync.

RMAN-20109: remote database has different database ID

Cause: Command RESYNC CATALOG FROM DB_UNIQUE_NAME was executed and the database ID of the remote database was different than the connected target database.

Action: The remote database should have the same database ID as the database connected as the target database. Fix the connect identifier for the remote database and retry the command.

RMAN-20201: datafile not found in the recovery catalog

Cause: The specified datafile is not found in the recovery catalog

Action: make sure that the datafile name is correct and that the recovery catalog is up-to-date

RMAN-20202: Tablespace not found in the recovery catalog

Cause: the specified tablespace is not found in the recovery catalog

Action: make sure that the tablespace name is correct and that the recovery catalog is up-to-date

RMAN-20203: translation in progress

Cause: this procedure can not be called when name translation is in progress

Action: This is an internal error.

RMAN-20204: translation not started

Cause: GETDATAFILE procedure was called before TRANSLATETABLESPACE

Action: This is an internal error.

RMAN-20205: incomplete UNTIL clause

Cause: The sequence# was NULL

Action: This is an internal error.

RMAN-20206: log sequence not found in the repository

Cause: The specified log sequence does not exist in log history of the current database incarnation

Action: check the thread# and sequence#

RMAN-20207: UNTIL TIME or RECOVERY WINDOW is before RESETLOGS time

Cause: UNTIL TIME and RECOVERY WINDOW cannot be less than the database creation time or RESETLOGS time.

Action: Check the UNTIL TIME or RECOVERY WINDOW. If the database needs to be restored to an old incarnation, use the RESET DATABASE TO INCARNATION command.

RMAN-20208: UNTIL CHANGE is before RESETLOGS change

Cause: UNTIL CHANGE cannot be less than the database RESETLOGS change.

Action: Check the UNTIL CHANGE. If the database needs to be restored to an old incarnation, use the RESET DATABASE TO INCARNATION command.

RMAN-20209: duplicate datafile name

Cause: Two datafiles have the same name

Action: This is an internal error.

RMAN-20211: FROM TIME is before RESETLOGS time

Cause: FROM TIME cannot be less than the database creation time or RESETLOGS time.

Action: Check the FROM TIME. If the database needs to be restored to an old incarnation, use the RESET DATABASE TO INCARNATION command.

RMAN-20212: UNTIL CHANGE is an orphan incarnation

Cause: Specified UNTIL CHANGE was an orphan incarnation.

Action: Check the UNTIL CHANGE or UNTIL RESTORE POINT. If the database needs to be restored or flashed back to an orphan incarnation, use the RESET DATABASE TO INCARNATION command.

RMAN-20215: backup set not found

Cause: The specified backup set key was not found in the recovery catalog or target database control file.

Action: Specify a different backup set key.

RMAN-20217: datafile not part of the database

Cause: the datafile does not exist or did not exist at until time/scn

Action: check the datafile name or number. This is an internal error. for restore database or tablespace.

RMAN-20218: datafile not found in repository

Cause: This is an internal error.

Action: Contact Oracle Support Services.

RMAN-20220: control file copy not found in the repository

Cause: The specified control file was not in the recovery catalog or target database control file or it was marked deleted.

Action: check the file name

RMAN-20221: ambiguous control file copy name

Cause: more than one control file copy in the recovery catalog match the specified name.

Action: None

RMAN-20222: datafile name not found in recovery catalog or is ambiguous

Cause: The specified datafile name is not the name of a datafile that is currently part of the target database, or an UNTIL clause has been specified and the file name was for a different datafile at the time specified by the UNTIL clause than it is now.

Action: Use a datafile number to specify the datafile you want to RESTORE or RECOVER.

RMAN-20223: DB_UNIQUE_NAME mismatch in snapshot control file

Cause: The DB_UNIQUE_NAME value in the snapshot control file was incorrect. This error can occur in Oracle RAC when the snapshot control file location is not shared across nodes and virtual IPs are setup in the remote database from where resynchronization is done using RESYNC CATALOG FROM DB_UNIQUE_NAME command.

Action: To avoid this error, one of the following actions can be taken: 1) Share the control file snapshot location. The snapshot location can be displayed by executing SHOW SNAPSHOT CONTROLFILE NAME at the RMAN prompt. 2) Do not use Virtual IPs in the service name used to define the connect identifiers. The connect identifiers can be displayed using SHOW DB_UNIQUE_NAME command at the RMAN prompt.

RMAN-20230: datafile copy not found in the repository

Cause: The specified datafile was not in the recovery catalog or target database control file or it was marked deleted.

Action: check the datafile copy name or key

RMAN-20231: ambiguous datafile copy name

Cause: more than one control file copy in the recovery catalog match the specified name.

Action: use the datafile copy key to uniquely specify the datafile copy

RMAN-20240: archived log not found in the repository

Cause: The specified archived log was not found in the recovery catalog or target database control file or it was marked deleted.

Action: check the archived log name or key

RMAN-20241: ambiguous archived log name

Cause: more than one archived log in the recovery catalog match the specified name

Action: use the archived log key to uniquely specify the archived log

RMAN-20242: specification does not match any archived log in the repository

Cause: No archived logs found that match specification in the recovery catalog or target database control file.

Action: check the archived log specifier

RMAN-20243: database db_unique_name is not known to the recovery catalog

Cause: the user specified DB_UNIQUE_NAME not known to the recovery catalog.

Action: change the database DB_UNIQUE_NAME to a known database value. To display list of known db_unique_names execute LIST DB_UNIQUE_NAME OF DATABASE

RMAN-20244: can not change currently connected database db_unique_name

Cause: the user specified currently connected DB_UNIQUE_NAME value to unregister.

Action: use the DB_UNIQUE_NAME other than connected target database's DB_UNIQUE_NAME value.

RMAN-20245: can not specify db_unique_name option in nocatalog mode

Cause: the user specified DB_UNIQUE_NAME in nocatalog mode.

Action: remove the DB_UNIQUE_NAME option from the command.

RMAN-20246: new db_unique_name is already known to the recovery catalog

Cause: the user specified known DB_UNIQUE_NAME value when renaming a DB_UNIQUE_NAME in the recovery catalog.

Action: change the database DB_UNIQUE_NAME to an known DB_UNIQUE_NAME value; or unregister the new DB_UNIQUE_NAME before renaming an old DB_UNIQUE_NAME value for a database. To display the list of all DB_UNIQUE_NAME for the databases LIST DB_UNIQUE_NAME OF DATABASE command can be executed.

RMAN-20247: specification does not match any foreign archived log in the repository

Cause: No foreign archived logs found that match specification in the recovery catalog or target database control file.

Action: check the foreign archived log specifier

RMAN-20250: offline range not found in the repository

Cause: The specified offline was not found in the recovery catalog or target database control file.

Action: check that recovery catalog is current

RMAN-20260: backup piece not found in the repository

Cause: The specified backup piece was not in the recovery catalog or target database control file or it was marked deleted.

Action: check the backup piece handle or key

RMAN-20261: ambiguous backup piece handle

Cause: more than one backup piece in the recovery catalog match the specified handle

Action: use the backup piece key to uniquely specify the backup piece

RMAN-20272: no parent backup found for the incremental backup

Cause: no available backup or copy that could be used as the parent of the incremental backup was found in the recovery catalog.

Action: take a level 0 backup or copy of the datafile first

RMAN-20280: too many device types

Cause: more than 8 device types were allocated

Action: make sure that the job allocates at most 8 different device types

RMAN-20298: DBMS_RCVCAT package not compatible with the recovery catalog

Cause: The version of the recovery catalog tables does not work with this version of the DBMS_RCVCAT package.

Action: Check that the recovery catalog packages and schema are installed correctly. The UPGRADE CATALOG command can be used to upgrade the recovery catalog tables and packages to the most current version.

RMAN-20299: DBMS_RCVMAN package not compatible with the recovery catalog

Cause: The version of the recovery catalog tables does not work with this version of the DBMS_RCVMAN package.

Action: Check that the recovery catalog packages and schema are installed correctly. The UPGRADE CATALOG command can be used to upgrade the recovery catalog tables and packages to the most current version.

RMAN-20310: proxy copy not found in the repository

Cause: The specified proxy copy was not in the recovery catalog or target database control file or it was marked deleted.

Action: check the proxy copy handle or key

RMAN-20311: ambiguous proxy copy handle

Cause: more than one proxy copy in the recovery catalog matches the specified handle

Action: use the proxy copy key to uniquely specify the proxy copy

RMAN-20401: script already exists

Cause: a CREATE SCRIPT was issued, but a script with the specified name already exists.

Action: use a different name or use REPLACE SCRIPT.

RMAN-20501: redo logs from parent database incarnation cannot be applied

Cause: A RESTORE or RECOVER of a datafile was requested, but recovery of the datafile would require applying redo logs that were generated before the most recent OPEN RESETLOGS.

Action: If a full backup or datafile copy from the current database incarnation exists, ensure that it is marked AVAILABLE, and that a channel of the correct device type is allocated. It may also be necessary to remove the FROM BACKUPSET or FROM DATAFILECOPY or FROM TAG operands if these have been specified.

RMAN-20502: DELETE EXPIRED cannot delete objects that exist - run CROSSCHECK

Cause: A DELETE EXPIRED command was run, but the object was actually found to exist. This means the recovery catalog or target database control file is out of sync with reality.

Action: Run CROSSCHECK.

RMAN-20503: DELETE cannot delete expired objects - run CROSSCHECK or DELETE EXPIRED

Cause: A DELETE command was run without EXPIRED option, but the object doesn't exist. This means the recovery catalog or target database control file is out of sync with reality.

Action: Run CROSSCHECK.

RMAN-20504: corruption list not found in recovery catalog

Cause: corruption list is empty

Action: make sure that one or more blocks are marked corrupted in v\$copy_corruption and v\$backup_corruption and recovery catalog is up-to-date.

RMAN-20505: create datafile during recovery

Cause: applying of archived log caused a create datafile redo-entry to terminate recovery.

Action: none. This message is never displayed. RMAN automatically detects this case and creates the datafile.

RMAN-20506: no backup of archived log found

Cause: during the recover process, no backup was found from which the archived logs could be restored.

Action: this message should be followed by a list of missing archived logs. Please make the necessary archived log backups available and try again.

RMAN-20507: some targets are remote - aborting restore

Cause: during the restore process, one or more backup files were unavailable locally for the restore operation.

Action: This message should be accompanied with the list of remote backup files. Recall these backups from remote location and retry the RESTORE command.

RMAN-20508: temporary resource already in use

Cause: Temporary resource that was allocated for IMPORT CATALOG command was already in use.

Action: Retry IMPORT CATALOG command.

RMAN-20509: temporary resource not found

Cause: Temporary resource that was allocated for IMPORT CATALOG command was not found.

Action: Retry IMPORT CATALOG command.

RMAN-20510: database not found in source recovery catalog database

Cause: Database that was specified in IMPORT CATALOG command was not found in the source recovery catalog database.

Action: Make sure that the database is registered in the source recovery catalog database.

RMAN-20511: database name is ambiguous in source recovery catalog database

Cause: Two or more databases in the source recovery catalog database match this name.

Action: Use DBID option in IMPORT CATALOG command to specify the source database.

RMAN-20512: source database already registered in recovery catalog

Cause: Source database was already registered in the recovery catalog.

Action: If the source database is really registered, there is no need to register it again. Note that the recovery catalog enforces that all databases have a unique DBID. If the new database was created by copying files from an existing database, it will have the same DBID as the original database and cannot be registered in the same recovery catalog.

RMAN-20514: feature requires Availability Machine recovery catalog

Cause: The specified command required the Availability Machine recovery catalog.

Action: Connect to the Availability Machine recovery catalog and retry the command.

KFNDG-00200 to KFNDG-00701

KFNDG-00200: invalid syntax

Cause: Invalid syntax for renamedg was specified.

Action: Try renamedg -help for more information.

KFNDG-00201: invalid arguments

Cause: Invalid key or value was specified for renamedg.

Action: Try renamedg -help for more information.

KFNDG-00202: invalid value (*string*) for parameter phase

Cause: Incorrect value for parameter PHASE was specified.

Action: Valid values for parameter PHASE are ONE, TWO, BOTH. Retry with correct values.

KFNDG-00203: disk group name (*string*) exceeds maximum allowed length *number*

Cause: Invalid disk group name was specified.

Action: Disk group name can be a maximum of 32 characters.

KFNDG-00204: disk group name *string* has invalid characters

Cause: Invalid disk group name was specified.

Action: Disk group name can only contain alphabetic, numeric and the underscore (_) characters.

KFNDG-00205: failed to interpret configuration file name

Cause: Invalid configuration file name was specified.

Action: Verify configuration file name and folder permissions and retry renamedg.

KFNDG-00301: new disk group (*string*) already exists, ignoring renamedg

Cause: disk group specified in NEWDGNAME already exists.

Action: None

KFNDG-00302: disk (*string:string*) does not contain a valid header

Cause: Device header could not be located or corrupt.

Action: Verify if the device mentioned is an ASM disk device.

KFNDG-00303: failed to update disk group name for *string*

Cause: Insufficient privileges or write error in disk.

Action: Verify disk permissions and retry renamedg. Also, see log for additional information.

KFNDG-00304: unable to access heartbeat block of the device *string:string*

Cause: Heartbeat block of the disk was corrupt.

Action: Verify disk header with ASM utilities, retry renamedg.

KFNDG-00305: failed to create configuration file

Cause: Insufficient privileges or invalid path.

Action: Verify folder permissions and retry the command.

KFNDG-00306: unable to write to configuration file

Cause: Insufficient privileges.

Action: Check file permissions and retry renamedg.

KFNDG-00307: unable to read configuration file

Cause: Insufficient privileges or disk read error.

Action: Check file permissions and retry renamedg.

KFNDG-00308: failed to process configuration file entry: *string*

Cause: Configuration file was corrupt.

Action: Check file information and retry renamedg.

KFNDG-00401: allocation unit size conflict (*number, number*)

Cause: Allocation unit size of disk group and the disk did not match.

Action: Verify that the device is not corrupt and retry renamedg.

KFNDG-00402: ASM metadata block size conflict (*number, number*)

Cause: Metadata block size of the disk group and disk did not match.

Action: Verify if the device is not corrupt and retry renamedg.

KFNDG-00403: not all disks of disk group *string* were discovered

Cause: Offline disks were present in the specified disk group.

Action: Refer to Oracle Database Storage Administrator's Guide for more details.

KFNDG-00404: disk group *string* contains offline disks, ignoring renamedg

Cause: Disk group with offline disks could not be renamed.

Action: Refer to Oracle Database Storage Administrator's Guide for more details.

KFNDG-00405: specified disk group *string* appears to be mounted

Cause: Disk group was mounted.

Action: Unmount the disk group and retry renamedg.

KFNDG-00406: disk group (*string*) is in use by CSS

Cause: Cluster Synchronization Service(CSS) was using the disk group to be renamed.

Action: Refer to crsctl command to relocate voting disks from disk group.

KFNDG-00407: Could not find disks for disk group *string*

Cause: No disks were discovered for disk group.

Action: Try renamedg with a different discovery string.

KFNDG-00408: disk (*string:string*) could not be discovered

Cause: Disk was either deleted or moved.

Action: None

KFNDG-00409: disk (*string*) doesn't belong to disk group (*string*)

Cause: Disk is not part of the specified disk group.

Action: None

KFNDG-00410: failed to discover devices in folder *string*

Cause: Insufficient privileges or invalid discovery string.

Action: See log for additional details.

KFNDG-00600: internal error *string*

Cause: An internal error occurred while executing renamedg.

Action: Contact Oracle Support Services.

KFNDG-00601: fatal error *string*

Cause: A fatal error occurred while executing renamedg.

Action: Contact Oracle Support Services.

KFNDG-00603: failed to initialize device discovery

Cause: Error occurred while communicating with generic services layer.

Action: Contact Oracle Support Services.

KFNDG-00700: system dependent error (*number, string, string, string*) occurred

Cause: Internal system error occurred.

Action: Contact Oracle Support Services.

KFNDG-00701: Error *number* while performing I/O

Cause: I/O failure.

Action: Contact Oracle Support Services.

KFED-00400 to KFED-00403

KFED-00400: Operating system dependent operation: *string* failed with status: *string*

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFED-00401: Operating system failure message: *string*

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFED-00402: failure occurred at: *string*

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFED-00403: additional information: *string*

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFOD-00316 to KFOD-00403

KFOD-00316: Error acquiring ASM disk discovery string from Grid Plug and Play profile: call to *[string]* failed.

Cause: Call to the Grid Plug and Play service to request disk discovery string failed.

Action: Ensure that the Grid Plug and Play component of Cluster Ready Services is available. If Grid Plug and Play is operational and command still fails, contact Oracle Support Services.

KFOD-00400: OS system dependent operation: *string* failed with status: *string*

Cause: OS system call error

Action: contact Oracle Support

KFOD-00401: OS failure message: *string*

Cause: OS system call error

Action: contact Oracle Support

KFOD-00402: failure occurred at: *string*

Cause: OS system call error

Action: contact Oracle Support

KFOD-00403: additional information: *string*

Cause: OS system call error

Action: contact Oracle Support

LRM-00100 to LRM-00123

LRM-00100: internal error [*number*]

Cause: An internal error has occurred.

Action: Contact Oracle Support Services and report the error.

LRM-00101: unknown parameter name '*string*'

Cause: The parameter name was misspelled.

Action: Spell the parameter name correctly.

LRM-00102: '*string*' is not in the legal range for '*string*'

Cause: The value of the parameter is not within the legal range.

Action: Refer to the manual for the allowable values for this parameter.

LRM-00103: '*string*' contains an illegal integer radix for '*string*'

Cause: An illegal integer radix specification was found.

Action: Only 'd', 'h', 'D', and 'H' may be used as radix specifications.

LRM-00104: '*string*' is not a legal integer for '*string*'

Cause: The value is not a valid integer.

Action: Specify only valid integers for this parameter.

LRM-00105: '*string*' is not a legal Boolean for '*string*'

Cause: The value is not a valid Boolean.

Action: Refer to the manual for allowable Boolean values.

LRM-00106: out of memory

Cause: The operating system has run out of memory.

Action: Take action to make more memory available to the program.

LRM-00107: parameter name abbreviation '*string*' is not unique

Cause: The given abbreviation was not unique.

Action: Use a longer abbreviation to make the parameter name unique.

LRM-00108: invalid positional parameter value '*string*'

Cause: An invalid positional parameter value has been entered.

Action: Remove the invalid positional parameter.

LRM-00109: could not open parameter file '*string*'

Cause: The parameter file does not exist.

Action: Create an appropriate parameter file.

LRM-00110: syntax error at '*string*'

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00111: no closing quote for value '*string*'

Cause: A quoted string was started but not finished.

Action: Put a closing quote in the proper location.

LRM-00112: multiple values not allowed for parameter '*string*'

Cause: An attempt was made to specify multiple values for a parameter which can take only one value.

Action: Do not specify more than one value for this parameter.

LRM-00113: error when processing file '*string*'

Cause: A problem occurred when processing this file.

Action: Examine the additional error messages and correct the problem.

LRM-00114: error when processing from command line

Cause: A problem occurred when processing the command line.

Action: Examine the additional error messages and correct the problem.

LRM-00115: error when processing an environment variable

Cause: A problem occurred when processing an environment variable.

Action: Examine the additional error messages and correct the problem.

LRM-00116: syntax error at '*string*' following '*string*'

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00117: syntax error at '*string*' at the start of input

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00118: syntax error at '*string*' at the end of input

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00119: unable to obtain a valid value for '*string*'

Cause: No valid value was obtained for this parameter.

Action: Rerun the application and enter a valid value.

LRM-00120: '*string*' is not a legal Oracle number for '*string*'

Cause: The value is not a valid Oracle number.

Action: Refer to the manual for allowable Oracle number values.

LRM-00121: '*string*' is not an allowable value for '*string*'

Cause: The value is not a legal value for this parameter.

Action: Refer to the manual for allowable values.

LRM-00122: value '*string*' for '*string*' must be between '*number*' and '*number*'

Cause: The value of the parameter is not within the legal range.

Action: Specify a value that is within the legal range.

LRM-00123: invalid character *number* found in the input file

Cause: A character that is invalid was found in the input file.

Action: Specify an input file that contains only valid characters.

LFI-00002 to LFI-01525**LFI-00002: Out of memory. *string***

Cause: The File IO package failed in trying to dynamically allocate memory. function name is used for additional comments to indicate where, when and why the error occurred.

Action: Perform whatever actions necessary to make more memory available to the executing program.

LFI-00003: Internal exception code. icode = [*string*], [*string*].

Cause: Unknown - indicated by parameters. The first '%s' gives the internal exception code; the second is for any other additional comments.

Action: Report to the appropriate development group

LFI-00004: Call to *string* failed.

Cause: A function call has failed. This error is a generic message to show that the exception has occurred in a particular function function name. This allows the client to know the trace runtime calling sequence by examining the exception stack.

Action: See the accompanying error messages for more information.

LFI-00005: Free some memory failed in *string*.

Cause: A call to free some memory in function function name has failed.

Action: See the accompanying error messages for more information and contact Oracle Worldwide Support immediately.

LFI-00006: Invalid parameter to function *string*.

Cause: The function was called with an invalid parameter.

Action: Check the function call to make sure that the correct parameters are being passed.

LFI-00007: NLSRTL's call failed. *string*.

Cause: LX calls return failure

Action: Check if our parameters are correct. Contact the appropriate group immediately if we parameters are valid.

LFI-00008: SLTS's initializing/terminating mutex failed for *string*.

Cause: SLTS's call return failure in function '%s'.

Action: Contact the appropriate development group.

LFI-00100: Unable to perform operation, file not opened in *string*.

Cause: The file has not been successfully opened at the time the operation is attempted.

Action: Check to make sure that the file exists (for read) or that the program has access to the write a file (for write). It is also possible that the file was just never opened

LFI-00101: Write failed, file cannot be written to.

Cause: The buffer write operation failed. Possibly due to incorrect parameters being passed in.

Action: Check the underlying error for more information.

LFI-00102: Unable to seek in sequentially accessed file.

Cause: The file was opened with the flag LFILFA_SEQ for sequential file operations. Use seek only on files that are opened with the LFILFA_RANDOM flag for random access.

Action: Check to see how the file is being opened and accessed and make the two operations consistent (that is, make them both operations either sequential or random).

LFI-00103: Seek operation failed.

Cause: The buffer seek operation failed. Probably due to incorrect parameters or flags.

Action: Check syntax of the seek command and retry the operation.

LFI-00104: Read operation failed.

Cause: The buffer read operation failed. Probably due to incorrect parameters or flags.

Action: Check syntax of the read command and retry the operation.

LFI-00105: Unable to add path.

Cause: One of the following might have caused the error: the current path might not be in the proper format the directory might not be in the proper format the name object might not have been initialized properly

Action: Check the format of the current path and the new directory; check that the name object was initialized properly.

LFI-00106: Path object holds more than one path.

Cause: The path object passed to lfippth() holds more than one path.

Action: Make sure that the path object used in lfippth() holds only one path.

LFI-00107: Open does not expect the file [string][string] to exist.

Cause: The flags specified for the open indicate that the file does not exist. However, the file does exist.

Action: Check to make sure that the options that were specified for the file are correct and that you do not expect that the file should exist. If so then find out why the file does exist.

LFI-00108: Open expect the file [string][string] to exist.

Cause: The flags specified for the open indicate that the file the file to exist and it does not.

Action: Check to make sure that the options that were specified for the file are correct and that you expect that the file should exist. If so then find out why the file doesn't.

LFI-00109: Unable to open file [string][string]. string.

Cause: Either: the process does not have the proper access rights to open the file the file is already open

Action: Check to make sure the proper access permissions are assigned. If they are and the file still cannot be opened, then contact Oracle Worldwide Support.

LFI-00110: Unable to initialize the Buffer Manager.

Cause: The Buffer Manager initialization routine failed; probably because memory was exhausted.

Action: See the accompanying error messages for more information.

LFI-00111: No other flags allowed in fixed length format.

Cause: The function lfigfo() was called with an invalid File ID Descriptor. The valid File ID Descriptors are LFISTDIN, LFISTDOUT, and LFISTDERR.

Action: Check the call to lfigfo() to make sure it is correct.

LFI-00113: Unable to initialize the Standard File object string.

Cause: The call to open the standard file object failed.

Action: Check the underlying errors for more information.

LFI-00114: Append is not allowed with string.

Cause: Attempting to append using certain options.

Action: Check the flag options to verify its usage.

LFI-00115: Buffer free failed.

Cause: Probably do to the buffer flush failing.

Action: See the accompanying error messages for more information.

LFI-00116: Unable to close file in operation string.

Cause: The file close operation failed.

Action: See the accompanying error messages for more information.

LFI-00117: Unable to rename file.

Cause: The rename operation failed. Rename is called when we are protecting a file by operating on a temp file.

Action: Check to make sure that the process has the correct access rights to perform a rename.

LFI-00118: Unable to change type to Unknown.

Cause: The function lfichty() was called to change the file extension to LFIEXUNK (Unknown). This is not a valid operation.

Action: Check why you are doing this. If the extension is already unknown then you do not need to do this. If you just want no extension then use the extension type LFIEXNONE.

LFI-00119: Unable to Abort an Unprotected file.

Cause: The Abort function lfiabt() was called on a file that was not opened as a protected file. As such the abort operation is not valid.

Action: Check to see if you intended to open the file as a protected file.

LFI-00120: Unable to parse root filename *string*.

Cause: The root filename that was given to `lfimknam()` is not in a format that this platform understands.

Action: Check the format of the filename and retry the operation.

LFI-00121: Only one of REPLACE, or PROT allowed for *opty*.

Cause: Two or more of the following open type options were specified for the `lfilini()` function: `LFILOPTY_REPLACE`, or `LFILOPTY_PROT`.

Action: Remove one or more the of options such that you are only passing in one of the three.

LFI-00122: Can only delete a file if we create it.

Cause: The delete file flag was specified for a file that was not created by this file operation. The ability to delete a file is not portable. As such the only deletion that is allowed by this package is if we know we want to delete the file when we create it.

Action: You can only delete a file that you create. If you need to delete a file that you do not create then you will have to find another means of doing so.

LFI-00123: Cannot access file Sequentially and Randomly.

Cause: Both the `LFILFA_SEQ` (sequential) and `LFILFA_RANDOM` (random) flags were specified during the file object creation. This is not allowed. Only one of the two may be specified.

Action: Choose how you wish to access the file. If you choose random you can still access sequentially by just not using the repositioning functions.

LFI-00124: No access mode was specified, default is sequential.

Cause: Neither `LFILFA_SEQ` (sequential) or `LFILFA_RANDOM` (random) were specified during file object creation.

Action: The default is sequential but this should be explicitly set.

LFI-00125: Random access only allowed on fixed length record files.

Cause: The `LFILFA_RANDOM` flag was specified on a file that was not organized into fixed-length records. Random access is only allowed on fixed-length record files.

Action: Determine if the organization of your data needs to be in variable-length records and if you need to have random access to the file. If both conditions are true then you might need to buffer the entire file or enough of it to remove your need for random access. Another option is to close and rescan the file although this is not the optimal solution.

LFI-00126: Record format can only be one of Fixed or Variable.

Cause: Both `LFILRF_FIXED` (fixed) and `LFILRF_VAR` (variable) were specified during file object creation. Only one of the two is allowed for a given file.

Action: Determine how the file is organized and choose the option that matches.

LFI-00127: No Record Format was specified, default is variable.

Cause: Neither `LFILRF_FIXED` (fixed) or `LFILRF_VAR` (variable) were specified for record format. One of the two must be specified for each file.

Action: The default is `LFILRF_VAR`, but this should be explicitly set during file object creation.

LFI-00128: Carriage Control is only valid for Standard file objects.

Cause: The Carriage Control option is only valid for the standard file objects (LFISTDIN, LFISTDOUT, LFISTDERR). You may not specify this option for any other type of file.

Action: Choose between LFILRF_FIXED and LFILRF_VAR for the record format.

LFI-00129: Invalid option *string* were specified on an input only file.

Cause: The file was opened as input only but the output mode option LFILRF_WR_ASIS or delete option LFLOPTY_DELETE was specified.

Action: Check to see how you intend to open this file and make the necessary changes.

LFI-00130: Input option specified on output only file.

Cause: The file was opened as output only but one of the input mode options (LFILRF_READ_NL or LFILRF_FORCE_NL) or was specified.

Action: Check to see how you intend to open this file and make the necessary changes.

LFI-00131: No open type specified.

Cause: The file object was created without an open type (that is, LFILOPTY_INPUT, LFILOPTY_OUTPUT, etc.).

Action: Decide how the file should be accessed and specify one of the open types.

LFI-00132: Record length *string* is greater than max length of *string*.

Cause: The record length specified for the file is greater than the max supported by this platform.

Action: Decrease the record length.

LFI-00133: Trying to create file *string* that already exists.

Cause: The file object was initialized with LFILOPTY_OUTPUT and without LFILOPTY_REPLACE and yet a file by this name already exists.

Action: Check to make sure that you are creating the right file. If you intend to overwrite the file if it exists that specify the replace option LFILOPTY_REPLACE when initializing the file object.

LFI-00134: Unable to protect a file for an append operation.

Cause: The LFILOPTY_APPEND and LFILOPTY_PROT options were both specified for the file. This is currently not allowed because it would require copying the entire file at open time.

Action: Decide if you really need to protect the file for append. If so then think about making a copy of it before appending.

LFI-00135: Unable to remove temporary file.

Cause: A temporary file was created to protect a file and when the the tempfile was no longer needed it LFI attempted to remove it and was unable to do so.

Action: Check the permissions and where the temp files are being created.

LFI-00136: Unable to change type of open file.

Cause: The function lfichty() was called on an opened file.

Action: This is a bug in the client code. lfichty() cannot be used in this case.

LFI-00137: Unable to perform *string* on a file object that is *string*.

-
- Cause:** Unable to perform an LFI operation on a file object for the given reason.
Action: Take the appropriate corrective measure. For example if a file is supposed to be opened before the operation can be performed, client code will need to open the file first.
- LFI-00138: Unable to perform *string* on a name object that is *string*.**
Cause: Unable to perform an LFI operation on a name object for the given reason.
Action: Take the appropriate corrective measure.
- LFI-00139: Option *string* cannot be used with option *string* in calling *string*.**
Cause: First option cannot be used with second option in such a function call.
Action: Re-examine code to determine which option is needed.
- LFI-00140: Invalid option *string* were specified on input-output file.**
Cause: The file was opened as input-output and one of the mode options (LFIOPTY_DELETE or non-LFIOPTY_RANDOM) was specified.
Action: Check to see how you intend to open this file and make the necessary changes.
- LFI-00141: Unable to abort file in operation *string*.**
Cause: The abort operation failed.
Action: Check the underlying errors for more information.
- LFI-00142: Unable to delete an existing file [*string*][*string*] not owned by Oracle.**
Cause: The file was not created by Oracle.
Action: Change owner of file to Oracle or give Oracle access privileges to delete it.
- LFI-00143: Unable to delete non-existent file *string*.**
Cause: The file to be deleted does not exist.
Action: Check the underlying errors for more information.
- LFI-00144: File [*string*][*string*] does not exist**
Cause: The file does not exist.
Action: Check to make sure the file exists and retry the operation.
- LFI-00145: User buffer too short.**
Cause: The buffer that was passed is not large enough.
Action: Allocate a larger buffer and retry the operation.
- LFI-00146: copy does not expect the file *string.string* to exist**
Cause: We are expecting the destination file not to exist and it does.
Action: Find out why the file does exist.
- LFI-00147: File *string.string* does not exist**
Cause: The file does not exist.
Action: Check to make sure the file exists and retry the operation.
- LFI-00148: *string* can be called only on files opened in byte mode**
Cause: A routine that should be used only for files in byte mode was called for a file that was opened in record mode
Action: In order to use this function, the file should be opened in byte mode.

-
- LFI-00149: Error on destroying hash table in function *string***
Cause: We were expecting the cache path object and it does not.
Action: In order to use this function, the path object should be cache path object.
- LFI-00150: Error on creating hash table in function *string***
Cause: routine failed to create path object hash table
Action: make sure that startsize <= LHTQMAXSLOTS
- LFI-00151: Error on inserting into hash table in function *string***
Cause: routine failed to insert into hash table
Action: make sure there is enough memory for allocation and that the hash table exists.
- LFI-00152: Read operation (byte mode) failed.**
Cause: Byte mode read operation failed. Probably due to incorrect parameters or flags, or trying to read beyond end of file.
Action: Check syntax of the read command and size of file.
- LFI-01000: Unable to write line to file.**
Cause: The file being written to may no longer be open or we may have reached the end of the file.
Action: Examine underlying errors for more information.
- LFI-01001: Unable to write *string* bytes to file.**
Cause: The file being written to may no longer be open or we may have reached the end of the file.
Action: Examine underlying errors for more information.
- LFI-01002: Unable to read line from file.**
Cause: The file being read from may no longer be open.
Action: Examine underlying errors for more information.
- LFI-01003: Unable to read *string* bytes from file.**
Cause: The file being read from may no longer be open.
Action: See the accompanying error messages for more information.
- LFI-01004: Unable to empty buffer.**
Cause: The buffer manager is probably unable to write to the underlying file.
Action: Examine underlying errors for more information.
- LFI-01005: Unable to fill buffer.**
Cause: The buffer manager is probably unable to read from the underlying file.
Action: See the accompanying error messages for more information.
- LFI-01006: File ends in partial character in *string*.**
Cause: A line ends in a partial character.
Action: Examine underlying errors for more information.
- LFI-01007: Line is too long; encountered in function *string*.**
Cause: The length of the line exceeds the maximum length.
Action: Examine underlying errors for more information.

LFI-01500: Error condition on call to OSD function *string*.

Cause: An error condition arises in calling an OSD function. This message occurs if calls to malloc or free functions failed.

Action: Contact Oracle Worldwide Support.

LFI-01501: tmpnam() fails to generate temporary file name.

Cause: Operating system was unable to create temporary file name.

Action: Contact the development organization.

LFI-01502: Base filename does not exist.

Cause: The filename that was parsed had no base file. It was either all path or extension.

Action: Check the filename being passed in to make sure it is correct.

LFI-01503: Max filename size exceeded generating filename.

Cause: While building a filename we exceeded the buffer allocated to hold the new filename.

Action: Contact the development organization.

LFI-01504: fseek() failed(OSD return value = *string*) in *string*.

Cause: The function fseek() returned an error condition.

Action: Contact Oracle Worldwide Support.

LFI-01505: fclose() failed(OSD return value = *string*) in *string*.

Cause: The function fclose() returned an error condition.

Action: Contact Oracle Worldwide Support.

LFI-01506: fflush() failed(OSD return value = *string*).

Cause: The function fflush() returned an error condition.

Action: Contact the development organization.

LFI-01507: fwrite() failed(OSD return value = *string*) in *string*.

Cause: File pointer may be null or may not be opened for write.

Action: Contact the development organization.

LFI-01508: access() failed.

Cause: Call to access() failed.

Action: Contact the development organization.

LFI-01509: fopen() failed(OSD return value = *string*).

Cause: Call to fopen() failed.

Action: Contact Oracle Worldwide Support.

LFI-01510: fread() failed(OSD return value = *string*) in *string*.

Cause: Call to fread() failed.

Action: Contact Oracle Worldwide Support.

LFI-01511: unlink() failed(OSD errno = *string*) in *string*.

Cause: Call to unlink() failed.

Action: Contact the development organization.

LFI-01512: stat() failed

Cause: Call to stat() failed.

Action: Contact Oracle Worldwide Support.

LFI-01514: ftell() failed in *string*

Cause: The ftell() function returned an error.

Action: Contact Oracle Worldwide Support.

LFI-01515: truncate() failed.

Cause: The function truncate() returned an error condition.

Action: Contact the development organization.

LFI-01516: read() failed (OSD return value = *string*) in *string*.

Cause: Call to read() failed.

Action: Contact the development organization.

LFI-01517: open() failed(OSD return value = *string*).

Cause: Call to open() failed.

Action: Contact the development organization.

LFI-01518: write() failed(OSD return value = *string*) in *string*.

Cause: Call to write() failed.

Action: Contact the development organization.

LFI-01519: lseek() failed(OSD return value = *string*) in *string*.

Cause: The lseek() function returned an error.

Action: Contact Oracle Worldwide Support.

LFI-01520: close() failed(OSD return value = *string*) in *string*.

Cause: The function close() returned an error condition.

Action: Contact the development organization.

LFI-01521: fsync() failed(OSD return value = *string*) in *string*.

Cause: The function fsync() returned an error condition.

Action: Contact the development organization.

LFI-01522: opendir() failed.

Cause: The function opendir() returned an error condition.

Action: Contact the development organization.

LFI-01523: rename() failed.

Cause: The function rename() returned an error condition.

Action: Contact the development organization.

LFI-01524: fdopen() failed(OSD return value = *string*).

Cause: Call to fdopen() failed.

Action: Contact the development organization.

LFI-01525: setvbuf() failed.

Cause: A call to lfcstd() had failed.

Action: Contact development service

PLS-00049 to PLS-01918

PLS-00049: bad bind variable '*string*'

Cause: The client (caller) of PL/SQL has parsed a bind variable that it has informed to be 'bad'.

Action: None

PLS-00102: parser stack overflow because nesting is too deep

Cause: The parser, which checks the syntax of PL/SQL statements, uses a data structure called a stack; the number of levels of nesting in the PL/SQL block exceeded the stack capacity.

Action: Reorganize the block structure to avoid nesting at too deep a level. For example, move the lowest-level sub-block to a higher level.

PLS-00103: *string*

Cause: This error message is from the parser. It found a token (language element) that is inappropriate in this context.

Action: Check previous tokens as well as the one given in the error message. The line and column numbers given in the error message refer to the end of the faulty language construct.

PLS-00104: empty argument list in call of procedure '*string*' must be omitted

Cause: In a subprogram call, the name of the subprogram was followed by an empty parameter list. For example, procedure P was called as P(). This is not allowed.

Action: Remove the empty parameter list. In the example, change the procedure call to P.

PLS-00105: at most one forward declaration of type '*string*' is permitted

Cause: More than one forward declaration of a type is redundant.

Action: Remove all but one forward declaration.

PLS-00108: declarative units must be a single variable declaration

Cause: While checking a declarative unit (a top-level declare block without the BEGIN...END), PL/SQL found that there was more than one item declared or that the item was not a variable declaration. A table is a common variable declaration at the unit level. To define a TABLE, compile a DECLARE compilation unit, but only one at a time is allowed.

Action: Declare variables in separate declarative units.

PLS-00109: unknown exception name '*string*' in PRAGMA EXCEPTION_INIT

Cause: No declaration for the exception name referenced in an EXCEPTION_INIT pragma was found within the scope of the pragma.

Action: Make sure the pragma follows the exception declaration and is within the same scope.

PLS-00110: bind variable '*string*' not allowed in this context

Cause: A bind variable, that is, an identifier prefixed with a colon, was found in an inappropriate context.

Action: Remove the colon or replace the bind variable with the appropriate object.

PLS-00111: end-of-file in comment

Cause: A Comment had a comment initiator (/*), but before the

Action: Remove the Comment initiator or add a comment terminator. The line and column numbers accompanying the error message refer to the beginning of the last legal token before the Comment initiator.

PLS-00112: end-of-line in quoted identifier

Cause: A quoted identifier had a beginning quote ("), but before the ending quote (") was found, an end-of-line marker was encountered.

Action: Remove the beginning quote or add the ending quote. The line and column numbers accompanying the error message refer to the beginning of the quoted identifier.

PLS-00113: END identifier '*string*' must match '*string*' at line *string*, column *string*

Cause: Following the keyword END, which terminates some language constructs (such as loops, blocks, functions, and procedures), you can optionally place the name of that construct. For example, at the end of the definition of loop L you might write END L. This error occurs when the optional name does not match the name given to the language construct. It is usually caused by a misspelled identifier or by faulty block structure.

Action: Make sure the spelling of the END identifier matches the name given to the language construct and that the block structure is correct.

PLS-00114: identifier '*string*' too long

Cause: The name of a PL/SQL variable is longer than 30 characters. Legal identifiers (including quoted identifiers) have a maximum length of 30 characters. A string literal might have been mistakenly enclosed in double quotes instead of single quotes, in which case PL/SQL considers it a quoted identifier.

Action: Shorten the identifier.

PLS-00115: this PRAGMA must follow the declaration of '*string*'

Cause: The pragma refers to a PL/SQL object that was not declared or is not within the scope of the reference. Identifiers must be declared before they are used in a pragma; forward references are not allowed.

Action: Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.

PLS-00116: Duplicate where-clause in table expression

Cause: Two or more WHERE clauses were found in a DELETE, SELECT, or UPDATE statement. The WHERE clause specifies a condition under which rows in a table are processed. The condition can contain several logical expressions connected by AND or OR, but a statement can contain only one WHERE clause.

Action: Remove one of the WHERE clauses and, if necessary, connect logical expressions by AND or OR

PLS-00117: Duplicate connect-by clause in table expression

Cause: Two or more CONNECT BY clauses were found in a SELECT statement. The CONNECT BY clause defines a relationship used to return rows in a hierarchical order. The relationship can contain two expressions separated by a relational operator (such as = or !=), but a statement can contain only one CONNECT BY clause.

Action: Remove one of the CONNECT BY clauses and, if necessary, separate expressions by a relational operator.

PLS-00118: Duplicate group-by clause in table expression

Cause: Two or more GROUP BY clauses were found in a SELECT statement. The GROUP BY clause lists column expressions used to form a summary row for each group of selected rows. The list can contain several column expressions separated by commas, but a statement can contain only one GROUP BY clause.

Action: Remove one of the GROUP BY clauses and, if necessary, separate column expressions by commas.

PLS-00119: Duplicate having-clause in table expression

Cause: Two or more HAVING clauses were found in a SELECT statement. The HAVING clause specifies a condition under which groups of rows (formed by the GROUP BY clause) are included in the result. The condition can include several logical expressions connected by AND or OR, but a statement can contain only one HAVING clause.

Action: Remove one of the HAVING clauses and, if necessary, connect logical expressions by AND or OR.

PLS-00120: inappropriate argument in OPEN statement

Cause: The asterisk (*) option was used in the argument list of a SQL group function other than COUNT. For example, the code might look like SELECT SUM(*) INTO emp_count FROM emp; -- should be COUNT(*) Only COUNT permits the use of the asterisk option, which returns the number of rows in a table.

Action: Remove the asterisk option from the argument list and replace it with an expression that refers to one or more database columns.

PLS-00122: string as separator is allowed only with specific built-in functions

Cause: A few built-in functions use keywords (instead of commas) as argument separators: Built-in function Argument separators

----- CHR, TRANSLATE USING CAST AS TRIM TRAILING, LEADING, BOTH, FROM A function different from one of these built-in functions is using a keyword as an argument separator.

Action: Correct the argument list or change the function name.

PLS-00123: program too large (string)

Cause: PL/SQL was designed primarily for robust transaction processing. One consequence of the special-purpose design is that the PL/SQL compiler imposes a limit on block size. The limit depends on the mix of statements in the PL/SQL block. Blocks that exceed the limit cause this error.

Action: The best solution is to modularize the program by defining subprograms, which can be stored in an Oracle database. Another solution is to break the program into two sub-blocks. Have the first block INSERT any data the second

block needs into a temporary database table. Then, have the second block SELECT the data from the table.

PLS-00124: name of exception expected for first arg in exception_init pragma

Cause: The first argument passed to the EXCEPTION_INIT pragma was something other than an exception name. The first argument must be the name of a legally declared exception.

Action: Replace the first argument with the name of a legally declared exception.

PLS-00125: type name expected

Cause: When a constant or variable was declared, its datatype was not specified. For example, the code might look like pi CONSTANT := 3.14159; -- should be CONSTANT REAL := 3.14159 Every constant and variable must have a datatype, which specifies a storage format, constraints, and valid range of values.

Action: Supply the type name

PLS-00126: selector ALL is not allowed

Cause: The ALL shortcut for specifying system privileges or statement options was used in a SQL statement. PL/SQL does not support the ALL shortcut.

Action: Remove the ALL shortcut from the SQL statement.

PLS-00127: Pragma *string* is not a supported pragma

Cause: The named pragma (compiler directive) is not among those supported by PL/SQL. The pragma name might be misspelled, or the pragma syntax might be faulty.

Action: Check the spelling of the pragma name, and make sure the proper syntax was used.

PLS-00128: Illegal number of arguments for pragma *string*

Cause: The number of arguments (actual parameters) passed to the named pragma (compiler directive) is incorrect. A required argument was omitted from the argument list, or the pragma syntax is faulty (for example, a comma might be missing between two parameters).

Action: Supply the missing argument, or correct the faulty syntax.

PLS-00129: Pragma INTERFACE only supports C as its first argument

Cause: The first parameter passed to pragma INTERFACE specified a host language other than C. Currently, C is the only host language supported. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).

Action: Check the spelling of the first parameter, which should be C, and make sure the proper syntax was used.

PLS-00130: Pragma *string* expects 1st argument to be a procedure/function/package/cursor

Cause: The first argument (actual parameter) passed to the named pragma (compiler directive) was not the name of a subprogram, package, or cursor, as required. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).

Action: Check the spelling of the first parameter, and make sure the proper syntax was used.

PLS-00131: Pragma *string* expects 2nd argument to be a procedure/function

Cause: The second argument (actual parameter) passed to the named pragma (compiler directive) was not the name of a procedure or function, as required. The parameter cannot be a non-static method. The parameter might be misspelled or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).

Action: Check the spelling of the second parameter and make sure the proper syntax was used.

PLS-00132: Pragma *string* does not support *string*

Cause: One of the parameters passed to this pragma was not among the list of allowed values. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).

Action: Check the spelling of all the parameters and make sure the proper syntax was used.

PLS-00133: Pragma *string* expects 1st argument to be an identifier or string-literal

Cause: The first argument (actual parameter) passed to the named pragma (compiler directive) was not an identifier or string literal, as required. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).

Action: Check the spelling of the first parameter, and make sure the proper syntax was used.

PLS-00134: Pragma *string* expects 2nd argument to be an identifier or string-literal

Cause: The second argument (actual parameter) passed to the named pragma (compiler directive) was not an identifier or string literal, as required. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).

Action: Check the spelling of the second parameter, and make sure the proper syntax was used.

PLS-00135: Pragma *string* expects 3rd argument to be an identifier, string or numeric literal

Cause: The fourth argument (actual parameter) passed to the named pragma (compiler directive) was not a numeric literal, as required. The parameter might be miscoded, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).

Action: Check the coding of the fourth parameter, and make sure the proper syntax was used.

PLS-00138: Precision for a binary type must be one of 8, 16, or 32

Cause: Invalid precision was specified for a signed or unsigned binary type.

Action: Specify precision as one of 8, 16, or 32.

PLS-00139: duplicate external NAME specification in subprogram expression

Cause: The subprogram was found to have two external NAME specifications.

Action: Remove one of the external NAME specifications.

PLS-00140: duplicate external LIBRARY specification in subprogram expression

Cause: The subprogram was found to have two external LIBRARY specifications.

Action: Remove one of the external LIBRARY specifications.

PLS-00141: duplicate external PARAMETER STYLE specification in subprogram expression

Cause: The subprogram was found to have two external PARAMETER STYLE specifications.

Action: Remove one of the external PARAMETER STYLE specifications.

PLS-00142: duplicate external PARAMETER list specification in subprogram expression

Cause: The subprogram was found to have two external PARAMETER STYLE specifications.

Action: Remove one of the external PARAMETER STYLE specifications.

PLS-00143: duplicate external LANGUAGE specification in subprogram expression

Cause: The subprogram was found to have two external LANGUAGE specifications.

Action: Remove one of the external LANGUAGE specifications.

PLS-00144: duplicate external CALLING STANDARD specification in subprogram expression

Cause: The subprogram was found to have two external CALLING STANDARD specifications.

Action: Remove one of the external CALLING STANDARD specifications.

PLS-00145: duplicate external WITH CONTEXT specification in subprogram expression

Cause: The subprogram was found to have two external WITH CONTEXT specifications.

Action: Remove one of the external WITH CONTEXT specifications.

PLS-00146: duplicate external TRUSTED/UNTRUSTED specification in subprogram expression

Cause: The subprogram was found to have two external TRUSTED/UNTRUSTED specifications.

Action: Remove one of the external external TRUSTED/UNTRUSTED specifications.

PLS-00147: LIBRARY or ASSEMBLY file specification string is empty

Cause: A zero-length string was found for the LIBRARY or ASSEMBLY file specification.

Action: Specify a non-zero length string for the LIBRARY or ASSEMBLY file specification.

PLS-00148: Only 1 pragma of this type is allowed per subprogram

Cause: The subprogram was found to have two PRAGMA RESTRICT_REFERENCES.

Action: Remove one of the PRAGMA RESTRICT_REFERENCES.

PLS-00150: found: *string* but expected : INTEGER

Cause: This error happens in the creation of a pl/sql external type: [SIGNED | UNSIGNED] BINARY INTEGER (<precision>). It may be referenced only in a create type statement. Such types are non-queryable. Something other than 'INTEGER' was supplied.

Action: None

PLS-00151: Expression or Variable is an illegal type to PLS/QL: *string*

Cause: A type was used which does not belong PL/SQL. This type can only be referenced in CREATE TYPE statements, and is a non-queryable data type.

Action: None

PLS-00152: POINTER type may only reference an object type.

Cause: A POINTER type which does not belong to PL/SQL can only refer to an object type. This type can only be referenced in CREATE TYPE statements, and is a non-queryable data type.

Action: None

PLS-00153: A *string* type may only be used as an object type attribute.

Cause: A POINTER or [SIGNED/UNSIGNED] BINARY INTEGER can only be used as attributes of object types. These types can only be referenced in CREATE TYPE statements, and are non-queryable data types. One of these external PL/SQL types outside of an object type.

Action: None

PLS-00154: An object type may have only 1 MAP or 1 ORDER method.

Cause: More than one map or order function was declared. An object type can have only one map function or one order function, but not both.

Action: None

PLS-00155: Only a function may be a MAP, ORDER or CONSTRUCTOR method.

Cause: A procedure was declared as a MAP, ORDER or CONSTRUCTOR method. Only functions can be MAP, ORDER or CONSTRUCTOR methods.

Action: None

PLS-00156: Null constraints not supported for object attributes.

Cause: A null constraint was specified for an attribute in an object. This is not supported.

Action: Remove the constraint.

PLS-00157: AUTHID only allowed on schema-level programs

Cause: An AUTHID clause was specified for a subprogram inside a package or type. These clauses are only supported for top-level stored procedures, packages, and types.

Action: Remove the clause

PLS-00160: AUTHID must specify CURRENT_USER or DEFINER

Cause: The only two allowed options for AUTHID are CURRENT_USER and DEFINER.

Action: Fix the AUTHID clause to specify CURRENT_USER or DEFINER

PLS-00161: Pragma *string* expects 3rd argument to be an identifier or a string literal

Cause: The third argument (actual parameter) passed to the named pragma (compiler directive) was not an identifier or a string literal when there is a fourth argument to the pragma. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).

Action: Check the spelling of the third parameter, and make sure the proper syntax was used.

PLS-00162: Pragma *string* expects 4th argument to be a positive integer literal

Cause: The fourth argument (actual parameter) passed to the named pragma (compiler directive) was not a numeric literal, as required. The parameter might be misspelled, or the pragma syntax might be faulty (for example, a comma might be missing between two parameters).

Action: Check the spelling of the fourth parameter, and make sure the proper syntax was used.

PLS-00164: cursor subqueries are not supported in this release

Cause: This feature is not yet implemented.

Action: None

PLS-00165: call statement is not supported in PL/SQL

Cause: A CALL statement was found in PL/SQL source.

Action: Use an ordinary PL/SQL function or procedure call.

PLS-00166: bad format for date, time, timestamp or interval literal

Cause: The contents of the date, time, timestamp or interval literal did not match the expected format.

Action: Correct the format for the date, datetime, or interval literal.

PLS-00167: keyword BULK is used in a wrong context

Cause: keyword BULK is used illegally. For example, BULK is used without INTO clause

Action: remove the keyword BULK.

PLS-00168: duplicate modifier specification '*string*'

Cause: A method or object type modifier was specified more than once.

Action: Remove all but one occurrence of the duplicate modifier.

PLS-00169: modifier '*string*' conflicts with prior '*string*' specification

Cause: The method or object type modifier specified conflicts with an earlier modifier. For example, a FINAL modifier cannot be combined with a NOT FINAL modifier.

Action: Remove one of the conflicting modifiers.

PLS-00170: the SQL statement in an OPEN statement or FOR loop must be a SELECT

Cause: An OPEN cursor statement or cursor FOR loop can only invoke a SELECT statement, not an UPDATE, INSERT or DELETE.

Action: Use only SELECT statements in OPEN or cursor FOR loops

PLS-00171: duplicate dedicated AGENT specification in subprogram expression

Cause: The subprogram was found to have two dedicated AGENT specifications.

Action: Remove one of the dedicated AGENT specifications.

PLS-00172: string literal too long

Cause: The string literal was longer than 32767 bytes.

Action: Use a string literal of at most 32767 bytes.

PLS-00173: SPACE, TAB or RETURN are disallowed as alternative quote delimiters

Cause: SPACE, TAB or RETURN was used as alternative quote delimiter.

Action: Use a character other than SPACE, TAB or RETURN as the alternative quote delimiter.

PLS-00174: a static boolean expression must be used

Cause: The expression contained a syntax or semantic error, or it did not have a boolean type or its evaluation raised an exception.

Action: Write correct static boolean expression.

PLS-00176: unexpected preprocessor token '\$string'

Cause: A preprocessor token was used inappropriately.

Action: Remove the preprocessor token that is inappropriately used.

PLS-00177: '\$string' preprocessor directive does not end properly

Cause: A preprocessor directive was not ended properly.

Action: Use \$end to end the preprocessor directive properly.

PLS-00178: a static character expression must be used

Cause: The expression contained a syntax or semantic error, or it did not have a character type or its evaluation raised an exception.

Action: Write correct static character expression.

PLS-00179: \$ERROR: string

Cause: \$ERROR directive was used. This is an expected error message.

Action: NA

PLS-00180: preprocessor directives are not supported in this context

Cause: A preprocessor directive was used in a compilation unit for which conditional compilation is not supported.

Action: Do not use any preprocessor directives in this compilation unit.

PLS-00181: unsupported preprocessor directive 'string'

Cause: An unsupported preprocessor directive was used.

Action: Use a supported preprocessor directive.

PLS-00182: Identifier cannot be an empty string

Cause: Identifier was declared using an empty string,

Action: rename the identifier to a non empty string.

PLS-00201: identifier 'string' must be declared

Cause: You tried to reference either an undeclared variable, exception, procedure, or other item, or an item to which no privilege was granted or an item to which privilege was granted only through a role.

Action: 1) Check your spelling and declaration of the referenced name. 2) Verify that the declaration for the referenced item is placed correctly in the block structure. 3) If the referenced item is indeed declared but you don't have privileges to refer to that item, for security reasons, you will be notified only that the item is not declared. 4) If the referenced item is indeed declared and you believe that you have privileges to refer to that item, check the privileges; if the privileges were granted only via a role, then this is expected and documented behavior. Stored objects (packages, procedures, functions, triggers, views) run in the security

domain of the object owner with no roles enabled except PUBLIC. Again, you will be notified only that the item was not declared.

PLS-00202: type '*string*' must be declared

Cause: An attempt was made to reference an undefined type. Either the type specifier was not declared or it is not within the scope of the reference.

Action: Check the spelling and declaration of the type specifier. Also confirm that the declaration is placed correctly in the block structure.

PLS-00203: function DECODE must be called with at least 3 non-boolean arguments

Cause: Less than three arguments were passed to the built-in function DECODE. Though DECODE takes a variable number of (non-Boolean) arguments, at least three arguments must be passed.

Action: Call DECODE with three or more arguments

PLS-00204: function or pseudo-column '*string*' may be used inside a SQL statement only

Cause: A pseudocolumn or proscribed function was used in a procedural statement. The SQL pseudocolumns (LEVEL, ROWID, ROWNUM) can be used only in SQL statements. Likewise, certain functions such as DECODE, DUMP, and VSIZE and the SQL group functions (AVG, MIN, MAX, COUNT, SUM, STDDEV, VARIANCE) can be used only in SQL statements.

Action: Remove the pseudocolumn reference or function call from the procedural statement. Or, replace the procedural statement with a SELECT INTO statement; for example, replace `bonus := DECODE(rating, 1, 5000, 2, 2500, ...)`; with the following statement: `SELECT DECODE(rating, 1, 5000, 2, 2500, ...) INTO bonus FROM dual;`

PLS-00205: Aggregate not allowed here

Cause: An aggregate, that is, a parenthesized list of values such as (7788, 'SCOTT', 20), was found in an inappropriate context.

Action: Remove or relocate the aggregate.

PLS-00206: %TYPE must be applied to a variable, column, field or attribute, not to "*string*"

Cause: The program object declared using the %TYPE datatype attribute is not of the appropriate class. It must be a variable, column, record component, subprogram formal parameter, or other object to which values can be assigned.

Action: Declare an object of the appropriate class or define the datatype in another way (for example, use %ROWTYPE).

PLS-00207: identifier '*string*', applied to implicit cursor SQL, is not a legal cursor attribute

Cause: An identifier that is not a cursor attribute was applied to the identifier SQL. For example, this error occurs if the cursor attribute is misspelled.

Action: Check the spelling of the cursor attribute name. Make sure the attribute is one of these: %NOTFOUND, %FOUND, %ROWCOUNT, %ISOPEN.

PLS-00208: identifier '*string*' is not a legal cursor attribute

Cause: An identifier not declared as a cursor attribute was applied to an identifier declared as a cursor. For example, this error occurs if the cursor attribute is misspelled.

Action: Check the spelling of the cursor attribute name. Make sure the attribute is one of these: %NOTFOUND, %FOUND, %ROWCOUNT, %ISOPEN.

PLS-00209: table '*string*' is not in FROM clause

Cause: In a query, a table referenced by the select list is not named in the FROM clause.

Action: Check the spelling of the table names, make sure each column in the select list refers to a table in the FROM clause, then re-execute the query.

PLS-00210: an OTHERS clause is required in this CASE statement

Cause: Unless the clauses of a CASE statement mention all values of the type of the selecting expression, an OTHERS clause must be provided as the last clause of the CASE statement. It is impossible to cover all values of type INTEGER (or NUMBER), so an OTHERS clause is always required when the expression following the keyword CASE is of type INTEGER (or NUMBER).

Action: None

PLS-00211: CASE labels or ranges must not be duplicated in different WHEN clauses

Cause: In this CASE statement, a value appears in more than one WHEN clause. A value may appear in at most one WHEN clause of a CASE statement.

Action: None

PLS-00212: could not obtain enough memory to compile CASE statement

Cause: The CASE statement is too big. The compiler did not have enough storage to process it.

Action: None

PLS-00213: package STANDARD not accessible

Cause: The PL/SQL compiler could not find package STANDARD in the current Oracle database. To compile a program, PL/SQL needs package STANDARD.

Action: Make sure that package STANDARD is available in the current Oracle database, then retry the operation.

PLS-00214: BEGIN...END block nesting is too deep

Cause: The number of levels of nesting in the PL/SQL block is too large. Blocks can be nested up to 255 levels deep, depending on the availability of system resources such as memory.

Action: Reorganize the block structure to avoid nesting at too deep a level. For example, move the lowest-level sub-block to a higher level.

PLS-00215: String length constraints must be in range (1 .. 32767)

Cause: When a character variable was declared, a length outside the legal range was specified. For example, the following declarations are illegal: flag CHAR(0); -- illegal; zero length name VARCHAR2(-10); -- illegal; negative length

Action: Change the length constraint, making sure that it lies in the range 1 .. 32767.

PLS-00216: NUMBER precision constraint must be in range (1 .. 38)

Cause: A NUMBER variable was declared with a precision that is outside the legal range. Declarations such as N NUMBER(800) or N NUMBER(123,10) are not supported.

Action: Change the illegal NUMBER precision constraint, making sure that it lies in the range 1 .. 38.

PLS-00217: NUMBER scale constraint must be in range (-84 .. 127)

Cause: A NUMBER variable was declared with a scale that is outside the legal range. Declarations such as N NUMBER(10,345) or N NUMBER(10,-100) are not supported.

Action: Change the illegal NUMBER scale constraint, making sure that it lies in the range -84 .. 127.

PLS-00218: a variable declared NOT NULL must have an initialization assignment

Cause: In general, variables that have no initialization clause in their declaration are automatically initialized to NULL. This is illogical for NOT NULL variables; therefore, an initialization clause is required.

Action: Add an initialization clause to the variable declaration. If the initialization is too complicated for the syntax, one can add a function call (in a later release).

PLS-00219: label '*string*' reference is out of scope

Cause: A block or loop label was used to qualify a variable (as in outer_block.date) that was not declared or is not within the scope of the label. The variable name might be misspelled, its declaration might be faulty, or the declaration might be placed incorrectly in the block structure.

Action: Check the spelling and declaration of the variable name. Also confirm that the declaration is placed correctly in the block structure.

PLS-00220: simple name required in this context

Cause: A qualified name such as A.B or A.B.C is not permitted here.

Action: Use a simple name such as A instead.

PLS-00221: '*string*' is not a procedure or is undefined

Cause: An identifier being referenced as a procedure was not declared or actually represents another object (for example, it might have been declared as a function).

Action: Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.

PLS-00222: no function with name '*string*' exists in this scope

Cause: An identifier being referenced as a function was not declared or actually represents another object (for example, it might have been declared as a procedure).

Action: Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.

PLS-00223: parameterless procedure '*string*' used as function

Cause: An identifier being referenced as a parameterless function actually represents a procedure.

Action: Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure. If necessary, change the declaration of the identifier or change the reference so that it does not require a return value.

PLS-00224: object '*string*' must be of type function or array to be used this way

Cause: An identifier being referenced as a function or an array actually represents an object (a number or date, for example) that cannot be referenced in this way.

Action: Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.

PLS-00225: subprogram or cursor '*string*' reference is out of scope

Cause: The prefix in a qualified name was a subprogram or cursor which was not in an enclosing scope; i.e., a subprogram or cursor name is being used as a scope qualifier for a reference to an entity (within that subprogram or cursor) that is not in scope. Example: declare x number; type t1 is record (a number); function f return t1 is a number; begin x := f.a; -- legal use of function "f" as a scope qualifier; -- resolves to local variable "a" in function "f". x := f().a; -- legal reference to component "a" of returned record end; begin x := f.a; -- illegal use of function "f" as a scope qualifier x := f().a; -- legal reference to component "a" of returned record end;

Action: a) if the intention was to refer to a local variable of a non-enclosing function, this is not allowed; remove the reference b) if this is a parameterless function, and the the intention was to access a field of the result of a call to this function, then use empty parentheses in the call.

PLS-00226: package '*string*' used as variable reference

Cause: A package was referenced in an expression as if it were a variable or function. Either the name of the variable or function is misspelled or the reference is not fully qualified. For example, to call the function my_function, which is stored in package my_package, dot notation must be used, as follows: ... my_package.my_function ...

Action: Correct the spelling of the variable or function name or use dot notation to reference the packaged variable or function.

PLS-00227: subprogram 'in' formal *string* is not yet denotable

Cause: When the formal parameters of a subprogram were declared, one parameter was used to initialize another, as in PROCEDURE my_proc (j NUMBER, k NUMBER := j) IS ... The first parameter has no value until run time, so it cannot be used to initialize another parameter.

Action: Remove the illegal formal parameter reference.

PLS-00228: Illegal declaration of variable of type LONG

Cause: The identifier is a formal parameter which is being used in the context of a default expression value for a formal parameter in the same formal parameter list. E.g.: procedure p(j number, k number := j).

Action: Remove the offending variable definition

PLS-00229: Attribute expression within SQL expression

Cause: An attribute expression, such as SQL%NOTFOUND, was used in a SQL statement, but attribute expressions are allowed only in procedural statements.

Action: To workaround this limitation, assign the value of the attribute expression to a variable, then use the variable in the SQL statement. For example, replace the statement INSERT INTO audits VALUES (c1%ROWCOUNT, ...); with the following statements: row_count := c1%ROWCOUNT; INSERT INTO audits VALUES (row_count, ...);

PLS-00230: OUT and IN OUT formal parameters may not have default expressions

Cause: When the formal parameters of a procedure were declared, an OUT or IN OUT parameter was initialized to a default value, as in PROCEDURE calc_bonus (bonus OUT REAL := 0, ...) IS ... However, only IN parameters can be initialized to default values.

Action: Remove the illegal default expression.

PLS-00231: function '*string*' may not be used in SQL

Cause: A proscribed function was used in a SQL statement. Certain functions such as SQLCODE and SQLERRM can be used only in procedural statements.

Action: Remove the function call from the SQL statement. Or, replace the function call with a local variable. For example, the following statement is illegal: INSERT INTO errors VALUES (SQLCODE, SQLERRM); However, you can assign the values of SQLCODE and SQLERRM to local variables, then use the variables in the SQL statement, as follows: err_num := SQLCODE; err_msg := SQLERRM; INSERT INTO errors VALUES (err_num, err_msg);

PLS-00232: nested packages not permitted

Cause: A package was declared inside another package, but package declarations are allowed only at the top level. In other words, packages cannot be nested.

Action: Move the package declaration outside the enclosing package.

PLS-00233: function name used as an exception name in when clause

Cause: The WHEN clause in an exception handler contains a function call instead of an exception name. A valid exception handler consists of a WHEN clause, which must specify an exception, followed by a sequence of statements to be executed when that exception is raised.

Action: Check the spelling of the identifier in the WHEN clause, then replace the function call with an exception name.

PLS-00234: PARAMETER STYLE SQL may not be specified with a PARAMATERS list

Cause: A subprogram cannot specify both PARAMETER STYLE SQL and an explicit PARAMETERS list. Use PARAMETER STYLE GENERAL to supply default PARAMETERS list types.

Action: Change the subprogram specification.

PLS-00235: the external type is not appropriate for the parameter

Cause: An unsuccessful attempt was made to convert a parameter to the specified external parameter type.

Action: Specify a different external type or parameter type.

PLS-00236: Invalid external type specification for *string*.

Cause: The external type specified is not valid for one of the following: INDICATOR, LENGTH, MAXLEN, TDO, DURATION, CHARSETID, or CHARSETFORM.

Action: Check the manual and specify an appropriate external type.

PLS-00237: invalid BY VALUE indicator or length specification

Cause: BY VALUE was specified with an indicator or length parameter that is being passed in OUT or IN OUT mode. Only IN mode parameters may be passed by value.

Action: Remove the BY VALUE specification or change it to IN mode.

PLS-00238: external parameter name *string* not found in formal parameter list

Cause: An external parameter name was specified that does not match one in the formal parameter list.

Action: Correct the external parameter name.

PLS-00239: invalid external type specification for SQLCODE

Cause: An inappropriate external parameter type was specified for the SQLCODE parameter.

Action: Correct the SQLCODE parameter specification.

PLS-00240: Invalid type specification for RETURN indicator, length, tdo, duration

Cause: An inappropriate external parameter type was specified for the RETURN indicator, LENGTH, TDO, or DURATION.

Action: Correct the RETURN parameter specification.

PLS-00241: invalid external type specification for SQLSTATE

Cause: An inappropriate external parameter type was specified for the SQLSTATE parameter.

Action: Correct the SQLSTATE parameter specification.

PLS-00242: invalid external type specification for CONTEXT

Cause: An inappropriate external parameter type was specified for the CONTEXT parameter.

Action: Correct the CONTEXT parameter specification.

PLS-00243: invalid external type specification for SQLNAME

Cause: An inappropriate external parameter type was specified for the SQLNAME parameter.

Action: Correct the SQLNAME parameter specification.

PLS-00244: Multiple declarations in foreign function formal parameter list

Cause: There are multiple declarations of at least one the following FORMAL, INDICATOR, LENGTH, MAXLENGTH, or CONTEXT. PL/SQL allows only one declaration of the above for each formal parameter in the PARAMETERS clause.

Action: Correct the PARAMETERS clause.

PLS-00245: Formals used in the 'parameters' clause must appear exactly once

Cause: There are multiple declarations of the formal parameter in the PARAMETERS clause. PL/SQL allows only one declaration of the formal parameter in the PARAMETERS clause.

Action: Correct the PARAMETERS clause.

PLS-00246: PARAMETER STYLE is unsupported

Cause: A PARAMETER STYLE clause was placed in the external subprogram body.

Action: Remove the PARAMETER STYLE clause.

PLS-00247: LIBRARY or ASSEMBLY name must be specified

Cause: The LIBRARY or ASSEMBLY name is missing from the external subprogram body.

Action: The LIBRARY or ASSEMBLY name was not specified in the external subprogram body.

PLS-00248: Invalid Library Syntax

Cause: The LIBRARY syntax was entered incorrectly.

Action: Correct the LIBRARY syntax and recompile.

PLS-00249: Invalid WITH CONTEXT Syntax

Cause: CONTEXT was used in a WITH CONTEXT or a PARAMETERS clause. This is invalid.

Action: Check if WITH CONTEXT is used without specifying CONTEXT in the PARAMETERS clause or vice versa. The PARAMETERS clause must be complete. Thus if WITH CONTEXT is specified, then CONTEXT must be referenced in the PARAMETERS clause (if there is one).

PLS-00250: Incorrect Usage of *string* in parameters clause.

Cause: The usage of Keywords such as MAXLEN, LENGTH, CHARSETID, CHARSETFORM RETURN in the parameters clause was incorrect

Action: This error occurs if keywords like MAXLEN, LENGTH, TDO, DURATION, CHARSETID, or CHARSETFORM cannot be used with PL/SQL formal parameters or the mode of the formal parameter. For example, MAXLEN can only be declared for a CHAR or VARCHAR2 PL/SQL variable and its use is allowed only for OUT or INOUT PL/SQL variables. Also, RETURN was specified in the parameters clause for a PL/SQL PROCEDURE. E.g. CREATE PROCEDURE proc IS EXTERNAL NAME ... LIBRARY ... PARAMETERS(RETURN INDICATOR SHORT, RETURN);

PLS-00251: RETURN, for actual function return, must be last in the parameters clause

Cause: RETURN specification for the actual function return, used within the parameters clause must hold the very last position. Example : The following will give this error since the RETURN specification for the actual function return in the parameters clause is not the last. FUNCTION myexternalfunc (var1 BINARY_INTEGER, var2 BINARY_INTEGER) RETURN BINARY_INTEGER IS EXTERNAL NAME "myexternalfunc" LIBRARY somelib PARAMETERS (var1 LONG, var2 SHORT, RETURN INT, RETURN INDICATOR SHORT); The correct syntax is the following. Note that RETURN for actual function return is the last specification in the parameters clause. FUNCTION myexternalfunc (var1 BINARY_INTEGER, var2 BINARY_INTEGER) RETURN BINARY_INTEGER IS EXTERNAL NAME "myexternalfunc" LIBRARY somelib PARAMETERS (var1 LONG, var2 SHORT, RETURN INDICATOR SHORT, RETURN INT);

Action: Correct the syntax of the RETURN specification in the parameters clause

PLS-00252: reference to the wrong copy of package STANDARD

Cause: A reference is made to the fixed package version of STANDARD when the database is open, or to the on-disk version when the database is closed. Explicit use of a SYS.X\$ package name can lead to this. One might also see this from a compilation that begins while the db is closed but has the bad luck to have another session open the db before compilation is complete. Another possible cause is having 'set serveroutput on' through svrmgrl when doing an 'alter database close'.

Action: Make use of on-disk versions of packages when the database is open and fixed (preloaded) versions when the database is closed. Do not attempt to use the wrong set. It should be quite hard to reference the wrong set, except by using SYS.X\$ package names explicitly. Also, be sure to 'set serveroutput off' before doing an 'alter database close'.

PLS-00253: Formal parameter *string* missing in the parameters clause

Cause: The parameter clause does not have a matching parameter for a parameter specified in the formal parameter list.

Action: Provide a matching parameter in parameters clause for every formal parameter.

PLS-00254: OUT and IN/OUT modes cannot be used in this context

Cause: actual parameter mode (OUT, or IN/OUT) is not used properly in USING clause. For USING clause in an OPEN statement, only IN mode is allowed.

Action: change the parameter mode in the USING clause to an appropriate mode.

PLS-00255: CALL Specification parameters cannot have default values

Cause: CALL Specification formal parameters default values are disallowed.

Action: Remove the default values in the formal parameter list (spec or body) and compile again.

PLS-00256: *string* is not a valid external library or assembly

Cause: The supplied external library or assembly name in the external clause is not a valid alias library or assembly.

Action: Provide the name of a valid alias library or assembly which is previously declared.

PLS-00257: illegal use of EXTERNAL clause in a TYPE or PACKAGE specification

Cause: An EXTERNAL Clause was detected in a TYPE Specification or a PACKAGE specification.

Action: Remove the EXTERNAL Clause and use the new CALL Specification syntax.

PLS-00258: constrained datatypes disallowed in CALL Specifications

Cause: A call specification for C or Java cannot have constraints on the PL/SQL formal parameter types. PL/SQL types which have constraints are NATURAL, NATURALN, POSITIVE, POSITIVEN, SIGNTYPE, INTEGER, INT, SMALLINT, DECIMAL, NUMERIC, DEC This includes NOT NULL constraints from POSITIVEN, NATURALN

Action: Use the unconstrained type for that PL/SQL formal declaration i.e NUMBER, BINARY_INTEGER or PLS_INTEGER

PLS-00259: rights model (AUTHID) must be specified

Cause: It is mandatory to specify the rights model if a PL/SQL PROCEDURE, FUNCTION, PACKAGE OR TYPE HAS CALL-Specifications

Action: Add the AUTHID clause indicating the rights model.

PLS-00260: Datetime/Interval constraints must be in range (0 .. 9)

Cause: A Datetime/Interval variable or attribute was declared with a constraint outside the legal range.

Action: Change the illegal constraint.

PLS-00261: Java CALL Specification not yet allowed as a method in an object type

Cause: A call specification declaring that an implementation is in Java has been found for a method of an object or opaque type. This usage is not yet supported.

Action: Implement the method using a language other than Java. A PL/SQL method implementation is permitted to call to Java through a call specification provided as a schema-level procedure or in a package; such a call specification can only target a static Java method, however. ***** errors until 300 are reserved for External Procedures ***** PH2 errors *****

PLS-00301: Invalid GOTO to non-label '*string*'

Cause: A GOTO was attempted to something which is not a label (for example, a variable).

Action: Specify a valid label name.

PLS-00302: component '*string*' must be declared

Cause: In a reference to a component (for example, in the name "A.B", "B" is a component of "A"), the component has not been declared. The component might be misspelled, its declaration might be faulty, or the declaration might be placed incorrectly in the block structure.

Action: Check the spelling and declaration of the component. Also confirm that the declaration is placed correctly in the block structure.

PLS-00303: qualifier '*string*' must be declared

Cause: In a name such as "A.B", "A" is the qualifier, and "B" is a component of the qualifier. This error occurs when no declaration for the qualifier is found. The qualifier might be misspelled, its declaration might be faulty, or the declaration might be placed incorrectly in the block structure.

Action: Check the spelling and declaration of the qualifier. Also confirm that the declaration is placed correctly in the block structure.

PLS-00304: cannot compile body of '*string*' without its specification

Cause: The compiled package specification required to compile a package body could not be found. Some possible causes follow: --the package name is misspelled --the package specification was never compiled --the compiled package specification is not accessible The package specification must be compiled before compiling the package body, and the compiler must have access to the compiled specification.

Action: Check the spelling of the package name. Compile the package specification before compiling the package body. Also, make sure the compiler has access to the compiled specification.

PLS-00305: previous use of '*string*' (at line *string*) conflicts with this use

Cause: While looking for prior declarations of a cursor, procedure, function, or package, the compiler found another object with the same name in the same scope. Or, the headers of subprogram in a package specification and body do not match word for word.

Action: Check the spelling of the cursor, procedure, function, or package name. Also check the names of all constants, variables, parameters, and exceptions declared in the same scope. Then, remove or rename the object with the duplicate name. Or, change the headers of the packaged subprogram so that they match word for word.

PLS-00306: wrong number or types of arguments in call to '*string*'

Cause: This error occurs when the named subprogram call cannot be matched to any declaration for that subprogram name. The subprogram name might be misspelled, a parameter might have the wrong datatype, the declaration might be faulty, or the declaration might be placed incorrectly in the block structure. For example, this error occurs if the built-in square root function SQRT is called with a misspelled name or with a parameter of the wrong datatype.

Action: Check the spelling and declaration of the subprogram name. Also confirm that its call is correct, its parameters are of the right datatype, and, if it is not a built-in function, that its declaration is placed correctly in the block structure.

PLS-00307: too many declarations of 'string' match this call

Cause: The declaration of a subprogram or cursor name is ambiguous because there was no exact match between the declaration and the call and more than one declaration matched the call when implicit conversions of the parameter datatypes were used. The subprogram or cursor name might be misspelled, its declaration might be faulty, or the declaration might be placed incorrectly in the block structure.

Action: Check the spelling and declaration of the subprogram or cursor name. Also confirm that its call is correct, its parameters are of the right datatype, and, if it is not a built-in function, that its declaration is placed correctly in the block structure.

PLS-00308: this construct is not allowed as the origin of an assignment

Cause: The construct or expression does not designate a value that can be assigned to a variable. For example, the datatype name NUMBER cannot appear on the right hand side of an assignment statement as in X := NUMBER.

Action: Correct the illegal assignment statement.

PLS-00309: with %LAST attribute, 'string' must be a variable of an enumerated type

Cause: The "%LAST" attribute must be applied to an identifier that has been declared as a variable of an enumerated type (or subtype of an enumerated type). This error occurs when "%LAST" follows some identifier that has not been so declared.

Action: None

PLS-00310: with %ROWTYPE attribute, 'string' must name a table, cursor or cursor-variable

Cause: The %ROWTYPE attribute must be applied to an identifier declared as a cursor, cursor variable, or database table. This error occurs when %ROWTYPE follows some identifier that has not been so declared.

Action: Change the declaration or do not apply the %ROWTYPE attribute to the identifier.

PLS-00311: the declaration of "string" is incomplete or malformed

Cause: This occurrence of the identifier cannot be compiled because its type has not been properly defined.

Action: Correct the faulty datatype declaration.

PLS-00312: a positional parameter association may not follow a named association

Cause: When a list of parameters is passed to a subprogram or cursor, if both positional and named associations are used, all positional associations must be placed in their declared order and before all named associations, which can be in any order.

Action: Reorder the parameter list to meet the requirements or use named association only.

PLS-00313: 'string' not declared in this scope

Cause: There is no declaration for the given identifier within the scope of reference. The identifier might be misspelled, its declaration might be faulty, or the declaration might be placed incorrectly in the block structure.

Action: Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.

PLS-00314: TABLE declarations are not allowed as PL/SQL local variables

Cause: In a precompiled program, the DECLARE TABLE statement was mistakenly used inside an embedded PL/SQL block. If an embedded PL/SQL block refers to a database table that does not yet exist, use the DECLARE TABLE statement to tell the precompiler what the table will look like. However, DECLARE TABLE statements are allowed only in the host program.

Action: Move the DECLARE TABLE statement outside the embedded PL/SQL block. If you want a variable that can store an entire row of data selected from a database table or fetched from a cursor or cursor variable, use the %ROWTYPE attribute.

PLS-00315: Implementation restriction: unsupported table index type

Cause: In the INDEX BY clause of a PL/SQL table declaration, a datatype other than BINARY_INTEGER, PLS_INTEGER, or VARCHAR2 was specified. PL/SQL tables can have one column and a primary key. The column can have any scalar type, but the primary key must be either a binary integer type or VARCHAR2.

Action: Use one of the supported key types in the INDEX BY clause.

PLS-00316: PL/SQL TABLEs must use a single index

Cause: In the INDEX BY clause of a PL/SQL table declaration, a composite primary key was specified. PL/SQL tables must have a simple, unnamed primary key of a binary integer or VARCHAR2 type.

Action: Use one of the supported key types in the INDEX BY clause.

PLS-00317: incomplete type "string" was not completed in its declarative region

Cause: An incomplete type declaration was not completed in the declarative region where it was declared.

Action: Complete the type appropriately, then retry the operation.

PLS-00318: type "string" is malformed because it is a non-REF mutually recursive type

Cause: A type-declaration such as: -- a non-REF recursive type, for example: type t is record (a t); or -- non-REF mutually dependent types, for example: type t1; type t2 is record (a t1); type t1 is record (a t2); was performed. In these examples, the type is malformed because it participates in a mutually recursive non-REF relationship with itself and possibly other types.

Action: Use another type to remove the recursion.

PLS-00319: subquery in an IN or NOT IN clause must contain exactly one column

Cause: An invalid expression such as X IN (SELECT A,B ...) was used. When a [NOT]IN clause is used with a subquery, it does not test for set membership. The number of expressions in the [NOT]IN clause and the subquery select list must match. So, in the example above, the subquery must specify at most one column.

Action: Change the subquery to select only one column.

PLS-00320: the declaration of the type of this expression is incomplete or malformed

Cause: In a declaration, the name of a variable or cursor is misspelled or the declaration makes a forward reference. Forward references are not allowed in PL/SQL. A variable or cursor must be declared before it is referenced in other statements, including other declarative statements. For example, the following declaration of dept_rec raises this exception because it refers to a cursor not yet

declared: DECLARE dept_rec dept_cur%ROWTYPE; CURSOR dept_cur IS
SELECT

Action: Check the spelling of all identifiers in the declaration. If necessary, move the declaration so that it makes no forward references.

PLS-00321: expression '*string*' is inappropriate as the left hand side of an assignment statement

Cause: The expression does not designate a variable that can have a value assigned to it. For example, the function SYSDATE cannot appear on the left hand side of an assignment statement such as SYSDATE := '01-JAN-1990';

Action: Correct the illegal assignment statement.

PLS-00322: declaration of a constant '*string*' must contain an initialization assignment

Cause: A constant declaration lacks the assignment of an initial value. For example, in the following declaration " := 3.14159" is the initialization clause: "pi constant number := 3.14159;"

Action: Correct the constant declaration by supplying the missing initialization assignment.

PLS-00323: subprogram or cursor '*string*' is declared in a package specification and must be defined in the package body

Cause: A subprogram specification was placed in a package specification, but the corresponding subprogram body was not placed in the package body. The package body implements the package specification. So, the package body must contain the definition of every subprogram declared in the package specification.

Action: Check the spelling of the subprogram name. If necessary, add the missing subprogram body to the package body.

PLS-00324: cursor attribute may not be applied to non-cursor '*string*'

Cause: This error occurs when a cursor-attribute ("%FOUND", "%NOTFOUND", "%ROWS", "%IS_OPEN", etc.) appears following an identifier that is not declared as a cursor or cursor variable. It occurs, for example, if the variable name my_cur in my_cur%FOUND was not properly declared as a cursor or if the variable declaration was placed incorrectly in the block structure.

Action: Check the spelling and declaration of the identifier. Also confirm that the declaration is placed correctly in the block structure.

PLS-00325: non-integral numeric literal *string* is inappropriate in this context

Cause: A non-integral numeric literal was used in a context that requires an integer (a number with no digits to the right of its decimal point).

Action: Replace the inappropriate literal with an integer literal.

PLS-00326: IN clause must contain same number of expressions as subquery

Cause: The number of expressions in an IN clause did not equal the number of expressions in a corresponding subquery select list. For example, the following statement is invalid because the IN clause contains two expressions, but the subquery select list contains just one: ... WHERE (ename, sal) IN (SELECT sal FROM emp);

Action: Check the number of expressions in each set, then revise the statement to make the numbers equal.

PLS-00327: "*string*" is not in SQL scope here

Cause: In a SQL statement, a reference was made to an out-of-scope database object. The referenced object might be misspelled, or the reference might be mixed, as in the following example: `CURSOR c1 IS SELECT dept.dname FROM emp;`

Action: Check the spelling of all database objects in the SQL statement, and make sure all references are to objects within the current scope.

PLS-00328: A subprogram body must be defined for the forward declaration of *string*.

Cause: A subprogram specification was declared, but the corresponding subprogram body was not defined. Write the subprogram specification and body as a unit. An alternative solution is to separate the specification from its body, which is necessary when you want to define mutually recursive subprograms or you want to group subprograms in a package.

Action: Check the spelling of the subprogram name. If necessary, supply the missing subprogram body.

PLS-00329: schema-level type has illegal reference to *string*

Cause: An attempt was made to make a reference from a schema-level type to something other than a schema-level type.

Action: Replace the illegal reference and retry the operation.

PLS-00330: invalid use of type name or subtype name

Cause: A datatype or subtype specifier was mistakenly used in place of a constant, variable, or expression. For example, the code might look like `IF emp_count > number THEN ... -- illegal; NUMBER is a datatype specifier`

Action: Replace the datatype or subtype specifier with a valid constant, variable, or expression.

PLS-00331: illegal reference to *string*

Cause: You had an EITHER

1. an illegal reference to some object in user SYS. to use one of them in an illegal way OR
2. an illegal reference to a remote object type.

Action: Remove the reference.

PLS-00332: "*string*" is not a valid prefix for a qualified name

Cause: You have a malformed qualified name because the prefix is not valid.

Action: Remove or change the reference.

PLS-00333: "*string*" must match an object-table alias in this context

Cause: The name, appearing in the context of a REF or VALUE, did not resolve to an object-table alias.

Action: 1) If there is no object table in the scope, then remove the REF or VALUE; or provide the missing object table reference. 2) If there is an object table in the scope, but you're not referring to it, add the reference.

PLS-00334: "*string*" matches table or view without an alias

Cause: You have a reference to a table or view name without an alias.

Action: Replace the reference with a reference to an object-table alias.

PLS-00335: a package name conflicts with an existing object

Cause: In a CREATE PACKAGE statement, a package (which is a database object that groups logically related PL/SQL types, objects, and subprograms) was given the same name as an existing database object.

Action: Give the package a unique name.

PLS-00336: non-object-table "string" illegal in this context

Cause: You have a REF or VALUE modifier for a non-object-table

Action: Replace the reference with a reference to an object-table alias.

PLS-00337: "string" matches too many object table aliases

Cause: You have an ambiguous reference to an object-table alias; there are at least two object-table aliases in the same scope.

Action: Remove all but one of the references or change the alias names of the remaining.

PLS-00338: unable to resolve "string" as a column or row expression

Cause: You have a reference to a name that could not be resolved as a column or row expression. This occurred in an update or insert statement involving an object-table.

Action: If this is an update statement and you intended to code this as a column reference, fix it as such. If you intended to code this as a row expression, change this to refer to an alias of an object-table.

PLS-00339: "string" matches object-table without a REF or VALUE modifier

Cause: You have an object-table name appearing without a REF or VALUE modifier.

Action: If you intended to code this with a REF or VALUE modifier, add the modifier; if you intended to code this as a column reference, change the reference appropriately; otherwise, remove the reference.

PLS-00341: declaration of cursor 'string' is incomplete or malformed

Cause: A cursor declaration is improper or an identifier referenced in the cursor declaration was not properly declared. A return type that does not refer to an existing database table or a previously declared cursor or cursor variable might have been specified. For example, the following cursor declaration is illegal because c1 is not yet fully defined: CURSOR c1 RETURN c1%ROWTYPE IS SELECT ... -- illegal In this case, a return type does not have to be specified because it is implicit.

Action: Check the spelling and declaration of the cursor name and any identifiers referenced in the cursor declaration. Also confirm that the declaration is placed correctly in the block structure. If a return type was specified, make sure that it refers to an existing database table or a previously declared cursor or cursor variable.

PLS-00351: Not logged onto database 'string'

Cause: An attempt was made to access an Oracle database without being logged on. Probably, an invalid username or password was entered.

Action: Log on to Oracle with a correctly spelled username and password before trying to access the database.

PLS-00352: Unable to access another database 'string'

Cause: An attempt was made to reference an object in a database other than the current local or remote Oracle database.

Action: Correct the reference and make sure the object is in the current Oracle database.

PLS-00353: 'string' must name a user in the database

Cause: This error occurs when the username was misspelled or when the user does not exist in the database.

Action: Check the spelling of the username and make sure the user exists.

PLS-00354: username must be a simple identifier

Cause: A qualified username such as scott.accts is not permitted in this context.

Action: Specify a simple username such as scott instead.

PLS-00355: use of pl/sql table not allowed in this context

Cause: A PL/SQL table was referenced in the wrong context (for example, with a remote link).

Action: Remove the PL/SQL table reference or change the context.

PLS-00356: 'string' must name a table to which the user has access

Cause: The named table is not accessible to the user. This error occurs when the table name or username was misspelled, the table and/or user does not exist in the database, the user was not granted the necessary privileges, or the table name duplicates the name of a local variable or loop counter.

Action: Check the spelling of the table name and username. Also confirm that the table and user exist, the user has the necessary privileges, and the table name does not duplicate the name of a local variable or loop counter.

PLS-00357: Table, View Or Sequence reference 'string' not allowed in this context

Cause: A reference to database table, view, or sequence was found in an inappropriate context. Such references can appear only in SQL statements or (excluding sequences) in %TYPE and %ROWTYPE declarations. Some valid examples follow: SELECT ename, emp.deptno, dname INTO my_ename, my_deptno, my_dept .FROM emp, dept WHERE emp.deptno = dept.deptno; DECLARE last_name emp.ename%TYPE; dept_rec dept%ROWTYPE;

Action: Remove or relocate the illegal reference.

PLS-00358: column 'string' exists in more than one table; use qualifier

Cause: The statement is ambiguous because it specifies two or more tables having the same column name. For example, the following statement is ambiguous because deptno is a column in both tables: SELECT deptno, loc INTO my_deptno, my_loc FROM emp, dept;

Action: Precede the column name with the table name (as in emp.deptno) so that the column reference is unambiguous.

PLS-00359: assignment target in 'string' must have components

Cause: An assignment target was declared that lacks the components needed to store the assigned values. For example, this error occurs if you try to assign a row of column values to a variable instead of a record, as follows: DECLARE dept_rec dept%ROWTYPE; my_deptno dept.deptno%TYPE; ... BEGIN SELECT deptno, dname, loc INTO my_deptno -- invalid FROM dept WHERE ...

Action: Check the spelling of the names of the assignment target and all its components. Make sure the assignment target is declared with the required components and that the declaration is placed correctly in the block structure.

PLS-00360: cursor declaration without body needs return type

Cause: A cursor declaration lacks either a body (SELECT statement) or a return type. If you want to separate a cursor specification from its body, a return type must be supplied, as in `CURSOR c1 RETURN emp%ROWTYPE;`

Action: Add a SELECT statement or return type to the cursor declaration.

PLS-00361: IN cursor '*string*' cannot be OPEN'ed

Cause: A cursor parameter with mode IN cannot be modified, and therefore cannot be opened.

Action: Change the cursor parameter to be IN OUT or OUT

PLS-00362: invalid cursor return type; '*string*' must be a record type

Cause: In a cursor specification or REF CURSOR type definition, a non-record type such as NUMBER or TABLE was specified as the return type. This is not allowed. Only the following return types are allowed: `<record_type_name>` `<record_name>%TYPE` `<table_name>%ROWTYPE` `<cursor_name>%ROWTYPE` `<cursor_variable_name>%ROWTYPE`

Action: Revise the cursor specification or REF CURSOR type definition so that it specifies one of the above return types.

PLS-00363: expression '*string*' cannot be used as an assignment target

Cause: A literal, constant, IN parameter, loop counter, or function call was mistakenly used as the target of an assignment. For example, the following statement is illegal because the assignment target, 30, is a literal: `SELECT deptno INTO 30 FROM dept WHERE ... -- illegal`

Action: Correct the statement by using a valid assignment target.

PLS-00364: loop index variable '*string*' use is invalid

Cause: An attempt was made to assign the value of an OUT parameter to

Action: Use an IN OUT parameter instead of the OUT parameter. Inside a

PLS-00366: subtype of a NOT NULL type must also be NOT NULL

Cause: After a subtype was defined as NOT NULL, it was used as the base type for another subtype defined as NULL. That is not allowed. For example, the code might look like `DECLARE SUBTYPE Weekday IS INTEGER NOT NULL; SUBTYPE Weekend IS Weekday NULL; -- illegal` instead of `DECLARE SUBTYPE Weekday IS INTEGER NOT NULL; SUBTYPE Weekend IS Weekday;`

Action: Revise the subtype definitions to eliminate the conflict.

PLS-00367: a RAISE statement with no exception name must be inside an exception handler

Cause: A RAISE statement not followed by an exception name was found outside an exception handler

Action: Delete the RAISE statement, relocate it to an exception handler, or supply the missing exception name.

PLS-00368: in RAISE statement, '*string*' must be an exception name

Cause: The identifier in a RAISE statement is not a valid exception name.

Action: Make sure the identifier in the RAISE statement was declared as an exception and is correctly placed in the block structure. If you are using the name of a PL/SQL predefined exception, check its spelling.

PLS-00369: no choices may appear with choice OTHERS in an exception handler

Cause: A construct of the form WHEN excep1 OR OTHERS => was encountered in the definition of an exception handler. The OTHERS handler must appear by itself as the last exception handler in a block.

Action: Remove the identifier that appears with OTHERS or write a separate exception handler for that identifier.

PLS-00370: OTHERS handler must be last among the exception handlers of a block

Cause: One or more exception handlers appear after an OTHERS handler. However, the OTHERS handler must be the last handler in a block or subprogram because it acts as the handler for all exceptions not named specifically.

Action: Move the OTHERS handler so that it follows all specific exception handlers.

PLS-00371: at most one declaration for 'string' is permitted

Cause: A reference to an identifier was ambiguous because there were multiple declarations for the identifier. At most one local variable with a given identifier is permitted in the declarative part of a block, procedure, or function. At most one label with a given identifier may appear in a block.

Action: Check the spelling of the identifier. If necessary, remove all but one declaration of the identifier.

PLS-00372: In a procedure, RETURN statement cannot contain an expression

Cause: In a procedure, a RETURN statement contains an expression, which is not allowed. In functions, a RETURN statement must contain an expression because its value is assigned to the function identifier. However, in procedures, a RETURN statement simply lets you exit before the normal end of the procedure is reached.

Action: Remove the expression from the RETURN statement, or redefine the procedure as a function.

PLS-00373: EXIT/CONTINUE label 'string' must label a LOOP statement

Cause: The label in the EXIT or CONTINUE statement did not refer to a LOOP statement. An EXIT or CONTINUE statement need not specify a label. However, if a label is specified (as in EXIT my_label or CONTINUE my_label), it must refer to a LOOP statement.

Action: Make sure the label name is spelled correctly and that it refers to a LOOP statement.

PLS-00374: illegal EXIT/CONTINUE statement; must appear inside the loop labeled 'string'

Cause: The label in the EXIT or CONTINUE statement did not refer to a loop statement. An EXIT or CONTINUE statement need not specify a label. However, if a label is specified (as in EXIT my_label or CONTINUE my_label), the EXIT or CONTINUE statement must be inside the LOOP statement designated by that label.

Action: Make sure the label name is spelled correctly; if necessary, move the EXIT or CONTINUE statement inside the LOOP statement to which the label refers.

PLS-00375: illegal GOTO statement; this GOTO cannot branch to label 'string'

Cause: The line and column numbers accompanying the error message refer to a GOTO that branches from outside a construct (a loop or exception handler, for example) that contains a sequence of statements to a label inside that sequence of statements. Such a branch is not allowed.

Action: Either move the GOTO statement inside the sequence of statements or move the labeled statement outside the sequence of statements.

PLS-00376: illegal EXIT/CONTINUE statement; it must appear inside a loop

Cause: An EXIT or CONTINUE statement was found outside of a loop construct. The EXIT statement is used to exit prematurely from a loop and the CONTINUE statement is used to begin the next iteration of a loop; each must always appear within a loop.

Action: Either remove the EXIT or CONTINUE statement or place it inside a loop.

PLS-00377: internal type PLS_INTEGER is not included in this release of PL/SQL

Cause: The type-name INTEGER was used in a declaration.

Action: None

PLS-00378: invalid compilation unit for this release of PL/SQL

Cause: A compilation unit is a file containing PL/SQL source code that is passed to the compiler. Only compilation units containing blocks, declarations, statements, and subprograms are allowed. This error occurs when some other language construct is passed to the compiler.

Action: Make sure the compilation unit contains only blocks, declarations, statements, and subprograms.

PLS-00379: CASE statements are not included in this release of PL/SQL

Cause: The unit being compiled contains a CASE statement. However, the current release of PL/SQL does not support CASE statements.

Action: Remove the CASE statement from the compilation unit.

PLS-00380: functions and procedures are not included in this release of PL/SQL

Cause: The program being compiled contains a declaration of a FUNCTION or PROCEDURE.

Action: None

PLS-00381: type mismatch found at 'string' between column and variable in subquery or INSERT

Cause: The datatypes of a column and a variable do not match. The variable was encountered in a subquery or INSERT statement.

Action: Change the variable datatype to match that of the column.

PLS-00382: expression is of wrong type

Cause: An expression has the wrong datatype for the context in which it was found.

Action: Change the datatype of the expression. You might want to use datatype conversion functions.

PLS-00383: type mismatch found at 'string' inside an IN or NOT IN clause

Cause: In a test for set membership such as X NOT IN (SELECT Y ...), the expressions X and Y do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the expressions so that their datatypes match. You might want to use datatype conversion functions in the select list.

PLS-00384: type mismatch found at 'string' in UPDATE's SET clause

Cause: The column to the left of the equal sign in the SET clause of an UPDATE statement does not match in datatype with the column, expression, or subquery to the right of the equal sign, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the expressions so that their datatypes match. You might want to use datatype conversion functions in the SET clause.

PLS-00385: type mismatch found at 'string' in SELECT...INTO statement

Cause: The expressions to the left and right of the INTO clause in a SELECT...INTO statement do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the expressions so that their datatypes match. You might want to use datatype conversion functions in the select list.

PLS-00386: type mismatch found at 'string' between FETCH cursor and INTO variables

Cause: An assignment target in the INTO list of a FETCH statement does not match in datatype with the corresponding column in the select list of the cursor declaration, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the cursor declaration or change the datatype of the assignment target. You might want to use datatype conversion functions in the select list of the query associated with the cursor.

PLS-00387: INTO variable cannot be a database object

Cause: An item in the INTO list of a FETCH or SELECT statement was found to be a database object. INTO introduces a list of user-defined variables to which output values are assigned. Therefore, database objects cannot appear in the INTO list.

Action: Check the spelling of the INTO list item. If necessary, remove the item from the INTO list or replace it with a user-defined output variable.

PLS-00388: undefined column 'string' in subquery

Cause: A subquery contains a column name that was not defined in the specified table.

Action: Change the expression to specify a column that was defined.

PLS-00389: table, view or alias name "string" not allowed in this context

Cause: A table, view or alias name <name> corresponding to a regular (non-object) table appeared in an inappropriate context.

Action: Remove the reference, or, if you intended to code this as a column reference, fix it as such.

PLS-00390: undefined column 'string' in INSERT statement

Cause: Check the spelling of the column name, then change the expression so that it refers only to defined columns.

Action: Check the spelling of the column name, then change the expression so that it refers only to defined columns.

PLS-00391: undefined column 'string' in UPDATE statement

Cause: An UPDATE statement refers to a column not defined for the table or view being updated.

Action: Check the spelling of the column name, then revise the statement so that it refers only to defined columns.

PLS-00392: Type mismatch in arguments to BETWEEN

Cause: In a comparison such as X BETWEEN Y AND Z, the expressions X, Y, and Z do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the expressions so that their datatypes match. You might want to use datatype conversion functions.

PLS-00393: wrong number of columns in SELECT...INTO statement

Cause: The number of columns selected by a SELECT...INTO statement does not match the number of variables in the INTO clause.

Action: Change the number of columns in the select list or the number of variables in the INTO clause so that the numbers match.

PLS-00394: wrong number of values in the INTO list of a FETCH statement

Cause: The number of variables in the INTO clause of a FETCH statement does not match the number of columns in the cursor declaration.

Action: Change the number of variables in the INTO clause or the number of columns in the cursor declaration so that the numbers match.

PLS-00395: wrong number of values in VALUES clause of INSERT statement

Cause: The number of columns in an INSERT statement does not match the number of values in the VALUES clause. For example, the following statement is faulty because no column is specified for the value 20: INSERT INTO emp (empno, ename) VALUES (7788, 'SCOTT', 20);

Action: Change the number of items in the column list or the number of items in the VALUES list so that the numbers match.

PLS-00396: INSERT statement's subquery yields wrong number of columns

Cause: The number of columns in an INSERT statement does not match the number of columns in a subquery select list. For example, the following statement is faulty because no corresponding column is specified for col3: INSERT INTO emp (ename, empno) SELECT col1, col2, col3 FROM ...

Action: Change the number of items in the column list of the INSERT statement or the number of items in the select list so that the numbers match.

PLS-00397: Type mismatch in arguments to IN

Cause: In a test for set membership such as X IN (Y, Z), the expressions X, Y, and Z do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the expressions so that their datatypes match. You might want to use datatype conversion functions.

PLS-00398: wrong number of columns in UNION, INTERSECT, or MINUS expression

Cause: The SELECT clauses to the left and right of a UNION, INTERSECT, or MINUS expression do not select the same number of columns. For example, the following statement is faulty because the select lists do not contain the same number of items: CURSOR my_cur IS SELECT ename FROM emp INTERSECT SELECT ename, empno FROM emp;

Action: Change the select lists so that they contain the same number of items.

PLS-00399: different types of columns in UNION, INTERSECT, or MINUS expression

Cause: The select lists to the left and right of a UNION, INTERSECT, or MINUS expression select at least one column that is mismatched in datatype. For example, the following statement is faulty because the constant 3 has datatype NUMBER, whereas SYSDATE has datatype DATE: `CURSOR my_cur IS SELECT 3 FROM emp INTERSECT SELECT SYSDATE FROM emp;`

Action: Change the select lists so that they match in datatype. You might want to use datatype conversion functions in the select list of one or more queries.

PLS-00400: different number of columns between cursor SELECT statement and return value

Cause: In a cursor declaration, a return type (such as `RETURN emp%ROWTYPE`) was specified, but the number of returned column values does not match the number of select-list items.

Action: Change the cursor return type or the select list so that the number of returned column values matches the number of select-list items.

PLS-00401: different column types between cursor SELECT statement and return value found at 'string'

Cause: In a cursor declaration, a return type (such as `RETURN emp%ROWTYPE`) was specified, but a returned column value and its corresponding select-list item have different datatypes.

Action: Change the cursor return type or the select list so that each returned column value and its corresponding select-list item have the same datatype.

PLS-00402: alias required in SELECT list of cursor to avoid duplicate column names

Cause: A cursor was declared with a SELECT statement that contains duplicate column names. Such references are ambiguous.

Action: Replace the duplicate column name in the select list with an alias.

PLS-00403: expression 'string' cannot be used as an INTO-target of a SELECT/FETCH statement

Cause: A FETCH statement was unable to assign a value to an assignment target in its INTO list because the target is not a legally formed and declared variable. For example, the following assignment is illegal because 'Jones' is a character string, not a variable: `FETCH my_cur INTO 'Jones';`

Action: Check the spelling and declaration of the assignment target. Make sure that the rules for forming variable names are followed.

PLS-00404: cursor 'string' must be declared with FOR UPDATE to use with CURRENT OF

Cause: The use of the `CURRENT OF cursor_name` clause is legal only if `cursor_name` was declared with a `FOR UPDATE` clause.

Action: Add a `FOR UPDATE` clause to the definition of the cursor or do not use the `CURRENT OF cursor_name` clause.

PLS-00405: subquery not allowed in this context

Cause: A subquery was used in an inappropriate context, such as: `if (SELECT deptno FROM emp WHERE ...) = 20 then ...` Subqueries are allowed only in SQL statements.

Action: The same result can be obtained by using a temporary variable, as in:
SELECT deptno INTO temp_var FROM emp WHERE ...; IF temp_var = 20 THEN
...

PLS-00406: length of SELECT list in subquery must match number of assignment targets

Cause: A query select list is not the same length as the list of targets that will receive the returned values. For example, the following statement is faulty because the subquery returns two values for one target: UPDATE emp SET ename = (SELECT ename, empno FROM emp WHERE ename = 'SMITH') ...

Action: Change one of the lists so that they contain the same number of items.

PLS-00407: '*' not allowed here; a list of columns is required

Cause: An asterisk (*) was used as an abbreviation for a list of column names. However, in this context the column names must be written out explicitly.

Action: Replace the asterisk with a list of column names.

PLS-00408: duplicate column 'string' not permitted in INSERT or UPDATE

Cause: An UPDATE or INSERT statement has a column list that contains duplicate column names.

Action: Check the spelling of the column names, then eliminate the duplication.

PLS-00409: duplicate variable 'string' in INTO list is not permitted

Cause: The same variable appears twice in the INTO list of a SELECT or FETCH statement.

Action: Remove one of the variables from the INTO list.

PLS-00410: duplicate fields in RECORD, TABLE or argument list are not permitted

Cause: When a user-defined record was declared, the same name was given to two fields. Like column names in a database table, field names in a user-defined record must be unique.

Action: Check the spelling of the field names, then remove the duplicate.

PLS-00411: Number of values in aggregate and in subquery don't match

Cause: In a statement of the form aggregate = subquery, the numbers of values in the aggregate and subquery are unequal. For example, the code might look like ... WHERE (10,20,30) = (SELECT empno,deptno FROM emp WHERE...);

Action: Revise the aggregate or subquery so that the numbers of values match.

PLS-00412: list of values not allowed as argument to this function or procedure

Cause: A parenthesized list of values separated by commas (that is, an aggregate) was used in the wrong context. For example, the following usage is invalid: WHERE (col1, col2) > (SELECT col3, col4 FROM my_table ...) However, an equal sign can take a list of values and a subquery as left- and right-hand-side arguments, respectively. So, the following usage is valid: WHERE (col1, col2) = (SELECT col3, col4 FROM my_table ...)

Action: Rewrite the expression. For example, the clause WHERE (col1, col2) > (SELECT col3, col4 FROM my_table ...) can be rewritten as WHERE col1 > (SELECT col3 FROM my_table ...) AND col2 > (SELECT col4 FROM my_table ...)

PLS-00413: identifier in CURRENT OF clause is not a cursor name

Cause: The identifier in a CURRENT OF clause names an object other than a cursor.

Action: Check the spelling of the identifier. Make sure that it names the cursor in the DELETE or UPDATE statement and that it names the cursor itself, not a FOR-loop variable.

PLS-00414: no column '*string*' in table

Cause: A table name or alias was used to qualify a column reference, but the column was not found in that table. Either the column was never defined or the column name is misspelled.

Action: Confirm that the column was defined and check the spelling of the column name.

PLS-00415: '*string*' is an OUT parameter and cannot appear in a function

Cause: An OUT or IN OUT formal parameter was used in a function specification.

Action: None

PLS-00416: The third argument of DECODE cannot be NULL

Cause: The third argument of DECODE is NULL.

Action: Enter an argument with a proper type and value.

PLS-00417: unable to resolve "*string*" as a column

Cause: A database table, view, or column was specified in a SQL statement that does not exist, or the privileges required to access the table or view were not granted.

Action: Check the spelling of the table (or view) and column names; make sure the table and columns exist. If necessary, ask the DBA to grant the privileges required to access the table.

PLS-00418: array bind type must match PL/SQL table row type

Cause: A host array was passed (by an Oracle Precompiler program, for example) to a PL/SQL subprogram for binding to a PL/SQL table parameter. However, the datatypes of the array elements and PL/SQL table rows are incompatible. So, the binding failed.

Action: Change the datatype of the array elements or PL/SQL table rows to make the datatypes compatible.

PLS-00419: reference to remote attribute not permitted

Cause: An attempt was made to reference a remote cursor attribute, which is not allowed. For example, the code might look like IF SQL%NOTFOUND@newyork THEN ...

Action: Do not try to reference a remote cursor attribute.

PLS-00420: can't call builtin routines remotely

Cause: An attempt was made to call a built-in PL/SQL function remotely, which is not allowed. For example, the code might look like my_sqlerrm := SQLERRM@newyork; or INSERT INTO emp VALUES (my_empno, STANDARD.RTRIM@newyork(my_ename), ...);

Action: Always call built-in functions locally; never specify a database link.

PLS-00421: circular synonym '*string*'

Cause: Directly or indirectly, a synonym was defined in terms of itself, creating a circular definition.

Action: Redefine the synonyms to eliminate the circular definition.

PLS-00422: no PL/SQL translation for the bindtype given for this bind variable

Cause: A host variable was passed (by an Oracle Precompiler program, for example) to PL/SQL for binding. However, its datatype is not compatible with any PL/SQL datatype. So, the binding failed.

Action: Change the datatype of the host variable to make it compatible with a PL/SQL datatype.

PLS-00423: ORDER BY item must be the number of a SELECT-list expression

Cause: A column alias was used in the ORDER BY clause of a SELECT statement that uses a UNION, INTERSECT, or MINUS set operator. This is not allowed. In such cases, expressions in the ORDER BY clause must be unsigned integers that designate the ordinal positions of select-list items.

Action: Change the alias in the ORDER BY clause to an unsigned integer that designates the ordinal position of the select item in question.

PLS-00424: RPC defaults cannot include Package State

Cause: An attempt was made to call a remote subprogram whose defaulted parameters depend on package state, which is not allowed. When calling remote subprograms, the actual parameters must be passed explicitly if the corresponding formal parameters depend on package state.

Action: Call the remote subprogram by passing each actual parameter explicitly.

PLS-00425: in SQL, function argument and return types must be SQL type

Cause: When a cursor variable was declared as the formal parameter of a

Action: Change the parameter mode from OUT to IN or IN OUT.

PLS-00427: RPC defaults cannot use builtins when versions of STANDARD differ

Cause: An attempt was made to call a remote subprogram whose defaulted parameter value is calculated using a builtin operation. If the calling system uses a different version of package STANDARD than does the called system, a defaulted expression must be either a simple numeric or string literal, NULL, or a direct call to a user-written function.

Action: Call the remote subprogram by passing each actual parameter value explicitly.

PLS-00428: an INTO clause is expected in this SELECT statement

Cause: The INTO clause of a SELECT INTO statement was omitted. For example, the code might look like SELECT deptno, dname, loc FROM dept WHERE ... instead of SELECT deptno, dname, loc INTO dept_rec FROM dept WHERE ... In PL/SQL, only a subquery is written without an INTO clause.

Action: Add the required INTO clause.

PLS-00429: unsupported feature with RETURNING clause

Cause:

- INTO clause and RETURNING clause cannot be use in the same statement

- RETURNING clause is currently not supported for object type columns, LONG columns, records, %rowtypes, remote tables and INSERT with subquery. This is as ORA-28815.

Action: Use separate select statement to get the values.

PLS-00430: FORALL iteration variable *string* is not allowed in this context

Cause: FORALL iteration variable can only be used as a subscript. It cannot be used directly or as a part of an expression.

Action: Use FORALL variable only as a collection subscript.

PLS-00431: bulk SQL attributes must use a single index

Cause: More than one index specified to access SQL bulk attribute.

Action: Use a single index of integer datatype.

PLS-00432: implementation restriction: cannot use FORALL and BULK COLLECT INTO together in SELECT statements

Cause: SELECT statement contains both the FORALL and BULK COLLECT INTO phrases.

Action: Do not use FORALL and BULK COLLECT INTO together in SELECT statements.

PLS-00433: inconsistent package STANDARD

Cause: PL/SQL compiler could not find the entries (such as type declarations) that should exist in the package STANDARD.

Action: Make sure that the correct version of package STANDARD is available in the current Oracle database, then retry compilation.

PLS-00434: record field has unsupported type: "string"

Cause: An attempt was made to use an unsupported type for a record field. In this release, the use of the SQL92 datetime types (time, timestamp, time with time zone, timestamp with time zone, interval year to month, interval day to second) are not supported in record fields.

Action: Use only supported types for record fields.

PLS-00435: DML statement without BULK In-BIND cannot be used inside FORALL

Cause: The DML (SELECT/INSERT/DELETE/UPDATE) statement inside the FORALL statement does not contain BULK IN-BIND variables.

Action: The DML (SELECT/INSERT/DELETE/UPDATE) statement inside the FORALL statement must contain BULK IN-BIND variables.

PLS-00436: implementation restriction: cannot reference fields of BULK In-BIND table of records or objects

Cause: table(bulk_index).field is not supported at run-time.

Action: Use FOR loop with instead of the FORALL DML statement (MERGE/INSERT/DELETE/UPDATE).

PLS-00437: FORALL bulk index cannot be used in string clause

Cause: RETURNING table(bulk_index) is not supported.

Action: Use RETURNING BULK COLLECT instead

PLS-00438: value in LIMIT clause: 'string' use is invalid

Cause: The evaluation value in the LIMIT clause of a bulk fetch was found in an inappropriate context. For example, the following statement is illegal because the LIMIT clause in a bulk fetch expects a numeric value. `FETCH c1 BULK COLLECT INTO var_tab LIMIT '22333';` -- illegal

Action: Change the expression of the LIMIT clause so that the evaluation result is compatible to a numeric value.

PLS-00439: A LIMIT clause must be used within a BULK FETCH

Cause: A LIMIT clause is used within a non-bulk fetch

Action: Do not use a LIMIT clause when a non-bulk fetch is used.

PLS-00440: FORALL bulk IN-bind variables cannot be used here

Cause: A reference to a FORALL statement's bulk IN-bind variable was found in a context in which it is not permitted. For example, such variables are not permitted in expressions in the USING clause of a dynamic SQL statement: forall j in 1..Users.Count() execute immediate ' insert into System_Users(Username) values :U' using Upper(Users(j));

Action: In the case described above, move the expression from the USING clause into the SQL statement: forall j in 1..Users.Count() execute immediate ' insert into System_Users(Username) values Upper(:U)' using Users(j);

PLS-00441: EXIT/CONTINUE statement may have a label here; 'string' is not a label

Cause: The specified name was not a label. An EXIT or CONTINUE statement does not require a label, but when the optional name appears, it must be a label.

Action: Check the spelling of the name. Make sure that the name is the label of a loop in which the EXIT or CONTINUE statement is nested. If a label is not needed for this statement, delete the name.

PLS-00442: CONTINUE statement may not have the prefix STANDARD

Cause: The procedure CONTINUE appears in STANDARD but that procedure may not be called either with its name alone or with the prefix STANDARD. It exists only to help in analysis of the CONTINUE statement.

Action: If a CONTINUE statement is intended, remove the prefix. If some other procedure was intended, check the spelling of the prefix and of the procedure name.

PLS-00450: a variable of this private type cannot be declared here

Cause: A variable declaration uses a type that is declared PRIVATE in some other compilation unit.

Action: Do not use this type in a PRIVATE variable declaration.

PLS-00452: Subprogram 'string' violates its associated pragma

Cause: A packaged function cannot be called from SQL statements unless its purity level is asserted by coding a RESTRICT_REFERENCES pragma in the package specification. The pragma, which is used to control side effects, tells the PL/SQL compiler to deny the packaged function read/write access to database tables, public packaged variables, or both. A SQL statement that violates the pragma will cause a compilation error.

Action: Raise the purity level of the function, or relax the pragma restrictions.

PLS-00453: remote operations not permitted on object tables or user-defined type columns

Cause: A reference to a remote object tables or user-defined type column was found.

Action: Do not refer to it.

PLS-00454: with a returning into clause, the table expression cannot be remote or a subquery

Cause: A reference to a remote table or subquery was found in a sql statement with a returning into clause.

Action: Do not refer to it, or do use a subsequent select statement.

PLS-00455: cursor '*string*' cannot be used in dynamic SQL OPEN statement

Cause: dynamically OPEN a REF CURSOR that has RETURN type. However, only REF CURSOR without RETURN type can be OPEN'ed by an embedded dynamic OPEN statement.

Action: define a REF CURSOR without return type, and use it in the statement.

PLS-00456: item '*string*' is not a cursor

Cause: the given variable is not a cursor and therefore cannot be OPEN'ed or FETCH'ed from.

Action: check the spelling and declaration for the given variable.

PLS-00457: expressions have to be of SQL types

Cause: an expression of wrong type is in USING or dynamic RETURNING clause. In USING or dynamic RETURNING clause, an expression cannot be of non-SQL types such as BOOLEAN, INDEX TABLE, and record.

Action: change the expression type to a SQL type.

PLS-00458: subprogram '*string*' cannot be called from a REPEATABLE subprogram

Cause: The subprogram is not REPEATABLE and cannot be called from a REPEATABLE subprogram.

Action: delete the call or delete REPEATABLE.

PLS-00459: this feature is not allowed in REPEATABLE subprogram

Cause: Having one of the followings feature in the REPEATABLE subprogram: dynamic SQL statements or autonomous transaction.

Action: delete the statements or delete REPEATABLE.

PLS-00460: REPEATABLE subprogram '*string*' has to be RNDS, WNDS, RNPS, and WNPS

Cause: Repeatable subprogram can neither read database state (RNDS), write database state (WNDS), read package state (RNPS), nor write package state (WNPS).

Action: make the subprogram to be RNDS, WNDS, RNPS, and WNPS or delete REPEATABLE

PLS-00461: mismatch REPEATABLE information between specification and body of '*string*'

Cause: REPEATABLE is declared at the subprogram's specification, but not at its body, or vice versa.

Action: make sure both specification and body are declared as REPEATABLE

PLS-00462: nested subprogram '*string*' has to be REPEATABLE

Cause: the nested subprogram of a REPEATABLE subprogram is not declared as REPEATABLE. If a subprogram is REPEATABLE, all of its nested subprograms has to be declared as REPEATABLE.

Action: declared the nested subprogram as REPEATABLE

PLS-00483: exception '*string*' may appear in at most one exception handler in this block

Cause: An exception appears in two different WHEN clauses (that is, two different exception handlers) in the exception-handling part of a PL/SQL block or subprogram.

Action: Remove one of the references to the exception.

PLS-00484: redundant exceptions '*string*' and '*string*' must appear in same exception handler

Cause: Using the EXCEPTION_INIT pragma, different exceptions were initialized to the same Oracle error number; then, they were referenced in different exception handlers within the same exception-handling part. Such references conflict.

Action: Remove one of the exceptions or initialize it to a different Oracle error number.

PLS-00485: in exception handler, '*string*' must be an exception name

Cause: An identifier not declared as an exception appears in an exception handler WHEN clause. Only the name of an exception is valid in a WHEN clause.

Action: Check the spelling of the exception name and make sure the exception was declared properly.

PLS-00486: select list cannot be enclosed in parentheses

Cause: In a SELECT statement, the select list was enclosed in parentheses, as in: SELECT (deptno, dname, loc) FROM dept INTO ... This breaks the rules of SQL syntax. Parentheses are not required because the keywords SELECT and FROM delimit the select list.

Action: Remove the parentheses enclosing the select list.

PLS-00487: Invalid reference to variable '*string*'

Cause: A variable was referenced in a way that is inconsistent with its datatype. For example, a scalar variable might have been mistakenly referenced as a record, as follows: DECLARE CURSOR emp_cur IS SELECT empno, ename, sal FROM emp; emp_rec emp_cur%ROWTYPE; my_sal NUMBER(7,2); BEGIN ... total_sal := total_sal + my_sal.sal; -- invalid ...

Action: Check the spelling of the variable name. Make sure the variable was declared properly and that the declaration and reference are consistent regarding datatype.

PLS-00488: '*string*' must be a type

Cause: The datatype specifier in a declaration or expression does not designate a legal type. For example, the %TYPE attribute might not have been added to a declaration, as in DECLARE my_sal emp.sal%TYPE; my_ename emp.ename; -- missing %TYPE ... When declaring a constant or variable, to provide the datatype of a column automatically, use the %TYPE attribute. Likewise, when declaring a record, to provide the datatypes of a row automatically, use the %ROWTYPE attribute.

Action: Make sure the datatype specifier designates a legal type. Remember to use the %TYPE and %ROWTYPE attributes when necessary.

PLS-00489: invalid table reference: '*string*' must be a column in this expression

Cause: In a query, a select-list item refers to a table in the FROM clause but not to a database column.

Action: Check the spelling of the column names, make sure each column in the select list refers to a table in the FROM clause, then re-execute the query.

PLS-00490: illegal statement

Cause: A constant, variable, function call, or incomplete statement was used where a statement was expected. For example, instead of calling a function from an expression, it might have been called as a statement (as if it were a procedure).

Action: Check the statement, making sure that its commands, identifiers, operators, delimiters, and terminator form a complete and valid PL/SQL statement.

PLS-00491: numeric literal required

Cause: A constant or variable was used where a numeric literal is required. For example, the code might look like `my_ename VARCHAR2(max_len);` instead of `my_ename VARCHAR2(15);` When specifying the maximum length of a VARCHAR2 variable, an integer literal must be used.

Action: Replace the identifier with a numeric literal.

PLS-00492: variable or constant initialization may not refer to functions declared in the same package

Cause: If a package spec `p` declares a function `f`, that function may not be used in any variable declarations in that same package spec. This is because of a circular instantiation problem: in order to fully instantiate the package spec, the variable must be initialized. To initialize the variable, the function body code in the package body must be executed. That requires that the package body be instantiated. However, the package body cannot be instantiated until the package spec is fully instantiated.

Action: Remove the reference to the function from the variable initialization. A technique which often works is to move the variable initialization from the variable declaration (in the package spec) to the package body initialization block.

PLS-00493: invalid reference to a server-side object or function in a local context

Cause: A reference to a server-side object (e.g. a table column) or function (a group function such as SUM, AVG, MIN, MAX, ...) was found in a context where only PL/SQL objects may be present (such as within the parameter list of a local function or as the index of a (local) PL/SQL table.)

Action: Rewrite the offending statement; or (if a local function call is the problem context), make the function non-local (either packaged or top- level.)

PLS-00494: coercion into multiple record targets not supported

Cause: The INTO list of a SELECT or FETCH specified more than a single record-type target and the column types required coercion into a record to match the INTO list. This is type checked as correct, but not yet supported.

Action: Create a new record type to hold all of the column types or code the SELECT with an INTO target for every source column.

PLS-00495: too many columns in SELECT...INTO statement after bursting record targets

Cause: Type checking indicated the columns in a SELECT or FETCH were being collected into a record in the INTO list. The record was burst into its fields. There were not enough fields in the record for each of the columns.

Action: Change the number of columns or the record variable(s) in the INTO clause so that they match.

PLS-00496: too few columns in SELECT...INTO statement after bursting record targets

Cause: Type checking indicated the columns in a SELECT or FETCH were being collected into a record in the INTO list. The record was burst into its fields. There were not enough columns to fill all of the fields in the record.

Action: Change the number of columns or the record variable(s) in the INTO clause so that they match.

PLS-00497: cannot mix between single row and multi-row (BULK) in INTO list

Cause: - When BULK syntax (e.g. BULK COLLECT INTO) is used to retrieve data, every variable in the INTO list has to be of type that is a collection of the type of the corresponding column.

- When BULK is NOT used, every variable in the INTO list has to be of compatible type with the corresponding column.

Action: Change the INTO list so that all variables have correct data types

PLS-00498: illegal use of a type before its declaration

Cause: A variable or constant was declared to be of a type whose declaration appears later in the compilation unit; or, a type or subtype was declared in terms of another type whose declaration appears later in the compilation unit.

Action: Ensure that the type declaration precedes its use in the variable/constant/type declaration.

PLS-00499: coercion into collection of records not supported

Cause: A SELECT or FETCH may specify a column list to be coerced into a variable which is a collection of records. This is type checked as correct, but not yet supported because of the implicit layout change required.

Action: Express the SELECT with an object constructor around the columns and use a collection of objects as an INTO variable. Or, build the collection one row at a time coercing each row into a record which happens to be an element. Or, use a record of collections.

PLS-00500: invalid operator binding

Cause: An operator binding function cannot be found in the specified scope.

Action: Provide the correct number and types of parameters for the operator binding function. Or, specify the correct names for schema, package, or type containing the operator binding function.

PLS-00503: RETURN <value> statement required for this return from function

Cause: In a function body, a RETURN statement was used that contains no expression. In procedures, a RETURN statement contains no expression because the statement simply returns control to the caller. However, in functions, a RETURN statement must contain an expression because its value is assigned to the function identifier.

Action: Add an expression to the RETURN statement.

PLS-00504: type *string_BASE* may not be used outside of package STANDARD

Cause: In a declaration, the datatype NUMBER_BASE (for example) was mistakenly specified. The datatypes CHAR_BASE, DATE_BASE, MLSLABEL_BASE, and NUMBER_BASE are for internal use only.

Action: Specify (for example) the datatype NUMBER instead of NUMBER_BASE.

PLS-00505: User Defined Types may only be defined as PLSQL Tables or Records

Cause: An attempt was made to define a type other than TABLE or RECORD, but these are the only user-defined types allowed in this release of PL/SQL. For example, the following type definition is illegal: TYPE Byte IS INTEGER(2); -- illegal

Action: Remove the type definition, or revise it to specify a TABLE or RECORD type.

PLS-00506: User Defined Constrained Subtypes are disallowed

Cause: An attempt was made to define a constrained subtype, but only unconstrained subtypes are allowed in this release of PL/SQL. For example, the following type definition is illegal: SUBTYPE Acronym IS VARCHAR2(5); -- illegal

Action: Remove the illegal type constraint.

PLS-00507: a PLSQL Table may not contain a table or a record with composite fields

Cause: In a TABLE type definition, a nested record type was specified as the element type. This is not allowed. All fields in the record must be scalars.

Action: Remove the TABLE type definition, or replace the nested record type with a simple record type.

PLS-00508: The expression in a RETURN statement cannot be a type

Cause: A datatype specifier was used instead of an expression in the RETURN statement of a user-defined function, as shown in the example below. Do not confuse the RETURN statement, which sets the function identifier to the result value, with the RETURN clause, which specifies the datatype of the result value. FUNCTION credit-rating (acct_no NUMBER) RETURN BOOLEAN IS BEGIN ... RETURN NUMBER; -- should be an expression END;

Action: Replace the datatype specifier in the RETURN statement with an appropriate expression.

PLS-00509: Implementation Restriction : Pass a returned record to a temporary identifier before selecting a field

Cause: Illegal syntax was used to call a parameter-less function that returns a record or a PL/SQL table of records. When calling a function that takes parameters and returns a record, you use the following syntax to reference fields in the record: function_name(parameters).field_name However, you cannot use the syntax above to call a parameter-less function because PL/SQL does not allow empty parameter lists. That is, the following syntax is illegal: function_name().field_name -- illegal; empty parameter list You cannot just drop the empty parameter list because the following syntax is also illegal: function_name.field_name -- illegal; no parameter list.

Action: Declare a local record or PL/SQL table of records to which you can assign the function result, then reference its fields directly.

PLS-00510: Float cannot have scale

Cause: When a FLOAT variable was declared, its precision and scale were specified, as shown in the following example: DECLARE Salary FLOAT(7,2); However, a scale for FLOAT variables cannot be specified; only a precision can be specified, as in salary FLOAT(7);

Action: Remove the scale specifier from the declaration, or declare a NUMBER variable instead.

PLS-00511: a record may not contain a PL/SQL table of records

Cause: In a RECORD definition, one of the fields was declared as a PL/SQL table of records. This is not allowed. A record can be the component of another record (that is, records can be nested), but a PL/SQL table of records cannot be the component of a record.

Action: Remove the field declaration, or revise it to specify a simple record type.

PLS-00512: Implementation Restriction: 'string': Cannot directly access remote package variable or cursor

Cause: An attempt was made to reference a remote packaged variable or cursor. This is not allowed. Instead, add to the remote package a function that returns the value of the variable or cursor.

Action: Remove the illegal reference.

PLS-00513: PL/SQL function called from SQL must return value of legal SQL type

Cause: In a SQL statement, do not call a PL/SQL function having a return type that can not be handled by SQL. For example, type BOOLEAN, records and indexed-tables are not supported by SQL and functions returning such values can not be called from SQL.

Action: None

PLS-00514: INSERT statement with REF INTO clause requires a typed table

Cause: This INSERT statement provides REF INTO clause, which is only legal when the table specified in the INTO clause is an object table.

Action: None

PLS-00515: The type of the REF INTO variable 'string' must be REF to the table's type

Cause: In INSERT statement with REF INTO clause, the type of the data item must be REF to the type of the table used in INTO clause.

Action: None

PLS-00516: Type mismatch between object table and value 'string' in INSERT statement.

Cause: In the INSERT statement operating on typed tables (tables of objects), the type of a non-aggregate value did not match the object type of the table.

Action: None

PLS-00517: Type mismatch between a select list element 'string' and corresponding table column in INSERT statement with a subquery

Cause: In an INSERT statement with subquery, at least one of the elements of the select list was not type-compatible with the corresponding column of the table in the INTO clause. This error indicates that the subquery should be rewritten to match the structure of the target table.

Action: None

PLS-00518: This INSERT statement requires VALUES clause containing a parenthesised list of values

Cause: A VALUES clause was entered without a list of SQL data items in parentheses. In all INSERT statements with an explicit column list, the VALUES clause must contain a list of SQL data items in parentheses. For example: INSERT INTO my_tab (a,b,c) VALUES (1,2,my_variable);

Action: Rewrite the statement to include a list of SQL data items in parentheses.

PLS-00519: This INSERT statement requires a VALUES clause containing an object type expression, not a list of values

Cause: In an INSERT statement with typed tables, an aggregate was used when an object type item was expected.

Action: Replace the aggregate with an object constructor or other object type expression.

PLS-00520: MAP methods must be declared without any parameters other than (optional) SELF.

Cause: A MAP member function was declared with a parameter. Map member functions can have only one parameter: the default SELF parameter. Map methods must be declared without any parameters. The compiler adds the SELF parameter.

Action: Remove the parameter from the map member function.

PLS-00521: ORDER methods must be declared with 1 (one) parameter in addition to (optional) SELF.

Cause: An order member function was declared without the user-specified parameter. Order member functions have two parameters, one is the default SELF parameter which is added by the compiler. the second parameter is added by the user and must declare an order method which must be the same type as the containing object type.

Action: Check and correct the way the parameter is specified.

PLS-00522: MAP methods must return a scalar type.

Cause: The MAP member function was written such that it returns something other than a scalar type.

Action: Rewrite the MAP function such that it returns a scalar type.

PLS-00523: ORDER methods must return an INTEGER.

Cause: An order member function was written such that it returns something other than an integer type.

Action: Rewrite the ORDER method such that it returns an integer type.

PLS-00524: The parameter type in an ORDER method must be the containing object type.

Cause: An order member function was declared without the user- specified parameter. Order member functions have two parameters, one is the default SELF parameter which is added by the compiler. the second parameter is added by the user and must declare an order method which must be the same type as the containing object type.

Action: Check and correct the way the parameter is specified.

PLS-00525: Within SQL statements, only equality comparisons of objects are allowed without a map or order function.

Cause: A map or order function was not provided for a relational comparison. Only equality comparisons may be used when a map or order function is not supplied.

Action: Supply either a map or order function for the object. Otherwise change the program to use only equality comparisons.

PLS-00526: A MAP or ORDER function is required for comparing objects in PL/SQL.

Cause: Within stand alone PL/SQL, an attempt was made to compare objects without a map or order function.

Action: Provide a map or order function and retry the operation.

PLS-00527: MAP or ORDER functions require a PRAGMA RESTRICT_REFERENCES specifying :WNDS,WNPS,RNPS,RNDS.

Cause: Either a PRAGMA RESTRICT_REFERENCES was not specified or it was specified without one of the following: WNDS, WNPS, RNPS, or RNDS.

Action: Add or correct the PRAGMA and retry the operation.

PLS-00528: The parameters to an ORDER function must have IN mode

Cause: You declared parameter to an ORDER function to have OUT or IN OUT mode.

Action: Correct the parameter to use IN mode only.

PLS-00529: Bad column name *string* in INSERT statement (must be an identifier)

Cause: In an INSERT statement, an attempt was made to use a column name that is not an identifier. In any INSERT statement with explicit column list a column name must be a simple identifier.

Action: Rewrite the INSERT statement, using a simple identifier for the column name.

PLS-00530: Illegal type used for object type attribute: '*string*'.

Cause: An attempt was made to use an invalid type for an object type attribute.

Action: Use only supported types for the object type attribute.

PLS-00531: Unsupported type in a VARRAY or TABLE type: '*string*'.

Cause: An attempt was made to use an unsupported type in a VARRAY or TABLE type.

Action: Use only supported types in a VARRAY or TABLE type.

PLS-00532: Target of REF must be a complete or incomplete object type.

Cause: The target of a REF can only be a complete or an incomplete object type.

Action: If a REF is to be used, change the type; otherwise, remove the REF.

PLS-00533: Tables of non_queryable types are not supported.

Cause: An attempt was made to create a table of a type which cannot be queried. Tables of such types are not supported.

Action: Create an object type containing the non-queryable type. Then create a table of the object type.

PLS-00534: A Table type may not contain a nested table type or VARRAY.

Cause: An attempt was made to do one of the following: define a table type which contained nested collection types. or define an object table that has (perhaps nested) another table type or VARRAY type.

Action: Check the table definitions to be sure that they do not contain nested tables or VARRAYs.

PLS-00535: A VARRAY type may not contain a NESTED TABLE, VARRAY or LOB

Cause: An attempt was made to do one of the following: define a VARRAY type containing a nested collection type or LOB or define a VARRAY type of an object

type that has a nested attribute which is one of NESTED TABLE, VARRAY or LOB type.

Action: Check the VARRAY definitions to be sure that they do not contain nested collection types, LOBs or nested attributes.

PLS-00536: Navigation through REF variables is not supported in PL/SQL.

Cause: The expression of the form refvar.field was entered. This is not supported in PL/SQL, ver 8.0.

Action: None

PLS-00537: A VARRAY must have a positive limit

Cause: A VARRAY type was declared with a non-positive limit, for example VARRAY(0).

Action: Declare the VARRAY with a positive limit and retry the operation.

PLS-00538: subprogram or cursor 'string' is declared in an object type specification and must be defined in the object type body

Cause: The specified subprogram is declared in an object type's specification, but is not defined in the object type body.

Action: Define the subprogram in the object type body, or remove the declaration from the specification.

PLS-00539: subprogram 'string' is declared in an object type body and must be defined in the object type specification

Cause: The specified subprogram is declared in an object type's body, but is not defined in the object type's specification. Notice cursor bodies can exist without a specification.

Action: Define the subprogram in the object type's specification, or remove the declaration from the body.

PLS-00540: object not supported in this context.

Cause: An object was declared inside a local scope (Function, Procedure, or anonymous block), or in a package scope which is not supported.

Action: Declare the type in a global or data base scope.

PLS-00541: size or length specified is too large.

Cause: A length or size that is too large was specified for a data item.

Action: Specify a smaller value and retry the operation.

PLS-00542: CLOB and NCLOB cannot use varying-width character sets in the server

Cause: A server type is being created with an embedded CLOB or NCLOB attribute which uses a varying-width character set.

Action: Use VARCHAR2 instead of CLOB, or use a fixed-width character set.

PLS-00543: a PLSQL Table may not contain a nested table type or VARRAY.

Cause: An attempt was made to define a PLSQL table that contained a (possibly deeply) nested table type or VARRAY. Nested collection types are not supported.

Action: Remove the nested table type or VARRAY from the table. Then retry the operation.

PLS-00546: SELF may not be declared as a REF parameter.

Cause: SELF was declared as a ref parameter to a member function or procedure. SELF is not supported as a REF.

Action: Redeclare SELF as a value parameter.

PLS-00548: invalid use of operator.

Cause: A name of an operator is used as a qualifier or appears outside from sql context.

Action: Eliminate the use of operator name as a qualifier or place it in a sql clause.

