CRS-02788: Server reconfiguration failed to stop resources '*string*'. The server '*string*' has been restored into the original pool(s).

Cause: The specified resources could not be stopped.

Action: Stop the specified resources manually and retry the last action.

CRS-02789: Cannot stop resource '*string*' as it is not running on server '*string*'

Cause: An request to stop a resource on a server where it is not running was received

Action: Check the current state of the resource; it should no longer be running on that server.

CRS-02790: Starting shutdown of Cluster Ready Services-managed resources on server '*string*'

Cause: Shutdown of Cluster Ready Services and the resources it manages has started on the specified server.

Action: None

CRS-02791: Starting shutdown of Oracle High Availability Services-managed resources on '*string*'

Cause: Shutdown of Oracle High Availability Services and the resources it manages has started on the indicated server.

Action: None

CRS-02792: Shutdown of Cluster Ready Services-managed resources on '*string*' has completed

Cause: Shutdown of Cluster Ready Services and the resources it manages on the indicated server has completed.

Action: None

CRS-02793: Shutdown of Oracle High Availability Services-managed resources on '*string*' has completed

Cause: Shutdown of Oracle High Availability Services and the resources it manages has completed on the indicated server.

Action: None

CRS-02794: Shutdown of Cluster Ready Services-managed resources on '*string*' has failed

Cause: The failure is associated with one or more of the resources affected by this command on the indicated server."

Action: Error message(s) preceding this one should have the details about the resources that refused to shut down. Either manually stop those resources or retry with the force option.

CRS-02795: Shutdown of Oracle High Availability Services-managed resources on '*string*' has failed

Cause: The failure is associated with one or more of the resources affected by this command on the indicated server."

Action: Error message(s) preceding this one should have the details about the resources that refused to shut down. Either manually stop those resources or retry with the force option.

CRS-02796: The command may not proceed when Cluster Ready Services is not running

Cause: This command must stop Cluster Ready Services-managed resources. However, Cluster Ready Services is not running, which does not mean its resources are not running.

Action: The underlying reason for Cluster Ready Services not running needs to be resolved and the command retried. Alternatively, the command can be retried with the force option.

CRS-02797: Shutdown is already in progress for '*string*', waiting for it to complete

Cause: Another shutdown command was issued for the indicated server in the past and it is currently in progress. This command will wait until the original command completes and then complete as well.

Action: None

CRS-02798: State change received for resource '*string*' from unexpected server '*string*'. Details at '*string*' in '*string*'.

Cause: A state change was reported for an instance of the resource from a server where the resource was never started.

Action: Shutdown the resource on the unexpected server

CRS-02799: Failed to shut down resource '*string*' on '*string*'

Cause: Shut down failed because the listed resource failed to stop.

Action: Error message(s) preceding this one should have the details about the resources that refused to shut down. Either manually stop those resources or retry with the force option.

CRS-02800: Cannot start resource '*string*' as it is already in the INTERMEDIATE state on server '*string*'

Cause: An attempt was made to start a resource that is already in the INTERMEDIATE state.

Action: Determine why the resource is in the INTERMEDIATE state based on the value of the STATE_DETAILS attribute. If it is due to a check timeout, no action is needed. Otherwise, manual intervention is required to bring the resource out of the INTERMEDIATE state.

CRS-02801: No instance of the resource '*string*' should be running

Cause: An attempt was made to relocate resource and the resource's instances to be relocated have TARGET=OFFLINE.

Action: Restart the resource to change the value of the TARGET attribute to ONLINE. Examining the value of the INTERNAL_STATE attribute can be used to determine if the instances are being operated on currently.

CRS-02802: Purging events not published within 15 minutes

Cause: The events could not be published to the Event Manager Daemon either because it is down or there are errors doing the publish.

Action: Check the status of the Event Manager Daemon.

CRS-02803: Attribute '*string*' has already been declared in a derived type '*string*'

Cause: An attempt was made to add a new attribute definition to a resource type that has an identically named attribute already defined in one or more derived types.

Attributes declared in base types can be overridden in derived ones, but the opposite is not allowed.

Action: Pick a different attribute name or delete the derived type(s), resubmit, and then add derived types back.

CRS-02805: Unable to start '*string*' because it has a '*string*' dependency on resource type '*string*' and no resource of that type can satisfy the dependency

Cause: Start/relocate of the resource is impossible because it has a dependency on a resource type no resource of which can currently be used to satisfy the dependency.

Action: This message will normally be coupled with one or more other messages that detail the nature of the problem for each existing resource of the type.

CRS-02806: Failed to create stop operation for resource '*string*'

Cause: Creating the stop operation did not complete successfully.

Action: Error message(s) preceding this one should have more details about the problem. Try shutting down the resource manually, or retrying with the force option.

CRS-02807: Resource '*string*' failed to start automatically.

Cause: This message comes up when the automatic start for the resource has failed during a reboot of the cluster node or restart of the clusterware stack. See previous resource specific messages for more details.

Action: Use 'crsctl start resource' to start the resource manually.

CRS-02809: Failed to update cluster configuration policy set. Details at *string* in *string*.

Cause: Could not update repository with new configuration data.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02810: Cluster configuration policy set is corrupted. Details at *string* in *string*.

Cause: Could not read the configuration data from the repository.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02814: Server category '*string*' does not exist.

Cause: A request was received that referenced a non-existing server category.

Action: Make sure a registered server category is used.

CRS-02815: Server category '*string*' is already registered.

Cause: A request to register a server category with a duplicate name was received.

Action: Use a unique name.

CRS-02816: Server category '*string*' cannot be unregistered as it is referenced by resource '*string*'.

Cause: The server category you are trying to remove has references to it.

Action: Make sure the server category you are trying to remove is not referenced by other entities.

CRS-02817: Server category '*string*' cannot be unregistered as it is referenced by server pool '*string*'.

Cause: The server category you are trying to remove has references to it.

Action: Make sure the server category you are trying to remove is not referenced by other entities.

CRS-02818: Failed to delete server category '*string*' from repository. Details at *string* in *string*.

Cause: Could not update repository with server category details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02819: Failed to save server category '*string*'. Details at *string* in *string*.

Cause: Could not update repository with server pool details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02820: Required attribute '*string*' is missing for configuration policy '*string*'.

Cause: A required attribute was not specified.

Action: Make sure the attribute is specified.

CRS-02821: Fatal error while validating configuration policy '*string*'.

Cause: There's a problem with the configuration data in the specified policy.

Action: This message always follows the actual error description.

CRS-02822: Server pool '*string*' is not declared in the policy set.

Cause: Each configuration policy may only define server pool. configuration for the pools declared to be a part of the policy set.

Action: Either remove the server pool from the policy, change its name, or extend the policy set to include the pool's name.

CRS-02823: The new active policy name '*string*' was not found.

Cause: An attempt to activate non-existent policy was made.

Action: Use a registered policy's name instead.

CRS-02824: '*string*' is reserved for a built-in configuration policy and cannot be used.

Cause: This name is reserved for a built-in object.

Action: Use a different name.

CRS-02825: Configuration policy '*string*' already exists.

Cause: A configuration policy name specified was defined multiple times.

Action: Make sure each policy is only defined once.

CRS-02826: Server pools cannot be removed from the configuration policy set without activating a new policy at the same time.

Cause: Server pools can be removed from the configuration policy set only if the command also activates a policy.

Action: To remove the server pools from the system, activate a new policy with the update. To remove the server pools from the policy control only, resubmit with the -ksp option.

CRS-02828: Failed to stop resource while attempting CARDINALITY modification

Cause: An attempt to stop a resource during CARDINALITY modification failed.

Action: Use 'crsctl stop resource' to stop the resource manually and then retry the update operation.

CRS-02829: Update operation cannot proceed because it would need to stop resources.

Cause: An update to CARDINALITY would require the operation to stop resources.

Action: Either manually stop enough resources using 'crsctl stop resource' or specify the force option to have them selected for you.

CRS-02830: A server category name may not be empty or contain spaces.

Cause: A name must not be empty or contain space character(s).

Action: Specify a valid name.

CRS-02831: Either '*string*' or '*string*' may be specified, but never both.

Cause: Two mutually exclusive attributes were used at the same time, which is not allowed.

Action: Use either one or the other.

CRS-02833: Either '*string*' or '*string*' must be specified, or both.

Cause: At least one of the two attributes must have a value.

Action: Specify a value for either or both.

CRS-02834: One of '*string*', '*string*' or '*string*' must be specified when '*string*' is '*string*'.

Cause: One attribute of the three is required for this configuration.

Action: Specify a value for one attribute of the three.

CRS-02835: Resource '*string*' cannot start on server '*string*' as the server does not belong to the resource's server category.

Cause: This resource may only run on the servers that belong to the server category of the resource.

Action: Pick a server that belongs to the category.

CRS-02836: When using a server category, the resource must have '*string*' attribute set to '*string*'.

Cause: An attempt was made to register a resource that uses a server category and yet is not configured to utilize any available server.

Action: Set the attribute to the required value.

CRS-02837: There are no servers that belong to the server category '*string*' of resource '*string*'.

Cause: The resource cannot be started as there are no available servers that belong to its category.

Action: Add servers to the cluster or change the category to be more inclusive.

CRS-02838: '*string*' is not a valid attribute of server categories.

Cause: An attempt was made to set a value for an attribute which does not belong to server categories.

Action: Use a valid attribute.

CRS-02839: Cluster Ready Services' active version is below required level of 'string'.

Cause: An attempt was made to use functionality that is only available starting from the specified active version.

Action: Upgrade to the minimum required version.

CRS-02840: Resource instance 'string' does not exist.

Cause: A request was received that referenced a nonexistent resource instance.

Action: Make sure a registered resource instance is used.

CRS-02841: 'string' must be a resource instance.

Cause: This command may only be issued on a resource instance but the supplied reference was to an object of a different type.

Action: Use a registered resource instance.

CRS-02842: Action 'string' on resource 'string' timed out.

Cause: The action did not complete within the allotted time.

Action: None

CRS-02843: Unable to complete processing of the 'string' action for resource 'string' on server 'string' as Cluster Ready Services is not reachable.

Cause: The processing of the specified action was aborted because Cluster Ready Services was no longer reachable.

Action: Unless the clusterware stack was stopped or the server was rebooted, Cluster Ready Services will restart momentarily. The action can be retried thereafter.

CRS-02844: Waiting for resource 'string' to start on server 'string'.

Cause: The resource is now expected to start on the server.

Action: None

CRS-02845: Waiting for resource 'string' to stop on server 'string'.

Cause: The resource is now expected to stop on the server.

Action: None

CRS-02846: There is no active action on resource instance 'string'

Cause: An attempt was made to finish an action on the resource instance while no corresponding attempt to start the action was found or an attempt to start the action was timed out before a request to finish the action arrived.

Action: Check the state of the resource and re-do the complete cycle if needed.

CRS-02847: Authorization failure: OS User 'string' does not exist on server 'string'

Cause: The specified operating system user does not exist on the specified server. Cluster Ready Services requires that all users used by the resource it manages exist on each server of the cluster.

Action: Add the specified operating user on the specified server.

CRS-02848: Error while reading resources: Resource: string . Error: string Details at string in string.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02849: Authorization failure: Resource [*string*]

Cause: A resource operation could not be performed because authorization checking failed.

Action: Check the ownership, group, and permissions associated with the resource and ensure that the associated operating system user and group definitions are consistent on all cluster nodes.

CRS-02850: Start of '*string*' on '*string*' has been delayed to maintain concurrency limit of *number*.

Cause: The configured concurrent start action limit was reached.

Action: The start action will automatically resume as soon as possible.

CRS-02851: Stop of '*string*' on '*string*' has been delayed to maintain concurrency limit of *number*.

Cause: The configured concurrent stop action limit was reached.

Action: The stop action will automatically resume as soon as possible.

CRS-02852: Conflicting specification of server pool and server.

Cause: Server pool name and server name were specified in a start command.

Action: Specify either server pool name or servername, not both.

CRS-02853: Unknown server pool name: '*string*' .

Cause: The server pool name given to start/stop command did not exist.

Action: Specify a valid server pool name.

CRS-02854: Resource '*string*' cannot be started in a server pool because it is a local resource.

Cause: A local resource name was given to start/stop command.

Action: Specify a cluster resource name.

CRS-02855: Resource '*string*' is not configured to run in server pool '*string*'.

Cause: An attempt was made to start or stop the resource in a server pool where resource was not configured to run.

Action: Modify resource's attribute to have this server pool or specify a different resource.

CRS-02856: Unknown names for server pools or for filters.

Cause: An invalid value was supplied for the '-s' or '-w' argument in a start/stop command or to the API calls.

Action: Provide valid server pool names or filter attributes.

CRS-02857: Cannot stop resource '*string*' because it is not running in server pool '*string*'.

Cause: A resource stop request specified a server pool on which the resource is not running.

Action: Check the current state of the resource; it should no longer be running in that server pool.

CRS-02858: User '*string*' does not have permission to run action '*string*' on resource '*string*'.

Cause: A username and/or group was specified for the action permissions, but the current user is not included in the specification.

Action: Use 'crsctl modify' to update the ACTIONS attribute for this resource to add the current user to the permission list for this action, or remove all user and group specifications to enable universal access.

CRS-02859: Cannot run action '*string*' on resource '*string*' because the resource is not online.

Cause: A resource action operation could not be performed because the resource was not online.

Action: Ensure the resource is online before attempting to run an action.

CRS-02862: Cannot update the ACTIONS attribute, because the input is not valid

Cause: A resource update operation could not be performed, because the input value is not vvalid.

Action: Ensure the ACTIONS name attribute is specified in 32 or less US7ASCII characters. Ensure users and groups are prefixed with the appropriate identifier, either "user:" or "group:"

CRS-02863: Cannot restart resource '*string*' because it is not running.

Cause: A resource restart action was not performed because the resource is not running.

Action: Ensure that the resource which needs to be restarted is up and running.

CRS-02865: Resource '*string*' cannot be started on server '*string*' because it has an exclusion dependency with resources of type '*string*'.

Cause: An exclusion dependency was configured without the right to preempt a running resource.

Action: Pick a different server or stop the other resource(s) on this server.

CRS-02866: Resource '*string*' cannot be started on server '*string*' because it has an exclusion dependency with resources of type '*string*' and the force option was not specified.

Cause: An exclusion dependency was configured but the force option was not used to stop the running resource(s).

Action: Either pick a different server or use the force option.

CRS-02867: Server pool '*string*' cannot be added to the policy set.

Cause: The Generic server pool as well as its sub-pools cannot be added to the policy set.

Action: Remove the pool from SERVER_POOL_NAMES attribute.

CRS-02868: '*string*' is not a valid attribute of configuration policies.

Cause: An attempt was made to set a value for an attribute which does not belong to configuration policies.

Action: Use a valid attribute.

CRS-02869: '*string*' is not a valid attribute of the policy set.

Cause: An attempt was made to set a value for an attribute which does not belong to the policy set.

Action: Use a valid attribute.

CRS-02870: An OCR write operation has failed during upgrade of the object schema.

Cause: While performing CRS upgrade as part of the clusterware upgrade, an OCR write operation has failed.

Action: Examine the clusterware alert log for more information about OCR failures.

CRS-02871: Resource '*string*' cannot be started on server '*string*' because it has an exclusion dependency with resource '*string*'.

Cause: An exclusion dependency was configured between the two resources without the right to preempt a running resource.

Action: Pick a different server or stop the other resource on this server.

CRS-02872: Resource '*string*' cannot be started on server '*string*' because it has an exclusion dependency with resource '*string*' and the force option is not used.

Cause: An exclusion dependency was configured between the two resources but the force option was not used to stop the running resource.

Action: Either pick a different server or use the force option.

CRS-02874: Could not restart resource '*string*' on server '*string*'.

Cause: A required part of restart operation has failed.

Action: Check the preceding errors to see the cause and take appropriate action.

CRS-02875: Failed to record shutdown information in OLR.

Cause: An attempt to record information during a normal shutdown failed. This will cause the shutdown to be regarded as unplanned on the next startup, and may lead to some driver resources being disabled.

Action: Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02876: Disabled resource '*string*' due to OHASD crashes

Cause: OHASD crashes have exceeded the autostart thresholds set for this resource, and the resource has been disabled as a result.

Action: Use crsctl config to look up whether a resource has been disabled, and crsctl enable/disable to manually change the status.

CRS-02877: Owner '*string*' of the entity '*string*' does not belong to the '*string*' group.

Cause: The owner of an entity being configured was not a member of the required group.

Action: The user, issuing the command, needs to be configured to be in the group.

CRS-02878: Failed to restart resource '*string*'

Cause: An attempt to start the resource has failed.

Action: If failover is not enabled, try manually starting the resource on a different server. If failover is enabled, the resource has been failed over, and any problems are reported in subsequent messages.

CRS-02879: Cannot update the ALERT_TEMPLATE attribute, because the input is not valid

Cause: A resource update operation could not be performed, because the input value is not valid.

Action: Ensure that valid attributes are specified in a space separated list.

CRS-02880: Incorrect specification of dependency '*string*', only one modifier may be specified.

Cause: During resource update, an exclusion dependency specified more than the maximum of one modifier.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02881: Additional exclusion dependency discovered on resource '*string*' within the same dependency tree.

Cause: During resource update, a dependency specified more than the maximum of one exclusion per hard dependency tree.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02882: Unable to place an instance of resource '*string*' due to an exclusion dependency on '*string*'.

Cause: The resource cannot be placed because of the constraints imposed by its start dependencies.

Action: Either change the resource start dependencies or re-evaluate the request.

CRS-02883: Resource '*string*' failed during Clusterware stack start.

Cause: During Clusterware startup, automatic startup of the indicated resource succeeded but the resource failed before Clusterware startup completed.

Action: Retry starting Clusterware.

CRS-02884: Server '*string*' cannot be used for resource placement currently.

Cause: The server is currently configured such that it cannot be used for resource placement.

Action: Use a different server.

CRS-02885: cannot stop the last server in Domain Service Cluster with active member cluster named '*string*'

Cause: An attempt to stop the last server in the Domain Service Cluster was rejected because this cluster was still serving the indicated client cluster and perhaps other member clusters."

Action: Stop the active member clusters that use this Domain Service Cluster first, or specify the '-f' option."

CRS-02890: An administrator-managed database cannot be configured on a non-Hub server '*string*'.

Cause: An attempt was made to register a database on a server whose role is not 'hub' or the node is currently down.

Action: Use only online servers configured as Hub servers.

CRS-02891: Policy-managed databases can only be configured in server pools that use *'string'* category.

Cause: An attempt was made to configure a database using a server pool that does not currently use a category that includes only nodes with the specified role.

Action: Either use an existing server pool that uses such a category or create and use a server pool with such category.

CRS-02892: In order to use *'string'* in resources of *'string'* type, *'string'* must be set to *'string'* and *'string'* must be set to *'string'*.

Cause: An attempt was made to use an attribute such that other attributes must be set to specific values.

Action: Resubmit with the mentioned attributes set to the mentioned values.

CRS-02893: Cannot stop ASM instance on server *'string'* because it is the only instance running.

Cause: An attempt was made to stop the last ASM instance in the cluster, which would lead to a complete cluster outage.

Action: Reissue the request when there are at least two ASM instances running in the cluster.

CRS-02894: Cannot stop the ASM resource because it will lead to a complete cluster outage.

Cause: An attempt was made to stop all ASM instances in the cluster, which would lead to a complete cluster outage.

Action: Reissue the request by specifying a concrete node name.

CRS-02895: DEGREE attribute is desupported.

Cause: An attempt was made to add a resource with DEGREE attribute.

Action: Remove the DEGREE attribute from the add command.

CRS-02896: Cannot restart resource *'string'* because the restart capability of this resource is disabled.

Cause: The resource did not restart automatically because the attribute "ALLOW_RESTART" of this resource was set to "useronly".

Action: Set the attribute "ALLOW_RESTART" of this resource to "default" or start the resource manually.

CRS-02900: User *'string'* does not exist on node *'string'*.

Cause: An attempt was made to add an unknown username to the CRS Administrator list.

Action: Reissue the command with a known username. Or create the user on the node(s) specified, and reissue the command.

CRS-02901: Not authorized to modify the CRS Administrator list.

Cause: An attempt was made to modify the CRS Administrator list by a user not belonging to the CRS Administrator list.

Action: Either acquire the role of cluster administrator or have one modify the CRS Administrator list for you.

CRS-02904: Parameter *'string'* for *'relocate'* is not a singleton resource.

Cause: A relocate request specified a resource that is not singleton.

Action: Specify a singleton resource or a filter that resolves to an instance of the resource.

CRS-02905: Server pools in a policy do not have ACL attribute

Cause: A 'crsctl modify serverpool' command specified an ACL attribute with -policy or -all_policies.

Action: Omit ACL from the attributes.

CRS-02906: Server category '*string*' cannot be unregistered as it is referenced by server pool '*string*' in policy '*string*'.

Cause: The server category you are trying to remove has references to it in a policy.

Action: Make sure the server category you are trying to remove is not referenced by other entities in the policy.

CRS-02907: Resource '*string*' is not completely configured, and hence cannot be operated upon.

Cause: A request was made without specifying the PID_FILES or EXECUTABLE_NAMES.

Action: Specify a value for PID_FILES and/or EXECUTABLE_NAMES attribute, or specify values for STOP_PROGRAM, CHECK_PROGRAM and CLEAN_PROGRAMS attributes. 2908 no longer used

CRS-02909: Server '*string*' cannot be assigned to server pool '*string*' because its current role is not '*string*'.

Cause: An attempt was made to assign a server to the server pool that did not have the specified role. Only servers with the specified role can be assigned to this server pool.

Action: Retry using a different server.

CRS-02910: Unable to register server category '*string*' as this will affect running resources, but the force option was not specified.

Cause: One or more running resources were affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02911: Unable to modify server category '*string*' as this will affect running resources, but the force option was not specified.

Cause: One or more running resources were affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02912: Unable to start resource '*string*' on server '*string*' because resource dependencies require stopping it on a different server.

Cause: A start request failed because resource dependencies would require stopping the resource in order to start it somewhere else.

Action: Manually stop the resource before starting it elsewhere.

CRS-02913: '*autostart delay*' value '*string*' is invalid.

Cause: The command specified an '*autostart delay*' time that was non-numeric or negative.

Action: Specify a non-negative numeric value for the '*autostart delay*' argument.

CRS-02914: 'autostart servercount' value '*string*' is invalid.

Cause: The command specified an 'autostart servercount' value that was non-numeric or negative.

Action: Specify a positive numeric value for the 'autostart servercount' argument.

CRS-02915: Failed to update 'autostart delay' (*string*) or 'autostart servercount' (*string*). Details at *string* in *string*.

Cause: A request to update the automatic start details failed because of incorrect input values.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02917: The '*string*' server pool cannot be removed from the system.

Cause: The command to remove the server pool from the policy set would have caused it to be removed from the system completely.

Action: Reissue the 'crsctl modify policyset' command with the -ksp option.

CRS-02918: Authorization failure: operating system group '*string*' does not exist on server '*string*'

Cause: The specified operating system group does not exist on the specified server. Cluster Ready Services requires that all groups used by the resources it manages exist on each server of the cluster.

Action: Add the specified operating system group on the specified server.

CRS-02919: Resource '*string*' has no instances to act upon.

Cause: An attempt was made to act on a resource that has no resource instances because it is configured to run on servers that have never existed in the cluster.

Action: Retry the command when the resource has instances.

CRS-02920: Unable to activate policy '*string*' because this will affect running resources, but the force option was not specified.

Cause: An attempt to activate a new policy would have affected one or more running resources but the force option was not specified.

Action: Reevaluate the request and if it makes sense, set the force option and resubmit.

CRS-02921: Unable to register policy because attribute '*string*' for resource '*string*' does not have the POLICY_CONFIG flag.

Cause: An attempt was made to specify resource attributes in the policy that do not have the POLICY_CONFIG flag.

Action: Only attributes that can be policy managed and have the POLICY_CONFIG flag can be specified in a policy definition.

CRS-02922: The attribute '*string*' is not supported for resource type '*string*'.

Cause: An attempt to update a CRS resource specified an attribute that is not associated with the resource type.

Action: Specify only attributes that are associated with the type of resource being updated.

CRS-02923: The EXPRESSION attribute cannot accept 'string' as a server configuration attribute.

Cause: An attempt was made to set a server configuration attribute that cannot be used with the EXPRESSION attribute.

Action: Use a valid attribute.

CRS-02924: The EXPRESSION attribute contains invalid value 'string' for server configuration attribute 'string'.

Cause: An attempt was made to set a value which cannot be assigned to a server configuration attribute.

Action: Use a valid value.

CRS-02925: The dependency modification 'string' for the targets 'string' has an unknown dependency or incorrect syntax.

Cause: An attempt was made to modify an existing dependency without providing a known dependency or the correct modification syntax.

Action: Refer to the Oracle Clusterware documentation for an explanation of supported dependencies and the resource dependency modification syntax.

CRS-02926: Cannot find a match for target 'string' in the modification list for dependency 'string'.

Cause: There was no existing dependency that had the same target to be modified.

Action: Supply the correct target for the dependency modification.

CRS-02927: The requested action for the resource 'string' was aborted due to a timeout.

Cause: The timeout specified for a custom action was reached before the action could complete.

Action: Revise the timeout setting and retry the action.

CRS-02928: The dependency on type 'string' cannot be accepted because it is specified multiple times.

Cause: A duplicate type was assigned as a dependency to a resource.

Action: Revise the dependency list to ensure that no duplicate types exist.

CRS-02929: The dependency on resource 'string' cannot be accepted because it is specified multiple times.

Cause: A duplicate resource was assigned as a dependency to a resource.

Action: Revise the dependency list to ensure that no duplicate resources exist.

CRS-02930: The server category 'string' cannot be deleted because it is still a dependency for one or more resources.

Cause: An attempt was made to delete a server category that was still a dependency for one or more resources.

Action: Either modify the dependency attributes of the associated resources or delete those resources and try again.

CRS-02931: Server category 'string' used in dependency 'string' does not exist or is not registered.

Cause: An attempt was made for the current resource to have a dependency on a server category that does not exist.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02932: The dependency on server category '*string*' is not supported for a resource type.

Cause: An attempt to specify a server category dependency for a resource type failed because server category dependency is only supported for a resource.

Action: Omit the server category dependency.

CRS-02933: The server category name for the relation '*string*' is missing.

Cause: The server category name was expected for the resource dependency, but it was not supplied.

Action: Provide the server category name when resubmitting the request.

CRS-02949: The dispersion dependency '*string*' is specified with multiple modifiers.

Cause: An attempt to specify the dispersion dependency failed because multiple modifiers were specified where at most one is supported.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02961: Consistency problem in registry while processing category '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02962: Consistency problem in registry while processing server pool '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02963: Consistency check for all entities managed by the Cluster Ready Services has completed successfully.

Cause: None.

Action: None

CRS-02964: cannot run resource '*string*' on server '*string*' because the server needs an additional *number* MB of memory

Cause: An attempt to start a resource on a server failed because the server needed the indicated additional memory to satisfy the memory requirements of the resource.

Action: Change the placement policy of the resource to expand the server selections, change the memory requirement of the resource, or add more memory to the server to which the resource is directly assigned.

CRS-02965: cannot run resource '*string*' on server '*string*' because the server needs *number* additional CPUs

Cause: An attempt to start a resource on a server failed because the server needed additional CPUs to satisfy the CPU requirement of the resource.

Action: Change the placement policy of the resource to expand the server selections, change the CPU requirement of the resource, or add more CPUs to the server to which the resource is directly assigned.

CRS-02966: There are no servers satisfying the placement policy for resource '*string*'.

Cause: An attempt to start a resource on servers that were available according to the placement policy failed because none of those servers could satisfy the requirements of the resource.

Action: Change the placement policy of the resource to expand the server selections, change the requirements of the resource, or upgrade the configurations of the eliminated servers.

CRS-02967: Resource instance '*string*' is unable to start because it is scheduled for deletion.

Cause: An online relocate attempt on this resource failed to stop the specified resource instance. The resource instance is scheduled for deletion when it stops.

Action: Use '`crsctl stop resource`' to stop the resource instance manually.

CRS-02968: authorization failure updating attribute '*string*'

Cause: Write access permission was not granted to this user to modify the attribute.

Action: Either omit the attribute, or issue the command from an operating system user who has the required permission.

CRS-02969: cannot add resource '*string*' because a resource group exists with the same name

Cause: An attempt to add a resource failed because a resource group with the same name was already registered.

Action: Reissue the command specifying a different name for the new resource.

CRS-02970: Value '*string*' is invalid, must be one of: '*string*', '*string*', '*string*', or '*string*'.

Cause: An attempt to change an attribute value of a resource was rejected because the indicated value was specified, when it must have been one of the other values indicated in the message.

Action: Retry modifying the resource attribute value specifying one of the allowed values as shown in the error message.

CRS-02971: cannot run resource ora.asm on server '*string*' on quarantined site '*string*'

Cause: An attempt to run resource ora.asm on the indicated server was rejected because that server was in the indicated site, which was quarantined so that no ASM client or instance could be run there.

Action: Unquarantine the site before attempting to run the resource.

CRS-02972: There are no servers satisfying the CPU and memory requirements for resource '*string*'.

Cause: An attempt to start the indicated resource failed because there were no servers available that meet the CPU-count and memory requirements of that resource.

Action: If possible, change the CPU or memory requirements of the resource or add more CPUs or memory to the servers in the cluster.

CRS-02973: The CPU count '*number*' exceeds the maximum value of '*number*'.

Cause: An attempt to modify a resource failed because the specified CPU count exceeded the maximum value indicated in the message.

Action: Retry modifying the resource attribute value specifying a value less than the maximum value as shown in the message.

CRS-02974: unable to act on resource '*string*' on server '*string*' because that would require stopping or relocating resource '*string*' but the -force option was not specified

Cause: The attempted operation on the indicated resource and server was rejected because it would have required stopping or relocating the additional resource as shown. The -force option would have been required to allow the additional effects.

Action: Reevaluate the request and, if appropriate, specify the -force option and resubmit.

CRS-02975: duplicate attempt to complete Transparent HA for resource '*string*' rejected

Cause: An attempt to end the transparent High Availability (HA) action on the indicated resource instance was rejected because the same action was already pending on that resource instance."

Action: None

CRS-02976: The workload maximum memory '*number*' MB exceeds the available memory size of '*number*' MB.

Cause: An attempt to modify a resource failed because the specified workload maximum memory exceeded the available value indicated in the message.

Action: Retry modifying the resource attribute value specifying a value less than or equal to the available value as shown in the message.

CRS-02977: The specified value '*number*' exceeds the available CPU capacity on node '*string*'

Cause: An attempt to modify the attribute WORKLOAD_CPU_CAP was rejected because the new value would have caused the total CPU utilization to exceed 100% on the node given in the message.

Action: Check the CPU utilization on the mentioned node and re-issue the modify command with an appropriate value.

CRS-03501: The Cluster Health Analysis service started on host *string*.

Cause: The Cluster Health Analysis service was successfully started on the listed node.

Action: None

CRS-03502: The Cluster Health Analysis service aborted on host *string*. Details at *string* in *string*.

Cause: The Cluster Health Analysis service aborted due to an internal error.

Action: Determine whether the Cluster Health Analysis service has automatically restarted by checking the Oracle Clusterware alert log. If the problem persists, contact Oracle Support Services.

CRS-03503: The Cluster Health Analysis service on host *string* is shutting down.

Cause: The Cluster Health Analysis service on the listed node was terminated.

Action: None

CRS-04000: Command *string* failed, or completed with errors.

Cause: The specified command did not complete successfully. If the command performs multiple operations internally, one or more of those operations experienced an error that is reported in a previous message.

Action: Examine the error message(s) preceding this message and correct the problem(s) they describe.

CRS-04016: Key '*string*' is missing in the OCR.

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04017: Failed to get the value for key '*string*' from OCR.

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04038: Cannot delete invalid user '*string*' from CRS Admin list.

Cause: An attempt was made to delete an invalid username from the CRS Admin list.

Action: Reissue the command with a valid username.

CRS-04040: The value of attribute '*string*' contains the following invalid characters: '*string*'

Cause: An attribute value with invalid characters was specified.

Action: Reissue the command and provide valid characters for the attribute value.

CRS-04044: CRS Administrator List: *string*

Cause: Output message, not an error.

Action: None

CRS-04046: Invalid Oracle Clusterware configuration.

Cause: The Oracle Clusterware configuration is invalid.

Action: Configure Oracle Clusterware or Oracle Restart.

CRS-04047: No Oracle Clusterware components configured.

Cause: No Oracle Clusterware components have been configured.

Action: Configure Oracle Clusterware or Oracle Restart.

CRS-04050: Rejecting the command because the cluster active version [*string*] is less than the required cluster active version [*string*]

Cause: The command was rejected because the cluster active version was less than the required cluster active version.

Action: Reissue the command with a valid cluster active version.

CRS-04200: Failed to initialize a security context during wallet IPMI credentials creation.\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04201: Hash context initialization failure during wallet IPMI credentials creation\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04202: String hashing failed during wallet credentials creation\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04203: Hashing creation error during wallet credentials creation\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04204: Failed to initialize the IPMI credentials wallet: *string*\n

Cause: While trying to initialize the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04205: Failed to open the IPMI credentials wallet. The wallet does not exist.\n

Cause: The wallet does not exist.

Action: Configure the wallet for the IPMI device using 'crsctl set'\n"

CRS-04206: Error reading IPMI credentials wallet: '*string*'\n

Cause: While trying to read the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04207: Error writing IPMI credentials wallet: '*string*'\n

Cause: While trying to write the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04208: Unexpected error encountered during lookup of IPMI credentials in the wallet\n

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using 'crsctl set' and then retry the operation. If the retry fails call Oracle Support Services.

CRS-04209: IPMI credentials not contained in the wallet\n

Cause: The wallet has not been configured.

Action: Configure the wallet for the IPMI device using 'crsctl set'\n

CRS-04210: Failed to obtain the length of IPMI credentials while accessing the wallet.\n

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call Oracle Support Services.

CRS-04211: Failed to allocate memory\n

Cause: Insufficient system memory resources.

Action: Correct the system memory resources problem and retry.

CRS-04212: Failed to obtain the secret from the wallet.\n

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call Oracle Support Services.

CRS-04213: Secret from wallet has incorrect size\n

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call Oracle Support Services.

CRS-04214: crsctl *string* and *string* wallet versions of IPMI do not match.\n

Cause: A mismatch occurred between the IPMI versions of crsctl and the Cluster Synchronization Services Daemon.

Action: Check proper installation and configuration of crsctl and the Cluster Synchronization Services Daemon.

CRS-04215: Wallet secret encoding error\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04216: Unexpected error configuring the wallet contents\n

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call Oracle Support Services.

CRS-04217: Unexpected error saving IPMI credentials wallet: *string*\n

Cause: While trying to save the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04218: Unable to access an IPMI device on this system\n

Cause: A test for the availability of an IPMI device failed. This can occur if: - the IPMI device driver is not installed, - the installed device driver is not supported by Oracle, - IPMI is not supported on this platform or operating system, - no IPMI device is present, or - an IPMI device is present but not configured.

Action: Verify that IPMI hardware supporting IPMI version 1.5 or greater is present and supported on this server, that the IPMI device is configured and the device driver is properly installed.

CRS-04219: Failed to open the wallet. User must be the creator of the wallet: *string* \n

Cause: Not the owner/creator of the wallet. The cluster wallet subsystem returned an error included with this message.

Action: Retry as the owner/creator of the wallet. If necessary, also see the documentation and follow the directions for the displayed error.

CRS-04221: Must specify a password\n

Cause: No password entered in response to password prompt.

Action: Specify a password which matches the local servers IPMI BMC password.

CRS-04222: Supplied password was greater than *number* bytes\n

Cause: The password specified was too long for the IPMI device.

Action: Supply a password with a length no greater than the indicated size while still matching the password used to configure the IPMI device. Retry.

CRS-04223: Username is greater than *number* bytes\n

Cause: The username specified was too long for the IPMI device.

Action: Supply a username with a length no greater than the indicated size while still matching the username used to configure the IPMI device. Retry.

CRS-04224: Unable to communicate with the Cluster Synchronization Services daemon to update IPMI values.\n

Cause: crsctl modified the IPMI credential wallet but could not notify the Cluster Synchronization Services Daemon.

Action: Retry after assuring the Cluster Synchronization Services Daemon is functioning by executing csscheck.

CRS-04225: Unexpected authorization error while creating the IPMI credentials wallet: *string*\n

Cause: Error creating the IPMI credentials wallet. The cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error and retry.

CRS-04226: Unexpected authorization error while saving the IPMI credentials wallet: *string*\n

Cause: While attempting to save the IPMI credentials wallet, the cluster wallet subsystem returned an authorization error. The text of the authorization error text is included with this message. This error was unexpected, and might have been due to an internal error, because wallet creation should be authorized for anyone, and, if the wallet was pre-existing, it had already been read after proper authorization checks.

Action: Consult the documentation for the included message to investigate the root cause of the authorization error, and retry the "set" operation if indicated. If this fails, contact Oracle Support Services.

CRS-04227: Configuration data stored but IPMI IP address is required to complete the change. The change cannot be validated until the information is complete.\n

Cause: Not proceeding with Client's IPMI login change request because all information such as IPMI username, password and IP address need to be present.

Action: Execute 'crsctl set css ipmiaddr' from crsctl.

CRS-04228: Value of attribute '*string*' is missing\n

Cause: The user did not provide a value for the attribute.

Action: Provide a value using the format *attrName=value*, where *value* may be empty single quotes.

CRS-04229: The IPMI information change was successful\n

Cause: The IPMI address and authorization information have been validated and the change completed.

Action: None required.

CRS-04230: A device was found where the IPMI device should be, but the device is not an IPMI device\n

Cause: The IPMI driver may not be configured or supported by this host.

Action: Check the configuration of the IPMI driver and verify the server's support of an IPMI version 1.5 or greater device.

CRS-04231: IPMI device and/or driver found

Cause: An IPMI device and/or device driver was identified on the machine. Detection mechanisms for IPMI hardware vary by platform.

Action: None required.

CRS-04232: Configuration data stored but IPMI authorization information is required to complete the change. The change cannot be validated until the information is complete.

Cause: Not proceeding with Client's IPMI login change request because all information (IPMI username, password and IP address) need to be present.

Action: Execute 'crsctl set css ipmiadmin' from crsctl.

CRS-04233: New IPMI configuration data stored, but failed validation by remote node.

Cause: The supplied configuration data was stored in the Oracle registry, but the resulting configuration could not be used for IPMI access by a remote node. The stored IP address and/or IPMI admin credentials is/are incorrect.

Action: The validating node is identified in the CRS alert log, and further details can be found in the alert log on that node. Verify the credentials for the local IPMI device and reset the configuration using commands 'crsctl set css ipmiadmin' and 'crsctl set css ipmiaddr'

CRS-04234: IPMI configuration unset and registry entries deleted.

Cause: Requested operation successful. However, if the CRS stack was able to access and use the deleted configuration data, it will continue to do so until it is restarted.

Action: None required. Enter new configuration data or restart the CRS stack if desired.

CRS-04235: Failed to delete the IPMI configuration from the Oracle Registry: 'string'

Cause: An error was encountered in the Oracle registry sub-system while trying to clear IPMI configuration and delete the IPMI configuration entries. The detailed error message is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04236: Oracle Clusterware configured to use IPMI

Cause: The Oracle Registry contains complete configuration data for IPMI.

Action: None required.

CRS-04237: Oracle Clusterware is not fully configured to use IPMI

Cause: The Oracle Registry does not contain complete configuration data for IPMI.

Action: None required.

CRS-04251: Failed to change the discovery string

Cause: An internal error happened during this operation.

Action: Contact Oracle Support Services.

CRS-04252: Failed to update the profile with the new discovery string

Cause: An internal error happened when updating the discovery string in the profile.

Action: Contact Oracle Support Services.

CRS-04253: The discovery string can not be changed because the voting files are on ASM\n

Cause: Changing the discovery string is allowed only if the voting files are not on ASM.

Action: None

CRS-04254: The discovery string has already been set to this value\n

Cause: The value being passed is the same as the current discovery string.

Action: Pass a different discovery string if necessary.

CRS-04255: Not able to find the current configured voting files with the provided discovery string\n

Cause: The supplied discovery string does not discover the voting files that are currently configured.

Action: Pass a different discovery string that includes the location of the current configured voting files.

CRS-04256: Updating the profile\n

Cause: An update to the profile is being performed.

Action: None

CRS-04257: Voting file discovery string successfully replaced\n

Cause: A request to replace a discovery string completed.

Action: None

CRS-04258: Addition and deletion of voting files are not allowed because the voting files are on ASM\n

Cause: A voting file add or delete request was issued, but voting files have been configured on ASM storage. Once voting files are configured for ASM, changes in the configuration can be made only with 'crsctl replace votedisk'.

Action: Use 'crsctl replace votedisk' to modify the voting file configuration.

CRS-04259: Only one ASM diskgroup may be specified\n

Cause: If the voting files will be on ASM, no more than one diskgroup should be specified.

Action: Specify the correct ASM diskgroup.

CRS-04260: Voting file *string* is already configured\n

Cause: The location provided is already configured as a voting file.

Action: Specify another location that is not a current voting file.

CRS-04261: Diskgroup *string* is already configured with voting files\n

Cause: The diskgroup name provided is already configured with voting files.

Action: Specify another location for the voting files.

CRS-04262: Failure when retrieving information from the GPnP profile\n

Cause: An internal error happened when accessing GPnP profile.

Action: Contact Oracle Support Services.

CRS-04263: This operation is not allowed\n

Cause: Replacing a list of non-ASM voting files with a different list of voting files is not supported.

Action: To change the list of non-ASM voting files and add new voting files, use 'crsctl add css votedisk *vfile* ... *vfile*'.

CRS-04264: The operation could not be validated\n

Cause: An internal error happened during the validation of the discovery string.

Action: Contact Oracle Support Services.

CRS-04265: The operation cannot be performed because the profile is busy with another operation\n

Cause: Another operation on the profile is taking place.

Action: Let the other operation finish and retry.

CRS-04266: Voting file(s) successfully replaced\n

Cause: A request to replace a voting files(s) completed.

Action: None

CRS-04267: Error while updating the profile with ASM discovery string\n

Cause: An internal error happened while updating the ASM discovery string.

Action: Contact Oracle Support Services.

CRS-04268: '-name' option is allowed only with APPQOSDB or CVUDB type wallets

Cause: The '-name' option was specified in a wallet command for other than APPQOSDB or CVUDB type wallet.

Action: Use the '-name' option only for actions on APPQOSDB or CVUDB type wallets.

CRS-04269: Successful get priority *number string* for Cluster Synchronization Services.\n

Cause: The 'get' operation was performed successfully.

Action: None

CRS-04271: Voting file creation in other than an ASM disk group prohibited in this cluster.\n

Cause: An attempt was made to create voting files outside the ASM disk group.

Action: Specify an ASM disk group for voting file creation or replacement.

CRS-04272: error while identifying voting files in use\n

Cause: More than one voting file was identified for the cluster.

Action: Contact Oracle Support Services.

CRS-04273: Creation of voting files in an ASM disk group not allowed using the command 'crsctl add votedisk'.\n

Cause: An attempt was made to create voting file in the ASM disk group with the command 'crsctl add votedisk'.

Action: Use 'crsctl replace votedisk' to add or replace the voting files in ASM disk group.

CRS-04274: Command not supported in this cluster.\n

Cause: An attempt was made to add voting file(s) in a client cluster with the command 'crsctl add votedisk'.

Action: Use 'crsctl replace votedisk' to add or replace the voting file in client clusters.

CRS-04275: Command 'crsctl add css votedisk' command is invalid.\n

Cause: An attempt to add a voting file using 'crsctl add css votedisk' was rejected because voting files are only supported on ASM disk group. Changes in configuration can be made only with 'crsctl replace votedisk'.

Action: Use 'crsctl replace votedisk' to add the voting files.

CRS-04276: Command 'crsctl delete css votedisk' command is invalid.\n

Cause: An attempt to delete a voting file using 'crsctl delete css votedisk' was rejected because voting files are present in ASM disk group.

Action: Use 'crsctl replace votedisk' to replace the voting files.

CRS-04399: Command no longer supported. Use 'crsctl get tracefileopts css' or 'crsctl set tracefileopts css' instead.\n

Cause: The specified command is no longer supported and has been replaced.

Action: Use command 'crsctl get tracefileopts css' or 'crsctl set tracefileopts css'. For the complete syntax enter 'crsctl get tracefileopts -help' or 'crsctl set tracefileopts -help'.

CRS-04402: The CSS daemon was started in exclusive mode but found an active CSS daemon on node *string*, number *string*, and is terminating

Cause: The CSS daemon was started in exclusive mode, which requires that the clusterware stack is down on all other nodes to ensure data integrity. A CSS daemon was detected on another node, so the CSS daemon on this node is terminating.

Action: If this message displays as part of the install process, no action is required, otherwise stop the Oracle clusterware stack that is running on the indicated node. The name and number of the active node may be unknown.

CRS-04404: The following nodes did not reply within the allotted time:\n*nstring*

Cause: The clusterized command timed out before the specified nodes responded to the command.

Action: Check if the nodes are online; also check for communications problems. Consider issuing the command locally on the specified node(s).

CRS-04405: The following nodes are unknown to Oracle High Availability Services:\n*nstring*

Cause: The local Oracle High Availability Services is not in contact with Oracle High Availability Services on the specified nodes.

Action: Check if the nodes are online and Oracle High Availability Services is running. Check for communications problems and consider issuing the command locally on the specified node(s).

CRS-04406: Oracle High Availability Services synchronous start failed.

Cause: A start of Oracle High Availability Services with the '-wait' or '-waitas' option did not complete successfully. This message is preceded by others describing errors that occurred.

Action: Examine the error messages preceding this message and correct the problems they describe.

CRS-04407: Values bigger than 10 are not allowed for parameter *string*.\n

Cause: This parameter does not allow values higher than 10.

Action: Use a value between 0 and 10.

CRS-04408: Node '*string*' configured role successfully changed; restart Oracle High Availability Services for new role to take effect.

Cause: The 'crsctl set node role' command was run to change the role of a node in a Flex Cluster.

Action: Restart Oracle High Availability Services on the node by running 'crsctl stop crs' and 'crsctl start crs'.

CRS-04409: Node '*string*' is already configured in '*string*' role.

Cause: A 'crsctl set node role' command specified the role already configured for the node."

Action: Specify a different role or a different node, if appropriate.

CRS-04411: The role of node *string* cannot be converted to 'leaf'.

Cause: An attempt was made to modify the role of the last remaining configured 'hub' node to 'leaf' node, which is not allowed or the node is already a 'leaf' node."

Action: If role of this node must to be modified to 'leaf', first bring up another node as a 'hub' node to ensure that there is always at least one 'hub' node.

CRS-04412: Attribute '*string*' does not exist.

Cause: An attempt was made to obtain the value for a nonexistent attribute.

Action: Verify the attribute name was specified as intended or retry with a valid attribute.

CRS-04413: The following message was received from node '*string*':

Cause: The mentioned node has sent a message indicating the status of the executed command.

Action: See the following message for the status.

CRS-04414: The specified 'crsctl set trace' or 'crsctl get trace' command is no longer supported.\n

Cause: A request was made to modify or acquire a component trace level which could not be carried out because the designated component tracing is no longer performed, making the concept of component trace level no longer applicable.

Action: None

CRS-04415: cannot stop all the Hub Nodes when clusterware stack is still up and running on a Leaf Node

Cause: An attempt to stop all the Hub Nodes was rejected because the clusterware stack was still running on a Leaf Node, which needs to be connected to a Hub Node."

Action: Stop all the stacks on the Leaf Nodes first, or keep at least one stack up and running on a Hub Node."

CRS-04416: Server attribute '*string*' successfully changed. Restart Oracle High Availability Services for new value to take effect.

Cause: The 'crsctl set' command was run to change the server attribute of a node in a Flex Cluster, however the new value had not taken effect.

Action: To have the new value take effect restart Oracle High Availability Services on the node by running 'crsctl stop crs' and 'crsctl start crs'.

CRS-04468: could not retrieve the software patch level because host *string* is not a cluster member\n

Cause: The software patch level could not be retrieved for the indicated host because it is not a cluster member.

Action: Specify a host name that belongs to the cluster.

CRS-04477: Oracle Cluster Registry security attributes cannot be initialized.\n

Cause: An attempt to initialize the Oracle Cluster Registry (OCR) security attributes failed because CRS could not obtain either the user name or the user group name.

Action: Report the error to Oracle Support Services.

CRS-04481: Unable to spawn a process.\n

Cause: There was an internal error while spawning a process.

Action: Report the error to Oracle Support.

CRS-04482: A child process terminated abnormally.\n

Cause: A child process exited due to an internal error.

Action: Report the error to Oracle Support.

CRS-04602: Failed *number* to add voting file *string*.\n

Cause: An attempt to add a voting file failed. The number following "Failed" is a return code, which can be: 1 - internal OCSSD server error; 8 - rejected by OCSSD; 15- insufficient privileges for this operation; 19- version incompatibility between client and server;

Action: Respond based on the return code as follows: 15 - adjust privileges or use a different userid 19 - ensure that compatible versions are installed others - report to Oracle Support Services

CRS-04608: Failure *number* with Cluster Synchronization Services while deleting voting disk.\n

Cause: An attempt to delete a voting disk failed. The number following "Failed" is a return code, which can be: 1 - internal OCSSD server error; 8 - rejected by OCSSD; 15- insufficient privileges for this operation; 16- either the specified voting disk does not exist or you tried to delete the last remaining voting disk; 19- version incompatibility between client and server.

Action: Respond based on the return code as follows: 15 - adjust privileges or use a different userid; 16 - review the voting disk configuration displayed by 'crsctl query css votedisk' and correct your request accordingly; 19 - ensure that compatible versions are installed; others - report to Oracle Support Services.

CRS-04615: Software version query failed for node *string*\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04625: Failure to allocate *number* bytes for username.\n

Cause: System is out of memory.

Action: Free up memory on system and retry.

CRS-04626: The requested setting must be between *number* and *number*.\n

Cause: An attempt to change a setting to an out of bounds value.

Action: Retry with the setting within the proper limits.

CRS-04627: Unable to lock the configuration before making changes. *number*\n

Cause: Failure in a CSS API acquiring a lock.

Action: Retry or contact support for information on the error code.

CRS-04628: Change to configuration failed, but was successfully rolled back.\n

Cause: See accompanying messages for explanation of cause.

Action: No action is required. This indicates that no damage was done.

CRS-04629: Unable *number* to mark unformat information on voting file *string*\n

Cause: Probably an unreadable / unwritable voting file was being removed.

Action: If cause is correct, this is ignorable, but not ideal.

CRS-04630: Unable to apply correct permissions to new voting file *string*.\n

Cause: An attempt to set permissions on a new voting file failed. This message is accompanied by others that provide OS-specific details of the error.

Action: Examine the OS-specific error and correct it if possible; otherwise, specify a different voting file.

CRS-04631: Unable *number* to undo initialization of voting file.\n

Cause: Could not roll back format of voting file.

Action: Disk should be cleaned out before an attempt to add again.

CRS-04632: Unable *number* to roll back OCR settings for voting file.\n

Cause: Could not remove temporary changes to OCR adding voting file.

Action: Shut down the cluster and restart. New voting file must be removed with "crsctl delete css votedisk".

CRS-04633: This could take several minutes.\n

Cause: CRS daemons is engaged in an activity take could potentially take a long time.

Action: None

CRS-04634: Retrying stop resources.\n

Cause: crsctl command is trying again to stop resources.

Action: None

CRS-04635: Internal error '*number*' while attempting to send shutdown request

Cause: This is an internal error.

Action: If retrying does not work, contact Oracle support

CRS-04636: Failure *number* in clsvrelversion

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04637: Oracle High Availability Services release version on the local node is [*string*]\n

Cause: Output message, not an error.

Action: None

CRS-04646: Disk group *string* does not exist or is not mounted.\n

Cause: The indicated disk group was not found or was not mounted.

Action: Create or mount the Disk group before use.

CRS-04651: No resources found on server '*string*'.

Cause: The server has no resources associated with it.

Action: Provide a server with resources running.

CRS-04652: Failure *number* in clsvswversion for the local node

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04653: Server name '*string*' contains invalid characters.

Cause: The name provided contains invalid characters.

Action: Use a server name with only alphanumeric characters.

CRS-04654: Server '*string*' could not be found.

Cause: The name provided is not a known server's name.

Action: Use a known server's name.

CRS-04655: Resource '*string*' could not be found.

Cause: The name provided is not a known resource's name.

Action: Use a known resource's name.

CRS-04656: Resource '*string*' is not running on server '*string*'.

Cause: The resource is not on the server the user specified.

Action: User must type a known server.

CRS-04657: Source and destination servers are the same.

Cause: The source and destination servers may not be the same.

Action: Specify a different destination server.

CRS-04658: The clusterware stack on node *string* is not completely down.\n

Cause: There is indication that the clusterware stack is still up.

Action: Shut down the entire clusterware stack before deleting the node.

CRS-04659: Error while trying to unpin node *string*.\n

Cause: An internal error happened during this operation.

Action: Contact Oracle Support Services.

CRS-04660: Could not find node *string* to delete.\n

Cause: The node to be deleted could not be found because it has not been a member of this cluster recently.

Action: Check the name provided. If the name is correct, the node has been automatically deleted because it was inactive for a long time and no further action is required to delete the node from the cluster.

CRS-04661: Node *string* successfully deleted.\n

Cause: A request to delete a node completed.

Action: None

CRS-04662: Error while trying to delete node *string*.\n

Cause: Some internal error happened during this operation.

Action: Contact Oracle Support Services.

CRS-04663: could not find node *string* to pin\n

Cause: The indicated node was not an active Hub node in the cluster.

Action: Ensure that the node name is correct, is a Hub node, and that Oracle Clusterware is running on the node.

CRS-04664: Node *string* successfully pinned.\n

Cause: A request to pin a node completed.

Action: None

CRS-04665: Error while trying to pin node *string*.\n

Cause: An internal error happened during this operation.

Action: Contact Oracle Support Services.

CRS-04666: Could not find node *string* to unpin.\n

Cause: An unpin request specified a node that is not an active hub node in the cluster.

Action: Ensure that the node name is correct, that it is a hub node, and that Oracle Clusterware is running on the node.

CRS-04667: Node *string* successfully unpinned.\n

Cause: A request to unpin a node completed.

Action: None

CRS-04668: This ASM diskgroup does not contain voting disks to be deleted\n

Cause: The ASM diskgroup name provided does not contain voting files.

Action: Provide the right ASM diskgroup name.

CRS-04669: Failed to set parameter *string* to *number* due to conflicting parameter *string*; the new value for *string* must be less than *number*.\n

Cause: An attempt was made to set a new value to a configuration parameter which conflicts with another parameter's current value.

Action: Set the value of this parameter to a lower value than what is indicated in the message.

CRS-04670: Failed to unset parameter *string* due to conflicting parameter *string* currently set to *number*.\n

Cause: An attempt was made to unset a configuration parameter which conflicts with another parameter's current value.

Action: Set the conflicting parameter to a value which can coexist with proposed parameter change before submitting this parameter change.

CRS-04671: This command is not supported for ASM diskgroups.\n

Cause: The command 'crsctl add css votedisk' contains one or more ASM diskgroups in the list of voting files. Voting files may be migrated to and from ASM, but diskgroups cannot be added or deleted.

Action: Use an appropriate 'crsctl set' command to add ASM diskgroups. Use 'crsctl replace votedisk' command to migrate voting files to ASM.

CRS-04672: Successfully backed up the Voting File for Cluster Synchronization Service.\n

Cause: The backup of the voting file completed successfully.

Action: None

CRS-04673: Oracle High Availability Services version on the local node is [string] \n

Cause: Output message, not an error.

Action: None

CRS-04674: Cannot add invalid user 'string' to CRS Admin list.

Cause: An attempt was made to add an invalid username to the CRS Admin list.

Action: Reissue the command with a valid username.

CRS-04677: Failed to get string for Cluster Synchronization Services.\n

Cause: An internal error happened during this operation for Cluster Synchronization Services.

Action: Contact Oracle Support Services.

CRS-04678: Successful get string number for Cluster Synchronization Services.\n

Cause: The 'get' operation was performed successfully.

Action: None

CRS-04681: Failed to unset priority for Cluster Synchronization Services.\n

Cause: An internal error happened during this operation for Cluster Synchronization Services.

Action: Contact Oracle Support Services.

CRS-04682: Successful unset priority for Cluster Synchronization Services.\n

Cause: The 'unset' operation was performed successfully.

Action: None

CRS-04683: failed to set parameter 'string' to number for Cluster Synchronization Services with error number\n

Cause: A 'crsctl set' command failed. The number following "error" is a return code, which can be: 1 - internal OCSSD server error 15 - insufficient privileges for this operation

Action: Respond based on the return code as follows: 15 - Adjust privileges or use a different user ID. others - Contact Oracle Support Services.

CRS-04684: Successful set of parameter string to number for Cluster Synchronization Services.\n

Cause: The 'set' operation was performed successfully for Cluster Synchronization Services.

Action: None

CRS-04687: Shutdown command has completed with errors.

Cause: Processing of a shutdown command has completed with errors.

Action: Refer to preceding error message(s) for information about the errors that occurred.

CRS-04688: Oracle Clusterware is already stopped on server '*string*'

Cause: Oracle Clusterware is not running on the indicated server.

Action: None

CRS-04689: Oracle Clusterware is already stopped

Cause: Oracle Clusterware is not running.

Action: None

CRS-04690: Oracle Clusterware is already running on '*string*'

Cause: Oracle Clusterware is already running on the indicated server.

Action: None

CRS-04691: Oracle Clusterware is already running

Cause: Oracle Clusterware is already running.

Action: None

CRS-04692: Cluster Ready Services is online in exclusive mode

Cause: Cluster Ready Services is limited to providing internal services to other Oracle Clusterware components. External Cluster Ready Services are not available.

Action: When in exclusive mode, Oracle Clusterware components are dedicated to the repair or reconfiguration of the Oracle Cluster Registry, voting files or both. Oracle Clusterware should be down and remain down on every other cluster node. Only commands that check or stop the stack, interact with Cluster Synchronization Services or aid in Clusterware repair or reconfiguration should be issued.

CRS-04693: Failed to back up the voting file for Cluster Synchronization Service.\n

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-04694: Number of voting files cannot exceed *number*. Failed to add voting files.\n

Cause: The request to add voting files would cause the maximum number allowed to be exceeded.

Action: Specify fewer voting files to add so that the maximum is not exceeded, or include the -purge option on 'crsctl add css votedisk' to replace the existing set of files with an allowable number of new files.

CRS-04695: Voting disk addition failed because this disk *string* is a duplicate of an existing voting disk with matching File Universal ID *string*.\n

Cause: This disk is already a part of the current cluster.

Action: None needed.

CRS-04696: Failed to set parameter *string* to *number* due to conflicting parameter *string*; the new value for *string* must be greater than *number*.\n

Cause: An attempt was made to set a new value to a configuration parameter which conflicts with another parameter's current value.

Action: Set the value of this parameter to a higher value than what is indicated in the message.

CRS-04697: This command must be executed by Operating System user '*string*'.

Cause: A crsctl command was executed by the wrong Operating System user.

Action: The specified Operating System user should execute the command.

CRS-04698: Error code *number* in retrieving the patch level

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04699: Error code *number* in retrieving the cluster configuration type

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04700: The Cluster Time Synchronization Service is in Observer mode.\n

Cause: Vendor time synchronization software exists on at least one of the nodes in the cluster.

Action: None

CRS-04701: The Cluster Time Synchronization Service is in Active mode.\n

Cause: Vendor time synchronization software is not detected on any of the nodes in the cluster.

Action: None

CRS-04702: Offset (in msec): *string*\n

Cause: None

Action: None

CRS-04703: The Cluster Time Synchronization Service is Offline.\n

Cause: The Cluster Time Synchronization Service is not running on the current node.

Action: None

CRS-04704: Shutdown of Clusterware failed on node *string*.\n

Cause: The shutdown did not complete successfully. One or more of the internal operations experienced an error that is reported in previous messages.

Action: Examine the error message(s) preceding this message and correct the problem(s) they describe.

CRS-04705: Start of Clusterware failed on node *string*.\n

Cause: The start did not complete successfully. One or more of the internal operations experienced an error that is reported in previous messages.

Action: Examine the error message(s) preceding this message and correct the problem(s) they describe.

CRS-04708: Server name is missing

Cause: The server name provided was empty or no name was provided.

Action: Provide a valid server name.

CRS-04712: An invalid client cluster version [*string*] was provided.

Cause: An attempt to create a configuration for a client cluster failed because an invalid cluster version was provided for the cluster.

Action: Retry the operation, providing a valid client cluster version in the required format(%u.%u.%u.%u.%u).

CRS-04713: Creating member cluster credential and configuration failed.

Cause: An attempt to create a credential and configuration for a member cluster failed. This is an Internal error.

Action: Contact Oracle Support Services.

CRS-04714: invalid output file name [*string*] was provided

Cause: An invalid output file name was provided.

Action: Provide a valid file name with XML extension.

CRS-04718: deleting member cluster credential and configuration failure

Cause: An attempt to delete a credential and configuration for a member cluster failed. The accompanying messages provide detailed failure information.

Action: See the accompanying messages, correct the issue and retry the command.

CRS-04719: querying member cluster credential and configuration failure

Cause: An attempt to query a credential and configuration for a member cluster failed. The accompanying messages provide detailed failure information.

Action: See the accompanying messages, correct the issue and retry the command.

CRS-04730: Command aborted due to an internal error\n

Cause: An inconsistent internal state was detected.

Action: Call Oracle Support Services.

CRS-04731: Specified file *string* could not be created.\n

Cause: JAZN configuration file required by the OC4J container could not be created.

Action: Ensure that the directory path exists and that its permissions will allow the file to be created by oracle owner of clusterware home.

CRS-04732: Could not be open file *string*.\n

Cause: JAZN configuration file required by the OC4J container could not be opened.

Action: Ensure that the directory path exists and that its permissions will allow the file to be created by oracle owner of clusterware home.

CRS-04733: File *string* does not exist.\n

Cause: The JAZN configuration file required by the OC4J container does not exist.

Action: Ensure that the directory path exists and that its permissions will allow the file to be created oracle owner of the clusterware home.

CRS-04734: Filename was not specified.\n

Cause: filename was not supplied or was an empty string.

Action: Re-try the command by specifying a valid JAZN configuration filename.

CRS-04735: Expected OCR key does not exist\n

Cause: An infrastructure error occurred because a required OCR key was missing.

Action: Call Oracle Support Services.

CRS-04736: Operation on OCR key failed\n

Cause: Operation on OCR key failed due to an OCR error.

Action: Re-issue the command as oracle owner of clusterware home.

CRS-04737: Failed to allocate *number* bytes of memory\n

Cause: Could not allocate memory for internal buffers due to insufficient system memory resources

Action: Correct the system memory resources problem and retry the command

CRS-04738: Size of file *string* is too large\n

Cause: Specified file size exceeds 65536 bytes.

Action: Re-issue the command after reducing the size of the file.

CRS-04739: Could not close file *string* \n

Cause: Due to an internal error the specified file could not be closed

Action: Re-issue the command after verifying disk space, permissions and path.

CRS-04740: I/O operation on file *string* failed.\n

Cause: Due to an internal error an I/O operation on the specified file failed.

Action: Call Oracle Support if the problem persists.

CRS-04741: Insufficient permissions on OCR key\n

Cause: Operation on OCR key failed due to insufficient permissions.

Action: Re-issue the command as oracle owner of clusterware home.

CRS-04742: OCR updated with contents of *string* (New = *number*, Old = *number* bytes)

Cause: set jazn command was issued and OCR key was updated.

Action: None Required.

CRS-04743: File *string* was updated from OCR(Size: *number*(New), *number*(Old) bytes)

Cause: get jazn command was issued and specified file was updated with the contents from OCR key.

Action: None Required.

CRS-04744: The CSSD is not running with real-time priority. It is running with priority base + nice.\n

Cause: Priority value returned from 'crsctl get css priority' was as displayed. In single instance high availability configurations, the Cluster Synchronization Services daemon (CSSD) always has priority Base + Nice and does not run real-time or at elevated priority.

Action: None Required.

CRS-04839: Required attribute '*string*' is missing for '*string*'.

Cause: A required attribute was not specified.

Action: Make sure the attribute is specified.

CRS-04840: Attribute '*string*' cannot be specified using this command.

Cause: An attribute was specified that cannot be used with this command.

Action: Server pool configuration can be changed or created using 'crsctl modify policyset' and 'crsctl modify serverpool -policy' commands.

CRS-04843: Policy '*string*' does not exist.

Cause: An invalid policy name was specified.

Action: Verify the name.

CRS-04846: Configuration policy set has an invalid profile.

Cause: An invalid policy set definition was specified. Missing elements or duplicate elements may be present in the profile.

Action: Verify the contents of the policy set profile and resubmit the command.

CRS-04847: File '*string*' does not exist.

Cause: The specified for the comamnd did not exist or could not be opened.

Action: Verify the filename and resubmit the command.

CRS-04848: Policy '*string*' appears more than once in a policy set file.

Cause: A policy was defined more than once in the profile.

Action: Verify the contents of the policy and remove the duplicate policy.

CRS-04849: Server pool '*string*' appears more than once for policy '*string*' in the policy set file.

Cause: A server pool was defined more than once in the profile for the same policy.

Action: Verify the contents of the policy and remove the duplicate server pool.

CRS-04873: At least one attribute must be specified for this command.

Cause: The 'crsctl eval modify' command was run without specifying any attributes.

Action: Rerun the command with at least one attribute specified.

CRS-04891: Invalid value of level specified.

Cause: An invalid value for output level was specified. Output level can only be 1, 2 or 3.

Action: Rerun the command with a level of 1, 2 or 3.

CRS-04922: Module *string*: *string* ignored; module level out of bounds (valid range *number* - *number*)

Cause: An attempt to set a log or trace level supplied a level that is out of range for the module.

Action: Specify a log or trace level within the valid range.

CRS-04923: *string* module: *string* ignored; module level is invalid (range 0 - 65535)

Cause: The module log level was invalid (range 0 - 65535).

Action: Specify a log level within the valid range (0 - 65535).

CRS-04925: 'all' module keyword was specified with other module names

Cause: The module keyword 'all' already refers to all module names.

Action: When referring to all modules, use 'all' without duplicate references to other module names.

CRS-04932: Failed to get the current cluster mode

Cause: There was an internal error while getting cluster mode.

Action: Contact Oracle Support Services.

CRS-04933: Cluster mode set to "flex"; restart Oracle High Availability Services on all nodes for cluster to run in "flex" mode.

Cause: Cluster mode was changed to "flex", which requires a cluster restart.

Action: Restart Oracle High Availability Services on all nodes for cluster to run in "flex" mode.

CRS-04934: Failed to set the cluster mode

Cause: There was an internal error while setting cluster mode.

Action: Contact Oracle Support Services.

CRS-04937: Unable to set the cluster mode.

Cause: An attempt was made to set the cluster mode to 'flex' but Grid Naming Service(GNS) was not configured.

Action: Configure GNS and try again to set the cluster mode to 'flex'.

CRS-04940: Cluster must run in standard or flex mode to use this command

Cause: An attempt was made to set the cluster mode but machine is not running as a cluster.

Action: Cluster must be in standard or flex mode to change the cluster mode.

CRS-04942: Cluster mode set to "standard"

Cause: Cluster mode is changed. Cluster will shut down now.

Action: None

CRS-04953: CSS already running in nonexclusive mode

Cause: An exclusive mode CRS stack start was attempted when CSS was already running in nonexclusive mode.

Action: Stop the CRS stack first and then start in exclusive mode.

CRS-04954: CRSD already running in nonexclusive mode

Cause: An exclusive mode CRS stack start was attempted when CRSD was already running in nonexclusive mode.

Action: Stop the CRS stack first and then start in exclusive mode.

CRS-04955: CSS failed to start in exclusive mode

Cause: An exclusive mode CRS stack start was attempted but CSS failed to start in exclusive mode.

Action: Check the Clusterware alert log for errors. Correct the reported error(s) and retry.

CRS-04956: CRSD failed to start in exclusive mode

Cause: An exclusive mode CRS stack start was attempted but CRSD failed to start in exclusive mode.

Action: Check the Clusterware alert log for errors. Correct the reported error(s) and retry. Msg 4957 continued in msg 6561

CRS-04967: Input values are out of range for parameter *string*

Cause: A value was provided which was out of range for this parameter.

Action: Specify a value which is appropriate for this parameter.

CRS-04968: Invalid values for parameter *string*. Specify either 0 or 1.

Cause: A value was provided which was out of range for this parameter.

Action: Specify a value which is appropriate for this parameter.

CRS-04969: Specified server attribute *string* does not exist

Cause: A nonexistent attribute was specified for get/set command.

Action: Specify an attribute that exists. Run 'crsctl stat res *resourcename* -p' to list all the attributes of that resource.

CRS-04973: Flex ASM must be enabled before switching the cluster mode to 'flex'

Cause: An attempt to change the cluster mode to 'flex' failed because Flex ASM is not enabled.

Action: Enable Flex ASM before changing the cluster mode. Refer to Oracle Automatic Storage Management Administrator's Guide for configuring Flex ASM.

CRS-04977: Cluster cannot be converted from 'flex' mode to 'standard' mode

Cause: An attempt was made to set the cluster mode to standard from flex mode.

Action: If a cluster needs to be converted to standard mode, reinstall Clusterware.

CRS-04980: Duplicate value *string* specified for resource attribute *string*

Cause: A duplicate value was specified for a resource attribute.

Action: Specify only one value for a resource attribute.

CRS-04981: Duplicate value *string* specified for type attribute keyword *string*

Cause: A duplicate value was specified for a type attribute keyword.

Action: Specify only one value for DEFAULT_VALUE, FLAGS and TYPE per type attribute.

CRS-04982: Valid type attribute keyword *string* specified outside a type attribute

Cause: A valid type attribute keyword was specified outside a type attribute.

Action: Specify the ATTRIBUTE type attribute keyword before specifying the DEFAULT_VALUE, FLAGS or TYPE type attribute keywords.

CRS-04983: Invalid type attribute keyword *string* specified

Cause: An invalid type attribute keyword was specified.

Action: Specify only the valid type attribute keywords ATTRIBUTE, DEFAULT_VALUE, FLAGS and TYPE.

CRS-04984: Duplicate definition for type attribute *string*

Cause: The same type attribute was named on more than one ATTRIBUTE keyword.

Action: Define a type attribute only once.

CRS-04985: The value '*string*' of FLAGS attribute is invalid.

Cause: An invalid flag value was specified.

Action: Flag values may be combined using the '|' character as a separator.

CRS-04986: This command is for Oracle's internal use only

Cause: A command meant for internal use was specified.

Action: Refer to 'crsctl -h' for list of commands available for use.

CRS-04989: Module *string*: *string* ignored; module level out of bounds (valid range *number* - *number*)

Cause: An attempt to set a log or trace level supplied a level that is out of range for the module.

Action: Specify a log or trace level within the valid range.

CRS-04990: Issued command does not support filter in this version of CRS.

Cause: The command was rejected because a filter (-w) was specified. Filters are not currently supported for this command.

Action: Reissue the command without the filter.

CRS-04991: Could not delete the resource because it does not exist.

Cause: An attempt to delete a resource failed because the resource specification did not identify an existing resource. Either there was no resource with the specified name, or no resource satisfied the specified filter.

Action: Reissue the command specifying the name of an existing resource or a filter that will select an existing resource.

CRS-04992: Could not delete the server pool because it does not exist.

Cause: An attempt to delete a server pool failed because the server pool specification did not identify an existing server pool. Either there was no server pool with the specified name, or no server pool satisfied the specified filter.

Action: Reissue the command specifying the name of an existing server pool or a filter that will select an existing server pool.

CRS-04993: Could not delete the server category because it does not exist.

Cause: An attempt to delete a server category failed because the server category specification did not identify an existing server category. Either there was no server category with the specified name, or no server category satisfied the specified filter.

Action: Reissue the command specifying the name of an existing server category or a filter that will select an existing server category.

CRS-04994: Could not delete the resource type because it does not exist.

Cause: An attempt to delete a resource type failed because the resource type specification did not identify an existing resource type. Either there was no resource type with the specified name, or no resource type satisfied the specified filter.

Action: Reissue the command specifying the name of an existing resource type or a filter that will select an existing resource type.

CRS-04995: The command '*string*' is invalid in crsctl. Use srvctl for this command.

Cause: An attempt was made to use an unsupported command in crsctl.

Action: Use srvctl for the mentioned command.

CRS-04996: Command ('crsctl *string* policyset') is not supported in this version of CRS.

Cause: The command was rejected because policy-based management is not a supported feature in this release.

Action: If this error occurs during rolling upgrade, wait for the upgrade to finish. Otherwise, upgrade to the required release or higher.

CRS-04997: Command ('crsctl *string* category') is not supported in this version of CRS.

Cause: The command was rejected because the server category is not a supported feature in this release.

Action: If this error occurs during rolling upgrade, wait for the upgrade to finish. Otherwise, upgrade to the required release or higher.

CRS-04998: Command ('crsctl eval *string*') is not supported in this version of CRS.

Cause: The command was rejected because What-If is not a supported feature in this release.

Action: If this error occurs during rolling upgrade, wait for the upgrade to finish. Otherwise, upgrade to the required release or higher.

CRS-04999: Command ('crsctl *string* policy') is not supported in this version of CRS.

Cause: The command was rejected because policy-based management is not a supported feature in this release.

Action: If this error occurs during rolling upgrade, wait for the upgrade to finish. Otherwise, upgrade to the required release or higher.

CRS-05000: Expected resource *string* does not exist in agent process

Cause: The expected resource must have been created by Oracle Configuration tools.

Action: Check that the resource was not manually deleted. If not the case call Oracle Support.

CRS-05001: Expected dependency in resource *string* on a resource of type *string* does not exist

Cause: The expected resource dependency must have been created by Oracle Configuration tools.

Action: Check that the resource dependency was not manually removed.

CRS-05002: Agent action was aborted

Cause: Agent action was aborted either due to action timeout expiry or the user canceled the action.

Action: Retry the operation.

CRS-05003: Invalid attribute value: '*string*' for attribute *string*

Cause: An attribute value passed to the Agent was NULL or invalid.

Action: Give the correct value to the attribute and retry.

CRS-05004: Cannot find listener endpoint for listener *string*

Cause: listener endpoint not found.

Action: Check listener.ora for that listener.

CRS-05005: IP Address: *string* is already in use in the network

Cause: The VIP resource attempted to use an IP address already in use in the network.

Action: Use srvctl to re-create vip or scanvip specifying an IP address which is not being used in the network and retry the operation.

CRS-05006: Unable to automatically select a network interface which has subnet mask *string* and subnet number *string*

Cause: The subnet mask and subnet number configured for the resource did not match the subnet mask and subnet number of any network interface on this node.

Action: Provide a subnet mask and subnet number which matches at least one network interface's subnet mask and subnet number using srvctl remove and add vip and retry the operation.

CRS-05007: Cannot remove the primary IP *string* from the network interface

Cause: The primary IP of the network interface was incorrectly configured as the VIP.

Action: Use 'srvctl remove' and 'srvctl add vip' or 'srvctl remove' and 'srvctl add scan' to provide the correct IP address for the VIP and retry the operation.

CRS-05008: Invalid attribute value: *string* for the network interface

Cause: The network interface value did not match the subnet mask and subnet number of any network interface on the node.

Action: Modify the network interface's value such that the subnet mask and subnet number matches the subnet mask and subnet number of at least one network interface on the node using 'srvctl remove' and 'srvctl add vip' and retry the operation.

CRS-05009: The VIP address *string* does not belong to the subnet *string*

Cause: The VIP's subnet number and the network interface's subnet number did not match.

Action: Make the VIP's subnet number match the network interface's subnet number using 'srvctl remove' and 'srvctl add vip' or 'srvctl remove' and 'srvctl add scan' and retry the operation.

CRS-05010: Update of configuration file "*string*" failed: details at "*string*" in "*string*"

Cause: An attempt to open the specified file failed. Common causes are that the file does not exist, or the file permissions prohibit access.

Action: Check that the file exists and has the proper permissions.

CRS-05011: Check of resource "*string*" failed: details at "*string*" in "*string*"

Cause: The check of the database or Automatic Storage Management instance failed.

Action: Check the database or ASM instance alert log and the referenced Oracle Clusterware trace file for additional information. Recover the instance if necessary.

CRS-05012: Check of service resource "*string*" failed: details at "*string*" in "*string*"

Cause: The check of the preconnect service failed because it could not run on the same node as the main service.

Action: Check the referenced Oracle Clusterware trace file for additional information. Start the preconnect service on a different node.

CRS-05013: Agent "*string*" failed to start process "*string*" for action "*string*": details at "*string*" in "*string*"

Cause: The named agent failed to start the named process for the named action.

Action: Check the referenced Oracle Clusterware trace file for additional operating system specific information. Refer to operating system documentation to correct the error.

CRS-05014: Agent "*string*" timed out starting process "*string*" for action "*string*": details at "*string*" in "*string*"

Cause: The named agent aborted the named process because the process failed to respond within the timeout period.

Action: Check the agent log files for further information

CRS-05015: Agent timed out waiting for a response from the DHCP server

Cause: Agent and the DHCP server were not able to communicate with each other. Common causes of this failure are due to the DHCP server not running, or improper DHCP server configuration, or the DHCP server running out of DHCP leases.

Action: Identify the cause of the problem from the DHCP server log files. If the problem is due to the DHCP server running out of leases, increase the number of addresses which can be served by the DHCP server.

CRS-05016: Process "*string*" spawned by agent "*string*" for action "*string*" failed: details at "*string*" in "*string*"

Cause: The named process failed to complete successfully.

Action: Check details in the agent log for error information from the spawned process.

CRS-05017: The resource action "*string string*" encountered the following error: \n*string*. For details refer to "*string*" in "*string*".

Cause: An error occurred during the resource action.

Action: Examine the accompanying error messages and respond accordingly.

CRS-05018: Clusterware has disabled an IP route associated with destination "*string*" and interface "*string*". For details, refer to "*string*" in "*string*".

Cause: A potentially conflicting route in the same subnet used by the address for the redundant interconnect was found and removed to prevent routing conflicts.

Action: Validate that the route described was not actually in use.

CRS-05019: All OCR locations are on ASM disk groups [*string*], and none of these disk groups are mounted. Details are at "*string*" in "*string*".

Cause: OCR was configured on ASM disk groups, and all of the listed disk groups failed to mount. The possible causes are: 1. A disk was not accessible. 2. A disk in a normal or high redundancy disk group failed after the most recent dismount. 3. The ASM_DISKSTRING in the SPFILE or the GPnP profile was incorrect.

Action: Check the ASM alert logs for more information. To correct disk access or failure issues either: a) restore access to the disks in the disk group and mount the disk group (via ASMCMD or SQL). or b) Issue a force mount to the disk group to offline missing disks and mount a normal or high redundancy disk group. To correct the ASM_DISKSTRING in the SPFILE and propagate the change to the GPnP profile, in sqlplus, issue the SQL command "ALTER SYSTEM SET ASM_DISKSTRING <discovery_string> ...", see Setting Oracle ASM Initialization Parameters in the Automatic Storage Management Administrator's Guide

CRS-05020: Not all endpoints are registered for listener *string*

Cause: Listener agent failed to register all endpoints to listener.

Action: Check listener log file for that listener.

CRS-05021: Check of storage failed: details at "*string*" in "*string*"

Cause: The check of ASM storage failed because the storage was not accessible.

Action: Check Clusterware alert log and the referenced Oracle Clusterware trace file for additional information.

CRS-05022: Stop of resource "*string*" failed: current state is "*string*"

Cause: The named resource failed to stop.

Action: Ensure there are no users of the resource and reissue the stop.

CRS-05023: Failed to unmount file system "*string*"; details at "*string*" in "*string*"

Cause: The named file system resource failed to unmount.

Action: Determine which OS processes are accessing the mount point using an OS command such as 'fuser' or 'lsof' for Unix based platforms or 'handle' for Windows. Close, shut down, or terminate applications and processes accessing the mount point, then retry.

CRS-05024: Unmounting file system "*string*"

Cause: A 'stop' of the file system resource mounted on the indicated path started.

Action: This is an informational message only.

CRS-05025: File system "*string*" unmounted

Cause: A 'stop' of the file system resource mounted on the indicated path completed normally.

Action: This is an informational message only.

CRS-05026: Failed to clean mount point "*string*"; details at "*string*" in "*string*"

Cause: The clean of the volume failed because one or more processes on the system were accessing the mount point.

Action: Determine which OS processes are accessing the mount point using an OS command such as 'fuser' or 'lsof' for Unix based platforms or 'handle' for Windows. Close, shut down, or terminate applications and processes accessing the mount point, then retry.

CRS-05027: The ASM instance on node "*string*" cannot be stopped because it is currently being used by Cluster Ready Services.

Cause: An attempt to stop the ASM instance on the indicated server failed because Cluster Ready Services was using that ASM instance.

Action: Use 'crsctl stop crs' or 'crsctl stop cluster' to stop the Cluster Ready Services on the node.

CRS-05028: Cannot start resource "*string*" because the resource it depends on, "*string*", failed to start on the same node

Cause: The resource could not be started because the resource on which it depends failed to start on the same node.

Action: Manually start the dependency resource and then the resource on the same node.

CRS-05029: Agent failed to initialize ARP devices required for starting the HAIP resource

Cause: The resource could not be started because the ARP devices failed to start on the same node.

Action: Manually check the ARP devices on the same node and then start the resource.

CRS-05030: The resource action "*string string*" completed with the following error: *string*

Cause: An error occurred during the resource action.

Action: Examine the accompanying error messages and respond accordingly.

CRS-05031: invalid instance open mode: '*string*'

Cause: The instance open mode passed to the Agent was invalid.

Action: Provide a correct instance open mode and retry.

CRS-05032: incompatible instance open mode: '*string*' with the role of the database in an Oracle Data Guard configuration: '*string*'

Cause: The instance open mode passed to the Agent was invalid for the role of the database in an Oracle Data Guard configuration.

Action: Provide a correct instance open mode or change the role of the database in an Oracle Data Guard configuration and retry.

CRS-05033: Open mode '*string*' is incompatible with the current instance state '*string*'.

Cause: An attempt to change the instance to the specified open mode failed because the specified mode was incompatible with the current instance state.

Action: Reissue the command with a correct instance open mode.

CRS-05034: failed to get instance connection

Cause: Agent process failed to get an instance connection. Internal error.

Action: If error persists, contact Oracle Support Services.

CRS-05038: Oracle home '*string*' was not configured correctly.

Cause: The 'oracle' executable was not relinked in the Oracle home or, on Windows platforms, the %ORACLE_HOME%\bin\oracle.key file did not exist, or the Windows registry key specified in %ORACLE_HOME%\bin\oracle.key did not exist.

Action: Relink the Grid Infrastructure executables as described in the Oracle Grid Infrastructure Installation Guide for your operating system.

CRS-05039: Oracle executable '*string*' was not present in Oracle home '*string*'.

Cause: The 'oracle' executable was not found in the expected location when checking if Oracle home was configured correctly.

Action: Relink the Grid Infrastructure executables as described in the Oracle Grid Infrastructure Installation Guide for your operating system.

CRS-05040: Start action for preconnect service resource '*string*' failed because base service name '*string*' is running.

Cause: An attempt to start a preconnect service was rejected because its associated base service was already running on the instance.

Action: Either issue the start request on another node or stop the base service and reissue the start on this node.

CRS-05041: No available network interface found for network classification *string*. Confirm that network interfaces for that classification are UP and RUNNING.

Cause: There was a problem when initializing the network interface list for highly available IP (HAIP).

Action: Confirm that network interfaces for that classification are UP and RUNNING on this node.

CRS-05042: failed to check whether service has any connected Java sessions

Cause: An unexpected internal error occurred.

Action: If the error persists, contact Oracle Support Services.

CRS-05043: An I/O control request to determine whether Infiniband ACLs are enabled failed with error: '*string*'.

Cause: During listener start, an OS 'ioctl' request failed.

Action: Examine the accompanying error message, resolve the problem reported, and restart the listener.

CRS-05044: Socket creation for communication failed with error: '*string*'.

Cause: During listener start, an OS system call 'socket' failed.

Action: Examine the accompanying error message, resolve the problem reported, and restart the listener.

CRS-05045: Reader farm service '*string*' does not exist in the database '*string*'.

Cause: During the specified reader farm service start or check action, it was found that the service did not exist in the indicated database.

Action: Restart the non-reader farm service of the database so that the reader farm service is created in the database and then start a reader farm service.

CRS-05046: Reader farm service '*string*' does not exist in the PDB '*string*' of database '*string*'.

Cause: During the specified reader farm service start or check action, it was found that the service did not exist in the indicated PDB of the indicated database.

Action: Restart the non-reader farm service of the PDB so that the reader farm service is created in the PDB and then start a reader farm service.

CRS-05047: SCAN listener *string* has endpoints registered on incorrect SCAN VIPs.

Cause: A periodic check by the the listener agent detected that the SCAN listener had endpoints registered on incorrect SCAN VIPs.

Action: Restart the SCAN listener. If the error persists, contact Oracle Support Services.

CRS-05048: Failure communicating with CRS to access a resource profile or perform an action on a resource

Cause: An attempt to access a resource profile or perform an action on a resource encountered an error attempting to communicate with Oracle Cluster Ready Services (CRS).

Action: If this error did not occur while bringing the clusterware stack up or down, please contact Oracle Support Services. Otherwise, retry the operation when the clusterware stack is up.

CRS-05049: Oracle Clusterware has removed the duplicate IP address *string* on interface *string*.

Cause: An automatic periodic scan of network interfaces determined that the indicated IP address was plumbed on multiple nodes, probably because of a missing ping response. The Network agent removed the duplicate address.

Action: If there is no evidence of system load on the nodes on which the duplicate address is discovered or if this problem is seen frequently, contact Oracle Support Services.

CRS-05050: HAIP failover due to network interface *string* not functioning

Cause: There was a problem with the network interface used for highly available IP (HAIP).

Action: Confirm that the network interface is up and running on this node.

CRS-05100: One or more attributes were not found for the entity.

Cause: The operation failed because the entity lacked one or more attributes.

Action: Provide the required attributes and retry the operation.

CRS-05101: The specified entity was not found in the entity list.

Cause: The Cluster Ready Services daemon was unable to locate the input entity in its entity list.

Action: Retry the operation after deleting the entity and registering it again.

CRS-05102: The entity is already registered.

Cause: An attempt was made to register an entity that was already registered.

Action: If the specification of the entity was incorrect, retry the operation with the correct entity specification.

CRS-05103: The entity is not registered.

Cause: An attempt was made to operate on an entity that was not registered.

Action: If the specification of the entity was incorrect, retry specifying the correct entity otherwise register the entity and retry the operation.

CRS-05104: The registration of the entity failed.

Cause: An attempt to register an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and retry the registration.

CRS-05105: Unregistering the entity failed.

Cause: An attempt to unregister an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and try to unregister the entity again.

CRS-05106: The entity failed to start.

Cause: An attempt to start an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and try to start the entity again.

CRS-05107: The entity failed to stop.

Cause: An attempt to stop an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and try to stop the entity again.

CRS-05108: The entity failed to relocate.

Cause: An attempt to relocate an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and try to relocate the entity again.

CRS-05109: The status code is invalid.

Cause: The status code was not of the type enum CLSCRS_STAT.

Action: Verify that the status code argument is a valid code returned from the CLSCRS API and retry.

CRS-05110: The entity failed to update.

Cause: An attempt to update an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and try to update the entity again.

CRS-05111: The entity has an invalid profile.

Cause: There were invalid attributes in the entity profile.

Action: Check the entity profile, remove any invalid attributes and retry the operation.

CRS-05112: The action script of the entity cannot be found.

Cause: The action script of the entity specified by the attribute ACTION_SCRIPT could not be located.

Action: Ensure that the attribute ACTION_SCRIPT exists and specifies a valid script for the entity.

CRS-05113: The entity has a dependency error.

Cause: An attempt to operate on an entity failed because of the resulting effect on one or more dependent entities. Preceding messages provide details on the nature of the problem.

Action: Take the corrective action as suggested by the preceding messages and resubmit the operation.

CRS-05114: A placement error was encountered while attempting to operate on the entity.

Cause: Based on the placement policy for the entity, there was no available server to which the entity could failover or start.

Action: Check the target server for the entity and restart the entity using the 'crsctl start' command.

CRS-05115: The specified server is not in the cluster.

Cause: The specified server name did not designate a server in the cluster.

Action: Check the server names in the cluster and retry the operation specifying a server that is a member of the cluster.

CRS-05116: The operation on the entity has been cancelled.

Cause: A scheduled or running operation was cancelled.

Action: None

CRS-05117: An internal error occurred while operating on the entity.

Cause: There was an internal error. This message will be preceded by another message with a more specific problem description.

Action: Review the accompanying error messages and contact Oracle Support Services.

CRS-05118: The entity or all of its instances are disabled.

Cause: The attempted request could not be serviced because the entity was disabled.

Action: Enable the entity and retry the operation.

CRS-05119: The active version of Cluster Ready Services is below the required level.

Cause: An attempt was made to use the functionality that has only been available beginning with the active version specified in the preceding message.

Action: Upgrade to the minimum required version stated in the preceding message.

CRS-05120: The requested action for the entity was aborted due to a timeout.

Cause: The timeout specified for a custom action was reached before the action could complete.

Action: Revise the timeout setting and retry the action.

CRS-05121: The operation cannot be completed due to invalid arguments.

Cause: Invalid arguments were specified to execute the CRS command.

Action: Check the arguments and specify only valid arguments to the command.

CRS-05122: The entity could not be registered due to a type mismatch.

Cause: The registration of an entity failed because the input entity type to the API did not match the type of the entity to be registered.

Action: Specify the correct entity type to register the entity.

CRS-05123: The resource validity check failed due to an invalid resource type.

Cause: The value of the attribute TYPE for the resource was not 'application'.

Action: Specify the value 'application' for the resource attribute TYPE.

CRS-05124: The entity has one or more attributes missing.

Cause: The validity check failed to find one or more of the attributes NAME, TYPE or ACTION_SCRIPT for the entity.

Action: Update the entity to have the missing attributes.

CRS-05125: The action script does not exist for the entity.

Cause: The validity check on the entity failed to find the file specified in the attribute ACTION_SCRIPT of the entity.

Action: Provide the full path to an existing file for the attribute ACTION_SCRIPT.

CRS-05126: The entity has invalid hosting servers for the placement policy.

Cause: Either the attribute HOSTMEM_REQ was not set or was empty for the entity.

Action: Either set the attribute HOSTMEM_REQ or set the attribute PLACEMENT to 'balanced'.

CRS-05127: The attribute HOSTING_MEMBERS must not be specified for the entity.

Cause: The attribute HOSTING_MEMBERS was specified for the entity with the balanced placement policy.

Action: Either unset the attribute HOSTING_MEMBERS or set the entity's placement policy to be 'favored' or 'restricted'.

CRS-05128: The value of the attribute HOSTING_MEMBERS for the entity is invalid.

Cause: The value of the attribute HOSTING_MEMBERS for the entity contained one or more of the characters: ',', ';' or ':'.

Action: Remove the invalid characters from the value of the attribute HOSTING_MEMBERS.

CRS-05129: An invalid placement policy was specified for the entity.

Cause: The attribute PLACEMENT for the entity was set to an invalid value.

Action: Set the attribute PLACEMENT to either 'favored', 'restricted', or 'balanced'.

CRS-05130: An invalid value was specified for the attribute AUTO_START.

Cause: The attribute AUTO_START of the entity was set to an invalid value.

Action: Set the attribute AUTO_START to either 'always', 'never', or 'restore'.

CRS-05131: One or more attribute of the entity are set to invalid values.

Cause: An attempt was made to set the attribute to a value of different type.

Action: Check the attributes and set the value to the appropriate type.

CRS-05132: The entity list is not empty.

Cause: The entity list passed to receive the information for the queried CRS entities was not empty.

Action: Create an empty list to pass as the output argument and retry.

CRS-05133: The generated connection key is too long.

Cause: The size of the environment variables HOST and HOSTNAME were greater than 255 characters.

Action: Set the environment variables HOST and HOSTNAME to values whose length is no more than 255 characters.

CRS-05151: Memory could not be allocated.

Cause: An attempt to allocate memory for an entity failed.

Action: Check the system logs, correct the condition and retry the operation.

CRS-05152: The pointer to the context is invalid.

Cause: A null pointer was passed as a pointer to the context.

Action: Create a valid context and pass its address to the requested operation.

CRS-05153: The entity pointer is invalid.

Cause: A null pointer was passed to the API for the entity name or the entity value."

Action: Allocate memory for the entity name and the entity value and pass in the valid pointers to the API.

CRS-05154: The input attribute name not found in the entity's attribute list.

Cause: An attempt was made to modify a nonexistent attribute of an entity.

Action: Provide an existing attribute of the entity and retry the operation.

CRS-05155: The end of the entity list was reached.

Cause: An attempt was made to search beyond the end of the entity list.

Action: None

CRS-05156: The entity has no attributes.

Cause: An attempt was made to get the attribute list for an entity that has no attributes.

Action: Check the entity name that is being passed. If it's correct then delete the entity, register it with correct attributes and retry the operation.

CRS-05157: The pointer to the operation status message in the entity structure is null.

Cause: The message pointer in the entity structure was null. The entity maybe corrupted.

Action: Delete the entity, register the entity and retry the operation.

CRS-05158: The entity list could not be found.

Cause: An attempt was made to perform an operation on an entity list, but no valid entity list was passed.

Action: None

CRS-05159: The specified entity already exists.

Cause: An attempt was made to add an entity that already exists.

Action: Check the entity name to be added. If it is correct and the existing entity must be recreated, then delete the entity and retry the operation.

CRS-05160: The entity list is empty.

Cause: The query failed because the entity list was empty.

Action: Retry the query supplying the intended list of entities.

CRS-05161: The entity name contains invalid characters.

Cause: An attempted operation was rejected because the specified entity name contained invalid characters.

Action: Retry the operation specifying a valid entity name.

CRS-05162: The name of a resource or a filter contains invalid characters.

Cause: An attempted operation was rejected because the specified resource name or the filter name contained invalid characters.

Action: Retry the operation specifying a valid resource name or the filter name.

CRS-05164: The attribute name is longer than 255 characters.

Cause: An attempt was made to use an attribute name with a length of more than 255 characters.

Action: Use an attribute name shorter than 255 characters and retry the operation.

CRS-05165: The supplied buffer is too small for the filter to string conversion.

Cause: The buffer supplied to the API was too small to hold the output string.

Action: Increase the buffer size and pass it to the API.

CRS-05166: The specified return code is invalid.

Cause: The return code was not of the type 'enum clscrsret'.

Action: Verify that the return code argument is a valid code returned from the CLSCRS API and retry.

CRS-05167: The value contains invalid characters.

Cause: An attempted operation was rejected because the specified attribute name or value contained invalid characters.

Action: Retry the operation using valid characters.

CRS-05501: Unable to connect to eONS server on port *number*

Cause: The eONS server may not be active or listening on a different port.

Action: Ensure that the eONS resource is ONLINE and listening on the above port.

CRS-05502: Invalid event template *string*

Cause: The event template specified is invalid.

Action: The event template format must be <PROPERTY | ELEMENT>(attribute name=<literal | %resource attribute name%>) ...

CRS-05503: Error creating the eONS subscriber

Cause: The eONS server may not be active.

Action: Ensure that the CRS eONS resource is in ONLINE state.

CRS-05504: Node down event reported for node '*string*'.

Cause: The specified node was not responsive.

Action: Restart the specified node.

CRS-05601: MDNS: *string*

Cause: None, generic bypass mdns message.

Action: None

CRS-05602: mDNS service stopping by request.

Cause: MDNSD stopping by OHASD request.

Action: None

CRS-05705: Failed to get required resources

Cause: There was an internal error while evaluating the required resources for the subject resource.

Action: Contact Oracle Support Services.

CRS-05706: No more members to consider

Cause: There was no host found on which to start the resource based on the placement policy.

Action: Check the placement policy and the required resources for the subject resource.

CRS-05707: Failed after successful dependency consideration

Cause: There was no host found on which to start the resource based on the placement policy.

Action: Check the placement policy and the required resources for the subject resource.

CRS-05709: Resource '*string*' is already running on member '*string*'

Cause: An attempt was made to start a resource on a host while it is already running on that host.

Action: This is an insignificant error. Check the operation being performed.

CRS-05801: Agent path is null or does not resemble a filesystem path

Cause: Unable to spawn the agent program because of incorrect agent path.

Action: Fix the agent path using 'crsctl modify type'.

CRS-05802: Unable to start the agent process

Cause: An attempt to start the agent process failed.

Action: Ensure that the agent path is correct and has the proper permissions, and retry the command.

CRS-05805: Missing the required action callback in agent

Cause: Unable to execute resource's command.

Action: Ensure that agent executable or action script contains the missing function.

CRS-05809: Failed to execute '*string*' value of '*string*' for '*string*'. Error information '*string*', Category : *number*, OS error : *number*

Cause: Unable to spawn the resource action script due to incorrect path value or incorrect permissions or other OS error.

Action: Correct the action script path and permissions or check and fix the reported OS error.

CRS-05810: Attempt to add a duplicate resource '*string*'. Details at *string* in *string*.

Cause: An identical resource was already being monitored.

Action: Rename the resource and retry the operation.

CRS-05811: Failed to read ORA_CRS_HOME from environment. Details at *string* in *string*.

Cause: The ORA_CRS_HOME environment variable was not set correctly.

Action: This variable is set during CRS installation. If necessary, reinstall CRS.

CRS-05812: Could not get local hostname. Details at *string* in *string*.

Cause: The hostname could not be read.

Action: Check that the hostname for the local machine is valid. If the problem persists, contact Oracle Support Services.

CRS-05813: Could not change directory to '*string*'. Details at *string* in *string*.

Cause: The specified path is inaccessible to the agent process.

Action: Check that the specified path exists.

CRS-05814: Agent '*string*' started with invalid arguments. Details at *string* in *string*.

Cause: An invalid parameter was supplied to the agent.

Action: Contact Oracle Support Services.

CRS-05815: Agent '*string*' could not find any base type entry points for type '*string*'. Details at *string* in *string*.

Cause: Action entry points were not defined for this agent.

Action: No action necessary if this is a script agent. If this is not a script agent, define action points in your agent code.

CRS-05816: Agent '*string*' could not start implicit monitoring for resource '*string*'. Details at *string* in *string*.

Cause: The resource was currently disabled and hence could not be monitored.

Action: Enable the resource.

CRS-05817: Caught exception from user code for command '*string*'. Details at *string* in *string*.

Cause: An exception was thrown from the user code when an action entry point was called.

Action: This is due to an error in the agent user code. Modify the agent's code to resolve this.

CRS-05818: Aborted command '*string*' for resource '*string*'. Details at *string* in *string*.

Cause: Execution of the specified command was aborted due to a timeout.

Action: Restart the resource manually. If the problem persists, contact Oracle Support Services.

CRS-05819: Could not abort command '*string*' for resource '*string*'. Details at *string* in *string*.

Cause: Attempt to abort the specified command failed.

Action: Define an abort action entry point for the agent.

CRS-05820: Agent '*string*' failed to initialize server process address. Details at *string* in *string*.

Cause: Agent could not connect to the server process.

Action: Contact Oracle Support Services.

CRS-05821: Agent '*string*' is started with wrong user '*string*'. Details at *string* in *string*.

Cause: An incorrect owner was specified for the agent.

Action: Make sure CRSD has enough privileges to spawn programs as the value specified as the 'owner' in the ACL attribute.

CRS-05822: Agent '*string*' disconnected from server. Details at *string* in *string*.

Cause: Agent could not connect to server process.

Action: Contact Oracle Support Services.

CRS-05823: Could not initialize agent framework. Details at *string* in *string*.

Cause: Initialization of the agent failed.

Action: Contact Oracle Support Services.

CRS-05824: Could not initialize server connect string '*string*'. Details at *string* in *string*.

Cause: Incorrect server connect string was specified in the environment.

Action: Contact Oracle Support Services.

CRS-05825: Agent '*string*' is unresponsive and will be restarted. Details at *string* in *string*.

Cause: The specified agent did not respond and will be restarted automatically.

Action: None

CRS-05826: Agent '*string*' could not read environment variable '*string*'. Details at *string* in *string*.

Cause: The agent could not read a required environment variable.

Action: Contact Oracle Support Services.

CRS-05827: Could not find information for resource '*string*'. Details at *string* in *string*.

Cause: The specified resource was not found in the internal list of resources.

Action: Check the agent parameters and restart the resource manually.

CRS-05828: Could not start agent '*string*'. Details at *string* in *string*.

Cause: Creation of the agent process failed.

Action: Contact Oracle Support Services.

CRS-05829: Failed to get definition for resource '*string*'. Details at *string* in *string*.

Cause: The definition of the resource could not be determined.

Action: Delete the resource and add it again using the crsctl command.

CRS-05830: Invalid path '*string*' found for agent filename. Details at *string* in *string*.

Cause: The path that was specified for the agent was incorrect.

Action: Check that the path exists and is readable.

CRS-05831: Agent '*string*' has exceeded maximum failures and has been disabled. Details at *string* in *string*.

Cause: The specified agent has failed too many times.

Action: Contact Oracle Support Services.

CRS-05832: Agent '*string*' was unable to process commands. Details at *string* in *string*.

Cause: Agent was unable to process commands.

Action: Contact Oracle Support Services.

CRS-05833: Cleaning resource '*string*' failed as part of reboot-less node fencing

Cause: A resource 'clean' action associated with reboot-less node eviction encountered an error. This is an expected occurrence in most cases.

Action: None

CRS-05834: Resource '*string*' monitoring disabled due to repeated agent failures. Details at *string* in *string*.

Cause: A cluster resource was disabled because it was causing repeated agent failures.

Action: Restart the resource after resolving the problems with the agent.

CRS-05835: Agent version incapable of processing this command

Cause: A request encountered an older agent version that is not capable of processing that request.

Action: Upgrade the agent to the Clusterware version.

CRS-05836: Agent '*string*' version '*string*' cannot process command. Details at *string* in *string*.

Cause: A request encountered an older agent version that is not capable of processing that request.

Action: Upgrade the agent to the Clusterware version.

CRS-05837: Unable to open environment file '*string*'.

Cause: The environment file specified could not be opened.

Action: Verify that the filename, its location and its permissions are correct.

CRS-05838: Syntax error in environment file '*string*'.

Cause: The environment file specified did not have key value pairs in the correct format.

Action: Correct the key value format and retry. Consult the administration document for the correct format.

CRS-05839: The requested action '*string*' for the resource '*string*' on server '*string*' was aborted due to a timeout.

Cause: The timeout specified for a custom action was reached before the action could complete.

Action: Revise the timeout setting and retry the action.

CRS-06001: User does not have permission to start CRSD.

Cause: Unable to start CRSD due to insufficient permissions.

Action: Start CRSD as a privileged user.

CRS-06007: Could not communicate with Event Manager.

Cause: Unable to communicate with Event Manager daemon.

Action: Run the 'crsctl check evmd' command to determine whether Event Manager daemon is properly configured and is running.

CRS-06015: Oracle Clusterware has experienced an internal error. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-06016: Resource auto-start has completed for server *string*

Cause: CRS has completed startup of resources on the specified server.

Action: None

CRS-06017: Processing resource auto-start for servers: *string*

Cause: The blocking start of Oracle High Availability Services has updated its list of servers to process.

Action: None

CRS-06021: Could not set system resource limits for Clusterware: "*ulimit -string string*".

Cause: A ulimit command issued internally to set system resource limits failed.

Action: Ensure that the correct resource limit values are set in the user profile and limits.conf.

CRS-06022: Starting Oracle High Availability Services-managed resources

Cause: Oracle High Availability Services is attempting to start resources for the local server.

Action: None

CRS-06023: Starting Oracle Cluster Ready Services-managed resources

Cause: Oracle Cluster Ready Services is attempting to start resources for the cluster.

Action: None

CRS-06024: Completed start of Oracle Cluster Ready Services-managed resources

Cause: Oracle Cluster Ready Services has started resources for the cluster.

Action: None

CRS-06026: Stopping Oracle Cluster Ready Services

Cause: Oracle Cluster Ready Services was stopped on at least one server.

Action: None

CRS-06027: Starting Oracle Cluster Ready Services

Cause: Oracle Cluster Ready Services was started on at least one server.

Action: None

CRS-06028: Starting Oracle Cluster Ready Services-managed resources on server '*string*'

Cause: Oracle Cluster Ready Services has started managed resources on the specified server.

Action: None

CRS-06504: '*string*' cannot be specified as an attribute.

Cause: An effort was made to explicitly specify an attribute that cannot be specified by the user

Action: Remove the mentioned attribute, and re-issue the command.

CRS-06505: Format of the EXPRESSION attribute '*string*' is invalid

Cause: The EXPRESSION attribute is invalid.

Action: Provide a valid value for the EXPRESSION attribute. Msg 6506 continued in msg 6562

CRS-06530: cannot set node role because cluster is not configured in "flex" mode

Cause: An attempt to set a node's role using 'crsctl set node role' was rejected because the cluster is not running in "flex" mode. Node roles can only be set for nodes in "flex" clusters.

Action: Reissue the command after the cluster is configured in "flex" mode."

CRS-06531: Issued command is not supported in this version of CRS.

Cause: The command was rejected because the related feature is not supported in this release.

Action: If this error occurred during rolling upgrade, wait for the upgrade to finish. Otherwise, upgrade to the required release or higher. Msg 6532 continued in msg 6566

CRS-06535: Cannot restart resource '*string*' as a part of a dependency because the auto start capability of this resource has been disabled.

Cause: An attempt was made to start a resource due to a dependency requirement, but the resource could not be started automatically because the auto start capability of this resource was disabled.

Action: Enable auto start for the resource.

CRS-06538: Could not set the cluster type to 'string'. The cluster type has already been set.

Cause: An attempt was made to change the cluster type, which has already been set. The cluster type can only be set once.

Action: Restart the cluster to reset its type.

CRS-06573: cannot set node role because GNS is not configured in the cluster

Cause: An attempt to set a node's role using 'crsctl set node role' was rejected because the cluster was not configured with GNS. Node roles can only be set to leaf if GNS is configured.

Action: Reissue the command after configuring GNS in the cluster.

CRS-06581: Node 'string' does not belong to any site.

Cause: An attempt to query a node failed because the indicated name did not belong to any site.

Action: Issue the command 'olsnodes' to retrieve the list of the nodes in the cluster.

CRS-06583: Disk 'string' does not belong to any site.

Cause: An attempt to query a disk failed because no disk with the indicated name could be found on any site.

Action: Issue the command 'asmcmd lsdisk' to retrieve the list of the disks in the cluster.

CRS-06592: Site 'string' cannot be added, deleted or quarantined because the cluster is not operating in extended mode.

Cause: An attempt to add, delete or quarantine a site was rejected because the cluster was not operating in extended mode.

Action: Reconfigure the cluster in extended mode.

CRS-06593: Site 'string' cannot be deleted because the site still has nodes.

Cause: An attempt to delete a site was rejected because there were nodes present on that site.

Action: Delete the cluster nodes from the site before deleting the site.

CRS-06594: Site 'string' cannot be deleted because the site still has disks.

Cause: An attempt to delete a site was rejected because there were disks present on that site.

Action: Delete the disks from the site before deleting the site.

CRS-06599: cannot set the node's role to Leaf on an extended cluster

Cause: An attempt to set a node's role to Leaf was rejected because the cluster was configured as an extended cluster where only Hub Nodes were supported.

Action: None

CRS-06602: No password specified.\n

Cause: A password was not entered in response to the password prompt.

Action: Enter a password.

CRS-06603: Cannot modify 'string' policy.

Cause: An attempt was made to modify a read-only policy.

Action: Specify a policy that is not read-only.

CRS-06705: Oracle Clusterware Release Version ('string') does not match Software Version ('string'). Oracle Clusterware cannot be started.

Cause: Oracle Clusterware was started from an older home that has since been upgraded.

Action: Start Oracle Clusterware from the upgraded home. Also, check the CRS home configured in olr.loc and the /etc/init.d/ohasd script to make sure they have not been accidentally changed.

CRS-06706: Oracle Clusterware Release patch level ('number') does not match Software patch level ('number'). Oracle Clusterware cannot be started.

Cause: Oracle Clusterware was started from an older home that has since been patched.

Action: Start Oracle Clusterware from the patched home. Also, check the CRS home configured in olr.loc and the /etc/init.d/ohasd script to make sure they have not been accidentally changed.

CRS-06707: init.ohasd is not running.

Cause: Oracle High Availability Services startup failed because there was no init.ohasd running.

Action: 1. Check the run level to ensure that you are in the correct runlevel using cluvfy ("cluvfy stage -pre crsinst -n nodelist"); 2. If the run level is correct, diagnose the reason for init.d not starting init.ohasd.

CRS-06749: unable to get the software version

Cause: The crsctl query failed because the software version could not be retrieved. Either the clusterware stack was down, or the user was not root (UNIX) or Administrator (WINDOWS).

Action: Bring up the clusterware stack or run the query as a privileged user.

CRS-06750: unable to get the active version

Cause: The crsctl query failed because the active version could not be retrieved. Either the clusterware stack was down, or the user was not root (UNIX) or Administrator (WINDOWS).

Action: Bring up the clusterware stack or run the query as a privileged user.

CRS-06751: unable to get the software patch version

Cause: The crsctl query failed because the software patch version could not be retrieved. Either the clusterware stack was down, or the user was not root (UNIX) or Administrator (WINDOWS).

Action: Bring up the clusterware stack or run the query as a privileged user.

CRS-06752: Active version query failed.

Cause: The crsctl query failed because the active version could not be retrieved.

Action: See the accompanying error message and respond.

CRS-06753: Software patch query failed.

Cause: The crsctl query failed because the software patch version could not be retrieved.

Action: See the accompanying error message and respond.

CRS-06754: Software version query failed for node *string*.

Cause: The crsctl query failed to retrieve the software version.

Action: See the accompanying error message and respond.

CRS-06761: Invalid value for QoS Management policy management key '*string*' in OCR.

Cause: An invalid value for Quality of Service Management policy management key was found in the OCR.

Action: Contact Oracle Support Services.

CRS-06762: Unable to use CR\$CTL for Policy Management because Quality of Service Management (QoS) is managing the Clusterware policies.

Cause: CR\$CTL cannot be used for Policy Management because Quality of Service Management is configured to manage Clusterware policies.

Action: Use Quality of Service Management for Policy Management.

CRS-06763: Maximum size specified for the cluster activity log is non-numeric.

Cause: A non-numeric value was specified for the maximum size of the cluster activity log.

Action: Specify a maximum size that is a numeric value. Msg 6764 continued in msg 6568

CRS-06771: An invalid value was specified for argument *string*.

Cause: Invalid values were specified on the command line for the argument.

Action: Provide a positive non-zero integer value for the mentioned argument.

CRS-06773: Value out of range for argument *string*.

Cause: An attempt to modify trace file options specified a value out of range. Either the value for the -filesize keyword was less than 1MB or greater than 2GB or the value for the -numsegments keyword was greater than 4294967295.

Action: Specify a valid value for the identified keyword and retry the command.

CRS-06775: Daemon *string*: Get trace file options request failed.

Cause: An unexpected internal error occurred.

Action: Contact Oracle Support Services.

CRS-06776: Daemon *string*: Set trace file options request failed.

Cause: An unexpected internal error occurred.

Action: Contact Oracle Support Services.

CRS-06777: The command '*string*' cannot be used for entity names starting with '*ora.*'

Cause: An attempt was made to use an unsupported entity name in CR\$CTL.

Action: Provide an entity name that does not start with '*ora.*'

CRS-06782: Retention time specified for the cluster activity log is non-numeric.

Cause: A non-numeric value was specified for the retention time of the cluster activity log.

Action: Specify a retention time in hours that is numeric.

CRS-06783: cannot set the node's role to Leaf on a *string*

Cause: An attempt to set a node's role to Leaf was rejected because the cluster configuration supports only Hub nodes.

Action: None

CRS-07000: Generic GPnP success

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07001: Generic GPnP error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07002: Not enough memory

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07003: GPnP facility initialization failed

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07004: This feature is unsupported or not implemented

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07005: Requested item not found

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07006: Insufficient buffer size

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07007: Error in file I/O operation

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07008: Invalid permissions for the operation

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07009: Bad authority id

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07010: Key does not exist

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07011: Bad key

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07012: Hostname not found

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07013: GPNPD daemon is not running

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07014: Attempting to set a bad value

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07015: Bad hostname value

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07016: Bad authority id value

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07025: Duplicate profile

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07026: Profile is not given or not available

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07027: Badly formed profile

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07028: Profile is too big to be valid

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07029: Profile is older than the current

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07030: Profile exists in memory only, not saved

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07031: Request retry message from GPNPD

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07032: Value already set in profile

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07040: Generic XML error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07041: GPnP XML profile is not well formed

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07047: Communication timeout

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07053: Resource discovery error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07056: OCR Init error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07057: Reinit OCR to a different bootlevel

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07058: OCR error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07065: GPnP wallet error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07066: Requested GPnP wallet is not found

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07067: Invalid GPnP wallet password given

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07068: GPnP wallet is too big to be valid

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07069: GPnP wallet is corrupted or invalid

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07070: Bad or missing private key in GPnP wallet

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07071: Bad or missing public key in GPnP wallet

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07076: Failed to init crypto libraries

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07085: GPnP profile unsigned

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07086: GPnP profile signature invalid

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07087: GPnP profile valid peer signature

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07088: GPnP profile valid PA signature

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07089: GPnP profile was signed with a different wallet

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07090: Grid Naming Service (GNS) error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07095: GPnP tool usage

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07096: GPnP tool version

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-08000: unable to obtain local host name for reboot advisory log file scan

Cause: An attempt to retrieve the local host name failed. The scan for reboot advisory files will not use host name criteria and so may report occurrences for other nodes as well as this one.

Action: Report this error to Oracle Support Services.

CRS-08001: an error occurred accessing reboot advisory log file location: *string*

Cause: The scan for reboot advisory log files was unable to access the indicated file system location. The location was skipped, so any reboot advisory files that it contains will not be reported. This message is accompanied by CLSU- messages containing details of the access error.

Action: Respond based on the error described by the accompanying CLSU- messages. This may involve re-creating the directory or changing its permissions.

CRS-08002: an error occurred searching reboot advisory log file location: *string*

Cause: The scan for reboot advisory log files was unable to read the next file name from the indicated file system location. No further processing of reboot advisory files from that location occurs. This message is accompanied by CLSU- messages containing details of the access error.

Action: Respond based on the error described by the accompanying CLSU- messages.

CRS-08003: reboot advisory log file: *string* is unexpectedly empty

Cause: The scan for reboot advisory log files encountered a file that was empty. This might happen (rarely) if a component is initializing its use of reboot advisory at the same time the scan is running. Processing of other files in the location continues.

Action: Frequent occurrence of this message should be reported to Oracle Support Services.

CRS-08004: an error occurred reading reboot advisory log file: *string*

Cause: The scan for reboot advisory log files experienced a read error on a reboot advisory file. No further processing is done for that file, but the scan continues with other files. This message is accompanied by CLSU- messages containing details of the read error.

Action: Respond based on the accompanying CLSU- messages.

CRS-08005: an error occurred closing reboot advisory log file: *string*

Cause: The scan for reboot advisory log files experienced a close error on a reboot advisory file. The scan continues with other files. This message is accompanied by CLSU- messages containing details of the close error.

Action: Report this error to Oracle Support Services.

CRS-08006: an error occurred opening reboot advisory log file: *string*

Cause: The scan for reboot advisory log files experienced an error when it opened a reboot advisory file. The scan continues with other files. This message is accompanied by CLSU- messages containing details of the open error.

Action: If the error indicated in the accompanying CLSU- messages is one that can be corrected, do so. Otherwise, report this error to Oracle Support Services.

CRS-08007: an error occurred closing reboot advisory log file location: *string*

Cause: The scan for reboot advisory log files experienced an error when it closed the indicated file system location. Processing of other reboot advisory locations (if any)

continues normally. This message is accompanied by CLSU- messages containing details of the close error.

Action: Report this error to Oracle Support Services.

CRS-08008: *string*

Cause: Operating system error data related to reboot advisory file processing was returned. The error data is packaged in a CLSU- message that follows "CRS-08008:". One or more of these messages appears after a message announcing the error condition.

Action: Look up the embedded CLSU- message for an explanation of the operating system error data. If there is no CLSU- message ID present, contact Oracle Support Services.

CRS-08009: reboot advisory log file: *string* contains invalid data (length *number*, error code *number*)

Cause: A reboot advisory log record read from the indicated file contained incorrect data.

Action: Report this error to Oracle Support Services.

CRS-08010: invalid network reboot advisory message detected (length *number*, error code *number*)

Cause: A reboot advisory record received over the network was improperly formed or contained incorrect data.

Action: Report this error to Oracle Support Services.

CRS-08011: reboot advisory message from host: *string*, component: *string*, with time stamp: *string*

Cause: A reboot advisory message was detected. During Oracle Clusterware startup on a given host, messages recently written to disk on that host before a reset or reboot are detected and announced. Subsequently, network reboot advisory messages may be announced as they occur. These are reported by hosts other than the one being reset or rebooted. This message is accompanied by other messages containing details on what led to the reset or reboot. The time stamp in this message begins with either 'U' (denoting UTC time) or 'L' (denoting local time as viewed by the issuing host). Note that a given reset or reboot event can produce multiple occurrences of these messages on multiple hosts in the cluster.

Action: Use the reboot advisory message(s) to determine why Oracle Clusterware caused a reset or reboot of the affected host, and respond accordingly. Refer to the discussion of reboot advisories in the Oracle Clusterware administration documentation for additional guidance.

CRS-08012: reboot advisory message from a higher Oracle Clusterware version detected

Cause: A reboot advisory message from a higher version installation of Oracle Clusterware was detected. This is an expected occurrence with network reboot advisories when there are nodes with a higher Oracle Clusterware version than this node (such as during an upgrade). It is an unexpected condition with file reboot advisories.

Action: The reboot advisory message is displayed in a following CRS-08013 message in a "raw" text form. In the case of network reboot advisories, the explanatory message text should be readable and useful to determine the cause of the node reboot. If the reboot advisory message is from a file, report this message to Oracle Support Services.

CRS-08013: reboot advisory message text: *string*

Cause: An explanatory text message associated with a reboot advisory announced in a preceding CRS-08011 or CRS-08012 message was displayed. These text messages are always written in US English locale.

Action: Refer to the descriptions of messages CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

CRS-08014: reboot advisory binary data (*number bytesstring*) follows:

Cause: Binary data associated with a reboot advisory message was displayed. It is followed by one or more lines of CRS-08015 message containing the binary data formatted in hexadecimal. If an asterisk appears inside the parentheses, an invalid data length was detected.

Action: Refer to the description of message CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

CRS-08015: *number string*

Cause: Hexadecimal display of binary data included in a reboot advisory log message was displayed. The first number is an offset and is followed by up to 16 bytes of data.

Action: Refer to the description of message CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

CRS-08016: an error occurred determining the location for reboot advisory log files

Cause: The search for reboot advisory log files was unable to determine the file system location used for those files. Processing of reboot advisory files is skipped. This message is accompanied by CLSU- messages containing failure details. This is an internal error.

Action: Report this error to Oracle Support Services.

CRS-08017: location: *string* has *number* reboot advisory log files, *number* were announced and *number* errors occurred

Cause: This summary message is written during Oracle Clusterware startup if one or more reboot advisory log files was found and examined.

Action: This message is informational, but if the error count is nonzero the associated messages (earlier in the alert log) should be examined.

CRS-08018: warning: missing cluster identity data for reboot advisory message validation

Cause: During Oracle Clusterware start up, an attempt to obtain the identity of the cluster failed. Processing continues normally, but network reboot advisories from nodes in other clusters may be reported in this cluster's alert log.

Action: Report this error to Oracle Support Services.

CRS-08019: warning generated by the initialization of the reboot advisory in the CSS agent, *string*

Cause: During initialization of the reboot advisory, a warning was generated

Action: Report this warning to Oracle Support Services.

CRS-08020: error generated by the initialization of the reboot advisory in the CSS agent, *string*

Cause: During initialization of the reboot advisory, an error was generated.

Action: Report this error to Oracle Support Services.

CRS-08216: Invalid rejection code received from policy engine: *string*. Contact Oracle Support Services for more help.

Cause: CRSCTL client received an invalid rejection code.

Action: Report the accompanying warning to Oracle Support Services.

CRS-08271: invalid flag or combination of flags given for the 'eval' command

Cause: The 'crsctl eval' command was executed with an invalid combination of flags.

Action: Reexecute the command with a valid combination of flags.

CRS-08500: Oracle Clusterware *string* process is starting with operating system process ID *string*

Cause: The indicated service or component of Oracle Clusterware began execution.

Action: None

CRS-08501: Oracle Clusterware *string* process with operating system process ID *string* is ending with return value *number*

Cause: The indicated service or component of Oracle Clusterware ended execution.

Action: None

CRS-08502: Oracle Clusterware *string* process with operating system process ID *string* failed in initialization

Cause: The indicated service or component of Oracle Clusterware was unable to complete initialization.

Action: Report this error to Oracle Support Services.

CRS-08503: Oracle Clusterware process *string* with operating system process ID *string* experienced fatal signal or exception code *string*.

Cause: The indicated service or component of Oracle Clusterware encountered a fatal exception.

Action: Report this error to Oracle Support Services.

CRS-08504: Oracle Clusterware *string* process with operating system process ID *string* is exiting

Cause: The indicated service or component of Oracle Clusterware ended execution using the operating system 'exit' function.

Action: None

CRS-08505: Oracle Clusterware *string* process with operating system process ID *string* encountered internal error *string-number*

Cause: The indicated service or component of Oracle Clusterware encountered an internal error, causing an ADR incident to be raised.

Action: Contact Oracle Support Services and report the internal error code displayed in the message.

CRS-09000: Failed to allocate memory.

Cause: During initialization, memory could not be allocated.

Action: Report this error to Oracle Support Services.

CRS-09001: Internal Error

Cause: An internal error occurred.

Action: Report this error to Oracle Support Services.

CRS-09003: Cluster Health Monitor is not supported in this configuration.

Cause: Grid Infrastructure Management Repository was not configured.

Action: Re-Install Grid Infrastructure and ensure that Grid Infrastructure Management Repository is configured.

CRS-09004: Error reading from standard input

Cause: Could not read commands from the command line.

Action: Report this error to Oracle Support Services.

CRS-09005: Quoted string not ended

Cause: An unmatched " was found in the command entered.

Action: Put in the corresponding quote or remove the unmatched quote.

CRS-09006: Could not set environment, exiting.

Cause: Error occurred during initialization of oclumon.

Action: Report this to Oracle Support Services.

CRS-09007: failed to contact 'osysmond' daemon

Cause: An attempt to get cluster mode was unable to contact the 'osysmond' daemon.

Action: Ensure that the ora.crf resource is running and, if not, start it.

CRS-09008: Unknown verb *string*

Cause: Unknown or invalid verb passed to oclumon.

Action: Use 'oclumon -h' in command line or help command in interactive mode to see the supported verbs.

CRS-09009: Error *string*: Parsing error. Invalid arguments specified.

Cause: Invalid or unknown arguments passed.

Action: Refer to product documentation or to command online help for an explanation of verbs and arguments.

CRS-09010: Error *string*: mandatory data not supplied

Cause: Mandatory data not supplied to the command.

Action: Refer to product documentation or to command online help for an explanation of verbs and arguments.

CRS-09011: Error *string*: Failed to initialize connection to the Cluster Logger Service

Cause: Error occurred while connecting to the Cluster Logger Service.

Action: Ensure that Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the given node.

CRS-09012: Error *string*: Error sending query to the Cluster Logger Service

Cause: Error occurred while sending query to the Cluster Logger Service.

Action: Ensure that the Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the specified node.

CRS-09013: Error *string*: Invalid data received from the Cluster Logger Service

Cause: Invalid or unknown data received from the Cluster Logger Service.

Action: Ensure that the Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the specified node.

CRS-09014: Error: Corrupt reply from the Cluster Logger Service

Cause: Invalid or unknown data received from the Cluster Logger Service.

Action: Make sure that the version of both master and client installation is same. Also, check the connectivity between master and client using the 'ping'.

CRS-09017: Error: Invalid or unknown reply received from the Cluster Logger Service

Cause: Error occurred in the data received.

Action: Make sure that the version of both master and client installation is same. Also, check the connectivity between master and client.

CRS-09018: Error *string*: No arguments supplied

Cause: No argument was supplied with the command.

Action: Some commands need arguments with them. Refer to the product documentation or to the online help display.

CRS-09019: Error *string*: No parameter *string* supported

Cause: A wrong parameter was passed with the command.

Action: Refer to the command help and pass the correct parameters.

CRS-09020: Error *string*: No master node name specified

Cause: The master node name was not specified in the command.

Action: Pass the appropriate master node name with the command.

CRS-09021: Error *string*: Invalid or no start time specified

Cause: A start time was not specified or the time was passed in the wrong format.

Action: Pass the correct start time. For correct format, refer to command help.

CRS-09022: Error *string*: Invalid or no end time specified

Cause: A end time was not specified or the time was passed in the wrong format.

Action: Pass the correct end time. For correct format, refer to command help.

CRS-09023: Error *string*: Time not specified or in wrong format or invalid

Cause: Time was not specified or was invalid.

Action: Pass the correct and valid time. For correct format, refer to command help.

CRS-09024: Error *string*: No node name specified

Cause: Node name not specified.

Action: Provide a node name in the command. Refer to the product documentation or to the command online help for information.

CRS-09025: Error *string*: No disk ID name specified

Cause: Disk ID was not specified in the command with -diskid.

Action: Pass a valid disk ID with -diskid option.

CRS-09026: Error *string*: No parameter specified

Cause: The parameter was not specified in the query.

Action: Pass appropriate parameter for query. Refer to the product documentation or to the command online help for information.

CRS-09027: Error string: Parameter *string* is not supported with this verb

Cause: Invalid or unknown parameter passed.

Action: Pass the correct parameter. Refer to the product documentation or to the command online help for information.

CRS-09028: Error string: No NIC ID specified

Cause: NIC ID was not specified in the command with `-nicid`.

Action: Pass a valid NIC ID with `-nic` option.

CRS-09029: Error string: No PID specified

Cause: PID was not specified in the command with `-pid`.

Action: Pass a valid PID with `-pid` option.

CRS-09030: Error string: No region specified

Cause: Incorrect or no region specified with `-c` option.

Action: Pass a valid region with `-c` option. Refer to the product documentation or to the command online help for information.

CRS-09031: Error string: Argument *string* not supported with this verb

Cause: Unknown or invalid argument passed with the command.

Action: Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09032: Invalid hour specified in the time argument

Cause: Invalid hour in the time string was passed.

Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09033: Invalid minutes specified in the time argument

Cause: Invalid minutes in the time string was passed.

Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09034: Invalid seconds specified in the time argument

Cause: Invalid seconds in the time string was passed.

Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09035: Arguments not in proper format, or invalid arguments

Cause: Invalid arguments specified.

Action: Pass a valid verb and correct arguments for it. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09036: Invalid Cluster Health Monitor repository size specified

Cause: Non-numeric value or value out of range specified for Cluster Health Monitor repository size.

Action: Specify Cluster Health Monitor repository size in the valid range. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09037: *string* Error: Node name not specified. -disk, -nic or -proc need node name

Cause: The required node name was not specified for -disk, -nic or -proc.

Action: Provide a node name with -n option. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09038: Error: -s and -e need to be specified together

Cause: Either -s or -e is missing.

Action: Start and end time need to be specified together for range queries, which cannot be unbounded. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09039: Error *string*: -i is not allowed with the range query

Cause: The -i option was specified on a oclumon range query.

Action: Use -i only in continuous mode. Refer to the command inline help or product documentation for more information.

CRS-09040: Error *string*: Band value not specified or incorrect

Cause: The band value was not specified with -t option or was invalid.

Action: Provide a valid band value. Refer to the product documentation or to the command online help for information on supported arguments..

CRS-09041: Error *string*: The -repos argument was specified without an option.

Cause: -repos was not specified with the option, generating a parsing error.

Action: Provide a valid option to -repos. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09042: Error *string*: No size specified with 'checkretentiontime'

Cause: A valid value was not specified with 'checkretentiontime'.

Action: Provide a valid numerical value with 'checkretentiontime'. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09043: Error *string*: Non-numeric or invalid value for size: *string*

Cause: An invalid or non-numeric value was specified for size.

Action: Provide a valid numeric size. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09044: No key specified with -getkey

Cause: An option was not specified with -getkey.

Action: Provide a valid key as an option with -getkey.

CRS-09045: No key specified for -get

Cause: An option was not specified with -get.

Action: Provide a valid option with -get. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09046: Invalid key specified

Cause: An unknown key was specified with -get.

Action: Provide a supported key with -get. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09047: Error string: Error Dumping Log (return code: *number*) for node *string*

Cause: An error occurred while dumping local log.

Action: Report this error to Oracle Support Services. Cluster Health Monitor repository directory may be unreachable, unreadable or incorrect.

CRS-09048: Error string: No data received from the Cluster Logger Service after *number* attempts

Cause: Data was not received from the Cluster Logger Service after the specified number of attempts or data was not available.

Action: None

CRS-09049: Error string: Cannot get environment variable CRFHOME

Cause: An internal error occurred.

Action: Report this error to Oracle Support Services.

CRS-09050: Error string: Too many host names

Cause: Too many host names were specified.

Action: Provide valid number of host names. Refer to the product documentation or to the command online help for information.

CRS-09051: Error string: Invalid interval size specified

Cause: Non-numeric or invalid interval specified.

Action: Provide a valid numerical value for interval size. Refer to the product documentation or to the command online help for information

CRS-09052: Error string: *string* control not supported

Cause: The specified debug control was not supported.

Action: Provide a supported control. Refer to the product documentation or to the command online help for information.

CRS-09053: Key:value pair missing

Cause: A required key:value pair was missing.

Action: Provide a valid key:value pair. Refer to the product documentation or to the command online help for information

CRS-09054: Incomplete or invalid parameters *string*

Cause: Incomplete or invalid parameters supplied.

Action: Provide the complete and correct parameters. Refer to the product documentation or to the command online help for information

CRS-09055: module:level specified in invalid format or invalid value

Cause: Invalid format or value specified for module:level.

Action: Provide correct module:level. Refer to the product documentation or to the command online help for information

CRS-09056: Error *string*: Invalid Cluster Health Monitor repository location specified

Cause: Invalid Cluster Health Monitor repository location specified.

Action: Provide a directory with read and write permissions for Cluster Health Monitor repository location. Refer to the product documentation or to the command online help for information.

CRS-09057: Error *string*: No response received from the Cluster Logger Service

Cause: No data received from the Cluster Logger Service for the query.

Action: Ensure that the Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the specified node.

CRS-09058: Error *string*: Changing log level failed due to authentication failure

Cause: Log level could not be changed due to authentication failure.

Action: Ensure that this command is run as root.

CRS-09059: Error *string*: Changing log level failed due to connection failure

Cause: A connection failure occurred while changing the log.

Action: Ensure that the daemons are running and are reachable.

CRS-09060: Error *string*: Unable to send message due to memory allocation failure

Cause: Memory could not be allocated for debug message.

Action: Report this error to Oracle Support Services.

CRS-09061: Error *string*: Changing log level failed due to response time-out

Cause: A time out happened while waiting for response.

Action: Report this error to Oracle Support Services.

CRS-09062: Error *string*: Error in changing log level

Cause: An error occurred while changing log level.

Action: Report this error to Oracle Support Services.

CRS-09063: Given time range is more than 1 hour

Cause: The time range specified with showtrail command was more than one hour.

Action: Provide a range of less than 1 hour for showtrail.

CRS-09064: Error *string*: Changing log level failed due to connection failure. Cannot connect to daemon *string*.

Cause: A connection failure occurred while changing the log level.

Action: Ensure that the specified daemon is running and reachable.

CRS-09065: Disk ID not found

Cause: Given disk ID was not found or not present in the interesting list.

Action: Provide a disk ID which is available at the start of the query range.

CRS-09066: Process ID not found

Cause: Given process ID was not found.

Action: Provide a process ID which is available at the start of the query range.

CRS-09067: NIC ID not found

Cause: Given NIC ID was not found.

Action: Provide a correct NIC ID.

CRS-09068: Error *string*: -allnodes and -n must not be used together

Cause: Both -allnodes and -n were supplied on a dumpnodeview command.

Action: Specify either -allnodes or -n with specific nodes.

CRS-09069: The new Cluster Health Monitor repository location is *string*.

Cause: The Cluster Health Monitor repository location was successfully replaced.

Action: None

CRS-09070: The new Cluster Health Monitor repository retention time is *number* seconds.

Cause: The Cluster Health Monitor repository retention time was successfully modified.

Action: None

CRS-09071: Internal error in Cluster Health Analysis during problem analysis

Cause: An internal error occurred during problem analysis.

Action: Contact Oracle Support Services.

CRS-09072: Internal error in Cluster Health Analysis report output

Cause: An internal error occurred while reporting a problem.

Action: Contact Oracle Support Services.

CRS-09073: No problems to display

Cause: No problems were found that matched the selection criteria specified to the 'oclumon analyze' command.

Action: None

CRS-09074: No component specified to the component argument

Cause: An 'oclumon analyze' command was issued without a component.

Action: Provide a component to the 'oclumon analyze' command. Refer to the product documentation or to the command online help for information.

CRS-09075: Invalid component name '*string*' specified as the component argument

Cause: An 'oclumon analyze' command was issued with an invalid component.

Action: Pass a valid component to the 'oclumon analyze' command. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09076: Error loading the required Cluster Health models

Cause: The required Cluster Health models did not exist, did not have the required permission, or had an invalid format.

Action: Ensure that the Cluster Health models are present in the 'cdata/model' subdirectory of the Oracle Grid Infrastructure home, and that their permissions are correct. If the problem persists, check for entries in the oclumon log file for more details.

CRS-09077: Invalid path '*string*' was specified as the data directory argument

Cause: An 'oclumon analyze' command was issued specifying a data directory that does not exist or is not accessible to the user.

Action: Pass a valid path to the 'oclumon analyze' command. Look at accompanying messages for more information.

CRS-09078: Invalid severity value '*string*' provided as the severity argument

Cause: An 'oclumon analyze' command was issued with an invalid severity value.

Action: Pass a valid severity value to the 'oclumon analyze' command. Refer to the product documentation or to the command online help for information.

CRS-09079: No instance name specified for the instance argument

Cause: An 'oclumon' command was issued without an instance name.

Action: Provide an instance name with the 'oclumon' command. Refer to the product documentation or to the command online help for information.

CRS-09080: data for other nodes of cluster cannot be viewed from this node

Cause: An 'oclumon dumpnodeview -n' command was issued for other nodes from a leaf node.

Action: Refer to the Cluster Health Monitor documentation for more information.

CRS-09081: Internal error in Cluster Health calibration

Cause: An internal error occurred during cluster health model calibration.

Action: Contact Oracle Support Services.

CRS-09082: Insufficient permission to execute command. Require privileged user

Cause: A non-privileged user attempted to execute a command requiring privilege.

Action: Issue the command again as a privileged user.

CRS-09083: No database name specified for the database argument

Cause: An 'oclumon' command was issued without a database name.

Action: Provide a database name with the 'oclumon' command. Refer to the product documentation or to the command online help for information.

CRS-09084: Error *string*: Node name is greater than *string* bytes

Cause: An 'oclumon' command was issued with a node name that was too long.

Action: Supply a node name no greater than the indicated size with the 'oclumon' command and retry. Refer to the product documentation or to the command online help for information.

CRS-09085: Model name missing or invalid for the model argument

Cause: The previous ocumon command was rejected because it did not include a valid model name.

Action: Reissue the ocumon command providing a valid model name. Refer to the product documentation or to the command online help for information.

CRS-09086: Server pool name missing or invalid for the server pool argument

Cause: The previous ocumon command was rejected because it did not include a valid server pool name.

Action: Reissue the ocumon command providing a valid server pool name. Refer to the product documentation or to the command online help for information.

CRS-09087: Server pool name specified in a cluster without user-defined server pools

Cause: The previous oclumon command was rejected because it was issued with a server pool name on a cluster without user-defined server pools.

Action: Reissue the oclumon command without a server pool name. Refer to the product documentation or to the command online help for information.

CRS-09088: Node name specified in a cluster with user-defined server pools

Cause: The previous oclumon command was rejected because it was issued with a node name on a cluster with user-defined server pools.

Action: Reissue the oclumon command without a node name. Refer to the product documentation or to the command online help for information.

CRS-09089: Parameter '*string*' is not supported in combination with parameter '*string*'.

Cause: The command was rejected because the combination of parameters passed was invalid.

Action: Refer to the product documentation or to the online help for the command and reissue the command with the correct parameters.

CRS-09090: Error *string*: Parameter '*string*' is specified multiple times.

Cause: The previous 'oclumon' command was rejected because the parameter listed in the message was specified multiple times.

Action: Refer to the product documentation or to the online help for the command and reissue the command with the correct parameters.

CRS-09091: database name '*string*' is invalid

Cause: An 'oclumon' command was issued with an invalid database name.

Action: Provide a valid database name with the 'oclumon' command. Refer to the product documentation or to the online help for the command for information.

CRS-09092: No instance of database '*string*' is active on this node.

Cause: The 'oclumon calibrate' command was rejected because no instance of the above listed database was active on the local node.

Action: Issue the 'srvctl start database' command to start the above listed database. Issue the 'srvctl status database' command to retrieve a list of nodes on which the database instances are online. Issue the 'oclumon calibrate' command again from a node on which the database instance is online. Refer to the product documentation or to the online help for the command for information.

CRS-09093: Database '*string*' of type '*string*' is not supported in a cluster with user-defined server pools.

Cause: An 'oclumon' command was issued with an administrator-managed database in a cluster with user-defined server pools.

Action: Reconfigure the database to be policy-managed using the 'srvctl modify database' command to enable monitoring by the Oracle Cluster Health Analysis service. Verify the monitoring status using the 'srvctl status cha' command. Re-issue the 'oclumon calibrate' command. Refer to the product documentation or to the online help for the command for information.

CRS-09100: Error setting Cluster Health Monitor repository size

Cause: An error occurred while setting Cluster Health Monitor repository size on the Cluster Logger Service.

Action: Report this error to Oracle Support Services.

CRS-09101: Error updating Cluster Health Monitor repository size in configuration file.

Cause: An error occurred while writing the Cluster Health Monitor repository size to configuration files.

Action: Report this error to Oracle Support Services.

CRS-09102: No data for the node at the specified time

Cause: Data was not found for the specified node.

Action: This is an informational message only.

CRS-09103: No data available

Cause: Data was not available for the query.

Action: Make sure the System Monitor Service is running on the specified node.

CRS-09104: No data available for the specified nodes

Cause: Data was not available for specified nodes.

Action: Make sure the System Monitor Service is running on the specified nodes.

CRS-09105: Internal Error on master

Cause: An internal error on master caused this error.

Action: Report this error to Oracle Support Services.

CRS-09106: Data requested was outside Cluster Health Monitor retention time limits.

Cause: A request for data outside Cluster Health Monitor repository limit caused this error.

Action: Data needs to be requested in the proper Cluster Health Monitor repository limits. Refer to the product documentation for more information.

CRS-09107: Start time greater than end time

Cause: A start time greater [or later] than end time caused an error.

Action: Make sure the start time is less than the end time for the specified range query.

CRS-09108: Threshold out of acceptable range

Cause: A threshold was specified that is outside the allowed range.

Action: Make sure threshold is within the acceptable range. Refer documentation or online help for more information

CRS-09109: New Cluster Health Monitor repository location same as the old location on node *string*

Cause: The new location specified for Cluster Health Monitor repository is same as the old location.

Action: Provide a different location for Cluster Health Monitor repository. Refer documentation or online help for more information.

CRS-09110: Cluster Health Monitor repository location not changed as the location specified does not exist on node *string*.

Cause: The new location specified for Cluster Health Monitor repository does not exist.

Action: Provide a different location for Cluster Health Monitor repository. Refer documentation or online help for more information.

CRS-09111: Error updating Cluster Health Monitor repository location *string* in configuration file.

Cause: An error occurred while writing the Cluster Health Monitor repository location to configuration files.

Action: Report this error to Oracle Support Services.

CRS-09114: Cluster Health Monitor repository location change failed on one or more nodes. Aborting location change.

Cause: An error occurred while setting Cluster Health Monitor repository location on the Cluster Logger Service.

Action: Retry specifying a valid location.

CRS-09116: Cluster Health Monitor repository retention change failed on one or more nodes. Aborting retention change.

Cause: An error occurred while setting Cluster Health Monitor repository size on the Cluster Logger Service.

Action: Retry specifying a valid location.

CRS-09117: Grid Infrastructure Management Repository configuration error \n *string*

Cause: Grid Infrastructure Management Repository configuration error occurred.

Action: Take the following steps. 1) Examine the accompanying ORA-nnnnn or CRS-nnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtdb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09118: Grid Infrastructure Management Repository connection error \n *string*

Cause: Grid Infrastructure Management Repository connection error occurred.

Action: Take the following steps. 1) Examine the accompanying ORA-nnnnn or CRS-nnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtdb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09119: Warning: *string* option has been deprecated and will be ignored.

Cause: A deprecated option was specified on the command line. The option was ignored.

Action: Check the documentation for the new syntax of the command.

CRS-09120: oclumon was not able to connect to the Grid Infrastructure Management Repository because an authorization failure occurred. \nstring

Cause: An authorization failure occurred when connecting to the Grid Infrastructure Management Repository.

Action: Run the 'srvctl config mgmtldb' command to verify that Grid Infrastructure Management Repository has been created successfully. If not, run the 'mgmtca' command to reset the passwords in the wallet. If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09121: oclumon was not able to connect to the Grid Infrastructure Management Repository because no listener was available.

Cause: An attempt to connect to the Grid Infrastructure Management Repository failed because no Grid Infrastructure Management Repository listener was running.

Action: Use the 'srvctl status mgmtlsnr' command to confirm that Grid Infrastructure Management Repository listener is running. If it is not, start it using the 'srvctl start mgmtlsnr' command. If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09122: oclumon was not able to retrieve the security keys from the wallet.

Cause: An attempt to retrieve the security keys from the wallet failed.

Action: Run the 'crsctl query wallet -type MGMTDB' command to verify that the wallet exists. If the problem persists, contact Oracle Support Services.

CRS-09123: oclumon was not able to connect to the Grid Infrastructure Management Repository because a Cluster Synchronization Services request failed.

Cause: An attempt to connect to the Grid Infrastructure Management Repository failed due to a Cluster Synchronization Services failure.

Action: If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09124: Cluster Health Monitor repository retention change failed. Aborting retention change. Error: string

Cause: An error occurred while setting the Cluster Health Monitor repository size on the cluster logger service.

Action: Take the following steps. 1) Examine the accompanying ORA-nnnnn or CRS-nnnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtldb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09125: Error string: Node name string is unknown or invalid. No data found for this node in Grid Infrastructure Management Repository.

Cause: The 'oclumon' command could not be carried out as entered because the node name cited in the message was invalid. The cited node name was ignored and the query executed with any remaining names.

Action: Reissue the 'oclumon' command, if desired, supplying a valid name for the node name cited in the message. Refer to the product documentation or to command online help for information.

CRS-09126: Cluster Health Monitor repository retention change failed. Error: retention space is lower than size permitted.

Cause: An attempt to set the Cluster Health Monitor repository size on the cluster logger service was rejected because the specified size was smaller than the permitted minimum size.

Action: Retry the command specifying a retention size larger or equal to the minimum size of 1 GB.

CRS-09127: Error *string*: Too many PIDs

Cause: The command 'oclumon dumpnodeview -pid' failed because too many PIDs were specified.

Action: Refer to the product documentation or to the command online help for information and reissue the command specifying a valid number of PIDs.

CRS-09128: Error *string*: Write operation is not permitted.

Cause: The command 'oclumon dumpnodeview -dir <dir_name>' failed because the user was not allowed to write in the specified directory.

Action: Ensure that the user has write permission for the specified directory and retry.

CRS-09129: Error *string*: Directory does not exist.

Cause: The command 'oclumon dumpnodeview -dir <dir_name>' failed because the specified directory did not exist.

Action: Create the specified directory and retry.

CRS-09130: Error: 'dumpnodeview' option -v or -verbose conflicts with additional view options.

Cause: The command 'oclumon dumpnodeview' failed because either -v or -verbose option was specified in addition to other view options (-system, -process, -cpu, etc.). The verbose options imply the inclusion of every part.

Action: Retry the operation specifying other options without -v or -verbose or specifying -v or -verbose without other options.

CRS-09131: Warning, argument *string* occurs multiple times in the command line.

Cause: A request to execute the command 'oclumon manage -get <args..>' included multiple occurrences of the indicated argument. The command was executed normally.

Action: To avoid issues, observe proper command syntax and avoid repeating arguments.

CRS-09500: The System Monitor Service aborted on host *string*. Details at *string* in *string*.

Cause: The System Monitor Service aborted due to an internal error.

Action: If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09501: The Cluster Logger Service aborted on host *string*. Details at *string* in *string*.

Cause: The Cluster Logger Service aborted due to an internal error.

Action: If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09502: The Cluster Health Monitor repository location *string* is inaccessible. Details at *string* in *string*.

Cause: An error occurred while accessing the Cluster Health repository.

Action: Check that the Cluster Health Monitor repository location in question has the correct permissions. Determine whether this behavior is limited to one node or whether it occurs across all of the nodes in the cluster. Use the 'oclumon manage -repos reploc *location*' command to replace the Cluster Health Monitor repository location.

CRS-09503: The System Monitor Service on this host is unable to communicate with the Cluster Logger Service on host *string*, and will log the Cluster Health Monitor data to the local repository.

Cause: Communication was lost with the Cluster Logger Service node.

Action: Verify all network connections between cluster nodes and repair any problematic connections. If network problems are not found, execute the following steps: 1. Run diagcollection.pl. 2. Contact Oracle Support Services.

CRS-09504: The Cluster Logger Service on host *string* is dropping the Cluster Health Monitor node view. Details at *string* in *string*.

Cause: The Cluster Logger Service was unable to insert Cluster Health Monitor node view into Cluster Health Monitor repository .

Action: Contact Oracle Support Services.

CRS-09505: The Cluster Health Monitor repository is deleted due to corruption and the Cluster Logger Service is disabled on *string*. Details at *string* in *string*.

Cause: A critical error occurred while operating on Cluster Health Monitor repository.

Action: Contact Oracle Support Services.

CRS-09506: The System Monitor Service local repository is disabled on the host *string*. Details at *string* in *string*.

Cause: An internal error occurred while writing to the System Monitor Service local repository.

Action: Contact Oracle Support Services.

CRS-09507: The maximum Cluster Health Monitor repository retention time is reached. Deleting the oldest Cluster Health Monitor node views in age order.

Cause: The maximum time for which the oldest Cluster Health Monitor node view will be available on Cluster Health Monitor repository was reached.

Action: If necessary, use 'oclumon manage -repos changerepossize *size*' command to change the retention time.

CRS-09508: The Cluster Health Monitor repository retention time cannot be changed due to lack of disk space on node *string*.

Cause: The Cluster Health Monitor retention time condition could not be fulfilled because the Cluster Health Monitor repository ran out of disk space at run time at the repository location.

Action: Use the 'oclumon manage -repos reploc *location*' command to replace the Cluster Health Monitor repository with a disk location that has at least 1GB of available space per cluster node.

CRS-09509: The new Cluster Logger Service master is *string*.

Cause: A new Cluster Logger Service master node was elected.

Action: None

CRS-09510: The new Cluster Logger Service replica is *string*.

Cause: A new Cluster Logger Service replica node was elected.

Action: None

CRS-09511: The System Monitor Service was not able to collect disk information on node *string*.

Cause: There was a problem in reading the disk-related information.

Action: Confirm that disks are properly configured and usable on the indicated node. If no issues are found and the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09512: The System Monitor Service was not able to collect network interface card information on node *string*.

Cause: There was a problem in reading the network interface card related information.

Action: Confirm that network interface cards are properly configured and usable on the indicated node. If no issues are found and the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09513: The version of the Grid Infrastructure Management Repository [*string*] is incompatible with the version of the Oracle Clusterware [*string*].

Cause: During startup, the Cluster Logger Service found that the version of Grid Infrastructure Management Repository was older than that of the Oracle Clusterware.

Action: Upgrade the Grid Infrastructure Management Repository to a version which is at least that of the Oracle Clusterware.

CRS-09514: The Cluster Logger Service encountered an unexpected error during inserting the data into the Grid Infrastructure Management Repository. \n*string*.

Cause: An unexpected Oracle error was returned by the Grid Infrastructure Management Repository.

Action: 1) Examine the accompanying ORA-nnnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtdb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, contact Oracle Support Services.

CRS-09515: The Cluster Logger Service encountered an unexpected error during deleting the data from Grid Infrastructure Management Repository. \n*string*.

Cause: An unexpected Oracle error was returned by the Grid Infrastructure Management Repository.

Action: 1) Examine the accompanying ORA-nnnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtdb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, contact Oracle Support Services.

CRS-09516: Encountered an unexpected error during querying the data from Grid Infrastructure Management Repository. \nstring.

Cause: An unexpected Oracle error was returned by the Grid Infrastructure Management Repository.

Action: 1) Examine the accompanying ORA-nnnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtldb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, contact Oracle Support Services.

CRS-09517: An unrecoverable configuration error occurred in the Grid Infrastructure Management Repository. Details at *string* in *string*. \nstring

Cause: An unexpected condition happened in the Grid Infrastructure Management Repository.

Action: 1) Examine the accompanying ORA-nnnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtldb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, contact Oracle Support Services.

CRS-09518: The Cluster Logger Service was not able to connect to the Grid Infrastructure Management Repository because an authorization failure occurred. \nstring

Cause: An authorization failure occurred when connecting to the Grid Infrastructure Management Repository.

Action: Run the 'srvctl config mgmtldb' command to verify that Grid Infrastructure Management Repository has been created successfully. If not, run the 'mgmtca' command to reset the passwords in the wallet. If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09519: The Cluster Logger Service was not able to connect to the Grid Infrastructure Management Repository because no listener was available.

Cause: An attempt to connect to the Grid Infrastructure Management Repository failed because no Grid Infrastructure Management Repository listener was running.

Action: Use the 'srvctl status mgmtlsnr' command to confirm that Grid Infrastructure Management Repository listener is running. If it is not, start it using the 'srvctl start mgmtlsnr' command. If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09520: The storage of Grid Infrastructure Management Repository is *number*% full. The storage location is '*string*'.

Cause: The storage of Grid Infrastructure Management Repository was close to full. This storage can be a shared file system or an Oracle ASM disk group.

Action: Make sure there is sufficient free space in repository location.

CRS-09521: Grid Infrastructure Management Repository was not available on the node *string*. The System Monitor Service will store the data in its local repository on all nodes. \nstring

Cause: Grid Infrastructure Management Repository was initializing or was shutting down when the Cluster Logger Service tried to connect, insert or delete the data.

Action: Check if the Grid Infrastructure Management Repository is online using the 'srvctl status mgmtdb' command. If it is offline, start it using the 'srvctl start mgmtdb' command.

CRS-09522: The Cluster Logger Service was not able to retrieve the security keys from the wallet.

Cause: The Cluster Logger Service could not get the security keys due a wallet read failure.

Action: Run the 'crsctl query wallet -type MGMTDB' command to verify that the wallet exists. If the problem persists, contact Oracle Support Services.

CRS-09523: The Cluster Logger Service was not able to connect to the Grid Infrastructure Management Repository because a Cluster Synchronization Services request failed.

Cause: An attempt to connect to the Grid Infrastructure Management Repository failed due to a Cluster Synchronization Services failure.

Action: If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09524: The System Monitor Service on this host is unable to communicate with the Cluster Logger Service on host *string*, and will log the Cluster Health Analysis data to the local repository.

Cause: Communication was lost with the Cluster Logger Service node.

Action: Verify all network connections between cluster nodes and repair any problematic connections. If network problems are not found, execute the following steps: 1. Run diagcollection.pl. 2. Contact Oracle Support Services.

CRS-09525: The Cluster Health Analysis local repository is disabled on host *string*. Details at *string* in *string*.

Cause: An internal error occurred while writing to the Cluster Health Analysis local repository.

Action: Contact Oracle Support Services.

CRS-09526: The Cluster Logger Service was unable to reset the password for Cluster Health Monitor.

Cause: A password reset failure occurred when the Cluster Logger Service tried to reset the Cluster Health Monitor password after finding that the password had expired.

Action: Run the 'srvctl config mgmtdb' command to verify that Grid Infrastructure Management Repository has been created successfully. If not, run the 'mgmtca setpasswd -user CHM' command to reset the password for Cluster Health Monitor. If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09527: The Cluster Logger Service was unable to reset the password for Cluster Health Analysis.

Cause: A password reset failure occurred when the Cluster Logger Service tried to reset the Cluster Health Analysis password after finding that the password had expired.

Action: Run the 'srvctl config mgmtdb' command to verify that Grid Infrastructure Management Repository has been created successfully. If not, run the 'mgmtca setpasswd -user CHA' command to reset the password for Cluster Health Analysis. If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09528: The Grid Infrastructure Management Repository exceeded the size set for it; disabling logging.

Cause: An internal error caused the size of the Grid Infrastructure Management Repository to be reset to an unexpectedly large value. Logging was disabled to prevent further problems.

Action: Contact Oracle Support Services.

CRS-09600: Failed to initialize *string* daemon

Cause: An error occurred during initialization.

Action: Report this error to Oracle Support Services.

CRS-09603: Failed to read configuration files

Cause: An error encountered while retrieving information from configuration files.

Action: Report this error to Oracle Support Services.

CRS-09607: Cannot spawn thread for *string*

Cause: An error encountered while spawning thread.

Action: Report this error to Oracle Support Services.

CRS-09608: ASM disk method failed

Cause: An error encountered with ASM disks configuration.

Action: Report this error to Oracle Support Services.

CRS-09609: Encountered cssd failure. Reinitializing CSSD layer.

Cause: An error was encountered with CSSD layer while retrieving information.

Action: Report this error to Oracle Support Services.

CRS-09610: Encountered a fatal internal error. Daemon *string* exiting.

Cause: A fatal error occurred with CSSD layer.

Action: Report this error to Oracle Support Services.

CRS-09611: Mark *string* disks encountered errors

Cause: An error occurred while accessing disk.

Action: Report this error to Oracle Support Services.

CRS-09612: Mark *string* disks failed

Cause: A fatal error occurred while accessing disk.

Action: Report this error to Oracle Support Services.

CRS-09615: Disk method Failure : *string*

Cause: Internal error occurred.

Action: Report this error to Oracle Support Services.

CRS-09616: Daemon started : *string*

Cause: A daemon process started successfully.

Action: None

CRS-09617: Invalid message type encountered

Cause: An invalid or corrupted message was received.

Action: Report this error to Oracle Support Services.

CRS-09618: Daemon stopped : *string*

Cause: A daemon process stopped successfully.

Action: None

CRS-10002: failed to allocate memory\n

Cause: Memory allocation failed.

Action: Correct the system memory problem and retry.

CRS-10004: unable to reach *string* address from local node

Cause: An attempt to reach the IP address specified failed.

Action: Make sure that the specified IP address is a valid IP address and is assigned to an interface. Make sure that there are no firewalls between local node and node on which specified IP address is hosted.

CRS-10005: unable to determine local host name

Cause: The host name could not be determined.

Action: Check that the host name for the local machine is valid. Look at the accompanying messages. If the problem persists, contact Oracle Support Services.

CRS-10006: APPVIP type needs a VIP name. Specify a VIP name using -vip commandline option.

Cause: VIP resource name was missing in the command line for APPVIP type.

Action: Specify a VIP name using -vip option.

CRS-10008: unable to generate client ID for VIP type *string*, cluster name *string*, VIP resource name *string*

Cause: An attempt to generate client ID for the specified cluster name, VIP type and resource name failed.

Action: Ensure that the cluster name and VIP resource name do not exceed 252 characters. Make sure that VIP type is a valid VIP type. Refer to 'crsctl get clientid - help' for more information.

CRS-10010: unable to discover DHCP server in the network listening on port *number* for client ID *string*

Cause: An attempt to discover DHCP server listening on port specified failed.

Action: Ensure that the DHCP servers exist on the network and are listening on port specified. If they are listening on a different port then specify that port using the -port option. For more information refer to help for 'crsctl discover dhcp' command.

CRS-10011: unable to request DHCP lease for client ID *string* on port *number*

Cause: An attempt to request DHCP lease for the specified client ID on specified port failed.

Action: Ensure that there are DHCP servers with IP addresses available on the network. If other DHCP servers are available which are listening on a different port specify an alternative port using the -port option. For more information refer to help for 'crsctl request dhcp' command.

CRS-10013: unable to release DHCP lease for client ID *string*, on port *number*

Cause: An attempt to release DHCP lease for the specified client ID on specified port failed.

Action: Ensure that there are DHCP servers listening on port specified. If the DHCP server is listening on a different port specify an alternative port using -port option. For more information refer to help for 'crsctl release dhcp' command.

CRS-10014: HOSTVIP type needs a node name. Specify a node name using -n option.

Cause: Node name was missing in the command line for HOSTVIP type.

Action: For HOSTVIP type node name needs to be specified via -n option.

CRS-10015: VIP type *string* is invalid

Cause: An invalid VIP type was specified for DHCP client ID generation.

Action: Ensure that the VIP type is a valid VIP type. Refer to 'crsctl get clientid -help' for more information.

CRS-10016: error obtaining local host DNS resolver configuration

Cause: An attempt to obtain local host DNS configuration failed.

Action: Make sure that the user executing the command has sufficient permission to read local system configuration.

CRS-10017: the *number* name servers configured on this system exceeds the *number* maximum allowed

Cause: An attempt to obtain local host DNS configuration failed because more name servers were found then allowed on this operating system.

Action: Reduce the number of name servers configured to the maximum allowed.

CRS-10023: Domain name look up for name *string* failed.

Cause: An attempt to query DNS servers for name specified failed.

Action: Look at accompanying messages for more information on the failure.

CRS-10029: could not verify if port *number* at address *string* is in use

Cause: An attempt to verify if port at address specified is in use failed.

Action: Make sure that the user has permission to create socket at port specified. For ports < 1024 user should be root. Also look at the accompanying messages for more information.

CRS-10030: could not verify if port *number* on local node is in use

Cause: An attempt to verify if port specified on local node is in use failed.

Action: Make sure that the user has permission to create socket at port specified. For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10033: could not stop the DNS listening daemon running on port *number* at address *string*

Cause: An attempt to stop the DNS listening daemon running on port and address specified failed.

Action: Make sure that the user has permission to send packets at the port specified. For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10034: could not stop the DNS listening daemon running on port *number* on local node

Cause: An attempt to stop the DNS listening daemon on local node running on port specified failed.

Action: Make sure that the user has permission to send packets at the port specified. For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10035: invalid name server '*string*' specified in command line

Cause: An invalid IPv4 address was specified on the command line for -dnsserver option.

Action: Specify a valid IPv4 address on the command line.

CRS-10036: value for command line parameter '*string*' is not an integer

Cause: An invalid value was specified for the specified command line parameter.

Action: Resubmit the request with an integer value.

CRS-10038: invalid IP address '*string*' specified

Cause: An invalid IPv4 or IPv6 address was supplied on command line.

Action: Supply an IP address that conforms to IETF RFC-791 or IETF RFC-2373.

CRS-10039: invalid subnet '*string*' specified

Cause: An invalid IPv4 or IPv6 subnet was supplied on the command line.

Action: Supply a subnet address that conforms to IETF RFC-950 or IETF RFC-5942.

CRS-10040: unable to get list of network interfaces

Cause: An attempt to retrieve the list of network interfaces failed.

Action: Look at the accompanying messages for more information.

CRS-10041: subnet '*string*' is not configured on the node

Cause: The subnet specified did not match subnet of any network interface on this node.

Action: Specify a subnet that matches at least one network interface's subnet on this node.

CRS-10043: DNS daemon is not listening on port *number* at address *string*

Cause: An attempt to check if the DNS daemon is listening on port and address specified failed.

Action: Make sure that the address specified is reachable. Make sure that there is no firewall between the node on which this command was run and the address specified. Also look at the accompanying messages for more information.

CRS-10044: invalid cluster name '*string*' specified

Cause: An invalid cluster name was supplied to the CRCTL utility.

Action: Specify a cluster name which is at least one character long but no more than 15 characters in length. The cluster name must be alphanumeric, it cannot begin with a numeric character, and it can contain hyphen (-) characters. However, it cannot end with a hyphen (-) character.

CRS-10045: invalid node name '*string*' specified

Cause: An invalid node name was supplied to the CRCTL utility.

Action: Specify a node name which is at least one character but no more than 63 characters in length. The node name must be alphanumeric, it cannot begin with a numeric character, and it may contain hyphen (-) characters. However, it cannot end with a hyphen (-) character.

CRS-10046: invalid client ID '*string*' specified

Cause: An invalid client ID was supplied to the CRSCTL utility.

Action: The client ID can be obtained by running the command 'crsctl get clientid dhcp'.

CRS-10047: invalid query type '*string*' specified

Cause: An invalid DNS query type was supplied to crsctl.

Action: Supply a query type of A for an IPv4 address or AAAA for an IPv6 address.

CRS-10048: Name '*string*' was not resolved to an address of the specified type by name servers '*string*'.

Cause: An attempt to look up an address of a specified type for the indicated name using the name servers shown did not yield any addresses of the requested type.

Action: Retry the request providing a different name or querying for a different IP address type.

CRS-10051: CVU found following errors with Clusterware setup : *string*

Cause: A resource-specific error was detected by the Clusterware Verification Utility (CVU). This message is accompanied by others providing details of the error condition.

Action: Respond based on the accompanying messages.

CRS-10100: Execution of crswrapexece.pl script with arguments '*string*' fails.

Cause: crswrapexece.pl script failed when executed with the specific arguments.

Action: Check system log and crswrapexece.log for more details. Contact Oracle Support Services.

CRS-10101: Internal Error

Cause: Execution of crswrapexece.pl script failed due to missing argument.

Action: Contact Oracle Support Services.

CRS-10102: Failure to open environment file *string*.

Cause: The crswrapexece.pl script failed to open the environment file, which might be caused by hostname change or user edits.

Action: Check for the existence and permission of the environment file.

CRS-10103: Found *string* syntax errors in environment file *string*.

Cause: crswrapexece.pl found syntax errors in the provided environment file.

Action: Check and fix syntax error in the indicated environment file. If the problem persists, contact Oracle Support Services.

CRS-10104: Executable *string* does not reside in *string*.

Cause: The script crswrapexece.pl attempted to invoke the indicated executable, which was not found in the proper directory.

Action: This error is unexpected and should not normally occur. Contact Oracle Support Services.

CRS-10105: Executable *string* is not a file.

Cause: The script crswrapexece.pl attempted to invoke the indicated executable, but the executable is not a file.

Action: This error is unexpected and should not normally occur. Contact Oracle Support Services.

CRS-10106: Executable *string* does not exist.

Cause: The script crswrapexece.pl could not find the specified executable.

Action: This error is unexpected and should not normally occur. Contact Oracle Support Services.

CRS-10131: Failure to create named pipe *string*. Details [*string*].

Cause: The specified named pipe could not be created. Oracle High Availability Service would not be able to restart if crashes.

Action: Check for the existence and permission of the parent directory, where the named pipe was created.

CRS-10132: Oracle High Availability Service was restarted at least *string* times within the last *string* seconds. Stop auto-restarting Oracle High Availability Service.

Cause: Oracle High Availability Service was restarted too rapidly within a short period of time.

Action: Check the Oracle High Availability Service log file to determine the cause. If the problem persists, contact Oracle Support Services.

CRS-10201: Internal error

Cause: An unexpected condition was detected in the cluster event module.

Action: Contact Oracle Support Services.

CRS-10202: Failed to allocate process memory

Cause: Insufficient system memory resources.

Action: Correct the system memory resources problem and retry. If this does not appear to be caused by an operating system issue, contact Oracle Support Services.

CRS-10203: Could not connect to the Event Manager daemon

Cause: Unable to communicate with Event Manager daemon.

Action: Run the 'crsctl check evmd' command to determine whether Event Manager daemon is properly configured and is running.

CRS-10250: Database name is required to access database wallets. Use -name option to supply a database name.

Cause: The option -name was missing on the command line.

Action: For APPQOSDB wallet types -name is a mandatory parameter. Retry the command with -name option.

CRS-10251: User name is required to create OSUSER wallets. Use -user option to supply a username.

Cause: The option -user was missing on the command line.

Action: For OSUSER wallet types -user is a mandatory parameter. Retry the command with -user option.

CRS-10253: Warning: *string* option has been deprecated.

Cause: A deprecated option was specified on the command line.

Action: Check the documentation for the new syntax of the command.

CRS-10301: Unable to contact Oracle high availability service on peer nodes for cluster wide commands. Details at *string* in *string*.

Cause: Multicast Domain Name Server (mDNS) or Grid Plug and Play (GPnP) or both daemons on the local node were not running.

Action: If you are shutting down the Clusterware stack, this is expected. If you had issued a cluster wide command, reissue the command after the stack has been restarted. If you are not shutting down the stack, the missing component(s) may have failed and may restart automatically. Any cluster wide commands can be retried after a few seconds. However, the failure should be investigated and reported to Oracle Support Services.

CRS-10302: Oracle high availability service on peer nodes is reachable. Details at *string* in *string*.

Cause: Oracle high availability service on peer nodes was reachable.

Action: None

CRS-10401: Internal error in credentials processing.

Cause: An unexpected condition was detected in the credentials module.

Action: Contact Oracle Support Services.

CRS-10402: Failed to allocate process memory.

Cause: There were insufficient system memory resources.

Action: Correct the system memory resources problem and retry. If this does not appear to be caused by an operating system issue, contact Oracle Support Services.

CRS-10403: Could not connect to credential storage: *string*.

Cause: An attempt to communicate with Oracle Cluster Registry (OCR) or Oracle Local Registry (OLR) credential storage failed.

Action: Run the 'crsctl check crs' command to determine whether Cluster Ready Services or Oracle High Availability Services are online.

CRS-10405: Credential domain already exists.

Cause: The provided credential domain already existed.

Action: Specify another credential domain path.

CRS-10406: Authorization error.

Cause: The user did not have permissions to view or modify the provided credential information.

Action: Use a different user to view or modify the credential information.

CRS-10407: Credential domain does not exist.

Cause: The provided credential domain did not exist.

Action: Specify another credential domain path or create the credential domain.

CRS-10408: Credential set already exists.

Cause: The provided credential set already existed.

Action: Specify another credential domain path to which the credential set will be added.

CRS-10409: Credential target already exists.

Cause: The provided credential target already existed.

Action: Specify another credential target name, or modify the value of the existing one.

CRS-10410: Credential set member does not exist.

Cause: The provided credential set member did not exist.

Action: Specify another credential set member or create a new member.

CRS-10411: Credential set does not exist.

Cause: The provided credential set did not exist.

Action: Specify another credential set or create a new member.

CRS-10412: Security layer returned failure: *string*.

Cause: Credential operation failed due to error from security layer.

Action: Depending on the reason, this operation may be retried after correcting the situation.

CRS-10413: Invalid argument specified for attribute.

Cause: An invalid argument was found for a given attribute.

Action: Rerun the command using correct value.

CRS-10414: User name or group name does not match the owner or group of the credential object.

Cause: Credential permissions for the owner could not be modified because the user name did not match the owner of the credential.

Action: Specify the owner's user ID in the argument to change owner's permission.

CRS-10415: ACL string is missing the user or group modifier.

Cause: The access control list (ACL) string did not specify whether user's or group's permission needs to be changed.

Action: Specify the correct format in the argument and rerun the command.

CRS-10416: Credentials target does not exist.

Cause: The provided credentials target did not exist.

Action: Specify another credentials target.

CRS-10417: The directory '*string*' does not exist.

Cause: The specified directory did not exist.

Action: Provide a directory for which the user has read and write permissions.

CRS-10418: The directory '*string*' is not accessible.

Cause: An attempt to access the specified directory failed.

Action: Ensure that the user has read and write permissions on the directory.

CRS-10419: Unable to open file '*string*' for read access.

Cause: An attempt to open the specified file for read access failed.

Action: Ensure that the user has read access permission on the file.

CRS-10420: Unable to open file '*string*' for write access.

Cause: An attempt to open the specified file for write access failed.

Action: Ensure that the user has write access permission on the file.

CRS-10421: Section name does not exist.

Cause: The credentials could not be imported because the provided section name did not exist in the XML file.

Action: Verify the sections included in the credentials file and retry the import supplying the correct section name.

CRS-10422: Credential set of type '*string*' does not support the specified attribute '*string*'.

Cause: An attempted operation on a credential set of the indicated type was rejected because it specified an attribute that was not valid for credential sets of that type.

Action: Retry the operation specifying an attribute supported for the set.

CRS-10423: Credential file specified is either empty or corrupt.

Cause: Credential import failed because the import file was empty or corrupt.

Action: Specify a valid credential file and try again.

CRS-10502: failed to delete site '*string*' because it was the last remaining site

Cause: An attempt to delete the indicated site was rejected because it was the last remaining site.

Action: Execute the command 'crsctl query cluster site -all' to list the the existing sites. Refer to the command inline help or product documentation for more information.

CRS-10503: invalid site name '*string*' specified

Cause: The indicated string was provided where a site name was required, but it was not a valid site name.

Action: Specify a site name which is at least one character but no more than 15 characters in length. A site name consists of alphanumeric characters plus the hyphen character (a..z,A..Z,0..9,-). It cannot begin with a numeric character. It cannot begin or end with the hyphen (-) character.

CRS-10504: The configured site name '*string*' is invalid.

Cause: A failure occurred while retrieving site information. The configured site name was invalid.

Action: Contact Oracle Support Services.

CRS-10505: The number of sites defined is more than the maximum.

Cause: A failure occurred while retrieving site information. There were more sites defined than the maximum allowed.

Action: Contact Oracle Support Services.

CRS-10506: The site GUID '*string*' configured for site '*string*' is invalid.

Cause: A failure occurred while retrieving site information. The configured site Globally Unique Identifier (GUID) was syntactically invalid.

Action: Contact Oracle Support Services.

CRS-10507: Host '*string*' not assigned to a site.

Cause: A failure occurred while retrieving the site assignment for the indicated host. The host has not been assigned to any site.

Action: Contact Oracle Support Services.

CRS-10508: The site '*string*' does not exist.

Cause: An attempt to query or delete a site failed because the indicated name had not been defined as a site name.

Action: Execute the command 'crsctl query cluster site -all' to list the the existing sites. Retry the original command with a site name that has been defined.

CRS-10509: The site '*string*' already exists.

Cause: An attempt to define an additional site failed because the indicated name had already been defined as a site name.

Action: To define an additional site, execute the command 'crsctl query cluster site -all' to list the the existing sites. Retry the original command with a site name that has not already been defined.

CRS-10510: The site GUID '*string*' configured for host '*string*' is invalid.

Cause: A failure occurred while retrieving the site information for the indicated host. The site GUID configured for the indicated host was invalid.

Action: Contact Oracle Support Services.

CRS-10511: failed to add site '*string*' because the number of sites cannot exceed *number*

Cause: The maximum number of sites were already defined.

Action: To add the indicated site name, execute the command 'crsctl query cluster site -all' to list the existing sites, delete an existing site using the command 'crsctl delete cluster site', and retry the original command. Refer to the command inline help or product documentation for more information.

CRS-10512: invalid site GUID '*string*' specified

Cause: An attempt to add a site required for an Exadata Cell was rejected because the supplied Globally Unique Identifier (GUID) was syntactically invalid.

Action: Retry the command specifying the Globally Unique Identifier (GUID) as a text string of 16 hexadecimal digits (0-f) without a hyphen (-) character or the hexadecimal literal prefix (0x). Refer to the command inline help or product documentation for more information.

CRS-10513: failed to add site '*string*' because specified GUID '*string*' is already configured

Cause: An attempt to add the indicated site with the indicated Globally Unique Identifier (GUID) was rejected because a site with that GUID had already been defined.

Action: Execute the command 'crsctl query cluster site -all' to list the existing sites. Retry the original command with a site GUID that has not already been configured.

CRS-10701: Internal error in cluster management module.

Cause: An unexpected condition was detected in the cluster management module.

Action: Contact Oracle Support Services.

CRS-10702: could not find cluster property '*string*'

Cause: The specified cluster property was not found.

Action: Contact Oracle Support Services.

CRS-10703: invalid cluster class '*string*' retrieved

Cause: An invalid cluster class was retrieved from the configuration.

Action: Contact Oracle Support Services.

CRS-29000: Oracle VM Manager job failed with the following error:\n*string*

Cause: The Oracle Virtual Machine (Oracle VM) Manager was unable to complete the action due to the indicated error.

Action: Consult Oracle Virtual Machine (Oracle VM) documentation if the problem persists.

CRS-29001: could not find Grid Infrastructure virtual machine '*string*'

Cause: The name specified for the Grid Infrastructure virtual machine was not found.

Action: Specify a known virtual machine, or create a new virtual machine with the specified name and add it to the Oracle Clusterware cluster.

CRS-29002: could not find a virtual machine with the ID '*string*'

Cause: The ID specified for the virtual machine was not found.

Action: Specify a known virtual machine, or create a new virtual machine with the specified ID.

CRS-29003: could not find a virtual machine with the name or ID '*string*'

Cause: Either the name or the ID provided for the virtual machine was not found.

Action: Specify a known virtual machine, or create a new virtual machine with the specified name or ID.

CRS-29004: not authorized to perform the Oracle VM Manager operation

Cause: The Oracle Virtual Machine (Oracle VM) user name and password combination did not work, or the user did not have permission to perform the action requested.

Action: Update the user's password using the 'srvctl modify ovmm' command, or specify a different user who has the correct permissions.

CRS-29005: could not connect to the Oracle VM Manager on host *string* at port *string*

Cause: A connection to the Oracle Virtual Machine (Oracle VM) Manager could not be established or timed out.

Action: Start the Oracle VM Manager on the appropriate host and port, or specify a different host or port using the 'srvctl modify ovmm' command.

CRS-29006: could not find Oracle VM Manager credentials

Cause: Authentication credentials were not found for the Oracle Virtual Machine (Oracle VM) Manager.

Action: Create or modify the credentials by using the 'srvctl {add | modify} ovmm' command.

CRS-33210: could not find resource group '*string*'

Cause: An attempt was made to operate on a resource group that is not registered.

Action: Ensure that the resource group name is specified correctly using the command 'crsctl status resourcegroup'.

CRS-33500: cannot stop resource group '*string*' because it is not running

Cause: A request to stop a resource group that is not running was received.

Action: Check the current state of the resource group; it should no longer be running.

CRS-33501: Resource group '*string*' is disabled.

Cause: The resource group is currently disabled and so may not be operated on.

Action: Enable the resource group and re-submit your request.

CRS-33503: Resource group '*string*' is in UNKNOWN state and must be stopped first.

Cause: An attempt to start a resource group failed because the group state was UNKNOWN.

Action: Stop the resource group manually, make sure it is OFFLINE, and then re-submit the request.

CRS-33504: cannot start resource group '*string*' because no online server satisfies its placement policy

Cause: An attempt to start the indicated resource group failed because no online server satisfies the constraints imposed by its placement policy.

Action: Reissue the command after modifying the placement policy for the resource group or adding appropriate servers to the cluster.

CRS-33509: Resource group type '*string*' used in dependency '*string*' does not exist or is not registered.

Cause: An attempt to configure the dependencies of a resource group was rejected because the indicated resource group type does not exist.

Action: Reissue the command specifying a valid resource group type.

CRS-33510: Resource group '*string*' used in dependency '*string*' does not exist or is not registered.

Cause: An attempt to configure the dependencies of a resource group was rejected because the indicated resource group does not exist.

Action: Reissue the command specifying a valid resource group.

CRS-33514: Dependency attribute specification '*string*' is invalid in resource group '*string*'.

Cause: An attempt to configure the dependencies of a resource group failed because of errors in the dependency specification.

Action: Check the accompanying error messages and reissue the command after correcting the dependency specification.

CRS-33515: Circular dependency found for resource group '*string*'.

Cause: An attempt to configure the dependencies of a resource group resulted in a circular dependency and was rejected.

Action: Reissue the command after correcting the cause of the circular dependency.

CRS-33516: Server pool is not specified for resource group '*string*'.

Cause: The resource group profile does not have a server pool specified.

Action: Specify an existing server pool in the profile and re-submit the request.

CRS-33517: Required attribute '*string*' is not specified for resource group '*string*'.

Cause: A required attribute is missing from the resource group profile.

Action: Add the attribute to the profile and resubmit the request.

CRS-33525: All instances of the resource group '*string*' are already running; relocate is not allowed because the -force option was not specified.

Cause: All instances of the resource group are running and the start request did not have the -force option specified.

Action: Either specify the -force option or re-evaluate the need for the request.

CRS-33526: There are no available instances of resource group '*string*' to start on node '*string*'

Cause: All instances of the resource group were already running or otherwise unavailable to be started on the specified server.

Action: Create more instances or re-evaluate the need for the request.

CRS-33527: unable to start resource group '*string*' because it has a '*string*' dependency on resource group '*string*'

Cause: Start or relocate of the resource group is impossible because it has a dependency on another entity which prevents it from being able to start.

Action: This message will usually be coupled with another one that details the nature of the problem with the other resource group. Follow up on the action recommended for that message.

CRS-33528: unable to start an instance of resource group '*string*' because instances are already running on all possible servers.

Cause: An attempt to start an instance of the indicated resource group failed because instances of that resource group were already running on all servers available for that resource.

Action: Reissue the command after adding more servers or modifying the resource group's placement policy to select more servers.

CRS-33529: unable to act on resource group '*string*' on server '*string*' because that would require stopping or relocating resource group '*string*' but the -force option was not specified

Cause: The attempted operation on the indicated resource group and server was rejected because it would have required stopping or relocating the additional resource group as shown. The -force option would have been required to allow the additional effects.

Action: Reevaluate the request and, if appropriate, specify the -force option and resubmit.

CRS-33534: Resource group type '*string*' is not registered.

Cause: The specified resource group type is not registered.

Action: Re-evaluate the request or specify a registered type.

CRS-33539: A resource group with the name '*string*' is already registered.

Cause: A resource group with specified name was already registered.

Action: Use a unique name for the new resource group.

CRS-33547: illegal attempt to update internal or read-only attribute '*string*' for resource group '*string*'

Cause: An internal or read-only attribute of the resource group was specified in the update resource group request.

Action: Exclude internal and read-only attributes from your request.

CRS-33555: cannot relocate local resource group '*string*'

Cause: An attempt to relocate the indicated resource group failed because resource groups of type local cannot relocate to another server.

Action: Reissue the command specifying only relocatable resource groups.

CRS-33556: Resource group '*string*' cannot be restored to its original state after a failed relocate attempt.

Cause: After an unsuccessful attempt to relocate a resource group, CRSD was unable to restore the resource group.

Action: Manual intervention may be required. Re-try starting the resource group.

CRS-33558: Resource group type '*string*' cannot be unregistered because there are types that are based on it.

Cause: An attempt was made to unregister a resource group type that has other types inherited from it.

Action: Remove inherited types first, then remove this one.

CRS-33559: Resource group type '*string*' cannot be unregistered because it has the following resource groups: *string*

Cause: An attempt was made to unregister a resource group type when resource groups based on that type exist.

Action: Remove the specified resource groups first, then remove the type.

CRS-33560: Resource group type '*string*' does not exist.

Cause: An attempt was made to unregister a resource group type that does not exist.

Action: Specify a registered resource group type.

CRS-33561: Resource group type '*string*' cannot be unregistered because it is referenced by resource group '*string*'.

Cause: An attempt was made to unregister a resource group type when other resource groups are dependent on the type.

Action: Make sure there are no existing resource groups that reference this type in their dependencies.

CRS-33562: Resource group '*string*' cannot be relocated because it is not running.

Cause: An attempt to relocate the resource group failed because it was not running.

Action: Ensure that the resource group is running before issuing the request.

CRS-33564: Failed to relocate resource group '*string*'. Will attempt to restore it on '*string*' now.

Cause: Relocate of a resource group failed on all possible servers and is now being restarted on original server.

Action: None, this is an informational message.

CRS-33565: Attempt to relocate resource group '*string*' to '*string*' has failed. Will retry on '*string*' now.

Cause: Relocate of a resource group has failed for the server; a retry is in progress.

Action: None, this is an informational message.

CRS-33568: Base resource group type '*string*' does not exist.

Cause: An attempt was made to register a resource group type with an unknown base type.

Action: Use an existing type as a base. Run '`crsctl status resourcegrouptype`' to list registered resource group types.

CRS-33571: Dependency type '*string*' is specified more than once for resource group '*string*'.

Cause: An attempt to configure the dependencies of a resource group was rejected because a dependency type was used more than once in the profile of the resource group.

Action: Reissue the command after combining multiple specifications of the same dependency type into a single clause.

CRS-33585: cannot unregister built-in resource group type

Cause: An attempt was made to delete a built-in resource group type.

Action: Specify a resource group type that is not built-in.

CRS-33607: cannot specify attribute '*string*' on a per-server basis

Cause: An attempt was made to register or update a resource group with an invalid per-server attribute.

Action: Check the permitted per-server attributes for the resource group, fix and resubmit. Run '`crsctl status resourcegroup`' to check the attributes of the resource group.

CRS-33613: could not find resource group '*string*'

Cause: An attempt was made to operate on a resource group that is not registered.

Action: Check if the resource group is registered. Run '`crsctl status resourcegroup`' to list all registered resource groups.

CRS-33625: The owner of resource group '*string*' does not have execute permission on pool '*string*'.

Cause: An attempt to start a resource group referenced a server pool on which the owner of the resource group lacks execute permission.

Action: Either have the pool's permission changed appropriately or use a different pool.

CRS-33632: There are no more servers to attempt to place resource group '*string*' that would satisfy its placement policy.

Cause: An operation to start, relocate or failover the indicated resource group failed after attempts were made on all available servers.

Action: Reissue the command after rectifying the failure condition.

CRS-33640: Required resource group '*string*' is missing.

Cause: A resource group that's configured as required is not registered.

Action: Register the missing resource group or update the dependency specification so as to the missing resource group is not required for start.

CRS-33643: The server pools where resource group '*string*' could run have no servers.

Cause: An attempt to start a resource group failed because all the configured server pools have no servers assigned.

Action: Either make sure there are active servers in the pools or use different pools for the resource group.

CRS-33644: No hosting members of resource group '*string*' are online or are allowed to be used by the resource group.

Cause: An attempt to start a resource group failed because no server specified as hosting member is online or, if it is, may be used by the resource group.

Action: Either add more servers to the cluster or request permission to pools to which currently available servers are assigned.

CRS-33645: cannot create resource groups of abstract type '*string*'

Cause: An attempt to create a resource group specified an abstract resource group type.

Action: Specify a concrete resource group type for the resource group.

CRS-33667: Resource Group '*string*' with *string=string* may only run on servers assigned to pools *string* and *string*, both of which are empty.

Cause: An attempt to start a resource group failed because it's placement policy only allows it to run on servers assigned to the specified pools, and they are all empty.

Action: Either change the placement policy of the resource group, or change the cluster configuration so that there are servers in those pools.

CRS-33672: Attempting to start resource group '*string*' on server '*string*'

Cause: This is a status message.

Action: None

CRS-33673: Attempting to stop resource group '*string*' on server '*string*'

Cause: This is a status message.

Action: None

CRS-33674: Start of resource group '*string*' on server '*string*' failed.

Cause: This is a status message.

Action: None

CRS-33675: Stop of resource group '*string*' on server '*string*' failed.

Cause: This is a status message.

Action: None

CRS-33676: Start of resource group '*string*' on server '*string*' succeeded.

Cause: This is a status message.

Action: None

CRS-33677: Stop of resource group '*string*' on server '*string*' succeeded.

Cause: This is a status message.

Action: None

CRS-33717: Server '*string*' is not in any of the server pools hosting resource group '*string*'.

Cause: An attempt was made to start a resource group on a server that is not currently an active server in any of the resource group's server pools.

Action: Use a server name that is currently an active server of the resource group's server pools.

CRS-33718: Server '*string*' is not a hosting member of resource group '*string*'.

Cause: An attempt was made to start the resource group on a server not listed as a hosting member of the resource group.

Action: Use a server name that is listed as a hosting member.

CRS-33719: Resource group '*string*' cannot be started on server '*string*' because the server is not in either '*string*' or '*string*' server pools.

Cause: The resource group's placement policy only allows it to run in the specified server pools. An attempt was made to start it on a server assigned to a different pool.

Action: Either use a different server or set the value of SERVER_POOLS to *, which will allow the resource to run on any server.

CRS-33722: The instance of resource group '*string*' can only run on server '*string*'; check on server '*string*' is unnecessary.

Cause: A check was issued on a server for a resource group instance that can only run on a particular server.

Action: Issue a check on the server where the resource group instance is supposed to be run.

CRS-33723: No instance of resource group '*string*' found on server '*string*'.

Cause: A check command failed because the resource group was not running on the specified server and no offline instances were available for the resource group.

Action: Reissue the command, specifying a server where a resource group instance might be running.

CRS-33728: A resource group type with the name '*string*' is already registered.

Cause: An attempt to register a resource group type specified a name that is already registered.

Action: Use a unique name for the new resource group type.

CRS-33729: Attribute '*string*' cannot be overridden for a resource group type.

Cause: An attribute was specified that is not allowed in a resource group type.

Action: Do not specify the indicated attribute for a resource group type.

CRS-33730: Resource group '*string*' depends on resource group '*string*'.

Cause: An attempt to unregister a resource group failed because another resource group is dependent on it.

Action: Reissue the command after removing all dependencies on the resource group to be unregistered.

CRS-33731: The resource group '*string*' is already running on target server '*string*'.

Cause: An attempt to relocate the indicated resource group failed because the resource group was already running on the indicated server.

Action: No action is required.

CRS-33736: cannot proceed with command because it requires stopping resource group '*string*' on server '*string*'

Cause: The command failed because the force option was not specified to stop the indicated resource groups.

Action: Reissue the command after adding more servers to the cluster or specify the force option.

CRS-33779: Failed to delete resource group type '*string*' from repository. Details at *string* in *string*.

Cause: An attempt to delete a resource group type encountered an internal error while updating the repository.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-33789: cannot stop resource group '*string*' because it is not running on server '*string*'

Cause: A request to stop a resource group on a server where it is not running was received.

Action: Check the current state of the resource group; it should no longer be running on that server.

CRS-33801: No instance of resource group '*string*' should be running.

Cause: An attempt to relocate a resource group was rejected because the TARGET attributes of the instances of the resource group were set to OFFLINE.

Action: Restart the resource group to change the value of the TARGET attribute to ONLINE.

CRS-33805: cannot start resource group '*string*' because it has a '*string*' dependency on resource group type '*string*' and no resource group of that type can satisfy the dependency

Cause: An attempt to start the indicated resource group failed because a resource group of the indicated type did not exist to satisfy the dependency.

Action: Reissue the command after registering a resource group of the indicated type.

CRS-33828: failed to stop resource group while attempting CARDINALITY modification

Cause: An attempt to stop a resource group during CARDINALITY modification failed.

Action: Use 'crsctl stop resourcegroup' to stop the resource group manually and then retry the update operation.

CRS-33835: Resource group '*string*' cannot start on server '*string*' because the server does not belong to the resource group's server category.

Cause: An attempt to start the resource group failed because the server specified does not belong to the server category of the resource group.

Action: Specify a server that belongs to the category.

CRS-33837: There are no servers that belong to the server category '*string*' of resource group '*string*'.

Cause: The resource group cannot be started as there are no available servers that belong to its category.

Action: Add servers to the cluster or change the category to be more inclusive.

CRS-33855: Resource group '*string*' is not configured to run in server pool '*string*'.

Cause: An attempt was made to start or stop the resource group in a server pool where the resource group was not configured to run.

Action: Modify resource group's attribute to have this server pool or specify a different resource group.

CRS-33857: cannot stop resource group '*string*' because it is not running in server pool '*string*'

Cause: A resource group stop request specified a server pool on which the resource group is not running.

Action: Check the current state of the resource group; it should no longer be running in that server pool.

CRS-33904: cannot relocate resource group '*string*' because it is not a singleton resource group

Cause: A relocate resource group request specified a resource group that has multiple instances.

Action: Reissue the request specifying a singleton resource group or use a filter that resolves to an instance of the group.

CRS-33919: Resource group '*string*' has no instances to act upon.

Cause: An attempt was made to act on a resource group that has no instances because it is configured to run on servers that have never existed in the cluster.

Action: Retry the command when the resource group has instances.

CRS-33969: cannot add resource group '*string*' because a resource exists with the same name

Cause: An attempt to add a resource group failed because a resource with the same name was already registered.

Action: Reissue the command specifying a different name for the new resource group.

CRS-34911: cannot delete the resource group because it does not exist

Cause: An attempt to delete a resource group failed because the resource group specification did not identify an existing resource group. Either there was no resource group with the specified name, or no resource group satisfied the specified filter.

Action: Reissue the command specifying the name of an existing resource group or a filter that will select an existing resource group.

CRS-34912: cannot delete the resource group type because it does not exist

Cause: An attempt to delete a resource group type failed because the resource group type specification did not identify an existing resource group type. Either there was no resource group type with the specified name, or no resource group type satisfied the specified filter.

Action: Reissue the command specifying the name of an existing resource group type or a filter that will select an existing resource group type.

CRS-34913: Restored the state of resource group '*string*' on server '*string*'

Cause: This is a status message.

Action: None

CRS-34914: Resource '*string*' is already a member of resource group '*string*'.

Cause: An attempt was made to add a resource to a group while the resource was already a member of another group.

Action: Reissue the command after removing the resource from its current group.

CRS-34915: cannot add local resource '*string*' to cluster resource group '*string*'

Cause: An attempt was made to add a local resource to a cluster resource group. Only cluster resources can be added to a cluster resource group.

Action: Reissue the command by specifying only cluster resources.

CRS-34916: cannot add cluster resource '*string*' to local resource group '*string*'

Cause: An attempt was made to add a cluster resource to a local resource group. Only local resources can be added to a local resource group.

Action: Reissue the command by specifying only local resources.

CRS-34917: Resource '*string*' cannot be added to resource group '*string*' because their '*string*' attribute values are not identical.

Cause: An attempt was made to add a resource to a resource group when the resource's profile is not compatible with the group.

Action: Reissue the command after updating the resource's profile to match the resource group's profile or specify a compatible resource group.

CRS-34918: cannot register resource group '*string*' because CRITICAL_RESOURCES attribute is not specified

Cause: An attempt was made to add a resource group without specifying the critical resources of the group.

Action: Reissue the command after designating some resource(s) as critical for the group.

CRS-34919: cannot register resource group '*string*' because critical resource '*string*' is not a member of the group

Cause: An attempt was made to add or update a resource group and an invalid resource was specified as critical.

Action: Reissue the command after correcting the CRITICAL_RESOURCES attribute of the group or specify the -force option.

CRS-34920: Dependency type '*string*' not supported for resource '*string*' because it is a member of resource group '*string*'

Cause: A dependency type was specified for a resource that is not supported when a resource is a member of a group.

Action: Reissue the command, specifying a supported dependency type.

CRS-34921: Resource '*string*' cannot have a dependency on resource '*string*' because they are not members of the same resource group.

Cause: An attempt was made to define a dependency between resources who are not members of the same resource group.

Action: Reissue the command, specifying a target resource that is member of the group.

CRS-34922: cannot modify internal resource group '*string*'

Cause: An attempt was made to modify an internal resource group created by Oracle Clusterware.

Action: Reissue the command by specifying an appropriate resource group.

CRS-34923: cannot delete internal resource group '*string*'

Cause: An attempt was made to delete an internal resource group created by Oracle Clusterware.

Action: Reissue the command by specifying an appropriate resource group.

CRS-34924: cannot start resource group '*string*' because it is incomplete

Cause: An attempt to start a resource group failed because it had not been completely populated.

Action: Check the RESOURCE_LIST and CRITICAL_RESOURCES attributes of the resource group, ensure they are not blank and retry.

CRS-34925: cannot start resource '*string*' outside of its resource group '*string*'

Cause: An attempt to start the indicated critical resource of the indicated resource group failed because critical resources cannot be started independently of the group.

Action: Start the resource group and that will start the critical resources of the group.

CRS-34926: cannot start resource '*string*' because its resource group '*string*' is not running

Cause: An attempt to start the indicated resource of the indicated resource group failed because the resource group was not online.

Action: Start the resource group before attempting to start the resources of the group.

CRS-34927: cannot stop resource '*string*' outside of its resource group '*string*'

Cause: An attempt to stop the indicated resource of the indicated resource group failed because it was a critical resource necessary for continuing group operation.

Action: To stop the indicated resource, stop the entire resource group.

CRS-34928: cannot modify critical resources of a resource group when it is running

Cause: An attempt was made to modify the CRITICAL_RESOURCES attribute of a resource group when it was running.

Action: Reissue the command after stopping the resource group on all servers.

CRS-34929: cannot remove critical resource '*string*' from resource group '*string*'

Cause: An attempt was made to remove a critical member resource of a resource group.

Action: Reconsider the removal. If it is necessary, update the CRITICAL_RESOURCES attribute of the group to categorize the resource as not critical, then reissue this command.

CRS-34930: cannot remove resource '*string*' from resource group '*string*' because another resource in the group '*string*' is dependent on it

Cause: An attempt was made to remove a member resource of a group when other group members were dependent on it.

Action: Reconsider the removal. If it is necessary, update other resources in the group to remove dependencies on the indicated resource, then reissue the command.

CRS-34931: cannot remove resource '*string*' from resource group '*string*' because it is dependent on other resources in the group

Cause: An attempt was made to remove a member resource of a group when it was dependent on other resources in the group.

Action: Reconsider the removal. If it is necessary, update the indicated resource to remove all dependencies, then reissue the command.

CRS-34932: cannot delete resource '*string*' because it is a member of resource group '*string*'

Cause: An attempt was made to delete a resource that was a member of a resource group.

Action: Reissue the command after removing the resource from the resource group.

CRS-34933: cannot start resource group '*string*' because it is in debug mode

Cause: An attempt to start the resource group failed because the DEBUG attribute was set to 1.

Action: Reissue the command after setting the DEBUG attribute of the resource group to 0.

CRS-34934: cannot set resource group '*string*' to debug mode because it is ONLINE

Cause: An attempt to update the DEBUG attribute of the resource group failed because it was running.

Action: Reissue the command after stopping the resource group on all servers.

CRS-34935: cannot clear debug mode of resource group '*string*' because some members are ONLINE

Cause: An attempt to update the DEBUG attribute of the resource group failed because some member resources were running.

Action: Reissue the command after stopping all member resources of the indicated group.

CRS-34939: Resource group '*string*' is not running on server '*string*'.

Cause: An attempt to relocate the resource group failed because it was not running on the specified server.

Action: Ensure that the correct server is specified and reissue the command.

CRS-34940: cannot add resource '*string*' to resource group '*string*' because the resource is online

Cause: An attempt to add a resource to a resource group was rejected because the resource was online.

Action: Reissue the command after stopping the resource on all servers.

CRS-34941: cannot delete resource group '*string*' because it has member resources

Cause: An attempt to delete a resource group failed because it had member resources.

Action: Reissue the command after removing all resources from the group.

CRS-34942: User '*string*' does not have sufficient permissions to update the resource group '*string*'.

Cause: An attempt to update the resource group of a resource was rejected because the user did not have update privileges on the resource group.

Action: Reissue the command after update privileges have been granted on the resource group.

CRS-34943: cannot add resource '*string*' to resource group '*string*' because the resource group owner '*string*' cannot operate on the resource

Cause: An attempt to add a resource to a resource group was rejected because the resource group owner did not have execute privileges on the resource.

Action: Reissue the command after granting execute privileges on the resource to the resource group owner.

CRS-34944: Resource group '*string*' cannot be started because the critical resource '*string*' is disabled.

Cause: An attempt to start the indicated resource group failed because a critical resource was disabled.

Action: Reissue the command after enabling the indicated critical resource.

CRS-34945: cannot configure attribute '*string*' because the resource is a member of a resource group

Cause: An attempt to update an attribute of a member resource was rejected because that attribute cannot be configured at an individual resource level.

Action: Reissue the command after removing the indicated attribute.

CRS-34946: Invalid dependency modifier '*string*' specified for a group member resource.

Cause: An attempt to configure the dependencies of a resource was rejected because the indicated modifier was invalid for resources belonging to a group.

Action: Reissue the command without the indicated modifier in the dependency specification of the resource.

CRS-34947: Resource group '*string*' is already running on '*string*'.

Cause: This is a status message.

Action: None

CRS-34948: cannot start resource group '*string*' because critical resource '*string*' is not a member of the group

Cause: An attempt was made to start a resource group and an invalid resource was specified as critical.

Action: Reissue the command after correcting the CRITICAL_RESOURCES attribute of the group.

CRS-40002: No activities match the query.

Cause: There were no activities found in the cluster activity log that matched the query provided.

Action: Verify the query parameters and retry.

CRS-40003: Cluster Synchronization Services is unavailable.

Cause: The requested operation failed because of a failure to communicate with the Cluster Synchronization Services daemon.

Action: Run the command 'crsctl check css' to determine whether the Cluster Synchronization Services daemon is properly configured and is running.

CRS-40004: authorization wallet not found

Cause: An attempt to access the cluster activity log failed because the authorization wallet could not be found.

Action: Contact Oracle Support Services.

CRS-40005: internal error

Cause: An unexpected condition was detected in the cluster activity log module.

Action: Contact Oracle Support Services.

CRS-40006: unable to allocate process memory

Cause: The requested operation failed because of a failure to allocate process memory. This was probably due to a lack of system resources.

Action: Correct the system memory resources problem and retry. If this does not appear to be caused by an operating system issue, contact Oracle Support Services.

CRS-40007: unable to connect to the Event Manager daemon

Cause: The requested operation failed because of a failure to communicate with the Event Manager daemon.

Action: Run the command 'crsctl check evmd' to determine whether the Event Manager daemon is properly configured and is running.

CRS-40008: insufficient permission for accessing the cluster activity log

Cause: A non-privileged user attempted to view or modify the cluster activity log.

Action: Issue the command again as a privileged user.

CRS-40009: invalid filter expression '*string*'

Cause: An attempt to access the cluster activity log failed because the specified filter was invalid.

Action: Correct the syntax of the filter being provided and try again.

CRS-40010: invalid regular expression '*string*'

Cause: An attempt to access the cluster activity log failed because the specified regular expression was invalid.

Action: Correct the syntax of the regular expression being provided and try again.

CRS-40011: unable to connect to the Oracle Cluster Registry: *string*

Cause: An attempt to communicate with the Oracle Cluster Registry (OCR) or the Oracle Local Registry (OLR) failed.

Action: Run the command 'crsctl check crs' to determine whether Cluster Ready Services or Oracle High Availability Services are online.

CRS-40012: Cluster activity log is not supported in this configuration.

Cause: The Grid Infrastructure Management Repository was not configured.

Action: Re-Install Grid Infrastructure and ensure that the Grid Infrastructure Management Repository is configured.