PLS-00550: character set specification is not allowed for this type

Cause: A character set specification was made on a type that does not require one.

Action: Remove the character set specification, or change the type.

PLS-00551: character set ANY_CS is only allowed on a subprogram parameter

Cause: The character set ANY_CS was specified when it is not allowed.

Action: Change or remove the character set specification.

PLS-00552: flexible character set is not allowed on component element

Cause: ANY_CS or %CHARSET was used to reference an ANY_CS parameter which is not a CHAR, VARCHAR2, or CLOB type. ANY_CS or %CHARSET is not allowed for fields of a record , object, elements of a collection, etc.

Action: Change or remove the character set specification.

PLS-00553: character set name is not recognized

Cause: An unrecognized name appears in a character set specification.

Action: Change or remove the character set specification.

PLS-00554: character set has already been determined

Cause: A redundant or conflicting character set was specified.

Action: Remove the CHARACTER SET specification, or change the character set specified.

PLS-00555: default expressions are not allowed for SQL operators

Cause: A default expression has been specified for a SQL operator.

Action: Eliminate the default expression from the operator.

PLS-00560: character set mismatch

Cause: An expression was used that has the wrong character set for this context.

Action: Adjust the expression, using TRANSLATE(... USING ...) or by rethinking the logic.

PLS-00561: character set mismatch on value for parameter 'string'

Cause: An expression was used that contains an incorrect character set. The actual argument has a character set conflict. If a default argument value is being used, it might be in conflict with some actual argument that must have the same character set.

Action: Adjust the expression, using TRANSLATE(... USING ...) or change the character set.

PLS-00562: a function must return a type.

Cause: The current function was defined to return something other than a data type.

Action: Make sure the function is returning a data type.

PLS-00563: illegal use of CAST expression

Cause: CAST (in PLSQL) was used outside of a DML scope.

Action: Do not use CAST outside DML statements.

PLS-00564: lob arguments are not permitted in calls to remote server

Cause: use of lob argument in call to remote server

Action: Do not use LOBs in call to remote server

PLS-00565: *string* must be completed as a potential REF target (object type)

Cause: Incomplete library units that are potential targets of REF dependencies must be completed so that they continue to remain potential targets of REF dependencies (since there might be library units with REF dependencies on this library unit). Potential REF targets include complete and incomplete object types. This error happened because an attempt was made to complete a potential REF target as something other than a potential REF target.

Action: Use another name for this library unit, or drop the original incomplete library unit.

PLS-00566: type name "*string*" cannot be constrained

Cause: A lob, date, boolean, rowid, or mlslabel type was constrained with a length specification. For example: X BLOB(5);

Action: Remove the constraint.

PLS-00567: cannot pass NULL to a NOT NULL constrained formal parameter

Cause: You attempted to pass NULL to a NOT NULL constrained parameter.

Action: Pass a NOT NULL expression instead.

PLS-00568: cannot access rows from a non-nested table item

Cause: You attempted to use TABLE expression, from a non-nested table

Action: pass the correct parameter

PLS-00569: numeric overflow or underflow

Cause: A constant literal is either too large or too small to fit in an Oracle number

Action: Change the value of the literal

PLS-00570: different number of columns in the multiset and cast expressions

Cause: Number of columns in the collection returned by MULTISSET and the number of columns for the CAST type don't match. For example: create type tab_obj as object (n number); create type tab1 as table of tab_obj; create table tab2 (col1 number, col2 number); select CAST(MULTISSET(select col1, col2 from tab2) as tab1) from tab2;

Action: None

PLS-00571: method access through data base link not yet supported on client side

Cause: Remote link is used with on client side

Action: Create a dummy function to call symbolic link on server side or wait till it is implemented

PLS-00572: improper constraint form used

Cause: "number" types cannot have a range. user-defined aggregate types and integer types cannot have scale or precision specified. Example: "x number(5,3)" is acceptable but "x number range 1..10" is not.

Action: Remove the constraint

PLS-00573: cannot constrain scale, precision, or range of an anchored type declaration

Cause: A variable declared with %TYPE or %ROWTYPE cannot have a scale, precision, or range constraint. Example: x y%TYPE(10) is not acceptable. It is legal to add "NOT NULL" or non-conflicting CHARACTER SET constraints to anchored type declarations.

Action: Remove the constraint or use a type name instead of an anchored type.

PLS-00580: supertype must be an object type

Cause: An attempt was made to declare an object type to have a supertype, but the specified supertype was not itself an object type. Object types can inherit only from other object types.

Action: Remove the supertype specification, or change it to refer to an object type. If the declaration appears correct, make sure the supertype has compiled correctly.

PLS-00581: inheritance is not supported for opaque types

Cause: An attempt was made to declare an opaque type with a supertype.

Action: Remove the supertype specification.

PLS-00582: attribute declarations are not allowed in opaque types

Cause: An attempt was made to declare an attribute in an opaque type.

Action: Remove the attribute declaration.

PLS-00583: size must be specified if opaque type is fixed-length

Cause: An attempt was made to declare a fixed-length opaque type without specifying an explicit size.

Action: Specify an explicit size, or change the declaration to be varying-length.

PLS-00584: size of an opaque type must be between 1 and 4000 bytes

Cause: An attempt was made to specify an explicit size for an opaque type, but the specified size was out of the valid range.

Action: Change the explicit size to be between 1 and 4000 bytes, or change the declaration to be varying-length without an explicit size.

PLS-00585: declared support library for opaque type is not a library

Cause: An attempt was made to name a support library for an opaque type, but the name refers to an object that is not a library.

Action: Change the declaration to name a valid library.

PLS-00586: a static method cannot declare a parameter named SELF

Cause: An attempt was made to name a parameter SELF when declaring a static method. SELF is reserved as a parameter name in methods, to hold the object instance on which the method is applied. A parameter named SELF is not allowed in static methods because static methods do not apply to a particular object instance.

Action: Change the name of the parameter in the declaration.

PLS-00587: a static method cannot be invoked on an instance value

Cause: An attempt was made to use an object instance value, not a typename, as the qualifier of the name of a method invocation, but only a typename can be used as the qualifier when calling a static method.

Action: Use the typename, not an object instance value, to qualify the name of a method if the method is static.

PLS-00588: unqualified instance attribute references allowed only in member methods

Cause: An attempt was made to use the name of an object instance attribute in the body of a static method, or in an initialization default value on another attribute. If the instance attribute is not qualified with a particular object instance that supplies a value, the instance attribute can be named only when it is inside a member method.

Action: Qualify the attribute reference with the name of an object value, or change the containing method to a member method rather than a static method.

PLS-00589: no attributes found in object type "string"

Cause: Table of non adt type is defined.

Action: Table of type should be of ADT type only

PLS-00590: attempting to create a subtype UNDER a FINAL type

Cause: An attempt was made to create a subtype UNDER a FINAL type.

Action: Avoid deriving a subtype from this FINAL type.

PLS-00591: this feature is not supported in client-side programs

Cause: One of the following features was used in a wrong context: pragma AUTONOMOUS_TRANSACTION, dynamic SQL statements, (e.g. EXECUTE IMMEDIATE), and bulk binds. These listed features can only be used in server-side programs but not client-side programs.

Action: Remove it or define a server-side subprogram to do the work and call the subprogram from the client.

PLS-00592: the type of a object table must be an object type

Cause: You have defined a typed-table of a non-object type.

Action: Replace the non-object type with an object-type.

PLS-00593: default value of parameter "string" in body must match that of spec

Cause: The default value initialization of a parameter in a subprogram body contained in a package body did not match that of the corresponding subprogram specification in the corresponding package specification.

Action: Change the default initialization of the parameter in body to match that of spec.

PLS-00594: the SELF parameter can be declared only as IN or as IN OUT

Cause: The SELF parameter was declared as an OUT parameter.

Action: Declare the SELF parameter as either an IN or an IN OUT parameter.

PLS-00595: the TABLE operator is not allowed in this context

Cause: This feature is not yet implemented.

Action: Don't use weak ref cursors with bulk binds.

PLS-00597: expression 'string' in the INTO list is of wrong type

Cause: This exception is raised for the following errors:

- the expression in INTO clause of OPEN or RETURNING statement is neither of legal SQL datatypes nor of PL/SQL RECORD datatype

- a collection of records is used in INTO clause of OPEN or RETURNING statement.

- a record or a collection of records is used in BULK COLLECT INTO

Action: Use expression with correct datatype in the INTO clause

PLS-00598: comparison of object with NULL using "string" is not allowed

Cause: An object is compared with NULL using a relational operator.

Action: Use IS NULL comparison operator.

PLS-00599: SAMPLE percentage must be in the range [0.000001,100)

Cause: The percentage number is not in the range [0.000001,100)

Action: Use a percentage number in the range [0.000001,100)

PLS-00600: SAMPLE cannot be applied to a remote object

Cause: SAMPLE applying to a remote object is not supported

Action: Do not use SAMPLE with a remote object

PLS-00601: partition extended object names may only be used with tables

Cause: User attempted to use a partition-extended object name with an object which is not a table.

Action: Avoid using partition-extended name syntax with objects which are not tables

PLS-00602: CUBE and ROLLUP may appear only in a GROUP BY clause

Cause: User attempted to use the keywords CUBE or ROLLUP outside a GROUP BY clause

Action: Avoid using the keywords CUBE and ROLLUP outside the GROUP BY clause

PLS-00603: GROUPING function supported only with GROUP BY CUBE or ROLLUP

Cause: User attempted to use the GROUPING function without GROUP BY CUBE or GROUP BY ROLLUP

Action: Avoid using the GROUPING function without GROUP BY CUBE or ROLLUP

PLS-00604: aggregate function is not allowed here

Cause: One of the functions, such as AVG, COUNT, MAX, MIN, SUM, STDDEV or VARIANCE, was used in a WHERE or GROUP BY clause

Action: Remove the group function from the WHERE or GROUP BY clause. The desired result may be achieved by including the function in a subquery or HAVING clause.

PLS-00605: set operators are not yet supported as an argument to a MULTISSET operator

Cause: A set operator was used in a subquery that was the argument to a MULTISSET operator.

Action: Rewrite your SQL statement so that it does not use a set operator in the subquery that is the argument to the MULTISSET operator.

PLS-00606: cursor subquery is not supported on client side in this release

Cause: A query that contains a cursor subquery is being used from client side.

Action: Use this feature from server side only.

PLS-00607: SQLJ Object Types can have only SQLJ Types as its supertype or subtype

Cause: You were trying to create a SQLJ Object Type under a non-SQLJ Object Type.

Action: Recreate the type as a SQLJ Object Type.

PLS-00608: the value of the USING clause must match that of the supertype

Cause: You were trying to create a SQLJ Object Type with a different value of the USING clause from the USING clause specified in its supertype.

Action: Change the value of the USING clause to match the USING clause in its supertype.

PLS-00609: the OVERRIDING clause is not valid for SQLJ Object Types

Cause: You were trying to a SQLJ Object Type method that override an inherited method.

Action: Change the SQLJ Object Type definition by removing the OVERRIDING method.

PLS-00610: ROW can be used only once in SET clause of UPDATE statement

Cause: You were trying to use ROW more than once in UPDATE statement.

Action: Remove all the additional ROW in set clause of UPDATE statement.

PLS-00611: right hand side can be only the variables of record type

Cause: with ROW on LHS, only PL/SQL records or %ROWTYPE variables are allowed on right hand side..

Action: Make appropriate changes, so that right hand side should only have variables of record or %ROWTYPE.

PLS-00612: Number of attributes do not match in SET clause

Cause: Number of columns do not match with number of attributes on record type on rhs.

Action: Make sure that number of columns match with the number of attributes in record on rhs.

PLS-00613: only one item is allowed, when using variables of record type

Cause: You are trying to use more than one values in VALUES clause or RETURNING INTO clause, when one of the value is of record type..

Action: Specify only one variable of record type, or don't use variables of record type.

PLS-00614: creating a FINAL NOT INSTANTIABLE type

Cause: An attempt was made to create a FINAL NOT INSTANTIABLE type. No useful operation can be performed with this type.

Action: Avoid using the keywords FINAL and NOT INSTANTIABLE together when creating types.

PLS-00615: type mismatch found at '*string*' between CASE operand and WHEN operands

Cause: In a simple CASE statement or expression, the CASE operand and WHEN operands do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the CASE operand and WHEN operands so that their datatypes match. Consider using datatype conversion functions in the CASE operand and/or WHEN operands.

PLS-00616: type mismatch found at '*string*' among result expressions in a CASE expression

Cause: In a CASE expression, the result expressions do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the result expressions so that their datatypes match. Consider using datatype conversion functions in the result expressions.

PLS-00617: at least one result in the CASE expression must not be NULL

Cause: All the results in the CASE expression are the literal NULL.

Action: Change at least one result in the CASE expression to be non-NULL.

PLS-00618: type mismatch found at '*string*' between operands in a NULLIF expression

Cause: In a NULLIF expression, the two operands do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the operands so that their datatypes match. Consider using datatype conversion functions in the operands.

PLS-00619: the first operand in the NULLIF expression must not be NULL

Cause: The first operand in the NULLIF expression is the literal NULL.

Action: Change the first operand in the NULLIF expression to be non-NULL.

PLS-00620: type mismatch found at '*string*' among operands in a COALESCE expression

Cause: In a COALESCE expression, the operands do not match in datatype, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the operands so that their datatypes match. Consider using datatype conversion functions in the operands.

PLS-00621: at least one operand in the COALESCE expression must not be NULL

Cause: All the operands in the COALESCE expression are the literal NULL.

Action: Change at least one operand in the COALESCE expression to be non-NULL.

PLS-00622: range constraints must be between -2147483647 and 2147483647

Cause: The range constraints specified for a `pls_integer` or `binary_integer` declaration did not fall between -2147483647 and 2147483647.

Action: Use range constraints between -2147483647 and 2147483647.

PLS-00623: FLOAT precision constraint must be between 1 and 126

Cause: The precision specified for a `FLOAT`, `REAL` or `DOUBLE PRECISION` did not fall between 1 and 126.

Action: Use precision constraints between 1 and 126.

PLS-00624: USING clause must be used with either aggregate or pipelined functions

Cause: USING clause cannot be used with functions that are not declared with AGGREGATE or PIPELINED properties.

Action: Define function body in PL/SQL or some other language (using external callout call specification).

PLS-00625: PARTITION/CLUSTER/ORDER-BY clause can only be used with IN parameters

Cause: A PARTITION/CLUSTER/ORDER-BY clause was used with an OUT or IN OUT ref-cursor parameter.

Action: Change the parameter mode to IN or use some other parameter with the PARTITION/CLUSTER/ORDER-BY clause.

PLS-00626: partitioned/clustering/ordered parameter must be a function argument

Cause: A partitioning or clustering/ordering specification specified on an argument that is not one of the function arguments.

Action: Specify partitioning/clustering/ordering based on the function ref-cursor formal argument.

PLS-00627: 'string' must be a strongly typed ref cursor

Cause: A partitioning or clustering/ordering specification specified on an argument that is not a strongly typed ref cursor.

Action: Specify partitioning/clustering/ordering based on the function ref-cursor formal argument.

PLS-00628: 'string' must be a valid record attribute

Cause: A partitioning or clustering/ordering specification must use only valid record attributes.

Action: Specify partitioning/clustering/ordering based on valid record attributes.

PLS-00629: PIPE statement cannot be used in non-pipelined functions

Cause: A PIPE statement was used in a non-pipelined function.

Action: Use PIPE statement only in pipelined functions.

PLS-00630: pipelined functions must have a supported collection return type

Cause: A pipelined function was specified with an unsupported return type. The following are not supported as return types of pipelined functions:

- non-collections,
- PL/SQL tables,
- associative arrays,
- collections of PL/SQL types: rowid, mlslabel, long, long raw, boolean, binary_integer, pls_integer, string and urowid The following restrictions apply:
 - If the return type is a collection of records, then each of the attributes of the record must be a supported type.
 - A collection of records must not contain a record type as one of its attributes.

Action: Specify a supported collection type as the pipelined function return type.

PLS-00631: PARTITION-BY and CLUSTER/ORDER-BY clauses must be used with the same function argument

Cause: PARTITION-BY and CLUSTER/ORDER-BY clauses are specified on different function arguments.

Action: Use the same argument in both PARTITION-BY and CLUSTER/ORDER-BY clauses.

PLS-00632: NOT INSTANTIABLE method cannot have a body

Cause: An attempt was made to provide an implementation for a NOT INSTANTIABLE method.

Action: Remove the implementation for the NOT INSTANTIABLE method.

PLS-00633: RETURN statement in a pipelined function cannot contain an expression

Cause: A RETURN statement in a pipelined function contains an expression, which is not allowed. Pipelined functions must send back values to the caller by using the PIPE statement.

Action: Remove the expression from the RETURN statement and use a PIPE statement to return values. Else, convert the function into a non-pipelined function.

PLS-00634: type with NOT INSTANTIABLE methods must be declared NOT INSTANTIABLE

Cause: The type being created contains NOT INSTANTIABLE methods, either declared or inherited. The type must be explicitly declared NOT INSTANTIABLE

Action: Explicitly specify the NOT INSTANTIABLE keyword or provide implementations for all the NOT INSTANTIABLE methods.

PLS-00635: method does not override

Cause: The method specification contains the OVERRIDING keyword but the method does not override a method in the ancestor types.

Action: Check the method specification.

PLS-00636: overriding method requires OVERRIDING keyword

Cause: An attempt was made to provide an overriding method specification, but the OVERRIDING keyword was not specified.

Action: Modify the method specification and specify the OVERRIDING keyword.

PLS-00637: FINAL method cannot be overridden or hidden

Cause: An attempt was made to override a FINAL MEMBER method or hide a FINAL STATIC method.

Action: Avoid overriding FINAL MEMBER methods or hiding FINAL STATIC methods

PLS-00638: cannot overload MAP method

Cause: The MAP method does override the inherited one.

Action: Make the specifications match.

PLS-00639: NCHAR/NVARCHAR2 cannot be byte length semantics

Cause: NCHAR/NVARCHAR can only be codepoint length semantics. BYTE qualifiers used with NCHAR is illegal: nc NCHAR(7 BYTE); name NVARCHAR2(10 byte);

Action: Remove BYTE qualifier to make it as codepoint length semantics

PLS-00640: a pipelined function cannot be called from PL/SQL context

Cause: A pipelined function was invoked from a PL/SQL expression.

Action: Use the pipelined function in the FROM clause of a SQL query.

PLS-00641: INTO clause not allowed for this SELECT statement

Cause: A SELECT statement in a cursor definition, an OPEN statement or a cursor FOR loop has an erroneous INTO clause.

Action: Remove the INTO clause.

PLS-00642: local collection types not allowed in SQL statements

Cause: A locally-defined (i.e. not schema level) collection type was used in a SQL statement. The type must be defined in a schema to be accepted in a SQL statement.

Action: Define the collection type in your schema, not inside a PL/SQL subprogram.

PLS-00643: booleans, index tables, records and cursors not allowed in SQL statements

Cause: Items of type boolean, table of foo index by binary_integer, record and static cursors cannot be used in SQL statements.

Action: Remove expressions of these types from the SQL statement.

PLS-00644: character set mismatch found at 'string' among result expressions in a CASE expression

Cause: In a CASE expression, the result expressions do not match in character set, and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the result expressions so that their character sets match.

PLS-00645: character set mismatch found at 'string' among operands in a COALESCE expression

Cause: In a COALESCE expression, the operands do not match in character set and it is unclear which implicit conversion is required to correct the mismatch.

Action: Change the operands so that their character sets match.

PLS-00646: MAP or ORDER method must be defined in the root of the subtype hierarchy

Cause: An attempt was made to define a MAP or ORDER method in a subtype.

Action: Define the MAP or ORDER method in the root of the subtype hierarchy. You can override MAP methods in subtypes.

PLS-00647: attribute by name "string" conflicts with method by same name

Cause: While creating a subtype some attribute name conflicted with a method name.

Action: Use a different name for attribute or method in the type being created.

PLS-00648: type of supertype attribute "string" can not be a subtype or reference to a subtype in this release

Cause: User tried to complete a type, Tsub as a subtype of another type, Tsuper where Tsuper contained an attribute of type Tsub or of type REF to Tsub. This is an implementation restriction.

Action: Change the design of code to not use any type with attribute whose type is of subtype or REF to subtype.

PLS-00649: method "string" can be overridden only once per object type

Cause: User tried to override the method more than once in the same subtype.

Action: Either make this an extra overload by removing the OVERRIDING keyword where the method signature is different. The argument types should be reconsidered otherwise.

PLS-00650: invalid type for PARTITION/CLUSTER/ORDER BY clause

Cause: User tried to use invalid type for PARTITION/CLUSTER/ORDER BY clause.

Action: Use legal allowed types.

PLS-00651: implementation type in Aggregate/Table function should be a valid type

Cause: User tried to use some other database object like a package to define implementation type of an aggregate/table function.

Action: Use a valid user defined type as implementation type.

PLS-00652: aggregate functions should have exactly one argument

Cause: User tried to create aggregate function with either 0 or more than one arguments.

Action: Do not create aggregate function with 0 or more than one argument.

PLS-00653: aggregate/table functions are not allowed in PL/SQL scope

Cause: User tried to use a table/aggregate function in PL/SQL scope.

Action: Do not use table/aggregate function in PL/SQL scope.

PLS-00654: PARTITION/ORDER/CLUSTER BY are allowed for only with PARALLEL_ENABLE

Cause: User tried partition by order by cluster by without parallel enable clause in table function.

Action: specify parallel enable also when using partition by, cluster by order by clause.

PLS-00655: only functions can be declared as PIPELINED

Cause: user is trying to declare a procedure to be pipelined function

Action: declare a function instead of a procedure to be a pipelined function

PLS-00656: field 'string' not available in input argument

Cause: An EXTRACT operation specified a field that was not present. For example, you tried to extract the YEAR field from a TIME variable.

Action: Specify a legal field in the call to EXTRACT.

PLS-00657: Implementation restriction: bulk SQL with associative arrays with VARCHAR2 key is not supported.

Cause: Variable or expression of associative array type was used as bulk SQL bind or define.

Action: Use collection types supported by bulk SQL.

PLS-00658: constructor method name must match type name

Cause: The name of the object type constructor does not match the type name.

Action: Change the name of the constructor method to match the type name.

PLS-00659: constructor method must return SELF AS RESULT

Cause: The return clause of the constructor method did not specify SELF AS RESULT.

Action: Change the return clause to include RETURN SELF AS RESULT.

PLS-00660: SELF parameter of constructor method must be IN OUT

Cause: The mode of the SELF parameter of the constructor was not IN OUT.

Action: Change the mode of the SELF parameter to be IN OUT.

PLS-00661: RETURN statement in a CONSTRUCTOR cannot include an expression

Cause: An attempt was made to include an expression in the RETURN statement of a CONSTRUCTOR body.

Action: Remove the expression from the RETURN statement.

PLS-00662: Non-external object types containing external mapped attributes are not allowed

Cause: An attempt was made to create a non-external object, whose attributes are mapped externally.

Action: Create the object as an external object.

PLS-00663: the NEW keyword is not allowed in this context

Cause: The NEW keyword is not followed by an call to a constructor method.

Action: Remove the NEW keyword, or make sure the expression following it is a constructor call.

PLS-00664: Both ORDER BY and CLUSTER BY can not be specified for the same table function

Cause: An attempt was made to specify both ORDER BY and CLUSTER BY for the same table function.

Action: specify either ORDER BY or CLUSTER BY for a table function, but not both.

PLS-00665: ORDER BY and CLUSTER BY clauses require a PARTITION BY clause

Cause: An attempt was made to specify an ORDER BY or CLUSTER BY clause without also specifying a PARTITION BY clause.

Action: Add a PARTITION BY clause, or remove the ORDER BY or CLUSTER BY clause.

PLS-00666: Only index by binary_integer/pls_integer associative arrays allowed here

Cause: An attempt was made to specify index collection that was not indexed by binary_integer or pls_integer.

Action: Change the index collection variable type to associative array that is indexed by binary_integer or pls_integer.

PLS-00667: Element type of associative array should be pls_integer or binary_integer

Cause: An attempt was made to specify index collection whos element type was not one of pls_integer or binary_integer.

Action: Change the index collection variable type to associative array whose element type is pls_integer or binary_integer.

PLS-00668: Type of expression should be a collection type

Cause: An attempt was made to specify expression after INDICES OF or VALUES OF clause whose type is not a collection type.

Action: Change the index collection expression type to a valid collection type.

PLS-00669: Type of expression should be a valid collection variable

Cause: An attempt was made to specify expression after INDICES OF or VALUES OF clause that is not a collection variable.

Action: Change the index collection expression type to a valid collection variable.

PLS-00670: sort columns must be simple column names

Cause: An attempt was made to specify an expression as a sort column in a PARTITION BY, CLUSTER BY or ORDER BY clause. Only simple column names are permitted.

Action: Specify a simple column name.

PLS-00671: this expression is allowed only with instance methods

Cause: The generalized invocation syntax was used in instance method context.

Action: The generalized invocation syntax can only be used in a instance method that is not a constructor

PLS-00672: The expression *string* should be a subtype of the type *string*

Cause: The expression in the generalized expression should be a sub type of the type.

Action: The type of expression should be a subtype of the type name

PLS-00673: Generalized expression is not allowed in this context

Cause: The generalized expression is used in wrong context

Action: Fix the expression and remove the generalized expression syntax.

PLS-00674: references to fields of BULK In-BIND table of records or objects must have the form A(I).F

Cause: The form table(bulk_index).field is the only field selection supported at runtime.

Action: Use a FOR loop instead of the FORALL DML statement (MERGE/INSERT/DELETE/UPDATE) or revise reference to fit the form allowed.

PLS-00675: invalid section for this type of Compound Trigger

Cause: Before and After row sections are not allowed for Compound triggers defined on the Table and instead of row section is not allowed for Compound Triggers defined on a view.

Action: Remove the invalid sections for this context.

PLS-00676: duplicate Compound Triggers section

Cause: Each Compound Trigger Section can appear at most once in a body of the compound trigger

Action: Remove the offending sections.

PLS-00677: Compound Triggers cannot be autonomous transactions

Cause: The Compound Triggers hsd pragma autonomous transaction.

Action: Call autonomous function or procedure, if autonomous transaction behavior is desired from Compound Triggers.

PLS-00678: RETURN statement not allowed inside Compound Triggers

Cause: A return Statement was seen inside a compound trigger

Action: Remove Return statement and use other PL/SQL constructs to transfer flow of control.

PLS-00679: trigger binds not allowed in before/after statement section

Cause: :new or :old were used in this section.

Action: Do not use trigger binds in this section

PLS-00680: BEFORE/AFTER ROW sections were used in a view trigger

Cause: BEFORE/AFTER ROW sections are not allowed with instead of row triggers.

Action: Remove the offending sections.

PLS-00700: PRAGMA EXCEPTION_INIT of *string* must follow declaration of its exception in the same declarative part

Cause: An EXCEPTION_INIT pragma was not declared in the same block as its exception. They must be declared in the proper order in the same block, with the pragma declaration following the exception declaration.

Action: Place the EXCEPTION_INIT pragma directly after the exception declaration referenced by the pragma.

PLS-00701: illegal ORACLE error number *string* for PRAGMA EXCEPTION_INIT

Cause: The error number passed to an EXCEPTION_INIT pragma was out of range. The error number must be in the range -9999 .. -1 (excluding -100) for Oracle errors or in the range -20000 .. -20999 for user-defined errors.

Action: Use a valid error number.

PLS-00702: second argument to PRAGMA EXCEPTION_INIT must be a numeric literal

Cause: The second argument passed to an EXCEPTION_INIT pragma was something other than a numeric literal (a variable, for example). The second argument must be a numeric literal in the range -9999 .. -1 (excluding -100) for Oracle errors or in the range -20000 .. -20999 for user-defined errors.

Action: Replace the second argument with a valid error number.

PLS-00703: multiple instances of named argument in list

Cause: Two or more actual parameters in a subprogram call refer to the same formal parameter.

Action: Remove the duplicate actual parameter.

PLS-00704: '*string*' must be declared as an exception

Cause: The exception_name parameter passed to an EXCEPTION_INIT pragma is misspelled or does not refer to a legally declared exception. Or, the pragma is misplaced; it must appear in the same declarative section, somewhere after the exception declaration.

Action: Check the spelling of the exception_name parameter. Then, check the exception declaration, making sure the exception name and the keyword EXCEPTION are spelled correctly. Also make sure the pragma appears in the same declarative section somewhere after the exception declaration.

PLS-00705: exception '*string*' used in expression requiring return type

Cause: An exception was referred to in an expression. Exceptions have names but not values and therefore cannot contribute values to an expression. For example, the following RETURN statement is illegal: `FUNCTION credit_limit (cust_no INTEGER) RETURN NUMBER IS limit NUMBER; over_limit EXCEPTION; ... BEGIN ... RETURN over_limit; -- illegal END;`

Action: Check the spelling of the identifiers in the expression, then rewrite the expression so that it does not refer to an exception.

PLS-00706: Exception *string* cannot be used as prefix of a selected component

Cause: An exception name was mistakenly used to qualify a reference to a component. For example, when dot notation was used to specify fields within a record, an exception name might have been coded instead of the record name.

Action: Rewrite the component reference using a valid prefix (for example, the name of a package, record, or schema).

PLS-00707: unsupported construct or internal error [*string*]

Cause: At run time, this is an internal error. At compile time, it indicates one of the following problems: -- A call was made to a remote subprogram that has a parameter type or default expression not supported at the calling site. -- An incomplete upgrade or downgrade was done to a database that has stored procedures. Perhaps incorrect versions of system packages such as STANDARD.SQL were installed. -- A compiler bug was encountered. In such cases, legal PL/SQL syntax will fail to compile.

Action: Either report the internal error to your Customer Support representative or, depending on the problem, take one of the following actions: -- Revise the logic of the application to use parameter types and default expressions that are supported at both the local and remote sites. -- Complete the upgrade or downgrade properly, making sure to install correct versions of all system packages. -- Report the legal-syntax error to your Customer Support representative. If there are line and column numbers displayed with the error message, they might help you find a workaround. For example, try recoding the offending line to avoid the bug.

PLS-00708: Pragma *string* must be declared in a package specification

Cause: The named pragma was not declared in a package specification, as required. For example, the pragma RESTRICT_REFERENCES must be declared in a package specification.

Action: Remove or relocate the misplaced pragma.

PLS-00709: pragma *string* must be declared in package specification and body

Cause: The named pragma was declared in a package specification but not in the corresponding package body or vice-versa, as well as the package body.

Action: Add the pragma to that part of the package declaration that does not have the pragma.

PLS-00710: Pragma *string* cannot be specified here

Cause: The pragma was specified in an inappropriate context.

Action: Remove or relocate the misplaced pragma. Check the documentation to determine the correct context for this pragma.

PLS-00711: PRAGMA *string* cannot be declared twice

Cause: The PRAGMA was declared twice in the same block.

Action: remove the duplicate declaration of the PRAGMA

PLS-00712: illegal option for subprogram *string*

Cause: Only top level subprograms or subprogram declarations in PACKAGE or TYPE specifications are allowed to have the options DETERMINISTIC or PARALLEL_ENABLE. For example, this error would be raised if the options are used in PACKAGE or TYPE body.

Action: remove the option.

PLS-00713: attempting to instantiate a type that is NOT INSTANTIABLE

Cause: An attempt was made to instantiate a type that is defined as NOT INSTANTIABLE.

Action: Avoid instantiating variables of this NOT INSTANTIABLE type, instead derive an INSTANTIABLE subtype from it and instantiate variables of the subtype.

PLS-00714: supertypes's AUTHID is DEFINER but supertype and subtype are not in same schema

Cause: The supertype's AUTHID is DEFINER, but the supertype and subtype are defined in different schemas. SQL statements executed in dynamically dispatched methods can potentially pick up different values from database tables in the two schemas.

Action: Create the subtype in the same schema as the supertype.

PLS-00715: attribute or method by name '*string*' does not exist

Cause: An attempt was made to drop a nonexistent method or attribute from the type being altered.

Action: Check the spelling of the attribute or method name. Make sure it is locally defined in the type and not inherited.

PLS-00716: Attribute/method '*string*' can occur only once in an ALTER TYPE statement

Cause: User attempted more than one of ADD, DROP or MODIFY on an attribute in single ALTER TYPE statement. User attempted more than one of ADD or DROP on a method in single ALTER TYPE statement.

Action: Do only one ADD, DROP or MODIFY for an attribute in single ALTER TYPE statement. Do only one ADD or DROP for a method in single ALTER TYPE statement.

PLS-00717: method '*string*' does not have matching signature among existing methods

Cause: The method to be dropped matches the name of some existing method but does not match it in signature.

Action: Make sure that a matching method signature is provided for dropping a method.

PLS-00718: type of attribute '*string*' does not allow modifications to the attribute

Cause: The type of the attribute to modify is not one of VARCHAR2, NUMBER, or RAW.

Action: Only VARCHAR2, NUMBER and RAW type attributes are allowed to be modified.

PLS-00719: only widening of attribute '*string*' constraints is allowed

Cause: Modification to the attribute did not widen its constraints or attempted to change the type of the attribute. For NUMBER type attributes, scale and precision

can be changed to allow increase in number of digits after and before the decimal point. For VARCHAR2 and RAW type attributes the size can be increased. Other type attributes are not allowed to be modified. Change of type of attribute is also not allowed.

Action: Change the constraint specification so as to widen the existing constraints. To narrow the constraints or to change the type of the attribute, you must drop the attribute and add it with new constraints or new type. In that case you must also take appropriate steps to preserve your existing data based on the type (if you want to preserve it). Typically this will involve backing up the data and restoring it after the ALTER TYPE.

PLS-00720: type 'string' has evolved

Cause: The type has evolved. The version of the type used by the compiled code is not the same as the latest version of the type.

Action: Recompile the code to use the latest version of the type.

PLS-00721: 'string' formed a non-REF mutually-dependent cycle with 'string'

Cause: This compilation was aborted because the library unit that was compiled would have formed a non-REF mutually-dependent cycle with some other library units. This happens when an attempt is made to compile types that have attributes of other types that may participate in a cycle with this type. Example: create type t1; create type t2 (a t1); create type t1 (a t2);

Action: Break the cycle (possibly by adding a REF or by using another type).

PLS-00722: supertypes's AUTHID is different than subtype's AUTHID

Cause: The subtype's AUTHID must be same as the supertype's AUTHID.

Action: Create the subtype with AUTHID of its supertype or do not specify AUTHID for subtype.

PLS-00725: type 'string' must be a supertype or subtype of the TREAT expression

Cause: In TREAT(<expr> AS <type>), type must be a supertype or subtype of <expr>.

Action: None

PLS-00726: MODIFY ELEMENT is supported only on schema-level varray and nested tables

Cause: An attempt was made to modify the limit of a type that was not a schema-level varray and nested table type.

Action: This is not a legal ALTER TYPE command for this type.

PLS-00727: MODIFY LIMIT is supported only on schema-level varray types

Cause: An attempt was made to modify the limit of a type that was not a schema-level varray type.

Action: This is not a legal ALTER TYPE command for this type.

PLS-00728: the limit of a VARRAY can only be increased and to a maximum 2147483647

Cause: An attempt was made to decrease the limit or raise it past 2147483647.

Action: This is not a legal limit for this type, change it.

PLS-00729: only widening of the collection element type is allowed

Cause: Modification to the collection element type did not widen its constraints or attempted to change the type of the element. For NUMBER types, scale and

precision can be changed to allow increase in number of digits after and before the decimal point. For VARCHAR2 and RAW type attributes the size can be increased.

Action: Change the constraint specification so as to widen the existing constraints.

PLS-00730: collection element type does not allow modifications

Cause: The element type to modify is not one of VARCHAR2, NUMBER, or RAW.

Action: Only VARCHAR2, NUMBER and RAW collection elements can be modified.

PLS-00731: ALTER TYPE is supported only on schema-level types

Cause: An attempt was made to alter a type that was not schema-level.

Action: ALTER TYPE is not legal for this type.

PLS-00732: Illegal overload of ellipsis in formal parameter list

Cause: An ellipsis and a non-ellipsis type appeared at the same position in separate overload candidates. Currently, if ellipsis types are used they must appear in ALL overload candidates with the same name (regardless of the number or types of their formal parameters) at the same position in the formal parameter list.

Action: Make sure that ellipsis types appear at the same position in all overload candidates.

PLS-00733: RPCs to variable argument functions are not allowed

Cause: Attempted to call a vararg function (a function which contains ellipsis in the formal parameter list) as an RPC.

Action: Do not call vararg functions as an RPC.

PLS-00734: Illegal use of an associational parameter with a formal ellipsis

Cause: Attempted to use an associational actual argument for a formal ellipsis type argument.

Action: Remove associational parameters which correspond to formal ellipsis types.

PLS-00735: Attempted to declare more than one formal ellipsis parameter

Cause: More than one ellipsis ('...') was found in a formal parameter specification for a function or procedure

Action: Make sure only one ellipsis appears in a formal parameter specification for any given function or procedure

PLS-00736: user-declared operators are not allowed

Cause: An attempt was made by the user to declare an operator (a function whose name is enclosed in single quotes ('')). Operators may only be declared in package STANDARD.

Action: Remove the single quotes from around the function name, replacing them with double quotes (""") only if needed.

PLS-00737: LIBRARY or ASSEMBLY file specification exceeds the maximum allowed length

Cause: A string of more than expected number of characters was found for the LIBRARY or ASSEMBLY file specification.

Action: Limit the LIBRARY or ASSEMBLY file specification to the appropriate size for the platform.

PLS-00738: REF target *string* changed during compilation

Cause: The current unit contains a REF to a target object. During compilation, the REF's target object was simultaneously changed by a different session. The current unit is therefore invalid and needs to be recompiled to pick up the latest definition of the REF target.

Action: Recompile the unit that has this error.

PLS-00739: FORALL INSERT/UPDATE/DELETE not supported on remote tables

Cause: The current statement refers to remote insert/update/delete for remote object.

Action: Use a FOR loop instead of a FORALL loop or call a remote function or procedure that includes the FORALL INSERT/UPDATE/DELETE statement.

PLS-00740: ASSEMBLY identity specification exceeds the maximum allowed length

Cause: A string of more than expected number of characters was found for the ASSEMBLY identity specification.

Action: Limit the ASSEMBLY identity specification to the appropriate size.

PLS-00741: *string* must be specified on subprogram *string*'s declaration and definition

Cause: A property was specified on a subprogram's declaration but not on its definition or vice-versa.

Action: Certain subprogram properties (e.g., RESULT_CACHE) must be specified as part of the subprogram declaration and definition. For example, if the property RESULT_CACHE is specified on a subprogram declared in a package specification, then it must also be specified on the subprogram's definition in the package body (and vice-versa).

PLS-00742: field *string* is not yet denotable

Cause: When the fields of a record were declared, one field was used to initialize another, as in: TYPE my_rec IS RECORD (f1 varchar2(10), f2 varchar2(10) := f1); The first field has no value until run time, so it cannot be used to initialize another field.

Action: Remove the illegal field reference.

PLS-00743: ASSEMBLY IDENTITY *string* is null

Cause: The string provided for the identity clause of an ASSEMBLY was null.

Action: Provide a valid identity string for the ASSEMBLY.

PLS-00744: DOTNET call specification *methodname* is null

Cause: The string provided for the METHODNAME clause of a DOTNET call specification was null.

Action: Provide a valid METHODNAME for the ASSEMBLY.

PLS-00745: ASSEMBLY CONTEXT *string* is null

Cause: The string provided for the CONTEXT clause of an ASSEMBLY was null.

Action: Provide a valid CONTEXT string for the ASSEMBLY.

PLS-00746: ASSEMBLY AGENT *string* is null

Cause: The string provided for the AGENT clause of an ASSEMBLY was null.

Action: Provide a valid AGENT string for the ASSEMBLY.

PLS-00747: .NET assemblies are not supported on this platform

Cause: .NET assemblies were not supported on this platform. .NET assemblies are only supported on 32-bit and 64-bit Windows.

Action: Only attempt to create assemblies on 32-bit or 64-bit Windows.

PLS-00748: compilation terminated due to other errors

Cause: Compilation of the library unit was terminated because of other reported errors.

Action: Fix the other reported errors.

PLS-00751: cannot find PACKAGE SYS_STUB_FOR_PURITY_ANALYSIS

Cause: A top level subprogram (function or procedure) cannot be created if the system package SYS_STUB_FOR_PURITY_ANALYSIS is missing in the Oracle database.

Action: Make sure the package is in the database, and retry the creation

PLS-00752: Table function *string* is in an inconsistent state.

Cause: Some of the internally generated types prefixed with SYS_ have been dropped. These should never be dropped by the user.

Action: Recompile the table function or the package or type that contains the table function.

PLS-00753: malformed or corrupted wrapped unit

Cause: The format of the wrapped unit being compiled is not understood by the compiler. This may be because the unit was edited or modified after it was wrapped.

Action: Rewrap the unit.

PLS-00754: illegal reference to editioned object *string*

Cause: An attempt was made to violate the rule "A noneditioned object may not depend on an editioned object."

Action: Either make this object editioned; or do not make the illegal reference.

PLS-00755: SYSAUX tablespace offline while saving identifier data

Cause: The SYSAUX tablespace was offline while attempting to save identifier data. Any identifier data previously collected and saved for the libunit will be invalid.

Action: Bring the SYSAUX tablespace back online and recompile the object.

PLS-00756: PL/SQL does not support feature "*string*" "*string*" in this environment

Cause: Some host environments of the PL/SQL compiler do not support the full range of PL/SQL features. A construct in the program violated one of the current host's restrictions.

Action: Modify the program to avoid using features that are not supported by this host environment. Check the host environment documentation for specific changes and limitations in PL/SQL features.

PLS-00801: internal error [*string*]

Cause: This is a generic internal error that might occur during compilation or execution. The first parameter is the internal error number.

Action: Report this error as a bug to your Customer Support representative.

PLS-00900: can't find body of unit '*string*'

Cause: At run time, the body of a program unit could not be found. This can happen for one of two reasons. -- First, there may be a unit 'a' which calls a module 'b', where the spec for 'b' exists but not the body. In this case, since the spec is present, there will be no compile-time errors. -- Secondly, this can occur if there is a reference to a sequence outside of the proper context such as a SQL statement. In this case, the "spec" of the sequence reference can be found, but it is invalid to actually run code which references the sequence outside a SQL statement, as in: `i := seq.nextval;`

Action: If caused by the first reason, create a body for the object that is being referenced. If caused by the second reason, move the sequence into a SQL statement. For example, `i := seq.nextval;` can be replaced by: `select seq.nextval into temp from dual; i := temp;`

PLS-00901: the data type of column '*string*' of table '*string*' is not supported

Cause: A column in a database table belongs to a datatype that is not supported by the current release of PL/SQL.

Action: Remove the offending column from the table or copy the desired columns to another table.

PLS-00902: A READ-ONLY bind variable used in OUT or IN-OUT context

Cause: A host variable that is protected from update was used in a context that allows an update.

Action: Check the context and change the use of the host variable, or assign the value of the host variable to a PL/SQL local variable, then use the local variable instead.

PLS-00904: insufficient privilege to access object *string*

Cause: An attempt was made to operate on a database object without the required privilege. This error occurs, for example, if an attempt was made to UPDATE a table for which only SELECT privileges were granted.

Action: Ask the DBA to perform the operation or to grant you the required privilege.

PLS-00905: object *string* is invalid

Cause: An invalid package specification or stored subprogram was referenced. A package specification or stored subprogram is invalid if its source code or any database object it references has been DROPPed, REPLACed, or ALTERed since it was last compiled.

Action: Find out what invalidated the package specification or stored subprogram, then make sure that Oracle can recompile it without errors.

PLS-00906: Compilation is not possible

Cause: The PL/SQL compiler cannot run properly because its operating environment is corrupted. For example, its error message file might be inaccessible.

Action: Check the PL/SQL operating environment, making sure that all files required by the compiler are accessible.

PLS-00907: cannot load library unit *string* (referenced by *string*)

Cause: PL/SQL is unable to find and load a library unit that was previously available. This typically happens when you try to load a unit which references another library unit that is non-existent or invalid.

Action: Provide the needed library unit.

PLS-00908: The stored format of *string* is not supported by this release

Cause: PL/SQL cannot understand the stored format of a library unit. It has been compiled or shrink-wrapped with a version of PL/SQL either too new or too old for this version to understand it.

Action: Recompile the library unit for this version of PL/SQL.

PLS-00909: object *string* is not declared or insufficient privileges to access object *string*

Cause: An object from the operator declaration is not declared, or it is declared but there is no sufficient privileges to access that object.

Action: Declare the object, or ask the DBA to grant the privileges required to access the object.

PLS-00910: insufficient privilege to inherit from type *string*

Cause: An attempt was made to inherit from a type without the required UNDER privilege.

Action: None

PLS-00920: parameter *plsql_native_library_dir* is not set

Cause: A PL/SQL program is being compiled natively, but the compiler parameter *plsql_native_library_dir*, which denotes the directory to store the native shared objects (DLL), is not set.

Action: The DBA should set this parameter.

PLS-00923: native compilation failed: *string:string*

Cause: The native compilation of PL/SQL program has failed because the native shared object (DLL) could not be created successfully.

Action: The DBA should ensure that the commands specified in *spnc_commands* file are correct.

PLS-00924: native compilation is not supported on this platform

Cause: Native compilation of PL/SQL programs is not supported on this platform.

Action: Compile the PL/SQL program to bytecode by setting the parameter *plsql_compiler_flags* to INTERPRETED.

PLS-00925: native compilation failed: Unable to create file (*string string*)

Cause: Native compilation of a PL/SQL program failed because a file could not be created. It is likely that the system parameter *plsql_native_library_dir* does not reference a writable, existing directory

Action: Ensure that the system parameter *plsql_native_library_dir* references a directory which exists, and is writable.

PLS-00950: In this version, PL/SQL tables can not be used in this SQL statement.

Cause: In a SQL statement, a PL/SQL table was referenced incorrectly. For example, the following reference might have been made, but PL/SQL table attributes can only be used in procedural statements: `SELECT ename_tab.COUNT INTO name_count WHERE ...`

Action: Remove the incorrect reference from the SQL statement.

PLS-00951: *string* Feature is not supported by this release

Cause: PL/SQL cannot understand something in an imported library unit. It uses some feature either too new or too old for this version to understand it.

Action: Recompile the imported library unit with this version of PL/SQL, to discover more precisely what feature is not supported.

PLS-00960: RPCs cannot use parameters with schema-level object types in this release

Cause: Schema-level object types, or types which recursively use such types, were used in an RPC, which is not permitted. For example: create type foo as object (...)
create package my_pack is type my_rec is record(v foo); -- on a remote server: x
my_pack.my_rec@rpc; -- illegal attempt to use type my_rec

Action: Use only PL/SQL-defined types in RPC calls. It may be necessary to add extra code to element-wise copy schema-level types into local types in order to move such data through an RPC.

PLS-00970: The class name of a method must match that of EXTERNAL NAME clause in the type header

Cause: The class name defined as part of the method signature does not match the one defined in the type header in the EXTERNAL NAME clause. create type foo as object EXTERNAL NAME 'foo' LANGUAGE JAVA (... MEMBER FUNCTION my (number) return number EXTERNAL NAME 'bar.func(oracle.sql.NUMBER) return oracle.sql.NUMBER', ..);

Action: Either omit the class name from the method signature or use the one defined in the type header.

PLS-00989: Cursor Variable in record, object, or collection is not supported by this release

Cause: 3.0 Implementation Restriction for Ref Cursors

Action: None

PLS-00990: Index Tables of Cursor Variables are disallowed

Cause: 2.2 Implementation Restriction for Ref Cursors

Action: None

PLS-00992: Cursor Variables cannot be FETCH'ed from

Cause: 2.2 Implementation Restriction for Ref Cursors

Action: None

PLS-00993: Cursor variables cannot be passed as forwarded RPC arguments or results

Cause: An attempt was made to pass a cursor variable to or from a remote subprogram by way of a forwarded RPC, which is not allowed. For example, from a client-side tool, a procedure on a remote database cannot be used to open a cursor variable because remote subprograms cannot return the values of cursor variables.

Action: Change the subprogram call to reference the local database.

PLS-00994: Cursor Variables cannot be declared as part of a package

Cause: An attempt was made to declare a cursor variable in a package specification, which is not allowed. Although REF CURSOR types can be defined in a PL/SQL block, subprogram, or package, cursor variables can be declared only in a block or subprogram.

Action: Move the cursor variable declaration into a PL/SQL block or subprogram.

PLS-00995: unhandled exception # *string*

Cause: An exception was raised for which no handler was found. If it cannot find a handler for a raised exception, PL/SQL returns an unhandled exception to the host environment. The number embedded in the message is an Oracle error code listed in this manual.

Action: Fix the condition that raised the exception, write an appropriate exception handler, or use the OTHERS handler. If there is an appropriate handler in the current block, the exception was raised in a declaration or exception handler, and therefore propagated immediately to the enclosing block.

PLS-00996: out of memory

Cause: A request from PL/SQL for more memory failed.

Action: Make sure that you are not referencing the wrong row in a PL/SQL table and that the program is not recursing too deeply.

PLS-00997: no cursor return types allowed in this beta version

Cause: Cursor return types have bugs, and it is best to disable them for now.

Action: None

PLS-01400: Use of '||' token

Cause: Use of '||' token in expressions is not in ANSI's grammar. This corresponds to the "binary_add_op"'s reduction to a "CAT_" in plsqly.y

Action: None

PLS-01401: Identifier over 18 characters long

Cause: Identifiers over 18 characters long are not allowed under the ANSI grammar.

Action: None

PLS-01402: Use of quoted identifier

Cause: The use of quoted identifiers is a PL/SQL extension and is not allowed under the ANSI grammar.

Action: None

PLS-01403: Comment delimiters /* */

Cause: C-style comments (introduced with the '/' and '*' characters) are not part of the ANSI grammar. To conform with ANSI, comments must be preceded by the ANSI comment introducer, '--', and must not contain a newline. If someone can figure out a way to make this message look less cheesy without ending up with nested comments, be my guest.

Action: None

PLS-01404: ANSI Identifiers can only consist of letters, digits, and the underscore character

Cause: ANSI identifiers can only consist of letters, digits, and the underscore character. PL/SQL allows "#" and "\$" in identifiers, but these are not ANSI.

Action: None

PLS-01405: Under ANSI's grammar, numeric data represented in exponent notation must use an uppercase E

Cause: Under ANSI's grammar, numeric data represented in exponent notation must use an uppercase "E". Example: 3.45E-6 is ANSI, but 3.45e-6 is not.

Action: None

PLS-01406: An identifier has been found that is considered a keyword in ANSI's grammar but not in PL/SQL's

Cause: An identifier has been found that is considered a keyword in ANSI's grammar but not in PL/SQL's.

Action: None

PLS-01407: One of the identifiers CHAR, CHARACTER, or INTEGER has been redefined by the programmer

Cause: One of the identifiers "CHAR", "CHARACTER", or "INTEGER" (all ansi keywords) has been redefined by the programmer.(special case of 1406, above).

Action: None

PLS-01408: Use of '&' token

Cause: Use of '&' token in expressions is not in ANSI's grammar.

Action: None

PLS-01409: Use of 'PRIOR_' token

Cause: Use of 'PRIOR_' token in expressions is not in ANSI's grammar.

Action: None

PLS-01410: Use of 'MOD' token

Cause: Use of 'MOD' token in expressions is not in ANSI's grammar.

Action: None

PLS-01411: Use of 'REM' token

Cause: Use of 'REM' token in expressions is not in ANSI's grammar.

Action: None

PLS-01412: Use of 'EXP' token

Cause: Use of 'EXP' token in expressions is not in ANSI's grammar.

Action: None

PLS-01413: Use of NULL an expression

Cause: Use of NULL an expression not in ANSI's grammar.

Action: None

PLS-01414: Use of qualified expression here

Cause: Use of qualified expression here is not in ANSI's grammar.

Action: None

PLS-01415: Use of aggregate value here

Cause: Use of aggregate value here is not in ANSI's grammar.

Action: None

PLS-01416: Use of <id> (<value>...) here

Cause: Use of <id> (<value>...) here is not in ANSI's grammar.

Action: None

PLS-01417: Use of %%attribute

Cause: Use of %%attribute value here is not in ANSI's grammar.

Action: None

PLS-01418: Subquery cannot include set operators in ANSI's grammar

Cause: Subquery cannot include set operators in ANSI's grammar.

Action: None

PLS-01419: Subquery must have either '*' or exactly one column in its select list

Cause: Subquery must have either '*' or exactly one column in its select list according to ANSI's grammar.

Action: None

PLS-01420: INTERSECT and MINUS set operators are not ANSI

Cause: INTERSECT and MINUS set operators are not ANSI

Action: None

PLS-01421: FOR UPDATE clause

Cause: FOR UPDATE clause is not in ANSI's grammar.

Action: None

PLS-01422: Aliases

Cause: Aliases are not in ANSI's grammar.

Action: None

PLS-01423: Subquery on right-hand-side in set clause

Cause: Subquery on right-hand-side in set clause is not in ANSI's grammar.

Action: None

PLS-01424: Non-ANSI order of clauses

Cause: ANSI specifies an ordering to clauses in a table-expression which PL/SQL doesn't. The ordering according to ANSI must be: (1) from clause (2) where clause (3) group-by clause (4) having clause In PL/SQL, the from clause must come first, and the clauses after it can appear in any order (with the addition of the non-ansi connect-by clause).

Action: None

PLS-01425: Connect-by clause

Cause: ANSI doesn't allow connect-by clauses.

Action: None

PLS-01450: This <value expression> contains a nonconforming data type

Cause: This <value expression> contains a nonconforming data type. Section 4.2 of X3H2, "Data types" states that: "A nonnull value is either a character string or a number." Many builtin functions in STANDARD will be flagged with this warning by means of a pragma.

Action: None

PLS-01451: The data types of these <value expressions> must be comparable

Cause: The data types of these <value expressions> must be comparable. Section 4.2 of X3H2, "Data types", states that: "A character string and a number are not comparable values." Many builtin functions in STANDARD will be flagged with this warning by means of a pragma. This warning will be place on data-type

coercion functions, for example, TO_CHAR(<number>), that are inserted in OracleSQL to allow non-conforming data type combinations.

Action: None

PLS-01452: This function is not part of the ANSI standard

Cause: This function is not part of the ANSI standard. This warning is used to flag such functions as "POWER" that are not mentioned in the ANSI specifications.

Action: None

PLS-01453: This procedure is not part of the ANSI standard

Cause: This procedure is not part of the ANSI standard. This warning is used to flag such procedures as "STOP" that are not mentioned in the ANSI specifications.

Action: None

PLS-01454: No operator may be used with values of data type CHAR

Cause: No operator may be used with values of data type "character string". Section 5.9, "<value expression>", syntax rule 3, of X3H2 states: "If the data type of a <primary> is character string, then the <value expression> shall not include any operators." This warning is placed on many functions in STDBASE that take CHAR args.

Action: None

PLS-01455: The predicates IS NULL and IS NOT NULL are defined only for column specifications

Cause: The predicates "IS NULL" and "IS NOT NULL" are defined only for column specifications, not for any other expressions. Section 5.15, "<null predicate>", indicates that in the predicate "x IS NULL", x must be a column, and may not be any other kind of expression.

Action: None

PLS-01458: The set clause in an UPDATE statement requires a column name of length 1

Cause: The set clause in an UPDATE statement requires a column name of length 1. Sect. 8.11, 8.12

Action: None

PLS-01460: Cannot access object on a remote host

Cause: Cannot access object on a remote host.

Action: None

PLS-01463: STDDEV is not a standard set function

Cause: STDDEV is not a standard set function.

Action: None

PLS-01464: VARIANCE is not a standard set function

Cause: VARIANCE is not a standard set function.

Action: None

PLS-01466: Null strings are not allowed

Cause: Null strings are not allowed.

Action: None

PLS-01467: The value list of the IN predicate, if not a subquery, must contain only value_specifications

Cause: The value list of the IN predicate, if not a subquery, must contain only value_specifications (i.e. literals and PL/SQL or embedded variables).

Action: None

PLS-01468: The first argument of the like-predicate must be a column of type character string

Cause: The first argument of the like-predicate must be a column of type character string.

Action: None

PLS-01469: ANSI standard does not permit records

Cause: ANSI standard does not permit records.

Action: None

PLS-01470: The escape character in the like-predicate must be a literal or a variable of type CHAR

Cause: The escape character in the like-predicate must be a literal or a variable of type character.

Action: None

PLS-01471: The keyword DISTINCT must be present in a COUNT(DISTINCT sim_expr)

Cause: The keyword DISTINCT must be present in a COUNT(DISTINCT sim_expr). Sect 5.8

Action: None

PLS-01472: In a set_function_specification, if DISTINCT is present, the expression must be a column_specification

Cause: In a set_function_specification, if DISTINCT is present, the expression must be a column_specification.

Action: None

PLS-01473: Use <> instead of != or ~=

Cause: Use <> instead of != or ~= . Sect 5.11.

Action: None

PLS-01474: Use of ANY is non_ANSI

Cause: Due to the combining of comparison_predicate and quantified_predicate, we may have something like sim_expr = ANY_sim_expr, which is nonetheless accepted by kernel.

Action: None

PLS-01500: Unions are not allowed in the definition of a view

Cause: Unions are not allowed in the definition of a view. Sect. 6.9

Action: None

PLS-01501: Options in CREATE TABLE statement is non-ANSI.

Cause: CREATE TABLE allows only the definition of the structure of a table. None of the .SPACE__name. .PCTFREE__numeric_literal. .cluster. is ANSI. Sect. 6.2

Action: None

PLS-01502: Constraint name and constraint status are non-ANSI.

Cause: Constraint name and constraint status are non-ANSI. Sect. 6.3

Action: None

PLS-01503: The expression in a SET clause must not include a set function

Cause: The expression in a SET clause must not include a set function. Sect. 8.12.

Action: None

PLS-01504: Use of AS phase in CREATE TABLE statement is non_ANSI

Cause: CREATE TABLE allows only the definition of the structure of a table. Use of AS phase in CREATE TABLE statement is non-ANSI.

Action: None

PLS-01505: ALTER is non-ANSI

Cause: ALTER is non-ANSI

Action: None

PLS-01506: CREATE INDEX is non-ANSI

Cause: CREATE INDEX is non-ANSI

Action: None

PLS-01507: DROP is non-ANSI

Cause: DROP is non-ANSI

Action: Sect. 6.2

PLS-01701: Illegal syntax in ROLLBACK WORK statement

Cause: Illegal syntax in ROLLBACK WORK statement.

Action: None

PLS-01702: Illegal syntax in COMMIT WORK statement

Cause: Illegal syntax in COMMIT WORK statement.

Action: None

PLS-01703: Cursor name in CLOSE statement must be of length 1

Cause: Cursor name in CLOSE statement must be of length 1.

Action: None

PLS-01704: The expressions in a sort clause must be column specs or unsigned integers, with optional ASC or DESC

Cause: The expressions in a sort clause may only be column specifications or unsigned integers, followed by optional ASC or DESC.

Action: None

PLS-01705: table specified by a cursor not updatable if cursor specification has a UNION or ORDER_BY

Cause: Missing keyword FROM.

Action: None

PLS-01707: In positioned DELETE or UPDATE statement, table must be identified in specification of cursor

Cause: In a positioned DELETE or UPDATE statement, the table deleted from or updated must be identified in the specification of the cursor.

Action: None

PLS-01708: In searched DELETE, UPDATE or INSERT, table must not appear in FROM clause of subqueries in search condition

Cause: In a searched DELETE, UPDATE or INSERT statement, the table affected must not appear in a FROM clause in any of the subqueries in the search condition.

Action: None

PLS-01709: value list of INSERT statement, if specified with value list rather than subquery, must be value specification

Cause: In an INSERT statement, the insert value list, if specified with a value list rather than a subquery, must be value specifications, i.e. no compound expressions or column references. Sect 8.7.

Action: None

PLS-01710: In a positioned DELETE or UPDATE statement, the cursor name must be of length 1

Cause: In a positioned DELETE or UPDATE statement, the cursor name must be of length 1.

Action: None

PLS-01711: A SELECT statement may not contain ORDER_BY, HAVING, or GROUP_BY clause

Cause: A SELECT statement may not contain ORDER_BY, HAVING, or GROUP_BY clause. Sect. 8.10.

Action: None

PLS-01712: ANSI does not allow bind variables as INDICATORS

Cause: ANSI does not allow bind variables as INDICATORS

Action: None

PLS-01713: The constraints on these types do not match

Cause: The constraints on these types do not match

Action: None

PLS-01714: ANSI expects a column name not a literal value here

Cause: ANSI expects a column name not a literal value here

Action: None

PLS-01900: : character to number conversion error

Cause: There was a failure while converting a character string into a numeric value.

Action: Verify that all character strings assigned to number variables have valid numeric value interpretations.

PLS-01901: : host bind array too small

Cause: PL/SQL was unable to transfer data into a host array because the array is too small.

Action: Increase the size of the host array.

PLS-01902: : hex to raw conversion error

Cause: There was a failure while converting a hexadecimal string to a raw.

Action: Verify that the hexadecimal variable to be converted contains a valid hexadecimal value.

PLS-01903: : non-integer error number

Cause: SQLERRM() was called with a non-integer value.

Action: Make sure SQLERRM() is called with an integer value.

PLS-01904: : NULL index table key value

Cause: An attempt was made to index into an index table with a NULL key value.

Action: Make sure key values used to index into index tables are non-NULL.

PLS-01905: : character string buffer too small

Cause: An error was encountered while moving a character string from a source to a destination. This error occurs if, for example, an attempt is made to move a character string of 10 characters into a 1 character buffer. The cause of this error may not always be obvious. For example, the following will result in this error: a varchar2(1); b number; b := 10; a := b; An error results because an implicit conversion causes the number 10 to become the character string '10', which does not fit in the character buffer of 1 allocated for the variable a.

Action: First, look for character string assignment statements where the buffer size is mismatched. If there are none found, then consider the implicit conversion case illustrated in the example above.

PLS-01906: : raw variable length too long

Cause: The length of a raw variable being copied or assigned was too long to fit into its destination.

Action: Make sure the raw variable length is correct.

PLS-01907: : number precision too large

Cause: The number being copied or assigned had too many digits to the left of the decimal and did not fit into its destination. In other words, there is a number precision mismatch. This error may also occur if, for example, an attempt is made to assign a character string to a number, as demonstrated below. a varchar2(4); b number(1,1); a := '10.1'; b := a;

Action: First, check explicit number precision value mismatches. If none are found, then consider implicit conversions of other types to numbers, including conversions performed during binds.

PLS-01908: : RETURNING INTO buffer too small

Cause: PL/SQL determined that a server side DML with a RETURNING INTO clause does not use a buffer that is large enough to hold the data being returned.

Action: Increase the size of the RETURNING INTO clause buffer.

PLS-01909: : cannot assign supertype instance to subtype

Cause: An attempt was made to assign or copy a supertype instance to a container (destination) that can only hold a subtype instance.

Action: Make sure the runtime type of the source of the assignment or copy is the same type as the destination or is a subtype of the destination type

PLS-01910: : associative array shape is not consistent with session parameters

Cause: NLS parameters affecting comparison of keys have been altered dynamically. The associative array's index is invalid.

Action: Avoid using associative arrays with string keys in applications which require frequent changes of NLS_COMP and/or NLS_SORT.

PLS-01911: : associative array key violates its type constraints

Cause: The key value of an element being inserted into an associative array violates the the key type constraints.

Action: Relax the constraints if the key value is meant to be acceptable. Otherwise, apply a valid key value when inserting an element.

PLS-01912: : instance must of be of type 'string'

Cause: The run-time type of the instance is not the declared type. e.g. If the return value of a user defined constructor is wrong.

Action: Return the correct type.

PLS-01913: : instance must of be of type 'string' or one of its subtypes

Cause: The run-time type of the instance is the not declared type or one of its subtypes. e.g. TREAT(supertype AS subtype) fails.

Action: Catch the exception.

PLS-01914: duplicate SECURITY specification in subprogram expression

Cause: The subprogram was found to have two SECURITY specifications.

Action: Remove one of the SECURITY specifications.

PLS-01915: duplicate ASSEMBLY specification in subprogram expression

Cause: The subprogram was found to have two ASSEMBLY specifications.

Action: Remove one of the ASSEMBLY specifications.

PLS-01916: SECURITY level specification exceeds ASSEMBLY SECURITY specification

Cause: The security level specified in the callspec exceeds the maximum security level allowed by the assembly.

Action: Lower the security level specified in the callspec to match the maximum security level specified in the assembly.

PLS-01917: illegal reference to package STANDARD item 'string'

Cause: The item is intended for internal use and must not be referred to in user code.

Action: Remove the reference and use syntax that provides the necessary functionality.

PLS-01918: 9.2 and earlier wrap formats are not permitted

Cause: An attempt was made to compile a unit that was wrapped using 9.2 or earlier version of the wrap utility. Wrapped source created by 9.2 and earlier versions of wrap is not permitted on this database.

Action: Wrap the source using 10g or later versions of the wrap utility. Alternately, set the initialization parameter PERMIT_92_WRAP_FORMAT parameter to TRUE.

PLW-05000 to PLW-07206

PLW-05000: mismatch in NOCOPY qualification between specification and body

Cause: The indicated parameter was declared with the NOCOPY hint in the subprogram specification but not in the body, or it was declared with the NOCOPY hint in the body but not in the specification.

Action: Ensure that the specification and the body agree in their use of NOCOPY. If this mismatch is not corrected, the program will obey the declaration given in the specification, ignoring that in the body.

PLW-05001: previous use of 'string' (at line *string*) conflicts with this use

Cause: While looking for prior declarations of a variable, constant, or label, the compiler found another declaration with the same name in the same scope. Or, the headers of subprogram in a package specification and body were not identical.

Action: Check the spelling of the variable, constant, or label name. Also check the names of all parameters and exceptions declared in the same scope. Then, remove or rename the object with the duplicate name. Or, change the headers of the packaged subprogram in the package specification or body so that they are identical.

PLW-05003: same actual parameter(*string* and *string*) at IN and NOCOPY may have side effects

Cause: The indicated parameter was declared with the NOCOPY hint in the subprogram specification but not in the body, or it was declared with the NOCOPY hint in the body but not in the specification.

Action: Ensure that the specification and the body agree in their use of NOCOPY. If this mismatch is not corrected, the program will obey the declaration given in the specification, ignoring that in the body.

PLW-05004: identifier *string* is also declared in STANDARD or is a SQL builtin

Cause: The indicated identifier was also either: o) declared in package STANDARD, or o) a SQL builtin function, or o) a pseudo-column. This situation can result in name resolution issues since the STANDARD/builtin declaration will be chosen over the local declaration in SQL statements; however the local declaration will be chosen over the STANDARD/builtin declaration outside SQL scope. (See the documentation on PL/SQL name resolution.)

Action: Either: o) rename the given identifier, o) qualify any references to the identifier with the containing scope's name, or o) make sure the intended resolution occurs if using the identifier in SQL scope.

PLW-05005: subprogram *string* returns without value at line *string*

Cause: A function terminated without a return value. RETURN statements with values are required for all PL/SQL functions.

Action: Inspect function source code to ensure that every RETURN statement returns a value and that a function does not terminate by executing its END statement. Notice that this message may appear at the call site for a function if the function call was inlined and if the called function did not terminate properly.

PLW-05006: shadow type generation resulted in warning: *string*

Cause: Compilation of a table function causes the creation of internally-generated types. A problem occurred during creation of these types which was not severe enough to prevent the creation of the types, but which may impact the usage of the table function. See the accompanying error message for more information.

Action: Fix the issue reported in the accompanying error message.

PLW-05007: first parameter to pragma INLINE must be an identifier

Cause: The first parameter to the pragma INLINE must be an identifier denoting a procedure or function.

Action: Use a procedure or function name

PLW-05008: illegal number of arguments for pragma *string*

Cause: The number of arguments (actual parameters) passed to the named pragma (compiler directive) is incorrect. A required argument was omitted from the argument list, or the pragma syntax is faulty (for example, a comma might be missing between two parameters).

Action: Supply the missing argument or correct the faulty syntax.

PLW-05009: pragma INLINE may not appear in a declaration list

Cause: Pragma INLINE applies only to the following statement, and can not appear immediately prior to a declaration

Action: Remove the pragma.

PLW-05010: duplicate pragma INLINE on procedure '*string*'

Cause: Pragma INLINE was applied twice to the same procedure in the same statement. The procedure will be inlined only if all duplicates specify a control value of 'YES'

Action: Remove the duplicate pragma.

PLW-05011: pragma INLINE for procedure '*string*' does not apply to any calls

Cause: A pragma INLINE was provided, but there was no call to the mentioned procedure in the next statement.

Action: Remove the unnecessary pragma.

PLW-05012: pragma INLINE for procedure '*string*' could not be applied

Cause: A pragma INLINE(<name>, 'yes') was used, but the named procedure could not be inlined.

Action: Eliminate the reasons which are blocking the inlining. See the documentation for possible problems.

PLW-05013: second parameter to pragma INLINE '*string*' is not 'YES' or 'NO'

Cause: The second parameter to the pragma INLINE governs whether or not a procedure call can be inlined. The only legal values are 'YES', meaning that the compiler should attempt to inline the call, and 'NO', meaning that the compiler must not inline the call.

Action: Use 'YES' or 'NO' as appropriate.

PLW-05014: Pragma *string* cannot be specified here

Cause: The pragma was specified in an inappropriate context.

Action: Remove or relocate the misplaced pragma. Check the documentation to determine the correct context for this pragma.

PLW-05015: implementation restriction - too many debug records

Cause: The program is so large that it overflowed a compiler limit on the size of the debug symbol table. The module was compiled with partial debugging information.

Action: Compile the module with PLSQL_DEBUG=FALSE, or split it into multiple modules

PLW-05016: INTO clause should not be specified here

Cause: The INTO clause was incorrectly specified on a cursor declaration. It should have been specified on the FETCH statement.

Action: Relocate the misplaced clause.

PLW-05017: prefix of the expression will be ignored

Cause: Generalized invocation with explicit SELF and a dotted name was used to call the type method causing the prefix of the dotted name to be ignored.

Action: Do not use a dotted name to invoked type method in this context.

PLW-05018: unit *string* omitted optional AUTHID clause; default value DEFINER used

Cause: The AUTHID clause is missing. The unit is allowed to have an AUTHID clause. If the clause is missing, DEFINER's rights are used by default. Good practice suggests that an explicit AUTHID clause should always be used.

Action: Write an explicit AUTHID clause for the unit.

PLW-05019: the language element near keyword *string* is deprecated beginning with version *string*

Cause: A deprecated language element was used. The particular language element is deprecated in PL/SQL versions greater than or equal to the version number given in the message text.

Action: The deprecated language element should be deleted or rewritten. Deprecated PL/SQL language elements become obsolete one version after they are deprecated. An obsolete language element will no longer be supported and use of the element will result in an error.

PLW-05020: parameter name must be an identifier

Cause: A string literal was used as the parameter name in a call that used named notation.

Action: Change the code to use an identifier for the parameter name.

PLW-05022: argument '*string*' is not comparable

Cause: An argument to either IN, BETWEEN or MEMBER OF was not of a comparable type. Or, if the argument was of an object type, no MAP or ORDER method was specified for the type.

Action: Use appropriate arguments, or specify a MAP or ORDER method.

PLW-05023: PL/Scope is disabled because SYSAUX is offline.

Cause: PL/Scope was disabled for the current PL/SQL unit compilation because the SYSAUX tablespace is or was offline at the time of compilation. Note that PL/Scope stores identified metadata in the SYSAUX tablespace, and thus cannot function when SYSAUX is offline.

Action: Verify SYSAUX is online and recompile the PL/SQL unit.

PLW-05024: Do not use BULK COLLECT clause in a cursor declaration

Cause: A BULK COLLECT clause was specified in a cursor declaration.

Action: Remove the BULK COLLECT clause from the cursor declaration, moving it to the FETCH statement or statements, if appropriate.

PLW-06002: Unreachable code

Cause: d by expression evaluation at compile time.

Action: Inspect program logic for possible defects. Disable the warning if much code is made unreachable intentionally and the warning message is more annoying than helpful.

PLW-06003: unknown inquiry directive '*string*'

Cause: An unknown inquiry directive was used. The inquiry directive is neither predefined nor user-defined.

Action: Use a predefined inquiry directive or define the inquiry directive.

PLW-06004: inlining of call of procedure '*string*' requested

Cause: A pragma INLINE(, 'YES') referring to the named procedure was found. The compiler will, if possible, inline this call.

Action: None

PLW-06005: inlining of call of procedure '*string*' was done

Cause: A call to the procedure was inlined.

Action: None

PLW-06006: uncalled procedure "*string*" is removed.

Cause: Static program analysis determined that the procedure can never be called or executed. Therefore, it has been removed to save time during compilation and space during execution.

Action: Inspect program logic for possible defects. Disable the warning if the procedure is useful but simply not being used right now and the warning message is more annoying than helpful.

PLW-06007: procedure "*string*" is removed because optimization removed calls

Cause: Static program analysis determined that the procedure can never be called or executed. Therefore, it has been removed to save time during compilation and space during execution.

Action: Inspect program logic for possible defects. Disable the warning if the procedure is useful but simply not being used right now and the warning message is more annoying than helpful.

PLW-06008: call of procedure '*string*' will not be inlined

Cause: A pragma INLINE(, 'NO') referring to the named procedure was found. The compiler is prevented from inlining this call.

Action: None

PLW-06009: procedure "*string*" OTHERS handler does not end in RAISE or RAISE_APPLICATION_ERROR

Cause: The OTHERS handler can exit without executing some form of RAISE or a call to the standard procedure RAISE_APPLICATION_ERROR.

Action: Good programming practices suggest that OTHERS handlers must always pass an exception upward. Inspect the program logic to determine if the handler code needs revision.

PLW-06010: keyword "*string*" used as a defined name

Cause: A PL/SQL or SQL keyword was used as defined name. Although legal, this is not recommended.

Action: Choose another name for the defined item.

PLW-06011: detailed dependency information discarded due to size limitations

Cause: The compiled unit was so large that the compiler could not store detailed dependency information that could be used to quickly recompile the unit if it was invalidated.

Action: Break up the unit into smaller units.

PLW-06012: SQL statement cannot be inlined. *string*

Cause: The SQL statement could not be inlined.

Action: None

PLW-06013: deprecated parameter PLSQL_DEBUG forces PLSQL_OPTIMIZE_LEVEL <= 1

Cause: The PLSQL_DEBUG parameter was set to TRUE forcing the optimization level to 1 (or 0 if the user selected 0) regardless of the setting of the PLSQL_OPTIMIZE_LEVEL parameter to a higher level

Action: Do not use the PLSQL_DEBUG parameter; it is deprecated. Instead, set the PLSQL_OPTIMIZE_LEVEL parameter to 1.

PLW-06014: PLSQL_OPTIMIZE_LEVEL <= 1 turns off native code generation

Cause: Native code generation was not done because the optimization was set to 1 or less.

Action: The goal of native code generation is high performance and a low optimization level defeats that purpose. Either request a higher optimization level or remove the request for native code generation. Note that using the deprecated parameter PLSQL_DEBUG also forces the optimization level to 1; do not use this parameter when native code generation is desired.

PLW-06015: parameter PLSQL_DEBUG is deprecated; use PLSQL_OPTIMIZE_LEVEL = 1

Cause: The PLSQL_DEBUG parameter was specified.

Action: The parameter PLSQL_DEBUG no longer controls the generation of debugging information by the PL/SQL compiler; debugging information is always generated and no special parameter is needed.

PLW-06016: unit *string* is too large; native code generation turned off

Cause: Because the program was extremely large, analysis took an excessive amount of time or space to complete causing native compilation to be turned off.

Action: The goal of native code generation is high performance and the compiler does extensive analysis of the program. If possible, reduce the size of the largest procedure, or split the program unit into multiple units.

PLW-06017: an operation will raise an exception

Cause: An operation near this location is certain to raise an exception during execution; it may be a programming error because it is not an explicit RAISE.

Action: The compiler has determined that some operation near this location is certain to raise an exception during execution. This may be a programming error; consider rewriting the code. If the intention is to raise an exception, use an explicit RAISE statement.

PLW-06018: an infinity or NaN value is computed or used

Cause: An operation near this location computes or uses an infinite NUMBER, BINARY_FLOAT, or BINARY_DOUBLE value or a NaN BINARY_FLOAT or BINARY_DOUBLE value.

Action: The compiler has determined that an operation near this location computes or uses either an infinity or a not-a-number (NaN) value. This may indicate a programming error; consider rewriting the code. If the intention is to use a BINARY_FLOAT or a BINARY_DOUBLE non-numeric value, use the appropriate constant from STANDARD rather than computing the value. Some valid uses exist for these values; the warning will still appear in those cases. The use of infinite NUMBER values is not well-defined and should be avoided.

PLW-07202: bind type would result in conversion away from column type

Cause: The column type and the bind type do not exactly match. This will result in the column being converted to the type of the bind variable. This type conversion may prevent the SQL optimizer from using any index the column participates in. This may adversely affect the execution performance of this statement.

Action: To make use of any index for this column, make sure the bind type is the same type as the column type.

PLW-07203: parameter '*string*' may benefit from use of the NOCOPY compiler hint

Cause: The mode of the specified parameter was IN OUT or OUT. Use of the NOCOPY compiler hint may speed up calls to this subprogram.

Action: Change the mode of the parameter to explicitly use the NOCOPY compiler hint. For example, if your subprogram declaration is: PROCEDURE proc(p1 IN OUT CLOB); you can change it to: PROCEDURE proc(p1 IN OUT NOCOPY clob); to get the benefit of the NOCOPY hint. For member procedures or functions in object types, you may have to explicitly declare the SELF parameter as illustrated in the following: MEMBER PROCEDURE proc(SELF IN OUT NOCOPY MY_TYPE);

PLW-07204: conversion away from column type may result in sub-optimal query plan

Cause: The column type and the bind type do not exactly match. This may result in the column being converted to the type of the bind variable. This type conversion may prevent the SQL optimizer from using any index the column participates in. This may adversely affect the execution performance of this statement.

Action: To make use of any index for this column, make sure the bind type is the same type as the column type.

PLW-07205: SIMPLE_INTEGER is mixed with BINARY_INTEGER or PLS_INTEGER

Cause: Using SIMPLE_INTEGER and BINARY_INTEGER or PLS_INTEGER arguments in the same arithmetic expression may inhibit certain optimizations.

Action: Try using SIMPLE_INTEGER values only if the expression is computed on a performance critical path.

PLW-07206: analysis suggests that the assignment to 'string' may be unnecessary

Cause: This assignment may be unnecessary; the PL/SQL optimizer could not find any further use of the variable which was being set. If the assignment was being done for some side-effect such as raising a specific exception, the compiler may not have been able to understand the side-effect and this warning may be inappropriate.

Action: If the assignment sets a variable whose value will not be used again and there are no side-effects (exceptions or calls) to consider, remove the assignment for better performance. If the assignment was in place to raise a specific known exception, replace the assignment with a RAISE statement.

NDFN-00020 to NDFN-00025

NDFN-00020: missing IPMI userid

Cause: Required user name argument was not specified.

Action: Reissue command with correct arguments.

NDFN-00021: missing node list

Cause: Required node list was not supplied.

Action: Re-issue command with correct arguments.

NDFN-00022: unrecognized command option: '*string*'

Cause: Operation type missing or mis-spelled.

Action: Re-issue command with correct arguments.

NDFN-00023: no password read. Re-issue request

Cause: Required administrator password was not read in response to the password prompt before finding end-of-line.

Action: Re-issue command and be sure to type the password immediately following the prompt.

NDFN-00024: caught I/O exception: *string*

Cause: .

Action: Re-issue command after repairing root cause.

NDFN-00025: *string* failed for node *string*

Cause: The indicated operation could not be completed for the specified node. The lower-level error messages attached should indicate the root cause.

Action: Re-issue command after repairing the condition indicated.

RDJ-00001 to RDJ-00136

RDJ-00001: OK ADDRESS

Cause: The operation succeeded.

Action: No further action is necessary.

RDJ-00002: invalid operation:

Cause: The operation specified was incorrect.

Action: Specify a valid operation.

RDJ-00003: Error parsing "*string*" *string*

Cause: An error occurred parsing an address.

Action: Correct the address using the other information in the error.

RDJ-00004: invalid trace level

Cause: The trace level specified was incorrect.

Action: Specify a valid trace level.

RDJ-00005: Operation: *string* failed. Error: *string*

Cause: An RD operation failed with the specified error.

Action: Re-try the operation with tracing enabled to determine what happened.

RDJ-00006: invalid port number: *number*

Cause: The port number specified for a service is invalid.

Action: Specify a port number that is greater than zero.

RDJ-00008: invalid number specified:

Cause: The number specified contained non-numeric characters.

Action: Specify a number with only numeric characters.

RDJ-00009: invalid address format:

Cause: The format specified for an address was incorrect.

Action: Specify a valid format.

RDJ-00011: results processor may not be null

Cause: A null object was specified for the class that is to process the results of an operation.

Action: Specify a non-null object.

RDJ-00012: invalid instance uniqueness

Cause: The uniqueness value specified for an instance was not valid.

Action: Specify a valid uniqueness value.

RDJ-00013: Invalid service instance attribute

Cause: An attribute specified for a service instance was not valid.

Action: Specify an attribute in the correct format.

RDJ-00015: Invalid service instance tag: "string". Available tags:

Cause: The tag value specified for a service instance was incorrect.

Action: Specify a valid tag value.

RDJ-00017: invalid domain type: "string". Available domain types:

Cause: The type specified for a domain was not valid.

Action: Specify a valid domain type.

RDJ-00048: Unknown command: "string"

Cause: An invalid command was specified.

Action: Specify a valid command.

RDJ-00049: Unknown option: "string"

Cause: An invalid option was specified.

Action: Specify a valid option.

RDJ-00052: invalid flag value:

Cause: The value specified for a flag was not valid.

Action: Specify a valid flag value.

RDJ-00053: deletion of trace output file failed:

Cause: The tool attempted to remove a trace file so that it could create a new one. However, the attempt failed.

Action: Examine the accompanying exception for details about what happened.

RDJ-00054: deletion of error log file failed:

Cause: The tool attempted to remove an error log so that it could create a new one. However, the attempt failed.

Action: Examine the accompanying exception for details about what happened.

RDJ-00055: trace file already exists:

Cause: The trace file specified already exists.

Action: Remove the file or specify a file which does not exist.

RDJ-00056: error log already exists:

Cause: The error log specified already exists.

Action: Remove the file or specify a file which does not exist.

RDJ-00057: trace file is a directory:

Cause: The trace file specified is actually a directory.

Action: Specify a file name.

RDJ-00058: error log is a directory:

Cause: The error log specified is actually a directory.

Action: Specify a file name.

RDJ-00059: The trace file "*string*" cannot be created

Cause: The tool failed to create the trace file.

Action: Examine the accompanying exception for details about the error.

RDJ-00060: The error log "*string*" cannot be created. Check permissions on the parent directory:

Cause: The tool failed to create the error log.

Action: Examine the accompanying exception for details about the error.

RDJ-00061: The file stream cannot be created:

Cause: The tool failed to create the Java stream for a file.

Action: Examine the accompanying exception for details about the error.

RDJ-00062: The print stream cannot be created:

Cause: An error occurred when the tool tried to create a Java print stream for a file.

Action: Examine the accompanying exception for details about the error.

RDJ-00063: invalid time-to-live:

Cause: A non-numeric value was specified for the time to live.

Action: Specify a numeric value.

RDJ-00065: Option type must be greater than zero:

Cause: The type specified for an option was less than or equal to zero.

Action: Specify a type which is greater than zero.

RDJ-00134: unknown type:

Cause: The type specified is invalid.

Action: Specify a known type.

RDJ-00135: invalid stream type:

Cause: The stream type specified is invalid.

Action: Specify a known type.

RDJ-00136: invalid argument count:

Cause: The number of arguments specified is invalid.

Action: Specify a valid number of arguments.

CLSDNSSD-00000 to CLSDNSSD-03999

CLSDNSSD-00000: no error.

Cause: Operation was successful.

Action: No action needed.

CLSDNSSD-00001: unknown error has occurred.

Cause: an unknown error has occurred.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00002: no such name.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00003: memory allocation failed.

Cause: The DNS service discovery component was unable to allocate enough memory.

Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Customer Support should be contacted.

CLSDNSSD-00004: invalid parameter.

Cause: An parameter which had an invalid value was passed by the caller to the DNS service discovery library. This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00005: invalid reference.

Cause: An unknown DNS record reference was encountered.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00006: invalid state.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00007: invalid flags.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00008: unsupported operation.

Cause: The DNS service discovery component attempted to perform an operation not supported by the library.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00009: uninitialized.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00010: service already registered.

Cause: The user attempted to register a service that was already registered.

Action: A service should only be registered once.

CLSDNSSD-00011: service name conflict.

Cause: The user attempted to register a service whose name already exists.

Action: A different service name needs to be used.

CLSDNSSD-00012: invalid data in record.

Cause: The DNS service discovery component attempted to use a record with invalid data. This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00013: firewall.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00014: client software incompatible with server.

Cause: The version of the client software used by the DNS service discovery interface is not compatible with the version of the server software.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00015: bad interface index.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00016: update refused.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00017: no such record.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00018: no auth.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00019: no such key.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00020: NAT Traversal.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00021: Double NAT traversal.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00022: invalid time stamp in record

Cause: A DNS record contained an invalid time stamp. This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSDNSSD-00023: invalid service type: "string".

Cause: The user specified a service type which does not conform to the standard specified by RFC's 1034 and RFC 1123. The service type must be one or more characters and must start and end with a letter or digit. The interior characters may be letters, digits, or hyphens.

Action: Specify a service type which conforms to the RFC.

CLSDNSSD-03999: unknown error: *number*.

Cause: A DNS error code was returned that is not known to the system. This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

CLSGN-00000 to CLSGN-32767

CLSGN-00000: no error

Cause: Operation was successful.

Action: No action needed.

CLSGN-00003: unknown command: "*string*"

Cause: The command entered was invalid.

Action: Specify a valid command.

CLSGN-00018: parameter has no default value.

Cause: An attempt was made to reset the value of a parameter for which there is no default value.

Action: Specify a parameter which has a default value.

CLSGN-00023: "*string*" is only available in interactive mode.

Cause: An attempt was made to run or get help for a command from the command line which is available only in interactive mode.

Action: Change to interactive mode to run the command.

CLSGN-00024: Server abort exception caught - shutting down.

Cause: Informational message that the server is aborting.

Action: Examine the alert log and trace files to determine the reason(s) why the abort is occurring.

CLSGN-00025: Creation of name object for configuration file "*string*" failed.

Cause: It was not possible to create a name object for the configuration file.

Action: Examine the rest of the stack for the exact reason.

CLSGN-00026: Configuration file "*string*" does not exist.

Cause: The configuration file specified could not be found.

Action: Specify a file that exists.

CLSGN-00027: Initialization of object for configuration file "*string*" failed.

Cause: It was not possible to create a file object for the specified file.

Action: Examine the rest of the error stack for the exact reason.

CLSGN-00028: Open of configuration file "*string*" failed.

Cause: The open of the configuration file failed.

Action: Examine the rest of the error stack for the exact reason.

CLSGN-00029: Read of configuration file "*string*" failed.

Cause: A read of the configuration file failed.

Action: Examine the rest of the error stack for the exact reason.

CLSGN-00030: Close of configuration file "*string*" failed.

Cause: It was not possible to close the configuration file.

Action: Examine the rest of the error stack for the exact reason.

CLSGN-00031: Server failed to start: *string*

Cause: The GNS server failed to start due to an error encountered by the server.

Action: Examine the message that accompanies this one for details. Also, take a look at the server log files for more information.

CLSGN-00032: Unexpected end of line found in record "*string*".

Cause: The line ended unexpectedly. For example, the line might have ended before the end of a quoted string was found.

Action: Specify a correctly formatted line.

CLSGN-00033: Too few arguments for value of parameter "*string*" Minimum: *number*

Cause: Not enough arguments were specified for a parameter.

Action: Specify the required number of arguments.

CLSGN-00034: Too many arguments for value of parameter "*string*" Maximum: *number*

Cause: The number of arguments specified for a parameter was greater than maximum allowed.

Action: Specify the required number of arguments.

CLSGN-00035: Record "*string*" contains too few fields. Minimum: *number*. Specified: *number*.

Cause: The entry for a parameter in the configuration file does not contain the required number of fields.

Action: Correct the entry to have the required number of fields.

CLSGN-00036: Record "*string*" contains too many fields. Maximum: *number*. Specified: *number*.

Cause: The entry for a parameter in the configuration file contains more than the maximum number of fields.

Action: Correct the entry to have the required number of fields.

CLSGN-00039: invalid value for floating point parameter: "*string*": "*string*"

Cause: The value specified for a floating point parameter was not floating point.

Action: Specify a correct value.

CLSGN-00040: invalid value for integer parameter: "*string*": "*string*"

Cause: The value specified for an integer parameter was not an integer.

Action: Specify a correct value, either decimal or hexadecimal. Hexadecimal values start with the string "0x".

CLSGN-00041: invalid value for boolean parameter "*string*": "*string*"

Cause: The value specified for a boolean parameter was not a boolean value.

Action: Specify a correct value. Correct values include: TRUE/FALSE, YES/NO, ON/OFF, and 1/0.

CLSGN-00043: invalid configuration method: "string"

Cause: An unknown type was specified for the method used to store configuration information.

Action: Specify a valid type.

CLSGN-00044: no file name specified.

Cause: No name was specified for a configuration method which uses a file as the repository.

Action: Specify a file name.

CLSGN-00045: initialization failed: string

Cause: The initialization of GNS failed.

Action: Please examine the accompanying message for the exact reason.

CLSGN-00046: no value found for parameter "string".

Cause: A value was not specified for the parameter.

Action: Specify a parameter.

CLSGN-00047: multiple values found for parameter "string".

Cause: Multiple values were specified for a parameter.

Action: Specify a single value.

CLSGN-00048: type mismatch "string". Expected: string Actual: string.

Cause: The type of the value specified for a parameter does not match the required type.

Action: Change the type of the parameter.

CLSGN-00049: unknown parameter: "string".

Cause: The specified parameter is not supported.

Action: Specify a supported parameter.

CLSGN-00050: failure to convert parameter value "string" to "string".

Cause: The attempt to convert the string value for a parameter failed.

Action: Specify a value of the correct type.

CLSGN-00051: unsupported query type: "string"

Cause: The query type passed in is not supported by GNS.

Action: Specify a supported query type.

CLSGN-00052: Initialization of OCR at level number failed. string

Cause: Initialization of OCR to the specified level failed.

Action: Examine the error message to determine what occurred.

CLSGN-00054: Invalid IP address: string

Cause: The IP address specified is neither in the v4 or v6 format.

Action: Specify a correct address.

CLSGN-00056: Unable to resolve host name "string"

Cause: No entry was found in GNS or the system for the specified host.

Action: Specify a valid machine.

CLSGN-00057: Invalid process type specified.

Cause: The caller specified a process type which is not known.

Action: Specify a valid type.

CLSGN-00058: Invalid number of arguments specified: *number*.

Cause: The client program sent the wrong number of arguments over for a command.

Action: This error should not ordinarily be seen. Contact Oracle Customer Support.

CLSGN-00059: Unknown command: *number*.

Cause: The server received an unknown command from the client.

Action: This error should never happen. If it does, contact Oracle Customer Support.

CLSGN-00060: Conversion of string value "*string*" failed with error *number*.

Cause: The value of a parameter sent over from the client to number failed.

Action: Specify a valid parameter value.

CLSGN-00061: Internal error.

Cause: An unexpected error occurred. The rest of the error stack contains details about the error.

Action: This error should never happen. If it does, contact Oracle Customer Support.

CLSGN-00062: Server spawn failed: could not access subdirectory *string* under *string*.

Cause: The server process could not be spawned because the directory where the program resides could not be located or accessed.

Action: Make sure that the server directory exists and can be accessed by the user starting the program.

CLSGN-00063: Server spawn failed: executable not accessible: directory: *string* file: *string*

Cause: The server program could not be accessed.

Action: Make sure the server executable exists and can be accessed by the user starting the program.

CLSGN-00064: spawn of server *string* failed.

Cause: The client was unable to start the server process.

Action: More details about the failure can be found in messages that follow.

CLSGN-00065: Unable to create backup for configuration file *string*

Cause: The GNS server was unable to create a backup configuration file.

Action: Check the permissions in the configuration directory. Make sure that the GNS process is permitted to create files there.

CLSGN-00066: Service advertisement initialization failed.

Cause: GNS failed when tried to initialize the Resource Discovery subsystem.

Action: Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

CLSGN-00067: Service advertisement termination failed.

Cause: GNS failed while trying to shut down the Resource Discovery subsystem.

Action: Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

CLSGN-00068: Service advertisement stop failed.

Cause: GNS encountered an error when it tried to stop the advertisement of its service.

Action: Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

CLSGN-00069: Service registration failed.

Cause: GNS was unable to register itself with Resource Discovery.

Action: Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

CLSGN-00070: Service location failed.

Cause: . If it is a number, consult rdret.h. Also, make sure that the server process has been started.

Action: Examine the message following this one for a possible

CLSGN-00071: Transport initialization failed.

Cause: GNS was unable to initialize the transport that it was used to communicate between the client and server.

Action: The message following indicates the exact error that occurred.

CLSGN-00072: Connection to server failed.

Cause: GNS was unable to initialize the transport that it was used to communicate between the client and server.

Action: The message following indicates the exact error that occurred.

CLSGN-00073: Send failed

Cause: GNS was unable to send data either from the client to the server or from the server to the client.

Action: The message following indicates the exact error that occurred.

CLSGN-00074: Wait for client connection failed

Cause: An error occurred while the server was waiting for a connection from the client.

Action: The message following indicates the exact error that occurred.

CLSGN-00075: Receive failed.

Cause: GNS was unable to receive data from its peer process.

Action: The message following indicates the exact error that occurred.

CLSGN-00076: *string* Packet ignored: *string*.

Cause: The packet was ignored by the server because it was invalid. This may be caused by another process sending malformed packets.

Action: Use system tools to determine if a non-GNS process is sending data to the server.

CLSGN-00077: Invalid DNS message received.

Cause: The GNS server received a message from the master DNS server which was not of the correct format. This could be due to an error by the server or because a malicious process is sending the GNS server invalid packets.

Action: The error is informational and should not ordinarily be visible to a user. If it is seen, contact Oracle Customer Support.

CLSGN-00078: No space in packet buffer. Length: *number*. Remaining: *number*

Cause: The GNS server was unable to add data to the packet that it was going to send to the DNS server because an internal buffer ran out of room.

Action: This error should ordinarily not be visible to users. If it appears, contact Oracle Customer Support.

CLSGN-00079: Bonjour initialization failed.

Cause: The function called to initialize Bonjour for use by GNS failed.

Action: Examine the accompanying Bonjour error and take corrective action.

CLSGN-00080: Wait for a DNS server request failed.

Cause: The GNS server attempted to wait for a request to arrive from the DNS server.

Action: This error should ordinarily not be visible to users. If it appears, contact Oracle Customer Support.

CLSGN-00081: The GNS service is not running.

Cause: The GNS service could not be contacted because it is not running.

Action: Start the GNS service.

CLSGN-00082: The GNS service is already running.

Cause: An attempt was made to start the GNS service, but it was already running.

Action: Shut down the GNS service before trying to start it.

CLSGN-00083: Invalid option: "*string*"

Cause: An unknown option was specified either to a client program or the server.

Action: Specify a supported option.

CLSGN-00084: Invalid trace level: "*string*"

Cause: The value specified for the trace level was not a number.

Action: Specify a number for the trace level.

CLSGN-00085: An argument must be specified for the "*string*" option.

Cause: An argument was not specified for the specified option.

Action: Provide an argument for the option.

CLSGN-00086: Service location initialization failed.

Cause: The GNS client failed when it tried to initialize the Resource Discovery subsystem.

Action: Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

CLSGN-00087: Listen on endpoint "*string*" failed.

Cause: The server was unable to listen for requests on the specified endpoint.

Action: The accompanying GIPC error should be examined for the exact error.

CLSGN-00088: Listen on *string* port *number* failed due to a lack of privileges.

Cause: The server was unable to listen on the specified port because it does not have privilege to do so. On Linux and Unix systems, this can occur because the server is not running as the root user.

Action: Run the server as a user with the needed privileges.

CLSGN-00089: Not enough arguments specified for the "*string*" option. Number specified: *number*. Minimum number: *number*.

Cause: Enough arguments were not specified for a command.

Action: Specify the minimum number of arguments.

CLSGN-00090: Too many arguments specified for the "*string*" option. Number specified: *number* Maximum number: *number*.

Cause: Too many arguments arguments specified for a command.

Action: Specify the required number of arguments.

CLSGN-00093: Server failed during start up.

Cause: The GNS server started but later terminated unexpectedly.

Action: Examine the trace and log files for the reason.

CLSGN-00094: DNS service query failed: *string*.

Cause: The name resolution component was unable to start a query for names of hosts in the cluster.

Action: The following error will detail exactly what occurred. Also, examine the log files for other information.

CLSGN-00095: Invalid IP address for name "*string*": "*string*"

Cause: An attempt was made to register an IP address which was in the incorrect format.

Action: Change the address to be in the correct format.

CLSGN-00096: Connection to the mDNS server failed: *string*.

Cause: An attempt to perform an operation on an address failed because it was not possible to connect to the mDNS server.

Action: Ensure that the server is up and try the operation again.

CLSGN-00097: Advertisement of "*string*" failed.

Cause: An attempt to advertise an address or create an alias failed.

Action: Examine the accompanying message for more details as to the reason.

CLSGN-00098: Name already exists.

Cause: An attempt to advertise an address or create an alias failed because the name already exists.

Action: Either delete the record and use a different name.

CLSGN-00099: Multicast DNS server not running.

Cause: GNS was unable to send a query to the multicast DNS server because it is not running.

-
- Action:** Start the multicast DNS server.
- CLSGN-00100: The alias "*string*" already exists.**
Cause: The specified alias already exists.
Action: Specify an alias which does not exist.
- CLSGN-00101: The alias "*string*" does not exist.**
Cause: An alias for a host could not be found.
Action: Specify an alias which exists.
- CLSGN-00102: The host name "*string*" does not exist.**
Cause: A host with the specified name could not be found.
Action: Specify a host name which exists.
- CLSGN-00105: Server terminated with error.**
Cause: GNS terminated with an unexpected error.
Action: See the accompanying exception stack for more information.
- CLSGN-00106: Getting information about interfaces failed.**
Cause: GNS did not have the privilege to obtain information about the interfaces available on the host.
Action: Consult the documentation about the operating system to determine the privileges needed.
- CLSGN-00107: Getting information about interface "*string*" failed.**
Cause: GNS did not have the privilege to obtain information about the given interface.
Action: Consult the documentation about the operating system to determine the privileges needed.
- CLSGN-00109: No interfaces available.**
Cause: GNS was unable to find any interfaces on which it can listen for requests. This error is likely caused by the incorrect specification of the list of interfaces on which GNS is not to listen. Alternatively, it may be caused by an error in system configuration.
Action: Correct the list of prohibited interfaces if it was set incorrectly. If this is not the case, check the system configuration.
- CLSGN-00110: One or threads failed - check log.**
Cause: One or more GNS failed unexpectedly.
Action: Check the log file to determine the exact reasons.
- CLSGN-00111: Acquisition of privileges needed to perform operation failed.**
Cause: An attempt to acquire the privileges needed failed.
Action: Examine the attached message for more details.
- CLSGN-00112: Platform initialization failed.**
Cause: GNS was unable to initialize the layer the provides system-specific services.
Action: Examine the accompanying message for details.
- CLSGN-00115: Authentication failed due to network failure.**

Cause: The authentication of the client to the server failed due to a failure in sending or receiving authentication data.

Action: Examine the log or trace files to determine the exact error.

CLSGN-00116: Authentication operation timed out

Cause: The authentication of the client to the server failed because one of the processes did not send its data in time.

Action: The accompanying reason has details about the reason.

CLSGN-00117: Authentication protocol failure.

Cause: The client program did not send to the server the data in the format that it was expecting.

Action: Try the connection again using an Oracle-approved client.

CLSGN-00118: Client was rejected: *string*.

Cause: The client was not allowed to connect to the GNS server.

Action: Examine the trace and log files for the specific reason.

CLSGN-00120: Creation of configuration file "*string*" failed.

Cause: The creation of the new version of the configuration file failed.

Action: Examine the rest of the error stack for the exact reason.

CLSGN-00121: Trace level set to *number*.

Cause: This is an information message to indicate that the trace level was set.

Action: No action is needed.

CLSGN-00122: Dynamic messaging initialization failed - error *number*

Cause: The facility used to control the GNS server dynamically failed.

Action: This error should not be seen in normal use. Contact Oracle Customer Support if it appears.

CLSGN-00127: Privileged user "*string*" does not exist.

Cause: The user which GNS is to run as in order to run operations which require special privileges does not exist.

Action: Specify a user which does exist on the host. This user must have the ability to listen for requests from the DNS server.

CLSGN-00128: Unprivileged user "*string*" does not exist.

Cause: The user which GNS is to run as in order to perform operations which do not require special privileges does not exist.

Action: Specify a user which exists.

CLSGN-00129: Privileged group "*string*" does not exist.

Cause: The group to which a user must belong in order to perform administrative operations does not exist.

Action: Specify a group which exists on the host.

CLSGN-00130: no privileges to access OCR key "*string*".

Cause: It was not possible to retrieve the specified key from OCR because the user does not have the required privileges.

Action: Either run the command as a user which has the required privileges or configure OCR to allow retrieval of the key.

CLSGN-00131: no privileges to get value for OCR key "*string*".

Cause: It was not possible to retrieve the specified value from OCR because the user does not have the required privileges.

Action: Either run the command as a user which has the required privileges or configure OCR to allow retrieval of the key.

CLSGN-00132: user "*string*" not authorized to run command.

Cause: A user tried to run a command but has no permission to do so.

Action: Run the command as a user which has the proper privileges.

CLSGN-00133: Exception received: *string*

Cause: An exception occurred on the server process.

Action: Examine the exception for details.

CLSGN-00134: Invalid host name: "*string*".

Cause: The name of the host to be used for a GNS operation was not valid. The name may have no domain or be qualified with the name of subdomain serviced by GNS.

Action: Specify a correct host name.

CLSGN-00135: Mandatory parameter "*string*" is not configured.

Cause: A value was not configured for a mandatory parameter.

Action: Configure a value in the parameter repository.

CLSGN-00136: Query for a host address failed.

Cause: An address was not found for the specified host.

Action: Register the host using `srvctl`.

CLSGN-00138: No thread names specified.

Cause: The command requires at least one thread name to be specified.

Action: Specify at least one thread name.

CLSGN-00139: Invalid thread name "*string*"

Cause: The name of the thread was unknown to GNS.

Action: Specify a valid thread name.

CLSGN-00140: OCR key "*string*" does not exist.

Cause: The specified key cannot be found in the Oracle Cluster Registry.

Action: Specify a key that exists This exception often happens when trying to retrieve a configuration parameter.

CLSGN-00141: The address "*string*" already exists.

Cause: A mapping for a address to a host already exists.

Action: Specify an address which does not exist.

CLSGN-00142: Open of OCR key "*string*" failed.

Cause: An error occurred while trying to open the root OCR used by GNS.

Action: Examine the accompanying exceptions for more information about the error. This error may be caused by mis-configuration.

CLSGN-00143: Subdomain "*string*" already exists.

Cause: An attempt was made to create a GNS subdomain which already exists.

Action: Specify a subdomain which does not exist.

CLSGN-00144: Subdomain "*string*" does not exist.

Cause: The specified GNS subdomain does not exist.

Action: Specify a subdomain which exists.

CLSGN-00145: The host "*string*" already exists.

Cause: The specified host already exists.

Action: Specify an host which does not exist.

CLSGN-00146: Address "*string*" for name "*string*" does not exist.

Cause: The specified host address does not exist.

Action: Specify a host address which exists.

CLSGN-00147: Address "*string*" for name "*string*" is not serviced by GNS.

Cause: The specified address is not served by GNS.

Action: Specify a different address or change the subnet mask used by GNS.

CLSGN-00149: Host address "*string*" does not exist.

Cause: The specified address is not known to GNS.

Action: Specify a valid address.

CLSGN-00150: Alias "*string*" is invalid.

Cause: The name of the alias to be advertised was not valid. The name may have no domain or be qualified with the name of subdomain serviced by GNS.

Action: Specify a correct alias.

CLSGN-00151: Host domain "*string*" does not match GNS subdomain "*string*"

Cause: The domain specified for the host does not specify the subdomain served by GNS.

Action: Either specify the correct domain or just specify the name of the host.

CLSGN-00152: Self-check failed.

Cause: The self-check performed by GNS at initialization time failed.

Action: Check the accompanying exceptions and the log and trace files for details as to why it failed. Also verify that DNS has been configured so that it contains a "forwarders" clause which contains the domain used by GNS and the IP address on which the GNS server is listening.

CLSGN-00153: Length of subdomain "*string*": *string* exceeds the maximum: *string*.

Cause: The name specified for the subdomain to be served by GNS is longer than the maximum.

Action: Specify a shorter subdomain name.

CLSGN-00154: Invalid subdomain: "*string*"

Cause: The name of the subdomain does not conform to Internet standards. It must meet the following requirements:

1. Only alphanumeric characters, periods and hyphens are allowed;
2. It must start and end with an alphanumeric character;

3. Consecutive periods are not allowed. In addition, the subdomain must not end with with ".local" as it is reserved for multicast DNS.

Action: Specify a subdomain in the correct format.

CLSGN-00155: trace level *number* is less than the minimum *number* - ignoring.

Cause: The trace level specified is lower than the minimum supported.

Action: Specify a valid trace level.

CLSGN-00156: trace level *number* is greater than the maximum *number*. Using the maximum value instead.

Cause: The trace level specified is greater than the maximum supported.

Action: Specify a valid trace level.

CLSGN-00158: Initialization or shut down in progress.

Cause: GNS was unable to process a command because it is either starting up or shutting down.

Action: If the server is starting up, try the command again in a few seconds. The server is shutting down, try the command again after the server has restarted.

CLSGN-00161: Failed to set GNS trace level: *string*.

Cause: The call to set the trace level on the GNS server failed.

Action: Examine the accompanying error message for details.

CLSGN-00162: Name "*string*" and address "*string*" will not be advertised due to configuration change.

Cause: When GNS attempted to advertise a name and address upon re-start, it failed because the address can no longer be serviced. This can happen if the subnet used by GNS was changed between the time that GNS was stopped and it was started.

Action: If this result was expected, the error can be ignored. Otherwise, the subnet needs to be changed in OCR and GNS needs to be stopped and re-started.

CLSGN-00163: connection with Cluster Synchronization Services failed. Error: *number*.

Cause: GNS was unable to contact Cluster Synchronization Services in order to retrieve the name of the cluster.

Action: This error is most probably caused by the Cluster Synchronization Services daemon being down. If the daemon is running, contact Oracle Customer Support and provide them with the error code.

CLSGN-00164: Failed to retrieve cluster name: Error: *number*.

Cause: GNS was unable to get the name of the cluster from Cluster Synchronization Services.

Action: This error is most probably caused by the Cluster Synchronization Services daemon being down. If the daemon is running, contact Oracle Customer Support and provide them with the error code.

CLSGN-00165: Running as user "*string*" which is not privileged.

Cause: GNS is not running as a privileged user e.g. root.

Action: Start GNS as a privileged user.

CLSGN-00166: Creation of OCR key "*string*" failed. *string*

Cause: GNS was unable to create the specified OCR key.

Action: Examine the accompanying error for details about what occurred. This error may be caused by mis-configuration.

CLSGN-00167: Operation is unsupported.

Cause: An operation was attempted which is not currently supported by GNS.

Action: Do not attempt the operation.

CLSGN-00168: Name advertisement or alias re-creation failed.

Cause: When GNS starts, it re-creates the advertisements and aliases that existed when it was shut down. The attempt to re-create an advertisement or alias failed.

Action: This error should not occur in normal use. Contact Oracle Customer Support.

CLSGN-00169: Spawn of thread "*string*" failed.

Cause: GNS was unable to spawn a thread. This may be due to low system resources.

Action: If the memory or processes in use on the system are too high, reduce one or both and restart GNS. If this is not the case, contact Oracle Customer Support.

CLSGN-00170: Thread "*string*" failed on startup.

Cause: A GNS thread failed when it tried to start.

Action: Examine the alert log and and trace file (if any) for details about the error.

CLSGN-00171: Invalid alias "*string*" specified for name "*string*"

Cause: The name of the alias to be advertised was not valid. The name must have no domain or be qualified with the name of subdomain serviced by GNS.

Action: Specify an alias whose name is in the correct format.

CLSGN-00172: Domain given in alias "*string*" for name "*string*" does not match GNS domain "*string*".

Cause: The domain specified for an alias does not match the domain serviced by GNS.

Action: Either specify the correct domain or do not specify a domain and GNS will use its domain as the default.

CLSGN-00173: GNS has not been configured.

Cause: An operation on GNS failed because GNS has not configured.

Action: Configure GNS and retry the operation.

CLSGN-00174: Packet replay detected - dropping connection.

Cause: GNS received a duplicate packet from a client. The connection was dropped as a consequence.

Action: Examine the trace file for details. It is possible that a malicious user is attempting to send an invalid packet to GNS.

CLSGN-00175: Invalid packet received - dropping connection.

Cause: The packet was ignored by the server because it was invalid. This may be caused by another process sending malformed packets. This error is usually accompanied by another error which describes the exact error that occurred.

Action: Use system tools to determine if a non-GNS process is sending data to the server.

CLSGN-00176: Packet security check failed.

Cause: The check of the security attributes of a packet failed.

Action: Check the trace file for details about the failure. It is possible that a malicious user is attempting to send an invalid packet to GNS.

CLSGN-00177: Invalid packet type received.

Cause: GNS received a packet whose type is unknown.

Action: Check the trace file for details about the failure. It is possible that a malicious user is attempting to send an invalid packet to GNS.

CLSGN-00178: Resolution of name "*string*" failed.

Cause: GNS failed to retrieve the address of the specified name.

Action: Check to make sure that an address for the name has been registered with GNS. If it is configured, check to make sure that DNS has been properly configured.

CLSGN-00179: No forwarded query received from DNS for name in "*string*" domain, check DNS configuration

Cause: A query was not forwarded from DNS to GNS for a name in the subdomain that it services.

Action: Check the configuration of DNS. Make sure that it contains the required forwarding directive contained in the following message.

CLSGN-00180: If BIND is being used and the zone is being forwarded, the entry will likely look like the following:

Cause: This message is displayed when the GNS self-check fails.

Action: Ensure that the configuration of DNS has the entry listed in the message that follows this one.

CLSGN-00182: *string* Unable to resolve self-check name.

Cause: This is an informational message which accompanies other messages describing a self-check failure.

Action: Examine the accompanying error messages for more information as to the cause of the problem.

CLSGN-00183: Number of retries exceeded maximum: *number*.

Cause: An operation failed after the maximum number of retries.

Action: Examine the accompanying message(s) for the reasons to why this error occurred.

CLSGN-00184: Operation has to be retried.

Cause: An operation failed because it could not be performed at this time and should be tried again later`.

Action: Examine the accompanying message(s) for details about the operation that was performed.

CLSGN-00185: Invalid argument.

Cause: An argument was passed to a function which was incorrect. In the case of a string, for example, a string will be invalid if it is null or has a zero length.

Action: Supply a valid argument.

CLSGN-00186: Insufficient privileges.

Cause: The user attempted an operation for which he or she does not have sufficient privileges.

Action: Either have the system administrator grant the needed privileges or re-try the operation as a user which has the needed privileges.

CLSGN-00187: Listening address "*string*" is not on the public network.

Cause: The address specified as the address on which GNS is to listen is not on the public network.

Action: Specify a different address which is on the public network.

CLSGN-00188: The value for parameter "*string*": *number* may only be from *number* to *number*.

Cause: The value for a parameter is outside the range of permitted values.

Action: Specify a value within the range.

CLSGN-00190: No records found for "*string*".

Cause: No records could be found for the specified name in GNS.

Action: Specify a name which exists in GNS.

CLSGN-00191: No records registered.

Cause: A query was made for the names registered in GNS but none were found.

Action: Re-run the query after names have been advertised.

CLSGN-00192: *string* Open of OCR key "*string*" failed. *string*

Cause: GNS was unable to open the specified OCR key.

Action: Examine the accompanying error for details about what occurred.

CLSGN-00193: Deletion of OCR key "*string*" failed. *string*

Cause: GNS was unable to delete the specified OCR key.

Action: Examine the accompanying error for details about what occurred.

CLSGN-00194: Time needed for resolution of name "*string*": *string* ms exceeded threshold of *string* ms

Cause: Name resolution took longer than the expected time.

Action: This may indicate a problem in the network or DNS configuration and should be investigated by each administrator.

CLSGN-00196: Self-check succeeded after previous failure.

Cause: This is an informational message which indicates that the self-check succeeded after having failed previously.

Action: No action required.

CLSGN-00197: *string* Self-check failed due to failure in name resolution.

Cause: The self-check failed because it was not possible to resolve the self-check name into the address used for reference.

Action: Examine the errors that follow the message for further information as to the cause.

CLSGN-00201: *string* first self-check name resolution failed.

Cause: GNS was unable to resolve the name that it uses for the self-check the first time after it started.

Action: Examine the logs for more information about the error.

CLSGN-00202: *string* first self-check failed.

Cause: GNS was unable run the self-check the first time after it started.

Action: Examine the logs for more information about the error.

CLSGN-00205: *string* self-check failed while in "recovery" state.

Cause: The self-check had previously succeeded after a failure but has failed again.

Action: Examine the logs for more information about the failure.

CLSGN-00206: Creation of a network endpoint failed.

Cause: The creation of a listening endpoint failed.

Action: Examine the accompanying error stack for more information about the error.

CLSGN-00207: Creation of a network endpoint failed due to lack of permissions.

Cause: The creation of a listening endpoint failed because the server did not have the needed permissions.

Action: Examine the accompanying error stack for more information about the error.

CLSGN-00208: Network endpoint "*string*" already in use.

Cause: The creation of an endpoint failed because another process is using it.

Action: If another GNS instance is running, this error is expected. Otherwise, terminate the process using the address or start GNS on another node.

CLSGN-00209: Listen for DNS requests failed. IP address *string* port number is in use.

Cause: Listening for requests from the DNS server(s) failed because another process is using the address.

Action: If another GNS instance is running, this error is expected. Otherwise, terminate the process using the address or start GNS on another node.

CLSGN-00210: failed to get value for OCR key "*string*". *string*

Cause: It was not possible to retrieve the specified value from OCR.

Action: Examine the accompanying error stack for more information about the error.

CLSGN-00211: OCR batch operation failed. *string*

Cause: Setting a set of Oracle Cluster Registry (OCR) key values failed.

Action: Examine the accompanying error messages for more information about the error.

CLSGN-32767: Internal error.

Cause: An unexpected error occurred.

Action: Examine the message(s) that accompany this one for details about the error and contact Oracle Customer Support.

CLSMDNS-00000 to CLSMDNS-02255

CLSMDNS-00000: no error

Cause: A command completely successfully.

Action: No action is needed.

CLSMDNS-00001: GIPC endpoint creation failed.

Cause: An attempt to create a GIPC endpoint for use multicast operations failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00002: bind failed.

Cause: An attempt to bind an address to a GIPC endpoint failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00003: address creation failed.

Cause: An attempt to create a GIPC address failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00004: attribute setting failed.

Cause: An attempt to set an attribute on a GIPC endpoint or address failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00005: interface registration failed.

Cause: The registration of an interface with mDNS failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00006: failed to get name server list.

Cause: An attempt to get the list of available name servers failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00007: mDNS initialization failed.

Cause: The initialization of the mDNS subsystem failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00008: start of host query failed.

Cause: The query for hosts from mDNS failed to start.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00009: stop of host query failed.

Cause: Termination of the query for hosts from mDNS failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00010: Initialization of name server name retrieval failed.

Cause: The initialization of the retrieval of the names of the name servers used by multicast DNS failed.

Action: Examine the accompanying messages(s) that detail the platform error(s) for details about the exception.

CLSMDNS-00011: retrieval of name server name failed.

Cause: The retrieval of the name of a name server to be used by multicast DNS failed.

Action: Examine the accompanying messages(s) that detail the platform error(s) for details about the exception.

CLSMDNS-00012: no name servers found.

Cause: No name servers were found that could be used by multicast DNS.

Action: Check the system configuration and ensure that one or more DNS name servers are configured, operating and accessible.

CLSMDNS-00013: Send of response to DNS server failed.

Cause: An attempt to send a response to a query from the DNS server failed.

Action: Examine accompanying exceptions for details about the exact error.

CLSMDNS-00015: invalid record type: *number*

Cause: The DNS server sent a record whose type is unknown.

Action: This is a warning message which can be ignored because the error should occur very infrequently. If the error occurs frequently, Oracle Customer Support should be contacted.

CLSMDNS-02000: unknown error.

Cause: An unknown error occurred. This error can occur when the multicast DNS server is not running.

Action: If the multicast server is not running, start it and try the operation again. If it is running, this is an internal error and Oracle Customer Support should be contacted with details about how and when the error occurred.

CLSMDNS-02001: no such name exists.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02002: memory allocation failure.

Cause: The allocation of process memory failed.

Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Customer Support should be contacted.

CLSMDNS-02003: invalid parameter.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02004: invalid reference.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02005: invalid state.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02006: invalid flags.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02007: operation is unsupported.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02008: uninitialized.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02009: no cache.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02010: record or service is already registered.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02011: name conflict found.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02012: Invalid.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02013: Firewall.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02014: Incompatible.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02015: invalid interface.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02016: Refused.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02017: no such record.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02018: no authentication.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02019: no such key.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02020: error occurred while passing through NAT.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02021: double NAT encountered.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02022: invalid time.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02023: invalid signature.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02024: invalid key.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02025: transient error.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02250: connection pending.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02251: connection failed.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02252: connection established.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02253: more memory needed for cache.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02254: configuration changed.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02255: memory free needed.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSR-00001 to CLSR-06507

CLSR-00001: Oracle error *number* encountered

Cause: Oracle-related error is encountered.

Action: Check alert log and trace file for more detail.

CLSR-00002: Oracle error encountered while executing *string*

Cause: Oracle-related error is encountered while executing a request.

Action: Check alert log for more detail.

CLSR-00003: ORACLE_HOME environment variable not set

Cause: ORACLE_HOME environment variable is not set.

Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

CLSR-00004: Error encountered at *string*, category=*number*, operation=*string*, OS error=*number*

Cause: Operating system error occurred.

Action: Check for the error message for more detail.

CLSR-00005: Error encountered during memory allocation

Cause: System memory is insufficient.

Action: Check the availability of memory in the system before retrying.

CLSR-00006: Error encountered when writing file *string*

Cause: Error when writing file.

Action: Check the permission of the file and the existence of its path.

CLSR-00007: Error encountered when reading file *string*

Cause: Error when reading file.

Action: Check the permission and existence of the file.

CLSR-00501: Error *number* encountered when connecting to EVM daemon

Cause: Error encountered when connecting to EVM daemon.

Action: Check status of EVM daemon and log file for detail.

CLSR-00502: Error *number* encountered when subscribing an EVM event

Cause: Error encountered when subscribing an EVM event.

Action: Contact customer support.

CLSR-00503: Error *number* encountered when creating an EVM event

-
- Cause:** Error encountered when creating an EVM event.
Action: Contact customer support.
- CLSR-00504: Error *number* encountered when posting an EVM event**
Cause: Error encountered when posting an EVM event.
Action: Contact customer support.
- CLSR-00505: Empty event type is specified**
Cause: Empty event type is specified.
Action: Try again with a valid event type.
- CLSR-00506: Unmatched resource name prefix *string* is specified**
Cause: Specified resource name prefix does not match as required.
Action: Try again with a valid resource name prefix.
- CLSR-00507: The length of the facility name *string* exceeds the limit (*number*)**
Cause: The given facility name is too long.
Action: Try again with a short facility name.
- CLSR-00508: Invalid message number *number***
Cause: An incorrect message number is specified.
Action: Try again with a correct message number.
- CLSR-00509: Unable to initialize NLS**
Cause: Failed to initialize callback structure for NLS.
Action: Contact customer support.
- CLSR-00510: Unable to load NLS data**
Cause: Failed to initialize NLS data loading.
Action: Not action required as default data loading will be used.
- CLSR-00511: Error *number* encountered when handling incoming EVM message**
Cause: Error encountered when handling incoming EVM message.
Action: Check log file for detail.
- CLSR-00512: Invalid CAA trigger event type [*string*]**
Cause: Invalid CAA trigger event type is specified.
Action: Try again with a valid type.
- CLSR-00513: Message file is not found**
Cause: The requested OCI message file is not found.
Action: Check if the message file is properly installed.
- CLSR-00514: Unable to locate PMON [*pid=string*]**
Cause: Cannot find PMON with this pid.
Action: Check the existence of PMON.
- CLSR-00515: A service member is already running on this node**
Cause: There is a service member of the same service running on this node.
Action: No action required as the service member will try to start on another node.

CLSR-00516: No service provider found at this node

Cause: No suitable service provider is found on this node.

Action: No action required as the service member will try to start on another node.

CLSR-00517: Failed to register a service name

Cause: The requested service name cannot be registered.

Action: Check log file for detail.

CLSR-00518: Failed to register a preconnect service name

Cause: The requested preconnect service name cannot be registered.

Action: Check log file for detail.

CLSR-00519: No instance found

Cause: No instance is found running for the database resource.

Action: No action required as the database resource will fail itself.

CLSR-00520: No service member found

Cause: No service member is found running for the composite service resource.

Action: No action required as the composite service resource will fail itself.

CLSR-00521: Event *string* is rejected by EVM daemon

Cause: No template has been registered for the event or caller is not authorized to post the event.

Action: Check if there is a template registered for this event and the authority of posting this event.

CLSR-00522: Resource *string* is not registered

Cause: CRS resource is not registered.

Action: Register the CRS resource.

CLSR-00523: Resource *string* is not enabled

Cause: CRS resource is not enabled.

Action: Enable the CRS resource.

CLSR-00524: Resource *string* is stopping, resource *string* cannot start

Cause: Resource cannot start because its composite resource is stopping.

Action: Retry to start the resource when its composite resource is not stopping.

CLSR-00525: prsr initialization failed

Cause: See the related error message.

Action: Run `crs_stat` to make sure CSS and OCR working properly.

CLSR-00526: Failed to retrieve database configuration in OCR

Cause: See the related error message.

Action: Run `crs_stat` to make sure CSS and OCR working properly and database configuration in ocr is initialized.

CLSR-00527: OCR operation failed

Cause: See related error messages about the OCR operation.

Action: Fix the related error. Then try again.

-
- CLSR-00528: RACGONS: host and port number already configured in OCR**
Cause: host and port number already configured in OCR.
Action: None
- CLSR-00529: RACGONS: host and port number to be removed does not exist**
Cause: host and port number to be removed is not configured in OCR.
Action: None
- CLSR-00530: Can not get user name**
Cause: Error caused by OSD layer.
Action: Contact Oracle support.
- CLSR-00531: Can not get primary group name**
Cause: There is no primary group for this OS.
Action: Not fatal. None.
- CLSR-01001: Unsupported open mode *number* is specified**
Cause: Unsupported open mode is specified for mounting database.
Action: Retry again with a valid open mode.
- CLSR-01002: Unable to process instance startup**
Cause: ORACLE_HOME environment variable not set.
Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.
- CLSR-01003: Error *number* encountered during mounting database**
Cause: Unexpected error occurs when mounting database.
Action: Check current status of database before retrying.
- CLSR-01004: Failed to mount database**
Cause: Database cannot be mounted by an instance.
Action: Check alert log for error detail.
- CLSR-01005: Error *number* encountered during altering database open mode**
Cause: Unexpected error occurs when altering database open mode.
Action: Check current database status.
- CLSR-01006: Unable to process instance shutdown**
Cause: ORACLE_HOME environment variable not set.
Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.
- CLSR-01007: Connection to database was not established**
Cause: Connection to database is failed to establish.
Action: Make sure connection and environment are properly set up.
- CLSR-01008: Error *number* encountered during querying for PMON status**
Cause: Unexpected error encountered when querying v\$process for PMON.
Action: Check alert log and connection to database.
- CLSR-01009: database management module failed to start**

Cause: Error encountered during initializing database management module.

Action: Check previous error message for detail.

CLSR-01010: Unable to record PMON pid to *string*

Cause: Failed to write os pid for PMON to file.

Action: Check file system for disk space and access privilege.

CLSR-01011: Invalid instance startup mode [*string*] is specified

Cause: Invalid startup mode is specified.

Action: Retry again with a valid startup mode.

CLSR-01012: Invalid instance stop mode [*string*] is specified

Cause: Invalid stop mode is specified.

Action: Retry again with a valid stop mode.

CLSR-06500: Invalid input arguments

Cause: Invalid input arguments are specified.

Action: Retry again with a valid argument.

CLSR-06501: Exceeds maximum number of arguments

Cause: Too many input arguments are specified.

Action: Retry again with correct number of arguments.

CLSR-06502: Failed to connect to database '*string*' as user '*string*'

Cause: Failed to connect to database.

Action: Check database and log file for details.

CLSR-06503: Service name already registered

Cause: Requested service name has been registered by another service.

Action: Choose another service name and retry registration again.

CLSR-06504: Service name not in SERVICE_NAMES

Cause: Requested service name is not registered.

Action: Make sure the correct service name is specified in the request.

CLSR-06505: SERVICE_NAMES found null and fixed

Cause: SERVICE_NAMES parameter becomes null after the delete operation.

Action: Not action required as SERVICE_NAMES is set to default value.

CLSR-06506: Error *number* encountered when executing *string*

Cause: Error occurred when executing the SQL statement.

Action: Check alert log for more detail.

CLSR-06507: Cannot add to SERVICE_NAMES, SERVICE_NAMES will be too long

Cause: Adding the service name will exceed the limit of SERVICE_NAMES.

Action: Change the configuration to avoid SERVICE_NAMES becomes too long.

CLSS-00001 to CLSS-03202

CLSS-00001: skgxn not active

Cause: The skgxn service is required, but is not active

Action: Verify that the clusterware skgxn is active and restart it if necessary

CLSS-00002: unable to determine local node number. type *string*

Cause: Either the skgxn service is unavailable, or the OCR configuration is incomplete/inaccurate.

Action: Verify that the clusterware skgxn is active and restart it if necessary. Additionally validate that the clusterware installation was successful, and that the local node was entered in the node listings.

CLSS-00003: unable to determine cluster name. type *string*

Cause: Name of the cluster cannot be determined from configuration.

Action: Verify that the clusterware installation was successful and that the OCR registry is available.

CLSS-00004: unable to allocate memory resources

Cause: Memory allocation routines failed.

Action: Validate that the system has sufficient memory resources to use the product.

CLSS-00099: logfile open failed for *string*, *err string*

Cause: The log file could not be opened, with error type err

Action: Verify that the log directory specified during installation exists and that the ocssd executable has permission to create a file in that directory

CLSS-00100: configuration data access failed for key *string*

Cause: Access of the configuration data indicated by key failed with error code error

Action: Verify that the clusterware installation was successful and that the OCR registry is accessible

CLSS-00101: Oracle Cluster Repository mismatch with node *string*. (*string* != *string*)

Cause: A remote node is accessing a different set of configuration. This situation can be caused by attempting to reinstall while there are active cluster nodes.

Action: Verify that the local and remote nodes are accessing the same Oracle Cluster Repository.

CLSS-00102: initialization failure: [*string*] [*string*] [*string*] [*string*] [*string*] [*string*]

Cause: A general initialization failure occurred.

Action: Contact Oracle Customer Service for more information.

CLSS-00103: unable to read configuration information for node *string*

Cause: Incomplete configuration information for the specified node was found.

Action: Validate the integrity of the Oracle Cluster Repository, restoring it from backup if necessary.

CLSS-00200: local node *string* not listed in configuration

Cause: The OCR configuration information does not list this node as a member of the cluster

Action: Verify that the clusterware installation was successful and that the node has not been added since installation

CLSS-01200: skgxn error: category *string*, operation *string*, loc *string*

Cause: The skgxn service encountered an error, the information in the error message is vendor supplied diagnostic information

Action: Report this error to the vendor who supplied the skgxn

CLSS-02000: reconfiguration successful, incarnation *string* with *string* nodes

Cause: A rconfiguration has completed successfully

Action: None

CLSS-02001: local node number *string*, master node number *string*

Cause: Informational message regarding this incarnation

Action: None

CLSS-02200: Received node deletion request for active node *string*.

Cause: User attempted to delete a node from the configuration before shutting it down.

Action: Shut down the specified node and retry the node deletion.

CLSS-02201: endpoint already in use: *string*

Cause: The specified endpoint is already in use. Another process is using the endpoint.

Action: Shut down the other process, and retry the startup attempt.

CLSS-02202: voting device access took an excessive amount of time. (*string* sec)

Cause: A read or write to the voting device took an unacceptable amount of time.

Action: Contact the disk hardware vendor for information on improving the availability of the disk.

CLSS-02203: unable to access voting device: *string*

Cause: The CSS daemon received a failure using the voting device.

Action: Examine the permissions on the voting device. If this failure occurred later than boot time, then access to the voting device was lost.

CLSS-02204: voting device not configured. [*string*] [*string*]

Cause: A voting device was not supplied during configuration.

Action: The voting device assists in ensuring data integrity and is required by the CSS daemon. Configure a voting device and restart the cluster.

CLSS-02205: remote node *string* signaled our eviction via voting device: cause *string*

Cause: A remote node of the cluster evicted the local node due to network failure or due to software failure in the local CSS daemon.

Action: Verify the stability of the private network between the local node and the specified remote node.

CLSS-02206: local node evicted by vendor node monitor

Cause: The Operating System vendor's node monitor evicted the local node.

Action: Examine the vendor node monitor's logs for relevant information.

CLSS-02207: error *string* getting status from vendor node monitor

Cause: The CSS daemon received a failure interacting with the vendor node monitor. The local node may have been evicted or the vendor node monitor may have been shut down.

Action: Examine the vendor node monitor's logs for relevant information.

CLSS-03000: reconfiguration successful, incarnation *string* with *string* nodes

Cause: A reconfiguration has completed successfully

Action: None

CLSS-03001: local node number *string*, master node number *string*

Cause: Informational message regarding this incarnation

Action: None

CLSS-03200: timed out waiting on nested reconfiguration

Cause: The current reconfiguration hung. A network failure may have occurred.

Action: The local node will terminate itself to cause remote nodes to enter a nested reconfiguration. This may allow the cluster to continue operation.

CLSS-03201: An attempt to begin a nested reconfiguration failed.

Cause: unable to cancel previous reconfiguration to begin a new one

Action: None

CLSS-03202: out of sync with master: [*string*] [*string*] [*string*] [*string*]

Cause: Consistency checks between the local node and the master failed.

Action: The local daemon will terminate itself to ensure that the surviving cluster is all properly coordinated.

CLST-01101 to CLST-03203

CLST-01101: assigning default private interconnect name *string* for node *string*

Cause: A private interconnect name was not specified. The node name was used as a default instead.

Action: Verify that the node name refers to IP addresses on the private interconnect. Using a non-private network can cause performance and stability issues.

CLST-01102: assigning default host name *string* for node *string*

Cause: A host name for the node was not specified. The node name was used as a default instead.

Action: If the node name is not equal to the host name, the host name must be supplied to clscfg. Failure to do so will cause the Cluster Ready Services daemons not to function.

CLST-01103: existing configuration version (*string*) detected

Cause: An existing configuration was detected.

Action: Informational message only. No action is required. clscfg will not modify the existing configuration unless explicitly requested with the `-force` flag.

CLST-01104: successfully determined required configuration for all components

Cause: clscfg was able to determine the proper configuration requirements.

Action: Informational message only. No action is required. clscfg will attempt to write the configuration next.

CLST-01105: An existing configuration was detected. It was not overwritten.

Cause: An existing configuration was detected, and clscfg chose not to overwrite it.

Action: This message may be ignored if it is seen as part of starting any node other than the first one. The `-force` option can be used to override this decision, but if it is used when there are active cluster members, failure CLSS-0101 and data integrity issues are likely.

CLST-01301: successfully deleted *string* of *string* configuration values

Cause: clscfg completed a portion of the delete operation.

Action: Informational message only. No action is required. If some of the values were not deleted, another error message should be visible with more information.

CLST-01302: successfully deleted *string* of *string* configuration keys

Cause: clscfg completed a portion of the delete operation.

Action: Informational message only. No action is required. If some of the keys were not deleted, another error message should be visible with more information.

CLST-01303: successfully rolled back delete operation

Cause: The delete node operation failed, but the configuration was properly restored to its original state.

Action: Informational message only. No action is required.

CLST-01304: node deletion successful

Cause: The delete node operation succeeded.

Action: Informational message only. No action is required.

CLST-01401: formatting voting device: *string*

Cause: clscfg started formatting the voting device.

Action: Informational message only. No action is required.

CLST-01501: tried to delete key *string* but it was not there

Cause: clscfg attempted to delete a key as part of a delete operation, but it had already been deleted.

Action: Informational message only. No action is required. This might be an indication of corrupted configuration, or a previous delete operation that did not complete.

CLST-01901: configuring TCP ports *string, string, string, and string*

Cause: The specified ports were configured for use with the Cluster Ready Services Daemons.

Action: Informational message only. No action is required. To change the ports used, specify 4 alternate ports with "-t". Example: -t 1001,1002,1003,1004

CLST-01902: configuring node: node number *string*, node name *string*

Cause: This node configuration was requested.

Action: Informational message only. No action is required. To alter the list of nodes re-run the install and specify a different set of nodes, or make use of the add and delete node install options after the current install is complete.

CLST-01903: configuring node: host name *string*, private interconnect name *string*

Cause: This node configuration was requested.

Action: Informational message only. No action is required. To alter the list of nodes re-run the install and specify a different set of nodes, or make use of the add and delete node install options after the current install is complete.

CLST-01904: creating configuration with user (*string*) and group (*string*)

Cause: The configuration was set up with the specified user and group.

Action: Informational message only. No action is required. Some configuration information will only be accessible to members of the specified group. Note: On Windows platforms the group may be blank.

CLST-01999: Warning: -force specified. Overwriting existing configuration.

Cause: The -force parameter was supplied.

Action: The -force parameter will cause clscfg to overwrite the existing configuration. If used while a Cluster Ready Services cluster is actively running, this can cause instability and data integrity exposures.