CRS-40013: cluster activity log maximum size below minimum of 100 MB

Cause: An attempt to set the maximum size of the cluster activity log specified a value less than the minimum of 100 MB.

Action: Specify a maximum size of 100 MB or more.

CRS-40014: invalid timestamp '*string*'

Cause: An attempt to access the cluster activity log failed because the specified timestamp was invalid.

Action: Reissue the command with a valid timestamp. Refer to the command line help for more information.

CRS-40015: invalid duration '*string*'

Cause: An attempt to access the cluster activity log failed because the specified duration was invalid.

Action: Reissue the command with a valid duration. Refer to the command line help for more information.

CRS-40016: Setting the maximum size for cluster activity log failed.

Cause: The cluster activity log maximum size could not be modified.

Action: See the accompanying error message and respond accordingly.

CRS-40017: Setting the retention time for cluster activity log failed.

Cause: The cluster activity log retention time could not be modified.

Action: Examine the accompanying error messages and respond accordingly.

CRS-40018: invalid combination of parameters '*timestamp_before*', '*timestamp_after*' and '*timestamp_duration*'

Cause: The parameters '*timestamp_before*', '*timestamp_after*' and '*timestamp_duration*' were all specified as part of the cluster activity log query.

Action: Retry the cluster activity log query with a valid parameter combination.

CRS-40019: Resize operation for cluster activity log failed because the maximum size or retention time specified was too large. Detailed error: '*string*'

Cause: The value specified for the maximum size or retention time of the cluster activity log was too large and could not be accommodated.

Action: Specify a lower value for maximum size or retention time.

CRS-40020: The operation will delete all entries in cluster activity log. Rerun with '*-f*' option.

Cause: The operation to shrink the cluster activity log was issued without the '*-f*' option.

Action: If appropriate, reissue the command with the '*-f*' option.

CRS-41003: unable to get the last active timestamp

Cause: The crsctl query failed because the last active timestamp could not be retrieved. Either the clusterware stack was down, or the requesting user was not root (UNIX) or Administrator (WINDOWS).

Action: Bring up the clusterware stack using the command 'crsctl start crs' and retry the query or retry the query as a privileged user.

CRS-41004: Last active timestamp query failed for node *string*.

Cause: The crsctl query failed to retrieve the last active timestamp for the indicated node.

Action: Examine the accompanying error message, address issues reported and retry the query.

CRS-41006: Node *string* is not a leaf node.

Cause: An attempt to list the last active timestamp for the indicated node was rejected because that node was not a leaf node.

Action: Rerun the command from a leaf node or specifying a leaf node that is a cluster member or was a cluster member.

CRS-41012: insufficient permission to create or delete a member cluster configuration

Cause: An attempt was made to create or delete a member cluster configuration by a user who was not an Oracle Grid Infrastructure user.

Action: Rerun the command as an Oracle Grid Infrastructure user.

CRS-41013: The member cluster configuration must be run on a "Domain Services Cluster" only.

Cause: An attempt was made to create a member cluster configuration on a cluster which is not a "Domain Services Cluster".

Action: Rerun the command on a "Domain Services Cluster".

CRS-41016: failure getting the cluster configuration

Cause: An attempt to get additional configuration information from the Grid Infrastructure Management Respository (GIMR) failed. This is an internal error.

Action: Contact Oracle Support Services.

CRS-41017: permission to retrieve the cluster configuration denied

Cause: An attempt to retrieve the configuration failed because the stack was down and permission to retrieve the cluster configuration with the stack down was denied.

Action: Run the query when the Oracle Clusterware stack is up or as a privileged user such as root (on UNIX) or administrator (on Windows).

CRS-41018: failure getting the local node number from Cluster Synchronization Services (return code *number*)

Cause: An attempt to execute the command 'crsctl get node role status' failed because Cluster Synchronization Services (CSS) was not running.

Action: Ensure that the CSS daemon is running on this node, and then retry the operation.

CRS-41019: the active status role of node '*string*' is unknown

Cause: An attempt to execute the command 'crsctl get node role status' failed for the indicated node because Cluster Synchronization Services (CSS) was not running.

Action: Ensure that CSS daemon is running on the indicated node, and then retry the operation.

CRS-42002: operation not supported for single-instance high availability configurations

Cause: An attempt was made to execute a command to rename a cluster, which was not supported in the current single-instance high availability configuration.

Action: None

CRS-42003: operation only supported for standalone cluster

Cause: An attempt to rename a cluster was rejected because that operation was only supported for standalone cluster configurations.

Action: None

CRS-42005: failed to set the cluster name

Cause: There was an internal error while setting the cluster name.

Action: Contact Oracle Support Services.

CRS-42006: cluster name is invalid

Cause: An attempt to rename a cluster was rejected because an invalid cluster name was specified.

Action: Rerun the command with a valid cluster name. A valid cluster name should contain only alphanumeric characters and hyphens, should start with an alphabetic character, and should not be more than fifteen characters long.

CRS-42007: operation not supported for clusters where an RHP Server or an RHP Client is configured

Cause: An attempt to rename a cluster was rejected because that operation was not supported for clusters where an RHP Server or an RHP Client is configured.

Action: None

CRS-42008: operation not supported for clusters where Quality of Service Management is configured and is in use

Cause: An attempt to rename a cluster was rejected because that operation was not supported for clusters where Quality of Service Management was configured and was in use.

Action: None

DBV-00200 to DBV-00201

DBV-00200: Block, DBA *number*, already marked corrupt

Cause: The block was previously corrupted. It has been marked as corrupt by the Oracle database server.

Action: If the block is not currently allocated to a database object, then no action is required. If the block is allocated, then the options and required action depend on the type and nature of the object which owns the block. To repair an allocated block, perform block or file media recovery.

DBV-00201: Block, DBA *number*, marked corrupt for invalid redo application

Cause: The block was marked corrupt by the Oracle database server for invalid redo application, ex: media recovery of a NOLOGGING object or direct loaded data.

Action: If the block is not currently allocated to a database object, then no action is required. If the block is allocated, then the object will need to be rebuilt, or data to be reloaded.

DGM-16900 to DGM-17176

DGM-16900: Unable to initialize client

Cause: The client could not be initialized.

Action: This is an internal error. Contact Oracle Support Services.

DGM-16901: Unable to initialize environment

Cause: The database environment could not be allocated and initialized.

Action: This is an internal error. Contact Oracle Support Services.

DGM-16902: Unable to allocate handle

Cause: The database handle could not be allocated.

Action: This is an internal error. Contact Oracle Support Services.

DGM-16903: Unable to connect to database using *string*

Cause: The Data Guard command-line interface (DGMGRL) was unable to connect to the database using the specified connect identifier.

Action: Check the connect identifier and ensure the instance or host is reachable.

DGM-16904: Unable to set attribute

Cause: The server attributes could not be set.

Action: Check additional error messages.

DGM-16905: Failed.

Cause: The command failed to execute.

Action: Check additional error messages.

DGM-16906: Unable to accept commands: no memory

Cause: No memory was available for the attempted operation.

Action: Check your system and retry the command.

DGM-16909: Fatal error - quitting...

Cause: A fatal error was encountered.

Action: See additional error messages and/or contact Oracle Support Services.

DGM-16910: Unable to issue command to server

Cause: Command could not be issued to the server.

Action: See additional error messages and/or contact Oracle Support Services.

DGM-16912: Unrecognized command "*string*", try "help"

Cause: An unrecognized command was issued.

Action: Try again using a valid command.

DGM-16916: Missing site name, try "help"

Cause: The site name is missing from the command.

Action: Try the command again using correct syntax.

DGM-16934: \tstart up instance "string" of database "string"

Cause: The operation completed successfully and requires a restart of the specified instance. DGMGRL was unable to restart the instance.

Action: Start the specified instance manually.

DGM-16943: \tconnect to instance "string" of database "string"

Cause: The operation required DGMGRL to connect to a specific instance to complete, but DGMGRL could not automatically connect to the given instance.

Action: Connect to the specified instance and issue the command again.

DGM-16944: Failover succeeded, new primary is "string"

Cause: The failover command completed successfully."

Action: No action is required.

DGM-16945: Syntax error before or at "string"

Cause: The command could not be processed because of a syntax error in the named token.

Action: Try the command again using valid syntax.

DGM-16948: Unable to switchover, primary database is still "string"

Cause: The switchover operation could not be executed due to the errors reported with this error message. The primary role has not been changed.

Action: Correct the errors and try the SWITCHOVER command again.

DGM-16949: Object "string" was not found

Cause: The named object was not found.

Action: Try the command again using a valid database name.

DGM-16951: Unable to failover

Cause: The failover operation could not be executed due to the errors reported with this error message.

Action: Correct the errors and try the FAILOVER command again.

DGM-16952: Configuration details cannot be determined by DGMGRL

Cause: The broker configuration could not be found.

Action: 1) The Data Guard broker process (DMON) could not be contacted. Verify that the DMON process is running. 2) No broker configuration currently exists. You must create one. 3) You are connected to a standby database in the broker configuration that has either been disabled or deleted. While the standby is in this state, the details of the broker configuration are not available on the standby database. Connect to the primary database and reissue the command. 4) You are connected to a database in the broker configuration that must be reinstated or reinstantiated. While in this state, details of the broker configuration are not available. Either reinstate or reinstantiate the database and reissue the command, or connect to the primary database and reissue the command.

DGM-16953: XML document is too long

Cause: The length of the XML document exceeded the internal limit.

Action: This is an internal error. Contact Oracle Support Services.

DGM-16954: Unable to open the observer file "*string*".

Cause: The observer file could not be opened.

Action: Make sure the observer has the correct operating system privileges to read the file and that there is no other observer using the same file. Try the command again.

DGM-16959: No response from broker server process

Cause: No response was received from the broker server process (DMON).

Action: The Data Guard broker process (DMON) is not available. Verify that the DMON process is running and retry the command.

DGM-16960: Status not available

Cause: The status could not be retrieved.

Action: The Data Guard broker process (DMON) is not available. Verify that the DMON process is running and retry the command.

DGM-16979: Unable to log on to the primary or standby database as SYSDBA

Cause: The username/password used by the observer to log on to the primary database and Fast-Start Failover target standby database does not have valid SYSDBA credentials.

Action: Make sure the primary database and Fast-start failover target database are using a remote login password file. Make sure the SYSDBA password is the same at both databases and that the SYSDBA password is used in the CONNECT command. Start the observer again.

DGM-16991: Two or more resources have the name "*string*".

Cause: The named resource exists on more than one site.

Action: Use the ON SITE clause and reissue the command.

DGM-16999: Instance "*string*" was not found

Cause: The named instance could not be found.

Action: Try the command again using a valid instance name.

DGM-17000: Two or more instances have the name "*string*".

Cause: The named instance exists on more than one database.

Action: Use the ON DATABASE clause and reissue the command.

DGM-17002: Primary database cannot be removed

Cause: The named database to be removed is the primary database.

Action: Remove the broker configuration instead.

DGM-17007: Unsupported platform, observer cannot start

Cause: The Observer was started on an operating system that does not support multi-threading.

Action: Start the Observer on an operating system that supports multi-threading.

DGM-17009: New primary database "*string*" is opening...

Cause: The Data Guard broker is opening the specified new primary database. The new primary database is ready to accept transactions once it is open.

Action: None

DGM-17016: failed to retrieve status for database "*string*"

Cause: DGMGRL could not retrieve the StatusReport property from the given database and thus could not report the database status.

Action: See accompanying messages for details.

DGM-17017: unable to determine configuration status

Cause: The Data Guard broker could not execute a health check at the moment, so the configuration status could not be determined.

Action: See accompanying messages for details.

DGM-17023: far sync instance "*string*" was not found

Cause: A far sync instance with the given name was not found in the configuration.

Action: Try the command again using a valid far sync instance name. If the name refers to a database, use the corresponding database command syntax instead.

DGM-17025: database "*string*" was not found

Cause: A database with the given name was not found in the configuration.

Action: Try the command again using a valid database name. If the name refers to a far sync instance, use the corresponding far sync instance command syntax instead.

DGM-17032: Wildcard string not supported for this command

Cause: The wildcard string was specified instead of an object name.

Action: Supply an object name instead of the wildcard string and retry the command.

DGM-17048: unable to open and lock the target file "*string*"

Cause: The target file could not be opened or could not be locked for exclusive access.

Action: Ensure that the observer has the correct operating system privileges to write the file and that there is no other Observer using the same file. Try the command again.

DGM-17049: unable to get the length of the target file "*string*"

Cause: An attempt to get the length of the target file failed.

Action: This is an internal error. Contact Oracle Support Services.

DGM-17050: unable to allocate enough memory for file buffer

Cause: An attempt to allocate enough memory for the file buffer failed.

Action: This is an internal error. Contact Oracle Support Services.

DGM-17051: unable to read the target file "*string*"

Cause: An attempt to read the target file failed.

Action: This is an internal error. Contact Oracle Support Services.

DGM-17067: unable to retrieve the local host name

Cause: An attempt to retrieve the local host name failed.

Action: This is an internal error. Contact Oracle Support Services.

DGM-17088: observer external ID "*string*" is invalid

Cause: An invalid observer external ID was specified. A valid observer external ID should be 1, 2 or 3.

Action: Ensure the specified observer external ID is valid.

DGM-17090: unable to connect to database: no memory

Cause: Not enough memory was available for the attempted operation.

Action: Check your system and retry the command.

DGM-17104: Failed to parse the file path

Cause: An attempt to parse a file path failed.

Action: This is an internal error. Contact Oracle Support Services.

DGM-17105: Invalid value specified for the TRACE_LEVEL option.

Cause: An invalid value was specified for the TRACE_LEVEL option.

Action: Valid values for the TRACE_LEVEL option are USER or SUPPORT. Specify one of these values and retry the command.

DGM-17147: command not supported by the Oracle version running on database *string*

Cause: The DGMGRL CLI command could not be completed because the CLI was connected to a database that was running an older version of Oracle.

Action: Use another command or a version of the DGMGRL CLI that is the same as the version of Oracle the database is running.

DGM-17148: Invalid value specified for the WAIT option.

Cause: An invalid value was specified for the WAIT option.

Action: Valid values for the WAIT option are positive integers. Specify a positive integer value and rerun the command.

DGM-17152: invalid value "*string*" specified in file operation option

Cause: An invalid value was specified for the file operation option.

Action: Valid values for the file operation option are CREATE, REPLACE and APPEND.

DGM-17175: Failed to set session container to *string*.

Cause: The DGMGRL CLI was unable to set the session container to the pluggable database identified in the error message text.

Action: Check that the pluggable database exists or look for errors that may have been recorded in the database alert log and correct them before retrying the command.

DGM-17176: Unable to query PDB_PLUG_IN_VIOLATIONS.

Cause: The DGMGRL CLI was unable to query the PDB_PLUG_IN_VIOLATIONS table.

Action: Check that the container is set to CDB\$ROOT and that the container is open. Also check for any errors in the database alert log and correct them before retrying the command.

DIA-24280 to DIA-51705

DIA-24280: invalid input value for parameter *string*

Cause: The parameter has been provided a negative, out of range, or NULL input value.

Action: Correct the input value such that it is valid, and is within the range as specified in the documentation.

DIA-24281: invalid access past the maximum size of LOB parameter *string*

Cause: The value of positional or size parameters exceeds the maximum allowed LOB size of 4 Gigabytes.

Action: Correct the input values for amount and offset such that their sum is less than or equal to 4 Gigabytes. If error occurs in a read or write loop, check the looping conditions and/or offset increments.

DIA-24292: no more tables permitted in this sorted hash cluster

Cause: A sorted hash cluster only supports a maximum of 2 tables

Action: n/a

DIA-24295: max key length (*string*) for sorted hash cluster exceeded

Cause: Sorted hash clusters have a maximum key size

Action: n/a

DIA-24296: error in processing the XML configuration file *string*

Cause: Parameters or their values were specified incorrectly in the configuration file.

Action: Check and correct the configuration parameters or their values.

DIA-24300: bad value for mode

Cause: An undefined mode value was specified.

Action: Check that the correct mode is selected and that an allowed value for that mode is specified.

DIA-24301: null host specified in thread-safe logon

Cause: An HDA was not specified in the logon call while running in a thread safe environment.

Action: Make sure that HDA is not NULL when calling the logon routine.

DIA-24302: host connection in use by another thread

Cause: An attempt was made to use the host connection while it was in use by another thread.

Action: Wait for another thread to finish before using this connection.

DIA-24303: call not supported in non-deferred linkage

Cause: One of the calls that is supported in deferred mode linkage exclusively was invoked when the client was linked non-deferred.

Action: Use this call in deferred mode of linkage.

DIA-24304: datatype not allowed for this call

Cause: Data of this datatype cannot be sent or fetched in pieces.

Action: Use other bind or define calls for this datatype.

DIA-24305: bad bind or define context

Cause: The call was executed on a cursor for which this is invalid.

Action: Verify that this call is valid for this cursor. For example, Get piece information and set piece information are valid on a cursor if appropriate binds and defines have been done on this cursor.

DIA-24306: bad buffer for piece

Cause: A zero length buffer or a null buffer pointer was provided.

Action: Verify that the buffer pointing to this piece or its length is non-zero. The buffer pointer for the next piece or its length can be zero if it is the last piece to be inserted and there are no more data for the column.

DIA-24307: invalid length for piece

Cause: The length of the piece exceeded the maximum possible size.

Action: Verify that the length of this piece and the cumulative length of all the previous pieces is not more than the desired value supplied by the application.

DIA-24308: illegal define position

Cause: Call to modify attributes was done for a non-existent position

Action: Verify that a define has been done for this position

DIA-24309: already connected to a server

Cause: This server handle is already attached to a server.

Action: Disconnect from the server and then retry the call to establish a connection.

DIA-24310: length specified for null connect string

Cause: The connect string is null, but a length was specified for it.

Action: Set length to zero if connect string is null.

DIA-24311: memory initialization failed

Cause: Cannot initialize user memory.

Action: Contact customer support.

DIA-24312: illegal parameters specified for allocating user memory

Cause: An illegal size or null pointer was specified for user memory.

Action: Specify a legal size and a valid pointer for user memory.

DIA-24313: user already authenticated

Cause: A user has already been authenticated on this service handle.

Action: Terminate the service context before using it for another user.

DIA-24314: service handle not initialized

Cause: The server context does not exist.

Action: Establish the server context in the service context.

DIA-24315: illegal attribute type

Cause: An illegal attribute type was specified for the handle.

Action: Consult user manual to specify an attribute valid for this handle.

DIA-24316: illegal handle type

Cause: An illegal handle type was specified.

Action: Consult user manual to specify a valid handle type.

DIA-24317: define handle used in a different position

Cause: A define was done with an existing handle on a different position.

Action: Specify the same position as before on a re-define.

DIA-24318: call not allowed for scalar data types

Cause: This call is valid only for object types.

Action: Verify that the data-type for this variable is an object type

DIA-24319: unable to allocate memory

Cause: Process was unable to allocate memory to store diagnostics.

Action: Terminate other processes in order to reclaim needed memory.

DIA-24320: unable to initialize a mutex

Cause: An attempt to initialize a mutex failed.

Action: Contact customer support.

DIA-24321: inconsistent parameters passed

Cause: One of the three memory function pointers is null or non-null.

Action: Verify that either all the memory functions are null or non-null.

DIA-24322: unable to delete an initialized mutex

Cause: An attempt to delete an initialized mutex failed.

Action: Contact customer support.

DIA-24323: value not allowed

Cause: A null value or a bogus value was passed in for a mandatory parameter.

Action: Verify that all mandatory parameters are properly initialized.

DIA-24324: service handle not initialized

Cause: An attempt was made to use an improper service context handle.

Action: Verify that the service context handle has all the parameters initialized prior to this call.

DIA-24325: this OCI operation is not currently allowed

Cause: An attempt was made to use a context handle outside its scope.

Action: Verify that the context handle is set to a service context handle that has been converted to a logon data area for other OCI calls. The logon data area must be converted back to a service context before it can be used.

DIA-24326: handle passed in is already initialized

Cause: An attempt was made to pass an initialized handle.

Action: Verify that the parameter passed in to retrieve a handle does not already point to a handle.

DIA-24327: need explicit attach before authenticating a user

Cause: A server context must be initialized before creating a session.

Action: Create and initialize a server handle.

DIA-24328: illegal attribute value

Cause: The attribute value passed in is illegal.

Action: Consult the users manual and specify a legal attribute value for the handle.

DIA-24329: invalid character set identifier

Cause: The character set identifier specified is invalid

Action: Specify a valid character set identifier in the OCI call.

DIA-24330: internal OCI error

Cause: An internal OCI error has occurred.

Action: Please contact Oracle customer support.

DIA-24331: user buffer too small

Cause: The user buffer to contain the output data is too small.

Action: Specify a bigger buffer.

DIA-24332: invalid object type

Cause: An invalid object type is requested for the describe call.

Action: Specify a valid object type to the describe call.

DIA-24333: zero iteration count

Cause: An iteration count of zero was specified for the statement

Action: Specify the number of times this statement must be executed

DIA-24334: no descriptor for this position

Cause: The application is trying to get a descriptor from a handle for an illegal position.

Action: Check the position number.

DIA-24335: cannot support more than 1000 columns

Cause: The number of columns exceeds the maximum number supported.

Action: n/a

DIA-24336: invalid result set descriptor

Cause: The result set descriptor should have valid data fetched into it before it can be converted to a statement handle

Action: Fetch valid data into the descriptor before attempting to convert it into a statement handle

DIA-24337: statement handle not prepared

Cause: A statement cannot be executed before making preparing a request.

Action: Prepare a statement before attempting to execute it.

DIA-24338: statement handle not executed

Cause: A fetch or describe was attempted before executing a statement handle.

Action: Execute a statement and then fetch or describe the data.

DIA-24339: cannot set server group name after connecting to server

Cause: An attempt was made to set the server group in a server handle after connecting to the server. However, once the connection is established to a server, the server group name cannot be set anymore.

Action: Attach to the server after setting the server group name in the server handle.

DIA-24340: cannot support more than 255 columns

Cause: The number of columns exceeds maximum supported by the server.

Action: Limit your operation to 255 columns.

DIA-24341: bad mode specified

Cause: OCI_ENV_NO_MUTEX mode was specified for a non-threaded client.

Action: OCI_ENV_NO_MUTEX may be specified when OCI_THREADED had been specified at process initialization.

DIA-24342: unable to destroy a mutex

Cause: An attempt to destroy a mutex failed.

Action: n/a

DIA-24343: user defined callback error

Cause: The only valid return value for a user defined callback function is OCI_CONTINUE or OCI_ROWCBK_DONE. Any other value will cause this error.

Action: Please insure that OCI_CONTINUE or OCI_ROWCBK_DONE is returned from the user defined callback function.

DIA-24344: success with compilation error

Cause: A sql/plsql compilation error occurred.

Action: Return OCI_SUCCESS_WITH_INFO along with the error code

DIA-24345: A Truncation or null fetch error occurred

Cause: A truncation or a null fetch error"

Action: Please ensure that the buffer size is long enough to store the returned data.

DIA-24346: cannot execute without binding variables

Cause: None of the bind variables in the SQL statement are bound.

Action: Please bind all the variables before the execute is done.

DIA-24347: Warning of a NULL column in an aggregate function

Cause: A null column was processed by an aggregate function

Action: An OCI_SUCCESS_WITH_INFO is returned.

DIA-24348: Update or Delete without Where

Cause: An update or delete was executed without where clause

Action: An OCI_SUCCESS_WITH_INFO is returned.

DIA-24349: Array DML row counts not available

Cause: One of the following occurred: -The attribute in OCIAttrGet was used incorrectly. -The version of the database used does not support this feature -There was an error in the array DML for all of the iterations.

Action: Ensure that the statement is an array DML and also ensure that the database version is Oracle 12 or higher and the correct mode is used.

DIA-24350: OCI call not allowed

Cause: OCI used is not permitted from external procedures.

Action: Refer to user manual for usage restrictions.

DIA-24351: invalid date passed into OCI call

Cause: A bad date was passed into one of the OCI calls.

Action: Check your date bind values and correct them.

DIA-24352: invalid COBOL display type passed into OCI call

Cause: A bad COBOL display type was passed into one of the OCI calls.

Action: Check your COBOL display type bind values and correct them.

DIA-24353: user buffer too small to accommodate COBOL display type

Cause: User supplied buffer for a COBOL display type was too small to accommodate fetched number.

Action: Increase the allocation for COBOL display type buffer.

DIA-24354: number fetched too large to fit in COBOL display type buffer.

Cause: The number fetched was beyond the range that can be displayed.

Action: Please check the number in the database.

DIA-24355: attempt to store a negative number in an Unsigned Display type.

Cause: An attempt was made to convert a negative number into an unsigned display type.

Action: Please check the number in the database or change the defined datatype.

DIA-24356: internal error while converting from to COBOL display type.

Cause: An internal error was encountered during conversion to COBOL display type.

Action: Contact customer support.

DIA-24357: internal error while converting from to OCIDate.

Cause: An internal error was encountered during conversion to OCIDate type.

Action: Contact customer support.

DIA-24358: OCIBindObject not invoked for a Object type or Reference

Cause: OCIBindObject was not invoked resulting in an incomplete bind specification for a Object Type or Reference.

Action: Please invoke the OCIBindObject call for all Object Types and References.

DIA-24359: OCIDefineObject not invoked for a Object type or Reference

Cause: OCIDefineObject was not invoked resulting in an incomplete bind specification for a Object Type or Reference.

Action: Please invoke the OCIDefineObject call for all Object Types and References.

DIA-24360: Type Descriptor Object not specified for Object Bind/Define

Cause: Type Descriptor Object is a mandatory parameter for Object Types Binds and Defines.

Action: Please invoke the OCIBindObject() or OCIDefineObject() call with a valid Type Descriptor Object.

DIA-24361: basic bind call not invoked before invoking advanced bind call

Cause: One of the basic bind calls was not invoked on this bind handle before performing an advanced bind call.

Action: Please invoke the advanced bind call on this bind handle only after performing a basic bind call.

DIA-24362: improper use of the character count flag

Cause: When the character count flag is set, then the maximum size of the buffer in the server should be specified as a non-zero value.

Action: Please use a non-zero value for the maximum size of the buffer in the server.

DIA-24363: measurements in characters illegal here

Cause: Measurements in characters instead of bytes are illegal if either the server's or client's character set is varying width.

Action: If either the client's or server's character set is varying width then do not use the OCI_ATTR_CHAR_COUNT attribute for the bind handle. Use OCI_ATTR_MAXDATA_SIZE instead.

DIA-24364: internal error while padding blanks

Cause: An internal error has occurred while attempting to blank pad string data. This error should not occur normally.

Action: Contact customer support.

DIA-24365: error in character conversion

Cause: This usually occurs during conversion of a multibyte character data when the source data is abnormally terminated in the middle of a multibyte character.

Action: Make sure that all multibyte character data is properly terminated.

DIA-24366: migratable user handle is set in service handle

Cause: This occurs during user authentication, a migratable user handle has been set in the service handle.

Action: Service handle must not be set with migratable user handle when it is used to authenticate another user.

DIA-24367: user handle has not been set in service handle

Cause: This occurs during authentication of a migratable user. the service handle has not been set with non-migratable user handle.

Action: Service handle must be set with non-migratable user handle when it is used to authenticate a migratable user.

DIA-24368: OCI mutex counter non-zero when freeing a handle

Cause: This is an internal OCI error.

Action: Contact customer support.

DIA-24369: required callbacks not registered for one or more bind handles

Cause: No callbacks have been registered for one or more of the bind handles which are part of the RETURNING clause.

Action: The bind handles which are to receive data in a DML statement with a RETURNING clause must have their mode set as DATA_AT_EXEC and callback functions must be registered for these bind handles using OCIBindDynamic.

DIA-24370: illegal piecewise operation attempted

Cause: Data of a certain datatype that does not support piecewise operation is being sent or fetched in pieces.

Action: Always set the piece value to OCI_ONE_PIECE for datatypes that does not support piecewise operation.

DIA-24371: data would not fit in current prefetch buffer

Cause: An internal OCI error has occurred.

Action: Please contact Oracle customer support.

DIA-24372: invalid object for describe

Cause: The object to be described is not valid. It either has compilation or authorization errors.

Action: The object to be described must be valid.

DIA-24373: invalid length specified for statement

Cause: The length specified for the statement is either 0 or too large.

Action: Specify a valid length for the statement.

DIA-24374: define not done before fetch or execute and fetch

Cause: The application did not define output variables for data being fetched before issuing a fetch call or invoking a fetch by specifying a non-zero row count in an execute call.

Action: Issue OCI define calls for the columns to be fetched.

DIA-24375: Cannot use V6 syntax when talking to a V8 server

Cause: V6 syntax is no longer supported in V8 server.

Action: Change syntax to V7 syntax or higher.

DIA-24376: cannot register/get user callback for non-environment handle

Cause: A user callback registration or get was attempted on a handle which is not an environment handle.

Action: Pass the environment handle to register/get user callback.

DIA-24377: invalid OCI function code

Cause: An invalid function code was used.

Action: Use a valid OCI function code.

DIA-24378: user callbacks not allowed for this call

Cause: An attempt was made to register a user callback for an OCI call for which it not allowed to register user callbacks.

Action: Do not register user callback for this OCI call.

DIA-24379: invalid user callback type

Cause: An invalid type of user callback was specified.

Action: Specify a valid user callback type.

DIA-24380: invalid mode specification

Cause: The mode parameter in an OCI call is invalid

Action: Use only valid mode parameter

DIA-24381: error(s) in array DML

Cause: One or more rows failed in the DML.

Action: Refer to the error stack in the error handle.

DIA-24382: statement handled already executed or described

Cause: The Statement handle was executed or described successfully before.

Action: Perform a OCISstmtPrepare again before OCI_PARSE_ONLY.

DIA-24383: Overflow segment of an IOT cannot be described

Cause: The name specified in the OCIDescribeAny call referred to an IOT overflow segment.

Action: Use OCIDescribeAny to describe only documented objects.

DIA-24384: Application context size is not initialized

Cause: The size of the application context must be initialized before populating each context element.

Action: Issue OCIAttrSet with OCI_ATTR_CTX_SIZE to initialize context size

DIA-24385: Application context size or index is not valid

Cause: The size or index of the application context must be non-zero and non-negative.

Action: Use an appropriate value for the size.

DIA-24386: statement/server handle is in use when being freed

Cause: This is an internal OCI error.

Action: The user should reset in-use flag in statement handle before freeing the handle.

DIA-24387: Invalid attach driver

Cause: Trying to attach using the wrong driver

Action: Relink the application in the right mode

DIA-24388: Unsupported functionality in fast path mode

Cause: Feature not supported in fast path mode

Action: Avoid using the functionality in this mode

DIA-24389: Invalid scrollable fetch parameters

Cause: All the requested rows in this fetch could not be received.

Action: Check the fetch orientation, scroll offset, OCI_ATTR_CURRENT_POSITION and number of rows in OCISstmtFetch2 call. If required, change some of above parameters and fetch again.

DIA-24390: Unsupported scrollable cursor operation

Cause: The scrollable cursor execute or fetch has failed.

Action: Check the documentation for supported types, and other restrictions while using scrollable cursors.

DIA-24391: invalid fetch operation

Cause: Scrollable cursor operation requested with non-scrollable cursor.

Action: Check if the statement was executed in the scrollable mode. Else the only acceptable orientation is OCI_FETCH_NEXT that ignores the scroll offset parameter.

DIA-24392: no connection pool to associate server handle

Cause: OCIServerAttach called in OCI_POOL mode but no connection pool found to associate the server handle.

Action: 1) Verify that OCIConnectionPoolCreate is called before calling OCIServerAttach. 2) Verify that the database link specified in OCIServerAttach matches with that of the connection pool database link.

DIA-24393: invalid mode for creating connection pool

Cause: Mode specified in OCIConnectionPoolCreate is invalid.

Action: Use a valid mode.

DIA-24394: invalid mode for destroying connection pool

Cause: Mode specified in OCIConnectionPoolDestroy is invalid.

Action: Use a valid mode.

DIA-24395: cannot reinitialize non-existent pool

Cause: OCIConnectionPoolCreate was not called in OCI_DEFAULT mode for this pool handle.

Action: Create a connection pool prior to reinitializing it.

DIA-24396: invalid attribute set in server handle

Cause: Attribute OCI_ATTR_NONBLOCKING_MODE has been set on the server handle and attached in OCI_POOL mode. Connection pooling does not support non blocking mode.

Action: Do not set the OCI_ATTR_NONBLOCKING_MODE attribute on the server handle while attaching in OCI_POOL mode.

DIA-24397: error occurred while trying to free connections

Cause: An internal error occurred while trying to free connections.

Action: Contact customer support.

DIA-24398: connection pool already exists

Cause: A connection pool has already been created for the specified pool handle.

Action: 1) Specify a different pool handle to create a new connection pool. 2) If you wish to modify the pool parameters, call OCIConnectionPoolCreate in OCI_CPOOL_REINITIALIZE mode.

DIA-24399: invalid number of connections specified

Cause: An invalid combination of minimum, maximum and increment number of connections was specified in the OCIConnectionPoolCreate call.

Action: Specify a valid combination of parameters.

DIA-24400: error occurred while creating connections in the pool

Cause: The database link specified in OCICreationPoolCreate might be an invalid one.

Action: Specify a valid database link.

DIA-24401: cannot open further connections

Cause: Sufficient number of connections are not present in the pool to execute the call. No new connections can be opened as the connMax parameter supplied in OCICreationPoolCreate has been reached.

Action: Call OCICreationPoolCreate in OCI_CPOOL_REINITIALIZE mode and increase the value of the connMax parameter.

DIA-24402: error occurred while creating connections in the pool

Cause: The username and password specified in OCICreationPoolCreate might be invalid.

Action: Specify a valid username and password.

DIA-24403: error occurred while trying to destroy the connection pool

Cause: Some connections in the pool were busy when an attempt to destroy the connection pool was made.

Action: Ensure no connections from the pool are being used.

DIA-24404: connection pool does not exist

Cause: An attempt was made to use the connection pool before creating it.

Action: Create the connection pool.

DIA-24405: error occurred while trying to create connections in the pool

Cause: An internal error occurred while creating connections in the pool.

Action: Contact customer support.

DIA-24406: API mode switch is disallowed when a call is in progress.

Cause: A mode switch from OCI8 to OCI7 was attempted in a callback.

Action: The user should perform the API mode switch either prior to initiating the top call or after the main call is done.

DIA-24407: connection pool already exists

Cause: A connection pool has already been created for the specified pool name.

Action: Specify a different pool name to create a new connection pool.

DIA-24408: could not generate unique server group name

Cause: An internal error occurred while generating unique server group name.

Action: Contact customer support.

DIA-24409: client cannot understand the object

Cause: The client cannot process all the new features in the object.

Action: Upgrade the client so that features like inheritance and SQLJ objects can be used.

DIA-24410: scrollable cursor max size exceeded

Cause: Result set size exceeded the max limits.

Action: Check the documentation for allowable maximum result set size for scrollable cursors. Re-execute with a smaller expected result set size or make the cursor non-scrollable.

DIA-24411: Session pool already exists.

Cause: A session pool has already been created for the specified pool handle.

Action: 1) Specify a different pool handle to create a new session pool. 2) If you wish to modify the pool parameters, call OCISessionPoolCreate in OCI_SPOOL_REINITIALIZE mode.

DIA-24412: Cannot reinitialize non-existent pool

Cause: OCISessionPoolCreate was not called in OCI_DEFAULT mode for this pool handle.

Action: Create a session pool prior to reinitializing it.

DIA-24413: Invalid number of sessions specified

Cause: An invalid combination of minimum, maximum and increment number of sessions was specified in the OCISessionPoolCreate call.

Action: Specify a valid combination of parameters.

DIA-24414: Only *number* sessions could be started.

Cause: The number of sessions specified by the minSess parameter of OCISessionPoolCreate could not be started, possibly because the value supplied was larger than that supported by the server."

Action: This is a warning. Check the maximum number of sessions allowed on the server.

DIA-24415: Missing or null username.

Cause: Username and password must be specified when pool is created in this mode.

Action: Specify a valid username and password.

DIA-24416: Invalid session Poolname was specified.

Cause: An attempt was made to use a Session Pool that does not exist.

Action: Create a Session Pool before using it.

DIA-24417: Session pool size has exceeded the maximum limit

Cause: The number of sessions has exceeded the maximum size of the Session Pool.

Action: This is a warning. You can tune the session pool with appropriate minimum and maximum parameters.

DIA-24418: Cannot open further sessions.

Cause: Sufficient number of sessions are not present in the pool to execute the call. No new sessions can be opened as the sessMax parameter supplied in OCISessionPoolCreate has been reached.

Action: Call OCISessionPoolCreate in OCI_SPOOL_REINITIALIZE mode and increase the value of the sessMax parameter.

DIA-24419: Proxy sessions are not supported in this mode.

Cause: A proxy session was requested for from a Session Pool which does not support proxy sessions.

Action: Do not specify mode OCI_CRED_PROXY.

DIA-24420: OCISessionRelease must be used to release this session.

Cause: The session was retrieved using OCISessionGet, and an attempt has been made to release it using a call other than OCISessionRelease.

Action: Call OCISessionRelease.

DIA-24421: OCISessionRelease cannot be used to release this session.

Cause: The session was not retrieved using OCISessionGet, and an attempt has been made to release it using OCISessionRelease.

Action: Release the session using an appropriate call.

DIA-24422: error occurred while trying to destroy the Session Pool

Cause: An attempt was made to destroy the session pool while some sessions in the pool were busy.

Action: Ensure that no sessions from the pool are being used OR call OCISessionPoolDestroy with mode set to OCI_SPD_FORCE.

DIA-24423: Cannot set the ROWID attribute - OCI_ATTR_FETCH_ROWID

Cause: An attempt was made to set the implicit ROWID attribute.

Action: Use a SELECT ... FOR UPDATE statement that has not previously been described or executed before setting this ROWID attribute.

DIA-24424: Invalid attempt to define at position 0

Cause: An invalid attempt was made to call OCIDefineByPos for position 0.

Action: Ensure that the implicit ROWID attribute, OCI_ATTR_FETCH_ROWID, is set on the statement handle before doing the execute.

DIA-24425: Invalid mode passed when defining at position 0

Cause: An invalid mode was passed to OCIDefineByPos.

Action: Ensure a valid mode is passed to OCIDefineByPos when defining at position 0.

DIA-24427: Invalid attributes on user handle

Cause: Some of the attributes set on the user handle were not allowed in pooled mode.

Action: Unset the attributes on the user handle and call OCISessionGet or use sessions that are not pooled.

DIA-24428: Sessions with SYSDBA privileges are not supported in this mode.

Cause: A session with SYSDBA privileges was requested from a Session Pool which does not support sessions with SYSDBA privileges.

Action: Do not specify mode OCI_SESSGET_SYSDBA.

DIA-24429: External authentication is not supported in this mode.

Cause: An externally authenticated session was requested from a Session Pool which does not support external authentication.

Action: Do not specify mode OCI_SESSGET_CREDEXT.

DIA-24430: Null values for sqltext and key were specified.

Cause: An attempt was made to call OCISmtPrepare2 and neither sqltext nor key were specified.

Action: Specify valid values for sqltext or key or both.

DIA-24431: Statement does not exist in the cache

Cause: The statement that was requested for does not exist in the statement cache.

Action: Please request for a valid statement.

DIA-24432: The statement that was returned is not tagged.

Cause: A tagged statement was requested for, but an untagged statement has been returned.

Action: This is a warning. Please modify and tag the statement as desired.

DIA-24433: This statement has already been prepared using OCISstmtPrepare2.

Cause: A statement that was earlier prepared using OCISstmtPrepare2 is now being reprepared using OCISstmtPrepare."

Action: Please use a different statement handle.

DIA-24434: OCISstmtRelease called before OCISstmtPrepare2.

Cause: An attempt was made to release a statement without first preparing it using OCISstmtPrepare2.

Action: Call OCISstmtPrepare2 before OCISstmtRelease.

DIA-24435: Invalid Service Context specified.

Cause: The statement was prepared using a service context that is different from the one specified in OCISstmtExecute.

Action: Please specify the same service context that the statement was prepared with.

DIA-24436: Invalid statement Handle.

Cause: OCIHandleFree called on a statement that was prepared using OCISstmtPrepare2.

Action: Release the statement using OCISstmtRelease.

DIA-24437: OCISstmtExecute called before OCISstmtPrepare2.

Cause: An attempt was made to execute a statement without first preparing it using OCISstmtPrepare2.

Action: Call OCISstmtPrepare2 before OCISstmtExecute.

DIA-24438: Invalid Authentication Handle specified.

Cause: The statement was prepared using an authentication handle that is different from the one specified in OCISstmtExecute.

Action: n/a

DIA-24439: success with PLSQL compilation warning

Cause: A plsql compilation warning occurred.

Action: Return OCI_SUCCESS_WITH_INFO along with the error code.

DIA-24440: OCI Easy Install mode cannot be initialized

Cause: An internal OCI error has occurred.

Action: Please contact Oracle customer support.

DIA-24441: Invalid cookie, resend sql text

Cause: An internal OCI error has occurred.

Action: Please contact Oracle customer support.

DIA-24442: SCN exceeds the capability of the target OCI database or client

Cause: An attempt was made to transfer a system change number (SCN) to an Oracle database or client that is older than Release 12.2 and the SCN exceeds the maximum value that such a system can handle.

Action: If needed, update the target database or client to Release 12.2 or higher.

DIA-24444: TTC RPC (*string*) not allowed by the security policy configured on the database

Cause: The database security policy configuration did not allow the specified Two-Task Common (TTC) RPC.

Action: Do not use functionality that issues the specified TTC RPC which is disallowed by the database security policy.

DIA-24445: object type input parameter in TTC RPC not allowed by the security policy configured on the database

Cause: The database security policy configuration did not allow object types as input parameters (including IN bind variables) in Two-Task Common (TTC) RPCs.

Action: Do not use the functionality that relies on object type input parameter usage in a TTC RPC.

DIA-24450: Cannot pre-process OCI statement

Cause: An error occurred during statement pre-processing. E.g., SQL statement has invalid usage of N' or Q' literals.

Action: Correct the SQL statement.

DIA-24451: *string*, Maximum call depth exceeded

Cause: Your program has too many levels of recursion.

Action: Restructure your program to eliminate some levels of recursion.

DIA-24452: value_sz exceeding SB4MAXVAL is not supported

Cause: value_sz specified in OCIBindByPos2, OCIBindByName2 or OCIDefineByPos2 exceeds SB4MAXVAL and is not supported in this release.

Action: Specify a value less than or equal to SB4MAXVAL for value_sz in OCIBindByPos2, OCIBindByName2 or OCIDefineByPos2.

DIA-24453: number of application context settings supplied during authentication has exceeded the supported limit of *number* settings

Cause: The number of application context settings supplied during authentication exceeded the specified limit.

Action: Reduce the number of application context settings that are passed during authentication.

DIA-24454: client host name is not set

Cause: The network host name in files like /etc/hosts was not set.

Action: Set the host name and try again.

DIA-24460: Native Net Internal Error

Cause: Internal error .

Action: This error should not normally occur. If it persists, please contact your customer service representative.

DIA-24480: invalid OCI mode

Cause: An attempt was made to invoke OCI API with an invalid mode.

Action: Provide the OCI API with legitimate mode.

DIA-24481: Failed to initialize multithreaded environment

Cause: Operating system did not support multithreaded mode.

Action: Use single thread mode instead.

DIA-24482: Pool size was less than 1 in shared mode

Cause: Pool size must be positive in shared mode.

Action: Set a positive pool size.

DIA-24483: Invalid parameters were passed into environment creation call

Cause: Invalid parameters were passed into the environment creation call. Check the passed in parameters for the following conditions: -envp should not be NULL - xtrmem_sz should not be negative -Either both xtrmem_sz and usrmempp have to be provided. Or, neither should be provided.

Action: Pass in legitimate parameters.

DIA-24484: Setting authentication handle not allowed after pool create

Cause: An attempt was made to set the authentication handle on session pool handle after OCISessionPoolCreate.

Action: Set the authentication handle on session pool handle before calling OCISessionPoolCreate.

DIA-24485: Invalid attributes in session pool authentication handle

Cause: Some of the attributes set on the authentication handle being set on the session pool handle are invalid.

Action: Unset the illegal attributes on the authentication handle being set on session pool handle and then call OCIAAttrSet. Refer to OCI documentation for details.

DIA-24486: Conflicting attributes in session pool authentication handle

Cause: Some attributes could not be set both on the authentication handle passed to OCISessionGet and the authentication handle set on session pool handle.

Action: Unset the conflicting attributes on the authentication handle and call OCISessionGet.

DIA-24487: Invalid properties or values provided for OCISessionGet

Cause: Some of the properties or their values provided during OCISessionGet with mode OCI_SESSGET_MULTIPROPERTY_TAG were invalid.

Action: Provide valid properties and values when calling OCISessionGet with mode OCI_SESSGET_MULTIPROPERTY_TAG. Refer to Oracle Call Interface documentation for details.

DIA-24488: Invalid properties or values provided for OCISessionRelease

Cause: Some of the properties or their values provided during OCISessionRelease with mode OCI_SESSRLS_MULTIPROPERTY_TAG were invalid.

Action: Provide valid properties and values when calling OCISessionRelease with mode OCI_SESSRLS_MULTIPROPERTY_TAG. Refer to Oracle Call Interface documentation for details.

DIA-24489: reserved OCI error

Cause: A reserved Oracle Call Interface (OCI) error has occurred.

Action: Contact Oracle Support Services.

DIA-24490: error while getting shard instances

Cause: There was a mismatch in the shard keys or group keys with the corresponding connect string.

Action: Check if the keys are properly specified along with the corresponding connection string.

DIA-24491: attempt to get sharding-related topology information failed

Cause: An unexpected error was encountered while building and processing sharding-related information.

Action: Contact Oracle Support Services.

DIA-24492: Shard library initialization failed.

Cause: An attempt to initialize the shard library failed.

Action: Contact Oracle Support Services.

DIA-24493: general sharding error

Cause: An unexpected error was encountered while processing sharding-related information.

Action: Contact Oracle Support Services.

DIA-24494: error in constructing shard key or shard group key

Cause: An invalid column value was passed.

Action: Pass in a column value in the appropriate format specified by the data type.

DIA-24495: OCISessionGet() timed out waiting for a suitable writable chunk.

Cause: There was no instance available with a writable chunk for the specified shard key at the time the OCISessionGet() request was issued. This may be a transient condition due to chunk migration.

Action: Retry the request later. If needed, increase the timeout specified in OCI_ATTR_SPOOL_WAIT_TIMEOUT to minimize or eliminate the chances of running into this error during chunk migrations.

DIA-24496: OCISessionGet() timed out waiting for a free connection.

Cause: There was no free connection as the pool reached its maximum and all connections were in use at the time the request was issued.

Action: Retry the request later. Use OCISessionGet() with OCI_SPOOL_ATTRVAL_TIMEDWAIT mode (with an appropriate OCI_ATTR_SPOOL_WAIT_TIMEOUT setting) or OCI_SPOOL_ATTRVAL_WAIT mode. If needed, increase the maximum size of the OCI session pool.

DIA-24497: PL/SQL fix up callback name too long

Cause: The PL/SQL fix up callback name was too long.

Action: Use a shorter PL/SQL fix up callback name.

DIA-24500: invalid UTF16 mode

Cause: UTF16 mode is allowed only at environment handle creation time.

Action: Remove UTF16 mode for functions other than OCIEnvCreate()

DIA-24501: invalid UTF16 string passed in

Cause: Non-UTF16 string is passed in while UTF16 string is expected

Action: Check the parameter which is actually a string

DIA-24502: codepoint length overflows

Cause: Returned buffer has more codepoints than allowed

Action: Set OCI_MAXCHAR_SIZE large enough to accommodate

DIA-24503: codepoint length overflows for piecewise operation

Cause: Accumulated codepoint length exceeds allowed codepoint length

Action: Set OCI_MAXCHAR_SIZE large enough to accommodate

DIA-24504: data length larger than expected

Cause: Incoming data larger than receiving buffer

Action: Set OCI_MAXDATA/MAXCHAR_SIZE appropriately or remove the setting

DIA-24505: cannot change character set id on the handle

Cause: Attempts to change character set id on non-environment handles

Action: Only try to change character set id on environment handles

DIA-24506: invalid attempt to change character set id on env handle

Cause: Attempts to change character set id after other handles have been allocated from the env handle

Action: Change character set id after creating environment handle but before allocating any handles from it.

DIA-24507: invalid combination of character set ids

Cause: Attempts to set one character set id as zero

Action: Set both charset and ncharset as zero or non-zero in OCIEnvNlsCreate()

DIA-24508: Buffer is not aligned correctly.

Cause: Alignment error occurred in buffer when converting between character sets.

Action: Align buffer appropriately. For UTF16 buffer, pass a ub2 pointer.

DIA-24509: OCI function currently not supported in UTF16 mode.

Cause: Attempt to call an OCI function that was not supported in OCI_UTF16ID mode.

Action: Remove the offending function or do not create an OCI environment with OCI_UTF16ID mode or OCI_UTF16ID character set ID.

DIA-24530: User not authorized to access column value.

Cause: Column security is enabled and column value is not authorized.

Action: The program needs to handle this error and take appropriate action.

DIA-24531: Column value authorization is unknown.

Cause: Column security is unknown for the column.

Action: Verify the fetched data. It may or may not contain a meaningful value because it is probably the result of an expression that operated on unauthorized values.

DIA-24536: Warning - column authorization unknown.

Cause: Column security is unknown for one or more columns.

Action: Verify the fetched data. It may or may not contain a meaningful value because it is probably the result of an expression that operated on unauthorized values.

DIA-24542: PRELIM mode logon not allowed to a pluggable database

Cause: PRELIM mode logon was attempted to a pluggable database.

Action: Create PRELIM mode connections to CDB\$ROOT only.

DIA-24543: instance startup or shutdown not allowed in pluggable database

Cause: An instance startup or shutdown operation was attempted when connected to a pluggable database.

Action: Perform instance startup or shutdown operations by connecting to CDB\$ROOT.

DIA-24544: Oracle RAC One Node instance is already running.

Cause: An instance startup failed because an instance of the Oracle RAC One Node database was already running on one of the cluster nodes.

Action: In Oracle RAC One Node, avoid any attempt to start a second instance by any means while the instance is already running.

DIA-24550: unhandled signal #number received. string

Cause: Serious error: signal received

Action: Refer to the platform-specific signal code, and see if the application code caused the error. Otherwise, record all error state and notify Oracle Support Services.

DIA-24557: error string encountered while handling error string; exiting server process

Cause: A second-level error occurred in an Oracle server process that required that process to exit.

Action: None. If an excessive number of incidents are dumped, contact Oracle Support Services.

DIA-24600: could not create OCI environment

Cause: The Oracle Client library used to communicate with the database failed to initialize correctly.

Action: Check that the Oracle environment or registry entries are consistent and correct. If using the Oracle Instant Client, make sure the Oracle driver for MySQL and Oracle libraries are from the same release. Make sure you have read access to the libraries.

DIA-24601: bind buffer not allocated by caller

Cause: A valid buffer was not provided for the bind call.

Action: Provide a non-NULL pointer for the bind call and a valid length for the buffer.

DIA-24602: attempting to read with no fetch

Cause: A column was being fetched while not in fetch state.

Action: Fetch the column after fetching of the result set has started.

DIA-24750: incorrect size of attribute

Cause: Transaction ID attribute size is incorrect.

Action: Verify that the size parameter is correct.

DIA-24752: OCI_TRANS_NEW flag must be specified for local transactions

Cause: Application attempted to start a local transaction without using OCI_TRANS_NEW.

Action: Use OCI_TRANS_NEW when starting local transactions.

DIA-24753: local transactions cannot be detached

Cause: An attempt to detach a local transaction was made.

Action: Local transactions may only be committed or rolled back.

DIA-24754: cannot start new transaction with an active transaction

Cause: An attempt to start a new transaction was made when there was an active transaction.

Action: Commit, rollback or detach the existing transaction before starting a new transaction.

DIA-24755: OCI_TRANS_NOMIGRATE, OCI_TRANS_JOIN options are not supported

Cause: These flags are currently not supported.

Action: n/a

DIA-24756: transaction does not exist

Cause: An invalid transaction identifier or context was used or the transaction has completed.

Action: Supply a valid identifier if the transaction has not completed and retry the call.

DIA-24757: duplicate transaction identifier

Cause: An attempt was made to start a new transaction with an identifier already in use by an existing transaction.

Action: Verify that the identifier is not in use.

DIA-24758: not attached to the requested transaction

Cause: An attempt was made to detach or complete a transaction that is not the current transaction.

Action: Verify that the transaction context refers to the current transaction.

DIA-24759: invalid transaction start flags

Cause: An invalid transaction start flag was passed.

Action: Verify that only one of the following values is specified: OCI_TRANS_NEW, OCI_TRANS_JOIN, OCI_TRANS_RESUME, or OCI_TRANS_PROMOTE.

DIA-24760: invalid isolation level flags

Cause: An invalid isolation level flag was passed.

Action: Verify that only one of following values - OCI_TRANS_READONLY, OCI_TRANS_READWRITE, OCI_TRANS_SERIALIZABLE is used.

DIA-24762: server failed due to unspecified error

Cause: An internal error has occurred in the server commit protocol.

Action: Contact customer support.

DIA-24763: transaction operation cannot be completed now

Cause: The commit or rollback cannot be performed now because the session cannot switch to the specified transaction.

Action: Retry the operation later.

DIA-24767: transaction branch prepare returns read-only

Cause: The transaction is read-only, or this is the outcome of an optimization for two-phase commit protocol.

Action: None. Informational only.

DIA-24769: cannot forget an active transaction

Cause: Transaction identifier refers to an active transaction.

Action: Verify that the identifier of an active transaction was not passed as an argument.

DIA-24770: cannot forget a prepared transaction

Cause: Transaction identifier refers to a prepared transaction.

Action: Verify that the identifier of a prepared transaction was not passed as an argument.

DIA-24771: cannot detach, prepare or forget a local transaction

Cause: Service handle contains a local transaction context.

Action: Verify that the transaction context does not refer to a local transaction.

DIA-24772: Cannot mix tightly-coupled and loosely-coupled branches

Cause: Application attempted to start a transaction with a global transaction identifier and a wrong option.

Action: Verify that all branches of a global transaction are started with either OCI_TRANS_TIGHT or OCI_TRANS_LOOSE option. If the application is correct and uses distributed updates, contact customer support.

DIA-24773: invalid transaction type flags

Cause: OCI_TRANS_TIGHT or OCI_TRANS_LOOSE mode was not specified.

Action: Verify that the right parameters are being used.

DIA-24774: cannot switch to specified transaction

Cause: The transaction specified in the call refers to a transaction created by a different user.

Action: Create transactions with the same authentication so that they can be switched.

DIA-24775: cannot prepare or commit transaction with non-zero lock value

Cause: An attempt was made to detach the transaction with a non-zero lock value.

Action: Detach the transaction with lock value set to zero and then try to prepare or commit the transaction.

DIA-24776: cannot start a new transaction

Cause: An attempt was made to start a new transaction when session was already attached to an existing transaction.

Action: End the current transaction before creating a new transaction.

DIA-24777: use of non-migratable database link not allowed

Cause: The transaction, which needs to be migratable between sessions, tried to access a remote database from a non-multi threaded server process.

Action: Perform the work in the local database or open a connection to the remote database from the client. If multi threaded server option is installed, connect to the Oracle instance through the dispatcher.

DIA-24778: cannot open connections

Cause: The migratable transaction tried to access a remote database when the session itself had opened connections to remote database(s).

Action: Close the connection(s) in the session and then try to access the remote database from the migratable transaction. If the error still occurs, contact Oracle customer support.

DIA-24779: detach not allowed with open remote cursor

Cause: The migratable transaction tried to detach from the current session while having an open remote cursor.

Action: Close any open remote cursor prior to detach.

DIA-24780: cannot recover a transaction while in an existing transaction

Cause: An attempt was made to commit or roll back a transaction while in a different transaction, and the transaction for which the action is requested is in a recovery state (this happens if it is idle too long).

Action: Detach from the current transaction and retry the operation.

DIA-24781: branches don't belong to the same global transaction

Cause: The list of xids passed into kpotxmp() don't have the same gtrid

Action: n/a

DIA-24782: Cannot detach from a non-migratable transaction

Cause: An attempt was made to detach from a non-migrateable transaction.

Action: Either commit or rollback the transaction.

DIA-24783: Cannot switch non-migratable transactions

Cause: An attempt was made to prepare/commit a txn different from current.

Action: n/a

DIA-24784: Transaction exists

Cause: An attempt was made to start a transaction, while attached to a non-migrateable transaction

Action: n/a

DIA-24785: Cannot resume a non-migratable transaction

Cause: An attempt was made to resume a non-migrateable transaction.

Action: n/a

DIA-24786: separated transaction has been completed

Cause: The current transaction has been completed by another process.

Action: Start a new transaction

DIA-24787: remote cursors must be closed before a call completes

Cause: The previous operation did not close all the remote cursors it opened. Since separated transactions are enabled, this is not allowed.

Action: Close all remote cursors in each call, or start a regular (non-separated) transaction.

DIA-24788: cannot switch to specified transaction (server type)

Cause: The transaction specified was created by a shared server and the requestor is a dedicated server, or the transaction was created by a dedicated server and the requestor is a shared server.

Action: All parts of this application should connect as dedicated or as shared.

DIA-24789: start not allowed in recursive call

Cause: Oracle RM will not start/resume a branch in a recursive call

Action: Reconsider your application stack design

DIA-24790: cannot mix OCI_TRANS_RESUME and transaction isolation flags

Cause: An attempt was made to change the isolation level of an existing transaction.

Action: No action required

DIA-24791: invalid transaction start flags

Cause: An invalid transaction start flag was passed.

Action: Verify that OCI_TRANS_LOOSE was not passed along with OCI_TRANS_JOIN, OCI_TRANS_RESUME. Also, verify that other flags (such as OCI_TRANS_SEPARABLE) passed by the client are supported by the version of the Oracle server.

DIA-24792: cannot mix services in a single global transaction

Cause: Oracle RM will not serve global (distributed) transaction requests if branches are created using different services

Action: Configure clients such that those participating in the same distributed transaction use the same service name.

DIA-24794: no active DTP service found

Cause: Oracle RM will not serve global (distributed) transaction requests until DTP services are configured in RAC. It is possible that a service was stopped while transactions were in-flight.

Action: Provision/Start DTP services first.

DIA-24795: Illegal *string* attempt made

Cause: An illegal attempt was made to commit/rollback current transaction

Action: Use appropriate commit/rollback mechanism

DIA-24796: operation completed; resume of original transaction rolled back

Cause: The commit, rollback, or prepare completed successfully, but the current transaction for this thread was rolled back.

Action: If desired, retry the current transaction. If the operation was prepare, then end transaction appropriately with a commit or rollback operation.

DIA-24797: cannot promote the current transaction to a distributed transaction

Cause: An illegal attempt was made to promote the current transaction.

Action: Verify that OCI_ATTR_XID, OCI_ATTR_INTERNAL_NAME, and OCI_ATTR_EXTERNAL_NAME attributes have been set properly, and verify that the current transaction has neither performed IDL or PDML operations, nor already been a distributed transaction. Also, verify that the local transaction is in the same isolation level if the isolation flag value is set.

DIA-24798: cannot resume the distributed transaction branch on another instance

Cause: An attempt was made to resume a distributed transaction branch that is physically located on another RAC instance.

Action: Get a connection to the instance where the transaction branch is located.

DIA-24801: illegal parameter value in OCI lob function

Cause: One of the parameter values in the OCI lob function is illegal.

Action: Check every parameter in the OCI Lob function call to make sure they are correct. Offsets should be greater than or equal to one.

DIA-24802: user defined lob read callback error

Cause: The only valid return value for a user defined lob read callback function is OCI_CONTINUE. Any other value will cause this error.

Action: Verify that OCI_CONTINUE is returned from the user defined lob read callback function.

DIA-24803: illegal parameter value in lob read function

Cause: Internal error .

Action: This error should not normally occur. If it persists, please contact your customer service representative.

DIA-24804: Lob read/write functions called while another OCI LOB read/write streaming is in progress

Cause: Internal error.

Action: Wait for the ongoing LOB streaming call to finish before issuing the next server call, or use OCIBreak() abort the current LOB streaming call.

DIA-24805: LOB type mismatch

Cause: When copying or appending LOB locators, both source and destination LOB locators should be of the same type.

Action: Pass the same type of LOB locators for copying or appending.

DIA-24806: LOB form mismatch

Cause: When reading from or writing into LOBs, the character set form of the user buffer should be same as that of the LOB.

Action: Make sure that the buffer you are using to read or write has the same form as that of the LOB.

DIA-24807: LOB form mismatch

Cause: When copying or appending LOBs, both source and destination LOB locators should have the same character set form.

Action: Pass locators of the same character set form for copying or appending LOBs.

DIA-24808: streaming of lob data is not allowed when using lob buffering

Cause: Attempted to stream lob data via the polling mode or a callback when lob buffering was enabled for the input lob locator.

Action: Lob buffering is useful when reading/writing small amounts of lob data so streaming should not be necessary. Rewrite the OCILobRead/OCILobWrite call so that it does not use streaming. If streaming of data is required, lob buffering should not be used. In this case, flush buffers associated with the input lob locator as necessary, disable buffering on the input lob locator and reissue the OCILobRead/OCILobWrite call.

DIA-24809: amount specified will not fit in the lob buffers

Cause: LOB buffering is enabled for the input lob locator so buffering will be used. However, the amount of lob data to read or write is larger than what the lob buffers can hold.

Action: Either disable buffering on the input lob locator and reissue the command or pass a smaller amount.

DIA-24810: attempting to write more data than indicated

Cause: While writing into a LOB, more data was supplied than indicated.

Action: If data is written in pieces, then make sure that you do not provide more data in the pieces (cumulatively), than you indicated.

DIA-24811: less data provided for writing than indicated

Cause: While writing into a LOB, less data was provided than indicated.

Action: If writing data in single pieces, then make sure that the buffer length specified is big enough to accommodate the data being provided. If data is written in pieces, then make sure that all the data has been provided before specifying OCI_LAST_PIECE.

DIA-24812: character set conversion to or from UCS2 failed

Cause: If the database character set is varying-width, the CLOB/NCLOB value is implicitly converted to or from UCS2. This implicit conversion failed.

Action: Contact Oracle Worldwide Support.

DIA-24813: cannot send or receive an unsupported LOB

Cause: An attempt was made to send a LOB across the network, but either the server does not support the LOB sent by the client, or the client does not support the LOB sent by the server. This error usually occurs when the client and server are running different versions of Oracle.

Action: Use a version of the Oracle that supports the LOB on both the client and the server.

DIA-24814: operation not allowed for temporary LOBs

Cause: Temporary LOB locators are not allowed in the operation. For example: OCILobAssign only takes persistent LOB locators as parameters, not temporary LOBs.

Action: Use OCILobLocatorAssign for temporary LOBs instead. Note that OCILobLocatorAssign can also be used for persistent LOBs, in which case it will behave the same as OCILobAssign.

DIA-24815: Invalid character set form

Cause: An invalid character set form was passed into an OCI LOB function. For example, the only valid cs form for OCILobCreateTemporary() is OCI_DEFAULT(0), SQLCS_IMPLICIT(1) or SQLCS_NCHAR(2).

Action: Specify a valid character set form.

DIA-24816: Expanded non LONG bind data supplied after actual LONG or LOB column

Cause: A Bind value of length potentially > 4000 bytes follows binding for LOB or LONG.

Action: Re-order the binds so that the LONG bind or LOB binds are all at the end of the bind list.

DIA-24817: Unable to allocate the given chunk for current lob operation

Cause: The given size is increased to accommodate the number of bytes from server due to varying width db char/nchar set.

Action: Use smaller chunk sizes when you have character set conversion between client/server or perform piece-wise read or write.

DIA-24818: Operation not permitted on Abstract LOBs

Cause: Abstract LOB locators were not allowed in the operation. For example, OCILobAssign only takes persistent LOB locators as parameters, not Abstract (i.e., client-side created) LOBs.

Action: Avoid the operation on Abstract LOBs.

DIA-24819: Illegal reference count encountered for a temporary LOB

Cause: Internal error.

Action: This error should not normally occur. If it persists, contact Oracle Support Services.

DIA-24820: Different LOB function called while another OCI LOB call is in progress

Cause: An attempt was made to execute a new OCI LOB call while another OCI LOB call was in progress.

Action: Wait for the ongoing LOB streaming call to finish before issuing the next server call, or use OCIBreak() to abort the current LOB streaming call.

DIA-24821: LOB prefetch size supplied is larger than the supported limit.

Cause: A very large LOB prefetch size was specified during a query.

Action: Reduce the prefetch size to an acceptable value.

DIA-24850: failed to startup shared subsystem

Cause: While attempting to initialize OCI in shared mode, a problem was encountered in starting up the shared subsystem.

Action: Contact Oracle Customer support.

DIA-24851: failed to connect to shared subsystem

Cause: While attempting to initialize OCI in shared mode, a problem was encountered in connecting the process to the shared subsystem.

Action: Contact Oracle Customer Support.

DIA-24852: protocol error during statement execution

Cause: An internal protocol error occurred while receiving describe data from the server during execution of a statement.

Action: Contact Oracle Customer Support.

DIA-24853: failed to connect thread to shared subsystem

Cause: While attempting to initialize OCI in shared mode, a problem was encountered in connecting the thread to the shared subsystem.

Action: Contact Oracle Customer Support.

DIA-24854: invalid pieceinfo provided

Cause: While making the first call to write LOB data, an invalid pieceinfo value provided.

Action: Correct the call to use OCI_ONE_PIECE or OCI_FIRST_PIECE. If using OCCI, make sure to call writeBuffer before calling writeLastBuffer.

DIA-24855: attempt to pass a LOB locator over an invalid database link

Cause: There was an attempt to send a LOB locator over a database link which was different from the one on which it was obtained.

Action: Ensure that remote LOB locators are passed back on the same database link from which they were obtained.

DIA-24900: invalid or unsupported mode parameter passed in call

Cause: The mode parameter passed into the OCI Client Notification call is incorrect.

Action: Please correct the mode parameter passed into OCI.

DIA-24901: handles belonging to different environments passed into an OCI call

Cause: All handles passed into an OCI call should belong to the same environment. In the call that returned this error, handles belonging to different environments were passed in.

Action: Please ensure that the handle parameters in the call to come from the same OCI Environment.

DIA-24902: invalid subscription name or name-length in subscription handle

Cause: The subscription handle passed into the OCI call does not have a proper name or name-length attribute.

Action: Please set the name and name-length attributes using the OCIAttrSet() call.

DIA-24903: invalid namespace attribute passed into OCI call

Cause: The subscription handle passed into the OCI call does not have a proper namespace attribute.

Action: Please set the namespace attribute using the OCIAttrSet() call.

DIA-24904: invalid callback attribute passed into OCI call

Cause: The subscription handle passed into the OCI call does not have a proper callback attribute.

Action: Please set the callback attribute using the OCIAttrSet() call.

DIA-24905: invalid recipient protocol attribute passed into OCI call

Cause: The subscription handle passed into the OCI call did not have a proper recipient protocol attribute.

Action: Please set the recipient protocol attribute using the OCIAttrSet() call.

DIA-24906: invalid recipient attribute passed into OCI call

Cause: The subscription handle passed into the OCI call did not have a proper recipient attribute.

Action: Please set the recipient attribute using the OCIAttrSet() call.

DIA-24907: invalid pair of callback and recipient protocol attributes

Cause: The subscription handle passed into the OCI call can't have both the callback defined and a recipient protocol other than OCI_SUBSCR_PROTO_OCI at the same time.

Action: Please set the appropriate callback and recipient protocol attributes using the OCIAttrSet() call.

DIA-24908: invalid recipient presentation attribute

Cause: The subscription handle passed into the OCI call does not have a valid recipient presentation attribute.

Action: Set the recipient presentation attribute using the OCIAttrSet() call

DIA-24909: call in progress. Current operation cancelled

Cause: The OCI call was invoked when another call on the connection was in progress.

Action: Check if the OCI call is supported when the call is in progress under special conditions; for example, if it is being used by a signal handler.

DIA-24911: Cannot start listener thread at specified port

Cause: Thread already running at a different port.

Action: Set the correct port in the environment handle or let the system choose the port.

DIA-24912: Listener thread failed. *string*

Cause: Thread listening for event notification exited because of an error. The error encountered is appended to the error message.

Action: The client needs to be restarted.

DIA-24913: Event to enable NLS validation

Cause: N/A

Action: Set this event in your environment to enable NLS character validation even when character sets are the same for client/server.

DIA-24915: Cannot start Listener at specified IP address

Cause: Thread was already listening at a different IP address.

Action: Set the correct IP address in the environment handle or let the system choose the correct IP address.

DIA-24916: cannot use IP address attribute before release 11.2 compatible notifications

Cause: An attempt was made to use OCI_ATTR_SUBSCR_IPADDR attribute before release 11.2 compatible notifications.

Action: Change the compatibility to 11.2.

DIA-24918: secure notification mode not supported

Cause: An attempt was made to use OCI_SECURE_NOTIFICATION before release 12.0 compatible notifications.

Action: Change the compatibility to 12.0.

DIA-24919: subscription to Fast Application Notification failed

Cause: An error occurred while subscribing to Fast Application Notification. This could be due to problems in the Oracle clusterware configuration.

Action: Look at the client trace files for additional information. Ensure that the Oracle clusterware is properly configured.

DIA-24920: column size too large for client

Cause: Client attempted to fetch a column whose size is larger than the maximum size that can be handled by the client.

Action: Upgrade the client stack to Oracle 12c or higher.

DIA-24922: cannot send or receive an SCN value which is too high for the current compatibility setting

Cause: An attempt was made to send or receive a high value system change number (SCN) over the network, but either the sever or client does not support such a high value SCN. This error usually occurs when either the server or client compatibility is lower than 12.2.

Action: Be sure the database compatibility is 12.2 or above on both the client and server.

DIA-24940: invalid combination of *string* namespace, *string* presentation and *string* receive protocol

Cause: An invalid combination of namespace, presentation and receive protocol was specified during notification registration. Currently, only AQ namespace is supported with XML presentation. Non-AQ namespace is not supported for e-mail and HTTP receive protocols.

Action: Please change the register call appropriately.

DIA-24941: invalid combination of notification grouping attributes

Cause: An invalid combination of notification grouping attributes was specified. Currently, only TIME notification grouping class is supported. If notification grouping class is zero, all other notification grouping attributes must be zero.

Action: Refer to documentation and change the attributes appropriately.

DIA-24942: cannot use ntfm grouping attributes on before release 11.0 compatible ntfms

Cause: An attempt was made to use notification grouping on before release 11.0 compatible notifications.

Action: Change the compatibility to 11.0.

DIA-24943: cannot use ntfm grouping with this receive protocol, presentation and/or QoS

Cause: An attempt was made to use notification grouping with e-mail or HTTP receive protocol or XML presentation or payload delivery or reliable QoS. Currently, only OCI and PLSQL receive protocols and default presentation are supported with notification grouping.

Action: Refer to documentation and change the call appropriately.

DIA-24944: cannot use timeout or grouping with ANONYMOUS namespace

Cause: An attempt was made to use timeout or grouping with ANONYMOUS namespace. Currently, timeout and grouping are supported only with AQ and DBCHANGE namespaces.

Action: Refer to documentation and change the call appropriately.

DIA-24945: cannot use context, QOS and timeout attributes of notification on lower than 10.2 compatible notifications

Cause: An attempt was made to use context, QOS and timeout attributes of notification on lower than 10.2 compatible notifications.

Action: Change the database compatibility to 10.2.

DIA-24946: invalid registration callback

Cause: An attempt was made to use a reserved callback for notification registration.

Action: Choose a different name for the notification callback and change the register call appropriately.

DIA-24947: Invalid namespace attribute specified for the subscription *string*

Cause: An attempt was made to register with invalid namespace attribute.

Action: Refer to documentation and change the namespace appropriately.

DIA-24950: unregister failed, registration not found

Cause: The registration that was asked to be unregistered could not be found.

Action: Please check the callback function name and the subscription name in the unregister call.

DIA-24952: register, unregister or post has incorrect collection count

Cause: The register, unregister or post function was invoked with a collection that was smaller than the size specified by the parameter to the function.

Action: Please check the function's use and ensure that the size parameter is correct.

DIA-24960: the attribute *string* is greater than the maximum allowable length of *number*

Cause: The user attempted to pass an attribute that is too long

Action: Shorten the specified attribute and retry the operation.

DIA-24962: connect string could not be parsed, error = *string*

Cause: The address portion of the connect string could not be parsed. The client may be using a format of the connect string that the server does not understand.

Action: Correct the connect string.

DIA-24964: ALTER SESSION SET CONTAINER error

Cause: An attempt to switch to a PDB with different settings such as character set, time zone or time zone file version on an Oracle 12c Release 1 (12.1) or earlier client failed.

Action: Upgrade client to Oracle 12 Release 2 (or later) to support such operations.

DIA-24981: deferred SGA thread spawn failed

Cause: This is an internal error.

Action: None

DIA-24982: deferred SGA segment allocation failed, index = *string* location = *string*

Cause: System-defined shared memory limits are inadequate for Oracle.

Action: Consult the alert file for details.

DIA-24983: Process (*string*) failed to attach to deferred SGA segments.

Cause: The process failed to attach to deferred SGA segments.

Action: Consult the alert file for details and contact Oracle Support Services.

DIA-24984: SGA allocation slaves termination failed

Cause: This is an internal error.

Action: None

DIA-25000: invalid use of bind variable in trigger WHEN clause

Cause: A bind variable was used in the when clause of a trigger.

Action: Remove the bind variable. To access the table columns use (new/old).column_name.

DIA-25001: cannot create this trigger type on this type of view

Cause: INSTEAD OF triggers can be created on any view which is not an Editing View, while BEFORE and AFTER triggers may only be created on Editing Views.

Action: Change the trigger type to INSTEAD OF or change the view on which you are attempting to create a DML trigger.

DIA-25002: cannot create INSTEAD OF triggers on tables

Cause: Only BEFORE or AFTER triggers can be created on a table.

Action: Change the trigger type to BEFORE or AFTER.

DIA-25003: cannot change NEW values for this column type in trigger

Cause: Attempt to change NEW trigger variables of datatype object, REF, nested table, VARRAY or LOB datatype which is not supported.

Action: Do not change the NEW trigger variables in the trigger body.

DIA-25004: WHEN clause is not allowed in INSTEAD OF triggers

Cause: WHEN clause is specified in an INSTEAD OF trigger.

Action: Remove the WHEN clause when creating an INSTEAD OF trigger.

DIA-25005: cannot CREATE INSTEAD OF trigger on a read-only view

Cause: attempt to create an INSTEAD OF trigger on a view created with read-only option. The view cannot be updated using INSTEAD OF triggers.

Action: Do not create the trigger.

DIA-25006: cannot specify this column in UPDATE OF clause

Cause: Attempt to create a trigger on update of a column whose datatype is disallowed in the clause, such as LOB and nested table.

Action: Remove the UPDATE OF clause.

DIA-25007: functions or methods not allowed in WHEN clause

Cause: PLSQL function call or method invocation is not allowed in the WHEN clause when creating a trigger.

Action: Remove the function call or method invocation from the WHEN clause.

DIA-25008: no implicit conversion to LOB datatype in instead-of trigger

Cause: When inserting or updating a view using instead-of trigger, the new value for a LOB view column is of a different datatype.

Action: Specified a LOB value as the new value for the LOB view column.

DIA-25009: Nested table clause allowed only for INSTEAD OF triggers

Cause: Triggers on nested tables can only be created on view columns using INSTEAD OF triggers.

Action: Use view nested table columns for defining nested table triggers.

DIA-25010: Invalid nested table column name in nested table clause

Cause: The column name specified in the nested table clause of an INSTEAD OF trigger does not correspond to a nested table column.

Action: Specify a nested table column on which the trigger is to be defined.

DIA-25011: cannot create trigger on internal AQ table

Cause: An attempt was made to try to create a trigger on a table that is used internally to support the Advanced Queueing (AQ) feature.

Action: Do not create the trigger.

DIA-25012: PARENT and NEW values cannot be identical

Cause: The referencing clause specifies identical values for PARENT and OLD.

Action: Re-specify either the PARENT or NEW referencing value.

DIA-25013: OLD and PARENT values cannot be identical

Cause: The referencing clause specifies identical values for OLD and PARENT.

Action: Re-specify either the OLD or PARENT referencing value.

DIA-25014: cannot change the value of a PARENT reference variable

Cause: Parent values can only be read and not changed.

Action: Do not attempt to change a Parent variable.

DIA-25015: cannot perform DML on this nested table view column

Cause: DML cannot be performed on a nested table view column except through an INSTEAD OF trigger

Action: Create an INSTEAD OF trigger over the nested table view column and then perform the DML.

DIA-25016: cannot specify column list for insert into nested table view column

Cause: A column list cannot be specified for inserts into the nested table view column.

Action: Specify all the columns for insert into the nested table.

DIA-25017: cannot reference NEW ROWID for movable rows in before triggers

Cause: NEW ROWID was referenced in a before row trigger which is defined on an index-organized table, or a partitioned table with enabled movement of rows. The ROWID cannot be computed in a before row update trigger because it depends on the actual values of the row

Action: Remove references to NEW ROWID from the trigger definition.

DIA-25018: conflicting trigger *string* already exists

Cause: Conflicting instead of DDL trigger on schema/database already exists.

Action: Remove the old trigger

DIA-25019: too much concurrency

Cause: cannot pin the database/schema because of too much concurrency

Action: try the operation later

DIA-25020: renaming system triggers is not allowed

Cause: renaming system triggers is not allowed

Action: Drop the trigger, and create a new one for the same

DIA-25021: cannot reference a trigger defined on another table

Cause: Referenced trigger in the FOLLOWS clause was defined on another table.

Action: Create the referenced trigger on the same table

DIA-25022: cannot reference a trigger of a different type

Cause: Referenced trigger in the FOLLOWS or PRECEDES clause was either a different type or not a compound trigger.

Action: Create the referenced trigger as the same type or a compound trigger.

DIA-25023: Cyclic trigger dependency is not allowed

Cause: A cycle of trigger dependency can be formed.

Action: Do not create a trigger that can formed a cyclic dependency.

DIA-25024: cannot specify FOLLOWS for a REVERSE CROSSEDITION trigger

Cause: The FOLLOWS clause was specified when creating the REVERSE CROSSEDITION trigger.

Action: Do not create a REVERSE CROSSEDITION trigger with a FOLLOWS clause.

DIA-25025: cannot specify PRECEDES clause

Cause: The PRECEDES clause was specified when creating a FORWARD CROSSEDITION trigger or a regular trigger.

Action: Do not create a FORWARD CROSSEDITION or a regular trigger with a PRECEDES clause.

DIA-25026: FOR EACH ROW was specified with compound triggers

Cause: FOR EACH ROW is not allowed with compound triggers.

Action: Remove the FOR EACH ROW clause.

DIA-25027: compound triggers cannot be used as system triggers

Cause: Compound trigger was defined as system trigger.

Action: Do not use compound trigger as system trigger.

DIA-25028: regular trigger body can not start with keyword COMPOUND

Cause: Regular triggers body should start with BEGIN/DECLARE etc .

Action: Fix the syntax and recompile.

DIA-25029: compound triggers should always start with keyword COMPOUND

Cause: Compound trigger body was started with incorrect keyword.

Action: Fix the syntax and recreate.

DIA-25030: crossedition trigger cannot be owned by a non-editioned user

Cause: An attempt was made to create a crossedition trigger in a schema where triggers were not editionable.

Action: Enable editions for the user for triggers and then create the crossedition trigger.

DIA-25031: only a crossedition trigger may be specified

Cause: The trigger specified was not a crossedition trigger.

Action: Specify a crossedition trigger.

DIA-25032: crossedition trigger cannot be created in ORA\$BASE

Cause: An attempt was made to create crossedition trigger in the ORA\$BASE edition.

Action: Do not create a crossedition trigger in the ORA\$BASE edition.

DIA-25033: triggers cannot be executed at this time

Cause: An attempt was made to execute a trigger when the session was almost finished.

Action: Do not attempt to DML with triggers that are expected to execute when session has almost ended.

DIA-25034: cannot bypass trigger owned by another user

Cause: An attempt was made to do DML from a crossedition trigger on an object that has a non-crossedition trigger owned by another user. DML from a crossedition trigger bypasses the running of non-crossedition triggers; this cannot be allowed for triggers owned by other users.

Action: Permit the non-crossedition trigger to be bypassed by attaching it to the editioning view rather than the table, moving one of the triggers to be in the same schema as the other, or explicitly disabling the non-crossedition trigger.

DIA-25035: cannot perform DML on remote object from a crossedition trigger

Cause: An attempt was made to do DML from a crossedition trigger that would modify data in a remote database. DML from a crossedition trigger has special rules applied regarding what triggers will fire as part of that DML; these special rules cannot be applied across database links and therefore the DML cannot be allowed.

Action: Perform the DML in a helper function separate from the crossedition trigger itself; the special rules are not applied when the DML is not issued from within the crossedition trigger itself.

DIA-25100: TABLESPACE option can only be used with ALTER INDEX REBUILD

Cause: The TABLESPACE option to ALTER INDEX was used without the REBUILD option.

Action: Use ALTER INDEX REBUILD TABLESPACE tablespace name.

DIA-25101: duplicate REBUILD option specification

Cause: The REBUILD option to ALTER INDEX is specified more than once.

Action: Specify the option at most once.

DIA-25102: PARALLEL option can only be used with ALTER INDEX REBUILD

Cause: The PARALLEL option to ALTER INDEX was used without the REBUILD option.

Action: Use ALTER INDEX REBUILD.

DIA-25103: NOPARALLEL option can only be used with ALTER INDEX REBUILD

Cause: The NOPARALLEL option to ALTER INDEX was used without the REBUILD option.

Action: Use ALTER INDEX REBUILD.

DIA-25104: UNRECOVERABLE option can only be used with ALTER INDEX REBUILD

Cause: The UNRECOVERABLE option to ALTER INDEX was used without the REBUILD option.

Action: Use ALTER INDEX REBUILD.

DIA-25105: RECOVERABLE option can only be used with ALTER INDEX REBUILD

Cause: The RECOVERABLE option to ALTER INDEX was used without the REBUILD option.

Action: Use ALTER INDEX REBUILD.

DIA-25106: only one of PARALLEL or NOPARALLEL clause may be specified

Cause: PARALLEL was specified more than once, NOPARALLEL was specified more than once, or both PARALLEL and NOPARALLEL were specified in an ALTER INDEX REBUILD statement.

Action: Remove all but one of the PARALLEL or NOPARALLEL clauses.

DIA-25107: duplicate TABLESPACE option specification

Cause: the TABLESPACE was specified more than once in an ALTER INDEX REBUILD statement.

Action: Remove all but one of the TABLESPACE clauses.

DIA-25108: standby lock name space exceeds size limit of *string* characters

Cause: The lock name space for the standby database exceeded the maximum string length.

Action: Change initialization parameter `_STANDBY_LOCK_NAME_SPACE` to a character string of less than the specified characters.

DIA-25109: standby lock name space has illegal character '*string*'

Cause: An invalid lock name space was specified for the standby database. The lock name space for the standby database can only contain A-Z, 0-9, '_', '#', '\$', '.' and '@' characters.

Action: Change initialization parameter `_STANDBY_LOCK_NAME_SPACE` to a valid character string.

DIA-25110: NOSORT may not be used with a bitmap index

Cause: An attempt was made to create a bitmap index using the NOSORT option.

Action: Remove NOSORT from the CREATE BITMAP INDEX statement.

DIA-25111: creation of BITMAP cluster indices is not supported

Cause: An attempt was made to create a cluster index with the BITMAP attribute.

Action: Remove BITMAP from the CREATE INDEX statement.

DIA-25112: maximum number of BITMAP index columns is 30

Cause: Too many columns were specified for the index.

Action: Create an index on fewer columns.

DIA-25113: GLOBAL may not be used with a bitmap index

Cause: An attempt was made to create a bitmap index using the GLOBAL option.

Action: Remove GLOBAL from the CREATE BITMAP INDEX statement, and/or add a LOCAL partition descriptor if the table is partitioned.

DIA-25114: invalid file number specified in the DUMP DATAFILE/TEMPFILE command

Cause: An invalid file number was used in dumping a datafile or tempfile.

Action: Specify a valid file number.

DIA-25115: duplicate BLOCK option specification

Cause: BLOCK (MIN/MAX) was specified more than once in the DUMP DATAFILE/TEMPFILE command.

Action: Specify only one BLOCK option.

DIA-25116: invalid block number specified in the DUMP DATAFILE/TEMPFILE command

Cause: An invalid block number was used in dumping a datafile or tempfile.

Action: Specify a valid block number.

DIA-25117: MIN/MAX/Block Number expected

Cause: A value other than MIN/MAX, or a block number was entered in the DUMP DATAFILE/TEMPFILE command.

Action: Correct the syntax.

DIA-25118: invalid DUMP DATAFILE/TEMPFILE option

Cause: An invalid option was specified for the DUMP DATAFILE/TEMPFILE command.

Action: Correct the syntax.

DIA-25119: LOGGING/NOLOGGING option already specified

Cause: In CREATE TABLESPACE, the LOGGING and/or NOLOGGING options were specified more than once.

Action: Remove all but one of the logging specifications.

DIA-25120: MINIMUM EXTENT option already specified

Cause: In CREATE TABLESPACE, the MINIMUM EXTENT option was specified more than once.

Action: Remove all but one of the MINIMUM EXTENT specifications.

DIA-25121: MINIMUM EXTENT value greater than maximum extent size

Cause: In CREATE/ALTER TABLESPACE, the value specified for the MINIMUM EXTENT option was greater than the maximum extent size.

Action: Choose a lower value for the MINIMUM EXTENT option.

DIA-25122: Only LOCAL bitmap indexes are permitted on partitioned tables

Cause: An attempt was made to create a global bitmap index on a partitioned table.

Action: create a local bitmap index instead.

DIA-25123: Too many components specified in the name.

Cause: Specifying more components to a name than allowed.

Action: Check the name specified for the operation.

DIA-25124: Database link name not allowed.

Cause: Specifying a database link name when it is not permitted.

Action: Check the name specified for the operation.

DIA-25125: BUFFER_POOL/FLASH_CACHE/CELL_FLASH_CACHE storage option not allowed

Cause: An attempt was made to specify the BUFFER_POOL, FLASH_CACHE, or CELL_FLASH_CACHE storage option. This option may only be specified during - CREATE or ALTER TABLE - CREATE or ALTER CLUSTER - CREATE or ALTER INDEX

Action: Remove this option and retry the statement.

DIA-25126: Invalid name specified for BUFFER_POOL/FLASH_CACHE/CELL_FLASH_CACHE

Cause: The name of the cache hints specified by was invalid. The only valid names for BUFFER_POOL are KEEP, RECYCLE and DEFAULT. The only valid names for FLASH_CACHE and CELL_FLASH_CACHE are KEEP, NONE and DEFAULT.

Action: Use a valid name or remove the BUFFER_POOL, FLASH_CACHE, or CELL_FLASH_CACHE clause.

DIA-25127: RELY not allowed in NOT NULL constraint

Cause: An attempt to set RELY on for NOT NULL constraint.

Action: only NORELY may be specified for a NOT NULL constraint.

DIA-25128: No insert/update/delete on table with constraint (*string.string*) disabled and validated

Cause: Try to insert/update/delete on table with DISABLE VALIDATE constraint.

Action: Change the constraint's states.

DIA-25129: cannot modify constraint (*string*) - no such constraint

Cause: the named constraint does not exist for this table.

Action: Obvious

DIA-25130: cannot modify primary key - primary key not defined for table

Cause: Attempted to modify a primary key that is not defined for the table.

Action: None

DIA-25131: cannot modify unique(*string*) - unique key not defined for table

Cause: attempted to modify a unique key that is not defined for the table.

Action: None

DIA-25132: UNIQUE constraint (*string.string*) disabled and validated in ALTER TABLE EXCHANGE PARTITION

Cause: cannot ALTER TABLE EXCHANGE PARTITION when the partition and the table have a disabled and validated unique constraints AND the unique keys in the partition is not mutually exclusive from the rest of the table.

Action: Change the constraint's status.

DIA-25133: duplicate SINGLE TABLE option specified

Cause: The SINGLE TABLE option was specified more than once.

Action: Specify the SINGLE TABLE option only once.

DIA-25134: keyword TABLE expected

Cause: The keyword TABLE is missing from the SINGLE TABLE option.

Action: Place the keyword TABLE after the keyword SINGLE in the command.

DIA-25135: cannot use the SINGLE TABLE option

Cause: The SINGLE TABLE option is only valid for hash clusters.

Action: Do not specify the SINGLE TABLE option.

DIA-25136: this cluster can contain only one table

Cause: An attempt was made to store more than one table in a cluster that was created with the SINGLE TABLE option.

Action: Do not attempt to store more than one table in the cluster.

DIA-25137: Data value out of range

Cause: Value from cast operand is larger than cast target size.

Action: Increase size of cast target.

DIA-25138: *string* initialization parameter has been made obsolete

Cause: An obsolete initialization parameter has been specified

Action: The system will come up, but parameters must be examined

DIA-25139: invalid option for CREATE TEMPORARY TABLESPACE

Cause: An invalid option appears.

Action: Specify one of the valid options: TEMPFILE, EXTENT MANAGEMENT LOCAL, UNIFORM

DIA-25140: *string* space policy cannot be specified for the *string* extent management

Cause: An invalid option appears.

Action: Make sure that for LOCAL extent management UNIFORM or AUTOALLOCATE is specified, and for DICTIONARY extent management UNIFORM or AUTOALLOCATE are not specified

DIA-25141: invalid EXTENT MANAGEMENT clause

Cause: An invalid option appears for EXTENT MANAGEMENT clause

Action: Specify one of the valid options: UNIFORM SIZE, AUTOALLOCATE

DIA-25142: default storage clause specified twice

Cause: default storage clause was specified twice for create tablespace

Action: Specify it once.

DIA-25143: default storage clause is not compatible with allocation policy

Cause: default storage clause was specified for a tablespace with AUTOALLOCATE or UNIFORM policy

Action: Omit the storage clause

DIA-25144: invalid option for CREATE TABLESPACE with TEMPORARY contents

Cause: An invalid option appears.

Action: Specify one of the valid options: EXTENT MANAGEMENT DICTIONARY, USER

DIA-25145: allocation policy already specified

Cause: In CREATE TABLESPACE, the allocation policy was specified more than once, for example, AUTOALLOCATE and UNIFORM.

Action: Remove all but one of the allocation policy specifications.

DIA-25146: EXTENT MANAGEMENT option already specified

Cause: In CREATE TABLESPACE, the EXTENT MANAGEMENT option was specified more than once.

Action: Remove all but one of the EXTENT MANAGEMENT specifications.

DIA-25147: UNIFORM SIZE value greater than maximum extent size

Cause: In CREATE/ALTER TABLESPACE, the value specified for the UNIFORM SIZE option was greater than the maximum extent size.

Action: Choose a lower value for the UNIFORM SIZE option.

DIA-25148: ONLINE option not permitted

Cause: An attempt was made to specify ONLINE for ALTER TABLE MOVE on a table that is not index-organized. The ONLINE option is currently supported only for index-organized tables.

Action: Remove the ONLINE option from the command.

DIA-25149: Columns of UROWID type may not be indexed

Cause: An attempt was made to create an index on a column of UROWID type

Action: Remove the column from the list of indexed columns

DIA-25150: ALTERING of extent parameters not permitted

Cause: An attempt was made to alter the extent parameters for a segment in a tablespace with autoallocate or uniform extent allocation policy.

Action: Remove the appropriate extent parameters from the command.

DIA-25151: Rollback Segment cannot be created in this tablespace

Cause: An attempt was made to create a rollback segment in a tablespace with autoallocate extent allocation policy.

Action: Specify a different tablespace for the rollback segment

DIA-25152: TEMPFILE cannot be dropped at this time

Cause: An attempt was made to drop a TEMPFILE being used by online users

Action: The TEMPFILE has been taken offline. Try again, later.

DIA-25153: Temporary Tablespace is Empty

Cause: An attempt was made to use space in a temporary tablespace with no files.

Action: Add files to the tablespace using ADD TEMPFILE command.

DIA-25154: column part of USING clause cannot have qualifier

Cause: Columns that are used for a named-join (either a NATURAL join or a join with a USING clause) cannot have an explicit qualifier.

Action: Remove the qualifier.

DIA-25155: column used in NATURAL join cannot have qualifier

Cause: Columns that are used for a named-join (either a NATURAL join or a join with a USING clause) cannot have an explicit qualifier.

Action: Remove the qualifier.

DIA-25156: old style outer join (+) cannot be used with ANSI joins

Cause: When a query block uses ANSI style joins, the old notation for specifying outer joins (+) cannot be used.

Action: Use ANSI style for specifying outer joins also.

DIA-25157: Specified block size *string* is not valid

Cause: An attempt was made to create a tablespace with a block size which is not supported.

Action: Specify one of the valid block sizes i.e the standard block size or one of (2k, 4k, 8k, 16k, 32k) subject to the maximum and minimum block sizes supported by the platform.

DIA-25158: Cannot specify RELY for foreign key if the associated primary key is NORELY

Cause: RELY is specified for the foreign key constraint, when the associated primary key constraint is NORELY.

Action: Change the option of the primary key also to RELY.

DIA-25159: Must specify a valid tablespace number

Cause: A valid tablespace number was missing.

Action: Specify a valid tablespace number.

DIA-25160: Must specify a valid relative data block address

Cause: A valid relative data block address was missing.

Action: Specify a valid relative data block address.

DIA-25161: Cannot have both DBA and RDBA options

Cause: Both the DBA and RDBA options were passed to ALTER SYSTEM DUMP REDO.

Action: Use either the DBA option or the RDBA option but not both.

DIA-25162: Must specify both RDBA MIN and RDBA MAX options

Cause: Only one RDBA option was passed to ALTER SYSTEM DUMP REDO.

Action: Specify both RDBA MIN and RDBA MAX.

DIA-25163: Invalid tablespace number or relative data block address

Cause: The relative data block address is invalid for the given tablespace number or the table space number is invalid.

Action: Specify a valid tablespace number or relative data block address.

DIA-25164: The tag expression is too complex.

Cause: The statement tag value was not specified using a simple expression.

Action: Reduce the complexity of the statement tag expression. For example, assign the tag expression to a variable and reference the variable in the error logging clause.

DIA-25165: number of passwords in statement exceeds maximum limit of *string*

Cause: The SQL statement had more passwords than the maximum limit allowed.

Action: Reconstruct the SQL statement to have a number of passwords less than or equal to the maximum allowed.

DIA-25175: no PRIMARY KEY constraint found

Cause: A PRIMARY KEY constraint must be defined for a table with this organization

Action: Define a PRIMARY KEY

DIA-25176: storage specification not permitted for primary key

Cause: Storage parameters cannot be defined for a PRIMARY KEY constraint for a table with this organization

Action: Remove storage specification for primary key

DIA-25177: UNRECOVERABLE option not permitted

Cause: The UNRECOVERABLE option may not be specified for a primary key for a table with this organization

Action: Remove UNRECOVERABLE option for primary key

DIA-25178: duplicate PCTTHRESHOLD storage option specification

Cause: The storage option PCTTHRESHOLD is specified more than once.

Action: Specify storage options at most once.

DIA-25179: invalid PCTTHRESHOLD storage option value

Cause: The specified value must be a positive integer.

Action: Specify an appropriate value.

DIA-25180: PCTTHRESHOLD only valid for certain table organizations

Cause: PCTTHRESHOLD can only be specified for tables with certain organizations.

Action: Remove the PCTTHRESHOLD option.

DIA-25181: missing ON keyword for NESTED INDEX

Cause: ON keyword required to specify nested index column nest

Action: Add ON keyword

DIA-25182: feature not currently available for index-organized tables

Cause: An attempt was made to use one or more of the following feature(s) not currently supported for index-organized tables: CREATE TABLE with LOB/BFILE/VARRAY columns, partitioning/PARALLEL/CREATE TABLE AS SELECT options, ALTER TABLE with ADD/MODIFY column options, CREATE INDEX

Action: Do not use the disallowed feature(s) in this release.

DIA-25183: index-organized table top index segment is in a different tablespace

Cause: An attempt was made to drop a tablespace which contains an index only table's overflow segment but not the top index segment"

Action: find index-organized tables which span the tablespace being dropped and some other tablespace(s). Drop these tables.

DIA-25184: column name expected

Cause: A column name is not present where required by the CREATE TABLE for specifying last column to be included in the index segment of the index-organized table

Action: Specify a column name where required by the syntax.

DIA-25185: index column other than last can not be specified for INCLUDE clause

Cause: An index column name other than the last is specified as including column

Action: Specify either a column name which is not part of index-organized table primary key index , or the last key column of the primary key for the INCLUDING clause.

DIA-25186: INCLUDING clause specified for index-organized table without OVERFLOW

Cause: INCLUDING clause of a CREATE TABLE is an valid option only for index-organized tables with OVERFLOW clause (at creation time) or if an OVERFLOW segment already exists (at ALTER time).

Action: Specify OVERFLOW clause for the index-organized table : For ALTER, perform ADD OVERFLOW first.

DIA-25187: specified exceptions table form incorrect

Cause: The specified table does not have the proper field definitions.

Action: Specify the correct table to use.

DIA-25189: illegal ALTER TABLE option for an index-organized table

Cause: While altering an index-organized table, an attempt was made to enter either the PCTFREE or PCTUSED value for IOT top index segment.

Action: Remove the illegal option(s).

DIA-25190: an index-organized table maintenance operation may not be combined with other operations

Cause: ALTER TABLE statement attempted to combine an index-organized table maintenance operation (e.g. changing physical attributes) with some other operation (e.g. ADD constraint) which is illegal

Action: Ensure that a index-organized table maintenance operation is the sole operation specified in ALTER TABLE statement;

DIA-25191: cannot reference overflow table of an index-organized table

Cause: An attempt to directly access the overflow table of an index-organized table

Action: Issue the statement against the parent index-organized table containing the specified overflow table.

DIA-25192: invalid option for an index-organized table

Cause: An attempt to specify one or more of the following options for an index-organized table: [NO]CACHE, NO LOGGING, CLUSTER

Action: Remove the illegal option(s)

DIA-25193: cannot use COMPRESS option for a single column key

Cause: An attempt to use COMPRESS option on single column key

Action: Remove the COMPRESS option.

DIA-25194: invalid COMPRESS prefix length value

Cause: The specified value must be a positive integer less than the number of key columns

Action: Specify an appropriate value.

DIA-25195: invalid option for index on an index-organized table

Cause: An attempt to specify one or more of the following options for index on an IOT: BITMAP, REVERSE, PCTUSED

Action: n/a

DIA-25196: keyword MOVE in ALTER TABLE MOVE must immediately follow table name

Cause: MOVE specified after one/more other ALTER options

Action: Change order of options, MOVE should be first Remove the illegal option(s)

DIA-25197: an overflow segment already exists for the indexed-organized table

Cause: An attempt was made to ADD OVERFLOW segment on an index-organized table that already has an overflow segment

Action: n/a

DIA-25198: partitioning method is not supported for index-organized table

Cause: An unsupported partitioning method was specified.

Action: Select a different partitioning scheme. Consult the documentation for supported partitioning methods.

DIA-25199: partitioning key of a index-organized table must be a subset of the primary key

Cause: An attempt to specify a partitioning key which is not a prefix of the primary key of the index-organized table

Action: Select a different partitioning key

DIA-25200: invalid value *string*, QUEUE_NAME should be [SCHEMA.]NAME

Cause: A NULL parameter was specified for QUEUE_NAME.

Action: Specify a non-NULL queue name.

DIA-25201: invalid value, VISIBILITY should be ON_COMMIT or IMMEDIATE

Cause: An invalid value specified for parameter VISIBILITY.

Action: Specify either ON_COMMIT or IMMEDIATE.

DIA-25202: invalid value NULL, *string* should be non-NULL

Cause: A NULL value was specified for the parameter.

Action: Specify a non-NULL value.

DIA-25203: invalid value *string*, DELAY should be non-negative

Cause: A negative value or NULL was specified for DELAY.

Action: Specify a non negative integer for DELAY.

DIA-25204: invalid value, SEQUENCE_DEVIATION should be BEFORE or TOP

Cause: An invalid SEQUENCE_DEVIATION was specified.

Action: Specify either the option 'BEFORE' or 'TOP'.

DIA-25205: the QUEUE *string.string* does not exist

Cause: The specified queue does not exist.

Action: Create the queue first before specifying it for enqueue or dequeue.

DIA-25206: enqueue failed, enqueue to exception queue *string.string* not permitted

Cause: An attempt was made to enqueue to an exception queue.

Action: Try enqueueing to another queue.

DIA-25207: enqueue failed, queue *string.string* is disabled from enqueueing

Cause: The queue has been stopped to prevent any further enqueueing.

Action: Enable the queue first by using an administrative operation.

DIA-25208: RELATIVE_MSGID must be specified if SEQUENCE_DEVIATION is BEFORE

Cause: A relative message identifier should be specified if sequence deviation is specified as BEFORE.

Action: Either specify an existing relative message identifier or don't specify sequence deviation as BEFORE.

DIA-25209: invalid value *string*, EXPIRATION should be non-negative or NEVER

Cause: The expiration is less than zero or NULL.

Action: Specify a valid value for `expire_after` which should be greater than or equal to zero or NEVER.

DIA-25210: invalid value for RELATIVE_MSGID, no message in queue with that msgid

Cause: No message in the queue with the `msgid` equal to the specified `RELATIVE_MSGID`.

Action: Try again with a valid `RELATIVE_MSGID`.

DIA-25211: invalid DELAY specified when using sequence deviation

Cause: The `DELAY` specified in the enqueue is greater than the delay of the message with the given relative message id.

Action: Set the `DELAY` to be less than or equal to the delay of the message with the given relative message id. If the `TOP` option is used the delay must be less than or equal to the delay of all the messages in the queue.

DIA-25212: invalid PRIORITY specified when using sequence deviation

Cause: The `PRIORITY` specified in the enqueue is less than the priority of the message with the given relative message id.

Action: Set the `PRIORITY` to be less than the delay of the message with the given relative message id. If the `TOP` option is used the priority must be greater than or equal to the priority of all the messages in the queue.

DIA-25213: message with specified RELATIVE_MSGID has been dequeued

Cause: The message specified by the `RELATIVE_MSGID` field in the sequence deviation `BEFORE` option has been dequeued.

Action: n/a

DIA-25214: cannot specify delay or expiration for enqueue to exception queue

Cause: A message was enqueued to the exception queue with either delay or expiration specified.

Action: Enqueue a message without delay or expiration.

DIA-25215: user_data type and queue type do not match

Cause: A user tries to enqueue an object to a queue that was created for objects of different type.

Action: Try enqueue again with an object of the right type.

DIA-25216: invalid recipient, either NAME or ADDRESS must be specified

Cause: Both attributes, NAME and ADDRESS, were specified null for one of the recipients in the recipient list.

Action: Specify a non-null NAME or ADDRESS for the recipient.

DIA-25217: enqueue failed, visibility must be IMMEDIATE for queue *string.string*

Cause: An attempt was made to enqueue to a non-persistent queue without setting visibility to IMMEDIATE.

Action: Set visibility to IMMEDIATE.

DIA-25218: enqueue failed, delay must be zero for queue *string.string*

Cause: An attempt was made to enqueue to a non-persistent queue with delay greater than zero seconds.

Action: Set delay to zero.

DIA-25219: enqueue failed, sequence deviation not allowed for queue *string.string*

Cause: An attempt was made to enqueue to a non-persistent queue with sequence deviation specified.

Action: Do not specify sequence deviation.

DIA-25220: enqueue failed, signature not specified for a non-repudiable queue

Cause: An attempt was made to enqueue to a non-repudiable queue without specifying the signature

Action: Give the signature

DIA-25221: enqueue failed, signature specified queue not supporting non-repudiation

Cause: An attempt was made to enqueue to a queue specifying the signature for a queue not supporting non-repudiation

Action: Remove the signature

DIA-25222: enqueue failed, complete sender info. not provided for a queue supporting non-repudiation

Cause: An attempt was made to enqueue to a queue without giving the complete sender information (name) for a queue supporting non-repudiation

Action: Provide the sender information

DIA-25223: user_data type used is not supported

Cause: An attempt was made to enqueue data into a non persistent queue that is of a type other than the supported raw or object type.

Action: Enqueue the message again with data of raw or object type.

DIA-25224: sender name must be specified for enqueue into secure queues

Cause: An attempt was made to enqueue into a secure queue without specifying a sender name.

Action: Enqueue the message with sender name specified.

DIA-25225: invalid value *string*, DEQUEUE_MODE should be REMOVE or BROWSE or LOCKED

Cause: An invalid parameter has been specified for DEQUEUE_MODE.

Action: Specify either REMOVE, BROWSE or LOCKED.

DIA-25226: dequeue failed, queue *string.string* is not enabled for dequeue

Cause: The queue has not been enabled for dequeue.

Action: Enable the queue using START_QUEUE.

DIA-25227: Propagation job *string* doesn't exist

Cause: The job doesn't exist in AQ\$_SCHEDULES or cache.

Action: n/a

DIA-25228: timeout or end-of-fetch during message dequeue from *string.string*

Cause: User-specified dequeue wait time has passed or the end of the queue has been reached but no message has been retrieved.

Action: Try dequeue again with the appropriate WAIT_TIME or the FIRST_MESSAGE option.

DIA-25229: error on transformation of message *string string*

Cause: There was an error when transforming a message at enqueue, dequeue or propagation time.

Action: Correct the transformation function.

DIA-25230: invalid value *string*, WAIT should be non-negative

Cause: A negative value has been specified for WAIT.

Action: specify a non negative value or FOREVER.

DIA-25231: cannot dequeue because CONSUMER_NAME not specified

Cause: A user tried to dequeue from a queue that has been created for multiple consumers but a CONSUMER_NAME was not been specified in the dequeue options.

Action: Specify the CONSUMER_NAME in the dequeue options.

DIA-25232: duplicate recipients specified for message

Cause: An enqueue was performed with duplicate queue agents in the recipients parameter.

Action: Remove the duplicate queue agent and retry the call.

DIA-25233: invalid parameter specified for NAVIGATION

Cause: An invalid parameter has been specified for NAVIGATION.

Action: Choose one of FIRST_MESSAGE, NEXT_MESSAGE or NEXT_TRANSACTION. Use FIRST_MESSAGE for dequeuing the first message that satisfies the criterion, NEXT_MESSAGE for dequeuing the next message that satisfies the criterion and NEXT_TRANSACTION for moving to a set of messages enqueued by another transaction.

DIA-25234: NEXT_TRANSACTION navigation option invalid for queue table *string.string*

Cause: The NEXT_TRANSACTION navigation option was used in a dequeue from a queue in a queue table that was not created for transactional grouping.

Action: Specify either FIRST_MESSAGE or NEXT_MESSAGE as the navigation option. If you want to dequeue messages using transactional grouping create the queue in a queue table that has transactional grouping enabled.

DIA-25235: fetched all messages in current transaction from *string.string*

Cause: The NEXT_TRANSACTION navigation option was used in a dequeue when there were no more messages that belong to the same transaction.

Action: Use the NEXT_TRANSACTION navigation option to move to the next also use the FIRST_MESSAGE option to start from the head of the queue again.

DIA-25236: buffer too small for user data

Cause: The variable or buffer used for the out parameter payload is too small for the user data dequeued.

Action: Increase the size of the buffer or the size of the variable. Maximum size allowed is 32K.

DIA-25237: navigation option used out of sequence

Cause: The NEXT_MESSAGE or NEXT_TRANSACTION option was specified after dequeuing all the messages.

Action: Reset the dequeuing position using the FIRST_MESSAGE navigation option and then specify the NEXT_MESSAGE or NEXT_TRANSACTION option.

DIA-25238: too many recipients specified for message destination *string*

Cause: An ENQUEUE was performed with more than 32 recipients for the given destination (address).

Action: Reduce the number of recipients to 32 or less, and retry the call.

DIA-25239: message ID not supplied when dequeuing from exception queue *string.string*

Cause: An attempt was made to dequeue from a release 8.0-compatible exception queue without including a message ID in the dequeue options.

Action: Check the application to ensure that the queue name has been specified correctly. If the queue name is correct supply a message ID when dequeuing from a release 8.0-compatible exception queue. Otherwise, upgrade the queue_table containing the queue to release 8.1-compatible using the DBMS_AQADM.MIGRATE_QUEUE_TABLE procedure.

DIA-25240: message ID and dequeue condition/correlation ID specified in dequeue options

Cause: An attempt was made to dequeue by including both a message ID and a dequeue condition/correlation ID in the dequeue options. In the dequeue options, you are permitted to specify either message ID or dequeue condition/correlation ID, or neither.

Action: To dequeue a message, specify a message ID or a dequeue condition/correlation ID in the dequeue options, but do not specify both. If you want to dequeue in the queue's sort order, then do not specify either the message ID or dequeue condition/correlation ID in the dequeue options.

DIA-25241: cannot change correlation ID from *string* to *string* without FIRST_MESSAGE option

Cause: An attempt was made to change the correlation ID while using the NEXT_MESSAGE or NEXT_TRANSACTION option for dequeuing.

Action: To use a correlation ID that is different from the previous dequeue call, reset the dequeuing position by using the FIRST_MESSAGE navigation option.

DIA-25242: cannot change subscriber name from *string* to *string* without FIRST_MESSAGE option

Cause: An attempt was made to change the subscriber name while using the NEXT_MESSAGE or NEXT_TRANSACTION option for dequeuing.

Action: To use a subscriber name that is different from the previous dequeue call, reset the dequeuing position by using the FIRST_MESSAGE navigation option.

DIA-25243: CONSUMER_NAME cannot be specified when dequeuing from exception queue *string.string*

Cause: An attempt was made to dequeue from an exception queue by specifying the CONSUMER_NAME in the dequeue options. CONSUMER_NAME can only be specified when dequeuing from a normal queue created for multiple consumers.

Action: Specify only the message id in the dequeue options to dequeue a message from an exception queue.

DIA-25244: dequeue index key not found, QUEUE *string*, rowid *string*

Cause: An internal error was encountered. There may be an inconsistency in the queue table index.

Action: Contact your Oracle customer support representative. You may need to provide the trace file and information about reproducing the error.

DIA-25245: agent name cannot be specified if address is a single-consumer queue or an exception queue

Cause: The agent name for the agent in the LISTEN call was specified when the agent address was a single-consumer queue or an exception queue.

Action: Do not specify the agent name.

DIA-25246: listen failed, the address *string* is an 8.0 style exception queue

Cause: An 8.0 style exception queue was specified in the agent-list for the LISTEN call.

Action: Specify a normal 8.0 style queue or an 8.1 style queue in the agent-list.

DIA-25247: *string* is not a recipient of specified message

Cause: The consumer name specified in the dequeue options is not a recipient of the message specified by the message id.

Action: Ensure that the agent specified by the consumer name is a recipient of the message specified by the message id.

DIA-25248: duplicate agent specified in the agent list

Cause: An agent was specified more than once in the agent list of the LISTEN call.

Action: Remove the duplicate agent specification(s), and retry the call.

DIA-25249: dequeue failed, dequeue not allowed for queue *string.string*

Cause: An attempt was made to dequeue from a non-persistent queue.

Action: Dequeue from a different queue.

DIA-25250: Cannot specify a remote recipient for the message

Cause: A recipient for the message enqueued to a non-persistent queue had a non-local address.

Action: Do not specify the address field or specify the queue which is the target of the enqueue

DIA-25251: exceeded maximum number of recipients for message

Cause: An attempt was made to issue an ENQUEUE call that exceeded the the maximum number (1024) of recipients per message.

Action: Reduce the number of recipients to 1024 or less, and retry the call.

DIA-25252: listen failed, the address *string* is a non-persistent queue

Cause: A non-persistent queue was specified as an address for an agent in the LISTEN call.

Action: Specify a normal queue as address for the agent, and retry the the LISTEN call.

DIA-25253: listen failed, queue *string.string* is not enabled for dequeue

Cause: An attempt was made to specify a queue that is not enabled for dequeue in a LISTEN call.

Action: Enable the queue for dequeue using START_QUEUE, and retry the LISTEN call.

DIA-25254: time-out in LISTEN while waiting for a message

Cause: The specified wait time has elapsed and there were no messages for any of the agents in the agent-list.

Action: Try the LISTEN call with an appropriate time-out.

DIA-25255: incorrect subscription string *string*

Cause: An incorrect subscription string was specified with OCIRegister.

Action: Specify a subscription string using the [CONSUMER:]SCHEMA.QUEUE form.

DIA-25256: consumer cannot be specified with a single-consumer queue or an exception queue

Cause: An attempt was made to specify a consumer in the subscription string when registering for notification on a single-consumer queue or an exception queue.

Action: Do not specify the consumer in the subscription string.

DIA-25257: consumer must be specified with a multi-consumer queue

Cause: An attempt was made to register on a multi-consumer queue without specifying a consumer in the subscription string.

Action: Specify a consumer in the subscription string.

DIA-25258: cannot register for notifications on an 8.0 style exception queue

Cause: An attempt was made to specify an 8.0 style exception queue in the subscription string of OCIRegister.

Action: Specify a normal queue or a non-persistent queue.

DIA-25259: cannot specify protocol for agent

Cause: The user specified the protocol attribute for an agent in the agent list.

Action: Do not specify the protocol attribute of the agent object type.

DIA-25260: AQ latch cleanup testing event

Cause: N/A.

Action: event used for AQ statistics latch cleanup testing.

DIA-25261: JOB_QUEUE_PROCESSES must be at least 2 for AQ propagation

Cause: AQ Propagator encountered a setting for JOB_QUEUE_PROCESSES that is insufficient for AQ propagation.

Action: Set the number of JOB_QUEUE_PROCESSES to at least 2 for AQ propagation.

DIA-25262: agent name cannot be NULL if address is a multi-consumer queue

Cause: The name for the agent in the LISTEN call was not specified when the agent address was a multi-consumer queue.

Action: Specify a non-NULL name for the agent.

DIA-25263: no message in queue *string.string* with message ID *string*

Cause: An attempt was made to dequeue a message with a specific message ID, but no such message exists in the queue.

Action: Try dequeue again with a valid message ID.

DIA-25264: cant get signature for this queue

Cause: An attempt was made to dequeue the signature from this queue, which is not receiver non-repudiable.

Action: Try dequeue again without the get signature option

DIA-25265: specified signature for a queue which does not support receiver non-repudiation

Cause: An attempt was made to dequeue the message from a queue which does not support receiver non-repudiation, but the signature was specified for verification

Action: Try dequeue again without the signature

DIA-25266: didnt try to dequeue by message id. with the signature

Cause: The signature was specified for a queue, but the dequeue was not done by message id.

Action: Try dequeue again by message id.

DIA-25267: didnt specify the signature for a receiver non-repudiable queue

Cause: The signature was not specified for a receiver non-repudiable queue

Action: Try dequeue again along with the signature

DIA-25268: didnt dequeue in browse mode with get signature option

Cause: The dequeue was not performed in browse mode with get signature option

Action: Try dequeue again in browse mode

DIA-25269: cant specify signature with get signature option

Cause: The signature is not required for the dequeue with get signature option

Action: Try dequeue again without the signature in dequeue options

DIA-25270: sender info does not match with the actual sender of the message

Cause: The sender info. and the message id. do not match

Action: Provide the right sender info. Try dequeue again without the signature in dequeue options

DIA-25271: queue table not found for the given queue

Cause: The queue table does not exist for the given queue

Action: Provide the right queue name

DIA-25272: Signature does not exist for the given reciever and message id.

Cause: Signature does not exist for the given reciever and message id.

Action: Check the message id. and the reciever's information

DIA-25273: AQ QMN process alternate cleanup event

Cause: N/A.

Action: event used for AQ QMN alternate cleanup mode.

DIA-25274: AQ Buffered Queue event

Cause: N/A.

Action: event used for AQ Buffered Queue mode.

DIA-25276: table specified is not a queue table

Cause: An invalid queue table name is specified.

Action: Check the dictionary views to see if the table is a queue table.

DIA-25277: cannot grant or revoke object privilege on release 8.0 compatible queues

Cause: An attempt was made to grant or revoke object privilege on release 8.0 style queues.

Action: Convert the release 8.0 compatible queue table to release 8.1 compatible using DBMS_AQADM.MIGRATE_QUEUE_TABLE before granting or revoking object privilege.

DIA-25278: grantee name cannot be NULL

Cause: An attempt was made to specify NULL for the grantee parameter.

Action: Specify a valid grantee parameter.

DIA-25279: dequeue as select not supported before 8.2

Cause: Dequeue as select not supported before 8.2.

Action: Dont use select condition while dequeuing

DIA-25280: complete sender information not provided to non-repudiate sender

Cause: complete sender information not provided to non-repudiate sender

Action: Provide the complete sender information

DIA-25281: complete reciever information not provided to non-repudiate reciever

Cause: complete reciever information not provided to non-repudiate reciever

Action: Provide the complete reciever information

DIA-25282: message id. not provided for non-repudiation

Cause: message id. was not provided

Action: Provide the message id.

DIA-25283: either agent's name or address needed for non-repudiation

Cause: neither agent's name nor address provided for non-repudiation"

Action: Provide the agent info.

DIA-25284: Invalid value *string* for *string*

Cause: An Invalid value or NULL was specified for the parameter.

Action: Check the documentation for valid values.

DIA-25285: Invalid value *string* for array_mode

Cause: An Invalid value or NULL was specified for the array_mode.

Action: Check the documentation for valid values.

DIA-25286: Invalid number of elements in the message properties array

Cause: Number of elements in the message properties array do not match the number of elements in the payload array.

Action: Create a message property array with one element (that applies for all the elements in the payload array) or create a message property array with the same number of elements as there are in the payload array.

DIA-25287: Invalid value *string*, *string* should be non-negative

Cause: An Invalid value or NULL was specified for the parameter.

Action: Specify a non negative integer.

DIA-25288: AQ HTTP propagation encountered error, status-code *number*, *string*

Cause: AQ propagation's HTTP request to the propagation servlet at the specified address encountered an error

Action: Specify a valid address in the connect string of the propagation destination dblink, the dblink user has the correct permissions, check if the AQ propagation servlet was properly installed.

DIA-25289: Buffer Already Exists

Cause: Buffer already exists for the specified queue.

Action: None

DIA-25290: Cannot complete operation on queue *string* with existing messages

Cause: Queue already has messages. Cannot complete operation

Action: Truncate the queue before adding/dropping a buffer

DIA-25291: Buffer does not exist for the specified queue

Cause: Buffer does not exist for the specified queue

Action: Operation on the buffer cannot be performed. create the buffer

DIA-25292: Buffer operations are not supported on the queue

Cause: Buffer operations are not supported on the specified queue type

Action: Buffered operations are only supported on to 8.1 style queues, which do not have transaction grouping.

DIA-25293: Lob attributes must be null for buffered operations

Cause: Enqueue of a buffered message with a non-null lob attribute was attempted

Action: Set the lob attributes to null before enqueueing the buffered message

DIA-25294: Cannot propagate user buffered messages to a database with version lower than 10.2

Cause: Propagation of user buffered messages was attempted to a database with version lower than 10.2.

Action: Do not propagate buffered messages to the database.

DIA-25295: Subscriber is not allowed to dequeue buffered messages

Cause: Subscriber is only allowed to dequeue persistent messages

Action: Drop the subscriber and re-create it, or dequeue only persistent messages for the subscriber

DIA-25296: Queue Table *string* has a buffered queue *string*

Cause: Buffered message was enqueued by specifying delay or sequence deviation.

Action: Do not specify delay of sequence deviation when enqueueing buffered messages.

DIA-25298: Only immediate visibility mode supported for buffered message enqueue or dequeue

Cause: A visibility of dbms_aq.ON_COMMIT was supplied with the buffered message enqueue or dequeue

Action: Supply a visibility of dbms_aq.IMMEDIATE

DIA-25299: Invalid message delivery_mode

Cause: Invalid value was specified for delivery mode

Action: Specify dbms_aq.BUFFERED or dbms_aq.PERSISTENT during Enqueue or dbms_aq.BUFFERED, dbms_aq.PERSISTENT or dbms_aq.PERSISTENT_OR_BUFFERED during Dequeue and Listen.

DIA-25300: Cannot drop buffer for queue with buffered subscribers

Cause: Cannot drop buffer for queue with buffered subscribers

Action: Either drop buffered subscribers or forcibly drop the buffer

DIA-25301: Cannot enqueue or dequeue user buffered messages to a database with version lower than 10.2

Cause: Enqueue or dequeue of user buffered messages was attempted to queues in a database with version lower than 10.2.

Action: Do not attempt to enqueue or dequeue user buffered messages.

DIA-25302: Operation not possible for non-buffered queue *string*

Cause: Last enqd/ackd message is only supported for buffered queues

Action: The operation is not supported.

DIA-25303: Buffered operation allowed only on the owner instance

Cause: Operation was not performed on the owner instance.

Action: Perform operation on the owner instance.

DIA-25304: Cannot use priority order queues for capture LCRs

Cause: Capture LCRs can only use commit time or enqueue time ordered queues.

Action: Use the appropriate type of queue for captured LCRs.

DIA-25305: enqueue failed, expiration must be zero for queue *string.string*

Cause: An attempt was made to enqueue to a buffered queue with expiration greater than zero seconds.

Action: Set expiration to zero.

DIA-25306: Cannot connect to buffered queue's owner instance

Cause: cannot connect to the owner instance of the buffered queue

Action: set listener information in REMOTE_LISTENERS or LOCAL_LISTENERS initialization parameter.

DIA-25307: Enqueue rate too high, flow control enabled

Cause: Subscribers could not keep pace with the enqueue rate.

Action: Try enqueue after waiting for some time.

DIA-25310: Subscriber is Notification only; dequeue not supported

Cause: Notification only subscribers are not allowed to dequeue.

Action: Recreate subscriber if necessary.

DIA-25311: *string* not supported for non-persistent queue

Cause: Specified QOS is not supported for non-persistent queues.

Action: Specify the right QOS.

DIA-25312: Cannot specify nonzero sender protocol

Cause: Sender protocol was specified during an enqueue operation.

Action: Specify the enqueue sender protocol as null or zero.

DIA-25313: a queue may not subscribe to itself for propagation

Cause: The specified subscriber had a NULL name and an address equal to the queue name.

Action: Provide a valid subscriber and retry the operation.

DIA-25314: a commit-time queue table cannot be migrated to 8.0

Cause: An attempt was made to migrate a commit-time queue table to an unsupported compatibility level.

Action: Provide an appropriate compatibility level, and retry the operation.

DIA-25315: unsupported configuration for propagation of buffered messages

Cause: An attempt was made to propagate buffered messages with the database link pointing to an instance in the destination database which is not the owner instance of the destination queue.

Action: Use queue to queue propagation for buffered messages.

DIA-25316: Late in the current transaction to begin an Enqueue/Dequeue operation

Cause: Check if the Enqueue/Dequeue operation is performed via triggers on Materialized Views which isn't supported.

Action: Triggers on materialized views aren't supported. Workarounds are on-demand materialized views or execution of trigger code within an autonomous txn.

DIA-25317: Propagation stopped because of instance shutdown

Cause: A propagation job has stopped because the instance is shutting down.

Action: No user action is required.

DIA-25318: Propagation stopped because of instance affinity change

Cause: A propagation job has stopped because its instance affinity has changed.

Action: No user action is required. The job will restart on the appropriate instance.

DIA-25319: Queue table repartitioning aborted

Cause: During instance restart in an Oracle RAC environment, queue table repartitioning aborted due to errors.

Action: Look at the incident generated for this error and report the problem to Oracle Support Services.

DIA-25320: Failed to create, alter, or remove Subscriber

Cause: There is a pending enqueue or dequeue operation on this queue from the same session.

Action: Either COMMIT or ROLLBACK pending enqueue or dequeue operation before attempting to create, alter, or remove the subscriber.

DIA-25321: enqueue failed, user property specified but queue *string.string* is not an 8.1 style queue

Cause: user properties can only be specified when enqueueing into 8.1 style queues.

Action: Specify an 8.1 style queue or pass user property as NULL.

DIA-25322: message priority is out of range

Cause: The message priority range of 0 to 9 was exceeded.

Action: Set the message priority in the range of 0 to 9.

DIA-25326: Array *string* operation failed for message at index *string*

Cause: Array operation fails for the message at specified index. Look at the remainder of the error stack to see what the problem was.

Action: Fix cause of error and retry array operation.

DIA-25327: Array size is invalid

Cause: Array size must be a positive, non-zero integer.

Action: Use corrected array size and retry array operation.

DIA-25328: *string* argument size *string* is smaller than array size

Cause: The size of the argument is smaller than the given array size.

Action: Lower array size or use a larger sized input argument.

DIA-25329: AQ array operations not allowed on 8.0 queues

Cause: An array enqueue/dequeue was attempted on an 8.0 queue.

Action: Use single enqueue/dequeue with this queue.

DIA-25330: PL/SQL associative arrays may not be used with AQ array operations

Cause: A PL/SQL associative array was provided for the payload parameter in an enqueue/dequeue array operation.

Action: Use VARRAY or NESTED TABLE types with AQ array operations.

DIA-25331: cannot downgrade because there are commit-time queue tables

Cause: An attempt was made to downgrade a database that has commit-time queue tables.

Action: Drop all commit-time queue tables before attempting the downgrade.

DIA-25332: Invalid release value *string* for queue table compatible parameter

Cause: The release level given for the queue table compatible parameter is invalid

Action: Specify a valid release value for the queue table compatible parameter

DIA-25333: Buffered Queue to Queue propagation did not connect to the correct instance

Cause: Queue to Queue propagation for buffered messages didn't connect to the correct instance, most likely because service was not started for the destination queue.

Action: No user action is required. Propagation will start the service for the destination queue and retry.

DIA-25334: Buffered propagation must restart as the destination queue was recreated/moved

Cause: Buffered propagation destination queue was recreated or its ownership was moved to another instance during propagation.

Action: No user action is required. Propagation will reinitialize its metadata and retry.

DIA-25335: AQ array operations not allowed for buffered messages

Cause: An array enqueue/dequeue was attempted for buffered messages

Action: Use single enqueue/dequeue for buffered messages or an array size of one.

DIA-25336: Cannot contact instance *string* during Streams AQ operation

Cause: The specified instance was not responding to AQ requests.

Action: Set parameter `aq_tm_processes` to a non-zero value. If the problem persists, contact Oracle Support Services.

DIA-25337: Cannot propagate in queue-to-queue mode to a database with version lower than 10.2

Cause: Remote subscriber with `queue_to_queue` mode set to TRUE was added. The remote subscriber is on a database version lower than 10.2. Propagation was scheduled to a destination database with version lower than 10.2.

Action: Remove the remote subscriber with `queue_to_queue` mode and add the subscriber back with `queue_to_queue` set to FALSE. Unschedule the queue-to-queue propagation and schedule propagation in queue-to-dblink mode.

DIA-25338: operation '*string*' is not allowed for sync_capture '*string*'

Cause: An attempt was made to execute the specified operation for a `sync_capture` process.

Action: Remove the offending call.

DIA-25339: STREAMS '*string*' must be sync_capture

Cause: The specified capture STREAMS did not exist or was not a `sync_capture` process.

Action: Remove the offending call.

DIA-25340: must use commit-time queue for sync_capture

Cause: An attempt was made to create a `sync_capture` without using a commit-time queue.

Action: Rerun statement with a commit-time queue.

DIA-25341: sync_capture does not support "*string*".*string*" because of the following reason:

Cause: `sync_capture` encountered a table with an unsupported property. The most common reason is an unsupported column data type.

Action: Revise the Capture rules to skip over the table in question. One option is to remove the rule that captures changes from the unsupported table. Check DBA_STREAMS_TABLE_RULES to determine the rule on the table specified in the error. Also query the DBA_STREAMS_UNSUPPORTED view to determine which tables are not supported by STREAMS and for what reason. For potential workarounds to certain unsupported properties, see Metalink.

DIA-25342: cannot downgrade because there are apply processes for user buffered messages

Cause: An attempt was made to downgrade a database that has apply process for user-buffered messages.

Action: Drop all the apply processes for user-buffered messages before attempting the downgrade.

DIA-25343: Streams error queue cannot be exported

Cause: An attempt was made to export a database that has apply errors.

Action: Delete or reexecute errors before attempting the export.

DIA-25344: statement has bind variables

Cause: Current API could not handle a statement with bind variables.

Action: Use alternative API which handles bind variables.

DIA-25345: requested AQ minimum Oracle Streams Pool size *string* greater than Oracle Streams Pool size *string*

Cause: The minimum value requested for the Oracle Streams Advanced Queuing (AQ) pool size was greater than the Oracle Streams pool size.

Action: Set the minimum value for the Oracle Streams AQ pool size to less than or equal to the Oracle Streams pool size.

DIA-25346: requested AQ maximum Oracle Streams Pool size *string* less than AQ minimum Oracle Streams Pool size *string*

Cause: The maximum value requested for the Oracle Streams Advanced Queuing (AQ) pool size was less than the minimum value of the Oracle Streams (AQ) pool size.

Action: Set the maximum value for the Oracle Streams AQ pool size to greater than or equal to the minimum value of the Oracle Streams AQ pool size.

DIA-25350: maximum number of concurrent transaction branches exceeded

Cause: the limit on the number of concurrent transaction branches has been reached

Action: Increase the INIT.ORA parameter 'transactions' and restart the system.

DIA-25351: transaction is currently in use

Cause: The transaction is currently used by a different session.

Action: Do not switch to a transaction attached to some other session.

DIA-25352: no current transaction

Cause: The user session is not attached to any transaction.

Action: Do not attempt to detach when there is no current transaction.

DIA-25353: branch marked for deletion

Cause: The branch specified cannot be killed immediately because another session is using the branch, but it has been marked for kill. This means it will be deleted as soon as possible after the current uninterruptable operation is completed.

Action: No action is required for the branch to be deleted.

DIA-25401: can not continue fetches

Cause: A failure occurred since the last fetch on this statement. Failover was unable to bring the statement to its original state to allow continued fetches.

Action: Reexecute the statement and start fetching from the beginning

DIA-25402: transaction must roll back

Cause: A failure occurred while a transaction was active on this connection.

Action: The client must roll back.

DIA-25403: could not reconnect

Cause: The connection to the database has been lost, and attempts to reconnect have failed.

Action: Manually reconnect.

DIA-25405: transaction status unknown

Cause: A failure occurred while a transaction was attempting to commit. Failover could not automatically determine instance status.

Action: The user must determine the transaction's status manually.

DIA-25406: could not generate a connect address

Cause: Failover was unable to generate an address for a backup instance.

Action: Contact Oracle customer support.

DIA-25407: connection terminated

Cause: The connection was lost while doing a fetch.

Action: This is an internally used error message and should not be seen by the user.

DIA-25408: can not safely replay call

Cause: The connection was lost while doing this call. It may not be safe to replay it after failover.

Action: Check to see if the results of the call have taken place, and then replay it if desired.

DIA-25409: failover happened during the network operation, cannot continue

Cause: The connection was lost when fetching a LOB column.

Action: Failover happened when fetching LOB data directly or indirectly. Please replay the top level statement.

DIA-25410: Application requested failover retry

Cause: The application failover callback requested failover retry.

Action: None. Informational only.

DIA-25411: transaction replay was not successful

Cause: Replay was not able to restore the transaction state to match the pre-failover state.

Action: Manually determine if it is safe to resubmit the transaction.

DIA-25412: transaction replay disabled by call to *string*

Cause: The application called an Oracle Call Interface (OCI) function that is not supported with transactional failover.

Action: Manually recover the pending transaction.

DIA-25413: transaction replay disabled by user request

Cause: The application explicitly disabled transaction replay by setting attribute OCI_ATTR_TRANSACTIONAL_TAF=FALSE.

Action: This message is informational only.

DIA-25414: Uncommitted transaction detected after TAF callback.

Cause: The Transparent Application Failover (TAF) callback started a transaction and did not commit or rollback prior to exiting.

Action: End the transaction with a COMMIT or a ROLLBACK prior to exiting the TAF callback.

DIA-25415: OCI Transaction TAF replay initiation timeout exceeded.

Cause: Oracle Call Interface (OCI) Transaction TAF replay was attempted after REPLAY_INITIATION_TIMEOUT expired. The value for REPLAY_INITIATION_TIMEOUT is configured for the service to which the application is connected.

Action: Manually recover the pending transaction.

DIA-25416: Retry current call

Cause: Failover successfully recovered an in-flight transaction

Action: Re-execute the current call

DIA-25417: replay disabled; call (*string*) too large to record

Cause: Oracle Call Interface (OCI) Application Continuity replay was attempted after a large call that could not be recorded due to excessive memory requirements.

Action: Break up the call into smaller pieces and retry failover, or manually retry the user operation.

DIA-25418: transaction replay disabled by the use of object type in function *string*

Cause: The application used an Oracle Call Interface (OCI) object type that is not supported with transactional failover.

Action: Manually recover the pending transaction.

DIA-25419: transaction replay disabled in function *string* by the use of unsupported type *string*

Cause: The application used an Oracle Call Interface (OCI) type that is not supported with transactional failover.

Action: Manually recover the pending transaction.

DIA-25425: connection lost during rollback

Cause: The connection was lost while issuing a rollback and the application failed over.

Action: The connection was lost and failover happened during rollback. If the transaction is not externally coordinated, then Oracle implicitly rolled back, so no

action is required. Otherwise examine pending_trans\$ to determine if "rollback force" is required.

DIA-25426: remote instance does not support shared dblinks

Cause: A shared dblink is being used to connect to a remote instance that does not support this feature because it is an older version.

Action: Use a normal dblink if you need to connect to this instance.

DIA-25427: cannot downgrade database links after database link data dictionary has been upgraded

Cause: An attempt was made to downgrade after the upgrade of the database link data dictionary.

Action: Drop the database links before attempting the downgrade.

DIA-25428: authentication failure while connecting through database link

Cause: An attempt to connect using the database link failed.

Action: Ensure connection details for the database link are correct.

DIA-25429: Break request cannot be propagated over shared database link.

Cause: No call in progress over shared database link.

Action: No action required. This is an informational message only.

DIA-25430: connected user database links are not supported in proxy session

Cause: A connected user database link is being used to connect to a remote database from a proxy user session.

Action: No action required. This was an informational message only.

DIA-25431: Connection with protocol *string* is disallowed by the outbound_dblink_protocols parameter.

Cause: An attempt to connect using the database link failed because the network protocol used for the database link is disallowed.

Action: Either set the value of the outbound_dblink_protocols initialization parameter appropriately to include the required protocol or change the protocol used by the database link to conform to the protocols allowed by the outbound_dblink_protocols parameter.

DIA-25433: User *string* does not have INHERIT REMOTE PRIVILEGES privilege on connected user *string*.

Cause: An attempt was made to use a connected user database link inside a definer's rights function, procedure or view, and the owner of the function, procedure or view lacked INHERIT REMOTE PRIVILEGES privilege on the connected user.

Action: Either do not start the function, procedure or view, or grant the owner of the function, procedure or view INHERIT REMOTE PRIVILEGES privilege on the connected user.

DIA-25434: Connected user database link usage by the common user *string* is not allowed.

Cause: The COMMON_SCHEMA_ACCESS lockdown profile feature was disabled.

Action: Either do not use the database link as a common user or have the administrator enable COMMON_SCHEMA_ACCESS lockdown profile feature.

DIA-25436: invalid table alias: *string*

Cause: An attempt to evaluate was made, which failed because one of the table values specified had an invalid alias.

Action: Check the valid table aliases in the evaluation context, and try again with a valid alias.

DIA-25437: duplicate table value for table alias: *string*

Cause: An attempt to evaluate was made, which failed because some of the table values specified had the same table alias.

Action: Check the table values specified, and try again with only one value per table.

DIA-25438: invalid variable name: *string*

Cause: An attempt to evaluate was made, which failed because one of the variable values specified had an invalid name.

Action: Check the valid variable names in the evaluation context, and try again with a valid name.

DIA-25439: duplicate variable value for variable: *string*

Cause: An attempt to evaluate was made, which failed because some of the variable values specified had the same variable name.

Action: Check the variable names specified, and try again with only one value per variable.

DIA-25440: invalid table alias: *string*

Cause: An attempt to evaluate was made, which failed because one of the column values specified had an invalid table alias.

Action: Check the valid table aliases in the evaluation context, and try again with a valid name.

DIA-25441: duplicate column value for table alias: *string*

Cause: An attempt to evaluate was made, which failed because one of the column values supplied a value for a table alias, which already had a table value supplied.

Action: Check the table and column values specified, and try again with either a table value or column values for each table alias.

DIA-25442: too many column values for table alias: *string*

Cause: An attempt to evaluate was made, which failed because too many column values were supplied for the specified table alias.

Action: Check the column values specified, and try again with the right number of column values.

DIA-25443: duplicate column value for table alias: *string*, column number: *string*

Cause: An attempt to evaluate was made, which failed because duplicate column values were supplied for the specified table alias and column number.

Action: Check the column values specified, and try again with only one column value for each table alias, and column number.

DIA-25444: invalid ROWID: *string* for table alias: *string*

Cause: An attempt to evaluate was made, which failed because an invalid ROWID was supplied for the specified table alias.

Action: Check the column values specified, and try again with only one column value for each table alias, and column number.

DIA-25445: invalid column number: *string* for table alias: *string*

Cause: An attempt to evaluate was made, which failed because an invalid column number was supplied for the specified table alias as a part of a column value.

Action: Check the column values specified, and try again with a valid column number.

DIA-25446: duplicate column value for table alias: *string*, column: *string*

Cause: An attempt to evaluate was made, which failed because duplicate column values were supplied for the specified table alias and column name.

Action: Check the column values specified, and try again with only one column value for each table alias, and column name.

DIA-25447: encountered errors during evaluation of rule *string.string*

Cause: An attempt to evaluate was made, which failed during the evaluation of the specified rule.

Action: Check the rule and the values passed to evaluate, and try again with valid values.

DIA-25448: The *string string.string* has errors.

Cause: An attempt to load the specified rule or expression failed due to errors in the rule or expression.

Action: Check the rule or expression and retry the operation.

DIA-25449: invalid variable name: *string*

Cause: An attempt to evaluate was made, which failed because one of the attribute values specified had an invalid variable name.

Action: Check the valid variable names in the evaluation context, and try again with a valid name.

DIA-25450: error *string* during evaluation of rule set *string.string*

Cause: The specified error occurred during evaluation of the rule set.

Action: Check the error and take appropriate action.

DIA-25451: too many attribute values for variable: *string*

Cause: An attempt to evaluate was made, which failed because too many attribute values were supplied for the specified variable.

Action: Check the attribute values specified, and try again with the right number of attribute values.

DIA-25452: duplicate attribute value for variable: *string*, attribute: *string*

Cause: An attempt to evaluate was made, which failed because duplicate attribute values were supplied for the specified variable and attribute name.

Action: Check the attribute values specified, and try again with only one attribute value for each variable, and attribute name.

DIA-25453: invalid iterator: *string*

Cause: An attempt to get rule hits or to close an iterator was made, which failed because an invalid iterator was passed in.

Action: Check the iterator, and try again with a valid iterator.

DIA-25454: error during evaluation of rule set: *string.string* for iterator: *string*

Cause: An attempt to get rule hits for an iterator was made, which failed because of an error in evaluation of the specified rule set.

Action: Check the validity of the rule set and try again.

DIA-25455: evaluation error for rule set: *string.string*, evaluation context: *string.string*

Cause: An attempt to evaluate the specified rule set using the evaluation context specified failed due to some errors.

Action: Check additional errors signalled to determine the problem.

DIA-25456: rule set was modified or evaluation terminated for iterator: *string*

Cause: An attempt to get rule hits was made, which failed because the underlying rule set was modified after the iterator was returned.

Action: Try again after re-evaluating the rule set.

DIA-25457: evaluation function *string* returns failure

Cause: The specified evaluation function returned a failure during evaluation, causing evaluation to terminate.

Action: Check arguments to evaluate and retry.

DIA-25458: Value not supplied for *string string*

Cause: Variable or table column values were not supplied for evaluation.

Action: Supply all the required variable and column data points for Independent Expression Evaluation.

DIA-25459: Data conversion for *string string* failed

Cause: The attempt to convert data to the data type of the variable or column failed.

Action: Supply the correct data for variable or column.

DIA-25461: rule set not specified

Cause: An attempt to evaluate was made, which failed because the ruleset name specified was null.

Action: Check the rule set name, and try again with a valid name.

DIA-25462: evaluation context not specified

Cause: An attempt to evaluate was made, which failed because the evaluation context specified was null.

Action: Check the evaluation context name, and try again with a valid name.

DIA-25463: table alias not specified

Cause: An attempt to evaluate was made, which failed because one of the table values specified had a NULL alias name.

Action: Check the list of table values, and try again with a valid alias name.

DIA-25464: ROWID not specified for table alias: *string*

Cause: An attempt to evaluate was made, which failed because the table value for the specified table alias had a NULL ROWID.

Action: Check the list of table values, and try again with a valid ROWID.

DIA-25465: variable name not specified

Cause: An attempt to evaluate was made, which failed because one of the variable values specified had a NULL variable name.

Action: Check the list of variable values, and try again with a valid variable name.

DIA-25466: data not specified for variable name: *string*

Cause: An attempt to evaluate was made, which failed because the variable value for the specified variable name had NULL data.

Action: Check the list of variable values, and try again with valid data.

DIA-25467: table alias not specified

Cause: An attempt to evaluate was made, which failed because one of the column values specified had a NULL alias name.

Action: Check the list of column values, and try again with a valid alias name.

DIA-25468: column name not specified for alias: *string*

Cause: An attempt to evaluate was made, which failed because one of the column values for the specified alias name had a NULL column name.

Action: Check the list of column values, and try again with a valid column name.

DIA-25469: data not specified for alias: *string* column name: *string*

Cause: An attempt to evaluate was made, which failed because the column value for the specified alias and column name had NULL data.

Action: Check the list of column values, and try again with valid data.

DIA-25470: duplicate attribute value for variable: *string*

Cause: An attempt to evaluate was made, which failed because one of the attribute values supplied a value for a variable, which already had a variable value supplied.

Action: Check the variable and attribute values specified, and try again with either a variable value or attribute values for each variable.

DIA-25471: attribute name not specified for variable: *string*

Cause: An attempt to evaluate was made, which failed because one of the attribute values for the specified variable had a NULL attribute name.

Action: Check the list of attribute values, and try again with a valid attribute name.

DIA-25472: maximum open iterators exceeded

Cause: The open rule hit iterators in the session exceeded $2 * OPEN_CURSORS$.

Action: Close some rule hit iterators.

DIA-25473: cannot store *string* in rule action context

Cause: The user attempted to put unsupported data types, such as LOBs and evolved ADTs, into the rule action context.

Action: Use only supported data types in rule action context.

DIA-25476: use pre-5523578 behaviour when looking up enabled roles

Cause: N/A

Action: Derive the enabled roles under the rules engine using the old method that existed before the fix to bug 5523578.

DIA-25500: database is not open

Cause: Database must be open to perform ALTER SYSTEM QUIESCE RESTRICTED command.

Action: Open the database and retry this command.

DIA-25501: ALTER SYSTEM QUIESCE RESTRICTED command failed

Cause: Database resource manager failed to change plan.

Action: Look at the alert logs to see detailed description of the error.

DIA-25502: concurrent ALTER SYSTEM QUIESCE/UNQUIESCE command is running

Cause: There is a concurrent ALTER SYSTEM QUIESCE RESTRICTED or ALTER SYSTEM UNQUIESCE command running in the system.

Action: Contact the database administrator who is responsible for the concurrent command.

DIA-25503: cannot open database because the database is being quiesced

Cause: Database cannot be opened because the system is being or has been quiesced.

Action: Open the database after the system has been quiesced.

DIA-25504: the system is already in quiesced state

Cause: Cannot quiesce the system because the system is already quiesced.

Action: n/a

DIA-25505: the system is not in quiesced state

Cause: Cannot unquiesce the system because the system is not in quiesced state.

Action: n/a

DIA-25506: resource manager has not been continuously on in some instances

Cause: Cannot quiesce the system because resource manager has not been continuously on since startup in this or some other instances.

Action: n/a

DIA-25507: resource manager has not been continuously on

Cause: Cannot quiesce the system because resource manager has not been continuously on since startup.

Action: n/a

DIA-25508: database is not mounted

Cause: Database must be mounted to perform ALTER SYSTEM UNQUIESCE command.

Action: Mount the database and retry this command.

DIA-25509: operation on "string"."string".string not allowed

Cause: A column has been added to a replicated table, but replication support processing has not completed.

Action: Wait until replication support processing has completed before updating the column

DIA-25510: quiesce not supported for the root container

Cause: Could not quiesce the root container.

Action: This operation is not supported for the root container.

DIA-25511: quiesce not supported for pluggable databases

Cause: Could not quiesce the pluggable database.

Action: This operation is not supported for pluggable databases.

DIA-25526: bad format of `_DB_MTTR_SIM_TARGET`: *string*

Cause: One value in `_DB_MTTR_SIM_TARGET` is not a valid MTTR.

Action: Alter the value of `_DB_MTTR_SIM_TARGET`.

DIA-25527: bad format of `_DB_MTTR_SIM_TARGET`

Cause: One value in `_DB_MTTR_SIM_TARGET` is empty.

Action: Set the value of `_DB_MTTR_SIM_TARGET` properly.

DIA-25528: too many candidate MTTRs are specified in `_DB_MTTR_SIM_TARGET`

Cause: Too many candidate MTTRs are specified in `_DB_MTTR_SIM_TARGET`.

Action: Alter the value of `_DB_MTTR_SIM_TARGET`.

DIA-25530: `FAST_START_MTTR_TARGET` is not specified

Cause: An attempt to start MTTR advisory was made, which failed because `FAST_START_MTTR_TARGET` was not specified.

Action: Set `FAST_START_MTTR_TARGET`.

DIA-25531: MTTR specified is too small: *string*

Cause: The current `FAST_START_MTTR_TARGET` setting or a candidate MTTR setting is too small for MTTR advisory.

Action: Set a larger `FAST_START_MTTR_TARGET` or candidate MTTR.

DIA-25532: MTTR specified is too large: *string*

Cause: The current `FAST_START_MTTR_TARGET` setting or a candidate MTTR setting is too large for MTTR advisory.

Action: Set a smaller `FAST_START_MTTR_TARGET` or candidate MTTR.

DIA-25533: `FAST_START_IO_TARGET` or `LOG_CHECKPOINT_INTERVAL` is specified

Cause: An attempt to start MTTR advisory was made, which failed because either `FAST_START_IO_TARGET` or `LOG_CHECKPOINT_INTERVAL` was specified.

Action: Set `FAST_START_IO_TARGET` and `LOG_CHECKPOINT_INTERVAL` to 0.

DIA-25950: missing where clause in join index specification\n

Cause: An attempt to create a join index was made, which failed because no valid where clause was found.

Action: Ensure that a where clause with valid join conditions is specified in the create index statement.

DIA-25951: join index where clause cannot contain OR condition\n

Cause: An attempt to create a join index was made, which failed because there was an OR branch in the where clause.

Action: Reformulate the where clause without using ORs.

DIA-25952: join index must only contain inner equi-joins

Cause: An attempt to create a join index was made, which failed because it included a predicate which wasn't an equi-inner join.

Action: Remove the inappropriate predicate.

DIA-25953: join index cannot be a functional index

Cause: An attempt to create a join index was made, which failed because a functional index was requested or necessary (such as is the case for indexing columns using timezone).

Action: Remove any functional indexing columns.

DIA-25954: missing primary key or unique constraint on dimension

Cause: An attempt to create a join index was made, which failed because one or more dimensions did not have an appropriate constraint matching the join conditions.

Action: Ensure that the where clause is correct (contains all of the constraint columns) and that an enforced constraint is on each dimension table.

DIA-25955: all tables must be joined in the where clause

Cause: An attempt to create a join index was made, which failed because one of the tables in the from clause did not appear in the where clause.

Action: Ensure that the where clause contains all from clause tables.

DIA-25956: join index cannot be created on tables owned by SYS

Cause: An attempt to create a join index was made, which failed because one of the tables was owned by SYS.

Action: Ensure that no join index related table is owned by SYS.

DIA-25957: join index where clause cannot contain cycles

Cause: An attempt to create a join index was made, which failed because the where clause contains a cycle.

Action: Ensure that the where clause is in the form of a star or snowflake schema.

DIA-25958: join index where clause predicate may only contain column references

Cause: An attempt to create a join index was made, which failed because a predicate in the where clause contained something other than a simple column.

Action: Ensure that the where clause only contains columns.

DIA-25959: join index must be of the bitmap type

Cause: An attempt to create a join index was made, which failed because no bitmap keyword was used.

Action: Make the index a bitmap index.

DIA-25960: join index cannot be based on a temporary table

Cause: An attempt to create a join index was made, which failed because one of the tables was temporary.

Action: Ensure no underlying tables are temporary.

DIA-25961: join index prevents dml cascade constraint operation

Cause: An attempt to execute dml resulted in the need to perform dml on another table because of a cascade constraint. The join index only allows one of its underlying tables to be modified at a time.

Action: Drop the join index or remove the constraint.

DIA-25962: join index prevents multitable insert or merge

Cause: An attempt to execute an merge or multitable insert on a table that was used to create a bitmap join index was made. Merge and multitable inserts are not supported on tables that were used to create a bitmap join index.

Action: Drop the join index.

DIA-25963: join index must be created on tables

Cause: An attempt to create a join index was made, which failed because the from clause contains non table object.

Action: Ensure that the from clause only contains tables.

DIA-25964: column type incompatible with join column type

Cause: The datatype of the join column is incompatible with the datatype of the joined column.

Action: Select a compatible datatype for the join column.

DIA-25965: fact table must be included in the from clause

Cause: An attempt to create a join index was made, which failed because the from clause does not contain the fact table.

Action: Ensure that the from clause contains the fact table.

DIA-25966: join index cannot be based on an index organized table

Cause: An attempt to create a join index was made, which failed because one of the tables was an index organized table.

Action: Ensure no underlying tables are index organized.

DIA-26000: partition load specified but table *string* is not partitioned

Cause: The Loader control file contains a PARTITION clause but the table being loaded is not partitioned.

Action: Remove the partition specification from the SQL*Loader control file and retry the load.

DIA-26001: Index *string* specified in SORTED INDEXES does not exist on table *string*

Cause: A nonexistent index was specified in the SORTED INDEXES clause.

Action: Do not specify as a SORTED INDEX.

DIA-26002: Table *string* has index defined upon it.

Cause: Parallel load was specified into a table which has index defined upon it.

Action: Drop index(es) defined upon table, or don't use parallel load, or use SKIP_INDEX_MAINTENANCE option.

DIA-26003: parallel load not supported for index-organized table *string*.

Cause: Parallel load is not supported for index-organized tables.

Action: load the index-organized table without the PARALLEL option.

DIA-26004: Tables loaded through the direct path may not be clustered\n

Cause: User attempted to load a clustered table via the direct path.

Action: Use the conventional path.

DIA-26005: Invalid handle for direct path load\n

Cause: In direct path load, the handle passed in does not match the type listed.

Action: Verify the handle and type are correct.

DIA-26006: Incorrect bind variable in column *string*'s sql expression - *string*\n

Cause: In direct path load, the bind variables listed in the sql expression do not match the input argument column names.

Action: Verify all the input arguments are listed in the expression as bind variables, and all the bind variables are listed as input arguments to the expression. Or verify that there were no errors in executing the OCI statements when getting the bind variable list.

DIA-26007: invalid value for SETID or OID column\n

Cause: The value passed in a Direct Path API stream for a column containing a SETID or OID has an invalid value. SETIDs and Object IDs must be either 16 bytes of RAW data or 32 bytes of hexadecimal characters.

Action: Regenerate the Direct Path API stream with a valid value for the SETID column.

DIA-26008: Invalid syntax or bind variable in SQL string for column *string*.\n*nstring*\n

Cause: See following error message for more information. A SQL string cannot have quoted strings improperly terminated. A bind variable in a SQL string cannot have a length of 0, cannot exceed maximum length of 30 characters, and cannot be missing a double quote.

Action: Fix the SQL string. See following error for more information.

DIA-26009: stream verification error: *string*\n

Cause: An error has occurred in a Data Pump stream verification operation.

Action: Contact Oracle Support Services.

DIA-26010: Column *string* in table *string* is NOT NULL and is not being loaded\n

Cause: A column which is NOT NULL in the database is not being loaded and will cause every row to be rejected.

Action: Load the column by specifying the NOT NULL column in the INTO TABLE clause in the SQL*Loader control file.

DIA-26011: Cannot load type *string* into column *string* in table *string*\n

Cause: A column can only store data of type declared for that column. And a substitutable column can only store data of valid subtypes of the supertype declared for that column.

Action: Check that the type or subtype specified is valid for that column.

DIA-26012: header in file *string* has an incompatible version number\n

Cause: A dump file was specified for a load operation whose version number is incompatible with the dump file version currently produced by the Oracle server on

the system. Usually this message indicates that the dump file was produced by a newer version of the Oracle server.

Action: Load this dump file using the same version of the Oracle server that created the file.

DIA-26013: List allocated may not be big enough\n

Cause: There seems to be a discrepancy between the size for a list or buffer allocated by direct path api and the size needed.

Action: Contact Oracle Customer Support.

DIA-26014: unexpected error on string string while retrieving string\nstring

Cause: The SQL error was returned from an OCIStmtExecute call.

Action: Correct the SQL error that was returned.

DIA-26015: Array column string in table string is not supported by direct path\n

Cause: User attempted to load an array column via the direct path.

Action: Use the conventional path.

DIA-26016: Virtual column string in table string.string cannot be loaded by direct path\n

Cause: You attempted to load an virtual column using the direct path.

Action: Virtual columns cannot be loaded using the direct path.

DIA-26017: global indexes not allowed for direct path load of table partition string

Cause: Global indexes are defined on a table when direct path loading a single partition of the table.

Action: n/a

DIA-26018: Column string in table string does not exist\n

Cause: Column specified in the loader control file does not exist.

Action: Make sure the column exists and that you have privileges on it. Correct the loader control file if it is wrong.

DIA-26019: Column string in table string of type string not supported by direct path\n

Cause: The Specified column of SQL column type %s is not supported by the direct path loader.

Action: If the column is NULLable, remove it from the control file description. Then it will be loaded as a NULL.

DIA-26020: index string.string loaded successfully with string keys

Cause: Non-partitioned index information put to loader log file.

Action: None. Informational only.

DIA-26021: index string.string partition string loaded successfully with string keys

Cause: Partitioned index information put to loader log file.

Action: None. Informational only.

DIA-26022: index string.string was made unusable due to:

Cause: A Non-partitioned index was made index unusable due to the error displayed below this error.

Action: Depending on the error, either rebuild the index, or drop and re-create it.

DIA-26023: index *string.string* partition *string* was made unusable due to:

Cause: A partition of a partitioned index was made index unusable due to error displayed below this error.

Action: Depending on the error, either rebuild the index partition, or drop and re-create the entire index.

DIA-26024: SKIP_UNUSABLE_INDEXES requested and index segment was initially unusable

Cause: User requested SKIP_UNUSABLE_INDEXES option, and the index segment * was in unusable state prior to the beginning of the load.

Action: Informational only. User will need to either rebuild the index * or index partition, or re-create the index.

DIA-26025: SKIP_INDEX_MAINTENANCE option requested

Cause: User requested that index maintenance be skipped on a direct path load.

Action: The listed index was put into Index Unusable state due to the user requesting that index maintenance be skipped. Either rebuild the index or index partitions, or drop and re-create the index.

DIA-26026: unique index *string.string* initially in unusable state

Cause: A unique index is in IU state (a unique index cannot have * index maintenance skipped via SKIP_UNUSABLE_INDEXES).

Action: Either rebuild the index or index partition, or use * SKIP_INDEX_MAINTENANCE if the client is SQL*Loader.

DIA-26027: unique index *string.string* partition *string* initially in unusable state

Cause: A partition of a unique index is in IU state (a unique index * cannot have index maintenance skipped via SKIP_UNUSABLE_INDEXES).

Action: Either rebuild the index or index partition, or use * SKIP_INDEX_MAINTENANCE if the client is SQL*Loader.

DIA-26028: index *string.string* initially in unusable state

Cause: An index is in IU state prior to the beginning of a direct * path load, it cannot be maintained by the loader.

Action: Either rebuild the index, re-create the index, or use either * SKIP_UNUSABLE_INDEXES or SKIP_INDEX_MAINTENANCE (Sql*Loader only).

DIA-26029: index *string.string* partition *string* initially in unusable state

Cause: A partition of an index is in IU state prior to the beginning * of a direct path load, it cannot be maintained by the loader.

Action: Either rebuild index partition, re-create the index, or use either * SKIP_UNUSABLE_INDEXES or SKIP_INDEX_MAINTENANCE (Sql*Loader only).

DIA-26030: index *string.string* had *string* partitions made unusable due to:

Cause: A logical index error occurred on a partitioned index which * affected one or more index partitions, which are listed below * this message.

Action: The affected index partitions will have to be re-built, or, the * entire index dropped and re-created.

DIA-26031: index maintenance error, the load cannot continue

Cause: A index error occurred during the index maintenance phase of * a direct path load. The load cannot continue. See error message * below this message.

Action: See action for the error message which follows this one.

DIA-26032: index *string.string* loading aborted after *string* keys

Cause: An index error occurred during direct-load of an index-organized table. * Loading had to be aborted. No rows were loaded.

Action: Check the key just following the number of keys mentioned above. * This key caused the index problem mentioned in an earlier message. *

DIA-26033: column *string.string* encryption properties differ for source or target table

Cause: The source and destination columns did not have the same * encryption properties.

Action: For security reasons, check that the source and target table have * the same encryption properties. *

DIA-26034: Column *string* does not exist in stream\n

Cause: Column specified in the column list does not exist in the stream.

Action: Make sure the column exists or remove it from the list.

DIA-26035: Error attempting to encrypt or decrypt column

Cause: An error occurred while attempting to encrypt or decrypt * a database column.

Action: Verify correct encryption key was specified. *

DIA-26036: subpartition load specified but table *string* is not subpartitioned\n

Cause: The Loader control file contains a PARTITION clause but the table being loaded is not subpartitioned.

Action: Remove the subpartition specification from the SQL*Loader control file and retry the load.

DIA-26037: must specify partition name(s) for system partitioned table *string*\n

Cause: An attempt was made to load a system partitioned table with no partition name(s) specified.

Action: Specify the partition name(s) explicitly.

DIA-26038: attempt to write audit record for SQL*Loader direct path load of *string.string* failed with error code: *number*\n

Cause: An attempt to write an audit record during a SQL*Loader direct path load failed.

Action: Contact Oracle Support Services.

DIA-26040: Data block was loaded using the NOLOGGING option\n

Cause: Trying to access data in block that was loaded without * redo generation using the NOLOGGING/UNRECOVERABLE option

Action: Drop the object containing the block.

DIA-26041: DATETIME/INTERVAL datatype conversion error\n

Cause: The column could not be converted from DATETIME * datatype to internal DATETIME/CHARACTER datatype.

Action: Contact Oracle Customer Support.

DIA-26045: REF column *string* expects *string* arguments; found *string*.\n

Cause: The number of arguments for the REF column is incorrect.

Action: Specify the correct number of input arguments for REFs. 1. Unscoped system-generated REFs can have exactly 1 or 2 input arguments. a) It has exactly 1 input argument (one for the OID value) if a fixed table name was specified through OCI_DIRPATH_EXPR_REF_TBLNAME. b) It has exactly 2 input arguments (one for the table name and one for the OID value) if a fixed table name was not specified through OCI_DIRPATH_EXPR_REF_TBLNAME. 2. Scoped system-generated REFs can have 1 or 2 input arguments. Because a table name argument is not needed for a scoped ref, only 1 argument (OID value) is expected. But if the table name argument is given, it's still accepted. 3. Scoped primary-key REFs with N columns in its primary-key OID can have N or N+1 input arguments. Because a table name argument is not needed for a scoped ref, only N arguments (making up the OID value) is expected. But if the table name argument is given, it's still accepted.

DIA-26046: REF column *string* expects scoped table name *string*; user passed in *string*.\n

Cause: The scoped table name passed in by the user does not match the name in the schema.

Action: Specify the correct table name for the scoped REF column.

DIA-26048: Scoped REF column has wrong table name.\n

Cause: The scoped table name passed in by the user does not match the name in the schema.

Action: Specify the correct table name for the scoped REF column.

DIA-26049: Unscoped REF column has non-existent table name.\n

Cause: The table name passed in by the user does not exist in the schema.

Action: Specify a valid table name for the unscoped REF column.

DIA-26050: Direct path load of domain index is not supported for this column type.\n

Cause: Direct path can not load a domain index of that column type.

Action: Drop the index and try again or load using conventional path.

DIA-26051: internal error parsing packed decimal format string

Cause: A packed decimal field with a non-zero scale factor is mapped to a character column. In order to perform the datatype conversion, a numeric format string must be created based on the input field's precision and scale specifications. Direct path loader encountered an error in creating this format string.

Action: Examine the packed decimal field's precision and scale specifications and make sure that they contain valid values.

DIA-26052: Unsupported type *number* for SQL expression on column *string*.\n

Cause: The direct path api does not support a SQL expression on a column of that type.

Action: Make sure the types are correct.

DIA-26053: Row was not loaded due to conversion error.\n

Cause: The current row was not loaded due to a conversion error.

Action: Continue with the load anyways. 260xx - 260xx Direct Path API

DIA-26054: Direct Path Context prepared for a different mode than operation requested.\n

Cause: The user prepared the direct path context for one operation (Load, Unload, Convert), but then tried to perform a different operation.

Action: Make sure the direct path context mode and operation matches.

DIA-26055: Invalid buffer specified for direct path unload\n

Cause: The user specified a zero length or null buffer to be used for the Direct Path Unload operation.

Action: Specify a valid buffer and length.

DIA-26056: Requested direct path operation on a view is not supported.\n

Cause: An attempt was made to load into a view using direct path that has user-defined types, XML data, object type table or SQL expressions.

Action: Do not attempt to use direct path when loading a view that has nonscalar columns or when using SQL expressions on input columns.

DIA-26057: Conversion is not necessary for this direct path stream.\n

Cause: User attempted to convert a direct path stream that does not require conversion.

Action: Load the stream without conversion it.

DIA-26058: unexpected error fetching metadata for column *string* in table *string*\n

Cause: The direct path API encountered an unexpected error while retrieving metadata for a column.

Action: Contact Oracle support.

DIA-26059: Data is too large for column *string*\n

Cause: The direct path API encountered a column that can not be loaded because the input data is too large for a column.

Action: Make the target column larger.

DIA-26060: Can not convert type identifier for column *string*\n

Cause: The direct path API encountered a type identifier for a column that can not be loaded because a mapping can not be found for the input value.

Action: Verify the input data.

DIA-26061: Concurrent direct unloads is not allowed.\n

Cause: User attempted a direct unload when another is still in progress.

Action: Complete the current direct unload before starting another.

DIA-26062: Can not continue from previous errors.\n

Cause: User attempted to continue a direct path load after receiving an error which indicates the load can not continue.

Action: Address the original error that was returned.

DIA-26063: Can not flashback to specified SCN value - Wrap: *string* Base: *string*.\n

Cause: User specified an SCN which occurs before the last time the table definition was modified.

Action: Specify a more recent SCN.

DIA-26064: Invalid SCN specified - Wrap: *string*.\n

Cause: User specified an invalid SCN.

Action: Specify a valid SCN.

DIA-26065: check constraint cannot reference column, *string*, in direct path load\n

Cause: An enabled check constraint was found on a column stored as a lob.

Action: Either disable the check constraint before loading the table data * using the direct path mode, or use the conventional path mode * instead.

DIA-26076: cannot set or reset value after direct path structure is allocated

Cause: Client attempted to set or reset the number of rows in a direct path * structure after it has already been allocated and initialized. * Attributes used is one of the following: * - OCI_ATTR_NUM_ROWS: to set # of rows in a direct path column array * - OCI_ATTR_DIRPATH_DCACHE_SIZE: to set size of a date cache * (default is 0) * - OCI_ATTR_DIRPATH_DCACHE_DISABLE: to set whether date cache will be * disabled on overflow (default is FALSE)

Action: Set the following attributes before: * - OCI_ATTR_NUM_ROWS: before calling OCIHandleAlloc for column array * - OCI_ATTR_DIRPATH_DCACHE_SIZE: before calling OCIDirPathPrepare * - OCI_ATTR_DIRPATH_DCACHE_DISABLE: before calling OCIDirPathPrepare

DIA-26077: direct path column array is not initialized

Cause: Client attempted to allocate a column array for a direct path * function context before allocating a column array for the * table-level direct path context.

Action: Allocate the table-level direct path context's column array * via OCIHandleAlloc before allocating column arrays for * direct path function contexts.

DIA-26078: file "*string*" is not part of database being loaded\n

Cause: A parallel load file was specified which is not part * of the database.

Action: Check filename and pathname for correctness.

DIA-26079: file "*string*" is not part of table *string.string*\n

Cause: A parallel load file was specified which is not in the * tablespace of the table being loaded.

Action: Check to make sure that the specified parallel load file * is in the tablespace of the table being loaded.

DIA-26080: file "*string*" is not part of table *string.string* partition *string*\n

Cause: A parallel load file was specified which is not in the * tablespace of the table (partition, subpartition) being loaded. * When a partitioned table is being loaded, the file must be * in the tablespace of every partition or subpartition * (i.e. each (sub)partition must be in the same tablespace).

Action: Specify a different parallel load file, or no file at all.

DIA-26082: load of overlapping segments on table *string.string* is not allowed

Cause: Client application is attempting to do multiple direct path load * operations on the same table, but the segments overlap.

Action: Check the partition names (subname attribute of the direct path * context) being loaded. Make sure you are not loading a table, * and a partition of the same table. Make sure you are not * loading a partition, and a sub-partition within the same * partition.

DIA-26083: unsupported direct path stream version *string*

Cause: The stream version requested is not supported by the server.

Action: Check to make sure that the VERSION attribute of the direct * stream is not being set to an invalid value.

DIA-26084: direct path context already finished

Cause: An OCIDirPathLoadStream operation was attempted after * OCIDirPathFinish was called. Once a direct path operation * has been finished, no more data can be loaded.

Action: Check program logic to make sure OCIDirPathLoadStream is * not called after OCIDirPathFinish.

DIA-26085: direct path operation must start its own transaction

Cause: A direct path operation is being attempted within a transaction * that has already been started.

Action: Commit the transaction and Prepare the direct path operation again.

DIA-26086: direct path does not support triggers

Cause: A direct path operation is being attempted on a table which * has enabled triggers.

Action: Disable the triggers on the table and try again.

DIA-26088: scalar column "*string*" must be specified prior to LOB columns

Cause: All scalar columns (i.e. non-LOB and non-LONG columns) must be * specified by the client of the direct path API prior to * specifying any LOB columns.

Action: Specify all scalar columns prior to specifying any LOB columns.

DIA-26089: LONG column "*string*" must be specified last

Cause: A client of the direct path API specified a LONG column to be * loaded, but the LONG column was not the last column to be * specified.

Action: Specify the LONG column last.

DIA-26090: row is in partial state

Cause: A direct path operation is being finished or a data save request * has been made, but the table for which the request is being made * on has a row in partial state. The row must be completed before * the segment high water marks can be moved.

Action: Either complete the row, or abort the direct path operation.

DIA-26091: requested direct path operation not supported

Cause: A direct path operation was requested that is not supported

Action: Do not use that operation. Currently, UNLOAD is not supported.

DIA-26092: only LONG or LOB types can be partial

Cause: A column which is not a LONG or LOB had the * OCI_DIRPATH_COL_PARTIAL flag associated with it. * Only LONG or LOB type columns can be loaded in pieces.

Action: Do not use the OCI_DIRPATH_COL_PARTIAL flag for the column.

DIA-26093: input data column size (*number*) exceeds the maximum input size (*number*)

Cause: The user attempted to specify a column size (%d) that exceeded * the maximum allowable input size (%d)."

Action: Make sure the input column metadata matches the column definition.

DIA-26094: stream format error: input column overflow

Cause: An input stream contained data for more input columns * than specified by the client of the direct path API.

Action: Make sure that the stream being loaded is for the * correct table. Check initialization sequence.

DIA-26095: unprocessed stream data exists

Cause: Either a OCIDirPathLoadStream call was made which provided * more stream data prior to the server being able to fully * process the stream data that it already has, or a * OCIDirPathFinish call was made when the server had * unprocessed stream data.

Action: Most likely an application mis-use of the direct path API. * Make sure that the stream is not being reset inadvertently * prior to any previous stream data being processed, or, that * OCIDirPathFinish is not being called prematurely (i.e. stream * pushed, error encountered and LoadStream not called to process * the remainder of the stream before Finish is called.)

DIA-26096: transfer size too small for row data (*number bytes required*)

Cause: Either the transfer buffer size specified, or the default * transfer buffer size (if you did not specify a size), is * too small to contain a single row of the converted row data.

Action: Set the transfer buffer size attribute of the direct path * context to be larger.

DIA-26097: unsupported conversion for column *string* (from type *number* to type *number*)

Cause: The direct path api does not support the required conversion.

Action: Make sure the types are correct. *

DIA-26098: direct path context is not prepared

Cause: A direct path api function was called with a direct path * context which has not been prepared.

Action: Make sure all necessary attributes in the direct path * context have been set, and the context is prepared via * OCIDirPathPrepare.

DIA-26099: direct path context is already prepared

Cause: OCIDirPathPrepare was called with a context that has already * been prepared.

Action: Free the direct path context, set necessary attributes, and * call OCIDirPathPrepare.

DIA-26101: tablespace # in file header is *string* rather than *string* for file *string*

Cause: The tablespace number in the file header is inconsistent with that in the control file.

Action: Check if the control file has been migrated correctly. Retry with the correct control file and data file.

DIA-26102: relative file # in file header is *string* rather than *string* for file *string*

Cause: The relative file number in the file header is inconsistent with that in the control file.

Action: Check if the control file has been migrated correctly. Retry with the correct control file and data file.

DIA-26103: V6 or V7 data file used to create control file

Cause: The file header of the referenced file is in V6 or V7 format.

Action: Either remove the file from the create control file command, or somehow migrate the file header to V8 format.

DIA-26500: error on caching "*string*".*string*"

Cause: Attempt to cache the replication information which is unavailable in the catalog for the object.

Action: Use `dbms_reputil.sync_up_rep` to validate the replication catalog, or use `dbms_reputil.make_internal_pkg` to validate internal package.

DIA-26501: RepAPI operation failure

Cause: An external RepAPI operation failed.

Action: consult detail error message.

DIA-26502: error resignal

Cause: An internal service failed and signalled an error"

Action: consult detail error message.

DIA-26503: internal RepAPI operation failure on object *string.string*

Cause: An unexpected internal RepAPI failure was detected

Action: Contact Oracle support.

DIA-26504: operation not implemented

Cause: The caller requested a RepAPI operation that was not implemented

Action: Do not issue this call.

DIA-26505: unexpected internal null

Cause: An internal buffer control structure was NULL

Action: Verify that sufficient memory resources are available to RepAPI.

DIA-26506: null global context

Cause: An internal buffer control structure was NULL

Action: Verify that sufficient memory resources are available to RepAPI.

DIA-26507: null master connection

Cause: The master connection handle was or became invalid.

Action: Verify that the master connection is valid.

DIA-26508: null materialized view connection

Cause: The client connection handle was or became invalid.

Action: Verify that the client connection is valid.

DIA-26509: null materialized view control structure

Cause: An internal materialized view control structure could not be obtained.

Action: Check that the owner and users provided are correct.

DIA-26510: materialized view name: '*string*' is greater than max. allowed length of *string* bytes

Cause: The specified materialized view name was too long.

Action: Shorten the materialized view name.

DIA-26511: master table '*string.string*' not found

Cause: A RepAPI operation was attempted against a non-existent or invalid master table

Action: Verify that the master table object exists.

DIA-26512: error pushing transaction to def\$error

Cause: An unexpected error occurred while sending an def\$error rpc to the master site

Action: Verify that the DBMS_DEFER package is valid and executable by the RepAPI client. Contact the local or master site administrator, if necessary.

DIA-26513: push error: master proc. *string*\$RP.*string* failed for trans:*string* seq:*string*

Cause: A conflict/error occurred at the master site while executing a \$RP.rep_insert(), rep_update(), or rep_delete() function which was not handled by conflict resolution logic at the master.

Action: Notify master site system administrator or DBA.

DIA-26514: object '*string.string*' not found

Cause: The specified object was expected but not found.

Action: Verify that the specified object exists and is valid.

DIA-26515: no master log available for '*string.string*'

Cause: The specified master log was not found or available for the named table.

Action: Create the master log at the master site or correct any problems that may exist with the log.

DIA-26516: no push transaction acknowledgement

Cause: RepAPI was unable to confirm that the last pushed transaction was successfully committed by the master site.

Action: Verify that the communications link between the local site and the master site is still valid. If the transaction has not been committed at the master, repush the transaction.

DIA-26517: materialized view control entry for '*string.string*' was not found

Cause: The specified materialized view catalog control record was not found.

Action: Verify that the local materialized view catalog is valid and that the local materialized view is properly defined.

DIA-26518: push queue synchronization error detected

Cause: Client tried to repush a transaction has already been committed at the master site. A common cause of this problem is an error at the local site in initializing or updating the local site transaction sequence mechanism.

Action: Verify that transaction data that RepAPI was attempting to repushed to the master site exists at the master table and is valid and consistent with the local site. If this error occurs, redundantly identified transactions are ignored and then purged from the local updatable materialized view logs. Check that the local site is correctly assigning new transactionIDs and is not accidentally generating non-unique values.

DIA-26519: no memory available to allocate

Cause: There was no memory left for the RepAPI process. This error may occur when RepAPI is trying to allocate a new table buffer area.

Action: Shutdown one or more local applications to attempt to free heap memory and retry the RepAPI operation.

DIA-26520: internal memory failure

Cause: An internal memory error was detected.

Action: Check if other errors have occurred or determine if any local application may have corrupted the memory subsystem.

DIA-26521: rpc initialization error

Cause: An error occurred during the initialization of a PL/SQL rpc.

Action: Verify that the procedure to be invoked exists and is valid at the master site and is executable by the RepAPI user.

DIA-26522: rpc execution error

Cause: An error occurred during the execution of a PL/SQL rpc.

Action: Check the error messages from the remote procedure and fix any remote site problems that may be preventing the execution of the invoked rpc.

DIA-26523: rpc termination error

Cause: An error occurred during the termination of a PL/SQL rpc. This is usually caused by master site being unable to close an opened cursor or if RepAPI cannot deallocate internal memory.

Action: Fix any server side problems first, determine if the RepAPI memory subsystem has been corrupted.

DIA-26524: nls subsystem initialization failure for product=*string*, facility=*string*

Cause: The NLS product/facility error message file could not be located or properly initialized.

Action: Check that the error message directory and file(s) have been properly installed.

DIA-26525: session connection attempt failed for *string* (@*string*)

Cause: A connection could not be established to the specified database using the provided connection string.

Action: Check that the user, password, connect string, names services, network, and any remote site listener process are properly installed and working.

DIA-26526: materialized view sql ddl parse/expansion failed for *string.string*

Cause: The client sql materialized view definition query could not be properly parsed by the master Oracle site.

Action: Check that materialized view ddl sql is compatible with the currently connected version of Oracle and does not violate any of the RepAPI sql limitations or restrictions.

DIA-26527: local store callback init phase failed for '*string.string*'

Cause: The client callback failed during its INIT phase for the named object.

Action: Verify that the objects referenced by the client callback exist and are valid. Refer to the vendor-specific callback error code reference to diagnose the local problem. Record all error state and notify Oracle support.

DIA-26528: local store callback proc phase failed for '*string.string*'

Cause: The client callback failed during its PROC phase for the named object.

Action: Refer to the vendor-specific callback error code reference to diagnose the local problem. Record all error state and notify Oracle support.

DIA-26529: local store callback term phase failed for '*string.string*'

Cause: The client callback failed during its TERM phase for the named object.

Action: Refer to the vendor-specific callback error code reference to diagnose the local problem. Record all error state and notify Oracle support.

DIA-26530: unable to build materialized view refresh control list

Cause: The materialized view control list could not be constructed. This is generally the result of an error while accessing the local materialized view catalog.

Action: Verify that the named materialized view(s) are properly defined and valid.

DIA-26532: replication parallel push simulated site failure

Cause: A parallel push executed with event 26531 enabled raises this error to simulation failure of network or destination site.

Action: Do not enable the event for normal operation.

DIA-26534: collision: tranID *number* ignored and purged

Cause: A transaction that was pushed had a transaction ID that collided with a transaction that was previously pushed and committed at the master site.

Action: See the action section for E_QUEUESYNC (26518).

DIA-26535: *number* byte row cache insufficient for table with rowsize=*number*

Cause: A transaction that was pushed had a transaction ID that collided with a transaction that was previously pushed and committed at the master site.

Action: Increase the RepAPI row buffer size or reduce the width of the replicated tables.

DIA-26536: refresh was aborted because of conflicts caused by deferred transactions

Cause: There are outstanding conflicts logged in the DEFERROR table at the materialized view's master site.

Action: Resolve the conflicts in the master DEFERROR table and refresh again after the table is empty. Alternatively, refresh with REFRESH_AFTER_ERRORS, even if there are conflicts in the master's DEFERROR table. Proceeding despite conflicts can

result in an updatable materialized view's changes appearing to be temporarily lost, until a refresh succeeds after the conflicts are resolved.

DIA-26563: renaming this table is not allowed

Cause: Attempt to rename a replicated table, an updatable materialized view table or the master table of a materialized view for which a materialized view log has been created.

Action: If desired, unregister the replicated table with `dbms_repcat.drop_master_reobject`, or use the recommended procedure to rename the master table of a materialized view.

DIA-26564: *string* argument is not of specified type

Cause: User passed type of the given argument number doesn't match with the type of the argument in the stored arguments.

Action: Invoke correct type procedure (i.e. `get_XXX_arg`)

DIA-26565: Call to *type_arg* made before calling `dbms_defer.call`

Cause: User invoked `type_arg` procedure before starting a deferred call

Action: Invoke various procedures in the correct order.

DIA-26566: Couldn't open connect to *string*

Cause: Failed to open connection using given dblink

Action: Make sure that the dblink is valid and remote m/c is up.

DIA-26571: *string.string.string*: number of arguments (*string*) does not match replication catalog

Cause: number of arguments does not match replication catalog

Action: examine total number of arguments for the rpc call

DIA-26572: *string.string.string*: argument *string* does not match replication catalog

Cause: the (rpc) call is corrupted

Action: examine total number of arguments and each argument for the rpc call

DIA-26575: remote database does not support replication parallel propagation

Cause: The remote database has a version lower than Oracle 8.0 and hence does not understand replication parallel propagation.

Action: Use serial propagation or upgrade the remote database to Oracle 8.0 or above.

DIA-26576: cannot acquire SR enqueue

Cause: An attempt to acquire the SR enqueue in exclusive mode failed.

Action: n/a

DIA-26577: PRESERVE TABLE can not be used when dropping old style materialized view *string.string*\n

Cause: The materialized view consists of a view and a container table.

Action: Drop the materialized view without PRESERVE TABLE option.

DIA-26578: No capture in this multitenant container database associated with queue "*string*".

Cause: An outbound server's queue was not associated with a capture from the same multitenant container database (CDB) before adding or starting an outbound server.

Action: Execute the DBMS_STREAMS_ADM.CREATE_CAPTURE procedure to create a capture before adding or starting an outbound server.

DIA-26650: *string string* background process *string* might not be started successfully

Cause: An error occurred during creation of a capture or apply background process.

Action: Review V\$STREAMS_CAPTURE and V\$STREAMS_APPLY_COORDINATOR views for the status of these processes. Also check the trace file for more information.

DIA-26651: Unable to start or stop capture process *string*

Cause: An attempt was made to start or stop a capture process while another capture process was concurrently starting or stopping.

Action: You cannot concurrently start or stop capture processes. Wait before attempting to start or stop additional capture processes.

DIA-26652: Capture *string* did not start properly and is currently in state *string*

Cause: An attempt to restart a capture process failed.

Action: Review V\$STREAMS_CAPTURE view for the state of the capture process. Also check the trace files for more information.

DIA-26653: Apply *string* did not start properly and is currently in state *string*

Cause: An attempt to restart an apply process failed.

Action: Streams: Review V\$STREAMS_APPLY% views for the state of the apply process. Also check the trace files for more information. XStream: Review V\$XSTREAM_APPLY% views for the state of the apply process. Also check the trace files for more information. GoldenGate: Review V\$GG_APPLY% views for the state of the apply process. Also check the trace files for more information.

DIA-26654: Capture *string* attempted to connect to apply *string* already configured for *string*

Cause: An attempt was made by a GoldenGate, XStream or Streams Capture or XStream In to connect to an Apply that is already connected in the other mode.

Action: You cannot connect a capture to an apply already configured for another apply mode. Create or connect to another apply.

DIA-26655: Invalid *string* specified for *string* procedure

Cause: An attempt was made to execute the specified procedure with an invalid SCN value.

Action: Resubmit procedure with a valid SCN value.

DIA-26656: supplemental logging version error: *string*

Cause: The supplemental logging versions of capture side and apply side are incompatible.

Action: For incompatibility caused by a newer apply side, please bypass or migrate the incompatible logs manually and consider upgrading or patching the capture side. For incompatibility caused by an unrecognizable version group or an older apply side, please upgrade or patch the apply side. For invalid versions, the logs might have been corrupted; please verify the integrity of the supplemental logging data on the capture side.

DIA-26660: Invalid action context value for *string*

Cause: The value specified in the action context is invalid for use in GoldenGate, XStream or Streams.

Action: Check that the type and value are correct.

DIA-26662: unable to process *string* Data Dictionary information for object

Cause: The database is unable to process GoldenGate, XStream or Streams Data Dictionary for this object.

Action: Check that the compatibility for the database supports the object, and check the trace file for information about the object.

DIA-26663: error queue for apply process *string* must be empty

Cause: The error queue for this apply process contains error entries.

Action: Execute or delete errors in the error queue.

DIA-26664: cannot create *string* process *string*

Cause: An attempt was made to create a GoldenGate, XStream or Streams process when another was being created concurrently.

Action: Wait for the creation of the other GoldenGate, XStream or Streams process to finish before attempting to create the process.

DIA-26665: *string* process *string* already exists

Cause: An attempt was made to create a GoldenGate, XStream or Streams process that already exists.

Action: Either specify another process or remove the existing GoldenGate, XStream or Streams process.

DIA-26666: cannot alter *string* process *string*

Cause: An attempt was made to alter a GoldenGate, XStream or Streams process that is currently running.

Action: Stop the GoldenGate, XStream or Streams process with FORCE parameter set to TRUE and reissue the command.

DIA-26667: invalid *string* parameter *string*

Cause: An attempt was made to specify an invalid parameter.

Action: Check the documentation for valid parameters.

DIA-26668: *string* process *string* exists

Cause: An attempt to remove the component failed because it is associated with the GoldenGate, XStream or Streams process.

Action: Either remove the process manually or specify the "cascade" option in `dbms_streams_adm.remove_queue`.

DIA-26669: parameter *string* inconsistent with parameter *string*

Cause: An attempt was made to specify a subprogram parameter value that is inconsistent with another parameter value.

Action: Check the documentation for valid parameter values.

DIA-26670: No capture is found for queue '*string*'

Cause: An attempt was made to add an XStream outbound server to a queue using uncommitted data mode when no co-located XStream capture was configured for that queue.

Action: Change to committed data mode or configure a local XStream capture for the specified queue then retry the operation.

DIA-26671: maximum number of *string* processes exceeded

Cause: Cannot create additional GoldenGate, XStream or Streams processes since the maximum number of processes has been reached.

Action: Remove existing GoldenGate, XStream or Streams processes and retry the operation.

DIA-26672: timeout occurred while stopping *string* process *string*

Cause: Timeout occurred while waiting for a GoldenGate, XStream or Streams process to shut down.

Action: Retry the operation. If the error persists, try stopping the process with the FORCE option, or contact Oracle Support Services.

DIA-26673: duplicate column name *string*

Cause: An attempt was made to specify a duplicate column name in an LCR.

Action: Remove the duplicate column and retry the operation.

DIA-26674: Column mismatch in '*string.string*' (LCR: *string* type=*string*; DB: *string* type=*string*)

Cause: The columns in the LCR were not the same or not found in the database table.

Action: Alter the database table.

DIA-26675: cannot create *string* capture process *string*

Cause: GoldenGate, XStream or Streams capture process could not be created because one or more parameters contain invalid value.

Action: Refer to trace file for more details.

DIA-26676: Table '*string.string*' has *string* columns in the LCR and *string* columns in the replicated site

Cause: The number of columns in the LCR was not the same as the the replicated site.

Action: Alter the table structure

DIA-26677: *string* downstream capture process *string* cannot proceed

Cause: Database global name has been set to a value which is same as the source database name of the downstream capture process.

Action: Change database global name to a value other than the source database name for the downstream capture.

DIA-26678: *string* downstream capture process for source database *string* must be created at database *string* first

Cause: A GoldenGate, XStream or Streams downstream capture process was nonexistent when this operation was attempted.

Action: Create a GoldenGate, XStream or Streams downstream capture process, then retry the operation.

DIA-26679: operation not allowed on LOB or LONG columns in LCR

Cause: Certain operations on LOB/LONG columns of the LCR through rule-based transformations, DML handlers, or error handlers were not allowed.

Action: Do not perform restricted operations on LOB or LONG columns in LCRs. See the documentation for operations that are restricted on LOB/LONG columns in LCRs.

DIA-26680: object type not supported

Cause: The specified object type is not supported.

Action: Retry with a supported object type.

DIA-26681: command type not supported

Cause: The specified command type is not supported.

Action: Retry with a supported command type.

DIA-26682: invalid value for publication_on

Cause: The publication_on parameter should be either 'Y' or 'N'

Action: Retry with a proper value for publication_on.

DIA-26683: invalid value for value_type

Cause: The value_type parameter should be either 'OLD' or 'NEW'

Action: Retry with proper value_type.

DIA-26684: invalid value for value_type

Cause: The value_type parameter should be one of 'OLD', 'NEW' or '*'

Action: Retry with proper value_type.

DIA-26685: cannot apply transactions from multiple sources

Cause: Transactions from multiple sources were sent to the same apply process.

Action: Create multiple apply processes and create appropriate rules so that transactions from only one source reach an apply process.

DIA-26686: cannot capture from specified SCN

Cause: An attempt was made to specify an invalid SCN.

Action: Retry with a valid SCN.

DIA-26687: no instantiation SCN provided for "string"."string" in source database "string"

Cause: Object SCN was not set. If the object is a table, then both fields will be filled, for example "SCOTT"."EMP". If the object is a schema, only one field will be set, for example "SCOTT"."". And if the object is the entire database, no fields will be set, for example ""."".

Action: Set the SCN by calling DBMS_APPLY_ADM.SET_%_INSTANTIATION_SCN

DIA-26688: missing key in LCR

Cause: Metadata mismatch, or not enough information in the user generated LCR.

Action: Alter the database object, or provide all defined keys in the LCR.

DIA-26689: column datatype mismatch in LCR

Cause: The datatypes of columns in the LCR are not the same as the datatypes in the database object.

Action: Alter the database object.

DIA-26690: datatype not supported at non-Oracle system

Cause: One of the columns of the LCR being applied was of a datatype not supported by either the target non-Oracle system or by the Oracle transparent gateway through which the apply is being done.

Action: Do not apply data of this type. If possible, filter out columns containing such datatypes before applying.

DIA-26691: operation not supported at non-Oracle system

Cause: The apply process attempted an operation that is either not supported by the non-Oracle system or by the Oracle transparent gateway through which the apply is being done. Some kinds of DML (like procedure and function calls) and all DDL will cause this error to be raised.

Action: Do not attempt to apply such LCRs to non-Oracle systems. If possible, filter out such LCRs before applying.

DIA-26692: invalid value *string*, *string* should be in *string* format

Cause: The parameter specified was not in the correct format.

Action: Specify the parameter value in the correct format.

DIA-26693: *string string* process dropped successfully, but error occurred while dropping rule set *string*

Cause: An attempt to drop an unused rule set failed after dropping the GoldenGate, XStream or Streams process successfully.

Action: Check existence of rule set and manually drop if necessary.

DIA-26694: error while enqueueing into queue *string.string*

Cause: An error occurred while enqueueing a message.

Action: If the situation described in the next error on the stack can be corrected, do so.

DIA-26695: error on call to *string*: return code *string*

Cause: A locking related call failed.

Action: Try the call again after fixing the condition indicated by the return code.

DIA-26696: no *string* data dictionary for object with number *string* and version number *string* from source database *string*

Cause: An attempt to access the database object failed because the data dictionary for the object was either never populated or it was purged.

Action: Make sure the GoldenGate, XStream or Streams data dictionary is created by calling DBMS_CAPTURE_ADM.PREPARE_%_INSTANTIATION.

DIA-26697: LCR contains extra column '*string*'

Cause: The LCR contained more columns than the replicated table.

Action: Alter the database object.

DIA-26698: *string* did not have a *string* rule set

Cause: The GoldenGate, XStream or Streams client does not have a rule set of the indicated type.

Action: Verify that the GoldenGate, XStream or Streams client has a rule set of the specified type, and retry the operation.

DIA-26699: *string* message consumer *string* already exists

Cause: An attempt was made to create a GoldenGate, XStream or Streams message consumer that already exists.

Action: Either specify another message consumer or remove the existing GoldenGate, XStream or Streams message consumer.

DIA-26701: *string* process *string* does not exist

Cause: An attempt was made to access a GoldenGate, XStream or Streams process which does not exist.

Action: Check with the relevant security views for the correct name of the object.

DIA-26705: cannot downgrade capture process after Streams data dictionary has been upgraded

Cause: An attempt was made to downgrade a capture process after it has upgraded the GoldenGate, XStream or Streams data dictionary.

Action: Drop the capture process before attempting the downgrade.

DIA-26706: cannot downgrade capture process

Cause: An attempt was made to downgrade a capture process that has a higher version than the downgrade release version.

Action: Drop the capture process after capture has finished consuming all the redo logs before attempting the downgrade.

DIA-26708: remote DDL not supported by STREAMS : *dblink string*

Cause: The apply process attempted to apply a DDL LCR via a *dblink*. This is not supported.

Action: Do not attempt to apply DDL LCRs via a *dblink*. If possible, filter out DDL LCRs before applying.

DIA-26709: Downstream Capture RFS restart

Cause: Remote file server (RFS) process was restarted to reflect a change in DOWNSTREAM_REAL_TIME_MINE option of the GoldenGate, XStream or Streams capture process.

Action: No action required. This is an informational message only.

DIA-26710: incompatible version marker encountered during Capture

Cause: Capture process cannot mine redo from a version higher than the current software release version.

Action: Drop and recreate the capture process.

DIA-26711: remote table does not contain a primary key constraint

Cause: The master table for remote apply does not contain a primary key constraint or the primary key constraint has been disabled.

Action: Create a primary key constraint on the master table or enable the existing constraint.

DIA-26712: remote object is "*string*".*string*"\@"*string*"

Cause: See the preceding error message to identify the cause. This message names the remote object, usually a table or view, for which an error occurred when GoldenGate, XStream or Streams tried to access it for remote apply.

Action: See the preceding error message.

DIA-26713: remote object does not exist or is inaccessible

Cause: GoldenGate, XStream or Streams replication could not access the named table or view at a remote database to apply changes.

Action: Confirm that the given remote table or view exists and is accessible through the given database link. When using a Heterogeneous Services database link to access a non-Oracle system, it may be necessary to check administration details for network connections at the non-Oracle system.

DIA-26714: User Error *string* encountered during apply process

Cause: An error was encountered during an apply process.

Action: Query the DBA_APPLY_ERROR view to determine the error and take the appropriate action.

DIA-26715: time limit reached

Cause: The specified time limit was reached for the GoldenGate, XStream or Streams process.

Action: Restart the GoldenGate, XStream or Streams process, increasing the TIME_LIMIT parameter if necessary.

DIA-26716: message limit reached

Cause: The specified message limit was reached for the Capture process.

Action: Restart the Capture process, increasing the MESSAGE_LIMIT parameter if necessary.

DIA-26717: SCN limit reached

Cause: The specified SCN limit was reached for the GoldenGate, XStream or Streams process.

Action: Change the MAXIMUM_SCN parameter, then restart the GoldenGate, XStream or Streams process.

DIA-26718: transaction limit reached

Cause: The specified transaction limit was reached for the Apply process.

Action: Restart the Apply process, increasing the TRANSACTION_LIMIT parameter if necessary.

DIA-26721: enqueue of the LCR not allowed

Cause: An apply process attempted to enqueue an LCR with a LONG column. This is not supported.

Action: Modify rules or unset the enqueue destination to prevent LCRs with LONG columns from being enqueued by the apply process.

DIA-26723: user "*string*" requires the role "*string*"

Cause: The caller did not have the specified role or called the procedure from a definer's rights package or procedure.

Action: Grant the specified role to the caller. If the procedure is called from a definer's rights package or procedure, change the definer's rights package or procedure to an invoker's rights package or procedure. Or grant all the privileges for the specified role explicitly.

DIA-26724: only SYS is allowed to set the Capture or Apply user to SYS.

Cause: The Capture or Apply user was specified as SYS by a user other than SYS.

Action: Set SYS as the Capture or Apply user while logged in as SYS.

DIA-26725: cannot downgrade apply handlers

Cause: An attempt was made to downgrade apply handlers that are not associated with a local database object, or the apply handlers are associated with a specific apply process.

Action: Drop the associated apply handlers before attempting the downgrade.

DIA-26726: standby and DOWNSTREAM_REAL_TIME_MINE are incompatible

Cause: An attempt was made to set the standby database and DOWNSTREAM_REAL_TIME_MINE option of the Oracle GoldenGate, XStream or Oracle Streams capture process on the same database.

Action: Do not attempt to set the DOWNSTREAM_REAL_TIME_MINE option for a Oracle GoldenGate, XStream or Oracle Streams capture process on a standby database. Do not attempt to change a database role to standby if there exists a capture process with the DOWNSTREAM_REAL_TIME_MINE parameter set to Y.

DIA-26727: Cannot alter queue_to_queue property of existing propagation.

Cause: The queue_to_queue property was specified for an existing propagation.

Action: Pass NULL for the queue_to_queue argument.

DIA-26730: *string 'string'* already exists

Cause: An attempt to use FILE GROUP, FILE GROUP VERSION, or FILE GROUP FILE failed because the item in question already exists.

Action: Remove the object if appropriate and re-attempt the operation.

DIA-26731: *string 'string'* does not exist

Cause: A FILE GROUP, FILE GROUP VERSION, or FILE GROUP FILE was specified that does not exist.

Action: Make sure the object exists and re-attempt the operation.

DIA-26732: invalid file group *string* privilege

Cause: The specified privilege number that was specified is invalid.

Action: Check specification of dbms_file_group for valid privileges.

DIA-26733: timed-out waiting for file group lock

Cause: The procedure waited too long while getting a lock to perform a file group repository operation.

Action: Retry the operation.

DIA-26734: different datafiles_directory_object parameter must be specified

Cause: The attempted operation involved datafiles platform conversion which required the datafiles_directory_object parameter to be specified for placing the converted data files.

Action: Retry the operation after specifying a valid datafiles_directory_object parameter. This directory must be different from the directory objects for any of the datafiles for the specified file group version.

DIA-26735: operation not allowed on the specified file group version

Cause: One or more datafiles or export dump file(s) were missing from the specified file group version.

Action: Retry the operation after adding all the data files and Data Pump dump file(s) to the specified version.

DIA-26736: Data Pump error

Cause: A Data Pump error occurred when the procedure performed a File Group Repository operation.

Action: Check the error stack and trace file for error details.

DIA-26737: version *string* already has an export dump file

Cause: A Data Pump dump file was added to a file group version that already has a dump file.

Action: Remove the existing dump file if appropriate, and retry the operation.

DIA-26738: *string 'string'* is not empty

Cause: The FILE GROUP or FILE GROUP VERSION being dropped contained objects.

Action: Remove the child objects, then retry the operation.

DIA-26740: cannot downgrade because there are file groups

Cause: An attempt was made to downgrade a database that has file groups.

Action: Drop all file groups before attempting the downgrade.

DIA-26741: cannot assemble lob

Cause: An attempt was made to assemble lob, but the compatibility of the source database for the LOB information is lower than 10.2.0.

Action: Set ASSEMBLE_LOBS to FALSE in the DML or error handler while this handler is processing LOB information from a source database with a compatibility level lower than 10.2.0.

DIA-26742: Maximum number of ignored transactions exceeded

Cause: An attempt was made to add more than the allowed number of ignored transactions.

Action: Please clear the current list of ignored transactions.

DIA-26744: *string capture process "string" does not support "string"."string" because of the following reason: string*

Cause: GoldenGate, XStream or Streams capture encountered a table with an unsupported property. The most common reason is an unsupported column data type.

Action: Revise the Capture rules to skip over the table in question. One way might be to add a negative rule excluding changes from the unsupported table from being captured. Streams: Also query the DBA_STREAMS_UNSUPPORTED view to determine which tables are not supported by Streams and for what reason. Consider adding negative rules for any tables that may be captured, but are present in this view. XStream: Also query the DBA_XSTREAM_OUT_SUPPORT_MODE view to determine which tables are not supported by XStream and for what reason. Consider adding negative rules for any tables that may be captured, but are present in this view. GoldenGate: Also query the DBA_GOLDENGATE_SUPPORT_MODE view to determine which tables are not supported by GoldenGate and for what reason. Consider adding EXCLUDETABLE statements for any tables that may be captured, but are present in this view. For potential workarounds to certain unsupported properties, see Metalink.

DIA-26745: cursors (*string*) are not sufficient

Cause: The maximum number of open cursors was too small for GoldenGate, XStream or Streams Apply.

Action: Increase the value of open_cursors.

DIA-26746: DDL rule "*string*".*string*" not allowed for this operation

Cause: A DDL rule was specified for this operation.

Action: Specify a non-DDL rule for this operation.

DIA-26747: The one-to-many transformation function *string* encountered the following error: *string*

Cause: The specified transformation function encountered an error.

Action: Ensure that the function does not process or return DDL LCRs. Also ensure that the function does not return NULL.

DIA-26748: The one-to-one transformation function *string* encountered the following error: *string*

Cause: The specified transformation function encountered an error.

Action: Ensure that the function does not return an LCR that has a different type from the LCR which was passed to the function. Also ensure that the function does not return NULL. For DDL transformation functions, creating and returning a new DDL LCR is not allowed.

DIA-26752: Unsupported LCR received for "*string*".*string*"

Cause: GoldenGate, XStream or Streams capture process received an LCR with unsupported operation from LogMiner.

Action: Stream: If this object is listed in DBA_STREAMS_UNSUPPORTED view, modify rules to prevent changes made to this object from getting captured. XStream: If this object is listed in DBA_XSTREAM_OUT_SUPPORT_MODE view, modify rules to prevent changes made to this object from getting captured. GoldenGate: If this object is listed in DBA_GOLDENGATE_SUPPORT_MODE view, modify rules to prevent changes made to this object from getting captured.

DIA-26753: Mismatched columns found in '*string.string*'

Cause: The columns in the LCR were not the same as the table in the database.