-
- CLST-02101: Too many nodes were specified. limit is *string***
Cause: Too many nodes were specified on command line.
Action: Retry the operation with a smaller number of simultaneous changes.
- CLST-02102: Node *string* specified is out of range. Maximum node number is *string*.**
Cause: A node was specified with node number out of range.
Action: Retry the operation with a smaller node number.
- CLST-02103: Unable to parse TCP port options specified.**
Cause: Arguments to the -t flag were not valid port numbers, or some number other than 4 ports were supplied.
Action: Correct the arguments to the -t flag and rerun the operation.
- CLST-02104: TCP port *string* is out of bounds.**
Cause: The TCP port specified was not a valid port number.
Action: Specify an another port. Usually TCP ports need to be between 1001 and 65,535.
- CLST-02105: missing required parameter -l with language ID information**
Cause: The -l parameter was required for the requested operation.
Action: Supply the -l parameter with the proper language ID.
- CLST-02106: missing required parameter -o with path to ORA_CRS_HOME**
Cause: The -o parameter was required for the requested operation.
Action: Supply the -o parameter with the proper path.
- CLST-02107: failure configuring component *string***
Cause: The Oracle Cluster Repository configuration for the specified component was unsuccessful.
Action: Look for other error information and contact Oracle support.
- CLST-02108: missing required parameter -q with path to the voting device**
Cause: The -q parameter was required for the requested operation.
Action: Supply the -q parameter with a valid path for the voting device.
- CLST-02109: missing required parameter -c with a cluster name**
Cause: The -c parameter was required for the requested operation.
Action: Supply the -c parameter with a name for the cluster.
- CLST-02110: missing required parameter -nn with the list of nodenames**
Cause: The -nn parameter was required for the requested operation.
Action: Supply a list of node names with the format:
nodenameA,nodenumA,nodenameB,nodenumB,...
- CLST-02201: node *string* already exists in the configuration with node number *string***
Cause: A node name specified for the add node operation conflicted with the existing configuration.
Action: Choose an alternate node to add to the cluster, or give the new node a unique name, or delete the previous node, then retry.

CLST-02202: private interconnect name *string* is already assigned to node number *string*

Cause: The private interconnect name specified for the add node operation conflicted with the existing configuration.

Action: Choose an alternate node to add to the cluster, or give the new node a unique name, or delete the previous node, then retry.

CLST-02203: Host name *string* is already assigned to node number *string*.

Cause: The host name specified for the add node operation conflicted with the existing configuration.

Action: Choose an alternate node to add to the cluster, or give the new node a unique name, or delete the previous node, then retry.

CLST-02204: Node number *string* is already assigned to node *string*.

Cause: The node number specified for the add node operation conflicted with the existing configuration.

Action: Chose an alternate node to add to the cluster, or give the new node a unique node number, or delete the previous node, then retry.

CLST-02301: failure *string* validating configuration of node *string*

Cause: clscfg was unable to validate existing configuration of the specified node.

Action: Validate the integrity of the Cluster Ready Services install on the local node, or choose another node to delete.

CLST-02302: failure *string* validating configuration of private interconnect name *string*

Cause: clscfg was unable to validate existing configuration of the specified node.

Action: Validate the integrity of the Cluster Ready Services install on the local node, or choose another node to delete.

CLST-02303: failure *string* validating configuration of node with host name *string*

Cause: clscfg was unable to validate existing configuration of the specified node.

Action: Validate the integrity of the Cluster Ready Services install on the local node, or choose another node to delete.

CLST-02304: node name *string* for node *string* does not match existing node name *string*

Cause: The node name specified in a delete operation did not match the existing configuration.

Action: Specify the correct information describing the node you intend to delete, then retry.

CLST-02305: node number *string* for node *string* does not match existing node number *string*

Cause: The node number specified in a delete operation did not match the existing configuration.

Action: Specify the correct information describing the node you intend to delete, then retry.

CLST-02306: private interconnect name *string* for node *string* does not match *string*

Cause: The private interconnect name specified in a delete operation did not match the existing configuration.

Action: Specify the correct information describing the node you intend to delete, then retry.

CLST-02307: host name *string* for node *string* does not match existing host name *string*

Cause: The host name specified in a delete operation did not match the existing configuration.

Action: Specify the correct information describing the node you intend to delete, then retry.

CLST-02308: concurrent node deletion suspected when deleting key *string*

Cause: A key being deleted by the current operation was deleted by another process during the small amount of time between opening it for deletion and actually deleting it. An attempt to execute multiple separate delete operations may have occurred, and may have corrupted the configuration.

Action: Verify the integrity of the Oracle Cluster Repository, and restore from backup if necessary. If only one clscfg process was active on the cluster this may be ignored.

CLST-02309: failure updating the configuration in node deletion

Cause: clscfg was unable to modify the existing configuration for node deletion. The existing configuration was probably not harmed.

Action: Verify the integrity of the Cluster Ready Services install on the local node, and retry.

CLST-02310: CSS daemon refused node deletion, status *string*. attempting rollback

Cause: Cluster Synchronization Services daemon refused the node deletion.

Action: One or more of the designated nodes may still be active. clscfg will now attempt to roll back the deletion process. The Cluster Ready Services daemons must be shut down on a node before any attempt to remove them from the configuration. More information on why the attempt was refused may be available in the Cluster Synchronization Service logfile.

CLST-02311: failure rolling back node deletion. configuration irrecoverable

Cause: clscfg attempted to roll back the deletion process after a failure and was unable to do so. Configuration was partially deleted and left in an inconsistent state.

Action: Shut down the cluster and restore the Oracle Cluster Repository from backup.

CLST-02312: failed to completely delete node configuration

Cause: The node deletion was mostly successful, and should be functional in this state. Some portions of the configuration were not successfully deleted.

Action: This can be ignored. The safer choice is to restore the Oracle Cluster Repository from backup, and attempt the delete again. Adding any of the deleted nodes back to the configuration in the future may fail if this is ignored.

CLST-02401: failure *string* querying maximum configurable node number

Cause: clscfg was unable to determine the legitimate range of node numbers.

Action: Verify the integrity of the Cluster Ready Services install on the local node.

CLST-02402: failure *string* querying existing configured node list

Cause: clscfg was unable to retrieve the list of currently configured nodes.

-
- Action:** Verify the integrity of the Cluster Ready Services install on the local node.
- CLST-02403: failure *string* querying the maximum node name size**
Cause: clscfg was unable to determine the size of the largest node name.
Action: Verify the integrity of the Cluster Ready Services install on the local node.
- CLST-02404: failure *string* querying the cluster name**
Cause: clscfg was unable to determine the existing cluster name.
Action: Verify the integrity of the Cluster Ready Services install on the local node.
- CLST-02405: failure formatting voting device (*string*) at [*string*] [*string*] [*string*]**
Cause: clscfg failed to format the voting device.
Action: Verify the path and permissions set on the voting device.
- CLST-02501: failure *string* opening configuration for write operation**
Cause: clscfg was attempting to open the current configuration for write access.
Action: Verify the integrity of the Oracle Cluster Repository. Shut down the cluster and restore OCR from backup if necessary.
- CLST-02502: failure *string* writing new configuration**
Cause: clscfg was attempting to write new configuration data.
Action: Verify the integrity of the Oracle Cluster Repository. Shut down the cluster and restore OCR from backup if necessary.
- CLST-02503: failure *string* opening configuration for delete operation**
Cause: clscfg received an error while attempting to delete part of the existing configuration.
Action: Verify the integrity of the Oracle Cluster Repository. Shut down the cluster and restore OCR from backup if necessary.
- CLST-02504: failure *string* writing configuration to disk**
Cause: clscfg received a failure writing information to the Oracle Cluster Repository.
Action: Verify the settings for the Oracle Cluster Repository and retry.
- CLST-02901: The number of Oracle Cluster Repository keys exceeds limit of *string*.**
Cause: clscfg ran out of internal space for keys during install.
Action: Re-run the install and specify a smaller list of nodes. When that completes, use the add node option to add the remaining nodes.
- CLST-02902: The number of Oracle Cluster Repository keys exceeds limit of *string*.**
Cause: clscfg ran out of internal space for keys during delete node.
Action: Re-run the delete node operation and delete fewer nodes at once.
- CLST-02903: unable to allocate *string* bytes of memory at location: *string***
Cause: clscfg was unable to allocate enough memory to service the request.
Action: Ensure that the specified amount of memory will be available and retry the operation.
- CLST-02904: failure *string* in SCLS API at *string***
Cause: clscfg was unable to query for information about the system setup.

Action: Contact Oracle support with the additional information printed just after this message.

CLST-02905: add, install, delete, concepts, and local are mutually exclusive

Cause: clscfg was run with two different mode flags. All mode flags are mutually exclusive.

Action: Correct the command line and try again.

CLST-02906: Clustername should be between 1 and *string* letters.

Cause: cluster name supplied with -c argument was the wrong size.

Action: Supply an alternate cluster name of an appropriate length.

CLST-02907: unknown parameter *string* supplied

Cause: An unknown parameter was passed to clscfg.

Action: Use "clscfg -help" or "clscfg -concepts" for more information.

CLST-02908: unable to determine local hostname

Cause: clscfg was unable to determine the local hostname.

Action: Verify the operating system host name configuration.

CLST-02909: The requested operation requires High Availability privileges.

Cause: The current user did not have High Availability privileges.

Action: Log in as a different user and retry the operation.

CLST-02910: Failure *string* contacting the CRS daemon.

Cause: clscfg was unable to communicate with the CRS daemon.

Action: The requested operation must be performed from an active cluster node. Validate the pre-existing installation on the local machine, or perform the operation from another node.

CLST-02911: failure *string* contacting the CSS daemon

Cause: clscfg was unable to communicate with the CSS daemon.

Action: The requested operation must be performed from an active cluster node. Validate the pre-existing installation on the local machine, or perform the operation from another node.

CLST-02999: Untranslated failure: [*string*] [*string*] [*string*] [*string*] [*string*] [*string*]

Cause: A failure with no translation occurred.

Action: Contact Oracle Customer Support for more information.

CLST-03100: See the documentation for usage information.

Cause: Incorrect or insufficient arguments were passed to crsuser.

Action: Read documentation for instructions on how to use this tool.

CLST-03101: Enter the password for user *string*.

Cause: crsuser requires the password to register the user.

Action: Enter the requested password.

CLST-03102: Operation successful.

Cause: The operation succeeded.

Action: None

CLST-03200: internal error: [*string*] [*string*] [*string*] [*string*] [*string*]

Cause: A failure with no translation occurred.

Action: Contact Oracle Customer support for more information.

CLST-03201: unexpected argument: *string*

Cause: crsuser failed to parse the arguments, or an unknown argument was passed.

Action: Supply the correct arguments and try again.

CLST-03202: Memory allocation failure for *string* bytes.

Cause: crsuser was unable to allocate memory.

Action: Free up some system memory and try again.

CLST-03203: insufficient privileges for action: *string*

Cause: The current user did not have sufficient privileges.

Action: Log in as another user and try again.

CLSU-00100 to CLSU-00912

CLSU-00100: Operating System function: *string* failed with error data: *string*

Cause: A call to an Operating System dependent service or function returned an error indication. The message includes the name of the function and the returned error data. The latter varies by platform but typically is numeric; on most platforms it is the value of C "errno" after the failing call.

Action: This error normally is accompanied by other (higher-level) messages describing the operation that is affected by the failure. It may also include one or more of messages 101, 103, and 104 providing additional error details. All of the messages should be examined to assess the error, which may have a very ordinary cause and correction, such as an input file failing to open because the supplied name was misspelled.

CLSU-00101: Operating System error message: *string*

Cause: This message accompanies message 100 above when the Operating System dependent error data can be converted into a text message. On most Oracle platforms the message is a text representation of the C "errno" value reported in message 100.

Action: See message 100.

CLSU-00102: Operating System interface detected an error

Cause: This message is issued instead of messages 100-101 when a "logical" error condition (rather than failure of an Operating System function call) is detected at an Operating System specific interface. The error condition is further described by accompanying message(s), including 103 and 104.

Action: This error normally is accompanied by other (higher-level) messages describing the operation that is affected by the failure. In most cases it will also include messages 103 and 104, providing additional details about the error. All of the messages should be examined to assess the error, which may have a very ordinary cause and correction, such as a missing required environment variable.

CLSU-00103: error location: *string*

Cause: This message accompanies message 100, 102, or 105 and identifies a location in Oracle program code that encountered the error.

Action: See message 100, 102, or 105. This information normally is useful only when reporting the error condition to Oracle as a potential code bug.

CLSU-00104: additional error information: *string*

Cause: This message accompanies message 100, 102, or 105 and supplies additional information related to the error condition. A single error may include multiple lines of additional information.

Action: See message 100, 102, or 105.

CLSU-00105: Operating System interface has reported an internal failure

Cause: This message indicates that an Operating System dependent interface within Oracle code has detected internal corruption or some other evidence of internal program failure.

Action: This message may be accompanied by other (higher-level) messages indicating the product operation that was affected by the failure. It may also be accompanied by either or both of messages 103 and 104. All situations reporting this condition should be referred to Oracle Support for resolution.

CLSU-00106: An improper Operating System error display was attempted

Cause: During processing of an error condition, an attempt was made to format/display Operating System dependent error data, but the error data structure was found to indicate "no error".

Action: This error should be reported to Oracle Support for resolution.

CLSU-00200: ** Error stack contains *number* records, newest first:**

Cause: The collection of errors about to be presented contains this many following records.

Action: This and the following data should be reported to Oracle Support for resolution.

CLSU-00201: ** Error stack end ******

Cause: This marks the end of a collection of errors

Action: The preceding data should be reported to Oracle Support for resolution.

CLSU-00210: CLSUUS test msg 0

Cause: A message for testing, should never be seen in the field.

Action: Report to Oracle Support.

CLSU-00211: CLSUUS test msg 1:*string*

Cause: A message for testing, should never be seen in the field.

Action: Report to Oracle Support.

CLSU-00212: CLSUUS test msg 2:*string* 2:*string*

Cause: A message for testing, should never be seen in the field.

Action: Report to Oracle Support.

CLSU-00213: CLSUUS test msg 3:*string* 2:*string* 3:*string*

Cause: A message for testing, should never be seen in the field.

Action: Report to Oracle Support.

CLSU-00214: CLSUUS test msg 4:*string* 2:*string* 3:*string* 4:*string*

Cause: A message for testing, should never be seen in the field.

Action: Report to Oracle Support.

CLSU-00215: CLSUUS test msg 5:*string* 2:*string* 3:*string* 4:*string* 5:*string*

Cause: A message for testing, should never be seen in the field.

Action: Report to Oracle Support.

CLSU-00216: CLSUUS test msg 6:*string* 2:*string* 3:*string* 4:*string* 5:*string* 6:*string*

-
- Cause:** A message for testing, should never be seen in the field.
Action: Report to Oracle Support.
- CLSU-00217: CLSUUS test msg 7:***string 2:string 3:string 4:string 5:string 6:string 7:string*
Cause: A message for testing, should never be seen in the field.
Action: Report to Oracle Support.
- CLSU-00218: CLSUUS test msg 8:***string 2:string 3:string 4:string 5:string 6:string 7:string 8:string*
Cause: A message for testing, should never be seen in the field.
Action: Report to Oracle Support.
- CLSU-00220: clsem FATAL exception:** *string*
Cause: Something unrecoverable happened in CLSEM.
Action: Report to Oracle Support.
- CLSU-00221: ERROR printed by clsecho:** *string*
Cause: An error printed by clsecho
Action: Report to Oracle Support.
- CLSU-00222: WARNING printed by clsecho:** *string*
Cause: A warning
Action: Note the text
- CLSU-00223: Info printed by clsecho:** *string*
Cause: Information printed by clsecho
Action: Report to Oracle Support.
- CLSU-00910: Named exception** *string string string string*
Cause: Program raised an exception that does not have its own message
Action: Report to Oracle Support.
- CLSU-00911: Signal** *string* **received**
Cause: Program received on OS signal reported as an exception
Action: Report to Oracle Support
- CLSU-00912: OSE:** *string string*
Cause: An operating specific error was noticed
Action: Examine the message in context.

CLSW-00001 to CLSW-01000

CLSW-00001: Cluster Wallet operation failed

Cause: This is generic internal error for Cluster Wallet.

Action: Contact Oracle Customer Support.

CLSW-00002: Out of heap memory.

Cause: The program ran out of heap memory.

Action: Retry the operation when more memory is available.

CLSW-00003: Error in the cluster registry (OCR) layer. [number] [string]

Cause: An error occurred in the cluster registry layer while performing a cluster wallet operation.

Action: Ensure correct operation of cluster registry by inspecting ocr error (oerr proc <ocrerror>), by using ocrcheck and ocrdump, and retry the operation.

CLSW-00004: Error in the network security layer. [number] [string]

Cause: An error occurred in the network security layer while performing a cluster wallet operation.

Action: Inspect the network security error (oerr ora <nzerr>), and take corrective action to ensure correct operation.

CLSW-00005: Cannot perform cluster wallet operation because one of the parameters is NULL.

Cause: Program tried a cluster wallet operation using a NULL parameter.

Action: Check the parameters, and retry the operation.

CLSW-00006: Cannot perform cluster wallet operation because the context is invalid.

Cause: The cluster wallet context passed was invalid.

Action: Initialize the cluster wallet and retry the operation.

CLSW-00007: Cannot perform cluster wallet operation because one of the parameters is invalid. [number] [string]

Cause: Program tried a cluster wallet operation using an invalid parameter.

Action: Check the parameters, and retry the operation.

CLSW-00008: The cluster wallet to be created already exists.

Cause: The program tried to create a cluster wallet that already exists.

Action: Retry the operation after unsetting the CLSW_FLAGS_WALLET_CREATE

CLSW-00009: The cluster wallet to be operated on does not exist.

Cause: Program tried to access a cluster wallet which does not exist.

Action: Check to see if the cluster wallet exists and try the operation

CLSW-00010: Error in the NLS services.

Cause: An error occurred in the NLS services while performing a cluster wallet operation.

Action: Check to see if the message file exists in \$ORACLE_HOME/has/mesg/clsw*.msb

CLSW-00011: Cannot perform cluster wallet operation because data stored in the registry is invalid.

Cause: The data stored in the registry cannot be converted to a wallet.

Action: Delete the registry key associated with the wallet and recreate the wallet.

CLSW-00012: User is not authorized to perform the cluster wallet operation.

[number] [string]

Cause: Program tried an operation on a cluster wallet for which it does not have permission.

Action: Check to see if program is run as the correct user.

CLSW-00013: Error in the clusterware operating system (SCLS) services. *[string]*

Cause: An error occurred in the SCLS services while performing a cluster wallet operation.

Action: Check to see if NIS/LDAP on Unix and Active Directory Service on Windows has been correctly configured.

CLSW-01000: Enter Password:

Cause: This is a prompt to user to enter password.

Action: Enter password.

CRS-00001 to CRS-10250

CRS-00001: Message ID *string-number* not found.

Cause: The message for the given message id is not found in any language.

Action: Make sure the product is setup correctly on the system.

CRS-00002: *string*:Internal list corruption. trace file: "*string*"

Cause: An internal error was detected during trace file flush processing.

Action: Contact Oracle Support Services.

CRS-00003: An error was encountered while attempting to open file "*string*".

Additional diagnostics: *string*

Cause: An error was encountered while attempting to open the specified file.

Action: Examine the additional diagnostics, if available, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00004: logging terminated for the process. log file: "*string*"

Cause: One or more file system errors were encountered which caused logging to be terminated for this process.

Action: Examine preceding Alert log messages for details on the error or errors that occurred. Restart the process to reenable logging.

CRS-00005: log file "*string*" deleted after close failure

Cause: This message is informational. An attempt to close the specified log file failed. The contents of the log file after a close error are undefined. The log file has been successfully deleted. Log data are lost.

Action: None

CRS-00006: file rotation processing continues for file: "*string*"

Cause: This message is informational and indicates only that a preceding error was not sufficiently severe to terminate file rotation which might otherwise be the case.

Action: None

CRS-00007: failed to open new log file "*string*"

Cause: The file system encountered an error while attempting to open the specified file during log file rotation. Log data are lost.

Action: Review the preceding Alert log message CRS-0011 and attempt to resolve any file system environmental problems indicated. Otherwise, contact Oracle Support Services.

CRS-00008: opened new file "*string*" after close failure

Cause: This message is informational. Log data are lost.

Action: None

CRS-00009: log file "*string*" reopened

Cause: An error was encountered during rotation processing so that log file rotation could not proceed. The original log file, which had been closed, was successfully reopened.

Action: Review Alert log messages that precede this message that identify the file system error or errors encountered. If the additional diagnostic data in a preceding alert log message indicate a file system environmental problem, attempt to correct it. Otherwise contact Oracle Support Services.

CRS-00011: An error occurred while attempting to close file "*string*" during log file rotation. Additional diagnostics: *string*

Cause: An error was encountered when attempting to close the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00012: An error occurred while attempting to rename file "*string*" to "*string*" during log file rotation. Additional diagnostics: *string*

Cause: An error was encountered when attempting to rename the source file to the destination file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00013: An error occurred while attempting to check for the existence of file "*string*" during log file rotation. Additional diagnostics: *string*

Cause: An error was encountered while attempting to determine if the specified file existed.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00014: An error occurred while attempting to delete file "*string*" during log file rotation. Additional diagnostics: *string*

Cause: An error was encountered while attempting to delete the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00015: An error occurred while attempting to flush file "*string*" during log file rotation. Additional diagnostics: *string*

Cause: An error was encountered while an attempting to flush the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00016: An error was encountered while attempting to free the file name object for file "*string*" during log file rotation. Additional diagnostics: *string*

Cause: An error was encountered while attempting to free the file name object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00017: An error occurred while attempting to create a file name object for file "*string*" during log file rotation. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create a file name object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00018: An error occurred while attempting to reopen file "*string*" during log file rotation. Additional diagnostics: *string*

Cause: An error was encountered while attempting to reopen the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00019: file rotation terminated. log file: "*string*"

Cause: One or more file system errors were encountered which caused log file rotation to be terminated for the process. Although log file rotation has been terminated, logging continues.

Action: Review Alert log messages that precede this alert log message that identify the file system error or errors encountered. If the additional diagnostic data in a preceding alert log message indicate a file system environmental problem, attempt to correct it. Otherwise contact Oracle Support Services. To re-enable file rotation the process must be restarted.

CRS-00020: An error occurred while attempting to create a file name object for file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create a file name object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00021: An error occurred while attempting to check for the existence of file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to determine if the specified file existed.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00022: An error occurred while attempting to change access permissions and privileges for file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to change access permissions and privileges for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00023: An error occurred while attempting to create default permissions for file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create default file permissions for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00024: An error occurred while attempting to create a file name object for file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create a file name object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00025: An error occurred while attempting to create a file object for file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create a file object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00026: failed to create one or more file name objects to rename "*string*" to "*string*" during file rotation processing

Cause: An error was encountered while attempting to create one of more file name objects for the specified files.

Action: Contact Oracle Support Services.

CRS-00027: An error occurred while attempting to determine the size of file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to determine the size of the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00036: An error was encountered while attempting to open log file "*string*".

Cause: An error was encountered while attempting to open the specified file. Logging is disabled for the process.

Action: Review the preceding Alert log messages and attempt to resolve any file system environmental problems indicated. Otherwise, contact Oracle Support Services

CRS-00184: Cannot communicate with the CRS daemon.

Cause: The CRS daemon on the local node is either not running or there was an internal communication error with the CRS daemon.

Action: Check if the CRS daemon process is running on the local node.

CRS-00210: Could not find resource '*string*'.

Cause: An attempt was made to operate on a resource that is not registered.

Action: Ensure that the resource name is specified correctly using the command 'crsctl status resource'.

CRS-00211: Resource '*string*' has already been registered.

Cause: An attempt was made to register a resource that is already registered.

Action: Ensure that the resource name is specified correctly and retry the command.

CRS-00213: Could not register resource '*string*'.

Cause: There was an internal error while registering the resource.

Action: Check the CRS daemon log file.

CRS-00214: Could not unregister resource '*string*'.

Cause: There was an internal error while unregistering the resource.

Action: Check the CRS daemon log file.

CRS-00215: Could not start resource '*string*'.

Cause: There was an internal error while starting the resource.

Action: Check the CRS daemon log file.

CRS-00216: Could not stop resource '*string*'.

Cause: There was an internal error while stopping the resource.

Action: Check the CRS daemon log file.

CRS-00217: Could not relocate resource '*string*'.

Cause: There was an internal error while relocating the resource.

Action: Check the CRS daemon log file.

CRS-00218: Could not restart the resource '*string*' on the original node.

Cause: There was an internal error while restarting the resource.

Action: Check the CRS daemon log file.

CRS-00219: Could not update resource '*string*'.

Cause: There was an internal error while updating the resource.

Action: Check the CRS daemon log file.

CRS-00220: Resource '*string*' has invalid resource profile.

Cause: Invalid attributes in the resource profile.

Action: Run the command 'crsctl status type' to identify the invalid attributes. Modify these attributes using the command 'crsctl modify type'.

CRS-00221: Resource '*string*'s action script cannot be found.

Cause: The action script has been deleted from the file system.

Action: Run 'crsctl status resource -p' to determine the action script location, and check for its existence.

CRS-00223: Resource '*string*' has placement error.

Cause: There was no host available to on which failover/start the resource based on the Placement Policy for the resource.

Action: Check the target host for the resource and restart the resource using the 'crsctl start resource' command.

CRS-00230: Member '*string*' is not in the cluster.

Cause: The hostname was not found in the cluster.

Action: Check the hostnames in the cluster.

CRS-00232: Cluster member is down. Cannot perform operation.

Cause: The node on which CRS is attempting to start the resource is down.

Action: Start the node and retry the operation.

CRS-00233: Resource or relatives are currently involved with another operation.

Cause: Another CRS daemon was operating on the same resource.

Action: Wait for a minute and try the command or operation again.

CRS-00253: CRS configuration error, the CRS default directory is not set in Oracle Cluster Registry.

Cause: The Oracle Cluster Registry key which contains the user default CRS key is not initialised.

Action: Check the CRS configuration. If necessary reinstall CRS.

CRS-00254: authorization failure

Cause: The user permissions were insufficient to operate on the resource.

Action: Check the permissions associated with the resource using 'crsctl getperm resource' and set the appropriate user permissions using 'crsctl setperm resource'.

CRS-00255: CRSD is not running in privileged mode. Insufficient permissions to run this command.

Cause: The CRS daemon was not running as the privileged user.

Action: Check if the CRS daemon is running as root (Unix) or Administrator (Windows).

CRS-00256: Username conflicts with the owner of the resource.

Cause: An attempt was made to give separate user level permissions for the owner of the resource.

Action: Check the owner of the resource and the user being given permissions.

CRS-00257: Groupname conflicts with the primary group of the resource.

Cause: An attempt was made to give separate group level permissions for the primary group of the resource.

Action: Check the primary group of the resource and the group being given permissions.

CRS-00258: Invalid ACL string format.

Cause: An invalid permission string (ACL) was supplied.

Action: Check the syntax of the permission string (ACL).

CRS-00259: Owner of the resource does not belong to the group.

Cause: The owner of the resource does not belong to the expected group.

Action: If this resource is owned by the root user, check if the root user belongs to the dba group.

CRS-00271: CRSD shutdown is already in progress.

Cause: crsctl stop command is issued before waiting for a prior stop command to finish.

Action: Wait for the currently running shutdown command to complete before issuing subsequent command.

CRS-00272: This command remains for backward compatibility only

Cause: A deprecated command was issued.

Action: For all new use cases, please use the replacement.

CRS-00273: This command is deprecated and has been replaced by '*string*'

Cause: A deprecated command was issued.

Action: For all new use cases, please use the replacement.

CRS-00274: This command is deprecated and its functionality incorporated into '*string*'

Cause: A deprecated command was issued.

Action: For all new use cases, please use the replacement.

CRS-00402: Could not make safe directory('*string*')

Cause: Unable to create safe directory.

Action: Check if you have proper permissions and sufficient space on the disk to create the directory.

CRS-00403: Could not change working directory to safe directory('*string*')

Cause: Unable to change directory to safe directory.

Action: Please check if safe directory exists and if you have proper permissions.

CRS-00406: Could not create lock directory ('*string*')

Cause: Unable to create lock directory.

Action: Check if you have proper permissions and sufficient space on the disk to create the directory.

CRS-00407: Another CRSD may be running, could not obtain lock file '*string*'.

Cause: Unable to obtain lock file as another CRSD may be running.

Action: Stop the existing CRSD before attempting to start CRSD again.

CRS-00413: Could not initialize the Cluster Synchronization Services context

Cause: Unable to communicate with the cluster services.

Action: Verify that the Cluster Synchronization Services Daemon is properly configured and is running.

CRS-00414: Could not establish Event Manager connection

Cause: Unable to communicate with Event Manager daemon.

Action: Run the 'crsctl check evmd' command to determine whether Event Manager daemon is properly configured and is running.

CRS-00451: CRS configuration error, unable to initialize Oracle Cluster Registry.

Cause: The Oracle Cluster Registry that contains information about the CRS configuration is unavailable.

Action: Check the OCR configuration using the ocrcheck utility and resolve any issues it reports. If the problem persists, contact Oracle Support Services.

CRS-00452: CRS configuration error, unable to find CRSD Connection Information in Oracle Cluster Registry.

Cause: The Oracle Cluster Registry key which contains the user default CRSD connection is not initialized.

Action: Check the OCR configuration using the ocrcheck utility and resolve any issues it reports. If the problem persists, contact Oracle Support Services.

CRS-00453: CRS configuration error, unable to find Instance Information in Oracle Cluster Registry.

Cause: The Oracle Cluster Registry key which contains the Instance's information is not initialized.

Action: Check the OCR configuration using the ocrcheck utility and resolve any issues it reports. If the problem persists, contact Oracle Support Services.

CRS-00471: Node number is not found

Cause: Cluster Synchronization Services is unable to retrieve the node name.

Action: Verify your cluster installation, including any vendor cluster ware. If necessary reinstall the cluster.

CRS-00472: Node name is not found

Cause: Cluster Services is unable to retrieve the node name.

Action: Verify your cluster installation, including any vendor cluster ware. If necessary reinstall the cluster.

CRS-00700: Oracle High Availability Service aborted due to failure to allocate memory. Details at *string* in *string*.

Cause: Memory allocation failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00701: Oracle High Availability Service aborted due to failure to obtain identity of the running process. Details at *string* in *string*.

Cause: Failed to retrieve user id.

Action: Check <crs_home> owner and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00702: Oracle High Availability Service aborted due to failure to run as privileged user. Details at *string* in *string*.

Cause: Oracle High Availability Service was not running as privileged user.

Action: On Unix, restart Cluster Ready Service as privileged user using 'crsctl stop crs -f' followed by 'crsctl start crs'. On Windows, check the privileges of the Oracle High Availability Service and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00703: Oracle High Availability Service aborted due to failure to initialize the communication context. Details at *string* in *string*.

Cause: The network layer initialization failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00704: Oracle High Availability Service aborted due to Oracle Local Registry error [string]. Details at string in string.

Cause: Oracle Local Registry aborted with an error. Look at the associated error message to determine the underlying issue.

Action: Solve the underlying issue and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00708: Oracle High Availability Service aborted due to failure to retrieve ORA_CRS_HOME environment variable. Details at string in string.

Cause: An environment variable required by Oracle High Availability Service failed to be set at initialization.

Action: Run 'rootcrs.pl -unlock' followed by 'rootcrs.pl -patch' and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00709: Oracle High Availability Service aborted due to failure to initialize ORA_CRS_HOME path. Details at string in string.

Cause: Oracle High Availability Service ORA_CRS_HOME path could not be initialized.

Action: Check for execute permissions on the Grid Infrastructure home or <crs_home> and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00712: Oracle High Availability Service aborted due to failure to initialize the network layer with error [number]. Details at string in string.

Cause: The network layer initialization failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00713: An error occurred initializing the Reboot Advisory Monitor: error code [number]. Details at string in string.

Cause: An error occurred initializing the Reboot Advisory Monitor component of Oracle High Availability Service. This error is not fatal; Oracle High Availability Service processing continues.

Action: Examine the Clusterware alert log for messages providing details of the error. If the error is correctable, do so and then restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If no messages are found or you do not understand how to correct the problem, contact Oracle Support Services.

CRS-00715: Oracle High Availability Service has timed out waiting for init.oahasd to be started.

Cause: The Oracle High Availability Service requires that initd start init.oahasd to successfully initialize.

Action: 1. Check the run level to ensure that you are in the correct runlevel using cluvfy ("cluvfy stage -pre crsinst -n <nodelist>"); 2. If the run level is correct, diagnose the reason for init.d not starting init.oahasd.

CRS-00800: Cluster Ready Service aborted due to failure to allocate memory. Details at string in string.

Cause: Memory allocation failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00801: Cluster Ready Service aborted due to failure to obtain identity of the running process. Details at *string* in *string*.

Cause: Failed to retrieve user id.

Action: Check <crs_home> owner and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00802: Cluster Ready Service aborted due to failure to run as privileged user. Details at *string* in *string*.

Cause: Cluster Ready Service was not running as privileged user.

Action: On Unix, restart Cluster Ready Service as privileged user using 'crsctl stop crs -f' followed by 'crsctl start crs'. On Windows, check the privileges of the Oracle High Availability Service and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00803: Cluster Ready Service aborted due to failure to initialize the communication context. Details at *string* in *string*.

Cause: The network layer initialization failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00804: Cluster Ready Service aborted due to Oracle Cluster Registry error [*string*]. Details at *string* in *string*.

Cause: Oracle Cluster Registry aborted with an error. Look at the associated error message to determine the underlying issue.

Action: Solve the underlying issue and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00805: Cluster Ready Service aborted due to failure to communicate with Cluster Synchronization Service with error [*number*]. Details at *string* in *string*.

Cause: The Cluster Synchronization Service is unreachable.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00806: Cluster Ready Service aborted due to failure to retrieve the local node name. Details at *string* in *string*.

Cause: The Cluster Synchronization Service node name is not accessible.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00807: Cluster Ready Service aborted due to failure to check version compatibility. Details at *string* in *string*.

Cause: Oracle Cluster Registry content is not compatible with this version of Cluster Ready Service.

Action: Start the correct version of Cluster Ready Service. If the problem persists, contact Oracle Support Services.

CRS-00808: Cluster Ready Service aborted due to failure to retrieve ORA_CRS_HOME environment variable. Details at *string* in *string*.

Cause: An environment variable required by Cluster Ready Service failed to be set at initialization.

Action: Run 'rootcrs.pl -unlock' followed by 'rootcrs.pl -patch' and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00809: Cluster Ready Service aborted due to failure to initialize ORA_CRS_HOME path. Details at *string* in *string*.

Cause: Cluster Ready Service ORA_CRS_HOME path could not be initialized.

Action: Check for execute permissions on the Grid Infrastructure home or <crs_home> and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00810: Cluster Ready Service aborted due to failure to communicate with Event Management Service with error [*number*]. Details at *string* in *string*.

Cause: The Event Management Service is unreachable.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00811: Cluster Ready Service aborted due to failure to build dependency graph. Details at *string* in *string*.

Cause: There exists inconsistencies in the resources dependencies.

Action: Check the resources dependencies and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00812: Cluster Ready Service aborted due to failure to initialize the network layer with error [*number*]. Details at *string* in *string*.

Cause: The network layer initialization failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00813: Cluster Ready Service aborted due to failure to initialize the network layer with error [*string*]. Details at *string* in *string*.

Cause: The network layer initialization failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00814: Cluster Ready Service aborted due to failure to start thread with error [*number*]. Details at *string* in *string*.

Cause: Thread creation failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-01001: The OCR was formatted using version *number*.

Cause: Successfully formatted the OCR location(s).

Action: None

CRS-01002: The OCR was restored from file *string*.

Cause: The OCR was successfully restored from a backup file as requested by the user.

Action: None

CRS-01003: The OCR format was downgraded to version *number*.

Cause: The OCR was successfully downgraded to an earlier block format as requested by the user.

Action: None

CRS-01004: The OCR was imported from *string*.

Cause: Successfully imported the OCR contents from a file as requested by the user.

Action: None

CRS-01005: The Oracle Clusterware upgrade was completed. Version has changed from [*number, string*] to [*number, string*]. Details in *string*.

Cause: The Oracle Clusterware was successfully upgraded to a version.

Action: None

CRS-01006: The OCR location *string* is inaccessible. Details in *string*.

Cause: An error occurred while accessing the OCR.

Action: Use the ocrcheck command to validate the accessibility of the device and its block integrity. Check that the OCR location in question has the correct permissions. Determine whether this behavior is limited to one node or whether it occurs across all of the nodes in the cluster. Use the ocrconfig command with the -replace option to replace the OCR location.

CRS-01007: The OCR/OCR mirror location was replaced by *string*.

Cause: The OCR location was successfully replaced as requested by the user.

Action: None

CRS-01008: Node *string* is not responding to OCR requests. Details in *string*.

Cause: Error in communicating to the OCR server on a peer node. This OCR did not receive a notification regarding its peer's death within the specified time.

Action: Contact Oracle Customer Support.

CRS-01009: The OCR configuration is invalid. Details in *string*.

Cause: The OCR configuration on this node does not match the OCR configuration on the other nodes in the cluster.

Action: Determine the OCR configuration on the other nodes in the cluster on which Oracle Clusterware is running by using the ocrcheck command. Run the ocrconfig command with the -repair option to correct the OCR configuration on this node.

CRS-01010: The OCR mirror location *string* was removed.

Cause: The OCR location was successfully removed as requested by the user.

Action: None

CRS-01011: OCR cannot determine that the OCR content contains the latest updates. Details in *string*.

Cause: The OCR could not be started. The OCR location configured on this node does not have the necessary votes and might not have the latest updates.

Action: Ensure that the other nodes in the cluster have the same OCR location configured. If the configuration on the other nodes in the cluster does not match, then run the ocrconfig command with the -repair option to correct the configuration on this node. If the configurations on all of the nodes match, use the ocrdump command to ensure that the existing OCR location has the latest updates. Run the ocrconfig command with the -overwrite option to correct the problem. If the se procedures do not correct the problem, then contact Oracle Customer Support.

CRS-01012: The OCR service started on node *string*.

Cause: The OCR was successfully started.

Action: None

CRS-01013: The OCR location in an ASM disk group is inaccessible. Details in *string*.

Cause: An error occurred while accessing the OCR file in an ASM disk group.

Action: Use the 'asmcmd' command to verify if the ASM instance is active. If the ASM instance aborted, it will be restarted automatically. Use 'ocrcheck -config' to discover the OCR locations configured, and verify using 'asmcmd' that the disk group in question is mounted. Mount the disk group if it is not mounted. Validate if the behavior is limited to one node or whether it occurs across all of the nodes in the cluster. If nothing works, use the 'ocrconfig' command with the '-replace' or '-delete' option to replace or remove the OCR location.

CRS-01014: Failed to import Oracle Cluster Registry from file *string*

Cause: Unable to read data from the import file and import to the cluster registry

Action: Check availability of the cluster registry and the details of the failure from the log file

CRS-01015: A request to terminate the Cluster Ready Service on node *string* completed successfully. Details at *string* in *string*.

Cause: The Cluster Ready Service on the above listed node did not respond to an earlier request within the specified time. The Cluster Ready Service will be terminated to prevent any possible cluster hangs.

Action: Check the Oracle Clusterware alert log on the listed node for any problems. Check for any reason that might not allow the Cluster Ready Service to run optimally on the listed node. Verify network accessibility to the listed node from other nodes in the cluster. If the problem persists, contact Oracle Support Services.

CRS-01016: The Cluster Ready Service on this node terminated because it detected a failure while upgrading the Oracle Cluster Registry format. Details at *string* in *string*.

Cause: The Cluster Ready Service on the node coordinating the upgrade of the Oracle Cluster Registry format terminated.

Action: The Oracle Cluster Registry format upgrade will be completed by another node in the cluster. The Cluster Ready Service on the node listed above will be automatically restarted, and will be able to function as soon as the upgrade completes. If the problem persists, contact Oracle Support Services.

CRS-01017: The Cluster Ready Service on this node terminated because it was unable to open the import file while upgrading the Oracle Cluster Registry format. Details at *string* in *string*.

Cause: There was a failure accessing the import file on this node. The Cluster Ready Service on this node may not have been active during the Oracle Cluster Registry format upgrade.

Action: The Oracle Cluster Registry format upgrade will be completed by another node in the cluster. The Cluster Ready Service on this node will be automatically restarted, and will be able to function as soon as the upgrade completes. If the problem persists, contact Oracle Support Services.

CRS-01018: The Cluster Ready Service on this node terminated because the OCR configuration on this node is invalid. Details at *string* in *string*.

Cause: The OCR configuration on this node did not match with the OCR configuration on the other nodes in the cluster.

Action: The OCR configuration on this node is automatically repaired and the Cluster Ready Service will be automatically restarted. If the problem persists, contact Oracle Support Services.

CRS-01019: The OCR Service exited on host *string*. Details in *string*

Cause: The OCR Service exited due to an internal error.

Action: Determine whether the service has restarted. Collect Clusterware alert log and the CRSD log indicated in the message and contact Oracle Support Services.

CRS-01020: The Oracle Cluster Registry has invalid contents. Details at *string* in *string*.

Cause: Some of the Oracle Cluster Registry contents were invalid.

Action: Check the log file indicated in the message for more details. Use the 'ocrcheck' command to detect errors, and the 'ocrdump' command to review the registry contents. If problems exist, the registry may need to be recovered or restored. If the problem persists, contact Oracle Support Services.

CRS-01021: The Oracle Cluster Registry backup file in an ASM disk group is inaccessible. Details in *string*.

Cause: Oracle Cluster Registry backup location did not exist, wasn't mounted correctly, or did not have the required permissions.

Action: Ensure that the backup location exists, that it is mounted correctly and visible to all nodes in the cluster, and that its permissions are correct. Check the entries in the ASM alert log file for more details.

CRS-01022: The Oracle Clusterware was forcibly upgraded without upgrading nodes *string*. Version has changed from [*number, string*] to [*number, string*]. Details in *string*.

Cause: Oracle Clusterware was forcibly upgraded when the above listed nodes were not upgraded.

Action: Delete the above listed nodes using the procedure in the Clusterware Administration and Deployment Guide. If the nodes later become accessible, they can be added back into the cluster.

CRS-01025: The Oracle Clusterware was upgraded to [*string*] on all nodes, but the cluster operating version is still [*string*]. Details in [*string*].

Cause: The cluster upgrade did not complete because the root upgrade script failed on the last node, the root upgrade script was interrupted by the user, or the cluster upgrade is ongoing.

Action: Check the Oracle Clusterware alert log on all nodes for any problems. Rerun the root upgrade script on the last node to completion, and ensure that the

cluster operating version has changed using the 'crsctl query crs activeversion' command. If the problem persists, run diagcollection.pl and contact Oracle Support Services.

CRS-01110: The Oracle Clusterware upgrade is in unknown state [number].

Cause: There was an internal error upgrading the Oracle Clusterware.

Action: Retry the 'crsctl set crs activeversion' command. If the problem persists, contact Oracle Support Services.

CRS-01111: Error upgrading the Oracle Clusterware. Details [string].

Cause: There was an internal error upgrading the Oracle Clusterware.

Action: Verify using the 'crsctl check crs' command that the CRS Service running. Retry the 'crsctl set crs activeversion' command. If the problem persists, contact Oracle Support Services.

CRS-01112: Failed to set the Oracle Clusterware operating version string

Cause: There was an internal error upgrading the Oracle Clusterware.

Action: Retry the 'crsctl set crs activeversion' command. If the problem persists, contact Oracle Support Services.

CRS-01114: Invalid active version [string] passed

Cause: An invalid active version was passed.

Action: Use the 'crsctl query crs softwareversion' command to retrieve a valid active version.

CRS-01115: Oracle Clusterware has already been upgraded.

Cause: Oracle Clusterware is already running in highest possible operating version.

Action: None

CRS-01116: Oracle Clusterware upgrade has been aborted.

Cause: One of the Oracle Clusterware components have failed to upgrade within the expected time.

Action: Check the Oracle Clusterware alert log and the CRS daemon log for additional information.

CRS-01117: Error upgrading the Oracle Clusterware.

Cause: An attempt was made to change the Oracle Clusterware operating version before all nodes were upgraded.

Action: Run root.sh script on all nodes in the cluster. If the problem persists, contact Oracle Support Services.

CRS-01119: Unable to complete Oracle Clusterware upgrade while nodes string have not yet upgraded

Cause: An attempt was made to change the Oracle Clusterware operating version before all nodes were upgraded.

Action: Run root.sh script and upgrade all nodes in the cluster before retrying the 'crsctl set crs activeversion' command.

CRS-01121: Oracle Clusterware was forcibly upgraded without upgrading nodes string.

Cause: Oracle Clusterware was forcibly upgraded when the above listed nodes were not upgraded.

Action: Delete the above listed nodes using the procedure in the Clusterware Administration and Deployment Guide. If the nodes later become accessible, they can be added back into the cluster.

CRS-01201: CRSD started on node *string*.

Cause: CRSD has started, possibly due to a CRS start, or a node reboot or a CRSD restart.

Action: None Required. You can run the command 'crsctl check crsd' to validate the health of the CRSD.

CRS-01202: CRSD aborted on node *string*. Error [*string*]. Details in *string*.

Cause: Fatal Internal Error. Check the CRSD log file to determine the cause.

Action: Determine whether the CRSD gets auto-started.

CRS-01203: Failover failed for the CRS resource *string*. Details in *string*.

Cause: Failover failed due to an internal error. Examine the contents of the CRSD log file to determine the cause.

Action: None

CRS-01204: Recovering CRS resources for node *string*.

Cause: CRS resources are being recovered, possibly because the cluster node is starting up online.

Action: Check the status of the resources using the 'crsctl status resource' command.

CRS-01205: Auto-start failed for the CRS resource *string*. Details in *string*.

Cause: This message comes up when the auto-start for the resource has failed during a reboot of the cluster node.

Action: Start the resources using the 'crsctl start resource' command.

CRS-01206: Resource *string* is in the UNKNOWN state. Make sure the resource is completely stopped, then use the 'crsctl stop -f' command.

Cause: Resource went into an unknown state because the check or the stop

Action: Make sure the resource is completely stopped, then use the 'crsctl stop -f' command.

CRS-01207: There are no more restart attempts left for resource *string*. Restart the resource manually using the crsctl command.

Cause: The Oracle Clusterware is no longer attempting to restart the resource because the resource has failed and the Oracle Clusterware has exhausted the maximum number of restart attempts.

Action: Use the 'crsctl start' command to restart the resource manually.

CRS-01208: Cluster Ready Service terminating, unable to start successfully. Details at *string* in *string*.

Cause: Cluster Ready Service could not initialize successfully.

Action: Restart Cluster Ready Service using the command 'crsctl start clusterware'. If the problem persists, contact Oracle Support Services.

CRS-01209: Cluster Ready Service terminating, failed to register with group '*string*'. Details at *string* in *string*.

Cause: Cluster Ready Service could not initialize successfully.

Action: Restart Cluster Ready Service using the command 'crsctl start clusterware'. If the problem persists, contact Oracle Support Services.

CRS-01210: Cluster Ready Service failed to update group data. Details at *string* in *string*.

Cause: Cluster Ready Service failed to update the group private data with new master.

Action: Restart Cluster Ready Service using the command 'crsctl start clusterware'. If the problem persists, contact Oracle Support Services.

CRS-01211: Cluster Ready Service noticed abnormal termination by Cluster Synchronization Service. Details at *string* in *string*.

Cause: Cluster Ready Service terminating due to abnormal termination of Cluster Synchronization Service layer.

Action: Contact Oracle Support Services.

CRS-01212: Cluster Ready Service received invalid update for group private data. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01213: Cluster Ready Service failed to retrieve user information. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01214: Cluster Ready Service failed to initialize OLR context. Details at *string* in *string*.

Cause: Cluster Ready Service unable to access local registry.

Action: Use the ocrcheck utility to detect errors in the OLR. If problems exist, the registry may need to be recovered or restored.

CRS-01215: Cluster Ready Service could not get the local node number. Details at *string* in *string*.

Cause: Cluster Ready Service could not retrieve the local node incarnation number.

Action: Contact Oracle Support Services.

CRS-01216: Cluster Ready Service could not determine node list. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01217: Cluster Ready Service unable to get node name. Details at *string* in *string*.

Cause: Cluster Ready Service could not determine node name.

Action: Contact Oracle Support Services.

CRS-01218: Cluster Ready Service error during initialization. Details at *string* in *string*.

Cause: Cluster Ready Service could not initialize underlying layers successfully.

Action: Contact Oracle Support Services.

-
- CRS-01219: Cluster Synchronization Service not available. Details at *string* in *string*.**
Cause: Cluster Ready Service was unable to initialize access to CSS, which is required.
Action: Contact Oracle Support Services.
- CRS-01220: Cluster Ready Service could not retrieve local node number. Details at *string* in *string*.**
Cause: Cluster Ready Service could not retrieve node number for local node.
Action: Contact Oracle Support Services.
- CRS-01221: Cluster Ready Service failed to retrieve local node name. Details at *string* in *string*.**
Cause: Cluster Ready Service could not retrieve node name.
Action: Contact Oracle Support Services.
- CRS-01222: Cluster Ready Service failed to retrieve maximum group size. Details at *string* in *string*.**
Cause: Cluster Ready Service could not retrieve value for maximum group size.
Action: Contact Oracle Support Services.
- CRS-01223: Cluster Ready Service error while reading cluster active version. Details at *string* in *string*.**
Cause: Could not retrieve cluster active version.
Action: Contact Oracle Support Services.
- CRS-01224: Server authentication exception encountered, exception text is '*string*'. Details at *string* in *string*.**
Cause: Cluster Ready Service encountered error while authenticating user.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01225: Invalid identity exception encountered, exception text is '*string*'. Details at *string* in *string*.**
Cause: Cluster Ready Service could not verify user identity.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01226: Failed to create message to send to policy engine. Details at *string* in *string*.**
Cause: Cluster Ready Service encountered communication error.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01227: Error during initialization of communication subsystem. Details at *string* in *string*.**
Cause: Cluster Ready Service encountered communication error during initialization.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01228: Error while setting up user interface server. Details at *string* in *string*.**
Cause: Cluster Ready Service encountered communication error.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01229: Error while listening for events. Details at *string* in *string*.**

-
- Cause:** Cluster Ready Service encountered communication error.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01231: Failed to open key '*string*' in OCR. Details at *string* in *string*.**
Cause: This is an internal error.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01232: Could not get security attribute for system key '*string*' in OCR. Details at *string* in *string*.**
Cause: Encountered error while reading system key attributes in OCR.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01233: Failed to initialize batch handler for OCR. Details at *string* in *string*.**
Cause: Could not initialize batch handler for multiwrite in OCR.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01234: Encountered error while setting key value for key '*string*' in OCR. Details at *string* in *string*.**
Cause: Encountered an error while executing a batch write in OCR.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01235: Error while executing batch for multi writes in OCR. Details at *string* in *string*.**
Cause: Encountered an error while executing a batch write in OCR.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01236: Error enumerating subkeys for key '*string*' in OCR. Details at *string* in *string*.**
Cause: Encountered an error while reading subkey values in OCR.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01237: Failed to retrieve the maximum value supported in OCR. Details at *string* in *string*.**
Cause: Could not read the maximum value size from registry.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01238: Failed to add a delete key operation for key '*string*' to a batch in OCR. Details at *string* in *string*.**
Cause: Encountered internal error while deleting key in OCR.
Action: This is an internal error. Contact Oracle Support Services.
- CRS-01239: Cluster Ready Service aborted due to an unexpected error [*string*]. Details at *string* in *string*.**
Cause: This is an unexpected error. Look at the associated error message to fix the underlying issue.
Action: If the problem persists, contact Oracle Support Services.
- CRS-01301: Oracle High Availability Service started on node *string*.**
Cause: Oracle High Availability Service has started, possibly due to a Clusterware start, or a node reboot.
Action: None Required.

CRS-01302: Oracle High Availability Service aborted on node *string*. Error [*string*]. Details in *string*.

Cause: Fatal Internal Error. Check the Oracle High Availability Service log file to determine the cause.

Action: Determine whether the Oracle High Availability Service gets auto-started.

CRS-01303: Failover failed for the OHAS resource *string*. Details in *string*.

Cause: Failover processing for the specified resource did not complete. Examine the contents of the Oracle High Availability Service log file to determine the cause.

Action: None

CRS-01304: Recovering OHAS resources for node *string*.

Cause: Oracle High Availability Service resources are being recovered, possibly because the cluster node is starting up online.

Action: Check the status of the resources using the `crsctl` command.

CRS-01305: Auto-start failed for the OHAS resource *string*. Details in *string*.

Cause: This message comes up when the auto-start for the resource has failed during a reboot of the cluster node.

Action: Start the resources using the '`crsctl start resource`' command.

CRS-01306: Resource *string* is in an unknown state. Make sure the resource is completely stopped, then use the '`crsctl stop -f`' command.

Cause: Resource went into an unknown state because the check or the stop

Action: Make sure the resource is completely stopped, then use the '`crsctl stop -f`' command.

CRS-01307: There are no more restart attempts left for resource *string*. Restart the resource manually using the `crsctl` command.

Cause: The Oracle Clusterware is no longer attempting to restart the resource because the resource has failed and the Oracle Clusterware has exhausted the maximum number of restart attempts.

Action: Use the '`crsctl start resource`' command to restart the resource manually.

CRS-01308: Oracle High Availability Service terminating, unable to start successfully. Details at *string* in *string*.

Cause: Oracle High Availability Service could not initialize successfully.

Action: Restart your clusterware installation. If the problem persists, contact Oracle Support Services.

CRS-01309: Oracle High Availability Service terminating, failed to register with group '*string*'. Details at *string* in *string*.

Cause: Oracle High Availability Service could not initialize successfully.

Action: Restart your clusterware installation. If the problem persists, contact Oracle Support Services.

CRS-01310: Oracle High Availability Service failed to update group data. Details at *string* in *string*.

Cause: Oracle High Availability Service failed to update the group private data with new master.

Action: Restart your clusterware installation. If the problem persists, contact Oracle Support Services.

CRS-01311: Oracle High Availability Service noticed abnormal termination by Cluster Synchronization Service. Details at *string* in *string*.

Cause: Oracle High Availability Service terminating due to abnormal termination of Cluster Synchronization Service layer.

Action: Contact Oracle Support Services.

CRS-01312: Oracle High Availability Service received invalid update for group private data. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01313: Oracle High Availability Service failed to retrieve user information. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01314: Oracle High Availability Service failed to initialize OLR context. Details at *string* in *string*.

Cause: Oracle High Availability Service unable to access local registry.

Action: Use the ocrcheck utility to detect errors in the OLR. If problems exist, the registry may need to be recovered or restored.

CRS-01315: Oracle High Availability Service could not get the local node number. Details at *string* in *string*.

Cause: Oracle High Availability Service could not retrieve the local node incarnation number.

Action: Contact Oracle Support Services.

CRS-01316: Oracle High Availability Service could not determine node list. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01317: Oracle High Availability Service unable to get node name. Details at *string* in *string*.

Cause: Oracle High Availability Service could not determine node name.

Action: Contact Oracle Support Services.

CRS-01318: Oracle High Availability Service error during initialization. Details at *string* in *string*.

Cause: Oracle High Availability Service could not initialize underlying layers successfully.

Action: Contact Oracle Support Services.

CRS-01319: Cluster Synchronization Service not available. Details at *string* in *string*.

Cause: Oracle High Availability Service was unable to initialize access to CSS, which is required.

Action: Contact Oracle Support Services.

CRS-01320: Oracle High Availability Service could not retrieve local node number. Details at *string* in *string*.

-
- Cause:** Oracle High Availability Service could not retrieve node number for local node.
- Action:** Contact Oracle Support Services.
- CRS-01321: Oracle High Availability Service failed to retrieve local node name. Details at *string* in *string*.**
- Cause:** Oracle High Availability Service could not retrieve node name.
- Action:** Contact Oracle Support Services.
- CRS-01322: Oracle High Availability Service failed to retrieve maximum group size. Details at *string* in *string*.**
- Cause:** Oracle High Availability Service could not retrieve value for maximum group size.
- Action:** Contact Oracle Support Services.
- CRS-01323: Oracle High Availability Service error while reading cluster active version. Details at *string* in *string*.**
- Cause:** Could not retrieve cluster active version.
- Action:** Contact Oracle Support Services.
- CRS-01324: Server authentication exception encountered, exception text is '*string*'. Details at *string* in *string*.**
- Cause:** Oracle High Availability Service encountered error while authenticating user.
- Action:** This is an internal error. Contact Oracle Support Services.
- CRS-01325: Invalid identity exception encountered, exception text is '*string*'. Details at *string* in *string*.**
- Cause:** Oracle High Availability Service could not verify user identity.
- Action:** This is an internal error. Contact Oracle Support Services.
- CRS-01326: Failed to create message to send to policy engine. Details at *string* in *string*.**
- Cause:** Oracle High Availability Service encountered communication error.
- Action:** This is an internal error. Contact Oracle Support Services.
- CRS-01327: Error during initialization of communication subsystem. Details at *string* in *string*.**
- Cause:** Oracle High Availability Service encountered communication error during initialization.
- Action:** This is an internal error. Contact Oracle Support Services.
- CRS-01328: Error while setting up user interface server. Details at *string* in *string*.**
- Cause:** Oracle High Availability Service encountered communication error.
- Action:** This is an internal error. Contact Oracle Support Services..
- CRS-01329: Error while listening for events. Details at *string* in *string*.**
- Cause:** Oracle High Availability Service encountered communication error.
- Action:** This is an internal error. Contact Oracle Support Services..
- CRS-01330: Oracle High Availability Services aborted due to internal error.**

Cause: Fatal Internal Error. Check the Oracle High Availability Service log file to determine the cause.

Action: Determine whether the Oracle High Availability Service gets auto-started.

CRS-01331: Failed to open key '*string*' in OLR. Details at *string* in *string*.

Cause: This is an internal error.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01332: Could not get security attribute for system key '*string*' in OLR. Details at *string* in *string*.

Cause: Encountered error while reading system key attributes in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01333: Failed to initialize batch handler for OLR. Details at *string* in *string*.

Cause: Could not initialize batch handler for multiwrite in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01334: Encountered error while setting key value for key '*string*' in OLR. Details at *string* in *string*.

Cause: Encountered an error while executing a batch write in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01335: Error while executing batch for multi writes in OLR. Details at *string* in *string*.

Cause: Encountered an error while executing a batch write in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01336: Error enumerating subkeys for key '*string*' in OLR. Details at *string* in *string*.

Cause: Encountered an error while reading subkey values in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01337: Failed to retrieve the maximum value supported in OLR. Details at *string* in *string*.

Cause: Could not read the maximum value size from registry.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01338: Failed to add a delete key operation for key '*string*' to a batch in OLR. Details at *string* in *string*.

Cause: Encountered internal error while deleting key in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01339: Oracle High Availability Service aborted due to an unexpected error [*string*]. Details at *string* in *string*.

Cause: Look at the associated error message to fix the underlying issue.

Action: If the problem persists, contact Oracle Support Services.

CRS-01401: EVMD started on node *string*.

Cause: EVMD has started either because of a CRS start, a node reboot, or an EVMD restart.

Action: None required. You can run the 'crsctl check evmd' command to validate the health of EVMD.

-
- CRS-01402: EVMD aborted on node *string*. Error [*string*]. Details in *string*.**
Cause: EVMD has aborted due to an internal error. Check the EVMD log file to determine the cause.
Action: Determine whether the EVMD is auto-started and contact Oracle Support Services.
- CRS-01403: The Event Management Service terminated on node *string*. Listening port *number* is in use by another application. Details in *string*.**
Cause: The Event Management Service has aborted because the configured listening port is being used by another application on this node.
Action: Make the listening port listed above available. Restart the Event Management Service using 'crsctl start crs' or 'crsctl start cluster' command.
- CRS-01601: CSSD Reconfiguration complete. Active nodes are *string*.**
Cause: A node joined or left the cluster.
Action: None
- CRS-01602: CSSD aborted on node *string*. Error [*string*]; details in *string*.**
Cause: The CSS daemon aborted on the listed node with the listed return code.
Action: Collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.
- CRS-01603: CSSD on node *string* shutdown by user.**
Cause: The CSS daemon on the listed node was terminated by a user.
Action: None
- CRS-01604: CSSD voting file is offline: *string*; details at *string* in *string*.**
Cause: The listed voting file became unusable on the local node.
Action: Verify that the filesystem containing the listed voting file is available on the local node.
- CRS-01605: CSSD voting file is online: *string*; details in *string*.**
Cause: The CSS daemon has detected a valid configured voting file.
Action: None
- CRS-01606: The number of voting files available, *number*, is less than the minimum number of voting files required, *number*, resulting in CSSD termination to ensure data integrity; details at *string* in *string***
Cause: The number of voting files has decreased to a number of files that is insufficient.
Action: as indicated by those messages.
- CRS-01607: Node *string* is being evicted in cluster incarnation *number*; details at *string* in *string*.**
Cause: The local node has detected that the indicated node is still active, but not able to communicate with this node, so is forcibly removing the indicated node from the cluster.
Action: Collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.
- CRS-01608: This node was evicted by node *number*, *string*; details at *string* in *string*.**
Cause: The local node was evicted by the indicated node.

Action: Collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.

CRS-01609: This node is unable to communicate with other nodes in the cluster and is going down to preserve cluster integrity; details at *string* in *string*.

Cause: Communication was lost with some nodes of the cluster and this node detected that another sub-cluster was designated to be the surviving sub-cluster. This node went down to preserve data integrity.

Action: Verify all network connections between cluster nodes and repair any problematic connections. If there do not appear to be any network problems,

1. collect the CSS daemon logs, system messages and any CSS daemon core files from all nodes and
2. contact Oracle Support.

CRS-01610: Network communication with node *string (number)* missing for 90% of timeout interval. Removal of this node from cluster in *number.number* seconds

Cause: Did not receive heartbeat messages from the node. This could be due to network problems or failure of the listed node.

Action: Check if the private interconnect network used by cluster is functioning properly, including all the cables, network cards, switches/routers etc. between this node and listed node. Correct any problems discovered.

CRS-01611: Network communication with node *string (number)* missing for 75% of timeout interval. Removal of this node from cluster in *number.number* seconds

Cause: Did not receive heartbeat messages from the node. This could be due to network problems or failure of the listed node.

Action: Check if the private interconnect network used by cluster is functioning properly, including all the cables, network cards, switches/routers etc. between this node and listed node. Correct any problems discovered.

CRS-01612: Network communication with node *string (number)* missing for 50% of timeout interval. Removal of this node from cluster in *number.number* seconds

Cause: Did not receive heartbeat messages from the node. This could be due to network problems or failure of listed node.

Action: Check if the private interconnect network used by cluster is functioning properly, including all the cables, network cards, switches/routers etc. between this node and listed node. Correct any problems discovered.

CRS-01613: No I/O has completed after 90% of the maximum interval. Voting file *string* will be considered not functional in *number* milliseconds

Cause: Voting device I/O has not completed for a long time. This could be due some error with the device the voting file is on or in some element in the path of the I/O to the device.

Action: Verify that the device is working properly including all elements in the I/O path. The voting file listed will be considered inactive in the number of milliseconds specified. Failure of a majority of devices will result in node reboot.

CRS-01614: No I/O has completed after 75% of the maximum interval. Voting file *string* will be considered not functional in *number* milliseconds

Cause: Voting device I/O has not completed for a long time. This could be due some error with the device the voting file is on or in some element in the path of the I/O to the device.

Action: Verify that the device is working properly including all elements in the I/O path. The voting file listed will be considered inactive in the number of milliseconds specified. Failure of a majority of devices will result in node reboot.

CRS-01615: No I/O has completed after 50% of the maximum interval. Voting file *string* will be considered not functional in *number* milliseconds

Cause: Voting device I/O has not completed for a long time. This could be due some error with the device the voting file is on or in some element in the path of the I/O to the device.

Action: Verify that the device is working properly including all elements in the I/O path. The voting file listed will be considered inactive in the number of milliseconds specified. Failure of a majority of devices will result in node reboot.

CRS-01616: The BMC device used for IPMI at IP address *string* is not properly configured for ADMIN access; details at *string* in *string*

Cause: The IPMI BMC is not configured to support the ADMIN access methods required by Oracle Clusterware.

Action: Consult the clusterware admin manual for proper procedures in configuring BMC. Use the BMC configuration tool (ipmitool or ipmiutil) command to check and verify that the current configuration supports either MD5 or password validation for ADMIN access.

CRS-01617: The information required to do node kill for node *string* is incomplete; details at *string* in *string*

Cause: Incomplete config information stored in Cluster Registry for node kill.

Action: Make sure all the information pertaining to the node kill method

CRS-01618: The requested node kill information change could not be validated by node *string*; details at *string* in *string*

Cause: Unable to validate the node kill information for this node.

Action: Additional information can be found in the CRS alert log of the node that performed the validation.

CRS-01619: The node kill information of node *string* could not be validated by this node due to failure in connecting to the IPMI device; details at *string* in *string*

Cause: Unable to validate the node kill information for this node.

Action: Additional information can be found in the CSSD logs.

CRS-01620: The node kill information of node *string* could not be validated by this node due to invalid authorization information; details at *string* in *string*

Cause: Unable to validate the kill information for this node.

Action: Additional information can be found in the CSSD logs.

CRS-01621: The IPMI configuration data for this node stored in the Oracle registry is incomplete; details at *string* in *string*

Cause: All the necessary information such as IPMI username, password and IP address are not present.

Action: Make sure all the information(BMC IPMI username, password and IP address) are present. Use commands 'crsctl set css ipmiaddr' and 'crsctl set css ipmiadmin' for this.

CRS-01622: The IPMI node kill information could not be validated due to inability to connect to the IPMI device at BMC IP address provided *string*; details at *string* in *string*

Cause: Unable to validate the BMC IPMI IP address provided.

Action: Additional information can be found in the CSSD logs.

CRS-01623: The IPMI node kill information of BMC at IP address *string* could not be validated due to invalid authorization information. The BMC username provided is '*string*'; details at *string* in *string*

Cause: Unable to validate the BMC IPMI UserName and password provided.

Action: Additional information can be found in the CSSD logs.

CRS-01624: The requested Node kill information change succeeds vacuously because there is no other node in cluster to validate.

Cause: Unable to validate the credentials because this is the sole node in the cluster.

Action: To complete the validation, shut down the clusterware stack on this node, start another node and restart the stack on this node.

CRS-01625: Node *string*, number *number*, was manually shut down

Cause: A Clustware stack shutdown command was issued for a node in the cluster and was observed by this node.

Action: None required.

CRS-01626: A Configuration change request completed successfully

Cause: A Configuration change request completed successfully.

Action: None required.

CRS-01627: A Configuration change request failed because another configuration change is in progress; Details at *string* in *string*

Cause: Another configuration change is in still in progress.

Action: Wait until the other command completes and reissue the command if necessary. Message 1626 would be printed if the command succeeds.

CRS-01628: A Configuration change request failed because read of existing voting files failed; Details at *string* in *string*

Cause: CSSD was not able to read the lease blocks of a majority of Voting files which is an indication of a problem with the voting files.

Action: Run the command 'crsctl query css votedisk' to get the list of currently working voting files. User may delete problematic voting file or use a different set.

CRS-01629: A Configuration change request failed because write to new voting files failed; Details at *string* in *string*

Cause: A voting file write failed, causing the associated configuration change to fail. This often results from adding a voting file that is not accessible to one or more nodes.

Action: Confirm that voting files added in a configuration change are accessible and writeable from all cluster nodes. If they are, contact Oracle Customer Support.

CRS-01630: A configuration change request failed because not all the new voting files were discovered; Details at *string* in *string*

Cause: One or more of the voting files being added were not discovered. Message 1638 identifies the unique ID(s) of the file(s) that could not be found.

Action: Verify if the discovery string is adequate to discover the new voting files. If not, modify discovery string using command 'crsctl replace discoverystring xxxxx'.

CRS-01631: A configuration change request failed because one or more nodes are not a sufficient Clusterware version level; Details at *string* in *string*

Cause: One ore more nodes are not a sufficient version level.

Action: Configuration change would not be successful until all nodes are at the latest version. Try after all the nodes are upgraded.

CRS-01632: Node *string* is being removed from the cluster in cluster incarnation *number*

Cause: The local node is removing the indicated node from the cluster because it appears to be dead.

Action: Verify that the node that was removed, or the Oracle Clusterware on that node, was down. The CRS alert log of the node that was removed has information regarding why the node, or clusterware on the node, was no longer active. If the node was still up and Oracle Clusterware still active on that node, collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.

CRS-01633: CSSD failed to register group *string* in vendor clusterware; details at *string* in *string*

Cause: The local node is not able to register the group of vendor clusterware.

Action: Verify that the vendor clusterware is installed and configured correctly.

CRS-01634: CSSD is unable to determine cluster name; details at *string* in *string*

Cause: Name of the cluster cannot be determined from configuration.

Action: Verify that Oracle Clusterware installation was successful.

CRS-01635: CSSSD failed to initialize vendor clusterware; details at *string* in *string*

Cause: The local node is not able to attach vendor clusterware.

Action: Verify that the vendor clusterware is installed and configured correctly.

CRS-01636: The CSS daemon was started in exclusive mode but found an active CSS daemon on node *string* and is terminating; details at *string* in *string*

Cause: The CSS daemon was started in exclusive mode, which requires that the clusterware stack is down on all other nodes to ensure data integrity. A CSS daemon was detected on another node, so the CSS daemon on this node is terminating.

Action: Stop the Oracle clusterware stack that is running on the indicated node.

CRS-01637: Unable to locate configured voting file with ID *string*; details at *string* in *string*

Cause: The voting file with unique the ID indicated in the message was not found during the voting file discovery phase of CSS initialization.

Action: Verify that all configured voting files are accessible on this node. Any voting files that are not accessible should be removed and replaced with accessible voting files using the appropriate 'crsctl' commands.

CRS-01638: Unable to locate voting file with ID *string* that is being added to the list of configured voting files; details at *string* in *string*

Cause: The voting file with the unique ID indicated in the message was not found during the voting file discovery phase of CSS initialization. This voting file is in the process of being added to the list of configured voting files.

Action: Verify that all voting files to be added are accessible on this node. Any voting files that are not accessible should be removed and replaced with accessible voting files using the appropriate 'crsctl' commands.

CRS-01639: Rejecting configuration change *number:number* because another configuration change is already in progress; details at *string* in *string*

Cause: A configuration change was requested, but another configuration change is already in progress and only one configuration change may be processed at a time.

Action: Wait for the current configuration change to complete, then resubmit this configuration change.

CRS-01640: Rejecting configuration change *number:number* because one or more new voting files in the new configuration could not be found; details at *string* in *string*

Cause: A configuration change that involved the addition of voting files is being rejected because some of the new voting files were not located.

Action: Verify that the voting file name is correct and that it is accessible on this node, if the voting files are not managed by ASM. Message number 1638 provides greater detail.

CRS-01641: Rejecting configuration change *number:number* because only *number* of the required *number* voting files of the new configuration were located; details at *string* in *string*

Cause: A configuration change that involved a change to the list of voting files is being rejected because a sufficient number of voting files in the new configuration could not be located.

Action: Verify that all voting files in the new configuration are accessible on this node.

CRS-01642: Node *number* is using a different CSS configuration from the one used by this node; this node is terminating to preserve integrity; details at *string* in *string*

Cause: Another node in the cluster is using a different set of CSS configuration values, such as misscount or voting files. Inconsistency can result in data corruption, so this node is terminating to avoid data corruption.

Action: Collect Clusterware alert log and the CSSD log indicated in the message as well as the CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01643: Failed to format the CSS voting disk *string*

Cause: Problems were encountered attempting to access the voting file.

Action: Verify that the voting file can be accessed, the file exists, has the proper ownership and permissions, etc.

CRS-01644: The initialization of the EXADATA fencing facility failed in start with error *ORA-number*; details at *string* in *string*

Cause: The start of the initialization of the EXADATA fencing facility failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01645: The initialization of the EXADATA fencing facility failed in completion with error *ORA-number*; details at *string in string*

Cause: The completion of the initialization of the EXADATA fencing facility failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01646: Creation of a EXADATA fence identifier failed with error *ORA-number*; details at *string in string*

Cause: An attempt to create an identifier for a fence to an EXADATA device failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01647: Initialization of a EXADATA fence failed with error *ORA-number*; details at *string in string*

Cause: An attempt to initiate a fence to an EXADATA device failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01648: Completion of queued EXADATA fence requests failed with error *ORA-number*; details at *string in string*

Cause: Previously queued fence requests to an EXADATA device failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01649: An I/O error occurred for voting file: *string*; details at *string in string*.

Cause: The listed voting file became inaccessible.

Action: Verify that the filesystem containing the listed voting file is available on the local node.

CRS-01650: Configuration change *number:number* rejected by node *number string*; details at *string in string*

Cause: A new configuration change request from this node was not accepted due to another node rejecting the change.

Action: Check the CRS alert log of the node rejecting this configuration change for more details.

CRS-01651: Configuration change *number:number* rejected because it would make the active version of node *number* lower than the current setting *string* of this node; details at *string in string*

Cause: A new configuration change request from another node was not accepted because the new Active Version in the request is lower than this node's Active Version.

Action: Ensure that the new Active Version is not lower than the current Active Version of the nodes in the cluster.

CRS-01652: Starting clean up of CRSD resources.

Cause: Clean up of the resources registered in CRSD started.

Action: None

CRS-01653: The clean up of the CRSD resources failed.

Cause: Clean up of the resources registered in CRSD failed.

Action: Check the CRS alert log.

CRS-01654: Clean up of CRSD resources finished successfully.

Cause: Clean up of the resources registered in CRSD finished.

Action: None

CRS-01655: CSSD on node *string* detected a problem and started to shutdown.

Cause: The CSS daemon on the listed node detected a problem and started to shutdown.

Action: Check the CRS alert log.

CRS-01656: The CSS daemon is terminating due to a fatal error; Details at *string* in *string*

Cause: A fatal error occurred during CSS daemon processing.

Action: Check for prior errors logged in the alert log. Correct any errors that can be corrected. If there are no errors shown, or the errors cannot be resolved, contact Oracle support

CRS-01657: Unable to obtain the voting file discovery string; Details at *string* in *string*

Cause: An attempt to obtain the voting file discovery string from the profile failed, causing the CSS daemon to fail.

Action: Collect the Clusterware alert log and the CSSD log of this node as well as all CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01658: There is a mismatch of the initial cluster incarnation among the cluster nodes; Details at *string* in *string*

Cause: An internal error occurred.

Action: Collect the Clusterware alert log and the CSSD log of this node as well as all CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01659: An attempt to kill node *string* failed; Details at *string* in *string*

Cause: To protect data integrity a node kill was attempted for the indicated node, but it failed.

Action: Collect the Clusterware alert log and the CSSD log of this node as well as the CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01660: The CSS daemon shutdown has completed

Cause: A command to shut down the CSS daemon was issued by a user and the shutdown processing is completed. The CSS daemon is terminated.

Action: No action is required.

CRS-01661: The CSS daemon is not responding. Reboot will occur in *number* milliseconds; Details at *string* in *string*

Cause: The CSS daemon is failing to respond.

Action: Collect the Clusterware alert log and the CSSD log of this node as well as the CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01662: Member kill requested by node *string* for member number *number*, group *string*

Cause: A request to kill a member of the indicated group was issued by a process on the indicated node.

Action: No action is required.

CRS-01663: Member kill issued by PID *string* for *number* members, group *string*. Details at *string* in *string*.

Cause: A member kill request was issued by the indicated process for the members belonging to the indicated group.

Action: No action is required.

CRS-01701: Initialization of the required component GIPC failed; details at *string* in *string*

Cause: The initialization of the communications component GIPC failed, causing the CSSD startup to fail.

Action: Collect alert log and the CSSD log indicated in the message and contact Oracle Support Services.

CRS-01702: Initialization of the required component OLR failed; details at *string* in *string*

Cause: The initialization of the local repository component OLR failed, causing the CSSD startup to fail.

Action: Collect clusterware alert log and daemon logs and contact Oracle Support Services.

CRS-01703: Initialization of the required component GPNP failed because the GPNP server daemon is not up; details at *string* in *string*

Cause: The initialization of the configuration profile service failed because the associated server is not up, causing the CSSD startup to fail.

Action: Collect clusterware alert log and daemon logs and contact Oracle Support Services.

CRS-01704: Initialization of the required component *string* failed; details at *string* in *string*

Cause: The initialization of a component required by the CSS daemon failed, causing the CSSD startup to fail

Action: Collect clusterware alert log and daemon logs and contact Oracle Support Services.

CRS-01705: Found *number* configured voting files but *number* voting files are required, terminating to ensure data integrity; details at *string* in *string*

Cause: The voting file discovery was unable to locate a sufficient number of valid voting files to guarantee data integrity and is terminating to avoid potential data corruption.

Action: Delete the voting files that are no longer available, as indicated by message number 1637, using appropriate 'crsctl' commands, run either on another node where the clusterware stack is active, or by starting the clusterware stack in exclusive mode.

CRS-01706: Found *number* of *number* voting files in a pending configuration change but *number* voting files are required, terminating to ensure data integrity; details at *string* in *string*

Cause: The voting file discovery was unable to locate a sufficient number of voting files from the new configuration when a configuration change to add or delete voting files is in progress. The CSS daemon is terminating to avoid potential data corruption.

Action: Delete the voting files that are no longer available, as indicated by message number 1638, using appropriate 'crsctl' commands, run either on another node where the clusterware stack is active, or by starting the clusterware stack in exclusive mode.

CRS-01707: Lease acquisition for node *string* number *number* completed

Cause: CSSD acquired a node number through a lease acquisition procedure.

Action: None

CRS-01708: Lease acquisition failed for node *string* because all lease slots are in use; Details at *string* in *string*

Cause: The node failed to acquire a lease because all the lease slots were found to be occupied by other nodes.

Action: Using olsnodes command get the list of leased nodes. Delete the unused nodes using appropriate crsctl command.

CRS-01709: Lease acquisition failed for node *string* because no voting file has been configured; Details at *string* in *string*

Cause: At least one voting file is required for CSSD to function properly. No voting files have been configured.

Action: Add at least one voting file using appropriate crsctl command.

CRS-01710: Lease acquisition failed for node *string* because CSSD failed to access majority of voting files; Details at *string* in *string*

Cause: A majority of the voting files are not accessible by a node.

Action: Delete the voting files that are no longer available, as indicated by message number 1637, using appropriate 'crsctl' commands, run either on another node where the Clusterware stack is active, or by starting the Clusterware stack in exclusive mode.

CRS-01711: Increasing the number of leases available for new nodes from *number* to *number*

Cause: All the currently available leases are being used. Hence the number of leases available are increased.

Action: None

CRS-01712: Failed to save the node number acquired for node *string*; Details at *string* in *string*

Cause: CSSD failed to save the node number acquired during startup. The node number is saved to speed up the subsequent startup. Hence this is not a real problem but just a performance degradation on the next startup.

Action: Collect Clusterware alert log, CSSD logs and OHASD logs indicated in the message and contact Oracle Support Services.

CRS-01713: CSSD daemon is started in *string* mode

Cause: CSSD has been started on the node.

Action: None

CRS-01714: Unable to discover any voting files, retrying discovery in *number* seconds; Details at *string* in *string*

Cause: No voting files were discovered. Possible reasons include:

- The filesystems the voting files are on are not available
- The voting files have been deleted
- The voting files are corrupted

Action: Verify that the filesystems that the voting files are on are active and that the voting files have not been damaged. If necessary, start the clusterware stack in exclusive mode using 'crsctl start crs -excl' and add voting files using 'crsctl add css votedisk'

CRS-01715: A failure occurred in the CSS daemon during initialization; Details at *string* in *string*

Cause: A fatal error occurred during the initialization of the CSS daemon.

Action: Check for prior errors logged in the alert log. Correct any errors that can be corrected. If there are no errors shown, or the errors cannot be resolved, contact Oracle Support Services

CRS-01716: The CSS daemon cannot join the cluster because the software version *string* is lower than the active version *string*; Details at *string* in *string*

Cause: The cluster has been upgraded to the active version indicated. in the message, but this node is at a lower software version, as indicated in the message.

Action: Upgrade this node to the active version indicated in the message

CRS-01717: The CSS daemon has detected a voting file add during startup and is waiting for the add to complete; Details at *string* in *string*

Cause: A voting file add started on another node is in progress while this CSS daemon is starting. To avoid the potential for data corruption, the CSS daemon on this node must wait for the add to complete.

Action: This is normally a temporary condition that is automatically resolved. If the clusterware stack cannot start on any node, this condition may be corrected by starting the clusterware stack in exclusive mode using 'crsctl start crs -excl' followed by 'crsctl stop crs' on one node. This will automatically correct the condition and the clusterware can be started normally on all nodes.

CRS-01805: Unable to connect to the CSS daemon, return code *number*

Cause: Could not initialize the CSS connection.

Action: Verify that the CSS daemon is running and restart it if it is not up. Retry the operation.

CRS-01806: An error occurred when obtaining the node number of this host, return code *number*

Cause: The request for node number of this node failed.

Action: Verify that the CSS daemon is running and restart it if not. Retry the operation that failed after restart. Look for error messages from the CSS daemon in the alert log indicating any problems.

CRS-01807: An internal cluster configuration command failed in an OCR/OLR operation. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01809: The cluster configuration command failed to open OCR or OLR key *string*. Details at *string* in *string*.

Cause: An expected or required piece of configuration is missing from the cluster or local registry.

Action: Use the ocrcheck utility to detect errors, and the ocrdump utility to review the registry contents. If problems exist, the registry may need to be recovered or restored. If the problem persists, contact Oracle Support Services.

CRS-02001: memory allocation error when initiating the connection

Cause: failed to allocate memory for the connection with the target process.

Action: None

CRS-02002: connection by user *string* to *string* refused

Cause: User command cannot connect to the target process.

Action: The user may not have sufficient privilege to connect.

CRS-02003: error *number* encountered when connecting to *string*

Cause: Connection to the target process failed.

Action: Examine whether the connection is made properly. Retry again at a later time if necessary.

CRS-02004: error *number* encountered when sending messages to *string*

Cause: User command cannot communicate with the target process properly.

Action: Retry again at a later time.

CRS-02005: timed out when waiting for response from *string*

Cause: the target process does not return acknowledgment in time.

Action: Retry again at a later time.

CRS-02006: error *number* encountered when receiving messages from *string*

Cause: no meta or response message was received from the target process.

Action: Retry again at a later time.

CRS-02007: invalid component key name *<string>* used

Cause: the given component key name could not be recognized.

Action: re-run the command with a valid component key name.

CRS-02008: invalid message type *<number>* used

Cause: an unrecognized message type was sent.

Action: Retry with a valid command again.

CRS-02009: unable to get authentication for user *string*

Cause: current user was not authenticated for connection.

Action: Log in as another user and try again.

CRS-02010: invalid response message from *string*

Cause: Response message has incorrect format.

Action: Retry again at a later time.

CRS-02011: no response at index *number* in response message from *string*

Cause: Response message did not contain a response at the specified index.

Action: If this is an unexpected result, retry again at a later time.

CRS-02012: syntax error in command

Cause: The command syntax is not valid.

Action: Issue 'crsctl debug -h' to see command syntax details. Watch out for ',' vs. ';'.
';'.

CRS-02101: The OLR was formatted using version *number*.

Cause: Successfully formatted the OLR location(s).

Action: None

CRS-02102: The OLR was restored from file *string*.

Cause: The OLR was successfully restored from a backup file as requested by the user.

Action: None

CRS-02103: The OLR format was downgraded to version *number*.

Cause: The OLR was successfully downgraded to an earlier block format as requested by the user.

Action: None

CRS-02104: The OLR was imported from *string*.

Cause: Successfully imported the OLR contents from a file as requested by the user.

Action: None

CRS-02105: The OLR upgrade was completed. Version has changed from *number* to *number*. Details in *string*.

Cause: The OLR was successfully upgraded to a newer block format.

Action: None

CRS-02106: The OLR location *string* is inaccessible. Details in *string*.

Cause: An error occurred while accessing the OLR.

Action: Use the "ocrcheck -local" command to validate the accessibility of the device and its block integrity. Check that the OLR location in question has the correct permissions.

CRS-02112: The OLR service started on node *string*.

Cause: The OLR was successfully started.

Action: None

CRS-02114: Failed to import Oracle Local Registry from file *string*

Cause: Unable to read data from the import file and import to the local registry

Action: Check availability of the local registry and the details of the failure from the log file

CRS-02120: The Oracle Local Registry has invalid contents. Details at *string* in *string*.

Cause: Some of the Oracle Local Registry contents were invalid.

Action: Check the log file indicated in the message for more details. Use the 'ocrcheck -local' command to detect errors, and the 'ocrdump -local' command to

review the registry contents. If problems exist, the registry may need to be recovered or restored. If the problem persists, contact Oracle Support Services.

CRS-02301: GPnP: *string*

Cause: This conveys a message from the GPnP layer to the alert log.

Action: Look up the imbedded message and respond accordingly.

CRS-02302: Cannot get GPnP profile. Error *string (string)*.

Cause: Get GPnP profile operation failed.

Action: None

CRS-02303: GPNPD is not running on local node.

Cause: GPNPD is not running on local node. GPnP request cannot be completed.

Action: Make sure GPNPD is running and retry the operation.

CRS-02304: GPnP profile signature verification failed. *string* request aborted.

Cause: GPnP profile used in GPnP request or request result does not have a valid signature.

Action: If error persists, please contact Oracle Support Services.

CRS-02305: GPnP resource discovery (MDNSD) is not running on local node.

Cause: GPnP resource discovery failed.

Action: Make sure resource discovery service (MDNSD) runs on local node.

CRS-02306: GPnP service on host "*string*" not found.

Cause: Remote GPnP service on requested host were not found in resource discovery results.

Action: Make sure host is up, clusterware GPnP services (MDNSD and GPNPD) are up and running and network connection is operational.

CRS-02310: Fatal error: failed to initialize NZ security facility.

Cause: Error occurred while initializing GPnP security component.

Action: If the problem persists, contact Oracle Support Services.

CRS-02311: Fatal error: failed to initialize Resource Discovery. RD error: *string (number)*. Make sure RD providers installed properly.

Cause: Error occurred while initializing GPnP Resource Discovery (RD).

Action: If the problem persists, contact Oracle Support Services.

CRS-02312: Fatal error: failed to initialize XDK. XDK error *string (number)*.

Cause: Error occurred while initializing Xml Development Kit component (XDK).

Action: If the problem persists, contact Oracle Support Services.

CRS-02313: Fatal error: failed to initialize GIPC communication layer. GIPC error: *string (number)*.

Cause: Error occurred while initializing GIPC communication layer.

Action: If the problem persists, contact Oracle Support Services.

CRS-02314: Fatal error: cannot initialize locking subsystem.

Cause: Error occurred while initializing locking subsystem.

Action: If the problem persists, contact Oracle Support Services.

-
- CRS-02315: Fatal error: failed to initialize GPnP certkey providers.**
Cause: GPnP certkey provider(s) data was not found or corrupt.
Action: If the problem persists, contact Oracle Support Services.
- CRS-02316: Fatal error: cannot initialize GPnP, *string* (*string*).**
Cause: General GPnP initialization failure.
Action: If the problem persists, contact Oracle Support Services.
- CRS-02317: Fatal error: cannot get local GPnP security keys (wallet).**
Cause: GPnP wallet(s) directory or files were not found or corrupt.
Action: If the problem persists, contact Oracle Support Services.
- CRS-02318: GPNPD is not found.**
Cause: Local GPnP service is not found.
Action: Make sure GPNPD is running.
- CRS-02319: No cluster name found in GPnP profile.**
Cause: Profile is invalid - it must specify a mandatory clustername parameter.
Action: Please contact Oracle Support Services.
- CRS-02322: Fatal error: Cannot get local GPnP profile. Error initializing GPnP profile cache providers.**
Cause: Local GPnP setup is invalid.
Action: Please contact Oracle Support Services.
- CRS-02323: Error initializing one of the GPnP profile cache providers.**
Cause: Local GPnP setup is invalid.
Action: Please contact Oracle Support Services.
- CRS-02324: Errors occurred while trying to push GPnP profile.**
Cause: GPnP profile update partially failed.
Action: Try to repeat the update. If the problem persists, contact Oracle Support Services.
- CRS-02325: Unable to get GPnP profile from requested cluster nodes.**
Cause: Get GPnP profile from remote nodes failed.
Action: Try to repeat the update. If the problem persists, contact Oracle Support Services.
- CRS-02326: GPnP profile is different across cluster nodes. *string*.**
Cause: GPnP profile is different across cluster nodes.
Action: Try to repeat the update. If the problem persists, contact Oracle Support Services.
- CRS-02327: GPNPD already running on node *string*. Terminating.**
Cause: GPnP service instance is already running on node.
Action: Bring down existing GPNPD instance first.
- CRS-02328: GPNPD started on node *string*.**
Cause: GPnP service started on node.
Action: None

CRS-02329: GPnPD on node *string* shutdown.

Cause: GPnP service was shutdown by request.

Action: None

CRS-02330: GPnPD failed to start listening for GPnP peers.

Cause: GPnP service failed to open server endpoint.

Action: Please check GPnPD logs for the cause. If the problem persists, contact Oracle Support Services.

CRS-02331: Error getting GPnP profile from "*string*".

Cause: Get remote GPnP profile from remote node operation failed.

Action: Retry request. If the problem persists, contact Oracle Support Services.

CRS-02332: Error pushing GPnP profile to "*string*".

Cause: Push GPnP profile to remote node operation failed.

Action: Retry request. If the problem persists, contact Oracle Support Services.

CRS-02333: Could not write GPnP profile to local cache.

Cause: GPnPD service cannot save GPnP profile to local cache.

Action: Make sure there is at least 10MB of free disk space in Clusterware home. If the problem persists, contact Oracle Support Services.

CRS-02334: Could not delete pending GPnP profile from local cache.

Cause: GPnPD service cannot delete GPnP profile from local cache.

Action: If the problem persists, contact Oracle Support Services.

CRS-02335: Could not write pending GPnP profile to local cache.

Cause: GPnPD service cannot save GPnP profile to local cache.

Action: Make sure there is at least 10MB of free disk space in Clusterware home. If the problem persists, contact Oracle Support Services.

CRS-02340: Errors occurred while processing received gnp message.

Cause: Invalid GPnP message received.

Action: Please check gnp client and GPnPD logs for details. If the problem persists, contact Oracle Support Services.

CRS-02341: GPnPD on node *string* shutting down on signal *number*.

Cause: GPnP service shutting down due to received signal.

Action: Please contact your cluster administrator.

CRS-02342: GPnP messaging received error : *string* (*string*).

Cause: GPnP message error received.

Action: If the problem persists, contact Oracle Support Services.

CRS-02401: The Cluster Time Synchronization Service started on host *string*.

Cause: The Cluster Time Synchronization Service successfully started on the listed node.

Action: None

CRS-02402: The Cluster Time Synchronization Service aborted on host *string*.

Details at *string* in *string*.

Cause: The Cluster Time Synchronization Service aborted due to an internal error. Check the Cluster Time Synchronization Service log file to determine the cause.

Action: Determine whether the Cluster Time Synchronization Service has auto-started.

CRS-02403: The Cluster Time Synchronization Service on host *string* is in observer mode.

Cause: The Cluster Time Synchronization Service detected an active vendor time synchronization service on at least one node in the cluster.

Action: Oracle Clusterware requires a time synchronization service in active mode. Oracle Clusterware will work with a vendor service or the Cluster Time Synchronization Service. If you want to change the Cluster Time Synchronization Service to active mode, stop and deconfigure the vendor time synchronization service on all nodes.

CRS-02404: The Cluster Time Synchronization Service detects that the local time is significantly different from the mean cluster time. Details in *string*.

Cause: The difference between the local time and the time on the reference node was too much to be corrected.

Action: Shutdown the Oracle Clusterware on the local node. Adjust the clock via native platform or OS methods. Restart the Oracle Clusterware on the local node.

CRS-02405: The Cluster Time Synchronization Service on host *string* is shutdown by user

Cause: The Cluster Time Synchronization Service on listed node was terminated by a user.

Action: None

CRS-02406: The Cluster Time Synchronization Service timed out on host *string*. Details in *string*.

Cause: A Cluster Time Synchronization Service action failed. The information from the reference node was discarded.

Action: Verify all network connections between cluster nodes and repair any problematic connections. If no network problems are found,

1. Run diagcollection.pl.
2. Contact Oracle Support Services.

CRS-02407: The new Cluster Time Synchronization Service reference node is host *string*.

Cause: A new Cluster Time Synchronization Service reference node has been elected.

Action: None

CRS-02408: The clock on host *string* has been updated by the Cluster Time Synchronization Service to be synchronous with the mean cluster time.

Cause: The clock was updated to be in sync with the mean cluster time.

Action: None

CRS-02409: The clock on host *string* is not synchronous with the mean cluster time. No action has been taken as the Cluster Time Synchronization Service is running in observer mode.

Cause: The clock was not in sync with the mean cluster time. No action has been taken as Cluster Time Synchronization Service is running in observer mode.

Action: Verify correct operation of the vendor time synchronization service on the node.

CRS-02410: The Cluster Time Synchronization Service on host *string* is in active mode.

Cause: The Cluster Time Synchronization Service did not detect an active vendor time synchronization service on any node in the cluster.

Action: None. If a vendor time synchronization service is preferred to the Cluster Time Synchronization Service, then configure and start the vendor time synchronization service on all nodes to change the Cluster Time Synchronization Service to observer mode.

CRS-02411: The Cluster Time Synchronization Service will take a long time to perform time synchronization as local time is significantly different from mean cluster time. Details in *string*.

Cause: The difference between the local time and the time on the reference node was too much to be synchronized in a short period.

Action: (Optional) Shutdown and restart the Oracle Clusterware on this node to instantaneously synchronize the time with the reference node.

CRS-02412: The Cluster Time Synchronization Service detects that the local time is significantly different from the mean cluster time. Details in *string*.

Cause: The difference between the local time and the time on the reference node was too large. No action has been taken as the Cluster Time Synchronization Service was running in observer mode.

Action: Verify correct operation of the vendor time synchronization service on the node. Alternatively, if you want to change the Cluster Time Synchronization Service to active mode, stop and deconfigure the vendor time synchronization service on all nodes.

CRS-02413: The Cluster Time Synchronization Service is unable to perform step time synchronization due to high network latency with the reference node. The local time is not significantly different from the mean cluster time. The Cluster Time Synchronization Service is entering slew time synchronization mode.

Cause: The Cluster Time Synchronization Service experienced high network latency. The local time was not significantly different from the mean cluster time; therefore, the Cluster Time Synchronization Service will maintain the system time with slew time synchronization.

Action: Determine the root cause of high network latency, and perform appropriate repair if necessary.

CRS-02414: The Cluster Time Synchronization Service is unable to perform step time synchronization due to high network latency with the reference node. The local time is significantly different from the mean cluster time. The Cluster Time Synchronization Service is aborting.

Cause: The Cluster Time Synchronization Service experienced high network latency. The local time was significantly different from the mean cluster time; therefore, the Cluster Time Synchronization Service is aborting.

Action: Shut down the Oracle Clusterware on the local node. Determine the root cause of high network latency. Perform appropriate repair if necessary, then restart the Oracle Clusterware on the local node.

CRS-02500: Cannot stop resource '*string*' as it is not running

Cause: A request to stop a resource that is not running was received.

Action: Check the current state of the resource, it should no longer be running.

CRS-02501: Resource '*string*' is disabled

Cause: The resource is currently disabled and so may not be operated on.

Action: Enable the resource and re-submit your request.

CRS-02502: Resource '*string*' has dependency error because of resource '*string*'

Cause: The attempted operation has failed because of a dependency on the specified resource.

Action: Ensure that the intended operation is still desired. If so, the specified resource and its state need to be evaluated to decide on the corrective action.

CRS-02503: Resource '*string*' is in UNKNOWN state and must be stopped first

Cause: The resource cannot be acted upon when it is in the UNKNOWN state.

Action: Stop the resource manually, make sure it is OFFLINE, and then re-submit the request.

CRS-02504: Resource '*string*' cannot be placed on any online servers that satisfy its placement policy

Cause: The resource cannot be placed because of the constraints imposed by its placement policy.

Action: Either change the placement policy of the resource or re-evaluate the request.

CRS-02505: Another operation is being performed on '*string*'. Please retry later

Cause: Another operation is being performed on the specified object.

Action: Typically, waiting and retrying or using a way to queue the request are the two choices to proceed.

CRS-02506: Operation on '*string*' has been cancelled

Cause: A scheduled or running operation has been cancelled.

Action: None

CRS-02507: Unsupported modifier '*string*' in dependency '*string*'

Cause: The modifier is not a valid one.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02508: Incomplete specification of dependency '*string*'

Cause: The specification does not have the dependent object specified.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02509: Resource type '*string*' used in dependency '*string*' does not exist or is not registered

Cause: The resource type referenced by the dependency specification is not found.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02510: Resource '*string*' used in dependency '*string*' does not exist or is not registered

Cause: The resource referenced by the dependency specification is not found.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02511: Attribute '*string*' cannot be specified on per-X basis for resource '*string*'

Cause: The specified attribute is specified on per-X basis, which is not allowed for this attribute.

Action: Remove the specification.

CRS-02512: Attribute format for '*string*' is invalid in resource '*string*'

Cause: The specification does not follow valid format.

Action: Correct the specification and re-submit the request.

CRS-02513: Attribute format for '*string*' is invalid

Cause: The specification does not follow valid format.

Action: Correct the specification and re-submit the request.

CRS-02514: Dependency attribute specification '*string*' is invalid in resource '*string*'

Cause: The specification of relations does not follow valid format.

Action: Correct the specification and re-submit the request.

CRS-02515: Circular dependency found for resource '*string*'

Cause: The resource dependency specification has a circular dependency.

Action: Circular dependencies are disallowed. Please change the profile and re-submit.

CRS-02516: Server pool is not specified for resource '*string*'

Cause: The resource profile does not have server pool specified.

Action: Please either specify a an existing server pool or HOSTING_MEMBERS in the profile and re-submit the request.

CRS-02517: Required attribute '*string*' is not specified for resource '*string*'

Cause: A required attribute is missing from the resource profile.

Action: Please add the attribute to the profile and re-submit the request.

CRS-02519: Either '*string*' or '*string*' must be specified when '*string*' is '*string*'

Cause: Neither or both of the parameters was specified.

Action: Please specify exactly one of the two and re-submit.

CRS-02520: Invalid value '*string*' for attribute '*string*'

Cause: The value specified for the attribute is inappropriate or invalid.

Action: Review the value, correct the problem and re-submit the request.

CRS-02521: Read-only attribute '*string*' cannot be modified

Cause: An attempt was made to modify a read-only attribute.

Action: None

CRS-02522: No value is specified

Cause: There is nothing specified for the value.

Action: Provide a valid value.

CRS-02523: Invalid characters are used when specifying the value

Cause: 1 or more characters used to specify a value are inappropriate.

Action: Provide a valid value.

CRS-02524: Value specification may only contain

'string'/'string'/'string'/'string'/'string'/'string'

Cause: The value specified is not any of the allowed.

Action: The value must be one of the allowed ones, as specified. Provide a valid one.

CRS-02525: All instances of the resource 'string' are already running; relocate is not allowed because the force option was not specified

Cause: All instances of the resource are running and the start request does not have the force option specified.

Action: Either specify the force option or re-evaluate the need for the request.

CRS-02526: There are no available instances of resource 'string' to start on 'string'

Cause: All instances of the resource are already running or otherwise unavailable to be started on the specified server.

Action: Create more instances or re-evaluate the need for the request.

CRS-02527: Unable to start 'string' because it has a 'string' dependency on 'string'

Cause: Start/relocate of the resource is impossible because it has a dependency on another entity which prevents it from being able to start.

Action: This message will usually be coupled with another one that details the nature of the problem with the other resource. Please follow up on the action recommended for that message.

CRS-02528: Unable to place an instance of 'string' as all possible servers are occupied by the resource

Cause: Out of possible servers to place the resource on, all already host an instance of the resource.

Action: You need to add more servers or change the resource placement parameters to allow placement on additional servers.

CRS-02529: Unable to act on 'string' because that would require stopping or relocating 'string', but the force option was not specified

Cause: Acting on the resource requires stopping or relocating other resources, which requires that force option be specified, and it is not.

Action: Re-evaluate the request and if it makes sense, set the force option and re-submit.

CRS-02530: Unable to stop 'string' because 'string' has a stop-time 'string' dependency on it

Cause: Stopping the resource is impossible because it has a dependency on another resource and there is a problem with that other resource.

Action: This message will usually be coupled with another one that details the nature of the problem with the other resource. Please follow up on the action recommended for that message.

CRS-02531: Internal error while operating on 'string'

Cause: General-purpose message for highly unexpected internal errors.

Action: This message will usually be preceded by another one with a more specific problem description. Contact Oracle Support Services.

CRS-02532: OCR write failed for '*string*'

Cause: Unknown, but would usually imply corruption or unavailability of the OCR or a lack of permissions to update keys or a software defect in the OCR code.

Action: Validate that OCR is accessible, validate that key permissions match. Contact Oracle Support Services.

CRS-02533: Server '*string*' is down. Unable to perform the operation on '*string*'

Cause: The server is down and therefore the operation cannot be performed.

Action: Try using a different server.

CRS-02534: Resource type '*string*' is not registered

Cause: The specified resource type is not registered.

Action: Re-evaluate the request.

CRS-02535: Resource type '*string*' does not have attribute '*string*' and thus it cannot be updated

Cause: An non-existing attribute cannot be modified.

Action: Re-evaluate the request.

CRS-02536: Required attribute '*string*' is not specified for '*string*'

Cause: A required attribute is missing from the entity's profile.

Action: Add the attribute to the profile and re-submit the request.

CRS-02537: Resource type '*string*' cannot be extended directly; use its extensions instead

Cause: The type cannot be extended.

Action: Use a type that extends this one.

CRS-02538: Value for attribute '*string*' is of incorrect type (string is expected)

Cause: The type of the value is not correct.

Action: Re-submit the request with the value specified in proper type.

CRS-02539: A resource with the name '*string*' is already registered

Cause: A resource with specified name is already registered.

Action: Use a unique name for the new resource.

CRS-02540: Value for attribute '*string*' is of incorrect type (integer is expected)

Cause: The type of the value is not correct.

Action: Re-submit the request with the value specified in proper type.

CRS-02541: Server pool '*string*' is not registered

Cause: The specified server pool is not registered.

Action: Re-evaluate the request.

CRS-02542: The tag '*string*' is mentioned in both '*string*' and '*string*' attributes, which is conflicting

Cause: The same tag is used to specify exclusive as well as overlapping server pools. These requirements cannot be satisfied simultaneously.

Action: Remove the tag from one of the attributes.

CRS-02543: The type is not specified for attribute '*string*'

Cause: Value type specification is missing for the attribute.

Action: Specify a proper type and re-submit.

CRS-02544: The name '*string*' is longer than the allowed maximum of '*number*' characters

Cause: The name is too long.

Action: Use a shorter name.

CRS-02545: Cannot operate on '*string*'. *string*

Cause: The entity specified is currently locked as part of another operation.

Action: Re-submit the request later.

CRS-02546: Server '*string*' is not online

Cause: Operation is invalid because the specified server is not online.

Action: Provide an online server name.

CRS-02547: Update of an internal or read-only attribute '*string*' for resource '*string*' is not allowed

Cause: Internal and read-only attributes may not be updated.

Action: Exclude internal and read-only attributes from your request.

CRS-02548: A cyclical dependency on '*string*' is detected from '*string*'

Cause: There is a cycle in the dependency graph. Cycles are disallowed.

Action: Re-evaluate the dependency graph.

CRS-02549: Resource '*string*' cannot be placed on '*string*' as it is not a valid candidate as per the placement policy

Cause: The resource cannot be placed because of the constraints imposed by its placement policy.

Action: Either change the placement policy of the resource or re-evaluate the request.

CRS-02550: Resource '*string*' cannot be failed-over because it has other non-OFFLINE instances on the server '*string*'

Cause: The resource cannot be failed-over from the specified server because has other non-OFFLINE instances still available on that server and fail-over can only be done on all instances of the resource on the server as a whole.

Action: None

CRS-02551: Resource '*string*' cannot be failed-over because it is of type '*string*', which cannot relocate

Cause: Local resources cannot be relocated from one server to another.

Action: None

CRS-02552: There are no available instances of resource '*string*' to start.

Cause: All instances of the resource are in the ONLINE or UNKNOWN state.

Action: Re-evaluate the need for the request.

CRS-02553: Server pool '*string*' cannot be unregistered as it does not exist

-
- Cause:** The server pool you are trying to remove does not exist.
Action: Make sure the server pool you are trying to remove exists.
- CRS-02554: Server pool '*string*' cannot be unregistered as it is referenced by resource '*string*'**
Cause: The server pool you are trying to remove has references to it.
Action: Make sure the server pool you are trying to remove is not referenced by other entities.
- CRS-02555: Resource '*string*' cannot be relocated as it is a local resource**
Cause: The request is impossible to complete as local resources never relocate.
Action: Please re-evaluate the request.
- CRS-02556: Resource '*string*' cannot be restored to its original state after a failed relocate attempt**
Cause: After an unsuccessful attempt to relocate a resource, crsd was unable to restore the resource.
Action: Manual intervention may be required. Re-try starting the resource.
- CRS-02557: Server pool '*string*' cannot be unregistered as it is referenced by server pool '*string*'**
Cause: The server pool you are trying to remove has references to it.
Action: Make sure the server pool you are trying to remove is not referenced by other entities.
- CRS-02558: Resource type '*string*' may not be unregistered as there are types that are based on it.**
Cause: Types may not be unregistered if they have derived types.
Action: Remove derived types first, then remove this one.
- CRS-02559: Resource type '*string*' may not be unregistered as it has the following resources:*string***
Cause: Types may not be unregistered if they have resources registered.
Action: Remove the specified resources first, then remove the type.
- CRS-02560: Resource type '*string*' does not exist**
Cause: The resource type referenced does not exist.
Action: Please specify a correct type.
- CRS-02561: Resource type '*string*' may not be unregistered as it is referenced by resource '*string*'**
Cause: Types may not be unregistered if they are referenced in resource dependencies.
Action: Make sure there are no existing resources that reference this type in their dependencies.
- CRS-02562: Resource '*string*' cannot be relocated as it is not running**
Cause: Only currently running resources can be relocated.
Action: Make sure the resource is running before issuing the request.
- CRS-02563: Attempt to start resource '*string*' on '*string*' has failed. Will re-try on '*string*' now.**

Cause: Undirected (no target member) start of a resource has failed for the server; a retry is in progress.

Action: None, this is an informational message.

CRS-02564: Failed to relocate resource '*string*'. Will attempt to restore it on '*string*' now.

Cause: Resource relocate operation was unable to relocate the resource to any of the possible servers.

Action: None, this is an informational message.

CRS-02565: Attempt to relocate resource '*string*' to '*string*' has failed. Will re-retry on '*string*' now.

Cause: Undirected (no target member) relocate of a resource has failed for the server; a retry is in progress.

Action: None, this is an informational message.

CRS-02566: User '*string*' does not have sufficient permissions to operate on resource '*string*', which is part of the dependency specification.

Cause: User does not have permissions to operate on the resource as it will prevent the current resource from starting or staying online in future.

Action: The user performing the operation must have access privileges to operate on the entire resource dependency tree. The user must either be given those privileges by modifying the dependent resources' access rights or another user having permissions should perform this operation.

CRS-02567: Error while parsing the default value for attribute '*string*'

Cause: The default value specified is not proper.

Action: Make sure the value is proper for its type.

CRS-02568: Base resource type name '*string*' does not exist

Cause: The name of a base type used is not valid.

Action: Use an existing type as a base.

CRS-02569: Unsupported value type is used in attribute '*string*'

Cause: An unsupported value type was specified in the attribute's definition.

Action: Use one of the supported types.

CRS-02570: Internal Error: Number of objects '*number*' is different from number of lists '*number*'

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02571: Dependency kind '*string*' is specified more than once for resource '*string*'

Cause: A dependency kind is used more than once in the profile of the resource.

Action: Combine multiple specifications of the same dependency kind into a single clause.

CRS-02572: '*string*' is not a supported Special Value

Cause: The specified identifier is not a valid Special Value.

Action: Check the value for correctness.

CRS-02573: ACL entry for owner field is missing.

Cause: The complete value for the ACL attribute has been provided but it is missing a mandatory entry specifying permissions for the owner.

Action: Include permissions for the owner in the value of ACL attribute.

CRS-02574: ACL entry for primary group field is missing.

Cause: The complete value for the ACL attribute has been provided but it is missing a mandatory entry specifying permissions for the primary group.

Action: Include permissions for the primary in the value of ACL attribute.

CRS-02575: ACL entry for users other than the owner and those belonging to primary group is missing.

Cause: The ACL attribute is missing a mandatory entry specifying permissions for users other than the owner and those belonging to the primary group.

Action: Include permissions for other users in the value of ACL attribute.

CRS-02576: User '*string*' is not a member of group '*string*'

Cause: The group that the caller claims to be a member of has no such user by configuration.

Action: Make sure the group is configured to have the calling user as a member.

CRS-02577: Use of '*string*' in attributes and values is not allowed

Cause: A disallowed character was detected.

Action: Retry without the disallowed character.

CRS-02578: Value of '*string*' (*number*) may not be greater than that of '*string*' (*number*)

Cause: The specified values do not make sense - one may not be less than the other.

Action: Use valid values.

CRS-02579: Value '*number*' may not be less than '*number*'

Cause: The value is less than the allowed minimum.

Action: Use a proper value.

CRS-02580: Value '*number*' is neither '*number*' nor '*number*'

Cause: The value must be one of the two and it is neither.

Action: Use a proper value.

CRS-02581: Value '*string*' is not any of the following '*string*', '*string*', '*string*'

Cause: The value must be one of the ones specified and it is not.

Action: Use a proper value.

CRS-02582: Value '*string*' does not follow expected format: <n>[s | d | m | w | h]

Cause: The value specification does not follow required format.

Action: Use a proper value.

CRS-02583: Value '*number*' must be in the '*number*' - '*number*' range

Cause: The value is not within the allowed range.

Action: Use a proper value.

CRS-02584: Value '*string*' is not allowed here

Cause: The value is not proper in this context.

Action: Use a proper value.

CRS-02585: Deletion of built-in resource types is not allowed

Cause: An attempt was made to delete a built-in resource type.

Action: Removal of built-in types is not allowed.

CRS-02586: Deletion of a running resource '*string*' requires the force option

Cause: An attempt was made to delete a resource that is still running.

Action: Stop the resource first using the 'crsctl stop resource' command. If the resource cannot be stopped, specify the force option to the 'crsctl delete' command.

CRS-02587: Attribute '*string*' is internal and thus may not be overridden in type '*string*'

Cause: Attributes defined in built-in resource types that are internal to the subsystem may never be overridden in user-defined resource types.

Action: Do not specify this attribute in the new user-defined type.

CRS-02588: A cyclical dependency on '*string*' is detected from '*string*' via type '*string*'

Cause: There is a cycle in the dependency graph, via a resource type. Cycles are disallowed.

Action: Re-evaluate the dependency graph.

CRS-02589: Relation modifier '*string*' is invalid for relation kind '*string*'

Cause: An unexpected relation modifier is specified.

Action: Use defined modifiers only.

CRS-02590: A resource name may not be empty or contain spaces

Cause: A name must not be empty or contain space character(s).

Action: Specify a valid name.

CRS-02591: A server pool name may not be empty or contain spaces

Cause: A name must not be empty or contain space character(s).

Action: Specify a valid name.

CRS-02592: A type name may not be empty or contain spaces

Cause: A name must not be empty or contain space character(s).

Action: Specify a valid name.

CRS-02593: Comparator value '*string*' in the filter specification is not supported

Cause: An unsupported comparator was supplied.

Action: Use a supported value.

CRS-02594: Filter specification '*string*' is invalid

Cause: The filter specification invalid or empty.

Action: Provide a valid filter or do not specify you have one.

CRS-02595: Server pool '*string*' has already been registered

Cause: A server pool with this name has already been registered.

Action: Provide a name that is not currently in use.

-
- CRS-02596: Modifications to the '*string*' attribute of server pools are not supported**
Cause: Changes to the value of the attribute are not allowed.
Action: Create a different pool with the desired value and use it.
- CRS-02597: Server '*string*' may not be moved to pool '*string*'**
Cause: Because of one or more of configuration-related constrains, the move of the server is not a valid operation at the time.
Action: Re-evaluate the request's validity in the context of the entire error stack.
- CRS-02598: Server pool '*string*' is already at its maximum size of '*number*'**
Cause: The pool is already at the maximum.
Action: The request is impossible to execute.
- CRS-02599: Server '*string*' is not in a parent pool of '*string*'**
Cause: The server is not in a parent pool of the pool in question.
Action: The request is impossible to execute.
- CRS-02600: Server '*string*' is already in another top-level server pool**
Cause: The server is already consumed by a different top-level pool and all such pools are exclusive as far as server ownership.
Action: The request is impossible to execute.
- CRS-02601: Server '*string*' is not explicitly mentioned as a candidate by server pool '*string*'**
Cause: The server is not in the list of names the pool allows as candidates.
Action: Use a server that is in the specified group.
- CRS-02602: Server '*string*' is in server pool '*string*' which is exclusive with server pool '*string*'**
Cause: The server is already in a pool that's configured to be exclusive with the one at hand.
Action: The request is impossible to execute.
- CRS-02603: Server '*string*' cannot be assigned to server pool '*string*' because it is not a top-level pool**
Cause: Server movement is only supported between top-level server pools.
Action: The request is impossible to execute as such an action is not supported.
- CRS-02604: Server '*string*' is already assigned to server pool '*string*'**
Cause: Server movement makes no sense: the server is already in the target pool.
Action: Check the request validity.
- CRS-02605: Server '*string*' may not be relocated from server pool '*string*' as the pool disallows transfers**
Cause: The server pool is configured not to allow server transfers.
Action: Check the request validity.
- CRS-02606: Server '*string*' may not be relocated from server pool '*string*' because it is not above its minimum size**
Cause: Server pools of identical or higher importance may not be used to steal servers from if they are not above their minimum size.

Action: Update the configuration of server pools by either changing the importance or the minimum size or both and then re-submit the request.

CRS-02607: Attribute '*string*' has not been specified on per-X basis for resource '*string*'

Cause: The specified attribute has not been specified on per-X basis for this resource.

Action: Check the per-X attribute for the resource, fix and resubmit.

CRS-02608: Attribute '*string*' is not a per-X value and cannot be removed

Cause: The specified attribute is not a per-X value.

Action: Check the per-X attribute for the resource, fix and resubmit.

CRS-02609: Server '*string*' may not be relocated to server pool '*string*' as the pool disallows transfers

Cause: The server pool is configured not to allow server transfers.

Action: Check the request validity.

CRS-02610: Server '*string*' is unavailable

Cause: The server is not available at the moment.

Action: Check available servers and rerun the request with an active server.

CRS-02611: Server pool '*string*' is built-in and may not be deleted

Cause: Built-in server pools may never be deleted.

Action: None

CRS-02612: Server pools do not have attribute named '*string*'

Cause: An unsupported attribute was provided as part of the register or update request.

Action: Please double check the attributes that are supplied.

CRS-02613: Could not find resource '*string*'.

Cause: An attempt was made to operate on a resource that is not registered.

Action: Check if the resource is registered.

CRS-02614: Could not find resource type '*string*'.

Cause: An attempt was made to operate on a resource type that is not registered.

Action: Check if the resource type is registered.

CRS-02615: Could not find server pool '*string*'.

Cause: An attempt was made to operate on a server pool that is not registered.

Action: Check if the server pool is registered.

CRS-02616: The owner of resource type '*string*' does not have sufficient permissions to operate on resource type '*string*', from which it is directly or indirectly derived.

Cause: Update of a resource type in the current manner is not allowed as it will severely limit operations on the current resource type and will potentially prevent resources of derived types from starting or staying online in future.

Action: If access privileges must be changed, then they need to be changed bottom-up in a dependency.

CRS-02617: Incorrect value of attribute flags has been specified for attribute *string*. Only READONLY flag can be changed for a type attribute.

Cause: Attempt was made to update the flag on a resource type attribute. The only change allowed is to the readonly property of the attribute.

Action: Provide correct value of the attribute flag.

CRS-02618: Cannot change data type *string* of existing attribute *string* to type *string*.

Cause: Attempt was made to update the data type of attribute value.

Action: Data type of the attribute cannot be changed.

CRS-02619: Server pool '*string*' may not be edited

Cause: The pool's attributes may not be edited.

Action: None

CRS-02620: Attribute '*string*' of server pool '*string*' may not be edited

Cause: Editing of the attribute of the server pool is not allowed.

Action: None

CRS-02621: Server '*string*' is assigned to '*string*' to which you have no permission. The operation is not authorized.

Cause: The operation requires making the specified server a placement candidate for the resources owned by the requesting user. However, this is not allowed because the user is not authorized to utilize the server.

Action: Either specify another server that that's in the pool you are authorized to use or request that a cluster administrator gives you access to the pool to which the server is currently assigned.

CRS-02622: Server '*string*' is not assigned to any server pool and thus may only be specified by a cluster administrator

Cause: The operation makes use of the server that's not currently assigned to a server pool and the requesting user is not a cluster administrator. Because of that use of the server cannot be authorized at the moment.

Action: Either request a cluster administrator to perform the operation for you or wait until the server has joined the cluster and is assigned to a pool to which you have an x-permission.

CRS-02623: Server pool '*string*' cannot accept server '*string*' because its name is not specified in '*string*'

Cause: Only servers whose names are mentioned in the attribute may be assigned to the pool.

Action: None

CRS-02624: One of '*string*', '*string*' must be specified when '*string*' is '*string*'

Cause: Neither of the parameters was specified.

Action: Please specify either of the two and re-submit.

CRS-02625: Owner of resource '*string*' does not have execute permission to pool '*string*' and may not use it

Cause: Resource profile references a server pool to which the owner of the resource does not have the X-permission.

Action: Either have the pool's permission changed appropriately or use a different pool.

CRS-02626: Owner of server pool '*string*' does not have execute permission to parent server pool '*string*'

Cause: Parent pool does not have the X-permission for the pool's parent.

Action: Either have the desired parent pool's permission changed appropriately or use a different pool.

CRS-02627: You must have execute permission on pool '*string*' to relocate server '*string*'

Cause: The client requesting the operation does not have proper permissions to the specified pool.

Action: Acquire required permissions or use another server/pool. Permissions can be added by an authorized user using 'crsctl setperm' command.

CRS-02628: Server pool '*string*' may not be a parent of itself

Cause: An attempt was made to make a server pool a parent of itself.

Action: Re-evaluate the server pool dependencies.

CRS-02629: Only cluster administrators are allowed to create top-level server pools

Cause: An attempt was made to create a server pool that has no parent pools. Creation of such pools is only allowed for cluster administrators.

Action: Either acquire the role of cluster administrator or have one create the pool for you.

CRS-02630: Only cluster administrators are allowed to create local resources

Cause: An attempt was made to create a local resource which is only allowed for cluster administrators.

Action: Either acquire the role of cluster administrator or have one create the resource for you.

CRS-02631: Only cluster administrators are allowed to create cluster resources that may run anywhere in the cluster

Cause: An attempt was made to create a cluster resource that may run anywhere in the cluster which is only for cluster administrators.

Action: Either acquire the role of cluster administrator or have one create the resource for you.

CRS-02632: There are no more servers to try to place resource '*string*' on that would satisfy its placement policy

Cause: After one or more attempts, the system ran out of servers that can be used to place the resource and satisfy its placement policy.

Action: None

CRS-02640: Required resource '*string*' is missing.

Cause: A resource that's configured as required is not registered.

Action: Register the missing resource or update the dependency specification so as to the missing resource is not required for start.

CRS-02641: The value of '*string*' cannot override that defined in the resource's type: '*string*'

Cause: Agent filename cannot be overridden on per-resource basis.

Action: Define a sub-type that uses the agent. Then create a resource of this new type.

CRS-02642: Relocate resource is not a valid command for this configuration

Cause: A relocate command was issued in the configuration where it is not possible in principle.

Action: None

CRS-02643: The server pool(s) where resource '*string*' could run have no servers

Cause: All of the server pools the resource uses (and has permissions to use) have no servers assigned.

Action: Either make sure there are active servers in the pools or use different pools for the resource.

CRS-02644: No hosting members of '*string*' are either online or are allowed to be used by the resource

Cause: No server out of the enumerated as hosting members is online or, if it is, may be used by the resource.

Action: You need to either add more servers into the cluster or request permission to pools to which currently available servers are assigned.

CRS-02645: Cannot create resources of type '*string*'

Cause: The type is abstract.

Action: Only concrete extensions of the type can be created.

CRS-02646: '*string*' must have a default value if specified

Cause: This attribute must have a default value if specified.

Action: Modify the type definition so that the attribute is removed or has a valid default value.

CRS-02647: Attribute '*string*' may not be a negative value

Cause: A negative value was provided for an attribute which only accepts non-negative values.

Action: Specify a non-negative number.

CRS-02649: Attribute '*string*' of '*string*' is internally managed and may not be specified

Cause: An internal attribute was specified as part of an add/modify request.

Action: Re-execute the request without any internal attribute.

CRS-02650: Resource '*string*' is configured to run only on '*string*' and cannot be started on '*string*'

Cause: An attempt was made to start a resource on a server where it cannot run given its placement configuration.

Action: Make sure you start resources where they are configured to run.

CRS-02651: Resource alias '*string*' must use special values to be unique for each server

Cause: Resource alias name must resolve to a unique identifier for every server in the cluster. To achieve that, special values that yield different values on for each server must be used.

Action: You need to special an alias with special variables that will make it unique for every server.

CRS-02652: *string* is a resource and only resource instances can be relocated.

Cause: An attempt was made to relocate a resource.

Action: Make sure you supply a resource instance rather than a resource.

CRS-02653: Special value evaluation must be associated with a resource instance

Cause: Because some special values are per-server, each special value evaluation request must be associated with a resource instance.

Action: Please specify a server for the resource using -k or -n.

CRS-02660: Resource '*string*' or all of its instances are disabled

Cause: This is an API return code for requests that cannot be performed because the resource is disabled.

Action: Look at the detailed error messages that should always accompany this error.

CRS-02661: All instances of resource '*string*' are disabled

Cause: All instances of the resource instances are disabled.

Action: In order to change a resource state through CRS, its instances need to be enabled.

CRS-02662: Resource '*string*' is disabled on server '*string*'

Cause: The resource was disabled on the specified server.

Action: Either re-enable, or use a different server.

CRS-02663: Resource instance of '*string*' with *string=number*, *string=number* is disabled

Cause: The resource instance whose cardinality/degree is specified is disabled.

Action: Either re-enable or use a different resource instance.

CRS-02664: Resource '*string*' is already running on '*string*'

Cause: The resource is already running everywhere it may run.

Action: None

CRS-02665: Resource '*string*' is disabled on '*string*'

Cause: The resource is disabled on every server it is configured to start on.

Action: None

CRS-02666: Resource '*string*' is disabled on '*string*' and is already running on '*string*'

Cause: The resource is disabled on every server it is configured to start on.

Action: None

CRS-02667: Resource '*string*' with *string=string* may only run on servers assigned to *string* and *string*, both of which are empty

Cause: The resource's placement policy only allows it to run on servers assigned to the specified pools, and they are all empty.

Action: Either change the placement policy of the resource, or change the cluster configuration so that there are servers in those pools.

CRS-02668: The value of attribute '*string*' (*number*) may not not be above '*number*'

Cause: Attribute value specified is above the allowed maximum.

Action: Use a value below the specified maximum.

CRS-02669: The value is out of range. Maximum allowed value is '*number*'

Cause: Attribute value is out of the valid range.

Action: The value needs to be in a valid range.

CRS-02670: Unable to start/relocate '*string*' because '*string*' has a stop-time '*string*' dependency on it

Cause: Start/relocate of the resource is impossible because another resource has a stop-time dependency on it and the action requires stopping that resources.

Action: This message will usually be coupled with another one that details the nature of the problem with the other resource. Please follow up on the action recommended for that message.

CRS-02671: Error processing attribute '*string*': *string*

Cause: The value specified for the attribute is inappropriate or invalid.

Action: Review the value, correct the problem and re-submit the request.

CRS-02672: Attempting to start '*string*' on '*string*'

Cause: This is a status message.

Action: None

CRS-02673: Attempting to stop '*string*' on '*string*'

Cause: This is a status message.

Action: None

CRS-02674: Start of '*string*' on '*string*' failed

Cause: This is a status message.

Action: None

CRS-02675: Stop of '*string*' on '*string*' failed

Cause: This is a status message.

Action: None

CRS-02676: Start of '*string*' on '*string*' succeeded

Cause: This is a status message.

Action: None

CRS-02677: Stop of '*string*' on '*string*' succeeded

Cause: This is a status message.

Action: None

CRS-02678: '*string*' on '*string*' has experienced an unrecoverable failure

Cause: This is a status message.

Action: Perform whatever steps necessary to reset the state.

CRS-02679: Attempting to clean '*string*' on '*string*'

Cause: This is a status message.

Action: None

CRS-02680: Clean of '*string*' on '*string*' failed

Cause: This is a status message.

Action: None

CRS-02681: Clean of '*string*' on '*string*' succeeded

Cause: This is a status message.

Action: None

CRS-02682: It is locked by '*string*' for command '*string*' issued from '*string*'

Cause: This message is generated for operations that have a locking conflict.

Action: None

CRS-02683: It is locked by '*string*' for command '*string*'

Cause: This message is generated for operations that have a locking conflict.

Action: None

CRS-02714: '*string*' is specified multiple times in '*string*' of '*string*'

Cause: The specified value is specified multiple times.

Action: Remove duplicates and retry.

**CRS-02715: Update to attribute AGENT_FILENAME is not currently supported.
Please recreate the resource type with new value.**

Cause: Attempt was made to update AGENT_FILENAME attribute.

Action: Delete existing resource type and add it back with the new value.

CRS-02716: Failure threshold exhausted for resource '*string*'

Cause: The resource instance has failed more times than allowed in the specified time interval. It will not be restarted automatically.

Action: Please identify and fix the problem. Restart the resource manually thereafter.

CRS-02717: Server '*string*' is not in any of the server pool(s) hosting resource '*string*'

Cause: An attempt was made to start a resource on a server that is not currently an active server in any of the resource's server pool(s).

Action: Use a server name that is currently an active server of the resource's server pools(s).

CRS-02718: Server '*string*' is not a hosting member of resource '*string*'

Cause: An attempt was made to start the resource on a server not listed as a hosting member of the resource.

Action: Use a server name that is listed as a hosting member.

CRS-02719: Resource '*string*' may not be started on server '*string*' because the server is not in either '*string*' or '*string*' server pools

Cause: The resource's placement policy only allows it to run in the specified server pools. An attempt was made to start it on a server assigned to a different pool.

Action: Either use a different server or set the value of SERVER_POOLS to *, which will allow the resource to run on any server.

CRS-02720: '*string*' is a resource alias for '*string*' and cannot be updated

Cause: An attempt was made to update a resource as if it were a resource.

Action: Please update the resource which this alias refers to instead.

CRS-02721: '*string*' is a resource alias for '*string*' and cannot be unregistered

Cause: An attempt was made to unregister a resource alias as if it were a resource.

Action: Either unregister the resource which this alias refers to or modify its ALIAS_NAME attribute to not have a resource alias.

CRS-02722: The instance of resource '*string*' may only run on '*string*'; check on '*string*' is unnecessary

Cause: A check was issued on a server for a resource instance that may only run on a particular server.

Action: Please issue a check on the server where the resource instance is supposed to be run.

CRS-02723: No instance of resource '*string*' found on '*string*'

Cause: A check was issued on a server for a resource which does not have any offline instances and no running instances on that server.

Action: Please issue a check on a server where a resource instance might be running.

CRS-02724: Modifications to the built-in resource type '*string*' are not allowed

Cause: An attempt was made to modify a built-in resource type.

Action: Modification of built-in resource types is not allowed.

CRS-02725: User *string* does not have permission to operate on resource *string*.

Cause: Access control list on the resource do not permit the user to operate on the resource.

Action: Access privileges on the resource must be honored or this user must be given appropriate permissions.

CRS-02726: Invalid permissions specified for access control.

Cause: Access permissions are specifies using 'r', 'w', 'x' and '-' characters to indicate read, write and execute permissions. '-' indicates no access of any kind.

Action: Check format for the permissions string and re-run the command with the correct string.

CRS-02727: Acl entry '*string*' has been specified more than once.

Cause: Access permissions for the entry have been specified more than once.

Action: Specify permissions for each entry only once and rerun the command.

CRS-02728: A resource type with the name '*string*' is already registered

Cause: A resource type with such name is already registered.

Action: Use a unique name for the new resource type.

CRS-02729: Attribute '*string*' cannot be overridden for a resource type

Cause: An attribute was specified that is not allowed in a resource type.

Action: Do not use the attribute specified in the error message for a resource type.

CRS-02730: Resource '*string*' depends on resource '*string*'

Cause: An attempt was made to unregister a resource that is referenced by another resource in the dependency specification(s).

Action: Either remove the reference to this resource or the other resource first. Alternatively, the operation can be retried with a force option.

CRS-02731: Resource '*string*' is already running on server '*string*'

Cause: The resource is already running on the server; relocate is impossible.

Action: Select another server.

CRS-02732: Resource '*string*' is already starting on server '*string*'

Cause: The resource is currently starting on the server.

Action: Wait for the request to complete.

CRS-02733: Failed to stop all required resources on '*string*'; the server will be restored into the original server pool(s)

Cause: In order to successfully relocate a server, all resources that cannot run in the new server pool(s) must be stopped. That did not happen and thus the server was placed back into the its original server pool(s).

Action: Manual intervention in stopping resources is required. The operation can be retried thereafter. Alternatively, another server can be used.

CRS-02734: Failed to stop all required resources on '*string*'; the server will stay in RECONFIGURING state

Cause: In order to successfully relocate a server, all resources that cannot run in the new server pool(s) must be stopped. Since that did not happen, the server will be kept in the RECONFIGURING state until the resources that did not stop have been stopped or unregistered.

Action: Manually stop the resources that did not stop or unregister them.

CRS-02735: The operation requires relocating resource '*string*' from server '*string*'

Cause: The operation would end up relocating the resource and the force option is not specified.

Action: Add more servers to the cluster, stop or relocate the resource, or use the force option for the same command.

CRS-02736: The operation requires stopping resource '*string*' on server '*string*'

Cause: The operation would end up stopping the resource and the force option is not specified.

Action: Add more servers to the cluster, stop or relocate the resource, or use the force option for the same command.

CRS-02737: Unable to register server pool '*string*' as this will affect running resources, but the force option was not specified

Cause: One or more running resources would be affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02738: Unable to modify server pool '*string*' as this will affect running resources, but the force option was not specified

Cause: One or more running resources would be affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02739: Unable to relocate server '*string*' as this will affect running resources, but the force option was not specified

Cause: One or more running resources would be affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, use a different server, or use the force option for the same command.

CRS-02740: Failed to relocate server '*string*' to server pool '*string*'. The server has been restored to original server pool(s).

Cause: In order to successfully relocate a server, all resources that cannot run in the new server pool(s) must be stopped. That did not happen and thus the server was placed back into the its original server pool(s).

Action: Manual intervention in stopping or unregistering resources is required. The operation can be retried thereafter. Alternatively, another server can be used.

CRS-02741: A value must be specified for attribute '*string*'

Cause: The attribute was not given a value.

Action: Provide a value and retry.

CRS-02742: The update of resource '*string*' would lose track of one or more running instances

Cause: An attempt was made to modify the configuration of the resource such that one or more currently running instance will be lost track of (the new configuration would change the resource to have fewer instances).

Action: Stop the resource and resubmit.

CRS-02743: Unable to register resource '*string*' as this will affect running resources, but the force option was not specified

Cause: One or more running resources would be affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02744: Unable to modify resource '*string*' as this will affect running resources, but the force option was not specified

Cause: One or more running resources would be affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02745: Unable to relocate server *string* because it results in violation of a pool *string* constraint

Cause: The requested move was rejected because it would cause either the source or target pool (or both) to violate a pool size constraint, as indicated.

Action: Either change the pool size constraint(s) to accommodate your intent with this move, or choose a different server to move.

CRS-02746: Cannot act on the instance of resource '*string*' which is last known to have run on '*string*' where Cluster Ready Services are not properly functioning

Cause: The resource had been running on the server in the past but currently there's no way to know if it's still running there because the Cluster Ready Services daemon does not appear to be running on the server. To prevent possible configuration violation, any attempt to start the resource instance on another server is rejected.

Action: The underlying problem preventing Cluster Resource Services on the server from functioning properly must be addressed. Only then the resources that used to run there can be operated on again. Alternatively, the server may be shut down or the clusterware stack on it stopped completely.

CRS-02747: Server reconfiguration has failed to stop resources '*string*' on server '*string*'. Resources that did not stop must be stopped or unregistered manually. Details at *string* in *string*.

-
- Cause:** The specified resources could not be stopped.
- Action:** Stop the specified resources manually using and retry the last action.
- CRS-02748: Failed to stop resource '*string*' during server reconfiguration on server '*string*'.**
- Cause:** The specified resources could not be stopped.
- Action:** Stop the specified resources manually and retry the last action.
- CRS-02749: A write of OCR server data '*string*' failed. Details at *string* in *string*.**
- Cause:** Could not persist data to OCR.
- Action:** Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.
- CRS-02750: Cardinality violation detected on server '*string*', resource '*string*' is in unexpected state. Details at *string* in *string*.**
- Cause:** The specified resource was in an unexpected state.
- Action:** Manually restart the resource.
- CRS-02751: Cannot create new resource, the resource type '*string*' is not supported. Details at *string* in *string*.**
- Cause:** The specified resource had an incorrect base type.
- Action:** Check the attributes for the resource and add it using crsctl again.
- CRS-02752: Unable to write event sequence number to OCR. Details at *string* in *string*.**
- Cause:** Could not update OCR with event sequence number.
- Action:** Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.
- CRS-02753: Timed out waiting for the server pools to be unfrozen.**
- Cause:** Timed out while waiting for a client to unfreeze the pools it froze.
- Action:** If the problem persists, contact Oracle Support Services.
- CRS-02754: Unable to change locks for a running operation '*string*'. Details at *string* in *string*.**
- Cause:** This is an internal error.
- Action:** Contact Oracle Support Services.
- CRS-02755: Error reading type definition for type '*string*'. Details at *string* in *string*.**
- Cause:** This is an internal error.
- Action:** Contact Oracle Support Services.
- CRS-02756: Invalid tag for command '*string*'. Details at *string* in *string*.**
- Cause:** An invalid command was received by the CRS daemon.
- Action:** Contact Oracle Support Services.
- CRS-02757: Command '*string*' timed out waiting for response from the resource '*string*'. Details at *string* in *string*.**
- Cause:** Timeout occurred while waiting for response to specified command.
- Action:** Check that the server targeted by the command is online and responsive.
- CRS-02758: Resource '*string*' is in an unknown state.**

Cause: Unable to determine the current state of specified resource.

Action: Manually restart the resource.

CRS-02759: Failed to read repository key for NLS language '*string*'. Details at *string* in *string*.

Cause: The key for the specified language could not be read from OCR.

Action: Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02760: Policy engine failed to initialize internal types. Details at *string* in *string*.

Cause: Error during initialization of internal data.

Action: If the problem persists, contact Oracle Support Services.

CRS-02761: Consistency problem in registry while processing resource '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02762: Unable to find type '*string*' in registry while processing resource '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services

CRS-02763: Error while reading resources. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02764: CRSADMIN and CRSUSER keys are not in repository. Details at *string* in *string*.

Cause: Error with repository. Required keys are not present.

Action: Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02765: Resource '*string*' has failed on server '*string*'.

Cause: The specified resource was no longer running.

Action: The resource will be automatically brought back online. Use crsctl to confirm that it is online.

CRS-02766: Received state change for disabled resource '*string*' from server '*string*'.

Cause: Received command to change state for a resource that was disabled.

Action: None

CRS-02767: Resource state recovery not attempted for '*string*' as its target state is OFFLINE

Cause: Target state for resource was OFFLINE. Clusterware will not attempt to recover it.

Action: None

CRS-02768: Failure threshold exhausted by resource '*string*'.