Action: Alter the database table.

DIA-26754: cannot specify both one-to-one transformation function *string* and one-to-many transformation function *string*

Cause: Both a one-to-one transformation function and a one-to-many transformation function were specified for a rule.

Action: Remove either the one-to-one transformation function, or the one-to-many transformation function.

DIA-26760: Could not find message number *string* for transaction with id *string*

Cause: Error

Action: Contact Oracle support"

DIA-26761: Standby Redo Logs not available for real time mining

Cause: Standby Redo Logs required for real time mining by downstream capture process were not available.

Action: Check the configuration of Standby Redo Logs and retry the operation at a later time. To start the capture process without real time mining property, reset `DOWNSTREAM_REAL_TIME_MINE` parameter of the capture process and retry the operation.

DIA-26762: Cannot autogenerate name for parameter *string* because of the following reason: *string*

Cause: An error was encountered while attempting to generate a name for a parameter which was passed a NULL value.

Action: If possible, fix the error, otherwise specify the parameter name explicitly.

DIA-26763: invalid file type "*string*"

Cause: An invalid file type was specified for the ASM file.

Action: Check documentation for valid ASM file types.

DIA-26764: invalid parameter "*string*" for local capture "*string*"

Cause: An invalid parameter was specified for the local capture process.

Action: Check documentation for valid parameters.

DIA-26765: invalid parameter "*string*" for downstream capture "*string*"

Cause: An invalid parameter was specified for the downstream capture process.

Action: Check documentation for valid parameters.

DIA-26766: Unexpected redo pattern encountered by LogMiner

Cause: LogMiner encountered an unexpected redo pattern. This is usually caused by tables with unsupported data types or newer table features.

Action: Remove the capture rule for the table and restart capture.

DIA-26767: Not enough redo log information for LogMiner

Cause: Direct-path SQL with NOLOGGING option or a SQL*Loader operation with UNRECOVERABLE clause was specified for the table.

Action: Remove the capture rule for the table and restart capture.

DIA-26768: Maximum number of unsupported tables exceeded

Cause: An attempt was made to add more than the allowed number of unsupported tables.

Action: Clear the current list of unsupported tables.

DIA-26785: Object has a NULL value

Cause: A method was invoked on a NULL object.

Action: Initialize the object with a non-NULL value.

DIA-26786: A row with key *string* exists but has conflicting column(s) *string* in table *string*

Cause: The row to update or delete exists in the table but had conflicting value for some columns.

Action: For Streams and XStream, please define a conflict resolution, or resolve the conflict and execute the error transaction using `DBMS_APPLY_ADM.EXECUTE_ERROR`. For logical standby, please verify the status of the database guard to ensure local modifications are not allowed, then re-instantiate the table and contact support if the problem persists. For GoldenGate,

configure Conflict Resolution (CDR) or REPERERROR handler for the table and restart replicat.

DIA-26787: The row with key *string* does not exist in table *string*

Cause: The row to update or delete does not exist in the table.

Action: For Streams and XStream, please define a conflict resolution, or resolve the conflict and execute the error transaction using DBMS_APPLY_ADM.EXECUTE_ERROR. For logical standby, please verify the status of the database guard to ensure local modifications are not allowed, then re-instantiate the table and contact support if the problem persists. For GoldenGate, configure Conflict Resolution (CDR) or REPERERROR handler for the table and restart replicat.

DIA-26788: The column *string* is not encrypted in the local database.

Cause: The column in the destination database is NOT encrypted while it is encrypted in the source database.

Action: Set the corresponding column property in the destination database to 'encrypted' or change the apply parameter, PRESERVE_ENCRYPTED_COLS, to 'N' to suppress the error.

DIA-26789: Cannot split propagation *string* because only one propagation originates from its source queue "*string*".*string*"

Cause: Only one propagation originated from the propagation source queue.

Action: Please do not split this propagation.

DIA-26790: Requesting a lock on *string* "*string*" timed out

Cause: Could not get a lock on the object because another process was holding the lock.

Action: Please try later.

DIA-26791: Cannot split or merge propagation "*string*"

Cause: A process tried to split or merge this propagation, but failed and left STREAMS in an inconsistent state.

Action: Query DBA_RECOVERABLE_SCRIPT_BLOCKS view, and roll back the script which tried to split or merge this propagation.

DIA-26792: Invalid source database name *string*

Cause: The value for the source database global name was not valid.

Action: Specify a valid database global name. If the source database is not the local database, check the listener is up and running.

DIA-26793: Number of capture processes that enqueued message to queue "*string*".*string*" not equal to one

Cause: Split-merge API requires only one capture process enqueued message to the queue where the propagation originated

Action: Please drop one capture, or split or merge another propagation.

DIA-26794: Hierarchically enabled tables not supported

Cause: Hierarchically enabled tables are not supported.

Action: Disable hierarchy for the table.

DIA-26795: Cannot modify an LCR received from an XStream outbound server

Cause: An attempt was made to modify an LCR generated by an XStream outbound server.

Action: Clone the LCR generated by the XStream outbound server by using the provided OCILCR* functions, such as OCILCRNew, OCILCRHeaderSet, and OCILCRRowColumnInfoSet. Then modify the cloned LCR.

DIA-26798: LOB logical change record (LCR) missing LOB column in table "*string*".*string*"

Cause: The apply slave could not fill update LOB because of missing LOB column.

Action: Check that all LOB columns have been sent correctly.

DIA-26799: unique constraint *string.string* violated for table *string.string* with column values *string*

Cause: The row to update or insert violated the unique constraint.

Action: For XStreams, define a conflict resolution, or resolve the conflict and execute the error transaction using DBMS_APPLY_ADM.EXECUTE_ERROR.

DIA-26800: Apply not the only subscriber for "*string*".*string*".

Cause: The combined capture and apply optimization could not be used since Apply was not the lone subscriber to the queue.

Action: Apply has to be the only subscriber to the queue.

DIA-26801: More than one subscriber for "*string*".*string*".

Cause: Multiple subscribers were found when the combined capture and apply optimization was configured to only work for one subscriber.

Action: Configure a single subscriber, apply or propagation for the queue, or enable the optimization for multiple subscribers.

DIA-26802: Queue "*string*".*string*" has messages.

Cause: The combined capture and apply optimization could not be used since the queue had messages.

Action: Make sure queue is empty before starting apply and capture.

DIA-26803: Subscribers have changed for queue "*string*".*string*".

Cause: The combined capture and apply optimization could not be used since the subscribers had changed.

Action: Optimization can be used only if the queue has a single subscriber.

DIA-26804: Apply "*string*" is disabled.

Cause: The apply process was disabled or aborted.

Action: Start the apply process.

DIA-26805: Queue "*string*".*string*" has rule based subscribers.

Cause: The combined capture and apply optimization could not be used since the queue had rule based subscribers.

Action: Make sure queue has no rule based subscribers before starting apply and capture.

DIA-26806: Remote database could not support combined capture and apply optimization.

Cause: The remote database has a version lower than Oracle 11.0 and hence does not understand combined capture and apply optimization.

Action: Upgrade the remote database to Oracle 11.0 or above in order to use the combined capture and apply optimization.

DIA-26807: Database link is not NULL for Apply with the name "*string*".

Cause: The combined capture and apply optimization could not be used since `apply_database_link` was not NULL.

Action: Drop and recreate the apply with NULL value for `apply_database_link`.

DIA-26808: Apply process *string* died unexpectedly.

Cause: Apply process died unexpectedly.

Action: Check your system for anomalies and restart apply. If this error persists, contact Oracle Support Services. See trace file for more details.

DIA-26809: Capture aborted: checkpoint-free mode requires combined capture and apply mode.

Cause: The requirements for combined capture and apply mode were broken.

Action: Restore the combined capture and apply mode and then restart the capture. If combined capture and apply mode is no longer desired, drop the existing checkpoint-free capture and create another one that will take checkpoints.

DIA-26810: Apply "*string*" on database "*string*" is in the mode of combined capture and apply.

Cause: The combined capture and apply optimization could not be used because Apply was already in the mode of combined capture and apply.

Action: Do not configure two captures for one apply.

DIA-26811: Client has already attached to *string* apply "*string*".

Cause: The client has already attached to the specified apply process.

Action: Detach apply process before reattach.

DIA-26812: An active session currently attached to XStream server "*string*".

Cause: An attempt was made to attach to the specified XStream server while another session was attached to it.

Action: Retry when there is no session attaching to the specified XStream server.

DIA-26813: The value for argument "ARRAY_SIZE" is too small

Cause: The value for argument "ARRAY_SIZE" was less than the number of columns in the requested column list.

Action: Check the return value for "NUM_COLUMNS" parameter then allocate all input arrays to at least that size and invoke the same OCI function again.

DIA-26814: The value for argument *string* exceeds maximum *string*

Cause: The value for specified value exceeded the maximum allowed.

Action: Correct the value of specified argument.

DIA-26815: Error from Apply Network Receiver for Apply "*string*" and Capture "*string*".

Cause: The Apply Network Receiver aborted due to an unexpected error.

Action: Query DBA_APPLY_ERROR to determine the error and then restart the Capture and Apply.

DIA-26816: *string* apply process "*string*" (OS id *string*) is exiting due to ORA-*string*.

Cause: An apply process encountered an unexpected error.

Action: Query DBA_APPLY to examine the status of Apply and restart Apply if needed.

DIA-26817: *string* capture process "*string*" is unable to communicate with capture server *string* during initialization.

Cause: Capture server might not be started properly

Action: Fix any errors during capture server creation and re-start capture process

DIA-26818: *string* capture process *string* receives an error from capture server.

Cause: Capture server received an error.

Action: Check log for error details.

DIA-26819: *string* capture server for apply "*string*" and capture "*string*" encounters disabled or aborted propagation "*string*".

Cause: Propagation was disabled or aborted.

Action: Start propagation.

DIA-26820: *string* capture server for apply "*string*" and propagation "*string*" becomes active and needs join capture process "*string*".

Cause: Capture server was waiting for propagation or apply to start

Action: Capture process needs restart (done automatically).

DIA-26821: No propagation process found between source queue "*string*".*string*" and destination queue "*string*".*string*".

Cause: Propagation has not been configured.

Action: Configure a propagation between specified queues and restart capture.

DIA-26822: Failure in creating capture servers (ksv error code *string*).

Cause: Failure in ksv slave creation.

Action: Identify the actual ksv error and act accordingly.

DIA-26823: *string* capture server *string* is unable to communicate with capture process "*string*".

Cause: Capture process was not started properly or was aborted.

Action: If Oracle GoldenGate, XStream or Streams capture process was stopped, then restart the capture process. Otherwise, fix any errors during the capture process creation and restart the capture process.

DIA-26824: user-defined XStream callback error

Cause: A value other than OCI_CONTINUE or OCI_SUCCESS was returned for the user-defined XStream callback function. Any returned value other than OCI_CONTINUE or OCI_SUCCESS is invalid.

Action: Verify that either OCI_CONTINUE or OCI_SUCCESS is returned from the user-defined XStream callback function.

DIA-26825: STREAMS process "*string*" is not configured as an XStream outbound server.

Cause: An attempt was made to attach to a STREAMS apply process, which was not configured as an XStream outbound server.

Action: Check the apply name or re-create the apply process as an XStream outbound server.

DIA-26826: *string* apply coordinator and apply slave are unable to communicate.

Cause: GoldenGate, XStream or Streams Apply process may have died unexpectedly.

Action: Check your system for anomalies and restart apply. If this error persists, contact Oracle Support Services. See trace file for more details.

DIA-26827: Insufficient privileges to attach to XStream outbound server "*string*".

Cause: Sufficient privileges were not granted to attach to the specified XStream outbound server.

Action: Query DBA_XSTREAM_OUTBOUND view to get the connect_user value for the specified outbound server. Then modify the application to connect to the outbound server's database using this value.

DIA-26828: XStream outbound server "*string*" requires combined capture and apply mode.

Cause: The specified XStream outbound server was not in combined capture and apply mode.

Action: Restore the combined capture and apply mode and then restart the capture.

DIA-26829: Cannot set "DISABLE_ON_ERROR" parameter to 'N'.

Cause: An attempt was made to change the "DISABLE_ON_ERROR" parameter for an XStream outbound server to 'N'.

Action: Remove invalid statement.

DIA-26830: Cannot define handler for an XStream outbound server.

Cause: An attempt was made to define a handler for an XStream outbound server.

Action: Remove invalid statement.

DIA-26831: Cannot delete or execute error transaction from XStream outbound server "*string*".

Cause: An attempt was made to delete or execute an error transaction from the specified XStream outbound server.

Action: Remove invalid statement.

DIA-26832: Unable to create XStream outbound server "*string*" due to existing handler.

Cause: An attempt was made to create the specified XStream outbound server while there was a handler defined for the specified server.

Action: Use DBMS_APPLY_ADM.SET_DML_HANDLER procedure to remove all handlers defined on the specified server then retry statement.

DIA-26833: *string* failed to update acknowledgment SCN for propagation "*string*" from capture "*string*" to apply "*string*".

Cause: propagation might have been modified after GoldenGate, XStream or Streams was started.

Action: Ensure propagation is configured properly and restart GoldenGate, XStream or Streams.

DIA-26834: Unable to alter parameter '*string*' because *string* capture process is not configured to run locally

Cause: An attempt was made to alter the specified capture parameter when the GoldenGate, XStream or Streams capture process was not configured to run on the local database.

Action: Remove the invalid parameter or use DBMS_CAPTURE_ADM.ALTER_CAPTURE procedure to alter the parameter.

DIA-26835: The source database for XStream outbound server "*string*" is invalid

Cause: An attempt was made to add an XStream outbound server with a source database that was different from the associated capture's source database.

Action: Correct the value for the 'source_database' parameter in the call.

DIA-26836: The specified rules must be created from the same subsetting condition

Cause: An attempt was made to remove an outbound server's subset rules when the specified INSERT, UPDATE, and DELETE rules were not created from the same subsetting condition.

Action: Correct the rules in the statement.

DIA-26837: Server "*string*" is not an XStream inbound server

Cause: An attempt was made to execute a procedure not appropriate on an XStream inbound server.

Action: Replace with a procedure appropriate for an XStream inbound server and resubmit.

DIA-26838: Setting apply parameter "*string*" is not permitted for XStream Outbound Server

Cause: An attempt was made to set an apply parameter that was not applicable for XStream Outbound Server.

Action: Configure XStream Outbound Server using valid parameters. Check the documentation for valid parameter values.

DIA-26839: Apply tag for apply "*string*" is not permitted for XStream Outbound Server

Cause: An attempt was made to set an apply tag that was not applicable for XStream Outbound Server.

Action: Do not set the apply tag when using XStream Outbound Server.

DIA-26840: Combined capture and apply optimization is disabled because *string* is unable to identify an apply for the source database "*string*".

Cause: There were multiple Streams apply processes using the same queue which made combined capture and apply (CCA) optimization not possible.

Action: If Streams performance is an issue, check the "Combined Capture and Apply Optimization" chapter in the "Oracle Streams Concepts and Administration" book. Then reconfigure the Streams processes to meet this optimization's requirements.

DIA-26841: No subscribers are found for queue "*string*"."*string*".

Cause: No propagation or apply was configured for the specified queue.

Action: Configure propagation or apply for the specified queue.

DIA-26842: Setting apply directive "*string*" is not permitted for XStream Outbound Server

Cause: An attempt was made to set an apply directive that was not applicable for XStream Outbound Server.

Action: Configure XStream Outbound Server using valid directives. Check the documentation for valid directives.

DIA-26843: Local propagation "*string*" found for capture queue "*string*"."*string*".

Cause: The combined capture and apply optimization could not be used because a local propagation was attached to the capture queue.

Action: Remove the local propagation and restart capture.

DIA-26844: Found "*string*" active automatic split jobs for *string* Capture "*string*" in DBA_STREAMS_SPLIT_MERGE

Cause: Only one active split job is allowed for each GoldenGate, XStream or Streams Capture, but multiple active automatic split jobs were found in DBA_STREAMS_SPLIT_MERGE.

Action: Check trace to see how the jobs were submitted and drop them.

DIA-26845: Found "*string*" active split rows with the same cloned *string* Capture "*string*" in DBA_STREAMS_SPLIT_MERGE

Cause: In DBA_STREAMS_SPLIT_MERGE, for active split rows, the column CLONED_CAPTURE_NAME should be unique. However, multiple rows were found whose ACTION_TYPE column is 'SPLIT', ACTIVE column is 'ACTIVE' and have the same CLONED_CAPTURE_NAME.

Action: Check trace to see how the rows were inserted and call DBMS_STREAMS_ADM.RECOVER_OPERATION() for error recovery.

DIA-26846: Found "*string*" active automatic merge jobs for cloned *string* Capture "*string*" in DBA_STREAMS_SPLIT_MERGE

Cause: Only one active merge job is allowed for each cloned GoldenGate, XStream or Streams Capture, but multiple active automatic merge jobs were found in DBA_STREAMS_SPLIT_MERGE.

Action: Check trace to see how the jobs were submitted and drop them.

DIA-26847: Found invalid *string* type: "*string*"

Cause: Invalid GoldenGate, XStream or Streams type to split off was found. Type should only be 'PROPAGATION'(1) or 'APPLY'(2).

Action: Check trace to see how the invalid GoldenGate, XStream or Streams type was created and correct it.

DIA-26848: Split a nonexistent Streams Capture process "*string*" in job "*string*"

Cause: The job attempted to split a non-existent original Streams Capture.

Action: Drop the split job, or wait until the Streams Capture comes to existence.

DIA-26849: Split a nonsplittable *string* Capture process "*string*" in job "*string*"

Cause: The job tried to split a GoldenGate, XStream or Streams Capture that was not splittable. That is, the Capture either had less than two subscribers, or it was not the only Capture of its queue.

Action: Drop the split job, or wait until the GoldenGate, XStream or Streams Capture becomes splittable.

DIA-26850: Changes to queue subscribers were detected by *string* capture process.

Cause: The subscribers for capture queue might have changed.

Action: Capture process will restart automatically.

DIA-26851: Unable to connect to apply "*string*" because it has connected to another capture.

Cause: Another capture process is already connected to apply.

Action: Wait for the connected capture process to terminate or abort the connected capture process.

DIA-26852: Invalid NULL value for *column_value* parameter.

Cause: NULL is not allowed to be passed as the column value.

Action: Replace NULL with a proper AnyData instance containing NULL, e.g., `sys.AnyData.ConvertVarchar2(NULL)`, as the column value if the column value is NULL.

DIA-26853: invalid *cca maximum percentage string*

Cause: Specified percentage value was not in range 0 - 100.

Action: Specify a percentage value in the range 0 - 100.

DIA-26854: *string string* has no enqueue or dequeue privileges to the queue.

Cause: The GoldenGate, XStream or Streams user did not have enqueue or dequeue privilege to the queue.

Action: Grant GoldenGate, XStream or Streams user enqueue or dequeue privileges to the queue.

DIA-26855: *string string* has insufficient database privilege to access the queue.

Cause: The GoldenGate, XStream or Streams user did not have sufficient database privilege to access the queue.

Action: Grant GoldenGate, XStream or Streams user database privileges to access the queue.

DIA-26856: STREAMS *string* has insufficient database privilege to access the queue.

Cause: The GoldenGate, XStream or Streams user did not have sufficient database privilege to access the queue.

Action: Grant GoldenGate, XStream or Streams user database privileges to access the queue.

DIA-26857: LCR position cannot be null (XID=*string*).

Cause: The position of an LCR in the specified transaction was null.

Action: Use `OCILCRHeaderSet` to define the LCR position.

DIA-26858: LCR position must be strictly increasing (XID='string', LCR position='string', previous position='string').

Cause: The position of an LCR in the specified transaction was less than or equal to the previous LCR in transaction.

Action: Use OCILCRHeaderSet to correct the LCR position.

DIA-26859: Server "string" is not an XStream outbound server

Cause: An attempt was made to execute a procedure not appropriate on an XStream outbound server.

Action: Replace with a procedure appropriate for an XStream outbound server and resubmit.

DIA-26860: Different transactions must have different transaction IDs (XID='string', LCR position='string', previous commit position='string').

Cause: The position of an LCR in the specified transaction was greater than the position of the previous commit LCR in transaction with same transaction ID.

Action: Use different transaction IDs for different transactions.

DIA-26862: LCR position must be greater than the processed low position of the XStream inbound server (XID='string', LCR position='string').

Cause: The position of an LCR in the specified transaction was less than or equal to the processed low position of the XStream inbound server.

Action: Use OCILCRHeaderSet to correct the LCR position.

DIA-26863: Job "string" showing as an active job in DBA_STREAMS_SPLIT_MERGE does not exist in DBA_SCHEDULER_JOBS.

Cause: An active job showing in DBA_STREAMS_SPLIT_MERGE did not exist. It may have been dropped accidentally or something was wrong with it.

Action: Check trace to identify the problem and call DBMS_STREAMS_ADM.RECOVER_OPERATION() for error recovery.

DIA-26864: Error occurred in string automatic job: "string"

Cause: An error has happened inside GoldenGate, XStream or Streams automatic job.

Action: Check trace for more detail.

DIA-26865: must send a COMMIT LCR to end transaction 'string' before sending another transaction

Cause: An attempt was made by a client application to send LCRs for a new transaction before sending a COMMIT LCR for the specified transaction.

Action: Modify the client application to send a COMMIT LCR at the end of the specified transaction.

DIA-26866: The Queue of string Apply process "string" is not changeable.

Cause: Not all of the conditions for the Queue of a GoldenGate, XStream or Streams Apply process to be changeable were met. Conditions are: -The Apply process is not running. -The Apply process has no error. -The Apply process has no spilling. -The Apply process is not used for XStream Outbound or Inbound Servers. -The Apply process is a local Apply process. -The corresponding GoldenGate, XStream or Streams Capture process should be stopped.

Action: Make sure all of the conditions are met.

DIA-26867: *string* must be called during OCIXStreamOutLCRReceive execution

Cause: An attempt was made to execute the specified function while OCIXStreamOutLCRReceive call was not in progress.

Action: Check your program and make sure the specified call is invoked during OCIXStreamOutLCRReceive callback function.

DIA-26868: *string* must be called during OCIXStreamInLCRSend execution

Cause: An attempt was made to execute the specified function while OCIXStreamInLCRSend call was not in progress.

Action: Check your program and make sure the specified call is invoked during OCIXStreamInLCRSend callback function.

DIA-26869: must attach to an XStream inbound server before executing *string* function

Cause: An attempt was made to invoke the specified function before executing OCIXStreamInAttach call.

Action: Add OCIXStreamInAttach call before the specified function.

DIA-26870: cannot call *string* while OCIXStreamInLCRCallbackSend call is still executing.

Cause: An attempt was made to invoke the specified call while OCIXStreamInLCRCallbackSend call was executing.

Action: Check your program and remove the specified call when there is an OCIXStreamInLCRCallbackSend call in progress.

DIA-26871: unexpected *string* call (expecting *string*)

Cause: Could be one of the following reasons: 1) An attempt was made to invoke OCIXStreamInChunkSend when the most recent LCR or chunk sent did not have the OCL_XSTREAM_MORE_ROW_DATA flag set; 2) An attempt was made to invoke OCIXStreamInLCRSend when the most recent LCR or chunk sent had OCL_XSTREAM_MORE_ROW_DATA flag set.

Action: n/a

DIA-26872: must attach to an XStream outbound server before executing *string* function

Cause: An attempt was made to invoke the specified function before executing OCIXStreamOutAttach call.

Action: Add OCIXStreamOutAttach call before the specified function.

DIA-26873: cannot call *string* while OCIXStreamOutLCRCallbackReceive call is still executing.

Cause: An attempt was made to invoke the specified call while OCIXStreamOutLCRCallbackReceive call was executing.

Action: Check your program and remove the specified call when there is an OCIXStreamOutLCRCallbackReceive call in progress.

DIA-26874: *string* Capture process "*string*" cannot be split.

Cause: An attempt was made to split a GoldenGate, XStream or Streams Capture process that could not be split. That is, the Capture process either had less than two subscribers, or it was not the only Capture process of its queue.

Action: Wait until the GoldenGate, XStream or Streams Capture process can be split.

DIA-26875: Timeout while *string* automatic split job "*string*" waits for the subscriber "*string*" of Capture process "*string*" to acknowledge split

Cause: To split a subscriber of a GoldenGate, XStream or Streams Capture process, an automatic split job needs to wait until the subscriber acknowledges the split. The wait timed out.

Action: n/a

DIA-26876: invalid processed low-watermark (current position=*string*; new position=*string*)

Cause: An attempt was made to set the processed low-watermark to a value that was less than the current processed low-watermark.

Action: Correct the processed low-watermark in OCIXStreamOutProcessedLWMSet call.

DIA-26877: must reattach after an OCIXStreamOut call was interrupted

Cause: An attempt was made to execute another OCIXStreamOut API when an earlier call was interrupted because the XStream outbound server was disabled or the client requested cancellation of the operation.

Action: Execute OCIXStreamOutAttach call to reattach to the same XStream outbound server.

DIA-26878: inconsistent input LCR (LCR is '*string*' type, expecting '*string*')

Cause: An attempt was made to send an LCR that was not consistent with the specified LCR type.

Action: Correct your application to specify an LCR type that agrees with the LCR to be sent.

DIA-26879: "SET_ENQUEUE_DESTINATION" directive is not permitted on rules used by XStream outbound server "*string*"

Cause: One or more rules, used by the specified XStream outbound server, had SET_ENQUEUE_DESTINATION directive defined.

Action: Execute the following: 1) Execute query SELECT xr.rule_owner, xr.rule_name, xr.rule_set_owner, xr.rule_set_name FROM dba_apply_enqueue e, dba_xstream_rules xr WHERE e.rule_owner = xr.rule_owner AND e.rule_name = xr.rule_name AND xr.streams_name = *specified outbound server*; 2) For each rule returned, execute DBMS_APPLY_ADM.SET_ENQUEUE_DESTINATION procedure to set the destination queue to null, or execute DBMS_RULE_ADM.REMOVE_RULE to remove that rule from its associated rule set.

DIA-26880: "SET_EXECUTE" directive is not permitted on rules used by XStream outbound server "*string*"

Cause: One or more rules, used by the specified XStream outbound server, had SET_EXECUTE directive defined.

Action: Execute the following: 1) Execute query SELECT xr.rule_owner, xr.rule_name, xr.rule_set_owner, xr.rule_set_name FROM dba_apply_execute e, dba_xstream_rules xr WHERE e.rule_owner = xr.rule_owner AND e.rule_name = xr.rule_name AND xr.streams_name = *specified outbound server*; 2) For each rule returned, use DBMS_APPLY_ADM.SET_EXECUTE procedure to set the EXECUTE parameter to TRUE, or use DBMS_RULE_ADM.REMOVE_RULE to remove that rule from its associated rule set.

DIA-26881: ORA-string: string raised in string automatic string job:"string"."string" for Capture process "string" and cloned Capture process "string".

Cause: An error was raised in a GoldenGate, XStream or Streams automatic split/merge job for the given original and cloned Capture processes.

Action: Check the corresponding split/merge row in DBA_STREAMS_SPLIT_MERGE view, alert log and trace file for details.

DIA-26882: Timeout while string automatic split/merge job:"string"."string" tried to lock Capture process "string".

Cause: The GoldenGate, XStream or Streams Capture process could be locked by other automatic split/merge jobs.

Action: No action required. The GoldenGate, XStream or Streams automatic split/merge job will retry automatically.

DIA-26883: Timeout due to string Apply process "string" while merge original Capture process "string" and cloned Capture process "string".

Cause: When merging two GoldenGate, XStream or Streams Capture processes, the merge needs to wait until the Apply process of the cloned Capture process goes ahead of the slowest subscriber of the original Capture process. This wait timed out.

Action: Make sure the GoldenGate, XStream or Streams Apply process still works properly.

DIA-26884: Not allowed to specify OCI_LCR_ROW_COLVAL_OLD with OCILCR_NEW_ONLY_MODE.

Cause: An attempt was made to call OCILCRRowColumnInfoGet function with OCI_LCR_ROW_COLVAL_OLD and OCILCR_NEW_ONLY_MODE.

Action: Change OCI_LCR_ROW_COLVAL_OLD to OCI_LCR_ROW_COLVAL_NEW or remove OCILCR_NEW_ONLY_MODE argument.

DIA-26885: OCIXStreamInCommit called before OCIXStreamInFlush

Cause: An attempt was made to call OCIXStreamInCommit before calling OCIXStreamInFlush.

Action: Call OCIXStreamInFlush prior to calling OCIXStreamInCommit.

DIA-26886: LCR commit position ('string') must be greater than the applied high position of the XStream inbound server (position='string').

Cause: The position of the commit LCR was less than or equal to the applied high position of the XStream inbound server.

Action: Set the commit position higher than the applied high position.

DIA-26887: Insufficient privileges to attach to XStream inbound server "string".

Cause: Sufficient privileges were not granted to attach to the specified XStream inbound server.

Action: Query DBA_XSTREAM_INBOUND view to get the apply_user value for the specified XStream outbound server. Then, modify the application to connect to the inbound server's database using this value.

DIA-26888: Redo compatilby must be 10.2 or greater

Cause: XStream Out requires redo comptibility to be 10.2 or greater.

Action: Drop the outbound server.

DIA-26889: LOB assembly not supported for PDML parent transaction *string*, child transaction *string*.

Cause: LOB assembly is not supported for PDML transactions.

Action: Disable LOB assembly, or filter out the PDML transaction.

DIA-26890: Invalid update LCR on Oracle Sequence "*string*".*string*"

Cause: The new value column list of an update LCR on an Oracle Sequence did not have non-null columns "CYCLE#", "INCREMENT\$", "CACHE" and "HIGHWATER".

Action: Make sure the new value column list has all the required columns. This might be a user error if the LCR is from an XStream In client.

DIA-26891: Target Oracle Sequence "*string*".*string*" has inconsistent parameters with the source.

Cause: The source and target Oracle Sequences did not have the identical cache size, increment value, and cycle flag needed for replication purposes.

Action: Make sure the source and target Oracle Sequences have identical parameters. This might be a user error if the LCR is from an XStream In client.

DIA-26892: XStream feature not supported

Cause: The XStream feature was not supported.

Action: No action necessary.

DIA-26893: Input LCR must be a commit LCR

Cause: The input LCR was not a commit LCR.

Action: Make sure the input LCR is a commit LCR.

DIA-26894: Invalid "*string*" in Apply Progress redo

Cause: The value of the field reported was possibly corrupted.

Action: Contact Oracle Support Services.

DIA-26895: Setting parameter "*string*" of Streams process "*string*" is only permitted for Oracle GoldenGate or XStream.

Cause: An attempt was made to set a parameter that is only allowed for XStream.

Action: Oracle GoldenGate license is needed to use this parameter.

DIA-26896: Attempted to connect multiple Oracle GoldenGate Capture processes, including "*string*", with XStream outbound server "*string*" through queue "*string*".*string*"

Cause: An attempt was made to connect multiple Oracle GoldenGate Capture processes through a queue with the XStream outbound server.

Action: Each XStream outbound server can only connect with one co-located Capture process. Remove extra Capture processes.

DIA-26897: Unable to start *string* capture "*string*" because its subscribers "*string*" and "*string*" have different purpose

Cause: An attempt was made to start an Oracle Capture process but it failed to start because its subscribers had conflicting purpose.

Action: Remove one of the specified subscribers from the capture queue.

DIA-26898: Unable to create "*string*" because there is an Oracle Capture process using the same queue "*string*".*string*"

Cause: An attempt was made to create an inbound server using the same queue that was used by an Oracle Capture process.

Action: Resubmit the statement using another queue name.

DIA-26899: internal *string* error

Cause: An internal Streams, XStream or GoldenGate error has occurred.

Action: Please contact Oracle customer support.

DIA-26900: Streams failed to update data dictionary table for propagation "*string*" from capture "*string*" to apply "*string*".

Cause: The data dictionary table was corrupted.

Action: Validate the data dictionary table to restart GoldenGate, XStream or Streams capture process.

DIA-26901: *string* propagation sender in the combined capture and apply mode is to be suspended while apply is disabled.

Cause: The corresponding subscriber was dropped or split.

Action: No action necessary.

DIA-26902: *string* propagation sender in the combined capture and apply mode is to be suspended while apply is enabled.

Cause: The corresponding subscriber was dropped or split.

Action: No action necessary.

DIA-26903: Invalid edition name "*string*"

Cause: The edition associated with the LCR did not exist in the destination database.

Action: Check if the edition needs to be created manually on the destination database or if the CREATE EDITION statement for this edition has been applied properly on the destination database.

DIA-26904: Invalid bind variable "*string*" in LCR field expression.

Cause: In the statement handler, the bind variables listed in the SQL expression did not match the allowed Logical Change Record field names.

Action: Verify that all the bind variables listed in the expression are legal Logical Change Record fields.

DIA-26905: Invalid LCR method expression "*string*" in statement handler.

Cause: The Logical Change Record method listed was not allowed in the statement handler.

Action: Verify that the Logical Change Record method listed in the expression is a legal DBMS_LCR method.

DIA-26906: No change handler exists.

Cause: There was no change handler for the specified apply, operation, source table, change table, and capture values.

Action: Query DBA_APPLY_CHANGE_HANDLERS view to find the correct change handler.

DIA-26907: Insufficient privileges to set converge tag

Cause: Privileges were insufficient to set converge tag.

Action: The invoker needs EXECUTE_CATALOG_ROLE or execute privilege on DBMS_STREAMS_ADM to set converge tag. Grant appropriate privileges to the invoker.

DIA-26908: XStream API must be executed using a dedicated server process.

Cause: An attempt was made to execute XStream API using a shared server process.

Action: Replace the connect string in the client application to use a dedicated server process.

DIA-26909: cannot reexecute an eager error

Cause: An attempt was made to reexecute an eager error transaction. An eager transaction is applied before the apply process sees the commit or rollback for the transaction.

Action: Fix the cause of the eager error and restart the apply process. When apply is restarted, capture will automatically resend the transaction, and the transaction will be applied by the apply process.

DIA-26910: user error *string* encountered in eager mode

Cause: An error was encountered during eager apply. An eager transaction is applied before the apply process sees the commit or rollback for the transaction. If an error occurs during an eager transaction, the transaction will be rolled back.

Action: Query the DBA_APPLY_ERROR view to determine the error and take the appropriate action. The apply process will need to be restarted to apply the transaction that had the error. When apply is restarted, capture will automatically resend the transaction, and the transaction will be applied by the apply process.

DIA-26911: invalid oldest position (current position=*string*; new position=*string*)

Cause: An attempt was made to set the oldest position to a value that was less than the current value.

Action: Correct the oldest_position argument in OCIXStreamOutProcessedLWMSet2 call.

DIA-26912: not allowed to invoke '*string*' while in committed data-only mode

Cause: An attempt was made to call the specified API while the attached XStream server was in committed data-only mode.

Action: Perform one of the following: 1) If the invalid call is OCIXStreamOutProcessedLWMSet2, then change it to OCIXStreamOutProcessedLWMSet or pass a null oldest_position to OCIXStreamOutProcessedLWMSet2 call. 2) If the invalid call is OCIXStreamInProcessedLWMGet2, then change it to OCIXStreamInProcessedLWMGet or pass a null oldest_position to OCIXStreamInProcessedLWMGet2 call.

DIA-26913: must connect to instance *string* where *string string* server "*string*" is running

Cause: The client application was not connected to the same Oracle RAC instance as the specified Oracle GoldenGate or XStream server.

Action: Connect to the specified instance using the network service name obtained from the following query: SELECT network_name FROM all_queues q,

all_xstream_outbound ob WHERE q.owner = ob.queue_owner AND q.name = ob.queue_name AND server_name = '<server_name>';

DIA-26914: Unable to communicate with *string* capture process "*string*" from outbound server "*string*".

Cause: Capture process might not have been started properly or was aborted.

Action: If Oracle GoldenGate or XStream capture process was stopped, then restart the capture process. Otherwise, query the DBA_CAPTURE view to determine the reason and take the appropriate action. If the error is ORA-4031, either increase the initialization parameter STREAMS_POOL_SIZE or increase the capture parameter MAX_SGA_SIZE or increase both. Refer to the XStream documentation for additional information on these parameters.

DIA-26915: Unable to return Logical Change Record (LCR) information due to missing data dictionary.

Cause: The current session was unable to return the requested information on the given LCR due to missing dictionary data on that LCR.

Action: Detach and reattach the XStream outbound server. Then retry the current call.

DIA-26916: Must call OCIPOGGRedoLogOpen function before OCIPOGGRedoLogRead

Cause: An attempt was made to call OCIPOGGRedoLogRead before calling OCIPOGGRedoLogOpen.

Action: Add OCIPOGGRedoLogOpen call before OCIPOGGRedoLogRead.

DIA-26917: OCIPOGG API must be executed using a dedicated server process.

Cause: An attempt was made to execute OCIPOGG API using a shared server process.

Action: Replace the connect string in the client application to use a dedicated server process.

DIA-26918: Must use '*string*' procedure for outbound server "*string*".

Cause: An attempt was made to execute START_APPLY on an outbound server that uses uncommitted data mode.

Action: Use the specified procedure instead.

DIA-26919: Capture "*string*" is not associated with queue "*string*".*string*".

Cause: The capture specified in the ADD_OUTBOUND procedure was not associated with the specified queue.

Action: Resubmit the ADD_OUTBOUND procedure after removing either the capture_name or the queue_name argument.

DIA-26920: *string* outbound server "*string*" has been stopped.

Cause: The specified outbound server was stopped.

Action: Execute START_OUTBOUND procedure to restart the outbound server or execute OCIXStreamOutAttach function to reattach to the outbound server.

DIA-26921: Cannot alter the start SCN or time of *string* Capture "*string*".

Cause: An attempt was made to alter the start SCN or time for a capture while other outbound servers were still attached to it.

Action: Execute the following: 1) Get the names of other outbound servers currently attached to the specified Capture using the query: SELECT server_name FROM

dba_xstream_outbound WHERE (status = 'ATTACHED') AND (server_name '<altered_server>') AND (capture_name = '<specified_capture_name>'); 2) Detach the client application from each server_name returned. 3) Retry the operation.

DIA-26922: user *string* does not have LOGMINING privilege

Cause: An attempt was made to start the capture process or attach to an outbound server when the specified user did not have LOGMINING privilege.

Action: Grant LOGMINING privilege to the specified user and resubmit the failed operation.

DIA-26923: cannot configure *string* outbound server "*string*" with *string* capture "*string*" due to different purpose

Cause: An attempt was made to configure an outbound server with a capture used for different purpose.

Action: Execute the following: 1) Get the purpose of each capture and its associated queue: SELECT capture_name, queue_owner, queue_name, purpose FROM dba_capture; 2) Resubmit the statement using a queue or capture with the same purpose.

DIA-26924: cannot configure *string* using "*string*".*string*" queue because it is used by "*string*" for *string* purpose

Cause: An attempt was made to configure the specified process using a queue already used by another process for different purpose.

Action: Resubmit the statement using another queue of the same purpose.

DIA-26925: cannot configure outbound server "*string*" with capture "*string*" because it is not using apply-state checkpoint

Cause: An attempt was made to configure an outbound server with a capture not using apply-state checkpoint.

Action: Specify a different capture in the ADD_OUTBOUND procedure or re-create the capture and resubmit the statement.

DIA-26926: Unable to attach because capture "*string*" is missing dictionary redo logs

Cause: The specified capture was unable to locate the dictionary redo log.

Action: Check the state of the specified capture from gv\$streams_capture to determine the SCN or filename of the missing log file. Confirm that the filename exists and is accessible online and also in the DBA_REGISTERED_ARCHIVED_LOG view. In addition, for local capture, confirm that an entry exists for the file in the V\$ARCHIVED_LOG view. If an entry is missing, it can be added using the ALTER DATABASE REGISTER ... LOGFILE command, specifying the keyword LOGICAL LOGFILE or PHYSICAL LOGFILE as appropriate.

DIA-26927: Unable to communicate with *string* capture process "*string*" from outbound server "*string*".

Cause: A timeout occurred while waiting for capture to respond.

Action: Check the state of the specified capture from GV\$XSTREAM_CAPTURE view. Determine the reason for capture's unresponsiveness. If streams_pool_size is not set or set with an inadequate value, consider setting or increasing the value of this parameter.

DIA-26928: Unable to communicate with *string* apply coordinator process "*string*" from outbound server "*string*".

Cause: A timeout occurred while waiting for apply coordinator to respond.

Action: Check the state of the specified apply coordinator from GV \$STREAMS_APPLY_COORDINATOR view. Determine the reason for apply coordinator's unresponsiveness. If streams_pool_size is not set or set with an inadequate value, consider setting or increasing the value of this parameter.

DIA-26929: altering an outbound server with a remote capture is not allowed

Cause: An attempt was made to alter an outbound server with a remote capture.

Action: None

DIA-26930: User "*string*" does not have privileges to perform this operation

Cause: An attempt was made to create, alter, or drop a process that has a different user (such as capture user or apply user) than the invoking user.

Action: Use the DBMS_XSTREAM_AUTH.GRANT_ADMIN_PRIVILEGE or DBMS_GOLDENGATE_AUTH.GRANT_ADMIN_PRIVILEGE procedures to grant the invoking user proper privileges.

DIA-26931: This procedure can only be invoked from the root container.

Cause: An attempt was made to create an outbound server in non-root PDB.

Action: Create the outbound server from the root container.

DIA-26932: Streams configuration is not allowed in a container database.

Cause: An attempt was made to configure a Streams environment in a container database.

Action: None

DIA-26933: Cannot start Streams process "*string*" while in a container database.

Cause: An attempt was made to start the specified Streams process while in a container database.

Action: None

DIA-26934: Streams synchronous capture is not supported in a container database.

Cause: An attempt was made to perform a DML operation on a table being captured by a Streams synchronous capture in a container database.

Action: Remove all Streams synchronous captures then reexecute the DML operation.

DIA-26935: Unsupported type *string.string* for parameter for procedure *string.string.string*.

Cause: Apply encountered a procedure call with a parameter with an unsupported type.

Action: Modify the rules to filter out the procedure call.

DIA-26936: must execute OCIPOGGCaptureAttach before invoking *string* function

Cause: An attempt was made to invoke the specified function before executing OCIPOGGCaptureAttach call.

Action: Add OCIPOGGCaptureAttach call before the specified function.

DIA-26937: client has already attached to *string* capture "*string*".

Cause: The client was already attached to the specified capture.

Action: Detach from the specified capture before reattaching.

DIA-26938: cannot pack LCR into LCR buffer (buffer size is *string*, LCR size is *string*)

Cause: The logical change record (LCR) buffer was not large enough to store the current LCR.

Action: Increase the buffer size in the OCIPOGGCaptureAttach call.

DIA-26939: *string* capture "*string*" is disabled.

Cause: The capture process was disabled or aborted.

Action: Start the capture process.

DIA-26940: OCIPOGGCapture API must be executed using a dedicated server process.

Cause: An attempt was made to execute OCIPOGGCapture API using a shared server process.

Action: Replace the connect string in the client application to use a dedicated server process.

DIA-26941: unable to perform LOB assembly for table *string.string*

Cause: The apply process was unable to perform the LOB assembly for a DML for the specified table.

Action: Verify that the storage type for the columns are compatible at the source and destination.

DIA-26942: LCR should not contain old value for column *string* in table *string.string*

Cause: The LCR contained old values for LOB, XMLType and object columns.

Action: Remove old values for any LOB, XMLType and object columns in the LCR.

DIA-26943: cross PDB operation not allowed

Cause: An attempt was made to perform an operation on a container database different from the container database where the call was made.

Action: Log into the root container or into the container where you want to perform the requested action.

DIA-26944: User "*string*" attempted to invoke a procedure without proper permissions.

Cause: An attempt was made to invoke a procedure without proper permissions.

Action: Use the DBMS_GOLDENGATE_AUTH.GRANT_ADMIN_PRIVILEGE to grant the invoking user proper privileges.

DIA-26945: unsupported hint *string*

Cause: The specified hint was not supported.

Action: Remove the hint from the SQL statement.

DIA-26946: OCIPOGGRedoLog API not supported in CDB.

Cause: An attempt was made to call an OCIPOGGRedoLog API in a multitenant container database (CDB).

Action: Do not call the OCIPOGGRedoLog API in a CDB.

DIA-26947: Oracle GoldenGate replication is not enabled.

Cause: The 'enable_goldengate_replication' parameter was not set to 'true'.

Action: Set the 'enable_goldengate_replication' parameter to 'true' and retry the operation. Oracle GoldenGate license is needed to use this parameter.

DIA-26948: Streams API must be executed using a dedicated server process.

Cause: The dblink configured for the propagation from the capture queue to the apply queue is using a shared server connection.

Action: Modify the dblink for this propagation to use a dedicated server connection.

DIA-26949: Advanced Replication is not allowed in a container database.

Cause: An attempt was made to configure an advanced replication in a multitenant container database (CDB).

Action: Do not call the Advanced Replication API in a CDB.

DIA-26951: table "*string*"."*string*" has column data type not supported by conflict resolution

Cause: A conflict was detected, but unsupported columns prevented resolving the conflict.

Action: Remove conflict resolution configuration for tables with LOB, LONG, XML, object, or extended types.

DIA-26952: could not clone from the specified clone_capture_name *string* while creating capture process *string*

Cause: The specified clone_capture_name could not be used as a clone candidate while creating the capture process.

Action: Re-create the capture without setting clone_capture_name.

DIA-26953: source database character set is not a subset of the mining database character set

Cause: An attempt was made to configure a downstream capture but the source database character set was not a subset of the mining database character set.

Action: Use AL32UTF8 character set or other compatible character set for the mining database.

DIA-26954: invalid protocol (opcode *string*) received during XStream execution

Cause: An internal protocol error occurred while executing an XStream function.

Action: Contact Oracle Support Services.

DIA-26955: cannot capture TIMESTAMP WITH LOCAL TIME ZONE data type

Cause: The capture process was unable to capture TIMESTAMP WITH LOCAL TIME ZONE data type because the source database time zone was not available.

Action: Refer to My Oracle Support Note 1928808.1 to set the source database time zone for the specified capture process.

DIA-26956: capture *string* created successfully but the source database time zone is not available

Cause: The capture process was created successfully; however, it will not be able to capture TIMESTAMP WITH LOCAL TIME ZONE data type unless the source database time zone is set.

Action: Refer to My Oracle Support Note 1928808.1 to set the source database time zone for the specified capture process.

DIA-26957: LCR identifier length is invalid.

Cause: A logical change record (LCR) identifier with an incompatible length was used.

Action: Use an LCR identifier compatible with release 12.2 or higher specification.

DIA-26958: LCR identifier version is invalid.

Cause: An invalid logical change record (LCR) identifier version number was used.

Action: Use an LCR identifier version compatible with release 12.2 or higher specification.

DIA-26959: SCN value does not fit in SCN version 1.

Cause: The system change number (SCN) value was too big to fit in the original SCN specification.

Action: Use an SCN value compatible with the original SCN specification.

DIA-26960: automatic CDR already configured for table "*string*".*string*"

Cause: Automatic conflict detection and resolution was already configured.

Action: Remove the automatic conflict detection and resolution configuration and retry.

DIA-26961: automatic CDR not configured for table "*string*".*string*"

Cause: Automatic conflict detection and resolution was not configured.

Action: None

DIA-26962: automatic CDR delta resolution not configured for column "*string*"

Cause: Automatic conflict detection and resolution delta resolution was not configured.

Action: None

DIA-26963: automatic CDR column group cannot be created

Cause: Automatic conflict detection and resolution was configured with column granularity.

Action: Remove the column-level configuration and retry.

DIA-26964: column "*string*" already assigned to a column group

Cause: The column was already part of a column group.

Action: Remove the column from the column group and retry.

DIA-26965: column group name "*string*" not available

Cause: The column group name was already in use.

Action: Remove the existing column group and retry.

DIA-26967: delete tombstone table "*string*".*string*" cannot be dropped

Cause: An attempt was made to drop a delete tombstone table.

Action: Remove the automatic conflict detection and resolution from the base table.

DIA-26968: column group "*string*" not found

Cause: The column group did not exist.

Action: Check if the column group needs to be created.

DIA-26969: column "string" not part of column group "string"

Cause: The column did not belong to the column group.

Action: Check the column list and retry.

DIA-26970: table "string" does not contain a primary key constraint

Cause: An attempt was made to configure automatic conflict detection and resolution with delete tombstones on a table without a primary key.

Action: Add a primary key and retry.

DIA-26971: resolution column "string" not present

Cause: The resolution column was not set in the logical change record (LCR).

Action: Manually resolve the conflict.

DIA-26972: An apply process attempted to modify the SYSAUX tablespace.

Cause: An ALTER TABLESPACE DDL to SYSAUX was attempted by Oracle GoldenGate, XStream or Streams process.

Action: Only SYS is allowed to modify SYSAUX.

DIA-26973: automatic CDR not supported for table "string"."string" which has long columns

Cause: Automatic conflict detection and resolution (CDR) support for long columns failed. CDR does not support long columns.

Action: None

DIA-26974: Apply process is stuck in synchronous error handling mode.

Cause: The apply process ran out of memory or queue space while suspended for synchronous error handling.

Action: Restart Oracle GoldenGate Replicat process.

DIA-27000: skgfsbi: failed to initialize storage subsystem (SBT) layer

Cause: sbtinit returned an error, additional information indicates error

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27001: unsupported device type

Cause: the specified device type is supported on this platform

Action: check V\$BACKUP_DEVICE for supported device types

DIA-27002: function called with invalid device structure

Cause: internal error, additional information indicates which function encountered error

Action: check for trace file and contact Oracle Support

DIA-27003: cannot open file on device allocated with NOIO option

Cause: internal error, a file is being created/retrieved on a device allocated with NOIO option, additional information indicates which function encountered error

Action: check for trace file and contact Oracle Support

DIA-27004: invalid blocksize specified

Cause: internal error, blocksize specified is incorrect for the device on which file is being created, additional information indicates blocksize specified, and the function that encountered the error

Action: check for trace file and contact Oracle Support

DIA-27005: cannot open file for async I/O on device not supporting async

Cause: internal error, a file is being opened for async I/O on a device that does not support async I/O, additional information indicates which function encountered error

Action: check for trace file and contact Oracle Support

DIA-27006: sbtremove returned error

Cause: additional information indicates error returned by sbtremove, and the function that encountered the error

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27007: failed to open file

Cause: sbtopen returned error, additional information indicates error returned from sbtopen, and the function that encountered the error

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27008: function called with invalid file structure

Cause: internal error, additional information indicates which function encountered error

Action: check for trace file and contact Oracle Support

DIA-27009: cannot write to file opened for read

Cause: internal error

Action: check for trace file and contact Oracle Support

DIA-27010: skgfwrt: write to file failed

Cause: sbtwrite returned error, additional information indicates error returned from sbtwrite

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27011: skgfrd: cannot read from file opened for write

Cause: internal error

Action: check for trace file and contact Oracle Support

DIA-27012: skgfrd: read from file failed

Cause: sbtread returned error, additional information indicates error returned from sbtread

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27013: skgqdel: cannot delete an open file

Cause: internal error

Action: check for trace file and contact Oracle Support

DIA-27014: skgqpini: translation error while expanding SS_UDMPDIR

Cause: Failure of sltn in skgqpini

Action: Check additional return error for more information.

DIA-27015: skgfcls: failed to close the file

Cause: sbtclose returned error, additional information indicates error returned from sbtclose

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27016: skgfcls: sbtinfo returned error

Cause: additional information indicates error returned from sbtinfo

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27017: skgfcls: media handle returned by sbtinfo exceeds max length(SSTMXQMH)

Cause: media handle string length exceeds SSTMXQMH

Action: verify that vendor's storage subsystem product is operating correctly, and that the platform limit (SSTMXQMH) is at least 64 (the limit specified for sbtinfo). additional information indicates the media handle string length returned by sbtinfo, and the limit (SSTMXQMH)

DIA-27018: BLKSIZE is not a multiple of the minimum physical block size

Cause: User-specified BLKSIZE (blocking factor) is not a multiple of the minimum block size that is permitted on this platform.

Action: Two ADDITIONAL INFORMATION messages are displayed which show the blocking factor provided by the user and the minimum physical block size. Specify a BLKSIZE that is an integral multiple of the minimum block size.

DIA-27019: tape filename length exceeds limit (SBTOPMXF)

Cause: length of tape filename provided to sequential I/O OSD functions is too long

Action: additional information indicates in which function this error is encountered, the length of filename provided, and the limit on filename

DIA-27020: named devices not supported

Cause: the platform or the specified device type does not support named devices

Action: do not specify device name or use a device type that supports named devices. Use V\$BACKUP_DEVICE view to see what device types and names (if any) are available.

DIA-27021: sequential file handle must be specified

Cause: The filename which will be passed to sbtopen was not specified.

Action: Specify a filename and continue. If this is a backup set being created via Recovery Manager, use the 'format' option to specify the backup piece handle name.

DIA-27022: skgfqsbi: could not allocate memory for media manager

Cause: Oracle could not allocate memory required by the media management software which is linked with Oracle to provide backup/restore services.

Action: Increase the amount of memory available to the Oracle process and retry the backup/restore.

DIA-27023: skgfqsbi: media manager protocol error

Cause: The media management software which is linked with Oracle to provide backup/restore services did not provide its function pointer structure to Oracle.

Action: This is an internal error in the media management product. Contact the media management vendor.

DIA-27024: skgfqsbi: sbtinit2 returned error

Cause: sbtinit2 returned an error. This happens during a backup or restore operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27025: skgfqsbi: invalid media manager context area size

Cause: The media management software requested a context area size which is greater than the maximum allowable size.

Action: This is an internal error in the media management product. Contact the media management vendor.

DIA-27026: skgfrls: sbtend returned error

Cause: sbtend returned an error. This happens during a backup or restore operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27027: sbtremove2 returned error

Cause: sbtremove2 returned an error. This happens when deleting a backup file.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27028: skgfqcre: sbtbackup returned error

Cause: sbtbackup returned an error. This happens when creating a backup file during a backup operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27029: skgfrtrv: sbtrestore returned error

Cause: sbtrestore returned an error. This happens when retrieving a backup file during a restore operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27030: skgfwrt: sbtwrite2 returned error

Cause: sbtwrite2 returned an error. This happens while writing a backup file during a backup operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27031: mirror resilvering functions not supported

Cause: internal error

Action: check for trace file and contact Oracle Support

DIA-27032: failed to obtain file size limit

Cause: getrlimit system call returned an error

Action: check errno

DIA-27033: failed to obtain file size limit

Cause: ulimit system call returned an error

Action: check errno

DIA-27034: maximum length of ORACLE_SID exceeded

Cause: too many characters in the ORACLE_SID string

Action: rename the ORACLE_SID to a string of up to the maximum number of characters specified for your system

DIA-27035: logical block size is invalid

Cause: logical block size for oracle files must be a multiple of the physical block size, and less than the maximum

Action: block size specified is returned as additional information, check init.ora parameters, additional information also indicates which function encountered the error

DIA-27036: translation error, unable to expand file name

Cause: additional information indicates sltln/slnrm error, and also indicates which function encountered the error

Action: check additional information

DIA-27037: unable to obtain file status

Cause: stat system call returned an error, additional information indicates which function encountered the error

Action: check errno

DIA-27038: created file already exists

Cause: trying to create a database file, but file by that name already exists

Action: verify that name is correct, specify reuse if necessary

DIA-27039: create file failed, file size limit reached

Cause: an attempt was made to create a file that exceeds the process's file size limit, additional information indicates which function encountered the error

Action: raise the file size limit

DIA-27040: file create error, unable to create file

Cause: create system call returned an error, unable to create file

Action: verify filename, and permissions

DIA-27041: unable to open file

Cause: open system call returned an error, additional information indicates which function encountered the error

Action: check errno

DIA-27042: not enough space on raw partition to fulfill request

Cause: internal error, file too large for raw partition, additional information indicates which function encountered the error

Action: check for trace file and contact Oracle Support

DIA-27043: unable to seek to beginning of file

Cause: seek system call failed, additional information indicates which function encountered the error

Action: check errno

DIA-27044: unable to write the header block of file

Cause: write system call failed, additional information indicates which function encountered the error

Action: check errno

DIA-27045: unable to close the file

Cause: close system call failed, additional information indicates which function encountered the error

Action: check errno

DIA-27046: file size is not a multiple of logical block size

Cause: file size as indicated by stat is not correct, additional information indicates which function encountered the error

Action: verify that the file has not been overwritten or truncated

DIA-27047: unable to read the header block of file

Cause: read system call failed, additional information indicates which function encountered the error

Action: check errno

DIA-27048: skgfifi: file header information is invalid

Cause: possibly trying to use a non-database file as a database file

Action: verify that file is a database file

DIA-27049: unable to seek to and read the last block

Cause: an attempt was made to seek to and read the last block in file, additional information indicates which function encountered error

Action: check errno

DIA-27050: function called with invalid FIB/IOV structure

Cause: internal error, additional information indicates which function encountered error

Action: check for trace file and contact Oracle Support

DIA-27052: unable to flush file data

Cause: fsync system call returned error, additional information indicates which function encountered the error

Action: check errno

DIA-27053: blocksize in file header not a multiple of logical block size

Cause: the logical block size is invalid, additional information indicates the logical block size and the blocksize in the file header

Action: use a different logical block size, or do not reuse file

DIA-27054: NFS file system where the file is created or resides is not mounted with correct options

Cause: The file was on an NFS partition and either reading the mount tab file failed or the partition was not mounted with the correct mount option.

Action: Make sure mount tab file has read access for Oracle user and the NFS partition where the file resides is mounted correctly. For the list of mount options to use refer to your platform specific documentation.

DIA-27056: could not delete file

Cause: unlink system call returned error

Action: check errno

DIA-27057: cannot perform async I/O to file

Cause: internal error, query is being asked about async vector I/O when the file does not support async I/O

Action: check for trace file and contact Oracle Support

DIA-27058: file I/O question parameter is invalid

Cause: internal error, invalid query is being asked

Action: check for trace file and contact Oracle Support

DIA-27059: could not reduce file size

Cause: ftruncate system call returned error

Action: check errno

DIA-27060: could not set close-on-exec bit on file

Cause: fcntl system call returned error

Action: check errno

DIA-27061: waiting for async I/Os failed

Cause: aiowait function returned error

Action: check errno

DIA-27062: could not find pending async I/Os

Cause: There should have been some async I/Os in the system but a blocking aiowait indicates that there are no more I/Os. It could be either because of an Oracle bug or the vendor OS bug or due to a NFS server not responding

Action: check Oracle trace file, OS message files and contact Oracle Support

DIA-27063: number of bytes read/written is incorrect

Cause: the number of bytes read/written as returned by aiowait does not match the original number, additional information indicates both these numbers

Action: check errno

DIA-27064: cannot perform async I/O to file

Cause: internal error, asked to perform async I/O when IOV indicates that it cannot be performed on the file

Action: check for trace file and contact Oracle Support

DIA-27065: cannot perform async vector I/O to file

Cause: internal error, asked to perform async vector I/O when it cannot be performed on the file

Action: check for trace file and contact Oracle Support

DIA-27066: number of buffers in vector I/O exceeds maximum

Cause: internal error, number of buffers in vector I/O exceeds maximum allowed by the OSD, additional information indicates both these numbers

Action: check for trace file and contact Oracle Support

DIA-27067: size of I/O buffer is invalid

Cause: internal error, buffer size is either 0, or greater than SSTIOMAX or not a multiple of logical block size, additional information indicates where in function the error was encountered and the buffer size

Action: check for trace file and contact Oracle Support

DIA-27068: I/O buffer is not aligned properly

Cause: internal error, buffer is not aligned to SSIOALIGN boundary, additional information indicates where in function the error was encountered and the buffer pointer

Action: check for trace file and contact Oracle Support

DIA-27069: attempt to do I/O beyond the range of the file

Cause: internal error, the range of blocks being read or written is outside the range of the file, additional information indicates the starting block number, number of blocks in I/O, and the last valid block in the file

Action: check for trace file and contact Oracle Support

DIA-27070: async read/write failed

Cause: aioread/aiowrite system call returned error, additional information indicates starting block number of I/O

Action: check errno

DIA-27071: unable to seek to desired position in file

Cause: lseek system call returned error, additional information indicates block number in file to which seek was attempted

Action: check errno

DIA-27072: File I/O error

Cause: read/write/readv/writev system call returned error, additional information indicates starting block number of I/O

Action: check errno

DIA-27073: Trying to close a file which has async I/Os pending to be dequeued

Cause: internal error, the file is being closed but not all async I/Os to the file have been dequeued, additional information indicates number of I/Os pending on the file

Action: check for trace file and contact Oracle Support

DIA-27074: unable to determine limit for open files

Cause: The getrlimit() system call returned an error.

Action: Check errno.

DIA-27075: SSTMOFRC constant too large

Cause: internal error

Action: check for trace file and contact Oracle Support

DIA-27076: unable to set limit for open files

Cause: The setrlimit() system call returned an error.

Action: Check errno.

DIA-27077: too many files open

Cause: internal error, the number of files opened through skgfofi has reached the limit

Action: Check for trace file and contact Oracle Support.

DIA-27078: unable to determine limit for open files

Cause: The getrlimit() system call returned an error.

Action: Check errno.

DIA-27079: unable to set async IO limit

Cause: The setting of the limit for async I/O has failed.

Action: Check errno.

DIA-27080: too many files open

Cause: The number of files opened has reached the system limit.

Action: Check the error, and set system configuration values.

DIA-27081: unable to close the file

Cause: The close() system call failed.

Action: Check errno.

DIA-27083: waiting for async I/Os failed

Cause: The aio_waitn() library call returned an error.

Action: Check errno.

DIA-27084: unable to get/set file status flags

Cause: The fcntl() system call with F_GETFL/F_SETFL flag returned an error.

Action: Check errno.

DIA-27086: unable to lock file - already in use

Cause: the file is locked by another process, indicating that it is currently in use by a database instance.

Action: determine which database instance legitimately owns this file.

DIA-27087: unable to get share lock - file not readable

Cause: share lock request was made on a file not open for read access.

Action: file must be open read-only or read-write to get a share lock.

DIA-27088: unable to get file status

Cause: file not open or file descriptor is invalid.

Action: n/a

DIA-27089: unable to release advisory lock

Cause: release of file lock failed

Action: see errno

DIA-27090: Unable to reserve kernel resources for asynchronous disk I/O

Cause: The system call to reserve kernel resources for asynchronous I/O has failed.

Action: Check errno

DIA-27091: unable to queue I/O

Cause: read/write/readv/writev system call returned error, additional information indicates starting block number of I/O

Action: check errno

DIA-27092: size of file exceeds file size limit of the process

Cause: an attempt was made to open a file that exceeds the process's file size limit (ulimit), additional information shows the current limit (logical blocks) and the size of the file (logical blocks)

Action: increase the processes file size limit (ulimit) and retry

DIA-27093: could not delete directory

Cause: rmdir system call returned error

Action: check errno

DIA-27094: raw volume used can damage partition table

Cause: A raw device with VTOC information was provided as a database file.

Action: Make sure the disk partition that is provided to Oracle does not start at sector 0

DIA-27095: fail to get the disk sector size

Cause: The system call to get the sector size failed. Additional information indicates which function encountered the error.

Action: Check error number.

DIA-27096: fail to get file size

Cause: The system call to get file size failed. Additional information indicates which function encountered the error.

Action: Check error number.

DIA-27097: failed to set Access Control List ownership for ASM devices

Cause: The system call to set ACL ownership for ASM devices failed. Additional information indicates which function encountered the error.

Action: Refer to Microsoft documentation for an explanation of the accompanying error code and text.

DIA-27098: failed to rename file

Cause: The system call to change the file name failed. Additional information indicates which function encountered the error.

Action: Check the Oracle trace file for additional information on file name and reason for failure.

DIA-27099: failed to create file

Cause: The system call to create this file type in this file system failed. Check if the creation of this file type is supported in this file system. Additional information indicates which function encountered the error.

Action: Refer to Oracle documentation for additional details.

DIA-27100: shared memory realm already exists

Cause: Tried to start duplicate instances, or tried to restart an instance that had not been properly shutdown

Action: Use a different instance name, or cleanup the failed instance's SGA

DIA-27101: shared memory realm does not exist

Cause: Unable to locate shared memory realm

Action: Verify that the realm is accessible

DIA-27102: out of memory

Cause: Out of memory

Action: Consult the trace file for details

DIA-27103: internal error

Cause: internal error

Action: contact Oracle support

DIA-27104: system-defined limits for shared memory was misconfigured

Cause: System-defined shared memory limits were inadequate for Oracle.

Action: Consult the alert file for details.

DIA-27105: unable to support any system page size for shared memory allocation

Cause: Current configuration was not supported by any system page size.

Action: Consult the alert file for details.

DIA-27106: system pages not available to allocate memory

Cause: System page count for supported page sizes was misconfigured.

Action: Configure system page count as recommended in the alert file.

DIA-27107: AUTO value for USE_LARGE_PAGES parameter is no longer supported

Cause: The USE_LARGE_PAGES configuration parameter was set to AUTO.

Action: Consult the alert file for details.

DIA-27120: unable to remove shared memory segment

Cause: shmctl() call failed

Action: check permissions on segment, contact Oracle support

DIA-27121: unable to determine size of shared memory segment

Cause: shmctl() call failed

Action: check permissions on segment, contact Oracle support

DIA-27122: unable to protect memory

Cause: mprotect() call failed

Action: contact Oracle support

DIA-27123: unable to attach to shared memory segment

Cause: shmatt() call failed

Action: check permissions on segment, contact Oracle support

DIA-27124: unable to detach from shared memory segment

Cause: shmdt() call failed

Action: contact Oracle support

DIA-27125: unable to create shared memory segment

Cause: shmget() call failed

Action: contact Oracle support

DIA-27126: unable to lock shared memory segment in core

Cause: insufficient privileges to lock shared memory segment in core

Action: make sure process is running with necessary privileges.

DIA-27127: unable to unlock shared memory segment

Cause: insufficient privileges to unlock shared memory segment

Action: make sure process is running with necessary privileges.

DIA-27128: unable to determine pagesize

Cause: sysconf() call failed

Action: contact Oracle support

DIA-27133: unable to determine stacksize

Cause: getrlimit() call failed

Action: Contact Oracle Support Services.

DIA-27134: unable to set stacksize

Cause: setrlimit() call failed

Action: Contact Oracle Support Services.

DIA-27135: Operating System hard stack limit is set too low

Cause: Operating System hard stack limit was set too low.

Action: Check additional information for current and minimum limit. Increase the Operating System hard stack limit and retry.

DIA-27136: MPMT and VLM are both enabled

Cause: When the `_mpmt_enabled` parameter is set to TRUE, none of the following parameters should be set to TRUE: `* use_indirect_buffers` `* _db_block_cache_protect` `* _db_block_cache_clone`

Action: Either turn off Multi Process Multi Threads (MPMT) or turn off all the other parameters.

DIA-27137: unable to allocate large pages to create a shared memory segment

Cause: Parameter `USE_LARGE_PAGES` set to only, but large pages were not configured properly

Action: Check alert file for more information

DIA-27138: unable to allocate large pages with current parameter setting

Cause: With parameter USE_LARGE_PAGES set to only, none of the following parameters can be set: * memory_target/memory_max_target *
_db_block_cache_protect

Action: Either turn off the USE_LARGE_PAGES parameter setting, or turn off all the other parameters. Large pages are compatible with sga_target, sga_max_size and shared_pool_size.

DIA-27139: unable to reserve Oracle VM mapping in process address space

Cause: The address space region was already mapped.

Action: Contact Oracle Support Services.

DIA-27140: attach to post/wait facility failed

Cause: The program attempted to initialize the post/wait facility, but the facility could not be attached.

Action: Check for additional errors and contact Oracle Support.

DIA-27141: invalid process ID

Cause: process operation attempted using invalid process ID

Action: contact Oracle Support

DIA-27142: could not create new process

Cause: OS system call

Action: check errno and if possible increase the number of processes

DIA-27143: OS system call failure

Cause: OS system call failed

Action: check errno and contact Oracle support

DIA-27144: attempt to kill process failed

Cause: OS system call error

Action: check errno and contact Oracle Support

DIA-27145: insufficient resources for requested number of processes

Cause: OS system call error

Action: check errno and contact Oracle Support

DIA-27146: post/wait initialization failed

Cause: OS system call failed

Action: check errno and contact Oracle Support

DIA-27147: post/wait reset failed

Cause: OS system call failed

Action: check errno and contact Oracle Support

DIA-27148: spawn wait error

Cause: OS system call failed

Action: check errno and contact Oracle Support

DIA-27149: assignment out of range

Cause: internal error, requested conversion too large for type

Action: contact Oracle Support

DIA-27150: attempt to notify process of pending oradebug call failed

Cause: OS system call

Action: check errno contact Oracle Support

DIA-27151: buffer not large enough to hold process ID string

Cause: internal error

Action: contact Oracle Support

DIA-27152: attempt to post process failed

Cause: OS system call failed

Action: check errno and contact Oracle Support

DIA-27153: wait operation failed

Cause: OS system called failed

Action: check errno contact Oracle Support

DIA-27154: post/wait create failed

Cause: internal error, multiple post/wait creates attempted simultaneously

Action: check errno and contact Oracle Support

DIA-27155: could not execute file

Cause: OS system call failed

Action: check errno and contact Oracle Support

DIA-27156: request for process information failed

Cause: internal error

Action: contact Oracle Support

DIA-27157: OS post/wait facility removed

Cause: the post/wait facility for which the calling process is awaiting action is removed from the system

Action: check errno and contact Oracle Support

DIA-27158: process control failure

Cause: Oracle was unable to set the specified process control.

Action: Consult the Oracle Administrator's Guide.

DIA-27159: failure setting process scheduling priority

Cause: Oracle was unable to set the scheduling priority desired.

Action: Consult the Oracle Administrator's Guide.

DIA-27160: process requested to perform operation

Cause: The current process was requested to perform an operation by another process.

Action: This is used internally; no action is required.

DIA-27161: request for Oracle binary information failed

Cause: The program was unable to get information about the Oracle binary.

Action: Check for additional errors and contact Oracle support.

DIA-27162: thread creation failed

Cause: The program was unable to create a thread.

Action: Check errno and contact Oracle support.

DIA-27163: out of memory

Cause: The program ran out of memory when allocating a temporary data structure.

Action: Increase the amount of memory on the system.

DIA-27164: tried to join detached thread

Cause: The program tried to join a detached thread.

Action: This is an internal error; contact Oracle support.

DIA-27165: tried to join thread that does not exist

Cause: The program tried to join a thread that does not exist.

Action: This is an internal error; contact Oracle support.

DIA-27166: tried to join current thread

Cause: A thread in the program tried to join itself.

Action: This is an internal error; contact Oracle support.

DIA-27168: Translation from hostname to network address failed

Cause: Internal error

Action: Contact Oracle Support Services.

DIA-27170: Oracle RAC option of current Oracle binary differs from running instance

Cause: The Oracle installation environment may have been modified while the instance was running.

Action: Restore the environment to its original state when the instance was started or shutdown (abort) and restart the instance.

DIA-27190: skgfrd: sbtread2 returned error

Cause: sbtread returned an error. This happens while reading a backup file during a restore operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27191: sbtinfo2 returned error

Cause: sbtinfo2 returned an error. This happens while retrieving backup file information from the media manager's catalog.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27192: skgfcls: sbtclose2 returned error - failed to close file

Cause: sbtclose2 returned an error. This happens while closing a backup file during a backup or restore operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27193: sbtinfo2 did not return volume label

Cause: sbtinfo2 did not return the volume label information for the backup file that was just created.

Action: This is an internal error in the media management product. Contact the media management vendor.

DIA-27194: skgfdvcmd: sbtcommand returned error

Cause: sbtcommand returned an error. This happens when an rman SEND command is issued.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27195: proxy copy not supported

Cause: An attempt was made to do a proxy backup or restore, but the media management software installed with Oracle does not support proxy copy.

Action: Re-run the backup in non-proxy mode, or contact the media management vendor if the software is supposed to support proxy copy.

DIA-27196: skgfpbk: sbtpcbbackup returned error

Cause: sbtpcbbackup returned an error. This happens when a proxy backup is begun.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27197: skgfprrs: sbtpcrestore returned error

Cause: sbtpcrestore returned an error. This happens when a proxy restore is begun.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27198: skgfpvl: sbtpcvalidate returned error

Cause: sbtpcvalidate returned an error. This happens during a proxy backup or restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27199: skgfpst: sbtpcstatus returned error

Cause: sbtpcstatus returned an error. This happens during a proxy backup or restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27200: skgfpgo: sbtpcstart returned error

Cause: sbtpcstart returned an error. This happens during a proxy backup or restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27201: skgfpcm: sbtpccommit returned error

Cause: sbtpccommit returned an error. This happens during a proxy backup or restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27202: skgfpen: sbtpcend returned error

Cause: sbtpcend returned an error. This happens during a proxy backup or restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27203: skgfpcb: sbtpcquerybackup returned error

Cause: sbtpcquerybackup returned an error. This happens during a proxy backup.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27204: skgfpcqr: sbtpcqueryrestore returned error

Cause: sbtpcqueryrestore returned an error. This happens during a proxy restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27205: skgfpcn: sbtpccancel returned error

Cause: sbtpccancel returned an error. This happens during a proxy restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27206: requested file not found in media management catalog

Cause: A backup file used in a recovery manager catalog maintenance command was not found in the media management catalog.

Action: Retry the command with a different file.

DIA-27207: syntax error in device PARMS - parentheses mismatch or missing

Cause: User-supplied PARMS value has incorrect syntax.

Action: Retry the command with correct syntax: ENV=(..) BLKSIZE=nnnn

DIA-27208: syntax error in device PARMS - environment variable value missing

Cause: User-supplied PARMS value has incorrect syntax.

Action: Retry the command with correct syntax: ENV=(var1=val1,var2=val2,..)

DIA-27209: syntax error in device PARMS - unknown keyword or missing =

Cause: User-supplied PARMS value has incorrect syntax. The server expected to find ENV or BLKSIZE, but found an unknown keyword.

Action: Retry the command with correct syntax: ENV=(..) BLKSIZE=nnnn

DIA-27210: syntax error in device PARMS

Cause: User-supplied PARMS value has incorrect syntax.

Action: Retry the command with correct syntax: ENV=(..) BLKSIZE=nnnn

DIA-27211: Failed to load Media Management Library

Cause: User-supplied SBT_LIBRARY or libobk.so could not be loaded. Call to dlopen for media library returned error. See Additional information for error code.

Action: Retry the command with proper media library. Or re-install Media management module for Oracle.

DIA-27212: some entrypoints in Media Management Library are missing

Cause: media library does not have one of the following entrypoints : sbtinfo, sbtread, sbtwrite, sbtremove, sbtopen, sbtclose, sbtinit

Action: Retry the command with proper media library.

DIA-27213: failed to unload Media Management Library

Cause: dlclose for media library returned error. See Additional Additional information for error code.

Action: contact Oracle Support.

DIA-27214: skgfrsfe: file search failed

Cause: The FindNextFile function returned unexpected error.

Action: Check errors on the error stack for an explanation why the search for files could not be successfully executed.

DIA-27215: skgfgsmcs: sbtinfo2 returned unknown file

Cause: During an sbtinfo2() call, the media management software returned information about an unknown backup file.

Action: Contact the media management vendor.

DIA-27216: skgfgsmcs: sbtinfo2 returned a malformed response

Cause: The media management software returned a malformed response during an sbtinfo2() call.

Action: Contact the media management vendor.

DIA-27217: failed to load Media Management Library from secure location

Cause: SBT libraries were not installed in a secure location.

Action: Remove SBT_SECURE parameter or Request third party vendors to provide patch that installs SBT libraries in secured locations as mandated by Oracle.

DIA-27218: failed to read ACFS mirror

Cause: An attempt to communicate with the Oracle Automatic Storage Management Cluster File System (Oracle ACFS) kernel driver failed.

Action: Check errors on the error stack for an explanation of why communication with ACFS was not successful.

DIA-27219: syntax error in device PARMS - quotes missing or mismatch

Cause: The user-supplied PARMS value had incorrect syntax. Either quotes were missing or there was a mismatch in the ENV parameter.

Action: Retry the command with matching quotes inside ENV parameter.

DIA-27230: OS system call failure

Cause: OS system call failed

Action: check errno and contact Oracle support

DIA-27231: unable to close file

Cause: A file could not be closed.

Action: See accompanying errors.

DIA-27232: unable to get file information

Cause: Information about the file could not be obtained.

Action: See accompanying errors.

DIA-27233: file is not an ELF file

Cause: A file was not an ELF file.

Action: Check for file corruption and contact Oracle Support Services.

DIA-27234: unable to read file

Cause: A file could not be read.

Action: See accompanying errors.

DIA-27235: unable to map file region into memory

Cause: A file region could not be mapped into memory.

Action: See accompanying errors.

DIA-27236: unable to unmap file from memory

Cause: A file region could not be unmapped from memory.

Action: See accompanying errors.

DIA-27237: ELF file is not a relocatable object file

Cause: An ELF file was not the expected type.

Action: Supply the expected type of file.

DIA-27238: ELF file is not an executable

Cause: An ELF file was not the expected type.

Action: Supply the expected type of file.

DIA-27239: ELF file is not a shared object file

Cause: An ELF file was not the expected type.

Action: Supply the expected type of file.

DIA-27240: ELF file does not have a required section

Cause: An ELF file did not have a required section.

Action: Contact Oracle Support Services.

DIA-27241: ELF-shared library has multiple sections of the same type

Cause: An ELF-shared library had multiple sections of the same type.

Action: Contact Oracle Support Services.

DIA-27242: ELF file has invalid hash table entry size

Cause: An ELF file had an invalid hash table entry size.

Action: Contact Oracle Support Services.

DIA-27243: ELF file has too many relocation sections

Cause: An ELF file had too many relocation sections.

Action: Contact Oracle Support Services.

DIA-27244: unable to determine base value for data relocation from ELF file

Cause: An ELF file was missing important information.

Action: Contact Oracle Support Services.

DIA-27245: unable to dlopen() binary image

Cause: A file could not be accessed via dlopen().

Action: See accompanying errors and make file available.

DIA-27246: unable to open file

Cause: A file could not be opened.

Action: See accompanying errors and make file available.

DIA-27250: OS system call failure

Cause: OS system call failed

Action: check errno and contact Oracle support

DIA-27270: szingroup: malloc failed

Cause: The malloc library call failed to allocate space for a group list.

Action: This is possibly an operating system error. Contact Oracle Support Services.

DIA-27271: szingroup: group lookup failure

Cause: The 'getgrnam_r' library call failed to determine the members of a UNIX group.

Action: This is an internal error. Contact Oracle Support Services.

DIA-27300: OS system dependent operation: *string* failed with status: *string*

Cause: OS system call error

Action: contact Oracle Support

DIA-27301: OS failure message: *string*

Cause: OS system call error

Action: contact Oracle Support

DIA-27302: failure occurred at: *string*

Cause: OS system call error

Action: contact Oracle Support

DIA-27303: additional information: *string*

Cause: OS system call error

Action: contact Oracle Support

DIA-27351: conflicting values of job attributes *string* and *string*

Cause: The values of two attributes passed in to the CREATE_JOBS call or the JOB object constructor conflicted with each other. This is usually because both attributes cannot be non-NULL at the same time.

Action: Resolve the conflict by changing the value of one of the attributes and issue the call again.

DIA-27353: job attribute *string* is missing

Cause: An attribute needed to fully specify a job was not passed in to a call to CREATE_JOBS or the JOB object constructor.

Action: Issue the call again with the required attribute set.

DIA-27354: attribute *string* cannot be set for *string* jobs

Cause: The CREATE_JOBS call or the JOB object constructor was called with an argument that is illegal in the case of lightweight or in-memory jobs.

Action: Set the argument to the default value and issue the call again.

DIA-27356: invalid job argument

Cause: An invalid job argument was passed into either the CREATE_JOBS call or the JOB object constructor.

Action: Correct the argument value and issue the call again.

DIA-27357: duplicate reference to job object *string*

Cause: The scheduler CREATE_JOBS call had two or more references to the same job.

Action: Eliminate the duplicate references and issue the call again.

DIA-27359: duplicate reference to attribute *string* of job *string*

Cause: The scheduler SET_JOB_ATTRIBUTES call had two or more references to a specific attribute of a job.

Action: Eliminate the duplicate references and issue the call again.

DIA-27361: scheduler API invoked with illegal or inconsistent arguments

Cause: A DBMS_SCHEDULER API call was invoked with either illegal or inconsistent arguments.

Action: Refer to scheduler documentation for the call, make the necessary changes and issue the call again.

DIA-27362: batch API call completed with errors

Cause: Some of the commands submitted to a scheduler batch API call could not be successfully carried out because of errors. Other commands in the batch may have completed successfully.

Action: Check the view SCHEDULER_JOB_ERRORS to see which commands failed and why. Make the appropriate corrections and submit the failed commands again.

DIA-27363: invalid program for *string* job

Cause: An attempt was made to create a lightweight or in-memory job using an invalid program. A program used in a lightweight or in-memory job has to be enabled, has to be in the same schema as the job, and the program action has to be either a PL/SQL block or a stored procedure.

Action: Use a valid program for the lightweight job.

DIA-27364: remote database "*string*" already registered as *string*

Cause: The user attempted to register a remote database that was already registered.

Action: To update the registration information, the REPLACE argument of the REGISTER_REMOTE_DATABASE procedure should be set to TRUE. If the registration information is already current, no further action is needed.

DIA-27365: job has been notified to stop, but failed to do so immediately

Cause: The job specified in the stop_job command cannot be stopped immediately (because it is rolling back or blocked on a network operation), but it has been notified to stop. This means it will be stopped as soon as possible after its current uninterruptable operation is done.

Action: No action is required for the job to be stopped, but calling stop_job with force (if you have the privilege) may cause the job to be stopped sooner.

DIA-27366: job "string"."string" is not running

Cause: An attempt was made to stop a job that was not running.

Action: Verify the status of the job. If the job is running but this message is still being returned, contact Oracle support.

DIA-27367: program "string"."string" associated with this job is disabled

Cause: An attempt was made to run a job whose program has been disabled.

Action: Reenable the program before running the job.

DIA-27369: job of type EXECUTABLE failed with exit code: string

Cause: A problem was encountered while running a job of type EXECUTABLE. The cause of the actual problem is identified by the exit code.

Action: Correct the cause of the exit code and reschedule the job.

DIA-27370: job slave failed to launch a job of type EXECUTABLE

Cause: The scheduler ran into an error when the job slave tried to start a job of type EXECUTABLE. The rest of the error stack will provide more detailed information on what the exact problem was.

Action: Correct the problem specified in the error stack and reschedule the job.

DIA-27371: jobs of type EXECUTABLE are not supported on this platform

Cause: The user tried to create a job or program of type EXECUTABLE on a platform where such jobs are not supported.

Action: Switch to a different platform or create a different type of job or program.

DIA-27372: length of action and arguments exceeds platform limit string

Cause: The total length of the job or program action and the arguments exceeds the platform limit specified.

Action: Reduce the total length by specifying fewer and/or shorter arguments

DIA-27373: unknown or illegal event source queue

Cause: The source queue specified for the event based job or event based schedule was either not found or was of the wrong type.

Action: Check if the queue exists. If it does make sure it is a multiple consumer queue and it is a post 8.1 compatible queue. Single consumer queues and old-style queues cannot be used as event source queues.

DIA-27374: insufficient privileges on event source queue

Cause: The job owner had insufficient privileges on the event source queue that was specified for the job.

Action: The job owner has to have dequeue privileges on event source queue or he has to have manage queue or dequeue any queue system privileges. Make sure one of these privileges is granted.

DIA-27375: valid agent name must be specified for secure queues

Cause: The queue specified for the event based job or schedule was a secure queue and either no agent name was specified or an invalid agent name was specified.

Action: If no agent name was specified, retry the call with a valid agent name. If the agent name was valid, check if the agent is currently subscribed to the queue and, in the case of jobs, check if the agent has been authorized to act as the job owner.

DIA-27376: event condition cannot be NULL

Cause: A null event condition was passed in for an event based job or schedule. This is not allowed.

Action: Pass in a legal event condition.

DIA-27377: windows cannot have event based schedules

Cause: Event based schedules for windows are currently not supported.

Action: Use a time-based schedule instead.

DIA-27378: cannot stop jobs of type EXECUTABLE on this platform

Cause: An attempt was made to stop a job of type EXECUTABLE on a platform where the stop operation was not supported.

Action: If the attempt to stop the job was made with the FORCE option set to FALSE, try again but change the FORCE option to TRUE.

DIA-27379: INSTANCE_ID attribute conflicts with job class settings

Cause: The value of the INSTANCE_ID attribute of the job conflicted with the value of the SERVICE attribute of its job class.

Action: Change the value of the INSTANCE_ID attribute or place the job in a job class whose settings do not conflict with the INSTANCE_ID attribute. Then re-enable the job.

DIA-27380: not enough units to satisfy the constraint

Cause: There were not enough resources to satisfy the constraint.

Action: Add more resource units.

DIA-27381: job cannot run, state is RESOURCE_UNAVAILABLE

Cause: The job could not run because one of the resources was in a BLOCKED_ALL_JOBS state.

Action: Change the resource to either ENFORCE_CONSTRAINTS or IGNORE_CONSTRAINTS.

DIA-27382: job type *string* has errors in the job action

Cause: There were errors in the job action when the FAIL_ON_SCRIPT_ERROR job attribute was set to TRUE.

Action: Ensure that the job action has no errors or set FAIL_ON_SCRIPT_ERROR job attribute to FALSE. FAIL_ON_SCRIPT_ERROR is only valid for SQL_SCRIPT, BACKUP_SCRIPT, EXECUTABLE and EXTERNAL_SCRIPT job types.

DIA-27399: job type EXECUTABLE requires the CREATE EXTERNAL JOB privilege

Cause: The owner of a job of type EXECUTABLE does not have the CREATE EXTERNAL JOB system privilege.

Action: Grant the CREATE EXTERNAL JOB system privilege to the job owner or create another job in a schema which does have the CREATE EXTERNAL JOB system privilege.

DIA-27400: In a PDB, the JOB_QUEUE_PROCESSES initialization parameter can only be set to 1000 or 0.

Cause: A value other than 1000 or 0 was specified for the JOB_QUEUE_PROCESSES initialization parameter. Inside a pluggable database (PDB), the JOB_QUEUE_PROCESSES initialization parameter can only accept the values of 1000 or 0 to indicate whether or not jobs should run in the PDB.

Action: Specify a proper value for this parameter.

DIA-27411: empty string is not a valid repeat interval.

Cause: An empty string '' was provided as a repeat interval for a window or a schedule.

Action: Specify a valid repeat interval, e.g., 'FREQ=DAILY;BYHOUR=8;BYMINUTE=0;BYSECOND=0' for a job that executes daily at 8am.

DIA-27412: repeat interval or calendar contains invalid identifier: *string*

Cause: The calendar string or calendar definition for the repeat interval of a job, schedule or window contained an unsupported keyword or reference to an undefined calendar.

Action: Correct the repeat interval such that it no longer contains the invalid keyword.

DIA-27413: repeat interval is too long

Cause: The repeat interval consisted of a calendar string larger than the maximum size allowed.

Action: Use a shorter calendar string for the repeat interval.

DIA-27414: Invalid *string* clause value

Cause: The BY clause value was not recognized or was out-of-range for the frequency specified.

Action: Specify a valid BY clause value.

DIA-27415: repeat interval or calendar must start with a frequency clause

Cause: The specified calendar string for the repeat interval did not start with a frequency clause.

Action: Create a repeat interval that starts with a frequency clause, for example 'FREQ=YEARLY;BYMONTH=FEB'

DIA-27416: BYDAY clause in repeat interval or calendar contains an invalid weekday

Cause: The BYDAY clause of the repeat interval contained a value that did not represent a weekday.

Action: Use the correct three letter abbreviations for weekdays, for example MON for Monday and FRI for Friday.

DIA-27417: BYWEEKNO clause requires YEARLY clause

Cause: A repeat interval or calendar contained a BYWEEKNO clause with a frequency other than yearly.

Action: Remove the BYWEEKNO clause or change the frequency to YEARLY.

DIA-27418: syntax error in repeat interval or calendar

Cause: The repeat interval or calendar definition was not recognized as valid syntax.

Action: Specify a valid repeat interval.

DIA-27419: unable to determine valid execution date from repeat interval

Cause: The specified repeat interval contained conflicting clauses that made it impossible to ever find a matching date, e.g., 'FREQ=YEARLY;BYMONTH=FEB;BYMONTHDAY=31'. Alternatively, the scheduler reached its maximum number of attempts to try to find a valid execution date. This occurs when theoretically there is a valid execution date far in the future, but the scheduler took too many attempts to determine this date.

Action: Remove the conflicting clauses, or simplify the repeat interval so that it is easier to determine the next execution date.

DIA-27420: Following message from *string* interval interpreter

Cause: The repeat interval or calendar definition was not recognized as valid syntax.

Action: Specify a valid repeat interval.

DIA-27421: calendar expression restriction *string* encountered

Cause: The calendar expression was not valid because a limit test failed. For example, the maximum value of the interval that can be specified in the INTERVAL clause is limited to a value derived from the frequency clause.

Action: Specify a valid calendar definition.

DIA-27422: usage of *string* not supported in embedded calendar application "*string*".*string*"

Cause: The main calendar definition used an embedded calendar in an INCLUDE, EXCLUDE, INTERSECT, or FREQ clause for which extra limitations apply.

Action: Remove the specific clause from the calendar definition.

DIA-27423: calendar clause *string* specified more than once

Cause: The calendar definition contained a clause that was specified twice or more times.

Action: Append the values in the second clause to the first clause and remove the second clause.

DIA-27424: calendar clauses *string* and *string* are incompatible

Cause: The calendar definition contained clauses that were incompatible.

Action: Change or remove either clause.

DIA-27425: instance_id cannot be specified if database is not in Oracle RAC mode

Cause: 'stop_job' was called with 'instance_id' outside Oracle RAC mode.

Action: Do not specify this parameter for 'stop_job' unless in Oracle RAC mode.

DIA-27431: chain "*string*".*string*" has a user-managed rule set

Cause: An attempt was made to modify a rule set that is not managed by the Scheduler.

Action: Modify the rule set directly using the dbms_rule_adm package or create another chain without specifying a rule set.

DIA-27432: step "*string*" does not exist for chain "*string*".*string*"

Cause: The step specified does not exist for the given chain.

Action: Reissue the command using a step that exists for this chain.

DIA-27433: cannot alter state of step "*string*" for job "*string*".*string*" to *string*

Cause: The step cannot be changed to the requested state. The state of a running step cannot be changed. A step which is running or has already run cannot be run again.

Action: Wait until the step has finished running.

DIA-27434: cannot alter chain step job "*string*".*string*".*string*"

Cause: A step job of a running chain cannot be altered, only stopped or dropped.

Action: Stop or drop the chain step job or alter the running chain step instead.

DIA-27435: chain job terminated abnormally

Cause: A chain job has ended abnormally. The error code for the running chain could not be retrieved.

Action: No action necessary. The job will run again when it is scheduled to.

DIA-27436: Scheduler agent operation failed with message: *string*

Cause: The Scheduler agent encountered an unexpected error when trying to perform the specified action.

Action: Review the provided message and the Scheduler agent log for information on how to fix the issue or contact Oracle Support Services.

DIA-27451: *string* cannot be NULL

Cause: An attempt was made to set a NOT NULL scheduler attribute to NULL.

Action: Reissue the command using a non-NULL value for the specified attribute.

DIA-27452: "*string*" is an invalid name for a database object.

Cause: An invalid name was used to identify a database object.

Action: Reissue the command using a valid name.

DIA-27453: "*string*" is an invalid job or program argument name.

Cause: An invalid job or program argument name was specified.

Action: Reissue the command using a valid name for this argument.

DIA-27454: argument name and position cannot be NULL

Cause: The name or position of a program or job argument was defined as NULL.

Action: Reissue the command providing either a valid argument name or valid argument position.

DIA-27455: Only "SYS" is a valid schema for a *string*.

Cause: A non-SYS schema was specified for an object that must be in the SYS schema.

Action: Reissue the command, leaving out the schema name or using the schema name of SYS.

DIA-27456: not all arguments of program "*string*".*string*" have been defined

Cause: The number_of_arguments attribute of the named program did not match the actual number of arguments that have been defined.

Action: Define as many arguments as the number of arguments, or change the number of arguments.

DIA-27457: argument *string* of job "*string*".*string*" has no value

Cause: No value was provided for the job argument with the specified position.

Action: Provide a value for the job argument using any of the `set_job_xxxx_value()` routines. Or, when using a named program, specify a default value for the corresponding argument of the program.

DIA-27458: A program of type PLSQL_BLOCK cannot have any arguments.

Cause: An attempt was made to create or enable a program of type PLSQL_BLOCK with arguments. This is not allowed.

Action: Change the number of arguments to zero, or change the type of the program.

DIA-27459: A program of type EXECUTABLE must have character-only arguments.

Cause: A program of type EXECUTABLE was created or enabled with one or more arguments of non-character datatypes.

Action: Change the arguments to be of character-only datatypes.

DIA-27460: cannot execute disabled job "*string*".*string*"

Cause: An attempt was made to run a job that is disabled.

Action: Enable the job and then reschedule the job.

DIA-27461: The value for attribute *string* is too large.

Cause: The value that was provided for the specified attribute was too large.

Action: Reissue the command using a smaller or shorter value.

DIA-27463: invalid program type *string*

Cause: An invalid program type was specified.

Action: Reissue the command using a valid program type.

DIA-27464: invalid schedule type *string*

Cause: An invalid schedule type was specified.

Action: Reissue the command using a valid schedule type.

DIA-27465: invalid value *string* for attribute *string*

Cause: An invalid value was provided for the specified attribute.

Action: Reissue the command using a valid value for this attribute.

DIA-27467: invalid datatype for *string* value

Cause: The value provided for the named scheduler attribute was of an invalid datatype.

Action: Reissue the command using a value of the correct datatype.

DIA-27468: "*string*".*string*" is locked by another process

Cause: An attempt was made to read or modify the state of the named scheduler object when another process was also updating the same object and held the lock.

Action: Retry the operation. Scheduler locks are held for a very short duration. If the error persists, contact Oracle Support.

DIA-27469: *string* is not a valid *string* attribute

Cause: A non-existent attribute was specified.

Action: Reissue the command using a valid attribute for that specific scheduler object.

DIA-27470: failed to re-enable "*string*"."*string*" after making requested change

Cause: A change was made to an enabled scheduler object that caused it to become disabled.

Action: Alter the object so that it becomes valid and then enable it.

DIA-27471: window "*string*"."*string*" is already closed

Cause: An attempt was made to close a window that was not open.

Action: No action required.

DIA-27472: invalid metadata attribute *string*

Cause: An invalid metadata attribute was specified.

Action: Reissue the command using a valid metadata attribute.

DIA-27473: argument *string* does not exist

Cause: An argument which was specified does not exist.

Action: Reissue the command using an argument name defined by the program or using a valid argument position.

DIA-27474: cannot give both an argument name and an argument position

Cause: An argument was specified using both a name and a position.

Action: Reissue the command using either the argument name or the argument position but not both.

DIA-27475: unknown *string* "*string*"."*string*"

Cause: The specified object did not exist, privileges were not granted, or the object was of the wrong type.

Action: Specify an object of the correct type on which you have privileges.

DIA-27476: "*string*"."*string*" does not exist

Cause: A database object was specified that does not exist.

Action: Reissue the command using an object that exists or create a new object and then reissue this command.

DIA-27477: "*string*"."*string*" already exists

Cause: An attempt was made to create an object with a name that has already been used by another object in the same schema.

Action: Reissue the command using a different name or schema.

DIA-27478: job "*string*"."*string*" is running

Cause: An attempt was made to drop a job that is currently running.

Action: Stop the job and then reissue the command, or reissue the command specifying the force option to stop the job first.

DIA-27479: Cannot *string* "*string*"."*string*" because other objects depend on it

Cause: An attempt was made to drop or disable a scheduler object that has jobs associated with it without specifying the force option.

Action: Alter the associated jobs so they do not point to the scheduler object being dropped or disabled and then reissue the command. Alternatively reissue the command specifying the force option. If the force option is specified and a scheduler object is being dropped, all associated jobs will be disabled.

DIA-27480: window "*string*" is currently open

Cause: An attempt was made to drop a window that is currently open, or to manually open a window while another window is already open.

Action: Close the window that is open and then reissue the command, or reissue the command while setting the force option to TRUE.

DIA-27481: "*string*"."*string*" has an invalid schedule

Cause: An attempt was made to enable a job or window that has an invalid schedule.

Action: Alter the schedule of the job or window so that it is valid and then reissue the enable command.

DIA-27483: "*string*"."*string*" has an invalid END_DATE

Cause: An attempt was made to enable a job or window that has an invalid end_date. Either the end_date is before the start_date or the end_date is in the past.

Action: Alter the job or window so that the end date becomes valid (possibly null) and then reissue the command.

DIA-27484: Argument names are not supported for jobs without a program.

Cause: An attempt was made to set or reset a job argument by using the name of the argument. Identifying job arguments by their name is only supported in combination with jobs that are based on programs. Jobs that are not using a program cannot have named arguments.

Action: Use argument position instead of name and then issue the command again.

DIA-27485: argument "*string*" already exists at a different position

Cause: An attempt was made to create or replace an argument with a name that is already used by an argument at a different position.

Action: Use a different name for the argument or drop or alter the argument which already exists with this name and then reissue the command.

DIA-27486: insufficient privileges

Cause: An attempt was made to perform a scheduler operation without the required privileges.

Action: Ask a sufficiently privileged user to perform the requested operation, or grant the required privileges to the proper user(s).

DIA-27487: invalid object privilege for a *string*

Cause: The granted object privilege is not valid for the specified scheduler object.

Action: Check the scheduler documentation to verify which object privileges can be granted on which scheduler objects.

DIA-27488: unable to set *string* because *string* was/were already set

Cause: An attempt was made to set an object's attribute even though one or more conflicting attributes of the same object had already been set.

Action: Set the other conflicting attributes to NULL and then reissue the command.

DIA-27489: unable to process job "*string*"."*string*" from job class "*string*"

Cause: An error was encountered while processing the named job from the specified job class.

Action: Resolve the error for this job and then reissue the command. See the next error message on the stack to find out what the error for the job is.

DIA-27490: cannot open disabled window "*string*"."*string*"

Cause: The user tried to open a disabled window.

Action: Enable the window and then try to open it again.

DIA-27491: repeat_interval and start_date cannot both be NULL

Cause: An attempt was made to set both repeat_interval and start_date to equal NULL for a Scheduler window or schedule.

Action: If either repeat_interval or start_date is set to equal NULL, the other should be set to a non-NULL value.

DIA-27492: unable to run job "*string*"."*string*": scheduler unavailable

Cause: A job run with current session set to false can not be issued if the scheduler is not active. Check value of job_queue_processes parameter, issue dbms_ijob.set_enabled(true), database is in upgrade/migrate mode, database is in data guard mode, or scheduler attribute SCHEDULER_DISABLED is set to TRUE

Action: Run the job in the current session or activate the scheduler

DIA-27493: In-memory job "*string.string*" cannot be modified

Cause: Once enabled, the full in-memory job could not be further modified.

Action: The only actions that can be taken now are to stop or drop the job.

DIA-27494: operation not permitted on lightweight and in-memory jobs

Cause: An attempt was made to perform an action that was not permitted.

Action: Check Oracle Scheduler documentation to see which actions can be performed on the desired job.

DIA-27495: attribute *string* cannot be set for in-memory jobs

Cause: An attempt was made in a CREATE or SET_ATTRIBUTE call to set an attribute that could not be set for run-time in-memory jobs.

Action: If you need to set this attribute, use either regular or lightweight jobs.