Cause: The specified resource failed too many times. No further restart attempts will be made.

Action: Fix the underlying cause of resource failure and manually restart the resource.

CRS-02769: Unable to failover resource '*string*'.

Cause: Could not failover the specified resource.

Action: Restart the resource manually.

CRS-02770: Resource target '*string*' is offline; will not restart.

Cause: The target state of the specified resource was offline.

Action: None

CRS-02771: Maximum restart attempts reached for resource '*string*'; will not restart.

Cause: Specified resource had been restarted too many times.

Action: Change the maximum restart parameter of the resource, and restart it manually.

CRS-02772: Server '*string*' has been assigned to pool '*string*'.

Cause: The specified server had been assigned to a server pool.

Action: None

CRS-02773: Server '*string*' has been removed from pool '*string*'.

Cause: The specified server had been removed from a server pool.

Action: None

CRS-02774: Failed to save resource '*string*' to the repository. Details at *string* in *string*.

Cause: Could not update repository with resource details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02775: Failed to update resource '*string*'. Details at *string* in *string*.

Cause: Could not update repository with resource details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02776: Failed to update server pool '*string*'. Details at *string* in *string*.

Cause: Could not update repository with server pool details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02777: Failed to delete resource '*string*' from repository. Details at *string* in *string*.

Cause: Unable to update resource details in repository.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02778: Failed to delete server pool '*string*' from repository. Details at *string* in *string*.

Cause: Could not update repository with server pool details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

-
- CRS-02779: Failed to delete type '*string*' from repository. Details at *string* in *string*.**
Cause: Failed to update repository.
Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.
- CRS-02780: Could not find Access Control List for resource '*string*'. Details at *string* in *string*.**
Cause: This is an internal error.
Action: Contact Oracle Support Services.
- CRS-02781: Error during registration for resource '*string*'. Details at *string* in *string*.**
Cause: Error occurred during registration callback of new resource.
Action: Contact Oracle Support Services.
- CRS-02782: Unable to find attributes for resource '*string*'. Details at *string* in *string*.**
Cause: This is an internal error.
Action: Contact Oracle Support Services.
- CRS-02783: Internal error in local placement policy for resource '*string*'. Details at *string* in *string*.**
Cause: Internal error in CRS Policy Engine.
Action: Contact Oracle Support Services.
- CRS-02784: Internal error, invalid server '*string*' in local placement policy. Details at *string* in *string*.**
Cause: Internal error in CRS Policy Engine.
Action: Contact Oracle Support Services.
- CRS-02785: Failed to register resource '*string*'. Details at *string* in *string*.**
Cause: Could not update repository with resource details.
Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.
- CRS-02786: Failed to register server pool '*string*'. Details at *string* in *string*.**
Cause: Could not update repository with server pool details.
Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.
- CRS-02787: Server pool '*string*' has fallen below its minimum size. Details at *string* in *string*.**
Cause: The specified server pool has fallen below its minimum size and will be reconfigured.
Action: None
- CRS-02788: Server reconfiguration failed to stop resources '*string*'. The server '*string*' has been restored into the original pool(s).**
Cause: The specified resources could not be stopped.
Action: Stop the specified resources manually and retry the last action.
- CRS-02789: Cannot stop resource '*string*' as it is not running on server '*string*'**
Cause: An request to stop a resource on a server where it is not running was received

Action: Check the current state of the resource; it should no longer be running on that server.

CRS-02790: Starting shutdown of Cluster Ready Services-managed resources on '*string*'

Cause: Shutdown of Cluster Ready Services and the resources it manages has started on the specified server.

Action: None

CRS-02791: Starting shutdown of Oracle High Availability Services-managed resources on '*string*'

Cause: Shutdown of Oracle High Availability Services and the resources it manages has started on the indicated server.

Action: None

CRS-02792: Shutdown of Cluster Ready Services-managed resources on '*string*' has completed

Cause: Shutdown of Cluster Ready Services and the resources it manages on the indicated server has completed.

Action: None

CRS-02793: Shutdown of Oracle High Availability Services-managed resources on '*string*' has completed

Cause: Shutdown of Oracle High Availability Services and the resources it manages has completed on the indicated server.

Action: None

CRS-02794: Shutdown of Cluster Ready Services-managed resources on '*string*' has failed

Cause: The failure is associated with one or more of the resources affected by this command on the indicated server."

Action: Error message(s) preceding this one should have the details about the resources that refused to shut down. Either manually stop those resources or retry with the force option.

CRS-02795: Shutdown of Oracle High Availability Services-managed resources on '*string*' has failed

Cause: The failure is associated with one or more of the resources affected by this command on the indicated server."

Action: Error message(s) preceding this one should have the details about the resources that refused to shut down. Either manually stop those resources or retry with the force option.

CRS-02796: The command may not proceed when Cluster Ready Services is not running

Cause: This command must stop Cluster Ready Services-managed resources. However, Cluster Ready Services is not running, which does not mean its resources are not running.

Action: The underlying reason for Cluster Ready Services not running needs to be resolved and the command retried. Alternatively, the command can be retried with the force option.

CRS-02797: Shutdown is already in progress for '*string*', waiting for it to complete

Cause: Another shutdown command was issued for the indicated server in the past and it is currently in progress. This command will wait until the original command completes and then complete as well.

Action: None

CRS-02798: State change received for resource '*string*' from unexpected server '*string*'. Details at '*string*' in '*string*'.

Cause: A state change was reported for an instance of the resource from a server where the resource was never started.

Action: Shutdown the resource on the unexpected server

CRS-02799: Failed to shut down resource '*string*' on '*string*'

Cause: Shut down failed because the listed resource failed to stop.

Action: Error message(s) preceding this one should have the details about the resources that refused to shut down. Either manually stop those resources or retry with the force option.

CRS-02800: Cannot start resource '*string*' as it is already in the INTERMEDIATE state on server '*string*'

Cause: An attempt was made to start a resource that is already in the INTERMEDIATE state.

Action: Determine why the resource is in the INTERMEDIATE state based on the value of the STATE_DETAILS attribute. If it is due to a check timeout, no action is needed. Otherwise, manual intervention is required to bring the resource out of the INTERMEDIATE state.

CRS-02801: No instance of the resource '*string*' should be running

Cause: An attempt was made to relocate resource and the resource's instances to be relocated have TARGET=OFFLINE.

Action: Restart the resource to change the value of the TARGET attribute to ONLINE. Examining the value of the INTERNAL_STATE attribute can be used to determine if the instances are being operated on currently.

CRS-02802: Purging events not published within 15 minutes

Cause: The events could not be published to the Event Manager Daemon either because it is down or there are errors doing the publish.

Action: Check the status of the Event Manager Daemon.

CRS-02803: Attribute '*string*' has already been declared in a derived type '*string*'

Cause: An attempt was made to add a new attribute definition to a resource type that has an identically named attribute already defined in one or more derived types. Attributes declared in base types can be overridden in derived ones, but the opposite is not allowed.

Action: Pick a different attribute name or delete the derived type(s), resubmit, and then add derived types back.

CRS-02805: Unable to start '*string*' because it has a '*string*' dependency on resource type '*string*' and no resource of that type can satisfy the dependency

Cause: Start/relocate of the resource is impossible because it has a dependency on a resource type no resource of which can currently be used to satisfy the dependency.

Action: This message will normally be coupled with one or more other messages that detail the nature of the problem for each existing resource of the type.

CRS-02806: Failed to create stop operation for resource '*string*'

Cause: Creating the stop operation did not complete successfully.

Action: Error message(s) preceding this one should have more details about the problem. Try shutting down the resource manually, or retrying with the force option.

CRS-02807: Resource '*string*' failed to start automatically.

Cause: This message comes up when the automatic start for the resource has failed during a reboot of the cluster node or restart of the clusterware stack. See previous resource specific messages for more details.

Action: Use 'crsctl start resource' to start the resource manually.

CRS-02847: Authorization failure: operating system user '*string*' does not exist on server '*string*'

Cause: The specified operating system user or group does not exist on the specified server. Cluster Ready Services requires that all users or groups used by the resource it manages exist on each server of the cluster.

Action: Add the specified operating system user or group on the specified server.

CRS-02848: Error while reading resources: Resource: '*string*' . Error: *string*. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02849: Authorization failure: Resource '*string*'

Cause: A resource operation could not be performed because authorization checking failed. This may be due to inconsistency of user or group IDs across cluster nodes.

Action: Check the ownership, group, and permissions associated with the resource and ensure that the associated operating system user and group definitions are consistent on all cluster nodes.

CRS-02878: Failed to restart resource '*string*'

Cause: An attempt to start the resource has failed.

Action: If failover is not enabled, try manually starting the resource on a different server. If failover is enabled, the resource has been failed over, and any problems are reported in subsequent messages.

CRS-02879: Cannot update the ALERT_TEMPLATE attribute, because the input is not valid

Cause: A resource update operation could not be performed, because the input value is not valid.

Action: Ensure that valid attributes are specified in a space separated list.

CRS-02907: Resource '*string*' is not completely configured and cannot be operated upon.

Cause: A request was made without specifying the PID_FILES or EXECUTABLE_NAMES attribute.

Action: Specify a value for the PID_FILES or EXECUTABLE_NAMES attribute, or specify values for STOP_PROGRAM, CHECK_PROGRAM and CLEAN_PROGRAMS attributes.

CRS-04000: Command *string* failed, or completed with errors.

Cause: The specified command did not complete successfully. If the command performs multiple operations internally, one or more of those operations experienced an error that is reported in a previous message.

Action: Examine the error message(s) preceding this message and correct the problem(s) they describe.

CRS-04016: Key '*string*' is missing in the OCR.

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04017: Failed to get the value for key '*string*' from OCR.

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04038: Cannot delete invalid user '*string*' from CRS Admin list.

Cause: An attempt was made to delete an invalid username from the CRS Admin list.

Action: Reissue the command with a valid username.

CRS-04044: CRS Administrator List: *string*

Cause: Output message, not an error.

Action: None

CRS-04046: Invalid Oracle Clusterware configuration.

Cause: The Oracle Clusterware configuration is invalid.

Action: Configure Oracle Clusterware or Oracle Restart.

CRS-04047: No Oracle Clusterware components configured.

Cause: No Oracle Clusterware components have been configured.

Action: Configure Oracle Clusterware or Oracle Restart.

CRS-04200: Failed to initialize a security context during wallet IPMI credentials creation.

Cause: Internal error.

Action: Contact Oracle Customer Support.

CRS-04201: Hash context initialization failure during wallet IPMI credentials creation

Cause: Internal error.

Action: Contact Oracle Customer Support.

CRS-04202: String hashing failed during wallet credentials creation

Cause: Internal error.

Action: Contact Oracle Customer Support.

CRS-04203: Hashing creation error during wallet credentials creation

Cause: Internal error.

Action: Contact Oracle Customer Support.

CRS-04204: Failed to initialize the IPMI credentials wallet: *string*

Cause: While trying to initialize the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04205: Failed to open the IPMI credentials wallet. The wallet does not exist.

Cause: The wallet does not exist.

Action: Configure the wallet for the IPMI device using 'crsctl set'\n'

CRS-04206: Error reading IPMI credentials wallet: '*string*'

Cause: While trying to read the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04207: Error writing IPMI credentials wallet: '*string*'

Cause: While trying to write the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04208: Unexpected error encountered during lookup of IPMI credentials in the wallet

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using 'crsctl set' and then retry the operation. If the retry fails call customer support.

CRS-04209: IPMI credentials not contained in the wallet

Cause: The wallet has not been configured.

Action: Configure the wallet for the IPMI device using 'crsctl set'\n'

CRS-04210: Failed to obtain the length of IPMI credentials while accessing the wallet.

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call customer support.

CRS-04211: Failed to allocate memory

Cause: Insufficient system memory resources.

Action: Correct the system memory resources problem and retry.

CRS-04212: Failed to obtain the secret from the wallet.

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call customer support.

CRS-04213: Secret from wallet has incorrect size

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call customer support.

CRS-04214: crsctl *string* and *string* wallet versions of IPMI do not match.

Cause: A mismatch occurred between the IPMI versions of crsctl and the Cluster Synchronization Services Daemon.

Action: Check proper installation and configuration of crsctl and the Cluster Synchronization Services Daemon.

CRS-04215: Wallet secret encoding error

Cause: Internal error.

Action: Contact Oracle Customer Support.

CRS-04216: Unexpected error configuring the wallet contents

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call customer support.

CRS-04217: Unexpected error saving IPMI credentials wallet: *string*

Cause: While trying to save the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04218: Unable to access an IPMI device on this system

Cause: A test for the availability of an IPMI device failed. This can occur if:

- the IPMI device driver is not installed,
- the installed device driver is not supported by Oracle,
- IPMI is not supported on this platform or operating system,
- no IPMI device is present, or
- an IPMI device is present but not configured.

Action: Verify that IPMI hardware supporting IPMI version 1.5 or greater is present and supported on this server, that the IPMI device is configured and the device driver is properly installed.

CRS-04219: Failed to open the wallet. User must be the creator of the wallet: *string*

Cause: Not the owner/creator of the wallet. The cluster wallet subsystem returned an error included with this message.

Action: Retry as the owner/creator of the wallet. If necessary, also see the documentation and follow the directions for the displayed error.

CRS-04221: Must specify a password

Cause: No password entered in response to password prompt.

Action: Specify a password which matches the local servers IPMI BMC password.

CRS-04222: Supplied password was greater than *number* bytes

Cause: The password specified was too long for the IPMI device.

Action: Supply a password with a length no greater than the indicated size while still matching the password used to configure the IPMI device. Retry.

CRS-04223: Username is greater than *number* bytes

Cause: The username specified was too long for the IPMI device.

Action: Supply a username with a length no greater than the indicated size while still matching the username used to configure the IPMI device. Retry.

CRS-04224: Unable to communicate with the Cluster Synchronization Services daemon to update IPMI values.

Cause: crsctl modified the IPMI credential wallet but could not notify the Cluster Synchronization Services Daemon.

Action: Retry after assuring the Cluster Synchronization Services Daemon is functioning by executing `csscheck`.

CRS-04225: Unexpected authorization error while creating the IPMI credentials wallet: *string*

Cause: Error creating the IPMI credentials wallet. The cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error and retry.

CRS-04226: Unexpected authorization error while saving the IPMI credentials wallet: *string*

Cause: While attempting to save the IPMI credentials wallet, the cluster wallet sub-system returned an authorization error. The text of the authorization error text is included with this message. This error was unexpected, and might have been due to an internal error, because wallet creation should be authorized for anyone, and, if the wallet was pre-existing, it had already been read after proper authorization checks.

Action: Consult the documentation for the included message to investigate the root cause of the authorization error, and retry the "set" operation if indicated. If this fails, contact Oracle Support.

CRS-04227: Configuration data stored but IPMI IP address is required to complete the change. The change cannot be validated until the information is complete.

Cause: Not proceeding with Client's IPMI login change request because all information such as IPMI username, password and IP address need to be present.

Action: Please execute '`crsctl set css ipmiaddr`' from `crsctl`.

CRS-04228: Value of attribute '*string*' is missing

Cause: The user did not provide a value for the attribute.

Action: Provide a value using the format `<attrName>=<value>`, where `<value>` may be empty single quotes.

CRS-04229: The IPMI information change was successful

Cause: The IPMI address and authorization information have been validated and the change completed.

Action: None required.

CRS-04230: A device was found where the IPMI device should be, but the device is not an IPMI device

Cause: The IPMI driver may not be configured or supported by this host.

Action: Check the configuration of the IPMI driver and verify the server's support of an IPMI version 1.5 or greater device.

CRS-04231: IPMI device and/or driver found

Cause: An IPMI device and/or device driver was identified on the machine. Detection mechanisms for IPMI hardware vary by platform.

Action: None required.

CRS-04232: Configuration data stored but IPMI authorization information is required to complete the change. The change cannot be validated until the information is complete.

Cause: Not proceeding with Client's IPMI login change request because all information (IPMI username, password and IP address) need to be present.

Action: Please execute 'crsctl set css ipmiadmin' from crsctl.

CRS-04233: New IPMI configuration data stored, but failed validation by remote node.

Cause: The supplied configuration data was stored in the Oracle registry, but the resulting configuration could not be used for IPMI access by a remote node. The stored IP address and/or IPMI admin credentials is/are incorrect.

Action: The validating node is identified in the CRS alert log, and further details can be found in the alert log on that node. Verify the credentials for the local IPMI device and reset the configuration using commands 'crsctl set css ipmiadmin' and 'crsctl set css ipmiaddr'

CRS-04234: IPMI configuration unset and registry entries deleted.

Cause: Requested operation successful. However, if the CRS stack was able to access and use the deleted configuration data, it will continue to do so until it is restarted.

Action: None required. Enter new configuration data or restart the CRS stack if desired.

CRS-04235: Failed to delete the IPMI configuration from the Oracle Registry: 'string'

Cause: An error was encountered in the Oracle registry sub-system while trying to clear IPMI configuration and delete the IPMI configuration entries. The detailed error message is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04236: Oracle Clusterware configured to use IPMI

Cause: The Oracle Registry contains complete configuration data for IPMI.

Action: None required.

CRS-04237: Oracle Clusterware is not fully configured to use IPMI

Cause: The Oracle Registry does not contain complete configuration data for IPMI.

Action: None required.

CRS-04251: Failed to change the discovery string

Cause: An internal error happened during this operation.

Action: Please contact Oracle Support Services.

CRS-04252: Failed to update the profile with the new discovery string

Cause: An internal error happened when updating the discovery string in the profile.

Action: Please contact Oracle Support Services.

CRS-04253: The discovery string can not be changed because the voting files are on ASM

Cause: Changing the discovery string is allowed only if the voting files are not on ASM.

Action: None

CRS-04254: The discovery string has already been set to this value

Cause: The value being passed is the same as the current discovery string.

Action: Pass a different discovery string if necessary.

CRS-04255: Not able to find the current configured voting files with the provided discovery string

Cause: The supplied discovery string does not discover the voting files that are currently configured.

Action: Pass a different discovery string that includes the location of the current configured voting files.

CRS-04256: Updating the profile

Cause: An update to the profile is being performed.

Action: None

CRS-04257: Voting file discovery string successfully replaced

Cause: A request to replace a discovery string completed.

Action: None

CRS-04258: Addition and deletion of voting files are not allowed because the voting files are on ASM

Cause: A voting file add or delete request was issued, but voting files have been configured on ASM storage. Once voting files are configured for ASM, changes in the configuration can be made only with 'crsctl replace votedisk'.

Action: Use 'crsctl replace votedisk' to modify the voting file configuration.

CRS-04259: Only one ASM diskgroup may be specified

Cause: If the voting files will be on ASM, no more than one diskgroup should be specified.

Action: Specify the correct ASM diskgroup.

CRS-04260: Voting file *string* is already configured

Cause: The location provided is already configured as a voting file.

Action: Specify another location that is not a current voting file.

CRS-04261: Diskgroup *string* is already configured with voting files

Cause: The diskgroup name provided is already configured with voting files.

Action: Specify another location for the voting files.

CRS-04262: Failure when retrieving information from the GPnP profile

Cause: An internal error happened when accessing GPnP profile.

Action: Contact Oracle Support Services.

CRS-04263: This operation is not allowed

Cause: Replacing a list of non-ASM voting files with a different list of voting files is not supported.

Action: To change the list of non-ASM voting files and add new voting files, use 'crsctl add css votedisk <vfile> ... <vfile>'.

CRS-04264: The operation could not be validated

Cause: An internal error happened during the validation of the discovery string.

Action: Contact Oracle Support Services.

CRS-04265: The operation cannot be performed because the profile is busy with another operation

Cause: Another operation on the profile is taking place.

Action: Let the other operation finish and retry.

CRS-04266: Voting file(s) successfully replaced

Cause: A request to replace a voting files(s) completed.

Action: None

CRS-04267: Error while updating the profile with ASM discovery string

Cause: An internal error happened while updating the ASM discovery string.

Action: Contact Oracle Support Services.

CRS-04268: '-name' option is supported only with APPQOSDB type wallets

Cause: The '-name' option was specified in a wallet command for APPQOSDB type wallet.

Action: Use the '-name' option only for actions on APPQOSDB type wallets.

CRS-04269: Successful get priority *number string* for Cluster Synchronization Services.

Cause: The 'get' operation was performed successfully.

Action: None

CRS-04402: The CSS daemon was started in exclusive mode but found an active CSS daemon on node *string*, number *string*, and is terminating

Cause: The CSS daemon was started in exclusive mode, which requires that the clusterware stack is down on all other nodes to ensure data integrity. A CSS daemon was detected on another node, so the CSS daemon on this node is terminating.

Action: is required, otherwise stop the Oracle clusterware stack that is running on the indicated node. The name and number of the active node may be unknown.

CRS-04404: The following nodes did not reply within the allotted time: *string*

Cause: The clusterized command timed out before the specified nodes responded to the command.

Action: Check if the nodes are online; also check for communications problems. Consider issuing the command locally on the specified node(s).

CRS-04405: The following nodes are unknown to Oracle High Availability Services: *string*

Cause: The local Oracle High Availability Services is not in contact with Oracle High Availability Services on the specified nodes.

Action: Check if the nodes are online and Oracle High Availability Services is running. Check for communications problems and consider issuing the command locally on the specified node(s).

CRS-04481: Unable to spawn a process.

Cause: There was an internal error while spawning a process.

Action: Report the error to Oracle Support.

CRS-04482: A child process terminated abnormally.

Cause: A child process exited due to an internal error.

Action: Report the error to Oracle Support.

CRS-04602: Failed *number* to add voting file *string*.

Cause: An attempt to add a voting file failed. The number following "Failed" is a return code, which can be: 1 - internal OCSSD server error; 8 - rejected by OCSSD; 15- insufficient privileges for this operation; 19- version incompatibility between client and server;

Action: Respond based on the return code as follows: 15 - adjust privileges or use a different userid 19 - ensure that compatible versions are installed others - report to Oracle Support Services

CRS-04608: Failure *number* with Cluster Synchronization Services while deleting voting disk.

Cause: An attempt to delete a voting disk failed. The number following "Failed" is a return code, which can be: 1 - internal OCSSD server error; 8 - rejected by OCSSD; 15- insufficient privileges for this operation; 16- either the specified voting disk does not exist or you tried to delete a majority of voting disks; 19- version incompatibility between client and server;

Action: Respond based on the return code as follows: 15 - adjust privileges or use a different userid 16 - review the voting disk configuration displayed by 'crsctl query css votedisk' and correct your request accordingly 19 - ensure that compatible versions are installed others - report to Oracle Support Services

CRS-04615: Failure *number* in clsvswversion for node *string*

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04625: Failure to allocate *number* bytes for username.

Cause: System is out of memory.

Action: Free up memory on system and retry.

CRS-04626: The requested setting must be between *number* and *number*.

Cause: An attempt to change a setting to an out of bounds value.

Action: Retry with the setting within the proper limits.

CRS-04627: Unable to lock the configuration before making changes. *number*

Cause: Failure in a CSS API acquiring a lock.

Action: Retry or contact support for information on the error code.

CRS-04628: Change to configuration failed, but was successfully rolled back.

Cause: See accompanying messages for explanation of cause.

Action: No action is required. This indicates that no damage was done.

CRS-04629: Unable *number* to mark unformat information on voting file *string*

Cause: Probably an unreadable / unwritable voting file was being removed.

Action: If cause is correct, this is ignorable, but not ideal.

CRS-04630: Unable to apply correct permissions to new voting file *string*.

Cause: An attempt to set permissions on a new voting file failed. This message is accompanied by others that provide OS-specific details of the error.

Action: Examine the OS-specific error and correct it if possible; otherwise, specify a different voting file.

CRS-04631: Unable *number* to undo initialization of voting file.

Cause: Could not roll back format of voting file.

Action: Disk should be cleaned out before an attempt to add again.

CRS-04632: Unable *number* to roll back OCR settings for voting file.

Cause: Could not remove temporary changes to OCR adding voting file.

Action: Shut down the cluster and restart. New voting file must be removed with "crsctl delete css votedisk".

CRS-04633: This could take several minutes.

Cause: CRS daemons is engaged in an activity take could potentially take a long time.

Action: None

CRS-04634: Retrying stop resources.

Cause: crsctl command is trying again to stop resources.

Action: None

CRS-04635: Internal error '*number*' while attempting to send shutdown request

Cause: This is an internal error.

Action: If retrying does not work, contact Oracle support

CRS-04636: Failure *number* in clsvrelversion

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04637: Oracle High Availability Services release version on the local node is [*string*]

Cause: Output message, not an error.

Action: None

CRS-04651: No resources found on server '*string*'.

Cause: The server has no resources associated with it.

Action: Provide a server with resources running.

CRS-04652: Failure *number* in clsvswversion for the local node

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04653: Server name '*string*' contains invalid characters.

Cause: The name provided contains invalid characters.

Action: Use a server name with only alphanumeric characters.

CRS-04654: Server '*string*' could not be found.

Cause: The name provided is not a known server's name.

Action: Use a known server's name.

CRS-04655: Resource '*string*' could not be found.

Cause: The name provided is not a known resource's name.

Action: Use a known resource's name.

CRS-04656: Resource '*string*' is not running on server '*string*'.

Cause: The resource is not on the server the user specified.

Action: User must type a known server.

CRS-04657: Source and destination servers are the same.

Cause: The source and destination servers may not be the same.

Action: Specify a different destination server.

CRS-04658: The clusterware stack on node *string* is not completely down.

Cause: There is indication that the clusterware stack is still up.

Action: Please shutdown the entire clusterware stack before deleting the node.

CRS-04659: Error while trying to unpin node *string*.

Cause: An internal error happened during this operation.

Action: Please contact Oracle Support Services.

CRS-04660: Could not find node *string* to delete.

Cause: The node to be deleted could not be found because it has not been a member of this cluster recently.

Action: Please check the name provided. If the name is correct, the node has been automatically deleted because it was inactive for a long time and no further action is required to delete the node from the cluster.

CRS-04661: Node *string* successfully deleted.

Cause: A request to delete a node completed.

Action: None

CRS-04662: Error while trying to delete node *string*.

Cause: Some internal error happened during this operation.

Action: Please contact Oracle Support Services.

CRS-04663: Could not find node *string* to pin.

Cause: The indicated node is not an active node in the cluster.

Action: Ensure that the node name is correct and that Oracle Clusterware is running on the node.

CRS-04664: Node *string* successfully pinned.

Cause: A request to pin a node completed.

Action: None

CRS-04665: Error while trying to pin node *string*.

Cause: An internal error happened during this operation.

Action: Please contact Oracle Support Services.

CRS-04666: Could not find node *string* to unpin.

Cause: The indicated node is not an active node in the cluster.

Action: Ensure that the node name is correct and that Oracle Clusterware is running on the node.

CRS-04667: Node *string* successfully unpinned.

-
- Cause:** A request to unpin a node completed.
- Action:** None
- CRS-04668: This ASM diskgroup does not contain voting disks to be deleted**
- Cause:** The ASM diskgroup name provided does not contain voting files.
- Action:** Provide the right ASM diskgroup name.
- CRS-04669: Failed to set parameter *string* to *number* due to conflicting parameter *string*; the new value for *string* must be less than *number*.**
- Cause:** An attempt was made to set a new value to a configuration parameter which conflicts with another parameter's current value.
- Action:** Set the value of this parameter to a lower value than what is indicated in the message.
- CRS-04670: Failed to unset parameter *string* due to conflicting parameter *string* currently set to *number*.**
- Cause:** An attempt was made to unset a configuration parameter which conflicts with another parameter's current value.
- Action:** Set the conflicting parameter to a value which can coexist with proposed parameter change before submitting this parameter change.
- CRS-04671: This command is not supported for ASM diskgroups.**
- Cause:** The command 'crsctl add css votedisk' contains one or more ASM diskgroups in the list of voting files. Voting files may be migrated to and from ASM, but diskgroups cannot be added or deleted.
- Action:** Use an appropriate 'crsctl set' command to add ASM diskgroups. Use 'crsctl replace votedisk' command to migrate voting files to ASM.
- CRS-04672: Successfully backed up the Voting File for Cluster Synchronization Service.**
- Cause:** The backup of the voting file completed successfully.
- Action:** None
- CRS-04673: Oracle High Availability Services version on the local node is [*string*]**
- Cause:** Output message, not an error.
- Action:** None
- CRS-04674: Cannot add invalid user '*string*' to CRS Admin list.**
- Cause:** An attempt was made to add an invalid username to the CRS Admin list.
- Action:** Reissue the command with a valid username.
- CRS-04675: Failed to get logfilesize for Cluster Synchronization Services.**
- Cause:** An internal error happened during this operation for Cluster Synchronization Services.
- Action:** Please contact Oracle Support Services.
- CRS-04676: Successful get logfilesize *number* for Cluster Synchronization Services.**
- Cause:** The operation is done successfully for Cluster Synchronization Services.
- Action:** None
- CRS-04677: Failed to get *string* for Cluster Synchronization Services.**

-
- Cause:** An internal error happened during this operation for Cluster Synchronization Services.
- Action:** Please contact Oracle Support Services.
- CRS-04678: Successful get *string number* for Cluster Synchronization Services.**
- Cause:** The 'get' operation was performed successfully.
- Action:** None
- CRS-04679: Failed to unset logfilesize for Cluster Synchronization Services.**
- Cause:** An internal error happened during this operation for Cluster Synchronization Services.
- Action:** Please contact Oracle Support Services.
- CRS-04680: Successful unset logfilesize for Cluster Synchronization Services.**
- Cause:** The 'unset' operation was performed successfully.
- Action:** None
- CRS-04681: Failed to unset priority for Cluster Synchronization Services.**
- Cause:** An internal error happened during this operation for Cluster Synchronization Services.
- Action:** Please contact Oracle Support Services.
- CRS-04682: Successful unset priority for Cluster Synchronization Services.**
- Cause:** The 'unset' operation was performed successfully.
- Action:** None
- CRS-04683: Failed to set parameter *string* to *number* for Cluster Synchronization Services.**
- Cause:** An internal error happened during this operation for Cluster Synchronization Services.
- Action:** Please contact Oracle Support Services.
- CRS-04684: Successful set of parameter *string* to *number* for Cluster Synchronization Services.**
- Cause:** The 'set' operation was performed successfully for Cluster Synchronization Services.
- Action:** None
- CRS-04685: Failed to set logfilesize *number* for Cluster Synchronization Services.**
- Cause:** An internal error happened during this operation for Cluster Synchronization Services.
- Action:** Please contact Oracle Support Services.
- CRS-04686: Successful set logfilesize *number* for Cluster Synchronization Services.**
- Cause:** The 'set' operation was performed successfully for Cluster Synchronization Services.
- Action:** None
- CRS-04687: Shutdown command has completed with errors.**
- Cause:** Processing of a shutdown command has completed with errors.
- Action:** Refer to preceding error message(s) for information about the errors that occurred.

CRS-04688: Oracle Clusterware is already stopped on server '*string*'

Cause: Oracle Clusterware is not running on the indicated server.

Action: None

CRS-04689: Oracle Clusterware is already stopped

Cause: Oracle Clusterware is not running.

Action: None

CRS-04690: Oracle Clusterware is already running on '*string*'

Cause: Oracle Clusterware is already running on the indicated server.

Action: None

CRS-04691: Oracle Clusterware is already running

Cause: Oracle Clusterware is already running.

Action: None

CRS-04692: Cluster Ready Services is online in exclusive mode

Cause: Cluster Ready Services is limited to providing internal services to other Oracle Clusterware components. External Cluster Ready Services are not available.

Action: When in exclusive mode, Oracle Clusterware components are dedicated to the repair or reconfiguration of the Oracle Cluster Registry, voting files or both. Oracle Clusterware should be down and remain down on every other cluster node. Only commands that check or stop the stack, interact with Cluster Synchronization Services or aid in Clusterware repair or reconfiguration should be issued.

CRS-04693: Failed to back up the voting file for Cluster Synchronization Service.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-04694: Number of voting files cannot exceed *number*. Failed to add voting files.

Cause: The request to add voting files would cause the maximum number allowed to be exceeded.

Action: Specify fewer voting files to add so that the maximum is not exceeded, or include the `-purge` option on `'crsctl add css votedisk'` to replace the existing set of files with an allowable number of new files.

CRS-04695: Voting disk addition failed because this disk *string* is a duplicate of an existing voting disk with matching File Universal ID *string*.

Cause: This disk is already a part of the current cluster.

Action: None needed.

CRS-04696: Failed to set parameter *string* to *number* due to conflicting parameter *string*; the new value for *string* must be greater than *number*.

Cause: An attempt was made to set a new value to a configuration parameter which conflicts with another parameter's current value.

Action: Set the value of this parameter to a higher value than what is indicated in the message.

CRS-04697: This command must be executed by Operating System user '*string*'.

Cause: A `crsctl` command was executed by the wrong Operating System user.

Action: The specified Operating System user should execute the command.

CRS-04700: The Cluster Time Synchronization Service is in Observer mode.

Cause: Vendor time synchronization software exists on at least one of the nodes in the cluster.

Action: None

CRS-04701: The Cluster Time Synchronization Service is in Active mode.

Cause: Vendor time synchronization software is not detected on any of the nodes in the cluster.

Action: None

CRS-04703: The Cluster Time Synchronization Service is Offline.

Cause: The Cluster Time Synchronization Service is not running on the current node.

Action: None

CRS-04704: Shutdown of Clusterware failed on node *string*.

Cause: The shutdown did not complete successfully. One or more of the internal operations experienced an error that is reported in previous messages.

Action: Examine the error message(s) preceding this message and correct the problem(s) they describe.

CRS-04705: Start of Clusterware failed on node *string*.

Cause: The start did not complete successfully. One or more of the internal operations experienced an error that is reported in previous messages.

Action: Examine the error message(s) preceding this message and correct the problem(s) they describe.

CRS-04730: Command aborted due to an internal error

Cause: An inconsistent internal state was detected.

Action: Call Oracle Support Services.

CRS-04731: Specified file *string* could not be created.

Cause: JAZN configuration file required by the OC4J container could not be created.

Action: Ensure that the directory path exists and that its permissions will allow the file to be created by oracle owner of clusterware home.

CRS-04732: Could not be open file *string*.

Cause: JAZN configuration file required by the OC4J container could not be opened.

Action: Ensure that the directory path exists and that its permissions will allow the file to be created by oracle owner of clusterware home.

CRS-04733: File *string* does not exist.

Cause: The JAZN configuration file required by the OC4J container does not exist.

Action: Ensure that the directory path exists and that its permissions will allow the file to be created oracle owner of the clusterware home.

CRS-04734: Filename was not specified.

Cause: filename was not supplied or was an empty string.

-
- Action:** Re-try the command by specifying a valid JAZN configuration filename.
- CRS-04735: Expected OCR key does not exist**
Cause: An infrastructure error occurred because a required OCR key was missing.
Action: Call Oracle Support Services.
- CRS-04736: Operation on OCR key failed**
Cause: Operation on OCR key failed due to an OCR error.
Action: Re-issue the command as oracle owner of clusterware home.
- CRS-04737: Failed to allocate *number* bytes of memory**
Cause: Could not allocate memory for internal buffers due to insufficient system memory resources
Action: Correct the system memory resources problem and retry the command
- CRS-04738: Size of file *string* is too large**
Cause: Specified file size exceeds 65536 bytes.
Action: Re-issue the command after reducing the size of the file.
- CRS-04739: Could not close file *string***
Cause: Due to an internal error the specified file could not be closed
Action: Re-issue the command after verifying disk space, permissions and path.
- CRS-04740: I/O operation on file *string* failed.**
Cause: Due to an internal error an I/O operation on the specified file failed.
Action: Call Oracle Support if the problem persists.
- CRS-04741: Insufficient permissions on OCR key**
Cause: Operation on OCR key failed due to insufficient permissions.
Action: Re-issue the command as oracle owner of clusterware home.
- CRS-04742: OCR updated with contents of *string* (New = *number*, Old = *number* bytes)**
Cause: set jazn command was issued and OCR key was updated.
Action: None Required.
- CRS-04743: File *string* was updated from OCR(Size: *number*(New), *number*(Old) bytes)**
Cause: get jazn command was issued and specified file was updated with the contents from OCR key.
Action: None Required.
- CRS-04922: *string* module: *string* ignored; module level out of bounds (range 0 - 65535)**
Cause: Module log/trace level was out of bounds (range 0 - 65535).
Action: Specify a log/trace level within the valid range (0 - 65535).
- CRS-04923: *string* module: *string* ignored; module level is invalid (range 0 - 65535)**
Cause: Module log/trace level was invalid (range 0 - 65535).
Action: Specify a log/trace level within the valid range (0 - 65535).
- CRS-04925: 'all' module keyword was specified with other module names**

-
- Cause:** The module keyword 'all' already refers to all module names.
- Action:** When referring to all modules, use 'all' without duplicate references to other module names.
- CRS-04980: Duplicate value *string* specified for resource attribute *string***
- Cause:** A duplicate value was specified for a resource attribute.
- Action:** Specify only one value for a resource attribute.
- CRS-04981: Duplicate value *string* specified for type attribute keyword *string***
- Cause:** A duplicate value was specified for a type attribute keyword.
- Action:** Specify only one value for DEFAULT_VALUE, FLAGS and TYPE per type attribute.
- CRS-04982: Valid type attribute keyword *string* specified outside a type attribute**
- Cause:** A valid type attribute keyword was specified outside a type attribute.
- Action:** Specify the ATTRIBUTE type attribute keyword before specifying the DEFAULT_VALUE, FLAGS or TYPE type attribute keywords.
- CRS-04983: Invalid type attribute keyword *string* specified**
- Cause:** An invalid type attribute keyword was specified.
- Action:** Specify only the valid type attribute keywords ATTRIBUTE, DEFAULT_VALUE, FLAGS and TYPE.
- CRS-04984: Duplicate definition for type attribute *string***
- Cause:** The same type attribute was named on more than one ATTRIBUTE keyword.
- Action:** Define a type attribute only once.
- CRS-05000: Expected resource *string* does not exist in agent process**
- Cause:** The expected resource must have been created by Oracle Configuration tools.
- Action:** Check that the resource was not manually deleted. If not the case call Oracle Support.
- CRS-05001: Expected dependency in resource *string* on a resource of type *string* does not exist**
- Cause:** The expected resource dependency must have been created by Oracle Configuration tools.
- Action:** Check that the resource dependency was not manually removed.
- CRS-05002: Agent action was aborted**
- Cause:** Agent action was aborted either due to action timeout expiry or the user canceled the action.
- Action:** Retry the operation.
- CRS-05003: Invalid attribute value: '*string*' for attribute *string***
- Cause:** An attribute value passed to the Agent was NULL or invalid.
- Action:** Give the correct value to the attribute and retry.
- CRS-05004: Cannot find listener endpoint for listener *string***
- Cause:** listener endpoint not found.
- Action:** Check listener.ora for that listener.

CRS-05005: IP Address: *string* is already in use in the network

Cause: The VIP resource attempted to use an IP address already in use in the network.

Action: Use `srvctl` to re-create vip or scanvip specifying an IP address which is not being used in the network and retry the operation.

CRS-05006: Unable to automatically select a network interface which has subnet mask *string* and subnet number *string*

Cause: The subnet mask and subnet number configured for the resource did not match the subnet mask and subnet number of any network interface on this node.

Action: Provide a subnet mask and subnet number which matches at least one network interface's subnet mask and subnet number using `srvctl remove` and `add vip` and retry the operation.

CRS-05007: Cannot remove the primary IP *string* from the network interface

Cause: The primary IP of the network interface was incorrectly configured as the VIP.

Action: Use '`srvctl remove`' and '`srvctl add vip`' or '`srvctl remove`' and '`srvctl add scan`' to provide the correct IP address for the VIP and retry the operation.

CRS-05008: Invalid attribute value: *string* for the network interface

Cause: The network interface value did not match the subnet mask and subnet number of any network interface on the node.

Action: Modify the network interface's value such that the subnet mask and subnet number matches the subnet mask and subnet number of at least one network interface on the node using '`srvctl remove`' and '`srvctl add vip`' and retry the operation.

CRS-05009: The VIP address *string* does not belong to the subnet *string*

Cause: The VIP's subnet number and the network interface's subnet number did not match.

Action: Make the VIP's subnet number match the network interface's subnet number using '`srvctl remove`' and '`srvctl add vip`' or '`srvctl remove`' and '`srvctl add scan`' and retry the operation.

CRS-05010: Update of configuration file "*string*" failed: details at "*string*" in "*string*"

Cause: An attempt to open the specified file failed. Common causes are that the file does not exist, or the file permissions prohibit access.

Action: Check that the file exists and has the proper permissions.

CRS-05011: Check of resource "*string*" failed: details at "*string*" in "*string*"

Cause: The check of the database or Automatic Storage Management instance failed.

Action: Check the database or ASM instance alert log and the referenced Oracle Clusterware trace file for additional information. Recover the instance if necessary.

CRS-05012: Check of service resource "*string*" failed: details at "*string*" in "*string*"

Cause: The check of the preconnect service failed because it could not run on the same node as the main service.

Action: Check the referenced Oracle Clusterware trace file for additional information. Start the preconnect service on a different node.

CRS-05013: Agent "*string*" failed to start process "*string*" for action "*string*": details at "*string*" in "*string*"

Cause: The named agent failed to start the named process for the named action.

Action: Check the referenced Oracle Clusterware trace file for additional operating system specific information. Refer to operating system documentation to correct the error.

CRS-05014: Agent "*string*" timed out starting process "*string*" for action "*string*": details at "*string*" in "*string*"

Cause: The named agent aborted the named process because the process failed to respond within the timeout period.

Action: Check the agent log files for further information

CRS-05015: Agent timed out waiting for a response from the DHCP server

Cause: Agent and the DHCP server were not able to communicate with each other. Common causes of this failure are due to the DHCP server not running, or improper DHCP server configuration, or the DHCP server running out of DHCP leases.

Action: Identify the cause of the problem from the DHCP server log files. If the problem is due to the DHCP server running out of leases, increase the number of addresses which can be served by the DHCP server.

CRS-05016: Process "*string*" spawned by agent "*string*" for action "*string*" failed: details at "*string*" in "*string*"

Cause: The named process failed to complete successfully.

Action: Check details in the agent log for error information from the spawned process.

CRS-05017: The resource action "*string string*" encountered the following error: *string*. For details refer to "*string*" in "*string*".

Cause: The following error occurred during the resource action.

Action: Examine the accompanying error messages and respond accordingly.

CRS-05018: *string* Removed unused HAIP route: *string* / *string* / *string* / *string*

Cause: A potentially conflicting route in the same subnet as the HAIP addresses was found and removed to prevent routing conflicts.

Action: Validate that the route described was not actually in use.

CRS-05019: All OCR locations are on ASM disk groups [*string*], and none of these disk groups are mounted. Details are at "*string*" in "*string*".

Cause: OCR was configured on ASM disk groups, and all of the listed disk groups failed to mount. The possible causes are:

1. A disk was not accessible.
2. A disk in a normal or high redundancy disk group failed after the most recent dismount.
3. The ASM_DISKSTRING in the SPFILE or the GPnP profile was incorrect.

Action: Check the ASM alert logs for more information. To correct disk access or failure issues either: a) restore access to the disks in the disk group and mount the disk group (via ASMCMD or SQL). or b) Issue a force mount to the disk group to offline missing disks and mount a normal or high redundancy disk group. To correct the ASM_DISKSTRING in the SPFILE and propagate the change to the

GPnP profile, in sqlplus, issue the SQL command "ALTER SYSTEM SET ASM_DISKSTRING <discovery_string> SCOPE=BOTH"

CRS-05020: Not all endpoints are registered for listener *string*

Cause: Listener agent failed to register all endpoints to listener.

Action: Check listener log file for that listener.

CRS-05021: Check of storage failed: details at "*string*" in "*string*"

Cause: The check of ASM storage failed because the storage was not accessible.

Action: Check the Oracle Clusterware alert log and the referenced Oracle Clusterware trace file for additional information.

CRS-05022: Stop of resource "*string*" failed: current state is "*string*"

Cause: The named resource failed to stop.

Action: Ensure no one is using the resource and reissue the stop.

CRS-05023: Failed to unmount file system "*string*"; details at "*string*" in "*string*"

Cause: The named file system resource failed to unmount.

Action: Determine which operating system processes are accessing the mount point using an operating system command such as 'fuser' or 'lsof' for UNIX-based platforms or 'handle' for Windows. Close, shut down, or terminate applications and processes accessing the mount point, then retry.

CRS-05024: Unmounting file system "*string*"

Cause: A 'stop' of the file system resource mounted on the indicated path started.

Action: This is an informational message only.

CRS-05025: File system "*string*" unmounted

Cause: A 'stop' of the file system resource mounted on the indicated path completed normally.

Action: This is an informational message only.

CRS-05026: Failed to clean mount point "*string*"; details at "*string*" in "*string*"

Cause: The clean of the volume failed because one or more processes on the system were accessing the mount point.

Action: Determine which operating system processes are accessing the mount point using an operating system command such as 'fuser' or 'lsof' for UNIX-based platforms or 'handle' for Windows. Close, shut down, or terminate applications and processes accessing the mount point, then retry.

CRS-05027: Agent failed to initialize ARP devices required for starting the HAIP resource

Cause: The resource could not be started because the ARP devices failed to start on the same node.

Action: Manually check the ARP devices on the same node and then start the resource.

CRS-05501: Unable to connect to eONS server on port *number*

Cause: The eONS server may not be active or listening on a different port.

Action: Ensure that the eONS resource is ONLINE and listening on the above port.

CRS-05502: Invalid event template *string*

Cause: The event template specified is invalid.

Action: The event template format must be <PROPERTY | ELEMENT>(<attribute name>=<literal | %resource attribute name%>) ...

CRS-05503: Error creating the eONS subscriber

Cause: The eONS server may not be active.

Action: Ensure that the CRS eONS resource is in ONLINE state.

CRS-05504: Node down event reported for node '*string*'.

Cause: The specified node was not responsive.

Action: Restart the specified node.

CRS-05601: MDNS: *string*

Cause: None, generic bypass mdns message.

Action: None

CRS-05602: mDNS service stopping by request.

Cause: MDNSD stopping by OHASD request.

Action: None

CRS-05705: Failed to get required resources

Cause: There was an internal error while evaluating the required resources for the subject resource.

Action: Contact Oracle Support Services.

CRS-05706: No more members to consider

Cause: There was no host found on which to start the resource based on the placement policy.

Action: Check the placement policy and the required resources for the subject resource.

CRS-05707: Failed after successful dependency consideration

Cause: There was no host found on which to start the resource based on the placement policy.

Action: Check the placement policy and the required resources for the subject resource.

CRS-05709: Resource '*string*' is already running on member '*string*'

Cause: An attempt was made to start a resource on a host while it is already running on that host.

Action: This is an insignificant error. Check the operation being performed.

CRS-05801: Agent path is null or does not resemble a filesystem path

Cause: Unable to spawn the agent program because of incorrect agent path.

Action: Fix the agent path using 'crsctl modify type'.

CRS-05802: Unable to start the agent process

Cause: An attempt to start the agent process failed.

Action: Ensure that the agent path is correct and has the proper permissions, and retry the command.

CRS-05805: Missing the required action callback in agent

Cause: Unable to execute resource's command.

Action: Ensure that agent executable or action script contains the missing function.

CRS-05809: Failed to execute '*string*' value of '*string*' for '*string*'. Error information '*string*', Category : *number*, OS error : *number*

Cause: Unable to spawn the resource action script due to incorrect path value or incorrect permissions or other OS error.

Action: Correct the action script path and permissions or check and fix the reported OS error.

CRS-05810: Attempt to add a duplicate resource '*string*'. Details at *string* in *string*.

Cause: An identical resource was already being monitored.

Action: Rename the resource and retry the operation.

CRS-05811: Failed to read ORA_CRS_HOME from environment. Details at *string* in *string*.

Cause: The ORA_CRS_HOME environment variable was not set correctly.

Action: This variable is set during CRS installation. If necessary, reinstall CRS.

CRS-05812: Could not get local hostname. Details at *string* in *string*.

Cause: The hostname could not be read.

Action: Check that the hostname for the local machine is valid. If the problem persists, contact Oracle Support Services.

CRS-05813: Could not change directory to '*string*'. Details at *string* in *string*.

Cause: The specified path is inaccessible to the agent process.

Action: Check that the specified path exists.

CRS-05814: Agent '*string*' started with invalid arguments. Details at *string* in *string*.

Cause: An invalid parameter was supplied to the agent.

Action: Contact Oracle Support Services.

CRS-05815: Agent '*string*' could not find any base type entry points for type '*string*'. Details at *string* in *string*.

Cause: Action entry points were not defined for this agent.

Action: No action necessary if this is a script agent. If this is not a script agent, define action points in your agent code.

CRS-05816: Agent '*string*' could not start implicit monitoring for resource '*string*'. Details at *string* in *string*.

Cause: The resource was currently disabled and hence could not be monitored.

Action: Enable the resource.

CRS-05817: Caught exception from user code for command '*string*'. Details at *string* in *string*.

Cause: An exception was thrown from the user code when an action entry point was called.

Action: This is due to an error in the agent user code. Modify the agent's code to resolve this.

-
- CRS-05818: Aborted command '*string*' for resource '*string*'. Details at *string* in *string*.**
Cause: Execution of the specified command was aborted due to a timeout.
Action: Restart the resource manually. If the problem persists, contact Oracle Support Services.
- CRS-05819: Could not abort command '*string*' for resource '*string*'. Details at *string* in *string*.**
Cause: Attempt to abort the specified command failed.
Action: Define an abort action entry point for the agent.
- CRS-05820: Agent '*string*' failed to initialize server process address. Details at *string* in *string*.**
Cause: Agent could not connect to the server process.
Action: Contact Oracle Support Services.
- CRS-05821: Agent '*string*' is started with wrong user '*string*'. Details at *string* in *string*.**
Cause: An incorrect owner was specified for the agent.
Action: Make sure CRSD has enough privileges to spawn programs as the value specified as the 'owner' in the ACL attribute.
- CRS-05822: Agent '*string*' disconnected from server. Details at *string* in *string*.**
Cause: Agent could not connect to server process.
Action: Contact Oracle Support Services.
- CRS-05823: Could not initialize agent framework. Details at *string* in *string*.**
Cause: Initialization of the agent failed.
Action: Contact Oracle Support Services.
- CRS-05824: Could not initialize server connect string '*string*'. Details at *string* in *string*.**
Cause: Incorrect server connect string was specified in the environment.
Action: Contact Oracle Support Services.
- CRS-05825: Agent '*string*' is unresponsive and will be restarted. Details at *string* in *string*.**
Cause: The specified agent did not respond and will be restarted automatically.
Action: None
- CRS-05826: Agent '*string*' could not read environment variable '*string*'. Details at *string* in *string*.**
Cause: The agent could not read a required environment variable.
Action: Contact Oracle Support Services.
- CRS-05827: Could not find information for resource '*string*'. Details at *string* in *string*.**
Cause: The specified resource was not found in the internal list of resources.
Action: Check the agent parameters and restart the resource manually.
- CRS-05828: Could not start agent '*string*'. Details at *string* in *string*.**
Cause: Creation of the agent process failed.

-
- Action:** Contact Oracle Support Services.
- CRS-05829: Failed to get definition for resource '*string*'. Details at *string* in *string*.**
Cause: The definition of the resource could not be determined.
Action: Delete the resource and add it again using the crsctl command.
- CRS-05830: Invalid path '*string*' found for agent filename. Details at *string* in *string*.**
Cause: The path that was specified for the agent was incorrect.
Action: Check that the path exists and is readable.
- CRS-05831: Agent '*string*' has exceeded maximum failures and has been disabled. Details at *string* in *string*.**
Cause: The specified agent has failed too many times.
Action: Contact Oracle Support Services.
- CRS-05832: Agent '*string*' was unable to process commands. Details at *string* in *string*.**
Cause: Agent was unable to process commands.
Action: Contact Oracle Support Services.
- CRS-05833: Cleaning resource '*string*' failed as part of reboot-less node fencing**
Cause: A resource 'clean' action associated with reboot-less node eviction encountered an error. This is an expected occurrence in most cases.
Action: None
- CRS-05837: Unable to open environment file '*string*'.**
Cause: The environment file specified could not be opened.
Action: Verify that the filename, its location and its permissions are correct.
- CRS-05838: Syntax error in environment file '*string*'.**
Cause: The environment file specified did not have key value pairs in the correct format.
Action: Correct the key value format and retry. Consult the Clusterware Administration manual for the correct format.
- CRS-06001: User does not have permission to start CRS.D.**
Cause: Unable to start CRS.D due to insufficient permissions.
Action: Start CRS.D as a privileged user.
- CRS-06007: Could not communicate with Event Manager.**
Cause: Unable to communicate with Event Manager daemon.
Action: Run the 'crsctl check evmd' command to determine whether Event Manager daemon is properly configured and is running.
- CRS-06015: Oracle Clusterware has experienced an internal error. Details at *string* in *string*.**
Cause: This is an internal error.
Action: Contact Oracle Support Services.
- CRS-06021: Could not set system resource limits for Clusterware: "*ulimit -string string*".**
Cause: A ulimit command issued internally to set system resource limits failed.

Action: Ensure that the correct resource limit values are set in the user profile and limits.conf.

CRS-08000: unable to obtain local host name for reboot advisory log file scan

Cause: An attempt to retrieve the local host name failed. The scan for reboot advisory files will not use host name criteria and so may report occurrences for other nodes as well as this one.

Action: Report this error to Oracle Support Services.

CRS-08001: an error occurred accessing reboot advisory log file location: *string*

Cause: The scan for reboot advisory log files was unable to access the indicated file system location. The location was skipped, so any reboot advisory files that it contains will not be reported. This message is accompanied by CLSU- messages containing details of the access error.

Action: Respond based on the error described by the accompanying CLSU- messages. This may involve re-creating the directory or changing its permissions.

CRS-08002: an error occurred searching reboot advisory log file location: *string*

Cause: The scan for reboot advisory log files was unable to read the next file name from the indicated file system location. No further processing of reboot advisory files from that location occurs. This message is accompanied by CLSU- messages containing details of the access error.

Action: Respond based on the error described by the accompanying CLSU- messages.

CRS-08003: reboot advisory log file: *string* is unexpectedly empty

Cause: The scan for reboot advisory log files encountered a file that was empty. This might happen (rarely) if a component is initializing its use of reboot advisory at the same time the scan is running. Processing of other files in the location continues.

Action: Frequent occurrence of this message should be reported to Oracle Support Services.

CRS-08004: an error occurred reading reboot advisory log file: *string*

Cause: The scan for reboot advisory log files experienced a read error on a reboot advisory file. No further processing is done for that file, but the scan continues with other files. This message is accompanied by CLSU- messages containing details of the read error.

Action: Respond based on the accompanying CLSU- messages.

CRS-08005: an error occurred closing reboot advisory log file: *string*

Cause: The scan for reboot advisory log files experienced a close error on a reboot advisory file. The scan continues with other files. This message is accompanied by CLSU- messages containing details of the close error.

Action: Report this error to Oracle Support Services.

CRS-08006: an error occurred opening reboot advisory log file: *string*

Cause: The scan for reboot advisory log files experienced an error when it opened a reboot advisory file. The scan continues with other files. This message is accompanied by CLSU- messages containing details of the open error.

Action: If the error indicated in the accompanying CLSU- messages is one that can be corrected, do so. Otherwise, report this error to Oracle Support Services.

CRS-08007: an error occurred closing reboot advisory log file location: *string*

Cause: The scan for reboot advisory log files experienced an error when it closed the indicated file system location. Processing of other reboot advisory locations (if any) continues normally. This message is accompanied by CLSU- messages containing details of the close error.

Action: Report this error to Oracle Support Services.

CRS-08008: *string*

Cause: Operating system error data related to reboot advisory file processing was returned. The error data is packaged in a CLSU- message that follows "CRS-08008:". One or more of these messages appears after a message announcing the error condition.

Action: Look up the embedded CLSU- message for an explanation of the operating system error data. If there is no CLSU- message ID present, contact Oracle Support Services.

CRS-08009: reboot advisory log file: *string* contains invalid data (length *number*, error code *number*)

Cause: A reboot advisory log record read from the indicated file contained incorrect data.

Action: Report this error to Oracle Support Services.

CRS-08010: invalid network reboot advisory message detected (length *number*, error code *number*)

Cause: A reboot advisory record received over the network was improperly formed or contained incorrect data.

Action: Report this error to Oracle Support Services.

CRS-08011: reboot advisory message from host: *string*, component: *string*, with time stamp: *string*

Cause: Perform a reset or reboot of the affected host, and respond accordingly. Refer to the discussion of reboot advisories in the Oracle Clusterware administration documentation for additional guidance.

Action: Use the reboot advisory message(s) to determine why Oracle Clusterware

CRS-08012: reboot advisory message from a higher Oracle Clusterware version detected

Cause: A reboot advisory message from a higher version installation of Oracle Clusterware was detected. This is an expected occurrence with network reboot advisories when there are nodes with a higher Oracle Clusterware version than this node (such as during an upgrade). It is an unexpected condition with file reboot advisories.

Action: The reboot advisory message is displayed in a following CRS-08013 message in a "raw" text form. In the case of network reboot advisories, the explanatory message text should be readable and useful to determine the cause of the node reboot. If the reboot advisory message is from a file, report this message to Oracle Support Services.

CRS-08013: reboot advisory message text: *string*

Cause: An explanatory text message associated with a reboot advisory announced in a preceding CRS-08011 or CRS-08012 message was displayed. These text messages are always written in US English locale.

Action: Refer to the descriptions of messages CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

CRS-08014: reboot advisory binary data (*number bytesstring*) follows:

Cause: Binary data associated with a reboot advisory message was displayed. It is followed by one or more lines of CRS-08015 message containing the binary data formatted in hexadecimal. If an asterisk appears inside the parentheses, an invalid data length was detected.

Action: Refer to the description of message CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

CRS-08015: *number string*

Cause: Hexadecimal display of binary data included in a reboot advisory log message was displayed. The first number is an offset and is followed by up to 16 bytes of data.

Action: Refer to the description of message CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

CRS-08016: an error occurred determining the location for reboot advisory log files

Cause: The search for reboot advisory log files was unable to determine the file system location used for those files. Processing of reboot advisory files is skipped. This message is accompanied by CLSU- messages containing failure details. This is an internal error.

Action: Report this error to Oracle Support Services.

CRS-08017: location: *string* has *number* reboot advisory log files, *number* were announced and *number* errors occurred

Cause: This summary message is written during Oracle Clusterware startup if one or more reboot advisory log files was found and examined.

Action: This message is informational, but if the error count is nonzero the associated messages (earlier in the alert log) should be examined.

CRS-08018: warning: missing cluster identity data for reboot advisory message validation

Cause: During Oracle Clusterware start up, an attempt to obtain the identity of the cluster failed. Processing continues normally, but network reboot advisories from nodes in other clusters may be reported in this cluster's alert log.

Action: Report this error to Oracle Support Services.

CRS-08019: warning generated by the initialization of the reboot advisory in the CSS agent, *string*

Cause: During initialization of the reboot advisory, a warning was generated

Action: Report this warning to Oracle Support Services.

CRS-08020: error generated by the initialization of the reboot advisory in the CSS agent, *string*

Cause: During initialization of the reboot advisory, an error was generated.

Action: Report this error to Oracle Support Services.

CRS-09000: Failed to allocate memory.

Cause: During initialization, memory could not be allocated.

Action: Report this error to Oracle Support Services.

CRS-09001: Internal Error

Cause: An internal error occurred.

Action: Report this error to Oracle Support Services.

CRS-09004: Error reading from standard input

Cause: Could not read commands from the command line.

Action: Report this error to Oracle Support Services.

CRS-09005: Quoted string not ended

Cause: An unmatched " was found in the command entered.

Action: Put in the corresponding quote or remove the unmatched quote.

CRS-09008: Unknown verb *string*

Cause: Unknown or invalid verb passed to oclumon.

Action: Use 'oclumon -h' in command line or help command in interactive mode to see the supported verbs.

CRS-09009: Error *string*: Parsing error. Invalid arguments given.

Cause: Invalid or unknown arguments passed.

Action: Refer to product documentation or to command online help for an explanation of verbs and arguments.

CRS-09010: Error *string*: mandatory data not supplied

Cause: Mandatory data not supplied to the command.

Action: Refer to product documentation or to command online help for an explanation of verbs and arguments.

CRS-09011: Error *string*: Failed to initialize connection to the Cluster Logger Service

Cause: Error occurred while connecting to the Cluster Logger Service.

Action: Ensure that Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the given node.

CRS-09012: Error *string*: Error sending query to the Cluster Logger Service

Cause: Error occurred while sending query to the Cluster Logger Service.

Action: Ensure that the Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the given node.

CRS-09013: Error *string*: Invalid data received from the Cluster Logger Service

Cause: Invalid or unknown data received from the Cluster Logger Service.

Action: Ensure that the Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the given node.

CRS-09014: Error: Corrupt reply from the Cluster Logger Service

Cause: Invalid or unknown data received from the Cluster Logger Service.

Action: Make sure that the version of both master and client installation is same. Also, check the connectivity between master and client using the 'ping'.

CRS-09017: Error: Invalid or unknown reply received from the Cluster Logger Service

Cause: Error occurred in the data received.

Action: Make sure that the version of both master and client installation is same. Also, check the connectivity between master and client.

CRS-09018: Error string: No arguments supplied

Cause: No argument was supplied with the command.

Action: Some commands need arguments with them. Refer to the product documentation or to the online help display.

CRS-09019: Error string: No parameter string supported

Cause: A wrong parameter was passed with the command.

Action: Refer to the command help and pass the correct parameters.

CRS-09020: Error string: No master node name given

Cause: The master node name was not passed in the command.

Action: Pass the appropriate master node name with the command.

CRS-09021: Error string: Invalid or no start time given

Cause: A start time was not provided or the time was passed in the wrong format.

Action: Pass the correct start time. For correct format, refer to command help.

CRS-09022: Error string: Invalid or no end time given

Cause: A end time was not provided or the time was passed in the wrong format.

Action: Pass the correct end time. For correct format, refer to command help.

CRS-09023: Error string: Time not given or in wrong format or invalid

Cause: Time was not provided or was invalid.

Action: Pass the correct and valid time. For correct format, refer to command help.

CRS-09024: Error string: No node name given

Cause: Node name not provided.

Action: Provide a node name in the command. Refer to the product documentation or to the command online help for information.

CRS-09025: Error string: No disk ID name given

Cause: Disk ID was not given in the command with -diskid.

Action: Pass a valid disk ID with -diskid option.

CRS-09026: Error string: No parameter given

Cause: The parameter was not passed in the query.

Action: Pass appropriate parameter for query. Refer to the product documentation or to the command online help for information.

CRS-09027: Error string: Parameter string is not supported with this verb

Cause: Invalid or unknown parameter passed.

Action: Pass the correct parameter. Refer to the product documentation or to the command online help for information.

CRS-09028: Error string: No NIC ID given

Cause: NIC ID was not given in the command with -nicid.

Action: Pass a valid NIC ID with -nic option.

CRS-09029: Error *string*: No PID given

Cause: PID was not given in the command with -pid.

Action: Pass a valid PID with -pid option.

CRS-09030: Error *string*: No region given

Cause: Incorrect or no region given with -c option.

Action: Pass a valid region with -c option. Refer to the product documentation or to the command online help for information.

CRS-09031: Argument *string* not supported with this verb *string*. -h for help.

Cause: Unknown or invalid argument passed with the command.

Action: Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09032: Invalid hour given in the time argument

Cause: Invalid hour in the time string was passed.

Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09033: Invalid minutes given in the time argument

Cause: Invalid minutes in the time string was passed.

Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09034: Invalid seconds given in the time argument

Cause: Invalid seconds in the time string was passed.

Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09035: Arguments not in proper format, or invalid arguments

Cause: Invalid arguments given.

Action: Pass a valid verb and correct arguments for it. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09036: Invalid Cluster Health Monitor repository size given

Cause: Non-numeric value or value out of range given for Cluster Health Monitor repository size.

Action: Specify Cluster Health Monitor repository size in the valid range. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09037: *string* Error: Node name not given. -disk, -nic and -proc need node name

Cause: The required node name was not provided for -disk, -nic, or -proc.

Action: Provide a node name with -n option. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09038: Error: -s and -e need to be specified together

Cause: Either -s or -e is missing.

Action: Start and end time need to be given together for range queries, which cannot be unbounded. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09039: Error *string*: -i is not allowed with the range query

Cause: The -i option was specified on an oclumon range query.

Action: Use -i only in continuous mode. Refer to the command inline help or product documentation for more information.

CRS-09040: Error *string*: Band value not given or incorrect

Cause: The band value was not passed with -t option or was invalid.

Action: Provide a valid band value. Refer command help.

CRS-09041: Error *string*: The -repos argument was specified without an option.

Cause: -repos was not provided with the option, generating a parsing error.

Action: Provide a valid option to -repos. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09042: Error *string*: No size given with resize

Cause: A valid value was not provided with resize.

Action: Provide a valid numerical value with 'resize'. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09043: Error *string*: Non-numeric or invalid value for size: *string*

Cause: An invalid or non-numeric value was provided for size.

Action: Provide a valid numeric size. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09044: No key specified with -getkey

Cause: An option was not given with -getkey.

Action: Provide a valid key as an option with -getkey.

CRS-09045: No key given for -get

Cause: An option was not provided with -get.

Action: Provide a valid option with -get. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09046: Invalid key given

Cause: An unknown key was provided with -get.

Action: Provide a supported key with -get. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09047: Error *string*: Error Dumping Log (return code:*number*) for node *string*

Cause: An error occurred while dumping local log.

Action: Report this error to Oracle Support Services. Cluster Health Monitor repository directory may be unreachable, unreadable or incorrect.

CRS-09048: Error *string*: No data received from the Cluster Logger Service after *number* attempts

Cause: Data was not received from the Cluster Logger Service after the given number of attempts or data was not available.

Action: None

CRS-09049: Error *string*: Cannot get environment variable CRFHOME

Cause: An internal error occurred.

Action: Report this error to Oracle Support Services.

CRS-09050: Error *string*: Too many host names

Cause: Too many host names were provided.

Action: Provide valid number of host names. Refer to the product documentation or to the command online help for information.

CRS-09051: Error *string*: Invalid interval size given

Cause: Non-numeric or invalid interval provided.

Action: Provide a valid numerical value for interval size. Refer to the product documentation or to the command online help for information

CRS-09052: Error *string*: *string* control not supported

Cause: The given debug control was not supported.

Action: Provide a supported control. Refer to the product documentation or to the command online help for information.

CRS-09053: Key:value pair missing

Cause: A required key:value pair was missing.

Action: Provide a valid key:value pair. Refer to the product documentation or to the command online help for information

CRS-09054: Incomplete or invalid parameters *string*

Cause: Incomplete or invalid parameters supplied.

Action: Provide the complete and correct parameters. Refer to the product documentation or to the command online help for information

CRS-09055: module:level given in invalid format or invalid value

Cause: Invalid format or value specified for module:level.

Action: Provide correct module:level. Refer to the product documentation or to the command online help for information

CRS-09056: Error *string*: Invalid Cluster Health Monitor repository location given

Cause: Invalid Cluster Health Monitor repository location provided.

Action: Provide a directory with read and write permissions for Cluster Health Monitor repository location. Refer to the product documentation or to the command online help for information.

CRS-09057: Error *string*: No response received from the Cluster Logger Service

Cause: No data received from the Cluster Logger Service for the query.

Action: Ensure that the Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the given node.

CRS-09058: Error *string*: Changing log level failed due to authentication failure

Cause: Log level could not be changed due to authentication failure.

Action: Ensure that this command is run as root.

-
- CRS-09059: Error *string*: Changing log level failed due to connection failure**
Cause: A connection failure occurred while changing the log.
Action: Ensure that the daemons are running and are reachable from the client node by using the 'ping' command for the given node.
- CRS-09060: Error *string*: Unable to send message due to memory allocation failure**
Cause: Memory could not be allocated for debug message.
Action: Report this error to Oracle Support Services.
- CRS-09061: Error *string*: Changing log level failed due to response time-out**
Cause: A time out happened while waiting for response.
Action: Report this error to Oracle Support Services.
- CRS-09062: Error *string*: Error in changing log level**
Cause: An error occurred while changing log level.
Action: Report this error to Oracle Support Services.
- CRS-09065: Disk ID not found**
Cause: Given disk ID was not found or not present in the interesting list.
Action: Provide a disk ID which is available at the start of the query range.
- CRS-09066: Process ID not found**
Cause: Given process ID was not found.
Action: Provide a process ID which is available at the start of the query range.
- CRS-09067: NIC ID not found**
Cause: Given NIC ID was not found.
Action: Provide a correct NIC ID.
- CRS-09068: Error *string*: -allnodes and -n must not be used together**
Cause: Both -allnodes and -n were supplied on a dumpnodeview command.
Action: Specify either -allnodes or -n with specific nodes.
- CRS-09069: The new Cluster Health Monitor repository location is *string*.**
Cause: The Cluster Health Monitor repository location was successfully replaced.
Action: None
- CRS-09070: The new Cluster Health Monitor repository retention time is *number* seconds.**
Cause: The Cluster Health Monitor repository retention time was successfully modified.
Action: None
- CRS-09100: Error setting Cluster Health Monitor repository size**
Cause: An error occurred while setting Cluster Health Monitor repository size on the Cluster Logger Service.
Action: Report this error to Oracle Support Services.
- CRS-09101: Error updating Cluster Health Monitor repository size in configuration file.**

Cause: An error occurred while writing the Cluster Health Monitor repository size to configuration files.

Action: Report this error to Oracle Support Services.

CRS-09102: No data for the node at the given time

Cause: Data was not found for the given node.

Action: This is an informational message only.

CRS-09103: No data available

Cause: Data was not available for the query.

Action: Make sure the System Monitor Service is running on the given node.

CRS-09104: No data available for the given nodes

Cause: Data was not available for given nodes.

Action: Make sure the System Monitor Service is running on the given nodes.

CRS-09105: Internal Error on master

Cause: An internal error on master caused this error.

Action: Report this error to Oracle Support Services.

CRS-09106: Data requested was outside Cluster Health Monitor retention time limits.

Cause: A request for data outside Cluster Health Monitor repository limit caused this error.

Action: Data needs to be requested in the proper Cluster Health Monitor repository limits. Refer to the product documentation for more information.

CRS-09107: Start time greater than end time

Cause: A start time greater [or later] than end time caused an error.

Action: Make sure the start time is less than the end time for the given range query.

CRS-09108: Threshold out of acceptable range

Cause: A threshold was specified that is outside the allowed range.

Action: Make sure threshold is within the acceptable range. Refer documentation or online help for more information

CRS-09109: New Cluster Health Monitor repository location same as the old location on node *string*

Cause: The new location specified for Cluster Health Monitor repository is same as the old location.

Action: Provide a different location for Cluster Health Monitor repository. Refer documentation or online help for more information.

CRS-09110: Cluster Health Monitor repository location not changed as the location provided does not exist on node *string*.

Cause: The new location specified for Cluster Health Monitor repository does not exist.

Action: Provide a different location for Cluster Health Monitor repository. Refer documentation or online help for more information.

CRS-09111: Error updating Cluster Health Monitor repository location *string* in configuration file.

Cause: An error occurred while writing the Cluster Health Monitor repository location to configuration files.

Action: Report this error to Oracle Support Services.

CRS-09114: Cluster Health Monitor repository location change failed on one or more nodes. Aborting location change.

Cause: An error occurred while setting Cluster Health Monitor repository location on the Cluster Logger Service.

Action: Retry specifying a valid location.

CRS-09116: Cluster Health Monitor repository retention change failed on one or more nodes. Aborting retention change.

Cause: An error occurred while setting Cluster Health Monitor repository size on the Cluster Logger Service.

Action: Retry specifying a valid location.

CRS-09500: The system monitor service aborted on host *string*. Details at *string* in *string*.

Cause: The system monitor service aborted due to an internal error.

Action: If the problem persists, contact Oracle Support Services.

CRS-09501: The Cluster Logger Service aborted on host *string*. Details at *string* in *string*.

Cause: The Cluster Logger Service aborted due to an internal error.

Action: If the problem persists, contact Oracle Support Services.

CRS-09502: The Cluster Health Monitor repository location *string* is inaccessible. Details at *string* in *string*.

Cause: An error occurred while accessing the Cluster Health repository.

Action: Check that the Cluster Health Monitor repository location in question has the correct permissions. Determine whether this behavior is limited to one node or whether it occurs across all of the nodes in the cluster. Use the 'oclumon manage -repos reploc <location>' command to replace the Cluster Health Monitor repository location.

CRS-09503: The system monitor service on this host is unable to communicate with the Cluster Logger Service on host *string*, and will log data to the local repository.

Cause: Communication was lost with the Cluster Logger Service node.

Action: Verify all network connections between cluster nodes and repair any problematic connections. If no network problems are found,

1. Run diagcollection.pl.
2. Contact Oracle Support Services.

CRS-09504: The Cluster Logger Service on host *string* is dropping the Cluster Health Monitor node view. Details at *string* in *string*.

Cause: The Cluster Logger Service was unable to insert Cluster Health Monitor node view into Cluster Health Monitor repository .

Action: Contact Oracle Support Services.

CRS-09505: The Cluster Health Monitor repository is deleted due to corruption and the Cluster Logger Service is disabled on *string*. Details at *string* in *string*.

Cause: A critical error occurred while operating on Cluster Health Monitor repository.

Action: Contact Oracle Support Services.

CRS-09506: The system monitor service local repository is disabled on the host *string*. Details at *string* in *string*.

Cause: An internal error occurred while writing to the system monitor service local repository.

Action: Contact Oracle Support Services.

CRS-09507: The maximum Cluster Health Monitor repository retention time is reached. Deleting the oldest Cluster Health Monitor node views in age order.

Cause: The maximum time for which the oldest Cluster Health Monitor node view will be available on Cluster Health Monitor repository was reached.

Action: If necessary, use 'oclumon manage -repos resize <size>' command to change the retention time.

CRS-09508: The Cluster Health Monitor repository retention time cannot be changed due to lack of disk space on node *string*.

Cause: The Cluster Health Monitor retention time condition could not be fulfilled because the Cluster Health Monitor repository ran out of disk space at run time at the repository location.

Action: Use the 'oclumon manage -repos reploc <location>' command to replace the Cluster Health Monitor repository with a disk location that has at least 1GB of available space per cluster node.

CRS-09509: The new Cluster Logger Service master is *string*.

Cause: A new Cluster Logger Service master node was elected.

Action: None

CRS-09510: The new Cluster Logger Service replica is *string*.

Cause: A new Cluster Logger Service replica node was elected.

Action: None

CRS-09520: The storage of Grid Infrastructure Management Repository is *number*% full. The storage location is '*string*'.

Cause: The storage of Grid Infrastructure Management Repository was close to full. This storage can be a shared file system or an Oracle ASM disk group.

Action: Make sure there is sufficient free space in repository location.

CRS-09600: Failed to initialize *string* daemon

Cause: An error occurred during initialization.

Action: Report this error to Oracle Support Services.

CRS-09603: Failed to read configuration files

Cause: An error encountered while retrieving information from configuration files.

Action: Report this error to Oracle Support Services.

CRS-09607: Cannot spawn thread for *string*

-
- Cause:** An error encountered while spawning thread.
Action: Report this error to Oracle Support Services.
- CRS-09608: ASM disk method failed**
Cause: An error encountered with ASM disks configuration.
Action: Report this error to Oracle Support Services.
- CRS-09609: Encountered cssd failure. Reinitializing CSSD layer.**
Cause: An error was encountered with CSSD layer while retrieving information.
Action: Report this error to Oracle Support Services.
- CRS-09610: Encountered a fatal internal error. Daemon *string* exiting.**
Cause: A fatal error occurred with CSSD layer.
Action: Report this error to Oracle Support Services.
- CRS-09611: Mark *string* disks encountered errors**
Cause: An error occurred while accessing disk.
Action: Report this error to Oracle Support Services.
- CRS-09612: Mark *string* disks failed**
Cause: A fatal error occurred while accessing disk.
Action: Report this error to Oracle Support Services.
- CRS-09615: Disk method Failure : *string***
Cause: Internal error occurred.
Action: Report this error to Oracle Support Services.
- CRS-09616: Daemon started : *string***
Cause: A daemon process started successfully.
Action: None
- CRS-09617: Invalid message type encountered**
Cause: An invalid or corrupted message was received.
Action: Report this error to Oracle Support Services.
- CRS-09618: Daemon stopped : *string***
Cause: A daemon process stopped successfully.
Action: None
- CRS-10002: failed to allocate memory**
Cause: Memory allocation failed.
Action: Correct the system memory problem and retry.
- CRS-10004: unable to reach *string* address from local node**
Cause: An attempt to reach the IP address specified failed.
Action: Make sure that the specified IP address is a valid IP address and is assigned to an interface. Make sure that there are no firewalls between local node and node on which specified IP address is hosted.
- CRS-10005: unable to determine local hostname**
Cause: The hostname could not be read.

Action: Check that the hostname for the local machine is valid. Look at the accompanying messages. If the problem persists, contact Oracle Support Services.

CRS-10006: APPVIP type needs a VIP name. Specify a VIP name using -vip commandline option

Cause: VIP resource name was missing in the command line for APPVIP type.

Action: Specify a VIP name using -vip option.

CRS-10008: unable to generate client ID for VIP type *string*, cluster name *string*, VIP resource name *string*

Cause: An attempt to generate client ID for specified cluster name, VIP type and resource name failed.

Action: Make sure that cluster name and VIP resource name do not exceed 252 characters. Make sure that VIP type is a valid VIP type. Refer to 'crsctl get clientid -help' for more information.

CRS-10010: unable to discover DHCP server in the network listening on port *number* for client ID *string*

Cause: An attempt to discover DHCP server listening on port specified failed.

Action: Make sure that DHCP servers exist on the network and are listening on port specified. If they are listening on a different port specify then specify that port using the -port option. For more information refer to help for 'crsctl discover dhcp' command.

CRS-10011: unable to request DHCP lease for client ID *string* on port *number*

Cause: An attempt to request DHCP lease for the specified client ID on specified port failed.

Action: Make sure that there are DHCP servers with IP addresses available on the network. If other DHCP servers are available which are listening on a different port specify an alternative port using the -port option. For more information refer to help for 'crsctl request dhcp' command.

CRS-10013: unable to release DHCP lease for client ID *string*, on port *number*

Cause: An attempt to release DHCP lease for the specified client ID on specified port failed.

Action: Make sure that there are DHCP servers listening on port specified. If the DHCP server is listening on a different port specify an alternative port using -port option. For more information refer to help for 'crsctl release dhcp' command.

CRS-10014: HOSTVIP type needs a node name. Specify a node name using -n option

Cause: Node name was missing in the command line for HOSTVIP type.

Action: For HOSTVIP type node name needs to be specified via -n option.

CRS-10015: VIP type *string* is invalid

Cause: An invalid VIP type was specified for DHCP client ID generation.

Action: Make sure that VIP type is a valid VIP type. Refer to 'crsctl get clientid -help' for more information.

CRS-10016: error obtaining local host DNS resolver configuration

Cause: An attempt to obtain local host DNS configuration failed.

Action: Make sure that the user executing the command has sufficient permission to read local system configuration.

CRS-10017: the *number* name servers configured on this system exceeds the *number* maximum allowed

Cause: An attempt to obtain local host DNS configuration failed because more name servers were found than allowed on this operating system.

Action: Reduce the number of name servers configured to the maximum allowed.

CRS-10023: Domain name look up for name *string* failed. Operating system error: *string*

Cause: An attempt to query DNS servers for name specified failed.

Action: Look at accompanying messages for more information on the failure.

CRS-10029: could not verify if port *number* at address *string* is in use

Cause: An attempt to verify if port at address specified is in use failed.

Action: Make sure that the user has permission to create socket at port specified. For ports < 1024 user should be root. Also look at the accompanying messages for more information.

CRS-10030: could not verify if port *number* on local node is in use

Cause: An attempt to verify if port specified on local node is in use failed.

Action: Make sure that the user has permission to create socket at port specified. For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10033: could not stop the DNS listening daemon running on port *number* at address *string*

Cause: An attempt to stop the DNS listening daemon running on port and address specified failed.

Action: Make sure that the user has permission to send packets at the port specified. For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10034: could not stop the DNS listening daemon running on port *number* on local node

Cause: An attempt to stop the DNS listening daemon on local node running on port specified failed.

Action: Make sure that the user has permission to send packets at the port specified. For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10035: invalid name server '*string*' specified in command line

Cause: An invalid IPv4 address was specified on the command line for -dnserver option.

Action: Specify a valid IPv4 address on the command line.

CRS-10036: value for command line parameter '*string*' is not an integer

Cause: An invalid value was specified for the specified command line parameter.

Action: Re-submit the request with an integer value.

CRS-10038: invalid IP address '*string*' specified

Cause: An invalid IP address was supplied on command line.

Action: Supply an IP address that conforms to IETF RFC-791.

CRS-10039: invalid subnet '*string*' specified

Cause: An invalid subnet was supplied to crsctl.

Action: Supply a subnet address that conforms to IETF RFC-950.

CRS-10040: unable to get list of network interfaces

Cause: An attempt to get the list of network interfaces failed.

Action: Look at the accompanying messages for more information.

CRS-10041: subnet '*string*' is not configured on the node

Cause: The subnet specified did not match subnet of any network interface on this node.

Action: Specify a subnet that matches at least one network interface's subnet on this node.

CRS-10043: DNS daemon is not listening on port *number* at address *string*

Cause: An attempt to check if the DNS daemon is listening on port and address specified failed.

Action: Make sure that the address specified is reachable. Make sure that there is no firewall between the node on which this command was run and the address specified. Also look at the accompanying messages for more information.

CRS-10051: CVU found following errors with Clusterware setup : *string*

Cause: A resource-specific error was detected by the Clusterware Verification Utility (CVU). This message is accompanied by others providing details of the error condition.

Action: Respond based on the accompanying messages.

CRS-10100: Execution of crswrapexece.pl script with arguments '*string*' fails.

Cause: crswrapexece.pl script failed when executed with the specific arguments.

Action: Check system log and crswrapexece.log for more details. Contact Oracle Support Services.

CRS-10101: Internal Error

Cause: Execution of crswrapexece.pl script failed due to missing argument.

Action: Contact Oracle Support Services.

CRS-10102: Failure to open environment file *string*.

Cause: The crswrapexece.pl script failed to open the environment file, which might be caused by hostname change or user edits.

Action: Check for the existence and permission of the environment file.

CRS-10103: Found *string* syntax errors in environment file *string*.

Cause: crswrapexece.pl found syntax errors in the provided environment file.

Action: Check and fix syntax error in the indicated environment file. If the problem persists, contact Oracle Support Services.

CRS-10131: Failure to create named pipe *string*. Details [*string*].

Cause: The specified named pipe could not be created. Oracle High Availability Service would not be able to restart if crashes.

Action: Check for the existence and permission of the parent directory, where the named pipe was created.

CRS-10132: Oracle High Availability Service was restarted at least *string* times within the last *string* seconds. Stop auto-restarting Oracle High Availability Service.

Cause: Oracle High Availability Service was restarted too rapidly within a short period of time.

Action: Check the Oracle High Availability Service log file to determine the cause. If the problem persists, contact Oracle Support Services.

CRS-10250: Database name is required to access database wallets. Use -name option to supply a database name.

Cause: The option -name was missing on the command line.

Action: For APPQOSDB wallet types -name is a mandatory parameter. Retry the command with -name option.

EVM-00001 to EVM-00901

EVM-00001: Cannot write raw events to a terminal

Cause: Attempted to redirect binary events to a terminal.

Action: Use `evmshow` to format events for display.

EVM-00002: Use `evmshow` to format events for display

Cause: Attempted to redirect binary events to a terminal.

Action: Use `evmshow` instead.

EVM-00003: Failed to open file "*string*": *string*

Cause: Filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00004: Failed to open channel config file "*string*"

Cause: Configuration file name, the path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00006: Failed to create temporary file

Cause: The file being used as a temporary file for `evmsort` had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00007: Failed to write to temporary file

Cause: The file being used as a temporary file for `evmsort` had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00008: Failed to read from temporary file

Cause: The file being used as a temporary file for `evmsort` had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00009: Failed to create EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00010: Failed to read from EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00011: Failed to write to EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00012: Failed to create EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00013: Failed to read from EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00014: Failed to write to EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00015: Failed to create EVM service connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00016: Failed to read from EVM service connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00017: Failed to start EVM service "*string*"

Cause: EVM daemon failed to start.

Action: Check log for the EVM daemon.

EVM-00018: Failed to write to output stream

Cause: Failed to write to standard output.

Action: Contact Oracle Customer Support.

EVM-00019: Failed to read event from input stream

Cause: Bad input file for evmshow/evmsort EOF missing.

Action: Check the input file.

EVM-00020: Failed to create event subscription

Cause: Bad network connection between subscriber and EVM daemon.

Action: Check the network connection and filter string.

EVM-00021: Failed to create filter

Cause: Used a null filter string or memory allocation failed.

Action: Use a non null filter string.

EVM-00022: Invalid filter string

Cause: Used a null or invalid filter string.

Action: Contact Oracle Customer Support.

EVM-00023: Filter test operation failed

Cause: Used a null or invalid filter string.

Action: Use a non null filter string. Otherwise contact Oracle Customer Support.

EVM-00024: Lost connection to EVM daemon

Cause: Evmlogger lost connection to evmdaemon.

Action: Check status of evmlogger, evmd daemons and logs.

EVM-00025: Authorization database error

Cause: Not authorized to post/listen for certain events.

Action: Check evm.auth file to ensure the current user is authorized to post/listen for specific events.

EVM-00026: Failed to post event "*string*"

Cause: Evmpost failed to post an event.

Action: Check the status and log for EVM daemon.

EVM-00027: Memory allocation failure

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00029: Event contains invalid values

Cause: Invalid syntax for an event was used.

Action: Use a valid syntax for an event.

EVM-00030: Event name is missing

Cause: Name of the event was missing.

Action: Use a valid syntax for an event.

EVM-00031: Event name has too few components

Cause: Invalid syntax for an event was used.

Action: Use a valid syntax for an event.

EVM-00032: Failed to write event

Cause: Failed to write event to output file.

Action: Check the permissions of the file. Otherwise contact Oracle Customer Support.

EVM-00033: Error in input file "*string*", line *number*

Cause: Failed to parse input file.

Action: Check input file and the line for possible errors. Otherwise contact Oracle Customer Support.

EVM-00034: Error: *string*

Cause: Error Occured.

Action: Look at the error message for details.

EVM-00035: EVM service "*string*" terminated with exit code *number*

Cause: EVM daemon died.

Action: Check the EVM daemon log.

EVM-00036: Host "*string*" is unknown

Cause: Invalid hostname discovered while trying to create a connection to the EVM daemon.

Action: Check the hostname, on which EVM daemon is running. Otherwise contact Oracle Customer Support.

EVM-00037: Failed to connect to EVM daemon on "*string*"

Cause: EVM daemon is dead or is not responding.

Action: Check the status of EVM daemon and logs.

EVM-00038: Failed to create an EVM event

Cause: Failed to create an EVM event.

Action: Check the EVM daemon log.

EVM-00039: Invalid port number in host name "*string*"

Cause: Used an invalid port number.

Action: Use a valid or a different port number.

EVM-00040: Error occurred while reading from "*string*"

Cause: Error occurred when evmshow was reading from an input file.

Action: Check the input file.

EVM-00042: Use "*string* -A" to format events, or pipe output to evmshow

Cause: Invalid use of evmshow command.

Action: Use evmshow command as instructed.

EVM-00043: Attempting to reconnect to the EVM daemon...

Cause: Evmwatch trying to reconnect to the evm daemon.

Action: Not an error message.

EVM-00044: Attempting to reconnect to the EVM daemon on "*string*"...

Cause: Evmwatch trying to reconnect to the evm daemon on this host.

Action: Not an error message.

EVM-00045: EVM connection re-established

Cause: Evmwatch was able to reconnect to the evm daemon.

Action: Not an error message.

EVM-00104: End of file reached unexpectedly

Cause: End of event template file reached unexpectedly.

Action: Check the event template file in evm/admin.

EVM-00105: Missing end-of-group character

Cause: end-of-group character missing in event template file.

Action: Check the event template file in evm/admin.

EVM-00106: Missing end-of-string character

Cause: end-of-string character missing in event template file.

Action: Check the event template file in evm/admin.

EVM-00107: Value "*string*" is not valid

-
- Cause:** Invalid value found in the event template file.
Action: Check the event template file in evm/admin.
- EVM-00108: Keyword "*string*" is not valid**
Cause: Invalid keyword found in the event template file.
Action: Check the event template file in evm/admin.
- EVM-00201: Failed to allocate space for application object**
Cause: The system is running low on memory.
Action: Check the availability of memory in the system.
- EVM-00202: Failed to allocate space for local lock pathname**
Cause: The system is running low on memory.
Action: Check the availability of memory in the system.
- EVM-00301: Failed to open logger config file "*string*"**
Cause: Configuration file had one of the following problems; filename, path or permissions were not valid.
Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.
- EVM-00302: Configuration error - using default configuration**
Cause: Configuration file had invalid configuration details
Action: Check the configuration file.
- EVM-00303: Keyword "*string*" is invalid in this position**
Cause: Valid Keyword was used in an invalid position in configuration file.
Action: Use the correct syntax.
- EVM-00304: Configuration error in file *string*, line *number***
Cause: Configuration error in configuration file.
Action: Check the configuration file.
- EVM-00305: Memory allocation failure for "*string*"**
Cause: The system is running low on memory.
Action: Check the availability of memory in the system.
- EVM-00306: Failed to create filter for "*string*"**
Cause: Failed to create a filter for events for evmlogger.
Action: Check the availability of memory.
- EVM-00307: Filter string invalid for "*string*"**
Cause: Used a null filter string or memory allocation failed.
Action: Use a non null filter string.
- EVM-00308: Failed to open eventlog "*string*": *string***
Cause: Eventlog file had one of the following problems; filename, path or permissions were not valid.
Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00309: Failed to write to eventlog "*string*"

Cause: Eventlog had one of the following problems; size or permissions were not valid.

Action: Check the permissions and the size of the eventlog file. Otherwise contact Oracle Customer Support.

EVM-00310: Invalid suppression filter for eventlog "*string*"

Cause: Invalid filter was used.

Action: Use a non null filter. Otherwise contact Oracle Customer Support.

EVM-00311: Invalid entry in eventlog "*string*" (*number events OK*)

Cause: Evmlogger found an invalid entry in eventlog.

Action: Check the eventlog file.

EVM-00312: Eventlog "*string*" disabled

Cause: Events could not be written to the eventlog file.

Action: Check the permissions,max size of the logfile.

EVM-00313: Eventlog "*string*" re-enabled

Cause: Events logging is reenabled.

Action: Not an error message.

EVM-00314: Forwarder "*string*" disabled

Cause: Forwarding is disabled by the evmlogger.

Action: Not an error message.

EVM-00315: Forwarder "*string*" re-enabled

Cause: Forwarding is disabled by the evmlogger.

Action: Not an error message.

EVM-00316: Suppression disabled for "*string*"

Cause: Error message filtering suppression disabled for this string.

Action: Not an error message.

EVM-00317: Suppression re-enabled for "*string*"

Cause: Error message filtering suppression reenabled for this string.

Action: Not an error message.

EVM-00318: Failed to open config info file "*string*"

Cause: Configuration file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00319: Keyword "*string*" is not allowed in a secondary config file

Cause: Invalid Keyword was used.

Action: Use a valid Keyword.

EVM-00323: Config file "*string*" has insecure write permission

Cause: The configuration file had write permissions for the group 'other'.

Action: Change the write permissions for the configuration file

EVM-00324: Config file "*string*" has incorrect ownership

Cause: Configuration file should be owned by root or bin.

Action: Change the owner of configuration file to root or bin.

EVM-00325: Config file "*string*" is not a regular file

Cause: Configuration file is not a regular file.

Action: Check the configuration file.

EVM-00401: Failed to open binary event library file

Cause: Binary event file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00601: Data read from the input stream is not a valid EVM event

Cause: evmshow tried to read an invalid EVM event.

Action: Check the logs for the evm daemon.

EVM-00701: Check that the event is registered and you are authorized to post it

Cause: Not authorized to post for certain events.

Action: Check evm.auth file to ensure the current user is authorized to post the specific event.

EVM-00702: Priority must be an integer in the range 0-*number*

Cause: Used an integer out of the range for priority.

Action: Use a valid integer.

EVM-00801: Missed *number* subscribed-to event(s)

Cause: Missed some events during the connection setup phase.

Action: Not an error message.

EVM-00802: Failed to reconnect within *number* seconds - terminating

Cause: Failed to establish a connection with EVM daemon.

Action: Check the logs for EVM daemon.

EVM-00901: Invalid sort specification "*string*"

Cause: Invalid sort specification used for evmsort.

Action: Use a valid sort specification. Look at documentation for evmsort using evmsort -h.

GIPC-00000 to GIPC-00020

GIPC-00000: general success.

Cause: The operation succeeded.

Action: No action is required.

GIPC-00001: general failure.

Cause: A GIPC operation failed.

Action: Examine the trace and log files for the specific cause.

GIPC-00002: GIPC needs to be initialized.

Cause: The application failed to initialize GIPC prior to performing an operation.

Action: Initialize GIPC.

GIPC-00014: buffer not large enough to hold data.

Cause: The buffer provided by the application was not big enough to hold the data received.

Action: Use a larger buffer.

GIPC-00016: timeout waiting on request.

Cause: A wait call returned because the time expired.

Action: This error happens normally in most cases. If this error was not expected, examine the trace and log files for the reason.

GIPC-00017: waiting call has been posted.

Cause: A wait was interrupted by another thread posting it.

Action: This error happens normally in most cases. If this error was not expected, examine the trace and log files for the reason.

GIPC-00020: bind address already in use.

Cause: The application attempt to bind an endpoint to an address which has already been bound.

Action: Specify another address.

RDE-00000 to RDE-06020

RDE-00000: no error

Cause: Operation was successful.

Action: No action needed.

RDE-00001: unspecified error

Cause: An unknown error occurred. This is an internal error.

Action: Contact Oracle Customer Support and provide details about how and when the error occurred.

RDE-00002: provider busy

Cause: The provider is processing a request.

Action: This is not an error.

RDE-00003: no value found for service tag *string*.

Cause: A value was not found for the given service tag.

Action: This is normally not an error.

RDE-00004: operation timeout

Cause: A FIND or REGISTER operation timed out.

Action: For a FIND operation, this is only an error if the find was expected to successfully locate a service.

RDE-00005: invalid universe: "*string*"

Cause: An unknown universe was specified for the address.

Action: Specify a valid universe.

RDE-00006: invalid protocol: "*string*"

Cause: An invalid protocol was specified in an address.

Action: Specify a valid protocol.

RDE-00009: data too large for buffer. Buffer length: *number*. Required: *number*.

Cause: This error is for internal use only and should not normally be seen by users.

Action: Contact Oracle Customer Support.

RDE-00010: not found

Cause: A value was not found in a list.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-00011: invalid type: *number*

Cause: The type given for a piece of data was invalid.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-00012: no list name specified.

Cause: A name was not given for a list.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-00013: name busy.

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-00014: operation was interrupted.

Cause: An operation was interrupted.

Action: None. This normally is not an error.

RDE-00015: load of provider library failed.

Cause: The load of a library which implements the interface for a provider failed.

Action: Enable tracing to determine the exact error that occurred.

RDE-00016: no provider libraries found.

Cause: It was not possible to locate any provider libraries.

Action: Make sure that the provider libraries have been installed.

RDE-00017: provider error.

Cause: A provider generated an error.

Action: If errors follow, examine them to determine the exact error. Otherwise, enable tracing to determine the exact error.

RDE-00018: regular expression compilation failed. Pattern "*string*" Error: *number*.

Cause: The creation of a pattern for use in a comparison failed.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-00019: pattern match failed. String: "*string*" Pattern: "*string*" Error: *number*.

Cause: A comparison against a regular expression failed.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-00020: no host name or IP address.

Cause: An address must contain either the name of the server or its IP address.

Action: Specify a host name or an IP address in the address.

RDE-00021: no providers found for universe "*string*".

Cause: A provider was not found for the specified universe.

Action: Either specify a different universe or obtain a provider library for that universe. Examine the errors that follow (if any) for more information.

RDE-00022: property not found.

Cause: A provider property was not found.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-00023: provider not found. Universe "string".

Cause: A provider was not found for the specified universe.

Action: Either specify a different universe or obtain a provider library for that universe.

RDE-00024: address invalid

Cause: The address is not in the correct format.

Action: Specify an address in the correct format. The syntax is described in rd.h.

RDE-00025: service type not specified.

Cause: The service type is not specified in the address.

Action: Specify an address with the service type.

RDE-00026: expected delimiter not found. Expected: "string" Found: "string"

Cause: The delimiter expected in the address was not found.

Action: Correct the address so that the delimiter is present.

RDE-00027: port number not found.

Cause: When a colon (":") follows the host name, it must be followed by a port number.

Action: Specify a port number.

RDE-00028: initialization failed.

Cause: Initialization of RD failed.

Action: Examine the errors that follow this one to determine the problem that is causing the error.

RDE-00029: no server found.

Cause: No server for the specified provider could be found to perform the desired operation.

Action: Start a server for the desired provider or use a different provider.

RDE-00030: memory allocation failure

Cause: An operation failed because it was not possible to allocate enough process memory.

Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Customer Support should be contacted.

RDE-00031: invalid domain: number.

Cause: The application specified an invalid number for the domain.

Action: Specify a correct domain. See rd.h for the allowed values.

RDE-00032: length of service type "*string*" (*number*) is greater than than the maximum allowed: *number*

Cause: The user specified a service type which is longer than that permitted by the provider.

Action: Use a shorter service type.

RDE-00033: no universe specified.

Cause: The user did not specify a universe in the address.

Action: Specify a universe.

RDE-00034: address not registered: "*string*"

Cause: The application attempted to use an address which does not exist.

Action: Specify a registered address.

RDE-00037: invalid service instance tag: *number*

Cause: The value for a service instance tag was incorrect.

Action: Specify a valid tag. They are listed in rd.h.

RDE-00038: invalid protocol type: "*string*" Valid protocols: *string*

Cause: The user specified a protocol which is not supported by the provider.

Action: Specify a valid protocol. The protocol must be at least one character which is not a period (".").

RDE-00039: invalid host name: "*string*"

Cause: The name of the host specified was not in the correct format.

Action: Use the correct host name format. The host name must be one of the following:

1. The name of the machine;
2. A valid IPv4 address (N.N.N.N);
3. A valid IPv6 address (N[:N]*).

RDE-00040: invalid search domain: "*string*"

Cause: The name of the domain searched by the service was not in the correct format.

Action: Use the correct domain name format. A domain is a series of one or more alphanumeric characters.

RDE-00041: no protocol or domain specified.

Cause: The service name was followed by a period separator, but no protocol or domain was found after it.

Action: Specify a valid protocol and/or domain.

RDE-00042: invalid port number: "*string*"

Cause: The port specified in the service address was not valid. A port number may only be a positive decimal number.

Action: Specify a valid port number.

RDE-00043: no search domain specified.

Cause: No search domain followed the period separator.

Action: Specify a valid search domain.

RDE-00044: no protocol specified.

Cause: No protocol was specified for the service.

Action: Specify a valid protocol.

RDE-00045: port number required to register with a generic address.

Cause: Because of the requirements of some providers, the port number must be specified when registering using a generic address.

Action: Specify a port number.

RDE-00046: invalid attribute

Cause: An attribute was specified using an incorrect format.

Action: An attribute should be specified using the following format:
"name=value[, name1=value1 ...]"

RDE-00047: no name specified for attribute.

Cause: A value was given for an attribute but no name was specified.

Action: Specify a name for the attribute.

RDE-00048: no attribute specified.

Cause: An attribute was not found in the address where it was expected.

Action: Specify a valid attribute. An attribute is composed of a name followed by an equals sign ("=") and then by an optional value. The name and value may both contain spaces.

RDE-00049: expected separator not found. Expected: "*string*" Found: "*string*"

Cause: The separator expected to be present between the mandatory and optional sections of the address was not found.

Action: Specify the separator.

RDE-00050: provider initialization for universe "*string*" failed.

Cause: The operation failed because providers could not be initialized for the specified universe.

Action: The message(s) that follow describe the errors encountered by the providers.

RDE-00051: provider "*string*" error.

Cause: The specified provider failed to perform an operation.

Action: The message(s) that follow describe the errors encountered by the provider.

RDE-00052: invalid numeric value specified: "*string*".

Cause: The value specified as a number was not valid.

Action: Specify a valid number.

RDE-00053: invalid or null service instance.

Cause: The service instance used for an operation is either invalid or null.

Action: Specify a valid service instance.

RDE-00054: invalid operation: *number*.

Cause: The operation specified was not valid.

Action: Specify a valid operation.

RDE-00055: no providers available.

Cause: No providers were available for an operation. This may be caused by the failure of a process or service needed by the provider (e.g. the mDNS service).

Action: Examine the trace and log files for details. Ensure that the process or service required by the process is running.

RDE-00056: registration of service instance "*string*" failed.

Cause: The registration of the specified service instance failed.

Action: Examine the errors that follow for more information about the error.

RDE-00057: unregistration of service instance "*string*" failed.

Cause: The deletion of the registration of the specified service instance failed.

Action: Examine the errors that follow for more information about the error.

RDE-00058: confirmation of service instance "*string*" failed.

Cause: The confirmation of the specified service instance failed.

Action: Examine the errors that follow for more information about the error.

RDE-00059: location of service types "*string*" failed.

Cause: It was not possible to retrieve types of services supported by Resource Discovery.

Action: Examine the errors that follow for more information about the error.

RDE-00060: service instance "*string*" was not found.

Cause: The location of the specified service.

Action: Examine the errors that follow for more information about the error.

RDE-00061: retrieval of details about service instance "*string*" failed.

Cause: It was not possible to get details about the specified service instance.

Action: Examine the errors that follow for more information about the error.

RDE-00062: termination failed.

Cause: The call to terminate the use of Resource Discovery failed.

Action: Examine the errors that follow for more information about the error.

RDE-00063: operation failed.

Cause: A FIND or REGISTER operation failed.

Action: Examine the errors that follow for more information about the error.

RDE-00064: retrieval of a provider for universe "*string*" failed.

Cause: It was not possible to retrieve a provider descriptor for the specified universe.

Action: Examine the errors that follow for more information about the error.

RDE-00065: creation of service instance failed.

Cause: An error occurred while trying to assemble a service instance using components.

Action: Examine the errors that follow for more information about the error.

RDE-00066: parsing of service instance "*string*" failed.

Cause: An error occurred while trying to parse the specified address.

Action: Examine the errors that follow for more information about the error.

RDE-00067: location of domain failed.

Cause: An error occurred while trying to locate domains of the specified type.

Action: Examine the errors that follow for more information about the error.

RDE-00068: length of universe component "*string*" (*number*) is longer than the maximum: *number*.

Cause: The string specified for the universe-specific portion of the service instance is longer than the maximum allowed by the provider.

Action: Specify a universe component which is shorter than the maximum. If this error occurs when no universe-specific portion was specified, the provider may have used the service type for the universe-specific component. In that case, make sure that the length of the service type does not exceed the maximum.

RDE-01999: internal error

Cause: RD failed due to some unforeseen reason.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-02000: invalid service type: "*string*"

Cause: The user specified a service type which does not conform to the standard specified by RFC's 1034 and RFC 1123. The service type must be one or more characters and must start and end with a letter or digit. The interior characters may be letters, digits, or hyphens.

Action: Specify a service type which conforms to the RFC.

RDE-02001: failed to connect to the mDNS responder.

Cause: The provider was unable to make a connection with the mDNS responder.

Action: Check to ensure that the responder is running. If it is, this is an internal error and Oracle Customer Support should be contacted.

RDE-04000: client waiting

Cause: The client uses this error to signal to the server that it is waiting for query results.

Action: This error is used for signalling between the client and the DNS server. It should not be visible to the user. If it occurs, please contact Oracle Customer Support

RDE-04001: no error

Cause: Operation was successful.

Action: No action needed.

RDE-04002: unknown error has occurred

Cause: an unknown error has occurred.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04003: no such name

Cause: a record could not be found with the given name.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04004: memory allocation failed

Cause: An operation failed because it was not possible to allocate enough process memory.

Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Customer Support should be contacted.

RDE-04005: invalid parameter

Cause: a record contained an illegal or non-existing value.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04006: invalid reference

Cause: An unknown DNS record was found.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04007: invalid state

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04008: invalid flags

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04009: unsupported operation

Cause: The provider interface attempted to perform an operation which is not supported by the provider.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04010: not initialized

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04011: no cache allocated

Cause: a DNS query failed because no cache was allocated.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04012: service already registered

Cause: The user attempted to register a service that was already registered.

Action: A service should only be registered once.

RDE-04013: service name conflict

Cause: The user attempted to register a service whose name already exists.

Action: A service should only be registered once.

RDE-04014: invalid record entry

Cause: The provider interface attempted to perform an operation whose record contained invalid or non-existent data.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04015: client software incompatible with server

Cause: The version of the client software used by the provider interface is not compatible with the version of the server software.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04016: invalid interface

Cause: The provider interface attempted to use an unknown interface.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04017: cache size must be increased

Cause: The size of the cache maintained by the provider interface must be increased.

Action: This error is used as a status indicator. It should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04018: configuration changed

Cause: The server configuration changed during an operation.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-04019: client should free resources

Cause: This error is used as an internal status indicator and should not be visible outside of the provider.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06000: no more data

Cause: This error is used internally to signal that there is no more data to be passed by the SLP provider.

Action: This error is normal - no action is required.

RDE-06001: no error

Cause: Operation was successful.

Action: This error is normal - no action is required.

RDE-06002: language not supported

Cause: No service could be found that supports the language required.

Action: A service will have to be added or modified which supports the requested language.

RDE-06003: parse error

Cause: The SLP message rejected by a remote SLP agent.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06004: invalid registration

Cause: The SLP provider attempted to register a URL which is malformed.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06005: scope not supported

Cause: This is an internal error.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06006: authenticator not provided

Cause: The SLP provider failed to authenticate itself.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06007: authentication failed

Cause: The SLP provider failed to authenticate itself.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06008: invalid update

Cause: An update for a non-existing registration was issued, or the update includes a service type or scope different than that in the initial registration, etc.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06009: refresh rejected

Cause: Attempts were made to refresh a registration more frequently than the minimum refresh interval.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06010: feature unimplemented

Cause: An unimplemented feature was used.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06011: buffer overflow

Cause: An outgoing request overflowed the maximum network MTU size.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06012: network timed out

Cause: An reply to an SLP request did not arrive in the configured timeout interval.

Action: Check the network connection and retry the request.

RDE-06013: network initialization failure

Cause: The network failed to initialize properly.

Action: Check the network connection and retry the request.

RDE-06014: memory allocation failed

Cause: The SLP provider was unable to allocate enough process memory.

Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Customer Support should be contacted.

RDE-06015: invalid parameter

Cause: The provider attempted to pass an invalid parameter.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06016: network error

Cause: The network failed to initialize properly.

Action: Check the network connection and retry the request.

RDE-06017: internal system error

Cause: The SLP subsystem failed for unknown reasons.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06018: handle in use

Cause: The SLP provider attempted to recursively use a handle.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06019: generic error

Cause: The provider failed for unknown reasons.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

RDE-06020: unicast query must be sent.

Cause: The provider must send a unicast query.

Action: This error should not be visible to the user. If it occurs, please contact Oracle Customer Support.

PRKU-01001 to PRKU-01057

PRKU-01001: Unexpected argument {0}.

Cause: The command line argument reported in above error message is not expected the by tool

Action: Refer to the tool's inline help display or to the product documentation of the command line tool for valid options and arguments, and then rerun the tool.

PRKU-01002: The option {0} is required.

Cause: The command line option reported by the above error message is a mandatory option required by the tool

Action: Review the tool's inline help display or to the product documentation of the command line tool for type of value required for this option. And then rerun the command specifying the above option in command line options.

PRKU-01003: The parameter {0} requires an argument.

Cause: The command line parameter reported in error message needs a value.

Action: Review the tool's inline help display or to the product documentation of the command line tool for type of value required for this option. And then rerun the command specifying the above option in command line options.

PRKU-01015: Oracle Clusterware is not properly stopped and de-configured on node "{0}". The files "{1}" exist as configured.

Cause: The files init.ohasd, or ocr.loc and/or directory scls_scr still exists on this node which makes the tool believe that the clusterware stack is not shutdown properly

Action: Run the Oracle clusterware deconfiguration utility to completely cleanup the configuration. The Clusterware deconfiguration tool is available in Oracle clusterware home and also on Oracle OTN (Technology Network) page.

PRKU-01016: Failed to stop Oracle Clusterware on nodes "{0}". Run the command "{1}" after fixing the problem.

Cause: The clusterware deconfiguration tool has failed to stop Oracle clusterware stack. The reason for failure can be found browsing through clusterware alert logs found in log/<hostname>/alert<hostname>.log directory under Oracle clusterware.

Action: You should browse through daemon logs in log/<hostname> under Oracle clusterware home and manually correct the problem to stop clusterware stack. And then rerun the command specified in above error message.

PRKU-01018: Run the following command as the root user on node "{0}".

Cause: The clusterware deconfiguration that is run as non-root user cannot automatically run the command specified in above message.

Action: You should login to another session as a privileged user and run the command specified in above message

PRKU-01019: Run the following command as administrator.

Cause: The clusterware deconfiguration which is run as non-root user cannot automatically run the command specified in above message.

Action: You should login to another session as a privileged user and run the command specified in above message

PRKU-01021: As the privileged user, Execute "{0}" on every node in this cluster except for this node, and then execute "{1}" on this node to remove the configuration of the Oracle Clusterware and to completely remove the Oracle software

Cause: This is the message reported by Oracle clusterware deconfiguration tool when it is run in non-interactive (or silent) mode.

Action: Execute the identified scripts as described. Deconfiguring Oracle Clusterware in silent mode requires one set of operations on all nodes but the last followed by a special set of operations on the last node.

PRKU-01023: Oracle Clusterware is not stopped and de-configured on node "{0}" due to error "{1}"

Cause: The tool failed to deconfigure Oracle clusterware stack on the node because of errors reported in the above message

Action: You should review the error messages reported in above message to perform corrective actions and then rerun the tool

PRKU-01024: The stopping and de-configuring of Oracle Clusterware failed on some nodes. Fix the problem and rerun this tool to completely remove the Oracle Clusterware configuration and the software

Cause: This is a message reported by the tool to inform you that the Oracle clusterware deconfiguration did not happen on some of the nodes in the cluster.

Action: You should review the error messages reported by the tool for failing to deconfigure clusterware stack on each node, perform corrective actions after reviewing the error messages, and rerun the tool to completely deconfigure Oracle clusterware stack

PRKU-01025: You must delete or downgrade Clusterware-managed Oracle databases and de-install Clusterware-managed Oracle homes before attempting to remove the Oracle Clusterware home.

Cause: An attempt was made to deconfigure the Oracle Clusterware when one or more Clusterware-managed Oracle databases still exist.

Action: Run the Oracle Clusterware deconfiguration tool from Clusterware-managed Oracle homes to delete, deconfigure or downgrade Oracle database and then run the same tool from Oracle Clusterware home to deconfigure Clusterware.

PRKU-01029: The node "{0}" is currently not responding.

Cause: The host reported in the above message may have rebooted or hung

Action: Login to the host if possible and review system logs, correct the problem

PRKU-01035: The stopping and de-configuring of Oracle Restart failed. Fix the problem and rerun this tool to completely remove the Oracle Restart configuration and the software

Cause: The Oracle Restart stack couldn't be stopped cleanly before de-configuring.

Action: Review the error messages reported by the tool for failing to deconfigure Oracle Restart stack, perform corrective actions after reviewing the error messages, and rerun the tool to completely deconfigure Oracle Restart stack.

PRKU-01036: The deinstall tool failed to create the script file "{0}" that needs to be run in silent mode due to error "{1}"

Cause: The tool failed to create silent mode script file because of errors reported in the above message.

Action: You should review the error messages reported in above message to perform corrective actions and then rerun the tool.

PRKU-01037: As the privileged user, execute "{0}" and then execute "{1}" on this node to remove the configuration of the Oracle Restart and to completely remove the Oracle software

Cause: This is the message reported by Oracle Restart deconfiguration tool when it is run in non-interactive (or silent) mode.

Action: Execute the identified scripts as described.

PRKU-01039: Can't deconfigure Oracle Restart before removing or downgrading managed Oracle databases.

Cause: A request to deconfigure Oracle Restart found one or more managed Oracle database homes, so the request was rejected.

Action: Run the Oracle deconfiguration tool from Oracle database homes to delete, deconfigure or downgrade Oracle database and then run the same tool from Oracle Restart home to deconfigure the Oracle Restart stack.

PRKU-01057: The home being deconfigured is NOT a configured Grid Infrastructure home ({0})

Cause: The home that was deconfigured has a different path from the configured Infrastructure home.

Action: If it is required to deconfigure the active CRS home, specify the configured CRS home in the deinstall command argument, or run deinstall from the configured CRS home.

PRKH-01014 to PRKH-03450

PRKH-01014: Current user "{0}" is not the oracle owner user "{1}" of oracle home "{2}"

Cause: The command was run as a different user than the owner user of the oracle home path.

Action: Retry the command as the user who owns the specified oracle home.

PRKH-01016: Failed to get CSS mode

Cause: An error occurred on a Cluster Synchronization Services request. This message may be accompanied by others identifying the specific problem.

Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-01050: Buffer is too small

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-01051: Cluster software (skgxn) error

Cause: An error occurred when Cluster Synchronization Services attempted to use non-Oracle vendor clusterware. This message may be accompanied by others identifying the specific problem.

Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-01052: Invalid arguments

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-01053: Cluster synchronization services are not active

Cause: CSS daemon is not running or unable to authenticate with CSS daemon

Action: Use 'crsctl check css' to ensure that CSS daemon is running. If CSS daemon is not running, execute 'crsctl start crs' command.

PRKH-01054: Communications error

Cause: CSS daemon is not running on the local node or unable to authenticate with CSS daemon

Action: Use 'crsctl check css' to ensure that CSS daemon is running. If CSS daemon is not running, execute 'crsctl start crs' command.

PRKH-01055: Oracle Cluster Registry error

Cause: OCR returned an error while processing a CSS request

Action: Ensure that CRSD daemon is running e.g. with crsctl check clusterware

PRKH-01056: Unexpected CSS error

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-01057: Check for node with node number 0 failed.

Cause: CSS daemon is not running on local node or unable to authenticate with CSS daemon.

Action: Use 'crsctl check css' to ensure that CSS daemon is running. If CSS daemon is not running, execute 'crsctl start crs' command.

PRKH-01058: Node number specified for the node name lookup is beyond the allowed node number range

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03002: Vendor cluster software error occurred in Cluster Synchronization Services

Cause: An error occurred when Cluster Synchronization Services attempted to use non-Oracle vendor clusterware. This message may be accompanied by others identifying the specific problem.

Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03003: An attempt to communicate with the CSS daemon failed

Cause: CSS daemon is not running.

Action: Ensure that CSS daemon is running.

PRKH-03004: Failed due to insufficient memory for Cluster Synchronization Services

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03005: Entity {0} was not registered with CSS

Cause: The given entity (e.g. instance) was not registered with CSS.

Action: Start the entity before retrying the operation.

PRKH-03009: An attempt was made by Cluster Synchronization Services to release a lock that was not held

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03011: Cluster Synchronization Services was started but has not completed startup

Cause: An attempt to connect to CSS failed because initialization is still in progress.

Action: None

PRKH-03013: An improper buffer argument was supplied to Cluster Synchronization Services

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRKH-03016: Invalid arguments

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03050: Unexpected error ({0}) returned from Cluster Synchronization Services

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03101: GIPC Error returned from DHCP module

Cause: A communication error occurred on a DHCP operation. This message may be accompanied by others identifying the specific problem.

Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03150: Unexpected error ({0}) returned from DHCP module

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03202: An error occurred in Oracle Clusterware during an Operating System function call or request

Cause: An error occurred in Oracle Clusterware. This message may be accompanied by others identifying the specific problem.

Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03203: Required password not supplied

Cause: A requested operation requires a password but none was supplied. This message may be accompanied by others identifying the specific problem.

Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03204: An improper buffer argument was supplied to Oracle Clusterware

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03205: Internal error in Oracle Clusterware

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03250: Unexpected error ({0}) returned from Oracle Clusterware

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03301: Invalid arguments

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03302: Oracle Clusterware database support layer returned OCR error

Cause: This message may be accompanied by others identifying the specific problem.

Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03303: Oracle Clusterware database support layer returned OSD error

Cause: This message may be accompanied by others identifying the specific problem.

Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03304: Internal error returned from Oracle Clusterware database support layer

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03306: Internal error returned from Oracle Clusterware database support layer

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03307: Internal error returned from Oracle Clusterware database support layer

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03340: Following VIP error occurred from Oracle Clusterware database support layer

Cause: An error occurred while processing a VIP request. This message may be accompanied by others identifying the specific problem.

Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03350: Unexpected error returned from Oracle Clusterware database support layer

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03401: An improper buffer argument was supplied to an internal interface

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKH-03402: OCR error returned from an internal interface

Cause: An internal interface encountered an error in OCR processing. This message may be accompanied by others identifying the specific problem.

Action: Correct the problem indicated by the accompanying messages, if possible. Otherwise, contact Oracle Support Services.

PRKH-03450: Unexpected error ({0}) returned from an internal interface

Cause: An internal error occurred.

Action: Contact Oracle Support Services.

PRKA-02001 to PRKA-02005

PRKA-02001: GSD already exists

Cause: An attempt was made to create the Global Services Daemon (GSD) application while there was a running GSD application.

Action: Stop and remove the GSD and create the GSD application again using 'srvctl add nodeapps'.

PRKA-02002: Listener already exists

Cause: An attempt was made to create a Listener application while there was a running Listener application.

Action: Stop and remove the running Listener and create the Listener application again using 'srvctl add nodeapps'.

PRKA-02003: EM Agent already exists

Cause: An attempt was made to create an Agent application while there was a running Agent application.

Action: Stop the running Agent and create the Agent application again using 'srvctl add nodeapps'.

PRKA-02005: Netmasks are different for starting and ending IP addresses

Cause: An invalid range of VIP addresses was specified for the cluster

Action: Check if the starting and ending addresses in the VIP range belong to the same netmask.

PRKC-01000 to PRKC-01168

PRKC-01000: No active nodes detected in the cluster

Cause: The active node list of the cluster could not be retrieved. This could occur if the operating system dependent clusterware was not functioning properly in one or more nodes in the cluster, or because there was no clusterware installed on the system.

Action: Check the state of the cluster by running 'lsnodes' binary from your ORACLE_HOME/bin and see if it prints the node list correctly.

PRKC-01001: Error submitting commands in the buffer

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRKC-01002: All the submitted commands did not execute successfully

Cause: Either a node failed in the middle of a manageability operation, or the communication between nodes was disrupted.

Action: Check the state of your cluster by running 'lsnodes' binary from your ORACLE_HOME/bin and see if it prints the node list correctly.

PRKC-01004: Problem in copying file to nodes

Cause: Attempted file copy operation(s) from the local node to one or more nodes in the cluster and one or multiple of those copy file operations failed. Possible causes: 1) One or more file copy operations to nodes in the cluster failed. 2) The destination directory did not have write permission for the user on one or more of the nodes .the source file did not exist. 3) The 'rcp' command to one or more nodes failed on UNIX platforms.

Action: 1) Check that the source file exists. 2) Check that all nodes in the cluster are up. 3) Check that destination directory has write permission for the user. 4) On UNIX based platforms check that user can do 'rcp' to all the nodes.

PRKC-01005: Problem in removing file from nodes

Cause: Attempted file remove operation(s) from the local node to one or more nodes in the cluster and one or multiple of those file remove operations failed. Possible causes: 1) One or more nodes failed during the operation. 2) The destination directory did not have write permission for the user on one or more of the nodes. 3) The source file did not exist. 4) The 'rcp' command to one or more nodes failed on UNIX platforms.

Action: Check the accompanying error messages for details.

PRKC-01006: Problem in moving file to nodes

Cause: Attempted file move operation(s) from the local node to one or more nodes in the cluster and one or multiple of those move file operations failed. Possible causes: 1) One or more nodes failed during the operation. 2) The destination directory did not have write permission for the user on one or more of the nodes. 3) The source file did not exist. 4) The 'rcp' command to one or more nodes failed on UNIX platforms.

Action: Check the accompanying error messages for details.

PRKC-01007: Problem in creating directories on the nodes

Cause: Attempted directory create operation(s) from the local node to one or more nodes in the cluster and one or multiple of those directory create operations failed. Possible causes: 1) One or more nodes failed during the operation. 2) The destination directory did not have write permission for the user on one or more of the nodes. 3) The 'rcp' command to one or more nodes failed on UNIX platforms.

Action: Check the accompanying error messages for details.

PRKC-01009: Failed to start the service on all nodes

Cause: The service failed to start on one or more nodes of the cluster.

Action: Check if all the nodes in cluster are up and look in the clusterware alert log.

PRKC-01010: Failed to stop the service on all nodes

Cause: The service failed to stop on one or more nodes of the cluster.

Action: Check if all the nodes in cluster are up and service is still up on failed nodes. Look in the clusterware alert log.

PRKC-01011: Failed to delete the service from all nodes

Cause: The service failed to be deleted on one or more nodes of the cluster.

Action: Check if all the nodes in cluster are up and service is still registered. Look in the clusterware alert log.

PRKC-01012: Failed to create the service on all nodes

Cause: The service failed to be created on one or more nodes of the cluster.

Action: Check if all the nodes in cluster are up. Look in the clusterware alert log.

PRKC-01016: Failed to retrieve value of the environment variable "{0}", {1}

Cause: Attempted to retrieve value of an environment variable which was not defined.

Action: Define the environment variable.

PRKC-01017: Problem restarting GSD

Cause: GSD (Global Services Daemon) could not be started on the local node. This could occur if the operating system dependent clusterware was not functioning properly or there is already a running GSD.

Action: Check the state of your clusterware by running 'lsnodes' from ORACLE_HOME/bin. It should list the nodes in the cluster. Try 'gsdctl stop' and then 'gsdctl start' again.

PRKC-01018: Error getting coordinator node

Cause: This could occur if the operating system dependent clusterware was not functioning properly.

Action: Use 'gsdctl stop' on each node to stop the GSDs. Use 'gsdctl start' on each node in the cluster.

PRKC-01019: Error creating handle to GSD daemon on the node {0}

Cause: Global Services Daemon was not running on the node.

Action: Use 'gsdctl stat' to check the status of the daemon. Use 'gsdctl start' to start it.

PRKC-01020: Exception while executing the operation on the remote node {0}

Cause: Attempted to execute an operation on the remote node when the Global Services Daemon was not up on the remote node {0}.

Action: Start the Global Services Daemon on the remote node using 'gsdctl start'.

PRKC-01021: Problem in the clusterware

Cause: The operating system dependent clusterware could not be contacted. This could occur because the operating system dependent clusterware was not functioning properly.

Action: Check the state of the operating system dependent clusterware.

PRKC-01022: Could not get node name for node {0} in {1}

Cause: The operating system dependent clusterware could not be contacted. This could occur because the operating system dependent clusterware was not functioning properly.

Action: Check the state of the operating system dependent clusterware using 'lsnodes -n'.

PRKC-01025: Failed to create a file under the filepath {0} because the filepath is not executable or writable

Cause: The directory of the specified filepath did not have execute or write permission. So the temporary file could not be created to test whether the filepath was shared among nodes.

Action: Make the directory of the specified filepath executable and writable.

PRKC-01141: Oracle Restart is not supported in version {0}. It is supported from version {1} onwards

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRKC-01144: File "{0}" not found.

Cause: The file was not found in the file system.

Action: Make sure that the file exists in the file system.

PRKC-01148: Failed to get host name for the local computer

Cause: An error occurred while attempting to retrieve the TCP/IP host name

Action: Correct the problem indicated by the accompanying error messages.

PRKC-01149: Failed to get OCR locations

Cause: An error occurred while attempting to retrieve the OCR locations, possibly due to missing or incorrect OCR locations file, or incomplete OCR configuration, or due to missing or incorrect SRVM shared libraries.

Action: Verify that the Clusterware has been correctly installed and configured. Verify that the ocr.loc file is present and readable in the appropriate location for your platform.

PRKC-01150: Failed to get drive letters used on following nodes: "{0}"

Cause: An error occurred while attempting to retrieve used drive letters on one or more nodes.

Action: Look at the accompanying messages and fix the error(s). The messages typically relate to a node not being reachable, or the remote execution service not running on the node, or some permissions issue when attempting to use the remote execution service on the remote node.

PRKC-01151: The given path "{0}" does not exist

Cause: The specified path may not have been created or an incorrect path has been specified.

Action: Make sure that the given path exists by specifying a correct existing path.

PRKC-01152: The specified path "{0}" is not a directory

Cause: The specified path may be a file, not a directory, or an incorrect path may have been specified.

Action: Make sure to specify a path that is a valid directory path.

PRKC-01153: No directory is available on the remote node "{0}" to copy the binary RemoteExecService.exe

Cause: Either the path defined by value of registry key HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/OracleRemExecService is not available on the remote node, or the c:/temp/ directory is not available or not accessible on the specified remote node.

Action: Make sure that the required path is available on the remote node.

PRKC-01155: The node list provided had only one entry or had multiple entries that were duplicates of a single nodename entry

Cause: The list of nodes provided for the shared path check was either only one node, or the list included entries that were duplicates of the same single node.

Action: Please provide the correct nodelist for the cluster on which the check is being called, making sure that there are at least two distinct entries.

PRKC-01156: Failed to validate raw device "{0}" -- Details: {1}

Cause: The raw device was not an existing device that could be opened and recognized by the OS as a "raw/character" device type.

Action: Make sure the supplied value identifies a valid raw device that can be opened as a "raw/character" device type.

PRKC-01157: Failed to validate raw device "{0}"

Cause: The raw device was not an existing device that could be opened and recognized by the OS as a "raw/character" device type.

Action: Make sure the supplied value identifies a valid raw device that can be opened as a "raw/character" device type.

PRKC-01158: Failed to validate raw device "{0}" -- Details: {1}

Cause: The device was not an existing device that could be opened and recognized by the OS as either "raw/character" or a "block" device type.

Action: Make sure the supplied value identifies a valid device that can be opened as a "raw/character" or "block" device type.

PRKC-01159: Failed to validate device "{0}"

Cause: The device was not an existing device that could be opened and recognized by the OS as either "raw/character" or a "block" device type.

Action: Make sure the supplied value identifies a valid device that can be opened as a "raw/character" or "block" device type.

PRKC-01160: Failed to retrieve the value of environment variable "{0}" on following nodes: "{1}", [{2}]

Cause: An error occurred while attempting to retrieve value of environment variable on one or more nodes due to the node not being reachable, or the remote execution service not running on the node, or some permissions issue when attempting to use the remote execution service on the remote node.

Action: Look at the accompanying messages and respond accordingly.

PRKC-01161: Failed to retrieve the Windows domain on following nodes: "{0}"

Cause: An error occurred while attempting to retrieve the Windows domain on one or more nodes. The possible causes include:"

- A node is not reachable.
- Remote execution service is not running on the node.
- Permissions problems prevented use of remote execution service on a node.

Action: Look at the accompanying messages and respond accordingly.

PRKC-01162: "{0}" is not a file

Cause: The indicated object was expected to be a file, but it was not.

Action: Make sure that the indicated object is a file and not a directory.

PRKC-01163: {0} Exception occurred while determining validity of storage type.

Cause: An error occurred while getting storage type of the given path. Null arguments might have been passed.

Action: Make sure that the native api is passing non null arguments.

PRKC-01164: invalid command or arguments

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRKC-01165: Failed to set up Windows service OracleRemoteExecService on node '{0}'

Cause: An error occurred while setting up OracleRemoteExecService on the specified nodes."

Action: Look at the accompanying messages and respond accordingly.

PRKC-01166: Storage is partially shared. Details: {0}

Cause: A subset of the nodes provided shared the given filesystem path with the local node.

Action: Mount the NFS filesystem on the node(s) that do not share the filesystem path.

PRKC-01167: Failed to resolve the specified path "{0}" to its physical path on following nodes: "{1}", [{2}]

Cause: An error occurred while attempting to resolve the path on one or more nodes due to the node not being reachable, the remote execution service not running on the node, or some permissions issue when attempting to use the remote execution service on the remote node.

Action: Look at the accompanying messages and respond accordingly.

PRKC-01168: Failed to get sub-keys of registry key {0}

Cause: Could not find any sub-keys for the given registry key.

Action: Check manually via 'regedit' that the registry key exists and has sub keys under it. If so, retry. Otherwise, contact Oracle Support Services.

PRKE-01008 to PRKE-01011

PRKE-01008: Failed to get list of active nodes from Clusterware

Cause: Possible causes: 1) Not operating in cluster mode. 2) Failed to load SRVM libraries. 3) Failed to initialize clusterware context.

Action: Check for the health of clusterware using "lsnodes" utility to get the list of active nodes in the cluster. Also, check for the presence of srvm libraries in the load library path. If these two checks get cleared, please contact Oracle Support Services.

PRKE-01009: Failed to start GSD on local node

Cause: GSD is already running on the local node, or GSD could not be started because of some other reason.

Action: Run "gsdctl stat" to check if a daemon is already running on the local node. If a daemon is not running on local node, please contact Oracle Support Services to check for the other reasons for failure.

PRKE-01010: Failed to stop GSD on local node

Cause: GSD is not running on the local node, or GSD could not shut down gracefully.

Action: Run "gsdctl stat" to check if a GSD is running on the local node. If a GSD is running, please contact Oracle Support Services to check for other reasons for failure.

PRKE-01011: Failed to get status of GSD on local node

Cause: Failure to get the list of active nodes from the cluster, or failure to query the list of live daemons from the clusterware.

Action: Run "lsnodes" to check the health of the clusterware. If the clusterware is working fine, check for the presence of SRVM libraries in the load library path. If the libraries are present, please contact Oracle Support Services for further assistance.

PRKN-01031 to PRKN-01040

PRKN-01031: Failed to retrieve local host name

Cause: An attempt to retrieve the local host name using Java network functions failed.

Action: Ensure that the 'localhost' entry exists in the hosts configuration file.

PRKN-01032: Error occurred while reading input from Console

Cause: An attempt to read input from console failed

Action: Use terminal windows like xterm or Windows console to run the command.

PRKN-01033: The following nodes do not share the filesystem path "{0}" with node {1}: {2}

Cause: A subset of the nodes provided shared the given filesystem path with the local node.

Action: Mount the NFS filesystem on the node(s) that do not share the filesystem path.

PRKN-01034: Failed to retrieve IP address of host "{0}"

Cause: An attempt to retrieve IP address for the host specified failed.

Action: Run 'nslookup' on the host name and make sure the name is resolved or add the host name to OS hosts file.

PRKN-01035: Host "{0}" is unreachable

Cause: An attempt to reach the specified host via IP failed.

Action: Make sure that the host is up and there are no firewalls blocking connectivity between local node and remote host.

PRKN-01036: Windows registry key "{0}" not found on node "{1}"

Cause: Could not find the specified Windows registry key on the identified node.

Action: Contact Oracle Support Services.

PRKN-01037: Unexpected command output on node {0}: "{1}"

Cause: A remotely-executed command produced output when none was expected.

Action: Ensure that ssh or rsh is configured properly on the target node. If it is, contact Oracle Support Services for assistance.

PRKN-01038: The command "{0}" run on node "{1}" gave an unexpected output: "{2}"

Cause: A remote-shell command produced an output when none was expected.

Action: Ensure that ssh or rsh is configured properly on the specified nodes. If it is, contact Oracle Support Services for assistance.

PRKN-01039: Failed to create directory "{0}" on node "{1}"

Cause: The specified directory could not be created on the specified node.

Action: Ensure that the user is an administrator on the specified node, that the specified drive has default share configured on it, and that there is enough space in the specified location. Look at accompanying error messages and respond accordingly.

PRKN-01040: Failed to remove directory "{0}" on node "{1}"

Cause: The specified directory could not be removed on the specified node.

Action: Ensure that the user is an administrator on the specified node, that the specified drive has default share configured on it. Look at accompanying error messages and respond accordingly.

PRKP-01000 to PRKP-01088

PRKP-01000: Cannot retrieve configuration for cluster database {0}

Cause: The cluster database configuration could not be retrieved from the repository. This could occur either because the database was never registered, or because the repository itself had not been created.

Action: Check if the database has been configured by printing a list of all cluster databases using 'srvctl config'. If the repository has not been created, use 'srvconfig -init' to create it.

PRKP-01001: Error starting database instance {0} on node {1}

Cause: The instance could not be started using the SQL*Plus startup command.

Action: Try starting the named instance manually using SQL*Plus to see why it failed and examine the database instance alert log.

PRKP-01002: Error stopping database instance {0} on node {1}

Cause: The SQL*Plus shutdown command returned an error while stopping the instance.

Action: Try stopping the named instance manually using SQL*Plus to see why it failed and examine the database instance alert log.

PRKP-01003: Startup operation partially failed

Cause: Some components of the cluster database could not be started.

Action: Check the accompanying error messages for details.

PRKP-01004: Shutdown operation partially failed

Cause: Some components of the cluster database reported errors while being stopped.

Action: Check the accompanying error messages for details.

PRKP-01005: Failed to start up cluster database {0}

Cause: The cluster database could not be started.

Action: Check the accompanying error messages for details.

PRKP-01006: Failed to shut down cluster database {0}

Cause: The cluster database reported errors while being shut down.

Action: Check the accompanying error messages for details.

PRKP-01007: Failed to start all the listeners associated with all the instances of cluster database {0}

Cause: Internal error.

Action: Contact your customer support representative.

PRKP-01008: Failed to start listeners associated with instance {0} on node {1}

Cause: Internal error.

Action: Contact your customer support representative.

PRKP-01009: Failed to stop all the listeners associated with all the instances of cluster database {0}

Cause: Either the listener name associated with an instance could not be determined, or 'lsnrctl stop' failed for a listener.

Action: Verify that listener.ora contains a SID_LIST entry for each instance of the named database, and that the 'lsnrctl stop' command succeeds for those listeners.

PRKP-01010: Failed to stop all the listeners associated with instance {0} on node {1}

Cause: Either the listener name associated with an instance could not be determined, or 'lsnrctl stop' failed for a listener.

Action: Verify that listener.ora contains a SID_LIST entry for each instance of the named database, and that the 'lsnrctl stop' command succeeds for those listeners.

PRKP-01011: Failed to get all the listeners associated with instance {0} on node {1}

Cause: The listener name associated with an instance could not be determined.

Action: Ensure that listener.ora contains a SID_LIST entry for the named instance.

PRKP-01012: Invalid environment variable {0} setting for cluster database {1}

Cause: The argument to the -t option was not of the form <name>=<value> or it contained special characters.

Action: Ensure that the -t option has an argument of the form <name>=<value>. Enclose the argument to the -t flag in quotes.

PRKP-01013: {0}: undefined environment variable for cluster database {1}

Cause: The named environment variable is not defined for the named cluster database

Action: Set a value for the variable with 'srvctl setenv'.

PRKP-01014: {0}: undefined environment variable for instance {1} of cluster database {2}

Cause: The named environment variable is not defined for the given instance

Action: Set a value for the variable with 'srvctl setenv'.

PRKP-01015: {0}: undefined environment variable

Cause: The named environment variable is not defined

Action: Set a value for the named environment variable with 'srvctl setenv'.

PRKP-01084: Database "{0}" cannot have more than "{1}" services

Cause: Attempt to add a new service to database was rejected because database has already reached the maximum services limit.

Action: Retry after removing a service of this database via 'srvctl remove service' command, or contact Oracle Support Services.

PRKP-01088: Failed to retrieve configuration of cluster database {0}

Cause: Attempt to retrieve configuration of cluster database failed. This failure is most likely due to user incorrectly using a tool, such as SRVCTL, that is of different version than that of database's configuration.

Action: If error is due to user using SRVCTL that is of different version than than of the database's, then run SRVCTL tool from the ORACLE_HOME reported in the error message. Otherwise, contact Oracle support services.

PRKR-01001 to PRKR-01082

PRKR-01001: cluster database {0} does not exist

Cause: The cluster database was never registered in the repository.

Action: Check if the database has been configured by printing a list of all cluster databases using 'srvctl config'.

PRKR-01002: cluster database {0} already exists

Cause: An attempt was made to register a cluster database which already existed in the repository.

Action: Check if the database has already been configured by printing a list of all cluster databases using 'srvctl config'.

PRKR-01003: instance {0} does not exist

Cause: The named instance was never registered in the repository.

Action: Use 'srvctl config instance' to check if the instance is registered in the repository.

PRKR-01005: adding of cluster database {0} configuration failed, {1}

Cause: Internal error.

Action: Contact your customer support representative.

PRKR-01006: deleting of cluster database {0} configuration failed, {1}

Cause: Internal error.

Action: Contact Oracle Support Services.

PRKR-01007: getting of cluster database {0} configuration failed, {1}

Cause: Internal error.

Action: Contact Oracle Support Services.

PRKR-01008: adding of instance {0} on node {1} to cluster database {2} failed.

Cause: Internal error.

Action: Contact Oracle Support Services.

PRKR-01009: deleting of instance {0} from cluster database {1} failed, {2}

Cause: Internal error.

Action: Contact Oracle Support Services.

PRKR-01010: moving of instance {0} to node {1} of cluster database {2} failed.

Cause: Internal error.

Action: Contact Oracle Support Services.

PRKR-01011: renaming of instance {0} to instance {1} of cluster database {2} failed, {3}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01012: error {0} while serializing configuration of cluster database {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01013: error {0} while deserializing configuration of cluster database {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01014: error {0} while serializing directory
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01015: error {0} while deserializing directory
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01016: reading of cluster database {0} configuration failed, {1}, {2}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01017: writing of cluster database {0} configuration failed, {1}, {2}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01018: reading of directory failed, {0}, {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01019: writing of directory failed, {0}, {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01020: reading of version information failed, {0}, {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01021: writing of version information failed, {0}, {1}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01022: Cluster registry {0} contains incompatible version, {1} != {2}
Cause: Internal error.
Action: Contact Oracle Support Services.

PRKR-01023: file {0} does not exist

Cause: The named file did not exist.

Action: Specify a file that exists.

PRKR-01024: file {0} does not have {1} permissions

Cause: The named file did not have the specified permission.

Action: Try changing the permission on the file to the specified permission.

PRKR-01025: file {0} does not contain property {1}

Cause: The file did not contain the specified property.

Action: Contact Oracle Support Services.

PRKR-01026: property {0} not set in file {1}

Cause: The file did not contain the specified property.

Action: Contact Oracle Support Services.

PRKR-01027: failed to retrieve list of cluster databases

Cause: Internal error.

Action: Contact Oracle Support Services.

PRKR-01028: Cluster registry {0} is invalid [HINT: initialize cluster registry by using "srvconfig" tool]

Cause: The management repository was never initialized.

Action: Use 'srvconfig -init' to initialize the repository.

PRKR-01039: invalid option {0} specified

Cause: The specified option was invalid.

Action: Check the command documentation or the inline help display for usage details.

PRKR-01040: missing <file> argument for {0} option

Cause: The specified option was invalid for srvconfig.

Action: Check the command documentation or the inline help display for usage details.

PRKR-01050: file {0} creation in {1} directory failed

Cause: Either the directory did not exist or it did not have the required permissions.

Action: Create the directory if it did not exist or change the permission of the directory.

PRKR-01051: file {0} does not contain an entry for dbname {1}

Cause: Internal error.

Action: Contact Oracle Support Services.

PRKR-01052: file name {0} is not of <cluster database name>.conf form

Cause: Internal error.

Action: Contact Oracle Support Services.

PRKR-01053: invalid range {0} specified in node_list = {1}

Cause: Internal error.

Action: Contact Oracle Support Services.

PRKR-01054: invalid parameter {0} specified in inst_oracle_sid = {1}

Cause: Internal error.

Action: Contact Oracle Support Services.

PRKR-01055: invalid extra arguments {0} specified to {1} option

Cause: Provided invalid arguments to srvconfig.

Action: Check the command documentation or the inline help display for usage details.

PRKR-01056: invalid registry entry {0} found; should be of form {1}

Cause: Internal error.

Action: Contact Oracle Support Services.

PRKR-01057: environment variable does not exist

Cause: Attempted to retrieve non existing environment variable.

Action: Set the environment variable.

PRKR-01078: Database {0} of version {1} cannot be administered using current version of srvctl. Instead run srvctl from {2}

Cause: An attempt was made to access configuration of database using srvctl that was of different version than that of the database.

Action: Perform the operation using srvctl from the ORACLE_HOME mentioned in the error message.

PRKR-01082: Failed to get OCR locations

Cause: An error occurred while attempting to retrieve the OCR locations, possibly due to missing or incorrect OCR locations file, or incomplete OCR configuration, or due to missing or incorrect SRVM shared libraries.

Action: Verify that the Clusterware has been correctly installed and configured. Verify that the ocr.loc file is present and readable in the appropriate location for your platform.

PRKO-00371 to PRKO-09068

PRKO-00371: No option specified for "modify gns"

Cause: No option was specified for the "modify gns" command.

Action: Specify at least one option.

PRKO-00372: The "-{0}" option requires the specification of the "-{1}" option.

Cause: An option was specified which requires that another option to be specified at the same time.

Action: Specify the required option.

PRKO-00373: Invalid host name or address: "{0}".

Cause: The host name or address specified for the address on which GNS is to listen was not valid.

Action: Specify a valid host name or IP address. If an IP address is used, it must be one of the following:

1. A valid IPv4 address (N.N.N.N);
2. A valid IPv6 address (N[:N]*).

PRKO-00374: The "-{0}" option may not be used with the "-{1}" option.

Cause: The two options may not be used together.

Action: Run `srvctl` with each option specified separately.

PRKO-00375: No option was specified for the GNS "modify" command.

Cause: An option was not specified for the modify command.

Action: Specify an option.

PRKO-00376: ASM not stopped: deprecated option '-i' is not allowed.

Cause: An attempt to stop ASM using `srvctl` specified the '-i' option.

Action: Use the '-n' option to specify the node where ASM instance should be stopped.

PRKO-00377: The "-{0}" option requires the specification of either the "-{1}" or the "-{2}" option.

Cause: An option was specified which requires that one of the other possible options to be specified at the same time.

Action: Specify the one of the other options.

PRKO-00378: Both "-{0}" and "-{1}" options may not be specified with the "-{2}" option.

Cause: An invalid combination of options was specified.

Action: Specify only one of the other possible options.

PRKO-00380: No other option is allowed when the "-l" option is specified.

Cause: If the "-l" option is specified, no other option may be given.

Action: Only specify the "-l" option.

PRKO-00381: Both "-g" and "-x" options are required to set server pool {0} for single instance database {1} on the cluster.

Cause: Option "-x" is not specified in 'srvctl modify database' command for a single instance database on the cluster.

Action: Specify both -g and -x options in 'srvctl modify database' and retry.

PRKO-00382: The number of candidate servers {0} in server pool {1} should be one for single instance database {2}

Cause: The server pool specified in 'srvctl modify database' command for a single instance database contains more than 1 candidate servers.

Action: Either modify the given server pool via 'srvctl modify srvpool' command to have only one candidate server specified via -x argument or specify another server pool that contains only one candidate server specified via -x argument.

PRKO-02000: Invalid command line syntax for a single instance database

Cause: user specified invalid command line syntax.

Action: Look at the usage provided for this command and specify all mandatory options.

PRKO-02001: Invalid command line syntax

Cause: The syntax of the command is incorrect.

Action: Look at the usage provided for this command and use the correct syntax.

PRKO-02002: Invalid command line option:

Cause: Invalid command line option was specified.

Action: Check the value printed along with the exception and specify the correct value.

PRKO-02003: Invalid command line option value:

Cause: Invalid command line option was specified.

Action: Check the value printed along with the exception and specify the correct value.

PRKO-02004: Repetition of command line option:

Cause: The command line option printed along with the exception was repeated.

Action: Delete the repeated command line option and try the command again.

PRKO-02005: Failure in getting Cluster Database Configuration for:

Cause: The specified database does not exist.

Action: Check the specified database name and try again.

PRKO-02006: Invalid node name: {0}

Cause: Unable to get the hostname for the given node/machine name.

Action: Check the node name and try again.

PRKO-02007: Invalid instance name: {0}

Cause: Unable to obtain the node name on which the instance name specified was running.

Action: Check the instance name specified and try again.

PRKO-02008: Invalid connect string:

Cause: The connect string specified was not in the format username/password [as {SYSDBA|SYSOPER}]

Action: Check the connect string and try again.

PRKO-02009: Invalid name/value string: {0}

Cause: The name value string should be of the form name = value

Action: check the input name/value pair and try again.

PRKO-02010: Invalid command specified on command line: {0}

Cause: The <command> specified on the command line was not recognized.

Action: Valid commands are

enable | disable | start | stop | relocate | status | add | remove | modify | getenv | setenv | unsetenv | config. Usage of srvctl is printed with this error. Check the usage and specify a valid command.

PRKO-02011: Invalid object specified on command line: {0}

Cause: The <object> specified on the command line was not recognized.

Action: Valid objects are

database | instance | service | nodeapps | vip | network | asm | diskgroup | listener | srvpool | scan | scan_listener | oc4j | home | filesystem | gns | cvu. Srvctl usage is printed along with this exception. Check the usage printed with this error and use a valid object.

PRKO-02012: {0} object is not supported in Oracle Restart

Cause: The <object> specified on the command line was not a valid object for the Oracle Restart mode.

Action: Valid objects for Oracle Restart mode are

database | service | asm | diskgroup | listener | home | ons. Srvctl usage is printed along with this exception. Check the usage printed with this error and use a valid object.

PRKO-02013: {0} object is not supported in Oracle Clusterware

Cause: The <object> specified on the command line was not a valid object for the Oracle Clusterware mode.

Action: Valid objects for Oracle Clusterware are

database | instance | service | nodeapps | vip | network | asm | diskgroup | listener | srvpool | scan | scan_listener | oc4j | home | filesystem | gns | cvu. Srvctl usage is printed along with this exception. Check the usage printed with this error and use a valid object.

PRKO-02014: The -a option should be specified with -d <dbunique_name> for 'srvctl config database' command

Cause: -a option was specified without the required -d option specifying for which database to retrieve configuration.

Action: To retrieve the full configuration of the database, specify both -d and -a option with the 'srvctl config database' command.

PRKO-02016: Database {0} has no services configured

Cause: 'srvctl config database' request found no services configured for the database.

Action: Use 'srvctl add service' command to configure services for the database and then retry.

PRKO-02017: Service {0} does not exist for database {1}.

Cause: The service being updated is not defined for the given database.

Action: If the service needs to be added don't use '-u' option in 'srvctl modify service' command. Option '-u' is for updating existing services.

PRKO-02018: No databases are configured

Cause: No databases were configured.

Action: Use 'srvctl add database' command to configure databases.

PRKO-02049: Invalid name-value string: {0}

Cause: The name=value string specified is not in valid format.

Action: The format for the string should be name=value. Check input and correct the error.

PRKO-02050: Error in enabling ASM instance on node {0}. {1}

Cause: ASM could not be enabled.

Action: Make sure that the node name is correct and that ASM exists on the specified node and it is not already enabled on the node. The current state of the ASM can be found using 'srvctl status asm' command. To check if ASM is configured or not, use 'srvctl config asm' command.

PRKO-02053: Error in disabling ASM instance on node {0}. {1}

Cause: ASM could not be disabled.

Action: Make sure that the node name is correct and that ASM exists on the specified node and it is not already disabled on the node. The current state of the ASM can be found using 'srvctl status asm' command. To check if ASM is configured or not, use 'srvctl config asm' command.

PRKO-02054: Invalid command line syntax, mandatory options are either {0} or {1}, but not both.

Cause: The command requires exactly one set of mandatory command line options. But either some options in one set were missing or the options from both sets were specified.

Action: Check the command line options entered and make sure that all the mandatory options in one set are specified.

PRKO-02056: Error occurred while checking dependent resources on network {0}. Network was not removed.

Cause: An attempt made to check if any resources are dependent on the given network failed.

Action: Make sure that the network is up. Make sure that the user has sufficient permission to remove network. If force flag was not specified in the remove command then specify force flag and try the command again.

PRKO-02058: Scan name {0} cannot be the same as a cluster node name: {1}

Cause: Scan name is same as a cluster node name.

Action: Choose a different scan name and issue the command.

PRKO-02065: Only one server pool should be provided for a single instance database on a cluster

Cause: An attempt to create a single instance database failed because more than one server pool was specified.

Action: Provide only one server pool while creating the single instance database.

PRKO-02067: The size of server pool should be one for single instance database

Cause: An attempt to create a single instance database failed because a server pool with more than one server was specified.

Action: Provide a server pool with only one server while creating a single instance database.

PRKO-02069: OC4J could not be created as it already exists

Cause: A new OC4J instance could not be created, as there is an existing instance of OC4J.

Action: Only one instance of OC4J can exist at any given time.

PRKO-02070: OC4J creation failed

Cause: A new OC4J instance could not be added because of OC4J exception.

Action: Resolve the OC4J exception and then try the OC4J addition again.

PRKO-02072: OC4J is not configured

Cause: OC4J is not configured on the cluster.

Action: Check the exception printed with this message. If OC4J is not configured then OC4J instance can be created using 'srvctl add oc4j'. If there are other errors shown with this error then check the cause/action messages of underlying exception.

PRKO-02074: OC4J is still running. It must be stopped before removing.

Cause: 'srvctl remove oc4j' was issued while OC4J instance was running.

Action: Stop the oc4j instance using 'srvctl stop oc4j' and then try removing.

PRKO-02075: OC4J could not be removed

Cause: OC4J instance could not be removed because it does not exist.

Action: The current OC4J configuration can be checked using 'srvctl config oc4j' command. Make sure that OC4J instance is running on that port. If there are other underlying messages printed then check the cause/action for the underlying errors shown with this.

PRKO-02077: OC4J RMI port could not be modified

Cause: OC4J RMI port could not be modified.

Action: Make sure that OC4J instance exists and port is not in use by using the command 'srvctl config oc4j' and try again.

PRKO-02079: OC4J could not be started

Cause: The start of OC4J instance failed.

Action: Make sure that OC4J instance exists and is not already started.

PRKO-02081: OC4J failed to stop

Cause: The OC4J instance could not be stopped.

Action: Make sure that OC4J instance exists and are not already stopped.

PRKO-02082: Missing mandatory option {0}

Cause: The specified mandatory command option is missing.

Action: Use `srvctl` with the `-h` option to display option details for the command and make sure that all the mandatory options are specified.

PRKO-02087: OC4J could not be enabled

Cause: OC4J instance could not be enabled.

Action: Make sure that node name is correct and that OC4J instance exists and is not already enabled. The current state of the OC4J instance can be found using `'srvctl status oc4j'` command. To check if OC4J instance is configured or not use `'srvctl config oc4j'` command.

PRKO-02090: OC4J could not be disabled

Cause: OC4J instance could not be disabled.

Action: Make sure that Node name is correct and that OC4J instance exists and is not already disabled. The current state of the OC4J instance can be found using the `srvctl status oc4j` command. To check if OC4J instance is configured or not use `'srvctl config oc4j'` command.

PRKO-02093: OC4J could not be relocated

Cause: OC4J instance could not be relocated to given node.

Action: If the node name was passed in the command line make sure that the node name is valid. Also make sure that OC4J instance exists on the cluster and is running.

PRKO-02100: Cannot update service {0} because {1} is not administrator-managed

Cause: An attempt to update the service using `"-u"` option failed because this option can be used with administrator-managed databases only.

Action: Make sure that you provide correct options for `'srvctl add service'` command.

PRKO-02102: Failed to create server pool {0}; {1}

Cause: An attempt to create the specified server pool failed because of the reason provided by the accompanying error.

Action: Examine the accompanying error messages for details.

PRKO-02103: The '-a' and '-r' options cannot both be supplied with '-u'

Cause: Command `'srvctl add service'` with `'-u'` option failed because both options `'-a'` and `'-r'` were provided.

Action: Correct options and issue command again.

PRKO-02104: Option '-a' or '-r' should be supplied with '-u'

Cause: Command `'srvctl add service'` with option `'-u'` failed because both it requires options `'-a'` or `'-r'` to be provided.

Action: Correct options and issue command again.

PRKO-02105: Option '-g' cannot be used with option '-r','-a' or '-P'

Cause: Incorrect usage of `-g` option.

Action: Correct options and issue command again.

PRKO-02106: There is no server pool associated with database {0}

Cause: Command 'srvctl add service' failed because the given database doesn't have an associated server pool.

Action: Oracle internal error. Contact customer support.

PRKO-02108: Command line options '-i' and '-n' cannot be used at the same time

Cause: Incorrect usage of -i and -n options.

Action: Correct options and issue command again.

PRKO-02109: Options '-e', '-i', or '-w' should be supplied with option '-c'

Cause: Incorrect usage of -e, -i and -w options.

Action: Correct options and issue command again.

PRKO-02110: Option '-c' cannot be used to create services with administrator-managed database {0}

Cause: Incorrect usage of -c option.

Action: Remove -c option and issue command again.

PRKO-02111: Invalid number {0} for command line option {1}

Cause: Invalid value was specified for the command line option that requires a number in a certain range.

Action: Check the value printed and specify a number within the required range.

PRKO-02112: Options '-x' and '-y' cannot be used to create RAC One Node database {0}

Cause: Incorrect usage of -x and -y options.

Action: Remove -x and -y options and issue command again.

PRKO-02115: OC4J is already disabled

Cause: OC4J instance could not be disabled because it is already disabled.

Action: If this is the expected state then this is not an error. If it is not then enable OC4J instance by using the 'srvctl enable oc4j' command.

PRKO-02116: OC4J is already enabled

Cause: OC4J instance could not be enabled because it is already enabled.

Action: If this is the expected state then this is not an error. If it is not then disable OC4J instance by using the 'srvctl disable oc4j' command.

PRKO-02117: Options '-g' and '-e' cannot be used together

Cause: Options -g and -e were used incorrectly.

Action: Correct options and issue command again.

PRKO-02118: Options '-g' and '-i' cannot be used together

Cause: Incorrect usage of -g and -i options.

Action: Correct options and issue command again.

PRKO-02119: Only one server pool can be specified with the -g option for a RAC One Node database

Cause: Incorrect number of serverpools was supplied with the -g option.

Action: Specify one server pool with the -g option and issue command again.

-
- PRKO-02120: Options '-x' and '-y' cannot be used to modify RAC One Node database**
Cause: Options -x and -y were used incorrectly.
Action: Remove -x and -y options and issue command again.
- PRKO-02121: Options '-e' and '-w' cannot be used to modify a database that is not RAC One Node**
Cause: Options -e and -w were used incorrectly.
Action: Remove -e and -w options and issue command again.
- PRKO-02122: Database type can only be 'RAC' or 'RACONENODE'**
Cause: Incorrect database type was specified for 'srvctl convert database' command.
Action: Specify 'RAC' or 'RACONENODE' when running 'srvctl convert database' command.
- PRKO-02126: Options '-n' and '-w' cannot both be used with options '-a' and '-r'**
Cause: Options -n, -w, -a and -r were used incorrectly.
Action: Correct options and issue command again.
- PRKO-02127: Either option '-e' or '-g' must be supplied for adding RAC One Node database**
Cause: Options -e and -g were not specified when adding RAC One Node database.
Action: Use 'srvctl add database' command with either -e or -g option.
- PRKO-02128: Specified cardinality {0} is not valid for policy-managed RAC One Node service {1}**
Cause: Given cardinality was not applicable to RAC One Node service.
Action: Use 'srvctl add service' command without the -c option or specify SINGLETON value for the -c option.
- PRKO-02129: Online relocation timeout value {0} is not within the range of {1} and {2}**
Cause: Online relocation timeout value was not within the required range.
Action: Supply a value within the required range.
- PRKO-02130: Supplied node {0} must be in the candidate list of the administrator-managed database {1}**
Cause: The supplied node name was not in the candidate list of the administrator-managed database.
Action: Supply a node in the candidate list of the database and rerun 'srvctl start database' command.
- PRKO-02131: Supplied node {0} must be in the server pool of the policy-managed database {1}**
Cause: The supplied node name was not in the server pool of the policy-managed database.
Action: Supply a node from the server pool of the database and rerun 'srvctl start database' command.

PRKO-02132: Options '-g', '-r' and '-a' cannot be used to add services for RAC One Node database {0}

Cause: Failed to add specified service because provided options cannot be used to add a service for RAC One Node database.

Action: Use 'srvctl add service' command without options -g, -r or -a.

PRKO-02133: Options '-g', '-r' and '-a' cannot be used to modify services for RAC One Node database {0}

Cause: Failed to modify specified service because provided options cannot be used to modify a service for RAC One Node database.

Action: Use 'srvctl modify service' command without options -g, -r or -a.

PRKO-02134: 'srvctl add instance' command is not supported with RAC One Node databases

Cause: The specified database does not support 'srvctl add instance' command.

Action: Convert the RAC One Node database to a RAC database by using the 'srvctl convert database' command and then rerun 'srvctl add instance' command.

PRKO-02135: 'srvctl remove instance' command is not supported with RAC One Node databases

Cause: The one instance of the RAC One Node database cannot be removed by the 'srvctl remove instance' command.

Action: Run 'srvctl remove database' command.

PRKO-02136: 'srvctl start/stop/enable/disable/modify/status/setenv/getenv/unsetenv instance' commands are not supported with RAC One Node databases

Cause: The supplied instance command is not supported with RAC One Node database.

Action: Perform srvctl operations on the 'database' noun instead of 'instance' with a RAC One Node database.

PRKO-02137: Option '-n' should not be supplied to convert policy-managed RAC One Node database to RAC database

Cause: Failed to convert database because provided option cannot be used to convert policy-managed RAC One Node database.

Action: Use 'srvctl convert database' command without -n option.

PRKO-02138: Database {0} is not of RAC One Node database type

Cause: The supplied database was not a RAC One Node database.

Action: Run 'srvctl convert database' command with database of type RAC One Node.

PRKO-02139: Supplied nodes {0} should contain node {1} where database {1} is already running on

Cause: Supplied nodes did not include the node that the database was running on.

Action: Make sure given nodes include the node that the database is running on.

PRKO-02140: Option '-x' should be supplied when adding single instance database

Cause: Option -x was not supplied when adding single instance database.

Action: Supply -x option and issue command again.

PRKO-02141: Option '-r' requires option '-a'

Cause: Command 'srvctl relocate database' with option '-r' failed because it requires option '-a' to be provided.

Action: Correct options and issue command again.

PRKO-02142: Cannot start RAC One Node database when an online relocation request for the database is already active

Cause: Unable to start the supplied RAC One Node database because it already has an active online relocation request.

Action: Specify another database to start.

PRKO-02143: Cannot stop RAC One Node database when an online relocation request for the database is already active

Cause: Unable to stop the supplied RAC One Node database because it already has an active online relocation request.

Action: Either wait for the online relocation request to complete or specify another database to stop.

PRKO-02144: Option '-e' cannot be used with RAC One Node policy-managed database {0}

Cause: The -e option was specified to modify the candidate server list for RAC One Node policy-managed database.

Action: Either use 'srvctl modify srvpool' to modify the candidate server list or specify -g with 'srvctl modify database' to modify the server pool.

PRKO-02145: 'srvctl remove instance' command is not supported with single instance databases

Cause: The single instance database cannot be removed by the 'srvctl remove instance' command.

Action: Run 'srvctl remove database' command.

PRKO-02147: A 'srvctl add database' command specified the '-e', '-i' or '-w' option for a database that is not Oracle RAC One Node

Cause: A 'srvctl add database' command was issued that included either the '-e', '-i' or '-w' option but did not include a '-c' option specifying that the database being added was Oracle RAC One Node. These options are permitted only for Oracle RAC One Node databases.

Action: Either remove the '-e', '-i' or '-w' option or specify '-c' option with type Oracle RAC One Node.

PRKO-02148: Option '-n' must be supplied when running 'srvctl relocate database' for administrator managed RAC One Node database

Cause: Option -n was not specified when executing relocate on administrator managed RAC One Node database.

Action: Use 'srvctl relocate database' command with -n option.

PRKO-02149: Option '-i' cannot be used to modify instance name of a RAC database

Cause: Option -i in "srvctl modify database" command can be used to modify the instance name of a single instance database or instance name prefix of a RAC One Node database.

Action: Try 'srvctl modify instance' command.

PRKO-02156: Instance name {0} is not valid

Cause: The supplied instance name is not the correct format for RAC One Node database.

Action: Make sure that the instance name is of the format <instance_name_prefix>_1 or <instance_name_prefix>_2. Use 'crsctl modify resource' to correct the instance name.

PRKO-02157: Option '-i' should not specified to convert policy-managed RAC database to RAC One Node database

Cause: Failed to convert database because the provided option can not be used to convert policy-managed RAC database to RAC One Node database.

Action: Use 'srvctl convert database' command without -i option.

PRKO-02158: Option '-n' should not be specified to convert a RAC database to RAC One Node database

Cause: Failed to convert database because the provided option '-n' should not be supplied to convert RAC database to RAC One Node database.

Action: Use 'srvctl convert database' command without -n option.

PRKO-02159: Option '-i' should be specified to convert an administrator-managed RAC database to its equivalent RAC One Node database configuration

Cause: Failed to convert database because the option '-i' was not specified to convert administrator-managed RAC database to its equivalent RAC One Node database configuration.

Action: Use 'srvctl convert database' command with -i option.

PRKO-02160: Option '-w' should not be specified to convert a RAC One Node database to its equivalent RAC database configuration

Cause: Failed to convert database because option '-w' was specified to convert RAC One Node database to its equivalent RAC database configuration.

Action: Use 'srvctl convert database' command without -w option.

PRKO-02165: VIP does not exist on node(s) : {0}

Cause: VIP was not configured on the nodes.

Action: Add VIP using 'srvctl add nodeapps' or 'srvctl add vip' and try this command again.

PRKO-02166: GSD does not exist on node(s): {0}

Cause: GSD was not configured on the nodes

Action: Add GSD using 'srvctl add nodeapps' and try this command again.

PRKO-02167: VIP {0} does not exist.

Cause: VIP with the specified name was not configured.

Action: Add VIP using 'srvctl add nodeapps' or 'srvctl add vip' and try this command again.

PRKO-02168: Node applications are still running on node:

Cause: Node applications are still running on node when a remove was attempted.

Action: Stop the node applications before removing them or use force flag when attempting removal.

PRKO-02172: Some or all node applications are not removed successfully on node:

Cause: Not all node applications were removed on the node.

Action: Make sure that all resources that depend on node applications are stopped before attempting to remove node applications. Also if force flag was not specified, reissue this command with the force flag specified.

PRKO-02173: Instance {0} is already a preferred instance for service {1}.

Cause: Given instance is already a preferred instance for the service.

Action: Specify an instance other than the preferred instances of this service.

PRKO-02174: Instance {0} is already an available instance for service {1}.

Cause: Given instance is already an available instance for the service.

Action: Specify an instance other than the available instances of this service.

PRKO-02175: Failed to remove service {0} because this is the last service of RAC One Node database {1}

Cause: An attempt was made to remove the last service of a RAC One Node

Action: Add another service, for example by using 'srvctl add service' command, before removing the given service. Otherwise, if you are trying to deconfigure database, then remove the database directly, for example by using 'srvctl remove database' command.

PRKO-02176: ONS daemon does not exist on node(s): {0}

Cause: ONS was not configured on the nodes.

Action: Add ONS using 'srvctl add nodeapps' command and try this command again.

PRKO-02182: eONS daemon does not exist on node(s): {0}

Cause: eONS was not configured on the nodes.

Action: Add eONS using 'srvctl add nodeapps' command and try this command again.

PRKO-02183: Node applications run on default network only. The netmask given {0} doesn't match default networks netmask {1}

Cause: The netmask given in the modify command doesn't match with default network's netmask.

Action: Modify the default network first using 'srvctl modify nodeapps -S <options>' and then try modifying the VIP.

PRKO-02184: Node applications run on default network only. The interface given {0} doesn't match default networks interface {1}

Cause: The interface specified in the modify command doesn't match with default network's interface.

Action: Modify the default network's interface using 'srvctl modify nodeapps -S <options>' and then try modifying the VIP.

PRKO-02185: The new VIP address given is same as the current VIP address

Cause: The VIP address given for modification is same as the current VIP. So there is nothing to modify.

Action: Check the VIP address you want to modify and specify the correct value.

PRKO-02186: The command line parameter host port list should be in the form <host>[:<port>][,<host>[:<port>]]...

Cause: The command line parameter -t <host_port_list> was not in the format <host>[:<port>][,<host>[:<port>]...] with port being numeric.

Action: Check the input and correct any error and try the command again.

PRKO-02187: The network resource has been modified successfully. VIP and other resources that depend on it might not start up unless they are modified

Cause: When underlying network resource has been modified the VIP should be updated to the new network resource. This is not a error and is just a status message.

Action: Use 'srvctl modify nodeapps -A <options>' to update the VIP to the new network.

PRKO-02188: All the node applications already exist. They were not recreated.

Cause: 'srvctl add nodeapps' was attempted when all the node applications already existed.

Action: If you want to modify node applications you should use 'srvctl modify nodeapps' command.

PRKO-02190: VIP exists for node {0}, VIP name {1}

Cause: The VIP being added already exists.

Action: Check the input and if VIP needs to be modified use 'srvctl modify VIP' command.

PRKO-02199: Invalid address string:

Cause: VIP address being passed on the command line is not a valid address string.

Action: Address string should be of the format <name | ip>/<netmask>/[if1 | if2...]]. Check the usage and correct the address format.

PRKO-02200: Invalid interface specified on command line: {0}

Cause: VIP address specification '-A <name | ip>/<netmask>/[if1 | if2 | ...]' or the network address specification '-S <subnet>/<netmask>/[if1 | if2 | ...]' on the command line contained interfaces names, none of which exist on current node.

Action: Check the interfaces listed in the address string and make sure that they are enabled and are up. Use network interface names on the command line if there is more than one interfaces that connect to the same network.

PRKO-02207: Warning:-{0} option has been deprecated and will be ignored.

Cause: Deprecated option has been used in the command line. The option will be ignored.

Action: Check the documentation for the new syntax of the command.

PRKO-02208: {0} command has been deprecated and will be ignored.

Cause: The command being executed has been deprecated and will not do any action.

Action: Check the documentation for the commands supported by srvctl.

PRKO-02209: {0} command is not supported for configuration using server pool.

Cause: The given command failed because it isn't applicable to instances of policy managed-databases.

Action: Check the documentation on the commands that are applicable to policy-managed databases.

PRKO-02211: ASM listener was not found

Cause: Check the reported message, ASM listener may not exist.

Action: Use "srvctl modify asm -l <lsnr_name>" to set the listener that ASM should register with.

PRKO-02214: Specified server pool {0} cannot be used to host single instance database {1}

Cause: An attempt to create a single instance database failed because the specified server pool had no configured candidate server.

Action: Use 'srvctl modify srvpool' with -n option to configure a candidate server for the server pool. Make sure that the candidate server name specified with the -n option matches that of the -x option in 'srvctl add database' command.

PRKO-02215: Specified server pool {0} has more than one candidate server

Cause: An attempt to create a single instance database failed because a server pool with more than one candidate server was specified.

Action: Provide a server pool with only one candidate server when creating a single instance database.

PRKO-02310: VIP does not exist on node {0}.

Cause: VIP was not configured on that node on which modification was attempted.

Action: VIP must be added using 'srvctl add nodeapps' command, before it can be modified.

PRKO-02313: VIP {0} does not exist.

Cause: An attempt was made to remove a VIP with the specified vipname. No such VIP was configured on the cluster.

Action: If this is the expected state then it is not an error. Check the status of VIPs using 'srvctl status vip' command. VIP must be added using 'srvctl add vip' command before it can be removed.

PRKO-02318: Target instance {0} already supports service {1}.

Cause: Given database instance already provides the given service.

Action: Specify an instance that is not a preferred or available instance for this service.

PRKO-02331: ONS daemon does not exist.

Cause: ONS daemon was not configured on this cluster.

Action: ONS daemon can be configured using the 'srvctl add nodeapps' command.

PRKO-02339: eONS daemon does not exist.

Cause: eONS daemon was not configured on this cluster.

Action: eONS daemon can be configured using the 'srvctl add nodeapps' command.

PRKO-02377: eONS already uses {0} as listening port. Nothing to modify.

Cause: The listening port specified in this command is already in use by eONS.

Action: Check the input and if the listening port needs to be changed then specify a different port.

PRKO-02380: VIP {0} is still running on node: {1}

Cause: VIP to be removed is still running on a node.

Action: Stop the VIP before attempting to remove it or retry the command with force flag.

PRKO-02381: VIP {0} is not removed successfully:

Cause: VIP remove action failed because VIP was running and force flag was not specified or an exception occurred during the removal.

Action: Make sure that any applications, like for example listener, that depend on VIP are down. Try using -f option to remove the VIP. If you use force option to remove VIP then any application that depends on this VIP will stop working. Look at the help message for the accompanying exception.

PRKO-02383: Network {0} is not removed successfully:

Cause: Since there were no VIPs hosted on the network an attempt was made to remove the network and network removal failed.

Action: Make sure that all other applications that depend on default network are stopped. If force flag was not specified then specify force flag and try the command again.

PRKO-02385: The specified hostname or address {0} cannot be resolved.

Cause: An invalid IP address or irresolvable hostname was specified.

Action: If IP address is specified then make sure that it is of legal length. If a host name is specified then make sure that the host name resolves to an IP address.

PRKO-02386: Netmask is missing in address string:

Cause: NETMASK is missing in the VIP address that was passed in the command string.

Action: VIP address is of form <ip_or_name>/<netmask>[/<interface1>[|<interface2>...]]. Specify the netmask.

PRKO-02387: -n <node_name> option has been deprecated.

Cause: -n <node_name> has been deprecated in this release.

Action: Try to remove the usage of -n <node_name> in the command.

PRKO-02388: Command line option {0} should be followed by a value.

Cause: The value needs to be specified by the command line option.

Action: Look at the usage and of the command and specify an appropriate value.

PRKO-02389: Invalid command line options. Neither -A nor -n can be specified with -S.

Cause: Invalid combination of options specified for add/modify node application command. -A is node-specific option and has to be used with -n option. -S option is a global option and it cannot be used with -A or -n option.

Action: Issue the command using either -A and -n together or -S without -A or -n.

PRKO-02390: -n <node_name> option has been deprecated and is ignored.

Cause: -n <node_name> option has been deprecated and is ignored from this release. It has no effect on the command.

Action: Remove the usage of -n <node_name> from the command line.

PRKO-02391: Network resource {0},{1} already exists. Nothing to modify

Cause: The subnet specified is already the default subnet.

Action: Check the input and if the subnet needs to be modified then specify a different subnet.

PRKO-02392: eONS already uses {0} as Multicast address. Nothing to modify.

Cause: The Multicast address specified in this command is already in use by eONS.

Action: Check the input and if the Multicast address needs to be changed then specify a different address.

PRKO-02393: eONS already uses {0} as Multicast port. Nothing to modify.

Cause: The Multicast port specified in this command is already in use by eONS.

Action: Check the input and if the Multicast port needs to be changed then specify a different port.

PRKO-02394: ONS already uses {0} as port for local connections. Nothing to modify.

Cause: The modify node applications command failed because the ONS port for local connections is already used by ONS for local connections.

Action: Check the input and if the port used by ONS for local connections need to be modified specify a different address.

PRKO-02395: ONS already uses {0} as port for remote connections. Nothing to modify.

Cause: The modify node applications command failed because the ONS port for remote connections is already used by ONS for remote connections.

Action: Check the input and if the port used by ONS for remote connections need to be modified specify a different address.

PRKO-02396: The list of remote host/port ONS pairs matches the current list : {0}. Nothing to modify.

Cause: The modify node applications command failed because the remote host/port ONS pairs matches the current list.

Action: Check the input and if the remote host/port pairs need to be modified and specify a different host/port list.

PRKO-02405: Network resource does not exist on the cluster nodes.

Cause: Network resource does not exist on the cluster nodes.

Action: Node applications can be added by using 'srvctl add nodeapps' command.

PRKO-02409: GSD is already disabled on node(s): {0}

Cause: The disable node applications command failed because GSD was already disabled.

Action: If this is the expected state then this is not an error. If it is not then GSD can be enabled by 'srvctl enable nodeapps' command.

PRKO-02410: VIP is already disabled on node(s): {0}

Cause: The disable node applications command failed because VIP was already disabled.

Action: If this is the expected state then this is not an error. If it is not then VIP can be enabled by 'srvctl enable nodeapps' command.

PRKO-02411: Network resource is already disabled.

Cause: The disable node applications command failed because Network resource was already disabled.

Action: If this is the expected state then this is not an error. If it is not then Network resource can be enabled by 'srvctl enable nodeapps' command.

PRKO-02412: ONS is already disabled on node(s): {0}

Cause: The disable node applications command failed because ONS was already disabled.

Action: If this is the expected state then this is not an error. If it is not then ONS can be enabled by 'srvctl enable nodeapps' command.

PRKO-02413: eONS is already disabled on node(s): {0}

Cause: The disable node applications command failed because eONS was already disabled.

Action: If this is the expected state then this is not an error. If it is not then eONS can be enabled by 'srvctl enable nodeapps' command.

PRKO-02414: GSD is already enabled on node(s): {0}

Cause: The enable node applications command failed because GSD is already enabled.

Action: If this is the expected state then this is not an error. If it is not then GSD can be disabled by 'srvctl disable nodeapps' command.

PRKO-02415: VIP is already enabled on node(s): {0}

Cause: The enable node applications command failed because VIP is already enabled.

Action: If this is the expected state then this is not an error. If it is not then VIP can be disabled by 'srvctl disable nodeapps' command.

PRKO-02416: Network resource is already enabled.

Cause: The enable node applications command failed because Network resource is already enabled.

Action: If this is the expected state then this is not an error. If it is not then Network resource can be disabled by 'srvctl disable nodeapps' command.

PRKO-02417: ONS is already enabled on node(s): {0}

Cause: The enable node applications command failed because ONS is already enabled.

Action: If this is the expected state then this is not an error. If it is not then ONS can be disabled by 'srvctl disable nodeapps' command.

PRKO-02418: eONS is already enabled on node(s): {0}

Cause: The enable node applications command failed because eONS is already enabled.

Action: If this is the expected state then this is not an error. If it is not then eONS can be disabled by 'srvctl disable nodeapps' command.

PRKO-02419: GSD is already started on node(s): {0}

Cause: The start node applications command failed because GSD is already started.

Action: If this is the expected state then this is not an error. If it is not then GSD can be stopped by 'srvctl stop nodeapps' command.

PRKO-02420: VIP is already started on node(s): {0}

Cause: The start node applications command failed because VIP is already started.

Action: If this is the expected state then this is not an error. If it is not then VIP can be stopped by 'srvctl stop nodeapps' command.

PRKO-02421: Network resource is already started on node(s): {0}

Cause: The start node applications command failed because Network resource is already started.

Action: If this is the expected state then this is not an error. If it is not then Network resource can be stopped by 'srvctl stop nodeapps' command. Note that once started network resource cannot be stopped.

PRKO-02422: ONS is already started on node(s): {0}

Cause: The start node applications command failed because ONS is already started.

Action: If this is the expected state then this is not an error. If it is not then ONS can be stopped by 'srvctl stop nodeapps' command.

PRKO-02423: eONS is already started on node(s): {0}

Cause: The start node applications command failed because eONS is already started.

Action: If this is the expected state then this is not an error. If it is not then eONS can be stopped by 'srvctl stop nodeapps' command.

PRKO-02424: GSD is already stopped on node(s): {0}

Cause: The stop node applications command failed because GSD is already stopped.

Action: If this is the expected state then this is not an error. If it is not then GSD can be started by 'srvctl start nodeapps' command.

PRKO-02425: VIP is already stopped on node(s): {0}

Cause: The stop node applications command failed because VIP is already stopped.

Action: If this is the expected state then this is not an error. If it is not then VIP can be started by 'srvctl start nodeapps' command.

PRKO-02426: ONS is already stopped on node(s): {0}

Cause: The stop node applications command failed because ONS is already stopped.

Action: If this is the expected state then this is not an error. If it is not then ONS can be started by 'srvctl start nodeapps' command.

PRKO-02427: eONS is already stopped on node(s): {0}

Cause: The stop node applications command failed because eONS is already stopped.

Action: If this is the expected state then this is not an error. If it is not then eONS can be started by 'srvctl start nodeapps' command.

PRKO-02428: VIP is running on the node {0} and cannot be modified.

Cause: Modify nodeapps command failed because VIP being modified is running on a node.

Action: Stop the node application by issuing 'srvctl stop nodeapps' and retry the modify again.

PRKO-02429: -n <node_name> should be specified with -A <name | ip>/netmask[/if1[| if2]] for modifying VIP.

Cause: If -n <node_name> option is specified then -A option should also be specified for modifying VIP.

Action: If you want to modify the VIP then use specify both the -n and -A options. Otherwise remove the -n <node_name> option and try command again.

PRKO-02430: -A <name | ip>/netmask[/if1[| if2]] should be specified with -n <node_name> for modifying VIP.

Cause: -A <options> has been specified for the modify nodeapps command without specifying which node VIP needs to be modified.

Action: Specify the node whose VIP needs to be modified by using -n option.

PRKO-02431: Warning: the -n option is obsolescent; 'srvctl remove vip' is preferred for removing per-node VIP resource

Cause: A 'srvctl remove nodeapps' command was issued with the -n option specifying one or more nodes. Support for this option will be removed in a future release, at which time you must use the preferred command 'srvctl remove vip -i <vip_list>'.

Action: The command is processed normally and attempts to remove VIP resources for the specified node(s). This message is displayed only to alert you to a future change. Use 'srvctl remove nodeapps' to remove all node applications from the last node of the cluster.

PRKO-02438: Network resource does not exist.

Cause: Network resource to be started/stopped/modified/enabled/disabled does not exist.

Action: Network resource can be created using 'srvctl add nodeapps' command.

PRKO-02439: VIP does not exist.

Cause: VIP to be started/stopped/modified/enabled/disabled does not exist.

Action: VIP can be created using 'srvctl add nodeapps' command.

PRKO-02440: Network resource is already stopped.

Cause: The stop node applications command failed because network resource was already stopped.

Action: If this is the expected state then this is not an error. If it is not then network resource can be started by 'srvctl start nodeapps' command.

PRKO-02452: ONS already exists

Cause: A new instance of ONS daemon could not be created, as there is an existing instance of ONS.

Action: If this is the expected state then it is not an error. Use 'srvctl config ons' command to look at ONS daemon attributes and 'srvctl modify ons' command to modify ONS attributes.

PRKO-02453: eONS already exists

Cause: A new instance of eONS daemon could not be created, as there is an existing instance of eONS.

Action: If this is the expected state then it is not an error. Use 'srvctl config eons' command to see if eONS daemon is configured. Use 'srvctl modify eons' command to modify eONS attributes.

PRKO-02458: ONS does not exist

Cause: ONS daemon was not configured on this instance of Oracle Restart.

Action: Add ONS daemon using the 'srvctl add ons' command and try this command again.

PRKO-02463: eONS does not exist

Cause: eONS daemon was not configured on this instance of Oracle Restart.

Action: Add eONS daemon using the command 'srvctl add eons' command and try this command again.

PRKO-02465: ONS does not exist.

Cause: ONS daemon was not configured on this instance of Oracle Restart.

Action: ONS daemon can be configured using the 'srvctl add ons' command.

PRKO-02567: eONS daemon does not exist.

Cause: eONS daemon was not configured on this instance of Oracle Restart.

Action: eONS daemon can be configured using the 'srvctl add eons' command.

PRKO-02569: ONS is already started.

Cause: The 'srvctl start ons' command failed because the ONS daemon was already started.

Action: If this is the expected state then this is not an error. If it is not then ONS can be stopped by 'srvctl stop ons' command.

PRKO-02571: eONS is already started.

Cause: The 'srvctl start eons' command failed because the eONS daemon was already started.

Action: If this is the expected state then this is not an error. If it is not then eONS can be stopped by 'srvctl stop eons' command.

PRKO-02573: ONS daemon is already stopped.

Cause: The 'srvctl stop ons' command failed because the ONS daemon was already stopped.

Action: If this is the expected state then this is not an error. If it is not then ONS can be started by 'srvctl start ons' command.

PRKO-02575: eONS daemon is already stopped.

Cause: The 'srvctl stop eons' command failed because the eONS daemon was already stopped.

Action: If this is the expected state then this is not an error. If it is not then eONS can be started by 'srvctl start eons' command.

PRKO-02576: ONS is already enabled.

Cause: The 'srvctl enable ons' command failed because the ONS was already enabled.

Action: If this is the expected state then this is not an error. If it is not then ONS can be disabled by 'srvctl disable ons' command.

PRKO-02579: eONS is already enabled.

Cause: The 'srvctl enable eons' command failed because the eONS was already enabled.

Action: If this is the expected state then this is not an error. If it is not then eONS can be disabled by 'srvctl disable eons' command.

PRKO-02581: ONS is already disabled.

Cause: The 'srvctl disable ons' command failed because the ONS was already disabled.

Action: If this is the expected state then this is not an error. If it is not then ONS can be enabled by 'srvctl enable ons' command.

PRKO-02583: eONS is already disabled.

Cause: The 'srvctl disable eons' command failed because the eONS was already disabled.

Action: If this is the expected state then this is not an error. If it is not then eONS can be enabled by 'srvctl enable eons' command.

PRKO-02588: ONS daemon could not be removed because it is still running.

Cause: 'srvctl remove ons' command failed because ONS daemon was still running.

Action: Stop the ons daemon by using 'srvctl stop ons' command and then attempt to remove it. You can also use the force option to remove a running ons daemon.

PRKO-02589: eONS daemon could not be removed because it is still running.

Cause: 'srvctl remove eons' command failed because eONS daemon was still running.

Action: Stop the ons daemon by using 'srvctl stop eons' command and then attempt to remove it. You can also use the force option to remove a running eons daemon.

PRKO-02590: None of the ONS daemon parameters were modified.

Cause: The configuration of the ONS daemon has remained the same after the 'srvctl modify ons' command.

Action: Make sure that at least one of the optional modification parameters was specified on the command line. The current values of parameters of the ONS daemon can be found by using 'srvctl config ons' command. Specify at least one value different than current value while issuing the 'srvctl modify ons' command.

PRKO-02591: None of the eONS daemon parameters were modified.

Cause: The configuration of the eONS daemon has remained the same after the 'srvctl modify eons' command.

Action: Make sure that at least one of the optional modification parameters was specified on the command line. The current values of parameters of the eONS

daemon can be found by using 'srvctl config eons' command. Specify at least one value different than current value while issuing the 'srvctl modify eons' command.

PRKO-02593: enable of GNS failed.

Cause: Enabling the GNS server failed.

Action: Examine the accompanying exception for details.

PRKO-02595: modify of GNS failed.

Cause: Modification the GNS server failed.

Action: Examine the accompanying exception for details.

PRKO-02597: disable of GNS failed.

Cause: Disabling the GNS server failed.

Action: Examine the accompanying exception for details.

PRKO-02599: relocation of GNS failed.

Cause: Relocation of the GNS server failed.

Action: Examine the accompanying exception for details.

PRKO-02601: removal of GNS failed.

Cause: Removal of the GNS server failed.

Action: Examine the accompanying exception for details.

PRKO-02603: addition of GNS failed.

Cause: The addition of the GNS server failed.

Action: Examine the accompanying exception for details.

PRKO-02604: GNS is already running

Cause: The GNS server is already running.

Action: Remove the GNS server first before trying to add it.

PRKO-02611: GNS VIP does not exist. Specify the {0} option to create one.

Cause: The attempt to add GNS failed because the VIP associated with it does not exist.

Action: Create the VIP.

PRKO-02621: The '-x <node>' option cannot be used to create RAC database {0}

Cause: The '-x' option was supplied to create a single-instance database, along with '-c RAC' requesting a RAC database.

Action: Specify '-c SINGLE' with '-x <node>'

PRKO-02700: The CVU resource is not configured

Cause: The CVU resource was not configured on the cluster or an unexpected error occurred while querying Clusterware for the CVU resource.

Action: If the CVU resource was not configured then a new resource can be created using 'srvctl add cvu' command. If the resource was configured, look at any accompanying error messages.

PRKO-02702: CVU is already disabled

Cause: CVU resource could not be disabled because it is already disabled.

Action: If this is the expected state then this is not an error.

PRKO-02703: CVU is already enabled

Cause: CVU resource could not be enabled because it is already enabled.

Action: If this is the expected state then this is not an error.

PRKO-02707: CVU resource must be stopped before removing

Cause: 'srvctl remove cvu' was issued while CVU instance was running.

Action: Stop the CVU resource using 'srvctl stop cvu' and then try removing.

PRKO-02708: Unable to convert RAC One Node database because it has an active online relocation request

Cause: Failed to convert RAC One Node database to RAC database because there was an active online relocation request for the database.

Action: Wait for the online relocation request to complete and then run 'srvctl convert database'.

PRKO-02709: Unable to convert RAC One Node database because it has a failed online relocation request

Cause: Failed to convert RAC One Node database to RAC database because there was a failed online relocation request for the database.

Action: Use 'srvctl status database' command to show the target node of the failed online relocation request process. Either run 'srvctl relocate database' with -a option or with -n option with the correct target node. Then run 'srvctl convert database'.

PRKO-02710: Option '-n' cannot be used to start RAC database {0}

Cause: The -n option was specified to start RAC database, but -n is only applicable to RAC One Node databases.

Action: Either use 'srvctl start instance' to start RAC database instance on the given node or use 'srvctl start database' without -n option to start the RAC database.

PRKO-03026: Only one instance can be listed in -i <inst_name_list> when -n option is specified

Cause: More than one instance was specified for -i option when both -i and -n options were used.

Action: Supply one instance name for -i option when using both -i and -n option.

PRKO-03031: Server pool {0} already exists

Cause: Command 'srvctl add serverpool' failed because the given server pool already exists.

Action: Make sure that the name of server pool is correct and a server pool with the given name doesn't exist.

PRKO-03032: Invalid instance name(s): {0}

Cause: Some of the supplied instance names do not exist in the database configuration.

Action: Please supply valid instance names and retry.

PRKO-03077: Failed to remove database {0}:

Cause: Failed to remove the database.

Action: Examine the accompanying message(s) for details of the error, and respond accordingly.

PRKO-03081: No such environment variable setting: {0}

Cause: The environment variable(s) does not exist for the specified resource.

Action: Supply a valid environment variable.

PRKO-03085: Volume device: {0}

Cause: Volume device label

Action: None

PRKO-03086: Mountpoint path: {0}

Cause: Mountpoint path label

Action: None

PRKO-03087: User: {0}

Cause: User label

Action: None

PRKO-03113: Administrator-managed database {1} can not support policy-managed service {0}.

Cause: The specified database does not support policy-managed services.

Action: Provide a database which supports policy-managed services.

PRKO-03114: Policy-managed database {1} can not support administrator-managed service {0}.

Cause: The specified database does not support administrator-managed services.

Action: Provide a database which supports administrator-managed services.

PRKO-03115: -P option cannot be used with policy-managed service {0}.

Cause: The -P option was specified for a policy-managed service.

Action: Use the -m option to specify failover processing for a policy-managed service.

PRKO-03116: '-g' or '-r' option should be provided

Cause: one of specified options should be provided.

Action: make sure that one of specified options is included into the command line.

PRKO-03117: Service {0} already exists in database {1}

Cause: The service being added already exists.

Action: If the service needs to be modified use 'srvctl modify service' command.

PRKO-03118: Failed to check if service {0} exists: {1}

Cause: Failed to get the service data.

Action: Make sure that Oracle Clusterware is active.

PRKO-03119: Database {0} cannot be started since it has no configured instances.

Cause: The specified database is an administrator-managed database and it cannot be started because no instances were configured.

Action: Use srvctl add instance command to configure the instance and then retry.

PRKO-03120: Database {0} cannot be stopped since it has no configured instances.

Cause: The specified database is an administrator-managed database and it could not be stopped because no instances were configured.

Action: Use `srvctl add instance` command to configure the instance and then retry.

PRKO-03121: -i option or -n option is required for starting an instance on the administrator-managed database {0}.

Cause: The specified database is an administrator-managed database and the `srvctl start instance` command requires the instance name or nodename to be specified.

Action: Use `srvctl start instance` command with either the `-i` or `-n` option to start the instance.

PRKO-03122: -i option or -n option is required for stopping an instance of database {0}

Cause: Neither the instance name nor the nodename was provided during '`srvctl stop instance`' command invocation.

Action: Use '`srvctl stop instance`' command with either the `-i` or `-n` option to specify which instance to stop.

PRKO-03125: Invalid value {0} for command line option {1}

Cause: Invalid value was specified for the command line option.

Action: Check the value printed and specify the correct value.

PRKO-03126: Invalid GNS logging level: "{0}"

Cause: The level of logging specified was not a positive integer.

Action: Specify a positive integer.

PRKO-03128: Unable to add database because the resource for diskgroup {0} could not be found. {1}

Cause: The resource for the specified disk group could not be found. Either the diskgroup name was misspelled or the diskgroup has not been mounted.

Action: Correct the diskgroup spelling or use `sqlplus` to create the diskgroup.

PRKO-03129: Unable to modify database because the resource for diskgroup {0} could not be found. {1}

Cause: The resource for the specified disk group could not be found. Either the diskgroup name was misspelled or the diskgroup has not been mounted.

Action: Correct the diskgroup spelling or use `sqlplus` to create the diskgroup.

PRKO-03130: Server pool {0} is internally managed as part of administrator-managed database configuration and therefore cannot be modified directly via srvpool object.

Cause: An attempt was made to alter configuration of an internally managed server pool that is hosting an administrator-managed configuration.

Action: Do not modify this server pool via `srvpool` object directly. Instead use `srvctl add/remove instance` or `srvctl modify database/service` to alter this server pool's configuration.

PRKO-03132: -i option or -n option is required for checking the status of an instance of database {0}

Cause: Neither the instance name nor the nodename was provided during '`srvctl status instance`' command invocation.

Action: Use '`srvctl status instance`' command with either the `-i` or `-n` option to check the status of the instance.

PRKO-03133: Database {0} has no instance on node {1}

Cause: Instance was not configured on the specified node.

Action: Both 'srvctl add instance' or 'srvctl modify instance' command can also be used to change inst-node mapping in administrator-managed db's. For policy-managed database, use either 'srvctl start instance' command with -n option to start the instance on the specified node or use 'srvctl modify instance' command to configure an instance for that node.

PRKO-03134: -n option cannot be specified in conjunction with -z option

Cause: -n and -z options were both provided during 'srvctl modify instance' command invocation.

Action: Use 'srvctl modify instance' command with either the -n or -z option to modify the node instance mapping of the database instance.

PRKO-03135: -z option cannot be used with administrator-managed database {0}

Cause: The -z option was specified in an attempt to remove node to instance mapping of administrator-managed database.

Action: Use 'srvctl remove instance' command to remove node instance mapping of administrator-managed database.

PRKO-03136: Option '-c' cannot be used with administrator-managed service {0}

Cause: The -c option was specified for administrator-managed service.

Action: Reissue the command without the -c option.

PRKO-03138: Node {0} does not belong to server pool {1} which defines nodes for service {2}

Cause: Node doesn't belong to the server pool which defines nodes which can be used to run the specified service.

Action: Supply a node which belongs to specified server pool.

PRKO-03139: Options '-i' and '-t' cannot be used with policy-managed service {0}

Cause: The -i and -t options were specified to relocate a policy-managed service.

Action: Use options -c and -n to relocate a service.

PRKO-03140: Options '-c' and '-n' cannot be used with administrator-managed service {0}

Cause: The -c and -n options were specified to relocate an administrator-managed service.

Action: Use options -i and -t to relocate a service.

PRKO-03141: Database {0} could not be removed because it was running

Cause: The 'srvctl remove database' command failed because the database was running.

Action: Stop the database by using 'srvctl stop database' command and then attempt to remove it. You can also use the force option to remove the running database.

PRKO-03142: Option '-i' cannot be used to enable/disable services for policy-managed database {0}

Cause: Policy-managed database services can only be enabled or disabled by node, not by instance.

Action: Use option `-n <node>` to specify nodes on which to enable or disable services for this policy-managed database.

PRKO-03143: Options '-i', '-r', '-n' and '-a' cannot be used to modify policy-managed service {0}

Cause: Options `-i`, `-r`, `-n` and `-a` can be used to modify administrator-managed service only.

Action: Make sure that the service you are going to modify is an administrator-managed service.

PRKO-03144: Option '-a' requires options '-n' and '-i' to be provided

Cause: Option `-a` can not be used without options `-n` and `-i`.

Action: Make sure that options `-n`, `-i` and `-a` are provided according to `'srvctl modify service'` syntax.

PRKO-03145: Option '-i' requires one of the options '-t', '-r' or '-n' to be set

Cause: Option `-i` can not be used without additional options.

Action: Make sure that required option is provided according to `'srvctl modify service'` syntax.

PRKO-03146: Option '-i' is not provided

Cause: Options `-t`, `-r`, and `-n` requires option `-i` to be set.

Action: Make sure that required option is provided according to `'srvctl modify service'` syntax.

PRKO-03147: Instance {0} cannot be removed because it is the only preferred instance for service(s) {1} for database {2}

Cause: An attempt was made to remove the instance which is the only preferred instance for specified services.

Action: Make sure that specified services have more than one preferred instance or modify services to not have the instance as a preferred instance.

PRKO-03148: Instance {0} does not support service {1}.

Cause: The given database instance is not defined as a preferred or available instance for the given service.

Action: Specify an instance that is defined as preferred or available instance for the given service.

PRKO-03149: The candidate server {0} of server pool {1} is different from the server {2} specified with the '-x' option

Cause: Specified server must be the candidate server of the specified server pool.

Action: Make sure that the server specified with `'-x'` option is the same as the candidate server of the given server pool.

PRKO-03150: The server pool(s) {0} specified with the '-g' cannot be used to add an administrator-managed database

Cause: A request to add an administrator-managed database specified the `-g` option.

Action: Use `'srvctl add database'` without the `'-g'` option to add an administrator-managed database.

PRKO-03151: Option '-g' cannot have more than one specified server pool when converting an administrator-managed database to a policy-managed database

Cause: An attempt was made to convert an administrator-managed database to a policy-managed database by specifying more than one server pool.

Action: Make sure to specify only one server pool with the '-g' option when converting an administrator-managed database to a policy-managed database.

PRKO-03152: The server pool(s) {0} specified with the '-g' option are subpools of Generic and therefore cannot be used to modify the server pool value of a policy-managed database

Cause: The supplied server pools are meant for managing administrator-managed databases because they are subpools of Generic.

Action: Make sure that none of the supplied server pools are meant for managing administrator-managed database. Only supply server pools meant for managing policy-managed databases to the -g option of 'srvctl modify database' command. Use 'srvctl config srvpool' command to list the qualified server pools meant for managing policy managed databases.

PRKO-03153: -i option and/or -n option is required for starting an instance on the policy-managed database {0}.

Cause: The specified database is a policy-managed database and the 'srvctl start instance' command requires the instance name and/or nodename to be specified.

Action: Use 'srvctl start instance' command with either the -i or -n option or both -i and -n options to start the instance.

PRKO-03154: Both -i and -n options are specified for starting an instance on the administrator-managed database {0}.

Cause: The specified database is an administrator-managed database and the 'srvctl start instance' command requires either the instance name or nodename to be specified but not both.

Action: Use 'srvctl start instance' command with either the -i or -n option to start the instance.

PRKO-03155: Can not start the instance {0} on the specified node {1} because the node is assigned to another user configured instance {2}

Cause: The database specified on 'srvctl start instance' is policy managed and has another instance already configured on the nodename specified with the -n option.

Action: Either reformulate the 'srvctl start instance' command so that there is no conflict with configured instances' nodes, or use 'srvctl modify instance' to change configured instances' nodes.

PRKO-03160: Server pool {0} is internally managed as part of administrator-managed database configuration and therefore cannot be queried directly via srvpool object.

Cause: An attempt was made to query configuration of an internally managed server pool that is hosting an administrator-managed configuration.

Action: Do not query this server pool via srvpool object directly. Instead use srvctl config/status database/service command to query servers that are part of this pool's configuration.

PRKO-03161: Server pool {0} is internally managed as part of administrator-managed database configuration and therefore cannot be removed directly via srvpool object.

Cause: An attempt was made to remove configuration of an internally managed server pool that is hosting an administrator-managed configuration.

Action: Do not remove this server pool via srvpool object directly. Instead use srvctl remove service/database command to remove this server pool and any service/database hosted by the server pool.

PRKO-03162: The actions setenv, getenv, and unsetenv are not supported for Single Client Access Name listener {0}

Cause: Failed to use srvctl setenv, getenv, and unsetenv listener command for specified Single Client Access Name Listener. The environment variables for Single Client Access Name Listener cannot be changed.

Action: Do not set, get, and unset environment variables for Single Client Access Name Listener.

PRKO-03163: Options '-u', '-r', '-a', '-g' and '-c' cannot be used to add service {0} for single instance database {1}

Cause: Failed to add specified service because provided options can not be used to add a service for single instance database.

Action: use 'srvctl add service' command without options -u, -r, -a, -g or -c.

PRKO-03164: Options '-r', '-f', '-n', '-i', '-t', '-a', '-c' and '-x' cannot be used to modify service {0} for single instance database {1}

Cause: Failed to modify specified service because provided options can not be used to modify a service for single instance database.

Action: Use 'srvctl modify service' command without options -r, -f, -n, -i, -t, -a, -c or -x.

PRKO-03165: Service {0} is defined for single instance database {1} and therefore cannot be relocated

Cause: Failed to relocate specified service because provided options can not be used to relocate a service for single instance database.

Action: Make sure that you issue 'srvctl relocate service' command for the service which is not defined for a single instance database.

PRKO-03166: Invalid GNS parameter: "{0}"

Cause: An invalid parameter value was specified.

Action: A parameter value must have the following format: <name>:<value>. The name may not contain a colon (":"). The value may not contain a comma (",").

PRKO-03167: EONS has been deprecated and ONS should be used to set and modify the local port for Enterprise Manager.

Cause: The command being executed has been deprecated and will not do any action.

Action: Use online help 'srvctl -h' or check the documentation for the commands supported by srvctl.

PRKO-03174: 'srvctl relocate service' command is not supported on RAC One Node database service {0}

Cause: An attempt was made to relocate a RAC One Node database service using 'srvctl relocate service' command.

Action: Use 'srvctl relocate database' command to relocate the RAC One Node database and its services to the target server.

PRKO-03175: TAF policy 'PRECONNECT' cannot be used to add a service for single instance database {0}

Cause: Failed to add specified service because provided TAF specification can not be used with a single instance database.

Action: Use 'srvctl add service' command without 'PRECONNECT' TAF policy.

PRKO-03176: Option '-g' cannot be used with administrator-managed service {0}

Cause: An attempt to change the server pool of service was rejected because the -g option cannot be used with administrator-managed service.

Action: Change the preferred and available instances of the service via 'srvctl modify service' command to manage placement of administrator-managed service.

PRKO-03226: Upgrade from version {0} to version {1} using 'srvctl upgrade model' command of version {2} is not supported

Cause: A 'srvctl upgrade model' command was issued for a version change that is other than an increase in patch set level.

Action: Check that the versions provided are correct.

PRKO-03229: Option '-i' cannot be used to enable or disable service(s) {0} for single instance database {1}

Cause: Failed to enable/disable specified service because its database is a single instance database.

Action: Make sure that you issue 'srvctl enable/disable service' command without option -i.

PRKO-03241: The '-o <oracle_home>' option value "{0}" corresponds to a pathname that does not exist or is not a directory

Cause: The '-o <oracle_home>' option value did not resolve to an existing directory pathname.

Action: Ensure that the '-o <oracle_home>' option value corresponds to an existing directory pathname.

PRKO-03242: The '-s <state_file>' option value "{0}" is a directory

Cause: The '-s <state_file>' option value resolved to an existing directory pathname instead of a file pathname.

Action: Ensure that the '-s <state_file>' option value corresponds to file.

PRKO-03243: The '-s <state_file>' option value "{0}" is a file under a non-writable directory

Cause: The '-s <state_file>' option value resolved to a non-writable pathname.

Action: Ensure that the state file parent directory has write permissions.

PRKO-03244: The '-s <state_file>' option value "{0}" already exists

Cause: The '-s <state_file>' option value resolved to an existing file pathname.

Action: Ensure that the '-s <state_file>' option value corresponds to a non-existing file pathname.

PRKO-03245: Cannot determine the canonical path to the state file "{0}"

Cause: The '-s <state_file>' option value specified a pathname for which the canonical path cannot be retrieved.

Action: Provide the absolute pathname for '-s <state_file>' option value.

PRKO-03246: The '-s <state_file>' option value "{0}" does not exist or cannot be read

Cause: The '-s <state_file>' option value mapped to a non-existing or non-readable file pathname.

Action: Ensure that the '-s <state_file>' option value corresponds to an existing readable file pathname.

PRKO-03249: Failed to add service {0} with PRECONNECT TAF policy because PRECONNECT TAF policy requires at least one available instance

Cause: Attempt to add a service with PRECONNECT TAF policy was rejected because no available instance was specified.

Action: Specify at least one available instance using -a option of 'srvctl add service' command if the service TAF policy is to be PRECONNECT.

PRKO-03251: Failed to relocate as relocation is not supported in Oracle Restart mode

Cause: Attempt to relocate failed as relocation is unsupported in Oracle Restart.

Action: Ensure you are in a cluster environment to relocate managed entities.

PRKO-03252: Failed to convert as convert action is not supported in Oracle Restart Mode

Cause: Attempt to convert failed as convert action is unsupported in Oracle Restart.

Action: Ensure you are in a cluster environment to convert managed entities.

PRKO-03253: An attempt to modify the OC4J port failed because OC4J is running. Use -f to force stop and restart of OC4J.

Cause: A request to modify the port number of OC4J was rejected because such modification requires OC4J to be stopped and restarted.

Action: Use '-f' option to force restart of OC4J.

PRKO-09059: Invalid command line options for listener. '-a' can not be specified with '-l'.

Cause: Invalid combination of options specified for listener command.

Action: Issue the command using either '-l <listener_name>' or '-a'.

PRKO-09063: Single Client Access Name must start with a letter unless it is an IP address

Cause: A SCAN was supplied which did not begin with a letter, however SCAN names must begin with a letter.

Action: Supply a SCAN name that begins with a letter.

PRKO-09066: Invalid upgrade phase "{0}" for upgrade model command

Cause: An invalid value was specified for upgrade phase.

Action: Upgrade phase must be either 'first' or 'last'.

PRKO-09067: Invalid network server type "{0}"

Cause: An invalid value was specified for network server type.

Action: Network server type must be 'static' or 'dhcp' or 'mixed'.

PRKO-09068: Invalid port number {0}

Cause: A supplied port number was not in the valid, non-privileged range 1024-65535.

Action: Specify a port number that is bigger than 1023.

PRVF-00001 to PRVF-10409

PRVF-00001: Could not retrieve static nodelist. Verification cannot proceed

Cause: Error running lsnodes/olsnodes.

Action: Ensure that the executable exists and that it is executable by your OS userid.

PRVF-00002: Could not retrieve local nodename

Cause: Unable to determine local host name using Java network functions.

Action: Ensure that hostname is defined correctly using the 'hostname' command.

PRVF-00006: Unable to check the existence of Oracle Home "{0}"

Cause: Could not verify the existence of the Oracle Home specified.

Action: Ensure that the Oracle Home location exists and is writeable by your user ID.

PRVF-00020: "{0}" is not writeable

Cause: The path specified is not writeable.

Action: Ensure that write access exists for the specified path.

PRVF-00040: The Remote Shell "{0}" requested by the client does not exist

Cause: Could not locate remote shell requested by the user.

Action: Ensure that the remote shell exists on all the nodes participating in the operation.

PRVF-00041: The Remote shell "{0}" requested by the client is not an executable file

Cause: The remote shell requested by the user is not a file.

Action: Ensure that the remote shell exists on all the nodes participating in the operation and that it is a file with execute permissions.

PRVF-00042: The Remote Copy command "{0}" requested by the client does not exist

Cause: Cannot locate remote copy command requested by the user.

Action: Ensure that the remote copy command exists on all the nodes participating in the operation.

PRVF-00045: The Secure Shell "{0}" requested by the client does not exist

Cause: Could not locate the secure shell executable specified.

Action: Ensure that the executable file specified exists.

PRVF-00046: The Secure Copy command "{0}" requested by the client does not exist

Cause: Could not locate the secure copy executable specified.

Action: Ensure that the executable file specified exists.

PRVF-00047: Unable to execute the Secure Shell "{0}" requested by the client

Cause: Could not execute the secure shell specified.

Action: Ensure that the secure shell specified allows execute access for the current user ID.

PRVF-00048: Unable to execute the Secure Copy command "{0}" requested by the client

Cause: Could not execute the secure copy specified.

Action: Ensure that the secure copy specified allows execute access for the current user ID.

PRVF-00051: The Remote Copy command "{0}" requested by the client is not an executable file

Cause: The remote copy command requested by the user was not an executable file.

Action: Ensure that the remote copy command exists on all the nodes participating in the operation and that it is a file with execute permissions.

PRVF-00054: Unable to find oifcfg executable file in directory "{0}"

Cause: An attempt to locate oifcfg executable file in specified directory failed.

Action: This is an internal error. Contact Oracle Support Services.

PRVF-00055: User "{0}" does not have sufficient authorization to run this command

Cause: An attempt to run the CVU command failed because the user does not have sufficient authority to run it.

Action: The commands can only be run as root user(uid=0). Make sure that you run these commands as appropriate user.

PRVF-00056: User "{0}" does not have sufficient authorization to run this command

Cause: An attempt to run the CVU command failed because the user does not have sufficient authority to run it.

Action: The command can be run only by the Oracle installation owner. Make sure that you run these commands as appropriate user.

PRVF-02409: The device file "{0}" does not exist on node "{1}"

Cause: The expected device file could not be found.

Action: To enable asynchronous input-output operations using the asynchronous device driver, create the device file.

PRVF-02410: The device file "{0}" does not exist on nodes:

Cause: The expected device file could not be found.

Action: To enable asynchronous input-output operations using the asynchronous device driver, create the device file.

PRVF-02411: The file "{0}" is not a device file on nodes:

Cause: The file was not a device file.

Action: Ensure that the correct path and filename specified for the device file.

PRVF-02412: The file "{0}" is not a device file on node "{1}"

Cause: The file was not a device file.

Action: Ensure that the correct path and filename are specified for the device file.

PRVF-02413: Failed to retrieve details of the device file "{0}" on nodes:

Cause: An attempt to retrieve the attributes of a device file failed.

Action: Ensure that the file exists on the system and user has correct permissions to retrieve the details of specified device file.

PRVF-02414: Failed to retrieve details of the device file "{0}" on node "{1}"

Cause: An attempt to retrieve the attributes of a device file failed.

Action: Ensure that the file exists on the system and user has correct permissions to retrieve the details of specified device file.

PRVF-02415: The minor number of device file "{0}" is incorrect on the nodes:

Cause: The minor number of a device file was found incorrect as per the requirement.

Action: The third least significant bit (the 0x4 bit hexadecimal) of the minor number must be set.

PRVF-02416: The minor number of device file "{0}" is incorrect on the node "{1}"

Cause: The minor number of a device file was found incorrect as per the requirement.

Action: The third least significant bit (the 0x4 bit hexadecimal) of the minor number must be set.

PRVF-02417: Failed to retrieve the ID for device file "{0}" on the node "{1}"

Cause: Device file ID could not be retrieved on the node.

Action: Ensure that the device file exists at the specified path and is set to correct device ID.

PRVF-02418: Failed to retrieve minor number value for the device file "{0}" on the node "{1}"

Cause: The device file ID does not contain the correct minor number.

Action: Ensure the value of the minor number of the device file is correct.

PRVF-03911: Length of value of environment variable "{0}" exceeds the maximum recommended length of "{1}" on the nodes:

Cause: Length of the value of environment variable exceeds the recommended length.

Action: Ensure that the value of the environment variable does not exceed the standard operating system specified limit.

PRVF-03912: Length of value of environment variable "{0}" exceeds the maximum recommended length of "{1}" on the node "{2}"

Cause: Length of the value of environment variable exceeds the recommended length.

Action: Ensure that the value of the environment variable does not exceed the standard operating system specified limit. Restart the installer after changing the setting for environment variable.

PRVF-03913: Environment variable name "{0}" is set on nodes:

Cause: The environment variable was set on the nodes indicated.

Action: Ensure that the environment variable is not set to any value.

PRVF-03914: Environment variable name "{0}" is set on node "{1}"

Cause: The environment variable was set on the node indicated.

Action: Ensure that the environment variable is not set to any value. Restart the installer after changing the setting for environment variable.

PRVF-03915: Environment variable name "{0}" is not set on nodes:

Cause: Environment variable value could not be determined.

Action: Ensure that the environment variable is set and access permissions for the Oracle user allow access to read the environment variables.

PRVF-03916: Environment variable name "{0}" is not set on node "{1}"

Cause: Environment variable value could not be determined.

Action: Ensure that the environment variable is set and access permissions for the Oracle user allow access to read the environment variables. Restart the installer after changing the setting for environment variable.

PRVF-03917: Environment variable check for variable "{0}" cannot be performed on nodes:

Cause: Environment Variable value could not be determined.

Action: Ensure that the environment variable is set in either system or user environment and access permissions for the Oracle user allow access to read the environment variables.

PRVF-03918: Can not read environment variable "{0}" from node "{1}"

Cause: Environment variable value could not be determined.

Action: Check user equivalence and whether the user has administrative privileges on the node.

PRVF-03919: Failed to retrieve value of environment variable "{0}"

Cause: Environment variable value could not be determined.

Action: Check user equivalence and whether the user has administrative privileges on the node.

PRVF-03920: Environment variable name "{0}" is invalid for this operating system.

Cause: Environment variable name does not meet operating system standards.

Action: Ensure that the environment variable name is as per the operating system standards. Restart the installer after changing the setting for environment variable.

PRVF-03921: Environment variable name not specified.

Cause: Environment variable name was not specified.

Action: Ensure that a valid environment variable name is specified.

PRVF-03928: Adding the Oracle binary location to the PATH environment variable will exceed the OS length limit of ["{0}"], The maximum allowed length for PATH environment variable is ["{1}"] on the nodes:

Cause: The environment variable PATH needs to be updated to include the value "%ORACLE_HOME%/bin;". However, doing so will cause PATH to exceed the maximum allowable length that this operating system allows.

Action: Ensure that the length of your current PATH environment variable is less than that of specified maximum allowed length, so that adding of "%ORACLE_

HOME%/bin;" does not exceed the operating system's environment variable length limit.

PRVF-03929: Adding the Oracle binary location to the PATH environment variable will exceed the OS length limit of ["{0}"], The maximum allowed length for PATH environment variable is [{"1}"] on the node "{2}"

Cause: The installer needs to update the PATH environment variable to include the value "%ORACLE_HOME%/bin;". However, doing so will cause PATH to exceed the maximum allowable length that this operating system allows.

Action: Ensure that the length of your current PATH environment variable is less than that of specified maximum allowed length, so that adding of "%ORACLE_HOME%/bin;" does not exceed the system's environment variable length limit. Restart the installer after changing the setting for environment variable.

PRVF-04001: Check: Space available on "{0}"

Cause: Could not determine mount point for location specified.

Action: Ensure that the location specified is available.

PRVF-04007: User equivalence check failed for user "{0}"

Cause: User equivalence for the specified user did not exist among all the nodes participating in the operation.

Action: Verify user equivalence on all the nodes participating in the operation, see "Enabling SSH User Equivalency on Cluster Member Nodes" documentation.

PRVF-04008: User equivalence unavailable on all the specified nodes

Cause: User equivalence doesn't exist between the local node and the remote node(s).

Action: Ensure that user equivalence exists on all the nodes specified.

PRVF-04020: Inconsistent group IDs found for group "{0}"

Cause: The group ID for the specified group is not the same across all the nodes.

Action: Make sure that the group has the same group ID across all the nodes.

PRVF-04025: Inventory configuration file "{0}" does not exist

Cause: Cannot locate the inventory configuration file specified.

Action: Ensure that the correct inventory location was supplied and that the inventory file is there.

PRVF-04037: CRS is not installed on any of the nodes

Cause: Could not identify a CRS installation on any node.

Action: Ensure that CRS is installed on all the nodes participating in the operation.

PRVF-04038: CRS is not installed on nodes:

Cause: An attempt to identify Oracle Clusterware installation failed on specified nodes.

Action: Ensure that Oracle Clusterware is installed on all the nodes participating in the operation.

PRVF-04041: CSS is probably working with a non-clustered, local-only configuration on all the nodes

Cause: Oracle CSS was found to be configured to run in a local-only (non-clustered) environment on all the nodes.

Action: Ensure that cluster setup is correct and reconfigure Cluster Synchronization Services (CSS) as necessary on the nodes that are supposed to be executing in a clustered environment. See Oracle Cluster Synchronization Services documentation for further information.

PRVF-04042: CSS is probably working with a non-clustered, local-only configuration on nodes:

Cause: Oracle CSS was found to be configured to run in a local-only (non-clustered) environment on the nodes specified.

Action: Ensure that cluster setup is correct and reconfigure CSS as necessary on the nodes that are supposed to be executing in a clustered environment, see documentation regarding usage of the 'localconfig' script.

PRVF-04043: Unable to obtain OCR integrity details from any of the nodes

Cause: OCR was not found to be in a healthy state on any of the nodes.

Action: Verify the state of OCR on each of the nodes using 'ocrcheck'.

PRVF-04044: Unable to obtain OCR integrity details from nodes:

Cause: OCR was not found to be in a healthy state on some of the nodes.

Action: Verify the state of OCR on each of the nodes identified using 'ocrcheck'.

PRVF-04046: OCR ID is inconsistent among the nodes

Cause: Multiple OCR ID's found across the cluster nodes specified.

Action: Verify Oracle Clusterware configuration and setup with 'ocrcheck' on each node specified. See 'ocrcheck' documentation for further information.

PRVF-04048: Version of OCR found "{0}", expected version of OCR for this release is "{1}"

Cause: An incorrect version of OCR was found running on all the nodes.

Action: Verify version of OCR running on all the nodes using 'ocrcheck'.

PRVF-04049: OCR version is inconsistent amongst the nodes

Cause: Found different version of OCR running on the cluster nodes.

Action: Ensure that the correct version of OCR is running on all the nodes using 'ocrcheck'.

PRVF-04052: Total space in OCR device is inconsistent amongst the nodes

Cause: Found possible different devices in use across the nodes.

Action: Verify that the same OCR devices are used across the cluster nodes using 'ocrcheck'.

PRVF-04055: OCR integrity is invalid

Cause: Cluster registry integrity check failed.

Action: Verify state of cluster registry using ocrcheck on the nodes participating in the verification operation.

PRVF-04056: OCR integrity results are inconsistent amongst the nodes

Cause: Cluster registry integrity check failed on some of the nodes.

Action: Verify state of cluster registry using ocrcheck on the nodes participating in the verification operation.

PRVF-04060: Unable to retrieve storage information

Cause: Internal error encountered while trying to retrieve storage information.

Action: If problem persists report issue to Oracle support and provide trace files generated when the cluvfy command is executed. Trace files should be located under <CRSHOME>/cv/log.

PRVF-04079: The number of addresses does not match the number of node

Cause: Cannot determine IP address for every node.

Action: Verify each node in the cluster has a valid IP address.

PRVF-04080: Network interface information cannot be obtained from any of the node

Cause: Could not find any network interface on any node in the cluster.

Action: Verify network interface(s) operational status on the cluster nodes.

PRVF-04083: Node reachability check failed from node "{0}"

Cause: Network link to target node could not be verified using PING.

Action: Verify network link to target node using the PING utility.

PRVF-04084: Make sure IP address "{0}" is up and is a valid IP address on node "{1}"

Cause: The network interface, IP address and subnet identified as "<network interface> : <IP address> [<subnet>]" is not available or is not functioning correctly.

Action: Please verify that the network interface identified is functioning as intended.

PRVF-04087: Node connectivity check failed

Cause: Encountered errors attempting to verify node connectivity using the "OS ping" utility.

Action: Ensure that the IP addresses that failed can be reached using the OS ping utility and resolve any issues found with those IP addresses/interfaces.

PRVF-04090: Node connectivity failed for interface "{0}"

Cause: Unable to verify connectivity to the interface indicated using the "OS ping" utility.

Action: Verify that the interface indicated is available.

PRVF-04095: Unable to reach any of the nodes

Cause: Unable to reach any of the nodes using the OS ping command.

Action: Ensure that the nodes specified are accessible.

PRVF-04097: Node "{0}" is not reachable

Cause: Unable to reach the node specified using the OS ping command.

Action: Ensure that the node specified is accessible.

PRVF-04098: User equivalence not found for node "{0}"

Cause: Cannot access node specified using user equivalence.

Action: Ensure that user equivalence is setup between the local node and the node specified.

PRVF-04101: Could not find a suitable set of interfaces for VIPs

Cause: Could not find a set of network interface adapters suitable for Virtual IP communication in the cluster .

Action: Ensure that the network interface adapters are installed and configured correctly on each node in the cluster and that each interface can communicate with a network gateway.

PRVF-04102: Could not find a suitable set of interfaces for the private interconnect

Cause: Could not find a set of network interface adapters suitable for Private communication in the cluster.

Action: Ensure that the network interface adapters are installed and configured correctly on each node in the cluster according to RFC 1918, or that the interfaces are not accessible from the public network.

PRVF-04107: Source node "{0}" is not reachable from local node

Cause: Unable to reach the source node specified using the OS ping command.

Action: Ensure that the source node specified is accessible.

PRVF-04108: User equivalence not found for source node "{0}"

Cause: Cannot access source node specified using user equivalence.

Action: Ensure that user equivalence is setup between the local node and the source node specified.

PRVF-04112: Cannot identify Oracle Restart installation

Cause: Cannot determine location of Oracle Restart installation.

Action: Ensure that the Oracle Restart environment is setup correctly.

PRVF-04113: Unable to obtain OLR integrity details from the local node

Cause: Could not verify the state of OLR on the local node.

Action: Check the status of OLR on the local node using the command 'ocrcheck -local'.

PRVF-04118: Unable to obtain Oracle Restart integrity details from the local node

Cause: Encountered an error when trying to run 'crsctl check has', or OHASD was found to be offline.

Action: Check the status of Oracle Restart using the 'crsctl check has' command on the local node.

PRVF-04123: Inconsistent user IDs found for user "{0}"

Cause: The user ID for the specified user is not the same across all the nodes.

Action: Make sure that the user has the same user ID across all the nodes.

PRVF-04125: Failed to retrieve storage type for "{0}"

Cause: The storage location specified may be non-existent or invalid or the user running the check may not have permissions to access the specified storage.

Action: Specify a valid existing location, and ensure that the user running the check has valid read permissions to this location.

PRVF-04126: Global failure for all nodes during execution of space check command

Cause: CVU's attempt to execute the space check command on all nodes had a total failure.

Action: Make sure that the location specified is a valid location and available on all nodes.

PRVF-04127: Unable to obtain OLR location

Cause: Could not verify the state of OLR.

Action: Check the status of OLR using the command 'ocrcheck -config -local'.

PRVF-04132: Multiple users "{0}" with UID "{1}" exist on "{2}".

Cause: More than one user is found to have the same user ID as specified in the message.

Action: Ensure that no two users share the same UID.

PRVF-04143: Media Sensing of TCP/IP is enabled on the nodes:

Cause: Media Sensing setting for TCP/IP is enabled.

Action: To disable Media Sensing for TCP/IP, add the REG_DWORD registry entry by name 'DisableDHCPMediaSense' and value 1 to the 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' subkey. It is recommended to backup the Windows Registry before proceeding with any changes, Restart your system to make your changes effective after changing the registry.

PRVF-04144: Media Sensing status check for TCP/IP cannot be performed on nodes:

Cause: Media Sensing status could not be determined.

Action: Ensure that the access permissions for the Oracle user allow access to the Windows Registry and Registry has the REG_WORD entry named 'DisableDHCPMediaSense' with value 1 under 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' sub key on the node. It is recommended to backup the Windows Registry before proceeding with any changes, Restart your system to make your changes effective after changing the registry.

PRVF-04145: Error reading Registry sub key 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' from Windows Registry

Cause: Windows Registry sub key 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' could not be read.

Action: Ensure that the access permissions for the Oracle user allow access to the Windows Registry.

PRVF-04146: Error reading Registry sub key 'HKEY_LOCAL_MACHINE/Cluster/Parameters' from Windows Registry

Cause: Windows Registry sub key 'HKEY_LOCAL_MACHINE/Cluster/Parameters' could not be read.

Action: Ensure that the access permissions for the Oracle user allow access to the Windows Registry.

PRVF-04147: Error reading Registry value 'DisableDHCPMediaSense' for Windows Media Sensing

Cause: Could not read Windows Registry value 'DisableDHCPMediaSense' under 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' sub key.

Action: Ensure that the access permissions for the Oracle user allow access to the Windows Registry and the Registry value 'DisableDHCPMediaSense' under 'HKEY_LOCAL_MACHINE/System/CurrentControlSet/Services/Tcpip/Parameters' sub key is present on the node.

PRVF-04148: Error reading Registry value 'DisableClusSvcMediaSense' for Windows Media Sensing

Cause: Could not read Windows Registry value 'DisableClusSvcMediaSense' under 'HKEY_LOCAL_MACHINE/Cluster/Parameters' sub key.

Action: Ensure that the access permissions for the Oracle user allow access to the Windows Registry and the Registry value 'DisableClusSvcMediaSense' under 'HKEY_LOCAL_MACHINE/Cluster/Parameters' sub key is present on the node.

PRVF-04151: Found different access permissions for the above storage location across the nodes specified

Cause: The access permissions for the path specified (i.e. read, write, execute) are different, or could not be determined, across the nodes specified.

Action: Ensure that the access permissions allow access for the Oracle user on all the nodes specified.

PRVF-04152: The access permissions for the above storage location do not allow the user access across the nodes specified

Cause: The access permissions for the path specified (i.e. read, write, execute) do not allow the user access.

Action: Ensure that the access permissions allow access for the Oracle user on all the nodes specified.

PRVF-04164: Size of the OCR location "{0}" does not meet the requirement. [Expected="{1}" ; Found="{2}"]

Cause: Size of the ocr device does not meet the requirement

Action: Increase the size of the ocr device

PRVF-04190: Verification of the hosts config file failed

Cause: The '/etc/hosts' file(s) contain incorrect, or incomplete, network host information.

Action: Review the contents of the node's '/etc/hosts' file and ensure that each entry contains a valid IP address and a canonical host name for the specified IP address.

PRVF-04192: Encountered error while trying to check hosts file

Cause: Could not verify the contents of the '/etc/hosts' file.

Action: Review the node's 'hosts' file and ensure that it exists, has necessary permissions and each entry contains at least an IP address and a host name for the IP address specified.

PRVF-04211: The specified OCR location "{0}" is not a partition

Cause: The location specified should be a disk partition rather than the disk itself.

Action: Specify a disk partition as the OCR storage.

PRVF-04212: The specified Voting Disk location "{0}" is not a partition

Cause: The location specified should be a disk partition rather than the disk itself.

Action: Specify a disk partition as the Voting Disk storage.

PRVF-04213: Encountered issues with the following OCR Device/Files

Cause: 'ocrcheck' returned failure, or warning, messages with the Device(s)/File(s) listed.

Action: Run 'ocrcheck' and resolve issues reported.

PRVF-04253: CRS integrity check passed, but encountered some warnings

Cause: Some warnings were encountered while verifying CRS integrity.

Action: Review warnings and make modifications as necessary.

PRVF-04309: The effective group id "{0}" differs from the primary group id "{1}" of user "{2}"

Cause: The user is currently logged into a group that is not user's primary group.

Action: Invoke the application after logging in to the primary group (using command 'newgrp <primary group>').

PRVF-04314: There is no primary group on this Operating System

Cause: An attempt was made to check users primary group on an Operating System where there are no primary groups.

Action: This is an internal error; contact Oracle Support.

PRVF-04317: User "{0}" is part of group "{1}". Check failed

Cause: The user who was executing this check was found to be part of root group.

Action: Use the 'id' command to check if the user is part of root group. Remove the user from root group using the 'usermod' command and try again.

PRVF-04318: Checking that user "{0}" is not part of "{1}" group could not be performed on node "{2}"

Cause: A node specific error occurred while checking if user is not part of root group.

Action: Check that the node is accessible and user equivalence exists between the node on which command was executed and the node on which the check failed.

PRVF-04353: Proper soft limit for resource "{0}" not found on node "{1}" [Expected = "{2}" ; Found = "{3}"]

Cause: Soft limit for the resource does not meet the requirement on the specified node.

Action: Modify the resource limits to meet the requirement.

PRVF-04354: Proper hard limit for resource "{0}" not found on node "{1}" [Expected = "{2}" ; Found = "{3}"]

Cause: Hard limit for the resource does not meet the requirement on the specified node.

Action: Modify the resource limits to meet the requirement.

PRVF-04355: Resource soft limit check for "{0}" failed on node "{1}"

Cause: Soft limit of the resource could not be determined.

Action: Ensure that the resource limit configuration is accessible.

PRVF-04356: Resource hard limit check for "{0}" failed on node "{1}"

Cause: Hard limit of the resource could not be determined.

Action: Ensure that the resource limit configuration is accessible.

PRVF-04363: Persistent configuration check for cluster nodes failed

Cause: The nodes IP address configuration was not found to be persistent.

Action: Make the nodes IP address configuration persistent using the 'crsctl pin css' command, see Oracle documentation 'Pinning Cluster Nodes for Oracle Database Release' for further information."

PRVF-04528: Check for existence of config file "{0}" could not be performed on node "{1}".

Cause: Could not verify existence of configuration file specified.

Action: Verify access to node indicated and that the config file exists.

PRVF-04529: Host-guid of node "{0}" is not unique

Cause: The system guid value is not unique across all the cluster nodes.

Action: Ensure that the guid value is unique across all cluster nodes using 'ocrcheck'.

PRVF-04530: OCFS is not configured in runlevel 3,4 and 5 on the node

Cause: Runlevel was not configured with levels 3,4 and 5 all being on.

Action: Check OCFS configuration and ensure the run levels indicated are on.

PRVF-04554: Unable to retrieve {0} resource name from node {1}.

Cause: Could not identify node application resource name specified on the node specified.

Action: Ensure that the node application resource name specified is available for the node specified.

PRVF-04555: Node application "{0}" does not exist on node "{1}"

Cause: Could not identify resource specified on the node specified.

Action: Ensure that the resource specified is available for the node specified.

PRVF-04556: Failed to check existence of node application "{0}" on node "{1}"

Cause: Could not verify existence of the nodeapp identified on the node specified .

Action: Ensure that the resource specified is available on the node specified, see 'srvctl add nodeapps' for further information.

PRVF-04567: Failed to check existence of VIP node application on nodes "{0}"

Cause: An attempt to verify existence of the VIP on the nodes specified failed.

Action: Look at the accompanying messages for details on the cause of failure.

PRVF-04570: Failed to check existence of NETWORK node application on nodes "{0}"

Cause: An attempt to verify existence of the NETWORK node application on the nodes specified failed.

Action: Look at the accompanying messages for details on the cause of failure.

PRVF-04573: Failed to check existence of GSD node application on nodes "{0}"

Cause: An attempt to verify existence of the GSD node application on the nodes specified failed.

Action: Look at the accompanying messages for details on the cause of failure.

PRVF-04576: Failed to check existence of ONS node application on nodes "{0}"

Cause: An attempt to verify existence of the ONS node application on the nodes specified failed.

Action: Look at the accompanying messages for details on the cause of failure.

PRVF-04578: Failed to check existence of node applications on nodes "{0}"

Cause: An attempt to verify existence of node applications on the nodes specified failed.

Action: Look at the accompanying messages for details on the cause of failure.

PRVF-04579: An error occurred while parsing the output of the command "{0}" for node application resource "{1}". The output is: "{2}"

Cause: An error occurred while parsing output of the command listed for the resource listed.

Action: This is an internal error. Contact Oracle Support Services.

PRVF-04580: Node applications do not exist on any node of the cluster

Cause: Node applications were not configured on the cluster nodes.

Action: Node applications are created when root scripts are run. They can be also be created using the command 'srvctl add nodeapps'.

PRVF-04606: User equivalence not found for reference node "{0}"

Cause: Cannot access reference node using user equivalence.

Action: Ensure that user equivalence is configured between the local node and the node specified. See Enabling SSH User Equivalency on Cluster Member Nodes documentation for further information.

PRVF-04657: Name resolution setup check for "{0}" (IP address: {1}) failed

Cause: Inconsistent IP address definitions found for the SCAN name identified using DNS and configured name resolution mechanism(s).

Action: Look up the SCAN name with nslookup, and make sure the returned IP addresses are consistent with those defined in NIS and /etc/hosts as configured in /etc/nsswitch.conf by reconfiguring the latter. Check the Name Service Cache Daemon (/usr/sbin/nscd) by clearing its cache and restarting it.

PRVF-04661: Found inconsistent 'hosts' entry in /etc/nsswitch.conf on node {0}

Cause: The 'hosts' specifications in the /etc/nsswitch.conf file is different the node specified.

Action: Ensure that the 'hosts' entries define the same lookup order in the /etc/nsswitch.conf file across all cluster nodes.

PRVF-04663: Found configuration issue with the 'hosts' entry in the /etc/nsswitch.conf file

Cause: The 'hosts' specifications in the /etc/nsswitch.conf file should specify 'dns' before 'nis' to ensure proper IP address to name mapping.

Action: Ensure that the 'hosts' entries across the cluster nodes define 'dns' lookup before 'nis' lookup.

PRVF-04664: Found inconsistent name resolution entries for SCAN name "{0}"

Cause: The nslookup utility and the configured name resolution mechanism(s), as defined in /etc/nsswitch.conf, returned inconsistent IP address information for the SCAN name identified.

Action: Check the Name Service Cache Daemon (/usr/sbin/nscd), the Domain Name Server (nslookup) and the /etc/hosts file to make sure the IP address for the SCAN names are registered correctly.

PRVF-04758: 'lsnodes' could not be executed on the node

Cause: Error running 'lsnodes'.

Action: Ensure that the executable exists and that it is executable by your OS userid.

PRVF-04759: 'lsnodes' execution failed on the node

Cause: Error running 'lsnodes'.

Action: Ensure that the executable <CRSHOME>/bin/lsnodes exists and that it is executable by your OS userid.

PRVF-04761: Multiple partitions found. Cluster is fragmented.

Cause: An attempt to verify that the list of nodes that constitute the cluster is same on all nodes failed because different lists of cluster nodes were obtained on different nodes.

Action: Make sure that all nodes specified in the command belong to the same cluster. Make sure that all nodes share the same voting disk.

PRVF-04859: Location "{0}" not accessible on node(s) to be added.

Cause: Location does not exist, or cannot be created, on node(s) to be added.

Action: Ensure location either exists or can be created on the node(s) to be added.

PRVF-04864: Path location check failed for: "{0}"

Cause: Cannot write to path, or parent of path, specified.

Action: Verify access to entire path specified across cluster nodes(s).

PRVF-04866: Device location check failed for: "{0}"

Cause: Cannot verify location specified.

Action: Verify location specified is accessible across cluster node(s).

PRVF-04868: Virtual IP (VIP) "{0}" found for node "{1}"

Cause: The VIP node application identified was found on the node specified.

Action: Removed the specified VIP node application from the node specified.

PRVF-04869: Shared OCR location check failed

Cause: Problem reading inventory file for CRS home location.

Action: Verify inventory file integrity.

PRVF-04950: Error checking Operating System Version compatibility for Universal Storage Manager on node "{0}"

Cause: A remote operation to check Operating System version on the remote node failed.

Action: See the action for the additional error message displayed.

PRVF-04954: Version "{0}" is NOT supported for installing ACFS on node "{1}"

Cause: The version of operating system on the node is not compatible for installing ACFS.

Action: Check documentation for compatible version and install compatible version.

PRVF-05054: Verification of SCAN VIP and Listener setup failed

Cause: Could not identify any SCAN, or Scan Listener, resources on the cluster.

Action: Verify SCAN configuration using 'srvctl config scan'.

PRVF-05056: Scan Listener "{0}" not running

Cause: The identified Listener was not in the running state.

Action: Start the identified Listener using 'srvctl start listener'.

PRVF-05057: Scan Listener port for listener "{0}" do not match other ports

Cause: The port number used for the listener identified does not match those of all instances of the Listener started.

Action: Ensure that all the port numbers for the identified Listener match. See the commands 'srvctl config scan' and 'srvctl modify scan' for details on how to inspect and modify scan resource port numbers.

PRVF-05059: An error was encountered while verifying the SCAN configuration

Cause: An error was encountered while obtaining SCAN information.

Action: Review additional messages displayed for details of the error that was encountered.

PRVF-05060: SCAN Listener processing error

Cause: An error was encountered while obtaining SCAN Listener information.

Action: Review additional messages displayed for details of the error that was encountered.

PRVF-05061: SCAN VIP "{0}" not running

Cause: The SCAN VIP resources is not in the 'running' state.

Action: Start the SCAN VIP resource using using 'srvctl start scan -i <num>'.

PRVF-05062: SCAN VIP "{0}" and Scan Listener "{1}" not running

Cause: The SCAN VIP and SCAN Listener resources are not in the 'running' state.

Action: Start the SCAN VIP and SCAN Listener resources using 'srvctl'.

PRVF-05064: SCAN and Scan Listener may not function correctly

Cause: The SCAN VIP and/or SCAN Listener are not in the 'Running' state, or the port numbers used for the Listeners do not match across the nodes.

Action: Start the SCAN VIP and/or SCAN Listener, or ensure that the port numbers used for the SCAN Listeners match across the nodes in the cluster.

PRVF-05065: Warning: all SCAN VIPs and SCAN Listeners are running on node "{0}"

Cause: All the SCAN VIPs and SCAN Listeners were found to be running on specified node.

Action: Relocate scan using 'srvctl relocate scan' command to different nodes of the cluster.

PRVF-05067: TCP connectivity check for SCAN Listener "{0}" failed on node "{1}"

Cause: An attempt to connect to SCAN Listener specified failed from the node specified.

Action: Examine the accompanying TNS error messages and respond accordingly.

PRVF-05109: ASM Running check failed. ASM is not running on all specified nodes

Cause: ASM was not running on all the specified nodes.

Action: Ensure that ASM is running on all the nodes specified, see 'srvctl start asm' for further information.

PRVF-05110: ASM is not running on nodes: "{0}"

Cause: ASM was not running on the cluster nodes specified.

Action: Ensure that ASM is running on all the cluster nodes.

PRVF-05114: Disk Group check failed. No Disk Groups configured

Cause: No ASM disk groups were found configured on the ASM instance.

Action: Ensure that the necessary disk groups are configured in ASM.

PRVF-05137: Failure while checking ASM status on node "{0}"

Cause: Could not verify ASM running on node specified.

Action: Ensure that ASM is running on the node specified.

PRVF-05144: ASM Disk group "{0}" is unavailable on nodes "{1}"

Cause: Could not verify existence of ASM disk group specified on the nodes indicated.

Action: Verify existence of ASM group identified on the specified nodes, see 'asmcmd' for further information.

PRVF-05145: ASM Disk group "{0}" is unavailable on all nodes

Cause: Could not verify existence of ASM disk group specified on all the nodes.

Action: Verify existence of ASM group identified on the cluster nodes.

PRVF-05157: Could not verify ASM group "{0}" for Voting Disk location "{1}"

Cause: The ASM group specified was not found running on the system.

Action: Ensure that the ASM group is configured correctly and running, and ensure that the Voting Disk locations are configured correctly.

PRVF-05174: ACFS Driver version is not compatible with Operating System version on node "{0}"

Cause: The version of ACFS driver is not compatible with the Operating system version on the node.

Action: Check documentation for compatible version and install compatible version.

PRVF-05175: Failed to retrieve ACFS driver version on node "{0}". Driver version compatibility check cannot be performed

Cause: The version of the ACFS driver could not be retrieved from specified nodes.

Action: Make sure that ACFS driver is installed on these nodes.

PRVF-05176: Failed to retrieve Operating System version on the local node. ACFS driver version compatibility check will not be performed

Cause: Operating system version on local node could not be determined.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-05177: Global failure when attempting to query ACFS driver state option "{0}" on all nodes

Cause: ACFS driver state could not be obtained on all the nodes.

Action: Make sure that user executing this check has execute permissions on the `usm_driver_state` command.

PRVF-05184: Check of following Udev attributes of "{0}" failed: "{1}"

Cause: Found incorrect attributes for the specified device.

Action: Ensure that the device attributes are set correctly. See Configurable Dynamic Device Naming documentation (udev) for further information.

PRVF-05193: No devices found matching discovery string "{0}"

Cause: The specified device may not exist on the node being tested.

Action: Specify a correct discovery string that matches to existing devices on the node being tested.

PRVF-05195: No shared devices found

Cause: No shared storage was found based on the discovery string used in the verification.

Action: A message should have been displayed for each shared storage check failure. For each such message, perform the suggested action for that message.

PRVF-05196: Failed to retrieve OCR locations

Cause: An attempt to retrieve the OCR locations failed, possibly due to incorrect or incomplete Clusterware install, or due to incorrect configuration of the OCR, or due to invalid or incorrect OCR location file ocr.loc.

Action: Make sure that the Clusterware installation and Clusterware configuration has been correctly completed, and the ocr.loc file is present and accessible.

PRVF-05197: Failed to retrieve voting disk locations

Cause: An attempt to retrieve the voting disk locations failed, possibly due to incorrect or incomplete Clusterware install, or due to incorrect configuration of the Clusterware.

Action: Make sure that the Clusterware installation and Clusterware configuration has been correctly completed.

PRVF-05205: GNS VIP resource configuration check failed.

Cause: An error occurred while trying to obtain GNS VIP resource configuration information.

Action: Look at the accompanying messages for details on the cause of failure.

PRVF-05210: GNS resource is running on multiple nodes "{0}"

Cause: GNS resource should be running on only one node in the cluster at any given time. It was found to be running on multiple nodes at the same time.

Action: Stop the GNS resources running on various nodes using 'srvctl stop gns' command and leave it running on just one node of the cluster.

PRVF-05211: GNS resource is not running on any node of the cluster

Cause: GNS resource should be running on one node of the cluster. GNS resource wasn't running on any node.

Action: GNS can be configured using 'srvctl add gns' command. Use 'srvctl start gns' command to start GNS.

PRVF-05213: GNS resource configuration check failed

Cause: An error occurred while trying to obtain GNS resource configuration information.

Action: Look at the accompanying messages for details on the cause of failure.

PRVF-05216: The following GNS resolved IP addresses for "{0}" are not reachable: "{1}"

Cause: The listed IP addresses for the fully domain qualified name (FDQN) listed in the message and resolved by GNS were not reachable.

Action: Make sure that the configuration of GNS resource is proper using 'srvctl config gns' command. If GNS is configured correctly make sure that the network administrator has provided a set of IP addresses for the subdomain of the cluster and Domain Name Server (DNS) is forwarding requests for these to the GNS.

PRVF-05217: An error occurred while trying to look up IP address for "{0}"

Cause: An error occurred while trying to translate the fully domain qualified name (FDQN), listed in the message, to IP addresses.

Action: These IP address requests should have been forwarded to GNS by the Domain Name Server (DNS). Check the configuration of GNS resource using 'srvctl config gns' command. If GNS is configured correctly make sure that the network administrator has provided a set of IP addresses for the subdomain of the cluster and DNS is forwarding requests for these to the GNS.

PRVF-05218: "{0}" did not resolve into any IP address

Cause: The fully domain qualified name (FDQN) listed in the message did not resolve into any IP address.

Action: Make sure that the configuration of GNS resource is proper using 'srvctl config gns' command. If GNS is configured correctly make sure that the network administrator has provided a set of IP addresses for the subdomain of the cluster and Domain Name Server (DNS) is forwarding requests for these to the GNS.

PRVF-05219: GNS and GNS VIP resources are running on different nodes. GNS is running on nodes "{1}" while GNS VIP is running on "{0}".

Cause: The GNS and GNS VIP resources were running on different nodes.

Action: If GNS should be running on one node of the cluster at any given point of time. Make sure that GNS is not running on multiple nodes of the cluster using 'srvctl config gns' command. If GNS is running on multiple nodes then shut down all but one using 'srvctl stop gns' command.

PRVF-05220: GNS VIP resource was not running on any node of the cluster

Cause: The GNS VIP resource was not running on any nodes of the cluster.

Action: Make sure that the VIP name specified in 'srvctl add gns' command is an unused address belonging to one of the public networks of the cluster nodes.

PRVF-05223: The GNS subdomain name "{0}" is not a valid domain name

Cause: The GNS domain name specified was not a valid domain name.

Action: A valid domain name starts with an alphabet and contain characters [A-Z], [a-z], [0-9], '.', '-'. Refer to RFC-1035 for more information.

PRVF-05227: GNS VIP "{0}" does not resolve to a valid IP address

Cause: The specified GNS VIP does not resolve to an IP address.

Action: Make sure that the VIP name is spelled correctly. Make sure that the VIP name is registered with the DNS. Make sure that there are no firewalls between the cluster and the DNS server.

PRVF-05229: GNS VIP is active before Clusterware installation

Cause: GNS VIP was found to be active on the public network before Clusterware installation.

Action: If you are upgrading an older release of Clusterware this is not an error. In case of new installation GNS VIP will be brought up by GNS resource after Clusterware installation. Make sure that GNS VIP is configured to be an unused IP address.

PRVF-05230: GNS VIP is inactive after Clusterware installation

Cause: GNS VIP was not reachable after Clusterware installation.

Action: Bring the GNS resource online using 'srvctl start gns' command.

PRVF-05232: The GNS subdomain qualified host name "{0}" was resolved into an IP address

Cause: The specified GNS subdomain qualified host name was resolved into an IP address before Clusterware installation.

Action: Ensure that the DNS is configured to forward (rather than resolve) names in the GNS subdomain.

PRVF-05233: There are no public networks that match the GNS VIP "{0}"

Cause: GNS VIP subnet number did not match any of the public networks on the node.

Action: Specify an address that matches the public subnet number for GNS VIP.

PRVF-05253: Command "{0}" executed to retrieve GPNP resource status failed on all of the nodes

Cause: An attempt to execute the displayed command failed on all of the nodes.

Action: Make sure that the nodes of the cluster are accessible from the current node. Make sure that the user executing the check has permission to execute commands on nodes using 'ssh'.

PRVF-05254: Command "{0}" executed on node "{1}" produced no output

Cause: An attempt to run the command listed on the node listed produced no output.

Action: This is an internal error. Contact Oracle support services.

PRVF-05255: The GPNP resource is not in ONLINE status on the following node(s): {0}

Cause: The GPNP resource was found to be in OFFLINE or UNKNOWN state on the nodes listed.

Action: This is not an error if the GPNP resource was shutdown. If it is not the expected state then use the command 'crsctl start res ora.gpnpd -init' to start the GPNP resource.

PRVF-05256: Command "{0}" executed to retrieve the GPNP resource status failed on node(s): {1}

Cause: An attempt to run the command listed failed on the node listed.

Action: Make sure that the nodes listed are accessible from the current node. Make sure that the user executing the check has permission to execute commands on the node(s) listed using 'ssh'.

PRVF-05300: Failed to retrieve active version for CRS on this node

Cause: Could not identify location of CRS home.

Action: Ensure that correct installation of CRS exists.

PRVF-05301: Failed to locate CRS home

Cause: Could not locate the CRS home.

Action: Ensure that the install of CRS has completed successfully and the CRS home is setup correctly.

PRVF-05302: Failed to execute the exectask command on node "{0}"

Cause: Could not execute command specified on node listed.

Action: Verify command specified can be executed on node listed.

PRVF-05305: The Oracle Clusterware is not healthy on node "{0}"

Cause: An error was found with the Oracle Clusterware on the node specified.

Action: Review the error reported and resolve the issue specified.

PRVF-05307: Failed to retrieve Oracle Restart home

Cause: Could not identify location of Oracle Restart home.

Action: Ensure that Oracle Local Repository (OLR) was created correctly. See Oracle Local Repository documentation for further information.

PRVF-05308: ohasd is either not running or could not be contacted on node "{0}"

Cause: CRSCCTL did not report that OHAS was online.

Action: Review the error information displayed and verify the state of OHAS on the node identified.

PRVF-05311: File "{0}" either does not exist or is not accessible on node "{1}"

Cause: Cannot access the file specified.

Action: Verify that the specified file exists and can be access on the node identified.

PRVF-05312: No ohasd entry was found in /etc/inittab file

Cause: Did not find 'respawn:/etc/init.d/init.ohasd' line in '/etc/inittab' file.

Action: Ensure that the OHASD environment has been setup correctly.

PRVF-05313: Failed to search for ohasd entry in /etc/inittab file on node "{0}"

Cause: An error was encountered trying to search for OHASD information in /etc/inittab.

Action: Ensure that the OHASD environment has been setup correctly and that /etc/inittab is accessible on the specified node.

PRVF-05314: Could not find CRS, or Oracle Restart, installed on the local node

Cause: Could not locate the CRS, or Oracle Restart, installation from the local node.

Action: Ensure that the install of CRS, or Oracle Restart, has completed successfully and the CRS, or Oracle Restart, home is setup correctly.

PRVF-05316: Failed to retrieve version of CRS installed on node "{0}"

Cause: Could not identify location of CRS home.

Action: Verify installation of CRS on the identified node.

PRVF-05317: The Clusterware is currently being upgraded to version: "{0}". The following nodes have not been upgraded and are running Clusterware version: "{1}". "{2}"

Cause: The CRS integrity may have discovered that your Oracle Clusterware stack is partially upgraded.

Action: Review warnings and make modifications as necessary. If the warning is due to partial upgrade of Oracle Clusterware stack then continue with upgrade and finish it.

PRVF-05318: No Oracle Restart is found configured on the local node

Cause: Could not locate the Oracle Restart configuration on the specified node.

Action: Ensure that the install of Oracle Restart has completed successfully and the Oracle Restart home is set up correctly.

PRVF-05319: Oracle Cluster Synchronization Services do not appear to be online.

Cause: An error was encountered when trying to verify the status of Oracle Cluster Synchronization Services.

Action: Verify the state of the Oracle Cluster Synchronization Services using 'crsctl check cluster'.

PRVF-05321: Failed to get the CRS or Oracle Restart home

Cause: Could not locate the CRS, or Oracle Restart, home.

Action: Ensure that the install of CRS, or Oracle Restart, has completed successfully and the CRS, or Oracle Restart, home is setup correctly.

PRVF-05322: Failed to get the CRS user name for CRS home "{0}"

Cause: An attempt to obtain the Clusterware owner information from CRS home failed.

Action: Ensure that the user executing the CVU check has read permission for CRS or Oracle Restart home.

PRVF-05323: Failed to get information for file "{0}"

Cause: An attempt to read information for a file failed.

Action: Make sure that the user executing the CVU check has read permission for the file and the file exists in the specified path.

PRVF-05324: Could not find CRS installed on the node "{0}"

Cause: Could not locate the CRS installation on the specified node.

Action: Ensure that the install of CRS has completed successfully and the CRS home is setup correctly.

PRVF-05325: Failed to retrieve release version for Oracle Restart

Cause: Could not get release version for Oracle Restart.

Action: Ensure that the install of Oracle Restart has completed successfully.

PRVF-05401: Clock synchronization check using Network Time Protocol(NTP) failed

Cause: One or more of the Clock Synchronization checks failed.

Action: Correlate with the other failure messages displayed and fix those failures.

PRVF-05402: Warning: Could not find NTP configuration file "{0}" on node "{1}"

Cause: NTP might not have been configured on the node, or NTP might have been configured with a configuration file different from the one indicated.

Action: Configure NTP on the node if not done so yet. Refer to your NTP vendor documentation for details.

PRVF-05403: Operation to check presence of NTP configuration file "{0}" failed on node "{1}"

Cause: The operation to check NTP configuration file failed on node indicated. The failure is due to a reason like incorrect permissions on the configuration file, communications error with the node, missing or inaccessible remote execution binary on the node, etc.

Action: Review the error messages that follow this message and fix the problem(s) indicated.

PRVF-05405: The NTP configuration file "{0}" does not exist on all nodes

Cause: The configuration file specified was not available or was inaccessible on the given nodes.

Action: If you want to use NTP for time synchronization, create this file and setup its configuration as described in your vendor's NTP document. If you plan to use CTSS for time synchronization then NTP configuration should be uninstalled on all nodes of the cluster. Refer to "Preparing Your Cluster" of "Oracle Database 2 Day + Real Application Clusters Guide".

PRVF-05406: NTP Configuration file Check failed

Cause: Attempt to check presence of configuration file failed on one or more nodes.

Action: Look at the related error messages and fix them.

PRVF-05408: NTP Time Server "{0}" is common only to the following nodes "{1}"

Cause: One or more nodes in the cluster do not synchronize with the NTP Time Server indicated.

Action: At least one common NTP Time Server is required for a successful Clock Synchronization check. If there are none, reconfigure all of the nodes in the cluster to synchronize with at least one common NTP Time Server.

PRVF-05410: Check of common NTP Time Server failed

Cause: The NTP query command showed there is no common time server among all of the nodes in the cluster.

Action: At least one common NTP Time Server is required for a successful Clock Synchronization check. Reconfigure all of the nodes in the cluster to synchronize with at least one common NTP Time Server. If you plan to use CTSS for time synchronization then NTP configuration should be uninstalled on all nodes of the cluster. Refer to "Preparing Your Cluster" of "Oracle Database 2 Day+ Real Application Clusters Guide".

PRVF-05411: Query of NTP daemon failed on all nodes on which NTP daemon is running

Cause: Attempt to query the NTP daemon failed on all of the nodes of the cluster because the 'ntpq' command could not be found.

Action: Make sure that the NTP query command 'ntpq' is available on all nodes and the user running the CVU check has execute privilege for it.

PRVF-05413: Node "{0}" has a time offset of {1} that is beyond permissible limit of {2} from NTP Time Server "{3}"

Cause: The time offset for the given node clock with the specified NTP Time Server is beyond permissible limits, possibly due to a clock drift, or due to an incorrectly functioning time server.

Action: Make sure that the Time Server is functioning properly, and if yes, adjust the system clock so that the offset is within limits.

PRVF-05414: Check of NTP Config file failed on all nodes. Cannot proceed further for the NTP tests

Cause: Attempt to check existence of config file failed on all nodes.

Action: Look at the individual error messages displayed for the respective nodes and the overall result message and take appropriate action.

PRVF-05415: Check to see if NTP daemon or service is running failed

Cause: Attempt to check if the NTP daemon was running failed on nodes of the cluster.

Action: Look at the accompanying error messages for the nodes on which the check failed and fix the problem. If you plan to use CTSS for time synchronization then NTP configuration should be uninstalled on all nodes of the cluster. Refer to "Preparing Your Cluster" of "Oracle Database 2 Day+ Real Application Clusters Guide".

PRVF-05416: Query of NTP daemon failed on all nodes

Cause: An attempt to query the NTP daemon using the 'ntpq' command failed on all nodes.

Action: Make sure that the NTP query command 'ntpq' is available on all nodes and make sure that user running the CVU check has permissions to execute it.

PRVF-05421: NTP configuration file check failed on the following nodes:

Cause: Check of existence of NTP configuration file failed on nodes listed because NTP was not configured on those nodes.

Action: If you plan to use NTP for time synchronization across nodes of the cluster then configure NTP on all of the nodes. If you plan to use CTSS for time synchronization then NTP configuration should be uninstalled on all nodes of the cluster. Refer to "Preparing Your Cluster" of "Oracle Database 2 Day+ Real Application Clusters Guide".

PRVF-05424: Clock time offset check failed

Cause: Offsets on all of the nodes in the cluster were not within limits for any Time Server.

Action: Look at the individual messages displayed and fix the problems indicated.

PRVF-05428: Network Time Protocol(NTP) configuration file not found on any of the nodes. Oracle Cluster Time Synchronization Service(CTSS) can be used instead of NTP for time synchronization on the cluster nodes

Cause: NTP is not configured on the cluster nodes.

Action: This is not an error if the system administrator intended to use Oracle Cluster Time Synchronization Service (CTSS) for clock synchronization on the cluster. If not then install NTP on all nodes of the cluster according to your NTP vendor documentation.

PRVF-05430: Voting disk configuration does not meet Oracle's recommendation of three voting disk locations

Cause: For high availability, Oracle recommends that you have a minimum of three voting disk locations.

Action: Add additional voting disk locations to meet the Oracle recommended amount of three voting disks.

PRVF-05431: Oracle Cluster Voting Disk configuration check failed

Cause: The Voting Disk configuration does not meet Oracle's recommendations.

Action: Review Clusterware and Voting Disk configuration.

PRVF-05433: The current voting disk state is at high risk

Cause: The current state of the voting disk locations is susceptible to the loss of one voting disk location resulting in failure of the cluster.

Action: Add additional voting disk locations, or bring existing locations online, to reduce the risk of losing one voting disk location.

PRVF-05434: Cannot identify the current CRS software version

Cause: Unable to obtain CRS version from CRSCTL.

Action: Ensure that CRSCTL is accessible on the nodes being verified.

PRVF-05435: Voting disk configuration does not meet Oracle's recommendation

Cause: For high availability, Oracle recommends that you have more than two voting disk locations.

Action: Add additional voting disk locations.

PRVF-05436: The NTP daemon running on one or more nodes lacks the slewing option "{0}"

Cause: NTP daemon on one or more nodes lacked slewing option.

Action: Shut down and restart the NTP daemon after setting the slewing option as follows: For Linux, edit `/etc/sysconfig/ntpd` and add `-x` to the command line option. For SUSE Linux, edit `/etc/sysconfig/ntp` and add `-x` to the `OPTIONS` variable. For AIX, edit `/etc/rc.tcpip` and add `-x` to the command line option. For HP-UX, edit `/etc/rc.config.d/netdaemons` and add `-x` to the command line option. For Solaris release 10 or earlier, edit `/etc/inet/ntp.conf` and add `'slewalways yes'` and `'disable pll'` to the file. For Solaris release 11 and higher, logon as root user and issue command: `/usr/sbin/svccfg -s svc:/network/ntp:default setprop config/slew_always = true` to change the setting, then refresh the service by issuing: `svcadm refresh svc:/network/ntp:default`

PRVF-05439: NTP daemon does not have slewing option "{0}" set on node "{1}"

Cause: NTP daemon on the specified node does not have the slewing option set.

Action: Shut down and restart the NTP daemon with the slewing option set. In each case add `-x` to the `ntpd` command line options.

PRVF-05440: NTP daemon slewing option "{0}" check could not be performed on node "{1}"

Cause: An attempt to obtain the command line options for NTP daemon failed.

Action: Make sure that the NTP daemon is running on the node. Also look at other messages accompanying this message.

PRVF-05442: Could not obtain NTP daemon's command line on any node

Cause: An attempt to obtain the command line options for the NTP daemon's failed on all nodes.

Action: Make sure that the NTP daemon is running on all the nodes. Make sure that slewing option is set on all the nodes of the cluster.

PRVF-05447: Could not verify sharedness of Oracle Cluster Voting Disk configuration

Cause: Unable to obtain list of nodes with CRS installed.

Action: Ensure that Clusterware is up and running and verify Voting Disk configuration.

PRVF-05448: Voting Disk location "{0}" is not shared across cluster nodes

Cause: Voting Disk location specified is not shared across all cluster nodes.

Action: Verify Voting Disk configuration and ensure all Voting Disk locations are shared across all cluster nodes and are of the same storage type.

PRVF-05449: Check of Voting Disk location "{0}" failed on the following nodes:

Cause: Voting Disk location specified is not accessible on the nodes identified.

Action: Verify the owner, group and permissions settings on the location indicated.

PRVF-05450: Constraint type does not match

Cause: The specified constraint does not relate to space checks.

Action: Make sure that the space constraint data is well formed and consistent in the constraint xml.

PRVF-05451: Missing key data "{0}"

Cause: The data required for constraint check is missing.

Action: Verify that the space constraint data is correctly specified in the constraint xml.

PRVF-05452: Missing key reference data "{0}"

Cause: The reference data required for constraint check is missing.

Action: For a greater than/equal comparison, reference data is required. Verify that the space constraint check reference data is correctly specified in the constraint xml.

PRVF-05453: Invalid data set for "{0}", EXPECTED:"{1}", FOUND: "{2}"

Cause: The specified data is invalid for the space constraint check being performed.

Action: Make sure that correct data is specified, using the values indicated in the message.

PRVF-05454: Qualifier "{0}" is not supported for "{1}"

Cause: The indicated qualifier is not supported for the class indicated in the message.

Action: Make sure that the correct qualifier is specified.

PRVF-05455: Cannot apply invalid constraint

Cause: The specified constraint is invalid.

Action: Specify the correct constraint.

PRVF-05456: Invalid constraint. Compatibility check cannot proceed

Cause: The specified constraint is invalid.

Action: Specify the correct constraint for the compatibility check.

PRVF-05461: Encountered an invalid setting for internal variable "{0}"

Cause: This is an internal error.

Action: Please contact Oracle Support.

PRVF-05470: The NTP daemon's boot time configuration, in file "{0}", on one or more nodes lacks the slewing option "{1}"

Cause: NTP daemon boot time configuration on one or more nodes lacked slewing option.

Action: Make sure that the slewing option is specified in the file listed. For a list of nodes on which this check failed look at the accompanying error messages.

PRVF-05472: NTP daemon's boot time configuration does not have slewing option "{0}" set on node "{1}"

Cause: NTP daemon boot time configuration on the specified node does not have the slewing option set.

Action: The NTP daemon's boot time configuration file is listed with the messages accompanying this message. Make sure that slewing option is set in configuration file. For more information on NTP daemon slewing option refer to NTP daemon's man pages.

PRVF-05473: NTP daemon's boot time configuration check could not be performed on node "{0}"

Cause: An attempt to obtain the NTP daemon's boot time configuration file failed on the node specified.

Action: Make sure that the NTP daemon is configured on the node and will be started when the node boots up. Make sure that the user running this check has access to the configuration file specified. Also look at other messages accompanying this message.

PRVF-05475: Could not obtain NTP daemon's boot time configuration on any node

Cause: An attempt to obtain the command line options for the NTP daemon's failed on all nodes.

Action: Make sure that the NTP daemon is running on all the nodes. Make sure that slewing option is set on all the nodes of the cluster.

PRVF-05478: TZ value missing in configuration file "{0}" on node "{1}".

Cause: Time Zone value is missing in specified configuration file.

Action: Enter appropriate Time Zone value in the specified configuration file on the indicated node.

PRVF-05479: Time zone is not the same on all cluster nodes.

Cause: Nodes have different time zone settings.

Action: Ensure that time zone is same on all nodes.

PRVF-05486: The NTP daemon on the indicated nodes is not using UDP port 123

Cause: The port 123 for udp is not opened for the NTP daemon or service.

Action: For Unix, edit the /etc/services file appropriately.

PRVF-05492: Warning: Could not find NTP Daemon or Service running on node "{0}".

Cause: NTP Daemon may have aborted , shut down or may not have been installed.

Action: Restart NTP Daemon on the indicated node or install if necessary.

PRVF-05493: Operation to check presence of NTP Daemon or Service failed on node "{0}".

Cause: The operation to check NTP Daemon or service failed on node indicated. The failure is due to a reason like incorrect setup, communications error with the node, missing or inaccessible remote execution binary on the node, etc.

Action: Review the error messages that follow this message and fix the problem(s) indicated.

PRVF-05494: The NTP Daemon or Service was not alive on all nodes

Cause: The NTP Daemon was not alive on all the nodes.

Action: Examine the status of ntp on each of the nodes indicated after this message and restart the daemon or install the NTP software if necessary.

PRVF-05495: The Check for NTP Daemon or Service status failed on some nodes

Cause: The NTP Daemon was not accessible or there was some unknown failure in the check. The failure is due to a reason like incorrect setup, communications error with the node, missing or inaccessible remote execution binary on the node, etc.

Action: Review the error that follow this message and fix the problem(s) in the indicated nodes.

PRVF-05498: Timezone file "{0}" missing on node "{1}".

Cause: A check for the indicated timezone file did not find it on the node shown.

Action: Restore the file on the indicated node by reinstalling timezone patches for your operating system.

PRVF-05499: There are more than one NTP daemons or Services running on various nodes of the cluster

Cause: An attempt to check if NTP daemons or Service were running on nodes of the cluster found that more than one NTP daemons or Services were active.

Action: The accompanying messages will list the NTP daemon or service names along with the nodes on which they are running. Make sure that only one time synchronization service is active on all nodes of the cluster at any given time by shutting down others.

PRVF-05501: The user "{0}" is currently logged in to the group "{1}" which is not the primary group for the user

Cause: The user is currently logged into a group that is not user's primary group.

Action: Invoke the application after logging in to the primary group (using command newgrp <primary group>).

PRVF-05502: Current group ID check cannot be performed

Cause: Attempt to check if the current group ID matches with primary group ID failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-05505: The NTP daemon on node "{0}" is not using UDP port 123

Cause: The port 123 for UDP was not being used by the NTP daemon or service.

Action: For Unix, edit the /etc/services file appropriately.

PRVF-05506: Check for UDP port 123 being used by NTP daemon or service could not be performed on node "{0}"

Cause: Attempt to check for UDP port 123 being used by NTP daemon or service failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-05507: NTP daemon or service is not running on any node but NTP configuration file exists on the following node(s):

Cause: The configuration file was found on at least one node though no NTP daemon or service was running.

Action: If you plan to use CTSS for time synchronization then NTP configuration must be uninstalled on all nodes of the cluster.

PRVF-05508: NTP configuration file is present on at least one node on which NTP daemon or service is not running.

Cause: An NTP configuration file was found on at least one node where the NTP daemon or service was not running.

Action: NTP configuration must be uninstalled on all nodes of the cluster.

PRVF-05555: Automount feature is disabled on nodes:

Cause: Automount feature for new volumes was found disabled.

Action: To enable Automount feature for new volumes, use 'mountvol /e' or use the 'diskpart' utility's 'automount enable' command. Restart your system to make your changes effective after enabling the Automount feature.

PRVF-05556: Automount feature is disabled on the node "{0}"

Cause: Automount feature for new volumes was found disabled on specified node.

Action: To enable Automount feature for new volumes, use 'mountvol /e' or use the 'diskpart' utility's 'automount enable' command. Restart your system to make your changes effective after enabling the Automount feature.

PRVF-05557: Error reading Registry subkey "{0}" from Windows Registry on node "{1}"

Cause: Windows Registry subkey 'HKEY_LOCAL_MACHINE\\System\\CurrentControlSet\\Services\\MountMgr' could not be read on specified node.

Action: Ensure that the specified subkey exists in registry and access permissions for the Oracle user allow access to the Windows Registry. Restart your system to make your changes effective after changing the registry.

PRVF-05558: Check for status of Automount feature cannot be performed on nodes:

Cause: Windows Registry subkey 'HKEY_LOCAL_MACHINE\\System\\CurrentControlSet\\Services\\MountMgr' could not be read.

Action: Ensure that the specified subkey exists in registry and the access permissions for the Oracle user allow access to the Windows Registry. Restart your system to make your changes effective after changing the registry.

PRVF-05559: Failed to perform the Automount status verification.

Cause: An error occurred while attempting to retrieve the information about Automount feature.

Action: Look at the accompanying messages and respond accordingly.

PRVF-05600: On node "{0}" The following lines in file "{1}" could not be parsed as they are not in proper format: {2}

Cause: Invalid lines were found in the file resolv.conf at the location and on the node indicated.

Action: Correct the errors indicated. On UNIX the general format of file resolv.conf is "<keyword> <value(s)>". For more details refer to resolv.conf man page.

PRVF-05603: 'domain' entry does not exist in file "{0}" on nodes: "{1}"

Cause: The 'domain' was not found in the resolv.conf file on nodes indicated while it was present in others.

Action: Look at the file specified on all nodes. Make sure that either 'domain' entry is defined on all nodes or is not defined on any nodes.

PRVF-05604: 'domain' entry in file "{0}" on node "{1}" is "{2}" which differs from reference node

Cause: The 'domain' entry on the node specified was not the same as the reference node 'domain' option specified above.

Action: Make sure that all nodes of the cluster have same 'domain' entry in the file specified.

PRVF-05605: File "{0}" does not exist on following nodes: {1}

Cause: File specified did not exist on the nodes listed, but exists on other nodes.

Action: Make sure that the file is either present on all nodes or is not present on any node.

PRVF-05607: The file "{0}" on following nodes have more than "{1}" 'nameserver' entries: {2}

Cause: The file specified had more than allowed number of 'nameserver' entries.

Action: Reduce the number of 'nameserver' entries on the nodes specified to the allowed number.

PRVF-05608: The file "{0}" on the following nodes have more than one 'attempts' entry: {1}

Cause: More than one 'option attempts:' entry was found on nodes specified.

Action: Make sure that there is only one 'option attempts:' entry in the file specified.

PRVF-05609: The following nodes have multiple 'domain' entries defined in file "{0}": {1}

Cause: The nodes specified had multiple 'domain' entry defined in the file specified.

Action: Make sure that the file specified has only one 'domain' entry.

PRVF-05610: The file "{0}" on the following nodes have more than one 'search' entry: {1}

Cause: More than one 'search' entry was found on nodes specified, in the file specified.

Action: Make sure that there is only one 'search' entry in the file specified. Multiple domains can be listed in the same search entry.

PRVF-05613: 'nameserver' entry does not exist in file "{0}" on nodes: "{1}"

Cause: The 'nameserver' entry was not found on nodes indicated while it was present in others.

Action: Look at the file specified on all nodes. Make sure that either 'nameserver' entry is defined on all nodes or is not defined any nodes.

PRVF-05614: 'nameserver' entry in file "{0}" on node "{1}" is "{2}" which differs from reference node

Cause: The 'nameserver' entry on the node specified was not the same as the reference node 'nameserver' option specified above.

Action: Make sure that all nodes of the cluster have same 'nameserver' entry in the file specified.

PRVF-05622: 'search' entry does not exist in file "{0}" on nodes: "{1}"

Cause: The 'search' entry was not found on nodes indicated while it was present in others.

Action: Look at the file specified on all nodes. Make sure that either 'search' entry is defined on all nodes or is not defined any nodes.

PRVF-05623: 'search' entry in file "{0}" on node "{1}" is "{2}" which differs from reference node

Cause: The 'search' entry on the node specified was not the same as the reference node 'search' option specified above.

Action: Make sure that all nodes of the cluster have same 'search' entry in the file specified.

PRVF-05629: Unable to read file "{0}" copied to local scratch area from node {1}

Cause: An error occurred while trying to read file specified.

Action: Make sure that the CV_DESTLOC area was not being used by another process. Make sure that CV_DESTLOC has sufficient permissions. Also look for messages accompanying this message for details.

PRVF-05636: The DNS response time for an unreachable node exceeded "{0}" ms on following nodes: {1}

Cause: The DNS response time for an unreachable node exceeded the value specified on nodes specified.

Action: Make sure that 'options timeout', 'options attempts' and 'nameserver' entries in file resolv.conf are proper. On HPUX these entries will be 'retrans', 'retry' and 'nameserver'. On Solaris these will be 'options retrans', 'options retry' and 'nameserver'. Make sure that the DNS server responds back to name lookup request within the specified time when looking up an unknown host name.

PRVF-05637: DNS response time could not be checked on following nodes: {0}

Cause: An attempt to check DNS response time for unreachable node failed on nodes specified.

Action: Make sure that 'nslookup' command exists on the nodes listed and the user executing the CVU check has execute privileges for it.

PRVF-05640: Both 'search' and 'domain' entries are present in file "{0}" on the following nodes: {1}

Cause: Both 'search' and 'domain' entries were found in resolv.conf file on the nodes specified.

Action: Make sure that only one of these entries exist in file resolv.conf. It is preferable to use entry 'search' in resolv.conf.

PRVF-05642: Unable to create the directory "{0}"

Cause: An attempt to create the directory specified failed on local node.

Action: Make sure that the user running CVU has read and write permissions on directory specified or specify a different work area using CV_DESTLOC environment variable where user has write permission.

PRVF-05643: Unable to delete files from directory "{0}"

Cause: An attempt to remove files from the directory specified failed.

Action: Make sure that the user running CVU has read and write permissions on directory specified or specify a different work area using CV_DESTLOC environment variable where user executing this check has write permission.

PRVF-05704: No DHCP server were discovered on the public network listening on port {0}

Cause: No reply was received for the DHCP discover packets sent on the specified port.

Action: Contact the network administrator to make sure that DHCP servers exist on the network. If the DHCP servers are listening to a different port then specify it by using -port option.

PRVF-05707: DHCP server was not able to provide sufficient IP addresses (required "{1}" , provided "{0}")

Cause: DHCP server was unable to provide sufficient number of IP address.

Action: An IP is required for each node VIP. Three IP addresses are needed for SCAN VIP. One IP address is required for each application VIP specified. Make sure that the DHCP server listening on port specified in above messages has sufficient number of IP addresses to give out.

PRVF-05711: DHCP server response time could not be measured

Cause: An attempt to measure DHCP server response time using 'crsctl discover' command failed.

Action: Look at messages accompanying this message for more information.

PRVF-05712: Warning: The DHCP server response time of {0} seconds is greater than VIP resource's SCRIPT_TIMEOUT attribute of {1} seconds

Cause: An attempt to obtain a DHCP lease took more time than VIP resource's SCRIPT_TIMEOUT attribute.

Action: This check is network load sensitive and can yield different result at different times. Make sure that the DHCP server and the network is not overloaded. Also consider a higher SCRIPT_TIMEOUT value.

PRVF-05713: Command "{0}" executed on node "{1}" produced no output

Cause: An attempt to run the command listed on the node listed produced no output.

Action: This is an internal error. Contact Oracle Support Services.

PRVF-05714: An error occurred while parsing the output of the command "{0}". The output is: "{1}"

Cause: An attempt to parse output of the command listed failed.

Action: This is an internal error. Contact Oracle Support Services.

PRVF-05715: The number of IP addresses assigned to the network interface "{0}" exceeds recommended value (recommended {1}, actual {2})

Cause: Too many IP addresses were assigned to the specified interface.

Action: If there are IP addresses that are not needed stop them in the operating system specific way. If too many resources are running on this node then relocate them to other nodes of the cluster relocate using 'srvctl relocate' command.

PRVF-05716: Unable to obtain network interface details on local node

Cause: An attempt to obtain network interface details on local node failed.

Action: Make sure that the user executing CVU has sufficient permissions to query network interfaces on the node. Also look at accompanying messages and take action as per those messages.

PRVF-05718: Command "{0}" failed to execute on node "{1}". The output produced by the command is: "{2}"

Cause: An attempt to execute specified command on the node specified failed.