DIA-27496: credential "*string*"."*string*" is disabled

Cause: An attempt was made to run a job, file watcher or external procedure whose credential was disabled.

Action: Reenable the credential before running the job, file watcher or external procedure.

DIA-27497: operation is not permitted inside a pluggable database

Cause: This operation was not permitted in a pluggable database.

Action: Log into the root database and retry the operation.

DIA-27498: resource constraint object type mismatch

Cause: Not all of the resource constraints of a resource were of the same type.

Action: Delete existing constraints for the resource.

DIA-27499: in-memory job metadata is too large

Cause: The in-memory job was too large. Due to the need to keep in-memory jobs efficient and performing well, we limit the size of in-memory job metadata to 8 kilobytes. This includes the space used for job argument values.

Action: Reduce the size of the job metadata and try again. If all the metadata is needed, then you should create some other type of job.

DIA-27500: inter-instance IPC error

Cause: This is an operating system/cluster interconnect error.

Action: Check the extra information and contact Oracle Support Services.

DIA-27501: IPC error creating a port

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27502: IPC error deleting OSD context

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27503: IPC error attempting to cancel request

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27504: IPC error creating OSD context

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27505: IPC error destroying a port

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27506: IPC error connecting to a port

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27507: IPC error disconnecting from a port

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27508: IPC error sending a message

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27509: IPC error receiving a message

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27510: IPC error waiting for a request to complete

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27512: IPC error posting a process

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27513: parameter *string* contains invalid value *string*

Cause: The program could not identify the value as an IP address.

Action: Change the value to be a valid IP address.

DIA-27514: IPC error copying memory to remote process

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27515: inadequate memlock limit or driver settings

Cause: Inter Process Communication(IPC) queue creation failed due to inadequate memlock limit or driver settings.

Action: Set a higher memlock limit and review the network driver settings to ensure that this limit is accepted.

DIA-27542: Failed to unprepare a buffer prepared for remote update

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27543: Failed to cancel outstanding IPC request

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27544: Failed to map memory region for export

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27545: Fail to prepare buffer for remote update

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27546: Oracle compiled against IPC interface version *string.string* found version *string.string*

Cause: A misconfiguration or installation error occurred.

Action: Install the IPC library for this release of Oracle.

DIA-27547: Unable to query IPC OSD attribute *string*

Cause: This is an operating system-dependent IPC error.

Action: Contact Oracle support Services.

DIA-27548: Unable to unprepare IPC buffer

Cause: This is an operating system-dependent IPC error.

Action: Contact Oracle support Services.

DIA-27550: Target ID protocol check failed. tid vers=*string*, type=*string*, remote instance number=*string*, local instance number=*string*

Cause: The local Oracle Real Application Cluster instance and remote instance are running with incompatible implementation of the inter-instance IPC protocol library. A misconfiguration or installation error occurred.

Action: Check additional error messages in the alert log and the process trace file.

DIA-27552: exception accessing Global Shared Memory (GSM) in Oracle RAC cluster

Cause: GSM is used to provide shared memory semantics on an Oracle RAC cluster. An error has occurred accessing shared memory hosted on a remote node. This is an internal programming error.

Action: Contact Oracle Support Services.

DIA-27553: incompatible IPC settings in Oracle RAC cluster

Cause: Inter-process Communication (IPC) settings were not compatible with other instances in the Oracle RAC cluster.

Action: Check additional error messages in the alert log and IPC0 trace file.

DIA-27601: Cell storage initialization failed, cell library error code [string]

Cause: Cell storage client did not succeed in initializing.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27602: Failure to publish network status information, cell library error code [string]

Cause: Network status information publishing failed.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27603: Cell storage I/O error, I/O failed on disk string at offset string for data length string

Cause: Cell storage I/O read or write failed, possibly due to a configuration problem or a hardware failure.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27604: Cell storage ioctl error, ioctl failed on disk string

Cause: Ioctl operation on a cell storage disk failed.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27605: Smart I/O failed as a handle could not be obtained to the cell "string" as the cell is not accessible.

Cause: The cell could have been unavailable.

Action: Ensure the cell is available. Check the network connectivity.

DIA-27606: Smart I/O failed because the diskgroup was found to be unmounted. tablespace number: "string", file number: "string"

Cause: The diskgroup to which the specified file belongs was found to be unmounted.

Action: Ensure that the diskgroup to which the specified file belongs is mounted.

DIA-27607: Smart I/O failed because there were no online disks. tablespace number: "string", file number: "string"

Cause: There were no online disks found for the specified file.

Action: Ensure the diskgroup to which the specified file belongs to is mounted. Ensure that the disks are online. Check the availability of cells and check the network.

DIA-27608: Smart I/O failed because the disk "string" on the cell "string" was not open. error code: "string", "string"

Cause: The specified disk on the specified cell could not be opened.

Action: Ensure the cell is available. Check the network.

DIA-27609: Smart I/O failed due to a network error to the cell "*string*". error code "*string*", "*string*"

Cause: The specified cell could not be connected to.

Action: Ensure that the cell is available. Check the network.

DIA-27610: Smart I/O failed due to shortage of memory on the cell "*string*"

Cause: The specified cell had a shortage of memory to perform smart I/O.

Action: Reduce the parallel degree or number of Oracle sessions executing smart I/O.

DIA-27611: Smart I/O failed due to a block corruption detected on the host. The block was received from cell "*string*". disk: "*string*", block: "*string*", disk offset: "*string*"

Cause: The data block indicated was corrupted on the host, but a corruption was not found on the cell.

Action: This may be due to a transient network error or a real block corruption. Check your network for any errors. Analyze the segment to which the file belongs. If there is indeed a corruption, try to restore the block using RMAN block recovery. If there is a trace file, report the errors in it to Oracle Support Services. If analyze did not report an error and network did not have any error, report the problem to Oracle Support Services as this appears to be a software error.

DIA-27612: Smart I/O failed due to a block corruption detected on the cell "*string*". disk: "*string*", block: "*string*", disk offset: "*string*"

Cause: The data block indicated was found to be corrupted on the cell.

Action: This may be due to a software error or a real data corruption. Analyze the segment. If there is indeed a block corruption, try to restore the block using RMAN block level recovery. If there is a trace file, report the errors in it to Oracle Support Services. If analyze did not report an error, report the problem to Oracle Support Services as this appears to be a software error.

DIA-27613: Smart I/O failed due to an I/O error on the cell "*string*". disk: "*string*", block: "*string*", disk offset: "*string*" I/O size: "*string*"

Cause: An I/O request failed on the specified cell and disk.

Action: Check the specified disk on the cell.

DIA-27614: Smart I/O failed due to an error "*string, string*" from the cell "*string*". disk: "*string*", block: "*string*", disk offset: "*string*" I/O size: "*string*"

Cause: An I/O request failed, due to an internal error on the specified cell and disk.

Action: Report the problem to Oracle Support Services along with the process trace file and alert log.

DIA-27615: Smart I/O file to ASM disk translation failed with error: *string*.

Cause: An internal error caused a smart I/O operation to fail.

Action: Report the problem to Oracle Support Services along with the process trace file and alert log.

DIA-27616: ASM Allocation Unit: *string*

Cause: This error message is usually accompanied by another message, indicating the real problem. This message exists to provide additional information to Oracle Support Services.

Action: Check the next error message.

DIA-27617: Smart I/O failed because of an internal error. Cell "*string*", disk "*string*", cell library error code "*string, string*", error information "*string*"

Cause: An internal error caused a smart I/O operation to fail.

Action: Report the problem to Oracle Support Services along with the process trace file and alert log.

DIA-27618: Smart I/O failed because of an internal error. Cell "*string*", cell library error code "*string, string*", error information "*string*"

Cause: An internal error caused a smart I/O operation to fail.

Action: Report the problem to Oracle Support Services along with the process trace file and alert log.

DIA-27619: Smart I/O failed because of an internal error when determining the time zone file version. Error code "*string*"

Cause: An internal error caused a smart I/O operation to fail.

Action: Report the problem to Oracle Support Services along with the process trace file and alert log.

DIA-27621: The value of *string* is not valid for parameter *string*

Cause: Incorrect value is specified for an internal parameter.

Action: This parameter should only be set by Oracle Support Services. Check the additional diagnostic information in the trace file and contact Oracle Support Services for recommendations on setting this parameter.

DIA-27623: Cell automation SQL action failed

Cause: Cell automation manager or worker process failed to execute SQL action through OCI recursive call.

Action: Check the alert log and process trace file for additional information. Contact Oracle Support Services if the errors specified in the trace file cannot be corrected.

DIA-27624: Smart I/O failed because the number of reconnects to the cell "*string*" exceeded the maximum allowed "*string*".

Cause: The number of reconnects to a cell exceeded the maximum allowed. This problem indicates a possible network problem or a software problem on the cell.

Action: If the cellsrv is being restarted repeatedly, in a short interval, check the system load. The problem may be corrected by rebooting the cell. If the system is not overloaded, the repeated restarts are likely due to software problem. Report the problem to Oracle Support Services along with alert log and trace files. If the cellsrv is not restarting, the problem may be in the IB network. Check the network between the host and all the cells.

DIA-27625: Exadata configuration failed.

Cause: One or both of the files, cellinit.ora and cellip.ora, were either invalid or missing.

Action: Check if the files, cellinit.ora and cellip.ora, are both present. They can be found in the \$OSSCONF directory. If both are present, check if their contents are valid and correct. If the files are invalid or missing, produce files with valid information in the \$OSSCONF directory. For information on how to set up these files, see the Exadata Users Guide.

DIA-27626: Exadata error: *string* (*string*)

Cause: The cause of this error is dependent on the context in which this error is reported.

Action: See the primary error reported with this error.

DIA-27627: Software edition incompatible with Exadata storage.

Cause: Oracle Exadata can be used only with Oracle Database Enterprise Edition.

Action: Check if Oracle is linked with the Enterprise Edition options.

DIA-27628: An invalid value was specified for the parameter *string*.

Cause: An invalid value was specified for a parameter.

Action: Check the additional diagnostic information in the trace file and contact Oracle Support Services if further help is required.

DIA-27629: External table smart I/O failed because the cell is not accessible.

Cause: The cell was unavailable.

Action: Ensure the cell is available.

DIA-27631: External encryption or decryption is disabled.

Cause: Either decryption was disabled in the cellinit.ora initialization parameter file, or the cryptography mode requested by the database was incompatible with what was available on the cell.

Action: No action is necessary. The Exadata cell returns data in pass-through mode when encryption or decryption is required.

DIA-27778: MGA namespace is already marked for deletion.

Cause: Managed Global Area (MGA) namespace was already marked for deletion. No further attaches are allowed.

Action: None

DIA-27779: MGA segment creation failure

Cause: The Managed Global Area (MGA) segment creation failed.

Action: Check the other error messages for additional information.

DIA-27800: invalid configuration (*string*) for event creation (*string*).

Cause: Invalid configuration values were given while creating the event.

Action: None

DIA-27801: event notification handle not valid

Cause: The event notification handle was not valid.

Action: None

DIA-28000: The account is locked.

Cause: The wrong password was entered multiple consecutive times as specified by the profile parameter FAILED_LOGIN_ATTEMPTS, or the DBA locked the account, or the user is a common user locked in the root container.

Action: Wait for the PASSWORD_LOCK_TIME or contact the DBA.

DIA-28001: the password has expired

Cause: The user's account has expired and the password needs to be changed.

Action: Change the password or contact the database administrator.

DIA-28002: the password will expire within *string* days

Cause: The password of the user's account has expired. Since the user's account is associated with a password profile with a limited password grace period and grace period is yet to elapse, the user will not be prompted to input a new password and ORA-28002 warning message will continue to be displayed upon each successful login to the user account, until the user changes their password. Once the grace period elapses, the password will expire and user login will start failing with ORA-28001 error, until the user changes their password.

Action: Change the password or contact the database administrator.

DIA-28003: password verification for the specified password failed

Cause: The new password did not meet the necessary complexity specifications and the password_verify_function failed

Action: Enter a different password. Contact the DBA to know the rules for choosing the new password

DIA-28004: invalid argument for function specified in PASSWORD_VERIFY_FUNCTION *string*

Cause: The password verification function does not have the required number and type of input/output arguments and/or the return argument

Action: Check the manual to find out the format of the password verification function

DIA-28005: invalid logon flags

Cause: The flags are not properly set or conflicting flags are set in making calls

Action: Call the function with appropriate flags set.

DIA-28006: conflicting values for parameters *string* and *string*

Cause: The parameters PASSWORD_REUSE_TIME and PASSWORD_REUSE_MAX cannot both be set. One parameter should be unlimited while other is set

Action: Set one value to UNLIMITED explicitly

DIA-28007: the password cannot be reused

Cause: The password cannot be reused for the specified number of days or for the specified number of password changes

Action: Try the password that you have not used for the specified number of days or the specified number of password changes Refer to the password parameters in the CREATE PROFILE statement

DIA-28008: invalid old password

Cause: old password supplied is wrong; Hence user cannot be authenticated using old password

Action: Supply the correct old password for authentication

DIA-28009: connection as SYS should be as SYSDBA or SYSOPER

Cause: connect SYS/*password* is no longer a valid syntax

Action: Try connect SYS/*password* as SYSDBA or connect SYS/*password* as SYSOPER

DIA-28010: cannot expire external or global accounts

Cause: If a user account is created as IDENTIFIED EXTERNALLY, or IDENTIFIED GLOBALLY, this account cannot be expired

Action: Try to expire the password of the user that has database password

DIA-28011: the password has expired; change your password now

Cause: The password of the user's account has expired. Since the user's account is associated with a password profile with an UNLIMITED password grace period, the user will not be prompted to input a new password (as normally happens for accounts with a limited grace period). Instead, ORA-28011 warning message will continue to be displayed upon each successful login to the user account, until the user changes their password.

Action: Change the password or contact the database administrator.

DIA-28012: connection as *string* should use AS *string*

Cause: An attempt was made to connect as an administrative user without using AS SYSBACKUP, AS SYSDG, or AS SYSKM.

Action: Try connecting with AS SYSBACKUP, AS SYSDG, or AS SYSKM.

DIA-28013: the password has expired

Cause: The password of the proxy user expired.

Action: Connect directly as proxy user to change the password or contact the DBA.

DIA-28014: cannot drop administrative users

Cause: An attempt was made to drop administrative users. Administrative users can be dropped only by SYS during migration mode.

Action: Try dropping administrative users during migration mode.

DIA-28015: account unlock attempted on read-only database but a conflicting account lockout on the primary exists

Cause: An attempt to unlock an account on a read-only database was prevented, because the account was previously marked as locked on the primary database. All attempts to unlock the account on the read-only database will be prevented as long as the overriding "account locked" condition exists at the primary database.

Action: If this database is part of a Data Guard configuration, perform the account unlock action on the primary database. If this database is read-only, then set the database to read/write and perform the account unlock action.

DIA-28016: Privilege *string* cannot be granted to SYS.

Cause: An attempt was made to grant SYSBACKUP, SYSDG or SYSKM to the SYS user. These administrative privileges cannot be granted to SYS.

Action: Try granting the administrative privilege to other users.

DIA-28017: The password file is in the legacy format.

Cause: An attempt was made to perform one of the following operations, but none of these operations are allowed while the password file is in LEGACY format. - Attempting to grant SYSBACKUP, SYSDG or SYSKM privileges. - Attempting to grant an administrative privilege to a user who has large password verifiers, for example, SHA-512 hashed verifiers. - Attempting to grant a common administrative privilege to a common user in a multitenant container database (CDB).

Action: Create the password file in the new format ("12" or higher) or migrate the existing password file in LEGACY format to the new format ("12" or higher) using the INPUT_FILE option, then retry the operation.

DIA-28018: This operation requires connection as SYS or SYSBACKUP.

Cause: An attempt was made to execute a command even though the user was not connected as SYS or SYSBACKUP.

Action: Connect as SYS or SYSBACKUP and retry this command.

DIA-28019: audit cannot be configured on administrative privileges

Cause: An attempt was made to configure audit on an administrative privilege using either the AUDIT, NOAUDIT, CREATE AUDIT POLICY, or ALTER AUDIT POLICY command.

Action: For traditional audit, use AUDIT_SYS_OPERATIONS to audit administrative privileges. If this is a unified audit, use action-based auditing to audit administrative users.

DIA-28020: IDENTIFIED GLOBALLY already specified

Cause: The IDENTIFIED GLOBALLY clause was specified twice.

Action: Use only one IDENTIFIED GLOBALLY clause.

DIA-28021: cannot grant global roles

Cause: The role granted was IDENTIFIED GLOBALLY. Global roles can only be granted via a central authority for the domain.

Action: Use ALTER ROLE to change the type of role (from IDENTIFIED GLOBALLY to other, such as IDENTIFIED BY password), or allocate it to a global user via the central authority.

DIA-28022: cannot grant external roles to global user or role

Cause: The role granted was IDENTIFIED EXTERNALLY. External roles cannot be granted to global users, to global roles or to any other roles.

Action: Use ALTER ROLE to change the type of the role being granted (from IDENTIFIED EXTERNALLY to other, such as NOT IDENTIFIED) or use ALTER USER to change the type of the user that is the grantee.

DIA-28023: must revoke grants of this role to other user(s) first

Cause: The role altered to IDENTIFIED GLOBALLY was granted to one or more other users and/or roles. Global roles cannot be granted to any user or role.

Action: Use REVOKE to revoke the role from other users or roles first.

DIA-28024: must revoke grants of external roles to this role/user

Cause: The user or role altered to IDENTIFIED GLOBALLY has external roles directly granted - these must be revoked, since external roles cannot be granted to global users or roles.

Action: Use REVOKE to revoke the external roles from the user or role to be ALTERed.

DIA-28025: missing or null external name

Cause: The IDENTIFIED EXTERNALLY AS or IDENTIFIED GLOBALLY AS clause was specified with a valid external name.

Action: Provide a valid external name.

DIA-28026: user with same external name already exists

Cause: The external name specified for the user being created or altered already exists for another user.

Action: External names must be unique among users. Specify another.

DIA-28027: privileged database links may be used by global users

Cause: Only users IDENTIFIED GLOBALLY may use a privileged database link.

Action: Either change the user to a global user or try to use a different database link.

DIA-28028: could not authenticate remote server

Cause: During the course of opening a privileged database link, the remote server was not securely identified using the network security service. Additional errors should follow.

Action: Consult the network security service documentation on how to properly configure the remote server.

DIA-28029: could not authorize remote server for user *string*

Cause: During the course of opening a privileged database link, the remote server was found to lack the necessary authorizations to connect as the current global user. This may be because the server was not authorized by the network security service. Or it may be because the local server is restricting access by the remote server using the DBMS_SECURITY_DOMAINS_ADMIN package.

Action: Grant the remote server the proper authorization to connect as the given global user, and check that the local server is not restricting access.

DIA-28030: Server encountered problems accessing LDAP directory service

Cause: Unable to access LDAP directory service

Action: Please contact your system administrator

DIA-28031: maximum of *string* enabled roles exceeded

Cause: The user attempted to enable too many roles.

Action: Enable fewer roles.

DIA-28032: Your password has expired and the database is set to read-only

Cause: Your password expired and needs to be changed before your login request can be processed. Because the database is currently open in read-only mode, the password change operation cannot be performed on this database.

Action: Log in to the primary database to change your password, then retry your login request at the standby database.

DIA-28034: cannot grant *string* to an Oracle supplied user

Cause: The KEEP DATE TIME, KEEP SYSGUID or KEEP SEQUENCE privilege could not be granted to an Oracle supplied user.

Action: Grant privilege directly to the application user.

DIA-28035: Cannot Get Session Key for Authentication

Cause: Client and server cannot negotiate shared secret during logon

Action: User should not see this error. Please contact your system administrator

DIA-28036: HTTP digest authentication cannot be configured for global or external user

Cause: An attempt was made to configure HTTP digest authentication for a global or external account.

Action: Contact your system administrator.

DIA-28037: Cannot Get Session Key for RACF Authentication

Cause: Client and server cannot negotiate shared secret during logon

Action: User should not see this error. Please contact your system administrator

DIA-28038: disallow O2LOGON

Cause: turn off O2LOGON

Action: n/a

DIA-28039: cannot validate Kerberos service ticket

Cause: The Kerberos service ticket provided was invalid or expired

Action: Provide a valid, unexpired service ticket.

DIA-28040: No matching authentication protocol

Cause: There was no acceptable authentication protocol for either client or server.

Action: The administrator should set the values of the SQLNET.ALLOWED_LOGON_VERSION_SERVER and SQLNET.ALLOWED_LOGON_VERSION_CLIENT parameters, on both the client and on the server, to values that match the minimum version software supported in the system. This error is also raised when the client is authenticating to a user account which was created without a verifier suitable for the client software version. In this situation, that account's password must be reset, in order for the required verifier to be generated and allow authentication to proceed successfully.

DIA-28041: Authentication protocol internal error

Cause: Authentication protocol failed with an internal error

Action: n/a

DIA-28042: Server authentication failed

Cause: Server failed to authenticate itself to the client

Action: Confirm that the server is a valid database server.

DIA-28043: invalid bind credentials for DB-OID connection

Cause: The Database password stored in the wallet did not match the one in OID .

Action: Use DBCA to reset the database password so that it is the same in database wallet and in OID.

DIA-28044: unsupported directory type

Cause: The database tried to work with a directory which is not OID.

Action: Enterprise User Security works only with Oracle Internet Directory. Update the ldap.ora file to reflect an appropriate OID.

DIA-28045: SSL authentication between database and OID failed

Cause: Server failed to authenticate itself to the Directory.

Action: Make sure the sqlnet.ora used is pointing to the wallet with the right certificate.

DIA-28046: Password change for SYS disallowed

Cause: REMOTE_LOGIN_PASSWORDFILE is set to SHARED, prohibiting SYS password changes.

Action: Change setting of REMOTE_LOGIN_PASSWORDFILE to EXCLUSIVE or NONE.

DIA-28047: database is not a member of any enterprise domain in OID

Cause: An enterprise user login was attempted on a database that is not a member of any enterprise domain in OID.

Action: An administrator should put the database into an enterprise domain in OID, and then the user should reconnect.

DIA-28048: database is a member of multiple enterprise domains in OID

Cause: An enterprise user login was attempted on a database that is a member of multiple enterprise domains in OID.

Action: An administrator should put the database into only one enterprise domain in OID, and then the user should reconnect.

DIA-28049: the password has expired

Cause: The enterprise user's password has expired and the password needs to be changed.

Action: change the password in the directory or contact the directory administrator.

DIA-28050: specified user or role cannot be dropped

Cause: The user or role specified in the DROP statement was a reserved Oracle object that could not be dropped.

Action: None

DIA-28051: the account is locked

Cause: The enterprise user has consecutively entered the wrong password for maximum number of times specified in the realm's password policy profile.

Action: Contact the directory administrator.

DIA-28052: the account is disabled

Cause: The enterprise user's account in the directory has been disabled.

Action: Contact the directory administrator.

DIA-28053: the account is inactive

Cause: The enterprise user's account in the directory is currently not active.

Action: Contact the directory administrator.

DIA-28054: the password has expired. *string* Grace logins are left

Cause: The enterprise user's password has expired. The user is able to login because he has gracelogins left.

Action: change the password in the directory or contact the directory administrator.

DIA-28055: the password will expire within *string* days

Cause: The enterprise user's password is about to expire.

Action: Change the password in the directory or contact the directory administrator.

DIA-28056: Writing audit records to Windows Event Log failed

Cause: Unable to write an audit entry to the Windows event log used as the audit trail.

Action: Check the error number for a possible operating system error. If there is no error, contact Oracle Support Services.

DIA-28057: name of the password file could not be constructed

Cause: Possibly environment variable ORACLE_SID was not set.

Action: Set value for the ORACLE_SID environment variable.

DIA-28058: login is allowed only through a proxy

Cause: This account is marked "proxy only connect".

Action: Connect through a proxy user.

DIA-28059: Cross-instance call failed

Cause: An attempt to inform other Oracle RAC instances of a security event failed.

Action: Log into each instance to perform the administrative action.

DIA-28060: A data redaction policy already exists on this column.

Cause: A data redaction policy was already in existence on this column.

Action: Specify a column which does not already have a redaction policy defined on it, or use DBMS_REDACT.ALTER_POLICY to alter the existing redaction policy for this column.

DIA-28061: This object cannot have a data redaction policy defined on it.

Cause: An attempt was made to define a data redaction policy on an object other than a table or view. Note that a data redaction policy cannot be defined on an editioned view, or on specialized tables created internally by the server in conjunction with various features such as materialized view.

Action: Specify the name of a table or view.

DIA-28062: The policy expression is too long.

Cause: The policy expression was longer than 4000 characters.

Action: Specify a policy expression of at most 4000 characters.

DIA-28063: The policy expression is empty.

Cause: The EXPRESSION parameter to DBMS_REDACT.ADD_POLICY was empty.

Action: A nonempty policy expression must be specified in the EXPRESSION parameter to DBMS_REDACT.ADD_POLICY.

DIA-28064: The redaction function is not valid.

Cause: The FUNCTION_TYPE parameter to DBMS_REDACT.ADD_POLICY was invalid.

Action: Specify the FUNCTION_TYPE parameter to DBMS_REDACT.ADD_POLICY as one of the following: DBMS_REDACT.NONE, DBMS_REDACT.FULL, DBMS_REDACT.RANDOM, DBMS_REDACT.PARTIAL, DBMS_REDACT.REGEXP, or DBMS_REDACT.NULLIFY. Note that only none redaction, full redaction, and NULL redaction may be applied to columns of type BLOB, and only none redaction, full redaction, NULL redaction, and regular expression-based redaction may be applied to columns of type CLOB or NCLOB.

DIA-28066: invalid column "string"

Cause: An invalid column was specified in the COLUMN_NAME parameter.

Action: Check the columns in the object and specify the right column name.

DIA-28067: missing or invalid column name

Cause: A valid column name was not specified in the COLUMN_NAME parameter when a column name was required. Note that when using DBMS_REDACT.ALTER_POLICY, the default action is DBMS_REDACT.ADD_COLUMN

Action: Specify the name of a column.

DIA-28068: The object "*string*" does not have a data redaction policy.

Cause: The specified object did not have a data redaction policy defined on it.

Action: Specify the name of an object which has a data redaction policy, or use DBMS_REDACT.ADD_POLICY to add a data redaction policy.

DIA-28069: A data redaction policy already exists on this object.

Cause: A data redaction policy was already in existence on this object.

Action: Specify a table or view which does not already have a redaction policy defined on it, or use DBMS_REDACT.ALTER_POLICY to alter the existing redaction policy for this object.

DIA-28070: The column "*string*" does not have a data redaction policy.

Cause: The specified column did not have a data redaction policy defined on it.

Action: Specify the name of a column which has a data redaction policy.

DIA-28071: The action is not valid.

Cause: The ACTION parameter to DBMS_REDACT.ALTER_POLICY was invalid.

Action: Specify the ACTION parameter to DBMS_REDACT.ALTER_POLICY as one of the following values: DBMS_REDACT.MODIFY_EXPRESSION, DBMS_REDACT.MODIFY_COLUMN, DBMS_REDACT.ADD_COLUMN, or DBMS_REDACT.DROP_COLUMN.

DIA-28072: The specified policy name is incorrect.

Cause: The POLICY_NAME parameter was incorrect.

Action: Specify the POLICY_NAME parameter with the name of the redaction policy currently defined on the object.

DIA-28073: The column "*string*" has an unsupported data type or attribute.

Cause: The column had a data type or attribute which is not supported by data redaction. The supported data types are CHAR, NCHAR, VARCHAR2, NVARCHAR2, NUMBER types, BINARY_FLOAT, BINARY_DOUBLE, DATE, TIMESTAMP, CLOB, NCLOB, and BLOB, except as listed below for certain function types: For DBMS_REDACT.PARTIAL and DBMS_REDACT.RANDOM, the CLOB, NCLOB, and BLOB datatypes are not supported. For DBMS_REDACT.REGEXP, the NUMBER, BINARY_FLOAT, BINARY_DOUBLE, DATE, TIMESTAMP, and BLOB datatypes are not supported. Virtual columns and base columns of virtual columns are not supported by data redaction. Columns with the INVISIBLE attribute are not supported by data redaction (this applies to both user-specified hidden columns and system-generated hidden columns). Vector encoded columns are not supported by data redaction. Columns with the IS JSON constraint are not supported.

Action: Specify the name of a column which has a supported data type and supported attributes. For columns with the IS JSON constraint, create a view on the columns and add the redaction policy to the view.

DIA-28074: The "*string*" field of the redaction parameters is not valid.

Cause: The redaction parameters specified had one or more fields that were invalid.

Action: Specify the redaction parameters according to Oracle documentation.

DIA-28075: The data redaction policy expression has an error.

Cause: The data redaction policy expression had an error.

Action: Contact the data redaction policy administrator. To correct this error, when invoking the ADD_POLICY and ALTER_POLICY procedures of the data redaction DBMS_REDACT package, the policy administrator must specify a valid policy expression for the EXPRESSION parameter. Check the trace file for the name of the affected policy and the error, and correct the data redaction policy expression.

DIA-28076: An attribute was not specified for SYS_SESSION_ROLES.

Cause: An attribute was not specified for the SYS_SESSION_ROLES namespace in the policy expression.

Action: Specify an attribute for SYS_SESSION_ROLES in the policy expression.

DIA-28077: The attribute specified (*string*) exceeds the maximum length.

Cause: The attribute specified in the policy expression for the SYS_SESSION_ROLES namespace exceeded the maximum length.

Action: Change the policy expression to use a valid attribute for SYS_SESSION_ROLES namespace.

DIA-28078: A regular expression parameter is missing or invalid.

Cause: The FUNCTION_TYPE was DBMS_REDACT.REGEXP, but one or more of the regular expression parameters were missing or invalid, the REGEXP_PATTERN failed to compile properly, or the regular expression replacement operation failed.

Action: Specify the regular expression parameters according to Oracle documentation. At a minimum, the REGEXP_PATTERN and the REGEXP_REPLACE_STRING must be specified. Ensure that the REGEXP_PATTERN can compile properly as a regular expression, for example by testing it with REGEXP_REPLACE in a SQL query against a column containing some of the data to be redacted.

DIA-28079: The policy was already enabled.

Cause: The redaction policy specified has already been enabled.

Action: Only disabled redaction policies can be enabled.

DIA-28080: The policy was already disabled.

Cause: The redaction policy specified has already been disabled.

Action: Only enabled redaction policies can be disabled.

DIA-28081: Insufficient privileges - the command references a redacted object.

Cause: The command referenced a redacted column in an object protected by a data redaction policy.

Action: If possible, modify the command to avoid referencing any redacted columns. Otherwise, drop the data redaction policies that protect the referenced tables and views, or ensure that the user issuing the command has the EXEMPT REDACTION POLICY system privilege, then retry the operation. The EXEMPT REDACTION POLICY system privilege is required for creating or refreshing a materialized view when the materialized view is based on an object protected by a data redaction policy. The EXEMPT REDACTION POLICY system privilege is required for performing a data pump schema-level export including any object protected by a data redaction policy. All data redaction policies are listed in the REDACTION_COLUMNS catalog view.

DIA-28082: The parameter *string* is invalid.

Cause: The specified parameter was either empty or too long.

Action: Specify a parameter of correct length. See the documentation for length requirements.

DIA-28083: A redacted column was referenced in a virtual column expression.

Cause: This redacted column was referenced in a virtual column expression.

Action: Ensure the column expression definition for any virtual column does not refer to any redacted columns. To check for columns with redaction policies, use the REDACTION_COLUMNS catalog view which lists all data redaction policies.

DIA-28085: The input and output lengths of the redaction do not match.

Cause: As specified, the redaction parameters produced an output with a length different to that of the input.

Action: Use regular expression redaction instead of partial redaction.

DIA-28086: The data redaction policy expression has an error. \nstring

Cause: The data redaction policy expression had an error.

Action: Specify a valid policy expression. The data redaction policy expression must be written in SQL, and must be a valid predicate to use in the following SQL query.
SELECT 1 FROM DUAL WHERE policy_expression;

DIA-28087: The policy expression has an unsupported (use of) operator 'string'.

Cause: The policy expression used an unsupported operator, or used an operator in an unsupported way.

Action: Modify the policy expression to use only the supported operators in a supported way. Supported operators include "=", "!=", ">", "<", ">=", "<=", the length operators, the substring operators, and the context operators (SYS_CONTEXT and XS_SYS_CONTEXT). For a complete list of the supported operators, and the supported ways the allowed operators can be used, refer to the section on data redaction policy expressions in the Oracle documentation.

DIA-28088: The policy expression has an unsupported PL/SQL function string.string.string.

Cause: The policy expression had an unsupported PL/SQL function.

Action: Modify the policy expression to use a supported PL/SQL function. Supported PL/SQL functions include the Oracle Label Security dominates functions, and the Oracle Apex session state functions (V and NV). For a complete list of the supported PL/SQL functions, refer to data redaction in the Oracle documentation.

DIA-28089: invalid SYS_CONTEXT namespace string in policy expression

Cause: The SYS_CONTEXT (or XS_SYS_CONTEXT) namespace used in the policy expression was not valid.

Action: Modify the policy expression to use a valid namespace. Supported namespaces include USERENV, SYS_SESSION_ROLES, XS\$SESSION and the namespaces listed in the DBA_CONTEXT catalog view.

DIA-28090: unsupported nesting of function string.string.string within function string.string.string in policy expression

Cause: The policy expression had an unsupported PL/SQL function nesting.

Action: Modify the policy expression to use only supported PL/SQL function nesting. The Oracle Label Security functions NUMERIC_LABEL, CHAR_TO_LABEL, and SA_SESSION can only be used from within the Label Security dominates functions. For a complete list of supported PL/SQL function nesting, refer to the section on writing policy expressions in the Oracle documentation for data redaction.

DIA-28091: unsupported use of PL/SQL function *string.string.string* in policy expression

Cause: The policy expression used a PL/SQL function in an unsupported way.

Action: Modify the policy expression to use the PL/SQL function properly. The parameters to the Oracle Label Security functions NUMERIC_LABEL, CHAR_TO_LABEL, and SA_SESSION must be constants. For a complete list of the supported ways PL/SQL functions can be used in a policy expression, refer to the section on writing policy expressions in the Oracle documentation for data redaction.

DIA-28092: The parameter *string* with value '*string*' has an error.

Cause: The value of the parameter had an error. If DBMS_REDACT.CREATE_POLICY_EXPRESSION was invoked and the POLICY_EXPRESSION_NAME parameter had an error, the policy expression name either already existed, or was invalid. If DBMS_REDACT.DROP_POLICY_EXPRESSION was invoked and the POLICY_EXPRESSION_NAME parameter had an error, the policy expression either did not exist, was still in use (was applied to a column), or was invalid. If DBMS_REDACT.APPLY_POLICY_EXPR_TO_COL was invoked and the POLICY_EXPRESSION_NAME parameter had an error, a policy expression may already exist on this column. Only one policy expression may be associated with any given column. The name of any Oracle Data Redaction policy expression associated with a given column can be found in the REDACTION_EXPRESSIONS catalog view. If the DBMS_REDACT.ADD_POLICY was invoked and the OBJECT_SCHEMA parameter referenced the APEX or Spatial installation schema, the operation was prevented. Data redaction policies are not supported on objects within the APEX or Spatial installation schema. If the DBMS_REDACT.ADD_POLICY was invoked and the OBJECT_NAME references a metadata-linked view, the operation was prevented. Data redaction policies are not supported on metadata-linked views.

Action: Provide a valid value for the parameter. If DBMS_REDACT.CREATE_POLICY_EXPRESSION was invoked and the parameter was POLICY_EXPRESSION_NAME, provide a valid (new or existing) policy expression name. The names of all existing Oracle Data Redaction policy expressions can be found in the REDACTION_EXPRESSIONS catalog view. For the POLICY_EXPRESSION_NAME parameter of the DBMS_REDACT.DROP_POLICY_EXPRESSION procedure, provide a valid existing policy expression name which is not currently in use (applied to any column). The names of the columns to which a given policy expression is currently applied can be found in the REDACTION_EXPRESSIONS catalog view. For the POLICY_EXPRESSION_NAME parameter of the DBMS_REDACT.APPLY_POLICY_EXPR_TO_COL procedure, either provide NULL to remove the current policy expression association of the column, or provide a valid existing policy expression name. There is currently no API to alter an existing association. For now it must first be dropped followed by applying the new association. The names of all existing policy expressions can be found in the REDACTION_EXPRESSIONS catalog view. If DBMS_REDACT.ADD_POLICY was invoked, provide an OBJECT_SCHEMA which is not the APEX or Spatial installation schema. Data redaction policies are not supported on objects within the APEX or Spatial installation schema. If DBMS_REDACT.ADD_POLICY was invoked, provide an OBJECT_NAME which does not reference a metadata-linked view.

DIA-28093: operation on column *string* is not supported by data redaction

Cause: The operation was not supported by data redaction.

Action: Perform only supported operations on any object which has a data redaction policy or which depends on an object with a data redaction policy. To check for columns with redaction policies, use the REDACTION_COLUMNS catalog view which lists all of the data redaction policies.

DIA-28094: SQL construct not supported by data redaction

Cause: The query had a SQL construct that was not supported by data redaction.

Action: Rewrite the query to avoid using an unsupported construct. Consult the Oracle documentation for details.

DIA-28100: policy function schema *string* is invalid

Cause: The schema was dropped after the policy associated with the function had been added to the object.

Action: Drop the policy and re-create it with a policy function owned by a valid user. Or re-create the user and the policy function under the new user.

DIA-28101: policy already exists

Cause: A policy with the same name for the same object already exists.

Action: Check if the policy has already been added or use a different policy name.

DIA-28102: policy does not exist

Cause: Try to drop/enable/refresh a non-existent policy.

Action: Correct the policy name argument.

DIA-28103: adding a policy to an object owned by SYS is not allowed

Cause: Try to add a policy to a table or a view owned by SYS.

Action: You can not perform this operation.

DIA-28104: input value for *string* is not valid

Cause: Input value for the argument is not valid

Action: specify a valid argument value.

DIA-28105: cannot create security relevant column policy in an object view

Cause: Security relevant column argument is not null in policy creation for an object view

Action: n/a

DIA-28106: input value for argument #*string* is not valid

Cause: Input values for the argument is missing or invalid.

Action: Correct the input values.

DIA-28107: policy was disabled

Cause: Try to flush a disabled policy.

Action: If the policy is supposed to be enforced, it must be enabled.

DIA-28108: circular security policies detected

Cause: Policies for the same object reference each other.

Action: Drop the policies

DIA-28109: the number of related policies has exceeded the limit of 16

Cause: Too many policies are involved in the same objects.

Action: Drop one or more policies. Or combine a few of them into one.

DIA-28110: policy function or package *string.string* has error

Cause: The policy function may have been dropped, or is no longer valid.

Action: Check the status of the function and correct the problem. Or re-create the policy with a valid function.

DIA-28111: insufficient privilege to evaluate policy predicate

Cause: Predicate has a subquery which contains objects that the owner of policy function does not have privilege to access.

Action: Grant appropriate privileges to the policy function owner.

DIA-28112: failed to execute policy function

Cause: The policy function has one or more error during execution.

Action: Check the trace file and correct the errors.

DIA-28113: policy predicate has error

Cause: Policy function generates invalid predicate.

Action: Review the trace file for detailed error information.

DIA-28115: policy with check option violation

Cause: Policy predicate was evaluated to FALSE with the updated values.

Action: n/a

DIA-28116: insufficient privileges to do direct path access

Cause: Users with insufficient privileges attempting to do direct path access of tables with fine grain access control policies.

Action: Ask the database administrator to do the operation. Note that users can work with security administrator to temporarily drop/disable the policies at time of export, import, or load, but this has security implication, and thus access of the database must be controlled carefully.

DIA-28117: integrity constraint violated - parent record not found

Cause: try to update/insert a child record with new foreign key values, but the corresponding parent row is not visible because of fine-grained security in the parent.

Action: make sure that the updated foreign key values must also visible in the parent

DIA-28118: policy group already exists

Cause: try to create a policy group that already exists

Action: n/a

DIA-28119: policy group does not exist

Cause: try to drop a policy group that does not exist

Action: n/a

DIA-28120: driving context already exists

Cause: try to create a driving context that already exists

Action: n/a

DIA-28121: driving context does not exist

Cause: try to drop a driving context that does not exist

Action: n/a

DIA-28122: can not update SYS_DEFAULT policy group

Cause: An attempt was made to execute either DBMS_RLS.CREATE_POLICY_GROUP or DBMS_RLS.DELETE_POLICY_GROUP using SYS_DEFAULT as the policy group name.

Action: Do not attempt to CREATE or DELETE the SYS_DEFAULT policy group. This action is not permitted.

DIA-28123: Driving context '*string,string*' contains invalid group '*string*'

Cause: A previous call to DBMS_SESSION.SET_CONTEXT specified an invalid policy group.

Action: Ensure that a valid policy group is passed to DBMS_SESSION.SET_CONTEXT when initializing a policy driving context.

DIA-28124: Column *string* in sec_relevant_cols cannot be of an object data type

Cause: A column specified in sec_relevant_cols was of an object data type.

Action: Ensure that none of the columns specified in sec_relevant_cols is of an object data type or XMLType.

DIA-28125: A protected base column was referenced in an unprotected virtual column expression.

Cause: A protected base column was referenced in an unprotected virtual column expression.

Action: Check the policy definition and make sure that the virtual column is also protected.

DIA-28126: Attribute association failed for policy "*string*".

Cause: An attempt was made to associate a global application context attribute to either a context-sensitive or shared context-sensitive policy. Only local application context attribute association is supported.

Action: Specify a local application context attribute.

DIA-28132: The MERGE INTO syntax does not support the security policy.

Cause: The MERGE INTO syntax did not support a security policy on the destination table, because the policy's statement_types did not include each of INSERT, UPDATE and DELETE.

Action: If you do not have the privilege to modify the security policy, then instead of MERGE INTO, use the INSERT, UPDATE and DELETE DML statements on the table that has a security policy defined on it. If you have the privilege to modify the security policy, then redefine it in such a way that statement_types includes all of the DML statement types (INSERT, UPDATE and DELETE).

DIA-28134: object cannot have fine-grained access control policy

Cause: Only tables, views, or synonyms of tables or views may have VPD policies

Action: n/a

DIA-28137: Invalid FGA audit Handler

Cause: An invalid audit handler was specified.

Action: Specify a valid audit handler.

DIA-28138: Error in Policy Predicate

Cause: An invalid policy predicate was specified.

Action: Please specify a valide policy Predicate for the FGA policy

DIA-28139: Maximum allowed Fine Grain Audit Policies Exceeded

Cause: A maximum of 256 policies can be enabled on an object

Action: Drop or disable an existing policy before creating more

DIA-28140: Invalid column specified

Cause: Column name specified during policy creation is invalid

Action: Please specify a valid column name. Object columns are not supported

DIA-28141: error in creating audit index file

Cause: ORACLE was not able to create the file being used to hold audit file names.

Action: Examine the directory pointed to by the initialization parameter "audit_file_dest." Make sure that all of the following is true: 1. The directory exists. 2. The name indeed points to a directory and not a file. 3. The directory is accessible and writable to the ORACLE user.

DIA-28142: error in accessing audit index file

Cause: ORACLE was not able to access the file being used to hold audit file names.

Action: Make sure the file exists in the directory pointed to by the initialization parameter "audit_file_dest" and is readable by the ORACLE user.

DIA-28143: Invalid argument passed to FGA ADD_POLICY procedure

Cause: Invalid input argument was specified for FGA ADD_POLICY procedure.

Action: Specify correct type and number of arguments to FGA ADD_POLICY procedure.

DIA-28144: Failed to execute fine-grained audit handler

Cause: An error was encountered while executing fine-grained audit handler.

Action: Refer to the trace file for details.

DIA-28145: XDS policy already exists for *string*

Cause: An XDS policy was enabled for an object that already has an associated XDS policy.

Action: Specify a different policy name or call enable_xds with the overwrite paramter set to TRUE.

DIA-28146: invalid operation for policy "*string*"

Cause: Attribute association (NAMESPACE, ATTRIBUTE) was specified for an invalid policy type. Attribute association can be specified only for context-sensitive and shared context-sensitive policy types.

Action: Do not perform any unsupported operation.

DIA-28147: The specified attribute association ("*string*", "*string*") is already attached to policy "*string*".

Cause: An attempt was made to create the attribute association using names that were already used by existing attribute association of the policy.

Action: Adjust the names and retry the operation.

DIA-28148: The specified attribute association ("*string*", "*string*") is not attached to policy "*string*".

Cause: An attempt was made to drop the attribute association that was not attached to the policy.

Action: Adjust the names and retry the operation.

DIA-28149: input value for argument "*string*" is missing

Cause: Only one input value was specified for the (NAMESPACE, ATTRIBUTE) arguments.

Action: Specify an input value for both (NAMESPACE, ATTRIBUTE) arguments.

DIA-28150: proxy not authorized to connect as client

Cause: A proxy user attempted to connect as a client, but the proxy was not authorized to act on behalf of the client.

Action: Grant the proxy user permission to perform actions on behalf of the client by using the ALTER USER ... GRANT CONNECT command.

DIA-28151: more than one user name specified for command

Cause: More than one user name was specified for an ALTER USER command.

Action: Try the command again with only one user name.

DIA-28152: proxy user '*string*' may not specify initial role '*string*' on behalf of client '*string*'

Cause: A proxy user attempted to specify an initial role for a client, but the client does not possess the role.

Action: Change the proxy user so that it does not specify the role or grant the role to the client.

DIA-28153: Invalid client initial role specified: '*string*'

Cause: A role specified by a proxy user as an initial role to be activated upon connecting on behalf of a client is invalid.

Action: Connect again as the client specifying a valid role.

DIA-28154: Proxy user may not act as client '*string*'

Cause: A proxy user may not assume the identity of a privileged user in order to limit the privileges that a proxy may possess.

Action: Execute the statement again specify a client other than a privileged user.

DIA-28155: user '*string*' specified as a proxy is actually a role

Cause: A user specified in an AUDIT *operation* BY *proxy* ON BEHALF OF *client* is actually a role.

Action: Execute the statement again with a valid proxy user.

DIA-28156: Proxy user '*string*' not authorized to set role '*string*' for client '*string*'

Cause: A proxy user has not been granted the right to use a role on behalf of a client.

Action: Execute the command ALTER USER *client* GRANT CONNECT THROUGH PROXY *proxy* to grant the needed role.

DIA-28157: Proxy user '*string*' forbidden to set role '*string*' for client '*string*'

Cause: A proxy user was forbidden to use a role on behalf of a client through the command ALTER USER *client* GRANT CONNECT THROUGH *proxy* WITH ALL ROLES EXCEPT *role*

Action: Execute the command ALTER USER *client* GRANT CONNECT THROUGH PROXY *proxy* to grant the needed role.

DIA-28163: GRANT already specified

Cause: The GRANT clause was specified twice.

Action: Use only one GRANT clause.

DIA-28164: REVOKE already specified

Cause: The REVOKE clause was specified twice.

Action: Use only one REVOKE clause.

DIA-28165: proxy '*string*' may not specify password-protected role '*string*' for client '*string*'

Cause: A proxy user attempted to activate a role on behalf of a client which has a password associated with it. Since the proxy does not have a password, this activation cannot be allowed.

Action: Attempt to activate a different role or change the role administratively so that there is no password.

DIA-28166: duplicate rolename in list

Cause: The name of a role was specified more than once in a list.

Action: Repeat the command specifying the role once.

DIA-28168: attempted to grant password-protected role

Cause: An ALTER USER ... GRANT CONNECT command was attempted specifying a role that was password-protected.

Action: Specify a role which is not a password-protected role.

DIA-28169: unsupported certificate type

Cause: The type of certificate from which the server is to extract the credentials of the client is not supported.

Action: Specify a supported type.

DIA-28170: unsupported certificate version

Cause: The version of the certificate from which the server is to extract the credentials of the client is not supported.

Action: Specify a supported version.

DIA-28171: unsupported Kerberos version

Cause: the version the Kerberos ticket which the server is to use to validate the identity of the client is not supported.

Action: Specify a supported version.

DIA-28172: distinguished name not provided by proxy

Cause: A client user is to be identified using a distinguished name, but none was provided by the proxy user.

Action: Provide a distinguished name.

DIA-28173: certificate not provided by proxy

Cause: A client user is to be identified using a certificate but none was provided by the proxy user.

Action: Provide a certificate.

DIA-28174: Kerberos ticket not provided by proxy

Cause: A client user is to be authenticated using a Kerberos ticket but none was provided by the proxy user.

Action: Provide a Kerberos ticket.

DIA-28175: incorrect certificate type

Cause: the type of certificate provided by the proxy user to identify a client user does not match the type that is required.

Action: Provide a certificate of the correct type.

DIA-28176: incorrect certificate version

Cause: the version of certificate provided by the proxy user to identify a client user does not match the version that is required.

Action: Provide a certificate of the correct version.

DIA-28177: incorrect Kerberos ticket version

Cause: the version of Kerberos ticket provided by the proxy user to authenticate a client user does not match the version that is required.

Action: Provide a Kerberos ticket of the correct version.

DIA-28178: password not provided by proxy

Cause: A client user is to be authenticated using a database password but none was provided by the proxy user.

Action: Provide a password.

DIA-28179: client user name not provided by proxy

Cause: No user name was provided by the proxy user for the client user.

Action: Either specify a client database user name, a distinguished name or an X.509 certificate.

DIA-28180: multiple authentication methods provided by proxy

Cause: More than one authentication method was specified by the proxy user for the client user.

Action: Specify only one of the following: a client database user name, a distinguished name or an X.509 certificate.

DIA-28181: proxy '*string*' failed to enable one or more of the specified initial roles for client '*string*'

Cause: Attempt to enable specified initial roles after logon resulted in failure.

Action: Check that the initial roles are valid, granted to client, and not password protected.

DIA-28182: cannot acquire Kerberos service ticket for client

Cause: An attempt to use a Kerberos forwardable ticket granting ticket to obtain a Kerberos service ticket failed.

Action: Check that the Kerberos forwardable ticket granting ticket belongs to the client, is valid, and that the key distribution center is available.

DIA-28183: proper authentication not provided by proxy

Cause: A client user must be authenticated but no authentication credentials were provided by the proxy user.

Action: Provide some form of authentication credentials.

DIA-28184: global user cannot have proxy permissions managed in the directory

Cause: The client name specified was a global user.

Action: Use ALTER USER to change the type of user (from IDENTIFIED GLOBALLY to something else, such as IDENTIFIED BY password or IDENTIFIED EXTERNALLY).

DIA-28185: cannot alter user with administrative privilege to proxy-only connect user

Cause: An attempt was made to alter a user with administrative privilege to a proxy-only connect user.

Action: This user cannot be altered to proxy-only connect user.

DIA-28186: cannot grant *string* to a proxy-only connect user

Cause: An attempt was made to grant administrative privilege like SYSDBA, SYSOPER, SYSASM, SYSBACKUP, SYSDG, SYSKM, or SYSRAC to a proxy-only connect user. Since proxy authentication using an administrative privilege is not supported, such grants are not allowed.

Action: None

DIA-28187: cannot alter global user to proxy-only connect user

Cause: An attempt was made to alter global user to proxy-only connect.

Action: None

DIA-28188: cannot alter user SYS/SYSBACKUP/SYSDG/SYSKM/SYSRAC to be identified as globally

Cause: An attempt was made to alter SYS/SYSBACKUP/SYSDG/SYSKM/SYSRAC to be identified as globally.

Action: None

DIA-28190: SYSRAC administrative privilege cannot be granted to other users

Cause: An attempt was made to grant SYSRAC administrative privilege to a user. This administrative privilege can only be used in operating system authentication and cannot be granted to other users.

Action: Use connection string '/' as SYSRAC' from an operating system account in the OSRAC group to connect to the database with the SYSRAC privilege.

DIA-28191: cannot grant administrative privileges to a user with non-ASCII or non-EBCDIC characters in the user name

Cause: An attempt to grant privileges to a user failed. Administrative privileges like SYSDBA, SYSOPER, SYSASM, SYSBACKUP, SYSDG, SYSKM, and SYSRAC cannot be granted to a user with non-ASCII or non-EBCDIC characters in the user name.

Action: Grant administrative privileges to users that have user names with only ASCII or EBCDIC characters.

DIA-28200: IDENTIFIED USING already specified

Cause: The IDENTIFIED USING clause was specified twice.

Action: Use only one IDENTIFIED USING clause.

DIA-28201: invalid command to enable secure application role '*string*'

Cause: An attempt to enable the secure application role outside of the scope of the designated package failed.

Action: Enable the role using the designated package.

DIA-28221: REPLACE not specified

Cause: User is changing password but password verification function is turned on and the original password is not specified and the user does not have the alter user system privilege.

Action: Supply the original password.

DIA-28222: may not modify reserved user

Cause: An attempt was made to change or grant to a reserved user account.

Action: None

DIA-28223: first login requires password change

Cause: This user was globally authenticated. Password policy settings in Oracle Internet Directory (OID) requires the password to be changed for the first connection. Further connections to the database will be denied if the password in OID is not changed.

Action: Connect to the OID to change the password.

DIA-28231: no data passed to obfuscation toolkit

Cause: A NULL value was passed to a function or procedure.

Action: Make sure that the data passed is not empty.

DIA-28232: invalid input length for obfuscation toolkit

Cause: Length of data submitted for encryption or decryption is not a multiple of 8 bytes.

Action: Make sure that the length of the data to be encrypted or decrypted is a multiple of 8 bytes.

DIA-28233: double encryption not supported

Cause: The obfuscation toolkit does not support the encryption of already-encrypted data.

Action: Do not attempt to encrypt already-encrypted data.

DIA-28234: key length too short

Cause: The key specified is too short for the algorithm. DES requires a key of at least 8 bytes. Triple DES requires a key of least 16 bytes in two-key mode and 24 bytes in three-key mode.

Action: Specify a longer key.

DIA-28235: algorithm not available

Cause: The encryption algorithm desired is not available.

Action: Run the installer to install the needed algorithm in Oracle Advanced Security.

DIA-28236: invalid Triple DES mode

Cause: An unknown value was specified for the mode in which triple DES encryption is to run.

Action: Specify a valid value. See the package declaration for a list of valid values.

DIA-28237: seed length too short

Cause: The seed specified for the key generation routine must be at least 80 characters.

Action: Specify a longer seed.

DIA-28238: no seed provided

Cause: A NULL value was passed in as the seed to be used in generating a key.

Action: Provide a non-NULL value for the seed.

DIA-28239: no key provided

Cause: A NULL value was passed in as an encryption or decryption key.

Action: Provide a non-NULL value for the key.

DIA-28261: CURRENT_USER can not be used in PLSQL Definer's Right procedure.

Cause: An attempt to retrieve CURRENT_USER using SYS_CONTEXT PLSQL interface.

Action: Use a SQL statement to query CURRENT_USER inside a DR procedure.

DIA-28264: Client identifier is too long

Cause: The length of the client identifier is longer than 64

Action: Set a client identifier whose length is less than 64.

DIA-28265: Namespace beginning with 'SYS_' is not allowed.

Cause: Namespace beginning with 'SYS_' was not allowed.

Action: Use a namespace that does not begin with 'SYS_'.

DIA-28267: Invalid NameSpace Value

Cause: Context NameSpace conflicts with reserved key words or a secure Namespace is not allowed for this type of Application Context.

Action: Use a valid namespace.

DIA-28268: Exceeded the maximum allowed size for Context information in a session

Cause: The maximum size specified by the `_session_context_size` init.ora parameter was exceeded.

Action: Please change the value for `_session_context_size` in the init.ora file.

DIA-28270: Malformed user nickname for password authenticated global user.

Cause: An attempt to login as password-authenticated global user with a malformed user nickname.

Action: Make sure the nickname is valid and re-login.

DIA-28271: No permission to read user entry in LDAP directory service.

Cause: ORACLE server does not have read permission on user nickname's X.500 user entry.

Action: Make sure ORACLE server is using right SSL credentials to connect to LDAP directory services. Make sure permissions for LDAP user entries are right.

DIA-28272: Domain policy restricts password based GLOBAL user authentication.

Cause: Domain policy does not allow password-authenticated GLOBAL users.

Action: Make sure ORACLE server is using right SSL credentials to connect to LDAP directory services. Make sure orclDBAuthTypes attributes within Oracle enterprise domain object is either set to PWD or ALL.

DIA-28273: No mapping for user nickname to LDAP distinguished name exists.

Cause: ORACLE server cannot map the given user nickname to LDAP distinguished name.

Action: Make sure user entries in LDAP are correctly provisioned with correct user nickname attribute values.

DIA-28274: No ORACLE password attribute corresponding to user nickname exists.

Cause: LDAP user entry corresponding to user nickname does not have a ORACLE password attribute or the attribute is not initialized.

Action: Make sure user entries in LDAP are correctly provisioned with correct ORACLE password attribute values.

DIA-28275: Multiple mappings for user nickname to LDAP distinguished name exist.

Cause: The given user nickname maps to more than one LDAP distinguished name.

Action: Make sure user nickname is unique within the enterprise.

DIA-28276: Invalid ORACLE password attribute.

Cause: The ORACLE password attribute of a user entry has an invalid format.

Action: Make sure ORACLE password attribute value is RFC-2307 compliant.

DIA-28277: LDAP search, while authenticating global user with passwords, failed.

Cause: The LDAP search for finding the appropriate user entry and ORACLE password failed.

Action: Make sure LDAP directory service is up and running.

DIA-28278: No domain policy registered for password based GLOBAL users.

Cause: No policy about password authenticated GLOBAL users has been registered.

Action: Add attribute orclDBAuthTypes to the database server's Enterprise domain.

DIA-28279: Error reading ldap_directory_access init parameter.

Cause: ldap_directory_access parameter is not specified correctly.

Action: Make sure spfile.ora has ldap_directory_access set correctly. Possible correct values are PASSWORD, SSL and NONE.

DIA-28280: Multiple entries for ORACLE database password exist.

Cause: The ORACLE password attribute of a user entry has multiple entries of ORACLE database password.

Action: Make sure ORACLE password attribute has one entry for ORACLE Database password.

DIA-28281: Global application context is not updated on one or more Oracle RAC instances

Cause: While updating global application context across Oracle RAC instances, the background process errored out or the timeout expired due to some failure.

Action: Ensure every instance in Oracle RAC is operational and retry the operation.

DIA-28290: Multiple entries found for the same Kerberos Principal Name

Cause: Multiple user entries has been configured with the same krbPrincipalName

Action: Modify enterprise user's entry to assign its Kerberos principal name Make sure the user entries in LDAP are provisioned correctly.

DIA-28291: No Kerberos Principal Value found.

Cause: Oracle server fails to get value of krbPrincipalName attribute

Action: Make sure user entries are correctly provisioned with correct Kerberos principal value

DIA-28292: No Domain Policy registered for Kerberos based authentication

Cause: The enterprise domain entry is not configured for Kerberos based global authentication.

Action: Modify orclDBAuthType of the database server's enterprise domain entry and assign it "ALL" or "KRB5"

DIA-28293: No matched Kerberos Principal found in any user entry

Cause: Oracle server fails to find the principal in the user search base

Action: Make sure the user search base is correct. Use ESM to configure the enterprise user its Kerberos principal name

DIA-28300: No permission to read user entry in LDAP directory service.

Cause: ORACLE server does not have read permission on user entries.

Action: Make sure ORACLE server is using right credentials to connect to LDAP directory services. Make sure permissions for LDAP user entries are configured correctly.

DIA-28301: Domain Policy hasn't been registered for SSL authentication.

Cause: An attempt was made to authenticate with SSL, but the database enterprise domain was not configured for SSL authentication.

Action: Modify orclDBAuthType of the server's enterprise domain entry and assign it "ALL" or "SSL".

DIA-28302: User does not exist in the LDAP directory service.

Cause: An attempt was made to authenticate with SSL using the user's certificate, but there was no user entry in the LDAP server that matched the user's Distinguished Name.

Action: Add an user entry whose DN matches the user's PKI DN in the LDAP directory.

DIA-28303: Distinguished name for user exceeds maximum supported length

Cause: The user's distinguished name (DN) exceeded the maximum supported length.

Action: Shorten the user's distinguished name (DN) and retry.

DIA-28304: Oracle encrypted block is corrupt (file # *string*, block # *string*)

Cause: The indicated encrypted block was corrupt. This was an in-memory corruption. The exact cause is unknown. Possible causes could be: - the encryption wallet is incorrect or corrupted - the tablespace encryption key is incorrect or corrupted - decryption engine failure - actual logical error exists in decrypted block

Action: Review the encryption wallet and the keys stored in it to ensure they are valid and correct.

DIA-28305: WALLET_LOCATION in sqlnet.ora file for container database is not supported.

Cause: WALLET_LOCATION was specified in sqlnet.ora file.

Action: Remove WALLET_LOCATION from sqlnet.ora file. Place the wallet in the pluggable database-specific default location.

DIA-28306: The directory user has *string* groups mapped to different database global users.

Cause: A directory user connected to the database while there were multiple directory user's groups mapped to different shared database global users.

Action: No action is required if by design the user's multiple groups need to be mapped to different database global users. Otherwise, create an exclusive database global user mapping for the directory user, or ensure that the directory user has only one mapped shared database global user.

DIA-28307: The directory current time *string* is unreasonable.

Cause: Either the directory service time was earlier than year 1900, or the format was incorrect.

Action: Ensure that the directory service clock is set properly.

DIA-28308: The directory server type *string* is not supported.

Cause: The database tried to work with a directory service which is not

Action: Update the ldap.ora file to reflect an appropriate directory server type.

DIA-28309: Failed to get the service user's credential from the wallet.

Cause: The database tried to get the service user's credential from the wallet but

Action: Update the wallet with the service user's credential.

DIA-28310: Role with same external name already exists.

Cause: The external name specified for the role being created or altered already exists for another role.

Action: External names must be unique among roles. Specify another.

DIA-28311: Oracle encrypted data block not encrypted (file # *string*, block # *string*)

Cause: The indicated data block was found unencrypted in a fully encrypted tablespace. The exact cause is unknown. Possible causes could be: - An encrypted data block is tampered and replaced with an unencrypted data block. - An Oracle internal issue.

Action: Collect block dump and redo dump for this block, and contact Oracle Support Services.

DIA-28312: Proxy user is not supported with DSI.

Cause: Proxy user authentication is currently not supported with Directory Service Integration (DSI).

Action: Do not use proxy user authentication with DSI.

DIA-28313: LDAP server connection is down.

Cause: The LDAP server is down or the connection to the LDAP server is closed.

Action: Retry the connect operation.

DIA-28314: The current user database link is not supported with DSI.

Cause: An attempt was made to use the current user database link with Directory Services Integration (DSI).

Action: Do not use the current user database link with DSI.

DIA-28330: encryption is not allowed for this data type or the data type is invalid

Cause: The data type was not supported for column encryption or the data type was invalid.

Action: n/a

DIA-28331: encrypted column size too long for its data type

Cause: The column was both encrypted and one of the following: -for VARCHAR2 when extended character data types were disabled, the length specified was > 3932; -for VARCHAR2 when extended character data types were enabled, the length specified was > 32699; -for CHAR, the length specified was > 1932; -for NVARCHAR2 when extended character data types were disabled, the length specified was > 1966; -for NVARCHAR2 when extended character data types were enabled, the length specified was > 16349; -for NCHAR, the length specified was > 966; -for RAW when extended character data types were disabled, the length specified was > 3932; -for RAW when extended character data types were enabled, the length specified was > 32699;

Action: Reduce the column size.

DIA-28332: cannot have more than one password for the encryption key

Cause: More than one password was specified in the user command.

Action: n/a

DIA-28333: column is not encrypted

Cause: An attempt was made to rekey or decrypt an unencrypted column.

Action: n/a

DIA-28334: column is already encrypted

Cause: An attempt was made to encrypt an encrypted column.

Action: n/a

DIA-28335: referenced or referencing FK constraint column cannot be encrypted

Cause: encrypted columns were involved in the referential constraint

Action: n/a

DIA-28336: cannot encrypt SYS owned objects

Cause: An attempt was made to encrypt columns in a table owned by SYS.

Action: n/a

DIA-28337: the specified index may not be defined on an encrypted column

Cause: Index column was either a functional, domain, or join index.

Action: n/a

DIA-28338: Column(s) cannot be both indexed and encrypted with salt

Cause: An attempt was made to encrypt index column with salt or an attempt was made to create an index on encrypted column with salt.

Action: Alter the table and specify column encrypting without salt.

DIA-28339: missing or invalid encryption algorithm

Cause: Encryption algorithm was missing or invalid in the user command.

Action: Must specify a valid algorithm.

DIA-28340: a different encryption algorithm has been chosen for the table

Cause: Existing encrypted columns were associated with a different algorithm.

Action: No need to specify an algorithm, or specify the same one for the existing encrypted columns.

DIA-28341: cannot encrypt constraint column(s) with salt

Cause: An attempt was made to encrypt constraint columns with salt.

Action: Encrypt the constraint columns without salt.

DIA-28342: integrity check fails on column key

Cause: Encryption metadata may have been improperly altered.

Action: n/a

DIA-28343: fails to encrypt data

Cause: data or encryption metadata may have been improperly altered or the security module may not have been properly setup

Action: n/a

DIA-28344: fails to decrypt data

Cause: data or encryption metadata may have been improperly altered or the security module may not have been properly setup

Action: n/a

DIA-28345: cannot downgrade because there exists encrypted column

Cause: An attempt was made to downgrade when there was an encrypted column in the system.

Action: Decrypt these columns before attempting to downgrade.

DIA-28346: an encrypted column cannot serve as a partitioning column

Cause: An attempt was made to encrypt a partitioning key column or create partitioning index with encrypted columns.

Action: The column must be decrypted.

DIA-28347: encryption properties mismatch

Cause: An attempt was made to issue an ALTER TABLE EXCHANGE PARTITION | SUBPARTITION command, but encryption properties were mismatched.

Action: Make sure encryption algorithms and columns keys are identical. The corresponding columns must be encrypted on both tables with the same salt and non-salt flavor.

DIA-28348: index defined on the specified column cannot be encrypted

Cause: An attempt was made to encrypt a column which is in a functional index, domain index, or join index.

Action: drop the index

DIA-28349: cannot encrypt the specified column recorded in the materialized view log

Cause: An attempt was made to encrypt a column which is already recorded in the materialized view log.

Action: drop the materialized view log

DIA-28350: cannot encrypt the specified column recorded in CDC synchronized change table

Cause: An attempt was made to encrypt a column which is already recorded in CDC synchronized change table.

Action: drop the synchronized change table

DIA-28351: cannot encrypt the column of a cluster key

Cause: An attempt was made to encrypt a column of the cluster key. A column of the cluster key in a clustered table cannot be encrypted.

Action: None

DIA-28353: failed to open wallet

Cause: The database was unable to open the security module wallet due to an incorrect wallet path or password. It is also possible that a wallet has not been created. Type mkwallet from command line for instructions.

Action: Execute the command again using the correct wallet password or verifying a wallet exists in the specified directory. If necessary, create a new wallet and initialize it.

DIA-28354: Encryption wallet, auto login wallet, or HSM is already open

Cause: Encryption wallet, auto login wallet, or HSM was already opened.

Action: None

DIA-28356: invalid open wallet syntax

Cause: The command to open the wallet contained improper spelling or syntax.

Action: If attempting to open the wallet, verify the spelling and syntax and execute the command again.

DIA-28357: password required to open the wallet

Cause: A password was not provided when executing the open wallet command.

Action: Retry the command with a valid password.

DIA-28358: improper set key syntax

Cause: The command to set the master key contained improper spelling or syntax.

Action: If attempting to set the master key for Transparent Database Encryption, verify the spelling and syntax and execute the command again.

DIA-28359: invalid certificate identifier

Cause: The certificate specified did not exist in the wallet.

Action: Query the V\$WALLET fixed view to find the proper certificate identifier for certificate to be used.

DIA-28361: master key not yet set

Cause: The master key for the instance was not set.

Action: Execute the ALTER SYSTEM SET KEY command to set a master key for the database instance.

DIA-28362: master key not found

Cause: The required master key required could not be located. This may be caused by the use of an invalid or incorrect wallet.

Action: Check wallet location parameters to see if they specify the correct wallet. Also, verify that an SSO wallet is not being used when an encrypted wallet is intended.

DIA-28363: buffer provided not large enough for output

Cause: A provided output buffer is too small to contain the output.

Action: Check the size of the output buffer to make sure it is initialized to the proper size.

DIA-28364: invalid wallet operation

Cause: The command to operate the wallet contained improper spelling or syntax.

Action: Verify the spelling and syntax and execute the command again.

DIA-28365: wallet is not open

Cause: The security module wallet has not been opened.

Action: Open the wallet.

DIA-28366: invalid database encryption operation

Cause: The command for database encryption contained improper spelling or syntax.

Action: Verify the spelling and syntax and execute the command again.

DIA-28367: wallet does not exist

Cause: The Oracle wallet has not been created or the wallet location parameters in sqlnet.ora specifies an invalid wallet path.

Action: Verify that the WALLET_LOCATION or the ENCRYPTION_WALLET_LOCATION parameter is correct and that a valid wallet exists in the path specified.

DIA-28368: cannot auto-create wallet

Cause: The database failed to auto create an Oracle wallet. The Oracle process may not have proper file permissions or a wallet may already exist.

Action: Confirm that proper directory permissions are granted to the Oracle user and that neither an encrypted or obfuscated wallet exists in the specified wallet location and try again.

DIA-28369: cannot add files to encryption-ready tablespace when offline

Cause: You attempted to add files to an encryption-ready tablespace when all the files in the tablespace were offline.

Action: Bring the tablespace online and try again

DIA-28370: ENCRYPT, DECRYPT or REKEY option not allowed

Cause: An attempt was made to specify the ENCRYPT, DECRYPT or REKEY option on an unsupported tablespace.

Action: Remove this option and retry the statement.

DIA-28371: ENCRYPTION clause or ENCRYPT option not allowed

Cause: An attempt was made to specify the ENCRYPTION clause or ENCRYPT option for system and undo tablespaces.

Action: Remove one or both of these options and retry the statement.

DIA-28372: missing ENCRYPT option for encrypted tablespace

Cause: An attempt was made to specify the ENCRYPTION property for the CREATE TABLESPACE statement without specifying the ENCRYPT option to encrypt the tablespace.

Action: Add the ENCRYPT option and retry the statement.

DIA-28373: missing or out of order ENCRYPTION clause

Cause: An attempt was made to specify the ENCRYPT or DECRYPT option in the CREATE TABLESPACE statement or to specify the ENCRYPT or REKEY option in the ALTER TABLESPACE statement without first specifying the ENCRYPTION property for the tablespace.

Action: Add the ENCRYPTION clause or correct the syntax, and retry the statement.

DIA-28374: typed master key not found in wallet

Cause: You attempted to access encrypted tablespace or redo logs with a typed master key not existing in the wallet.

Action: Copy the correct Oracle Wallet from the instance where the tablespace was created.

DIA-28375: cannot perform cross-endianism conversion on encrypted tablespace

Cause: You attempted to perform cross-endianism conversion on encrypted tablespace.

Action: Cross-endianism conversion on encrypted tablespace is not supported.

DIA-28376: cannot find PKCS11 library

Cause: The HSM vendor's library cannot be found.

Action: Place the HSM vendor's library in the following directory structure: For Unix like system: /opt/oracle/extapi/[32,64]/hsm/{VENDOR}/{VERSION}/libapiname.ext For Windows systems: %SYSTEM_DRIVE%\oracle\extapi\ [32,64]\hsm\{VENDOR}\{VERSION}\libapin//ame.ext [32, 64] - refers to 32bit or 64bit binary. {VENDOR} - The name of the vendor supplying the library. {VERSION} - Version of the library, preferably in num#.num#.num# for // mat.

DIA-28377: No need to migrate from wallet to HSM

Cause: There are either no encrypted columns or all column keys are already encrypted with the HSM master key.

Action: No action required.

DIA-28378: Wallet not open after setting the Master Key

Cause: The Master Key has been set or reset. However, wallet could not be reopened successfully.

Action: Reopen the wallet.

DIA-28379: a different integrity algorithm has been chosen for the table

Cause: Encrypted columns were associated with a different algorithm.

Action: You do not need to specify an algorithm, or specify the same one for the existing encrypted columns.

DIA-28382: Global wallet operation in RAC failed

Cause: Wallet operation in RAC failed.

Action: Check V\$WALLET_ENCRYPTION table to verify if the wallet operation succeeded on any instance. Retry the operation.

DIA-28383: cannot do a PKI certificate-based Master Key migration

Cause: A PKI certificate-based Master Key migration was not allowed.

Action: Execute a symmetric Master Key migration.

DIA-28384: cannot perform Tablespace Encryption

Cause: Tablespace Encryption was attempted when PKI certificate-based Master Key was in use.

Action: Perform a symmetric Master Key Rekey.

DIA-28385: cannot perform a PKI certificate-based migration

Cause: A PKI certificate-based migration to HSM was attempted.

Action: Perform a symmetric Master Key migration.

DIA-28386: cannot perform a PKI certificate-based Master Key Rekey

Cause: A PKI certificate-based Master Key Rekey was attempted when Tablespace Encryption or HSM was in use.

Action: Perform a symmetric Master Key Rekey or disable Tablespace Encryption for all tablespaces.

DIA-28387: Could not acquire an enqueue for wallet operation in Oracle RAC

Cause: Enqueue to block TDE operations in Oracle RAC database could not be obtained.

Action: Retry the wallet operation.

DIA-28388: database is not open in read/write mode

Cause: Database was not open in read/write mode and could not perform these wallet operations.

Action: Open the database in read/write mode and retry this command.

DIA-28389: cannot close auto login wallet

Cause: Auto login wallet could not be closed because it was opened with another wallet or HSM requiring a password.

Action: Close the wallet or HSM with a password.

DIA-28390: auto login wallet not open but encryption wallet may be open

Cause: Auto login wallet was not open. But, the encryption wallet may still be open and subsequent TDE operations might succeed.

Action: If auto login wallet is closed but TDE operations succeed, check the status of the encryption wallet and close that if required.

DIA-28391: cannot close wallet or HSM, password mismatch

Cause: Password provided did not match the password of the open wallet or HSM.

Action: Provide the correct password for wallet or HSM to close the wallet or HSM.

DIA-28392: invalid close wallet syntax

Cause: The command to close the wallet contained improper spelling or syntax.

Action: If attempting to close the wallet, verify the spelling and syntax and execute the command again.

DIA-28393: password required to close the wallet

Cause: A password was not provided when executing the close wallet command.

Action: Retry the command with a valid password.

DIA-28394: decryption of data of length *string* failed

Cause: Decryption of data failed. Error may be due to plain text data in an external file being submitted for decryption, data encrypted with a different key or a utility being submitted for decryption, or TDE encrypted data in data files being corrupted.

Action: Verify that the correct external file is being specified or contact Oracle Support Services.

DIA-28395: could not write the new master key to the wallet

Cause: An attempt was made to write the new master key to the wallet. The wallet or the parent directory may not have the proper file permissions to write the master key in the wallet.

Action: Check the password-based wallet, auto login wallet, the parent directory permissions and disk space availability on the file system. Make sure that the Oracle processes have read/write permissions on the password-based and auto login wallets. Retry the command.

DIA-28396: rekey of enc\$ dictionary table failed

Cause: One or more master keys required for the rekey operation could not be found in the wallet. Either incorrect master key identifiers were inserted into the enc\$ dictionary table or the wallet containing the referenced master keys were improperly modified or deleted.

Action: Restore the most recent copy of the wallet and try again.

DIA-28397: cannot bring file *string* online since it has a passphrase-wrapped key

Cause: The encrypted tablespace file was rewrapped using passphrase through the DBMS_TTS.PASSPHRASE_REWRAP_KEY procedure. Therefore it cannot be part of the database until it is converted by RMAN.

Action: Do not attempt to bring files with passphrase-wrapped keys online.

DIA-28398: cannot rewrap encryption key for this file

Cause: Cannot rewrap encryption key for this file because it was not from an encrypted tablespace, or it had already been rewrapped.

Action: Verify that the file is a copy of a file from an encrypted tablespace.

DIA-28403: file *string* cannot be modified because it is an online data file

Cause: An attempt was made to modify an online data file when the file was not expected to be part of the database.

Action: Check the status of the file and its tablespace and make sure it is offline or is a copy of a data file

DIA-28404: role cannot be altered

Cause: An attempt was made to alter the role to become a global, external, password protected, or secure application role. The role could not be altered because it was already granted to one or more other roles or program units.

Action: Use REVOKE to revoke the role from other roles first.

DIA-28405: cannot grant secure role to a role

Cause: Role granted was a password protected or secure application role. This role can only be granted directly to a user.

Action: Grant the role directly to a user.

DIA-28407: Hardware Security Module failed with PKCS#11 error *string(string)*

Cause: The Hardware Security Module (HSM) connection may have been lost or another internal HSM error was reached.

Action: Check the error. For more information on the error, check the trace files and try the following: 1) Retry the command. If the error repeats, go to step 2. 2) Verify that the HSM is configured correctly and connected. Retry the command. If the error repeats, go to step 3. 3) Ask your Security Officer to close and open the security module. Retry the command. If the error repeats, go to step 4. 4) Bounce the database if possible. Retry the command. If the error repeats, contact Oracle Support Services or your HSM vendor's support.

DIA-28408: encryption using passphrase failed

Cause: Encryption with the passphrase failed which was likely due to an invalid or missing passphrase or due to an internal error.

Action: Verify that the passphrase is provided and try the operation again. If the problem persists contact Oracle Support Services.

DIA-28409: decryption using passphrase failed

Cause: Decryption with the passphrase failed which was likely due to an invalid or missing passphrase or due to an internal error.

Action: Verify that the passphrase is provided and try the operation again. If the problem persists contact Oracle Support Services.

DIA-28410: No need to migrate from HSM to wallet.

Cause: There were either no encrypted columns or all column keys were already encrypted with the wallet master key.

Action: No action required.

DIA-28411: auto login wallet cannot be open during migration

Cause: Auto login wallet could not be opened during migration.

Action: Close the auto login wallet and try the migration again.

DIA-28412: cannot determine the database migration status

Cause: The migration status of the database could not be determined.

Action: Verify if the migration status is correct in props\$ and, if not, correct it. Shutdown and startup the database.

DIA-28414: specified keys are in HSM

Cause: Master key rekey or activation failed because the keys were in Hardware Security Module(HSM) but the configuration indicated that the keys were in wallet.

Action: Correct the sqlnet.ora configuration to HSM or migrate to wallet.

DIA-28415: specified keys are in wallet

Cause: Master key rekey or activation failed because the keys were in wallet but the configuration indicated that the keys were in Hardware Security Module(HSM).

Action: Correct the sqlnet.ora file configuration to wallet or migrate to HSM.

DIA-28416: specify the correct keystore in the sqlnet.ora file

Cause: The keystore specified in the sqlnet.ora file was incorrect.

Action: When migrating to HSM, the keystore specified in sqlnet.ora file should be HSM and similarly when migrating to wallet, the keystore specified in sqlnet.ora should be wallet. Check if the sqlnet.ora file configuration is correct and, if not, correct it.

DIA-28417: password-based keystore is not open

Cause: Password-based keystore was not opened.

Action: Close the auto login keystore, if required, and open a password-based keystore.

DIA-28418: password-based HSM is not open

Cause: Password-based HSM was not opened.

Action: Close the auto login keystore, if required, and open a password-based HSM.

DIA-28419: migration from wallet to Hardware Security Module (HSM) failed

Cause: The TDE_MASTER_KEY_ID entry did not exist in props\$ table. A subsequent attempt to add TDE_MASTER_KEY_ID entry into props\$ failed.

Action: Verify why the TDE_MASTER_KEY_ID entry was deleted from the props\$ table. Retry the command.

DIA-28420: cannot open resetlogs from a restore point prior to wallet creation

Cause: The open resetlogs, open read-only, or standby activation operation failed because the restore point is prior to the wallet creation, and the data file does not contain the database key information as stored in the control file.

Action: Restore to a restore point after the wallet creation, or rebuild the control file with existing data files.

DIA-28421: cannot FINISH a tablespace encrypt, decrypt or rekey command which has not started

Cause: The ALTER TABLESPACE FINISH [ENCRYPT | DECRYPT | REKEY] command did not find a failed attempt for tablespace encrypt, decrypt or rekey.

Action: Check if tablespace already has a desired key version and reissue the command without FINISH keyword if necessary.

DIA-28422: operation disallowed: concurrent master key rekey

Cause: Concurrent master key rekey was detected.

Action: Wait for the master key rekey operation to complete and retry the command.

DIA-28423: current operation disallowed: *string* tablespace is being encrypted, decrypted, or rekeyed

Cause: The specified tablespace was being concurrently encrypted, decrypted, or rekeyed.

Action: Wait for the concurrent operation to complete and retry the command.

DIA-28424: ENCRYPT, DECRYPT or REKEY option already specified

Cause: In the CREATE or ALTER TABLESPACE statement, the ENCRYPT, DECRYPT or REKEY option was specified more than once.

Action: Remove all but one of the ENCRYPT, DECRYPT or REKEY options.

DIA-28425: missing a valid FILE_NAME_CONVERT clause

Cause: A valid FILE_NAME_CONVERT clause was not specified with the ALTER TABLESPACE [ENCRYPT | DECRYPT | REKEY] statement. The FILE_NAME_CONVERT clause is required unless Oracle Managed Files are being used.

Action: Specify a valid FILE_NAME_CONVERT clause and retry the command.

DIA-28426: must FINISH a tablespace encrypt, decrypt or rekey command first

Cause: The ALTER TABLESPACE [ENCRYPT | DECRYPT | REKEY] command found a previously failed attempt for tablespace encrypt, decrypt or rekey.

Action: Issue the ALTER TABLESPACE FINISH [ENCRYPT | DECRYPT | REKEY] command to complete the attempt for tablespace encrypt, decrypt or rekey.

DIA-28427: cannot create, import or restore unencrypted tablespace: *string* in Oracle Cloud

Cause: User tablespaces were not encrypted. Oracle Cloud mandates all user tablespaces must be encrypted.

Action: Create, import or restore an encrypted tablespace instead.

DIA-28428: cannot encrypt or decrypt a data file in mount mode when the database is open elsewhere

Cause: An attempt was made to encrypt or decrypt a data file in mount mode when the database was already opened by another Oracle RAC instance.

Action: Ensure that the database is not open anywhere and retry the command.

DIA-28429: cannot encrypt or decrypt a data file on standby when it is open read-only

Cause: An attempt was made to encrypt or decrypt a data file on a standby database when it was already opened in read-only mode.

Action: Restart the standby instance in mount mode and retry the command.

DIA-28430: cannot encrypt or decrypt a data file for online tablespace *string*

Cause: An attempt was made to encrypt or decrypt a data file for an online tablespace.

Action: Bring the tablespace offline and retry the command.

DIA-28431: cannot encrypt an already encrypted data file *string*

Cause: An attempt was made to encrypt a data file that was already encrypted in an encrypted tablespace.

Action: Check if the data file belongs to an encrypted tablespace.

DIA-28432: cannot encrypt data file *string* in seed pluggable database

Cause: An attempt was made to encrypt a data file that was part of a seed pluggable database, which is not allowed.

Action: Check if the data file belongs to a seed pluggable database.

DIA-28433: mismatched encryption property between data file *string* and tablespace *string*

Cause: Either an unencrypted data file in an encrypted tablespace or an encrypted data file in an unencrypted tablespace was found. When bringing a tablespace online or opening the database, all data files in an encrypted tablespace must be encrypted, and all data files in an unencrypted tablespace must be unencrypted.

Action: Encrypt all of the data files in the tablespace before resuming the operation.

DIA-28434: cannot decrypt an unencrypted data file *string*

Cause: An attempt was made to decrypt a data file that was unencrypted.

Action: Check if the data file belongs to an encrypted tablespace.

DIA-28435: cannot decrypt data file *string* which is not encrypted with the database key

Cause: An attempt was made to decrypt a data file that was not encrypted with the database key. Only data files encrypted with the ALTER DATABASE DATAFILE ENCRYPT or ALTER TABLESPACE ENCRYPTION OFFLINE ENCRYPT statement are encrypted with the database key.

Action: Check if the data file belongs to an encrypted tablespace with a different key from the database key in the V\$DATABASE_KEY_INFO view, or use the ALTER TABLESPACE ENCRYPTION ONLINE DECRYPT statement instead.

DIA-28436: cannot encrypt data file *string* in SYSTEM or SYSAUX tablespace

Cause: An attempt was made to encrypt a data file that was a part of the SYSTEM or SYSAUX tablespace, which is not allowed in compatibility lower than 12.2.

Action: Check if the data file belongs to SYSTEM or SYSAUX tablespace, or change the database compatibility to 12.2 or later.

DIA-28437: unexpected FILE_NAME_CONVERT clause with Oracle Managed Files

Cause: A FILE_NAME_CONVERT clause was specified with the ALTER TABLESPACE [ENCRYPT | DECRYPT | REKEY] statement, which is not allowed when the database is using Oracle Managed Files.

Action: Remove the FILE_NAME_CONVERT clause and retry the command.

DIA-28438: ALTER TABLESPACE *string* ENCRYPTION *stringstring* operation not complete

Cause: The ALTER TABLESPACE [ENCRYPT | DECRYPT | REKEY] command started but could not complete for all the data files of this tablespace.

Action: Check if all the data files are online and if the specified FILE_NAME_CONVERT clause covers all the data files of this tablespace, and retry the command with FINISH keyword.

DIA-28439: cannot close wallet when SYSTEM, SYSAUX, UNDO, or TEMP tablespaces are encrypted

Cause: An attempt was made to close the wallet for a database with an encrypted SYSTEM, SYSAUX, UNDO, or TEMP tablespace.

Action: Decrypt the tablespace and retry the command.

DIA-28440: cannot offline encrypt or decrypt data file *string* - file is in use or recovery

Cause: An attempt was made to offline encrypt or decrypt a data file that was online in an open instance, being encrypted or decrypted by another session, or was being recovered.

Action: Ensure that the tablespace is offline and no other encrypt or decrypt operation is performed on this data file, and end all recovery sessions.

DIA-28441: RMAN clone instance cannot open wallet

Cause: The RMAN clone instance failed to open the auto login wallet in an operation such as a pluggable database (PDB) or tablespace point-in-time recovery because the auto login wallet was incorrectly configured, or did not exist.

Action: Check and correct the auto-login wallet configuration or create an auto-login wallet from the password wallet, and retry the operation.

DIA-28442: Rekey of the TDE master encryption key is not permitted when the database is in restricted mode.

Cause: An attempt was made to rekey the Transparent Data Encryption (TDE) master encryption key when the database was in restricted mode.

Action: Open the database in read-write mode and retry the command.

DIA-28500: connection from ORACLE to a non-Oracle system returned this message:

Cause: The cause is explained in the forwarded message.

Action: See the non-Oracle system's documentation of the forwarded message.

DIA-28501: communication error on heterogeneous database link

Cause: An unexpected communication failure occurred on a heterogeneous database link to a non-Oracle system. The message above will be followed by a second message generated by the connected non-Oracle system.

Action: See the documentation for the non-Oracle system for an explanation of the second error message.

DIA-28502: internal communication error on heterogeneous database link

Cause: A communication error internal to ORACLE's heterogeneous services has occurred.

Action: Contact Oracle customer support.

DIA-28503: bind value cannot be translated into SQL text for non-Oracle system

Cause: A SQL statement used bind variables on a Heterogenous Services database link to a non-Oracle system, but the non-Oracle system does not support bind variables.

Action: Change your SQL statement so that it does not use bind variables.

DIA-28504: ROWID not found in ROWID cache for heterogeneous database link

Cause: The ROWID cache for Heterogeneous Services held no entry that corresponds to the specified ROWID. The ROWID entry may have been overwritten in the ROWID cache.

Action: Enlarge the Heterogeneous Services ROWID cache size by increasing the value of the Heterogenous Services initialization parameter `HS_ROWID_CACHE_SIZE`.

DIA-28505: cannot get non-Oracle system capabilities from *string*

Cause: ORACLE was unable to retrieve capability information for the non-Oracle system connected through a heterogeneous database link. This capability information should be stored in data dictionary tables viewable with the HS_CLASS_CAPS or HS_INST_CAPS data dictionary views.

Action: Contact the DBA to check the server data dictionary table named in the error message. If table contents are incorrect, the DBA should restore all data dictionary content for this FDS_CLASS_NAME and/or FDS_INST_NAME. It usually is sufficient to delete all current data dictionary content for this class and/or instance and initiate a new connection to let the connected agent upload new data dictionary content to the server.

DIA-28506: parse error in data dictionary translation for *string* stored in *string*

Cause: A reference to an ORACLE data dictionary table or view name on a heterogeneous database link to a non-Oracle system could not be translated. The ORACLE data dictionary tables shown with view HS_CLASS_DD contain invalid SQL for the data dictionary translation.

Action: Contact customer support of the agent vendor.

DIA-28507: error in data dictionary view *string*

Cause: The initialization parameter table for the Heterogeneous Services was not available, or its structure (number of columns or column types) was incorrect.

Action: Verify correct installation of the following Heterogeneous Services' initialization parameter views: HS_CLASS_INIT and HS_INST_INIT. If these views are not available, make sure you ran the script CATHS.SQL in the \$ORACLE_HOME/rdbms/admin directory.

DIA-28508: invalid value *string* for Heterogeneous Services initialization parameter *string*

Cause: The specified Heterogeneous Services initialization parameter had an invalid value when attempting to connect to a non-Oracle system.

Action: Check the Heterogeneous Services and agent documentation to determine acceptable values

DIA-28509: unable to establish a connection to non-Oracle system

Cause: Initialization of a database link to a non-Oracle system failed to connect to the Heterogeneous Services agent process for this non-Oracle system.

Action: Check the Net8 service name definition in the following places: -- the USING clause of the CREATE DATABASE LINK statement -- the TNSNAMES.ORA file -- the Oracle Names Server The following are possible reasons for name mismatches: -- The USING clause in the CREATE DATABASE LINK statement has to match the service name defined in the TNSNAMES.ORA file or in the Oracle Names Server. -- The protocol-specific information in the service name definition must match the protocol-specific definition of the responding listener. -- The SID=*name* in the service name definition (in the TNSNAMES.ORA file or in Oracle Names Server) must match the value in the LISTENER.ORA file for the responding listener.

DIA-28510: heterogeneous database link initialization failed

Cause: Initialization of a heterogeneous database link to a non-Oracle system failed due to an error identified by the agent for this non-Oracle system.

Action: Make sure the non-Oracle system is up and running and that all of the environment and initialization values for the agent are set correctly.

DIA-28511: lost RPC connection to heterogeneous remote agent using SID=*string*

Cause: A fatal error occurred in one of the following places: -- the connection between the ORACLE server and the agent -- the heterogeneous services remote agent itself -- the connection to the non-Oracle system This error occurred after communication had been established successfully.

Action: Check for network problems and remote host crashes. The problem is probably in the agent software. If so, contact a customer support representative of the agent vendor.

DIA-28512: cannot get data dictionary translations from *string*

Cause: ORACLE was unable to retrieve data dictionary translation information for the non-Oracle system connected through a heterogeneous database link. This data dictionary translation information should be stored in data dictionary tables viewable with the HS_CLASS_DD or HS_INST_DD data dictionary views.

Action: Ask your DBA to check the server data dictionary table named in the error message. If table contents are incorrect, the DBA should restore all data dictionary content for this FDS_CLASS_NAME and/or FDS_INST_NAME. It usually is sufficient to delete all current data dictionary content for this class and/or instance and initiate a new connection to let the connected agent upload new data dictionary content to the server.

DIA-28513: internal error in heterogeneous remote agent

Cause: An internal error has occurred in the Oracle remote agent supporting a heterogeneous database link.

Action: Make a note of how the error was produced and contact the customer support representative of the agent vendor.

DIA-28514: heterogeneous database link initialization could not convert system date

Cause: The system date was not retrievable.

Action: Verify that the ORACLE server's host machine and operating system are operational. This error should not occur unless low level system functions are failing.

DIA-28515: cannot get external object definitions from *string*

Cause: ORACLE was unable to retrieve definitions of distributed external procedures or remote libraries registered for the non-Oracle system instance, probably because the underlying data dictionary table does not exist or is malformed.

Action: Verify that the ORACLE server's Heterogeneous Services data dictionary was installed correctly. If the Heterogeneous Services data dictionary is not installed, execute the CATHS.SQL script in the \$ORACLE_HOME/rdbms/admin directory.

DIA-28518: data dictionary translation has illegal translation type

Cause: A data dictionary translation definition, either in the ORACLE server data dictionary or in data dictionary content uploaded from a Heterogeneous Services agent, specified an illegal translation type code. Legal values are 'T' or 't' for 'translate', 'M' or 'm' for 'mimic'. Information on the exact data dictionary translation causing the error is written to a trace (*.TRC) file for the ORACLE instance and to the ORACLE instance's alert log. This error occurs when a Heterogeneous Services agent uploads data dictionary content to an ORACLE server on the first connection from the server to the agent.

Action: Contact the customer support of the agent vendor.

DIA-28519: no heterogeneous data dictionary translations available

Cause: The ORACLE server's data dictionary did not define data dictionary translations for the connected non-Oracle system, and automatic self-registration (data dictionary upload) was disabled.

Action: Ask a DBA to resolve this problem. The easiest solution is to enable automatic self-registration by setting the ORACLE server's HS_AUTO_REGISTER initialization parameter to TRUE. An alternative is to load the Heterogeneous Services data dictionary with information specific for the non-Oracle system by executing a SQL script supplied by the agent vendor. If the script is run and the error persists, contact the customer support representative of the agent vendor.

DIA-28520: error initializing heterogeneous data dictionary translations

Cause: ORACLE was unable to retrieve data dictionary translations for the non-Oracle system instance, probably because the underlying data dictionary table does not exist or is formed incorrectly.

Action: Verify that the ORACLE server's Heterogeneous Services data dictionary was installed correctly. If the Heterogeneous Services data dictionary is not installed, execute the CATHS.SQL script in the \$ORACLE_HOME/rdbms/admin directory. If the connected agent, identified by FDS_CLASS_NAME, requires a custom installation script for the ORACLE server, verify that the script has been run. If both scripts were executed and the error persists, contact the customer support representative of the agent vendor.

DIA-28521: no heterogeneous capability information available

Cause: The ORACLE server's data dictionary did not contain capability definitions for the connected non-Oracle system, and automatic self-registration (data dictionary upload) was disabled.

Action: Ask a DBA to resolve this problem. The easiest resolution is to enable automatic self-registration by setting the ORACLE server's HS_AUTO_REGISTER initialization parameter to TRUE. An alternative is to load the Heterogeneous Services data dictionary with information specific for the non-Oracle system by executing a SQL script supplied by the agent vendor. If the script is run and the error persists, contact the customer support representative of the agent vendor.

DIA-28522: error initializing heterogeneous capabilities

Cause: ORACLE was unable to retrieve capability definitions for the non-Oracle system instance, probably because the underlying data dictionary table does not exist or is formed incorrectly.

Action: Verify that the ORACLE server's Heterogeneous Services data dictionary was installed correctly. If the Heterogeneous Services data dictionary is not installed, execute the CATHS.SQL script in the \$ORACLE_HOME/rdbms/admin directory. If the connected agent, identified by FDS_CLASS_NAME, requires a custom installation script for the ORACLE server, verify that the script has been run. If both scripts were executed and the error persists, contact the customer support representative of the agent vendor.

DIA-28523: ORACLE and heterogeneous agent are incompatible versions

Cause: An operation on a database link attempted to connect to a non-Oracle system, but the ORACLE instance and the agent process for the non-Oracle system are incompatible.

Action: Ask your DBA to confirm configuration of both the ORACLE instance and the agent. Additional information on the version incompatibility is logged in trace

(*TRC) files, the ORACLE instance and the agent, and in the ORACLE instance's alert log. Check the documentation for your agent to find out which releases of the Oracle Server are supported.

DIA-28525: unable to create Heterogeneous Services error message text

Cause: Incorrect arguments were passed into the error message creation routine.

Action: Contact Oracle customer support.

DIA-28526: invalid describe information returned to Heterogeneous Services

Cause: The Heterogeneous Services received invalid describe information for a select list, bind list, or stored procedure from the Heterogeneous Services agent. This indicates a problem with the Heterogeneous Services' non-Oracle system agent.

Action: Contact customer support of the agent vendor.

DIA-28527: Heterogeneous Services datatype mapping error

Cause: Either an Oracle datatype could not be mapped to a non-Oracle datatype, or a non-Oracle datatype could not be mapped to an Oracle datatype. These mappings are defined as capability definitions in the ORACLE server's data dictionary.

Action: Verify that the ORACLE server's data dictionary has been initialized with correct capability definitions for the connected FDS_CLASS_NAME and FDS_INST_NAME. If table contents are incorrect, a DBA should restore all data dictionary content for this FDS_CLASS_NAME and/or FDS_INST_NAME. It usually is sufficient to delete all current data dictionary content for this class and/or instance and initiate a new connection to let the connected agent upload new data dictionary content to the server. If the error persists contact the customer support representative of the agent vendor.

DIA-28528: Heterogeneous Services datatype conversion error

Cause: Either an Oracle datatype could not be converted to a non-Oracle datatype, or a non-Oracle datatype could not be converted to an Oracle datatype. The following are possible reasons for the conversion failure: -- overflow problems (in the case of numbers) -- length limitations (in the case of character strings) -- invalid values passed into the conversion routines

Action: Contact customer support of the agent vendor. If the problem is due to size discrepancies between Oracle and the non-Oracle system, it may not be possible to convert the value.

DIA-28529: invalid or missing parameter in Net8 service name definition

Cause: There was an invalid or missing Heterogeneous Services parameter in the Net8 service name definition stored in either the TNSNAMES.ORA file or in the Oracle Names Server.

Action: Ask your DBA to make sure the information in the Net8 service definition is correct and complete. The correct information that should be included in the Net8 service definition can be found in the agent's documentation.

DIA-28530: Heterogeneous Services initialization error in NLS language ID

Cause: Heterogeneous Services was unable to initialize an NLS language ID. Both the ORACLE server and the Heterogeneous Services agent for the connected non-Oracle system must have language IDs.

Action: Contact Oracle customer support.

DIA-28533: Heterogeneous Services coercion handling error

Cause: The Heterogeneous Services encountered an error in coercion handling. The HS can, if the agent vendor so chooses, perform extra processing on SQL statements that contain implicit coercions or that contain coercion functions such as TO_CHAR, TO_NUMBER or TO_DATE. This functionality is controlled by coercion-related capabilities. HS logic reports this error when it encounters an error in one of these capability definitions.

Action: The capability table settings are controlled by the agent vendor and can be modified by the DBA. Contact your DBA and agent vendor and get the correct set of capabilities installed.

DIA-28534: Heterogeneous Services preprocessing error

Cause: One of the things that the Heterogeneous Services can do is to preprocess parts of SQL statements that contain implicit coercions or calls to explicit coercion functions like TO_CHAR TO_NUMBER or TO_DATE. For example, it could convert a call to TO_DATE to a bind variable, pre-evaluate the TO_DATE function call and pass the resulting value to the non-Oracle system as the bind value. This behavior is controlled by some coercion related capabilities. If the capabilities are set incorrectly, the HS could encounter errors when it attempts to do the preprocessing. If it does then this error will be signaled.

Action: The capability table settings are controlled by the agent vendor and can be modified by the DBA. Contact your DBA and agent vendor and get the correct set of capabilities installed.

DIA-28535: invalid Heterogeneous Services context

Cause: A Heterogeneous Services agent's driver module called an HS service routine with an invalid HS context value. This probably is a logic error in the driver.

Action: Contact Oracle customer support or your agent vendor.

DIA-28536: error in processing Heterogeneous Services initialization parameters

Cause: An error described by a subsequent error message prevented successful processing of Heterogeneous Services initialization parameters from the ORACLE server data dictionary.