Action: Refer to the specified output and fix the error.

PRVF-05801: Failed to execute command "{0}" on all nodes

Cause: CVU's attempt to execute the specified command failed on all of the nodes.

Action: Examine the messages displayed for each node and take action as per those messages.

PRVF-05803: An error occurred while starting the IP address "{0}" on node "{1}"

Cause: An attempt to start the specified IP address on the node specified failed.

Action: Look at messages accompanying this message for more information.

PRVF-05805: Unable to start the test DNS server

Cause: An attempt to start the test DNS server failed with errors.

Action: Look at messages accompanying this message for more information.

PRVF-05809: Unable to start the test DNS server on address: "{0}", listening on port: {1}

Cause: An attempt to start the test DNS server failed with errors.

Action: Look at messages accompanying this message for more information.

PRVF-05810: Unable to stop the test DNS server on address: "{0}", listening on port: {1}

Cause: An attempt to stop the test DNS server failed with errors.

Action: Look at messages accompanying this message for more information.

PRVF-05811: Unable to stop the IP address "{0}" on node "{1}"

Cause: An attempt to stop the IP address specified on the node specified failed.

Action: Look at messages accompanying this message for more information.

PRVF-05813: Unable to reach the IP address "{0}" from local node

Cause: An attempt to reach the specified IP address from current node failed.

Action: Make sure that the specified IP address is a valid IP address. Check messages of the 'cluvfy comp dns -server' instance to make sure that there are no errors. If the address has been started then make sure that there are no firewalls between the local node and node on which this IP address has been started.

PRVF-05816: Unable to query the test DNS server started on address "{0}", listening on port {1}

Cause: An attempt to query the test DNS server, started on specified address and port, failed.

Action: Look at messages on the 'cluvfy comp dns -server' instance to make sure that the test DNS server was started. Also look at any messages accompanying this message.

PRVF-05819: Failed to verify DNS delegation of the GNS subdomain "{0}"

Cause: An attempt to perform name resolution for nodename.<gns_subdomain> failed as DNS did not forward requests to the test DNS server.

Action: Look at messages accompanying this message for more information. Also look at any messages from 'cluvfy comp dns -server' invocation for CVU.

PRVF-05821: Unable to reach the IP address "{0}" from local node

Cause: An attempt to reach the specified IP address failed.

Action: Make sure that the specified IP address is a valid IP address and is assigned to an interface on the node on which 'cluvfy comp dns -server' was run. Make sure that there are no firewalls between local node and node on which specified IP address is assigned.

PRVF-05822: Name lookup for FDQN "{0}" failed with test DNS server running on address "{1}", listening on port {2}

Cause: An attempt to query specified FDQN on the test DNS server running on specified address and port failed.

Action: Make sure that the specified address and port is correct. Make sure that there are no firewalls between the node on which 'cluvfy comp dns -server' was run and the node on which this command was run. Also look at any error messages on the node on which 'cluvfy comp dns -server' was run.

PRVF-05823: Name lookup for FDQN "{0}" failed

Cause: An attempt to query DNS servers for FDQN specified failed.

Action: Make sure that there are no firewalls between the local node and the DNS. Make sure that there are no firewalls between DNS and the node on which 'cluvfy comp dns -server' was run. Make sure that GNS subdomain delegation was setup correctly in the DNS. Also look at any error messages on the node on which 'cluvfy comp dns -server' was run.

PRVF-05826: The domain name "{0}" is not valid

Cause: The GNS domain name specified did not conform to the industry standard.

Action: A valid domain name starts with an alphabetic character and consists only of characters [A-Z], [a-z], [0-9], '.', '-'. Refer to the RFC-1035 standard for more information.

PRVF-05827: The response time for name lookup for name "{1}" exceeded {0} seconds

Cause: The DNS response time for the name specified exceeded the value specified.

Action: On Linux and AIX make sure that 'options timeout', 'options attempts' and 'nameserver' entries in file resolv.conf are proper. On HP-UX these entries will be 'retrans', 'retry' and 'nameserver'. On Solaris these will be 'options retrans', 'options retry' and 'nameserver'. On windows look at registry key 'HKEY_

LOCAL_MACHINE\\System\\CurrentControlSet\\Services\\VxD\\MSTCP' for values 'BcastQueryTimeout' and 'MaxConnectRetries'.

PRVF-06001: Could not get required information about the interface "{0}"

Cause: Could not get interface information for the interface specified.

Action: Ensure that the interface is installed and online on the nodes in the cluster.

PRVF-06002: Unable to get information about interface "{0}" on the following nodes:

Cause: Could not get interface information for the interface specified on the nodes listed.

Action: Ensure that the interface is installed and online on the nodes specified.

PRVF-06003: Unable to get network information from node: {0}

Cause: Could not obtain any network interface information from the node specified.

Action: Verify state of network interface adapters on the specified node.

PRVF-06005: Could not find a fully connected subnet that covers all the nodes

Cause: Could not find a network interface adapter that exists in the same subnet on every node in the cluster .

Action: Ensure that the network interface adapters are installed and configured correctly on each node in the cluster.

PRVF-06006: Unable to reach any of the nodes

Cause: Unable to reach any of the nodes using the OS ping command.

Action: Ensure that the nodes specified are accessible with the OS ping utility.

PRVF-06011: Network interface unavailable on node "{0}"

Cause: Could not find any network interface on the node.

Action: Verify network interface(s) operational status on the node identified.

PRVF-06019: Interface subnet "{0}" does not have a gateway defined

Cause: Could not identify the gateway for the subnet identified.

Action: Define a gateway for the specified subnet.

PRVF-06020: Different MTU values used across network interfaces in subnet "{0}"

Cause: Different MTU values found for the network adapter used between cluster nodes across the specified subnet.

Action: Set the MTU value for that network adapter/subnet to be the same on each node in the cluster.

PRVF-06402: Core file name pattern is not same on all the nodes.

Cause: The core file name pattern is not same on all the nodes.

Action: Ensure that the mechanism for core file naming works consistently on all the nodes. Typically for Linux, the elements to look into are the contents of two files /proc/sys/kernel/core_pattern or /proc/sys/kernel/core_uses_pid. Refer OS vendor documentation for platforms AIX, HP-UX, and Solaris.

PRVF-06407: Core file name pattern can not be obtained from nodes "{0}".

Cause: Unable to execute commands on the nodes specified.

Action: Ensure the ability to communicate with, and execute commands on, nodes specified .

PRVF-07017: Package cvuqdisk not installed

Cause: The required cvuqdisk package to perform this operation was found missing.

Action: Ensure that the required version of cvuqdisk package is installed on all the nodes participating in the operation.

PRVF-07019: OCFS file system does not exist on location "{0}"

Cause: OCFS file system was not found on the specified location.

Action: Ensure that OCFS file system is correctly created on the specified location.

PRVF-07020: Unable to determine the shareability of device {0} on nodes:

Cause: An attempt to retrieve devices' Universally Unique Identifier (UUID) failed, or UUID's do not match, on the nodes indicated.

Action: Ensure the devices UUID can be obtained, and that the UUID value matches across all the nodes indicated.

PRVF-07037: Reserve_policy setting prevents sharing of {0} on nodes:

Cause: The reserve_policy setting for the device is preventing the device from being shared on the nodes indicated.

Action: Change the reserve_policy setting for the device. See the chdev command for further details.

PRVF-07038: Reserve_lock setting prevents sharing of {0} on nodes:

Cause: The reserve_lock setting for the device is preventing the device from being shared on the nodes indicated.

Action: Change the reserve_lock setting for the device. See the chdev command for further details.

PRVF-07039: File system exists on location "{0}"

Cause: Existing file system found on the specified location.

Action: Ensure that the specified location does not have an existing file system.

**PRVF-07501: Sufficient space is not available at location "{0}" on node "{1}"
[Required space = {2}]**

Cause: Not enough free space at location specified.

Action: Free up additional space or select another location.

PRVF-07524: Kernel version is not consistent across all the nodes.

Cause: The operating system kernel versions do not match across cluster nodes.

Action: Update the kernel version where necessary to have all cluster nodes running the same kernel version.

PRVF-07530: Sufficient physical memory is not available on node "{0}" [Required physical memory = {1}]

Cause: Amount of physical memory (RAM) found does not meet minimum memory requirements.

Action: Add physical memory (RAM) to the node specified.

PRVF-07531: Physical memory check cannot be performed on node "{0}"

Cause: Could not perform check of physical memory on the node indicated.

Action: Ensure the ability to access the node specified and view memory information.

PRVF-07532: Package "{0}" is missing on node "{1}"

Cause: A required package is either not installed or, if the package is a kernel module, is not loaded on the specified node.

Action: Ensure that the required package is installed and available.

PRVF-07533: Proper version of package "{0}" is not found on node "{1}" [Required = "{2}" ; Found = "{3}"].

Cause: Package does not meet the requirement.

Action: Upgrade the package to meet the requirement.

PRVF-07534: Package check cannot be performed on node "{0}"

Cause: Package configuration could not be determined.

Action: Ensure that the package configuration is accessible.

PRVF-07535: Proper architecture is not found on node "{0}" [Expected = "{1}" ; Found = "{2}"]

Cause: System architecture does not meet the requirement.

Action: Ensure that the correct software bundle is being used.

PRVF-07536: Architecture check cannot be performed on node "{0}"

Cause: System architecture could not be determined.

Action: Ensure that the correct software bundle is being used.

PRVF-07537: User "{0}" does not exist on node "{1}"

Cause: The specified user does not exist on the specified node.

Action: Create the user on the specified node.

PRVF-07538: User existence check cannot be performed on node "{0}"

Cause: Attempt to check the existence of user on the specified node failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07539: Group "{0}" does not exist on node "{1}"

Cause: The specified group does not exist on the specified node.

Action: Create the group on the specified node.

PRVF-07540: Group existence check cannot be performed on node "{0}"

Cause: Attempt to check the existence of group on the specified node failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07542: Kernel version check cannot be performed on node "{0}"

Cause: Unable to execute commands on node specified.

Action: Ensure the ability to communicate with, and execute commands on, node specified .

PRVF-07543: OS Kernel parameter "{0}" does not have proper value on node "{1}" [Expected = "{2}" ; Found = "{3}"].

Cause: Kernel parameter value does not meet the requirement.

Action: Modify the kernel parameter value to meet the requirement.

PRVF-07544: Check cannot be performed for kernel parameter "{0}" on node "{1}"

Cause: Kernel parameter value could not be determined.

Action: Ensure that the correct software bundle is being used.

PRVF-07562: Sufficient available memory is not available on node "{0}" [Required available memory = {1}]

Cause: Amount of available memory (RAM) does not meet minimum memory requirements.

Action: Add physical memory (RAM) to the node specified, or free memory being used.

PRVF-07563: Available memory check cannot be performed on node "{0}"

Cause: Could not perform check of available memory on the node indicated.

Action: Ensure the ability to access the node specified and view memory information.

PRVF-07564: Incorrect run level set on node "{0}" [Required run level = {1}]

Cause: Found incorrect runlevel on the node specified.

Action: Reboot the specified node with the correct runlevel.

PRVF-07565: Run level check cannot be performed on node "{0}"

Cause: Encountered error when trying to determine runlevel.

Action: Ensure that runlevel value can be obtained on the specified node.

PRVF-07566: User "{0}" does not belong to group "{1}" on node "{2}"

Cause: The specified user is not a member of the specified group on the specified node.

Action: Make the user a member of the group on the specified node.

PRVF-07567: Group "{0}" is not the primary group for user "{1}" on node "{2}"

Cause: The specified group is not the primary group for the specified user.

Action: Make the specified group as the primary group for the user.

PRVF-07568: Check cannot be performed for membership of user "{0}" with group "{1}" on node "{2}"

Cause: Attempt to check the group membership of the user on the specified node failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07571: Process "{0}" not running on node "{1}"

Cause: Required process not running on the specified node.

Action: Ensure that the identified process can be started on the node .

PRVF-07572: Process running check cannot be performed on node "{0}"

Cause: Could not collect process information from the specified node.

Action: Ensure the access to node specified and ability to view process information.

PRVF-07573: Sufficient swap size is not available on node "{0}" [Required = {1} ; Found = {2}]

Cause: The swap size found does not meet the minimum requirement.

Action: Increase swap size to at least meet the minimum swap space requirement.

PRVF-07574: Swap size check cannot be performed on node "{0}"

Cause: Could not perform check of swap space on the node indicated.

Action: Ensure the ability to access the node specified and view swap space information.

PRVF-07575: Encountered an internal error. The range of reference data for verifying swap size has not been correctly defined

Cause: Swap size could not be determined based on the physical memory available.

Action: This is an internal error that should be reported to Oracle.

PRVF-07584: Multiple versions of package "{0}" found on node {1}: {2}

Cause: Multiple versions of the package were found when only one version was expected.

Action: Ensure that the specified package is installed correctly.

PRVF-07590: "{0}" is not running on node "{1}"

Cause: The process identified is not running on the specified node.

Action: Ensure that the identified process is started and running on the specified node. If it is one of the Clusterware daemons then you can use 'crsctl check' command to check status.

PRVF-07591: Check cannot be performed for status of "{0}" on node "{1}"

Cause: An error was encountered trying to determine if the identified process was running on the specified node.

Action: Ensure the ability to communicate with the specified node. The status of Clusterware daemons can be checked on this node using the 'crsctl check' command.

PRVF-07592: Space availability check for location "{0}" cannot be performed on node "{1}"

Cause: Unable to determine amount of free space available for the specified location on the node identified.

Action: Ensure the ability to communicate with the specified node and the ability to access the location identified.

PRVF-07593: CRS is not found to be installed on node "{0}"

Cause: Could not identify CRS installation on the specified node.

Action: Ensure that CRS is installed on the specified node.

PRVF-07594: {0} is running but is not working effectively on node "{1}"

Cause: Could not communicate with the process specified on the node indicated.

Action: Verify state of CRS on the node indicated using the 'crsctl check' command.

PRVF-07595: CRS status check cannot be performed on node "{0}"

Cause: Could not verify the status of CRS on the node indicated using 'crsctl check'.

Action: Ensure the ability to communicate with the specified node. Make sure that Clusterware daemons are running using 'ps' command. Make sure that the Clusterware stack is up.

PRVF-07596: CSS is probably working with a non-clustered, local-only configuration on node "{0}"

Cause: Oracle CSS was found to be configured to run in a local-only (non-clustered) environment on the specified node.

Action: Ensure that cluster setup is correct and reconfigure Cluster Synchronization Services (CSS) as necessary on the nodes that are supposed to be executing in a clustered environment. See Oracle Cluster Synchronization Services documentation for further information.

PRVF-07597: Unable to obtain OCR integrity details from node "{0}"

Cause: OCR was not found to be in a healthy state on the node specified.

Action: Verify the state of OCR on the node specified using 'ocrcheck'.

PRVF-07610: Cannot verify user equivalence/reachability on existing cluster nodes

Cause: Attempts to verify user equivalence, or node reachability, failed for all the existing cluster nodes.

Action: Verify that all the cluster nodes have user equivalence and are reachable.

PRVF-07611: Proper user file creation mask (umask) for user "{0}" is not found on node "{1}" [Expected = "{2}" ; Found = "{3}"]

Cause: The user's OS file creation mask (umask) was not the required setting.

Action: Set appropriate user file creation mask. Modify the users .profile or .cshrc or .bashrc to include the required umask.

PRVF-07612: User file creation mask check cannot be performed for user "{0}" on node "{1}"

Cause: Attempt to check the file creation mask of user on the specified node failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07615: Unable to obtain network interface list from Oracle Clusterware

Cause: The oifcfg executable may have encountered issues

Action: Verify this with the "oifcfg getif" command

PRVF-07616: Node connectivity failed for subnet "{0}" between "{1}" and "{2}"

Cause: Node connectivity for the mentioned <subnet> could not be verified between the two interfaces identified (<node> - <interface> : <IP addr>).

Action: Verify the interface configurations for the network interfaces identified on the nodes indicated using utilities like ipconfig or ping.

PRVF-07617: Node connectivity between "{0}" and "{1}" failed

Cause: Node connectivity between the two interfaces identified (<node> : <IP addr>) could not be verified.

Action: Verify the interface configurations for the network interfaces identified on the nodes indicated using utilities like ipconfig or ping.

PRVF-07650: Remote execution files could not be copied to "{0}" on the following nodes:

Cause: An attempt to copy files to the directory specified failed.

Action: Make sure that the user running CVU has read and write permissions on directory specified or specify a different work area using CV_DESTLOC environment variable where user executing this check has write permission.

PRVF-07700: Path for fixup root directory is either null or is an empty string

Cause: Provided fixup root directory path is either null or an empty string.

Action: Provide appropriate and absolute path for fixup root directory.

PRVF-07701: Path "{0}" for fixup root directory is invalid. It must be specified as an absolute pathname

Cause: Fixup root directory was not specified as an absolute pathname.

Action: Respecify fixup root directory as an absolute pathname.

PRVF-07702: The path "{0}" for fixup root directory is not a valid directory

Cause: Fixup root directory path was not a valid directory.

Action: Respecify fixup root path as a valid directory where files can be created and executed from.

PRVF-07703: The fixup root directory "{0}" is not writeable

Cause: Directory identified is not writeable.

Action: Verify write access to directory specified.

PRVF-07704: The fixup root directory "{0}" cannot be created

Cause: Could not create fixup root directory specified.

Action: Ensure that write access exists for the path for the directory specified.

PRVF-07705: Directory "{0}" cannot be created

Cause: Could not create directory specified.

Action: Ensure that write access exists for the path for the directory specified.

PRVF-07706: File "{0}" cannot be created

Cause: Could not create file specified.

Action: Ensure that write access exists for file location.

PRVF-07709: File "{0}" cannot be copied to file "{1}" on node "{2}"

Cause: Could not copy the source file specified to the target file specified on the identified node.

Action: Ensure that the node identified and the target location for the file specified can be accessed.

PRVF-07710: Invalid path has been specified for fixup root directory

Cause: The path specified for the fixup root directory is not correct.

Action: Specify an absolute path for a directory that exists and is writeable by the user performing the verification.

PRVF-07720: Fixup cannot be generated for creating group "{0}" on node "{1}"

Cause: Attempt to generate fixup for group creation on the specified node failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07721: Fixup cannot be generated for creating user "{0}" on node "{1}"

Cause: Attempt to generate fixup for user creation on the specified node failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07722: Fixup cannot be generated for setting kernel param "{0}" on node "{1}"

Cause: Attempt to generate fixup for kernel param on the specified node failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07723: Fixup cannot be generated for setting soft limit for resource "{0}" on node "{1}"

Cause: Attempt to generate fixup for resource soft limit on the specified node failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07724: Fixup cannot be generated for setting hard limit for resource "{0}" on node "{1}"

Cause: Attempt to generate fixup for resource hard limit on the specified node failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07725: Fixup cannot be generated for setting runlevel "{0}" on node "{1}"

Cause: Attempt to generate fixup for run level on the specified node failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07726: Fixup cannot be generated for setting membership of user "{0}" with group "{1}" on node "{2}"

Cause: Attempt to generate fixup for group membership on the specified node failed.

Action: Look at the accompanying error messages displayed and fix the problems indicated.

PRVF-07728: Could not access or create trace file path "{0}". Trace information could not be collected

Cause: Trace file location could not be created, or is not writeable.

Action: Make sure user has write access to location specified, or specify a different location using the environmental variable CV_TRACELOC.

PRVF-07729: Fixup cannot be generated for user "{0}", group {1}, on node "{2}" because the user is not defined locally on the node

Cause: Fixup for group membership could not be generated because user was not found to be locally defined on the specified node.

Action: The fixup will have to be done manually. The user could be a Network Information Service (NIS) or Lightweight Directory Access Protocol (LDAP) user. Based on where the user is defined use appropriate tools to modify the user account.

PRVF-07730: Fixup cannot be generated for user "{0}", group "{1}", on node "{2}" because the group is not defined locally on the node

Cause: Fixup for group membership could not be generated because the group was not found to be locally defined on the specified node.

Action: The fixup will have to be done manually. The group could be a Network Information Service (NIS) or Lightweight Directory Access Protocol (LDAP) user. Based on where the group is defined use appropriate tools to modify the user account.

PRVF-09041: String has bad format: "{0}"

Cause: A parsing exception has occurred, and the string displayed could not be parsed.

Action: This message should be part of one or more other messages. Please look at those messages and take appropriate action.

PRVF-09105: Linux RPM package version found to be lower than minimum required version of <"{0}"> on nodes:

Cause: Linux RPM package version found to be older than recommended version.

Action: Ensure that the Linux RPM package version installed on the system is version 4.4.2.3 or higher.

PRVF-09106: Linux RPM package version was lower than the expected value. [Expected = "{0}" ; Found = "{1}"] on node "{2}"

Cause: Linux RPM package version found to be older than recommended version.

Action: Ensure that the Linux RPM package version installed on the system is version 4.4.2.3 or higher.

PRVF-09107: Could not retrieve the version of Linux RPM package on node:

Cause: An error occurred while running rpm command on system to determine the current version of Linux RPM package.

Action: Ensure that the Linux RPM package is correctly installed and is accessible to current user.

PRVF-09108: Could not retrieve the version of Linux RPM package on node "{0}"

Cause: An error occurred while running rpm command on system to determine the current version of Linux RPM package.

Action: Ensure that the Linux RPM package is correctly installed and is accessible to current user.

PRVF-09306: OCFS2 is not configured in runlevel 3,4 and 5 on all the nodes

Cause: Runlevel was not configured with levels 3,4 and 5 all being on.

Action: Check OCFS2 configuration and ensure the run levels indicated are on.

PRVF-09555: Current installation user "{0}" is not the owner "{1}" of the existing CRS installation

Cause: Current user was not found to be an owner of an existing CRS installation.

Action: Ensure that the user upgrading CRS installation is an owner of already existing installation.

PRVF-09556: Failed to get the CRS user name for an existing CRS installation

Cause: An attempt to obtain the Clusterware owner information from an existing CRS installation failed.

Action: Ensure that the user executing the CVU check has read permission for CRS or Oracle Restart home.

PRVF-09653: Command "{0}" to check CTSS status failed on all of the nodes

Cause: CVU attempts to execute the displayed command failed on all of the nodes.

Action: Examine the messages displayed for each node and take action as per those messages.

PRVF-09654: CTSS status check command "{0}" executed successfully on node "{1}", but there was a failure in retrieving the output of this command

Cause: Reason for failure to retrieve output could be due to improper execution.

Action: Try the command manually on the node to verify proper execution, and fix any issues arising out of this.

PRVF-09655: Query of CTSS for time offset and reference produced invalid output on node "{0}" Output: "{1}"

Cause: Failure to correctly parse output could be due to improper execution.

Action: Try the command manually on the node to verify proper execution, and fix any issues arising out of this.

PRVF-09656: The CTSS command to query time offset and reference failed on node "{0}" with error message "{1}"

Cause: Reason for failure to retrieve output could have been due to improper execution.

Action: Try the command manually on the node to verify proper execution, and fix any issues arising out of this.

PRVF-09657: The CTSS command "{0}" failed to execute correctly or failed to produce valid output on all of the nodes

Cause: Reason for failure could be due to improper execution.

Action: Look at the individual messages for each node and take action as per those messages.

PRVF-09659: The time offset of "{1}" on node "{0}" against reference node "{3}" is NOT within specified limit of "{2}" milliseconds

Cause: One of the clocks, either on the current node, or on the reference node has drifted beyond limits.

Action: Monitor the offset over a longer duration and verify if the offset reduces over this period and falls within the threshold limits. Oracle Time Synchronization Service does periodic adjustments of the clock to attempt to bring it within threshold limits. If the threshold does not fall within limits over a period of time possibly due to a large deviation or drift, it is recommended that the Oracle processes on this node be shutdown, and the clock be adjusted on the problematic node suitably. It is NOT recommended to set a clock backwards.

PRVF-09661: Time offset is greater than acceptable limit on node "{0}" [actual = "{1}", acceptable = "{2}"]

Cause: System clock has drifted from the clock on the reference node for the specified set of nodes.

Action: Look at the individual messages for each node and take action as per those messages.

PRVF-09664: CTSS is in an inconsistent state with some nodes in Observer state and some nodes in Active state. All nodes must be either in Observer state or in Active state. Nodes with CTSS in Active state:"{0}" Nodes with CTSS in Observer state: "{1}"

Cause: Some nodes may have NTP configured and some other nodes may not have NTP configured, resulting in an inconsistent state of CTSS.

Action: Stop Oracle CTSS service on all nodes and restart. Ensure that NTP is either configured on all nodes or not configured on any node.

PRVF-09665: Check of Clusterware install failed on some nodes. Clock Synchronization check will proceed with remaining nodes

Cause: A valid CRSHome was not found on one or more nodes. The messages displayed prior to this message indicate the list of nodes where a valid Clusterware install was not found.

Action: Specify the correct set of nodes that contain a valid Clusterware installation, or complete the Clusterware installation on those node(s) and repeat this CVU verification.

PRVF-09666: CTSS is in Observer state. Switching over to clock synchronization checks using NTP

Cause: All of the nodes queried for CTSS state indicate they are in Observer state. In the Observer state, CTSS is not performing active clock synchronization adjustments, but letting the underlying NTP handle this action.

Action: None. This is a normal state.

PRVF-09667: CTSS is in Observer state. Switching over to Windows-specific time synchronization checks

Cause: All of the nodes queried for CTSS state indicate they are in Observer state. In the Observer state, CTSS is not performing active clock synchronization adjustments, but letting the underlying Windows time synchronization mechanisms handle this action.

Action: Look at the results of the Windows time synchronization checks displayed following this message. If there are any errors reported, perform action suggested for those error messages.

PRVF-09668: Command "{0}" executed to retrieve CTSS resource status failed on all of the nodes

Cause: CVU attempts to execute the displayed command failed on all of the nodes.

Action: Examine the messages displayed for each node and take action as per those messages.

PRVF-09669: Failure to query CTSS resource on all nodes in the cluster

Cause: Attempt to query CTSS resource on all of the nodes in the cluster failed. Possibly because Clusterware may not be running on the nodes.

Action: Look at the specific error messages reported for each of the nodes and take action as per those messages.

PRVF-09670: Failure checking status of CTSS on node "{1}" using command "{0}"

Cause: CTSS may not OFFLINE, or may not be running, or the remote node may not be accessible.

Action: Try running in the indicated command directly on the specified node and ensure it is up and running, check that the remote node, and check user equivalence.

PRVF-09671: CTSS on node "{1}" is not in ONLINE state, when checked with command "{0}"

Cause: The CTSS daemon is not running on the node, it may have died or may have been stopped.

Action: Restart the CTSS daemon on the specified node.

PRVF-09672: All nodes for which CTSS state was checked failed the check: Nodes: "{0}"

Cause: CTSS is not in ONLINE state on any of nodes, possibly due to node accessibility, or being stopped.

Action: Look at the individual messages displayed for each node and perform the suggested action for those messages.

PRVF-09676: Clusterware is not installed on all nodes checked : "{0}"

Cause: A valid Clusterware installation was not found on these nodes.

Action: Make sure the correct nodes are being specified in this check, or make sure that Clusterware is fully installed on the nodes before running this check for those nodes.

PRVF-09691: Clock Synchronization check without Oracle Cluster Time Synchronization Service (CTSS) is not supported on this platform

Cause: The command line parameter, '-noctss', was specified on the command line which indicates that Clock Synchronization check should be performed without Oracle Cluster Time Synchronization Service (CTSS). This is not supported on this platform.

Action: Run the Clock Synchronization check without the '-noctss' flag.

PRVF-09692: CRS Active version is less than 11.2, performing NTP checks

Cause: CTSS is supported only from release 11.2 onwards. Therefore, the clocksync component check can only run NTP checks.

Action: None

PRVF-09695: Failed to determine operating system patch status on the node "{0}"

Cause: Operating system patch status could not be determined.

Action: Ensure that the operating system configuration is accessible.

PRVF-09800: An exception occurred while attempting to determine storage type for location "{0}"

Cause: The location indicated may not be available on the node, or may have insufficient permissions for access by the user running the CVU check.

Action: Make sure that the location is available on the node, and has the right permissions to allow the user running the CVU check to read its attributes.

PRVF-09801: The storage location "{0}" is not a device, and therefore invalid for running Udev permissions check

Cause: UDev permissions check are valid only for storage devices, and not valid for any kind of file system.

Action: Make sure that a valid storage device location is specified. If the location is derived from an ASM discovery string, make sure that the discovery string specified points to one or more storage devices, and not filesystems.

PRVF-09802: Attempt to get udev info from node "{0}" failed

Cause: Attempt to read the udev permissions file failed, probably due to missing permissions directory, missing or invalid permissions file, or permissions file not accessible to user account running the check.

Action: Make sure that the udev permissions directory is created, the udev permissions file is available, and it has correct read permissions for access by the user running the check.

PRVF-09806: Failed to get storage attributes to compare udev attributes against, udev attributes check aborted

Cause: In order to compare Udev attributes for a given storage location, the expected storage attributes are required to compare against. There was a failure to get these attributes, possibly due to invalid or non-existing Clusterware installation.

Action: Make sure that a valid Clusterware install exists on the node.

PRVF-09807: Encountered an internal error. The range of reference data for verification of kernel param "{0}" has not been correctly defined for node "{1}"

Cause: No reference range defined to be used to calculate expected value.

Action: Define a reference range.

PRVF-09809: Proper OS Patch is not found on node "{0}" [Expected = "{1}" ; Found = "{2}"]

Cause: Required OS Patch is not applied.

Action: Apply the required OS Patch.

PRVF-09810: No prereq file defined

Cause: Prereq file was not set.

Action: Set prereq file.

PRVF-09811: Reference data is not available for verifying prerequisites on this operating system distribution

Cause: No reference data was found for this operating system distribution.

Action: Please check the documentation for a list of supported operating system distributions for this product.

PRVF-09903: Check of Clusterware install failed on some nodes. Oracle patch check will proceed with remaining nodes

Cause: A valid CRS home was not found on one or more nodes. The messages displayed prior to this message indicate the list of nodes where a valid Clusterware install was not found.

Action: Specify the correct set of nodes that contain a valid Clusterware installation, or complete the Clusterware installation on those node(s) and repeat this CVU verification.

PRVF-09905: Clusterware is not installed on the following nodes : "{0}"

Cause: A valid Clusterware installation was not found on these nodes.

Action: Make sure the correct nodes are being specified, and that the Clusterware is fully installed on the nodes before running this check for those nodes.

PRVF-09907: Failed to query patch information from OPatch inventory

Cause: The execution of opatch lsinventory command failed.

Action: Make sure that the install inventory is readable by the user.

PRVF-09908: Failed to query patch information from Oracle executable

Cause: Oracle executable could not be queried for patch information.

Action: Make sure that Oracle executable is present and is readable by the user running CVU.

PRVF-09909: Patch information from OPatch did not match patch information from Oracle executable

Cause: Bug information from OPatch inventory does not match patch information recorded with Oracle executable.

Action: Make sure that all patches are applied correctly, refer to the OPatch user guide for information on patch application. Make sure that Oracle executable is relinked, refer to the Oracle Administrator Guide for information on relinking executables.

PRVF-09910: Patch information is not consistent across nodes

Cause: Bug information from OPatch do not match between the nodes.

Action: Make sure that all patches are applied correctly on all nodes, refer to the OPatch user guide for information on patch application.

PRVF-09913: Patch information from OPatch did not match patch information from Oracle executable on the following nodes:

Cause: Bug information from OPatch inventory does not match patch information recorded with Oracle executable.

Action: Make sure that all patches are applied correctly, refer to the OPatch user guide for information on patch application. Make sure that Oracle executable is relinked, refer to the Oracle Administrator Guide for information on relinking executables.

PRVF-09914: bug list did not match across nodes for the following nodes

Cause: Bug information from OPatch do not match between the nodes.

Action: Make sure that all patches are applied correctly on all nodes, refer to the OPatch user guide for information on patch application.

PRVF-09990: Antivirus software is running

Cause: Antivirus software was detected to be running.

Action: Oracle recommends that the Antivirus software be disabled. Antivirus may introduce delays in processing that interfere with time-sensitive cluster operations.

PRVF-09991: Owner of device "{0}" did not match the expected owner. [Expected = "{1}"; Found = "{2}"] on nodes: {3}

Cause: Owner of the device listed was different than required owner.

Action: Change the owner of the device listed or specify a different device.

PRVF-09992: Group of device "{0}" did not match the expected group. [Expected = "{1}"; Found = "{2}"] on nodes: {3}

Cause: Group of the device listed was different than required group.

Action: Change the group of the device listed or specify a different device.

PRVF-09993: Permissions of device "{0}" did not match the expected permissions. [Expected = "{1}"; Found = "{2}"] on nodes: {3}

Cause: Permissions of the device listed was different than the required permissions.

Action: Change the permissions on the device listed or specify a different device.

PRVF-09994: Owner, group, permission information could not be obtained for device(s) "{0}" on node "{1}"

Cause: Owner, group and permission information could not be obtained for devices listed on the nodes listed.

Action: "Ensure that the correct devices were specified and that they are created on the indicated node. Make sure that the path exists and is accessible by the user.

PRVF-09995: Owner, group, permission information could not be obtained for all devices on node "{1}"

Cause: Owner, group and permission information could not be obtained for all devices on the node listed.

Action: Make sure that the node is up. Make sure that user equivalence exists on the node listed.

PRVF-09998: User "{0}" could not be verified as a domain user, domain "{1}" is either an invalid domain or can not be contacted

Cause: Current user could not be verified as domain user. The identified domain name was either an invalid domain name or the domain could not be contacted.

Action: Ensure that the Windows Domain Server is reachable; log in to the OS as a domain user.

PRVF-10002: Node "{0}" is not yet deleted from the Oracle inventory node list

Cause: The indicated node still exists in the list of nodes for the CRS home in the Oracle inventory.

Action: Use 'runInstaller -updateNodeList' to remove the indicated node from the CRS home node list.

PRVF-10014: Clusterware home "{0}" is located under Oracle base directory "{1}" on nodes "{2}"

Cause: Clusterware home directory was found to be located in a subdirectory of ORACLE_BASE.

Action: Choose a Clusterware home directory that is not a subdirectory of the ORACLE_BASE. After Clusterware installation the owner will be changed to root for all of the directories above Clusterware home.

PRVF-10015: Clusterware home "{0}" is located under Oracle base directory "{1}" on node "{2}"

Cause: Clusterware home directory was found to be located in a subdirectory of ORACLE_BASE.

Action: Choose a Clusterware home directory that is not a subdirectory of the ORACLE_BASE. After Clusterware installation the owner will be changed to root for all of the directories above Clusterware home.

PRVF-10016: Unable to check for the locations of Clusterware home and Oracle Base directory on nodes "{0}"

Cause: Clusterware home or Oracle Base is not accessible or do not exist.

Action: Ensure that Oracle Base and Clusterware home exist and are accessible.

PRVF-10017: Unable to check for the locations of Clusterware home and Oracle Base directory on node "{0}"

Cause: Clusterware home or Oracle Base is not accessible or do not exist.

Action: Ensure that Oracle Base and Clusterware home exist and are accessible.

PRVF-10018: Clusterware home "{0}" is located under Oracle base directory "{1}"

Cause: The Clusterware home directory was found to be a subdirectory of the Oracle base directory.

Action: Choose a Clusterware home directory that is not a subdirectory of the Oracle base directory. After Clusterware installation the owner will be changed to root for all of the directories above Clusterware home.

PRVF-10035: OCR location is not the same across the cluster nodes

Cause: More than one OCR location was found across the cluster nodes.

Action: Ensure the OCR location is the same across the cluster nodes.

PRVF-10037: Failed to retrieve storage type for "{0}" on node "{1}"

Cause: The storage location specified may be non-existent or invalid or the user running the check may not have permissions to access the specified storage.

Action: Specify a valid existing location, and ensure that the user running the check has valid read permissions to this location.

PRVF-10038: Could not find any OCR Locations

Cause: OCR Locations were not passed to the check.

Action: Pass Oracle locations to the check.

PRVF-10105: ASMLib is not installed on the nodes:

Cause: The ASMLib installation file /etc/init.d/oracleasm was not found or could not be accessed on one or more nodes.

Action: Ensure that the ASMLib is correctly installed on all the nodes, or is not installed on any node.

PRVF-10106: ASMLib is not installed on the node "{0}"

Cause: The ASMLib installation file /etc/init.d/oracleasm was not found or could not be accessed on the indicated node.

Action: Ensure that the ASMLib is correctly installed on the specified node, or is not installed on any node.

PRVF-10107: Failed to retrieve ASMLib information on the nodes:

Cause: The check for ASMLib installation was unable to retrieve the required information on one or more nodes.

Action: Ensure that the ASMLib is correctly installed on all the nodes and that the user has the necessary access privileges.

PRVF-10108: Failed to retrieve ASMLib information on the node "{0}"

Cause: The check for ASMLib installation was unable to retrieve the required information on the indicated node.

Action: Ensure that the ASMLib is correctly installed on all the nodes and that the user has the necessary access privileges.

PRVF-10109: ASMLib is not configured correctly on the nodes:

Cause: ASMLib was found configured on some nodes, but not on the listed nodes.

Action: Ensure that the ASMLib is configured correctly and enabled on all the nodes, or is not configured on any node.

PRVF-10110: ASMLib is not configured correctly on the node "{0}"

Cause: ASMLib was found configured on some nodes, but not on the indicated node.

Action: Ensure that the ASMLib is configured correctly and enabled on all the nodes, or is not configured on any node.

PRVF-10111: ASMLib does not identify the disks "{0}" on the nodes:

Cause: ASMLib could not list all the disks on one or more nodes.

Action: Ensure that the ASMLib is configured correctly to list all the created disks, To refresh the list of disks execute "/etc/init.d/oracleasm scandisks".

PRVF-10112: ASMLib does not identify the disks "{0}" on the node "{1}"

Cause: ASMLib could not list all the disks on the indicated node.

Action: Ensure that the ASMLib is configured correctly to list all the created disks, To refresh the list of disks execute "/etc/init.d/oracleasm scandisks".

PRVF-10208: Following error occurred during the VIP subnet configuration check

Cause: An error occurred while performing the VIP subnet check.

Action: Look at the accompanying messages for details on the cause of failure.

PRVF-10209: VIPs "{0}" are active before Clusterware installation

Cause: Node VIPs were found to be active on the network before Clusterware installation.

Action: If you are upgrading an older release of Clusterware this is not an error. In case of new installation, make sure that the IP addresses to be configured as VIPs are currently unused.

PRVF-10210: VIPs "{0}" are not active after Clusterware installation

Cause: Node VIPs were found to be not active on the network after Clusterware installation.

Action: Please run the command 'srvctl start nodeapps' to bring up VIPs

PRVF-10211: Failed lookup of IP address for host "{0}"

Cause: An error occurred while trying to get IP address of the node VIP name.

Action: Run 'nslookup' on the name and make sure the name is resolved or add the node VIP name into OS hosts file.

PRVF-10304: IPMI device driver does not exist on nodes {0}

Cause: Open IPMI device driver is not installed on the nodes.

Action: Install Open IPMI device drivers.

PRVF-10306: Error occurred while retrieving IP address of IPMI device on nodes {0}

Cause: An internally-issued 'crsctl get css ipmiaddr' on the nodes failed.

Action: Configure IPMI device over LAN and run command 'crsctl set css ipmiaddr' command on the nodes to set the IP address.

PRVF-10307: IPMI IP address {0} on node {1} is not reachable

Cause: A timeout occurred while receiving IPMI ping response. Usually this results from having the wrong IP address.

Action: Run 'crsctl set css ipmiaddr' command to set the correct IP address.

PRVF-10308: Login to node {0} BMC device using stored credentials failed

Cause: An attempt to login to BMC on the node using username and password present in IPMI wallet failed.

Action: Run 'crsctl set css ipmiadmin' command to set correct credentials.

PRVF-10405: Path "{0}" is not suitable for usage as RAC database software

Cause: The specified path is not found suitable for usage as RAC database software

Action: Ensure that you have selected a path that is suitable for the desired usage.

PRVF-10406: Path "{0}" is not suitable for usage as RAC database file

Cause: The specified path is not found suitable for usage as RAC database file

Action: Ensure that you have selected a path that is suitable for the desired usage.

PRVF-10407: Path "{0}" is not suitable for usage as Oracle Clusterware storage

Cause: The specified path is not found suitable for usage as Oracle Clusterware storage(OCR or Voting Disk).

Action: Ensure that you have selected a path that is suitable for the desired usage.

PRVF-10408: Path "{0}" is not suitable for usage as Single Instance database software

Cause: The specified path is not found suitable for usage as Single Instance database software

Action: Ensure that you have selected a path that is suitable for the desired usage.

PRVF-10409: Path "{0}" is not suitable for usage as Single Instance database file

Cause: The specified path is not found suitable for usage as Single Instance database file

Action: Ensure that you have selected a path that is suitable for the desired usage.

PRVP-01044 to PRVP-01044

PRVP-01044: Error occurred while opening configuration file "{0}"

Cause: Configuration file could not be opened. It either does not exist or you are not allowed read access.

Action: Provide a usable configuration file.

PRCW-01001 to PRCW-01014

PRCW-01001: Could not allocate new memory

Cause: Could not allocation any new memory.

Action: Retry after make more memory available.

PRCW-01002: Network Security error code {0}

Cause: Failed to perform the network security operation.

Action: Look at the network security error for the appropriate action.

PRCW-01003: Failed to do the cluster wallet operation {0}

Cause: Failed to perform the cluster wallet operation.

Action: Look at the cluster wallet error for the appropriate action.

PRCW-01004: Could not open the wallet {0} due to error {1} : {2}

Cause: Failed to open the cluster wallet.

Action: Look at the cluster wallet error for the appropriate action.

PRCW-01005: Wallet {1} did not exist due to error code {1}

Cause: The cluster wallet did not exist.

Action: Need to create the cluster wallet.

PRCW-01006: Alias {0} in Wallet {1} did not exist

Cause: The alias within the cluster wallet did not exist.

Action: Need to create the alias within the cluster wallet.

PRCW-01007: Alias {0} in Wallet {1} could not be read due to error {2}

Cause: Could not read the alias within the cluster wallet.

Action: Look at the network security error for the appropriate action.

PRCW-01008: Alias {0} in Wallet {1} could not be written due to error code {2}

Cause: Could not write the secret of the alias to the cluster wallet.

Action: Look at the network security error for the appropriate action.

PRCW-01009: Wallet {0} could not be saved due to error code {1}

Cause: Could not save the cluster wallet.

Action: Look at the cluster wallet error for the appropriate action.

PRCW-01010: Wallet {0} could not be created due to error {1}: {2}

Cause: Could not create the cluster wallet.

Action: Look at the cluster wallet error for the appropriate action.

PRCW-01011: Wallet {0} could not be accessed due to error code {1}

Cause: Could not access the cluster wallet.

Action: Use the correct cluster wallet password.

PRCW-01012: Wallet {0} could not be deleted due to error code {1}

Cause: Could not delete the cluster wallet.

Action: Look at the cluster wallet error for the appropriate action.

PRCW-01013: Failed to initialize cluster wallet context due to error code {0}

Cause: Could not initialize the cluster wallet context.

Action: Look at the cluster wallet error for the appropriate action.

PRCW-01014: Failed to terminate cluster wallet context due to error code {0}

Cause: Could not terminate the cluster wallet context.

Action: Look at the cluster wallet error for the appropriate action.

PRCA-01000 to PRCA-01056

PRCA-01000: ASM Disk Group {0} does not exist

Cause: An attempt failed to retrieve an ASM disk group that was not configured.

Action: Create the diskgroup using sqlplus if the specified diskgroup does not exist. Mount the diskgroup in ASM which registers the diskgroup with CRS.

PRCA-01001: ASM Disk Group resource does not exist

Cause: There was no disk group resource registered with CRS.

Action: Create the diskgroup using sqlplus and mount the diskgroup in ASM which registers the diskgroup with CRS.

PRCA-01002: Failed to remove CRS resource {0} for ASM Disk Group {1}

Cause: An attempt to remove the CRS resource for the specified ASM Disk Group failed.

Action: Examine the accompanying error messages for details.

PRCA-01003: Failed to create ASM {0} resource {1}

Cause: An attempt to add the CRS resource for ASM failed.

Action: Ensure that the CRS stack is running, the user running `srvctl add asm` is also the owner of the CRS home, and examine the accompanying error message for details.

PRCA-01005: Failed to retrieve server parameter file of ASM {0}

Cause: Cannot retrieve ASM server parameter file.

Action: Retry the request after ensuring that the CRS stack is running, the ASM resource has been configured, and the user has read permission on the ASM resource.

PRCA-01006: Failed to update server parameter file {0} of ASM {1}

Cause: Unable to update the ASM server parameter file.

Action: Retry the request after ensuring that the CRS stack is running, the ASM resource has been configured, and the user has update permission on the ASM resource.

PRCA-01007: ASM {0} is not using initialization parameters: {1}

Cause: The specified ASM instance does not use the initialization parameters shown.

Action: Examine the accompanying error messages for details.

PRCA-01016: Failed to remove ASM resource {0} for ASM instance {1}

Cause: An attempt to remove the specified ASM configuration failed.

Action: Examine the accompanying error message for details.

PRCA-01017: ASM {0} does not exist

Cause: ASM is not configured yet.

Action: Configure ASM and then retry.

PRCA-01018: Failed to retrieve ASM instance list for ASM {0}

Cause: Failed to retrieve the list of ASM instances.

Action: Make sure that the crs stack is up and the ASM resource has been configured.

PRCA-01019: ASM {0} is not running

Cause: The ASM resource does not have any running instances.

Action: Use 'srvctl start asm' command to start the asm resource.

PRCA-01020: Unable to create ACFS file system resource {0} for the volume device {1}

Cause: The ACFS file system resource for the specified volume device path could not be created. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc) 4) Was unable to identify the mount point that the user requested the resource to use.

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. (srvctl status asm) 3) Verify that the user is running with administrative access. 4) Verify that the mount point given to the create resource command exists.

PRCA-01021: Unable to retrieve ACFS file system for the volume device {0}

Cause: The ACFS file system resource for the specified volume device path could not be retrieved. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc) 4) Was unable to identify the mount point that the user requested the resource to use.

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. (srvctl status asm) 3) Verify that the user is running with administrative access. 4) Verify that the mount point given to the create resource command exists.

PRCA-01022: ACFS file system resource already exists for disk group {0} and volume {1}

Cause: The ACFS file system resource had already been created for the specified disk group and volume names.

Action: 1) Supply a different volume device path to srvctl add filesystem to create a different ACFS file system resource. -or- 2) Delete the previous resource (' srvctl remove filesystem -d <volume device> ') and re-run the command.

PRCA-01023: Unable to add ACFS file system resource {0} for disk group {1} and volume {2}

Cause: The ACFS file system resource for the specified volume device path could not be added. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative

access. (root, Administrator, etc) 4) Was unable to identify the mount point that the user requested the resource to use.

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access. 4) Verify that the mount point given to the create resource command exists.

PRCA-01024: Unable to retrieve the volume for disk group {0} and volume {1}

Cause: The ACFS file system resource for the specified volume device path was unable to be retrieved. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc)

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access.

PRCA-01025: Unable to retrieve the mountpoint path for disk group {0} and volume {1}

Cause: The ACFS file system resource for the specified volume device path was unable to be retrieved. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc)

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access.

PRCA-01026: Unable to set the user of the ACFS file system for disk group {0} and volume {1}

Cause: The user of the ACFS file system resource for the specified disk group and volume was unable to be modified. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc)

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access.

PRCA-01027: Failed to remove ACFS file system configuration for disk group {0} and volume {1}

Cause: Cannot remove the ACFS file system configuration for the specified disk group and volume.

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access.

PRCA-01028: Failed to retrieve listener associated with ASM {0}

Cause: Failed to retrieve listener associated with ASM.

Action: Ensure that user has read permissions on ASM resource and then retry. Also, ensure that listener specified in ASM resource's start dependencies exists.

PRCA-01029: Failed to associate listener {0} with ASM {1}

Cause: Failed to associate given listener with ASM.

Action: Ensure that user has update permissions on ASM resource and then retry.

PRCA-01030: Failed to retrieve the diskgroup associated with the volume device {0}

Cause: Unable to retrieve the diskgroup associated with the given volume device using "asmcmd volinfo -g <volume_name>" command.

Action: Make sure that the asm instance is running; the asmcmd utility exists and the underlying ofs devices are accessible.

PRCA-01031: Unable to retrieve the diskgroup {0} associated with the volume device {1}

Cause: The ACFS file system resource for the specified volume device path was unable to be retrieved. Possible causes: 1) CRS stack was not available. 2) ASM instance was not running. 3) User was not running with an account with administrative access. (root, Administrator, etc) 4) Disk group is not mounted.

Action: 1) Verify that the CRS stack is available. ('crsctl check crs') 2) Verify that ASM is running. ('srvctl status asm') 3) Verify that the user is running with administrative access. 4) Verify that the disk group is mounted.

PRCA-01032: ASM listener {0} does not exist

Cause: ASM listener is not registered with Oracle Clusterware.

Action: Run 'srvctl add listener -l <lsnr_name>' command with <lsnr_name> as in above error message, or if there is another listener registered with Oracle clusterware, then try 'srvctl modify asm -l <lsnr_name>'

PRCA-01033: ACFS file system resource does not exist for volume device {0}

Cause: The ACFS file system resource with the specified volume device was not registered with the Oracle Clusterware.

Action: Use 'srvctl add filesystem' command to create an ACFS file system resource.

PRCA-01034: ACFS file system resource does not exist in Oracle Clusterware

Cause: No ACFS file system resource was registered with the Oracle clusterware.

Action: Use 'srvctl add filesystem' command to create an ACFS file system resource.

PRCA-01035: Unable to determine the databases that use the disk group {0}

Cause: Unable to retrieve databases that have dependencies on the disk group.

Action: Make sure that the crs stack is up; the user has read permissions on database CRS resources and then retry.

PRCA-01036: An Oracle Restart environment-specific API was invoked in an Oracle Clusterware environment.

Cause: Internal error.

Action: Contact Oracle Support Services.

PRCA-01037: Failed to retrieve the diskgroup discovery string of ASM {0}

Cause: An attempt to retrieve the diskgroup discovery string for ASM failed.

Action: Retry the request after ensuring that the CRS stack is running, the ASM resource has been configured, and the user has read permission on ASM resource.

PRCA-01038: Failed to update the diskgroup discovery string {0} of ASM {1}

Cause: An attempt to update the diskgroup discovery string for ASM failed.

Action: Retry the request after ensuring that the CRS stack is running, the ASM resource has been configured, and the user has update permission on ASM resource.

PRCA-01039: Volume device {0} does not exist

Cause: The supplied volume device does not exist.

Action: Use asmca to create the volume device and then run 'srvctl add filesystem' command again.

PRCA-01040: Failed to check the existence of volume device {0}

Cause: Failed to execute acfsutil command to check for the existence of the supplied volume device.

Action: Review the underlying error messages that provide the details of why acfsutil execution failed. Resolve the reported problem and retry the command.

PRCA-01041: Failed to validate disk group {0} of volume device {1}

Cause: Failed to execute acfsutil command to validate the disk group of the volume device.

Action: Review the underlying error messages that provide the details of why acfsutil execution failed. Resolve the reported problem and retry 'srvctl add filesystem' command.

PRCA-01042: Diskgroup {0} is not valid for volume device {1}

Cause: The supplied diskgroup does not match the underlying diskgroup created for the supplied volume device.

Action: Execute 'srvctl add filesystem' command with the correct disk group value.

PRCA-01043: Failed to validate volume {0} of volume device {1}

Cause: Failed to execute acfsutil command to validate the volume of the volume device.

Action: Review the underlying error messages that provide the details of why acfsutil execution failed. Resolve the reported problem and retry 'srvctl add filesystem' command.

PRCA-01044: Volume {0} is not valid for volume device {1}

Cause: The supplied volume does not match the underlying volume created for the supplied volume device.

Action: Execute 'srvctl add filesystem' command with the correct volume value.

PRCA-01045: ACFS is not supported on this platform

Cause: A filesystem operation was requested on an unsupported platform.

Action: Run srvctl filesystem command on a supported platform.

PRCA-01046: File system for volume device {0} exists in the ACFS registry

Cause: File system for the specified volume device was registered in the ACFS registry. File system can either be in the ACFS registry or registered as a CRS resource, but not both.

Action: Either run 'acfsutil registry -d' to delete the volume device from the ACFS registry or run 'srvctl add filesystem' with a different volume device.

PRCA-01047: Unable to find ACFS file system resource for volume device {0} because of inability to get the canonical form of the volume device

Cause: An internally-issued 'advmutil canonical' command failed and the volume device recorded in the ACFS file system resource did not match the specified volume device.

Action: Review the underlying error messages that provide the details of why advmutil execution failed. Resolve the reported problem and retry.

PRCA-01048: The user "{0}" could not be found on the cluster

Cause: The user specified as the file system owner/user could not be found.

Action: Enter the name of an existing user or the owner of the specified file system.

PRCA-01049: Invalid mount point path {0} because specified mount point path was a remote path

Cause: The specified mount point path was a remote path.

Action: Make sure that the mount point path was not a remote path.

PRCA-01050: Unable to retrieve the canonical form of the volume device for disk group {0} and volume {1}

Cause: The ACFS file system resource for the specified canonical form of the volume device path was not retrieved.

Action: 1) Make sure that the CRS stack is available. ('crsctl check crs') 2) Review the accompanying error messages for details about the failure. Retry after resolving those issues.

PRCA-01056: Unable to upgrade ACFS from version {0} to version {1}

Cause: Failed to upgrade ACFS from one version to another version.

Action: Review the accompanying error messages for details about the failure. Retry after resolving those issues.

PRCC-01000 to PRCC-01020

PRCC-01000: Parameter {0} value is not valid

Cause: This is an internal error. The value for the specified parameter is null or empty string.

Action: Contact Oracle Support Services.

PRCC-01001: Failed to retrieve install group: {0}

Cause: An attempt to retrieve the install group failed.

Action: Examine the accompanying error messages for details.

PRCC-01002: Failed to update install group: {0}

Cause: An attempt to set the install group failed.

Action: Examine the accompanying error messages for details.

PRCC-01003: Version for module {0} is not available

Cause: An attempt to retrieve the version information for specified module failed.

Action: Examine the accompanying error messages for details.

PRCC-01004: Unknown identifier {0} specified for checking result of operation

Cause: Failed to retrieve the result from the exception data using the specified identifier because the exception did not have the specified identifier.

Action: This is an internal error. Contact Oracle Support Services.

PRCC-01005: Parameter {0} is not an absolute path

Cause: The specified parameter is not an absolute directory path.

Action: Provide an absolute directory path.

PRCC-01006: Path {0} is not a directory

Cause: The specified path is not a directory.

Action: Provide a directory path.

PRCC-01007: Path {0} does not exist

Cause: The specified path did not exist.

Action: Provide an existing directory path.

PRCC-01008: Enumerated type {0} does not have a member with corresponding value of {1}

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRCC-01009: Parameter {0} cannot have null as a value

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRCC-01010: {0} was already enabled

Cause: Given entity was already enabled.

Action: No action needed. To re-enable the entity, first disable it and then retry.

PRCC-01011: {0} was already enabled on {1}

Cause: Given entity was already enabled on given nodes.

Action: No action needed. To re-enable the entity on given nodes, first disable it on these nodes and then retry.

PRCC-01012: {0} was already disabled

Cause: Given entity was already disabled.

Action: No action needed. To re-disable the entity, first enable it and then retry.

PRCC-01013: {0} was already disabled on {1}

Cause: Given entity was already disabled on given nodes.

Action: No action needed.

PRCC-01014: {0} was already running

Cause: Given entity is already running.

Action: No action needed. To re-start the entity, first stop it and then retry.

PRCC-01015: {0} was already running on {1}

Cause: Given entity was already running on given nodes.

Action: No action needed. To re-start the entity on given nodes, first stop it on these nodes and then retry.

PRCC-01016: {0} was already stopped

Cause: Given entity was already stopped.

Action: No action needed. To re-stop the entity, first start it and then retry.

PRCC-01017: {0} was already stopped on {1}

Cause: Given entity was already stopped on given nodes.

Action: No action needed. To re-stop the entity on given nodes, first start it on these nodes and then retry.

PRCC-01018: A request to retrieve private network addresses for node {0} found no addresses

Cause: A request to retrieve private network addresses by executing 'olsnodes -p' returned no private IP addresses.

Action: Check 'oifcfg getif' for cluster_interconnect networks and ensure this node has an IP address on the cluster_interconnect networks.

PRCC-01019: Parameter "{0}" value is not valid

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRCC-01020: Version {0} cannot be used to administer resource configuration of version {1} or later

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRCD-01000 to PRCD-01246

PRCD-01000: Database {0} already exists

Cause: The specified database resource was already registered in Oracle Clusterware.

Action: No action is needed.

PRCD-01001: Database {0} does not exist

Cause: The specified database resource was not registered in Oracle Clusterware.

Action: Register the database resource using 'srvctl add database'.

PRCD-01002: Database {0} is dependent upon server pool {1}

Cause: An attempt to remove the specified server pool failed because the server pool is in use.

Action: Remove the specified database before removing the server pool.

PRCD-01003: Service {0} already exists

Cause: The specified service was already created and registered in Oracle Clusterware.

Action: No action is needed.

PRCD-01004: Service {0} is dependent upon server pool {1}

Cause: An attempt to remove the specified server pool failed because the server pool is in use.

Action: Remove the specified service before removing the server pool.

PRCD-01005: Server pool {0} for the database {1} does not exist

Cause: The specified server pool used by the database was removed by force.

Action: Create the server pool using 'srvctl add srvpool'.

PRCD-01007: Failed to retrieve the database name

Cause: Failed in retrieving the DB_NAME resource attribute.

Action: Review the accompanying error messages for details about the failure. Retry after resolving those issues.

PRCD-01008: Server parameter file does not exist for database {0}

Cause: Failed in retrieving the SPFILE resource attribute.

Action: Review the accompanying error messages for details about the failure. Retry after resolving those issues.

PRCD-01009: Failed to retrieve server parameter file of database {0}

Cause: Cannot retrieve the server parameter file for the specified database.
Action: Retry the request after ensuring that the CRS stack is running, the database resource has been configured, and the user has read permission on the database resource.

PRCD-01010: Failed to update server parameter file {0} of database {1}

Cause: Unable to update the server parameter file for the specified database.
Action: Retry the request after ensuring that the CRS stack is running, the database resource has been configured, and the user has update permission on the database resource.

PRCD-01011: Failed to identify whether this database {0} is a multi-instance database

Cause: Failed in retrieving the CLUSTER_DATABASE resource attribute.
Action: Examine the accompanying error messages for details.

PRCD-01012: Failed to retrieve disk group list for database {0}.

Cause: Failed to retrieve the diskgroups from the start dependencies of the specified database.
Action: Examine the accompanying error messages for details. Create the diskgroup using sqlplus if the specified diskgroup does not exist. Mount the diskgroup in database which registers the diskgroup with Oracle Clusterware.

PRCD-01014: Failed to retrieve database domain of database {0}

Cause: Failed to get the domain of the specified database from its USR_ORA_DOMAIN attribute.
Action: Examine the accompanying error messages for details.

PRCD-01015: Combination of service cardinality {0} and TAF {1} is not allowed for service {2}

Cause: The specified service cardinality can not be used with the specified TAF policy.
Action: Change the cardinality or find a matching TAF policy. PRECONNECT can only be used with SINGLETON cardinality.

PRCD-01016: Failure encountered while accessing server pool {0} for database {1}

Cause: An attempt to look up the server pools referenced by the database SERVER_POOLS attribute failed.
Action: Examine the accompanying error messages for details.

PRCD-01019: Failed to retrieve Oracle home of database {0}

Cause: An attempt to retrieve the TAF_POLICY attribute of the specified database failed.
Action: Examine the accompanying error messages for details.

PRCD-01020: Failed to retrieve TAF policy for service {0}

Cause: An attempt to retrieve the ORACLE_HOME attribute of the specified database failed.
Action: Examine the accompanying error messages for details.

PRCD-01021: Failed to update TAF policy {0} for service {1}

Cause: An attempt to set the TAF_POLICY attribute of the specified database failed.

Action: Examine the accompanying error messages for details.

PRCD-01022: Cannot add a second instance to a single instance database

Cause: Unable to add an instance to a single instance database.

Action: Multiple instances are not supported for a single instance database. Convert to a RAC database if multiple instances are desired.

PRCD-01023: An instance has already been added to node {0} for database {1}

Cause: Unable to add an instance to the database on the specified node because another instance has already been added to the node.

Action: Use 'srvctl modify instance' command to change the instance name on the specified node.

PRCD-01024: Failed to retrieve instance list for database {0}

Cause: An attempt to get the list of the instances for the specified database failed.

Action: Examine the accompanying error messages for details.

PRCD-01025: Failed to create database {0}

Cause: An attempt to create Clusterware resources for the specified database failed. Either the request was issued by the wrong OS userid or a problem was detected inside Oracle Clusterware.

Action: Examine the accompanying error messages for details. Login in as the user of the Oracle Home to issue the command 'srvctl add database'.

PRCD-01026: Failed to create service {0} for database {1}

Cause: An attempt to create the specified service failed because the command 'srvctl add service' was not issued by the Oracle Home owner.

Action: Examine the accompanying error messages for details. Login in as the user of the Oracle Home to issue the command 'srvctl add service'.

PRCD-01027: Failed to retrieve database {0}

Cause: An attempt to get the specified database failed.

Action: Examine the accompanying error messages for details.

PRCD-01028: Failed to retrieve service resource {0} for database {1}

Cause: An attempt to get the specified service failed.

Action: Examine the accompanying error messages for details.

PRCD-01029: Disk group {0} for database {1} does not exist

Cause: The disk group for the specified database does not exist.

Action: Use 'srvctl add diskgroup' to add the specified disk group.

PRCD-01030: Failed to determine whether the database {0} has cardinality

Cause: Failed to determine whether the specified database is cardinality based or not based on its VERSION attribute.

Action: Examine the accompanying error messages for details.

PRCD-01031: Failed to determine whether the service {0} has cardinality

Cause: Failed to check whether the specified service is cardinality based or not.

Action: Examine the accompanying error messages for details.

PRCD-01032: Failed to remove database resource {0}

Cause: Failed to remove the specified database.

Action: Examine the accompanying error messages for details.

PRCD-01033: The server pool of service {0} is different from the server pool of database {1}

Cause: The specified server pool is not the child of the database's server pool.

Action: Use a server pool which is the child of the database's server pool.

PRCD-01034: Database {0} is not a single instance database. It is a cluster database

Cause: The specified database is not a single instance database.

Action: Provide database name for a single instance database.

PRCD-01035: Database {0} is not a cluster database

Cause: The specified database is not a cluster database.

Action: Provide database name for a RAC database.

PRCD-01036: Failed to set Oracle home {0} for database {1}

Cause: An attempt to update Oracle home for the specified database failed.

Action: Examine the accompanying error messages for details.

PRCD-01037: Failed to set Oracle home {0} for database {1} on node {2}

Cause: An attempt to update Oracle home for the specified database on the specified node failed.

Action: Examine the accompanying error messages for details.

PRCD-01038: Cannot create a RAC database {0} in a non cluster environment

Cause: Failed to create the specified RAC database because Oracle Clusterware is not installed and configured.

Action: Install and configure Oracle Clusterware before creating the RAC database.

PRCD-01039: Failed to retrieve database for service {0}

Cause: An attempt to get the database that the specified service depended on failed. This is an internal error.

Action: Contact Oracle Support Services.

PRCD-01040: Specified server pool {0} for {1} is already hosting an administrator-managed configuration for databases {2} and services {3}

Cause: Server pool is hosting administrator-managed databases and service.

Action: Specify a server pool that is not hosting an administrator-managed database and service.

PRCD-01041: The administrator-managed database {0} can have only one server pool {1}

Cause: Multiple server pools cannot be configured for an administrator-managed database

Action: Contact Oracle Support.

PRCD-01042: The database {1} is administrator-managed and a policy-managed service {0} cannot be created on it.

Cause: The specified database does not support policy-managed services.

Action: Provide a database which supports policy-managed services.

PRCD-01043: The service {0} is not a uniform or a singleton service and therefore it cannot be created as policy-managed service. This service can only be created as administrator-managed service using preferred, and optionally available instance lists.

Cause: The service to be created was an administrator-managed service and the database that the service depended on was a policy-managed database.

Action: Use preferred and available instance lists to create an administrator-managed service for an administrator-managed database.

PRCD-01044: Failed to retrieve the list of nodes where instances have been configured for database {0}

Cause: An attempt failed to get the list of nodes where the instances of the specified database were configured.

Action: Examine the accompanying error messages for details.

PRCD-01045: Database {0} is policy managed and does not support add instance option

Cause: The specified database does not support add instance option

Action: 1) Provide an administrator-managed database. -or- 2) For policy-managed database, add a server to a server pool which manages the database using 'srvctl modify srvpool' or 'srvctl relocate server'.

PRCD-01046: Database {0} is policy managed and does not support the remove instance option

Cause: The specified database does not support the remove instance option.

Action: 1) Provide an administrator-managed database. -or- 2) For policy-managed database, stop the database on a server and then remove that server from the server pool which manages the database using 'srvctl modify srvpool' or 'srvctl relocate server'.

PRCD-01047: Failed to retrieve list of services for database {0}

Cause: An attempt to get the list of services for the specified database failed.

Action: Examine the accompanying error messages for details.

PRCD-01048: Cannot remove instance from the single instance database {0}

Cause: An attempt to remove the instance from the single instance database failed.

Action: Remove the database using 'srvctl remove database'.

PRCD-01049: Failed to update server pool {0} for database {1}

Cause: An attempt to update the specified server pool failed.

Action: Examine the accompanying error messages for details.

PRCD-01050: Failed to update auto start value of service {0}

Cause: An attempt to update the auto start value for the specified service failed.

Action: Examine the accompanying error messages for details.

PRCD-01051: Failed to add instance to database {0}

Cause: An attempt to add an instance to the specified database failed because the node of the instance is not a node of the cluster or other errors.

Action: Examine the accompanying error messages for details.

PRCD-01052: Failed to remove instance from database {0}

Cause: An attempt to remove the specified instance failed because the services depended on the instance or other errors.

Action: Examine the accompanying error messages for details.

PRCD-01053: Failed to retrieve the database instances providing service {0}

Cause: An attempt to get the database instances that provide the specified service failed.

Action: Examine the accompanying error messages for details.

PRCD-01054: Database name is null

Cause: The database name given by the user is null.

Action: Provide a valid database name that is not a null string.

PRCD-01055: Instance name is null

Cause: The instance name given by the user is null.

Action: Provide a valid instance name that is not a null string.

PRCD-01056: Database name {0} contains invalid characters

Cause: The supplied database name contains invalid characters.

Action: Supply a valid database name. The valid character set for database name is [a-zA-Z0-9\$_#_].

PRCD-01057: Instance name {0} is not valid

Cause: The supplied instance name is not of the correct format.

Action: Supplied a valid instance name. The valid character set for instance name is [a-zA-Z0-9_-].

PRCD-01058: Invalid server pool list {0} supplied for single instance database {1}

Cause: The server pool size was not one when creating a single instance database on a cluster.

Action: Use one server pool with only one server when creating the single instance database.

PRCD-01059: Instance name prefix {0} contains illegal characters

Cause: The supplied instance name prefix contained non-alphanumeric characters.

Action: Supply an instance name prefix that consists of alphanumeric characters a-z, A-Z, and 0-9.

PRCD-01060: Server pool has not been supplied for creating cluster service {0} for database {1}

Cause: No server pool argument has been supplied when configuring a cluster database.

Action: Supply an existing server pool when configuring a cluster database.

PRCD-01061: No database exists

Cause: No database has been configured.

Action: Configured database and retry.

-
- PRCD-01062: Invalid service cardinality {0}**
Cause: The service cardinality supplied is not valid.
Action: Supply a valid service cardinality.
- PRCD-01063: Invalid service taf policy {0}**
Cause: The service taf policy supplied is not valid.
Action: Supply a valid service taf policy.
- PRCD-01064: Invalid database role {0}**
Cause: The database role supplied is not valid.
Action: Supply a valid database role.
- PRCD-01065: Invalid managment policy {0}**
Cause: The management policy supplied is not valid.
Action: Supply a valid management policy. The management policy should be automatic or manual.
- PRCD-01066: Invalid start option {0}**
Cause: The start option supplied is not valid.
Action: Supply a valid start option.
- PRCD-01067: Invalid stop option {0}**
Cause: The stop option supplied is not valid.
Action: Supply a valid stop option.
- PRCD-01068: Failed to modify instance {0} on node {1} for database {2}**
Cause: The instance for the specified node does not exist on the database.
Action: Use srvctl add instance to add the per-X instance.
- PRCD-01069: Failed to modify instance {0} on node {1} for database {2}**
Cause: The instance for the specified node cannot not be updated.
Action: Make sure that the crs stack is up and running; the oracle user has the permission to modify the instance; and then retry.
- PRCD-01070: Failed to retrieve startup options for database {0}**
Cause: Unable to retrieve the startup options for the database.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01071: Failed to update startup options for database {0}**
Cause: Unable to update the startup options for the database.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01072: Failed to retrieve stop options for database {0}**
Cause: Unable to retrieve the stop options for the database.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01073: Failed to update stop options for database {0}**
Cause: Unable to update the stop options for the database.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01074: Failed to retrieve the database role for database {0}**

-
- Cause:** Unable to retrieve the database role for the database.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01075: Failed to set the database role {1} for database {0}**
Cause: Unable to update the database role for the database.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01076: Failed to retrieve the management policy for database {0}**
Cause: Unable to retrieve the management policy for the database.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01077: Failed to update the management policy for database {0}**
Cause: Unable to update the management policy for the database.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01078: Failed to update the db name {0} of database {1}**
Cause: Unable to update the db name for the database.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01079: Failed to update pullup for service {0}; {1}**
Cause: Failed to update pullup modifier for the service.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01080: Failed to get attributes for service {0}**
Cause: Failed to get attributes for the service.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01081: Failed to set attributes for service {0}**
Cause: Failed to set attributes for the service.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01082: Failed to modify service {0}; Unsupported attribute {1}**
Cause: Operation doesn't support modification of attribute.
Action: Fix your application.
- PRCD-01083: Failed to modify service {0}**
Cause: Failed to modify service.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01084: Failed to start service {0}**
Cause: Failed to start the service.
Action: Make sure that the crs stack is up and running and then retry.
- PRCD-01085: Failed to stop service {0}**
Cause: Failed to stop the service.
Action: Make sure that the crs stack is up, the service is running and then retry.
- PRCD-01086: Invalid rlb goal {0}**
Cause: The rlb goal supplied is not valid.
Action: Supply a valid rlb goal.

PRCD-01087: Invalid failover type {0}

Cause: The failover type supplied is not valid.

Action: Supply a valid failover type.

PRCD-01088: Invalid connection load balancing goal {0}

Cause: The clb goal supplied is not valid.

Action: Supply a valid clb goal.

PRCD-01089: Invalid failover method {0}

Cause: The failover method supplied is not valid.

Action: Supply a valid failover method.

PRCD-01090: Failed to retrieve Oracle home of database {0} on node {1}

Cause: No Oracle home of the database has been set on the specified node.

Action: Set the Oracle home of the database on the specified node.

PRCD-01091: Failed to create database instance {0} for database {1}

Cause: Unable to create database instance for the specified instance name.

Action: Make sure that the local node can be used for creating a database instance; the instance name provided is valid. The valid character set for instance name is [a-zA-Z0-9_-].

PRCD-01092: Failed to create database instance {0} for database {1} on node {2}

Cause: Unable to create database instance for the specified instance name and node name.

Action: Make sure that the specified node can be used to create a database; the instance name provided is valid. The valid character set for instance name is [a-zA-Z0-9_-].

PRCD-01093: Failed to update the domain {0} of database {1}

Cause: Unable to update the domain for the database.

Action: Make sure that the crs stack is up and running and then retry.

PRCD-01094: Failed to create start dependency for database {0} on the ASM cluster filesystem where ACFS path {1} resides

Cause: Unable to modify the database resource to include a start dependency on the ASM cluster filesystem for the ACFS path.

Action: Make sure that the ASM instance is running, the OFS driver exists in the driver directory, and the underlying ofs devices are accessible.

PRCD-01095: Failed to retrieve databases for version 11.1 and earlier

Cause: Unable to read OCR configuration to get databases for version 11.1 and earlier

Action: Make sure that the Oracle clusterware is up and running and the primary group of the user running srvctl is the same as the primary group of the user who installed the Oracle clusterware home. Also, run 11.1 srvctl config to verify that the database configuration exists in OCR.

PRCD-01096: Failed to retrieve the database unique name

Cause: Unable to read the attribute value for database unique name.

Action: Make sure that the Oracle clusterware is up and running and then retry.

PRCD-01097: Failed to retrieve the active servers of server pool {0} for database {1}

Cause: Unable to read the active servers attribute value for the database underlying server pools.

Action: Make sure that the Oracle clusterware is up and running; the database underlying server pools exist; the user has the permission to access the database underlying server pools and then retry.

PRCD-01098: Failed to retrieve the configured servers of server pool {0} for database {1}

Cause: Unable to read the servers attribute value for the database underlying server pool.

Action: Make sure that the Oracle clusterware is up and running; the database underlying server pool exists and then retry.

PRCD-01099: {0} enum member has a constant value that cannot be changed to given value {1}

Cause: An attempt was made to change value of read-only valued enum member.

Action: Contact Oracle Support Services.

PRCD-01100: Invalid relocate option {0}

Cause: Supplied relocate option is unknown.

Action: Contact Oracle Support Services.

PRCD-01101: Failed to remove running instance {0} for database {1}

Cause: Unable to remove the instance configuration for the database because the instance was still running.

Action: Stop the running instance using `srvctl stop instance` command and then retry.

PRCD-01102: Failed to create preconnect service for service {0}

Cause: An attempt to register service failed due to failure to register its corresponding preconnect service.

Action: Contact Oracle Support Services.

PRCD-01103: Failed to retrieve the maximum cardinality for database {0}

Cause: Unable to query the number of servers in the server pool used to manage the database.

Action: Make sure that the Oracle clusterware is up and running; the database underlying server pool exists and then retry.

PRCD-01104: A source server must be specified to relocate cluster database {0}

Cause: Cluster database cannot be relocated without specifying source server to relocate instance from.

Action: Supply source and target servers for database relocation.

PRCD-01105: A source server must be specified to relocate service {0}

Cause: Cluster database service cannot be relocated without specifying source server to relocate service member from.

Action: Supply source and target servers for service relocation.

PRCD-01106: Failed remove service {0}; could not get data for its underlying server pool

Cause: Server pool data is not found.

Action: Make sure that the Oracle clusterware is up and running; the service underlying server pool exists.

PRCD-01107: Removed service {0} but failed to remove its underlying server pool {1}

Cause: Failed to remove the server pool.

Action: Make sure that the Oracle clusterware is running and remove the server pool manually.

PRCD-01108: Failed to identify whether database {0} is an administrator-managed database

Cause: Failed to get database attributes.

Action: Make sure that the Oracle clusterware is up and running; the database exists.

PRCD-01109: Failed to find administrator-managed service {0} of database {1} because the database is a policy-managed database.

Cause: The database does not support administrator-managed services.

Action: Provide an administrator-managed database and make sure that the service exists within that database.

PRCD-01110: Database {0} does not have instances {1}

Cause: The database does not have instances mentioned in the message.

Action: Make sure that database name is correct and the database has requested instances.

PRCD-01111: The type of service cardinality for this operation should be {1}, not {0}

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRCD-01112: Failed to get preferred instances of service {0}

Cause: The service does not exist or the Oracle clusterware is down.

Action: Make sure that the Oracle clusterware is up and running and the service exists.

PRCD-01113: Failed to modify service {0}

Cause: The service does not exist or the Oracle clusterware is down.

Action: Make sure that the Oracle clusterware is up and running and the service exists.

PRCD-01114: Failed to enable service {0} on one or more instances

Cause: The service does not exist or enabled on all database instances. The Oracle clusterware is down.

Action: make sure that the Oracle clusterware is up and running; the service exists and disabled on at least one database instance.

PRCD-01115: Failed to disable service {0} on one or more instances

Cause: The service does not exist or disabled on all database instances. The Oracle clusterware is down.

Action: Make sure that the Oracle clusterware is up and running; the service exists and enabled on at least one database instance.

PRCD-01116: Failed to get available instances of service {0}

Cause: The service does not exist or the Oracle clusterware is down.

Action: Make sure that the Oracle clusterware is up and running and the service exists.

PRCD-01117: Failed to modify service {0}, the service should have at least one preferred instance

Cause: An attempt was made to remove all preferred instances of the service.

Action: Make sure that there is at least one instance provided in the service preferred instance list.

PRCD-01118: Failed to set service {0} to {1} because it runs on more than one node

Cause: The service was running on more than one node.

Action: Make sure that the service is not running or running on one node only.

PRCD-01119: Failed to create database {0} because the database unique name matches that of database {1} in the first 8 characters

Cause: The database unique name is not unique in the first 8 characters. It is a requirement because the name is used to generate ORACLE_SID.

Action: Ensure that the name supplied to either DBCA or srvctl during database creation is sufficiently unique, and retry the command.

PRCD-01120: The resource for database {0} could not be found.

Cause: The resource for the specified database name could not be found. Either the database name was misspelled or the database has not been created.

Action: Correct the database name spelling or use the 'srvctl add database' command to create the database configuration.

PRCD-01121: Specified server pool {0} for {1} is already hosting an administrator-managed configuration for database(s) {2}

Cause: Server pool is hosting administrator-managed databases.

Action: Specify a server pool that is not hosting an administrator-managed database.

PRCD-01122: Specified server pool {0} for {1} is already hosting an administrator-managed configuration for service(s) {2}

Cause: Server pool is hosting administrator-managed services.

Action: Specify a server pool that is not hosting an administrator-managed service.

PRCD-01123: Oracle Clusterware resource does not exist for ACFS filesystem of volume device {0}. A resource is required for the filesystem containing ACFS path {1}.

Cause: The resource for the filesystem did not exist for the database which has its dependency on the ACFS path. A resource is required for path used by the database on ACFS filesystems so that Oracle Clusterware can track the database's dependency on the filesystem. Database's dependent ACFS paths cannot be mounted via the ACFS registry.

Action: Add the resource with 'srvctl add filesystem'.

PRCD-01124: Failed to stop database {0} and its services

Cause: Attempt to stop the database has failed.

Action: Ensure that user attempting to stop the database has execute privileges on the database resource. Also, review the accompanying error messages for details about failure to stop database. Retry after resolving those issues or contact Oracle Support Services.

PRCD-01125: Failed to create dependency from database {0} to its Oracle home {1} that is located on the ASM cluster filesystem

Cause: An attempt to modify the database resource to include a stop dependency on the ASM cluster filesystem for the database's Oracle home failed.

Action: Make sure that the asm instance is running; the ACFS driver exists in the driver directory and the underlying ACFS devices are accessible.

PRCD-01126: Instance {0} cannot be removed because it is the only preferred instance for service(s) {1} for database {2}

Cause: An attempt was made to remove the instance which is the only preferred instance for specified services.

Action: Make sure that specified services have more than one preferred instance or modify services to not have the instance as a preferred instance.

PRCD-01127: Failed to verify if instance {0} is the only preferred instance for any service

Cause: An attempt to verify if the instance is the only preferred instance for any service failed.

Action: Make sure that the Oracle clusterware is up and running. Also, review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01128: Failed to remove all services configured for database {0}

Cause: An attempt to remove all services configured for database.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01129: Failed to start instance {0} for database {1}

Cause: An attempt to start an instance with the specified name failed.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01130: Failed to convert administrator-managed database {0} into a policy-managed database to use server pool {1}

Cause: An attempt to convert the database from an administrator-managed configuration to a policy-managed configuration failed.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01131: Failed to stop database {0} and its services on node(s) {1}

Cause: Attempt to stop the database on given nodes has failed.

Action: Ensure that user attempting to stop the database has execute privileges on the database resource. Also, review the accompanying error messages for details about failure to stop database. Retry after resolving those issues or contact Oracle Support Services.

PRCD-01132: Database {0} doesn't have defined service(s) {1}

Cause: An attempt to start/stop services on the given database failed.

Action: Make sure that every service you want to start or stop is configured for the given database.

PRCD-01133: Failed to start services for database {0}

Cause: An attempt to start given services on the given database failed because those service(s) are not configured for the database.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01134: Failed to find any listener defined for network {0}

Cause: An attempt to find listener(s) defined for specified network failed.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01135: There is no listener defined for network {0} to be used by service {1}

Cause: An attempt to create a service failed because provided network doesn't have listener to publish a service on that network.

Action: Make sure that the provided network has a listener.

PRCD-01136: Failed to retrieve type of the database {0}

Cause: An attempt to query the type of database has failed.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01137: Failed to retrieve online relocation timeout for RAC One Node database {0}

Cause: An attempt to query the current online relocation timeout for RAC One Node database has failed.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01138: Failed to set online relocation timeout to {0} for RAC One Node database {1}

Cause: An attempt to update the online relocation timeout for RAC One Node Database has failed.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01139: The current server {0} where RAC One Node database {1} is running is not in the given candidate server list {2}

Cause: An attempt to update the candidate servers of the server pool hosting RAC One Node Database has failed because current server where this database is running is not in the given candidate server list.

Action: Retry the operation after either including the current server where this database is running in the given candidate server list or stopping the database.

PRCD-01140: Failed to update candidate servers to {0} of the server pool hosting RAC One Node database {1}

Cause: An attempt to update the candidate servers of the server pool hosting RAC One Node Database has failed.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01141: The database {0} is not hosted by a server pool

Cause: An attempt to query the server pool for given database failed because this database is not hosted by a server pool. This is most likely due to a program calling cluster environment API in Oracle Restart environment.

Action: Examine the accompanying error messages for details and contact Oracle Support Services.

PRCD-01142: The {0} TAF policy is not valid for RAC One Node service {1}

Cause: A TAF policy other than BASIC or NONE was specified for RAC One Node service.

Action: Specify BASIC or NONE TAF policy and retry the operation.

PRCD-01143: The cardinality of {0} is not valid for RAC One Node database or service {1}

Cause: An invalid cardinality was specified for RAC One Node database or service.

Action: Specify a SINGLETON cardinality and retry the operation.

PRCD-01144: The {0} management policy is not valid for RAC One Node database {1}

Cause: A management policy other than AUTOMATIC was specified for RAC One Node database.

Action: Specify AUTOMATIC management policy and retry the operation.

PRCD-01145: {0} API is not supported on RAC One Node database environment

Cause: Internal error.

Action: Contact Oracle Support Services.

PRCD-01146: Database {0} is not a RAC One Node database

Cause: The specified database is not a RAC One Node database.

Action: Provide database name for a RAC One Node database.

PRCD-01147: The server pool {0} of administrator-managed database {1} has no candidate servers

Cause: Either no instance had been added to the database or this database's server pool was altered inappropriately.

Action: If no instance was added to the database yet, try to add an instance to this database, for example by using 'srvctl add instance' command, and then retry. Otherwise, contact Oracle Support Services.

PRCD-01148: Failed to convert the configuration of RAC One Node database {0} into its equivalent configuration for RAC database

Cause: Internal error.

Action: Review the accompanying error messages and contact Oracle Support Services.

PRCD-01149: AUTOMATIC management policy cannot be used for the service {0} when the database {1} is not AUTOMATIC

Cause: An attempt to create/modify a service failed because the management policy specified for the service is AUTOMATIC but the database's management policy is not AUTOMATIC.

Action: Make sure that the provided service's management policy is MANUAL or NORESTART when running 'srvctl add service' or 'srvctl modify service' command.

PRCD-01150: Failed to retrieve EDITION for service {0}

Cause: An attempt to retrieve the EDITION attribute of the specified database failed.

Action: Examine the accompanying error messages for details.

PRCD-01151: Failed to convert the configuration of RAC One Node database {0} into its equivalent RAC database configuration because RAC One Node database is running on a different server {1} than the given target server {2}

Cause: A target server was specified that was different from the server where the RAC One Node database is running.

Action: Either supply the server where RAC One Node Database is running now as target server or stop the database and retry.

PRCD-01152: Failed to update instance name {0} for database {1}

Cause: An attempt to update instance name for the specified database failed.

Action: Examine the accompanying error messages for details.

PRCD-01153: Failed to convert the configuration of cluster database {0} into its equivalent RAC One Node database configuration

Cause: An attempt to convert the specified cluster database to RAC One Node database failed.

Action: Review the accompanying error messages and retry after resolving these errors or contact Oracle Support Services.

PRCD-01154: Failed to convert the configuration of cluster database {0} into its equivalent RAC One Node database configuration because cluster database is running on more than one server {1}

Cause: User attempted conversion of a cluster database to RAC One Node database that was running on more than one servers.

Action: Stop this database on all but one server and retry.

PRCD-01155: Failed to convert the configuration of cluster database {0} into its equivalent RAC One Node database configuration because cluster database has more than one server pool {1} to control its placement

Cause: User attempted conversion of a cluster database that had more than one server pool to control its placement.

Action: Update configuration of this database by either 'srvctl modify database' or if this database has services that are in their own respective server pool, then removing all but one of its services via 'srvctl remove service' and then retry.

PRCD-01156: Failed to convert the configuration of cluster database {0} into its equivalent configuration for RAC One Node database due to its services {1} having {2} TAF policy

Cause: This database has services that have TAF policy (e.g. PRECONNECT) that is not supported by RAC One Node Database.

Action: Either modify the TAF policy of these services to either BASIC or NONE using 'srvctl modify service' or remove these services using 'srvctl remove service' and then retry.

PRCD-01157: Failed to convert the configuration of cluster database {0} into its equivalent configuration for RAC One Node database because none of its services have {1} management policy

Cause: An attempt to convert a cluster database configuration into its equivalent configuration for RAC One Node database was rejected because all services of the given database have MANUAL management policy.

Action: Modify the management policy of at least one of these services to AUTOMATIC using 'srvctl modify service ... -y AUTOMATIC' command and then retry.

PRCD-01158: Invalid database type {0}

Cause: The database type supplied is not valid.

Action: Supply a valid database type.

PRCD-01159: Target node must be specified when initiating an online relocation of administrator managed RAC One Node database {0}

Cause: The target node was not specified when requesting online relocation on administrator managed RAC One Node database.

Action: Use 'srvctl relocate database' command with -n option.

PRCD-01160: Online relocation request for RAC One Node database {0} was rejected because this database is not running

Cause: RAC One Node database was not running.

Action: Start the database by issuing the 'srvctl start database' command and then retry.

PRCD-01161: Online relocation failed for RAC One Node database {0}

Cause: Online relocation of the given database was unsuccessful.

Action: Either run 'srvctl relocate database -a' command to abort the online relocation or run 'srvctl relocate database -n' command to perform online relocation of the database to the given target node.

PRCD-01162: Invalid online relocation status {0}

Cause: This is an internal error.

Action: Review the accompanying error messages and contact Oracle Support Services.

PRCD-01163: Failed to modify database {0}

Cause: Failed to modify database.

Action: Make sure that the CRS stack is up and running and then retry.

PRCD-01164: An online relocation request for RAC One Node database {0} is already active

Cause: The given database has an already active online relocation request.

Action: Either specify another database in the 'srvctl relocate database' command or abort the in-progress request with 'srvctl relocate database -a' command.

PRCD-01165: An online relocation request for RAC One Node database {0} has failed

Cause: An online relocation request for the database has failed and the supplied target node was not the same as that in the failed request.

Action: Use 'srvctl status database' command to query the target node of the failed online relocation request. Either run 'srvctl relocate database -a' command to abort the failed request or 'srvctl relocate database -n' command with with the correct target node.

PRCD-01166: The supplied node {0} is not available in the {1} server pool

Cause: Supplied node was not in the Free server pool.

Action: Supply node from the Free server pool.

PRCD-01175: Failed to determine the status of the online relocation request for RAC One Node database {0}

Cause: Unable to determine the status of the online relocation request for given RAC One Node database.

Action: Examine the accompanying error messages for details.

PRCD-01176: Invalid online relocation state {0}

Cause: This is an internal error.

Action: Review the accompanying error messages and contact Oracle Support Services.

PRCD-01177: Failed to abort the online relocation request for RAC One Node database {0}

Cause: Failed to abort the online relocation of the RAC One Node database.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01178: A failed online relocation request for RAC One Node database {0} does not exist

Cause: The supplied RAC One Node database does not have a failed online relocation request.

Action: Supply a RAC One Node database that has a failed online relocation request.

PRCD-01179: The online relocation timeout value {0} is not within the range of between {1} and {2}

Cause: The specified online relocation timeout value was not within the required range.

Action: Supply a value within the required range.

PRCD-01180: Configuration of database {0} has already been upgraded to version {1}

Cause: The supplied database was already upgraded.

Action: Supply a database of a lower version.

PRCD-01181: Failed to upgrade configuration of services {0} to version {1}

Cause: Failed to upgrade the service configuration.

Action: Review the accompanying error messages. If you are unable to resolve the problem, contact Oracle Support Services.

PRCD-01182: Failed to upgrade configuration of database {0} to version {1}

Cause: Failed to upgrade the database configuration.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01183: Failed to upgrade configuration of service type to version {0}

Cause: Failed to upgrade the service type configuration.

Action: Review the accompanying error messages and contact Oracle Support Services.

PRCD-01184: Failed to upgrade configuration of database type to version {0}

Cause: Failed to upgrade the database type configuration.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01185: Failed to retrieve service resource {0} for non cluster database {1}

Cause: An attempt to get the specified service failed because the database provided is a single instance and not a cluster database.

Action: Make sure that Oracle Clusterware is configured, specify a service defined for cluster database, and then retry.

PRCD-01186: TAF policy 'PRECONNECT' cannot be used to add a service for single instance database {0}

Cause: Failed to create a service because provided TAF specification can not be used with a single instance database.

Action: Retry after removing 'PRECONNECT' TAF policy.

PRCD-01187: Failed to enable or disable service {0} on particular nodes for non-cluster single instance database {1}

Cause: An attempt to enable or disable the service on particular nodes for single instance database failed. Such enable or disable operations are not applicable to services defined for single instance databases in Oracle Restart.

Action: Specify a service defined for database which is running on cluster or do not specify nodes.

PRCD-01188: Failed to detect whether the standby database {0} supports the Data Guard protection mode

Cause: An attempt has failed to determine whether the standby database supports the configured Data Guard protection mode.

Action: Review the accompanying error messages for details about the failure and retry the command after resolving those issues.

PRCD-01189: Cannot update server pool to {0} for RAC One Node database service {1}

Cause: Attempt to update server pool of a RAC One Node database service was rejected because placement of this service is controlled by the server pool hosting the underlying database.

Action: Try updating the server pool controlling the placement of the database via 'srvctl modify database' command or its equivalent.

PRCD-01190: Cannot update server pool to {0} for single instance database service {1}

Cause: Attempt to update server pool of a single instance (non-RAC) database service was rejected because placement of this service is controlled by the server pool hosting the underlying database.

Action: Try updating the server pool controlling the placement of the database via 'srvctl modify database' command or its equivalent.

PRCD-01191: Cannot update server pool to {0} for database service {1}

Cause: Attempt to update server pool of database service was rejected because a subpool server pool was specified.

Action: Supply a first-level server pool that is not a subpool of any other server pool and retry the operation.

PRCD-01192: The cardinality {0} is not valid for single instance database service {1}

Cause: An invalid cardinality was specified for single instance (non-RAC) database.

Action: Retry after specifying a SINGLETON cardinality in 'srvctl modify service' command or its equivalent.

PRCD-01193: Service {0} defined for RAC One Node database {1} cannot be started on more than one node

Cause: An attempt to start the specified service failed because RAC One Node service cannot be started on more than one node.

Action: Retry after specifying one node to start the service on.

PRCD-01194: Failed to retrieve the version of database {0}

Cause: An attempt to retrieve the VERSION resource attribute has failed.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01195: Option to remove the target node was not allowed for aborting online relocation of policy-managed RAC One Node database {0}

Cause: Option -r was specified in a request to abort online relocation on policy managed RAC One Node database.

Action: Use 'srvctl relocate database -a' command without -r option.

PRCD-01196: 'PRECONNECT' TAF policy cannot be used to create service {0} on policy managed database {1}

Cause: Failed to create a service because a policy managed database cannot have service with PRECONNECT TAF policy.

Action: Retry after supplying 'BASIC' or 'NONE' TAF policy.

PRCD-01197: The database {0} is policy-managed and an administrator-managed service {1} cannot be created on it

Cause: The specified database does not support administrator-managed services.

Action: Provide a database which supports administrator-managed services.

PRCD-01198: Failed to add service {0} to database {1} because database is already at maximum services limit of {2}

Cause: Attempt to add a new service to database was rejected because database has already reached the maximum services limit.

Action: Retry after removing a service from this database via 'srvctl remove service' command, or contact Oracle Support Services.

PRCD-01199: The stop request on instance {0} of standby database {1} was rejected to prevent termination of the primary database

Cause: The attempt to stop this instance of the standby database was rejected because the configured Data Guard protection mode required this instance to be running to prevent termination of the primary database.

Action: Retry the stop request after stopping the primary database or downgrading the protection mode.

PRCD-01200: Configuration of database {0} has already been downgraded to version {1} for database {2}

Cause: The supplied database was already downgraded.

Action: Supply a database of a higher version.

PRCD-01201: Downgrade from current version {0} to version {1} is not supported for database {2}

Cause: An unsupported version was specified for downgrading the database.

Action: Check that the versions provided are correct.

PRCD-01202: Failed to downgrade configuration of services {0} to version {1}

Cause: A request to downgrade the service configuration failed.

Action: Review the accompanying error messages. If you are unable to resolve the problem, contact Oracle Support Services.

PRCD-01203: Failed to downgrade configuration of database {0} to version {1}

Cause: A request to downgrade the database configuration failed.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01204: Failed to update administrator-managed database {0} to use server pool {1}

Cause: Attempt to update administrator-managed database was rejected because administrator-managed database cannot be moved to another subpool.

Action: Retry after supplying a first-level server pool in 'srvctl modify database' command to convert administrator-managed database to policy-managed database.

PRCD-01205: Failed to update policy-managed database {0} to use server pools {1}

Cause: Attempt to update policy-managed database was rejected because specified server pools do not include all server pools hosting services of this database.

Action: Either include all server pools hosting services of this database in the supplied server pool list or specify one server pool to move all services into one server pool in 'srvctl modify database' command and retry.

PRCD-01206: Failed to retrieve preferred instance of service {0} of RAC One Node database {1}

Cause: Attempt to retrieve preferred instance of service belonging to RAC One Node database failed because database is either in failed online relocation state or undergoing online relocation.

Action: Check the status of online relocation via 'srvctl status database' command. If online relocation status is reported as active, then retry after online relocation completes. If online relocation status is reported as failed, then repair the configuration via 'srvctl relocate database ... -a' command and then retry.

PRCD-01207: The start options {2} can not be used while starting service {0} and its database {1}

Cause: An attempt to start the service was rejected because the specified start options can not be used with service when the database is not running.

Action: Remove the specified start options and then retry.

PRCD-01208: The start options {1} can not be used while starting services for database {0}

Cause: An attempt to start the services was rejected because the specified start options can not be used with services when the database is not running.

Action: Remove the specified start options and then retry.

PRCD-01209: RAC One Node database {0} does not have enough servers in its server pool {1} to initiate an online relocation

Cause: Online relocation request was rejected because there were less than two servers in the server pool of the specified RAC One Node database.

Action: Make sure that the minimum and maximum size of the server pool are set properly.

PRCD-01210: The service name {0} cannot be same as the database default service name {1}

Cause: An attempt to create the service was rejected because the given service name is same as the database default service name.

Action: Retry after supplying a service name that is different than the database default service name.

PRCD-01211: Cannot start RAC One Node database {0} because a failure has occurred while trying to clean up an earlier failed online relocation

Cause: An attempt to start a RAC One Node database was rejected because a failure has occurred while trying to clean up an earlier failed online relocation.

Action: Use 'srvctl status database' command to query the target node of the failed online relocation process. Either run 'srvctl relocate database' with -a option or with -n option with the target node thus discovered.

PRCD-01212: An instance with name "{0}" already exists on node {1}

Cause: Unable to add an instance to the database on the specified node because an instance with the same name was found on another node.

Action: Use 'srvctl modify instance' command to change the name of the existing instance, or use a different instance name in the 'srvctl add instance -i <inst>' command.

PRCD-01213: Service {0} of database {1} is still running

Cause: An attempt to remove RAC One Node service failed because the given service was still running.

Action: Stop the service and then retry the command.

PRCD-01214: Administrator-managed RAC database {0} has more than one instance

Cause: Failed to convert RAC database to RAC One Node database because there was more than one instance.

Action: Use 'srvctl remove instance' command to remove all but one instance and then run 'srvctl convert database -c RACONENODE'.

PRCD-01215: Unable to downgrade RAC One Node database {0}

Cause: Failed to downgrade RAC One Node database to an earlier version because there was no RAC One Node specific configuration in the earlier version.

Action: None

PRCD-01222: Online relocation of database "{0}" failed but database was restored to its original state

Cause: Online relocation of the given database was unsuccessful, therefore the database was restored to its original state.

Action: See accompanying messages for online relocation failure.

PRCD-01223: The service name {0} contains illegal characters {1}

Cause: An attempt to create the service was rejected because the given service name contains illegal characters.

Action: Retry after supplying a service name that contains characters from its character set ({a-zA-Z0-9_} for the base name, and {a-zA-Z0-9_}\$#} for the domain name if needed)."

PRCD-01224: The {0} management policy is not valid for RAC One Node database service {1}

Cause: A management policy other than AUTOMATIC was specified for RAC One Node database service.

Action: Either specify AUTOMATIC management policy for this service or modify management policy of another service of this database to AUTOMATIC, such as via 'srvctl modify service' command, and then retry the current operation.

PRCD-01225: An attempt to remove service {0} of database {1} was rejected because this is the last service with {2} management policy. A RAC One Node database must have at least one service with {2} management policy.

Cause: An attempt was made to remove the last service of a RAC One Node database having AUTOMATIC management policy.

Action: Add another service with AUTOMATIC management policy, for example by using 'srvctl add service ... -y AUTOMATIC' command, or modify the management policy of an existing service to AUTOMATIC, using 'srvctl modify service' command, before removing the given service.

PRCD-01226: Failed to retrieve ASM Cluster Filesystem resource {0} for database {1}.

Cause: The ASM Cluster Filesystem resource was not registered in Oracle Clusterware.

Action: Create the ASM Cluster Filesystem resource using 'srvctl add filesystem' command and then retry.

PRCD-01227: Failed to retrieve ASM Cluster Filesystem list for database {0}.

Cause: Failed to retrieve the ASM Cluster Filesystems of the specified database.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01228: Failed to convert administrator-managed RAC database {0} to RAC One Node database because the database had no instance added

Cause: Attempt to convert RAC database to RAC One Node database was rejected because database did not have any instance added.

Action: Use 'srvctl add instance' command to add an instance and then run 'srvctl convert database -c RACONENODE'.

PRCD-01229: An attempt to access configuration of database {0} was rejected because its version {1} differs from the program version {2}. Instead run the program from {3}.

Cause: An attempt was made to access configuration of database that is of different version than that of the program.

Action: Make sure that database configuration version and the program version are same and then retry. For example, try the operation using `srvctl` from the `ORACLE_HOME` mentioned in the error message.

PRCD-01230: Failed to modify database {0} to use server pool {1}

Cause: An attempt to modify the database to use the given server pool has failed.

Action: Review the accompanying error messages for details about the failure. For example, a failure could happen if the database owner does not have execute permissions on the given server pool. In this case, use `'srvctl config database -d <db_unique_name>'` command to find out the database owner's username, create a server pool as that user, and then supply that server pool as argument when retrying the command.

PRCD-01231: Failed to upgrade configuration of database {0} to version {1} in new Oracle home {2}

Cause: Failed to upgrade the database configuration.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01232: Failed to upgrade configuration of database {0} because database version {1} is an unsupported version for upgrade

Cause: Version of the database was not supported for upgrade.

Action: None

PRCD-01233: Failed to downgrade configuration of database {0} to version {1} in new Oracle home {2}

Cause: Failed to downgrade the database configuration.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01234: Failed to downgrade configuration of database {0} to version {1} because the specified version is unsupported for downgrade

Cause: Specified version was not supported for downgrade.

Action: Specify a version that is 10.1 or later.

PRCD-01235: Unable to downgrade configuration of single instance database {0} to version {1}

Cause: Single instance database was specified.

Action: Remove the single instance database configuration. 11.2 Clusterware cannot manage pre-11.2 single instance databases.

PRCD-01236: Unable to downgrade configuration of RAC One Node database {0} to version {1}

Cause: RAC One Node database was specified.

Action: Convert the administrator-managed RAC One Node database to an administrator-managed RAC database using `'srvctl convert database'` command and then retry.

PRCD-01237: Unable to downgrade configuration of policy-managed RAC database {0} to version {1}

Cause: Policy-managed RAC database was specified.

Action: Remove the 11.2 database configuration and use pre-11.2 srvctl to re-create the configuration.

PRCD-01238: Failed to get attributes for database {0}

Cause: Failed to get attributes for the database.

Action: Make sure that the CRS stack is up and running and then retry.

PRCD-01239: Failed to downgrade configuration of database {0} to version {1} because the database has dependency on ASM Cluster File System

Cause: Specified database was dependent on ASM Cluster File System.

Action: None

PRCD-01240: Unable to downgrade configuration of database {0} because its database role of {1} is not supported in version {2}

Cause: Database role of specified database was not supported in the specified version.

Action: Modify the database role using 'srvctl modify database' command and then retry this command.

PRCD-01241: Failed to upgrade configuration of database {0} to version {1} in new Oracle home {2}. Also failed to remove the internal server pool configuration.

Cause: Failed to upgrade the database configuration.

Action: Review the accompanying error messages for details about failure. Retry after resolving those issues.

PRCD-01242: Unable to convert RAC database {0} to RAC One Node database because the database had no service added

Cause: Attempt to convert RAC database to RAC One Node database was rejected because the database did not have any service configured. A RAC One Node database must always have one service.

Action: Use 'srvctl add service' command to add a service and then run 'srvctl convert database -c RACONENODE'.

PRCD-01243: Failed to start instance {0} of database {1} because an instance having same name was already running on node {2}

Cause: An attempt to start an instance with the given name was rejected because another instance with same name was already running on another node.

Action: Either supply a different instance name or stop the running instance with the same name and then retry.

PRCD-01244: Failed to start service {0} of RAC One Node database {1} on the given node {2} because the database was running on node {3}

Cause: An attempt to start the specified service on the given node was rejected because RAC One Node database is running on a node different than the given node.

Action: Either omit the node option or supply the node where the database is running.

PRCD-01245: Addition of database version {0} is not allowed using srvctl version {1}

Cause: The versions of srvctl used and database to be created did not match.

Action: Use the same version of srvctl as database.

PRCD-01246: Online relocation of RAC One Node Data Guard standby database "{0}" was rejected because the database is in Data Guard maximum protection mode

Cause: An online relocation request was rejected because the specified database is operating in Data Guard maximum protection mode.

Action: Downgrade the protection mode to maximum availability and retry the online relocation.

PRCH-01000 to PRCH-01060

PRCH-01000: Failed to stop resources running from Oracle home {0}

Cause: Attempt to stop one or more resources in the specified Oracle home failed.

Action: for the individual resource stop failure and perform the steps for each resource that failed to stop.

PRCH-01001: Failed to start resources in Oracle home {0}

Cause: Attempt to start one or more resources in the specified Oracle home failed.

Action: for the individual resource start failure and perform the steps for each resource that failed to start.

PRCH-01002: Failed to stop resources running from CRS home {0}

Cause: Attempt to stop one or more resources in the specified CRS home failed.

Action: for the individual resource stop failure and perform the steps for each resource that failed to stop.

PRCH-01003: Failed to start resources in CRS home {0}

Cause: Attempt to start one or more resources in the specified CRS home failed.

Action: for the individual resource start failure and perform the steps for each resource that failed to start.

PRCH-01004: Failed to stop service

Cause: Attempt to stop a Service resource in the specified oracle home failed.

Action: Review the error messages for possible reasons and if needed, use 'srvctl stop service -d <db_unique_name>' to stop the service.

PRCH-01005: Failed to stop database

Cause: Attempt to stop the database resource in the specified oracle home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop database -d <db_unique_name>' to stop the database.

PRCH-01006: Failed to stop Listener

Cause: Attempt to stop the Listener resource in the specified oracle home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop listener' to stop the Listener.

PRCH-01007: Failed to stop Listener

Cause: Attempt to stop the Listener resource in CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop listener' to stop the Listener.

PRCH-01008: Failed to start service

Cause: Attempt to start a Service resource in the specified oracle home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start service -d <db_unique_name>' to start the service.

PRCH-01009: Failed to start database

Cause: Attempt to start the database resource in the specified oracle home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start database -d <db_unique_name>' to start the database.

PRCH-01010: Failed to start Listener

Cause: Attempt to start the Listener resource in the specified Oracle home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start listener' to start the Listener.

PRCH-01011: Failed to start Listener

Cause: Attempt to start the Listener resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start listener' to start the Listener.

PRCH-01012: Failed to stop EONS

Cause: Attempt to stop the EONS resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop nodeapps' to stop the EONS resource.

PRCH-01013: Failed to start EONS

Cause: Attempt to start the EONS resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start nodeapps' to start the EONS resource.

PRCH-01014: Failed to stop ONS

Cause: Attempt to stop the ONS resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop nodeapps' to stop the ONS resource.

PRCH-01015: Failed to start ONS

Cause: Attempt to start the ONS resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start nodeapps' to start the ONS resource.

PRCH-01016: Failed to stop GSD resource

Cause: Attempt to stop the GSD resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop nodeapps' to stop the GSD resource.

PRCH-01017: Failed to start GSD resource

Cause: Attempt to start the GSD resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start nodeapps' to start the GSD resource.

PRCH-01018: Failed to stop VIP resource

Cause: Attempt to stop the VIP resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop vip -n <node_name>' to stop the VIP resource.

PRCH-01019: Failed to start VIP resource

Cause: Attempt to start the VIP resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start vip -n <node_name>' to start the VIP resource.

PRCH-01020: Failed to stop Network resource

Cause: Attempt to stop the Network resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop nodeapps' to stop the Network resource.

PRCH-01021: Failed to start Network resource

Cause: Attempt to start the Network resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start nodeapps' to start the Network resource.

PRCH-01022: Failed to stop SCAN VIP resource

Cause: Attempt to stop the SCAN VIP resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop scan' to stop the SCAN VIP resource.

PRCH-01023: Failed to start SCAN VIP resource

Cause: Attempt to start the SCAN VIP resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start scan' to start the SCAN VIP resource.

PRCH-01024: Failed to stop SCAN Listener resource

Cause: Attempt to stop the SCAN Listener resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop scan_listener' to stop the SCAN Listener resource.

PRCH-01025: Failed to start SCAN Listener

Cause: Attempt to start the SCAN Listener resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start scan_listener' to start the SCAN Listener resource.

PRCH-01026: Failed to stop ASM

Cause: Attempt to stop the ASM resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop asm' to stop the ASM resource.

PRCH-01027: Failed to start ASM

Cause: Attempt to start the ASM resource in the specified CRS home failed.

Action: Review the accompanying error messages for possible reasons, correct the error and use 'srvctl start asm' to start the ASM resource.

PRCH-01028: One or more resources failed to start: {0}

Cause: Attempt to start one or more resources in the specified oracle home failed.

Action: for the individual resource start failure and perform the steps for each resource that failed to start.

PRCH-01029: One or more resources failed to stop: {0}

Cause: Attempt to stop one or more resources in the specified oracle home failed.

Action: for the individual resource stop failure and perform the steps for each resource that failed to stop.

PRCH-01030: One or more resources failed to stop: {0}

Cause: An attempt to stop one or more resources in the specified CRS home failed.

Action: Review the accompanying resource error messages and their documentation, and correct the problems indicated.

PRCH-01031: One or more resources failed to start: {0}

Cause: Attempt to start one or more resources in the specified CRS home failed.

Action: for the individual resource start failure and perform the steps for each resource that failed to start.

PRCH-01032: Failed to stop GNS resource

Cause: Attempt to stop the GNS resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl stop gns' to stop the GNS resource.

PRCH-01033: Failed to start GNS resource

Cause: Attempt to start the GNS resource in the specified CRS home failed.

Action: Review the error messages for possible reasons, correct the error and use 'srvctl start gns' to start the GNS resource.

PRCH-01034: Failed to stop diskgroup resource

Cause: Attempt to stop the diskgroup resource in the specified home failed.

Action: Review the accompanying error messages for possible reasons, correct the error and use 'srvctl stop diskgroup -g <dg_name>' to stop the diskgroup resource.

PRCH-01035: Failed to start diskgroup resource

Cause: Attempt to start the diskgroup resource in the specified home failed.

Action: Review the accompanying error messages for possible reasons, correct the error and use 'srvctl start diskgroup -g <dg_name>' to start the diskgroup resource.

PRCH-01036: The state file "{0}" does not exist

Cause: The state file required for the current operation was not found.

Action: Make sure the named file exists in the file system.

PRCH-01037: The filesystem object "{0}" is not a file

Cause: The content that was expected to be a file which turned out not to be a file.

Action: Retry the 'srvctl stop home' to generate this file. If the problem still exists, contact Oracle Support Services.

PRCH-01038: "{0}" is a non-readable file

Cause: The user does not have read permissions to open the file.

Action: Modify the file permissions so that the file becomes readable or execute the command from an OS userid with the required privileges.

PRCH-01039: Failed to stop CVU resource

Cause: Attempt to stop the CVU resource failed.

Action: Review the accompanying error messages for possible reasons, correct the error and use 'srvctl stop cvu' to stop the CVU resource.

PRCH-01040: Failed to start CVU resource

Cause: Attempt to start the CVU resource failed.

Action: Review the accompanying error messages for possible reasons, correct the error and use 'srvctl start cvu' to start the CVU resource.

PRCH-01041: Failed while checking status of service "{0}"

Cause: Attempt to check the status of the listed service failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01042: Failed while checking status of database "{0}"

Cause: Attempt to check the status of the listed database failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01043: Failed while checking status of database instance "{0}"

Cause: Attempt to check the status of the listed database instance failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01044: Failed while checking status of listener "{0}"

Cause: Attempt to check the status of the listed listener failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01045: Failed while checking status of VIP "{0}"

Cause: Attempt to check the status of the listed VIP failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01046: Failed while checking status of SCAN VIP "{0}"

Cause: Attempt to check the status of the listed SCAN VIP failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01047: Failed while checking status of SCAN Listener "{0}"

Cause: Attempt to check the status of the listed SCAN Listener failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01048: Failed while checking status of CVU resource "{0}"

Cause: Attempt to check the status of the listed CVU resource failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01049: Failed while checking status of disk group "{0}"

Cause: Attempt to check the status of the listed disk group failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01050: Failed while checking status of ASM "{0}"

Cause: Attempt to check the status of the listed ASM failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01051: Failed while checking status of GNS "{0}"

Cause: Attempt to check the status of the listed GNS failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01052: Failed while checking status of GSD "{0}"

Cause: Attempt to check the status of the listed GSD failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01053: Failed while checking status of Network "{0}"

Cause: Attempt to check the status of the listed Network failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01054: Failed while checking status of ONS "{0}"

Cause: Attempt to check the status of the listed ONS failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01055: Failed to create or open file "{0}"

Cause: State file processing failed because: the file specified is a directory rather than a file, the file did not exist but could not be created, or the file exists but could not be opened.

Action: Enable state file processing by: not specifying a directory name, ensuring the the directory is writable, or ensuring that an existing state file can be overwritten.

PRCH-01056: Failed to write to file "{0}"

Cause: Attempt to write to the given file failed.

Action: If the state file already exists, then make sure that it is writable. Otherwise, make sure that parent directory of the state file path is writable.

PRCH-01057: The Clusterware resource for database "{0}" does not exist.

Cause: The Clusterware resource for the database with the given name did not exist.

Action: Make sure that Clusterware resource for the database with the given name exists.

PRCH-01058: Failed while checking status of CRS home {0}

Cause: Attempt to check the status of the CRS home failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01059: Failed while checking status of Oracle home {0}

Cause: Attempt to check the status of the Oracle home failed.

Action: Review the accompanying error messages for possible reasons, correct the error and retry.

PRCH-01060: Status check for one or more resources failed: {0}

Cause: Attempt to check the status for one or more resources in the specified Oracle home failed.

Action: Review the underlying error messages that provides the details of which resources failed to query their status, check the cause and action for the individual resource start failure and perform the steps for each resource that failed to start.

PRCI-01000 to PRCI-01145

PRCI-01000: Failed to retrieve install information on local node using OUI location {0}

Cause: An attempt to retrieve install information on the local node from the specified location failed.

Action: Examine the accompanying error messages for details.

PRCI-01001: Failed to retrieve install information on remote node {0} using OUI location {1}

Cause: An attempt to retrieve install information on a remote node from the specified location failed.

Action: Examine the accompanying error messages for details.

PRCI-01100: Failed to get Vendor Cluster for CRS home {0}

Cause: Unable to locate vendor cluster library or execute lsnodes.

Action: Install Vendor Clusterware. Then try to run lsnodes again.

PRCI-01101: Failed to get Vendor Cluster for CRS home {0} on node {1}

Cause: Unable to locate vendor cluster library or execute lsnodes on the specified node.

Action: Install Vendor Clusterware on the specified node. Then try to run lsnodes again.

PRCI-01102: Failed to get OracleCM Cluster for CRS home {0}

Cause: Failed to get OracleCM Cluster for the local node using CRS home provided.

Action: Install Oracle 9i and make sure that /etc/ORCLcluster exists.

PRCI-01103: Failed to get OracleCM Cluster for CRS home {0} on node {1}

Cause: Failed to get OracleCM Cluster for the specified node using CRS home provided.

Action: Examine the accompanying error messages for details.

PRCI-01104: Failed to check Oracle Restart running state for Oracle Restart home {0}

Cause: Failed to check whether Oracle Restart is running from the specified home on the local node.

Action: Examine the accompanying error messages for details.

PRCI-01105: Failed to check Oracle Restart running state for Oracle Restart home {0} on node {1}

Cause: Failed to check whether Oracle Restart is running from the specified home on the specified node.

Action: Examine the accompanying error messages for details.

PRCI-01106: Failed to check Oracle Restart configuration state for Oracle Restart home {0} on node {1}

Cause: Failed to check whether Oracle Restart is configured for the specified home on the specified node.

Action: Examine the accompanying error messages for details.

PRCI-01107: Failed to check CRS running state for CRS home {0}

Cause: Failed to check whether Oracle Clusterware is running from the specified home on the local node.

Action: Examine the accompanying error messages for details.

PRCI-01108: Failed to check CRS running state for CRS home {0} on node {1}

Cause: Failed to check whether Oracle Clusterware is running from the specified home on the specified node.

Action: Examine the accompanying error messages for details.

PRCI-01109: Failed to check CRS configuration state for CRS home {0}

Cause: Failed to check whether Oracle Clusterware is configured for the specified home on the specified node.

Action: Examine the accompanying error messages for details.

PRCI-01110: Failed to check CRS configuration state for CRS home {0} on node {1}

Cause: Failed to check whether Oracle Clusterware is configured for the specified home on the local node.

Action: Examine the accompanying error messages for details.

PRCI-01111: File path is null

Cause: The specified file is null or an empty string.

Action: Provide a valid file path that is not null.

PRCI-01112: Directory name passed was null

Cause: The specified directory name is null or an empty string.

Action: Provide a valid directory name that is not null.

PRCI-01113: Directory {0} does not exist

Cause: Could not find the specified directory or it was a file instead of a directory.

Action: Provide an existing directory name.

PRCI-01114: Node name is null

Cause: The specified node name is null or an empty string.

Action: This is an internal error. Contact Oracle Support Services.

PRCI-01115: argument passed is null

Cause: The specified database name is null or an empty string.

Action: This is an internal error. Contact Oracle Support Services.

PRCI-01116: Failed to check if a database named {0} exists

Cause: Failed to execute the command 'crsctl stat resource <database_resource_name>' to decide whether the specified database exists or not.

Action: Examine the accompanying error messages for details.

PRCI-01117: Failed to retrieve list of databases under high availability management

Cause: Failed to execute the command 'crsctl stat resource -w TYPE=ora.database.type <filter>' in order to get the list of databases managed by Oracle Restart.

Action: Examine the accompanying error messages for details.

PRCI-01118: Failed to determine if database {0} depends on Automatic Storage Management

Cause: Failed to execute crsctl command to decide whether the specified database depended on Automatic Storage Management (ASM).

Action: Examine the accompanying error messages for details.

PRCI-01119: Failed to check if a database named {0} exists on node {1}

Cause: Failed to decide whether the specified database exists or not on the specified node because the specified node is null or an invalid node or crsctl command execution failed.

Action: Examine the accompanying error messages for details.

PRCI-01120: Failed to retrieve list of databases under high availability management for node {0}

Cause: Failed to get the list of database managed by Oracle Restart on the specified node because the specified node is null or an invalid node or crsctl command execution failed.

Action: Examine the accompanying error messages for details.

PRCI-01121: Failed to determine if database {0} depends on Automatic Storage Management on node {1}

Cause: Failed to execute crsctl command to decide whether the specified database depended on Automatic Storage Management (ASM) on the specified node because the specified node is null or an invalid node or crsctl command execution failed.

Action: Examine the accompanying error messages for details.

PRCI-01122: Failed to determine if the public network is using dynamic address assignment (DHCP)

Cause: An attempt to determine whether the public network is using dynamic address assignment (DHCP) failed.

Action: Examine the accompanying error messages for details.

PRCI-01123: CRS home does not exist on the local node

Cause: CRS home is not installed on the local node.

Action: Install a CRS home using the Oracle Universal Installer.

PRCI-01124: Oracle Restart home does not exist on the local node

Cause: Oracle Restart home is not installed.

Action: Install an Oracle Restart home using the Oracle Universal Installer.

PRCI-01125: CRS home does not exist on node {0}

Cause: CRS home is not installed on the specified node.

Action: Install a CRS home using the Oracle Universal Installer.

PRCI-01126: Oracle Restart home does not exist on node {0}

Cause: Oracle Restart home is not installed on the specified node.

Action: Install an Oracle Restart home using the Oracle Universal Installer.

PRCI-01127: CRS active version cannot be queried in a non-cluster environment

Cause: Clusterware is not configured.

Action: Ensure that Clusterware is configured.

PRCI-01128: Failed to check Oracle Restart configuration state

Cause: Oracle Restart may not be configured

Action: Ensure that Oracle Restart is installed and configured

PRCI-01129: Failed to check Oracle Restart configuration state on node {1}

Cause: Oracle Restart may not be configured

Action: Ensure that Oracle Restart is installed and configured

PRCI-01130: Failed to check CRS configuration state

Cause: Clusterware CRS may not be configured

Action: Ensure that Clusterware CRS is installed and configured

PRCI-01131: Failed to check CRS configuration state on node {1}

Cause: Clusterware CRS may not be configured

Action: Ensure that Clusterware CRS is installed and configured

PRCI-01132: Failed to get clustername for CRS home {0} and version {1}

Cause: Clusterware is not configured and CRS stack is not up

Action: Ensure that Clusterware CRS is installed and configured and the stack is up.

PRCI-01133: The IP address {0} does not have the same number of fields with the subnet mask {1}

Cause: IP address is in IPv4 address format while the subnet mask is in IPv6 address format or the other way around.

Action: Ensure that both the IP address and the subnet mask use the same representation (the longer required among IPv4 and IPv6).

PRCI-01134: Applying subnet mask {0} to IP address {1} resulted in an invalid IP address format

Cause: This won't ever happen. Message added just in case.

Action: None

PRCI-01135: Failed to check if path {0} on node {1} is on ACFS

Cause: An attempt to determine if the specified path is on ACFS failed. This can occur because:

1. The Clusterware stack is down on the specified node.
2. ASM is down on the specified node.
3. A diskgroup associated with the path is not online.

4. The path is not mounted.

Action: Perform checks corresponding to the above causes:

1. Ensure the Clusterware stack is running on the specified node.
2. Ensure that ASM is running on the specified node.
3. Ensure that the diskgroup associated with the path is online.
4. Ensure that the file system is mounted on the node.

PRCI-01136: The specified path {0} is not on Oracle Automatic Storage Manager Cluster File System (ACFS)

Cause: The specified path is not on ACFS.

Action: Specify a path that is on ACFS. This check will only accept paths on ACFS.

PRCI-01137: Failed to check if path {0} is on ACFS

Cause: An attempt to determine if the specified path is on ACFS failed. This can occur because:

1. The Clusterware stack is down on the specified node.
2. ASM is down on the specified node.
3. A diskgroup associated with the path is not online.
4. The path is not mounted.

Action: Perform checks corresponding to the above causes:

1. Ensure the Clusterware stack is running on the specified node.
2. Ensure that ASM is running on the specified node.
3. Ensure that the diskgroup associated with the path is online.
4. Ensure that the file system is mounted on the node.

PRCI-01140: Error occurred while reading input from console

Cause: An attempt to read input from console failed

Action: Make sure that the process running this program has a valid standard input (stdin).

PRCI-01141: Failed to get volume device for path {0}

Cause: An attempt to retrieve the volume device for the given ACFS path failed. This can occur because:

1. The Clusterware stack is down on the node.
2. ASM is down on the node.
3. A diskgroup associated with the path is not online.
4. The path is not mounted.

Action: Perform checks corresponding to the above causes:

1. Ensure the Clusterware stack is running on the node.
2. Ensure that ASM is running on the node.
3. Ensure that the diskgroup associated with the path is mounted.
4. Ensure that the file system is mounted on the node.

PRCI-01142: Failed to get volume device for path {0} on node {1}

Cause: An attempt to retrieve the volume device for the given ACFS path failed. This can occur because:

1. The Clusterware stack is down on the specified node.
2. ASM is down on the specified node.
3. A diskgroup associated with the path is not online.
4. The path is not mounted.

Action: Perform checks corresponding to the above causes:

1. Ensure the Clusterware stack is running on the specified node.
2. Ensure that ASM is running on the specified node.
3. Ensure that the diskgroup associated with the path is mounted.
4. Ensure that the file system is mounted on the specified node.

PRCI-01143: Error executing the script {0} on nodes {1}

Cause: An error occurred in executing the script on the list of nodes mentioned. This message is accompanied by others providing details of the error.

Action: Correct the problem indicated by the accompanying messages and retry.

PRCI-01144: Failed to retrieve Oracle Grid Infrastructure home path

Cause: An attempt to read Grid Infrastructure home path from OLR configuration file or registry entry failed.

Action: Examine the accompanying error messages for details.

1. Make sure Grid Infrastructure is configured as either Oracle Clusterware or Oracle Restart, and that the invoking user is able to read the configuration.
2. Issue the command '<GI home>/srvm/admin/getcrshome' and examine the resulting output.

PRCI-01145: Failed to retrieve Oracle Grid Infrastructure home path on node {0}

Cause: An attempt to read Grid Infrastructure home path from OLR configuration file or registry entry on specified node failed.

Action: Examine the accompanying error messages for details.

1. Make sure Grid Infrastructure is configured as either Oracle Clusterware or Oracle Restart, and that the invoking user is able to read the configuration.
2. Issue the command '<GI home>/srvm/admin/getcrshome' and examine the resulting output.

PRCN-02018 to PRCN-03018

PRCN-02018: Current user {0} is not a privileged user

Cause: Current user did not have sufficient privileges to perform this operation.

Action: Make sure that the user has root privileges on Linux/Unix's and Administrator on Windows.

PRCN-02030: Subnet does not exist for resource {0}

Cause: An attempt was made to query subnet for a network resource configured with Oracle clusterware and it was not found.

Action: Internal error. Contact Oracle Support.

PRCN-02031: Unknown DHCP server name {0} found for resource {1}

Cause: The DHCP server type obtained for the network resource is not a valid server type.

Action: Internal error. Contact Oracle Support.

PRCN-02032: Failed to retrieve DHCP server type {0}

Cause: An attempt to query the DHCP server type for the network resource failed because its value could not be retrieved from the Oracle clusterware resource attributes.

Action: make sure Oracle clusterware is up and running, and also look at the help for the accompanying CRS error message.

PRCN-02033: Failed to update DHCP server type to {0} {1}

Cause: An attempt to update the DHCP server type for the network resource failed because its value could not be updated in the Oracle Clusterware resource attribute.

Action: Make sure that the Clusterware stack is up. Make sure that the user has enough permission to modify node applications. Examine the accompanying message for additional details.

PRCN-02034: Could not find dependent resource {0} for resource {1}: {2}

Cause: Could not get the resource associated with a given resource. Could not get the ASM resource associated with a given ASM disk group resource.

Action: Make sure that clusterware stack is up. Make sure that the network resource associated with this resource has not been removed. Make sure that the user has permission to perform this operation.

PRCN-02035: Port {0} is not available on node(s) or virtual host(s): {1}

Cause: The port specified is already being used by some other applications on the nodes or virtual hosts given.

Action: Stop the applications that are using these ports or specify a different port and try the command again.

PRCN-02036: Failed to retrieve port number(s) for {0}

Cause: An attempt to retrieve the port number(s) for the cluster resource failed.

Action: Make sure that the clusterware stack is up. Make sure that the resource you are querying has been configured. Also take a look at the help for the accompanying error message(s).

PRCN-02037: Failed to retrieve Oracle home for {0}

Cause: An attempt to retrieve Oracle home value for the listener resource failed.

Action: Make sure that the clusterware stack is up. Make sure that listener is configured. If node name is being specified in the command line make sure that the node name is a valid node name. Also look at help for the accompanying error message(s).

PRCN-02038: Failed to update Oracle home {0} for listener {1}

Cause: An attempt to update the Oracle home value for the listener resource failed.

Action: Make sure that the clusterware stack is up. Make sure that the listener is configured. If node name is being specified in the command line make sure that the node name is a valid node name. Make sure that user is a owner or has write permissions to modify the listener resource. Also look at the help for other errors listed in error stack.

PRCN-02039: Failed to retrieve Oracle home for {0} on node {1}

Cause: An attempt to retrieve Oracle home value for the listener resource on a the specified node failed.

Action: Make sure that the clusterware stack is up. Make sure that the listener is configured on the node. Make sure that the node name being passed in the command line is a valid node name. Also look at the help for the accompanying error message(s).

PRCN-02040: Failed to update Oracle home {0} for {1} on node {2}

Cause: Attempt to update value of attribute Oracle home for listener resource on the specified node failed.

Action: Make sure that the clusterware stack is up. Make sure that the listener is configured on the node. Make sure that the user has enough permission to modify the listener. Make sure that the node name being passed in the command line is a valid node name. Also look at the help for other errors listed in error stack.

PRCN-02041: Failed to retrieve properties of {0}

Cause: Failed to retrieve properties of the given entity.

Action: Make sure that user has permission to read resource attribute.

PRCN-02042: Failed to set properties {0} of {1}

Cause: Failed to update properties of the given entity.

Action: Make sure that user has permission to update resource attribute.

PRCN-02043: Multiple network resources {0} exist on the cluster

Cause: More than one network resource has been configured and the one to be used for creating this resource has not been specified.

Action: Use command line option -k <net_num> argument to specify the network to be used and retry the command again.

PRCN-02044: No listener exists

Cause: No listener has been configured.

Action: Use netca or srvctl to add/configure a listener.

PRCN-02045: No network exists

Cause: No network has been configured.

Action: Use 'srvctl add nodeapps' to add/configure network resource.

PRCN-02046: Netmask does not exist for resource {0}

Cause: An attempt to retrieve the subnet information for the network resource resulted in not finding subnet mask.

Action: Internal error. Contact Oracle Support.

PRCN-02047: VIP {0} exists

Cause: The VIP with specified name has been registered in CRS.

Action: Remove the existing VIP before registering it again.

PRCN-02048: The network number {0} is already registered for subnet "{3}" and adapters "{4}". Can not add network number {0} for the specified subnet "{1}" and adapters "{2}".

Cause: The network number is taken by a registered network resource.

Action: Use a different network number to add a new network resource with the specified subnet and adapters, or modify existing network using 'srvctl modify nodeapps'.

PRCN-02049: The network attributes specified (network number: {0}, subnet: {1}, adapters: {2}) conflict with an already registered network (network number: {3}, subnet: {4}, adapters: {5})

Cause: The network resource is registered with different network number

Action: Use the registered network resource with the registered network number or provide different subnet or adapters.

PRCN-02050: The requested VIP (nodename: {0}, VIP name: {1}, network number: {2}) has the same VIP name but different network number or preferred node than the registered VIP (nodename: {3}, VIP name: {4}, network number: {5}).

Cause: One VIP name (and IP address) can only be used by one VIP with the same network number on the same node.

Action: Use a different VIP name or IP address.

PRCN-02051: The requested VIP (nodename: {0}, VIP name: {1}, network number: {2}) has the same network number and the same preferred node but different VIP name with the registered VIP (nodename: {3}, VIP name: {4}, network number: {5}).

Cause: One network resource on one preferred node can have only one cluster VIP.

Action: Use different network number or preferred node to register different VIP.

PRCN-02052: Failed to modify Network resource (network number: {0}) to use (subnet: {1}, netmask {2} adapters: {3}).

Cause: CRS was unable to modify the network resource to use new subnet/netmask/interface

Action: Make sure that clusterware stack is up. Make sure that the subnet, netmask and adapters value are correct. Make sure that the interface being referred to is running. Make sure that the user who is trying to modify network resource has root privileges. Examine the accompanying message for additional details.

PRCN-02053: Failed to modify ONS listening port for local client connections to {0}

Cause: CRS unable to modify the ONS listening port for local connections

Action: Make sure that clusterware stack is up. If the port is in use by another application, try using a different port.

PRCN-02054: Failed to modify ONS listening port for remote client connections to {0}

Cause: CRS unable to modify the ONS listening port for remote client connections

Action: Make sure that clusterware stack is up. If the port is in use by another application, try using a different port.

PRCN-02055: Failed to update port number(s) to {0} for {1}

Cause: An attempt to update the listener port failed for the nodes of the cluster.

Action: The port could be in use. Try using different port. If node name was specified in the command line make sure that the node name is a valid node name. Also look at the help for the accompanying error message(s).

PRCN-02056: Invalid listener protocol type {0}

Cause: The specified listener protocol type is invalid.

Action: Provide a valid listener protocol type. It can be TCP, TCPS, IPC, NMP, or SDP.

PRCN-02057: Invalid listener protocol value {0}

Cause: The specified listener protocol value is invalid.

Action: Provide a valid listener protocol value. It cannot contain special characters ';/'

PRCN-02058: Invalid listener protocol ENDPOINTS {0}. Delimiter is "{1}", invalid part is "{2}".

Cause: The specified listener ENDPOINTS are invalid.

Action: Provide valid listener protocol ENDPOINTS. It cannot contain invalid part.

PRCN-02059: Invalid listener port number {0}

Cause: The specified listener port number is invalid.

Action: Provide a valid listener port number.

PRCN-02060: Duplicated listener protocol value {0}

Cause: The specified listener protocol value is a duplication of another one.

Action: Remove duplicated listener protocol value.

PRCN-02061: Failed to add listener {0}

Cause: An attempt to add listener failed because endpoints were not specified correctly or other reasons.

Action: Review the underlying error messages that provide the details of which resources failed to create. Check the cause and action for the individual resource creation failure. If the endpoints were not specified correctly, correct endpoints.

PRCN-02062: The specified hostname or address {0} cannot be resolved.

Cause: An invalid IP address or unresolvable hostname was specified.

Action: If IP address is specified then make sure that it is of legal length. If a host name is specified then make sure that the host name resolves to an IP address.

PRCN-02063: Failed to modify OC4J listening port to {0}

Cause: CRS unable to modify the OC4J instances listening port.

Action: Make sure that clusterware stack is up. If the port is in use by another application, try using a different port.

PRCN-02064: Found {0} VIPs for {1}

Cause: A conflict was found in VIP resource definition: either more than one VIP is using the same name or address, or a VIP is using the same name or address as a real host.

Action: Ensure that each VIP is defined with a distinct name and address relative to other VIPs and hosts in the network.

PRCN-02065: Port(s) {0} are not available on the nodes given

Cause: The ports specified are already being used by some other applications on the nodes given.

Action: Stop the applications that are using these ports or specify different ports and try the command again.

PRCN-02066: Failed to retrieve cluster listener for {0} because it has the type of Single Client Access Name Listener

Cause: Failed to use cluster listener APIs or `srvctl` commands for specified listener.

Action: Use Single Client Access Name Listener (SCAN listener) APIs or `srvctl` commands (`srvctl <verb> scan_listener`) for specified listener name.

PRCN-02067: Port {0} is not available across node(s) "{1}"

Cause: The port specified is already being used by some other applications across the nodes given.

Action: Stop the application that is using this port or specify a different port and try the command again.

PRCN-02068: Failed to check the port availability

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRCN-02069: Unable to retrieve the list of nodes

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRCN-02070: Failed to validate network. No interface on {0} matches required network (subnet: {1}, netmask: {2} adapters: {3}).

Cause: The nodes don't have the configuration for the required network.

Action: Specify a subnet that exists on all nodes, or reconfigure the nodes to ensure that the specified subnet exists on all nodes.

PRCN-02071: Failed to update attribute USE_EVM to {0}

Cause: An attempt to update the attribute value of USE_EVM for ONS failed.

Action: Examine the accompanying error message(s) and respond accordingly.

PRCN-02072: Failed to get multicast port for events from EONS

Cause: An attempt to get multicast port for events from EONS failed.

Action: Examine the accompanying error message(s) and respond accordingly.

PRCN-02073: Failed to remove EONS

Cause: An attempt to remove EONS failed.

Action: Examine the accompanying error message(s) and respond accordingly.

PRCN-02074: Specified check interval of {0} minutes is below the minimum check interval {1} minutes

Cause: The CVU resource check interval specified was less than the minimum check interval.

Action: Retry the operation with a interval greater than or equal to the minimum check interval.

PRCN-02075: Failed to modify the CVU CHECK_INTERVAL attribute to {0}

Cause: CRS was unable to modify the CVU CHECK_INTERVAL attribute.

Action: Make sure that Clusterware stack is up. Make sure that user is an owner or has write permissions to modify the CVU resource. Check for and respond to any accompanying error messages.

PRCN-02076: Failed to retrieve the CVU CHECK_INTERVAL attribute for "{0}"

Cause: An attempt to retrieve the CHECK_INTERVAL for the CVU cluster resource failed.

Action: Make sure that the Clusterware stack is up. Make sure that the CVU resource has been configured. Check for and respond to any accompanying error messages.

PRCN-02077: Failed to modify the CVU CHECK_RESULTS attribute to "{0}"

Cause: CRS was unable to modify the CVU CHECK_RESULTS attribute.

Action: Make sure that Clusterware stack is up. Make sure that the CVU resource has been configured. Check for and respond to any accompanying error messages.

PRCN-02078: Failed to retrieve the CVU CHECK_RESULTS for "{0}"

Cause: An attempt to retrieve the CHECK_RESULTS attribute for the CVU cluster resource failed.

Action: Make sure that the Clusterware stack is up. Make sure that the CVU resource has been configured. Check for and respond to any accompanying error messages.

PRCN-02079: Port {0} is out of the valid range, between 1 and 65535 and cannot be used on any of the nodes given

Cause: The port number that was provided was either less than 1 or greater than 65535.

Action: Make sure the port provided has a value between 1 and 65535.