Action: Check server data dictionary views HS_CLASS_INIT, HS_INST_INIT, and HS_ALL_INITS. Look for conditions which could produce the error identified in the error message immediately following this one.

DIA-28537: no more result sets

Cause: This error code was used internally within Oracle Database Gateway and Heterogeneous Services code and should not be reported to a client program.

Action: Contact Oracle customer support.

DIA-28538: result set not found

Cause: The client program tried fetching from a result set that is not open anymore. Many gateways will, on execution of a stored procedure, automatically close all result sets that were returned by any previously executed stored procedure.

Action: Check the documentation for the gateway that you are using and see if it will automatically close currently open result sets each time a stored procedure is executed. Then check if your client program is doing anything that violates this rule. If it is, fix your program. If it is not then contact Oracle customer support.

DIA-28539: gateway does not support result sets

Cause: The client program tried executing a stored procedure that returns one or more result sets through a gateway that does not have result set support.

Action: Check the documentation for the gateway that you are using and see if it supports result sets returned from stored procedures. If it does not, then the only way of accessing such stored procedures is to upgrade to a version of the gateway that does support result sets (if such a version exists). If the gateway does have result set support and you are still seeing this error then contact Oracle customer support.

DIA-28540: internal result set error

Cause: A protocol error internal to Heterogeneous Services or Oracle Database Gateway code has occurred.

Action: Contact Oracle customer support.

DIA-28541: Error in HS init file on line *number*.\n

Cause: A syntax error occurred in the gateway initialization file.

Action: Check gateway init file to correct the syntax error. For further information, check the error message in the gateway trace file.

DIA-28542: Error in reading HS init file \n

Cause: Reading the gateway init file generated an error.

Action: Check the gateway initialization file name to see that the gateway initialization file actually exists. Check the ifile parameter to see that it points to the correct location.

DIA-28543: Error initializing apply connection to non-Oracle system

Cause: Attempt to initialize connection to non-Oracle for heterogeneous replication failed.

Action: Check if the listener used to connect to the gateway is up and is correctly configured. Make sure that the database link used has been configured correctly and, if a tnsnames alias has been used in the database link definition, make sure that the configuration of the entry in tnsnames.ora has been done correctly.

DIA-28544: connect to agent failed, probable Net8 administration error

Cause: Net8 reported a failure to make a RSLV connection or a protocol mode error when the Oracle server attempted to establish communication with a Heterogeneous Services agent or an external procedure agent. This usually is due to an administration error in setting up Net8 service definitions in TNSNAMES.ORA or LISTENER.ORA: A basic network connection is opened, but it connects to a program which does not use the appropriate protocol. This often is a sign that the connection goes to the wrong program.

Action: Check Net8 administration in the following ways: -- When using TNSNAMES.ORA or an Oracle Names server, make sure that the connection from the ORACLE server uses the correct service name or SID. -- Check LISTENER.ORA on the agent's host machine to assure that the service name or SID refers to the correct agent executable in its (PROGRAM=...) clause. -- Confirm in TNSNAMES.ORA or the equivalent service definition that service 'extproc_connection_data' does NOT contain (HS=), or that the service definition used by a Heterogeneous Services database link DOES contain (HS=).

DIA-28545: error diagnosed by Net8 when connecting to an agent

Cause: An attempt to call an external procedure or to issue SQL to a non-Oracle system on a Heterogeneous Services database link failed at connection initialization. The error diagnosed by Net8 NCR software is reported separately.

Action: Refer to the Net8 NCRO error message. If this isn't clear, check connection administrative setup in tnsnames.ora and listener.ora for the service associated with the Heterogeneous Services database link being used, or with 'extproc_connection_data' for an external procedure call.

DIA-28546: connection initialization failed, probable Net8 admin error

Cause: A failure occurred during initialization of a network connection from the Oracle server to a second process: The connection was completed but a disconnect occurred while trying to perform protocol-specific initialization, usually due to use of different network protocols by opposite sides of the connection. This usually is caused by incorrect Net8 administrative setup for database links or external procedure calls. The most frequent specific causes are: -- Database link setup for an Oracle-to-Oracle connection instead connects to a Heterogeneous Services agent or an external procedure agent. -- Database link setup for a Heterogeneous Services connection instead connects directly to an Oracle server. -- The extproc_connection_data definition in tnsnames.ora connects to an Oracle instance instead of an external procedure agent. -- Connect data for a Heterogeneous Services database link, usually defined in tnsnames.ora, does not specify (HS=). -- Connect data for an Oracle-to-Oracle database link, usually defined in tnsnames.ora, specifies (HS=).

Action: Check Net8 administration in the following ways: -- When using TNSNAMES.ORA or an Oracle Names server, make sure that the connection from the ORACLE server uses the correct service name or SID. -- Check LISTENER.ORA on the connection end point's host machine to assure that this service name or SID connects to the correct program. -- Confirm in TNSNAMES.ORA or the equivalent service definition that service 'extproc_connection_data' does NOT contain (HS=), or that the service definition used by a Heterogeneous Services database link DOES contain (HS=).

DIA-28547: connection to server failed, probable Oracle Net admin error

Cause: A failure occurred during initialization of a network connection from a client process to the Oracle server. The connection was completed but a disconnect occurred while trying to perform protocol-specific initialization, usually due to use of different network protocols by opposite sides of the connection. This usually is caused by incorrect Oracle Net administrative setup for database links or external procedure calls. The most frequent specific causes are: -- The connection uses a connect string which refers to a Heterogeneous Services agent instead of an Oracle server. -- The connection uses a connect string which includes an (HS=) specification. -- Hitting Ctrl +C before connection initialization is complete. -- Using DRCP on Windows with SQLNET.AUTHENTICATION_SERVICES set to NTS. -- Connection timeout due to SQLNET.INBOUND_CONNECT_TIMEOUT parameter when all shared servers are busy in shared server configuration.

Action: Check Oracle Net administration in the following ways: -- When using TNSNAMES.ORA or an Oracle Names server, make sure that the client connection to the Oracle server uses the correct service name or SID. -- Check LISTENER.ORA on the connection end point's host machine to assure that this service name or SID refers to the correct server. -- Confirm in TNSNAMES.ORA or the equivalent service definition that the connect string does not contain (HS=). -- Set SQLNET.AUTHENTICATION_SERVICES to NONE when using DRCP on Windows.

DIA-28550: pass-through SQL: cursor not found

Cause: A value passed to a pass-through SQL function or procedure call as a cursor does not identify a currently open cursor.

Action: Use a cursor number returned by the pass-through SQL OPEN_CURSOR call.

DIA-28551: pass-through SQL: SQL parse error

Cause: A non-Oracle system rejected text supplied as a pass-through SQL statement.

Action: Ensure that the SQL supplied to the pass-through SQL PARSE call is legal for the non-Oracle system.

DIA-28552: pass-through SQL: call flow error

Cause: A pass-through SQL function was called in an invalid order.

Action: Correct program flow by changing the order of API calls to match the flow described in the manual.

DIA-28553: pass-through SQL: invalid bind-variable position

Cause: A pass-through SQL function referring to the position of a bind variable in the currently-parsed SQL statement supplied an invalid bind-variable position. Valid values are 1 through n, where n is the number of bind-variable place-holders in the SQL text.

Action: Verify that the bind-variable position parameter is in the correct range to represent a place-holder in the SQL text. Confirm that the SQL text uses the correct syntax for a bind-variable place-holder, as required by the non-Oracle system.

DIA-28554: pass-through SQL: out of cursors

Cause: The maximum number of open cursors has been exceeded.

Action: Close open cursors by using the pass-through SQL CLOSE_CURSOR function.

DIA-28555: pass-through SQL: required parameter missing or NULL

Cause: An attempt was made to pass a NULL value to a non-NULL parameter.

Action: Use a non-NULL value for the parameter.

DIA-28556: authorization insufficient to access table

Cause: A query attempted to access a table in the non-Oracle system that is either privileged or has privileged columns.

Action: Contact the DBA for the non-Oracle system. The DBA can grant permission to access the privileged table or columns.

DIA-28557: unknown *string* for database link to non-Oracle system

Cause: When attempting to connect to a non-Oracle system through a Heterogeneous Services database link, the agent supporting this non-Oracle system failed to return FDS_CLASS_NAME and/or FDS_INST_NAME. ORACLE requires these names to configure the heterogeneous database link.

Action: Contact the DBA to check setup of the connection and the Heterogeneous Services agent.

DIA-28558: HS_FDS_CONNECT_STRING undefined for non-Oracle system

Cause: A database link to a non-Oracle system had no HS_FDS_CONNECT_STRING initialization parameter in the ORACLE server's data dictionary for Heterogeneous Services. Without this parameter, the connection could not be completed.

Action: Contact your DBA to verify correct setup of an HS_FDS_CONNECT_STRING entry in the ORACLE Heterogeneous Services data dictionary.

DIA-28559: FDS_CLASS_NAME is *string*, FDS_INST_NAME is *string*

Cause: An associated error was reported in another message, and this message supplies supplementary information to assist diagnosis of that error.

FDS_CLASS_NAME and FDS_INST_NAME are used to access information in tables and views of the ORACLE data dictionary that direct operation of Heterogeneous Services on a database link to a non-Oracle data store.

Action: Use the FDS_CLASS_NAME and FDS_INST_NAME values to check ORACLE data dictionary contents when necessary to diagnose the cause of the associated error.

DIA-28560: error in configuration of agent process

Cause: An ORACLE server invoked a function not supported by the connected agent (Heterogeneous Services or external procedures). The most probable cause is incorrect Net8 setup, resulting in use of the wrong agent executable.

Action: Check Net8 administration in the following ways: -- When using TNSNAMES.ORA or an Oracle Names server, make sure that the connection from the ORACLE server uses the correct SID. -- Check LISTENER.ORA on the agent's host machine to assure that this SID refers to the correct agent executable in its (PROGRAM=...) clause.

DIA-28561: unable to set date format on non-Oracle system

Cause: Initialization of a Heterogeneous Services connection to set the date format to be used on the connected non-Oracle system.

Action: If the Oracle data dictionary supplies a value for the HS_NLS_DATE_FORMAT parameter, confirm that this value is formatted correctly by the rules of the non-Oracle system. Also check for additional information in log and trace files generated by the Heterogeneous Services agent.

DIA-28562: Heterogeneous Services data truncation error

Cause: A select operation was attempted with an insufficient data buffer to satisfy the request.

Action: Contact your DBA to verify whether your gateway initialization parameter HS_KEEP_REMOTE_COLUMN_SIZE is set appropriately based on your requirement. If it is, make sure the sizes of bind parameters are sufficient. If the problem persists, contact Oracle Support Services.

DIA-28575: unable to open RPC connection to external procedure agent

Cause: Initialization of a network connection to the extproc agent did not succeed. This problem can be caused by network problems, incorrect listener configuration, or incorrect transfer code.

Action: Check listener configuration in LISTENER.ORA and TNSNAMES.ORA, or check Oracle Names Server.

DIA-28576: lost RPC connection to external procedure agent

Cause: A fatal error occurred in either an RPC network connection, the extproc agent, or the invoked 3GL after communication had been established successfully.

Action: First check the 3GL code you are invoking; the most likely cause of this error is abnormal termination of the invoked "C" routine. If this is not the case, check for network problems. Correct the problem if you find it. If all components appear to be

normal but the problem persists, the problem could be an internal logic error in the RPC transfer code. Contact your customer support representative.

DIA-28577: argument *string* of external procedure *string* has unsupported datatype *string*

Cause: While transferring external procedure arguments to the agent, an unsupported datatype was detected.

Action: Check your documentation for the supported datatypes of external procedure arguments.

DIA-28578: protocol error during callback from an external procedure

Cause: An internal protocol error occurred while trying to execute a callback to the Oracle server from the user's 3GL routine.

Action: Contact Oracle customer support.

DIA-28579: network error during callback from external procedure agent

Cause: An internal network error occurred while trying to execute a callback to the Oracle server from the user's 3GL routine.

Action: Contact Oracle customer support.

DIA-28580: recursive external procedures are not supported

Cause: A callback from within a user's 3GL routine resulted in the invocation of another external procedure.

Action: Make sure that the SQL code executed in a callback does not directly call another external procedure, or indirectly results in another external procedure, such as triggers calling external procedures, PL/SQL procedures calling external procedures, etc.

DIA-28581: protocol error while executing recursive external procedure

Cause: An internal protocol error occurred while trying to execute an external procedure resulting from a callback in another external procedure.

Action: Contact Oracle customer support.

DIA-28582: a direct connection to this agent is not allowed

Cause: A user or a tool tried to establish a direct connection to either an external procedure agent or a Heterogeneous Services agent, for example: "SVRMGR> CONNECT SCOTT/TIGER@NETWORK_ALIAS". This type of connection is not allowed.

Action: When executing the CONNECT statement, make sure your database link or network alias is not pointing to a Heterogeneous Option agent or an external procedure agent.

DIA-28583: remote references are not permitted during agent callbacks

Cause: A Heterogeneous Services agent issued a callback to the Oracle server which attempted to access a remote system. This is not supported.

Action: Make sure that SQL code issued by Heterogeneous Services agents does not reference a database link.

DIA-28584: heterogeneous apply internal error

Cause: The apply slave process encountered an error while trying to apply changes through a gateway to a non-Oracle system.

Action: Make sure that the apply database link is correctly configured and that the gateway listener and the non-Oracle system are correctly set up and are up and running. If everything is configured correctly and the problem still occurs, contact Oracle customer support. errors 28590 - 28599 are reserved for the HS agent control utility

DIA-28590: agent control utility: illegal or badly formed command

Cause: The user has issued an unrecognized or syntactically incorrect command.

Action: Refer to documentation and correct the syntax of the command.

DIA-28591: agent control utility: unable to access parameter file

Cause: The agent control utility was unable to access its parameter file. This could be because it could not find its admin directory or because permissions on directory were not correctly set.

Action: The agent control utility puts its parameter file in either the directory pointed to by the environment variable AGTCTL_ADMIN or in the directory pointed to by the environment variable TNS_ADMIN. Make sure that at least one of these environment variables is set and that it points to a directory that the agent has access to.

DIA-28592: agent control utility: agent SID not set

Cause: The agent needs to know the value of the AGENT_SID parameter before it can process any commands. If it does not have a value for AGENT_SID then all commands will fail.

Action: Issue the command SET AGENT_SID *value* and then retry the command that failed.

DIA-28593: agent control utility: command terminated with error

Cause: An error occurred during the processing of the command. There could be several causes. A SET or an UNSET command could have been issued after the agent was started. This is illegal. The user may have attempted to start two agents with the same SID value or the user could have attempted to shutdown an agent that is no longer running.

Action: If the user wishes to issue a SET or an UNSET command, he should make sure the agent is shutdown first by issuing the SHUTDOWN command.

DIA-28594: agent control utility: invalid parameter name

Cause: The user tried to set or unset an invalid agent parameter.

Action: Refer to documentation and correct the parameter name.

DIA-28595: Extproc agent : Invalid DLL Path

Cause: The path of DLL supplied for the extproc execution is invalid.

Action: Check if the DLL path is set properly using the EXTPROC_DLLS environment variable.

DIA-28596: Extproc agent : Invalid or disabled credential *string*

Cause: The credential of the PL/SQL library supplied for the extproc execution is invalid.

Action: Check if the credential of the PL/SQL library is valid and enabled. errors 28600 - 28620 are reserved for bitmap indexes

DIA-28601: invalid [no]MINIMIZE option

Cause: user didn't type this alter table <table_name> MINIMIZE RECORDS_PER_BLOCK or alter table <table_name> NOMINIMIZE RECORDS_PER_BLOCK

Action: reenter correct sql command

DIA-28602: statement not permitted on tables containing bitmap indexes

Cause: table has bitmap indexes and user is minimizing or nominimizing records_per_block

Action: drop all bitmap indexes before changing records_per_block

DIA-28603: statement not permitted on empty tables

Cause: table is empty and statement does not work on empty tables

Action: try statement after loading your data

DIA-28604: table too fragmented to build bitmap index (*string,string,string*)

Cause: The table has one or more blocks that exceed the maximum number of rows expected when creating a bitmap index. This is probably due to deleted rows. The values in the message are: (data block address, slot number found, maximum slot allowed)

Action: Defragment the table or block(s). Use the values in the message to determine the FIRST block affected. (There may be others).

DIA-28605: bitmap indexes cannot be reversed

Cause: user tried to create reverse bitmap index

Action: don't do this; it is not supported

DIA-28606: block too fragmented to build bitmap index (*string,string*)

Cause: The block(s) exceed the maximum number of rows expected when creating a bitmap index. This is probably due to maximum slot allowed set too low. The values in the message are: (slot number found, maximum slot allowed)

Action: alter system flush shared_pool; update tab\$ set spare1 = 8192 where obj# = (select obj# from obj\$ where NAME=<table_name> AND owner# = <table_owner>); commit;

DIA-28611: bitmap index is corrupted - see trace file for diagnostics

Cause: Validate Index detected bitmap corruption in its argument index

Action: Drop this bitmap index and create a new one.

DIA-28650: Primary index on an IOT cannot be rebuilt

Cause: An attempt is made to issue alter index rebuild on IOT-TOP

Action: Use Alter table MOVE to reorganize the table(IOT)

DIA-28651: Primary index on IOTs can not be marked unusable

Cause: An attempt is made to mark IOT-TOP unusable thru ALTER INDEX

Action: Remove the option UNUSABLE

DIA-28652: overflow segment attributes cannot be specified

Cause: During ALTER MOVE ONLINE of a index-organized table, the user attempted to enter one or more of the following options: OVERFLOW, PCTTHRESHOLD,INCLUDING.

Action: Remove the illegal option(s).

DIA-28653: tables must both be index-organized

Cause: Attempt to exchange a non IOT table/partition with a partition/table respectively

Action: Ensure that non-partitioned and partitioned tables are both index-organized.

DIA-28654: table and partition not overflow compatible

Cause: If one of the tables (partitioned/non-partitioned) has overflow data segment and the other one doesn't.

Action: Ensure that non-partitioned and partitioned tables both have overflow data segment or neither one does.

DIA-28655: Alter table add overflow syntax error

Cause: Syntax error

Action: Check the syntax.

DIA-28656: incomplete attribute specification

Cause: The attribute specification is not done for all partitions"

Action: Specify the storage attributes either for ALL partitions or NONE

DIA-28658: This operation is supported only for Index-Organized tables

Cause: Attempt to perform some IOT specific operation on a non-IOT

Action: don't do this. This is not supported

DIA-28659: COMPRESS must be specified at object level first

Cause: Attempt to specify COMPRESS at partition level without first specifying at the table level

Action: Specify COMPRESS at table level. Use ALTER TABLE xxx MODIFY DEFAULT ATTRIBUTES COMPRESS ...

DIA-28660: Partitioned Index-Organized table may not be MOVED as a whole

Cause: Attempt to MOVE partitioned IOT as a whole

Action: don't do this. This is not supported

DIA-28661: Object already has COMPRESS clause specified

Cause: Attempt to specify compress for iot/index which already has a compression clause.

Action: This is a 'create time only' attribute

DIA-28662: IOT index and overflow segments must share the same LOGGING attribute

Cause: Attempt to specify LOGGING for one segment and NOLOGGING for the other segment.

Action: don't do that

DIA-28663: Logging/NoLogging attribute can not be specified in the statement ALTER TABLE ADD OVERFLOW

Cause: Attempt to specify LOGGING for a Alter Table Add Overflow.

Action: don't do that

DIA-28664: a partitioned table may not be coalesced as a whole

Cause: User attempted to coalesce a partitioned IOT using ALTER TABLE COALESCE statement, which is illegal

Action: Coalesce the table a partition at a time (using ALTER TABLE MODIFY PARTITION COALESCE)

DIA-28665: table and partition must have same compression attribute

Cause: User attempted to EXCHANGE a compression enabled partition with a compression disabled table or vice versa OR the # of columns compressed is different for table and partition

Action: Make sure the compression attributes match. If they don't, fix it using ALTER TABLE MOVE [PARTITION] COMPRESS

DIA-28666: option not allowed for an index on UROWID column(s)

Cause: User attempted to build a REVERSE or COMPRESSED or GLOBAL partitioned index on UROWID column(s)

Action: Build the index without these options

DIA-28667: USING INDEX option not allowed for the primary key of an IOT

Cause: User attempted to define storage attributes for the primary key index of an Index-Organized table with USING INDEX clause. All the storage attribute defined for the (IOT)table applies to the primary key index and a separate USING INDEX clause is not required.

Action: Remove the USING INDEX clause and specify all attributes directly for the table

DIA-28668: cannot reference mapping table of an index-organized table

Cause: An attempt to directly access the mapping table of an index-organized table

Action: Issue the statement against the parent index-organized table containing the specified mapping table.

DIA-28669: bitmap index can not be created on an IOT with no mapping table

Cause: User attempted to create a bitmap index on an index-organized table without a mapping table.

Action: Enable bitmap indexes on the Index-organized table by creating a mapping table using 'ALTER TABLE .. MOVE MAPPING TABLE'.

DIA-28670: mapping table cannot be dropped due to an existing bitmap index

Cause: User attempted to drop the mapping table with NOMAPPING option when the IOT has one or more bitmap indexed.

Action: Drop the bitmap index(es) before dropping the mapping table.

DIA-28671: UPDATE BLOCK REFERENCES may not be used on a partitioned index as a whole

Cause: User attempted to UPDATE BLOCK REFERENCES on a partitioned index using ALTER INDEX UPDATE BLOCK REFERENCES statement, which is illegal.

Action: Issue a partition level operation with ALTER INDEX .. PARTITION .. UPDATE BLOCK REFERENCES

DIA-28672: UPDATE BLOCK REFERENCES may not be used on a global index

Cause: User attempted to UPDATE BLOCK REFERENCES on a global partitioned or non-partitioned index. This feature is not supported for non-partitioned or global

partitioned index on a partitioned IOT and a global partitioned index on a non-partitioned IOT.

Action: Use online index [partition] rebuild to fix the block references

DIA-28673: Merge operation not allowed on an index-organized table

Cause: User attempted merge operation on an index-organized table. Merge is not supported on a IOT .

Action: Use updates and inserts on index-organized table .

DIA-28674: cannot reference transient index-organized table

Cause: An attempt was made to directly access a transient table created on behalf of a index-organized table partition maintenance operation.

Action: Issue the statement against the associated permanent index-organized table.

DIA-28700: Only roles can be attached to or detached from program units.

Cause: An attempt was made to grant object privileges or system privileges to program units.

Action: Grant the privileges to a role first, and then grant the role to the program units.

DIA-28701: Keyword PROCEDURE, FUNCTION, or PACKAGE is either missing or not correct.

Cause: The keyword PROCEDURE, FUNCTION, or PACKAGE was either missing before the program unit, or it was not consistent with the type of the program unit.

Action: Include the correct keyword PROCEDURE, FUNCTION or PACKAGE right before each program unit according to its type.

DIA-28702: Program unit *string* is not owned by the grantor.

Cause: An attempt was made to attach roles to or detach roles from one or more program units by someone other than the owner or SYS. Only a program unit owner or SYS can attach roles to or detach roles from a program unit.

Action: Specify only the program units owned by the grantor in the command.

DIA-28703: Only regular database roles can be attached to or detached from program units.

Cause: An attempt was made to attach non-supported types of roles to or detach them from program units. Application roles, secure application roles, external roles, global roles, and light-weight roles cannot be attached to or detached from program units.

Action: Remove any application role, secure application role, external role, global role, and light-weight role from the command.

DIA-28704: Role *string* is not directly granted to the owner of the program units.

Cause: An attempt was made to attach roles that were not directly granted to the owner of the program units. The roles must be granted to the owner directly in order to attach them to the owner's program units.

Action: Grant the role to the owner of the program unit first.

DIA-28705: The grantor does not have privileges to grant the role *string* to the program units.

Cause: Privileges to grant a role to a program unit were insufficient. The grantor must have the GRANT ANY ROLE privilege or the ADMIN option or the DELEGATE option for the role to do the operation.

Action: Obtain the required privilege and retry.

DIA-28706: duplicate program unit *string* found in list

Cause: A duplicate program unit was found in the GRANTEE clause.

Action: Specify each program unit only once.

DIA-28707: Reserved word ALL was used with roles in the REVOKE command to detach roles from program units.

Cause: An attempt was made to use reserved word ALL jointly with roles in a REVOKE command to detach roles from program units.

Action: Do not specify roles in the privilege clause except for the reserved word ALL.

DIA-28708: More than *string* roles were attached to the program unit.

Cause: Too many roles were currently attached to the program unit.

Action: Detach some roles from the program unit.

DIA-28709: Roles with DELEGATE option can only be granted to users.

Cause: One of the grantees was not a user when trying to grant roles with the DELEGATE option.

Action: Verify that the grantees are users and try the operation again.

DIA-48001: internal error code, arguments: [*string*], [*string*], [*string*], [*string*], [*string*], [*string*], [*string*], [*string*]

Cause: This is the generic internal error number for program exceptions. This indicated that a process encountered an exceptional condition.

Action: Report as a bug - the first argument is the internal error number.

DIA-48002: thread terminated by fatal error

Cause: The thread was in an unrecoverable state.

Action: Examine the thread trace file for more information.

DIA-48003: out of process memory when trying to allocate *string* bytes (*string*,*string*)

Cause: Operating system process private memory was exhausted.

Action: n/a

DIA-48004: unable to allocate *string* bytes of shared memory ("*string*",*string*,"*string*","*string*")

Cause: More shared memory is needed than was allocated in the shared pool.

Action: Reduce your use of shared memory or increase the amount of available shared memory.

DIA-48007: name is already used by an existing product type

Cause: An attempt was made to define a product type with the same name as an already defined product type.

Action: Use the already existing product type with the specified name, or use a different name for the product type.

DIA-48008: id is already used by an existing product type

Cause: An attempt was made to define a product type with the same id as an already defined product type.

Action: Choose a different name for the product type.

DIA-48100: error encountered when attempting to open a file

Cause: There was an error encountered when attempting to open a file with the ADR file interface.

Action: Check that the specified directory name, file name, and open options are valid.

DIA-48101: error encountered when attempting to read a file [string] [string] [string]

Cause: There was an error encountered when attempting to read a file with the ADR file interface.

Action: Check the specified arguments to the read interface.

DIA-48102: encountered the end-of-file when reading the file

Cause: The ADR file interface encountered the end-of-file when reading the file.

Action: Handle the end of file condition.

DIA-48103: error encountered when attempting to write a file [string] [string] [string]

Cause: There was an error encountered when attempting to write a file with the ADR file interface.

Action: Check the specified arguments to the write interface.

DIA-48104: read mismatch on blocks requested and returned, [string], [string]

Cause: There was a mismatch between the number of blocks requested for reading and the number of blocks actually returned.

Action: Check the file to make sure there are no partial blocks.

DIA-48105: write mismatch on blocks requested and returned, [string], [string]

Cause: There was a mismatch between the number of blocks requested for writing and the number of blocks actually written.

Action: Check that there is enough space left on the device to write the requested number of blocks.

DIA-48106: error initializing the ADR string object

Cause: There was an error encountered during the initialization of one of the ADR file objects.

Action: Check the validity of the specified directory name and file name.

DIA-48107: invalid Bfile input, [string]

Cause: An invalid Bfile was passed into the routine to convert the bfile into a file handle.

Action: Verify the contents of the specified Bfile.

DIA-48108: invalid value given for the diagnostic_dest init.ora parameter

Cause: The value given for the diagnostic_dest directory is not a valid directory. Either the directory does not exist or the process does not have read/write privileges on the directory.

Action: Use a value for diagnostic_dest that is a valid directory with the proper read and write privileges.

DIA-48109: invalid lock mode for file descriptor, [string]

Cause: The lock mode associated with the file descriptor was invalid in the context of the routine.

Action: Verify that a file is not trying to obtain multiple locks and that the file is holding a lock when attempting to release the lock.

DIA-48110: error encountered while attempting to get a file lock [string] [string]

Cause: There was an error encountered while trying to get a file lock.

Action: Check the state of the file and operating system.

DIA-48111: error encountered while attempting to release a file lock [string]

Cause: There was an error encountered while trying to release a file lock.

Action: Check the state of the file and operating system.

DIA-48112: invalid flags for open file, string

Cause: Invalid flags were passed in to the open file routine.

Action: Check to see if the flags are a valid combination.

DIA-48113: unable to write to stream file because of out of space condition

Cause: The system is unable to write the requested number of bytes to a stream file. This is due to an out of space condition. The additional information shows how many bytes were not written.

Action: Check that there is enough space left on the device to write the requested number of bytes.

DIA-48114: error encountered when attempting to close a file

Cause: There was an error encountered when attempting to close a file with the ADR file interface.

Action: Check the validity of the file descriptor.

DIA-48115: error encountered while seeking a file position

Cause: There was an error encountered while seeking a position in a file.

Action: Check that the requested file position falls within the file boundaries.

DIA-48116: error encountered when attempting to create a directory [string]

Cause: There was an error encountered when attempting to create a directory.

Action: Check the directory name.

DIA-48117: error encountered when attempting to remove a directory [string]

Cause: There was an error encountered when attempting to remove a directory.

Action: Check the directory name.

DIA-48118: error encountered with list directory [string]

Cause: There was an error with listing the elements of a directory.

Action: Check the state of the operating system.

DIA-48119: error encountered when attempting to remove a file [string] [string]

Cause: There was an error encountered when attempting to remove a file with the ADR file interface.

Action: Check the directory name and file name.

DIA-48120: error encountered when attempting to retrieve the file size [string] [string]

Cause: There was an error encountered when attempting to retrieve the file size with the ADR file interface.

Action: Check the directory name and file name.

DIA-48121: error with opening the ADR stream file [string] [string]

Cause: An error was encountered when attempting to open an ADR stream file.

Action: Check the rest of the error stack for details of the actual error that was encountered.

DIA-48122: error with opening the ADR block file [string] [string]

Cause: An error was encountered when attempting to open an ADR block file.

Action: Check the rest of the error stack for details of the actual error that was encountered.

DIA-48123: error encountered when attempting to flush a file

Cause: There was an error encountered when attempting to flush a file with the ADR file interface.

Action: Check the state of the file.

DIA-48124: device full encountered during write to a file

Cause: The device full error was encountered during the write to a file.

Action: Check the amount of free space on the device.

DIA-48125: illegal identifier length, argn:string, len:string, lim:string

Cause: An input identifier was passed in that has a length that is greater than the max length.

Action: Make sure the input identifier has a length that is less than the max length.

DIA-48126: attempting to create a file that already exists

Cause: The client attempted to create a file that already exists.

Action: Either remove the file or check if it is okay if the file already exists.

DIA-48127: attempting to open a file that does not exist

Cause: An attempt was made to open a file that does not exist.

Action: Either create the file or check why the file does not exist.

DIA-48128: opening of a symbolic link is disallowed

Cause: An error was encountered when attempting to open a file that is a symbolic link. Users are not allowed to open symbolic links.

Action: Check the specified file name.

DIA-48129: invalid input for the full path specification

Cause: Input was incorrectly specified for the full path specification, or the default extension may have been incorrectly specified. Or an empty string was passed in for the full path.

Action: Check that the full path string is non-NULL. If you want to specify a relative path from ADR Home for the full path specification, then use '<ADR_HOME>' instead of the actual path to ADR Home. For ADR Base, use '<ADR_BASE>'.

DIA-48130: invalid lock parameters for get file lock [string]

Cause: Invalid lock parameters passed in for the get file lock routine. The user must pass in file as the lock type. Or, there is a lock mode mismatch. Exclusive locks are not allowed in read-only mode, and shared locks are not allowed in write-only mode.

Action: Check that correct lock type is specified and that the correct lock mode is requested for the file given its open flags.

DIA-48131: error encountered when attempting to tell the file position

Cause: An error was encountered when attempting to tell the file position using the ADR file interface.

Action: Check the directory and file name of the file along with the open state.

DIA-48132: requested file lock is busy, [string] [string]

Cause: The requested file lock is busy because another process is holding the file lock.

Action: Try to get the file lock again at a later time.

DIA-48133: file descriptor has already been opened [string] [string]

Cause: The specified file descriptor has already been opened.

Action: Do not open a file that has previously been opened, or check your code to make sure you are cleaning up a file descriptor that is being reused correctly.

DIA-48134: invalid file descriptor state for operation, string, string, string

Cause: The state of the file descriptor was invalid for the requested operation. An example is that a file was opened for read, but a write operation to the file was requested.

Action: Check the state of the file descriptor and make sure it matches the operation.

DIA-48135: uninitialized file descriptor

Cause: The specified file descriptor is uninitialized.

Action: Make sure the file descriptor is initialized before passing it into the routine.

DIA-48136: directory already exists [string]

Cause: Operation failed because the specified directory already exists.

Action: Remove the directory or ignore this error.

DIA-48137: uninitialized file handle

Cause: The specified file handle is uninitialized.

Action: Make sure the file handle is initialized before passing it into the routine.

DIA-48138: invalid directory name input for client address

Cause: An invalid directory name was specified as part of the address path specification.

Action: Check that the directory name is non-NULL and that the directory name length does not exceed the maximum length.

DIA-48139: invalid input to ADR initialization routine

Cause: There was an invalid input to the ADR initialization routine.

Action: Check the length of the ADR base, product ID, and instance ID input arguments.

DIA-48140: the specified ADR Base directory does not exist [string]

Cause: The specified ADR Base Directory does not exist.

Action: Check that the specified ADR Base Directory is a valid path name and that the directory exists.

DIA-48141: error creating directory during ADR initialization [string]

Cause: Error encountered when creating a directory during the initialization of the ADR subsystem.

Action: Check the input arguments to the ADR initialization routine and the state of the operating system.

DIA-48142: invalid permissions input for change permissions

Cause: Invalid permissions passed into change permissions routine.

Action: Check the value of the permissions input.

DIA-48143: error changing permissions for a file

Cause: Error encountered while changing the permissions for a file

Action: Check the specified directory and file and the state of the operating system.

DIA-48144: error encountered while performing standard file I/O

Cause: Error encountered while performing standard file I/O

Action: Check the validity of standard in, out, and error.

DIA-48145: invalid seek location, [string], [string]

Cause: Invalid seek location specified for routine.

Action: Check the validity of specified seek location.

DIA-48146: missing read, write, or exec permission on directory during ADR initialization [string] [string]

Cause: Error encountered when checking if the process has read, write, and exec privileges on directories needed by the ADR subsystem. This error occurs during the initialization of the ADR subsystem.

Action: Check the input arguments to the ADR initialization routine and the state of the operating system. Ensure that the user has the proper permissions on the ADR directories.

DIA-48147: invalid home location specification for ADR, [string], [string], [string]

Cause: Invalid read or write home location specification for ADR.

Action: An invalid home was specified for the ADR Read or Write Home location.

DIA-48148: error encountered when attempting to move a file

Cause: There was an error encountered when attempting to move a file with the ADR file interface.

Action: Check the directory name and file name.

DIA-48149: error encountered when attempting to copy a file

Cause: There was an error encountered when attempting to copy a file with the ADR file interface.

Action: Check the directory name and file name.

DIA-48150: error encountered with set current working directory

Cause: There was an error with setting the current working directory.

Action: Check the path used, or the state of the operating system.

DIA-48151: error getting operating system time for a file

Cause: Error encountered while getting the operating system time for a file.

Action: Check the specified directory and file and the state of the operating system.

DIA-48152: lock table is full

Cause: Lock table is full - too many locks granted

Action: Try again later

DIA-48153: error encountered when getting ADR base directory default

Cause: There was an error encountered when attempting to get the ADR base directory default value.

Action: Check your environment to see if the \$ORACLE_BASE and \$ORACLE_HOME environment variables are set.

DIA-48154: reached end of file for alert log

Cause: The end of file was reached for reading the Alert Log. There are no more messages to read in the Alert Log.

Action: Do not read from the Alert Log

DIA-48155: error encountered when read alert log [*string*]

Cause: There was an error encountered when attempting to read a message from the Alert Log.

Action: Check the error message and the contents of the alert message.

DIA-48156: Alert log purge has occurred - retry operation

Cause: The purge of the alert log has occurred.

Action: Retry the operation.

DIA-48157: null input to ADR initialization

Cause: There was an null input to the ADR initialization routine.

Action: Check the ADR base, product ID, and instance ID input arguments.

DIA-48158: invalid input for ADR base directory

Cause: An invalid input was passed in for the ADR base directory name. The ADR base directory name is either NULL or too long of a string.

Action: Check the ADR base directory input argument.

DIA-48159: invalid input for ADR product type

Cause: An invalid input was passed in for the ADR product type. The ADR product type is out of bounds.

Action: Check the ADR product type input argument.

DIA-48160: invalid input for ADR product id

Cause: An invalid input was passed in for the ADR product id. The ADR product id is either NULL or too long of a string.

Action: Check the ADR product id input argument.

DIA-48161: invalid input for ADR instance id

Cause: An invalid input was passed in for the ADR instance id. The ADR instance id is either NULL or too long of a string.

Action: Check the ADR instance id input argument.

DIA-48162: string buffer too small to hold input, [string], [string], [string]

Cause: The string buffer is too small to copy an input string into.

Action: Check the size of the string buffer and the input string. Look in the argument for the location in the code where the error occurs.

DIA-48163: error concatenating directory onto path, [string], [string], [string]

Cause: Error encountered while concatenating a directory onto a path name.

Action: Check the error returned by the OS and the size of the input and output buffers.

DIA-48164: error concatenating file onto path, [string], [string], [string]

Cause: Error encountered while concatenating a directory onto a path name.

Action: Check the error returned by the OS and the size of the input and output buffers.

DIA-48165: user missing read, write, or exec permission on specified ADR Base directory [string]

Cause: The specified ADR Base Directory does not have the correct permissions.

Action: Check the read, write, and exec permissions on the specified ADR Base Directory

DIA-48166: error with opening ADR block file because file does not exist [string] [string]

Cause: An error was encountered with opening an ADR block file because the file does not exist.

Action: Check the existence of the ADR Block File.

DIA-48167: invalid argument for checking ADR initialization

Cause: Invalid arguments were specified for the routine to check ADR initialization.

Action: Check the inputs to the ADR initialization routine.

DIA-48168: the ADR sub-system is not initialized

Cause: The ADR subsystem has not been initialized. The requested operation cannot be performed.

Action: Check the usage of the call to the ADR services. The ADR sub-system must be initialized for the call to work.

DIA-48169: incorrect arguments to ADR deferred initialization

Cause: There are incorrect arguments to the ADR deferred initialization.

Action: Check the input arguments. It could be possible that the product is not set up for deferred initialization.

DIA-48170: unable to lock file - already in use

Cause: the file is locked by another process, indicating that it is currently in use by another process

Action: determine which process legitimately owns this file.

DIA-48171: unable to get share lock - file not readable

Cause: share lock request was made on a file not open for read access.

Action: file must be open read-only or read-write to get a share lock.

DIA-48172: unable to find a valid ADR base

Cause: Unable to find a valid ADR base. We tried the ORACLE_BASE, ORACLE_HOME, home, and tmp directories, but none of the directories exist for read/write access.

Action: Check the validity of the ORACLE_BASE, ORACLE_HOME, home, and tmp directories.

DIA-48173: error checking directory existence during ADR initialization [string]

Cause: Error encountered when checking directory existence during the initialization of the ADR subsystem. Either the diag or product type directory does not exist underneath the ADR base.

Action: The directory in the error message must exist in order for ADR initialization to succeed. Make sure the directories exist.

DIA-48174: error encountered with get current working directory

Cause: There was an error with getting the current working directory.

Action: Check the state of the operating system or the size of the path buffer.

DIA-48175: the path name must not contain the string '..'

Cause: The specified path name contains '..'.

Action: Correct the path name and retry the operation.

DIA-48176: error translating a path name into its full path name

Cause: An error was encountered when translating a path name into its full path name.

Action: Check the inputted path name to make sure it is a valid relative path.

DIA-48177: file name with full path information [string] not allowed

Cause: Input was incorrectly specified for the file name. The inputted file name is greater than the maximum length, or the file name has path information. In this case, the file name should not have any path information. The path information should be specified in a separate argument.

Action: Check that the string for the file name is not too long and does not have path information.

DIA-48178: error encountered while reading an ADR block file during ADR initialization [string]

Cause: An error was encountered while reading an ADR block file during the initialization of the ADR subsystem.

Action: Check the state of the file system.

DIA-48179: OS file synchronization failure

Cause: OS command to synchronize the changes to a file with the operating system failed.

Action: Check the state of the file system and the amount of free space left on your device.

DIA-48180: OS open system call failure

Cause: OS open system call failed. The system failed to open or create a file in the requested mode.

Action: Check the OS error code

DIA-48181: OS write system call failure

Cause: OS write system call failed. The system failed to write to a file.

Action: Check the OS error code

DIA-48182: OS read system call failure

Cause: OS read system call failed. The system failed to read to a file.

Action: Check the OS error code

DIA-48183: OS close system call failure

Cause: OS close system call failed. The system failed to close a file.

Action: Check the OS error code

DIA-48184: OS seek system call failure

Cause: OS seek system call failed. The system failed to seek to a position in a file.

Action: Check the OS error code

DIA-48185: OS file size system call failure

Cause: OS file size call failed. The system failed to retrieve the file size for a file.

Action: Check the OS error code

DIA-48186: OS check file exists system call failure

Cause: OS check file exists system call failed. The system failed to perform the check file exists command for a file.

Action: Check the OS error code

DIA-48187: specified directory does not exist

Cause: The specified directory does not exist.

Action: Check the directory name.

DIA-48188: user missing read, write, or exec permission on specified directory

Cause: The user does not have valid permissions on the specified directory. The user is missing either the read, write, or execute permission.

Action: Check the permissions of the specified directory.

DIA-48189: OS command to create directory failed

Cause: The OS command to create a directory failed.

Action: Check the error number associated with the create directory failure.

DIA-48190: OS unlink system call failure

Cause: OS unlink system call failed. The system failed to perform unlink on the specified file.

Action: Check the OS error code

DIA-48191: user missing read or write permission on specified file

Cause: The user does not have valid permissions on the specified file. The user is missing either the read or write permission.

Action: Check the permissions of the specified file.

DIA-48192: OS command to move a file failed

Cause: The OS command to move a file failed.

Action: Check the error number associated with the move file.

DIA-48193: OS command to open a directory failed

Cause: The OS command to open a directory failed.

Action: Check the OS error associated with the open directory failure.

DIA-48194: OS command to close a directory failed

Cause: The OS command to close a directory failed.

Action: Check the OS error associated with the close directory failure.

DIA-48195: OS command to remove a directory failed

Cause: The OS command to remove a directory failed.

Action: Check the OS error associated with the remove directory failure.

DIA-48196: OS command to release advisory lock failed

Cause: The OS command to release the advisory lock failed

Action: Check the OS error associated with the release advisory lock failure.

DIA-48197: OS command to get the file status failed

Cause: The OS command to get the file status failed. This could be because the file is not open or file descriptor is invalid.

Action: Check the OS error associated with the get file status failure.

DIA-48198: OS command to change the file permissions failed

Cause: The OS command to change the file permissions failed.

Action: Check the OS error associated with the failure.

DIA-48199: OS command to copy a file failed

Cause: The OS command to copy a file failed.

Action: Check the error number associated with the copy file.

DIA-48200: Illegal Input Argument [string]

Cause: An illegal argument was passed in.

Action: Fix the call.

DIA-48201: Field Length Exceeds Maximum [string] [string] [string]

Cause: An illegal field length was used.

Action: Fix the call.

DIA-48202: Illegal Identifier *[string]* *[string]*

Cause: Illegal identifier specified.

Action: Use a valid identifier.

DIA-48203: Illegal Data Type *[string]*

Cause: Illegal data type specified.

Action: Use a valid data type.

DIA-48204: Illegal Identifier Length *[string]* *[string]* *[string]*

Cause: The input identifier is too long.

Action: Specify a shorter identifier.

DIA-48205: Record Length too Big *[string]* *[string]* *[string]*

Cause: The sum of the maximum lengths of all fields exceeds the maximum record length that is supported.

Action: Remove or shorten some of the fields.

DIA-48206: Illegal Number of Fields *[string]* *[string]* *[string]*

Cause: The number of fields specified exceeds the supported maximum.

Action: Remove some of the fields in the relation.

DIA-48207: Illegal Field Name *[string]*

Cause: The field name is invalid.

Action: Specify a valid field name.

DIA-48208: Duplicate Field Names *[string]*

Cause: The list of fields specified contains a duplicate field.

Action: Remove the duplicate field.

DIA-48209: Relation Already Exists

Cause: The relation already exists.

Action: Remove the relation.

DIA-48210: Relation Not Found

Cause: The relation was not found.

Action: Either specify a valid relation name or create one with that name.

DIA-48211: Illegal Access Mode *[string]* *[string]*

Cause: The supplied access mode is not recognized.

Action: Supply a valid mode.

DIA-48212: Open Record Access Not Done

Cause: The open record access call was not performed.

Action: The open record access call is required before attempting this call.

DIA-48213: Incorrect Access Mode for Operation *[string]* *[string]*

Cause: The relation was opened in a mode not compatible with the attempted operation being done.

Action: Reopen the relation in the correct mode.

DIA-48214: Sequence Overflow [string] [string] [string]

Cause: The sequence number will exceed the system maximum.

Action: Reset the sequence number.

DIA-48215: Sequence Invalid Operation [string] [string]

Cause: The specified sequence operation is not valid.

Action: Specify a valid operation.

DIA-48216: Field Len Exceeds Max Field Length [string] [string] [string] [string]

Cause: The field length specified exceeds the defined maximum for the field.

Action: Supply a smaller field length.

DIA-48217: Out of Space on Device

Cause: The storage subsystem is out of space.

Action: Add more space to the storage subsystem.

DIA-48218: Duplicate Key Name [string] [string]

Cause: The key name already exists.

Action: Specify a different key name.

DIA-48219: Key Name Doesn't Match Any Existing Key

Cause: The key name provided doesn't match an existing key.

Action: Specify a key name that exists.

DIA-48220: Too Many Keys Defined [string] [string]

Cause: A key is trying to be created that exceeds the maximum number of keys supported.

Action: Drop another key.

DIA-48221: Key Exceeds Maximum Allowed Length [string] [string] [string]

Cause: The sum of the lengths of the fields in the key exceeds the maximum length supported.

Action: Remove one or more fields from the key.

DIA-48222: Predicates/Order By Not Allowed

Cause: A predicate or order by can not be added after fetch has started.

Action: Put the predicate or order by call before the first fetch.

DIA-48223: Interrupt Requested - Fetch Aborted - Return Code [string] [string]

Cause: User interrupt has occurred.

Action: None

DIA-48224: DDL has occurred since parse - reparse [string] [string] [string]

Cause: Another session has performed a DDL (i.e. add field, create key, drop key) that prevents this session from being to continue.

Action: Call open record access again.

DIA-48225: No More Space in Order By Buffer

Cause: The order by buffer size is not sufficient for the number of rows.

Action: Increase the order by buffer size specified.

DIA-48226: No Fetch in Progress

Cause: An attempt to perform update or delete has occurred without a fetch.

Action: You must first perform a fetch.

DIA-48227: Invalid Relation File - [string] [string] [string] [string]

Cause: The AMS file is invalid or corrupt.

Action: Do a repair relation

DIA-48228: Missing Define Call [string]

Cause: A call to define was not performed before doing a fetch.

Action: Call the define service before fetch.

DIA-48229: Invalid Relation Handle Provided [string] [string]

Cause: An invalid or corrupt relation handle was used.

Action: Possible memory corruption.

DIA-48230: Expression arguments must match types

Cause: Incorrect type semantics for fields in the predicate.

Action: Correct the predicate.

DIA-48231: Predicate syntax error

Cause: A syntax error exists in the predicate string.

Action: Correct the predicate.

DIA-48232: Debug command syntax error [string]

Cause: An invalid debug command has been specified.

Action: Correct the debug command.

DIA-48233: Invalid Field Handle [string] [string] [string]

Cause: The field handle is invalid.

Action: Possible memory corruption.

DIA-48238: Invalid Surrogate Length Specified [string] [string]

Cause: An invalid length during create field was specified

Action: Specify a correct length

DIA-48239: Invalid Predicate Handle Provided [string] [string]

Cause: An invalid or corrupt relation handle was used.

Action: Possible memory corruption.

DIA-48240: Field is NOT NULL but NULL value supplied

Cause: A field [%s] declared to not allow nulls contains a null value.

Action: Specify a correct value

DIA-48242: Fields that are NOT NULL can not use surrogates

Cause: NOT NULL fields can not have surrogates specified.

Action: Either remove the constraint or the surrogate.

DIA-48243: Additional Fields must be declared nulls allowed

Cause: A field can not be added to a relation that is defined NOT NULL

Action: Do not specify NOT NULL

DIA-48244: Purge for Retention can't be called while in an Query

Cause: A query is already running - purge for retention can't be invoked

Action: Fix call sequence

DIA-48245: Attempt to Update/Delete when at EOF

Cause: The fetch operation is positioned at EOF - can not update/delete

Action: Do not call update/delete after fetch has returned EOF

DIA-48246: Illegal Operation on External Relation

Cause: An illegal call was made using an external relation

Action: Do not perform the API Call

DIA-48247: Predicate Conversion Error *string*

Cause: A time conversion failed

Action: Fix the input

DIA-48248: Function *string* type check error; ityp = *string* typ = *string* arg = *string*

Cause: Invalid inputs to the specified function

Action: Change the inputs

DIA-48251: Failed to open relation due to following error

Cause: See error below in the error stack

Action: See error below in the error stack

DIA-48252: Relation does not require migration

Cause: Relation on disk is compatible with the current code

Action: Don't run the migration services

DIA-48258: AMS Corrupt Page Found - Rebuild Relation

Cause: A corrupted page has been found.

Action: Do a rebuild of the relation

DIA-48259: AMS Relation not Created Correctly

Cause: Create relation failed

Action: Recreate the relation

DIA-48260: Function *string* not found

Cause: A reference to a function that is not valid was found

Action: Fix the function name

DIA-48262: Sequence references not allowed in predicates

Cause: References to currval or nextval not allowed

Action: Remove these references

DIA-48263: Currval not set yet - use nextval

Cause: References to currval can't occur until a nextval is done

Action: Remove the reference

DIA-48265: Incorrect number of arguments (*string*) provided - expected (*string*)

Cause: Number of arguments to function is incorrect

Action: Specify the correct number of arguments

DIA-48291: Field name *string* can't be unique resolved

Cause: Field name appears in more than one relation

Action: Prefix the field name with the relation name

DIA-48292: Can't use outer join syntax mixed with inner join syntax

Cause: The join condition was specified using both inner and outer join elements"

Action: Specify the join condition correctly

DIA-48293: Outer join syntax not allowed without a join

Cause: Using outer join syntax in the predicate without doing a join

Action: Fix the predicate

DIA-48300: Incident Record Already Exists

Cause: trying to create an incident that already exists

Action: retry operation with new incident ID

DIA-48301: An Invalid Incident ID was specified

Cause: the specified incident ID was invalid

Action: retry operation with correct incident ID

DIA-48302: Incident Directory does not exist

Cause: the incident directory was not found

Action: retry operation with a different incident ID

DIA-48303: Exceeded max Incident Sequence Value

Cause: the maximum supported incident sequence value was exceeded

Action: reset incident sequence and retry operation

DIA-48304: incident staging file not found

Cause: the incident staging file is missing

Action: retry with a different incident ID

DIA-48305: incident ID range is too large

Cause: the maximum incident sequence value was exceeded

Action: retry operation with a smaller range

DIA-48309: illegal incident state transition, [*string*] to [*string*]

Cause: the incident cannot be moved to the new state

Action: retry operation with a valid incident status

DIA-48310: Incident *string* staging file not found

Cause: the incident staging file does not exist

Action: retry operation with a valid incident ID

DIA-48311: Invalid field name [*string*]

Cause: the specified field name is invalid

Action: retry operation with a valid field name

DIA-48312: Sweep incident *string* staging file failed

Cause: the sweep action of incident staging file failed

Action: check the incident ID and retry

DIA-48313: Updates not allowed on ADR relation [*string*] of Version=*string*

Cause: Update operations not supported on this version of ADR relation

Action: check ADR version and retry

DIA-48314: Invalid ADR Control parameter [*string*]

Cause: the specified control parameter is invalid

Action: check parameter and reissue command

DIA-48315: ADR unavailable

Cause: the ADR directory is not available

Action: enable ADR and retry operation

DIA-48316: relation [*string*] unavailable or cannot be created

Cause: the ADR relation is not available

Action: check ADR directory and retry operation

DIA-48317: ADR Relation [*string*] of version=*string* is obsolete

Cause: the version of ADR relation is too old and not supported

Action: check the ADR version and retry

DIA-48318: ADR Relation [*string*] of version=*string* cannot be supported

Cause: the version of ADR relation is too new and cannot be supported

Action: need to use a newer release to access the ADR

DIA-48319: Update operation on ADR relation [*string*] not allowed

Cause: updates to foreign ADR relation cannot be supported

Action: verify ADR location and reissue command

DIA-48320: Too many incidents to report

Cause: the result set of incidents is too large to handle

Action: use a predicate to reduce the number of incidents and retry

DIA-48321: ADR Relation [*string*] not found

Cause: the required ADR relation is missing, ADR may be corrupted

Action: check ADR directory and retry

DIA-48322: Relation [*string*] of ADR V[*string*] incompatible with V[*string*] tool

Cause: the tool version is incompatible with the ADR version

Action: use another version of tool and retry

DIA-48323: Specified pathname [*string*] must be inside current ADR home

Cause: A file outside of ADR home was not allowed for this type of file.

Action: Check the file name and retry.

DIA-48324: Incompatible staging file encountered

Cause: sweep incident failed because staging file is incompatible

Action: check the incident ID and version of ADR and retry

DIA-48339: view [string] does not exist

Cause: view has not been created

Action: verify view name and reissue command

DIA-48340: operation not supported on view [string]

Cause: unsupported (dml) operation on views

Action: verify relation name and reissue command

DIA-48341: Field [string] not a grouping field

Cause: the field name specified is not a grouping field

Action: verify field names and groupby clause and reissue command

DIA-48342: Field [string] cannot be mixed with string fields

Cause: the specified field is incompatible with other grouping fields

Action: verify this and other field names and reissue command

DIA-48343: invalid field [string] reference in string clause

Cause: the specified field in the specified clause is invalid

Action: verify this field name and reissue command

DIA-48344: Invalid Name [string] specified

Cause: Either the name refers to an existing object or violates the reserved namespace rules.

Action: Pick another name

DIA-48345: Timeout encountered during operation

Cause: The attempted operation conflicted with another operation that was already being executed.

Action: Retry operation at a later time.

DIA-48400: ADRCI initialization failed

Cause: The ADR Base directory does not exist

Action: Either create an ADR Base directory or point to an existing one

DIA-48401: SET command requires arguments

Cause: No arguments are input for the SET command

Action: Input the arguments

DIA-48402: Variable is not defined

Cause: No substitution value is input.

Action: Input the substitution value following after the variable name.

DIA-48403: DEFINE or UNDEFINE command has no arguments

Cause: DEFINE and UNDEFINE command need users to input the substitution variable name.

Action: Input the variable name after the keyword DEFINE or UNDEFINE

DIA-48404: RUN or @ command has no arguments

Cause: RUN and @ commands need users to input script filename

Action: Input script filename after RUN and @ commands

DIA-48405: The option in the command is invalid

Cause: The option is not allowed in the command

Action: Check the command syntax

DIA-48406: ECHO or TERMOUT status must be set to ON or OFF

Cause: the status of ECHO and TERMOUT commands must be ON or OFF

Action: input ON or OFF

DIA-48407: DESCRIBE and QUERY commands need at least relation name argument

Cause: This is no relation name is input as argument

Action: Need users to input at least the relation name

DIA-48408: The incident number exceeds the maximum number [string]

Cause: The input incident number exceeds the maximum number

Action: Input fewer incidents

DIA-48409: The ADR homes exceed the maximum number [string]

Cause: The input ADR homes number exceeds the maximum number

Action: Input shorter ADR home string

DIA-48410: The trace path exceeds the maximum number [string]

Cause: The input trace path exceeds the maximum number

Action: Input less trace path

DIA-48411: The trace files exceed the maximum number [string]

Cause: The input trace file path number exceeds the maximum number

Action: Input less trace file path

DIA-48412: The parameters exceed the maximum number [string]

Cause: The input parameter number exceeds the maximum number

Action: Input fewer parameters

DIA-48413: The number of orderby fields exceeds maximum number [string]

Cause: The orderby field number exceeds the maximum number

Action: Input fewer fields

DIA-48414: The string in the execution option exceeds maximum length [string]

Cause: The string length is too long

Action: Divide the commands into two sets or use adrci scripts.

DIA-48415: Syntax error found in string [string] at column [string]

Cause: Parsing error found in the user input string

Action: Validate the input string

DIA-48419: Illegal arguments

Cause: The input argument is illegal

Action: Check the input arguments and make sure it is not null

DIA-48421: Predicate string in the command must be single or double quoted

Cause: The predicate string is not single or double quoted

Action: Put single or double quotes around the predicate string

DIA-48423: IMPORT command must have a filename

Cause: File name is missing from the command

Action: Input the import file name after the IMPORT keyword

DIA-48424: SHOW TRACE command needs argument

Cause: SHOW TRACE command needs arguments

Action: Input arguments

DIA-48426: The initialization filename is too long

Cause: The initialization filename length exceeds the maximum length

Action: This is really an internal setting parameter of the ADRCI, report it as a bug. Alternatively move the initialization file to the current working directory

DIA-48428: Input command string exceeds max length [*string*]

Cause: The current command string is too long and exceeds the limit

Action: Input less characters

DIA-48429: Variable name [*string*] is an invalid identifier

Cause: The substitution variable name is not a valid identifier

Action: Input the valid identifier defined by ADRCI

DIA-48431: Must specify at least one ADR home path

Cause: The command syntax requires at least one ADR home path to be input

Action: Check the command syntax and input the home path

DIA-48432: The ADR home path [*string*] is not valid

Cause: The adr home user inputs is not valid, which may due to the path does not exist.

Action: Check if the input home path exists

DIA-48433: Unknown help topic

Cause: The input topic is unknown

Action: Check if the topic is valid

DIA-48434: No DDE commands are input

Cause: No DDE commands are input

Action: Input a DDE command

DIA-48435: Input a trace file

Cause: Show trace expects a trace file

Action: Input a trace file

DIA-48436: File [*string*] does not exist

Cause: the file does not exist

Action: Validate the trace file name

DIA-48437: No IPS commands are input

Cause: No IPS commands are input

Action: Input a IPS command

DIA-48438: [*string*] is not a valid number

Cause: The input number is not valid

Action: Check the input number

DIA-48439: The input path name exceeds the maximum length [*string*]

Cause: The input path name is too long

Action: Report as a bug to change the limit

DIA-48440: Variable [*string*] is already defined

Cause: The variable name is defined previously

Action: Use another variable name

DIA-48441: The function parameter number exceeds the maximum number [*string*]

Cause: The function parameter number exceeds the maximum number

Action: Report it as bug to change the maximum number

DIA-48442: The number of control parameters exceeds the maximum allowed [*string*].

Cause: The control parameters exceeded the maximum number allowed.

Action: Check the parameters. If the parameters are correct, contact Oracle Support Services.

DIA-48443: Trace Record type appears in the middle of the path

Cause: The trace record cannot be in the middle of the path

Action: Validate the input

DIA-48444: The single "." and "*" cannot appear in the middle of the path

Cause: The single "." and "*" appears in the middle of the path

Action: Validate the input

DIA-48445: Path expression only supports one bucket dump type

Cause: The path expression only supports one bucket dump"

Action: Change the path expression syntax

DIA-48446: The command needs path input

Cause: No path is input as a parameter

Action: Input the path

DIA-48447: The input path [*string*] does not contain any ADR homes

Cause: The input path does not contain ADR homes

Action: Validate the path

DIA-48448: This command does not support multiple ADR homes

Cause: There are multiple homes in the current adr setting.

Action: Use command SET HOMEPATH to set a single home

DIA-48449: Tail alert can only apply to single ADR home

Cause: There are multiple homes in the current setting

Action: Use command SET HOMEPATH to set a single home

DIA-48457: ADRCI core dumped

Cause: It is adrci internal error.

Action: Report to Oracle

DIA-48458: "show incident" failed due to the following errors

Cause: There could be a bug or users do not have the access permission

Action: Report to Oracle if the errors are not due to ADR permission settings

DIA-48459: "describe" command only supports one ADR home path

Cause: Multiple ADR home paths in the command

Action: put one ADR home path

DIA-48460: The home path [*string*] is not valid

Cause: The input home path is not valid home path

Action: Verify the homopath

DIA-48461: "describe" failed due to the following errors

Cause: Underlying code failed

Action: If it is not due to permission issue, report to Oracle

DIA-48462: Fatal error encountered in [*string*]

Cause: Fatal error encountered

Action: Report to Oracle

DIA-48463: The value buffer reached the maximum length [*string*]

Cause: The value buffer is full

Action: Report to Oracle

DIA-48464: The predicate buffer reached the maximum length [*string*]

Cause: The predicate buffer is too small

Action: Report to Oracle

DIA-48465: The specified type [*string*] is undefined

Cause: The purge type specified is undefined

Action: Check the type name

DIA-48466: Internal failure, the report context is not initialized

Cause: Internal problem failure.

Action: Report to Oracle

DIA-48467: "*string*" for the keyword "*string*" is not a valid number

Cause: The keyword value is not a valid number

Action: Check the value

DIA-48468: "string" is not a valid keyword

Cause: The keyword is not defined for the command

Action: Check the available keywords

DIA-48469: Keyword "string" cannot be duplicated

Cause: The command can only allow one key with the name

Action: Remove one keyword name from the command

DIA-48470: Unknown "string" command

Cause: The command is not valid

Action: Use help manual to check the command syntax

DIA-48472: Invalid product name

Cause: The product name provided does not exist

Action: Specify a product name, see HELP SHOW BASE

DIA-48473: Internal failure, unknown return code [string]

Cause: Internal program failure

Action: Report to Oracle

DIA-48474: Syntax error specifying product, must not be NULL

Cause: The product clause is being used, but no product name is provided

Action: Supply the product name

DIA-48475: [string] is not a valid timestamp

Cause: The input timestamp string is not in valid format

Action: None

DIA-48476: Cannot write the results out to a file, please check if \nthe environment variable TMPDIR is set or the current directory is \nnot writable

Cause: The current path may not be writable

Action: If the current path is writable, report to Oracle

DIA-48477: The input path does not contain any valid ADR homes

Cause: The input path does not contain any valid ADR homes

Action: Check the path if it is valid

DIA-48478: No alert messages are created

Cause: No alert messages are created

Action: No action

DIA-48479: No HM runs are created

Cause: There is no hm runs

Action: No action

DIA-48480: No incidents are created

Cause: There is no incident

Action: No action

DIA-48481: Report is not available

Cause: The requested report does not exist"

Action: Check the report ID

DIA-48482: Report is not generated

Cause: The requested report is not ready to be generated

Action: Check the report ID

DIA-48483: Spooling failed, it may be because the spool file cannot be created due to a permission issue

Cause: The spooling filename may not be valid or the file cannot be created

Action: Check the permissions of the target directory and verify the filename

DIA-48484: Run script failed, it may be because the script file does not exist

Cause: The script file may not exist

Action: Check if the script file exist

DIA-48485: The file exceeds the maximum length [string]

Cause: The filename is too long

Action: Report to Oracle

DIA-48486: The file [string] exceeds the maximum length [string]

Cause: The filename is too long

Action: Report to Oracle

DIA-48487: The internal predicate string exceeds the maximum length [string]

Cause: The predicate string exceeds the maximum length

Action: Report to Oracle

DIA-48488: The predicate string exceeds the maximum length [string]

Cause: The input predicate string exceeds the maximum length

Action: Report to Oracle

DIA-48489: The input exceeds the maximum length [string]

Cause: The input exceeds the maximum length

Action: Report to Oracle

DIA-48490: The field number exceeds the maximum number [string]

Cause: The input field number exceeds the maximum number

Action: Input less field names

DIA-48491: The program name is too long, exceeds the maximum length [string]

Cause: the program name length exceeds the maximum length setting

Action: Report to Oracle

DIA-48492: The report component name is not defined

Cause: the report component name does not exist

Action: Check the component name to ensure it is registered

DIA-48493: Sweep command needs parameters

Cause: sweep command needs parameter

Action: Check the syntax of the command

DIA-48494: ADR home is not set, the corresponding operation cannot be done

Cause: The adr home is not set in the current adrci session

Action: Set the adr home using the adrci command "set base" and "set homepath"

DIA-48495: Interrupt requested

Cause: User requested to interrupt the current action

Action: No action is needed

DIA-48496: "string" is a mandatory keyword for the command

Cause: The keyword is not specified for the command

Action: Input the keyword

DIA-48497: "string" is an invalid product type

Cause: The product type is not registered

Action: Check the product type

DIA-48499: The value of the keyword "string" exceeds the maximum length string

Cause: The keyword value is too long

Action: Check the limit and input again

DIA-48500: File Write Error [string] [string]

Cause: Number of bytes written differs from number requested. Possibly due to out of disk space.

Action: Ensure sufficient disk space.

DIA-48501: File Read Error [string] [string]

Cause: Number of bytes read differs from number requested. Possibly due due to corrupted file.

Action: Recreate the file.

DIA-48502: Invalid Command Line - Missing Required Elements

Cause: Missing required command line arguments.

Action: Review the help message and supply the required arguments.

DIA-48503: Invalid Parameter Specified

Cause: Invalid input parameter supplied.

Action: Review the help message and correct the invalid input parameter.

DIA-48504: Relation Parameter Must be Specified

Cause: Relation parameter must be specified during ADR export.

Action: Supply the relation parameter.

DIA-48505: File Parameter Must be Specified

Cause: File parameter must be specified during ADR import.

Action: Supply the file parameter.

DIA-48506: Existing Relation at different version than export [string] [string]

Cause: Attempting to import into an existing relation and the schema version of that relation differs from the schema of the relation that was exported.

Action: Drop the existing relation if you still wish to import the relation.

DIA-48507: Predicate Not Allowed during Import

Cause: The predicate option is not allowed during ADR import.

Action: Remove the predicate argument.

DIA-48508: Export File Version [string] Can Not be Used by Import [string]

Cause: The version of the export file is not able to be read by this version of ADR import.

Action: Rerun the export using the current version of ADR export.

DIA-48509: Error occurred during operation. See the following errors

Cause: An underlying error has occurred.

Action: Review and correct the underlying error.

DIA-48510: Can not export an in memory relation

Cause: In memory relations can not be exported.

Action: Pick a different relation.

DIA-48600: HM run with name [string] already exists

Cause: The specified run name already existed.

Action: Specify different run name and re-run the check

DIA-48615: Parameter [string] value not specified

Cause: Run was invoked without specifying the parameter and its value

Action: Specify the needed parameter and its value

DIA-48618: Invalid HM run name specified

Cause: An invalid Health Monitor (HM) run name was specified.

Action: Specify a HM run name using only alphanumeric and underscore characters.

DIA-48800: "string" for the keyword "string" is not in the right format of timestamp

Cause: The value format is not right

Action: Check the format ADRCI supports

DIA-48801: The option "string" is duplicated

Cause: The option has been specified more than once

Action: Check the input

DIA-48802: The options "%0!s" and "%1!s" are mutually exclusive.

Cause: An attempt was made to specify the two options together.

Action: Specify only one of the options.

DIA-48803: The keyword "string" is not defined for this command

Cause: The keyword is invalid

Action: Check the valid keywords for the command

DIA-48804: The command needs at least one file input

Cause: No files are specified to view

Action: Input the files

DIA-48805: BEGIN BACKUP issued already - must do an END BACKUP first

Cause: A begin backup was already issued.

Action: Issue END BACKUP

DIA-48806: Unknown Function Reference (*string*)

Cause: The function reference is not a valid function

Action: Change the reference

DIA-48807: The SET subcommand requires at least one additional parameter

Cause: An argument was not specified for the SET subcommand.

Action: Specify additional arguments or precede the command with help.

DIA-48808: malformed SET CONTROL command - see "HELP SET CONTROL"

Cause: Improper syntax was specified for the SET CONTROL command.

Action: Specify additional arguments or use the HELP SET CONTROL command for more information.

DIA-48809: The number of estimate parameters exceeds the maximum allowed [*string*].

Cause: The estimate parameters exceeded the maximum number allowed.

Action: Check the parameters. If the parameters are correct, contact Oracle Support Services.

DIA-48810: malformed ESTIMATE command - see "HELP ESTIMATE"

Cause: Improper syntax was specified for the ESTIMATE command.

Action: Specify additional arguments or use the HELP ESTIMATE command for more information.

DIA-48900: Illegal Input Argument [*string*]

Cause: The input argument is invalid

Action: Check the input parameter

DIA-48906: Parser context is not valid

Cause: The parser context is not initialized

Action: Call the initialization routine first before using the context

DIA-48907: The end of file is reached

Cause: The end of file is reached

Action: Handle the end of file

DIA-48908: No trace files are found

Cause: This is no file in the navigator context, either it is done with parsing, or no file is pushed

Action: Check if the file is added to the context

DIA-48909: Scan context is not initialized

Cause: The scan context is not initialized

Action: call the initialization routine of the scan context

DIA-48912: The specified trace filename is too long

Cause: The resulting trace filename length exceeds the maximum length

Action: Use a smaller trace filename suffix or move ADR higher in the directory hierarchy

DIA-48913: Writing into trace file failed, file size limit [*string*] reached

Cause: An attempt was made to write into a trace file that exceeds the trace's file size limit

Action: increase the trace's file size limit.

DIA-48914: File position is not in right format

Cause: The file position format is not right

Action: Check if the file format string is the right one

DIA-48928: The predicate exceeds the max limit *string*

Cause: The predicate is too long, exceeds the max limit

Action: Use a shorter predicate

DIA-48929: The trace record size exceeded the max size that can be read [*string*]

Cause: A trace record is too large to be read by the ADR viewer

Action: Report to Oracle

DIA-48930: Cannot allocate memory for processing traces

Cause: A memory allocation request failed

Action: Report to Oracle

DIA-48934: invalid input for the file name identifier

Cause: An invalid input was given for the file name identifier. The file name is not allowed to have slashes ('/', '/') and is not allowed to refer to the parent directory using the '..' characters.

Action: Check the file name and provide a valid input.

DIA-48936: The number of relations exceeds maximum number [*string*]

Cause: Too many relations listed

Action: Reduce the number

DIA-48937: Feature (*string*) currently not allowed for SELECT

Cause: Feature is not allowed

Action: Remove feature

DIA-48938: View select column count differs from select alias list

Cause: The view alias list has a different number of fields than the select list"

Action: Change the alias list or view select statement

DIA-48939: Select * not allowed in a CREATE VIEW

Cause: * is currently not allowed for a create view select list

Action: List the fields explicitly

DIA-49315: Invalid incident type specified [*string*]

Cause: The specified incident type is not defined in this ADR.

Action: Specify an available incident type.

DIA-49404: No such package [*string*]

Cause: The specified package does not exist.

Action: Specify an existing package.

DIA-49405: Cannot change package name [*string*] [*string*]

Cause: Attempted to change package name after package generation.

Action: Use current name, or create a new package with the desired name.

DIA-49406: Undefined configuration parameter specified [*string*]

Cause: The specified configuration parameter was not found in ADR.

Action: Specify an existing parameter. Re-populate parameters if necessary.

DIA-49407: No unpacking history in this home

Cause: No packages were unpacked into this home.

Action: Verify the current home. Unpack a package if necessary.

DIA-49408: Invalid home specified [*string*]

Cause: An invalid ADR_HOME was specified.

Action: Verify that the directory exists, and has the correct structure.

DIA-49409: Incremental package provided when complete expected

Cause: No packages were unpacked into this home.

Action: Provide a complete package, or use FORCE option.

DIA-49410: Not an IPS package

Cause: The specified file was not an IPS package.

Action: Verify that the file is a valid zip file with expected contents.

DIA-49412: Package ID does not match existing ID [*string*] [*string*]

Cause: The package ID in package file did not match previously unpacked packages.

Action: Use the correct location for unpacking the package.

DIA-49413: Package name does not match existing name [*string*] [*string*]

Cause: The package name in package file did not match previously unpacked packages.

Action: Use the correct location for unpacking the package.

DIA-49414: Package sequence later than expected [*string*] [*string*]

Cause: The package sequence in package file was later than expected.

Action: Apply packages in correct order, or use FORCE option.

DIA-49415: Package sequence earlier than expected [*string*] [*string*]

Cause: The package sequence in package file was earlier than expected.

Action: Apply packages in correct order, or use FORCE option.

DIA-49416: Earlier package sequence applied with FORCE option [string] [string]

Cause: An earlier package sequence was applied using the FORCE option.

Action: Apply a complete sequence which is later than any already applied, or use FORCE option to apply an incremental package.

DIA-49417: Cannot modify already generated package

Cause: Attempted to change package attributes after package generation.

Action: Create a new package with the desired name.

DIA-49418: Invalid package name specified

Cause: An invalid Incident Packaging Service (IPS) package name was specified.

Action: Specify a package name using only alphanumeric and underscore characters.

DIA-49420: Package too large [string] [string]

Cause: The package is too large.

Action: Remove some files or incidents from the package, or try using incremental mode.

DIA-49421: Maximum number of package files generated [string]

Cause: The command generated the maximum number of package files.

Action: Remove some files or incidents from the package, or use incremental mode to generate additional files.

DIA-49423: File outside ADR not allowed

Cause: The specified file is not within the ADR directory structure.

Action: Specify a file inside ADR.

DIA-49424: Directory outside ADR not allowed

Cause: The specified directory is not within the ADR directory structure.

Action: Specify a directory inside ADR.

DIA-49425: File inside ADR not allowed

Cause: The specified file is within the ADR directory structure.

Action: Specify a file outside ADR.

DIA-49426: Directory inside ADR not allowed

Cause: The specified directory is within the ADR directory structure.

Action: Specify a directory outside ADR.

DIA-49427: No such file or file not accessible [string]

Cause: The specified file does not exist or cannot be accessed.

Action: Create the file or verify file permissions.

DIA-49428: No such directory or directory not accessible [string]

Cause: The specified directory does not exist or cannot be accessed.

Action: Create the directory or verify directory permissions.

DIA-49429: File already exists and OVERWRITE option not specified [string]

Cause: The client attempted to create a file that already exists.

Action: Either remove the file or use the OVERWRITE option.

DIA-49430: No such problem [*string*]

Cause: The specified problem does not exist.

Action: Specify a problem that exists in this repository.

DIA-49431: No such incident [*string*]

Cause: The specified incident does not exist.

Action: Specify an incident that exists in this repository.

DIA-49432: Problem not part of package [*string*]

Cause: The specified problem is not included in the package.

Action: Specify a problem that is included in the package.

DIA-49433: Incident not part of package [*string*]

Cause: The specified incident is not included in the package.

Action: Specify an incident that is included in the package.

DIA-49434: Invalid date format

Cause: An invalid format was used to specify a date

Action: Specify the date in a supported format.

DIA-49435: Flood-controlled incident not allowed here [*string*]

Cause: A flood-controlled incident cannot be included in a package

Action: Specify an incident that is not flood-controlled

DIA-49436: Date conversion error [*string*]

Cause: An invalid format was used to specify a date

Action: Specify the date in a supported format.

DIA-49440: Warnings while unpacking package, details in file *string*

Cause: There were some non-fatal errors when unpacking a package

Action: Review the specified unpacking log file

DIA-49441: Warnings while finalizing package, details in file *string*

Cause: There were some non-fatal errors when finalizing a package

Action: Review the specified finalize log file

DIA-49450: Non-zero return code from archiving utility [*string*] [*string*]

Cause: The archiving utility (zip/unzip) returned a warning or error.

Action: Verify that the file and directory exist and are readable, and that the file is a valid zip file.

DIA-49451: Archive file structure error [*string*] [*string*]

Cause: The archiving utility (zip/unzip) returned an error indicating that the archive file structure is incorrect.

Action: Verify that the file was transferred correctly and that the file is a valid zip file.

DIA-49452: Archiving utility out of memory [*string*] [*string*]

Cause: The archiving utility (zip/unzip) returned an error indicating that it was unable to allocate enough memory.

Action: Check for operating system limitations on process memory usage.

DIA-49453: Invalid command invoking archiving utility [string] [string]

Cause: The archiving utility (zip/unzip) was invoked with an invalid command line, or with invalid options.

Action: Verify that there are no operating system settings affecting the behavior of the archiving utility..

DIA-49454: Archive is missing or empty [string] [string]

Cause: The specified archive does not exist, or is empty.

Action: Check if the specified archive exists.

DIA-49455: Archive I/O failed [string] [string]

Cause: An attempt to create, write to or read from an archive failed.

Action: Verify that operating system I/O operations are working correctly.

DIA-49456: Operation failed due to insufficient disk space [string] [string]

Cause: An operation on an archive failed due to insufficient disk space.

Action: Verify that there is sufficient disk space. Check for operating system quotas or other restrictions.

DIA-49601: syntax error: found "string": expecting one of: "string" etc..

Cause: Syntax error discovered when processing event specification

Action: Enter correct event specification

DIA-49701: Parameter 'string' is NULL.

Cause: NULL was passed to a function that requires a non-NULL parameter.

Action: Pass a valid non-NULL parameter.

DIA-49702: unable to allocate 'string' bytes of external procedure call memory

Cause: An attempt to allocate memory in a C external procedure failed due to insufficient memory.

Action: Try the operation again.

DIA-49703: invalid ADR service name

Cause: A NULL or undefined Automatic Diagnostic Repository (ADR) service name was specified.

Action: Specify a valid ADR service name.

DIA-49704: invalid incident ID

Cause: A NULL or nonpositive incident ID was specified.

Action: Specify a valid ADR incident ID.

DIA-49800: ADR block file [string] could not be opened using direct I/O

Cause: An error was encountered when attempting to open an Automatic Diagnostic Repository (ADR) block file using O_DIRECT. The system automatically retries the open without using O_DIRECT.

Action: No action is required.

DIA-49802: missing read, write, or execute permission on specified ADR home directory [string]

Cause: The specified Automatic Diagnostic Repository (ADR) home directory did not have the correct permissions.

Action: Check the read, write, and execute permissions on the specified ADR home directory.

DIA-49803: Purge not possible due to incompatible schema version.

Cause: The Automatic Diagnostic Repository (ADR) found on disk was different from the version in the library.

Action: Start the product to migrate automatically or use the ADRCI utility command MIGRATE SCHEMA.

DIA-49804: cannot modify ADR PDB parameter *string*

Cause: An attempt was made to alter the Automatic Diagnostic Repository (ADR) pluggable database (PDB) - only parameters from a non-consolidated database or root container of a consolidated database.

Action: ADR PDB parameters cannot be altered from non-consolidated database or root container of a consolidated database. Switch to a PDB to perform the operation.

DIA-49900: cannot modify parameter *string*

Cause: An attempt was made to alter the parameter from a non-consolidated database or pluggable database.

Action: The parameter can only be altered in the root container of a consolidated database.

DIA-51001: check [*string*] not found in HM catalog

Cause: checker name might have been misspelled

Action: retry running check with proper checker name

DIA-51003: run parameters not formatted correctly

Cause: Run parameters were given in a wrong format

Action: Correct the run params text and try again

DIA-51004: Check doesn't take any input params

Cause: run params were passed to the check, which doesn't take any inputs

Action: don't pass any run params and try again

DIA-51006: unexpected delimiter ';' in the run params text

Cause: run params were not properly formatted.

Action: correct the run params format and try again

DIA-51007: parameter [*string*] not registered with this check

Cause: Wrong inputs were given to this check.

Action: correct the run params and try the check again

DIA-51008: parameter [*string*] value is not a proper number

Cause: the given parameter value is a not a proper number

Action: correct the run params and try again

DIA-51025: check name should be non NULL value

Cause: NULL value was passed for check name

Action: give a proper check name and retry again

DIA-51035: invalid timeout value

Cause: User specified an invalid timeout value

Action: n/a

DIA-51036: check [string] can only be executed in database instance

Cause: An attempt was made to run database-specific check in ASM environment

Action: Don't run the check in ASM environment

DIA-51037: check [string] can only be executed in ASM instance

Cause: An attempt was made to run ASM-specific check in a database environment

Action: Don't run the check in database environment

DIA-51102: cannot change priority of a critical failure string

Cause: An attempt was made to change priority of a failure with CRITICAL priority.

Action: No action is required.

DIA-51103: cannot change priority of a closed failure string

Cause: An attempt was made to change priority of a closed failure.

Action: No action is required.

DIA-51105: cannot change priority of a failure to CRITICAL

Cause: An attempt was made to change priority of a failure to CRITICAL.

Action: No action is required.

DIA-51106: check failed to complete due to an error. See error below

Cause: While executing the check, an unexpected error occurred.

Action: Check the errors below and try rerunning the check.

DIA-51107: failures are changing too rapidly - retry command

Cause: Failures were added or closed during a Data Recovery Advisor command.

Action: Retry the command.

DIA-51108: unable to access diagnostic repository - retry command

Cause: A lock or timeout error occurred when trying to read failure or repair data from the Automatic Diagnostic Repository.

Action: Retry the command.

DIA-51109: repair script file is too large

Cause: Data Recovery Advisor generated a repair script file that was too large.

Action: Retry the command with fewer failures selected.

DIA-51110: buffer size [string] is too small - [string] is needed

Cause: An internal buffer was too small.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51111: failure revalidation timed out

Cause: Data Recovery Manager was unable to revalidate all failures before timing out.

Action: Increase timeout and retry the command.

DIA-51190: Internal error [*string*], [*string*] from DBMS_IR

Cause: An unexpected error occurred while executing a routine in the DBMS_IR package.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51191: Too many files opened

Cause: Data Recovery Advisor attempted to open too many files using the DBMS_IR package.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51192: File not open

Cause: Data Recovery Advisor attempted to read or write from a file that was not open.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51193: invalid parameter value

Cause: An invalid parameter value was supplied in a call to the DBMS_IR package.

Action: Fix the parameter value and retry the call.

DIA-51303: illegal check mask value specified

Cause: An illegal check mask value was specified.

Action: Specify one of the following legal values: COLUMN_CHECKS, ROW_CHECKS, REFERENTIAL_CHECKS, or ALL.

DIA-51316: No check meta-data found on specified table *string*

Cause: No check meta-data was found for the object

Action: Table may not exist or no checks currently defined for the table

DIA-51700: Invalid file URL

Cause: A URL with invalid syntax was provided, either directly to the function or through an XML IMPORT or INCLUDE.

Action: Check the URL.

DIA-51701: Invalid file URL or path prefix

Cause: Either a URL or path prefix with invalid syntax was provided.

Action: Check the URL.

DIA-51702: Could not find file at URL provided

Cause: The file requested could not be found in the given location.

Action: Check the URL provided.

DIA-51703: Missing *body* tag from HTML

Cause: An HTML document was passed to the function missing its *body* tag.

Action: Check the HTML source.

DIA-51704: Error *string* received from XPath engine

Cause: An error was received from the XPath library during an XPath operation.

Action: Check xmlerr.h to understand the cause of the error and correct the relevant client code.

DIA-51705: XML *string* error: *string "string"*

Cause: An error was received from an underlying XDK API and is being resigalled.

Action: Check xmlerr.h to understand the cause of the error and correct the relevant client code.

DRG-10000 to DRG-52404

DRG-10000: failed to read column *string.string*

Cause: Error during read of specified text column

Action: check existence and privs of column

DRG-10001: can not access result table *string*

Cause: specified table does not exist or server does not have write privileges

Action: check result table

DRG-10002: can not insert into result table

Cause: text server is not privileged to insert, tablespace exhausted

Action: check privileges and tablespace

DRG-10011: invalid object name *string*

Cause: a table, column or procedure name specified had an invalid format. It is either too long or contains illegal characters. Probably you are passing in incorrect parameters.

Action: check parameter values

DRG-10015: id exceeds limit(2147483642) of a number

Cause: the limit of an id is 2147483642

Action: use an id with value 214748364 or under

DRG-10016: you must be the owner to modify this object

Cause: you tried to modify an object which you do not own

Action: have the owner modify the object

DRG-10017: you must be *string* to do this: *string*

Cause: you tried to modify an object which you have no privilege

Action: have the owner modify the object

DRG-10100: invalid argument found: *string*

Cause: invalid command argument was specified

Action: check the documentation for the legal arguments and re-execute the command

DRG-10101: no value for argument: *string*

Cause: this argument requires value(s)

Action: re-execute the command with the correct argument value(s)

DRG-10102: mandatory argument missing: *string*

Cause: this argument is mandatory

Action: re-execute the command and specify the argument

DRG-10103: illegal value for argument: *string*

Cause: an illegal value was passed to this argument

Action: check the documentation for the legal values for this argument

DRG-10200: invalid server personality mask: *string*

Cause: the specification for the server personality mask is invalid

Action: check the documentation and specify the correct mask

DRG-10202: server failed to register

Cause: the server failed to register itself with the data dictionary

Action: look at the next error on the stack

DRG-10203: server named *string* does not exist

Cause: update was called with the name of a server that does not exist

Action: correct the name of the server

DRG-10204: server update failed

Cause: the attempt to update the server failed

Action: look at the next error on the stack

DRG-10205: server deregister failed

Cause: the attempt to deregister the server from the data dictionary failed

Action: look at the next error on the stack

DRG-10206: failed to perform recovery for a server or client

Cause: Contact oracle support

Action: Contact oracle support

DRG-10301: timed out waiting for responses from servers

Cause: Not enough servers are running to handle the current system load, and a large backlog of commands has accumulated; perhaps no servers are running. This message could also indicate an internal error where one of the servers has crashed trying to process a given request

Action: Check that enough servers are running, and that they are processing commands of the correct type. For instance, a DDL command might timeout if all the servers are setup to exclusively process query commands. Also, check the server log files.

DRG-10302: interrupted waiting for responses from servers

Cause: User interrupted the request before it was completed

Action: Restart the request

DRG-10303: could not queue given commands to be processed

Cause: The given command or commands could not (all) be queued. This could indicate an extremely high system load, but it is more likely an internal error.

Action: Check if any servers are running to process the command.

DRG-10304: unexpected error sending command(s) to Oracle Text server

Cause: There was an unexpected error sending command(s) to server

Action: Call customer support.

DRG-10305: pipe *string* is full

Cause: Could not send command to pipe, because the pipe was full

Action: Check if any servers are running to process the commands on that pipe

DRG-10306: server terminated unexpectedly while processing command

Cause: The server shutdown during execution of your command. This could be caused by a shutdown abort, or by an internal error in the server.

Action: If the server terminated had an internal error, contact customer support.

DRG-10307: no servers running

Cause: Could not process command because no servers are running with the correct personality mask.

Action: Start some servers with correct personality mask.

DRG-10308: no server with the required *string* personality mask is running

Cause: Could not process command because no servers are running with the correct personality mask.

Action: Start some servers with correct personality mask.

DRG-10309: not enough job queue processes

Cause: Could not process command because no servers with the correct personality mask are running.

Action: increase the JOB_QUEUE_PROCESSES initialization parameter or reduce the parallel degree for this statement.

DRG-10310: servers were shutdown before processing request

Cause: The command could not be completed because the servers were shut down or terminated before processing the request.

Action: Start another server with the correct personality mask.

DRG-10311: remote send not supported

Cause: You tried to specify a database link in an index specification

Action: Specify only local index names

DRG-10312: logfile name must be specified

Cause: You tried to start logging without specifying a logfile name

Action: Specify a logfile name

DRG-10313: logging has already been started

Cause: You tried to start logging even though logging has already been started

Action: Stop logging first, or ignore

DRG-10314: logging has not been started

Cause: You tried to stop logging even though logging has not been started

Action: Start logging first, or ignore

DRG-10315: logging is not supported on MTS

Cause: You tried to start logging on MTS

Action: n/a

DRG-10500: CREATE_INDEX failed: column spec *string*

Cause: failed to create text index on the specified column

Action: See the next errors on stack and take appropriate action

DRG-10501: invalid stopword: *string*

Cause: The stopword specified could be lexed into multiple tokens with current lexer preference

Action: Check lexer preference and Respecifies the stopword

DRG-10502: index *string* does not exist

Cause: the specified index does not exist or you do not have access to it.

Action: Specify an existing index

DRG-10503: table *string* cannot be indexed because it has no primary key

Cause: a textkey needs to be a single column unique key whose length does not exceed 64 bytes. no such key was defined as an unique index or declared as a primary or unique key constraint

Action: create a suitable textkey for the table or specify it explicitly in this procedure call

DRG-10504: primary key is required when using the DETAIL_DATASTORE

Cause: you tried to use the detail datastore to index a table with no primary key constraint

Action: add a primary key constraint on the table

DRG-10506: table does not exist: *string*

Cause: The table, view, or synonym specified does not exist. There may also be a permissions problem reading the table.

Action: Reinvoke the operation with the correct table name

DRG-10507: duplicate index name: *string*

Cause: the specified index already exists in the dictionary

Action: this index can be updated or deleted, however this is only allowed if there is no text index available on the text column

DRG-10509: invalid text column: *string*

Cause: the column specified is not valid

Action: check that the followings are valid: a) text column is of supported datatype b) valid table name, column name in the specification.

DRG-10510: stopword is missing

Cause: The stopword to be added was not specified.

Action: Specify the stopword

DRG-10511: index *string* does not exist or is incomplete

Cause: index creation is not complete

Action: create index before performing this operation

DRG-10513: index *string* metadata is corrupt

Cause: dictionary contains bad preferences for this index

Action: contact you DBA

DRG-10516: failed to perform DDL operation due to an Oracle error

Cause: the ddl operation requested has failed because of an Oracle error

Action: see the Oracle error on the stack and take the appropriate action

DRG-10517: index *string* is already valid

Cause: The index was in a valid state and did not need the requested operation.

Action: Check the requested operation

DRG-10518: an operation is in progress which conflicts with *string* request

Cause: another session is operating on this index. it could be: a) DML is requested and DDL is in progress or b) DDL is requested and DML is in progress operation on the index

Action: try again later

DRG-10520: failed to drop index: *string*

Cause: Failed to drop index on the specified index

Action: see the Oracle error on the stack and take the appropriate action

DRG-10525: missing REBUILD keyword

Cause: all Oracle Text alter index options require the REBUILD keyword

Action: specify alter index with the REBUILD keyword

DRG-10528: primary keys of type *string* are not allowed

Cause: you tried to create an index on a table with an illegal primary key datatype

Action: change the textkey to one of the followings: VARCHAR2, NUMBER, VARCHAR, DATE, CHAR, MLSLABEL

DRG-10531: parallel parameter must be > 0

Cause: you called create index with parallel = 0

Action: specify with value > 0

DRG-10532: table is not partitioned

Cause: you called parallel create index on non-partitioned table

Action: recreate the table with partitions or remove the PARALLEL clause

DRG-10533: invalid user name: *string*

Cause: you specified a user name that is invalid

Action: specify the correct user name

DRG-10535: failed to optimize text index *string*

Cause: the optimize operation requested has failed because of an Oracle error

Action: see the Oracle error on the stack and take the appropriate action

DRG-10549: length of the object name *string* exceeded the limit

Cause: object name has exceeded the maximum length of 30 bytes

Action: Reduce the length of the object name if you want to re-create it

DRG-10550: illegal syntax for index, preference, source or section name

Cause: name may have additional periods(.)

Action: check the syntax of the name

DRG-10553: illegal syntax for column specification *string*

Cause: column specification may have additional periods(.)

Action: check the syntax of column specification if you want to re-create it

DRG-10561: index *string* is not valid for requested operation

Cause: The index was not in a valid state due to some prior error.

Action: Drop index and create index again.

DRG-10562: missing alter index parameter

Cause: The parameter string was missing

Action: Provide correct parameter string with regard to the requested alter index operation.

DRG-10569: table or column does not exist: *string*

Cause: The table, view, synonym or column specified does not exist. There may also be a permissions problem reading the table.

Action: Reinvoke the operation with the correct table name or column name

DRG-10573: index *string* is obsolete

Cause: you specified an obsolete index

Action: perform upgrade_index on the index

DRG-10574: failed to upgrade text index *string*

Cause: the upgrade operation has failed because of an Oracle error

Action: see the Oracle error on the stack and take the appropriate action

DRG-10579: must provide text query criteria

Cause: text query criteria is mandatory

Action: provide text query criteria

DRG-10580: parallel indexing is not supported: *string*

Cause: attempted to create index with parallel servers

Action: Drop index and set parallel to 1 in create index

DRG-10581: indirect datastores cannot be used with long or lob text columns

Cause: You tried to create an index on a long or lob column using an indirect datastore such as the file or url datastores

Action: Use direct datastore or a varchar column

DRG-10582: column *string* does not exist in table *string*

Cause: you specified an invalid column

Action: specify valid column

DRG-10583: TRUNCATE INDEX failed: *string*

Cause: Failed to truncate index

Action: See the next errors on stack and take appropriate action

DRG-10584: failed to *string string string* due to an Oracle error
Cause: a DDL operation on an index object failed due to SQL error
Action: see following error

DRG-10595: ALTER INDEX *string* failed
Cause: failed to alter index
Action: See the next errors on stack and take appropriate action

DRG-10597: invalid rebuild online operation
Cause: REBUILD ONLINE is not supported for requested operation.
Action: Alter index without the online option.

DRG-10598: invalid parallel operation
Cause: PARALLEL is not supported for requested operation.
Action: Alter index without the parallel option

DRG-10599: column is not indexed
Cause: The column specified is not indexed.
Action: Create index on the column before performing this operation

DRG-10600: Optimization encountered ORA-01555 error
Cause: Optimization ran into the snapshot too old error.
Action: Increase undo tablespace

DRG-10601: failed to remove pending DML for this index
Cause: The system could not remove triggers setup to monitor updates to the requested table
Action: See next error on stack to determine course of action. Call Oracle support if necessary. Until this error is fixed, updates to all text columns in the given table may not be indexed.

DRG-10602: failed to queue DML change to column *string* for primary key *string*
Cause: The system could not record that a change had been made to the given column
Action: See next error on stack to determine course of action. Call Oracle support if necessary. Until this error is fixed, updates to all text columns in the given table may not be indexed.

DRG-10606: server failed to access the DML Queue
Cause: The server was had an error accessing the DML Queue
Action: See next error on stack.

DRG-10607: index meta data is not ready yet for queuing DML
Cause: the meta data for the index has not been created yet
Action: retry the DML operation

DRG-10608: rowid to primary key mapping not available in base table
Cause: Procedural replication is on and no rowid to primary key mapping available in base table
Action: Modify base table to include a primary key

DRG-10609: cannot encode composite key with more than 16 columns

Cause: Cannot encode composite key with more than 16 columns

Action: Modify base table to have composite key with less than 16 columns

DRG-10610: Procedure not supported with Procedural replication on: *string*

Cause: This procedure is not supported when Procedural replication is on

Action: Turn off procedural replication to execute this procedure

DRG-10700: preference does not exist: *string*

Cause: the preference name specified does not exist

Action: retry with the correct preference name

DRG-10701: preference *string.string* already exists

Cause: the specified preference already exists

Action: must drop the preference if you want to re-create it.

DRG-10702: cannot create or modify preference in another user's schema

Cause: you tried to create a preference for another user

Action: owner or CTXSYS or a user who has CTXADMIN role should create preference

DRG-10703: invalid framework object *string*

Cause: you specified an invalid object type

Action: use a valid framework object

DRG-10704: preference *string* does not have an attribute named *string*

Cause: you tried to set value for a invalid attribute (not supported by the object).

Action: specify the correct attribute name

DRG-10705: invalid value *string* for attribute *string*

Cause: you tried to set an illegal value for an attribute

Action: specify the correct attribute value for the datatype of the attribute

DRG-10706: length of *string* exceeds maximum size of *string*

Cause: Parameter is too many bytes

Action: Correct preference setting and resubmit

DRG-10707: a value is required for attribute *string* of preference *string*

Cause: A required attribute was not provided

Action: Correct preference setting and resubmit

DRG-10708: invalid class id *string* for preference *string*

Cause: the specified class id is not correct for the specified preference

Action: specify the correct class id

DRG-10709: this preference is referenced by *string* and cannot be dropped

Cause: the specified preference is used as part of another preference and cannot be dropped until the referring preference is modified

Action: modify the referring preference

DRG-10710: Invalid value *string* for *string* attribute

Cause: Invalid value provided for save_copy attribute It should be one of these: (PLAINTEXT, FILTERED, NONE)

Action: Provide correct SAVE_COPY attribute value

DRG-10711: Invalid value for SAVE_COPY attribute: *string*

Cause: Invalid value provided for SAVE_COPY attribute. It should be a boolean value

Action: Provide boolean value for SAVE_COPY attribute

DRG-10712: preference *string* already has value for an attribute named *string*

Cause: Cannot call set_sec_grp_attr for an attribute whose value is already set in a preference

Action: Call add_sec_grp_attr_val to add an additional value for attribute

DRG-10713: preference *string* does not have any value for attribute named *string*

Cause: Cannot call add_sec_grp_attr_val for an attribute without calling set_sec_grp_attr for the same attribute

Action: Call set_sec_grp_attr to set value for attribute and then call add_sec_grp_attr_val to add an additional value for attribute

DRG-10714: cannot add or remove value for attribute named *string*

Cause: Cannot call add_sec_grp_attr_val or rem_sec_grp_attr_val for a boolean attribute

Action: Do not call add_set_grp_attr_val or rem_sec_grp_attr_val for a boolean attribute. Use set_sec_grp_attr and unset_sec_grp_attr instead.

DRG-10715: preference *string* has incompatible values for *string* and *string*

Cause: Cannot set related attributes to incompatible values

Action: Set or add a compatible value for related attributes

DRG-10716: invalid prefix_ns_mapping attribute value *string*

Cause: Value of prefix_ns_mapping is neither of the form xmlns:px="ns" nor of the form xmlns="ns"

Action: Call rem_sec_grp_attr_val to remove this prefix_ns_mapping attribute value.

DRG-10717: incompatible index settings

Cause: Invalid combination of PATH_SECTION_GROUP, DATAGUIDE attribute and NEVER_POPULATE

Action: Use a valid combination of PATH_SECTION_GROUP, DATAGUIDE attribute and NEVER_POPULATE

DRG-10718: operation not supported with NEVER_POPULATE

Cause: Operation is not supported with NEVER_POPULATE index option

Action: Operation is not supported with NEVER_POPULATE index option

DRG-10719: Value of stage_itab_max_rows can only be either 0 or >=1000

Cause: Invalid value for stage_itab_max_rows

Action: Provide correct value for stage_itab_max_rows

DRG-10720: syntax only supported with constraint: *string*

Cause: The syntax was invalid.

Action: Simplified syntax is only supported with constraints.

DRG-10721: ALTER INDEX does not support this operation

Cause: ALTER INDEX supported only with JSON_ENABLE and IS JSON constraint. Any degradation of the index state is not supported either.

Action: Ensure constraints are met. For degrading index state, please drop and recreate the index

DRG-10750: unknown parameter *string*

Cause: Unrecognized parameter

Action: Specify correct parameter

DRG-10751: invalid value for parameter

Cause: Wrong data type or out of range

Action: Specify correct parameter value

DRG-10752: DEFAULT_INDEX_MEMORY cannot be greater than MAX_INDEX_MEMORY

Cause: You tried to set DEFAULT_INDEX_MEMORY to a value higher than the maximum set in MAX_INDEX_MEMORY

Action: Specify a lower value

DRG-10753: invalid size (in bytes) string *string*

Cause: You specified an incorrectly formatted size string

Action: Specify a correctly formatted size string

DRG-10754: Size (in bytes) must be between *string* and *string*

Cause: You specified size (in bytes) which is outside the allowed range

Action: Specify size (in bytes) within the allowed range

DRG-10755: *string* and *string* have characters in common

Cause: the join character sets cannot have characters in common

Action: Correct the attribute values and resubmit

DRG-10756: neither text indexing nor theme indexing has been selected

Cause: INDEX_TEXT and INDEX_THEMES preferences both cannot be FALSE.