PRCN-03000: The IPMI configuration failed on all nodes

Cause: The node names were invalid or were valid but had no IPMI device present.

Action: Make sure that all nodes are reachable and the IPMI device exists on those nodes.

PRCN-03001: The IPMI configuration failed on one or more nodes

Cause: There was at least one node with invalid name or with no IPMI device.

Action: Make sure that all nodes are reachable and the IPMI device exists on those nodes.

PRCN-03002: There is no network resource configured for the cluster

Cause: A request to add a listener was rejected due to the lack of a network resource.

Action: Use command 'srvctl add network' to configure the network first, then retry the command.

PRCN-03003: Failed to unregister EONS resource type

Cause: A request to unregister the EONS resource type failed because of the reason provided by an accompanying exception message.

Action: Examine the accompanying error message for details.

PRCN-03004: Listener {0} already exists

Cause: The specified listener was already created.

Action: Use 'srvctl modify listener' to modify attributes if needed.

PRCN-03005: Failed to add or use registered network {0} with network interfaces "{1}" because the network was already registered for network interfaces "{2}"

Cause: The network resource was already registered with different interfaces.

Action: Use the same network interfaces as the one registered with network resource.

PRCN-03006: Failed to add or use registered network {0} with network interfaces "{1}" because the network was already registered with no interface specified

Cause: The network resource was already registered with no user specified interface.

Action: Do not specify network interface as the system decides the network interface.

PRCN-03007: Failed to add or use registered network {0} with network mask "{1}" because the network was already registered for network mask "{2}"

Cause: The network resource was already registered with a different network mask.

Action: Use the same network mask as the one registered with network resource.

PRCN-03008: Failed to add or use registered network {0} with network subnet "{1}" because the network was already registered for network subnet "{2}"

Cause: The network resource was already registered with a different network subnet.

Action: Use the same network subnet as the one registered with network resource.

PRCN-03009: Failed to retrieve log file attribute for {0} resource

Cause: An attempt to retrieve the log file attribute for the cluster resource failed.

Action: Make sure that the clusterware stack is up. Make sure that the resource you are querying has been configured. Refer also to any accompanying error messages for details.

PRCN-03010: Failed to retrieve log component attribute for {0} resource

Cause: An attempt to retrieve the log component attribute for the cluster resource failed.

Action: Make sure that the clusterware stack is up. Make sure that the resource you are querying has been configured. Refer also to any accompanying error messages for details.

PRCN-03011: Failed to retrieve debug file attribute for {0} resource

Cause: An attempt to retrieve the debug file attribute for the cluster resource failed.

Action: Make sure that the clusterware stack is up. Make sure that the resource you are querying has been configured. Refer also to any accompanying error messages for details.

PRCN-03012: Failed to retrieve debug component attribute for {0} resource

Cause: An attempt to retrieve the debug component attribute for the cluster resource failed.

Action: Make sure that the clusterware stack is up. Make sure that the resource you are querying has been configured. Refer also to any accompanying error messages for details.

PRCN-03013: Failed to update log file attribute of {0} resource

Cause: An attempt to update the attribute value of LOG_FILE for ONS failed.

Action: Examine the accompanying error message(s) and respond accordingly.

PRCN-03014: Failed to update log component attribute of {0} resource

Cause: An attempt to update the attribute value of LOG_COMP for ONS failed.

Action: Examine the accompanying error message(s) and respond accordingly.

PRCN-03015: Failed to update debug file attribute of {0} resource

Cause: An attempt to update the attribute value of DEBUG_FILE for ONS failed.

Action: Examine the accompanying error message(s) and respond accordingly.

PRCN-03016: Failed to update debug component attribute of {0} resource

Cause: An attempt to update the attribute value of DEBUG_COMP for ONS failed.

Action: Examine the accompanying error message(s) and respond accordingly.

PRCN-03017: Specified check interval of {0} minutes exceeds the maximum check interval {1} minutes

Cause: The CVU resource check interval specified was more than the maximum check interval.

Action: Retry the operation with an interval smaller than or equal to the maximum check interval.

PRCN-03018: Addition of listener version {0} is not allowed using srvctl version {1}

Cause: The versions of srvctl used and listener to be created did not match.

Action: Use the same version of srvctl as listener.

PRCR-01000 to PRCR-01135

PRCR-01000: Resource {0} already exists

Cause: An attempt was made to create a resource that already exists.

Action: Check the resource using 'srvctl config <object>' command and if the resource should not exist then remove it using 'srvctl remove <object>' command.

PRCR-01001: Resource {0} does not exist

Cause: An attempt was made to operate on a resource that does not exist.

Action: Check the resource using 'srvctl config <object>' command and if the resource does not exist then create it using 'srvctl add <object>' command.

PRCR-01002: Resource {0} is already enabled

Cause: An attempt was made to enable a resource that is already enabled.

Action: If the resource is already enabled then no action is needed. Use 'srvctl status <object>' command to determine whether it is enabled.

PRCR-01003: Resource {0} is already disabled

Cause: An attempt was made to disable a resource that is already disabled.

Action: If the resource is already disabled then no action is needed. Use 'srvctl status <object>' command to determine whether it is disabled.

PRCR-01004: Resource {0} is already running

Cause: An attempt was made to start a resource that is already running.

Action: If the resource is already running then no action is needed. Use 'srvctl status <object>' command to determine whether it is running.

PRCR-01005: Resource {0} is already stopped

Cause: An attempt was made to stop a resource that is already stopped.

Action: If the resource is already stopped then no action is needed. Use 'srvctl status <object>' command to determine whether it is stopped.

PRCR-01006: Failed to add resource {0} for {1}

Cause: An attempt to add the specified resource has failed.

Action: Check and resolve the underlying exception.

PRCR-01007: Failed to check status of resource {0}

Cause: An attempt to check status of specified resource has failed.

Action: Check the help for the underlying exception.

PRCR-01008: Failed to retrieve version of resource {0}

Cause: An attempt to retrieve version of the specified resource has failed.

Action: Check the help for the underlying exception.

PRCR-01009: Failed to retrieve permissions of resource {0}, ACL {1}

Cause: Internal error.

Action: Contact Oracle Support Services.

PRCR-01010: Failed to update permissions of resource {0}

Cause: An attempt to update permissions of specified resource has failed.

Action: Check the help for the underlying exception.

PRCR-01011: Failed to enable resource {0}

Cause: An attempt to enable specified resource has failed.

Action: Check the help for the underlying exception.

PRCR-01012: Failed to disable resource {0}

Cause: An attempt to disable specified resource has failed.

Action: Check the help for the underlying exception.

PRCR-01013: Failed to start resource {0}

Cause: An attempt to start specified resource on several nodes failed.

Action: Check the help for the underlying exception.

PRCR-01014: Failed to stop resource {0}

Cause: An attempt to stop specified resource on several nodes failed.

Action: Check the help for the underlying exception.

PRCR-01015: Failed to relocate resource {0}

Cause: An attempt to relocate specified resource has failed.

Action: Check the help for the underlying exception.

PRCR-01016: Failed to modify resource {0}

Cause: An attempt to modify specified resource has failed.

Action: Check the help for the underlying exception.

PRCR-01024: Failed to remove resource {0} on nodes {1}

Cause: An attempt to remove the resource on the specified nodes failed.

Action: Check the accompanying error messages for details.

PRCR-01025: Resource {0} is still running

Cause: The specified resource is not stopped.

Action: Check the accompanying error messages to decide whether to stop the specified resource.

PRCR-01026: Resource {0} is not running

Cause: The specified resource is not started.

Action: Check the accompanying error messages to decide whether to start the specified resource.

PRCR-01028: Failed to remove resource {0}

Cause: An attempt to remove specified resource failed.

Action: Check the help for the underlying CRSException.

PRCR-01029: Attribute {0} does not exist in resource {1} definition

Cause: An attempt was made to get an attribute which is not defined for that resource type.

Action: Make sure that the attribute exists in the resource definition.

PRCR-01030: Resource attribute name {0} is not valid

Cause: Internal error.

Action: Contact Oracle Support Services.

PRCR-01031: Resource attribute {0} value {1} is not valid

Cause: Specified resource attribute value is not valid.

Action: Try recreating the resource attribute value using srvnm APIs or recreating the resource using srvctl commands.

PRCR-01032: Current state of resource {0} is not valid

Cause: Internal error.

Action: Contact Oracle Support Services.

PRCR-01033: Resource type {0} does not exist

Cause: An attempt to retrieve the type has failed.

Action: Make sure that the type exists.

PRCR-01035: Failed to look up CRS resource {0} for {1}

Cause: An attempt to access the specified resource failed because it did not exist.

Action: Check that the specified name and resource type are correct.

PRCR-01036: Failed to retrieve cardinality of the resource {0}

Cause: An attempt to retrieve cardinality of resource has failed.

Action: Examine the accompanying error messages to determine how to respond.

PRCR-01037: Failed to update cardinality of the resource {0} to {1}

Cause: An attempt to set cardinality of the resource has failed.

Action: Examine the accompanying error messages to determine how to respond.

PRCR-01039: Server pool {0} does not exist

Cause: An attempt was made to retrieve the server pool which does not exist.

Action: Make sure that requested server pool exists.

PRCR-01040: Resource {0} is already enabled on node(s) {1}

Cause: An attempt was made to enable a resource that is already enable on nodes.

Action: The status of a resource can be checked by using the 'srvctl status <object>' command.

PRCR-01041: Resource {0} is already disabled on node(s) {1}

Cause: An attempt was made to disable a resource that is already disabled on nodes.

Action: The status of a resource can be checked by using the 'srvctl status <object>' command.

PRCR-01042: Failed to get dependent resources {0} of resource {1}: {2}

-
- Cause:** Failed to retrieve dependent resources of the given resource.
Action: Examine the accompanying error messages to determine how to respond.
- PRCR-01043: Failed to update dependent resources {0} of resource {1} to resource {2}**
Cause: Failed to update dependent resources of the given resource.
Action: Examine the accompanying error messages to determine how to respond.
- PRCR-01050: Resource {0} is not configured in Oracle cluster environment**
Cause: The environment for the specified resource is not Oracle Clusterware.
Action: The specified commands or APIs can only be used when Oracle Clusterware is running. If the environment is configured as Oracle Restart, use the correspond commands and APIs for Oracle Restart.
- PRCR-01051: OracleCM Cluster is not found on node {0}**
Cause: The OracleCM Cluster was not found on the specified node because the library for OracleCM Cluster was not found.
Action: Install OracleCM Cluster on the specified node.
- PRCR-01052: Failed to find OracleCM Cluster library on node {0}**
Cause: Failed to check OracleCM Cluster because of the error in executing the command to find the file /etc/ORCLcluster/oracm/lib/libskgxn2.so.
Action: Make sure that the caller has the read and execute permission for the library file.
- PRCR-01053: Vendor Cluster is not found on node {0}**
Cause: The Vendor Cluster was not installed and configured on the specified node.
Action: Install and configure the Vendor Cluster on the specified node.
- PRCR-01054: Failed to find Vendor Cluster library on node {0}**
Cause: Failed to check OracleCM Cluster because of the error in executing the command to find the file /etc/ORCLcluster/lib/libskgxn2.so.
Action: Make sure that the caller has the read and execute permission for the library file.
- PRCR-01055: Cluster membership check failed for node {0}**
Cause: The specified node does not belong to the cluster.
Action: Check whether the node name is correct.
- PRCR-01061: User permissions are insufficient**
Cause: User permissions are insufficient to register resource/type.
Action: Make sure the user is crs-user or root.
- PRCR-01062: Failed to retrieve attributes of resource {0} on node {1}**
Cause: An attempt to retrieve attributes of the resource has failed.
Action: Make sure that resource exists.
- PRCR-01063: Failed to create context**
Cause: Internal error.
Action: Contact Oracle Support Services.
- PRCR-01064: Failed to start resource {0} on node {1}**

Cause: An attempt to start the resource has failed.

Action: Make sure that resource is ready to start on the node before starting it.

PRCR-01065: Failed to stop resource {0}

Cause: An attempt to stop the resource failed because the resource wasn't running or the running resource had dependent resources also running.

Action: Check the accompanying messages to identify dependent resources and stop them. Make sure that resource is running before stopping it.

PRCR-01067: Failed to create a filter

Cause: An attempt to create a filter has failed.

Action: Check the help for the underlying exception.

PRCR-01068: Failed to query resources

Cause: An attempt to query the resource failed.

Action: Check the help for the underlying exception.

PRCR-01069: Attribute {0} of {1} {2} not found

Cause: Internal error.

Action: Contact Oracle Support Services.

PRCR-01070: Failed to check if {0} {1} is registered

Cause: Failed to check if resource is registered.

Action: Check the help for the underlying exception.

PRCR-01071: Failed to register or update {0} {1}

Cause: An attempt to register or update the resource failed.

Action: Check the help for the underlying exception.

PRCR-01072: Failed to unregister {0} {1}

Cause: An attempt to unregister specified Oracle clusterware entity failed.

Action: Check the help for the underlying exception.

PRCR-01074: Failed to retrieve attributes for {0} {1}

Cause: Failed to retrieve attributes for specified resource.

Action: Check the help for the underlying exception.

PRCR-01075: Failed to retrieve status for resource {0}

Cause: Failed to retrieve status for specified resource.

Action: Check the help for the underlying exception.

PRCR-01076: Failed to retrieve status for resource {0}: {1} is missed

Cause: Internal error.

Action: Contact Oracle Support Services.

PRCR-01077: Failed to calculate status for resource {0}: {1}/{2}

Cause: Internal error.

Action: Contact Oracle Support Services.

PRCR-01078: Failed to retrieve attributes of resource {0}

Cause: An attempt to retrieve attributes of the resource has failed.

Action: Make sure that resource exists.

PRCR-01079: Failed to start resource {0}

Cause: An attempt to start the resource has failed.

Action: Make sure that resource is ready to start before starting it.

PRCR-01085: Unknown typeAsString: {0}

Cause: Internal error.

Action: Contact Oracle Support Services.

PRCR-01086: {0} {1} is already registered

Cause: An attempt to register specified resource failed.

Action: Make sure that a resource is not registered before register it.

PRCR-01087: Failed to retrieve resource {0} instances

Cause: Internal error.

Action: Contact Oracle Support Services.

PRCR-01088: Failed to stop resource {0}: it was not started on node {1}

Cause: The resource was not started on the node..

Action: Make sure that resource was started before stopping it.

PRCR-01089: Failed to relocate resource {0}.

Cause: An attempt to relocate specified resource failed.

Action: Check the help for the underlying exception.

PRCR-01090: Failed to relocate resource {0}. It is not running.

Cause: The resource was not started.

Action: Make sure that resource was started before relocating it.

PRCR-01091: Failed to relocate resource {0}. It is not running on node {1}.

Cause: The resource was not started on the node.

Action: Make sure that resource was started before relocating it.

PRCR-01092: Failed to relocate resource {0}. It is running on more than one node

Cause: The resource was started on more than one node.

Action: Make sure that resource is running on one node only before relocating it.

PRCR-01093: Failed to relocate resource {0}. It is already running on node {1}

Cause: The resource is running that node.

Action: Make sure that resource is not running on a node before relocating it.

PRCR-01094: Failed to start resources on node {0}: {1}

Cause: Resources defined by filter cannot be started on the node.

Action: Make sure that resources are not running and ready to run before starting them. Make sure that the node is online.

PRCR-01095: Failed to start resources using filter {0}

Cause: Resources defined by filter cannot be started.

Action: Make sure that resources are not running and ready to run before starting them.

PRCR-01096: Filter cannot be null

Cause: An attempt to use filter has failed.

Action: Make sure that a filter is provided.

PRCR-01097: Resource attribute not found: {0}

Cause: Requested resource attribute not found.

Action: Make sure that resource has requested attribute.

PRCR-01098: Could not set rolling upgrade mode {0}

Cause: An attempt to start the resource in rolling upgrade mode has failed.

Action: Make sure that the correct LD_LIBRARY_PATH is set and all shared libraries are present.

PRCR-01099: Cannot start resource {0} on {1} additional nodes because it would exceed the resource cardinality {2}. Resource is already running on {3} nodes

Cause: Resource cannot be started because of its cardinality restriction.

Action: Make sure that number of additional nodes does not exceed the resource cardinality.

PRCR-01100: Cannot start resource {0} on {1} nodes because it would exceed the resource cardinality {2}

Cause: Resource cannot be started because of its cardinality restriction.

Action: Make sure that number of nodes does not exceed the resource cardinality.

PRCR-01101: Cannot stop resource {0} on {1} nodes, it is running on {2} nodes.

Cause: The resource does not have enough running instances to stop.

Action: Make sure that resource has enough running instances to stop.

PRCR-01102: Failed to verify if user {0} has CRS administrator role

Cause: Failed to verify if the user has CRS administrator role.

Action: Resolve the reported error message and retry.

PRCR-01104: Unsupported relocate option {0}

Cause: Internal error.

Action: Contact Oracle Support Services.

PRCR-01105: Failed to relocate resource {0} to node {1}

Cause: An attempt to relocate the resource to the specified node has failed.

Action: Examine accompanying message(s) that provide details of the error, and respond accordingly.

PRCR-01106: Failed to relocate resource {0} from node {1} to node {2}

Cause: An attempt to relocate the resource from the specified node to another has failed.

Action: Check the help for the underlying exception.

PRCR-01107: Error while trying to set default network as dependent resource for {0}

Cause: An attempt to set default network dependency for the specified resource failed.

Action: Examine the accompanying error message(s) for details.

PRCR-01108: ONS cannot be created because default network is not configured.

Cause: An attempt was made to create ONS resource with out creating the dependent default network resource.

Action: Network resource can be created using 'srvctl add nodeapps' command. Create the network resource and try this command again.

PRCR-01109: Failed to remove attributes "{1}" from resource {0}

Cause: Possible reasons: Oracle Clusterware stack might not be active, CRS resource may not exist, or the CRS resource may not have given attributes set.

Action: Make sure that Oracle Clusterware is active, the CRS resource exists and has given attributes set.

PRCR-01110: Failed to retrieve processed attributes of resource {0} for node {1}

Cause: Oracle Clusterware stack was not active or CRS resource did not exist.

Action: Make sure that Oracle Clusterware is active, the CRS resource exists.

PRCR-01111: Failed to retrieve processed attributes of resource {0} for node {1}

Cause: requested CRS resource did not exist.

Action: Make sure that the CRS resource exists.

PRCR-01112: Failed to retrieve current event sequence number

Cause: Oracle Clusterware stack was not active.

Action: Make sure that Oracle Clusterware is active.

PRCR-01113: Failed to create detailed error message, rc = {0}

Cause: Internal error

Action: Contact Oracle Support Services.

PRCR-01114: Failed to relocate servers {0} into server pool {1}

Cause: Failed to relocate servers into the given server pool. This message may be accompanied by others providing additional details. A likely cause is violation of defined configuration attributes such as pool MIN_SIZE, SERVER_NAMES etc.

Action: If the problem stems from violating configuration attributes, either modify the attributes or reformulate the request. Otherwise, contact Oracle Support Services.

PRCR-01115: Failed to find entities of type {0} that match filters {1} and contain attributes {2}

Cause: Failed to look up entities of given type that match given filters. This message may be accompanied by others providing additional details. A likely cause is that current user does not have permissions to read attributes of entities of given type.

Action: If lack of permissions is the cause of this failure, then use 'srvctl config <object> -a' command to find the current owner of the entity and retry the query as that owner user. Otherwise, contact Oracle Support Services.

PRCR-01116: {0} {1} cannot be created and registered now

Cause: Oracle Clusterware stack could not create and register an object.

Action: Check the help for the underlying exception.

PRCR-01117: Failed to stop resources using filter {0}

Cause: An attempt to stop resources using specified filter failed.

Action: Respond based on the accompanying exception message.

PRCR-01118: Failed to generate resource permissions for the resource

Cause: Creation of the Access Control List (permission) structures for the resource failed. This message is accompanied by others providing details of the error.

Action: Respond based on the accompanying exception message(s).

PRCR-01119: Failed to look up CRS resources of {0} type

Cause: An attempt to find the resource for the specified resource type failed because it did not exist.

Action: Create a resource of the type.

PRCR-01120: Resources are already running: {0}

Cause: An attempt to start resources failed because they are already running. For detailed information about resources review the accompanying error messages.

Action: None

PRCR-01121: Value of parameter "{0}" cannot be null or empty

Cause: An attempt to construct ACFS resource name failed due to null or empty value for the indicated parameter.

Action: This is an internal error. Contact Oracle Support Services.

PRCR-01122: Resource type {0} is not registered with Oracle Clusterware

Cause: Given resource type was not registered.

Action: Make sure that required resource type is registered.

PRCR-01123: Failed to rename resource type {0}

Cause: An attempt was made to change name of the given resource type. Resource types cannot be renamed.

Action: None

PRCR-01124: Failed to check resource {0}

Cause: An attempt to check the resource failed.

Action: Correct any problems reported in accompanying messages. Make sure that resource is registered with Oracle Clusterware.

PRCR-01125: Failed to check resource {0} on node {1}

Cause: An attempt to check the resource on specified node failed.

Action: Correct any problems reported in accompanying messages. Make sure that resource is registered with Oracle Clusterware.

PRCR-01126: Failed to relocate resource {0} from node {1}

Cause: An attempt to relocate the resource from the specified node has failed.

Action: Examine the accompanying error messages and respond accordingly.

PRCR-01127: Resource {0} does not have attributes {1} on per node basis

Cause: An attempt to remove given attributes failed because these attributes do not exist on per node basis.

Action: Retry after supplying attributes that exist on per node basis.

PRCR-01128: Resource {0} does not have attributes {1} on node {2}

Cause: An attempt to remove given attributes failed because these attributes do not exist on the given node.

Action: Retry after supplying attributes that exist on the node.

PRCR-01129: Failed to upgrade resource type {0}

Cause: An attempt to upgrade specified resource type failed.

Action: Examine the accompanying error message(s) and respond accordingly.

PRCR-01130: Failed to get the name for resource type {0} from resource type enum class

Cause: An attempt to get the name of the resource type for the given resource type enum class.

Action: Ensure that the resource type enum class contains the proper resource type name.

PRCR-01131: CVU resource cannot be created because default network is not configured.

Cause: An attempt was made to create CVU resource without creating the dependent default network resource.

Action: Network resource can be created using 'srvctl add nodeapps' command. Create the network resource and try this command again.

PRCR-01132: Failed to stop resources using a filter

Cause: An attempt to stop resources failed because resources were not running or running resources had dependent resources also running.

Action: Check the accompanying messages to identify dependent resources and stop them. Make sure that resources are running before stopping them.

PRCR-01133: Failed to stop database {0} and its running services

Cause: An attempt to stop given database and its running services failed.

Action: Correct any problems reported in accompanying messages.

PRCR-01134: Failed to stop database {0} and its running services on nodes {1}

Cause: An attempt to stop the given database and its running services failed on the specified nodes.

Action: Correct any problems reported in accompanying messages.

PRCR-01135: Failed to check if node with node number 0 exists

Cause: An attempt failed to determine whether a node numbered 0 exists.

Action: Follow action specified for accompanying message.

PRCS-01000 to PRCS-01077

PRCS-01000: Failed to get enabled status of {0}

Cause: An attempt to check whether a server is enabled failed.

Action: Examine the accompanying error messages for details.

PRCS-01001: Failed to enable {0}

Cause: An attempt to enable the specified server failed.

Action: Examine the accompanying error messages for details.

PRCS-01002: Failed to disable {0}

Cause: An attempt to disable the specified server failed.

Action: Examine the accompanying error messages for details.

PRCS-01005: Failed to create server {0}

Cause: An attempt to create the specified server failed.

Action: Examine the accompanying error messages for details.

PRCS-01006: Failed to get server for node {0}

Cause: An attempt to get server for the specified node failed.

Action: Examine the accompanying error messages for details.

PRCS-01007: Server pool {0} already exists

Cause: The specified server pool already exists.

Action: Examine the accompanying error messages for details.

PRCS-01008: Server pool {0} does not exist

Cause: The specified server pool does not exist.

Action: Use the `srvctl` command to create server pool.

PRCS-01009: Failed to create server pool {0}

Cause: An attempt to create specified server pool failed.

Action: Examine the accompanying error messages for details.

PRCS-01010: Failed to get {0} of server pool {1}

Cause: An attempt to get the attribute value of the specified server pool failed.

Action: Examine the accompanying error messages for details.

PRCS-01011: Failed to modify server pool {0}

Cause: An attempt to modify the specified server pool failed.

Action: Examine the accompanying error messages for details.

PRCS-01012: Failed to remove server pool {0}

Cause: Failed to unregister server pool. This message is followed by the reason for failure.

Action: Retry after resolving the issue reported in the failure message.

PRCS-01013: Failed to look up server pool {0}

Cause: An attempt to get the specified server pool failed.

Action: Examine the accompanying error messages for details.

PRCS-01014: Server {0} is already part of server pool {1}

Cause: An attempt to add the server as a candidate for the specified server pool failed because the server is already in the pool's SERVER_NAME attribute.

Action: No action is needed.

PRCS-01015: Server {0} is not part of server pool {1}

Cause: An attempt to remove the server from the SERVER_NAMES attribute of the server pool failed because the specified server is not in the pool's SERVER_NAME attribute.

Action: Add the server to the server pool.

PRCS-01016: Failed to resolve Single Client Access Name {0}

Cause: An attempt to resolve specified Single Client Access Name to a list of IP addresses failed because Single Client Access Name could not be resolved in DNS using nslookup or using other lookup methods.

Action: Check whether the specified Single Client Access Name is correct. Review the underlying error messages that provide the details of which resource failed to resolve. Check the cause and action for the individual error. If Single Client Access Name should be resolved in DNS, check the configuration of Single Client Access Name in DNS.

PRCS-01017: Failed to configure Single Client Access Name {0}

Cause: An attempt to add cluster configuration for Single Client Access Name failed.

Action: Review the underlying error messages that provide the details of which resources failed to create. Check the cause and action for the individual resource creation failure.

PRCS-01018: Failed to add cluster configuration for Single Client Access Name listener {0}

Cause: An attempt to configure Single Client Access Name listener failed because endpoints were not specified correctly or other reasons.

Action: Review the underlying error messages that provide the details of which resources failed to create. Check the cause and action for the individual resource creation failure. If the endpoints were not specified correctly, correct endpoints.

PRCS-01019: Failed to remove the configuration for Single Client Access Name listener {0}

Cause: An attempt to remove the configuration of Single Client Access Name listener failed because other resources depended on it or other reasons.

Action: Review the underlying error messages that provide the details of which resources failed to remove. Stop Single Client Access Name listener resource

before removing it. Can consider using force flag to remove Single Client Access Name listener resources if no other resources depend on it.

PRCS-01020: Failed to enable Single Client Access Name resources {0}

Cause: An attempt to enable Single Client Access Name resources failed.

Action: Review the underlying error messages that provide the details of which resources failed to enable. Check the cause and action for the individual resource creation failure.

PRCS-01021: Failed to disable Single Client Access Name resources {0}

Cause: An attempt to disable Single Client Access Name resources failed because current user did not have sufficient privileges to perform this operation or other reasons.

Action: Review the underlying error messages that provide the details of which resources failed to disable. Check the cause and action for the individual resource failure. Make sure that the user has root privileges on Linux/Unix's and Administrator on Windows.

PRCS-01022: Failed to start Single Client Access Name resources {0}

Cause: An attempt to start Single Client Access Name resources failed.

Action: Review the underlying error messages that provides the details of which resources failed to start.

PRCS-01023: Failed to stop Single Client Access Name resources {0}

Cause: An attempt to stop Single Client Access Name resources failed because Single Client Access Name listeners were not stopped/relocated or other reasons.

Action: Review the underlying error messages that provides the details of which resources failed to stop. Check the cause and action for the individual resource creation failure. Stop Single Client Access Name listeners first or use force flag to stop Single Client Access Name Virtual Internet Protocol(VIP) resources if no other resources depend on them.

PRCS-01024: Failed to remove Single Client Access Name Virtual Internet Protocol(VIP) resources {0}

Cause: Could not remove Single Client Access Name Virtual Internet Protocol(VIP) resources because the resources are running or Single Client Access Name listeners depend on or other reasons.

Action: Review the underlying error messages that provides the details of which resources failed to remove. Stop the Single Client Access Name VIPs and Single Client Access Name listeners, then remove Single Client Access Name listeners. Or use force flag to remove Single Client Access Name Virtual Internet Protocol(VIP) resources if no other resources depend on them.

PRCS-01025: Could not find Single Client Access Name Virtual Internet Protocol(VIP) resources {0}

Cause: Could not find Single Client Access Name Virtual Internet Protocol(VIP) resources.

Action: Check the resource name and check the underlying error messages that provides the details of which resources failed to be found.

PRCS-01026: Could not find Single Client Access Name listener resources {0}

Cause: An attempt to find Single Client Access Name listener resources failed.

Action: Check the resource name. Review the underlying error messages that provides the details of which resources failed to be found.

PRCS-01027: Could not find any Single Client Access Name listener with ordinal number {0}

Cause: Could not find the Single Client Access Name listener for specified ordinal number.

Action: Use 'srvctl config scan_listener' to check available ordinal number.

PRCS-01028: Single Client Access Name listeners already exist

Cause: Single Client Access Name listeners were already created.

Action: Use 'srvctl modify scan_listener' to modify attributes if needed.

PRCS-01031: Failed to modify Single Client Access Name listeners using endpoints {0}

Cause: An attempt to modify Single Client Access Name listeners failed.

Action: Check if the endpoints specified are valid.

PRCS-01032: No server pool was found that matches the query {0}

Cause: An attempt to find server pools that match the given query found no matching server pool.

Action: Either configure a server pool via 'srvctl add srvpool' command or modify existing a server pool via 'srvctl modify srvpool' command to match the query and retry the request.

PRCS-01034: Failed to modify Single Client Access Name {0}

Cause: Failed to modify the configuration of Single Client Access Name because the endpoints were not specified correctly or extra Single Client Access Name VIPs could not be removed or other reasons.

Action: Review the underlying error messages that provides the details of which resources failed to modify. Resolve the reported problem and retry. If to modify the endpoints, specify correct endpoints. If to update the number of Single Client Access Name VIPs, stop the Single Client Access Name listeners that depend on.

PRCS-01035: Invalid number of TCP ports ({0}) for SCAN Listener

Cause: Either no port was specified, or more than one port was specified.

Action: Specify only one port number for TCP protocol for SCAN Listener.

PRCS-01037: Single Client Access Name VIPs already exist

Cause: An attempt was made to add SCAN VIPs when SCAN VIPs are already configured. Only one SCAN per cluster can be configured.

Action: Remove existing SCAN and add new SCAN. Or modify scan to use new SCAN name or have the existing SCAN name to map to different SCAN VIPs.

PRCS-01038: Failed to find Single Client Access Name Virtual Internet Protocol(VIP) associated with listener {0}

Cause: Cannot find Single Client Access Name Virtual Internet Protocol(VIP) associated with the given listener.

Action: Examine the accompanying error messages to determine how to respond.

PRCS-01039: Failed to find Single Client Access Name listener associated with the given Virtual Internet Protocol(VIP) {0}

Cause: Cannot find Single Client Access Name listener associated with the given Virtual Internet Protocol(VIP).

Action: Examine the accompanying error messages to determine how to respond.

PRCS-01040: User {0} does not have CRS administrator role

Cause: Specified user did not have CRS administrator role.

Action: Grant CRS administrator role to the user by using 'crsctl add crs administrator -u <user_name>' command and retry.

PRCS-01041: Invalid builtin server pool name {0}

Cause: The specified builtin server pool name is invalid.

Action: Provide a valid builtin server pool name. It can be Generic or Free.

PRCS-01042: Server pool {0} is not hosting any database currently

Cause: No database could be found referencing the given server pool.

Action: Create database configuration using 'srvctl add database ... -g <server_pool>' command and retry.

PRCS-01043: Server pool {0} is not hosting any database service currently

Cause: No service could be found referencing the given server pool.

Action: Create service configuration using 'srvctl add service ... -g <server_pool>' command and retry.

PRCS-01046: Name {0} is not valid

Cause: Specified name was not valid.

Action: Specify a valid string name, and retry.

PRCS-01047: Minimum size of {0} is not valid

Cause: Specified minimum size was not valid.

Action: Specify minimum size to be an integer equal to or greater than zero and less than the maximum size (other than -1), and retry.

PRCS-01048: Maximum size of {0} is not valid

Cause: Specified maximum size was not valid.

Action: Specify maximum size to be an integer greater than or equal to -1 and retry.

PRCS-01049: Importance of {0} is not valid

Cause: Specified importance was not valid.

Action: Specify importance value to be an integer greater than or equal to 0 and retry.

PRCS-01050: Could not add GNS VIP {0} because another one with name {1} already exists

Cause: The name of the GNS VIP to be added matches one that already existed.

Action: Specify another name.

PRCS-01051: Could not add GNS VIP using network {0} because registered another one using network {1} already exists

Cause: The network specified for the GNS VIP to be added matches one that already existed.

Action: Specify another network.

PRCS-01053: failed to resolve address for Grid Naming Service VIP {0}: {1}

Cause: The address specified for the GNS VIP could not be resolved.

Action: Specify a valid address.

PRCS-01054: Failed to configure VIP for Grid Naming Service VIP {0}

Cause: The creation of the GNS VIP failed.

Action: Examine the accompanying error message for details.

PRCS-01055: Failed to modify Grid Naming Service VIP {0}

Cause: The modification of the GNS VIP failed.

Action: Examine the accompanying error message for details.

PRCS-01056: Could not find resources for Grid Naming Service Virtual Internet Protocol(VIP) {0}

Cause: The specified GNS VIP did not exist.

Action: Specify a valid GNS VIP name.

PRCS-01057: INTERNAL ERROR: no attributes specified.

Cause: No attributes to modify GNS with were passed to a method.

Action: This is an internal error. Please contact Oracle Customer Support.

PRCS-01058: INTERNAL ERROR: unsupported query type: "\${0}"

Cause: The type of query to be made to GNS is unrecognized.

Action: This is an internal error and should not be visible. Please contact Oracle Customer Support.

PRCS-01059: Failed to get sub-server pools of server pool {0}

Cause: Failed to look up PARENT_POOLS attribute of server pools containing the given server pool name. Ensure that current user has read permissions on the given server pool and its sub-server pools.

Action: Grant read permissions on the given server pool and its sub-server pools.

PRCS-01060: Failed to relocate servers {0} into server pool {1}

Cause: Failed to relocate servers into the given server pool. This message may be accompanied by others providing additional details. A likely cause is violation of defined configuration attributes such as pool MIN_SIZE, SERVER_NAMES etc.

Action: If the problem stems from violating configuration attributes, either modify the attributes or reformulate the request. Otherwise, contact Oracle Support Services.

PRCS-01061: Failed to find running database instances hosted by server pool {0}

Cause: Failed to find running database instances hosted by the servers in the given server pool. This message is accompanied by others providing additional details. A likely cause is that current user may not have permissions to query profiles of databases hosted by the given server pool.

Action: If lack of permissions is the cause of this failure, then use 'srvctl config <object> -a' command to find the current owner of entity and retry the query as that owner user. Otherwise, contact Oracle Support Services.

PRCS-01062: Failed to determine whether server pool {0} has any parents or children

Cause: Failed to find parents or children of the given server pool. A likely cause is that current user may not have permissions to query profile of given server pool or profiles of other server pools whose PARENT_POOLS attribute contains this server pool name.

Action: If lack of permissions is the cause of this failure, then use 'srvctl config serverpool <serverpool> -a' command to find the current owner of the server pool and retry the query as that owner user. Otherwise, contact Oracle Support Services.

PRCS-01063: Server pool {0} with minimum size {1}, maximum size {2}, importance {3} and server list ({4}) can not be created

Cause: Specified server pool cannot be created because of the reason provided by an accompanying exception message.

Action: Respond based on the accompanying exception message.

PRCS-01064: Server {0} is not assigned to any server pool

Cause: Given server is not yet recognized by Oracle Clusterware and therefore is not active in any server pool.

Action: Check state of the server using 'crsctl stat server <server> -f' and contact Oracle Support Services.

PRCS-01065: GNS is not configured.

Cause: GNS has not been configured on the cluster.

Action: Configure GNS by executing "srvctl add gns".

PRCS-01066: Server group {0} with server list ({1}) can not be created

Cause: Specified server group cannot be created because of the reason provided by an accompanying exception message.

Action: Respond based on the accompanying exception message.

PRCS-01067: Failed to find online database instances hosted by server pool {0}

Cause: Failed to find online database instances hosted by the servers in the given server pool. This message is accompanied by others providing additional details. A likely cause is that current user may not have permissions to query profiles of databases hosted by the given server pool.

Action: If lack of permissions is the cause of this failure, then use 'srvctl config <object> -a' command to find the current owner of the entity and retry the query as that owner user. Otherwise, contact Oracle Support Services.

PRCS-01068: Oracle Clusterware server entity for node {0} does not exist

Cause: The server entity for the specified node does not exist.

Action: Start Oracle Clusterware on the given node and retry.

PRCS-01069: Label {0} in GNS domain name {1} does not follow RFC-1035 convention

Cause: The specified portion of the GNS domain name does not follow RFC-1035 label conventions.

Action: Specify a domain name that follows RFC-1035 conventions. According to RFC-1035 conventions, the domain name consists of a set of labels separated by ".". A label must begin with an alphabetic character and can contain only alphanumeric characters and "-" (dash or minus character), end with an alphanumeric, and be no more than 63 characters long.

PRCS-01070: Label {0} part of GNS domain name {1} is too long

Cause: The specified portion of the GNS domain name does not follow RFC-1035 label conventions, as it is longer than 63 characters.

Action: Specify a domain name that follows RFC-1035 conventions. The domain name consists of a set of labels separated by ".". Label must begin with an alphabetic character and can contain only alphanumeric characters and "-" (dash or minus character), end with an alphanumeric and be no more than 63 characters long.

PRCS-01071: An error occurred while trying to look up IP address for domain name {0}

Cause: An error occurred while trying to translate the indicated fully domain qualified name (FDQN) to IP addresses.

Action: Make sure that name servers on local node are correctly configured. If the domain in the FDQN is GNS domain make sure that DNS has been set up to forward request to GNS and GNS resource is online. Make sure that there are no firewalls between the local node and the name servers.

PRCS-01072: Failed to create server pool with reserved name {0}

Cause: Request to create the specified server pool was rejected because specified server pool name is the name of builtin server pool of Oracle Clusterware.

Action: Supply a server pool name other than the builtin server pool name (Generic or Free) of Oracle Clusterware and retry.

PRCS-01073: The specified GNS logging level {0} was outside the expected range of {1} to {2}

Cause: The log_level value in the 'srvctl start gns -l <log_level>' command was less than the minimum limit.

Action: Ensure that the log_level value is within the valid range.

PRCS-01074: The specified GNS logging level {0} was outside the expected range of {1} to {2}

Cause: The log_level value in the 'srvctl start gns -l <log_level>' command was greater than the maximum limit.

Action: Ensure that the log_level value is within the valid range.

PRCS-01075: GNS Domain name {0} ends with invalid character {1}

Cause: The specified GNS domain name ends with an invalid character and does not follow RFC-1035 label conventions.

Action: Specify a domain name that follows RFC-1035 conventions. According to RFC-1035 conventions, the domain name consists of a set of labels separated by ".". A label must begin with an alphabetic character and can contain only alphanumeric characters or "-" (dash or minus character), end with an alphanumeric, and be no more than 63 characters long.

PRCS-01076: Invalid Single Client Access Name {0}. The subnet {1} of SCAN VIP {2} differs from the subnet {3} of network {4}

Cause: The SCAN VIPs resolved from the specified Single Client Access Name are in a subnet that differs from the network's subnet.

Action: Use the SCAN name that can be resolved to the SCAN VIPs in the same subnet of network resource.

PRCS-01077: The specified trace level {0} was outside the expected range of {1} to {2}

Cause: The trace level value was less than the minimum limit or greater than the maximum limit.

Action: Ensure that the trace level value is within the valid range.

PRCT-01000 to PRCT-01415

PRCT-01000: File path is null

Cause: The supplied path is set to null.

Action: Oracle internal error. Contact Oracle Support Services..

PRCT-01001: Node name is null

Cause: The supplied node name is set to null.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01003: Failed to run "{0}" on node "{1}"

Cause: Failed to execute the specified command on the specified node.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01004: Directory name passed was null

Cause: The supplied directory name is set to null.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01005: Directory {0} does not exist

Cause: The supplied directory path does not exist.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01006: Failed to retrieve cluster name from node "{0}"

Cause: Failed to get the cluster name using 'olsnodes -c' from the specified node.

Action: Execute 'olsnodes -c' from the specified node and check the output of the command. Fix the problem according to the error message given in the command output.

PRCT-01007: Failed to retrieve local node name

Cause: Underlying call failed to get the local hostname.

Action: Please check the underlying error message.

PRCT-01008: Failed to retrieve node names

Cause: Failed to get the node names using 'olsnodes' command.

Action: Execute command 'olsnodes' and check the output of the command. Fix the problem according to the error message given in the command output.

PRCT-01009: crsctl execution failed. Detailed error: {0}

Cause: Failed to execute crsctl command.

Action: Examine the accompanying error message for details.

PRCT-01010: crsctl execution failed on node {0}. Detailed error: {1}

Cause: Failed to execute crsctl command on the specified node.

Action: Examine the accompanying error message for details.

PRCT-01011: Failed to run "{0}". Detailed error: {1}

Cause: Failed to execute the specified command on the local node.

Action: Execute the specified command from the console and check the result. Fix the problem according to the error message given in the command output.

PRCT-01012: Invalid file path {0}

Cause: The supplied path does not exist.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01013: Failed to start remote execution server on local node.

Cause: A remote execution server is required on this platform, but an attempt to start one on this node failed. This message is accompanied by other(s) providing details on the failure.

Action: Correct the problem indicated by the accompanying error messages. On Windows systems, make sure that the current user has authority to remove and create directories and files in the Temp directory and to create and delete registry entries.

PRCT-01014: Internal error: {0}

Cause: An internal error occurred. The included value is an internal identifier.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01015: Version supplied is null

Cause: The supplied version was set to null.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01050: Failed to parse output returned by kfod when executing kfod at location {0}

Cause: Failed to parse the output returned by executing kfod because the output string is null or has fewer rows than expected

Action: This is an internal error. Contact Oracle Support Services.

PRCT-01051: Failed to parse the output returned by kfod for node {0} when executing kfod at location {1}

Cause: Failed to parse the output returned by executing kfod on the specified node because the output string is null or has fewer rows than expected.

Action: This is an internal error. Contact Oracle Support Services.

PRCT-01052: Failed to parse output {0} returned by kfod when executing kfod at location {1}

Cause: Failed to parse the output returned by executing kfod because the output has fewer columns than expected.

Action: This is an internal error. Contact Oracle Support Services.

PRCT-01053: Failed to parse output {0} returned by kfod for node {1} when executing kfod at location {2}

Cause: Failed to parse the output returned by executing kfod on the specified node because the output has fewer columns than expected.

Action: This is an internal error. Contact Oracle Support Services.

PRCT-01054: Fail to retrieve ASM active version for local node

Cause: Failed to get the active version of ASM by executing 'kfod nohdr=true op=version hostlist=<hostlist>'.
Action: This is an internal error. Contact Oracle Support Services.

PRCT-01055: Fail to retrieve ASM active version for node {0}. kfod execution failed at location {1}. Detailed error: {2}

Cause: Failed to get the active version of ASM by executing 'kfod nohdr=true op=version hostlist=<hostlist>' on the specified node.
Action: Examine the accompanying error messages for details.

PRCT-01056: Fail to retrieve ASM instance type. kfod execution failed at location {0}. Detailed error: {1}

Cause: Failed to get the instance type for ASM instance by executing 'kfod nohdr=true op=version'.
Action: Examine the accompanying error messages for details.

PRCT-01057: The value of ASM instance type {0} is not correct

Cause: The value of ASM instance type is invalid.
Action: The instance type of ASM can only be YES or NO.

PRCT-01058: Fail to check if ASM is running on node {0}. kfod execution failed at location {1}. Detailed error: {2}

Cause: Failed to check whether ASM is running by executing 'kfod nohdr=true op=insts hostlist=<hostlist>'.
Action: Examine the accompanying error messages for details.

PRCT-01059: Fail to retrieve list of disk group names for node {0}. kfod execution failed at location {1}. Detailed error: {2}

Cause: Failed to get the diskgroup names by executing 'kfod nohdr=true op=groups hostlist=<hostlist>'.
Action: Examine the accompanying error messages for details.

PRCT-01060: Fail to check if ASM is in rolling migration. kfod execution failed at location {1}. Detailed error: {2}

Cause: Failed to check whether ASM is in rolling migration by executing 'kfod nohdr=true op=rm'.
Action: Examine the accompanying error messages for details.

PRCT-01100: Failed to retrieve ACFS active version for local node

Cause: Failed to execute acfsutil to retrieve the ACFS active version on the local node.
Action: Review the underlying error messages that provides the details of why acfsutil execution failed. Resolve the reported problem and retry.

PRCT-01101: Failed to retrieve ACFS active version for node {0}. acfsutil execution failed at file location {1}. Detailed error: {2}

Cause: Failed to execute acfsutil to retrieve the ACFS active version on the supplied node.

Action: Review the underlying error messages that provides the details of why acfsutil execution failed. Resolve the reported problem and retry.

PRCT-01102: Failed to parse output when executing acfsutil at file location {0}

Cause: Unable to parse output returned by acfsutil.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01103: Failed to parse the output for node {0} when executing acfsutil at file location {1}

Cause: Unable to parse output returned by acfsutil on the supplied node.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01104: Failed to parse output {0} when executing acfsutil at file location {1}

Cause: Unable to parse output returned by acfsutil at specified location.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01105: Failed to parse output {0} for node {1} when executing acfsutil at file location {2}

Cause: Unable to parse output returned by acfsutil at specified location on the supplied node.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01109: Failed to get diskgroup names for node {0}

Cause: Unable to parse diskgroup names returned by acfsutil on the supplied node.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01111: Received empty result while getting ACFS Mount Points on node {1}

Cause: The output returned by acfsutil is empty.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01114: Execution of acfsutil command failed on node {0} for location {1}

Cause: Failed to execute acfsutil on the supplied node at the specified location.

Action: Review the underlying error messages that provides the details of why acfsutil execution failed. Resolve the reported problem and retry.

PRCT-01115: Execution of acfsutil failed on node {0} with result {1}

Cause: Failed to execute acfsutil on the supplied node.

Action: Review the underlying error messages that provides the details of why acfsutil execution failed. Resolve the reported problem and retry.

PRCT-01116: Invalid partition path {0} specified to acfsutil on node {1}

Cause: The supplied path path does not exist.

Action: Supply a valid partition path and retry.

PRCT-01117: Received empty result while getting ACFS Disk Groups on node {1}

Cause: The output returned by acfsutil is empty.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01118: Received empty result while getting total space at file location {0} on node {1}

Cause: The output returned by acfsutil is empty.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01119: Received empty result while getting free space at file location {0} on node {1}

Cause: The output returned by acfsutil is empty.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01120: A NULL path has been specified for the location on node {0}

Cause: A null path was provided for the location.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01121: Execution of acfsutil failed on local node with result {0}

Cause: Execution of acfsutil failed on the local node.

Action: Review the underlying error messages that provides the details of why acfsutil execution failed. Resolve the reported problem and retry.

PRCT-01122: Received empty result while getting mountpoint for path {0} on the local node

Cause: acfsutil returned an empty value when querying for the mountpoint of a specified path.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01123: The mountpoint is either set to null or empty

Cause: The supplied mountpoint is either an empty string or is set to null.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01124: Received empty result while getting volume device for mountpoint {0} on the local node

Cause: acfsutil returned an empty value when querying for the volume device of a specified mountpoint.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01125: The volume device is either set to null or empty

Cause: The supplied volume device is either an empty string or is set to null.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01126: Received empty result while getting mountpoint for volume device {0} on the local node

Cause: acfsutil returned an empty value when querying for the volume device of a specified mountpoint.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01127: Received empty result while getting all volume devices on the local node

Cause: No ACFS volume devices has been created.

Action: Use usmca to create ACFS volume devices.

PRCT-01128: ACFS is not supported on this operating system

Cause: ACFS is not supported on the underlying operating system.

Action: Run srvctl filesystem command on a supported operating system.

PRCT-01129: Execution of ACFS driver state check failed on local node with result {0}

Cause: Execution of ACFS driver state check failed on the local node

Action: Review the underlying error messages that provides the details of why ACFS driver state check execution failed. Resolve the reported problem and retry.

PRCT-01130: Execution of advmutil failed on local node with result {0}

Cause: Execution of advmutil failed on the local node

Action: Review the underlying error messages that provides the details of why advmutil execution failed. Resolve the reported problem and retry.

PRCT-01131: Failed to retrieve mount point for volume device {0}

Cause: No ACFS filesystem was mounted for the specified volume device.

Action: Mount the filesystem and retry.

PRCT-01132: ACFS driver state check with "{0}" option on local node failed to display any output

Cause: No output was captured when executing ACFS driver state check with the specified option on the local node.

Action: Internal error. Contact Oracle Support Services.

PRCT-01133: ACFS driver state check with "{0}" option on node {1} failed to display any output

Cause: No output was captured when executing ACFS driver state check with the specified option on the specified node.

Action: Internal error. Contact Oracle Support Services.

PRCT-01134: Execution of ACFS driver state check failed on node {0} with result {1}

Cause: Execution of ACFS driver state check failed on the specified node.

Action: Review the underlying error messages that provides the details of why ACFS driver state check execution failed. Resolve the reported problem and retry.

PRCT-01135: This platform does not support a default location for "{0}"

Cause: An attempt to run the 'acfsutil' command did not provide a location of this binary

Action: Internal error. Contact Oracle Support Services.

PRCT-01149: Failed to retrieve cluster name

Cause: The olsnodes command executed successfully, but there was no output.

Action: This is an internal error. Contact Oracle Support Services.

PRCT-01150: Failed to retrieve cluster name

Cause: Clusterware is not running.

Action: Make sure the clusterware is running.

PRCT-01151: Failed to retrieve cluster nodes status

Cause: Clusterware is not running.

Action: Make sure the clusterware is running.

PRCT-01152: Received empty result while getting cluster nodes Status Map

Cause: The olsnodes command executed successfully, but there was no output.

Action: This is an internal error. Contact Oracle Support Services.

PRCT-01153: Received empty result while getting a list of pinned and unpinned nodes in the cluster

Cause: The olsnodes command executed successfully, but there was no output.

Action: This is an internal error. Contact Oracle Support Services.

PRCT-01154: Failed to retrieve private host name for all cluster nodes. Detailed error: {0}

Cause: Clusterware is not running.

Action: Make sure the clusterware is running.

PRCT-01155: Received empty result while getting the private interconnect for nodes in the cluster

Cause: The olsnodes command executed successfully, but there was no output.

Action: This is an internal error. Contact Oracle Support Services.

PRCT-01200: Failed to retrieve disk group name for volume device {0}. asmcmd execution failed at location {1}. Detailed error: {2}

Cause: Unable to retrieve the disk group name for the specified volume device

Action: Check that ASM instance is running on the local node.

PRCT-01201: Failed to retrieve volume name for volume device {0}. asmcmd execution failed at location {1}. Detailed error: {2}

Cause: Unable to retrieve the volume name for the specified volume device

Action: Check that ASM instance is running on the local node.

PRCT-01202: Failed to parse output returned by asmcmd when executing asmcmd at location {0}

Cause: Unable to parse output returned by asmcmd.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01203: Failed to parse the output returned by asmcmd for node {0} when executing asmcmd at location {1}

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRCT-01204: Failed to find volume device {0}. asmcmd execution failed at location {1}. Detailed error: {2}

Cause: Volume device does not exist.

Action: Create the volume device using asm tools.

PRCT-01205: Failed to parse output {0} returned by asmcmd when executing asmcmd at location {1}

Cause: Unable to parse the specified output returned by asmcmd.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01206: Failed to parse output {0} returned by asmcmd for node {1} when executing asmcmd at location {2}

Cause: Unable to parse the specified output returned by asmcmd on specified node.

Action: Oracle internal error. Contact Oracle Support Services.

PRCT-01207: Failed to set the ORACLE_SID for running asmcmd from CRS home location {0}

Cause: Unable to retrieve the ASM instance name on the local node to generate the ORACLE_SID value.

Action: Use crsctl to make sure that the CRS stack is up; use 'srvctl status asm' to make sure that the ASM resource is running on the local node.

PRCT-01300: oifcfg execution failed. Detailed error: {0}

Cause: Failed to execute the oifcfg command for the local node. See the underlying error message for further details.

Action: Try to execute the oifcfg command manually.

PRCT-01301: oifcfg execution failed on node {0}. Detailed error: {1}

Cause: Failed to execute the oifcfg command for the remote node. See the underlying error message for further details.

Action: Try to execute the oifcfg command manually.

PRCT-01302: The "{0}" has an invalid IP address format

Cause: The format of the subnet number and/or the subnet mask is an invalid IP address format.

Action: Make sure that both the subnet number and the subnet mask have a valid IP address format.

PRCT-01303: The oifcfg command returned as result the line "{0}" that has less than 4 fields

Cause: This is an internal error.

Action: Contact Oracle Support Services.

PRCT-01400: getcrshome execution failed. Detailed error: {0}

Cause: Failed to execute the getcrshome command. See the underlying error message for further details.

Action: Try to execute the getcrshome command manually.

PRCT-01401: getcrshome execution failed on node {0}. Detailed error: {1}

Cause: Failed to execute the getcrshome command. See the underlying error message for further details.

Action: Try to execute the getcrshome command manually.

PRCT-01402: Attempt to retrieve version of SRVCTL from Oracle Home {0} failed. Detailed error: {1}

Cause: Failed to execute the 'srvctl -V' command. See the underlying error message for further details.

Action: Verify that the 'bin' directory under the indicated oracle home contains the 'srvctl' binary, and verify execution of 'srvctl -V' manually on that oracle home.

PRCT-01403: Failed to parse output returned by srvctl -V when executing command at Oracle home {0}

Cause: Failed to parse the output returned by executing 'srvctl -V' because the output string is null or has unexpected result

Action: Verify execution of 'srvctl -V' manually at oracle home or Contact Oracle Support Services.

PRCT-01404: Attempt to retrieve version of SRVCTL on node {0} from Oracle Home {1} failed. Detailed error: {2}

Cause: Failed to execute the 'srvctl -V' command. See the underlying error message for further details.

Action: Verify that the 'bin' directory in specified node under the indicated oracle home contains the 'srvctl' binary, and verify execution of 'srvctl -V' manually on that oracle home.

PRCT-01405: Failed to parse output returned by srvctl -V when executing command at node {0} and Oracle home {1}

Cause: Failed to parse the output returned by executing 'srvctl -V' at specified node and because the output string is null or has unexpected result

Action: Verify execution of 'srvctl -V' manually at given node and oracle home or Contact Oracle Support Services.

PRCT-01406: Oracle Home location: {0} does not contain {1}

Cause: The current Oracle Home directory does not contain the specified utility.

Action: Provide the correct Oracle Home directory.

PRCT-01415: More than one ACFS resource was found for the mount point path {0}

Cause: When looking up the ACFS resource for a mount point, more than one resource was found.

Action: Remove all but one of the ACFS resources that contains the duplicate mount point path.

SCLC-01000 to SCLC-01037

SCLC-01000: Failed to retrieve address of {0}, {1}

Cause: Failed to retrieve current address of the resource.

Action: Make sure that resource is running and that user has read permission on resource profile and try again.

SCLC-01003: Failed to retrieve tier names registered with {0}, {1}

Cause: Failed to retrieve tier names.

Action: Make sure that resource is running and try again.

SCLC-01004: Failed to retrieve members of tier {0} registered with {1}, {2}

Cause: Failed to retrieve tier members.

Action: Make sure that resource is running and try again.

SCLC-01005: Failed to get member tiers, {0}

Cause: Failed to get member tiers.

Action: Make sure that tier specific representatives are running and try again.

SCLC-01006: Failed to get cluster tier instance, {0}

Cause: Failed to get cluster tier instance.

Action: Make sure that cluster tier is configured and try again.

SCLC-01007: Failed to get discovery information for tier {0}, {1}

Cause: Failed to get tier discovery information

Action: Retry after resolving cause stated in message

SCLC-01008: Failed to get filters at location {0} for tier {1}

Cause: Failed to get filters registered at the given location of the tier.

Action: Retry after resolving cause stated in message

SCLC-01009: Failed to set filters {0} at location {1} of the tier {2}, {3}

Cause: Failed to set filters at the given location of the tier.

Action: Retry after resolving cause stated in message

SCLC-01010: Failed to create Discovery Server, {0}

Cause: Failed to initialize Discovery Server

Action: Retry after resolving cause stated in message.

SCLC-01011: Failed to get Discovery Server reference, {0}

-
- Cause:** Failed to get Discovery Server reference
Action: Discovery server is not configured properly, contact Oracle support.
- SCLC-01013: Failed to get Super Cluster Representative reference, {0}**
Cause: Failed to get Super Cluster Representative reference
Action: Super Cluster Representative is not running, start it and retry.
- SCLC-01014: Address {0} is not a multicast address**
Cause: Given IP Address is not a multicast address and therefore cannot be used for multicast discovery.
Action: Supply a multicast IP address and try again.
- SCLC-01015: Failed to retrieve configured multicast address for tier {0}**
Cause: Failed to retrieve multicast address.
Action: Retry after resolving cause stated in message
- SCLC-01016: Failed to retrieve discovery method for tier {0}**
Cause: Failed to retrieve discovery method for the given tier.
Action: Retry after resolving cause stated in message
- SCLC-01017: Multicast discovery method is not configured for tier {0}, {1}**
Cause: Multicast discovery method is not configured.
Action: This operation is applicable only for Multicast discovery method. Try it after configuring multicast discovery method for this tier.
- SCLC-01018: Discovery Server discovery method is not configured for tier {0}, {1}**
Cause: Discovery Server discovery method is not configured.
Action: This operation is applicable only for Discovery Server discovery method.
- SCLC-01019: Failed to retrieve member list for tier {0}, {1}**
Cause: Failed to current retrieve member list for the tier.
Action: Retry after resolving cause stated in message
- SCLC-01021: Failed to retrieve name of tier {0}**
Cause: Failed to retrieve name of the tier.
Action: Retry after resolving cause stated in message.
- SCLC-01022: Failed to update name of the tier {0}, {1}**
Cause: Failed to update name of the tier.
Action: Retry after resolving cause stated in message.
- SCLC-01025: Failed to retrieve count of representatives for tier {0}**
Cause: Failed to retrieve number of representatives configured for the given tier.
Action: Retry after resolving cause stated in message.
- SCLC-01026: Failed to update count of representatives for tier {0}, {1}**
Cause: Failed to update number of representatives for the given tier.
Action: Retry after resolving cause stated in message.
- SCLC-01027: Failed to start {0}, {1}**
Cause: Failed to start given server.

-
- Action:** Retry after resolving cause stated in message.
- SCLC-01028: Failed to stop {0}, {1}**
Cause: Failed to stop given server.
Action: Retry after resolving cause stated in message.
- SCLC-01029: Failed to check status of {0}, {1}**
Cause: Failed to check status of given server.
Action: Retry after resolving cause stated in message.
- SCLC-01030: {0} server is not running**
Cause: Server is not running.
Action: Retry after starting the server.
- SCLC-01031: Illegal argument : {0}**
Cause: Given argument is illegal.
Action: See command usage.
- SCLC-01032: Usage: {0} {1} {2}**
Cause: Prints given action script usage.
Action: None
- SCLC-01033: Failed to create super cluster client for tier {0}, {1}**
Cause: Failed to create super cluster client for tier.
Action: Retry after resolving cause stated in message.
- SCLC-01034: No argument was supplied to {0}**
Cause: The tool was invoked without any arguments, see its usage.
Action: Invoke the tool with arguments as documented in its usage.
- SCLC-01035: Failed to configure logger for {0}**
Cause: An error was encountered while configuring logger for given program. The message is followed by an exception message that contains more information. Most likely source of error is lack of privileges to create/update files in <crs_home>/log/<hostname>/srvm directory.
Action: Fix the error reported in the exception message by granting privileges to the current user to create/update files in <crs_home>/log/<hostname>/srvm directory.
- SCLC-01036: Failed to start the status listener for the EONS server {0}, {1}**
Cause: The specified EONS server failed to either obtain an available port or create the status listener thread.
Action: Check if there are available ports on this system.
- SCLC-01037: Failed to create the port file for the EONS server {0}, {1}**
Cause: An error occurred while creating a file in the <crs_home>/eons/init directory.
Action: Ensure that filesystem permissions are correct and that disk space is available.

SCLS-01000 to SCLS-01005

SCLS-01000: Failed to create super cluster representative server for tier {0}, {1}

Cause: Failed to create super cluster representative server for the given tier.

Action: Retry after resolving cause stated in message.

SCLS-01001: Failed to get ONS runtime of {0}

Cause: Failed to get ONS runtime of the given server.

Action: Retry after resolving cause stated in message.

SCLS-01002: Failed to get current member list of tier {0}

Cause: Failed to get current member list of the given tier.

Action: Retry after resolving cause stated in message.

SCLS-01003: eONS runtime was not running for tier {0}

Cause: eONS runtime was stopped abnormally.

Action: In cluster environment, try `srvctl stop nodeapps -n <node>` and `srvctl start nodeapps -n <node>`. In Oracle Restart environment, try `srvctl stop eons` and `srvctl start eons`.

SCLS-01004: Failed to set listening port to {0} for {1}

Cause: Failed to update listening port of the eONS runtime for this tier.

Action: Make sure that user has permission to update resource attribute. In cluster environment make sure that the clusterware stack is up.

SCLS-01005: Invalid listening port {0} specified for eONS

Cause: The specified eONS listening port number is invalid.

Action: Valid port numbers on Unix are from 1025 to 65535. Provide a valid port number for eONS to listen on.

PRCO-00001 to PRCO-00019

PRCO-00001: Failed to initialize olsnodes

Cause: Unable to initialize and start olsnodes

Action: Ensure that the clusterware is running.

PRCO-00002: Unable to communicate with the clusterware

Cause: Unable to communicate with the clusterware

Action: Ensure that the clusterware is running.

PRCO-00003: OCR operation failed *string*

Cause: OCR operation failed

Action: Refer to the OCR error message

PRCO-00004: OCR initialization failed *string*

Cause: OCR initialization failed

Action: Refer to the OCR error message

PRCO-00008: Unable to retrieve local node number

Cause: Unable to retrieve local node number from clusterware

Action: Ensure that the clusterware is running.

PRCO-00009: Unable to retrieve local node name

Cause: Unable to retrieve local node name from clusterware

Action: Ensure that the clusterware is running.

PRCO-00010: Unable to retrieve max number of nodes

Cause: Unable to retrieve maximum number of nodes from clusterware

Action: Ensure that the clusterware is running.

PRCO-00011: Unable to retrieve node name

Cause: Unable to retrieve node name from clusterware

Action: Ensure that the clusterware is running.

PRCO-00012: Unable to retrieve node number

Cause: Unable to retrieve node number from clusterware

Action: Ensure that the clusterware is running.

PRCO-00013: Unable to retrieve private interconnect name

Cause: Unable to retrieve private interconnect name from clusterware

Action: Ensure that the clusterware is running.

PRCO-00014: Unable to retrieve node virtual IP

Cause: Unable to retrieve node virtual IP from clusterware

Action: Ensure that the clusterware is running.

PRCO-00015: Not a cluster member

Cause: Specified node is not a cluster member

Action: Specify a cluster member node.

PRCO-00016: Cluster node membership interface for retrieving nodes list returned error code *number*

Cause: Call to the CSS nodelist service failed with the specified error as return value

Action: Ensure that the clusterware is running and look at the Clusterware log files

PRCO-00017: Cluster attribute retrieval interface to retrieve max node length failed

Cause: Call to the CSS attribute fetch service failed for attribute max node length

Action: Ensure that the clusterware is running, and look at the Clusterware log files

PRCO-00018: Unable to retrieve cluster name

Cause: Unable to retrieve cluster name from clusterware

Action: Ensure that the clusterware is running.

PRCO-00019: Failure retrieving list of nodes in the cluster

Cause: The list of cluster nodes could not be determined. Additional details on the problem are in accompanying message(s).

Action: Take action based on the accompanying message(s).

PRIF-00001 to PRIF-00052

PRIF-00001: invalid format for network interface

Cause: An invalid network interface was given.

Action: Supply a network interface of the form <if_name>/<subnet>:<if_type>.

PRIF-00002: invalid network interface type

Cause: An invalid network interface type was given.

Action: Supply one of the valid interface types "public", "cluster_interconnect".

PRIF-00003: cannot find the input interface configured

Cause: An attempt was made to access an interface that is not already configured.

Action: Check if the input interface is configured through the "getif" command option.

PRIF-00004: OCR error while deleting the configuration for the given interface

Cause: OCR may have been configured incorrectly or an OCR API failed.

Action: Check if OCR is configured correctly by running ocrdump.

PRIF-00005: invalid syntax for the setif command option

Cause: An invalid syntax was specified for the oifcfg setif command option.

Action: Make sure the syntax for setif is "oifcfg setif {-node <nodename> | -global} {<if_name>/<subnet>:<if_type>}..."

PRIF-00006: invalid syntax for the getif command option

Cause: An invalid syntax was specified for the oifcfg getif command option.

Action: Make sure the syntax for getif is "oifcfg getif [-node <nodename> | -global] [-if <if_name>/<subnet>] [-type <if_type>] ."

PRIF-00007: invalid syntax for the delif command option

Cause: An invalid syntax was specified for the oifcfg delif command option.

Action: Make sure the syntax for delif is "oifcfg delif {{-node <nodename> | -global} [<if_name>/<subnet>]} [-force] | -force}."

PRIF-00008: failed to initialize the prifcfg context

Cause: There was a system error.

Action: Check the messages in the log file oifcfg.log.

PRIF-00009: incorrect usage

Cause: Invalid command line options specified for the oifcfg tool.

Action: Run "oifcfg -help" to check the usage for the oifcfg tool.

PRIF-00010: failed to initialize the cluster registry

Cause: The cluster registry was not configured correctly.

Action: Run "ocrdump" to see if the cluster registry was configured properly.

PRIF-00011: cluster registry error

Cause: There was an internal error while operating on the cluster registry.

Action: Check the messages in the log file oifcfg.log.

PRIF-00012: failed to initialize cluster support services

Cause: The cluster support services module was not configured correctly.

Action: Check the messages in the log file oifcfg.log.

PRIF-00013: cluster support services error

Cause: There was an internal error while accessing cluster support services.

Action: Check if Cluster Support Services is running properly.

PRIF-00014: invalid node name

Cause: The node name does not match any of the configured nodes.

Action: Ensure that the supplied node name is one of the node names returned by 'olsnodes'.

PRIF-00015: invalid format for subnet

Cause: An invalid subnet was given.

Action: Supply a subnet of the form a.b.c.d where a, b, c and d is a value between 0 and 255 (inclusive).

PRIF-00016: invalid syntax for the iflist command option

Cause: An invalid syntax was specified for the oifcfg iflist command option.

Action: Make sure the syntax for iflist is "oifcfg iflist [-p [-n]]."

PRIF-00017: Error in getting the host names in a cluster

Cause: There was an internal error while calling clsgpnp_crs_getcsshosts.

Action: Check the underlying errors shown with this.

PRIF-00018: Error in deleting network information from GPnP profile

Cause: There was an internal error while calling clsgpnp_x_prfDelHostNetInfo.

Action: Check the underlying errors shown with this.

PRIF-00019: Error in getting the network attribute values from GPnP profile

Cause: There was an internal error while calling clsgpnp_x_prfGetNetAttrVal.

Action: Check the underlying errors shown with this.

PRIF-00020: Error in getting the lock for GPnP profile

Cause: There was an internal error while calling clsgpnp_crs_cssLockUpdates.

Action: Check the underlying errors shown with this.

PRIF-00021: Error in getting the GPnP profile

Cause: There was an internal error while calling clsgpnp_getProfile.

Action: Check the underlying errors shown with this.

PRIF-00022: Error in cloning the GPnP profile

Cause: There was an internal error while calling `clsgpnp_getProfile`.

Action: Check the underlying errors shown with this.

PRIF-00023: Error in getting network interface from GPnP profile

Cause: There was an internal error while calling `clsgpnp_x_prfGetHostNetInfo`

Action: Check the underlying errors shown with this.

PRIF-00024: Error in retrieving the network interface from GPnP profile

Cause: Failed to retrieve the network interface information because of underlying errors.

Action: Check the underlying errors shown with this.

PRIF-00025: Error in setting network attribute value in GPnP profile

Cause: There was an internal error while calling `clsgpnp_x_prfSetNetAttrVal`.

Action: Check the underlying errors shown with this.

PRIF-00026: Error in update the profiles in the cluster

Cause: There was an internal error while calling `clsgpnp_crs_ensuredSignAndPush`

Action: Check the underlying errors shown with this.

PRIF-00027: Error in releasing the in memory presentation of GPnP profile

Cause: There was an internal error while calling `clsgpnp_profileDestroy`.

Action: Check the underlying errors shown with this.

PRIF-00028: Error in unlock the GPnP profile

Cause: There was an internal error while calling `clsgpnp_crs_cssUnlockUpdates`.

Action: Check the underlying errors shown with this.

PRIF-00029: Warning: wildcard in network parameters can cause mismatch among GPnP profile, OCR, and system

Cause: Wildcard syntax was detected in one or more network-related parameters. Although this is allowed, be aware that network particulars (such as interface names and subnets) must be identical on all nodes of the cluster. Using wildcard syntax in network parameters does not allow the network configuration to vary across nodes.

Action: If wild card causes the problem, provide interface name and subnet without wild card.

PRIF-00030: Network information in OCR and GPnP profile differs

Cause: There was mismatched network information in OCR.

Action: Use 'oifcfg setif' to synchronize the network information from GPnP profile to OCR.

PRIF-00031: Failed to delete the specified network interface because it is the last private interface

Cause: A request to delete the only private network interface was refused because force was not specified.

Action: Specify the '-force' option to delete the last private interface, but be aware this may render Oracle Clusterware inoperative.

PRIF-00032: Error in checking for profile availability for host *string* *string*

Cause: Failed to set or delete interface because the profile was not available on the specified node.

Action: Make sure that profile is available on all cluster nodes before setting interface or deleting the interface. Examine the accompanying error messages and respond accordingly.

PRIF-00033: Failed to set or delete interface because hosts could not be discovered *string*

Cause: An attempt to set or delete an interface failed because hosts could not be discovered or their GPnP profiles could not be accessed.

Action: Ensure that the Oracle GPnP and mDNS daemons are running on all cluster nodes and resolve any other issues reported in accompanying error messages.

PRIF-00034: IPv6 subnets are not supported for cluster interconnect or Oracle ASM network

Cause: An attempt was made to classify an IPv6 subnet as Oracle ASM network or cluster interconnect.

Action: Use an IPv4 subnet for Oracle ASM network and cluster interconnect.

PRIF-00035: Failed to retrieve the OCR registry key [*string*] for global interface [*string*]

Cause: An attempt to get the registry key for the specified global interface from OCR failed.

Action: Delete the interface with invalid key using 'oifcfg delif -global <if_name> [-force]'. Reset the interface using 'oifcfg setif -global <if_name>/<subnet>:<if_type>'.

PRIF-00036: Failed to retrieve the OCR registry key [*string*] for interface *string* on node *string*

Cause: An attempt to get the registry key for the specified interface from OCR failed.

Action: Delete the interface with invalid key using 'oifcfg delif -node <nodename> <if_name> [-force]'. Reset the interface using 'oifcfg setif -node <nodename> <if_name>/<subnet>:<if_type>'.

PRIF-00050: duplicate interface is given in the input

Cause: Duplicate interface is given in the input.

Action: Warning: Supply a network interface of the form <if_name>/<subnet>:<if_type>. Make sure to provide unique combination for <if_name>/<subnet>:<if_type> if multiple inputs are provided in the same command line or if the entry already exists.

PRIF-00051: interface [*string*] is set to both public and cluster_interconnect

Cause: The interface is set to both public and cluster_interconnect.

Action: Warning: Make sure that the interface is not set to both public and cluster_interconnect.

PRIF-00052: Could not get an immediate lock for GPnP profile. Wait to get the lock

...

Cause: The command was unable to take an exclusive CSS lock with the nowait option.

Action: Ctrl-C if wait for too long. Check the setup of clusterware.

PROCL-00001 to PROCL-00109

PROCL-00001: Oracle Local Registry cannot be initialized.

Cause: An invalid init level was passed to initialize Oracle Local Registry.

Action: Initialize Oracle Local Registry with a valid init level.

PROCL-00002: Cannot perform local registry operation at the current init level.

Cause: Program tried a local registry operation which is not permitted at the init level.

Action: Initialize Oracle Local Registry with an appropriate init level.

PROCL-00003: Cannot perform local registry operation because context is invalid.

Cause: The Oracle Local Registry context passed was invalid.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00004: The local registry key to be operated on does not exist.

Cause: Program tried a local registry operation on a key which does not exist.

Action: Check to see if the key exists and try the operation again.

PROCL-00005: User does not have permission to perform a local registry operation on this key.

Cause: Program tried an operation on a local registry key for which it does not have permission.

Action: Check to see if program is run as the correct user.

PROCL-00006: User does not have permission to perform a local registry operation on this key.

Cause: Program tried a local registry operation on a key for which it does not have permission.

Action: Check to see if program is run as the correct user.

PROCL-00007: Cannot perform local registry operation because the key or batch handle is invalid.

Cause: The local registry key or batch handle passed was invalid.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00008: Cannot perform local registry operation because one of the parameters is invalid.

Cause: Program tried a local registry operation using an invalid parameter.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00009: Cannot perform local registry operation because the buffer passed is too small.

Cause: The amount of memory allocated for the buffer was insufficient.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00010: Cannot delete the local registry key as subkeys exist.

Cause: The program tried to delete a key for which subkeys exist.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00011: Cannot perform local registry operation because key is NULL.

Cause: The local registry key passed was NULL.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00012: Out of heap memory.

Cause: The program ran out of heap memory.

Action: Contact Oracle Support Services.

PROCL-00013: Cannot perform local registry operation because one of the parameters is NULL.

Cause: Program tried a local registry operation using an NULL parameter.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00014: Unknown error occurred

Cause: This is generic internal error for Oracle Local Registry.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00015: Failed to initialize the local registry

Cause: The Oracle Local Registry could not be accessed. The possible causes are:

1. The local registry has not been formatted.
2. The local registry file is not accessible.
3. The local registry file has incorrect permissions.
4. Oracle Clusterware is not running.

Action:

1. Run the 'ocrcheck -local' command to confirm that the OLR is formatted and usable.
2. Run 'ocrcheck -local -config' command to retrieve the configured file, and verify that the file is accessible and has the correct permissions via native platform or OS methods
3. Run 'crsctl check crs' command to verify that Oracle Clusterware is running.

PROCL-00016: Cannot retrieve any more subkeys for the given keyhandle

Cause: The key has no more subkeys to enumerate.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00017: Unimplemented feature

Cause: Requested feature has not been implemented in the current release.

Action: Try the feature again in the upcoming Oracle release.

PROCL-00018: The value size passed is too large

Cause: Cannot set a value of the given size.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00019: Cannot create more subkeys for the key

Cause: An attempt was made to create more subkeys under a key that is not permitted by the local registry.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00020: ORACLE_HOME environment not set

Cause: ORACLE_HOME environment not set.

Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

PROCL-00021: Maximum permitted depth of the OLR tree is reached

Cause: An attempt was made to create subkeys under a key which is already at depth PROC_MAX_KEY_DEPTH

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00022: The OLR backend has an invalid format

Cause: An attempt was made to use OLR before initializing it.

Action: Use the root.sh script. The 'ocrconfig -local -upgrade' command will initialize OLR.

PROCL-00023: Error in retrieving hostname

Cause: An error occurred while retrieving hostname.

Action: Contact Oracle Support Services.

PROCL-00024: Error in the messaging layer

Cause: An error occurred in the messaging layer while performing a local registry operation.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00025: Error in the NLS services

Cause: An error occurred in the NLS services while performing a local registry operation.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00026: Error while accessing the physical storage

Cause: The Oracle Local Registry could not be accessed. The possible causes are:

1. The local registry has not been formatted.
2. The local registry file is not accessible.
3. The local registry file has incorrect permissions.

Action:

1. Run the 'ocrcheck -local' command to confirm that the OLR is formatted and usable.
2. Run 'ocrcheck -local -config' command to retrieve the configured file, and verify that the file is accessible and has the correct permissions via native platform or OS methods

PROCL-00027: Error in authentication layer

Cause: An error occurred in the authentication layer while performing a local registry operation.

Action: Contact Oracle Support Services.

PROCL-00028: Oracle Local Registry already in current version

Cause: An attempt to upgrade the local registry which has already been upgraded.

Action: No action required.

PROCL-00029: Error in logging layer

Cause: An error occurred in the logging layer while performing a local registry operation.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00031: Storage device for the local registry is too small

Cause: The configured storage device for local registry was too small.

Action: Refer to the documentation and configure a storage device that is large enough for use by local registry.

PROCL-00032: Oracle High Availability Services on the local node is not running

Cause: Oracle High Availability Services on the local node was not running

Action: Run 'crsctl start crs' command to start the Oracle High Availability Services on the local node.

PROCL-00033: Oracle Local Registry is not configured

Cause: Oracle Local Registry configuration was not present on the node.

Action: Install and configure Oracle Clusterware.

PROCL-00035: Cannot perform local registry operation due to invalid version

Cause: The operation cannot be performed for this local active version

Action: Complete the upgrade before retrying the operation

PROCL-00036: No free space to perform this operation

Cause: There is no free space left to perform the requested operation

Action: Free up space and retry the operation

PROCL-00037: Oracle Local Registry does not support the storage type configured

Cause: The configured storage type for local registry is not supported

Action: Change the configuration of the local registry to a supported storage type. Refer to Oracle documentation for an exhaustive list for each platform.

PROCL-00038: Requested block number is not allocated from Oracle Local Registry

Cause: The requested block number is not allocated from Oracle Local Registry

Action: Retry the operation with another block number

PROCL-00039: Requested block has an invalid header

Cause: The requested block has an invalid header

Action: Retry the operation with another block number

PROCL-00040: Cannot add more operations to the batch

Cause: An attempt was made to add an operation to a batch that already has the maximum allowed operations.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00041: Oracle Local Registry is incorrectly configured

Cause: The local registry is incorrectly configured.

Action: Correct the local registry configuration.

PROCL-00042: User cannot access Oracle Local Registry configuration

Cause: Program encountered an error accessing the local registry configuration.

Action: Check to see if program is run as the correct user. Check that the local registry configuration has the correct permissions.

PROCL-00044: Error in network address and interface operations

Cause: An error occurred in the network address and interface operations layer while performing a local registry operation.

Action: Contact Oracle Support Services.

PROCL-00046: Cannot perform local registry operation because the batch is empty.

Cause: An attempt was made to execute the batch without any operations in it.

Action: This is an internal error. Contact Oracle Support Services.

PROCL-00048: Cannot perform the Oracle Local Registry operation due to a transient error.

Cause: A transient error occurred while performing the requested Oracle Local Registry operation. The operation was aborted without retrying, as requested by the client.

Action: Retry the operation.

PROCL-00049: The specified Oracle Local Registry backup location is inaccessible on the local node.

Cause: The backup location did not exist or the required permissions were not granted.

Action: Ensure that the location exists and the required file creation permissions are granted.

PROCL-00101: Operating System error [string]

Cause: An error occurred in the operating system layer while performing a local registry operation

Action: Contact Oracle Support Services.

PROCL-00102: Cluster services error [string]

Cause: An error occurred in the cluster services layer while performing a local registry operation.

Action: Contact Oracle Support Services.

PROCL-00103: Messaging error [string]

Cause: An error occurred in the messaging layer while performing a local registry operation.

Action: Contact Oracle Support Services.

PROCL-00104: Authentication error [string]

Cause: An error occurred in the authentication layer while performing a local registry operation.

Action: Contact Oracle Support Services.

PROCL-00105: Logging error

Cause: An error occurred in the logging layer while performing a local registry operation.

Action: Contact Oracle Support Services.

PROCL-00106: Unidentified component error

Cause: An error occurred in an unidentified layer while performing a local registry operation.

Action: Contact Oracle Support Services.

PROCL-00107: Storage layer error [*string*]

Cause: An error occurred in the storage layer while performing a local registry operation.

Action: Contact Oracle Support Services.

PROCL-00109: Network address and interface operations error

Cause: An error occurred in the network address and interface operations layer while performing a local registry operation.

Action: Contact Oracle Support Services.

PROC-00001 to PROC-00109

PROC-00001: Oracle Cluster Registry cannot be initialized.

Cause: An invalid init level was passed to initialize Oracle Cluster Registry.

Action: Initialize Oracle Cluster Registry with a valid init level.

PROC-00002: Cannot perform cluster registry operation at the current init level.

Cause: Program tried a cluster registry operation which is not permitted at the init level.

Action: Initialize Oracle Cluster Registry with an appropriate init level.

PROC-00003: Cannot perform cluster registry operation because context is invalid.

Cause: The Oracle Cluster Registry context passed was invalid.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00004: The cluster registry key to be operated on does not exist.

Cause: Program tried a cluster registry operation on a key which does not exist.

Action: Check to see if the key exists and try the operation again.

PROC-00005: User does not have permission to perform a cluster registry operation on this key.

Cause: Program tried an operation on a cluster registry key for which it does not have permission.

Action: Check to see if program is run as the correct user.

PROC-00006: User does not have permission to perform a cluster registry operation on this key.

Cause: Program tried a cluster registry operation on a key for which it does not have permission.

Action: Check to see if program is run as the correct user.

PROC-00007: Cannot perform cluster registry operation because key or batch handle is invalid.

Cause: The cluster registry key or batch handle passed was invalid.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00008: Cannot perform cluster registry operation because one of the parameters is invalid.

Cause: Program tried a cluster registry operation using an invalid parameter.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00009: Cannot perform cluster registry operation because the buffer passed is too small.

Cause: The amount of memory allocated for the buffer was insufficient.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00010: Cannot delete the cluster registry key as subkeys exist.

Cause: The program tried to delete a key for which subkeys exist.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00011: Cannot perform cluster registry operation because key is NULL.

Cause: The cluster registry key passed was NULL.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00012: Out of heap memory.

Cause: The program ran out of heap memory.

Action: Contact Oracle Support Services.

PROC-00013: Cannot perform cluster registry operation because one of the parameters is NULL.

Cause: Program tried a cluster registry operation using a NULL parameter.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00014: Unknown error occurred

Cause: This is generic internal error for Oracle Cluster Registry.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00015: Failed to initialize the cluster registry

Cause: The Oracle Cluster Registry could not be accessed. The possible causes are:

1. The cluster registry has not been formatted.
2. The cluster registry location is not accessible.
3. The cluster registry location has incorrect permissions.
4. Oracle Clusterware is not running.

Action:

1. Run the 'ocrcheck' command to confirm that the OCR is formatted and usable.
2. Run 'ocrcheck -config' command to retrieve the configured locations, and verify that each location is accessible and has the correct permissions via native platform or OS methods. If a location is an ASM disk group, verify that the disk group exists and is mounted.
3. Run 'crsctl check crs' command to verify that Oracle Clusterware is running.

PROC-00016: Cannot retrieve any more subkeys for the given keyhandle

Cause: The key has no more subkeys to enumerate.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00017: Unimplemented feature

Cause: Requested feature has not been implemented in the current release.

Action: Try the feature again in the upcoming Oracle release.

PROC-00018: The value size passed is too large

Cause: Cannot set a value of the given size.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00019: Cannot create more subkeys for the key

Cause: An attempt was made to create more subkeys under a key that is not permitted by the cluster registry.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00020: ORACLE_HOME environment not set

Cause: ORACLE_HOME environment not set.

Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

PROC-00021: Maximum permitted depth of the OCR tree is reached

Cause: An attempt was made to create subkeys under a key which is already at depth PROC_MAX_KEY_DEPTH

Action: This is an internal error. Contact Oracle Support Services.

PROC-00022: The OCR backend has an invalid format

Cause: An attempt was made to use OCR before initializing it.

Action: Use the root.sh script. The 'ocrconfig -upgrade' command will initialize OCR.

PROC-00023: Error in cluster services layer

Cause: An error occurred in the cluster services layer while performing a cluster registry operation.

Action: Contact Oracle Support Services.

PROC-00024: Error in the messaging layer

Cause: An error occurred in the messaging layer while performing a cluster registry operation.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00025: Error in the NLS services

Cause: An error occurred in the NLS services while performing a cluster registry operation.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00026: Error while accessing the physical storage

Cause: The Oracle Cluster Registry could not be accessed. The possible causes are:

1. The cluster registry has not been formatted.
2. The cluster registry location is not accessible.
3. The cluster registry location has incorrect permissions.
4. Oracle Clusterware is not running.

Action:

1. Run the 'ocrcheck' command to confirm that the OCR is formatted and usable.
2. Run 'ocrcheck -config' command to retrieve the configured locations, and verify that each location is accessible and has the correct permissions via native platform

or OS methods. If a location is an ASM disk group, verify that the disk group exists and is mounted.

3. Run 'crsctl check crs' command to verify that Oracle Clusterware is running.

PROC-00027: Error in authentication layer

Cause: An error occurred in the authentication layer while performing a cluster registry operation.

Action: Contact Oracle Support Services.

PROC-00028: Oracle Cluster Registry already in current version

Cause: An attempt to upgrade the cluster registry which has already been upgraded.

Action: No action required.

PROC-00029: Error in logging layer

Cause: An error occurred in the logging layer while performing a cluster registry operation.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00030: Oracle Cluster Registry IDs do not match

Cause: The cluster registry storage seen by the client was not the same as the one seen by the server. This may be caused by a misconfiguration.

Action: Contact Oracle Support Services.

PROC-00031: Storage device for the cluster registry is too small

Cause: The configured storage device or the storage device to be newly added to the cluster registry was too small.

Action: Refer to the documentation and configure a storage device that is large enough for use by cluster registry. In case the cluster registry is already configured, execute the 'ocrcheck' command to retrieve the total size, and ensure that the size of the device to be added is large enough for use by cluster registry.

PROC-00032: Cluster Ready Services on the local node is not running

Cause: The Cluster Ready Services on the local node was not running.

Action: Use the 'crsctl start crs' command to start the Cluster Ready Services on the local node.

PROC-00033: Oracle Cluster Registry is not configured

Cause: Oracle Cluster Registry configuration was not present on the node.

Action: Install and configure Oracle Clusterware.

PROC-00034: Oracle Cluster Registry configurations are not compatible

Cause: Cluster registry configuration on this node did not match with another node in the cluster.

Action: Retrieve the cluster registry configuration using 'ocrcheck -config' command on all nodes in the cluster. Fix the configuration on this node and make it consistent using 'ocrconfig -repair' command.

PROC-00035: Cannot perform cluster registry operation due to invalid version

Cause: The operation cannot be performed for this cluster active version

Action: Complete the upgrade before retrying the operation

PROC-00036: No free space to perform this operation

Cause: There is no free space left to perform the requested operation.

Action: Free up space and retry the operation.

PROC-00037: Oracle Cluster Registry does not support the storage type configured

Cause: The configured storage type for cluster registry is not supported

Action: Change the configuration of the cluster registry to a supported storage type. Refer to Oracle documentation for an exhaustive list for each platform.

PROC-00038: Requested block number is not allocated from Oracle Cluster Registry

Cause: The requested block number is not allocated from Oracle Cluster Registry.

Action: Retry the operation with another block number.

PROC-00039: Requested block has an invalid header

Cause: The requested block has an invalid header.

Action: Retry the operation with another block number.

PROC-00040: Cannot add more operations to the batch

Cause: An attempt was made to add an operation to a batch that already has the maximum allowed operations.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00041: Oracle Cluster Registry is incorrectly configured

Cause: The cluster registry is incorrectly configured.

Action: Correct the cluster registry configuration.

PROC-00042: User cannot access Oracle Cluster Registry configuration

Cause: Program encountered an error accessing the cluster registry configuration.

Action: Check to see if program is run as the correct user. Check that the cluster registry configuration has the correct permissions.

PROC-00043: Error in the ASM access layer

Cause: An error occurred in the layer used to access OCR when configured on ASM managed storage.

Action: Contact Oracle Support Services.

PROC-00044: Error in network address and interface operations

Cause: An error occurred in the network address and interface operations layer while performing a cluster registry operation.

Action: Contact Oracle Support Services.

PROC-00045: Error in the Oracle Clusterware API layer

Cause: An error occurred in the Oracle Clusterware API layer.

Action: Contact Oracle Support Services.

PROC-00046: Cannot perform cluster registry operation because the batch is empty.

Cause: An attempt was made to execute the batch without any operations in it.

Action: This is an internal error. Contact Oracle Support Services.

PROC-00047: Cannot proceed while the Oracle Cluster Registry format upgrade is in progress.

Cause: An Oracle Cluster Registry operation was requested, but found that an Oracle Cluster Registry format upgrade was in progress.

Action: Retry the operation after the format upgrade completes.

PROC-00048: Cannot perform the Oracle Cluster Registry operation due to a transient error.

Cause: A transient error occurred while performing the requested Oracle Cluster Registry operation. The operation was aborted without retrying, as requested by the client.

Action: Retry the operation.

PROC-00049: The specified Oracle Cluster Registry backup location is inaccessible on nodes *string*.

Cause: The Oracle Cluster Registry backup location did not exist, was not mounted correctly or did not have the required permissions on the above listed nodes.

Action: Ensure that the backup location exists with appropriate permissions on the above listed nodes. If the backup location is an ASM disk group, the disk group must be mounted correctly; also check the entries in the ASM alert log file for more details.

PROC-00050: The Oracle Cluster Registry location to be added is inaccessible on nodes *string*.

Cause: The Oracle Cluster Registry location to be added did not exist, was not mounted correctly or did not have the required permissions on the above listed nodes.

Action: Ensure that the location exists with appropriate permissions on the above listed nodes. If the location is an ASM disk group, the disk group must be mounted correctly; also check the entries in the ASM alert log file for more details.

PROC-00101: Operating System error [*string*]

Cause: An error occurred in the operating system layer while performing a cluster registry operation

Action: Contact Oracle Support Services.

PROC-00102: Cluster services error [*string*]

Cause: An error occurred in the cluster services layer while performing a cluster registry operation.

Action: Contact Oracle Support Services.

PROC-00103: Messaging error [*string*]

Cause: An error occurred in the messaging layer while performing a cluster registry operation.

Action: Contact Oracle Support Services.

PROC-00104: Authentication error [*string*]

Cause: An error occurred in the authentication layer while performing a cluster registry operation.

Action: Contact Oracle Support Services.

PROC-00105: Logging error

Cause: An error occurred in the logging layer while while performing a cluster registry operation.

Action: Contact Oracle Support Services.

PROC-00106: Unidentified component error

Cause: An error occurred in an unidentified layer while performing a cluster registry operation.

Action: Contact Oracle Support Services.

PROC-00107: Storage layer error [*string*]

Cause: An error occurred in the storage layer while performing a cluster registry operation.

Action: Contact Oracle Support Services.

PROC-00108: ASM error [*string*]

Cause: An error occurred in the asm layer while performing a cluster registry operation.

Action: Contact Oracle Support Services.

PROC-00109: Network address and interface operations error

Cause: An error occurred in the network address and interface operations layer while performing a cluster registry operation.

Action: Contact Oracle Support Services.

PROTL-00001 to PROTL-00811

PROTL-00001: Failed to initialize ocrconfig

Cause: Unable to initialize and start ocrconfig.

Action: Check log file for details about the failure.

PROTL-00002: Export file '*string*' already exists

Cause: Requested export file exists in the given path.

Action: Change the location for export file or remove the old export file.

PROTL-00003: Failed to create export file '*string*'

Cause: Unable to create or open file for exporting local registry data.

Action: Check access privilege or disk space of the requested path.

PROTL-00004: Failed to retrieve data from the local registry

Cause: Unable to retrieve necessary information from the local registry.

Action: Check the availability of the local registry and the details of the failure from the log file.

PROTL-00006: The specified import file '*string*' cannot be found

Cause: The import file did not exist.

Action: Check the file and its correct path and try again.

PROTL-00007: Failed to open the specified import file '*string*'

Cause: Unable to access the specified import file.

Action: Check access privilege of the import file.

PROTL-00008: Failed to import data from specified file to the local registry

Cause: Unable to read data from the import file and import to the local registry.

Action: Check availability of the local registry and the details of the failure from the log file.

PROTL-00010: Failed to open the specified source local registry

Cause: Unable to access the specified source local registry.

Action: Check access privilege and location of the source local registry, and the log file for more detail.

PROTL-00011: Failed to open the specified destination local registry

Cause: Unable to access the specified destination local registry.

Action: Check access privilege and location of the destination local registry. Also check the log file for more details.

PROTL-00012: Oracle Local Registry to be upgraded has an unsupported version

Cause: Oracle Local Registry to be upgraded had an unsupported version.

Action: Upgrade Oracle Local Registry to a version supported.

PROTL-00013: Oracle Local Registry is in current version

Cause: Oracle Local Registry was in current version.

Action: No action required.

PROTL-00015: Unimplemented feature

Cause: Requested feature has not been implemented in current release.

Action: Try the feature again in the next release.

PROTL-00016: Internal Error

Cause: This is a generic internal error for ocrconfig.

Action: Contact Oracle Support Services.

PROTL-00017: Fatal Error

Cause: This is a generic fatal error for ocrconfig.

Action: Contact Oracle Support Services.

PROTL-00018: Failed to open the specified backup file '*string*'

Cause: File did not exist or user did not have permission to open the file.

Action: Ensure that the file exists and its permissions are correct. Also check the log file for more details.

PROTL-00019: Cannot proceed while the Oracle High Availability Service is running

Cause: The Oracle High Availability Service was running.

Action: Use the 'crsctl stop crs' command to shutdown the Oracle High Availability Service on the local node.

PROTL-00020: Insufficient permission to proceed. Require privileged user

Cause: User was not a privileged user.

Action: Run the command again using a privileged user.

PROTL-00021: Invalid parameter

Cause: Input parameter was not valid.

Action: Check log file for more information.

PROTL-00025: Manual backups for the Oracle Local Registry are not available

Cause: Manual backups for the Oracle Local Registry were not yet created.

Action: Manual backups can be created using 'ocrconfig -local -manualbackup' command.

PROTL-00035: The configured OLR location is not accessible.

Cause: The configured Oracle Local Registry (OLR) location did not exist, did not have the required permissions, or did not have sufficient disk space.

Action: Ensure that the location exists, that its permissions are correct, and that it has sufficient disk space. Also check the Clusterware alert log file for more details.

PROTL-00039: The specified file '*string*' has an invalid format

Cause: The specified file was not a valid Oracle Local Registry export/import file.

Action: Specify a valid Oracle Local Registry file which was created using the 'ocrconfig -local -export' command.

PROTL-00040: The specified file '*string*' has an invalid format

Cause: The specified file was not a valid Oracle Local Registry backup file.

Action: Use the 'ocrconfig -local -showbackup' command to list all available backups. Specify a valid Oracle Local Registry backup file listed by the above command.

PROTL-00041: The specified backup location '*string*' is not accessible

Cause: The backup location did not exist or the required permissions were not granted.

Action: Ensure that the location exists and the required file creation permissions are granted.

PROTL-00042: The specified backup location '*string*' is not a directory

Cause: The specified backup location was not a directory.

Action: Specify a directory.

PROTL-00049: The Oracle Local Registry (OLR) integrity check failed.

Cause: The integrity check failed for the configured Oracle Local Registry location.

Action: Check availability of backups using 'ocrconfig -local -showbackup' command and restore a compatible backup. If you are not able to resolve the problem, contact Oracle Support Services.

PROTL-00124: * Use option '-local' to indicate that the operation is to be performed on the Oracle Local Registry.

Cause: ocrconfig called with incorrect or missing options.

Action: Use ocrconfig with correct options.

PROTL-00302: Failed to initialize ocrdump

Cause: Unable to initialize and start ocrdump .

Action: Check log file for details about the failure.

PROTL-00303: Dump file already exists [*string*]

Cause: Requested dump file exists in the given path.

Action: Change the location for the dump file or remove the old dump file.

PROTL-00304: Failed to create dump file [*string*]

Cause: Unable to create or open file for dumping local registry data.

Action: Check access privilege or disk space of the requested path.

PROTL-00305: Failed to write to dump file [*string*]

Cause: Unable to write to dump file while dumping local registry data.

Action: Check access privilege or disk space of the requested path.

PROTL-00306: Failed to retrieve local registry data

Cause: Unable to read local registry data.

Action: Check log file for details about the failure.

PROTL-00307: The specified key does not exist in local registry

Cause: Unable to retrieve the specified key from local registry.

Action: Check log file for the key name.

PROTL-00309: Failed to access the Oracle Local Registry backup file.

Cause: The Oracle Local Registry backup file either did not exist or the user did not have the permission to open the file.

Action: Ensure that the file exists and its permissions are correct.

PROTL-00418: Use option '-local' to indicate that the operation is to be performed on the Oracle Local Registry.

Cause: ocrdump called with incorrect or missing options.

Action: Use ocrdump with correct options.

PROTL-00601: Failed to initialize ocrcheck

Cause: Unable to initialize and start ocrcheck.

Action: Check log file for details about the failure.

PROTL-00602: Failed to retrieve data from the local registry

Cause: Unable to retrieve necessary information from the local registry.

Action: Check the availability of the local registry and the details of the failure from the log file.

PROTL-00603: Oracle Local Registry is logically corrupted

Cause: A logical corruption was detected in the Oracle Local Registry.

Action: Check the log file for more information.

PROTL-00604: Failed to retrieve the configured location of the local registry

Cause: Unable to retrieve the location of local registry.

Action: Check log file for details about the failure.

PROTL-00724: Oracle Local Registry configuration is :

Cause: ocrcheck called.

Action: None

PROTL-00811: when running this tool.

Cause: ocrcheck called with incorrect or missing options.

Action: Use ocrcheck with correct options.

PROT-00001 to PROT-00811

PROT-00001: Failed to initialize ocrconfig

Cause: Unable to initialize and start ocrconfig.

Action: Check log file for details about the failure.

PROT-00002: Export file '*string*' already exists

Cause: Requested export file exists in the given path.

Action: Change the location for export file or remove the old export file.

PROT-00003: Failed to create export file '*string*'

Cause: Unable to create or open file for exporting cluster registry data.

Action: Check access privilege or disk space of the requested path.

PROT-00004: Failed to retrieve data from the cluster registry

Cause: Unable to retrieve necessary information from the cluster registry.

Action: Check the availability of the cluster registry and the details of the failure from the log file.

PROT-00005: Clusterware is not running properly

Cause: Unable to register with clusterware for access to the cluster registry.

Action: Check the status of clusterware running on the machine.

PROT-00006: The specified import file '*string*' cannot be found

Cause: The import file did not exist.

Action: Check the file and its correct path and try again.

PROT-00007: Failed to open the specified import file '*string*'

Cause: Unable to access the specified import file.

Action: Check access privilege of the import file.

PROT-00008: Failed to import data from specified file to the cluster registry

Cause: Unable to read data from the import file and import to the cluster registry.

Action: Check availability of the cluster registry and the details of the failure from the log file.

PROT-00010: Failed to open the specified source cluster registry

Cause: Unable to access the specified source cluster registry.

Action: Check access privilege and location of the source cluster registry, and the log file for more detail.

PROT-00011: Failed to open the specified destination cluster registry

Cause: Unable to access the specified destination cluster registry.

Action: Check access privilege and location of the destination cluster registry. Also check the log file for more details.

PROT-00012: Oracle Cluster Registry to be upgraded has an unsupported version

Cause: Oracle Cluster Registry to be upgraded had an unsupported version.

Action: Upgrade Oracle Cluster Registry to a version supported.

PROT-00013: Oracle Cluster Registry is in current version

Cause: Oracle Cluster Registry was in current version.

Action: No action required.

PROT-00014: Oracle Cluster Registry to be downgraded has an earlier version

Cause: Oracle Cluster Registry to be downgraded had an earlier version.

Action: No action required.

PROT-00015: Unimplemented feature

Cause: Requested feature has not been implemented in current release.

Action: Try the feature again in the next release.

PROT-00016: Internal Error

Cause: This is a generic internal error for ocrconfig.

Action: Contact Oracle Support Services.

PROT-00017: Fatal Error

Cause: This is a generic fatal error for ocrconfig.

Action: Contact Oracle Support Services.

PROT-00018: Failed to open the specified backup file '*string*'

Cause: File did not exist or user did not have permission to open the file.

Action: Ensure that the file exists and its permissions are correct. Also check the log file for more details.

PROT-00019: Cannot proceed while the Cluster Ready Service is running

Cause: The Cluster Ready Service was running.

Action: Use the 'crsctl stop crs' command to shutdown the Cluster Ready Service on the local node.

PROT-00020: Insufficient permission to proceed. Require privileged user

Cause: User was not a privileged user.

Action: Run the command again using a privileged user.

PROT-00021: Invalid parameter

Cause: Input parameter was not valid.

Action: Check log file for more information.

PROT-00022: Storage too small

Cause: Specified storage was too small to mirror OCR content.

Action: Execute the 'ocrcheck' command to retrieve the total size, and ensure that the size of the device to be added is large enough for use by cluster registry.

PROT-00023: Failed to backup OCR

Cause: Unable to take a backup of OCR.

Action: Check availability of the cluster registry and the available free space on the file system where the manual backup will be stored. Use ocrconfig -backuploc to specify a new backup location if necessary. Check the CRS log file for more information.

PROT-00024: Auto backups for the Oracle Cluster Registry are not available

Cause: Auto backups for the Oracle Cluster Registry were not yet created. They are created once every four hours.

Action: No action required.

PROT-00025: Manual backups for the Oracle Cluster Registry are not available

Cause: Manual backups for the Oracle Cluster Registry were not yet created.

Action: Manual backups can be created using 'ocrconfig -manualbackup' command.

PROT-00026: Oracle Cluster Registry backup locations were retrieved from a local copy

Cause: The Oracle Cluster Registry files were not accessible. Information about the cluster registry backups is also maintained in the Oracle Local Registry. The information displayed has been retrieved from the Oracle Local Registry. This information may be outdated.

Action: Run 'ocrconfig -showbackup' command from another node in the cluster. Compare the output of the 'ocrconfig -showbackup' on this node with output of the same command from other nodes in the cluster to determine the latest backup copy.

PROT-00027: Cannot configure another Oracle Cluster Registry location because the maximum number of Oracle Cluster Registry locations (5) have been configured

Cause: The maximum number of Oracle Cluster Registry locations (5) had been configured.

Action: (Optional) Verify the configuration using the 'ocrcheck -config' command. Delete an Oracle Cluster Registry device by executing 'ocrconfig -delete <existing location>' command, and retry the operation.

PROT-00028: Cannot delete or replace the only configured Oracle Cluster Registry location

Cause: A delete or replace operation was performed when there was only 1 configured Oracle Cluster Registry location. The above listed operation can only be performed when there are at least 2 configured Oracle Cluster Registry locations.

Action: Execute 'ocrconfig -add <new location>' to add the new Oracle Cluster Registry location followed by 'ocrconfig -delete <existing location>' command.

PROT-00029: The Oracle Cluster Registry location is already configured

Cause: The location to be added was identical to a configured Oracle Cluster Registry location.

Action: Verify the configuration using the 'ocrcheck -config' command. Ensure that the location to be added is not already configured.

PROT-00030: The Oracle Cluster Registry location to be added is not usable

Cause: The Oracle Cluster Registry location to be added did not exist, wasn't mounted correctly, did not have the required permissions, or did not have the sufficient disk space.

Action: Ensure that the location exists, that it is mounted correctly and visible to all nodes in the cluster, that its permissions are correct, and that it has sufficient disk space. If trying to add an ASM Oracle Cluster Registry location, check for related entries in the ASM alert log file for more details.

PROT-00031: The Oracle Cluster Registry location to be added is an ASM disk

Cause: The Oracle Cluster Registry location to be added is already in use by ASM.

Action: Specify a Oracle Cluster Registry location that is not currently in use. Use the 'crsctl query css votedisk' command to get the list of voting files used by CSS. Use the 'asmcmd lsdsk --member' command to get the list of disks used by ASM. Specify a location that is not in either list.

PROT-00032: The Oracle Cluster Registry location to be added is a CSS voting file

Cause: The Oracle Cluster Registry location to be added is already configured as a CSS voting file.

Action: Specify a Oracle Cluster Registry location that is not currently in use. Use the 'crsctl query css votedisk' command to get the list of voting files used by CSS. Use the 'asmcmd lsdsk --member' command to get the list of disks used by ASM. Specify a location that is not in either list.

PROT-00033: Oracle High Availability Services on the local node is not running

Cause: Oracle High Availability Services on the local node was not running

Action: Run 'crsctl start crs' command to start the Oracle High Availability Services on the local node.

PROT-00034: The Oracle Cluster Registry location to be deleted is not configured

Cause: The location to be deleted was not already configured as an Oracle Cluster Registry location.

Action: Run 'ocrcheck -config' command to get the list of configured Oracle Cluster Registry locations. Ensure that the location to be deleted is already configured.

PROT-00035: The configured OCR locations are not accessible.

Cause: The configured Oracle Cluster Registry (OCR) locations did not exist, were not mounted correctly, did not have the required permissions, or did not have sufficient disk space.

Action: Ensure that the locations exist, that they are mounted correctly and visible to all nodes in the cluster, that their permissions are correct, and that they have sufficient disk space. If using an Oracle Automatic Storage Management (Oracle ASM) OCR location, check for entries in the Oracle ASM alert log file for more details.

PROT-00036: Duplicate or previously used Oracle Cluster Registry location *string* cannot be added

Cause: The Oracle Cluster Registry location to be added had the same contents as that of currently configured locations. This might be due to the location to be added was either duplicate of one of the currently configured locations with a different path or previously used.

Action: Make sure that the location to be added is not currently configured with a different path. If the location was previously configured as an Oracle Cluster Registry location, ensure that the contents are erased before adding it again.

PROT-00037: The Oracle Cluster Registry location *string* cannot be deleted because it is required for the OCR to be available

Cause: A delete operation was requested when there were minimum configured Oracle Cluster Registry locations available. The above listed operation can only be performed when a majority of configured Oracle Cluster Registry locations are accessible and online.

Action: Run 'ocrcheck' command to get the current status of the configured Oracle Cluster Registry locations. Execute 'ocrconfig -add <new location>' to add the new Oracle Cluster Registry location followed by 'ocrconfig -delete <existing location>' command.

PROT-00038: The Oracle Cluster Registry location cannot be added because location *string* is offline

Cause: An add or replace operation was requested when there was at least one configured Oracle Cluster Registry location which was not accessible or online. The above listed operation can only be performed when the inaccessible Oracle Cluster Registry location has been deleted or replaced.

Action: Run 'ocrcheck' command to get the current status of the configured Oracle Cluster Registry locations. Execute 'ocrconfig -delete <offline location>' command to delete the inaccessible Oracle Cluster Registry location followed by 'ocrconfig -add <new location>' command.

PROT-00039: The specified file '*string*' has an invalid format

Cause: The specified file was not a valid Oracle Cluster Registry export/import file.

Action: Specify a valid Oracle Cluster Registry file which was created using the 'ocrconfig -export' command.

PROT-00040: The specified file '*string*' has an invalid format

Cause: The specified file was not a valid Oracle Cluster Registry backup file.

Action: Use the 'ocrconfig -showbackup' command to list all available backups. Specify a valid Oracle Cluster Registry backup file listed by the above command.

PROT-00041: The specified backup location '*string*' is not accessible

Cause: The backup location did not exist or the required permissions were not granted.

Action: Ensure that the location exists and the required file creation permissions are granted.

PROT-00042: The specified backup location '*string*' is not a directory or an ASM disk group

Cause: The specified backup location was not a directory or an ASM disk group.

Action: Specify a directory or an ASM disk group.

PROT-00044: Cannot change the Oracle Cluster Registry backup location to an ASM disk group.

Cause: An attempt was made to change the Oracle Cluster Registry backup location to an ASM disk group when the Oracle Cluster Registry was not configured on ASM.

Action: Migrate the Oracle Cluster Registry to ASM before changing the Oracle Cluster Registry backup location to an ASM disk group.

PROT-00045: The specified Oracle Cluster Registry backup location *string* is inaccessible.

Cause: Oracle Cluster Registry backup location did not exist, was not mounted correctly, or did not have the required permissions.

Action: Ensure that the backup location exists, that it is mounted correctly, and that its permissions are correct. Check the entries in the ASM alert log file for more details.

PROT-00046: Failed to repair the Oracle Cluster Registry configuration while adding the location '*string*' on the local node.

Cause: The Oracle Cluster Registry location to be added did not exist, was not mounted correctly, did not have the required permissions, or the OCR file in the disk group did not exist.

Action: Ensure that the location exists with appropriate permissions. If the location is an ASM disk group, then the OCR file in the disk group must already exist, the disk group must be mounted correctly; also check the entries in the ASM alert log file for more details.

PROT-00047: Cannot change the Oracle Cluster Registry backup location to the specified ASM disk group *string*.

Cause: An attempt was made to change the Oracle Cluster Registry backup location to an ASM disk group which was the same as the only configured ASM Oracle Cluster Registry location.

Action: Add another ASM Oracle Cluster Registry location before changing the Oracle Cluster Registry backup location to the specified ASM disk group or specify a different ASM disk group for the Oracle Cluster Registry backup location.

PROT-00049: The Oracle Cluster Registry (OCR) integrity check failed.

Cause: The integrity check failed for one or more of the configured Oracle Cluster Registry locations.

Action: Use 'ocrcheck' command to validate the block integrity of the configured Oracle Cluster Registry locations. Delete the corrupt locations using the command 'ocrconfig -delete <corrupt location>'. If all configured Oracle Cluster Registry locations are corrupted, check the availability of backups using the 'ocrconfig -showbackup' command and restore a compatible backup. If you are not able to resolve the problem, contact Oracle Support Services.

PROT-00124: * Use option '-local' to indicate that the operation is to be performed on the Oracle Local Registry.

Cause: ocrconfig called with incorrect or missing options.

Action: Use ocrconfig with correct options.

PROT-00301: Dump is not feasible when clusterware is running

Cause: Unable to dump cluster registry data when clusterware is running.

Action: Stop the clusterware before retrying ocrdump.

PROT-00302: Failed to initialize ocrdump

Cause: Unable to initialize and start ocrdump.

Action: Check log file for details about the failure.

PROT-00303: Dump file already exists [string]

Cause: Requested dump file exists in the given path.

Action: Change the location for the dump file or remove the old dump file.

PROT-00304: Failed to create dump file [string]

Cause: Unable to create or open file for dumping cluster registry data.

Action: Check access privilege or disk space of the requested path.

PROT-00305: Failed to write to dump file [string]

Cause: Unable to write to dump file while dumping cluster registry data.

Action: Check access privilege or disk space of the requested path.

PROT-00306: Failed to retrieve cluster registry data

Cause: Unable to read cluster registry data.

Action: Check log file for details about the failure.

PROT-00307: The specified key does not exist in cluster registry

Cause: Unable to retrieve the specified key from cluster registry.

Action: Check log file for the key name.

PROT-00309: Failed to access the Oracle Cluster Registry backup file.

Cause: The Oracle Cluster Registry backup file either did not exist or the user did not have the permission to open the file.

Action: Ensure that the file exists and its permissions are correct.

PROT-00418: Use option '-local' to indicate that the operation is to be performed on the Oracle Local Registry.

Cause: ocrdump called with incorrect or missing options.

Action: Use ocrdump with correct options.

PROT-00601: Failed to initialize ocrcheck

Cause: Unable to initialize and start ocrcheck.

Action: Check log file for details about the failure.

PROT-00602: Failed to retrieve data from the cluster registry

Cause: Unable to retrieve necessary information from the cluster registry.

Action: Check the availability of the cluster registry and the details of the failure from the log file.

PROT-00603: Oracle Cluster Registry is logically corrupted

Cause: A logical corruption was detected in the Oracle Cluster Registry.

Action: Check the log file for more information. Check availability of backups using 'ocrconfig -showbackup' command. Restore a compatible backup, and verify using ocrcheck.

PROT-00604: Failed to retrieve the configured location(s) of the cluster registry.

Cause: Unable to retrieve the configured location(s) of the cluster registry.

Action: Check log file for details about the failure.

PROT-00724: Oracle Cluster Registry configuration is :

Cause: ocrcheck called.

Action: None

PROT-00811: when running this tool.

Cause: ocrcheck called with incorrect or missing options.

Action: Use ocrcheck with correct options.

TNS-00000 to TNS-12699

TNS-00000: Not An Error

Cause: Everything is working as it should.

Action: Don't worry: Be happy.

TNS-00001: INTCTL: error while getting command line from the terminal

Cause: Improper standard input connection from the terminal.

Action: Normally not visible to the user. Start the INTCTL program again. If error persists, contact Oracle Customer Support.

TNS-00002: INTCTL: error while starting the Interchange

Cause: of the problem. Be sure to turn tracing off when the problem has been rectified.

Action: Check the Interchange configuration files (INTCHG.ORA, TNSNET.ORA and TNSNAV.ORA) for errors and confirm that no other programs are using the ADDRESS(es) specified. If error continues, turn on tracing in the Interchange components and examine the trace files to determine the

TNS-00003: INTCTL: error while sending request to the Interchange

Cause: Improper command sent to the Interchange or the Interchange is not responding. Not normally visible to the user.

Action: Verify that the command sent to the Interchange is valid. Also check that the Interchange is running by using the INTCTL STATUS command. If necessary, start the Interchange using the INTCTL START command.

TNS-00004: INTCTL: error while starting the Navigator

Cause: The Navigator could not be started.

Action: Check to make sure that executables for the Navigator (navgatr) are present in the ORACLE executable directory on your platform. Check the configuration files TNSNET.ORA and TNSNAV.ORA for errors. If error continues, turn on tracing in the Interchange components and examine the trace files to determine the cause of the problem. Be sure to turn tracing off when the problem has been rectified.

TNS-00005: INTCTL: error while sending request to the Navigator

Cause: The Navigator is not responding. Either the Navigator is not running or another process is responding.

Action: Check that the Navigator is running by using the STATUS command of the Interchange Control Utility. Verify that the correct addresses are listed in the TNSNAMES.ORA, TNSNET.ORA, and TNSNAV.ORA configuration files.

TNS-00006: INTCTL: HOST variable is not defined

Cause: The HOST variable was not set.

Action: Set the variable HOST properly and restart the INTCTL program.

TNS-00007: INTCTL: unknown host

Cause: The pointer HOST is set to an unknown hostname.

Action: Set the pointer HOST properly and restart INTCTL program.

TNS-00008: INTCTL: could not contact destination Navigator

Cause: Connection could not be properly established to a Navigator. This may be because the Navigator specified is not running or the Navigator addresses are incorrect.

Action: Check that the Navigator is running by using the STATUS command of the Interchange Control Utility; if necessary, start the Navigator using the START command of the Interchange Control Utility. If it is running and the error persists, contact Oracle Customer Support.

TNS-00009: INTCTL: could not contact destination Connection Manager

Cause: Connection could not be properly established to a Connection Manager. This may be because the Connection Manager (Interchange) specified is not running or the Connection Manager addresses are incorrect.

Action: Make sure the Connection Manager is running by using the STATUS command of the Interchange Control Utility; if necessary, start the Connection Manager using the START command of the Interchange Control Utility. If it is running and the error persists, contact Oracle Customer Support.

TNS-00010: Error while flushing NS context

Cause: Internal NS error; connection may be lost.

Action: Make sure the connection is properly established. If the error persists, then contact Oracle Customer Support.

TNS-00011: INTCTL: error while starting the Connection Manager

Cause: The Connection Manager could not be started.

Action: Assure that the executable can be found in the standard Oracle executable area. Check the configuration file INTCHG.ORA for errors and confirm that no other process is using the ADDRESS(es) for this Connection Manager as specified in TNSNET.ORA. Tracing can also be turned on in the Connection Manager and detailed information about the reason for the error determined. Consult the MultiProtocol Interchange Administrator's Guide and Chapter 2 of this manual for how to turn on tracing.

TNS-00012: INTCTL: error while processing Connection Manager request

Cause: An improper command was sent to the Connection Manager or it is not responding. Not normally visible to the user.

Action: Verify that the correct addresses are listed in the TNSNAMES.ORA, TNSNET.ORA, and TNSNAV.ORA configuration files. Also check that the Connection Manager is running by using the STATUS command of the Interchange Control Utility. If the error persists, contact Oracle Customer Support.

TNS-00013: INTCTL: error while performing NS disconnect command

Cause: Internal NS error. Error in closing down connections.

Action: Make sure the networking protocol being used is properly installed on the machine. If the error persists contact Oracle Customer Support.

TNS-00014: INTCTL: error while opening terminal input channel

Cause: Could not open standard terminal input. Internal error.

Action: Normally not visible to the user. Restart the INTCTL program. If error persists, contact Oracle Customer Support.

TNS-00015: INTCTL: error while closing terminal input channel

Cause: Could not close terminal input channel. Internal error.

Action: Normally not visible to the user. Restart the INTCTL program. If error persists, contact Oracle Customer Support.

TNS-00016: INTCTL: error while performing NS send command

Cause: Internal NS error. Connection may be lost.

Action: If the error persists contact Oracle Customer Support.

TNS-00017: INTCTL: error while performing NS receive command

Cause: Internal NS error. Connection may be lost.

Action: If the error persists contact Oracle Customer Support.

TNS-00018: INTCTL: TNS_ADMIN not defined

Cause: The TNS_ADMIN pointer is improperly set.

Action: No action necessary; TNS_ADMIN need only be set if you want to use a different network environment.

TNS-00019: INTCTL: error initializing the national language interface

Cause: The message file could not be found.

Action: Make sure that the ORACLE environment is set and that the message file is in the correct place.

TNS-00020: INTCTL: missing NAVIGATOR_DATA in TNSNAV.ORA

Cause: TNSNAV.ORA does not contain the NAVIGATOR_DATA component.

Action: Define the ADDRESS(es) for the Navigator, then restart the INTCTL program.

TNS-00021: INTCTL: missing INTERCHANGE_DATA in INTCHG.ORA

Cause: INTCHG.ORA does not contain an INTERCHANGE_DATA component.

Action: Define the correct data for the Connection Manager, then restart the INTCTL program.

TNS-00022: INTCTL: missing CMANAGER_NAME in INTCHG.ORA

Cause: INTCHG.ORA does not contain a CMANAGER_NAME component.

Action: Define the correct name for the CMANAGER_NAME, then restart the INTCTL program.

TNS-00023: INTCTL: missing ADDRESS(es) in config files

Cause: Configuration files do not contain an ADDRESS/ADDRESS_LIST component.

Action: Define the Connection Manager ADDRESS(es) in the TNSNET.ORA file and check the Navigator ADDRESS(es) in the TNSNAV.ORA file, then restart the INTCTL program.

TNS-00024: INTCTL: Unable to contact Navigator to obtain Connection Manager address

Cause: The Navigator is not running.

Action: Verify that the Navigator is running by doing a status request on the Navigator (use the Interchange Control Utility command STATUS). If necessary, start the Navigator using the Interchange Control Utility. Verify that the network is properly configured; if the error persists, contact Worldwide Customer Support.

TNS-00025: INTCTL: The ORACLE environment is not set up correctly

Cause: The ORACLE environment is incorrectly set up.

Action: Refer to the Oracle operating system specific documentation for your platform for information on how the ORACLE environment should be set. Correct it and rerun INTCTL. Make sure the ORACLE environment includes the correct directories.

TNS-00026: INTCTL: TNS_ADMIN directory set, and is being used

Cause: The TNS_ADMIN environment variable is set properly. INTCTL will use the TNS_ADMIN directory. This is only an informative message. If you do not want it to be used, and want the default directory to be used instead, then unset TNS_ADMIN and reexecute.

Action: None

TNS-00027: INTCTL: Could not resolve Navigator's name/address

Cause: The Navigator's name to address definition is missing.

Action: Check TNSNAMES.ORA file and make sure to include a definition for the name specified.

TNS-00028: INTCTL: Could not resolve Connection Manager's name/address

Cause: The Connection Manager's name does not have a definition that the Navigator knows about, nor is the name/address available in the TNSNAMES.ORA file. The name may also be incorrect in the INTCHG.ORA file.

Action: Verify that the Connection Manager's name is in the TNSNET.ORA file read by the Navigator or in the TNSNAMES.ORA file. Be sure that INTCHG.ORA is correct.

TNS-00031: INTCTL: internal NT error

Cause: Problem interfacing to the protocol adapters installed.

Action: Normally not visible to the user. Try starting INTCTL again. If the error persists, check the product installation. If it is correct, contact Oracle Customer Support.

TNS-00032: INTCTL: internal NS error

Cause: Problem interfacing with TNS.

Action: Normally not visible to the user. Try starting INTCTL again. If the error persists, check the product installation. If it is correct, contact Oracle Customer Support.

TNS-00033: INTCTL: internal NL error

Cause: Problem with internal TNS module NL.

Action: Normally not visible to the user. Try starting INTCTL again. If the error persists, check the product installation. If it is correct, contact Oracle Customer Support.

TNS-00034: INTCTL: internal NR error

Cause: Problem with internal Interchange routines.

Action: Normally not visible to the user. Try starting INTCTL again. If the error persists, check the product installation. If it is correct, contact Oracle Customer Support.

TNS-00035: INTCTL: error while constructing full file name

Cause: Problem while constructing the full path for a file name because the path name to the file or the environment variables are incorrect. Files looked up include TNSNAMES.ORA, TNSNAV.ORA, INTCHG.ORA and the error files for the Navigator and Connection Manager.

Action: Check that all environment variables are defined correctly and that all configuration files exist in their correct places.

TNS-00036: INTCTL: error reading from Navigator or Connection Manager error files

Cause: Problem while reading from Navigator or Connection Manager error files generated by the Navigator or Connection Manager when they fail to start.

Action: Check that a standard Network Error directory exists and that all privileges on the directory are appropriate.

TNS-00037: INTCTL: error opening Navigator or Connection Manager error files

Cause: Failed to open Navigator or Connection Manager error files when they have failed to start.

Action: Check that a Network Error directory exists and that all privileges on the directory are appropriate.

TNS-00038: INTCTL: Poorly formed address or command string

Cause: An unacceptable string was encountered while attempting to send a message to either the Navigator or Connection Manager. The addresses provided for either the Navigator or Connection Manager may be incorrectly constructed.

Action: Check all address strings in configuration files (TNSNAMES.ORA, TNSNAV.ORA or TNSNET.ORA) and assure that they are properly formed. Regenerate the files, if possible. If all is correct, please contact Worldwide Customer Support.

TNS-00039: INTCTL: error while spawning a process

Cause: An error was encountered while spawning a process due to an internal operating system dependent problem. Machine resources may be limited.

Action: Retry command. Check permissions on Interchange executables and the current setting of the search path. If necessary, terminate other applications to free up machine resources. If the error persists, contact Oracle Customer Support.

TNS-00040: INTCTL: failed to initialize trace context- Continuing anyway

Cause: Problem while opening specified trace file because of errors in INTCHG.ORA or because the user has incorrect privileges, or the file does not exist.

Action: Check the privileges on the configuration files and ensure that all of them exist in their proper locations.

TNS-00041: INTCTL: Navigator already running. Start operation cancelled

Cause: There is a Navigator already running and listening on the same addresses.

Action: None; the Navigator is already running.

TNS-00042: INTCTL: CMANAGER already running. Start operation cancelled

Cause: There is a Connection Manager already running and listening on the same addresses.

Action: None; the Connection Manager is already running.

TNS-00043: The CMANAGER has active connections, do you still want to stop it (y/n)?

Cause: The CMANAGER that is being stopped has active connections going through. This is the confirmation message.

Action: Respond by pressing y or n. Answering y will cause the active database connection to be dropped; this is not generally recommended.

TNS-00044: INTCTL: You must have an INTCHG.ORA file to contact the Connection Manager

Cause: There was an attempt to contact a default Connection Manager (Interchange) where there was no INTCHG.ORA present in the correct directory.

Action: Create an INTCHG.ORA file. Make sure it is placed in the correct directory and includes the correct name for the Connection Manager you wish to contact.

TNS-00045: INTCTL: Could not contact the Navigator on address

Cause: There was an attempt to contact a Navigator on a specific address which is not responding.

Action: Check the TNSNAV.ORA file for that address. Or check that the Navigator is actually listening on that address.

TNS-00046: INTCTL: Could not contact the CMANAGER on address

Cause: There was an attempt to contact a CMANAGER on a specific address which is not responding.

Action: Verify that the TNSNET.ORA file contains that address. Also check that the CMANAGER is actually listening on that address by using the INTCTL STATUS command. If necessary, start the Connection Manager using the INTCTL START command.

TNS-00060: INTCTL: Bad command: only the STATUS command can be used on remote Interchanges

Cause: The user entered a command that does not exist, or the user tried to make a request other than STATUS to a remote Interchange.

Action: Check the MultiProtocol Interchange Administrator's Guide for a list of INTCTL commands or type HELP for a list of valid commands.

TNS-00061: INTCTL: Bad command or syntax error: You must specify a trace level

Cause: The user did not specify a trace level.

Action: Specify a trace level and retry command.

TNS-00062: INTCTL: Bad command or syntax error: For help type help/h/?

Cause: The user entered an invalid command.

Action: Check the MultiProtocol Interchange Administrator's Guide or type HELP for a list of valid commands.

TNS-00063: INTCTL: Failed to allocate memory for buffers

Cause: INTCTL was unable to allocate memory for internal buffers.

Action: Check the amount of available memory on your machine to ensure that there is enough memory to run this executable. If necessary, free up memory by running fewer programs, then try again.

TNS-00064: INTCTL: Failed to find CMANAGER_NAME in INTCHG.ORA

Cause: INTCTL was unable to find the CMANAGER_NAME parameter in INTCHG.ORA.

Action: Check that the INTCHG.ORA file is properly constructed.

TNS-00065: INTCTL: Command cannot be executed remotely

Cause: A command other than status and version has been attempted remotely.

Action: If you desire execute any command other than status and version, you must run intctl on the interchange machine.

TNS-00070: INTCTL usage: [intctl] <command> <process_name> [argument]

Cause: Help message displayed by INTCTL.

Action: None

TNS-00071: where <command> is one of following:

Cause: Help message displayed by INTCTL.

Action: None

TNS-00072: * start - start up process_name

Cause: Help message displayed by INTCTL.

Action: None

TNS-00073: * stop/abort - stop the process_name

Cause: Help message displayed by INTCTL.

Action: None

TNS-00074: * status - get statistics from the process_name

Cause: Help message displayed by INTCTL.

Action: None

TNS-00075: NOTE: the user may get the status info of a remote

Cause: Help message displayed by INTCTL.

Action: None

TNS-00076: component by specifying the component name in

Cause: Help message displayed by INTCTL.

Action: None

TNS-00077: the argument field

Cause: Help message displayed by INTCTL.

Action: None

TNS-00078: * log_on - ask process_name to turn logging on

Cause: Help message displayed by INTCTL.

Action: None

TNS-00079: * log_off - ask process_name to turn logging off

Cause: Help message displayed by INTCTL.

Action: None

TNS-00080: * force_log - ask process_name to dump its state

Cause: Help message displayed by INTCTL.

Action: None

TNS-00081: * trace_on - ask process name to turn tracing on

Cause: Help message displayed by INTCTL.

Action: None

TNS-00082: NOTE: the user MUST specify a trace level

Cause: Help message displayed by INTCTL.

Action: None

TNS-00083: (USER or ADMIN) in the argument field

Cause: Help message displayed by INTCTL.

Action: None

TNS-00084: * trace_off - ask process name to turn tracing off

Cause: Help message displayed by INTCTL.

Action: None

TNS-00085: * reread - ask the process name to reread parameter files

Cause: Help message displayed by INTCTL.

Action: None

TNS-00086: * reload - ask the Navigator to reload TNSNET.ORA

Cause: Help message displayed by INTCTL.

Action: None

TNS-00087: * version - ask the process name to display its version number

Cause: Help message displayed by INTCTL.

Action: None

TNS-00088: * exit - quit the Interchange controller

Cause: Help message displayed by INTCTL.

Action: None

TNS-00089: process_name is one of Interchange, CMANAGER, or Navigator

Cause: Help message displayed by INTCTL.

Action: None

TNS-00090: * Interchange - will ask the Interchange

Cause: Help message displayed by INTCTL.

Action: None

TNS-00091: * Navigator (or navgatr) - will ask the Navigator only

Cause: Help message displayed by INTCTL.

Action: None

TNS-00092: * CMANAGER (or intlsnr) - will ask the Cmanager only

Cause: Help message displayed by INTCTL.

Action: None

TNS-00093: argument is only supplied to either status or trace_on

Cause: Help message displayed by INTCTL.

Action: None

TNS-00094: * to status - argument is considered the remote process_name

Cause: Help message displayed by INTCTL.

Action: None

TNS-00095: * to trace_on - argument is considered the trace level

Cause: Help message displayed by INTCTL.

Action: None

TNS-00100: Unable to allocate memory

Cause: Out of memory on the machine.

Action: Add more memory or run fewer processes.

TNS-00101: File operation error

Cause: Error in accessing reading or writing a particular file.

Action: Check existence of or operating system access to the log and trace file locations.

TNS-00102: Keyword-Value binding operation error

Cause: Not normally visible to the user. May indicate a shortage of memory.

Action: If error persists contact Oracle Customer Support.

TNS-00103: Parameter file load error

Cause: Parameter file process failed.

Action: Check to make sure that all parameter files necessary for the Interchange are present (TNSNAV.ORA, TNSNET.ORA and INTCHG.ORA). If these files are present and properly configured, turn on tracing and repeat the operation. Turn off tracing when the trace is complete. Look in the trace file for errors in the parameter loading process. If error persists contact Oracle Customer Support.

TNS-00104: Data stream open/access error

Cause: Unable to open or access data stream for either log or trace files for the Interchange.

Action: Check read/write permissions on Oracle files and directories.

TNS-00105: Could not initialize tracing

Cause: The INTCHG.ORA file is improperly configured. Verify the trace parameters specified.

Action: If error persists contact Oracle Customer Support.

TNS-00106: Failed to open log file

Cause: Unable to access or obtain write permission to create log file.

Action: Check existence of or access to log file directory.

TNS-00107: Unable to initialize TNS global data

-
- Cause:** Not normally visible to the user.
Action: If error persists contact Oracle Customer Support.
- TNS-00108: TNS_ADMIN not defined**
Cause: TNS_ADMIN pointer is not set.
Action: Set the TNS_ADMIN pointer before running application
- TNS-00109: Message could not be printed; not enough memory**
Cause: Printing of message failed due to lack of memory. Not normally visible to user.
Action: Increase the resources on your machine. If error persists contact Oracle Customer Support.
- TNS-00110: Could not initialize network from file TNSNET.ORA**
Cause: Poorly formed network information in network file.
Action: Fix network configuration data to assure that at least one Interchange is defined in TNSNET.ORA.
- TNS-00111: Failed to get configuration data from file**
Cause: Poorly formed configuration information in network files TNSNET.ORA or TNSNAV.ORA.
Action: Check TNSNET.ORA and TNSNAV.ORA and confirm that they are correct.
- TNS-00112: Failed to find configuration file name**
Cause: Name specified for configuration file was incorrect.
Action: Check for presence of the configuration file.
- TNS-00113: Failed to open error log file**
Cause: Could not open log file during startup of Navigator or Connection Manager due to read or write permission problems or non-existent error directory.
Action: Create the standard error directory or assure that if one is present the Interchange executables can write to it.
- TNS-00114: Internal error- Allocation of addresses not performed**
Cause: Internal error. Should not normally occur.
Action: Contact Oracle Customer Support.
- TNS-00115: Could not allocate pump global buffers**
Cause: Not enough memory to allocate pump buffers.
Action: Decrease the number of PUMP_BUFFERS in INTCHG.ORA.
- TNS-00116: Pump failed during initial bequeath**
Cause: d by insufficient machine resources.
Action: Attempt the connection again. The pump should recover from such a failure. If machine resources appear to be the problem, add more resources // or shut down some active applications. If problem persists, contact Oracle Customer Support.
- TNS-00117: Internal error- No data passed through pump**
Cause: Internal error. Data expected has not arrived yet.
Action: If error persists, contact Oracle Customer Support.

TNS-00119: Missing PUMP_CONNECTIONS in INTCHG.ORA

Cause: No PUMP_CONNECTIONS parameter specified in INTCHG.ORA.

Action: Add PUMP_CONNECTIONS parameter to INTCHG.ORA.

TNS-00120: Missing PUMPS in INTCHG.ORA

Cause: No PUMPS parameter specified.

Action: Add an appropriate number of PUMPS to INTCHG.ORA.

TNS-00121: Missing CMANAGER_NAME in INTCHG.ORA

Cause: No CMANAGER_NAME parameter specified.

Action: Define the CMANAGER_NAME parameter in INTCHG.ORA; it must match the CMANAGER_NAME parameter used in TNSNET.ORA for that Interchange.

TNS-00122: Missing ADDRESS(es) in TNSNET.ORA file

Cause: No ADDRESS or ADDRESS_LIST parameter specified in TNSNET.ORA.

Action: Define a valid set of ADDRESSES for the Connection Manager in the TNSNET.ORA file.

TNS-00123: Unable to perform a listen on configured ADDRESS(es)

Cause: Another process is already listening on this address or the ADDRESS is incorrectly defined.

Action: Check the ADDRESS(es) defined in TNSNET.ORA (for the Connection Manager) for errors. Verify that another program is not using them.

TNS-00124: Internal error - Unable to create empty address

Cause: - Internal error. Should not normally occur.

Action: If problem persists contact Oracle Customer Support.

TNS-00125: Failed to get number of Interchanges in TNSNET.ORA

Cause: Error in the TNSNET.ORA file.

Action: Check the contents of TNSNET.ORA and eliminate errors. Regenerate the configuration files.

TNS-00126: Missing Connection Manager name and address in TNSNET.ORA

Cause: The Interchange name specified in INTCHG.ORA is not defined in the TNSNET.ORA file.

Action: Define one Connection Manager name and set of addresses for each Interchange in the network. Regenerate the configuration files.

TNS-00127: Missing Connection Manager name in TNSNET.ORA

Cause: One or more Connection Manager names are missing.

Action: Ensure that each Connection Manager name is defined in TNSNET.ORA. Regenerate TNSNET.ORA.

TNS-00128: Missing COMMUNITY in TNSNET.ORA

Cause: One or more ADDRESSES does not have a COMMUNITY assigned.

Action: Ensure that all addresses have a COMMUNITY defined in TNSNET.ORA.

TNS-00129: Internal error - Failed to create new community

Cause: Internal Error. Should not normally occur. There may be a resource limitation problem on the machine.

Action: Stop and restart Interchange. If possible, make more memory available on the machine. If problem persists, contact Oracle Customer Support.

TNS-00130: Failed to create Interchange's internal address

Cause: There is an error in one of the addresses listed in TNSNET.ORA.

Action: Check the file for errors in defining Interchanges.

TNS-00131: Missing COMMUNITY in COMMUNITY_COST_LIST in TNSNET.ORA

Cause: A COMMUNITY keyword-value pair is missing within the COMMUNITY_COST_LIST in TNSNET.ORA.

Action: Define the communities with a COMMUNITY name and associated COST in COMMUNITY_COST_LIST.

TNS-00132: COST value must be an integer greater than 0

Cause: A community has been defined in TNSNET.ORA with a COST of 0.

Action: Assign an alternate value that is greater than 0.

TNS-00133: Missing LOCAL_COMMUNITIES field in TNSNAV.ORA

Cause: Improperly configured TNSNAV.ORA file.

Action: Define the LOCAL_COMMUNITIES fields correctly in TNSNAV.ORA.

TNS-00134: Missing COMMUNITY component in addresses for the Navigator in TNSNAV.ORA

Cause: The addresses specified for the Navigator have no COMMUNITY name.

Action: Ensure that all addresses in the NAVIGATOR_ADDRESSES field have a COMMUNITY entry in the TNSNAV.ORA file.

TNS-00135: Missing TNS error message file

Cause: No error message file present.

Action: Ensure that the ORACLE environment is correctly set for your platform and that there is a message directory that contains the correct error message file.

TNS-00136: Did not register product/facility for TNS error message

Cause: Error message file error.

Action: Ensure that the ORACLE environment is correctly set for your platform and that there is a message directory that contains the correct error message file.

TNS-00137: Failed to get TNS error message file entry

Cause: No TNS error message file present.

Action: Ensure that the ORACLE environment is correctly set for your platform and that there is a message directory that contains the correct error message file.

TNS-00138: Failed to find ORACLE executable directory

Cause: The ORACLE environment is not correctly set.

Action: Ensure that the ORACLE environment is correctly set and the error messages file is in the correct place.

TNS-00139: Internal - Data passed from the Interchange listener is poorly formed

Cause: Internal error in Interchange.

Action: Check that you are using compatible components of the Interchange product, using the INTCTL VERSION command. If problem persists call Oracle Customer Support.

TNS-00140: Interchange specified was not found in network tables

Cause: Could not find the Interchange specified in a control request.

Action: Check that the Interchange specified is indeed in TNSNET.ORA.

TNS-00141: Failed to get file stream information

Cause: Error in the file stream package.

Action: None

TNS-00142: Community mismatch in TNSNAV.ORA

Cause: The communities in the LOCAL_COMMUNITIES entry in TNSNAV.ORA do not correspond with all the communities in the NAVIGATOR_ADDRESSES entry.

Action: Assure that all communities in the NAVIGATOR_ADDRESSES correspond to those in the LOCAL_COMMUNITIES component.

TNS-00143: Illegal PREFERRED_CMANGERS entry in TNSNAV.ORA

Cause: PREFERRED_CMANGERS entry in the TNSNAV.ORA used by the Connection Manager. There should only be a PREFERRED_NAVIGATORS entry in the TNSNAV.ORA on an Interchange.

Action: Remove the PREFERRED_CMANGERS entry from TNSNAV.ORA and assure that either no PREFERRED_NAVIGATORS entry is present or that it is correct.

TNS-00144: PUMP_CONNECTIONS value in INTCHG.ORA is too large.

Cause: The number of PUMP_CONNECTIONS specified in INTCHG.ORA is too large to be supported on this platform.

Action: Consult the Oracle operating system specific manual for the maximum value for the number of PUMP_CONNECTIONS.

TNS-00145: PUMPS value in INTCHG.ORA is too large.

Cause: The number of PUMPS specified in INTCHG.ORA is too large to be supported on this platform.

Action: Consult the Oracle operating system specific manual for the maximum value for the number of PUMPS.

TNS-00146: Internal-- Retry data request withing pump.

Cause: The data space provided in order to receive data from the pump is too small.

Action: Operation must be retried with a larger buffer.

TNS-00147: Failed to start a pre-spawned pump.

Cause: The Connection Manager was unable to start a pump during startup.

Action: Check all configuration parameters and assure that they are correct. Turn on tracing to determine the area that the failure occurred in.

TNS-00200: Unable to do nsanswer on context result=*string*

Cause: Requester of service may have aborted or options negotiation failed.

Action: Try making the connection again. If the problem persists call Oracle Customer Support.

TNS-00201: Unable to read answer connection data :*string*:

Cause: Improperly formed connect data sent to the Interchange listener.

Action: If problem persists, check the application using the Interchange (it may be closing down or crashing). Call Oracle Customer Support if the problem cannot be located.

TNS-00202: Failure in redirecting call : Original to *string* Redirect to *string*

Cause: Internal - error could not redirect call to a pump or other Interchange listener. The cause may be insufficient network or machine resources.

Action: Add resources or close some running applications in order to free up resources. If error persists, call Oracle Customer Support.

TNS-00203: Unable to start tracing in intlsnr

Cause: Failure in setting up tracing for Interchange listener.

Action: Check file permissions in Network trace directory also check to make sure that if trace file names and directories are specified in INTCHG.ORA, they are correct.

TNS-00204: Started tracing in intlsnr

Cause: Internal message- Successfully started tracing information.

Action: None

TNS-00205: Turning off tracing in intlsnr

Cause: Internal message - Turned off tracing in the Interchange listener.

Action: None

TNS-00206: Status Information for Interchange *string*:

Cause: Message sent back by Interchange as header for status request.

Action: None

TNS-00207: Uptime : *number days number hr. number min. number sec*

Cause: Part of status request.

Action: None

TNS-00208: Logging : *string*

Cause: Part of status request.

Action: None

TNS-00209: Tracing : *string*

Cause: Part of status request Interchange.

Action: None

TNS-00210: Total Pumps Available : *number*

Cause: Part of status request for Connection Manager.

Action: None

TNS-00211: Total Active Pumps : *number*

Cause: Part of status request for Connection Manager.

Action: None

TNS-00212: Total Pumps Started : *number*

Cause: Part of status request for Connection Manager.

Action: None

TNS-00213: Available Connections : *number*

Cause: Part of status request for Connection Manager.

Action: None

TNS-00214: Total Connections in Use : *number*

Cause: Part of status request for Connection Manager.

Action: None

TNS-00215: Total Successful Connections : *number*

Cause: Part of status request for Connection Manager.

Action: None

TNS-00216: Total Failed Connections : *number*

Cause: Part of status request for Connection Manager.

Action: None

TNS-00217: Total Bytes of Data : *number*

Cause: Part of status request for Connection Manager.

Action: None

TNS-00218: Current Bytes/Sec. : *number*

Cause: Part of status request for Connection Manager.

Action: None

TNS-00219: Pump Strategy : *string*

Cause: Part of status request.

Action: None

TNS-00220: Pump Breakdown -----

Cause: Part of status request.

Action: None

TNS-00221: Pump Connections Total Data Bytes/Second

Cause: Part of status request.

Action: None

TNS-00222: -----

Cause: Part of status request.

Action: None

TNS-00223: *numbernumbernumbernumber*

Cause: Part of status request.

Action: None

TNS-00224: No more connections available

Cause: More connections were made to the Interchange than are configured in INTCHG.ORA.

Action: Wait until the Interchange is not as busy or change the number of connections allowed in INTCHG.ORA and restart the Interchange.

TNS-00225: Unable to bequeath connection to pump

Cause: Unable to start a pump because either the executable cannot be found or too many processes are currently running on a particular machine.

Action: Reduce the number of processes on the machine or increase the resources on the machine.

TNS-00226: Unable to contact pump *number* to send broadcast message *string*

Cause: Could not call a particular pump.

Action: None, but if the problem persists call Oracle Customer Support.

TNS-00227: Unable to contact pump; Connection Manager declared pump dead

Cause: A pump became an orphaned process. A protocol adapter is not working properly or machine network resources are being over used.

Action: This error is not immediately fatal; the orphaned pump may continue to function. Restart the Interchange when convenient. If the problem persists, call Oracle Customer Support.

TNS-00228: Failure in finding pump data

Cause: Internal problem with data passed back from pump.

Action: None

TNS-00229: Error in call: unable to deliver message *:string: string string string*

Cause: Destination for call is unavailable.

Action: None

TNS-00230: Cannot start new pump process: *string string* Protocol Adapter errors:*number*

Cause: Unable to create a new process; possibly there are too many processes on the machine.

Action: Free machine resources by exiting other applications on the Interchange machine. If the problem continues you may need more memory on the machine. If you believe there are sufficient resources on the machine but the problem persists, contact Oracle Customer Support.

TNS-00231: Pump is alive

Cause: Pump log message sent to Interchange listener.

Action: None

TNS-00232: Unable to setup connection

Cause: Error log message sent from pump to indicate failure in initiating connection because of errors in the call string: network problem or resource limitations.

Action: None

TNS-00233: Interchange failed to make contact with destination with errors: *string string string*

Cause: Pump call to destination failed.

Action: Check destination.

TNS-00234: Connect data for failed call: CALL DATA = *string* RECEIVE DATA = *string*:

Cause: Connect data supplied for error 00233.

Action: None

TNS-00235: Aborting connection: Protocol Apapter errors: *string;number,number string;number,number*

Cause: Pump aborting connection because connection has been up too long, or some other network error on the connection.

Action: None

TNS-00236: Failed to initialize tracing

Cause: Pump failed to initialize tracing.

Action: Check that INTCHG.ORA is properly configured.

TNS-00237: Failed to refuse connection

Cause: Connection may have aborted before error took place in Pump.

Action: None

TNS-00238: Pump *number* @: *string*:

Cause: Prepend message to all pump log messages.

Action: None

TNS-00239: Connection Manager has been stopped

Cause: Message sent back to control program from Interchange.

Action: None

TNS-00240: Connection Manager: Logging is now ON

Cause: Message sent back to control program from Interchange.

Action: None

TNS-00241: Connection Manager: Logging is now OFF

Cause: Message sent back to control program from Interchange.

Action: None

TNS-00242: Connection Manager: Tracing is now ON

Cause: Message sent back to control program from Interchange.

Action: None

TNS-00243: Connection Manager: Tracing is now OFF

Cause: Message sent back to control program from Interchange.

Action: None

TNS-00244: Connection Manager: Request Failed

Cause: Message sent back to control program from Interchange.

Action: None

TNS-00245: Connection Manager: Failed to open log file

Cause: Message sent back to control program from Interchange.

Action: None

TNS-00246: Connection Manager: Failed to start tracing

Cause: Message sent back to control program from Interchange.

Action: None

TNS-00247: Unable to allocate memory for configuration data from TNSNET.ORA file

Cause: Navigator failed to allocate enough memory for TNSNET.ORA configuration file.

Action: Increase machine resources available for running the Interchange or remove some other running applications from the machine.

TNS-00248: Unable to get information from file *:string*: Exiting with NR error:*number*

Cause: TNSNAV.ORA poorly configured or addresses provided are already being used by another application.

Action: Check the syntax of the TNSNAV.ORA file; if necessary, assign new addresses.

TNS-00249: Unable to read network configuration data from file *string* with error: *string*

Cause: Network configuration file TNSNET.ORA is missing or poorly configured.

Action: Check to make sure that TNSNET.ORA is properly configured.

TNS-00250: Navigator has been started

Cause: Message to log file on Navigator startup.

Action: None

TNS-00251: Failure in nstest:

Cause: NS test operation failed due to internal error.

Action: If the problem persists there may be a network problem or resource limitations on the machine. If these do not seem to be causing the problem, call Oracle Customer Support.

TNS-00252: Unable to handle route request: *string*

Cause: Command requested did not exist.

Action: None

TNS-00253: Error in reading network configuration data from file *string* with error *string*

Cause: TNSNET.ORA is poorly configured or nonexistent.

Action: Check to make sure that TNSNET.ORA is properly configured.

TNS-00254: Navigator has been stopped

Cause: Message sent to Interchange control program by Navigator confirming it has been stopped.

Action: None

TNS-00255: Closing down log, stopping Navigator

Cause: Log message when Navigator is stopped.

Action: None

TNS-00256: Status of Navigator:

-
- Cause:** Navigator status message component
Action: None
- TNS-00257: Number of Successful Requests : *number***
Cause: Navigator status message component
Action: None
- TNS-00258: Number of Failed Requests : *number***
Cause: Navigator status message component
Action: None
- TNS-00259: Disabled Interchange list:**
Cause: Navigator status message component
Action: None
- TNS-00260: -----**
Cause: Navigator status message component
Action: None
- TNS-00261: Interchange Name Community Link Down Time Remaining (secs)**
Cause: Navigator status message component
Action: None
- TNS-00262: *stringstringnumber***
Cause: Navigator status message component
Action: None
- TNS-00263: Navigator: Request Failed**
Cause: Response from Navigator when a particular request failed.
Action: None
- TNS-00264: Navigator: Failed to reload configuration data**
Cause: Message sent to the Interchange control program when reload of network configuration failed. TNSNET.ORA Poorly configured or missing.
Action: None
- TNS-00265: Navigator: Reloaded network configuration data**
Cause: Message sent to Interchange control program when reload of network is successful.
Action: None
- TNS-00266: Navigator: Unknown Request**
Cause: Request was made to Navigator that it knows nothing about.
Action: None
- TNS-00267: Navigator: Internal Error**
Cause: Generated when a request was made to the Navigator it knows nothing about.
Action: None
- TNS-00268: ON**

Cause: On component of message.
Action: None

TNS-00269: OFF
Cause: Off component of message.
Action: None

TNS-00270: *string*: Terminal Error *string*
Cause: Message put out in error file of executable when it fails to start.
Action: None

TNS-00271: Connection Manager
Cause: Name of the Connection Manager.
Action: None

TNS-00272: Navigator
Cause: Name for the Navigator.
Action: None

TNS-00273: Navigator: Logging is now ON
Cause: Message sent back to control program from Navigator.

Cause: Log entry for request to Navigator.
Action: None
- TNS-00300: ***Disabling Interchange : *string***
Cause: Log entry for disabling a particular Interchange.
Action: None
- TNS-00301: ***Enabling Interchange : *string***
Cause: Log entry for disabling a particular Interchange.
Action: None
- TNS-00302: Connection Manager: Unknown Request**
Cause: Request sent by Interchange control program is unknown.
Action: None
- TNS-00303: Connection Manager: Reread parameter data**
Cause: Request sent by control manager to control programming indicating that parameter data was read.
Action: None
- TNS-00304: Status Information for Connection Manager:**
Cause: Message sent back by Interchange as header for status request.
Action: None
- TNS-00305: The Navigator encountered an invalid/unknown trace level**

Cause: Message sent back by the Navigator indicating an invalid trace level.

Action: Reattempt the request with a correct trace level.

TNS-00306: Connection Manager encountered an invalid/unknown trace level

Cause: Message sent back by the Connection Manager indicating an invalid trace level.

Action: Reattempt the request with a correct trace level.

TNS-00307: Navigator: Reread parameter data

Cause: Request sent by the Navigator to control program indicating that parameter data was read.

Action: None

TNS-00308: Navigator: Failed to open log while rereading parameter data

Cause: Request sent by the Navigator to control program indicating that it could not reopen log file after rereading parameter data.

Action: None

TNS-00309: Connection Manager: Failed to open log while re-reading parameter data

Cause: Request sent by the Connection Manager to control program indicating that it could not reopen log file after rereading parameter data.

Action: None

TNS-00310: Navigator: Failed to start tracing after rereading parameter data

Cause: Message sent back to control program from Navigator.

Action: None

TNS-00311: Connection Manager: Failed to start tracing after rereading parameter data

Cause: Message sent back to control program from Connection Manager.

Action: None

TNS-00312: Connection Manager: Failed to get version information

Cause: Message sent back to control program from Connection Manager.

Action: None

TNS-00313: Navigator: Failed to get version information

Cause: Message sent back to control program from Connection Manager.

Action: None

TNS-00314: Protocol Adapter Errors: *number,number*

Cause: Protocol Adapter errors which go with message 233

Action: None

TNS-00315: Failed to allocate larger connect data area for getting pump data: *number*

Cause: Could not allocate a large enough area to get pump statistics; continue without them.

Action: None

TNS-00316: Ran out of data buffers in the pump

Cause: The Interchange is resource limited by having too few data buffers in the pump.

Action: If the problem persists (that is, there are a lot of log messages), increase the number of pump buffers by increasing the value of the parameter PUMP_BUFFERS in INTCHG.ORA. Then shutdown and restart the Interchange to make the changes take effect.

TNS-00317: Failed to contact Connection Manager

Cause: Connection Manager is not running.

Action: Start the Connection Manager and retry

TNS-00501: Cannot allocate memory

Cause: Sufficient memory could not be allocated to perform the desired activity.

Action: Either free some resource for TNS or add more memory to the machine. For further details, turn on tracing and reexecute the operation.

TNS-00502: Invalid argument

Cause: An internal function received an invalid parameter.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00503: Illegal ADDRESS parameters

Cause: An illegal set of protocol adapter parameters was specified.

Action: Check the parameters within the ADDRESS section of the TNSNAMES.ORA file. It may be helpful to turn on tracing and look at the addresses specified in the trace file, checking for spelling or other errors. Be sure to turn tracing off when the trace is complete.

TNS-00504: Operation not supported

Cause: An internal function received a request to perform an operation that is not supported (on this machine).

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00505: Operation timed out

Cause: The requested operation could not be completed within the timeout period.

Action: For further details, turn on tracing and reexecute the operation.

TNS-00506: Operation would block

Cause: An internal operation did not commence because to do so would block the current process and the user has requested that operations be non-blocking.

Action: None needed; this is an information message.

TNS-00507: Connection closed

Cause: Normal "end of file" condition has been reached; partner has disconnected.

Action: None needed; this is an information message.

TNS-00508: No such protocol adapter

Cause: The protocol adapter requested for this connection does not exist.

Action: Install the protocol adapter or use one that is available. Be sure that the correct protocols are listed in the configuration files.

TNS-00509: Buffer overflow

Cause: Too much data for buffer.

Action: Reexecute with larger receive buffer or smaller send buffer.

TNS-00510: Internal limit restriction exceeded

Cause: Too many files or sockets open simultaneously (or some other resource has been depleted).

Action: For further details, trace the operation for protocol details.

TNS-00511: No listener

Cause: The connect request could not be completed because no application is listening on the address specified, or the application is unable to service the connect request in a sufficiently timely manner.

Action: Ensure that the supplied destination address matches one of the addresses used by the listener - compare the TNSNAMES.ORA entry with appropriate LISTENER.ORA file (or TNSNAV.ORA if the connection is to go by way of an Interchange. Start the listener on the remote machine.

TNS-00512: Address already in use

Cause: Specified listener address is already being used.

Action: Start your listener with an unused address.

TNS-00513: Destination host unreachable

Cause: Contact cannot be made with remote party.

Action: Make sure the network driver is functioning and the network is up.

TNS-00514: Contexts have different wait/test functions

Cause: Two protocol adapters have conflicting wait/test functions.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00515: Connect failed because target host or object does not exist

Cause: The address specified is not valid, or the program being connected to does not exist.

Action: Ensure the ADDRESS parameters have been entered correctly; the most likely incorrect parameter is the node name. Ensure that the executable for the server exists (perhaps "oracle" is missing.)

TNS-00516: Permission denied

Cause: User has insufficient privileges to perform the requested operation.

Action: Acquire necessary privileges and try again.

TNS-00517: Lost contact

Cause: Partner has unexpectedly gone away.

Action: Investigate partner application for abnormal termination.

TNS-00518: Incomplete read or write

Cause: A data send or receive failed.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00519: Operating system resource quota exceeded

Cause: The current user has exceeded the allotted resource assigned in the operating system.

Action: Acquire more operating system resource, or perform a different function.

TNS-00520: Syntax error

Cause: The supplied connect descriptor contains illegal syntax.

Action: Check the syntax of the connect descriptor for correct syntax.

TNS-00521: Missing keyword

Cause: The supplied connect descriptor is missing one or more TNS keywords.

Action: Check the syntax, and ensure all required keywords are present.

TNS-00522: Operation was interrupted

Cause: An internal operation was interrupted and could not complete.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00523: Previous operation was busy

Cause: Operation tried could not be successfully completed because the requested resource was busy.

Action: Attempt the operation again. If error persists, contact Oracle Customer Support.

TNS-00524: Current operation is still in progress

Cause: Internal operation is still in progress but will complete.

Action: None; wait for operation to complete.

TNS-00525: Insufficient privilege for operation

Cause: Operating system failed to complete operation because user lacked sufficient privileges.

Action: Check your platform-specific privileges.

TNS-00526: No caller (false async event)

Cause: Internal error.

Action: For further details, turn on tracing and reexecute the operation.

TNS-00527: Protocol Adapter not loadable

Cause: On some platforms (for example OS/2) protocol adapters are loaded at run-time. If the shared library (or DLL) for the protocol adapter is missing or one of its supporting libraries is missing, then this error is returned.

Action: For further details, turn on tracing and reexecute the operation. The trace file will have the name of the shared library (or DLL) that could not be loaded.

TNS-00528: Protocol Adapter not loaded

Cause: On some platforms (for example OS/2) protocol adapters are loaded at run-time. If the shared library (or DLL) for the protocol adapter has not been loaded, then this error is returned.

Action: For further details, turn on tracing and reexecute the operation. The trace file will have the name of the shared library (or DLL) that has not been loaded.

TNS-00530: Protocol adapter error

Cause: A generic protocol adapter error occurred.

Action: For further details, turn on tracing and reexecute the operation.

TNS-00532: No previous async operation to wait on

Cause: Internal protocol adapter error.

Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00533: Connection dissolved or not yet made

Cause: Internal protocol adapter error.

Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00534: Failed to grant connection ownership to child

Cause: Internal protocol adapter error.

Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00535: Failed to send or receive disconnect message

Cause: Internal protocol adapter error.

Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00536: Connection entered inappropriate state

Cause: Internal protocol adapter error.

Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00537: Index into protocol adapter table is out of legal range

Cause: Internal protocol adapter error.

Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-00539: Network or Protocol services are down

Cause: The Network services on or from your node are not running or have stopped running.

Action: Restart your network or protocol services on this platform. If error persists, contact Oracle Customer Support.

TNS-00540: SSL protocol adapter failure

Cause: The SSL protocol adapter encountered an error.

Action: In most cases, this error should only be pair with a more meaningful ORA- error.

TNS-00541: underlying transport does not exist.

Cause: The SSL protocol adapter was unable to locate an adapter for the protocol that it is going to use as the data transport.

Action: In most cases, the underlying transport is TCP. Make sure that the Oracle Net TCP/IP adapter was installed.

TNS-00542: SSL Handshake failed

Cause: The SSL protocol adapter was unable to connect to another process.

Action: This error can be caused by a variety of problems including the termination of the peer process. Enable Oracle Net tracing and attempt the connection again. The trace file should give some clues as to what the exact problem is.

TNS-00543: internal error

Cause: The SSL protocol adapter encountered an unexpected error.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

TNS-00544: unsupported operation

Cause: The SSL adapter could not perform a given command.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

TNS-00545: parameter retrieval failure

Cause: The SSL protocol adapter was not able to retrieve a configuration parameter for some reason.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

TNS-00546: control failure

Cause: The SSL protocol adapter was unable to perform a command.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

TNS-00547: user information retrieval failed

Cause: The SSL protocol adapter was unable to retrieve information about the remote user.

Action: Examine the first error in the error stack. It should describe the error in more detail.

TNS-00548: value specified for client authentication parameter is not boolean

Cause: The value specified for the parameter that specifies that SSL client authentication is to be used was not boolean.

Action: Specify a correct value for the parameter.

TNS-00549: value specified for the SSL version is not valid

Cause: The value specified for the SSL version is not valid.

Action: Specify a valid value for the SSL version.

TNS-00550: disconnection error

Cause: The SSL protocol adapter encountered an error when the underlying transport disconnected.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

TNS-00551: underlying transport connection failed

Cause: The underlying transport adapter used by the SSL adapter failed to connect.

Action: Enable Oracle Net tracing and try the connection again. If the connection fails, examine the trace file to determine the cause.

TNS-00552: no valid cipher suites were specified

Cause: SSL cipher specs were specified, but none were valid.

Action: Specify correct cipher suites.

TNS-00553: read failed

Cause: The SSL adapter failed to read data from its connection.

Action: Examine the contents of sqlnet.log for more information. Enable Oracle Net tracing and try the connection again. If the connection fails, examine the trace file to determine the cause.

TNS-00554: write failed

Cause: The SSL adapter failed to send data over its connection.

Action: Examine the contents of sqlnet.log for more information. Enable Oracle Net tracing and try the connection again. If the connection fails, examine the trace file to determine the cause.

TNS-00555: no directory specified for wallet resource locator

Cause: It was specified that a file was to be used from which to retrieve a wallet, but no directory was specified for the wallet.

Action: Specify the directory where the wallet is located.

TNS-00556: no method specified for wallet retrieval

Cause: A wallet resource locator was specified, but no method was given for the retrieval of the wallet.

Action: Specify the method by which the method is to be retrieved.

TNS-00557: unsupported wallet retrieval method

Cause: The method specified for wallet retrieval is not supported. Currently, only files are supported for wallet retrieval.

Action: Specify "FILE" as the wallet retrieval method.

TNS-00558: Entrust login failed

Cause: Entrust failed to authenticate the username, password, and/or profile name that was presented.

Action: Specify correct values for the username, password or profile name. If no data was prompted for, contact Oracle support.

TNS-00559: load of Entrust certificate failed

Cause: An error occurred while attempting to validate the provided Entrust certificate.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

TNS-00560: extraction of name from Entrust certificate failed

Cause: An error occurred while attempting to extract a name from an Entrust certificate.

Action: This error is not normally visible to users. Enable Oracle Net tracing and attempt to reproduce the error. If it occurs, contact Oracle customer support.

TNS-00580: Read failed due to closed or invalid transport connection

Cause: Read attempt was made on a transport connection which was previously terminated or is somehow deemed to be invalid.

Action: Indicates a substantial transport level failure. Check the O/S configuration for the particular transport or contact the transport provider. For further details, turn on tracing and reexecute the operation.

TNS-00581: Send failed due to timeout

Cause: The send operation did not complete within the allowed time interval.

Action: Error is informational. Note, repeated receipt of this error could indicate an attempted Denial-Of-Service attack. Also, if the receipt of this error interferes w/ a customer's normal operations, the customer may wish to lengthen the timeout.

TNS-00582: Receive failed due to timeout

Cause: The receive operation did not complete within the allowed time interval.

Action: Error is informational. Note, repeated receipt of this error could indicate an attempted Denial-Of-Service attack. Also, if the receipt of this error interferes w/ a customer's normal operations, the customer may wish to lengthen the timeout.

TNS-00583: Valid node checking: unable to parse configuration parameters

Cause: Valid node checking was unable to parse the configuration due to syntactical errors.

Action: Ensure that the configuration syntax matches the Oracle reference manual documented syntax. For further details, turn on tracing and reexecute the operation.

TNS-00584: Valid node checking configuration error

Cause: Valid node checking specific Oracle Net configuration is invalid.

Action: Ensure the hosts specified in the "invited_nodes" and "excluded_nodes" are valid. For further details, turn on tracing and reexecute the operation.

TNS-01000: spawn [<listener_name>] <spawn_alias> [<(ARGUMENTS='arg0, arg1,...')>]

Cause: Control program usage message.

Action: None

TNS-01001: start [<listener_name>] : start listener

Cause: Control program usage message.

Action: None

TNS-01002: stop [<listener_name>] : stop listener

Cause: Control program usage message.

Action: None

TNS-01003: status [<listener_name>] : get the status of listener

Cause: Control program usage message.

Action: None

TNS-01004: reload [<listener_name>] : reload the parameter files and SIDs

Cause: Control program usage message.

Action: None

TNS-01005: trace OFF | USER | ADMIN | SUPPORT [<listener_name>]: set tracing to the specified level
Cause: Control program usage message.
Action: None

TNS-01006: set password : set the password for subsequent calls
Cause: Control program usage message.
Action: None

TNS-01007: quit | exit : exit LSNRCTL
Cause: Control program usage message.
Action: None

TNS-01008: version [<listener_name>]: get the version information of the listener
Cause: Control program usage message.
Action: None

TNS-01009: service [<listener_name>]: get the service information of the listener
Cause: Control program usage message.
Action: None

TNS-01013: set | show trc_{} [<value>]: set | show trace parameters of current listener
Cause: Control program usage message.
Action: None

TNS-01014: set | show log_{} [<value>]: set | show log parameters of current listener
Cause: Control program usage message.
Action: None

TNS-01015: set | show parm_name [<value>]: sets | shows current listener parm values
Cause: Control program usage message.
Action: None

TNS-01016: change_password [<listener_name>]: changes the password of the listener
Cause: Control program usage message.
Action: None

TNS-01017: set | show current_listener [<listener_name>]: sets | shows current listener
Cause: Control program usage message.
Action: None

TNS-01018: save_config [<listener_name>]: saves configuration changes to parameter file
Cause: Control program usage message.
Action: None

TNS-01019: set rawmode ON | OFF: set output mode for services and status commands

Cause: Control program usage message.
Action: None

TNS-01099: *string * string * string * string * number*

Cause: Listener logging message.

Action: None

TNS-01100: TNS returned error *number* when attempting to start the listener

Cause: Caused by the fact that the TNSLSNR executable cannot be found in the place expected in your platform's ORACLE environment. Verify that the full pathname of the TNSLSNR executable as displayed by LSNRCTL is correct.

Action: If NS error code 12538 is also returned then the BEQ driver is not installed; call Oracle Worldwide Support as the BEQ driver should always be installed. If this is not the problem then the error is probably

TNS-01101: Could not find service name *string*

Cause: The service name could not be resolved by name-lookup.

Action: Verify that the listener name or service name specified to LSNRCTL has the correct name and address defined in LISTENER.ORA or in TNSNAMES.ORA.

TNS-01102: TNS application contacted was not the listener

Cause: Another TNS application such as the Interchange was listening at the address contacted. There may be another TNS application listening at the address contacted and the data returned is not in the appropriate format.

Action: Verify that the listener name or service name specified to LSNRCTL has the correct name and address defined in LISTENER.ORA or in TNSNAMES.ORA.

TNS-01103: Protocol specific component of the address is incorrectly specified

Cause: The ADDRESS used to contact the listener is not correctly specified. This error occurs because the address fails to specify the destination of the listener. The address is well formed (for example, there are no missing parentheses) but it is missing a protocol specific component. For example, this is the error returned when the HOST component is missing from a TCP/IP address string.

Action: Edit the ADDRESS in LISTENER.ORA to include the required protocol-specific keywords. For more information about the keywords required by different protocol adapters, see the Oracle operating system specific documentation for your platform.

TNS-01106: Listener using listener name *string* has already been started

Cause: Another listener is already listening on one of the ADDRESSES specified.

Action: Shutdown the previous listener specified by the listener name before starting this one.

TNS-01107: A valid trace level was not specified

Cause: Failed to specify a valid trace level for the LSNRCTL trace command.

Action: Specify one of OFF, USER, ADMIN, or SUPPORT. Type "LSNRCTL help trace" for more information or consult Chapter 2 of this manual for an introduction to the concepts of tracing.

TNS-01108: Listener password prompt failed

Cause: Password not entered via tty

Action: Enter the listener password on a tty device

TNS-01109: Listener password encryption failed

Cause: Possibly garbled password entered

Action: Re-enter the listener password, using valid ASCII characters. If problem persists, contact Oracle Customer Support.

TNS-01110: Mismatch - password unchanged

Cause: New password and reentered new password are different"

Action: Re-enter the listener password, make sure that New password and reentered new password are the same

TNS-01111: Log status can either be ON or OFF

Cause: Failed to specify a log status value for the LSNRCTL log_status command.

Action: Specify one of ON or OFF. Type "LSNRCTL help set log_status" for more information or consult Chapter 2 of this manual for an introduction to the concepts of logging.

TNS-01112: Plug and play can either be ON or OFF

Cause: Failed to specify a valid value for the LSNRCTL use_plugandplay command.

Action: Specify one of ON or OFF. Type "LSNRCTL help set use_plugandplay" for more information.

TNS-01113: save_config_on_stop can either be ON or OFF

Cause: Failed to specify a valid value for the LSNRCTL save_config_on_stop command.

Action: Specify one of ON or OFF. Type "LSNRCTL help set save_config_on_stop" for more information.

TNS-01114: LSNRCTL could not perform local OS authentication with the listener

Cause: LSNRCTL failed to obtain system resources (heap memory, or shared memory) needed to perform local OS authentication with the listener.

Action: Make sure that system resources like shared memory and heap memory are available for LSNRCTL tool to execute properly.

TNS-01115: OS error *string* creating shared memory segment of *string* bytes with key *string*

Cause: The shared memory segment could not be created as requested. For example, a segment with the provided key may already exist, or the size may be outside of system allowed range.

Action: Use the error code to determine the exact cause of the problem. In certain cases the problem may be resolved by adjusting the system-imposed limits such as the maximum number of allowed shared memory segments, or their maximum and minimum sizes. In other cases, resources need to be freed up first for the operation to succeed.

TNS-01116: Listener alias name given as connect identifier is too long

Cause: The listener alias name you were attempting to resolve was too long.

Action: The maximum length of a listener alias name is 255 bytes; this limit has been exceeded. Use a smaller listener alias name.

TNS-01150: The address of the specified listener name is incorrect

Cause: The address on which the listener attempted to listen contains a syntax error.

Action: For the listener name or service name specified to LSNRCTL, check that the address or connect descriptor is well-formed. You can find the listener name in LISTENER.ORA, or you can access the listener through the service name is TNSNAMES.ORA.

TNS-01151: Missing listener name, *string*, in LISTENER.ORA

Cause: The listener could not find the listener name specified.

Action: Make sure valid addresses on which to listen are specified for the listener name in LISTENER.ORA.

TNS-01152: All addresses specified for the listener name, *string*, failed

Cause: The listener failed to listen on any of the specified addresses.

Action: Make sure that another application is not listening on the addresses specified or check that the appropriate protocol adapters are installed. Turn on tracing and execute again for more information.

TNS-01153: Failed to process string: *string*

Cause: The string specified is not well-formed.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-01154: SID detected in old format that is no longer supported

Cause: One of the SIDs was specified in an obsolete format.

Action: Check LISTENER.ORA for a line of the form: <sid> = (SID=(ORACLE_HOME=<oracle_home>)) OR <sid> = (SID_DESC=(ORACLE_HOME=<oracle_home>)) The above format is no longer supported and SID_LIST_<listener_name> format described in the Oracle9i Net Services Reference Guide should be used. For example, SID_LIST_LISTENER = (SID_LIST=(SID_DESC=(SID_NAME=<sid>)(ORACLE_HOME=<oracle_home>)))

TNS-01155: Incorrectly specified SID_LIST_<string> parameter in LISTENER.ORA

Cause: SID_LIST_<listener_name> in LISTENER.ORA has an error in it.

Action: Be sure this parameter is specified as described in the Oracle9i Net Services Reference Guide. For example, SID_LIST_LISTENER = (SID_LIST=(SID_DESC=(SID_NAME=<sid>)(ORACLE_HOME=<oracle_home>)))

TNS-01156: Missing or inappropriate PROTOCOL, TIMEOUT or POOL_SIZE parameter from PRESPAWN_DESC

Cause: PRESPAWN_DESC in each SID_DESC does not have required fields.

Action: Be sure the parameters required for PRESPAWN_DESC are specified in each SID_DESC. For example, SID_LIST_LISTENER = (SID_LIST=(SID_DESC=(SID_NAME=<sid>)(PRESPAWN_MAX=5)(ORACLE_HOME=<oracle_home>)(PRESPAWN_DESC=(PROTOCOL=tcp)(POOL_

SIZE=10)(TIMEOUT=30)))) Add or correct these parameters in the LISTENER.ORA file

TNS-01157: Can only listen on *number* addresses - ignoring *string*

Cause: Too many addresses were given to listen on.

Action: Reduce the number of addresses to listen on and use another listener to listen on the remaining addresses.

TNS-01158: Internal connection limit reached, preventing dispatcher from connecting

Cause: The internal Oracle Net connection list is full. Too many dispatchers are connected to the listener; therefore, no more dispatchers are allowed to connect.

Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-01159: Internal connection limit has been reached; listener has shut down

Cause: The internal Oracle Net connection list is full. The listener is configured to use too many Oracle Net connections.

Action: Reduce the number of listen addresses or services connected to the listener. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-01160: Trace level was not specified

Cause: Failed to specify a trace level for the trace command.

Action: Specify one of OFF, USER, ADMIN, or SUPPORT. Users should not see this error if LSNRCTL is being used.

TNS-01161: Spawn alias *string* was not found. Check listener parameter file

Cause: The alias specified to spawn a program was not found in LISTENER.ORA.

Action: This is not seen in normal use of Oracle Net.

TNS-01162: Syntax error in the address resolved from the spawn alias: *string*

Cause: The alias specified to spawn a program was not a valid NVstring.

Action: This is not seen in normal use of Oracle Net.

TNS-01163: Failed to spawn process: *string*

Cause: The process failed to start correctly.

Action: This is not seen in normal use of Oracle Net.

TNS-01164: No spawn alias sent to listener

Cause: The spawn command was issued without an alias.

Action: This is not seen in normal use of Oracle Net.

TNS-01165: Spawn alias has no program name set in it

Cause: The spawn alias in LISTENER.ORA is incorrectly specified.

Action: This is not seen in normal use of Oracle Net.

TNS-01167: The command *string* is not supported by the listener contacted

Cause: The listener does not recognize the command.

Action: This is caused when a newer version of LSNRCTL contacts an old listener. Upgrade listener if executing this command is important.

TNS-01168: Cannot allocate memory

Cause: Sufficient memory could not be allocated to perform the desired activity.

Action: Either free some resource for TNS, or add more memory to the machine. For further details, turn on tracing and reexecute the operation.

TNS-01169: The listener has not recognized the password

Cause: The listener has the password security mechanism enabled and requires the correct password to execute any command other than VERSION. The user attempted to issue one of the privileged administrative commands, but could not be successfully authenticated with the password provided.

Action: If an authorized user is attempting the command, then use the SET PASSWORD command at the LSNRCTL prompt with the listener password. If you do not know the password, then you are trying to execute an inappropriate command.

TNS-01170: Event detection broke for address: *string*

Cause: The event detection mechanism for the address specified returned an error.

Action: Future attempts to detect events on this address will fail. The listener will deallocate the listen address and connections will no longer be accepted for this address. This error is not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-01171: Event detection broke for dispatcher: *string*

Cause: The event detection mechanism for the dispatcher specified returned an error.

Action: Future attempts to detect events on this dispatcher will fail. The listener will deallocate the dispatcher and connections will no longer be redirected to this dispatcher. This error is not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-01172: Listener has shut down since all listen addresses have been deallocated

Cause: The event detection mechanism broke and caused all listen addresses to be removed.

Action: Error 1170 has occurred and caused all the listen addresses to be deallocated. Since all the listen addresses have been removed, no more connections can be established to this listener so it shuts itself down. This error is not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-01173: Missing or inappropriate PRESPAWN_MAX parameter from SID_DESC

Cause: PRESPAWN_MAX in each SID_DESC does not have required fields.

Action: Be sure the parameters required for PRESPAWN_DESC are specified in each SID_DESC. For example, SID_LIST_LISTENER = (SID_LIST=(SID_DESC=(SID_NAME=<sid>)(PRESPAWN_MAX=15)(ORACLE_HOME=<oracle_home>)(PRESPAWN_DESC=(PROTOCOL=tcp)(POOL_SIZE=10)(TIMEOUT=30)))) Add or correct these parameters in the LISTENER.ORA file

TNS-01174: The sum of the POOL_SIZES from each PRESPAWN_DESC is greater than the PRESPAWN_MAX

Cause: The minimum value for PRESPAWN_MAX should be the sum of the POOL_SIZES.

Action: Be sure the parameters required for PRESPAWN_DESC are specified in each SID_DESC. For example, SID_LIST_LISTENER = (SID_LIST=(SID_DESC=(SID_NAME=<sid>)(PRESPAWN_MAX=15)(ORACLE_HOME=<oracle_home>)(PRESPAWN_DESC=(PROTOCOL=tcp)(POOL_SIZE=10)(TIMEOUT=30))(PRESPAWN_DESC=(PROTOCOL=ipc)(POOL_SIZE=5)(TIMEOUT=15)))) Add or correct these parameters in the LISTENER.ORA file

TNS-01175: Password unchanged

Cause: Unable to set the new password

Action: Be sure to see that the new password has legal ASCII characters. Try to set the password again.

TNS-01176: Error in loading the new parameter value

Cause: Illegal values given for the parameters

Action: Make sure that the parameter values are valid refer to the manual for the legal values for paramters

TNS-01177: Log Status is OFF. Log file/directory unchanged

Cause: Log status needs to be set ON for changing the log file

Action: use command set log_status ON to set the log status of the listener ON.

TNS-01178: Trace Level is 0. Trace file/directory unchanged

Cause: Trace Level needs to be set for changing the trace file/directory

Action: use command set trc_level ON to set the trace level

TNS-01179: Listener cannot load instance class "*string*"

Cause: Instance tried to register as a class unknown to listener.

Action: check LISTENER.ORA and/or instance configuration, and reference platform documentation to find the instance classes available for the listener on this platform.

TNS-01180: Missing listener object *string* in Directory Server

Cause: The listener could not find the listener object specified.

Action: Make sure the listener object is present in the Directory Server.

TNS-01181: Internal registration connection limit reached

Cause: The number of registration connections has reached the maximum. No more registrations are allowed until some of the existing registration connections are completed.

Action: Disconnect existing registration connections if they are no longer needed.

TNS-01182: Listener rejected registration of service "*string*"

Cause: Received registration information could not be processed because it was invalid, or an internal error occurred.

Action: Not normally visible to the user. For further details, turn on tracing and restart the instance. If error persists, contact Oracle Customer Support.

TNS-01183: Listener rejected registration or update of instance "*string*"

Cause: Received registration or update information could not be processed because it was invalid, or an internal error occurred.

Action: Not normally visible to the user. For further details, turn on tracing and restart the instance. If error persists, contact Oracle Customer Support.

TNS-01184: Listener rejected registration or update of service handler "*string*"

Cause: Received registration or update information could not be processed because it was invalid, or an internal error occurred.

Action: Not normally visible to the user. For further details, turn on tracing and restart the instance. If error persists, contact Oracle Customer Support.

TNS-01185: Registration attempted from a remote node

Cause: It was determined that the registering instance is not located on the same node as the listener. It is required that the instance be colocated with the listener for this type of service registration.

Action: Check the configuration of the registering instance. Ensure that local_listener parameter specifies only local listeners. Use remote_listener parameter to specify remote listeners.

TNS-01186: Client connection was dropped based on a filtering rule

Cause: Listener was configured with a filtering rule which explicitly specified that the client connection should be terminated without returning an error to the client.

Action: Modify the filtering rules if the client should be allowed access to the requested service.

TNS-01187: No proxy service handler available

Cause: One of the following conditions has occurred:

- the proxy service was not registered
- the proxy service was registered, but was blocking new connections
- all of the registered proxy service handlers were blocking new connections

Action: If the proxy service is not registered it may need to be restarted. If the proxy service handlers are busy and not accepting new connections more of them may need to be started to handle the load.

TNS-01188: Listener cannot operate with incompatible transport protocols

Cause: Listener was configured with multiple listening addresses with different and incompatible transport protocols. Listener cannot operate efficiently in such configuration.

Action: Modify the existing listener configuration by removing the listening address that caused the error. Configure a separate listener to listen on this address.

TNS-01189: The listener could not authenticate the user

Cause: The user attempted to issue a privileged administrative command, but could not be successfully authenticated by the listener using the local OS authentication mechanism. This may occur due to one of the following reasons:

1. The user is running a version of LSNRCTL that is lower than the version of the listener.
2. The user is attempting to administer the listener from a remote node.

-
3. The listener could not obtain the system resources needed to perform the authentication.
 4. The local network connection between the listener and LSNRCTL was terminated unexpectedly during authentication message exchange, such as if LSNRCTL program was suddenly aborted.
 5. The communication between the listener and LSNRCTL is being intercepted by a malicious user.
 6. The software that the user is running is not following the authentication protocol, indicating a malicious user.

Action: Make sure that administrative commands are issued using the LSNRCTL tool that is of a version equal or greater than the version of the listener, and that the tool and the listener are running on the same node. You can issue the VERSION command to find out the version of the listener. If a malicious user is suspected, use the information provided in the listener log file to determine the source and nature of the requests. Enable listener tracing for more information. If the error persists, contact Oracle Support Services.

TNS-01190: The user is not authorized to execute the requested listener command

Cause: Most of the listener administrative commands are only intended to be issued by privileged users, for example DBAs or system administrators. If the listener password is not set, then the listener only accepts administrative requests from LSNRCTL running with the same OS credentials, or running as a local administrator (also referred to as super user).

Action: If an authorized user is attempting the command, then make sure that LSNRCTL is executed with the same OS user credentials as the running listener, or as a local administrator.

TNS-01191: Failed to initialize the local OS authentication subsystem

Cause: Initialization of the security subsystem failed during listener startup or reload. The listener could not obtain system resources (memory, or file descriptors) needed for local OS authentication security mechanism.

Action: Make sure that system resources like shared memory and heap memory are available for listener to execute properly. For further details, turn on tracing and execute the operation again. If the error persists, contact Oracle Support Services.

TNS-01192: Missing SID_LIST_ value left of equation for SID description in LISTENER.ORA

Cause: SID description in LISTENER.ORA had an error in it.

Action: Make sure the lines of code in LISTENER.ORA containing SID_DESC or SID begin with SID_LIST_ <listener_name> on the left side of the equation. For example, SID_LIST_LISTENER =(SID_LIST=(SID_DESC=(SID_NAME=<sid>)(ORACLE_HOME=<oracle_home>)))

TNS-01193: Listener cannot operate with specified secure transport

Cause: Listener was configured with transport protocols which are either invalid or none of the secure transport protocols are present in listening addresses.

Action: Modify the existing listener configuration by specifying a valid transport protocol in secure transport list.

TNS-01194: The listener command did not arrive in a secure transport

Cause: Most of the listener administrative commands are only intended to be issued in a secure transport, which are configured in `secure_control_` parameter. If the parameter is set, then the listener accepts administrative requests only on those secure transports.

Action: Make sure the command is issued using a transport specified in secure transport list.

TNS-01196: Listener failed to initialize valid node list

Cause: VNCR options are not properly initialized in `listener.ora` or OS API failed.

Action: Check VNCR options i.e. `valid_node_checking_for_regisrtation`, `registration_invited_nodes`, `registration_excluded_nodes` in `listener.ora` For further details, turn on tracing.

TNS-01197: Listener failed to create the end point

Cause: Internal error. Unable to get subnet mask for the ip address.

Action: OS failure. Turn on tracing for further details

TNS-01200: The listener must be suid root

Cause: The ownership privileges of the `TNSLSNR` executable are incorrect.

Action: Contact your DBA or system administrator to change the ownership of the file to be suid root and restart the listener. This action is necessary because the user that started the process should claim ownership.

TNS-01201: Listener cannot find executable *string* for SID *string*

Cause: The executable for the Oracle dedicated server process cannot be found.

Action: Check the appropriate `SID_DESC` in `LISTENER.ORA` to make sure that the `ORACLE_HOME` component is pointing to a valid location. If this component is not set, then check the value of the `ORACLE_HOME` environment variable.

TNS-01202: Missing the dba group (*string*) specified by `DBA_GROUP` in `SID_DESC`

Cause: The dba group specified is missing from `/ETC/GROUP`.

Action: Check the `DBA_GROUP` parameter in the `SID_DESC` in `LISTENER.ORA` and verify it has a valid entry in `/ETC/GROUP`.

TNS-01203: Missing the account (*string*) specified by `DEFAULT_USER_ACCOUNT` in `SID_DESC`

Cause: The unprivileged OS account is missing from `/etc/passwd`.

Action: Check the `DEFAULT_USER_ACCOUNT` parameter in the `SID_DESC` in `LISTENER.ORA` and verify it has a valid entry in `/etc/passwd`. This is the account that the Oracle shadow process will be started with if the the connecting client has database privileges or does not exist on this machine.

TNS-01204: Unprivileged account (*string*) is in dba group (*string*)

Cause: The unprivileged account has DBA privileges. The unprivileged account specified by `DEFAULT_USER_ACCOUNT` in the `SID_DESC` in `LISTENER.ORA` is a member of the dba group specified by `DBA_GROUP` in `SID_DESC`. The unprivileged account cannot belong to the dba group because this would be a security violation with OPS\$ logins.

Action: Remove the unprivileged account from the dba group.

TNS-01250: Failed to get ADR Path for trace/alert directory

Cause: The diagnosability API to get the service path returned an error

Action: None

TNS-01251: Cannot set trace/log directory under ADR
Cause: ADR trace and log directories cannot be set by the user.
Action: None

TNS-01300: ERROR at *string*
Cause: Listener logging message.
Action: None

TNS-01301: TNS error structure:

TNS-01441: Number of filtering rules currently in effect: *number*
Cause: Control program status message
Action: None

TNS-01442: No filtering rules currently in effect.
Cause: Control program status message
Action: None

TNS-02020: set displaymode RAW | COMPAT | NORMAL | VERBOSE: output mode for lsnrctl display
Cause: Control program usage message.
Action: None

TNS-02021: DIRECT_HANDOFF can be either ON or OFF.
Cause: Invalid value for the LSNRCTL direct_handoff parameter.
Action: Specify one of ON or OFF.

TNS-02022: show rules: Show rules that are currently in effect
Cause: Control program usage message.
Action: None

TNS-02401: gdbname *string* too long, allowed *number* characters
Cause: gdbname or domain name too long.
Action: Check the gdbname parameter in listener.ora, shorten it.

TNS-02402: Bad CLBGNAMEs parameter in tnsnames.ora

Cause: CLBGNAMEs parameter in tnsnames.ora is bad.

Action: Check the CLBGNAMEs parameter format and correct it. Make sure that the tnsnames.ora file is there.

TNS-02403: Bad alias *string* or alias not present in tnsnames.ora

Cause: An alias was expected in tnsnames.ora but was not found or was not correctly formed.

Action: Check the tnsnames.ora for the alias and make sure it is correctly formed.

TNS-02404: Service *string* contains no local handlers

Cause: The listener found no suitable handler to redirect to.

Action: Make sure that there is at least one handler for this node.

TNS-02405: GMS call failed, check GMS logs.

Cause: A GMS call made by the listener failed.

Action: Check if the GMS is up and running. See GMS-client trace files for more information.

TNS-02501: Authentication: no more roles

Cause: When a process attempted to retrieve a role from the authentication service, no more were available.

Action: None. This error is used internally and occurs in the normal course of events.

TNS-02502: Authentication: unable to find initialization function

Cause: The native authentication service was unable to call the initialization function for the specified service because it does not exist.

Action: If this service adaptor came directly from Oracle, contact Oracle Customer Support, as this error should never happen. Otherwise, add an initialization function for the service being used.

TNS-02503: Parameter retrieval failed

Cause: The native service layer was unable to retrieve a parameter from a configuration file.

Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02504: Parameter count retrieval failed

Cause: The native service layer was unable to determine the number of arguments given for a configuration parameter.

Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02505: Authentication: null context pointer provided

Cause: The function nau_ini() was passed a null pointer as the pointer to the context that it is supposed to use.

Action: Call nau_ini() with a pointer to a context structure.

TNS-02506: Authentication: no type string

Cause: An authentication context structure does not contain a string that describes the authentication service being used.

Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02507: Encryption: algorithm not installed

Cause: After picking an algorithm, the server was unable to find an index for it in its table of algorithms. This should be impossible because the algorithm was chosen (indirectly) from that list.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-02508: Encryption: server negotiation response in error

Cause: The server's response in negotiation was in error.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-02509: Authentication: invalid process state

Cause: The state in which a process is running does not correspond to any of the values which are valid.

Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02510: Invalid numeric data type

Cause: The type of a piece of numeric data that was received does not correspond to one of the valid values.

Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02511: Invalid data type

Cause: The type of a piece of data that was received or to be transmitted did not correspond to any of the correct values.

Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02512: Invalid status received

Cause: A process received a value as a status flag which was unknown.

Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02513: Requested data type does not match retrieved type

Cause: A service requested data whose type does not match that of the segment which was sent from the other process.

Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02514: Invalid packet received

Cause: A process received a data packet which was not meant for the native services layer.

Action: If it is possible, enable tracing and attempt to reproduce the problem. In any event, contact Oracle Customer Support.

TNS-02515: Encryption/crypto-checksumming: unknown control type

Cause: An encryption or crypto-checksumming algorithm "control" function was called, but did not recognize the "type" argument it was given.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-02516: No data available

Cause: A native service attempted to retrieve data but no data was available to be received.

Action: The error is not normally visible as it usually is only used to signal the end of a data stream. If the error becomes visible, enable tracing to reproduce the problem and contact Oracle Customer Support.

TNS-02517: key smaller than requested size

Cause: The key returned by negotiation was smaller than the size requested by some service (either encryption or crypto-checksumming).

Action: The error is not normally visible. If the error persists, enable tracing to reproduce the problem and contact Oracle Customer Support.

TNS-02518: key negotiation error

Cause: An error occurred while the two sides of the connection were negotiating an encryption or crypto-checksumming key.

Action: The error is not normally visible. If the error persists, enable tracing to reproduce the problem and contact Oracle Customer Support.

TNS-02519: no appropriate key-negotiation parameters

Cause: No appropriate key-negotiation parameters are available for the key size requested either by encryption or by crypto-checksumming.

Action: The error is not normally visible. Enable tracing to reproduce the problem and contact Oracle Customer Support.

TNS-02520: encryption/crypto-checksumming: no Diffie-Hellman seed

Cause: The "sqlnet.crypto_seed" parameter is missing from the SQLNET.ORA parameters file for Oracle Advanced Security.

Action: Add this line to SQLNET.ORA: sqlnet.crypto_seed = "randomly-chosen text"

TNS-02521: encryption/crypto-checksumming: Diffie-Hellman seed too small

Cause: The "sqlnet.crypto_seed" parameter in the SQLNET.ORA parameter file for Oracle Net is too small.

Action: Add more randomly-chosen text to it.

TNS-02524: Authentication: privilege check failed

Cause: An error occurred when the Oracle Advanced Security authentication service attempted to verify that a user had a specific database privilege.

Action: This error should not happen normally. Enable tracing and attempt to repeat the error. Contact Customer Support.

TNS-02525: encryption/crypto-checksumming: self test failed

Cause: The Oracle Advanced Security encryption/crypto-checksumming service detected an error while running tests on the active encryption or checksumming algorithm.

Action: Contact Customer Support.

TNS-02526: server proxy type does not match client type

Cause: The authentication type selected by the server does not match that picked by the client.

Action: Contact Oracle Customer Support

TNS-03501: OK

Cause: The operation succeeded.

Action: No action necessary.

TNS-03502: Insufficient arguments. Usage: tns ping <address> [<count>]

Cause: Some required command-line arguments are missing.

Action: Re-enter the command using the correct arguments.

TNS-03503: Could not initialize NL

Cause: The network library could not be initialized.

Action: This is an internal error which should not normally be visible. Ensure that memory is available to run the application and that there are no other operating system problems, and then attempt the command again.

TNS-03504: Service name too long

Cause: The service name you are attempting to ping is too long.

Action: Re-enter the command using the correct service name.

TNS-03505: Failed to resolve name

Cause: The service name you provided could not be found in TNSNAMES.ORA, an Oracle Names server, or a native naming service.

Action: Verify that you entered the service name correctly. You may need to ensure that the name was entered correctly into the network configuration.

TNS-03506: Failed to create address binding

Cause: The TNSPING utility found the requested address or service name, but received an internal error when trying to use it.

Action: This is an internal error which should not normally be visible. Ensure that memory is available to run the application and that there are no other operating system problems, and then attempt the command again.

TNS-03507: Failure looking for ADDRESS keyword

Cause: The TNS address did not contain an ADDRESS keyword.

Action: If you entered the TNS address on the command line, be sure that the syntax is correct. If you entered a service name on the command line, the address contains the wrong information. You should verify that the information was entered correctly.

TNS-03508: Failed to create address string

Cause: The TNSPING utility received an internal error when generating an address.

Action: This is an internal error which should not normally be visible. Ensure that memory is available to run the application and that there are no other operating system problems, and then attempt the command again.

TNS-03509: OK (number msec)

Cause: The operation succeeded, in this amount of time.

Action: No action necessary.

TNS-03510: Failed due to I/O error

Cause: An I/O operation failed, perhaps due to a resource failure or premature window termination.

Action: This is an internal error which should not normally be visible. Do not close the TNSPING window before all I/O operations have completed.

TNS-03511: Used parameter files: *string*

Cause: Prints out the path of the parameter files(sqlnet.ora,tnsnames.ora) used in the process of resolving the NAME.

Action: None

TNS-03512: Used *string* adapter to resolve the alias

Cause: Prints out the name of the adapter which resolved the TNS alias.

Action: None

TNS-03513: Attempting to contact *string*

Cause: Attempting to contact a given TNS address.

Action: None

TNS-03601: Failed in route information collection

Cause: The route could either not connect, or encountered an unsupported version of Oracle Net.

Action: Check if Oracle Net along all nodes is version 2.3 or greater.

TNS-03602: Insufficient arguments. Usage: `trcroute <address>`

Cause: Some required command-line arguments are missing.

Action: Re-enter the command using the correct arguments.

TNS-03603: Encountered a node with a version earlier than SQL*Net 2.3

Cause: Versions of SQL*Net before 2.3 do not support trcroute.

Action: Find the node that isn't responding to trcroute.

TNS-04001: *string*

Cause: CMCTL general message.

Action: None

TNS-04002: The command completed successfully.

Cause: Not applicable.

Action: None

TNS-04003: Syntax Error.

Cause: The command issued has a wrong syntax.

Action: Check for the command issue syntax, and correct the problem.

TNS-04004: Unable to encrypt the supplied password.

Cause: The password that was supplied to the ADMINISTER command could not be encrypted.

Action: Change the password to something acceptable. See Oracle Net Services documentation for valid password values.

TNS-04005: Unable to resolve address for *string*.

Cause: The alias name supplied with the ADMINISTER command could not be resolved to an Oracle Connection Manager address.

Action: Check if your an entry for the alias is present in either CMAN.ORA file or in TNSNAMES.ORA file.

TNS-04006: Invalid password

Cause: The password given with the ADMINISTER command could not be verified by the Oracle Connection Manager instance.

Action: Retry with the correct password.

TNS-04007: Internal error *number*.

Cause: Not normally visible to the user.

Action: If error persists, contact Oracle Support Services.

TNS-04008: *string* | *string*

Cause: String parameter value.

Action: None

TNS-04009: *string* | *number*

Cause: Integer parameter value.

Action: None

TNS-04010: Command cannot be issued before the ADMINISTER command.

Cause: A command was issued before administering the Oracle Connection Manager instance.

Action: Enter the ADMINISTER command before retrying this command.

TNS-04011: Oracle Connection Manager instance not yet started.

Cause: A command was issued when Oracle Connection Manager was not yet started or already shutdown.

Action: Start Oracle Connection Manager.

TNS-04012: Unable to start Oracle Connection Manager instance.

Cause: CMCTL was unable to start the Oracle Connection Manager instance. Some of the possible reasons include: cmadmin not present in ORACLE_HOME/bin, Invalid parameter in configuration repository, wrong parameter values, or log directory not present.

Action: 1. Check whether log directory is present, and is writable. Log directory can be found at ORACLE_HOME/network/log, or as specified by the LOG_DIRECTORY parameter in CMAN.ORA.

2. Turn on logging or tracing to get more information about this error.

3. Correct any parameter errors (or mismatched paranthesis), and retry starting Oracle Connection Manager.

4. If the problem persists, contact Oracle Support Services.

TNS-04013: CMCTL timed out waiting for Oracle Connection Manager to start

Cause: Oracle Connection Manager internal registrations have not been completed.

Action: Turn on logging or tracing to get more information about this error. If the problem persists, contact Oracle Support Services.

TNS-04014: Current instance *string* is already started

Cause: An ADMINISTER command was issued to administer an Oracle Connection Manager instance that is already started.

Action: None

TNS-04015: Current instance *string* is not yet started

Cause: An ADMINISTER command was issued to an instance that has not yet been started.

Action: None

TNS-04016: Connecting to *string*

Cause: CMCTL is connecting to the the specified Oracle Connection Manager address.

Action: None

TNS-04017: Please wait. Shutdown in progress.

Cause: A command which cannot be used while Oracle Connection Manager is shutting down was issued.

Action: Wait for some time before retrying the command.

TNS-04018: Instance already started

Cause: The STARTUP command was issued to an instance which was already started.

Action: None

TNS-04019: Starting Oracle Connection Manager instance *string*. Please wait...

Cause: The STARTUP command was issued for an Oracle Connection Manager instance. CMCTL is waiting for the instance to start.

Action: None

TNS-04021: The SET command is unsuccessful for parameter *string*.

Cause: The value set for the parameter was out of range.

Action: See Oracle Net Services documentation for value ranges for the parameters.

TNS-04022: *string* parameter *string* set to *string*.

Cause: Parameter value was successfully set.

Action: None

TNS-04023: Command failed.

Cause: The command issued failed to complete successfully.

Action: Retry command. If problem persists, contact Oracle Support Services.

TNS-04037: Connections refer to *string*.

Cause: The ADMINISTER command resolved to the address in the specified message string.

Action: None

TNS-04044: Specified gateways do not exist.

Cause: One or more specified gateway IDs do not exist.

Action: Specify correct gateway IDs.

TNS-04045: Invalid specification of time

Cause: The time specified with the GT (greater than) option was invalid.

Action: Check Oracle Net Services documentation for valid time specification.

TNS-04046: Invalid specification for source

Cause: The source specified with the FROM option was invalid.

Action: Check Oracle Net Services documentation for valid source specification.

TNS-04047: Invalid specification for destination

Cause: The destination specified with the TO option was invalid.

Action: Check Oracle Net Services documentation for valid destination specification.

TNS-04048: Specified service does not exist.

Cause: The service specified with the FOR option did not exist.

Action: None

TNS-04049: Specified connections do not exist

Cause: One or more connection IDs do not exist.

Action: None

TNS-04050: Invalid specification for gateway ID.

Cause: The gateway ID specified is invalid.

Action: Check Oracle Net Services documentation for a valid gateway ID specification.

TNS-04063: Remote administration disabled in the Oracle Connection Manager instance.

Cause: CMCTL attempted to connect to a remote Oracle Connection Manager instance in which remote administration was disabled.

Action: Set parameter `remote_admin=on` in the remote instance before starting it.

TNS-04064: The number of CMCTL sessions exceeds MAX_CMCTL_SESSIONS.

Cause: The Oracle Connection Manager instance already has MAX_CMCTL_SESSIONS number of CMCTLs connected to it.

Action: Use an already connected CMCTL, or, use a higher value for the parameter MAX_CMCTL_SESSIONS in the CMAN.ORA file.

TNS-04065: The number of remote CMCTL sessions exceeds (MAX_CMCTL_SESSIONS-1)

Cause: The Oracle Connection Manager instance already has (MAX_CMCTL_SESSIONS-1) number of remote CMCTL sessions connected to it.

Action: Use an already connected CMCTL, or, use a higher value for the parameter MAX_CMCTL_SESSIONS in the CMAN.ORA file.

TNS-04067: Number of connections: *number*.

Cause: Either no information qualifier (COUNT/DETAIL) was present in SHOW CONNECTIONS command, or, COUNT was used as the information qualifier.

Action: None

TNS-04068: Cannot start an Oracle Connection Manager instance remotely.

Cause: CMCTL was used to start Oracle Connection Manager instance in a remote host.

Action: Use a local CMCTL to start the Oracle Connection Manager.

TNS-04069: Sleeping for *number* seconds...

Cause: CMCTL is idle for specified seconds. This feature is only provided for testing purposes.

Action: None

TNS-04070: Cannot administer a remote Oracle Connection Manager instance which is not yet started.

Cause: An attempt was made to administer a remote Oracle Connection Manager instance which is not yet started.

Action: Use a local CMCTL session to start the Oracle Connection Manager instance before trying to administer it remotely.

TNS-04071: Connections closed successfully. Number closed: *number*.

Cause: The specified connections were closed successfully.

Action: None

TNS-04072: Unable to suspend atleast one of the gateways.

Cause: CMCTL was unable to suspend one or more gateways. Possible reason could be suspending a gateway that was already suspended or suspending a gateway that was not present.

Action: Turn on tracing and logging, retry operation. Information in the log files would help.

TNS-04073: Passwords do not match.

Cause: The new password and its confirmation do not match

Action: Use SET PASSWORD again.

TNS-04074: Invalid value for the parameter *string*.

Cause: The parameter value set using the SET command is invalid.

Action: See Oracle Net Services documentation for the valid values of the parameter.

TNS-04075: Cannot use ADMINISTER directly from the command line.

Cause: ADMINISTER can only be issued from the CMCTL> prompt.

Action: Use the -c option with any command instead of ADMINISTER.

TNS-04076: Invalid specification for state.

Cause: The state specified with "in" option is invalid.

Action: Check Oracle Net Services documentation for valid state specification.

TNS-04077: WARNING: No password set for the Oracle Connection Manager instance.

Cause: A connection to the Oracle Connection Manager instance was made with no password from the user.

Action: Ignore the warning if the Oracle Connection Manager is secure enough. Otherwise, use SET PASSWORD command to set a new password for the instance.

TNS-04078: Unable to resume atleast one of the gateways.

Cause: CMCTL was unable to resume one or more gateways. Possible reason could be resuming a gateway that was ready for connections, or resuming a gateway that was not present.

Action: Turn on tracing and logging, retry operation. Information in the log files would help.

TNS-04079: Cannot administer Oracle Connection Manager with no CMAN.ORA, and port = *number*.

Cause: CMAN.ORA is not present or address not configured in CMAN.ORA, and the net service name in the TNSNAMES.ORA contains a nondefault Oracle Connection Manager port.

Action: Either change the TNSNAMES.ORA entry to use the default port, or configure the CMAN.ORA file with the Oracle Connection Manager's address.

TNS-04080: Failed to reload

Cause: Oracle Connection Manager failed to reload the new configuration due to errors in the configuration file.

Action: Set log_level to support and retry operation. Error encountered will be logged in the log file of CMADMIN.

TNS-04082: *string* event *string* set to *string*.

Cause: Event value was successfully set.

Action: None

TNS-04083: Failed to save password

Cause: Oracle Connection Manager failed to save the password in the configuration file.

Action: Check for the permissions on the configuration file. The file should have WRITE permissions.

TNS-04084: WARNING: Non-reloadable parameters have retained their values.

Cause: Values of non-reloadable parameters were changed, or, one or more non-reloadable parameters having non-default values were added to the parameter file.

Action: See Oracle Net Services documentation for a list of non-reloadable parameters.

TNS-04085: Password not changed since last save.

Cause: Password has not been changed since it was last saved.

Action: None

TNS-04086: Invalid value for the event *string*.

Cause: The event value set using the SET EVENT command is invalid.

Action: See Oracle Net Services documentation for the valid values of the event.

TNS-04087: Unable to shutdown atleast one of the gateways.

Cause: CMCTL was unable to shutdown one or more gateways. Possible reason could be shutting down a gateway that was not present.

Action: Turn on tracing and logging, retry operation. Information in the log files would help.

TNS-04088: Unable to close atleast one of the connections.

Cause: CMCTL was unable to close one or more connections. Possible reason could be closing a connection that was not present.

Action: Turn on tracing and logging, retry operation. Information in the log files would help.

TNS-04089: Alias name too long.

Cause: User entered an alias name that exceeded 64 characters.

Action: Retry with a shorter alias name. Alias names have to be less than 65 characters.

TNS-04140: Migration completed successfully.

Cause: CMMIGR has successfully completed the migration of the old CMAN.ORA file to the new format.

Action: None

TNS-04141: Unable to find CMAN.ORA file.

Cause: CMMIGR was not able to find CMAN.ORA file.

Action: Check whether CMAN.ORA file is present in \$TNS_NAME/admin, or in \$ORACLE_HOME/network/admin, or in the path specified in the command line.

TNS-04142: CMAN.ORA file has an invalid format.

Cause: CMMIGR was unable to recognize the format of CMAN.ORA file.

Action: Check for the syntax errors in CMAN.ORA file, and correct them.

TNS-04143: Unable to write the new CMAN.ORA file.

Cause: CMMIGR was unable to create the new CMAN.ORA file due to insufficient permissions.

Action: Set WRITE permissions to the directory in which CMAN.ORA file is to be written.

TNS-04144: Nothing to migrate

Cause: CMMIGR did not find anything in the old CMAN.ORA file that has an equivalent in the new format.

Action: None

TNS-04201: Trace Assistant Usage ERROR: Missing File name

Cause: Trace file name argument is missing

Action: Put the trace file name as the last command line argument for for this tool.

TNS-04202: Trace Assistant Usage ERROR: Not enough arguments

Cause: The <file name> and/or the <options> arguments are missing

Action: Put the right number of command line arguments.

TNS-04203: Trace Assistant Usage ERROR: Invalid options

Cause: The options provided are not valid

Action: Check the valid options for this tool.

TNS-04204: Trace Assistant Internal ERROR: Couldn't Open trace file

Cause: The trace file name given doesn't exist or it is not accessible for this user.

Action: Check the spelling, and permissions of the trace file.

TNS-04205: Trace Assistant Internal ERROR: Memory

Cause: Possible memory problem

Action: Verify the amount of available memory on the system.

TNS-04206: Trace Assistant Internal ERROR: Packet Type

Cause: The packet type read by trcAsst is not valid.

Action: Verify that your trace file is not corrupted. If trace file looks OK, with not strange characters in it, contact World Wide Support and provide trace file to them.

TNS-04207: Trace Assistant Internal ERROR: Packet Length

Cause: The packet being decode is corrupted.

Action: Verify that your trace file is not corrupted. If trace file looks OK, with not strange characters in it, contact World Wide Support and provide trace file to them.

TNS-04208: Trace Assistant Internal ERROR: Fatal

Cause: Fatal internal error

Action: Contact World Wide Support.

TNS-04209: Trace Assistant Internal ERROR: Type Error

Cause: Internal type error,

Action: Contact World Wide Support.

TNS-04210: Trace Assistant Internal ERROR: End of File

Cause: Reaching End of File to soon. Not able to decode trace file. Your trace file appears to be truncated.

Action: Generate another trace file. This trace file can not be decoded.

TNS-04211: Trace Assistant Internal ERROR: CORE

Cause: Internal System Error

Action: Contact World Wide Support.

TNS-04212: Trace Assistant Internal ERROR: NACOM Type Error

Cause: Not able to decode Network Authentication information

Action: Contact World Wide Support.

TNS-04231: Trace Assistant WARNING: Assuming Oracle trace format

Cause: This trace file may not be a Network trace file. The default format (Oracle Trace) will be assumed.

Action: None

TNS-04232: Trace Assistant WARNING: Not retrieving all rows

Cause: Trace Assitante won't retrieve all the rows data.

Action: None

TNS-04233: Trace Assistant WARNING: Going beyond Packet length

Cause: Trying to read beyond packet length. The trace file may be corrupted

Action: None

TNS-04234: Trace Assistant WARNING: won't decode TTC

Cause: Trace assistant does not have enough information to decode TTC data. This maybe an old trace file or from a platform that trace assistant does not understand.

Action: None

TNS-04235: Trace Assistant WARNING: Unknown TTC protocol

Cause: Trace Assistant has reached a point in which the TTC protocol can not be understood.

Action: None

TNS-12150: TNS:unable to send data

Cause: Unable to send data. Connection probably disconnected.

Action: Reestablish connection. If the error is persistent, turn on tracing and reexecute the operation.

TNS-12151: TNS:received bad packet type from network layer

Cause: Internal error.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

TNS-12152: TNS:unable to send break message

Cause: Unable to send break message. Connection probably disconnected.

Action: Reestablish connection. If the error is persistent, turn on tracing and reexecute the operation.

TNS-12153: TNS:not connected

Cause: Not currently connected to a remote host.

Action: Reestablish connection.

TNS-12154: TNS:could not resolve the connect identifier specified

Cause: A connection to a database or other service was requested using a connect identifier, and the connect identifier specified could not be resolved into a connect descriptor using one of the naming methods configured. For example, if the type of connect identifier used was a net service name then the net service name could not be found in a naming method repository, or the repository could not be located or reached.

Action:

- If you are using local naming (TNSNAMES.ORA file):

- Make sure that "TNSNAMES" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA)

- Verify that a TNSNAMES.ORA file exists and is in the proper directory and is accessible.

- Check that the net service name used as the connect identifier exists in the TNSNAMES.ORA file.

- Make sure there are no syntax errors anywhere in the TNSNAMES.ORA file. Look for unmatched parentheses or stray characters. Errors in a TNSNAMES.ORA file may make it unusable.

- If you are using directory naming:

-
- Verify that "LDAP" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA).
 - Verify that the LDAP directory server is up and that it is accessible.
 - Verify that the net service name or database name used as the connect identifier is configured in the directory.
 - Verify that the default context being used is correct by specifying a fully qualified net service name or a full LDAP DN as the connect identifier
 - If you are using easy connect naming:
 - Verify that "EZCONNECT" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA).
 - Make sure the host, port and service name specified are correct.
 - Try enclosing the connect identifier in quote marks. See the Oracle Net Services Administrators Guide or the Oracle operating system specific guide for more information on naming.

TNS-12155: TNS:received bad datatype in NSWMARKER packet

Cause: Internal error during break handling.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

TNS-12156: TNS:tried to reset line from incorrect state

Cause: Internal error during break handling.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

TNS-12157: TNS:internal network communication error

Cause: Internal error during network communication.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

TNS-12158: TNS:could not initialize parameter subsystem

Cause: Unable to locate parameter file.

Action: Verify that a valid parameter file exists, and is readable.

TNS-12159: TNS:trace file not writeable

Cause: The trace file to be generated is not writeable by this user.

Action: If the user does not have write permissions in the directory to which the trace file will be written, contact an administrator to get the proper permissions or set the TRACE_DIRECTORY_CLIENT parameter in the net profile (SQLNET.ORA file) to a directory the user can write to.

TNS-12160: TNS:internal error: Bad error number

Cause: Corrupt error reporting subsystem.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

TNS-12161: TNS:internal error: partial data received

Cause: The connection may be terminated.

Action: Reconnect and try again. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

TNS-12162: TNS:net service name is incorrectly specified

Cause: The connect descriptor corresponding to the net service name in TNSNAMES.ORA or in the directory server (Oracle Internet Directory) is incorrectly specified.

Action: If using local naming make sure there are no syntax errors in the corresponding connect descriptor in the TNSNAMES.ORA file. If using directory naming check the information provided through the administration used for directory naming.

TNS-12163: TNS:connect descriptor is too long

Cause: The connect descriptor corresponding to the net service name specified as the connect identifier is too long. The maximum length for a connect descriptor is 512 bytes and this limit has been exceeded.

Action: Check the net service name's connect descriptor in the local naming file (TNSNAMES.ORA) or in the directory server (Oracle Internet Directory). Use a smaller connect descriptor. If this is not possible, contact Worldwide Customer Support.

TNS-12164: TNS:Sqlnet.fdf file not present

Cause: The sqlnet.fdf file doesn't exist in \$ORACLE_HOME/network/admin.

Action: The sqlnet.fdf file is required for Oracle Tracing to occur. Either install the sqlnet.fdf file in \$ORACLE_HOME/network/admin or turn off tracing in your ORA file.

TNS-12165: TNS:Trying to write trace file into swap space.

Cause: Oracle Trace doesn't allow writing trace information into your swap space.

Action: Oracle Trace cannot write trace information into swap space so either disable tracing or redirect trace files to be written to another area of your disk.

TNS-12166: TNS:Client can not connect to HO agent.

Cause: NVstring contained DESCRIPTION/HO.

Action: Call HO agent from integrating server.

TNS-12168: TNS:Unable to contact LDAP Directory Server

Cause: Cannot contact LDAP directory server to get Oracle Net configuration.

Action: Verify that the directory server is up and accessible from the network. Verify that directory access configuration is correct. For more information see the Oracle Internet Directory Administrators Guide or the Oracle Net Administrators Guide.

TNS-12169: TNS:Net service name given as connect identifier is too long

Cause: The net service name you are attempting to resolve is too long.

Action: The maximum length of a net service name is 255 bytes; this limit has been exceeded. Use a smaller net service name. If this is not possible, contact Worldwide Customer Support.

TNS-12170: TNS:Connect timeout occurred

Cause: The server shut down because connection establishment or communication with a client failed to complete within the allotted time interval. This may be a result of network or system delays; or this may indicate that a malicious client is trying to cause a Denial of Service attack on the server.

Action: If the error occurred because of a slow network or system, reconfigure one or all of the parameters SQLNET.INBOUND_CONNECT_TIMEOUT, SQLNET.SEND_TIMEOUT, SQLNET.RECV_TIMEOUT in sqlnet.ora to larger values. If a malicious client is suspected, use the address in sqlnet.log to identify the source and restrict access. Note that logged addresses may not be reliable as they can be forged (e.g. in TCP/IP).

TNS-12171: TNS:could not resolve connect identifier: *string*

Cause: A connection to a database or other service was requested using a connect identifier, and the connect identifier specified could not be resolved into a connect descriptor using one of the naming methods configured. For example, if the type of connect identifier used was a net service name then the net service name could not be found in a naming method repository, or the repository could not be located or reached.

Action:

- If you are using local naming (TNSNAMES.ORA file):
 - Make sure that "TNSNAMES" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA)
 - Verify that a TNSNAMES.ORA file exists and is in the proper directory and is accessible.
 - Check that the net service name used as the connect identifier exists in the TNSNAMES.ORA file.
 - Make sure there are no syntax errors anywhere in the TNSNAMES.ORA file. Look for unmatched parentheses or stray characters. Errors in a TNSNAMES.ORA file may make it unusable.
- If you are using directory naming:
 - Verify that "LDAP" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA).
 - Verify that the LDAP directory server is up and that it is accessible.
 - Verify that the net service name or database name used as the connect identifier is configured in the directory.
 - Verify that the default context being used is correct by specifying a fully qualified net service name or a full LDAP DN as the connect identifier
- If you are using easy connect naming:
 - Verify that "EZCONNECT" is listed as one of the values of the NAMES.DIRECTORY_PATH parameter in the Oracle Net profile (SQLNET.ORA).
 - Make sure the host, port and service name specified are correct.
 - Try enclosing the connect identifier in quote marks. See the Oracle Net Services Administrators Guide or the Oracle operating system specific guide for more information on naming.

TNS-12196: TNS:received an error from TNS

Cause: The navigation layer received an error from TNS.

Action: See the error log file for the specific TNS error.

TNS-12197: TNS:keyword-value resolution error

Cause: The navigation layer received an error while trying to look up a value for a keyword.

Action: Check the syntax of the connect descriptor.

TNS-12198: TNS:could not find path to destination

Cause: Could not navigate a path through Interchanges to the destination. This error occurs if an invalid community is in the address string, or the address includes a protocol that is not available or the TNSNAV.ORA file does not have a correct CMANAGER address specified or the Interchange is down.

Action: Assure that Interchanges necessary to get to the desired destination are up and have available capacity for an additional connection. Also check that the correct community and protocol have been specified in the CMANAGER address used.

TNS-12200: TNS:could not allocate memory

Cause: Out of memory on machine.

Action: Reconfigure machine to have more storage or run fewer applications while the Interchange is running.

TNS-12201: TNS:encountered too small a connection buffer

Cause: TNS connection buffer supplied by the application was too small to retrieve the data sent back.

Action: Supply a larger connection buffer. If problem persists, call Worldwide Customer Support.

TNS-12202: TNS:internal navigation error

Cause: Internal navigation error.

Action: Not normally visible to the user. For further details contact Worldwide Customer Support.

TNS-12203: TNS:unable to connect to destination

Cause: Invalid address specified or destination is not listening. This error can also occur because of underlying network or network transport problems.

Action: Verify that the net service name you entered was correct. Verify that the ADDRESS portion of the connect descriptor which corresponds to the net service name is correct. Ensure that the destination process (for example the listener) is running at the remote node.

TNS-12204: TNS:received data refused from an application

Cause: The application using Connection Manager refused the connection at the listener.

Action: Make sure that the application listener at the destination is functioning correctly. If it is and the problem persists, contact Worldwide Customer Support.

TNS-12205: TNS:could not get failed addresses

Cause: Internal navigation error.

Action: Not normally visible to the user. For further details contact Worldwide Customer Support.

TNS-12206: TNS:received a TNS error during navigation

Cause: Internal navigation error because of an unexpected TNS error.

Action: Look at the log file to find the TNS error. If necessary, turn on tracing and repeat the operation.

TNS-12207: TNS:unable to perform navigation

Cause: Improperly configured navigation file TNSNAV.ORA.

Action: Check the syntax of the TNSNAV.ORA file on the application's machine, and verify that it lists the correct communities.

TNS-12208: TNS:could not find the TNSNAV.ORA file

Cause: Either the ORACLE environment is not set up correctly, or the TNSNAV.ORA file is not present.

Action: Ensure that the ORACLE environment is set up appropriately on your platform and that a TNSNAV.ORA file is present.

TNS-12209: TNS:encountered uninitialized global

Cause: Application calling navigation routine has not properly configured the global variables. There are no TNSNAV.ORA files available, or they are defective.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Worldwide Customer Support.

TNS-12210: TNS:error in finding Navigator data

Cause: Application calling navigation routine has not properly configured the TNSNAV.ORA file.

Action: Check the syntax of the TNSNAV.ORA file.

TNS-12211: TNS:needs PREFERRED_CMANGERS entry in TNSNAV.ORA

Cause: TNSNAV.ORA does not have a PREFERRED_CMANGERS defined.

Action: Add a PREFERRED_CMANGERS entry to the TNSNAV.ORA file.

TNS-12212: TNS:incomplete PREFERRED_CMANGERS binding in TNSNAV.ORA

Cause: The PREFERRED_CMANGERS binding in the client's TNSNAV.ORA file does not have a CMANGER_NAME specified.

Action: Define the CMANGER_NAME as part of the PREFERRED_CMANGERS binding. Use of the Oracle Network Manager should eliminate this error.

TNS-12213: TNS:incomplete PREFERRED_CMANGERS binding in TNSNAV.ORA

Cause: The PREFERRED_CMANGERS binding in the client's TNSNAV.ORA file does not have an ADDRESS specified.

Action: Define the ADDRESS as part of the PREFERRED_CMANGERS binding.

TNS-12214: TNS:missing local communities entry in TNSNAV.ORA

Cause: There is no LOCAL_COMMUNITIES entry in TNSNAV.ORA.

Action: Define the LOCAL_COMMUNITIES for this node in the TNSNAV.ORA file.

TNS-12215: TNS:poorly formed PREFERRED_NAVIGATORS Addresses in TNSNAV.ORA

Cause: Address binding for PREFERRED_NAVIGATORS entry is improperly entered. entry.

Action: Check your PREFERRED_NAVIGATORS entry and fix it in TNSNAV.ORA

TNS-12216: TNS:poorly formed PREFERRED_CMANGERS addresses in TNSNAV.ORA

Cause: Address binding for the PREFERRED_CMANGERS entry in the client's TNSNAV.ORA file is improperly entered.

Action: Define the ADDRESS as part of the PREFERRED_CMANGERS binding.

TNS-12217: TNS:could not contact PREFERRED_CMANGERS in TNSNAV.ORA

Cause: There is a syntax error in the PREFERRED_CMANGERS entry, or addresses specified are wrong, or the intended Connection Managers are unavailable.

Action: Check the PREFERRED_CMANGERS entries in the client's TNSNAV.ORA file and correct them or talk with your network administrator to determine if the specified Connection Managers are available. Verify that the Interchanges are active by using the INTCTL STATUS command.

TNS-12218: TNS:unacceptable network configuration data

Cause: Poorly formed network configuration data. For example, a PREFERRED_CMANGERS entry may have an incorrect CMANGER_NAME in the client's TNSNAV.ORA file. Or an Interchange downtime parameter (TIMEOUT_INTERVAL) on the Navigator may be set to zero in INTCHG.ORA.

Action: Check the entries in TNSNAV.ORA and the Interchange configuration files and correct them. If necessary, talk with your network administrator to determine if the specified Interchanges (Connection Managers) are available and properly configured. Use the Oracle Network Manager to generate the configuration files if necessary.

TNS-12219: TNS:missing community name from address in ADDRESS_LIST

Cause: This error occurs when an ADDRESS_LIST has some ADDRESSes in it that have no COMMUNITY component and others that do have a COMMUNITY component.

Action: Check that in the connect descriptors you are using either all the ADDRESSes have a COMMUNITY component or all do not.

TNS-12221: TNS:illegal ADDRESS parameters

Cause: An illegal set of protocol adapter parameters was specified. In some cases, this error is returned when a connection cannot be made to the protocol transport.

Action: Verify that the destination can be reached using the specified protocol. Check the parameters within the ADDRESS section of TNSNAMES.ORA or in the directory. Legal ADDRESS parameter formats may be found in the Oracle operating system specific documentation or the Oracle Net Administrator's Guide. Protocols that resolve names at the transport layer are vulnerable to this error if not properly configured or names are misspelled.

TNS-12222: TNS:no support is available for the protocol indicated

Cause: The protocol requested in the ADDRESS portion of the connect descriptor identified through the net service name is not available. If the supplied ADDRESS is typographically correct then support for that protocol is not installed.

Action: Install support for the protocol or correct typographical error, as appropriate. Note: if the supplied address was derived from resolving the net service name, check the address in the appropriate file (TNSNAMES.ORA, LISTENER.ORA) or in the directory server.

TNS-12223: TNS:internal limit restriction exceeded

Cause: Too many TNS connections open simultaneously.

Action: Wait for connections to close and re-try.

TNS-12224: TNS:no listener

Cause: The connection request could not be completed because the listener is not running.

Action: Ensure that the supplied destination address matches one of the addresses used by the listener - compare the TNSNAMES.ORA entry with the appropriate LISTENER.ORA file (or TNSNAV.ORA if the connection is to go by way of an Interchange). Start the listener on the remote machine.

TNS-12225: TNS:destination host unreachable

Cause: Contact can not be made with remote party.

Action: Make sure the network driver is functioning and the network is up.

TNS-12226: TNS:operating system resource quota exceeded

Cause: The current user has exceeded the allotted resource assigned in the operating system.

Action: Acquire more operating system resource, or perform a different function.

TNS-12227: TNS:syntax error

Cause: The supplied connect descriptor contains illegal syntax.

Action: Check the syntax of the connect descriptor in TNSNAMES.ORA.

TNS-12228: TNS:protocol adapter not loadable

Cause: On some platforms (such as Windows) protocol support is loaded at run-time. If the shared library (or DLL) for the protocol adapter is missing or one of its supporting libraries is missing then this error is returned.

Action: For further details, turn on tracing and reexecute the operation. The trace file will include the name of the shared library (or DLL) that could not be loaded.

TNS-12229: TNS:Interchange has no more free connections

Cause: One or more Interchanges along the path to the destination desired has no more free connections available to be used for this call.

Action: Try again later when the Interchanges are less busy, or contact your network administrator to have him determine which interchange it is, and increase the number of connections available on that interchange.

TNS-12230: TNS:Severe Network error occurred in making this connection

Cause: This error is reported by an interchange which fails to make contact with the destination due to a physical network error while calling a destination.

Action: Try again later when the network service may have been fixed or report the problem to your Network Administrator so that he may fix the problem.

TNS-12231: TNS:No connection possible to destination

Cause: This error is reported by an interchange which fails to find a possible connection along the path to the destination.

Action: Report the problem to your Network Administrator so that he may fix the problem.

TNS-12232: TNS:No path available to destination

Cause: This error is reported by an interchange which fails to find a possible path to the destination.

Action: Report the problem to your Network Administrator so that he may fix the problem.

TNS-12233: TNS:Failure to accept a connection

Cause: This error is reported by an interchange which fails to accept a connection due to a redirect failure.

Action: Report the problem to your Network Administrator so that he may isolate the interchange problem.

TNS-12234: TNS:Redirect to destination

Cause: This error is reported by an interchange which determines that this interchange is not the right gateway and needs to redirect the connection to another gateway along the path to the destination.

Action: None

TNS-12235: TNS:Failure to redirect to destination

Cause: This error is reported by an interchange which fails to redirect a connection to another interchange along the path to the destination.

Action: Report the problem to your Network Administrator so that he may fix the problem.

TNS-12236: TNS:protocol support not loaded

Cause: On some platforms (such as Windows) protocol support is loaded at run-time. If the shared library (or DLL) for the protocol adapter has not been loaded, then this error is returned.

Action: For further details, turn on tracing and reexecute the operation. The trace file will have the name of the shared library (or DLL) that has not been loaded.

TNS-12500: TNS:listener failed to start a dedicated server process

Cause: The process of starting up a dedicated server process failed. The executable could not be found or the environment may be set up incorrectly.

Action: Turn on tracing at the ADMIN level and reexecute the operation. Verify that the ORACLE Server executable is present and has execute permissions enabled. Ensure that the ORACLE environment is specified correctly in LISTENER.ORA. The Oracle Protocol Adapter that is being called may not be installed on the local hard drive. Please check that the correct Protocol Adapter are successfully linked. If error persists, contact Oracle Customer Support.

TNS-12502: TNS:listener received no CONNECT_DATA from client

Cause: No CONNECT_DATA was passed to the listener.

Action: Check that the service name resolved from TNSNAMES.ORA has the CONNECT_DATA component of the connect descriptor.

TNS-12504: TNS:listener was not given the SERVICE_NAME in CONNECT_DATA

Cause: The listener was not configured with a default service and SERVICE_NAME was missing from the CONNECT_DATA received by the listener.

Action: Possible solutions are:

- Configure DEFAULT_SERVICE parameter in LISTENER.ORA with a valid service name. Reload the listener parameter file using reload [<listener_name>]. This should be done by the LISTENER administrator.

- If using a service name, Check that the connect descriptor corresponding to the service name in TNSNAMES.ORA has a SERVICE_NAME or SID component in the CONNECT_DATA.

TNS-12505: TNS:listener does not currently know of SID given in connect descriptor

Cause: The listener received a request to establish a connection to a database or other service. The connect descriptor received by the listener specified a SID for an instance (usually a database instance) that either has not yet dynamically registered with the listener or has not been statically configured for the listener. This may be a temporary condition such as after the listener has started, but before the database instance has registered with the listener.

Action:

- Wait a moment and try to connect a second time.
- Check which instances are currently known by the listener by executing: lsnrctl services <listener name>
- Check that the SID parameter in the connect descriptor specifies an instance known by the listener.
- Check for an event in the listener.log file.

TNS-12508: TNS:listener could not resolve the COMMAND given

Cause: d by incompatible Oracle Net or Net8 versions. Do not include in error manual.

Action: This is not seen in normal use of Oracle Net.

TNS-12509: TNS:listener failed to redirect client to service handler

Cause: The dispatcher terminated unexpectedly

Action: Attempt to connect again and if the same error occurs, contact the DBA to check the state of the dispatchers for this SID. If the problem persists, turn on tracing in the listener to determine the TNS error caused by the redirect.

TNS-12510: TNS:database temporarily lacks resources to handle the request

Cause: The dispatchers appear to be busy handling other requests.

Action: Attempt the connection again. If error persists, ask the DBA to increase the number of dispatchers and/or dispatchers' limit on number of connections/sessions that they can accept.

TNS-12511: TNS:service handler found but it is not accepting connections

Cause: The dispatchers notified the listener that they temporarily do not accept new connections.

Action: Attempt the connection again. If error persists, contact the DBA to check the state of the dispatchers and/or ask him to increase the number of dispatchers.

TNS-12513: TNS:service handler found but it has registered for a different protocol

Cause: The dispatchers registered for this service are connected to the listener by way of a different network protocol than that of the client.

Action: Contact the DBA to register a dispatcher on your protocol.

TNS-12514: TNS:listener does not currently know of service requested in connect descriptor

Cause: The listener received a request to establish a connection to a database or other service. The connect descriptor received by the listener specified a service

name for a service (usually a database service) that either has not yet dynamically registered with the listener or has not been statically configured for the listener. This may be a temporary condition such as after the listener has started, but before the database instance has registered with the listener.

Action:

- Wait a moment and try to connect a second time.
- Check which services are currently known by the listener by executing: `lsnrctl services <listener name>`
- Check that the `SERVICE_NAME` parameter in the connect descriptor of the net service name used specifies a service known by the listener.
- If an easy connect naming connect identifier was used, check that the service name specified is a service known by the listener.
- Check for an event in the listener.log file.

TNS-12515: TNS:listener could not find a handler for this presentation

Cause: None of the listener's known service handlers are registered as supporting the presentation protocol required by the connecting client.

Action: Check that the destination service is configured to accept the presentation protocol.

TNS-12516: TNS:listener could not find available handler with matching protocol stack

Cause: None of the known and available service handlers for the given `SERVICE_NAME` support the client's protocol stack: transport, session, and presentation protocols.

Action: Check to make sure that the service handlers (e.g. dispatchers) for the given `SERVICE_NAME` are registered with the listener, are accepting connections, and that they are properly configured to support the desired protocols.

TNS-12518: TNS:listener could not hand off client connection

Cause: The process of handing off a client connection to another process failed.

Action: Turn on listener tracing and re-execute the operation. Verify that the listener and database instance are properly configured for direct handoff. If problem persists, call Oracle Support.

TNS-12519: TNS:no appropriate service handler found

Cause: The listener could not find any available service handlers that are appropriate for the client connection.

Action: Run "`lsnrctl services`" to ensure that the instance(s) have registered with the listener, and are accepting connections.

TNS-12520: TNS:listener could not find available handler for requested type of server

Cause: None of the known and available service handlers for requested type of server (dedicated or shared) are appropriate for the client connection.

Action: Run "`lsnrctl services`" to ensure that the instance(s) have registered with the listener and that the appropriate handlers are accepting connections.

TNS-12521: TNS:listener does not currently know of instance requested in connect descriptor

Cause: The listener received a request to establish a connection to a database or other service. The connect descriptor received by the listener specified in addition to the service name an instance name for an instance (usually a database instance) that either has not yet dynamically registered with the listener or has not been statically configured for the listener. This may be a temporary condition such as after the listener has started, but before the database instance has registered with the listener.

Action:

- Wait a moment and try to connect a second time.
- Check which instances are currently known by the listener by executing: `lsnrctl services <listener name>`
- Check that the `INSTANCE_NAME` parameter in the connect descriptor specifies an instance name known by the listener.
- Check for an event in the listener.log file.

TNS-12522: TNS:listener could not find available instance with given INSTANCE_ROLE

Cause: There are not any available and appropriate database instances registered with the listener, that are part of the service identified by `SERVICE_NAME` given in the connect descriptor and that have the specified `INSTANCE_ROLE` (and `INSTANCE_NAME`, if specified).

Action: Check to make sure that the `INSTANCE_ROLE` specified is correct. Run "lsnrctl services" to ensure that the instance(s) have registered with the listener and that they are ready to accept connections.

TNS-12523: TNS:listener could not find instance appropriate for the client connection

Cause: The listener could not find any available (database) instances, that are appropriate for the client connection.

Action: Run "lsnrctl services" to ensure that the instance(s) are registered with the listener, and have status `READY`.

TNS-12524: TNS:listener could not resolve HANDLER_NAME given in connect descriptor

Cause: The `HANDLER_NAME` in the `CONNECT_DATA` was not found in the listener's tables for the specified `SERVICE_NAME` and `INSTANCE_NAME`.

Action: Check to make sure that the `HANDLER_NAME` specified is correct.

TNS-12525: TNS:listener has not received client's request in time allowed

Cause: The listener disconnected the client because the client failed to provide the necessary connect information within the allowed time interval. This may be a result of network or system delays; or this may indicate that a malicious client is trying to cause a Denial of Service attack on the listener.

Action: If the error occurred because of a slow network or system, reconfigure `INBOUND_CONNECT_TIMEOUT` to a larger value. If a malicious client is suspected, use the address in listener.log to identify the source and restrict access. Turn on tracing for more information.

TNS-12526: TNS:listener: all appropriate instances are in restricted mode

Cause: Database instances supporting the service requested by the client were in restricted mode. The Listener does not allow connections to instances in restricted

mode. This condition may be temporary, such as during periods when database administration is performed.

Action: Attempt the connection again. If error persists, then contact the database administrator to change the mode of the instance, if appropriate.

TNS-12527: TNS:listener: all instances are in restricted mode or blocking new connections

Cause: All appropriate database instances supporting the service requested by the client reported that they either were in restricted mode or were blocking the new connections. The Listener does not allow connections to such instances. This condition may be temporary, such as at instance startup.

Action: Attempt the connection again. If error persists, then contact the database administrator to check the status of the instances.

TNS-12528: TNS:listener: all appropriate instances are blocking new connections

Cause: All instances supporting the service requested by the client reported that they were blocking the new connections. This condition may be temporary, such as at instance startup.

Action: Attempt the connection again. If error persists, then contact the administrator to check the status of the instances.

TNS-12529: TNS:connect request rejected based on current filtering rules

Cause: Connection Manager and its listener were configured with filtering rules specifying that the connect request be rejected.

Action: If this connect request should be allowed, then contact the administrator to modify the filtering rules.

TNS-12531: TNS:cannot allocate memory

Cause: Sufficient memory could not be allocated to perform the desired activity.

Action: Either free some resource for TNS, or add more memory to the machine. For further details, turn on tracing and reexecute the operation.

TNS-12532: TNS:invalid argument

Cause: An internal function received an invalid parameter.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12533: TNS:illegal ADDRESS parameters

Cause: An illegal set of protocol adapter parameters was specified. In some cases, this error is returned when a connection cannot be made to the protocol transport.

Action: Verify that the destination can be reached using the specified protocol. Check the parameters within the ADDRESS section of TNSNAMES.ORA. Legal ADDRESS parameter formats may be found in the Oracle operating system specific documentation for your platform. Protocols that resolve names at the transport layer (such as DECnet object names) are vulnerable to this error if not properly configured or names are misspelled.

TNS-12534: TNS:operation not supported

Cause: An internal function received a request to perform an operation that is not supported (on this machine).

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12535: TNS:operation timed out

Cause: The requested operation could not be completed within the time out period.

Action: Look at the documentation on the secondary errors for possible remedy. See SQLNET.LOG to find secondary error if not provided explicitly. Turn on tracing to gather more information.

TNS-12536: TNS:operation would block

Cause: An internal operation did not commence because to do so would block the current process and the user has requested that operations be non-blocking.

Action: None needed; this is an information message.

TNS-12537: TNS:connection closed

Cause: "End of file" condition has been reached; partner has disconnected.

Action: None needed; this is an information message.

TNS-12538: TNS:no such protocol adapter

Cause: The protocol adapter requested (by way of the "(PROTOCOL=..)" keyword-value pair in a TNS address) is unknown. If the supplied address is typographically correct then the protocol adapter is not installed.

Action: Install the protocol adapter or correct typographically error, as appropriate. Note: if the supplied address was derived from resolving the service name, check the address in the appropriate file (TNSNAMES.ORA, LISTENER.ORA or SQLNET.ORA).

TNS-12539: TNS:buffer over- or under-flow

Cause: Buffer too small for incoming data or too large for outgoing data.

Action: This restriction (which is associated with CONNECT DATA) is not normally visible to the user. For further details, turn on tracing and reexecute the operation; contact Oracle Customer Support.

TNS-12540: TNS:internal limit restriction exceeded

Cause: Too many TNS connections open simultaneously.

Action: Wait for connections to close and re-try.

TNS-12541: TNS:no listener

Cause: The connection request could not be completed because the listener is not running.

Action: Ensure that the supplied destination address matches one of the addresses used by the listener - compare the TNSNAMES.ORA entry with the appropriate LISTENER.ORA file (or TNSNAV.ORA if the connection is to go by way of an Interchange). Start the listener on the remote machine.

TNS-12542: TNS:address already in use

Cause: Specified listener address is already being used.

Action: Start your listener with a unique address.

TNS-12543: TNS:destination host unreachable

Cause: Contact can not be made with remote party.

Action: Make sure the network driver is functioning and the network is up.

TNS-12544: TNS:contexts have different wait/test functions

Cause: Two protocol adapters have conflicting wait/test functions.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12545: Connect failed because target host or object does not exist

Cause: The address specified is not valid, or the program being connected to does not exist.

Action: Ensure the ADDRESS parameters have been entered correctly; the most likely incorrect parameter is the node name. Ensure that the executable for the server exists (perhaps "oracle" is missing.) If the protocol is TCP/IP, edit the TNSNAMES.ORA file to change the host name to a numeric IP address and try again.

TNS-12546: TNS:permission denied

Cause: User has insufficient privileges to perform the requested operation.

Action: Acquire necessary privileges and try again.

TNS-12547: TNS:lost contact

Cause: Partner has unexpectedly gone away, usually during process startup.

Action: Investigate partner application for abnormal termination. On an Interchange, this can happen if the machine is overloaded.

TNS-12548: TNS:incomplete read or write

Cause: A data send or receive failed.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12549: TNS:operating system resource quota exceeded

Cause: The current user has exceeded the allotted resource assigned in the operating system.

Action: Acquire more operating system resource, or perform a different function.

TNS-12550: TNS:syntax error

Cause: The supplied connect descriptor contains illegal syntax.

Action: Check the syntax of the connect descriptor in TNSNAMES.ORA.

TNS-12551: TNS:missing keyword

Cause: The supplied connect descriptor is missing one or more TNS keywords.

Action: Check the syntax, and ensure all required keywords are present.

TNS-12552: TNS:operation was interrupted

Cause: An internal operation was interrupted and could not complete.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12554: TNS:current operation is still in progress

Cause: An internal operation is still in progress.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12555: TNS:permission denied

Cause: User has insufficient privileges to perform the requested operation.

Action: Acquire necessary privileges and try again.

TNS-12556: TNS:no caller

Cause: TNS detected an incoming connect request but there was no caller.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12557: TNS:protocol adapter not loadable

Cause: On some platforms (such as OS/2) protocol adapters are loaded at run-time. If the shared library (or DLL) for the protocol adapter is missing or one of its supporting libraries is missing then this error is returned.

Action: For further details, turn on tracing and reexecute the operation. The trace file will include the name of the shared library (or DLL) that could not be loaded.

TNS-12558: TNS:protocol adapter not loaded

Cause: On some platforms (such as OS/2) protocol adapters are loaded at run-time. If the shared library (or DLL) for the protocol adapter has not been loaded, then this error is returned.

Action: For further details, turn on tracing and reexecute the operation. The trace file will have the name of the shared library (or DLL) that has not been loaded.

TNS-12560: TNS:protocol adapter error

Cause: A generic protocol adapter error occurred.

Action: Check addresses used for proper protocol specification. Before reporting this error, look at the error stack and check for lower level transport errors. For further details, turn on tracing and reexecute the operation. Turn off tracing when the operation is complete.

TNS-12561: TNS:unknown error

Cause: A generic protocol error occurred.

Action: For further details, turn on tracing and reexecute the operation.

TNS-12562: TNS:bad global handle

Cause: Internal error - bad 'gbh' argument passed to TNS from caller. System may have been linked with old libraries.

Action: Not normally visible to the user, contact Oracle Customer Support.

TNS-12564: TNS:connection refused

Cause: The connect request was denied by the remote user (or TNS software).

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation.

TNS-12566: TNS:protocol error

Cause: An unexpected TNS protocol error has occurred.

Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12569: TNS:packet checksum failure

Cause: The data received is not the same as the data sent.

Action: Attempt the transaction again. If the error is persistent, turn on tracing and reexecute the operation.

TNS-12570: TNS:packet reader failure

Cause: An error occurred during a data receive.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12571: TNS:packet writer failure

Cause: An error occurred during a data send.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12574: TNS:redirection denied

Cause: The connect request failed because it would have required redirection and the caller has requested no redirections.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12575: TNS:dhctx busy

Cause: The handoff over a dhctx failed as dhctx was already busy with an ongoing handoff.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12576: TNS:handoff not supported for this session

Cause: Handoff of a established session was attempted which either had tcps as its transport or NA options were enabled for this session.

Action: Check the transport setting as well as NA options. If error persists, contact Oracle Customer Support.

TNS-12578: TNS:wallet open failed

Cause: An error was encountered while trying to open the specified wallet.

Action: For further details, turn on tracing and re-execute the operation.

TNS-12582: TNS:invalid operation

Cause: An internal function received an invalid request.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12583: TNS:no reader

Cause: A send operation has been requested but partner has already disconnected.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12585: TNS:data truncation

Cause: A receive operation has completed with insufficient data to satisfy the user's request.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12589: TNS:connection not bequeathable

Cause: An attempt to hand-off a connection from one process to another has failed because the protocol provider does not support it.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12590: TNS:no I/O buffer

Cause: An attempt to perform an I/O operation failed because no buffer was available.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12591: TNS:event signal failure

Cause: The TNS software is unable to signal an event occurrence.

Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12592: TNS:bad packet

Cause: An ill-formed packet has been detected by the TNS software.

Action: For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12593: TNS:no registered connection

Cause: An attempt to solicit network event activity has failed because no connections are registered for event notification.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12595: TNS:no confirmation

Cause: TNS is unable to get requested confirmation acknowledgment from remote partner.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12596: TNS:internal inconsistency

Cause: TNS has detected an internal inconsistency.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12597: TNS:connect descriptor already in use

Cause: Internal error - illegal use of connect descriptor.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12598: TNS:banner registration failed

Cause: The registration of a product banner with the Oracle server failed.

Action: This is an error which is not normally visible externally. Enable tracing and attempt to repeat the error. If it occurs again, contact Oracle Customer Support.

TNS-12599: TNS:cryptographic checksum mismatch

Cause: The data received is not the same as the data sent.

Action: Attempt the transaction again. If error persists, check (and correct) the integrity of your physical connection.

TNS-12600: TNS: string open failed

Cause: The creation of a string in ORACLE NLS format failed.

Action: This is an internal error, enable tracing and attempt to repeat the error. If it occurs again, contact Oracle Customer Support.

TNS-12601: TNS:information flags check failed

Cause: The TNS information flags set by the process prior to connection negotiation were not present after the negotiation was finished.

Action: This is an internal error. Enable tracing and attempt to repeat the error. If it occurs again, contact Oracle Customer Support.

TNS-12602: TNS: Connection Pooling limit reached

Cause: The operation failed because maximum active current connections has been reached. It may not be a real error when the Connection Pooling feature is enabled. It is possible that the application later reissues the operation and successfully grabs the connection pool slot and proceeds.

Action: This is an internal error. Enable tracing and attempt to repeat the error. If it occurs again, contact Oracle Customer Support.

TNS-12606: TNS: Application timeout occurred

Cause: A network session did not reach an application-defined stage within the allowed time interval.

Action: This is an error which does not normally appear at the high level. The action to take is application specific, and is detailed in the higher level error description.

TNS-12607: TNS: Connect timeout occurred

Cause: A network session did not reach a predefined connect stage within the allowed time interval.

Action: This is an error which does not normally appear at the high level. The action to take is application specific, and is detailed in the higher level error description.

TNS-12608: TNS: Send timeout occurred

Cause: The send or write operation did not complete within the allowed time interval.

Action: Check if the peer host is available. Increase the send timeout value if necessary.

TNS-12609: TNS: Receive timeout occurred

Cause: The receive or read operation did not complete within the allowed time interval.

Action: Check if the peer host is available. Increase the receive timeout value if necessary.

TNS-12611: TNS:operation is not portable

Cause: Attempted operation is not portable.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12612: TNS:connection is busy

Cause: Attempted operation failed because it conflicts with an ongoing

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12615: TNS:preempt error

Cause: A request to service an event failed because no event notification has yet been posted.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12616: TNS:no event signals

Cause: The operation failed because the type of data specified is unknown.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12618: TNS:versions are incompatible

Cause: The two machines are running incompatible versions of TNS.

Action: Check the version numbers, and upgrade the machine with the smaller one.

TNS-12619: TNS:unable to grant requested service

Cause: The connect request failed because requested service could not be provided by the local TNS software.

Action: If appropriate, reexecute with reduced service requirements.

TNS-12620: TNS:requested characteristic not available

Cause: The connect request failed because a requested transport characteristic could not be supported by the remote TNS software.

Action: If appropriate, reexecute with reduced requirements.

TNS-12622: TNS:event notifications are not homogeneous

Cause: An attempt to register a connection for event notification failed because the event notification type conflicts with existing registrations.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12623: TNS:operation is illegal in this state

Cause: Connection is half-duplex and a full-duplex operation was attempted.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation. If error persists, contact Oracle Customer Support.

TNS-12624: TNS:connection is already registered

Cause: An attempt to register a connection for event notification failed because the connection is already registered.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12625: TNS:missing argument

Cause: An operation failed because an argument was missing"

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12626: TNS:bad event type

Cause: An attempt to register a connection for event notification failed because the event type is unknown.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12628: TNS:no event callbacks

Cause: An attempt to register a connection for event notification failed because asynchronous callbacks are not available.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12629: TNS:no event test

Cause: An attempt to register a connection for event notification failed because the ability to test for events is not available.

Action: Not normally visible to the user. For further details, turn on tracing and reexecute the operation and contact Oracle Customer Support.

TNS-12630: Native service operation not supported

Cause: An operation requested by a user is not supported by the native services component.

Action: This may be an internal error if the operation should have been supported.

TNS-12631: Username retrieval failed

Cause: The authentication service failed to retrieve the name of a user.

Action: Enable tracing to determine which routine is failing.

TNS-12632: Role fetch failed

Cause: The authentication service failed to retrieve one of the user's roles.

Action: Enable tracing to determine which routine is failing.

TNS-12633: No shared authentication services

Cause: The list of authentication services specified by the user does not match those supported by the process.

Action: Either specify another list or relink the executable with the desired services.

TNS-12634: Memory allocation failed

Cause: Process was unable to allocate memory.

Action: Terminate other processes in order to reclaim needed memory.

TNS-12635: No authentication adapters available

Cause: The executable was not linked with any authentication service adapters but the sqlnet.ora parameter that determines whether or not authentication is required was set to true.

Action: Either disable the parameter or relink the executable with service adapters.

TNS-12636: Packet send failed

Cause: A process was unable to send a packet to another process. Possible causes are:

1. The other process was terminated.

-
2. The machine on which the other process is running went down.
 3. Some other communications error occurred.

Action: If the cause is not obvious, contact Oracle Customer Support.

TNS-12637: Packet receive failed

Cause: A process was unable to receive a packet from another process. Possible causes are:

1. The other process was terminated.
2. The machine on which the other process is running went down.
3. Some other communications error occurred.

Action: If the cause is not obvious, contact Oracle Customer Support.

TNS-12638: Credential retrieval failed

Cause: The authentication service failed to retrieve the credentials of a user.

Action: Enable tracing to determine the exact error.

TNS-12639: Authentication service negotiation failed

Cause: No match was found between the types of authentication services that the client supports and those that the server is using.

Action: Possible solutions:

1. Change the entry in sqlnet.ora that determines which services are to be used.
2. Relink the client with at least one of the authentication service adapters that the server supports.
3. Relink the server with at least one of the authentication service adapters that the client supports.
4. Disable authentication on both the client and server.

TNS-12640: Authentication adapter initialization failed

Cause: The function specified in the authentication table entry for the service failed.

Action: Enable tracing to determine the exact error.

TNS-12641: Authentication service failed to initialize

Cause: The authentication service failed during initialization.

Action: Enable tracing to determine the exact error.

TNS-12642: No session key

Cause: A process has no session key associated with it because the authentication service being used does not use one.

Action: If a session key is required, use another authentication service.

TNS-12643: Client received internal error from server

Cause: The client process received an error from the server that indicated that an internal Oracle Net native services error had occurred.

Action: Enable tracing on both processes and attempt to recreate the problem. If successful in recreating the problem, contact Oracle Customer Support.

TNS-12645: Parameter does not exist.

Cause: A sqlnet.ora parameter from which a value was needed does not exist.

Action: Set the parameter in the parameter file.

TNS-12646: Invalid value specified for boolean parameter

Cause: The value specified for a parameter was set to a value other than true/false or on/off.

Action: Correct the value of the parameter.

TNS-12647: Authentication required

Cause: The parameter that controls whether authentication is required was set to true, but the executable does not have an authentication service linked in.

Action: Either re-link the executable with an authentication service adapter or disable the parameter.

TNS-12648: Encryption or data integrity algorithm list empty

Cause: An Oracle Advanced Security list-of-algorithms parameter was empty, e.g. "()".

Action: Change the list to contain the name of at least one installed algorithm, or remove the list entirely if every installed algorithm is acceptable.

TNS-12649: Unknown encryption or data integrity algorithm

Cause: An Oracle Advanced Security list-of-algorithms parameter included an algorithm name that was not recognized.

Action: Either remove that algorithm name, correct it if it was misspelled, or install the driver for the missing algorithm.

TNS-12650: No common encryption or data integrity algorithm

Cause: The client and server have no algorithm in common for either encryption or data integrity or both.

Action: Choose sets of algorithms that overlap. In other words, add one of the client's algorithm choices to the server's list or vice versa.

TNS-12651: Encryption or data integrity algorithm unacceptable

Cause: The algorithm the server chose to use for encryption or data integrity was not one of the choices acceptable to the client. This is either the result of an internal error, of a network data transmission error, or of deliberate tampering with the transmitted data.

Action: For further details, turn on tracing, re-execute the operation, and contact Oracle Customer Support.

TNS-12652: String truncated

Cause: Not enough memory was allocated for a string so it had to be truncated

Action: If it is OK that the string is truncated, then it is not an error. Otherwise, call the routine that reported the error again with a larger string buffer.

TNS-12653: Authentication control function failed

Cause: The control function utilized by the authentication service driver failed.

Action: Enable tracing to determine the exact error.

TNS-12654: Authentication conversion failed

Cause: The authentication service was unable to convert the credentials of a user from the format specific to the format into the ORACLE format.

Action: Enable tracing to determine the exact error.

TNS-12655: Password check failed

Cause: The authentication service being used was unable to verify the provided password.

Action: Enable tracing to determine the exact error.

TNS-12656: Cryptographic checksum mismatch

Cause: The cryptographic checksum received with a packet of incoming data didn't match the checksum computed by the receiving end. This indicates that the packet was tampered with or otherwise corrupted in transit.

Action: Look for sources of data corruption, perhaps including deliberate tampering.

TNS-12657: No algorithms installed

Cause: The near side of the connection required the use of a service (either encryption or checksumming) when no algorithms for that service were installed.

Action: Remove the "ON" requirement for that service.

TNS-12658: ANO service required but TNS version is incompatible

Cause: A client process that is running an earlier version of TNS attempted to connect but the connection failed because the server process required that an ANO service (authentication, encryption, etc.) be used.

Action: Relink the calling executable and retry the connection or eliminate the requirement that the service be used on the server side.

TNS-12659: Error received from other process

Cause: An error was received by one or more services from the process on the other side of the connection.

Action: Enable tracing to determine the exact error(s). The error(s) is (are) not returned directly because an error generated by a server may not make sense on the client side and vice-versa.

TNS-12660: Encryption or crypto-checksumming parameters incompatible

Cause: One side of the connection specified "REQUIRED" for encryption or crypto-checksumming, while the other side specified "REJECTED".

Action: Change the "REQUIRED" side to "REQUESTED" if you want encryption or crypto-checksumming to be optional, or change the "REJECTED" side to "ACCEPTED" if you do not want the service to be optional.

TNS-12661: Protocol authentication to be used

Cause: The Oracle Advanced Security authentication service has determined that the Oracle Net transport protocol in use is to be utilized to authenticate a user's identity.

Action: This error is used solely to communicate information between the authentication service and the Oracle Net session layer and should not normally be visible. If the error is seen, contact Oracle Worldwide Support.

TNS-12662: proxy ticket retrieval failed

Cause: The authentication adapter used by Oracle Net failed to retrieve the credentials needed to authenticate a database link.

Action: Enable tracing to determine the exact error.

TNS-12663: Services required by client not available on the server

Cause: Service(s) that was (were) required by the client process were not available on the server process.

Action: Configure the server with the services required by the client (best solution) or delete the requirement from the configuration file of the client (least secure).

TNS-12664: Services required by server not available on the client

Cause: Service(s) that was (were) required by the server process were not available on the client process.

Action: Configure the client with the services required by the server (best solution) or delete the requirement from the configuration file of the server (least secure).

TNS-12665: NLS string open failed

Cause: A native service was unable to make a string available for use by the National Language Support component.

Action: Make sure the National Language Support component has been properly. If it has, enable tracing and report the problem to Customer Support.

TNS-12666: Dedicated server: outbound transport protocol different from inbound

Cause: The protocol specified for an externally-identified outbound connection from a dedicated server (database link) was not the same as that used for the inbound connection. It is not possible for Oracle Net to authenticate a proxy connection that uses a protocol that is different from that which was used for the connection to the dedicated server.

Action: Specify the same protocol in the Oracle Net connect descriptor for the outbound connection as that used for the inbound connection.

TNS-12667: Shared server: outbound transport protocol different from inbound

Cause: The protocol specified for an externally-identified outbound connection from a shared server (database link) was not the same as that used for the inbound connection. It is not possible for Oracle Net to authenticate a proxy connection that uses a protocol that is different from that which was used for the connection to the shared server.

Action: Specify the same protocol in the Oracle Net connect descriptor for the outbound connection as that used for the inbound connection

TNS-12668: Dedicated server: outbound protocol does not support proxies

Cause: The protocol specified to perform an externally-identified proxy connection (database link) from a dedicated server does not support proxy connections.

Action: Specify a protocol in the Oracle Net connect descriptor used for the connection that does support externally-authenticated proxy connections. NOTE: Because of a limitation in Oracle Net, the protocol used for the proxy connection must be the same as that used for the connection from the client to the server.

TNS-12669: Shared server: outbound protocol does not support proxies

Cause: The protocol specified to perform an externally-identified proxy connection (database link) from a shared server does not support proxy connections.

Action: Specify a protocol in the Oracle Net connect descriptor used for the connection that does support externally-authenticated proxy connections. NOTE:

Because of a limitation in Oracle Net, the protocol used for the proxy connection must be the same as that used for the connection from the client to the server.

TNS-12670: Incorrect role password

Cause: A password supplied for a role could not be validated by the authentication service.

Action: Supply the correct password.

TNS-12671: Shared server: adapter failed to save context

Cause: The adapter for the authentication service failed when it tried to save the data needed for proxy connections (database links) through the shared server.

Action: Enable tracing to determine the exact error. Contact Oracle Customer Support if the reason is not obvious.

TNS-12672: Database logon failure

Cause: The authentication service adapter in use encountered an error it attempted to validate the logon attempt of a user.

Action: Enable tracing to determine the exact error encountered by the adapter.

TNS-12673: Dedicated server: context not saved

Cause: A connection was marked as being a proxy connection (database link) from a dedicated server but no inbound context was present.

Action: This error should not normally be visible to the user. Contact Oracle Customer Support.

TNS-12674: Shared server: proxy context not saved

Cause: A connection was marked as being a proxy connection (database link) from a shared server but no inbound context was present.

Action: This error should not normally be visible to the user. Contact Oracle Customer Support.

TNS-12675: External user name not available yet

Cause: The authentication service in use was not able to return the external name of a user of the ORACLE server because it is not available to the service yet.

Action: This is just an informational message and should not normally be visible to the user. If the error does appear, contact Oracle Customer Support.

TNS-12676: Server received internal error from client

Cause: The server process received an error from the client which indicated that an internal Oracle Net native services error had occurred.

Action: Enable tracing on both processes and attempt to recreate the problem. If the problem recurs, contact Oracle Customer Support.

TNS-12677: Authentication service not supported by database link

Cause: The authentication service used by the proxy process (database link) was unable to find the adapter being used by the client in its list of authentication mechanisms.

Action: Specify an authentication adapter that is shared by the client and the server being used for the database link.

TNS-12678: Authentication disabled but required

Cause: The configuration parameters that control whether Oracle Advanced Security authentication is disabled or required were both set to TRUE.

Action: Set one or both of the parameters to FALSE.

TNS-12679: Native services disabled by other process but required

Cause: The remote process has disabled native services but the local process requires them.

Action: Enable native services on the remote process or disable them locally.

TNS-12680: Native services disabled but required

Cause: The process has disabled native services but at least one service is required.

Action: Enable native services or change the configuration file so that none of the available services are required.

TNS-12681: Login failed: the SecurID card does not have a pincode yet

Cause: The SecurID card that is used to logon to Oracle, does not have a pincode assigned to it.

Action: Use one of the programs supplied by Security Dynamics to assign a pincode to the card.

TNS-12682: Login failed: the SecurID card is in next PRN mode

Cause: The SecurID card and the SecurID server are out of sync and the server requires the next cardcode to resynchronize the card.

Action: Use one of the programs supplied by Security Dynamics to resynchronize the SecurID card.

TNS-12683: encryption/crypto-checksumming: no Diffie-Hellman seed

Cause: The "sqlnet.crypto_seed" parameter is missing from the SQLNET.ORA parameters file for Oracle Advanced Security.

Action: Add this line to SQLNET.ORA: sqlnet.crypto_seed = "randomly-chosen text"

TNS-12684: encryption/crypto-checksumming: Diffie-Hellman seed too small

Cause: The "sqlnet.crypto_seed" parameter in the SQLNET.ORA parameter file for Oracle Advanced Security is too small.

Action: Add more randomly-chosen text to it, perhaps using Network Manager.

TNS-12685: Native service required remotely but disabled locally

Cause: A native service is required by the remote process but native services have been disabled locally.

Action: Enable native services locally or change the configuration parameters on the remote host so that no native services are required.

TNS-12686: Invalid command specified for a service

Cause: An operation which does not exist was specified for a native service.

Action: This is a programming error and should not normally be visible to the user. If the error does appear, contact Oracle Customer Support.

TNS-12687: Credentials expired.

Cause: The credentials that are used to authenticate the user for the requested connection have expired.

Action: Renew your credentials. Refer to the documentation specific for your Network Authentication Adapter on how to do this.

TNS-12688: Login failed: the SecurID server rejected the new pincode

Cause: There are a number of reasons why the SecurID server would refuse a pincode:

- The user might not have permission to make up his own pincode.
- The pincode was either too short or too long. Valid pincodes consist of minimal four, but no more than eight characters.
- The pincode contains any non alphanumeric characters.

Action: Reexecute the operation and make sure to use a pincode that satisfies the above requirements. If the problem persists, turn on tracing at the Oracle Server side of the connection and examine the trace file for the exact error.

TNS-12689: Server Authentication required, but not supported

Cause: Server Authentication is required for this connection, but not supported by both sides of the connection.

Action: Make sure both sides of the connection have the correct version of Advanced Networking Option, and that the Authentication Adapter supports Server Authentication.

TNS-12690: Server Authentication failed, login cancelled

Cause: Server Authentication is required, but the server's credentials were found invalid by the client.

Action: Make sure that the server has a valid set of credentials. Refer to your authentication adapter specific documentation on how to do this.

TNS-12696: Double Encryption Turned On, login disallowed

Cause: The user is using a Secure Protocol Adapter that has Encryption turned ON as well as ANO Encryption.

Action: Turn OFF either ANO Encryption or the Protocol Adapter Encryption if possible. Refer to Oracle Advanced Security Administrator's Guide on how to do this.

TNS-12699: Native service internal error

Cause: An internal error occurred in the native services component.

Action: Enable tracing to determine the exact error. Contact Oracle Customer Support.

NNC-00001 to NNC-00501

NNC-00001: maximum number of connections already open

Cause: All available name service connections are handling requests.

Action: If the problem occurs when running a name server, increase the values of `names.max_open_connections`. If the problem occurs in a client program, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00002: error listening on stream *string*

Cause: The name server was asked to listen on the specified address, and failed, probably because the address is malformed, or because it uses a SQL*Net protocol adaptor which has not been installed.

Action: Make sure the address is properly formed, and that it uses a protocol adaptor which has been installed on your system.

NNC-00003: error opening stream *string*

Cause: A name server or client program attempted to open a connection to another server and failed, either because the server is down, or because the network path to that server is not working. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Make sure that the server being connected to is listening on the address used, and that there is network connectivity between the two end-points.

NNC-00004: connection is broken

Cause: The connection from a name server or client program to another server has been broken, either because that server has shut down, or because the network path to the server has stopped working. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Make sure that the server being connected to is running and listening on the address used, and that there is network connectivity between the two end-points.

NNC-00005: cannot initialization stream subsystem

Cause: The name service stream subsystem could not be started, probably because of a missing TNS error message file.

Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations.

NNC-00050: message format error

Cause: A corrupted name server message was received by a name server or the name server program interface.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00051: message content error

Cause: A corrupted name server message was received by a name server or the name server program interface.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00052: client and server protocol versions are incompatible

Cause: A name server message with an incompatible protocol version was received by a name server or the name server program interface. This problem will occur when there are clients and servers with widely varying protocol versions that are trying to communicate.

Action: upgrade older client and server software so it is compatible with newer software.

NNC-00053: ASN.1 error encountered while sending or receiving message

Cause: The name server or the name server program interface attempted to send or receive a message and failed because of an ASN.1 error.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00400: memory exhausted

Cause: The program interface has run out of memory.

Action: Add more memory or run fewer processes.

NNC-00401: program interface initialization failed

Cause: The name server program interface could not be initialised, probably because of a missing TNS or name server error message file.

Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations.

NNC-00402: program interface de-initialization failed

Cause: An internal error occurred while the name server program interface was being de-initialised by an internal function.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00403: program interface has not been initialised

Cause: An internal function has attempted to de-initialise the name service program interface when it has not yet been initialised.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00404: supplied buffer of size *string* is smaller than minimum size *string*

Cause: A caller supplied the name server program interface with a memory buffer too small for the interface's requirements. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00405: network failure

Cause: The network connection between the client program and the name server has failed, either because the server has shut down, or because the network path to the server has stopped working. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Contact your name server administrator to make sure that the server being connected to is running and listening on the address used, and that there is network connectivity between the two end-points.

NNC-00406: name "*string*" does not exist

Cause: The user asked for information associated with a global name that does not exist.

Action: Re-try the failing operation with a global name that exists.

NNC-00407: alias loop in name request

Cause: The name service detected an "alias loop" when trying to retrieve information associated with a global name. An alias loop occurs when an alias name X points to another alias name Y, which in turn points back to X, rather than eventually to a global name which contains data.

Action: Contact your name server administrator to have the alias loop investigated and fixed.

NNC-00408: name "*string*" exists but desired data does not

Cause: The user asked for information associated with a global name. The name in question exists, but does not contain the desired type of information.

Action: Re-try the failing operation with a type which the desired name does contain.

NNC-00409: temporary name service failure

Cause: There are no name servers available to handle a client request, or a name server was temporarily unable to handle a client request. This situation is almost always temporary, and occurs when the program interface has issued a name server request and not received a timely response from any of its preferred servers. Such delays can occur due to transient network or name server outages or heavy load.

Action: Re-try the failing operation. If the error persists, make sure there is network connectivity between the client and its preferred name servers, and contact your name server administrator to make sure that those name servers are running.

NNC-00410: invalid preferred server address list

Cause: The names.preferred_servers parameter in sqlnet.ora is malformed.

Action: Make sure the address list is properly formatted.

NNC-00411: invalid default domain name "*string*"

Cause: The names.default_domain parameter in sqlnet.ora is invalid.

Action: Make sure the parameter value is a valid global name. See your documentation for the characters which may be used in a global name.

NNC-00412: invalid name "*string*"

Cause: The name server program interface was given an invalid global name to process.

Action: Supply a valid domain name. If the error is caused by an internal function, contact Worldwide Customer Support.

NNC-00413: general failure

Cause: A name server program interface error occurred which did not fall under the heading of any other more specific error condition. The error will usually be followed by more specific lower-level information.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00414: invalid name-value binding string "*string*"

Cause: A caller provided the name server program interface with an invalid name-value binding string value.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid name-value binding string argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00415: section identifier *string* is invalid, must be between *string* and *string*

Cause: An internal function has called the name server program interface with illegal arguments.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00416: user callback function returned error number *string*

Cause: An internal function has called the name server program interface with illegal arguments.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00417: name "*string*" already exists

Cause: A caller has attempted to create a new global name, and that name already exists.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a name that does not already exist. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00418: name "*string*" cannot be modified because it has children

Cause: A caller has attempted to delete or rename a global name, and that name cannot be modified because it has child names underneath it in the name space.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a name that is a leaf node. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00419: authoritative server is unreachable

Cause: A name server request cannot be processed because the server which received the operation does not own the name specified in the request and cannot locate the server which does own the name. The error is almost always transient, and occurs either because the path between the server receiving the request and the request's final destination has been interrupted, or because the final destination is down.

Action: Not normally visible to the user, except when using the name server control program. Because the error is typically a transient one, retrying the failing operation will usually work. If the failure persists, the name server which is allowed to process the failing operation is probably shut down or unreachable. Contact your name server administrator to make sure that your site's name servers are running, and are properly configured.

NNC-00420: operation not allowed

Cause: A name server request cannot be processed because the server which received the operation is not allowed to process it. The problem typically occurs when an administrator has disabled request processing at a particular server for some reason.

Action: Contact your name server administrator to determine why server request processing has been disabled.

NNC-00421: invalid modification directive *string*, must be between *string* and *string*

Cause: An internal function has called the name server program interface with illegal arguments.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00422: invalid data type name "*string*"

Cause: A caller has provided an invalid data type name to the name server program interface.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid type name. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00423: invalid data item syntax code *string*

Cause: A caller has provided an invalid data type code to the name server program interface.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid type name. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00424: invalid address "string"

Cause: A caller provided the name server program interface with an invalid address value.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid address argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00425: meta-data violation

Cause: A caller issued a name server modification request and that request cannot be processed because it would violate data type meta-data constraints.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, examine the meta-data constraints for the data type being operated upon and don't violate them. Examples of typical constraint violations are attempts to add a new data item to a name which already contains alias information, or attempts to add alias information to a name which already contains other data, or attempts to replace a data item with another item that has the wrong syntax. If the error occurs outside the control program, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00426: no such data type

Cause: A caller attempted to create a data item, and could not because the data item's type does not exist.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the operation with an existent data type. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00427: server does not support this version of the protocol

Cause: A name server message with an incompatible protocol version was received by a name server or the name server program interface. This problem will occur when there are clients and servers with widely varying protocol versions that are trying to communicate.

Action: upgrade older client and server software so it is compatible with newer software.

NNC-00428: invalid meta-data data item

Cause: A caller provided the name server program interface with an invalid meta-data data item.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid meta-data argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00429: invalid octet string literal "string"

Cause: A caller provided the name server program interface with an invalid octet string string value.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid octet string argument. Otherwise, turn on tracing

and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00430: Database not accessible

Cause: When a database is used for consistency between different nameservers, any modify operation should not only modify the cache but also the database. And if the database is not accessible, this error occurs.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, make sure database is available and then re-execute the operation. If error persists, contact Worldwide Customer Support.

NNC-00431: NS address does not match any of the current addresses

Cause: When delegating a domain, the address of the Nameserver is provided by the client. If the nameserver already exists, then it already has address(es) associated with it. So, the address supplied by the client must match one of them. Otherwise, this error occurs.

Action: Not normally visible to the user, except when using name server control program. If the error occurs when using the control program, either provide an one of the existing addresses of the name server or delegate the domain to a new nameserver.

NNC-00500: warning: "string" parameter value is illegal, setting to *string*

Cause: The named parameter value is invalid.

Action: Make sure the parameter value is formatted correctly. Valid choices for boolean parameter values are TRUE, FALSE, YES, NO, ON, and OFF.

NNC-00501: warning: "string" parameter value must be between *number* and *number*, setting to *number*

Cause: The named parameter value is invalid or outside legal boundary values.

Action: Make sure the parameter value is a number, and falls between valid minimum and maximum values, as specified in the error text.

NNO-00050 to NNO-00854

NNO-00050: serious errors in configuration data, server cannot run

Cause: The server's configuration data has a problem of some sort which prevents the server from starting.

Action: Previous error messages in the log file will specify the exact problems leading to the shutdown. The problem most frequently occurs when the network is broken up into multiple administrative regions and the delegation points are incorrect. Read the Oracle Names documentation sections on region delegation and ensure that their directions are being followed correctly.

NNO-00051: domain count *number* exceeds maximum of *number*, first *number* will be loaded

Cause: The server's configuration contains more domains than the server can support.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00052: invalid domain description list

Cause: The server's configuration contains an invalid domain description list.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00053: duplicate domain description for domain "*string*"

Cause: The server's configuration contains duplicate domain descriptions in the domain description list.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00054: invalid domain name "*string*"

Cause: The server's configuration contains a domain description with an invalid name.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00055: invalid domain minimum TTL "*string*"

Cause: The server's configuration contains a domain description with an invalid minimum TTL.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00056: warning: domain minimum TTL must be between *number* and *number*, set to *number* seconds

Cause: The server's configuration contains a domain description with an invalid minimum TTL. This error is not fatal; the server will automatically set the TTL to a default value which is suitable for most uses.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00057: loading and verifying topology data

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00058: cannot load topology data from configuration database

Cause: An error was encountered while trying to load the server's topology data from the configuration database. If more information is available, it will appear under this error. This error will cause the server to shut down.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00059: cannot construct topology checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00060: loading server topology from checkpoint file "*string*"

Cause: An informational message written to the log file when the server has been forced to load from its most recent topology checkpoint file, by setting the names.no_region_database parameter to TRUE.

Action: None

NNO-00061: loading data for domain "*string*"

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00062: cannot load domain data from configuration database

Cause: An error was encountered while trying to load the server's domain data from the configuration database. If more information is available, it will appear under this error. This error will cause the server to shut down.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00063: cannot construct domain checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00064: loading domain data from checkpoint file "*string*"

Cause: An informational message written to the log file when the server has been forced to load from its most recent domain checkpoint file, by setting the `names.no_region_database` parameter to TRUE.

Action: None

NNO-00065: loading cached data from checkpoint file "*string*"

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00066: server will perform reload check of administrative region in *number* seconds

Cause: An informational message written to the log file whenever the Oracle Network Manager or the Oracle Names control program send a reload request to the server.

Action: None

NNO-00067: server reload check countdown aborted

Cause: An informational message written to the log file whenever the Oracle Names control program halts a reload request previously sent to the server

Action: None

NNO-00068: warning: administrative region check failed, next check in *number* seconds

Cause: this warning is issued whenever the server fails to connect to the configuration database to see if any configuration data has changed. The server will automatically begin reissuing reload checks more frequently, and will eventually give up if connections fail continuously for three days.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database.

NNO-00069: warning: too many administrative region check failures, checking disabled

Cause: a warning issued whenever the server has continuously failed for three days in its attempts to connect to the configuration database. The server disables reload checking. Reload checking can later be re-enabled from the Oracle Network Manager or the Oracle Names control program.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the `names.no_region_database` parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00070: administrative region has changed, reloading domain data

Cause: An informational message written to the log file whenever the server's configuration has changed, and the server is reloading the new configuration from the configuration database.

Action: None

NNO-00071: cannot construct cache checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00072: loading from region database

Cause: normal

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00073: loading server config from region database

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00074: downloading region from server *string*

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00080: domain "*string*" cannot be delegated because its parent is already delegated

Cause: an internal delegation error has occurred. Delegation is controlled by the Oracle Network Manager, which enforces correct delegation rules.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00081: domain "*string*" has no name servers

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00082: domain "*string*" is missing my name "*string*" as a name server

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00083: domain "*string*" server "*string*" has no addresses

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00084: domain "*string*" is not in the authoritative domain list

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00104: line *string*: syntax error, data ignored

Cause: the server found a syntax error its domain data. This message will also appear if the server's internal checkpoint files become corrupted. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00105: line *string*: invalid name "*string*", data ignored

Cause: the server found an invalid global name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00106: line *string*: invalid TTL "*string*", data ignored

Cause: the server found an invalid TTL in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00107: line *string*: ignoring stale checkpoint data

Cause: an informational message which appears during server startup when the server detects out-of-date cached data in its cache checkpoint file. The message is part of normal server startup.

Action: None

NNO-00108: line *number*: TTL of *number* seconds below domain minimum *number*, using minimum

Cause: the server found an invalid TTL value in its domain data. The record in question is not loaded, but the server continues to load data.