Action: Set either of INDEX_TEXT or INDEX_THEMES or both to TRUE.

DRG-10757: stoplist cannot have more than 4096 stopwords

Cause: a stoplist cannot have more than 4096 stopwords. This includes stopthemes.

Action: none required

DRG-10758: index owner does not have the privilege to use file or URL datastore

Cause: index owner does not have the role defined in FILE_ACCESS_ROLE

Action: grant index owner the appropriate role

DRG-10759: invalid role

Cause: the role does not exist in the database

Action: check the role name or create the role

DRG-10760: illegal format for procedure name

Cause: the procedure name specified is invalid. For instance, it may have a semicolon

Action: check the procedure name

DRG-10761: procedure *string* does not exist

Cause: the specified procedure could not be found

Action: check input. Try a fully-specified format such as OWNER.OBJECT

DRG-10762: index owner does not have access to procedure *string*

Cause: the index owner does not have execute privilege on the specified procedure

Action: grant index owner execute permission on the procedure

DRG-10763: value *string* is not a valid character set

Cause: the value specified for the filename_charset attribute of the file datastore is not a valid character set name

Action: specify a valid Oracle character set name

DRG-10764: only SYS can modify FILE_ACCESS_ROLE

Cause: For security reasons, only SYS can modify the FILE_ACCESS_ROLE system parameter

Action: Connect as SYS before modifying the parameter

DRG-10765: stoplist cannot have more than 250 stopclasses with stoppatterns

Cause: a stoplist cannot have more than 250 stopclasses with stoppatterns. This does not include NUMBERS stopclass.

Action: none required

DRG-10800: query failed: *string string string*

Cause: Failed to process the query

Action: Check the errors on stack and take appropriate action

DRG-10801: cannot create an SQE for another user

Cause: You tried to create an SQE for another user

Action: Remove owner from SQE name specification

DRG-10816: display/highlight call failed

Cause: See the next error on the stack.

Action: See the next error on the stack.

DRG-10817: CONTAINS term consists of stopword or phrase of stopwords: *string*

Cause: One or more terms within a CONTAINS query consist of just a stopword or a phrase of just stopwords

Action: Replace the stopword or use stopwords within phrases containing non-stopwords.

DRG-10819: could not open contains cursor

Cause: An error occurred while trying to open a contains cursor

Action: See accompanying error messages in the stack

DRG-10820: invalid contains cursor id

Cause: You tried to fetch or close a contains cursor with an id which does not exist.

Action: Review fetch or close invocation

DRG-10821: contains cursor is not open

Cause: You tried to fetch from a contains cursor which was not open.

Action: Open cursor first

DRG-10822: duplicate query name

Cause: You tried to create a stored query with a name already used.

Action: Use different name

DRG-10823: invalid query name

Cause: The query name specified is not valid

Action: Check the query name

DRG-10825: stored query does not exist: *string*

Cause: The specified stored query does not exist.

Action: Check the query name

DRG-10826: no document with the specified textkey is found

Cause: There is no document with the specified textkey.

Action: Check the textkey

DRG-10827: open_con must be performed before count_last

Cause: last_count returns hit from in-memory query,so an in-memory query must be run before you can use count_last

Action: execute open_con before run count_last

DRG-10828: token *string* is longer than maximum length for column *string*

Cause: A token to be inserted in the feedback table is longer than the maximum allowed column size.

Action: Modify the query, or the column size for feedback table, or feedback procedure arguments accordingly.

DRG-10829: feedback id *string* is longer than the maximum length of *string* bytes

Cause: Feedback id is longer than the maximum allowed length for the feedback_id column.

Action: Use a smaller feedback_id.

DRG-10830: SHARELEVEL is not 0 or 1

Cause: You specified a sharelevel which is not 0 or 1

Action: Use sharelevel equal to 0 or 1 only.

DRG-10831: can not insert into feedback table *string*

Cause: Not privileged to insert.

Action: Check privileges.

DRG-10832: can not delete from feedback table *string*

Cause: Not privileged to delete.

Action: Check privileges.

DRG-10833: feedback failed

Cause: Failed to process feedback request

Action: Check the errors on stack and take appropriate action

DRG-10834: upper-case form of section name *string* too long

Cause: upper-case form of the section name is longer than supported length

Action: reduce length of section name when adding section

DRG-10835: WITHIN operator not supported for theme index

Cause: WITHIN operator used in theme index query

Action: Rewrite query without WITHIN operator

DRG-10836: field section and attribute section can not be nested

Cause: A field section or an attribute section is specified in a nested section search

Action: Rewrite query without nested field sections

DRG-10837: section *string* does not exist

Cause: The given section name does not exist in USER_SECTIONS

Action: Rewrite query with valid section name

DRG-10838: invalid SPAN argument supplied to NEAR

Cause: An invalid value was supplied for SPAN argument to NEAR

Action: Provide a valid SPAN. Valid values are integers from 0 to 100.

DRG-10839: invalid ORDER argument supplied to NEAR

Cause: An invalid value was supplied for ORDER argument to NEAR

Action: Provide a valid ORDER. Valid values are T, TRUE, F, FALSE (case insensitive).

DRG-10840: CONTAINS predicate including 0 is not supported by FIRST_ROWS hint

Cause: User attempts to issue a query with CONTAINS predicate including 0 while giving FIRST_ROWS hint.

Action: remove FIRST_ROWS hint.

DRG-10841: invalid SCORE argument supplied to FUZZY

Cause: An invalid value was supplied for SCORE argument to FUZZY

Action: Provide a valid SCORE. Valid values are integers from 1 to 80.

DRG-10842: invalid NUMRESULTS argument supplied to FUZZY

Cause: An invalid value was supplied for NUMRESULTS argument to FUZZY

Action: Provide a valid NUMRESULTS. Valid values are integers from 0 to 5000.

DRG-10843: invalid WEIGHT argument supplied to FUZZY

Cause: An invalid value was supplied for WEIGHT argument to FUZZY

Action: Set WEIGHT to WEIGHT or NOWEIGHT.

DRG-10844: index cannot execute this structured predicate efficiently

Cause: You specified a combination of condition and order by columns in a catsearch query which cannot be executed by the index's index set efficiently

Action: n/a

DRG-10845: column *string* is not indexed

Cause: You specified a column in a condition or order by which is not part of the ctxcat index

Action: n/a

DRG-10846: order by columns must be all ascending or all descending

Cause: You specified an order by clause which has some columns ascending and some descending. This is not currently supported by catsearch

Action: n/a

DRG-10847: catsearch requires prefix index for this type of query

Cause: For efficient execution of this Vgram query, we require presence of a prefix index.

Action: create a prefix index

DRG-10848: invalid structured clause

Cause: you have specified an invalid structured clause

Action: n/a

DRG-10849: catsearch does not support functional invocation

Cause: the query plan for your query is invoking a catsearch operator functionally rather than as an index rowsource. The catsearch operator does not support functional invocation

Action: add optimizer hints so that all catsearch operators are performed through index scans

DRG-10850: CTXRULE indextype does not support the operator

Cause: Used an operator not supported by CTXRULE. Currently it only supports AND, NEAR, phrase, NOT, WITHIN, OR, ABOUT, EQUIVALENCE, STEM and THESAURUS operators

Action: Rewrite query without this operator

DRG-10851: Invalid grammar *string* specified for query template

Cause: incorrect grammar specification

Action: Rewrite query specifying valid grammar name

DRG-10852: Invalid scoring type *string* specified for query template

Cause: incorrect scoring type specification

Action: Rewrite query specifying valid scoring type (integer/float)

DRG-10853: Catsearch does not support this operator

Cause: unsupported operator specified

Action: Rewrite query using valid operators

DRG-10854: Invalid scoring algorithm *string* specified for query template

Cause: incorrect scoring algorithm specification

Action: Rewrite query specifying valid scoring algorithm (default/count)

DRG-10855: CTXRULE indextype does not support the token type

Cause: Unsupported VGRAM token type 1.

Action: n/a

DRG-10856: SDATA section *string* does not exist

Cause: The given SDATA section name does not exist in USER_SECTIONS

Action: Rewrite query with valid SDATA section name

DRG-10857: literal is not compatible with the data type of the SDATA section

Cause: The given literal is not compatible with the data type of the specified SDATA section.

Action: Rewrite query with a compatible literal

DRG-10858: SDATA operator is not allowed in WITHIN

Cause: A field section or a attribute section is specified in a nested section search

Action: Rewrite query without nested field sections

DRG-10859: Only one predefined scoring component can be used in DEFINESCORE

Cause: More than one predefined scoring component (i.e. RELEVANCE, OCCURRENCE, etc.) is used in the scoring expression of the DEFINESCORE operator

Action: Rewrite query using only one predefined component

DRG-10860: All expressions under the same WITHIN must use the same predefined scoring component

Cause: The query side of the same within mixes different types of scoring components(i.e. RELEVANCE, OCCURRENCE, etc.)

Action: Rewrite query using only one type of predefined component

DRG-10861: COMPLETION score must be used with WITHIN operator

Cause: The completion score is used without using the WITHIN operator

Action: Rewrite query to include a within operator

DRG-10862: *string* attribute cannot be used with CTXRULE indexes

Cause: Used an attribute not supported by CTXRULE. This restriction is due to lack of wildcard support for CTXRULE indexes.

Action: Rewrite query without this attribute

DRG-10863: invalid ORDER argument supplied to NDATA

Cause: An invalid value was supplied for ORDER argument to NDATA

Action: Set ORDER to ORDER or NOORDER.

DRG-10864: invalid PROXIMITY argument supplied to NDATA

Cause: An invalid value was supplied for PROXIMITY argument to NDATA

Action: Set PROXIMITY to PROXIMITY or NOPROXIMITY.

DRG-10865: invalid datatype in user scoring expression

Cause: The scoring expression specified in DEFINESCORE or NORMALIZATION_EXPR in the query template either contains components with unsupported datatypes or does not return numerical values.

Action: Rewrite the scoring expression.

DRG-10866: The right hand operand of MINUS cannot use IGNORE score

Cause: The IGNORE score is used as the right hand operand of MINUS

Action: Rewrite the scoring expression.

DRG-10867: OCCURRENCE and COMPLETION score cannot be used with ABOUT in DEFINESCORE

Cause: The OCCURRENCE and COMPLETION score cannot be used with ABOUT queries

Action: Rewrite the scoring expression.

DRG-10868: matches does not support functional invocation

Cause: the query plan for your query is invoking a matches operator functionally rather than as an index rowsource. The matches operator does not support functional invocation

Action: add optimizer hints so that all matches operators are performed through index scans

DRG-10869: Invalid span supplied to NEAR2 operator

Cause: Near2 span must be between 0 and 100

Action: Use acceptable span

DRG-10870: Invalid weight supplied to NEAR2 operator

Cause: Near2 weights must be between 0 and 10

Action: Use acceptable weight

DRG-10871: NDATA operator not supported with *string*

Cause: NDATA operator is not supported in the specified operation

Action: Rewrite the query without NDATA operator

DRG-10872: Characters cannot be outside *string* in an XML query

Cause: Characters outside *query* element are not valid

Action: Write the characters inside *querytextquery*

DRG-10873: Invalid characters location in the XML query

Cause: Characters between certain elements are not allowed

Action: Write the characters in designed places

DRG-10874: Syntax error in XML Query Template

Cause: XML template is wrong. Possible causes include missing closing tag or receiving invalid attributes or characters.

Action: Check that the query is valid XML

DRG-10875: Missing closing tag in XML Query

Cause: Some tag has been opened and not closed properly.

Action: Close all tags properly

DRG-10876: Invalid ordering of elements in XML Query

Cause: Occurrence of some element that should be only between another element that was not found

Action: Check the proper ordering of elements

DRG-10877: *query* should always start an XML Query

Cause: Either *query* is missing or is wrongly positioned

Action: Insert *query* properly

DRG-10878: Invalid ordering in XML Query: *string* should be *string of string*

Cause: Invalid ordering of tags as of specs

Action: Rewrite query properly

DRG-10879: Invalid *string* element repetition in XML Query

Cause: Invalid repetition of XML element

Action: Rewrite query, merging both repeated elements

DRG-10880: Invalid nesting of *string* in XML Query

Cause: Invalid nesting of same element has been encountered

Action: Either close element properly or avoid nesting

DRG-10881: Invalid setting of *savescore* in *ctxfiltercache*

Cause: *savescore* argument must be true or false

Action: set *savescore* to true or false

DRG-10882: Invalid setting of *topn* in *ctxfiltercache*

Cause: *topn* argument must be true or false

Action: set *topn* to true or false

DRG-10883: *savescore* must be true to use *topn* in *ctxfiltercache*

Cause: *savescore* must be true to use *topn* in *ctxfiltercache*

Action: set *savescore* to true to use *topn* processing

DRG-10884: invalid use of *ctxfiltercache* with *topn*

Cause: *ctxfiltercache* with *topn* must be child of AND, THRESHOLD, or WEIGHT operators

Action: invalid query

DRG-10885: *ctxfiltercache* operator requires non-zero *query_filter_cache_size*

Cause: used *ctxfiltercache* operator with zero *query_filter_cache_size*

Action: Set a non-zero *query_filter_cache_size*

DRG-10886: *topn* must be used with order by score desc in *ctxfiltercache*

Cause: must order query results by score desc when *topn* argument is true

Action: Add order by score desc and use oracle hint DOMAIN_INDEX_SORT

DRG-10887: Query cannot be processed, index partition is set to non-readable mode

Cause: Index partition has been set to non-readable mode

Action: Use 'alter index modify prartition' to set read mode to TRUE

DRG-10888: Invalid use of CTXIN operator

Cause: CTXIN operator is not rightmost child of AND node

Action: CTXIN should be rightmost child of AND node

DRG-10889: Filter section *string* does not exist

Cause: The given Filter section name does not exist in USER_SECTIONS

Action: Rewrite query with valid Filter section name

DRG-10890: CTXIN cursor not found

Cause: The predicate query cursor was not found.

Action: Store a valid cursor using 'ctx_query.store_ctxin_cursor'.

DRG-10891: invalid MINREQD argument supplied to NEAR

Cause: An invalid value was supplied for MINREQD argument to NEAR

Action: Provide a valid MINREQD. Valid values are integers from 0 to 63.

DRG-10892: invalid THRESHOLD argument supplied to NDATA

Cause: An invalid value was supplied for the THRESHOLD argument to NDATA.

Action: Set the THRESHOLD to a value between 1-100 inclusive.

DRG-10893: parallel CTXIN query execution not supported

Cause: The CTXIN query was run in parallel.

Action: Run the CTXIN query with 'no_parallel' and 'no_parallel_index hint'.

DRG-10894: Missing regular expression in PATTERN

Cause: The syntax is PATTERN(regex). regex is missing.

Action: Supply the regular expression

DRG-10895: Invalid regular expression in PATTERN

Cause: The syntax of the regular expression is incorrect

Action: Correct the regular expression

DRG-10896: Regular expression specifies empty string in PATTERN

Cause: The expression ^\$ has no match.

Action: Correct the regular expression

DRG-10897: Regular expression matches too many words

Cause: The regular expression matches too many words.

Action: Correct the regular expression

DRG-10898: ctxfiltercache is not supported with optimized for *string* SDATA

Cause: Used ctxfiltercache operator with unsupported SDATA.

Action: Do not use ctxfiltercache operator with this kind of SDATA.

DRG-10900: out of memory

Cause: can not allocate more memory

Action: Contact your system administrator

DRG-11000: invalid keyword *string*

Cause: A keyword was invalid.

Action: Respecify the parameter string with correct keyword

DRG-11001: missing keyword when expecting one of *string*

Cause: A keyword was missing.

Action: Respecify the parameter string with keyword

DRG-11002: missing value for *string*

Cause: A value for the argument was missing.

Action: Respecify the parameter string with value

DRG-11003: invalid value *string* for *string*

Cause: An invalid value was given for the argument

Action: Specify a valid value

DRG-11004: duplicate or conflicting value for *string*

Cause: More than one value has been specified for the argument

Action: Check parameter string and correct the problem parameter

DRG-11005: invalid create index parameter string

Cause: the supplied parameter string is not correct

Action: drop index and recreate index with correct parameters

DRG-11006: invalid alter index parameter string

Cause: The parameter string was invalid.

Action: Reissue the statement with the correct parameter string.

DRG-11007: multiple stopwords specified

Cause: Tried to add more than one stopword

Action: Specify one stopword at a time

DRG-11008: invalid create index partition parameter string

Cause: The parameter string was invalid

Action: drop index and recreate index with correct parameters

DRG-11100: unable to connect to the database

Cause: failed to connect to Oracle database

Action: check the Oracle error and connect string

DRG-11101: failed to open file *string*

Cause: failed to open a file

Action: check whether the file exist or access permission available

DRG-11102: assigned lexer can not operate on *string* language setting

Cause: Single byte lexer selected in multibyte language setting

Action: check RDBMS language setting or text columns lexer setting

DRG-11104: Oracle Text error:

Cause: See the next error on stack

Action: See the next error on stack

DRG-11106: user database session has terminated during this operation

Cause: this database session does not exist or has terminated

Action: determine why the user database session terminated while the operation was still being carried out.

DRG-11107: invalid path specification: *string*

Cause: the path specified is not valid

Action: check the path specification

DRG-11108: invalid filename specified: *string*

Cause: the filename specified is not valid

Action: check the filename for beginning or trailing spaces, invalid characters, or other such problems.

DRG-11109: assigned lexer does not support *string* query operator

Cause: This lexer does not support this query operator

Action: do not use the operator in your query

DRG-11111: value of *string* must be between *string* and *string*

Cause: You specified a value for the parameter which is out of range

Action: Specify a value which is in the allowed range

DRG-11112: length of *string* exceeds maximum of *string*

Cause: You specified a value for the parameter which is too long

Action: Specify a value which is less than or equal to the maximum length

DRG-11113: value of *string* must be one of *string*

Cause: You specified a value for the parameter which is invalid

Action: Specify a valid value for the parameter

DRG-11114: result table format is not correct for this operation

Cause: You specified a result table which has the wrong number, type, or names of columns for this operation.

Action: Check result table. Refer to the documentation for the correct format for each operation

DRG-11115: a value for *string* must be specified

Cause: You did not specify a value for the parameter

Action: Specify a value for the parameter

DRG-11116: value of *string* must be less than or equal to value of *string*

Cause: You specified values for the two parameters which are invalid

Action: Specify valid values for the parameters

DRG-11117: name is already used by an existing object

Cause: You tried to create an object whose name conflicts with an object of that type which already exists

Action: Specify a new name

DRG-11118: object *string* does not exist

Cause: You tried to modify or drop an object which does not exist

Action: Specify correct object name

DRG-11119: operation is not supported by this index type

Cause: You tried to invoke an operation on an index which is not supported by the index type

Action: n/a

DRG-11120: failed to write to file *string*

Cause: failed to write to a file

Action: check whether the file exist or access permission available

DRG-11121: failed to read from file *string*

Cause: failed to read from a file

Action: check whether the file exist or access permission available

DRG-11122: unsupported section group

Cause: unsupported section group is specified for functional contains

Action: change the section group to NULL_SECTION_GROUP

DRG-11123: theme indexing is not supported

Cause: theme indexing is on in the lexer preference for functional contains

Action: turn off theme indexing

DRG-11124: invalid value *string*

Cause: you specified an invalid value

Action: specify a valid value

DRG-11125: invalid format of existing log file *string*

Cause: the file specified by START_LOG already exists, and is not a previously written log file

Action: specify a new file, or remove the existing file

DRG-11126: context index is empty

Cause: the training table is empty or the context index of training table is not populated

Action: populate the training table or context index

DRG-11127: inconsistent index policy with trained rule

Cause: the ctxrule index policy is inconsistent with the policy in which the rule was trained

Action: change the ctxrule index policy

DRG-11128: invalid format of rule

Cause: the rule format is not valid for this operation

Action: check the rule type and operation type

DRG-11129: the rule table is empty

Cause: the rule table is empty

Action: populate the rule table by training

DRG-11130: no data found in the collection

Cause: feature preparation program can not find any feature in the specified collection

Action: check the setting for extracting features.

DRG-11131: Error from Oracle XML parser: *string*

Cause: The Oracle XML parser reported an error

Action: Check the document for the error, and fix if necessary

DRG-11132: Invalid character in logfile name

Cause: The logfile parameter to CTX_OUTPUT.START_LOG or CTX_OUTPUT.START_QUERY_LOG contains an invalid character (such as a forward slash)

Action: Remove the invalid character

DRG-11133: failed to convert a datetime value [ora-number]

Cause: Failed to convert the datetime value.

Action: Check the error code

DRG-11134: The file *string* is currently being used for logging by another process

Cause: The file is currently being used by another process.

Action: Give a different file name.

DRG-11135: feature not generally available

Cause: You tried to use a feature not generally available.

Action: Contact customer support

DRG-11136: assigned lexer does not support entity extraction

Cause: This lexer does not support entity extraction

Action: Do not use this lexer for entity extraction

DRG-11137: tracing is not supported on MTS

Cause: you tried to use ctx_output tracing in an MTS session

Action: connect using a dedicated session and retry the operation

DRG-11138: trace *string* is already enabled

Cause: you tried to enable a trace that is already enabled

Action: disable the trace first

DRG-11139: trace *string* is not enabled

Cause: you tried to disable a trace that is not enabled

Action: enable the trace first

DRG-11140: Section *string* is not MDATA

Cause: you tried to perform MDATA operation on non-mdata section

Action: provide correct mdata section name

DRG-11141: CTX_DDL.REMOVE_MDATA() and CTX_DDL.ADD_MDATA() not allowed for MDATA Section *string*

Cause: you tried to call CTX_DDL.REMOVE_MDATA() or CTX_DDL.ADD_MDATA() on a MDATA section which is created with ALLOW_ADD_REM parameter set to FALSE.

Action: do not call CTX_DDL.REMOVE_MDATA() or CTX_DDL.ADD_MDATA() on a MDATA section that is created with ALLOW_ADD_REM parameter set to FALSE.

DRG-11142: *string* cannot be *string*

Cause: The value for the specified parameter cannot be as specified

Action: Specify the correct value

DRG-11143: Only 64 errors can be traced

Cause: You tried to trace more than 64 errors with ctx_output

Action: Trace fewer errors, or use DRG_DUMP_ALL_ERRORS

DRG-11144: Invalid value for radius parameter: *string*

Cause: You specified invalid value for radius parameter

Action: Provide non-negative/non-decimal value for radius parameter

DRG-11145: Invalid value for max_length parameter: *string*

Cause: You specified invalid value for max_length parameter

Action: Provide non-negative/non-decimal value for max_length parameter

DRG-11146: Invalid value for use_saved_copy: *string*

Cause: You specified invalid value for use_saved_copy parameter

Action: Use one of these: SAVE_COPY_FALLBACK / SAVE_COPY_ERROR / SAVE_COPY_IGNORE

DRG-11147: Invalid lexer for ctx_doc.policy_stems

Cause: You specified/used a lexer which does not support ctx_doc.policy_stems

Action: Use auto lexer for ctx_doc.policy_stems

DRG-11148: Invalid lexer for ctx_doc.policy_noun_phrases

Cause: You specified/used a lexer which does not support ctx_doc.policy_noun_phrases

Action: Use auto lexer for ctx_doc.policy_noun_phrases

DRG-11149: Invalid lexer for ctx_doc.policy_part_of_speech

Cause: You specified/used a lexer which does not support ctx_doc.policy_part_of_speech

Action: Use auto lexer for ctx_doc.policy_part_of_speech

DRG-11150: Reverse Index feature not enabled

Cause: Feature not enabled

Action: Enable Reverse Index feature

DRG-11151: Invalid value for max_inst in sentiment procedure

Cause: Sentiment procedure called with an invalid max_inst value.

Action: Specify a max_inst value in the range of 1 to 10.

DRG-11152: Invalid value for type attribute in sentiment procedure

Cause: An invalid type attribute value was specified.

Action: Specify the type as either EXACT or ABOUT.

DRG-11153: classifier *string* does not exist

Cause: The specified classifier did not exist.

Action: Provide the name of an existing classifier.

DRG-11154: topic cannot be null

Cause: The specified topic was null for a non-aggregate sentiment request.

Action: Specify a non-null topic or use an aggregate request.

DRG-11155: Invalid Lexer for Default Sentiment Classifier

Cause: The specified lexer is not supported for the Default Sentiment Classifier.

Action: Use auto lexer for Default Sentiment Classifier.

DRG-11203: INSO filter not supported on this platform

Cause: You tried to use the INSO filter on a platform which does not support it

Action: Do not use the INSO filter

DRG-11204: user filter command is too long

Cause: The user filter command must be 32 characters or less

Action: Specify a shorted user filter command

DRG-11205: user filter command contains illegal characters

Cause: The user filter command cannot contain special characters such as slashes, parentheses, semicolons, etc.

Action: Correct command specification

DRG-11206: user filter command *string* could not be executed

Cause: The user filter command could not be executed.

Action: Check that the command exists in \$ORACLE_HOME/ctx/bin, and that it is executable.

DRG-11207: user filter command exited with status *string*

Cause: The user filter command exited with the given error status.

Action: See any DRG-11220, DRG-11221, DRG-11222, DRG-11223, DRG-11224, DRG-11225, or DRG-11227 error message on the error stack otherwise see error status.

DRG-11208: ORACLE_HOME is not set

Cause: ORACLE_HOME is not set

Action: make sure ORACLE_HOME is set when running ctxsrv

DRG-11209: filename for *string* exceeds maximum length of *string*

Cause: Value of the file name is too long

Action: Specify a shorter filename

DRG-11210: format column must be a char, varchar, or varchar2 type

Cause: you specified a format column which is not a char, varchar, or varchar2 type.

Action: specify a format column of correct type

DRG-11211: charset column must be a char, varchar, or varchar2 type

Cause: you specified a charset column which is not a char, varchar, or varchar2 type.

Action: specify a charset column of correct type

DRG-11212: procedure filter procedure name contains a semicolon

Cause: the procedure name specified had a semicolon

Action: remove semicolon or rename procedure name. The correct format is
PACKAGE_NAME.PROCEDURE_NAME

DRG-11213: CTXSYS does not own procedure filter stored procedure: *string*

Cause: CTXSYS does not have execute privilege to the procedure filter stored procedure

Action: make sure the package is owned by CTXSYS and the procedure exist

DRG-11214: execution of procedure filter stored procedure has failed

Cause: an error occur while executing the proedure filter stored procedure

Action: check or debug the stored procedure

DRG-11215: index owner does not have access to filter stored procedure: *string*

Cause: the index owner does not have execute privilege of the procedure

Action: CTXSYS to grant execute privilege of the procedure to index owner

DRG-11216: length of datastore data exceeds limit

Cause: the length of the datastore data passed to the filter stored procedure is longer than the maximum length (32767 bytes)

Action: check primary key parameter

DRG-11217: INSO safe callout failed

Cause: The INSO safe callout cannot be executed

Action: check the Oracle errpr

DRG-11218: malformed mail line, line *string*

Cause: The mail message has an error at the indicated line

Action: manually edit mail message, if possible

DRG-11219: malformed mail configuration file, line *string*

Cause: mail filter configuration file has an error at the indicated line

Action: manually edit mail filter configuration file, if possible

DRG-11220: Third-party filter is out of memory.

Cause: Third-party filter could not filter this document because it was unable to allocate sufficient virtual memory.

Action: Increase virtual memory provided by the Operating System and reindex this document.

DRG-11221: Third-party filter indicates this document is corrupted.

Cause: Third-party filter could not filter this document because this document is corrupted.

Action: Fix the corruption and reindex this document.

DRG-11222: Third-party filter does not support this known document format.

Cause: Third-party filter was able to recognize the format of this document but could not filter it because this format is not supported.

Action: Remove this document or specify it to be ignored.

DRG-11223: Third-party filter indicates this document is password protected or encrypted.

Cause: Third-party filter encountered a password protected or encrypted document and could not filter it because this level of password protection or encryption is not supported.

Action: Remove this document or specify it to be ignored.

DRG-11224: Third-party filter is unable to create or write to temporary file.

Cause: Third-party filter could not filter this document because it was unable to create a temporary file or unable to write to a temporary file.

Action: Make sure that the Operating System specified temporary directory has enough space and that the Operating System Oracle user has the privileges to create files in this temporary directory.

DRG-11225: Third-party filter timed out.

Cause: Third-party filter could not filter this document because the filter timed out.

Action: Increase the value of the TIMEOUT attribute of INSO_FILTER filter type and reindex this document. When TIMEOUT attribute is set to 0 and the session hangs then contact Oracle Support.

DRG-11226: Error initializing third-party filter: *string*

Cause: There was an error initializing the third-party filter.

Action: Check the following messages for details

DRG-11227: Third-party filter does not support this document format.

Cause: Third-party filter does not support the format of this document.

Action: Remove this document or specify it to be ignored.

DRG-11228: Charset filter does not support binary documents.

Cause: The format column specifies a binary document

Action: Do not attempt to filter binary documents using the charset filter

DRG-11229: configuration column must be a char, varchar, or varchar2 type

Cause: you specified a configuration column which is not a char, varchar, or varchar2 type.

Action: specify a configuration column of correct type

DRG-11301: error while indexing document

Cause: An error was encountered while indexing the document. The error may have occurred during lexing, parsing for sections, or other action during document tokenization

Action: review document and update with valid data. Note that the document contents may have been partially indexed, so it may be returned by some queries.

DRG-11303: secondary indexes are not supported by this indextype

Cause: You attempted to create an index on an index-organized table, but the indextype does not support this action.

Action: n/a

DRG-11304: function-based indexes are not supported by this indextype

Cause: You attempted to create a function-based index but the indextype does not support this action.

Action: n/a

DRG-11305: create/alter index *string* is in progress in another session

Cause: you attempted to mark the index from INPROGRESS to FAILURE but create/alter on the same index is in progress in another session

Action: n/a

DRG-11306: operation cannot be performed on a policy

Cause: you attempted to perform an operation on a policy, but the operation is only valid for an index.

Action: n/a

DRG-11307: operation cannot be performed on an index

Cause: you attempted to perform an operation on an index, but the operation is only valid for a policy.

Action: n/a

DRG-11308: unsupported column expression *string*

Cause: You attempted to create an index with an unsupported column expression.

Action: n/a

DRG-11309: invalid filter by column: *string*

Cause: the column specified is not valid

Action: check that the followings are valid: a) column is of supported datatype b) valid table name, column name in the specification.

DRG-11310: invalid order by column: *string*

Cause: the column specified is not valid

Action: check that the followings are valid: a) column is of supported datatype b) valid table name, column name in the specification.

DRG-11311: *string* cannot be specified for this optimization mode

Cause: the specified option is not valid for this optimization mode

Action: remove the specified option

DRG-11312: source and new policy must have same owner

Cause: the new policy has a different owner than the source policy

Action: Ensure that both policies are owned by the same user

DRG-11313: populate index error on index partition *string*

Cause: failed to populate the text index on the specified partition

Action: See the next errors on stack and take appropriate action

DRG-11314: changing TRANSACTIONAL property on index with rows on pending queue not allowed

Cause: the index has pending unsynced rows

Action: sync the index before changing the TRANSACTIONAL property

DRG-11316: \$\$ table cannot be created with *string*

Cause: the \$\$ table cannot be created with the specified storage option

Action: remove the specified option from the index preference and retry the index creation

DRG-11317: rowid *string* is not in the index

Cause: you specified an invalid rowid in `ctx_ddl.add_mdata`

Action: correct the rowid and retry

DRG-11318: error processing `dr$data_update`

Cause: there was an error

Action: check the error stack for more details

DRG-11319: more than 1 index found on \$I. OPTIMIZE REBUILD not supported

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11320: no index found on \$I. OPTIMIZE REBUILD not supported

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11321: triggers detected on \$I. OPTIMIZE REBUILD not supported

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11322: fast optimize not supported for `big_io` option

Cause: OPTIMIZE FAST is not supported with `big_io` option

Action: run optimize full or rebuild instead

DRG-11323: merge optimize requires `near_realtime` option

Cause: OPTIMIZE MERGE requires `near_realtime` option

Action: run another optimize mode

DRG-11324: fast optimize not supported for `separate_offsets` option

Cause: OPTIMIZE FAST is not supported with `separate_offsets` option

Action: run optimize full or rebuild instead

DRG-11325: stageitab only supported for context index

Cause: STAGEITAB requires context index

Action: don't use stageitab on non context indexes

DRG-11326: separate offsets only supported for context index

Cause: SEPARATE_OFFSETS requires context index

Action: don't use separate_offsets on non context indexes

DRG-11327: big_io only supported for context index

Cause: BIG_IO requires context index

Action: don't use big_io on non context indexes

DRG-11328: optimize validation failed

Cause: optimize validation failed

Action: file a bug

DRG-11332: Index already has STAGE_ITAB set

Cause: Index already has stage_itab set

Action: Do not add stage_itab to this index

DRG-11333: Index does not have STAGE_ITAB set

Cause: Index does not have stage_itab set

Action: Do not remove stage_itab from this index

DRG-11334: Index already has BIG_IO set

Cause: Index already has big_io set

Action: Do not add big_io to this index

DRG-11335: Index does not have BIG_IO set

Cause: Index does not have big_io set

Action: Do not remove big_io from this index

DRG-11336: Index already has SEPARATE_OFFSETS set

Cause: Index already has separate_offsets set

Action: Do not add separate_offsets to this index

DRG-11337: Index does not have SEPARATE_OFFSETS set

Cause: Index does not have separate_offsets set

Action: Do not remove separate_offsets from this index

DRG-11338: policy *string* does not exist

Cause: the specified policy does not exist or you do not have access to it.

Action: Specify an existing index

DRG-11339: \$A table cannot be created with *string*

Cause: the \$A table cannot be created with the specified storage option

Action: remove the specified option from the index preference and retry the index creation

DRG-11340: \$F table cannot be created with *string*

Cause: the \$F table cannot be created with the specified storage option

Action: remove the specified option from the index preference and retry the index creation

DRG-11341: Index optimization failed for one or more tokens

Cause: Index optimization generated an error for one or more tokens, possibly due to corruption of the token_info blob.

Action: Check the index optimization log for the detailed error, or retry the optimize call with logging enabled

DRG-11342: OPTIMIZE REBUILD not supported for partitioned \$I and global \$X

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11343: OPTIMIZE REBUILD not supported for current \$I partitioning scheme

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11344: SPLIT DOLLARI does not allow an empty mapping table input

Cause: SPLIT DOLLARI doesn't generate any output for empty mapping table

Action: populate the mapping table, and retry the operation

DRG-11345: Index optimization was interrupted

Cause: Index optimization was interrupted by ctx_adm.stop_optimize

Action: None

DRG-11346: FORWARD INDEX only supported for context index

Cause: FORWARD INDEX needs context index

Action: Don't use FORWARD INDEX on non context indexes

DRG-11347: FORWARD INDEX does not exist for this index

Cause: FORWARD INDEX does not exist

Action: Enable forward index for the index

DRG-11348: OPTIMIZE REBUILD not supported for \$I with character length semantics columns

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11349: FILTER CACHE only supported for context index

Cause: FILTER CACHE only for context index

Action: Don't use FILTER_CACHE on non context indexes

DRG-11350: SAVE COPY only supported for context index

Cause: SAVE COPY needs context index

Action: Don't use SAVE COPY on non context indexes

DRG-11351: Unable to fetch partition Id for given rowid: *string*

Cause: Not able to fetch partition id for given rowid

Action: Make sure index tables are partitioned correctly.

DRG-11352: Not able to fetch partition name for given partition position: *number*

Cause: Not able to fetch partition name for given partition position

Action: Make sure valid partition position has been provided

DRG-11353: xml_enable is not allowed for a local index

Cause: Section group attribute xml_enable set to TRUE for a local index

Action: Set xml_enable to FALSE for a local index.

DRG-11354: stage_itab_max_rows not allowed without stage_itab storage preference

Cause: Storage option stage_itab_max_rows needs to be accompanied by stage_itab

Action: Add stage_itab to storage preference

DRG-11355: Not able to fetch partition position from rowid: *string*

Cause: Not able to fetch partition position for given rowid

Action: Make sure valid rowid has been provided

DRG-11356: Optimize operations are not permitted on partition *string*

Cause: READ mode for this partition is set to FALSE. No optimize operations are permitted in this mode.

Action: Set READ mode for this partition to be TRUE.

DRG-11357: FORWARD INDEX must be specified at index, not partition level *string*

Cause: forward index was specified at partition level and not at index level

Action: Specify forward index option at index level. All partitions inherit.

DRG-11358: Save Copy must be specified at index, not partition level *string*

Cause: save copy was specified at partition level and not at index level

Action: Specify save copy option at index level. All partitions inherit.

DRG-11359: xml_save_copy can only be specified for xml enabled text index

Cause: xml_save_copy was specified for non-xml enabled text index

Action: Use xml_save_copy only for xml enabled text index.

DRG-11360: xml_forward_enable can only be specified for xml enabled text index

Cause: xml_forward_enable was specified for non-xml enabled text index

Action: Use xml_forward_enable only for xml enabled text index.

DRG-11361: xml_forward_enable can not be enabled without xml_save_copy set to true

Cause: attempt to enable xml_forward_enable without xml_save_copy set to true

Action: Set xml_forward_enable to true only when xml_save_copy set to true

DRG-11362: xml_enable is not allowed for non-XMLType columns

Cause: 'xml_enable' was set to TRUE for non-XMLType columns.

Action: Set 'xml_enable' to TRUE only for XMLType columns.

DRG-11363: xml_enable is not allowed for XMLType OR storage

Cause: 'xml_enable' was set to TRUE for XMLType with object-relational storage.

Action: Set 'xml_enable' to TRUE only for XMLType binary or CLOB storage.

DRG-11364: index *string* is invisible

Cause: the index is marked as invisible. Only DML operations on the base table are allowed

Action: mark the index as visible with alter index

DRG-11365: FORWARD_INDEX cannot be specified for XML enabled text index.

Cause: The FORWARD_INDEX attribute was specified for an XML enabled text index.

Action: Use the FORWARD_INDEX attribute for a non-XML enabled text index only.

DRG-11366: SAVE_COPY cannot be specified for XML enabled text index.

Cause: The SAVE_COPY attribute was specified for an XML enabled text index.

Action: Use the SAVE_COPY attribute for a non-XML enabled text index only.

DRG-11367: Index is too fragmented to run optimize for all fragmented tokens.

Cause: More than 50% of tokens in \$I are fragmented.

Action: Please run FULL/REBUILD optimize or specify value for maxtokens

DRG-11368: Invalid value for maxtokens attribute.

Cause: Maxtokens value was either less than zero or too high.

Action: Specify maxtokens values between 0 and 50% of token count of \$I.

DRG-11369: Stage itab row exceeds max allowable size.

Cause: Ctxagg optimize merge limits the size of rows to under 4K.

Action: Use traditional optimize merge.

DRG-11370: Error in optimize merge (ctxagg).

Cause: Internal error in optimize merge.

Action: Use traditional optimize merge.

DRG-11371: stage_itab_parallel not allowed without stage_itab storage preference

Cause: Storage option stage_itab_parallel needs to be accompanied by stage_itab

Action: Add stage_itab to storage preference

DRG-11372: forward index storage preference cannot be specified with asynchronous update

Cause: Storage option Forward index specified along with asynchronous update

Action: Remove forward index storage preference when using asynchronous update

DRG-11400: failed to parse document with key *string*

Cause: the document specified for linguistic extraction could not be parsed. This could indicate that the document is not well-formed English

Action: check the document contents

DRG-11403: primary key value too long

Cause: the primary key value parameter passed to the service request is longer than the maximum primary key length (64 bytes)

Action: check primary key parameter

DRG-11404: no primary key value specified

Cause: the primary key value parameter passed to the service request is null

Action: check primary key parameter

DRG-11410: could not insert into *string* result table

Cause: an ORACLE error occurred while linguistic output was being inserted into the result table

Action: take action appropriate to the ORACLE error code.

DRG-11418: insufficient document content for linguistic parser

Cause: the document specified for linguistic extraction was parsed but the document content was insufficient for linguistic extraction by the specified parser.

Action: check the document contents or try modifying linguistic settings

DRG-11422: linguistic initialization failed

Cause: linguistic services initialization failed

Action: Check to see if knowledge base files present for the language

DRG-11425: gist level *string* is invalid

Cause: invalid gist level

Action: Specify a valid gist level

DRG-11427: valid gist level values are *string*

Cause: Invalid gist level

Action: Specify a valid gist level

DRG-11428: document contains invalid characters

Cause: The document contains invalid characters

Action: Remove invalid characters

DRG-11432: file error while accessing knowledge base

Cause: An oracle error was encountered during knowledge base access

Action: Check to see if knowledge base files present for the language

DRG-11435: primary key value is invalid

Cause: the primary key value parameter passed to the service request is not valid

Action: check primary key parameter

DRG-11439: index name length exceeds maximum of *string* bytes

Cause: the length of the index name is longer than the maximum index name size

Action: drop the index and recreate the index with a shorter index name

DRG-11440: operation not supported for the *string* language

Cause: the requested operation is not supported for the current language

Action: Do not request this operation

DRG-11441: gist numParagraphs *string* is invalid

Cause: invalid gist numparagraphs

Action: Specify valid gist numparagraphs

DRG-11442: valid gist numParagraphs values are *string*

Cause: invalid gist numparagraphs

Action: Specify valid gist numparagraphs

DRG-11443: gist maxPercent *string* is invalid

Cause: invalid gist max percent

Action: Specify valid gist max percent

DRG-11444: valid gist maxPercent values are *string*

Cause: invalid gist max percent

Action: Specify valid gist max percent

DRG-11445: rowid value is invalid: *string*

Cause: the rowid value parameter passed to the service request is not valid

Action: check rowid parameter

DRG-11446: supplied knowledge base file *string* not installed

Cause: Either using Oracle Express edition or supplied Knowledge Base was required but was not installed.

Action: If using Oracle Express edition then upgrade to Oracle Enterprise or Oracle Standard edition. Otherwise see post-installation tasks section of the Database Installation Guide for instructions to install supplied Knowledge Base.

DRG-11480: ctkbctc memory allocation error: %(1)

Cause: Unable to allocate memory

Action: Contact your system administrator

DRG-11481: linguistic feature not enabled

Cause: linguistic feature not enabled

Action: enable linguistic feature

DRG-11500: column name expected, found *string* on line *string*

Cause: possibly miss-spelt column name or keyword

Action: check spellings and punctuation around specified line

DRG-11501: identifier *string* found in place of column name on line *string*

Cause: possibly miss-spelt column name

Action: check spellings around specified line

DRG-11502: read of file failed at line *string* for file *string*

Cause: bad file name, wrong file_type or file system error

Action: check file name, type and/or file integrity

DRG-11503: insert statement overflows maximum statement size

Cause: total length of statement exceeds database maximum

Action: reduce length of column names or number of columns

DRG-11504: invalid longsize parameter of *string* specified

Cause: invalid option argument

Action: specify long buffer size in kbytes above 0

DRG-11505: long data on line *string* not found or invalid

Cause: either bad data or bad data file

Action: check file exists and is accessible, if separate

DRG-11506: record ignored on line *string* because of error(s)

Cause: an error occurred parsing this row's data

Action: move and amend line in error to alternate load file

DRG-11507: file error trying to read file *string*

Cause: file not found or could not be read

Action: check name and location of file

DRG-11508: bad or missing *string* token on line *string*

Cause: token expected was not found

Action: move and amend record affected to error load file

DRG-11509: value expected on line *string*

Cause: could not make sense of text where value expected

Action: move and amend record affected to error load file

DRG-11510: encountered unrecoverable error on line *string*

Cause: see previous messages

Action: see previous errors

DRG-11511: specified table does not contain a LONG RAW column

Cause: text must be inserted into a LONG RAW type column

Action: check table and type of data

DRG-11512: bad syntax for thesaurus load file at line *string*

Cause: load file must have specific format for loading thesaurus

Action: check documentation for description of correct format

DRG-11513: unable to open or write to file *string*

Cause: an attempt to open or to write to the given file failed

Action: check with system administrator

DRG-11514: user *string* does not have UPDATE or SELECT privilege on *string*

Cause: user has not been granted UPDATE or SELECT privilege

Action: check privilege on the user

DRG-11515: not enough text key values

Cause: number of values provided does not match the number of text keys

Action: provide same number of values as the number of text keys

DRG-11516: user must be at least in role CTXUSER to perform this operation

Cause: user does not have CTXUSER, CXAPP or CTXADMIN role

Action: grant user the proper role

DRG-11517: error when validating text objects

Cause: see accompanying Oracle error

Action: see accompanying Oracle error

DRG-11518: text table *string* does not have a LONG or LONG RAW column

Cause: table specified does not have a LONG or LONG RAW column

Action: check the table

DRG-11519: encounter error when exporting a LONG or LONG RAW column

Cause: see accompanying error message

Action: see accompanying error message

DRG-11520: error writing to file

Cause: file does not exist

Action: make sure file exists

DRG-11521: encounter error when updating a LONG or LONG RAW column

Cause: see accompanying error message

Action: see accompanying error message

DRG-11522: no row exists for the text key(s) specified

Cause: no row in the table has the text key(s) specified

Action: use a valid text key(s)

DRG-11523: unable to lock the specified row for update

Cause: some other process has a lock on the row

Action: release the lock or wait until the lock is released

DRG-11524: primary key value is missing

Cause: primary key value is not provided

Action: provide the primary key value(s)

DRG-11525: invalid commitafter parameter of *string* specified

Cause: invalid option argument

Action: specify commitafter above 0

DRG-11526: filename exceeds maximum length

Cause: value of the file name is too long

Action: Specify a shorter file name

DRG-11527: end token not found on line *string*

Cause: *TEXTEND* not found at end of record

Action: processing discontinued - amend record

DRG-11528: LONG or LONG RAW column definition found in structure data

Cause: could be misplaced

Action: remove reference to LONG or LONG RAW column from structure data

DRG-11529: token exceeds maximum length

Cause: value of the column name or value is too long

Action: processing discontinued - amend record

DRG-11530: token exceeds maximum length

Cause: value of the phrase or relation word is too long

Action: processing discontinued - amend record

DRG-11531: start token not found on line *string*

Cause: <TEXTSTART: not found at start of record

Action: processing discontinued - amend record

DRG-11532: error reading through end of line *string* for file *string*

Cause: characters encountered while reading through end of line

Action: remove extraneous characters

DRG-11533: improper value of column *string*

Cause: value of the column is too long or mismatched quote

Action: processing discontinued - amend record

DRG-11534: invalid column *string*

Cause: column does not exist or it's misspelled

Action: processing discontinued - amend record

DRG-11535: error writing phrase or qualifier: *string* on line *string* to memory

Cause: not enough memory

Action: allocate more memory, contact WorldWide Support if problem persists

DRG-11600: URL store: *string* has permanently moved

Cause: the document referred to by the URL has permanently moved

Action: find the new address, if any, of the document

DRG-11601: URL store: bad syntax on request for *string*

Cause: client did not make correct request

Action: contact support

DRG-11602: URL store: access to *string* requires authentication

Cause: user has to provide password or other authentication

Action: get required access, or check URL

DRG-11603: URL store: payment required to access *string*

Cause: payment is required before the URL can be accessed

Action: check URL, or pay if required if access necessary

DRG-11604: URL store: access to *string* is denied

Cause: access to the URL is denied

Action: check URL; if correct, do not try to access URL again

DRG-11605: URL store: document specified by *string* not found

Cause: the document can not be found on the host specified

Action: check URL

DRG-11606: URL store: access to *string* timed out waiting for client request

Cause: client did not make response within timeout period

Action: check URL

DRG-11607: URL store: access to *string* was denied due to garbled response

Cause: Web server identified in URL doesn't obey HTTP protocol

Action: contact the Web administrator of the remote host

DRG-11608: URL store: host portion of *string* specified incorrectly

Cause: host portion of the URL could not be parsed

Action: check URL

DRG-11609: URL store: unable to open local file specified by *string*

Cause: attempt to open local file failed

Action: check URL

DRG-11610: URL store: unable to read local file specified by *string*

Cause: attempt to read local file failed

Action: contact system administrator

DRG-11611: URL store: unknown protocol specified in *string*

Cause: the protocol parsed is neither http or file

Action: check URL

DRG-11612: URL store: unknown host specified in *string*

Cause: the address of the host specified could not be resolved

Action: check URL

DRG-11613: URL store: connection refused to host specified by *string*

Cause: attempt to connect to host was forcibly refused

Action: check URL

DRG-11614: URL store: communication with host specified in *string* timed out

Cause: a network operation timed out

Action: try again later; network connection may be down to Web server

DRG-11615: URL store: write failed sending to *string* over network

Cause: unknown error writing request to Web server

Action: check network connection

DRG-11616: URL store: too many redirections trying to access *string*

Cause: too long a chain of HTTP redirections given the URL

Action: contact the Web administrator of the remote host

DRG-11617: URL store: URL *string* is too long

Cause: The length of the URL string is longer than URLSIZE

Action: set URLSIZE attribute to a larger value

DRG-11618: URL store: document identified by *string* is too large

Cause: document larger than user-set maximum size

Action: do not access URL, or increase document size limit

DRG-11619: URL store: row in table is empty

Cause: row deleted or otherwise missing

Action: check table if necessary

DRG-11620: URL store: thread operation error

Cause: thread operation failed

Action: contact system administrator

DRG-11621: URL store: socket open error for *string*

Cause: socket open failed; probably too many open file descriptors

Action: reduce the maximum number of threads started

DRG-11622: URL store: unknown HTTP error *string* getting *string*

Cause: an unexpected HTTP error has occurred

Action: consult HTTP error codes; if valid, contact support

DRG-11623: URL store: unknown error getting *string*

Cause: unexpected error

Action: contact support

DRG-11624: invalid attribute *string* for *string*: proper range *string* to *string*

Cause: unexpected error

Action: change attribute value

DRG-11625: MAXURLS * URLSIZE must be less than *string*

Cause: MAXURLS * URLSIZE cannot be larger than the limit

Action: Lower either MAXURLS or URLSIZE

DRG-11626: URL store: unknown protocol specified during redirect from *string*

Cause: the URL redirected to a site with neither http nor file protocol

Action: check URL

DRG-11627: URL store: not implemented error getting *string*

Cause: The remote host returned a 501 not implemented error

Action: Check URL

DRG-11628: URL store: bad gateway error getting *string*

Cause: The remote host returned a 502 bad gateway error

Action: Check URL

DRG-11629: URL store: service unavailable error getting *string*

Cause: The remote host returned a 503 service temporarily unavailable error

Action: Check URL

DRG-11630: URL store: gateway timeout error getting *string*

Cause: The remote host returned a 504 gateway timeout error

Action: Check URL

DRG-11700: thesaurus *string* already exists

Cause: thesaurus with same name exists

Action: use another name

DRG-11701: thesaurus *string* does not exist

Cause: thesaurus does not exist

Action: use another thesaurus or create it

DRG-11702: *string*

Cause: error while parsing thesaurus operator in query term. see error message for details.

Action: see error message

DRG-11703: user *string* must have at least CTXAPP role to execute this function

Cause: privilege is not sufficient

Action: grant user CTXAPP role

DRG-11704: phrase '*string*' does not exist

Cause: phrase does not exist

Action: use another phrase or create it

DRG-11705: multilevel jump from *string* to *string*

Cause: the thesaurus load file has a multilevel jump which could not be parsed.

Action: correct thesaurus file

DRG-11706: invalid relation *string*

Cause: You specified an invalid relation. The set of valid relations will be displayed. Additionally, you may be able to specify a translation, which has the syntax languagename: where languagename can be any string up to 10 bytes

Action: Specify a valid relation

DRG-11707: valid relations: *string*

Cause: You specified an invalid relation. The set of valid relations will be displayed. Additionally, you may be able to specify a translation, which has the syntax languagename: where languagename can be any string up to 10 bytes

Action: Specify a valid relation

DRG-11708: too many thesauri

Cause: ctxkbtc cannot compile more than 16 thesauri

Action: Specify fewer thesauri

DRG-11709: too many terms in thesaurus

Cause: number of thesaurus terms exceeds maximum

Action: Use a thesaurus with fewer terms

DRG-11710: thesaurus term *string* too long

Cause: knowledge base does not permit terms longer than 80 characters

Action: Correct thesaurus

DRG-11711: too much data for term *string*

Cause: internal limit on size of data per term

Action: redesign thesaurus

DRG-11712: multiple Broader Terms for term *string*

Cause: There is a term in the thesaurus with multiple broader terms

Action: make sure each term has only one broader term

DRG-11713: multiple Preferred Terms per synonym ring

Cause: There is a synonym ring in the thesaurus with multiple preferred terms

Action: make sure each synonym ring has only one preferred term

DRG-11714: synonyms have different Broader Terms

Cause: Some synonyms in a synonym ring have different broader terms

Action: make sure all synonyms have the same broader term

DRG-11715: attempt to add a BT relation between 2 KB categories *string* and *string*

Cause: BT relation cannot be between two existing knowledge base categories

Action: redesign the BT hierarchy

DRG-11716: attempt to add Narrower Term *string* for non-Preferred Term *string*

Cause: only a PT can have NTs

Action: attach the NT to the preferred term

DRG-11717: attempt to add Related Term *string* to non-Preferred Term *string*

Cause: only a PT can have RTs

Action: attach the RT

DRG-11718: multiple Preferred Terms for term *string*

Cause: There are multiple preferred terms for this term

Action: Correct thesaurus

DRG-11719: Broader Term hierarchy too deep

Cause: The broader term hierarchy in this thesaurus is too deep

Action: flatten the hierarchy for best results

DRG-11720: too many synonyms per synonym ring

Cause: too many synonyms for a single preferred term

Action: introduce further distinctions to deepen the hierarchy

DRG-11721: thesaurus *string* is empty

Cause: no entries in thesaurus

Action: add some entries or drop the thesaurus

DRG-11722: invalid language specification

Cause: language specification cannot be more than 10 characters

Action: reduce language specification to less or equal to 10 char

DRG-11723: phrase cannot be NULL

Cause: you tried to add a NULL phrase to the thesaurus

Action: specify a valid phrase

DRG-11724: phrase *string* already exists

Cause: phrase with same name exists

Action: use another name

DRG-11725: phrase does not have any synonyms

Cause: you tried to nominate a phrase with no synonyms to be the preferred term, or you tried to drop SYN from a phrase with no synonyms

Action: None

DRG-11726: phrase is not a preferred term

Cause: you tried to remove the preferred term relation from a phrase which is not a preferred term.

Action: None

DRG-11727: phrase does not have any related terms

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11728: phrase does not have any broader terms of this type

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11729: phrase does not have any narrower terms of this type

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11730: relation does not exist

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11731: translation does not exist

Cause: you tried to drop a translation which does not exist

Action: None

DRG-11732: phrase does not have any translations

Cause: you tried to drop translations which does not exist

Action: None

DRG-11733: more than one translation for the term in the specified language

Cause: the term has more than one translation in the specified language

Action: specified a translation

DRG-11734: missing homograph

Cause: A term of the form 'homograph(disambiguation)' is missing the the homograph.

Action: None

DRG-11735: missing disambiguation

Cause: A term of the form 'homograph(disambiguation)' is missing the the disambiguation (i.e., homograph()).

Action: None

DRG-11736: illegal text after disambiguated homograph

Cause: A term of the form 'homograph(disambiguation)' has text after the disambiguation (e.g, homograph(disambiguation) extra text").

Action: None

DRG-11737: Unsupported attribute value for thes_toktype

Cause: An invalid value was specified for thes_toktype attribute.

Action: Please specify a valid token type as thes_toktype.

DRG-11801: Continue

Cause: Enquire user to decide if continue is necessary HTTP_ERROR = 100

Action: Upon positive response, continue the original operation

DRG-11802: Switching Protocols

Cause: Telling client a protocol switching just happened HTTP_ERROR = 101

Action: The user agent takes proper actions

DRG-11803: OK

Cause: Telling client things are ok HTTP_ERROR = 200

Action: The user agent takes proper actions

DRG-11804: Created

Cause: Telling client things are created HTTP_ERROR = 201

Action: The user agent takes proper actions

DRG-11805: Accepted

Cause: Telling client things are accepted but not committed HTTP_ERROR = 202

Action: The user agent takes proper actions

DRG-11806: Non-authoritative Information

Cause: The returned meta-information is not the definitive set HTTP_ERROR = 203

Action: The user agent knows the information is Non-authoritative

DRG-11807: No Content

Cause: request has been fulfilled but no new information found HTTP_ERROR = 204

Action: The user agent takes proper actions

DRG-11808: Reset Content

Cause: Telling client to reset the document view HTTP_ERROR = 205

Action: The user agent takes proper actions

DRG-11809: Partial Content

Cause: Telling client document content is a partial content HTTP_ERROR = 206

Action: The user agent takes proper actions

DRG-11810: Partial Update OK

Cause: Telling client document is partially updated HTTP_ERROR = 207

Action: The user agent takes proper actions

DRG-11811: Multiple Choices

Cause: Telling client multiple choices of resources is possible HTTP_ERROR = 300

Action: The user agent takes proper actions

DRG-11812: Moved Permanently

Cause: The URI has been assigned a new permanent URI HTTP_ERROR = 301

Action: The user agent takes proper actions

DRG-11813: Moved Temporarily

Cause: The URI resides temporarily under a different URI. HTTP_ERROR = 302

Action: The user agent takes proper actions

DRG-11814: See Other

Cause: The URI can be found using GET METHOD under a different URI
HTTP_ERROR = 303

Action: The user agent takes proper actions

DRG-11815: Not Modified

Cause: Response to conditional GET, indicating document not modified.
HTTP_ERROR = 304

Action: The user agent takes proper actions

DRG-11816: Use Proxy

Cause: The client should use specified proxy to repeat the request HTTP_ERROR = 305

Action: The user agent takes proper actions

DRG-11817: Proxy Redirect

Cause: Proxy redirection. Not used HTTP_ERROR = 306

Action: Outdated due to HTTP evolution

DRG-11818: Temporary Redirect

Cause: The resource is temporarily under a different URI. HTTP_ERROR = 307

Action: The takes proper actions

DRG-11819: Bad Request

Cause: The URL syntax is incorrect. Request rejected by server. HTTP_ERROR = 400

Action: The user agent takes proper actions

DRG-11820: Unauthorized

Cause: The request requires further authentication. HTTP_ERROR = 401

Action: The user agent takes proper actions

DRG-11821: Payment Required

Cause: Reserved for future use. HTTP_ERROR = 402

Action: The user agent takes proper actions

DRG-11822: Forbidden

Cause: The server refuses to fulfil the request from client HTTP_ERROR = 403

Action: The user agent takes proper actions

DRG-11823: Not Found

Cause: The server can not find the requested URI HTTP_ERROR = 404

Action: The user agent takes proper actions

DRG-11824: Method Not Allowed

Cause: The user agent specified method not allowed HTTP_ERROR = 405

Action: The user agent reads allow header to decide alternatives.

DRG-11825: Not Acceptable

Cause: Requested resource is not acceptable according to request header

HTTP_ERROR = 406

Action: The user agent should query the user for the next action.

DRG-11826: Proxy Authentication Required

Cause: The client must authenticate itself with the proxy. HTTP_ERROR = 407

Action: The user agent takes proper actions

DRG-11827: Request Timeout

Cause: The server is tired of waiting for the request HTTP_ERROR = 408

Action: The user agent repeat the request

DRG-11828: Conflict

Cause: The request conflicts with the current state of the URI HTTP_ERROR = 409

Action: The user agent takes proper actions

DRG-11829: Gone

Cause: The resource is no longer available and no forwarding address. HTTP_ERROR = 410

Action: The user agent takes proper actions

DRG-11830: Length Required

Cause: The server must receive a content-length header. HTTP_ERROR = 411

Action: The user agent takes proper actions

DRG-11831: Precondition Failed

Cause: Telling the user agent that the resource failed preconditions HTTP_ERROR = 412

Action: The user agent takes proper actions

DRG-11832: Request Entity Too Large

Cause: Request rejected because request entity is too large. HTTP_ERROR = 413

Action: If Retry-After header found, the user agent should retry.

DRG-11833: Request-URI Too Big

Cause: The server is refusing to accept the URI which is too big. HTTP_ERROR = 414

Action: The user agent takes proper actions

DRG-11834: Unsupported Media Type

Cause: The server is refusing the request because of media type HTTP_ERROR = 415

Action: The user agent takes proper actions

DRG-11835: Requested Range Not Satisfiable

Cause: The byte range request can not be satisfied by the resource extent.

HTTP_ERROR = 416

Action: The user agent reads content-range header in the response.

DRG-11836: Expectation Failed

Cause: Server can not meet the user agent's expectation. HTTP_ERROR = 417

Action: The user agent takes pro

DRG-11837: Reauthorization Required

Cause: Reserved HTTP_ERROR = 418

Action: Reserverd

DRG-11838: Proxy Reauthentication Required

Cause: Reserved HTTP_ERROR = 419

Action: Reserved

DRG-11839: Internal Server Error

Cause: The server encountered internal error in fulfilling the request. HTTP_ERROR = 500

Action: The user agent takes proper actions

DRG-11840: Not Implemented

Cause: The server can't support a request feature which has yet to be implemented. HTTP_ERROR = 501

Action: The user agent takes proper actions

DRG-11841: Bad Gateway

Cause: In serving the request, the server received invalid response from gateway. HTTP_ERROR = 502

Action: The user agent takes proper actions

DRG-11842: Service Unavailable

Cause: Server overloaded or in maintenance mode. HTTP_ERROR = 503

Action: If retry-after header is in the response, retry the request.

DRG-11843: Gateway Timeout

Cause: Upstream server did not timely respond to the gateway server. HTTP_ERROR = 504

Action: The user agent takes proper actions

DRG-11844: HTTP Version Not Supported

Cause: The HTTP version in the request header is rejected by the server. HTTP_ERROR = 505

Action: The user agent takes proper actions

DRG-11845: No Partial Update

Cause: Reserved HTTP_ERROR = 506

Action: Reserved

DRG-11846: Response Is Stale

Cause: The the user agent knows the returned reponse is stale. HTTP_CACHE_ERROR = 10

Action: The user agent client takes proper actions.

DRG-11847: Revalidation Failed

Cause: User agent's attempt to revalidate a stale response failed.
HTTP_CACHE_ERROR = 11

Action: The user agent client takes proper actions

DRG-11848: Disconnected Operation

Cause: The cache is intentionally disconnected for a time period.
HTTP_CACHE_ERROR = 12

Action: The user agent client takes proper actions

DRG-11849: Heuristic Expiration

Cause: Cache freshness lifetime and response age both greater than 24 hours.
HTTP_CACHE_ERROR = 13

Action: The user agent client takes proper actions

DRG-11850: Transformation Applied

Cause: Telling cache manager, content encoding/media type has been changed in cache. HTTP_CACHE_ERROR = 14

Action: The user agent takes proper actions

DRG-11851: Cache Related Warning

Cause: Arbitrary information about cache to be presented to logger.
HTTP_CACHE_ERROR = 99

Action: The user agent client must not take any automated action.

DRG-11852: Can't Locate Remote Host

Cause: connection to remote host failed USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11853: No Host Name Found

Cause: The host name is not specified in URI. USER_AGENT_ERROR

Action: The user agent client takes proper action.

DRG-11854: No File Name Found Or File Not Accessible

Cause: Unable to open the file specified USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11855: FTP Server Replies

Cause: FTP server responds to the agent request USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11856: FTP Server Doesn't Reply

Cause: No response from FTP server during operation. USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11857: Server Timed Out

Cause: Server operation timed out USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11858: Gopher Server Replies

Cause: Gopher server responds to the agent request. USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11859: Data Transfer Interrupted

Cause: Processing of URL request was interrupted USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11860: Connection Establishment Interrupted

Cause: Connection operation was interrupted USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11861: CSO-server Replies

Cause: Telling client things are ok USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11862: This Is Probaly A HTTP Server 0.9 Or Less

Cause: A very old web server USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11863: Bad, Incomplete, Or Unknown Response

Cause: The server is numbering something not understandable
USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11864: Unknown Access Authentication Scheme

Cause: The server is using an unkown access authentication scheme
USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11865: News Server Replies

Cause: News Server is responding USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11866: Please Try `ftp://` Instead Of `file://`

Cause: wrong access scheme is used. USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11867: Method Not Suited For Automatic Redirection

Cause: Telling client things are ok USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11868: Too Many Redirections

Cause: The web server setup configured too many redirections
USER_AGENT_ERROR

Action: The user agent client should take proper actions

DRG-11869: Premature End Of File Detected

Cause: Detected end of file is unexpected USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11870: Response From WAIS Server Too Large -- Extra Lines Ignored

Cause: Response from WAIS caused buffer overflow USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11871: WAIS Server Doesn't Return Any Data

Cause: Bad WAIS Server USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11872: Can't Connect To WAIS Server

Cause: Connect to WAIS server failed USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11873: System Call Replies

Cause: register what system call replies USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11874: Wrong Or Unknown Access Scheme

Cause: Protocol class is wrongfully connected to ther server USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11875: Access Scheme Is Not Allowed

Cause: Telling client things are ok USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11876: When Your Are Connected, You Can Log In

Cause: Pass information to telnet agent USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11877: This Cache Version Has Expired And Will Be Automatically Reloaded

Cause: Need to tell user that cache entry has been reloaded USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11878: Loading New Rules Must Be Explicitly Acknowledged

Cause: Let user agent client be aware of new rule loading USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11879: Automatic Proxy Redirection Msut Be Explicitly Acknowledged

Cause: Let user agent client be aware of proxy redirection USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-12001: Please enter username:

Cause: Prompt user for name W3CLIB_MSG = 0

Action: The user agent client takes proper actions

DRG-12002: Please enter username for proxy authentication:

Cause: Prompt user for name W3CLIB_MSG = 1

Action: The user agent client takes proper actions

DRG-12003: Please enter username for this FTP server:

Cause: Prompt user for name W3CLIB_MSG = 2

Action: The user agent client takes proper actions

DRG-12004: Password:

Cause: Prompt user for password W3CLIB_MSG = 3

Action: The user agent client takes proper actions

DRG-12005: Please give name of file to save in:

Cause: Prompt user for file name W3CLIB_MSG = 4

Action: The user agent client takes proper actions

DRG-12006: Plase enter account:

Cause: Prompt user for account W3CLIB_MSG = 5

Action: The user agent client takes proper actions

DRG-12007: You might not be allowed to use this method here, continue?

Cause: Warn user of deny of service. W3CLIB_MSG = 6

Action: The user agent client takes proper actions

DRG-12008: Location has moved, continue?

Cause: Warn user of location changes. W3CLIB_MSG = 7

Action: The user agent client takes proper actions

DRG-12009: A new set of rules is requested to be added to your setup - continue?

Cause: Warn user of rule changes. W3CLIB_MSG = 8

Action: The user agent client takes proper actions

DRG-12010: This file already exists - replace existing file?

Cause: Warn user of pending replacement W3CLIB_MSG = 9

Action: The user agent client takes proper actions

DRG-12011: Authentication failed - retry?

Cause: Warn user of authentication failure W3CLIB_MSG = 10

Action: The user agent client takes proper actions

DRG-12012: Proxy authentication failed - retry?

Cause: Warn user of proxy authentication failure W3CLIB_MSG = 11

Action: The user agent client takes proper actions

DRG-12013: This method has already been performed - repeat operation?

Cause: Warn user the repetition of previous method used W3CLIB_MSG = 12

Action: The user agent client takes proper actions

DRG-12014: This document is very big - continue operation?

Cause: Warn user of big document processing W3CLIB_MSG = 13

Action: The user agent client takes proper actions

DRG-12015: The source document for this operation has moved - continue?

Cause: Warn user of location changes W3CLIB_MSG = 14

Action: The user agent client takes proper actions

DRG-12016: The target document for this operation has moved - continue?

Cause: Warn user of destination document changes W3CLIB_MSG = 15

Action: The user agent client takes proper actions

DRG-12017: A redirection may change the behavior of this method - proceed anyway?

Cause: Warn user of redirection effects on method W3CLIB_MSG = 16

Action: The user agent client takes proper actions

DRG-12018: Encountered an automatic request for changing proxy - continue?

Cause: Warn user of automatic proxy change W3CLIB_MSG = 17

Action: The user agent client takes proper actions

DRG-12201: section group *string* already exists

Cause: Section group with the same name already exists

Action: Use another name or delete the existing one first

DRG-12202: error while creating section group

Cause: detect an Oracle error while creating section group

Action: see the accompanying Oracle error and take appropriate action

DRG-12203: section group *string* does not exist

Cause: section group provided does not exist

Action: provide an existing section group

DRG-12204: error while dropping section group *string*

Cause: detect an Oracle error while dropping a section group

Action: see the accompanying Oracle error and take appropriate action

DRG-12206: tag *string* already exists in section group *string*

Cause: the start tag provided already exists in the same Section

Action: provide another start tag

DRG-12210: error while adding section *string*

Cause: detect an Oracle error while adding a section

Action: see the accompanying Oracle error and take appropriate action

DRG-12211: section or section id *string* does not exist

Cause: Section name or Section id to be dropped does not exist

Action: provide an existing Section name or Section id

DRG-12212: error while dropping section *string*

Cause: detect an Oracle error while dropping a Section

Action: see the accompanying Oracle error and take appropriate action

DRG-12213: cannot create/drop section group or sections for other user

Cause: You can only create/drop section group objects of your own

Action: have the other user create/drop his/her own objects

DRG-12217: tags cannot be more than 64 bytes

Cause: max limit of start and end tag is 64 bytes

Action: provide a shorter start and end tag

DRG-12218: section group name missing

Cause: must provide section group name

Action: provide a section group name when creating Section or section group

DRG-12219: section name missing

Cause: must provide Section name when creating a Section

Action: provide a Section name

DRG-12220: a valid tag must be provided

Cause: must provide tag when adding a section to a section group

Action: provide a tag

DRG-12223: section name *string* is a reserved name

Cause: you tried to name a section a reserved name

Action: Specify a different name for the section

DRG-12224: use `ctx_ddl.create_section_group` to create section groups

Cause: you tried to use `ctx_ddl.create_preference` to create a section group

Action: use `ctx_ddl.create_section_group`

DRG-12225: this type of section cannot be added to this section group

Cause: You tried to add sections to the null section group, add a stop section to a non-auto section group, or add a zone or field section to the auto section group

Action: Do not add this type of section to this section group

DRG-12226: a field section named *string* already exists in this section group

Cause: you tried to name an attribute or zone section the same name as an existing field section

Action: use another name

DRG-12227: a zone section named *string* already exists in this section group

Cause: you tried to name an attribute or field section the same name as an existing zone section

Action: use another name

DRG-12228: maximum number of field sections (*string*) exceeded

Cause: a section group has more than the maximum number of unique field sections

Action: no action required

DRG-12229: special section *string* already exists in this section group

Cause: you tried to add a special section which already exists

Action: no action required

DRG-12230: special section name must be one of *string*

Cause: you tried to add an invalid special section

Action: specify a valid special section

DRG-12231: an attr section named *string* already exists in this section group

Cause: you tried to name a field or zone section the same name as an existing attribute section

Action: use another name

DRG-12232: invalid attribute tag format

Cause: you specified a tag for use as an attribute tag which did not have the correct format. An attribute tag must have the form TAG@ATTR

Action: use correct format

DRG-12233: xml sections cannot co-exist with other section types

Cause: you tried to add an xml section to a section group or index which already has zone, field, attr, or special sections, or you tried to add a zone, field, attr, or special section to a section group or index which already has xml sections

Action: n/a

DRG-12234: column *string* already mapped in section group *string*

Cause: you tried to add a column section which already exists

Action: use correct format

DRG-12235: an sdata section named *string* already exists in this section group

Cause: you tried to name a non-sdata section the same name as an existing sdata section

Action: use another name

DRG-12236: an mdata section named *string* already exists in this section group

Cause: you tried to name a non-mdata section the same name as an existing mdata section

Action: use another name

DRG-12237: a section named *string* already exists in this section group

Cause: you tried to map a column but the section name is already being used by another section

Action: use another name

DRG-12238: maximum number of mdata sections (*string*) exceeded

Cause: a section group has more than the maximum number of unique mdata sections

Action: no action required

DRG-12239: maximum number of sdata sections (*string*) exceeded

Cause: a section group has more than the maximum number of unique sdata sections

Action: no action required

DRG-12240: ORDER BY column *string* must be indexed as an SDATA section

Cause: an order by column has been mapped to an MDATA section

Action: adjust section group

DRG-12241: column name *string* is not a valid section name

Cause: an order by or filter by column cannot be implicitly mapped to an SDATA section because the name is not valid as a section name

Action: adjust section group to map column name to a valid section name

DRG-12242: value of *string* is too large for section *string*

Cause: the value of a filter by or order by column is too large to be indexed

Action: update the row

DRG-12243: invalid datatype

Cause: the datatype specified for a sdata or mdata section is invalid

Action: specify a supported datatype

DRG-12244: data conversion error for sdata section *string*

Cause: failed to convert data

Action: check the format of the data

DRG-12245: SDATA operator not compatible with the sdata section *string*

Cause: failed to convert data

Action: check the format of the data

DRG-12246: SDATA operand not compatible with the sdata section *string*

Cause: failed to convert data

Action: check the format of the data

DRG-12247: maximum number of NDATA sections (*string*) exceeded

Cause: a section group has more than the maximum number of unique NDATA sections

Action: no action required

DRG-12248: a NDATA section named *string* already exists in this section group

Cause: you tried to name a non-NDATA section the same name as an existing NDATA section

Action: use another name

DRG-12249: a MVDATA section named *string* already exists in this section group

Cause: you tried to name a non-MVDATA section the same name as an existing MVDATA section

Action: use another name

DRG-12250: maximum number of mvdata sections (*string*) exceeded

Cause: a section group has more than the maximum number of unique mvdata sections

Action: no action required

DRG-12251: MVDATA section in XML_SECTION_GROUP is not supported

Cause: you tried to add MVDATA section in XML_SECTION_GROUP

Action: n/a

DRG-12252: No valid rowid provided with MVDATA update procedure

Cause: No valid rowid(s) provided with MVDATA update procedure

Action: Provide at least one valid rowid with this procedure

DRG-12253: optimized for *string* SDATA sections do not support *string* operation

Cause: An attempt was made to use an operation that is not supported for these SDATA sections.

Action: Use another substitute operation if possible.

DRG-12254: order by for SDATA optimized for search only is not allowed

Cause: An attempt was made to use a query ordering by SDATA section that is optimized for search only.

Action: Use SDATA section that is optimized for sort or sort_and_search.

DRG-12255: invalid data type for SDATA section *string*

Cause: The data type of the SDATA section in the XML enabled context index was invalid.

Action: Specify a supported data type.

DRG-12256: SDATA section *string* is not optimized for search

Cause: Section attribute 'optimized_for' was not set to 'search' for the SDATA section in the XML enabled context index.

Action: Set 'optimized_for' to 'search' for the SDATA section.

DRG-12257: RANGE_SEARCH_ENABLE cannot co-exist with other section types.

Cause: An attempt was made to create an index with a section group having both RANGE_SEARCH_ENABLE on and other sections such as Attribute, Field, MDATA, NDATA, SDATA, Special, or Zone section.

Action: Remove other sections from the section group or do not use RANGE_SEARCH_ENABLE for the section group.

DRG-12300: an index with this column list already exists in the index set

Cause: You tried to add an index to an index set, but an index with the specified column list already exists

Action: n/a

DRG-12301: index does not exist in index set

Cause: You tried to remove an index from an index set, but the specified index was not found

Action: n/a

DRG-12302: invalid column list

Cause: You specified an invalid column list -- it may have a syntax error, duplicate columns, or invalid column names

Action: n/a

DRG-12303: cannot add more than 99 indexes to an index set

Cause: You tried to add too many indexes to the index set

Action: n/a

DRG-12304: index set *string* does not exist

Cause: You specified an invalid index set name

Action: n/a

DRG-12305: column *string* data type is not supported for index set columns

Cause: You specified a column in the column list of an index of an index set which does not have a valid datatype

Action: use only DATE, NUMBER, CHAR, or VARCHAR2 columns in index column lists

DRG-12306: column *string* is too long for index set columns

Cause: You specified a column in the column list of an index of an index set which is too long

Action: CHAR and VARCHAR2 columns must be 30 bytes or less max length

DRG-12307: column *string* is NULL and cannot be indexed

Cause: You tried to index a row where at least one of the meta columns was NULL.

Action: provide a value for the meta column and reindex the row

DRG-12308: use `ctx_ddl.create_index_set` to create index sets

Cause: you tried to use `ctx_ddl.create_preference` to create an index set

Action: use `ctx_ddl.create_index_set`

DRG-12309: not to use compression on attributes lob column

Cause: you tried to use compression on attributes lob column for xml full text index

Action: not to use compression on attributes lob column for xml full text index

DRG-12310: index set name exceeds maximum size of *string*

Cause: Index set name is too many bytes

Action: Correct name and resubmit

DRG-12400: template *string* is empty

Cause: The template is empty.

Action: Check the template was installed successfully.

DRG-12401: invalid template: query within a loop

Cause: A CTX EXEC tag cannot occur within a CTX REPEAT tag.

Action: Remove the CTX EXEC tag.

DRG-12402: error processing template *string*, line *string*

Cause: An error occurred when processing a template.

Action: See other errors on the stack and take the appropriate action.

DRG-12403: template *string* was not found

Cause: The template does not exist.

Action: Check the name of the template and check that it is installed.

DRG-12404: more than one template *string* found

Cause: More than one template with the same name was found.

Action: Remove templates as appropriate.

DRG-12405: error occurred processing CTX REDIRECT or CTX LABEL tag

Cause: Error in syntax of a tag.

Action: Correct the syntax of the tag.

DRG-12406: invalid CTX EXEC tag attribute (*string*)

Cause: The specified attribute is incorrectly specified.

Action: Check the syntax of the specified attribute.

DRG-12407: invalid CTX REPEAT tag attribute (*string*)

Cause: The specified attribute is incorrectly specified.

Action: Check the syntax of the specified attribute.

DRG-12408: invalid variable reference: *string.string*

Cause: The variable referenced does not exist.

Action: Check the label and column name.

DRG-12409: syntax error for label in *string*

Cause: The SQL in a CTX EXEC tag has incorrect syntax for a label or label type.

Action: Check the SQL attribute of the CTX EXEC tag.

DRG-12410: could not process CTX EXEC tag

Cause: An error occurred when processing the SQL attribute of a CTX EXEC tag.

Action: See other errors on the stack and take the appropriate action.

DRG-12411: SQL processing error: *string*

Cause: Error executing SQL from SQL attribute of CTX EXEC tag.

Action: Check the SQL in the SQL attribute.

DRG-12412: missing or invalid Template Processor attribute (*string*)

Cause: The specified attribute was missing or invalid in a HTML input field.

Action: Check the Template Processor-specific attributes in the INPUT, SELECT, RADIO and CHECKBOX tags of the template.

DRG-12422: write to client failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12430: mandatory argument missing: *string*

Cause: This argument is mandatory.

Action: Re-submit the URL with this argument supplied.

DRG-12431: configuration section *string* not found

Cause: Specified conf argument is invalid.

Action: Re-submit the URL with this argument corrected.

DRG-12432: configuration file *string* not found or unreadable

Cause: An error occurred when processing the configuration file.

Action: Contact the administrator.

DRG-12433: load of *string* JDBC driver class failed

Cause: Driver class is invalid.

Action: Contact the administrator to modify configuration.

DRG-12434: connection failed using configuration *string* information

Cause: Configuration information is not correct.

Action: Contact the administrator to modify configuration.

DRG-12435: highlight table allocation failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12436: document table allocation failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12437: highlight table release failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12438: document table release failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12439: highlight table read failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12440: document table read failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12441: counting the number of highlights failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12500: stoplist *string* already exists

Cause: the specified stop list already exists

Action: must remove the duplicate stop list if you want to re-create it.

DRG-12501: null stoplist is not allowed

Cause: the specified stop list is null

Action: mustspecify a valid stop list

DRG-12502: cannot modify stoplists owned by other users

Cause: You can only create/drop Stop List or Stop Word objects of your own

Action: have the other user create/drop his/her own objects

DRG-12503: error while creating or dropping stoplist

Cause: detect an Oracle error while creating Stop List

Action: see the accompanying Oracle error and take appropriate action

DRG-12504: stoplist *string* does not exist

Cause: the specified stop list does not exist

Action: check that the Stop List is valid

DRG-12505: error while adding or removing a stop word

Cause: detect an Oracle error while adding or removing Stop Word

Action: see the accompanying Oracle error and take appropriate action

DRG-12506: stop word *string* does not exist in stoplist *string*

Cause: the specified Stop Word does not exist

Action: check that the Stop Word is valid

DRG-12507: stop word *string* already exists in this stoplist

Cause: the specified stop word already exists

Action: must remove the duplicate word if you want to re-create it.

DRG-12508: null stop words are not allowed

Cause: the specified stop word is null

Action: must remove the null stop word if you want to re-create it.

DRG-12509: length of the stop word *string* exceeded the limit of *string* bytes

Cause: A stop list entry has exceeded the maximum length

Action: Reduce the length of the stop list entry

DRG-12511: use `ctx_ddl.create_stoplist` to create stoplists

Cause: you tried to use `ctx_ddl.create_preference` to create a stoplist

Action: use `ctx_ddl.create_stoplist`

DRG-12512: invalid stop class *string*

Cause: you specified an invalid stop class

Action: specify a valid stop class

DRG-12513: valid stop classes are: *string*

Cause: You specified an invalid stop class

Action: Specify a valid stop class

DRG-12514: languages must be specified for stopwords in a MULTI_STOPLIST

Cause: You tried to add a stopword to a multi_stoplist without specifying the language of the stopword

Action: Specify the language of the stopword

DRG-12515: cannot specify language for stopwords in a BASIC_STOPLIST

Cause: You tried to add a language-specific stopword to a basic stoplist.

Action: Do not specify language for the stopword

DRG-12516: language column must be specified when using the multi stoplist

Cause: you tried to create an index using a multi stoplist but you did not specify a language column

Action: specify a language column

DRG-12517: cannot add stopthemes to a MULTI_STOPLIST

Cause: you tried to add a stoptheme to a MULTI_STOPLIST. This is not supported in this version.

Action: n/a

DRG-12518: cannot use this option with MULTI_STOPLIST

Cause: index already has multi_stoplist

Action: can only be used to migrate from basic to multi stoplist

DRG-12519: LANGUAGE COLUMN missing

Cause: index does not have a language column

Action: specify language column value

DRG-12520: LANGUAGE COLUMN mismatch

Cause: LANGUAGE COLUMN does not match language column of the Index

Action: index language column should match specified one

DRG-12521: cannot add STOP PATTERN to NUMBERS stopclass

Cause: NUMBERS is a predefined stopclass to specify numeric values

Action: use any other alphanumeric word

DRG-12600: user datastore procedure name contains a semicolon

Cause: the procedure name specified had a semicolon

Action: remove semicolon or rename procedure name. The correct format is
PACKAGENAME.PROCEDURE_NAME

DRG-12601: invalid user datastore procedure name: *string*

Cause: the format of the procedure name is invalid. It should be in the form
PACKAGENAME.PROCEDURENAME or PROCEDURENAME

Action: make sure PROCEDURE attr has the format
PACKAGENAME.PROCEDURENAME or PROCEDURENAME

DRG-12602: index owner does not have access to user datastore procedure: *string*

Cause: the index owner does not have execute privilege of the procedure

Action: CTXSYS to grant execute privilege of the procedure to index owner

DRG-12603: CTXSYS does not own user datastore procedure: *string*

Cause: CTXSYS does not have execute privilege to the user datastore procedure

Action: make sure the package is owned by CTXSYS and the procedure exist

DRG-12604: execution of user datastore procedure has failed

Cause: an error occur while executing the user datastore procedure

Action: check or debug the datastore procedure

DRG-12605: datatype of column *number* in COLUMNS list is not supported

Cause: one or more of the columns in the column list of the multi datastore are of a
type which the multi datastore is unable to process

Action: change the column list of the multi datastore to contain only supported types.
PL/SQL functions can be used in the comlumn list to convert unsupported types to
supported types.

DRG-12606: error encountered while parsing COLUMNS list

Cause: An oracle error was encountered while parsing the columns list of the multi
datastore.

Action: See next error on stack and take appropriate action

DRG-12607: only ctxsys can create MULTI_COLUMN preferences

Cause: In order to create a multi column datastore preference, the effective user must be ctxsys.

Action: contact your DBA to create the preference as ctxsys

DRG-12700: seed word must be a single word

Cause: seed word is not a single word

Action: use a single-word seed word

DRG-12800: Attribute NESTED_TYPE must have owner name as prefix

Cause: the attribute NESTED_TYPE does not have an owner name prefix

Action: reset the attribute NESTED_TYPE to include owner name prefix

DRG-12801: invalid type: *string*

Cause: invalid nested_type or

Action: check the owner and the type attribute names

DRG-12802: invalid type column: *string*

Cause: column specified does not exist in the type table

Action: check the type table

DRG-12803: invalid text datatype

Cause: LONG and LONG RAW are not supported in nested table

Action: change text column to a supported data type

DRG-12900: Operation:*string* for index: *string* has already been started

Cause: the specified operation has been started

Action: n/a

DRG-13000: error while adding or removing a sub lexer

Cause: see next error

Action: n/a

DRG-13001: sub lexer and multi lexer must have the same owner

Cause: you specified a sub lexer which is not owned by the owner of the enclosing multi-lingual lexer preference

Action: specify a sub lexer owned by the owner of the multi-lexer preference

DRG-13002: preference *string* is not a MULTI_LEXER

Cause: you tried to add a sub lexer to a lexer preference which cannot accept sub lexers. Only multi-lingual lexers can accept sub lexers.

Action: specify a multi lingual lexer

DRG-13003: preference *string* cannot be used as a sub lexer

Cause: you specified a preference for sub lexer which is not a lexer, or is a multi-lingual lexer or is an auto lexer

Action: specify a sub lexer which is not a multi-lingual lexer or an auto lexer

DRG-13004: language is invalid

Cause: you specified an invalid language for the sub lexer or stopword

Action: specify a valid language -- see NLS Support Guide for a list of valid languages

DRG-13005: alt_value cannot be an NLS language name

Cause: you specified an NLS language name as the alt value

Action: specify a non-NLS value

DRG-13006: sub lexer for this language is not defined

Cause: you tried to remove a sub lexer for a language, but no sub lexer was defined for that language

Action: None

DRG-13007: cannot define an alternate value for the DEFAULT sub lexer

Cause: you tried to define an alternate value for the DEFAULT sub lexer

Action: None

DRG-13008: cannot remove the DEFAULT sub lexer

Cause: you tried to remove the DEFAULT sub lexer

Action: None

DRG-13009: multi lexer preference does not have a DEFAULT sub lexer

Cause: you tried to use a multi lexer preference which does not have a DEFAULT sub lexer defined

Action: add a DEFAULT sub lexer to the multi lexer preference and retry

DRG-13010: alt_value is already used by another sub lexer

Cause: you tried to specify an alt value which is already in use by another sub lexer in the lexer preference

Action: specify a different alt value

DRG-13011: language column must be specified when using the multi lexer

Cause: you tried to create an index using a multi lexer preference, but you did not specify a language column

Action: specify a language column

DRG-13012: language column must be a char, varchar, or varchar2 type

Cause: you specified a language column which is not a char, varchar, or varchar2 type.

Action: specify a language column of correct type

DRG-13013: cannot have language independent DEFAULT sub lexer

Cause: you tried to define a language independent DEFAULT sub lexer

Action: DEFAULT sub lexer can only be language dependent

DRG-13014: base table has rows with language column value *string*

Cause: there are documents in the base table with language column value set to symbol for sublexer or stopword being removed

Action: base table should not have such rows

DRG-13015: sublexer *string* already exists in the index

Cause: cannot add a sub_lexer more than once

Action: if you want to update sub_lexer preferences, use update sub_lexer parameter or remove currently used sub_lexer

DRG-13100: index is not partitioned

Cause: you attempted to invoke a partition-level operation on an index which is not partitioned

Action: invoke appropriate index-level operation

DRG-13101: partition *string* does not exist in this index

Cause: you specified a partition name which does not exist

Action: specify correct partition name

DRG-13102: index partition name must be specified

Cause: you attempted to invoke a partition-level operation on a partitioned index but did not specify the partition name

Action: n/a

DRG-13103: index table *string* is partitioned

Cause: you attempted to perform an exchange partition including indexes, but one or more of the internal index tables are partitioned.

Action: specify EXCLUDING INDEXES on the exchange partition, then manually rebuild the indexes.

DRG-13104: indexes do not have equivalent settings for *string*

Cause: you attempted to perform an exchange partition including indexes, but the specified metadata setting is not equivalent across the two indexes, so the data cannot be exchanged

Action: specify EXCLUDING INDEXES on the exchange partition, then manually rebuild the indexes.

DRG-13200: failed to load dictionary file *string*

Cause: failed to load a dictionary file

Action: check whether the dictionary file exists in \$ORACLE_HOME/ctx/data/kolx or access permission is available

DRG-13201: KOREAN_LEXER is desupported

Cause: Using lexer type KOREAN_LEXER which is desupported.

Action: Use lexer type KOREAN_MORPH_LEXER instead.

DRG-13300: document size bigger than *string* bytes

Cause: size of the document being indexed is larger than the maximum supported size for the VARCHAR2 interface of stored procedure

Action: use the CLOB interface for the stored procedure

DRG-13301: syntax error in token data when expecting *string*, at line *string*

Cause: token data returned by the user-defined lexer procedure is incorrect

Action: modify user-defined lexer procedure to return expected data

DRG-13302: number of wildcard offsets must be in the range *string*..*string*, at line *string*

Cause: number of wildcard offsets specified as value for the wildcard attribute does not meet the supported range

Action: modify user-defined lexer query procedure to return valid number of wildcard offsets

DRG-13303: value of wildcard offset must be in the range *string..string*, at line *string*

Cause: value of pre-normalized wildcard offset or post-normalized wildcard offset specified as value for the wildcard attribute does not meet the supported range

Action: modify user-defined lexer query procedure to return valid value for wildcard offset

DRG-13304: character referenced by wildcard attribute is not a wildcard character, at line *string*

Cause: The wildcard attribute value specified the offset of a wildcard character. The character at the specified offset is neither the '%' character nor the '_' character.

Action: Modify user-defined lexer query procedure.

DRG-13305: 'off' attribute value must be in the range *string..string*, at line *string*

Cause: value of 'off' attribute does not meet the supported range

Action: modify user-defined lexer index procedure to return valid value for 'off' attribute

DRG-13306: 'len' attribute value must be in the range *string..string*, at line *string*

Cause: value of 'len' attribute does not meet the supported range

Action: modify user-defined lexer index procedure to return valid value for 'len' attribute

DRG-13307: 'off'=string and 'len'=string references character past end-of-file of *string* character document, at line *string*

Cause: value of 'off' attribute plus value of 'len' attribute is greater than the number of characters in the document

Action: modify user-defined lexer index procedure to return valid values for 'off' and 'len' attributes

DRG-13308: query operator ABOUT not supported by USER_LEXER

Cause: the query contains an ABOUT operator while using USER_LEXER lexer type

Action: remove ABOUT operator from query or use lexer type other than USER_LEXER

DRG-13309: operation not supported by USER_LEXER

Cause: USER_LEXER does not support this operation

Action: stop the operation or use alternate lexer type

DRG-13310: index owner does not have EXECUTE privilege on USER_LEXER stored procedure *string*

Cause: user CTXSYS did not grant EXECUTE privilege on USER_LEXER stored procedure to the index owner

Action: user CTXSYS grant EXECUTE privilege on USER_LEXER stored procedure to index owner

DRG-13311: USER_LEXER stored procedure name contains a semicolon

Cause: the procedure name contains a semicolon character

Action: remove semicolon from procedure name or rename stored procedure

DRG-13312: user CTXSYS does not own USER_LEXER stored procedure *string*
Cause: CTXSYS does not have EXECUTE privilege on the USER_LEXER stored procedure

Action: make sure the stored procedure exists and is owned by CTXSYS

DRG-13400: Oracle Data Mining was not installed

Cause: The function you used depends on Oracle Data Mining, which has not been installed yet.

Action: make sure the Oracle Data Mining is installed

DRG-13401: the preference *string* type is not supported in this API

Cause: the type you have specified is not supported

Action: use a different type

DRG-13500: Parameter_string must start with *string*

Cause: Wrong syntax for parameter_string.

Action: Make sure the parameter_string has the correct syntax

DRG-13501: Shadow Index Already Exists

Cause: A shadow index was previously created already

Action: Drop the shadow index and try again

DRG-13502: NOPOPULATE is not allowed in recreate_index_online

Cause: Specify NOPOPULATE in parameter_string in recreate_index_online

Action: Don't specify NOPOPULATE.

DRG-13503: POPULATE is not allowed for a local index in create_shadow_index

Cause: Specify POPULATE for a local index during create_shadow_index

Action: Don't specify POPULATE.

DRG-13504: *string* has no shadow index

Cause: Tried to perform exchange shadow without creating shadow index first

Action: create a shadow index before doing exchanges_shadow_index

DRG-13505: Keyword *string* is not allowed here in parameter_string

Cause: Wrong syntax for parameter_string

Action: Make sure the parameter_string has the correct syntax

DRG-13506: *string* has no shadow part

Cause: Tried to perform exchange shadow part without creating shadow part first

Action: create a shadow part before doing exchanges_shadow_index on the partition.

DRG-13507: SWAP and NOPOPULATE is incompatible

Cause: Specified SWAP and NOPOUPLATE in parameter string

Action: Correct the parameter string setting

DRG-13508: Not all partitions for index *string* are swapped

Cause: try to swap an local partitioned index when not all partitions are swapped

Action: Swap all partitions first, then swap the (local) index.

DRG-13509: error while swapping shadow index

Cause: an error occurred during the shadow index swap

Action: check error message stack for the actual error

DRG-13510: shadow index does not exist

Cause: Tried to perform exchange shadow without creating shadow index first

Action: create a shadow index before doing exchanges_shadow_index

DRG-13600: Syntax error in the result set descriptor at *string*

Cause: The result set descriptor has a syntax error

Action: check the syntax of the result set descriptor

DRG-13601: Syntax error in the order attribute

Cause: The order attribute has a syntax error

Action: check the syntax of the order attribute

DRG-13602: Number parsing error in *string*

Cause: The number string is malformed

Action: check the syntax of the number string

DRG-13603: Too many sort keys

Cause: Too many sort keys are specified

Action: reduce the number of sort keys

DRG-13604: Too many items to select

Cause: Too many select items are specified

Action: reduce the number of select items

DRG-13605: Too many group tags

Cause: Too many group tags are specified

Action: reduce the number of group tags

DRG-13606: start_hit_num is not specified or out of valid range *number..number*

Cause: start_hit_num is not specified or out of valid range

Action: set a correct start_hit_num value

DRG-13607: end_hit_num is not specified or out of valid range *number..number*

Cause: end_hit_num is not specified or out of valid range

Action: set a correct end_hit_num value

DRG-13608: Temporary lob not created for *ctx_query.result_set_document*

Cause: Temporary lob is not allocated for *ctx_query.result_set_document*

Action: Create a temporary lob for *ctx_query.result_set_document*

DRG-13609: Result set Interface should only have group mvdata element in absence of a query

Cause: No query is specified and result set descriptor has invalid elements

Action: either specify query or change result set descriptor

DRG-13610: Missing group_values in the result set interface

Cause: MVDATA group values not specified in RSI

Action: add group_values element for group counting

DRG-13611: Missing value id for MVDATA group counting in the result set interface

Cause: MVDATA group values not specified in RSI

Action: add value id element for group counting

DRG-13612: Missing path element in the result set interface

Cause: Path element not specified for the ctx_tree element

Action: add path element for the ctx_tree element

DRG-13613: Missing index name

Cause: index name not specified in the API

Action: specify an index name

DRG-13614: result_set_inteface not supported with security policy

Cause: result set interface not supported with security policies

Action: cannot use result set interface on table with security policy

DRG-13615: Only one snippet element allowed in result set interface

Cause: More than one snippet element specified with result set interface

Action: Specify only one snippet element with result set interface

DRG-13616: Invalid MVDATA group counting topn in result set interface

Cause: Cannot use group values and topn for the same group counting

Action: Use group_values or topn

DRG-13617: Invalid MVDATA value for topn in result set interface

Cause: Cannot use topn less than or equal to zero

Action: Use topn greater than zero

DRG-13618: Error in group counting in result set interface

Cause: Cannot do group count for facets with no data

Action: Check facet name or index needed facet values

DRG-13619: Invalid value for MVDATA sortby in result set interface

Cause: Invalid value provided for sortby criteria in result set interface

Action: Select either count or alpha

DRG-13620: Invalid value for MVDATA order in result set interface

Cause: Invalid value provided for order criteria in result set interface

Action: Select either asc or desc

DRG-13621: Duplicate group count element in result set interface

Cause: Group Count element specified more than once for group

Action: Specify one count element for a group

DRG-13622: Unsupported SDATA 'bucketby' value specified in the result set interface

Cause: An unsupported attribute value was specified for the 'bucketby' attribute.

Action: Specify a valid attribute value (range or single).

DRG-13623: Missing 'bucketby' attribute for SDATA group in result set interface

Cause: The 'bucketby' attribute must be specified for SDATA group.

Action: Specify a valid attribute value for 'bucketby' (range or single).

DRG-13624: invalid attribute value for 'collocates' in the result set interface

Cause: An unsupported attribute value was specified for a 'collocates' attribute.

Action: Valid attribute values are larger than zero.

DRG-13625: more than one sentiment element in query

Cause: There was more than one sentiment element in the query.

Action: Ensure there is only one sentiment element.

DRG-13626: too many Item elements in sentiment query

Cause: There were too many item elements in the sentiment query.

Action: Ensure there are less than 10 items in the sentiment element.

DRG-13627: Invalid item attribute value for *string* in result set interface

Cause: There was an unsupported attribute value specified for the item attribute.

Action: Provide a non-zero valid value for the attribute.

DRG-13628: Invalid value for 'sortby' SDATA group count in the result set interface

Cause: An unsupported attribute value was specified for the 'sortby' attribute.

Action: Valid attribute values are 'count' (default) and 'value'.

DRG-13629: Invalid value for 'order' SDATA group count in the result set interface

Cause: An unsupported attribute value was specified for the 'order' attribute.

Action: Valid attribute values are 'des' (default) and 'asc'.

DRG-13630: The 'bucketby' attribute is only supported for 'searchable' SDATA

Cause: The 'bucketby' attribute applies to 'searchable' SDATA sections only.

Action: Enable 'searchable' for this SDATA section.

DRG-13631: Empty queries are not supported with 'bucketby' single

Cause: Empty queries are supported with 'bucketby' range.

Action: Use 'bucketby' range or use a different query.

DRG-13632: Auto lexer is not supported with 'collocates' in the result set interface

Cause: An unsupported lexer was specified for 'collocates'.

Action: Use the basic lexer for 'collocates'.

DRG-13633: Error processing 'collocates' in the result set interface

Cause: Internal error processing the 'collocates' element.

Action: check syntax and re-try

DRG-13700: Syntax error in the Extraction Rule Descriptor

Cause: The Extraction Rule descriptor has a syntax error

Action: check the syntax of the Extraction rule descriptor

DRG-13701: Invalid rule_id

Cause: rule_id is NULL or rule_id <= 0

Action: rule_id must be number > 0

DRG-13702: Rule not found

Cause: No rule for given rule_id

Action: Specify a valid rule_id

DRG-13703: Invalid Type Specified: *string*

Cause: An invalid entity type was specified

Action: Specify a valid entity type

DRG-13704: Invalid Entity Type List

Cause: An invalid entity type list was specified

Action: Check format and types on entity type list

DRG-13705: Must use an Extract Policy

Cause: Using a non-extraction policy

Action: Use a policy created with ctx_entity.create_extract_policy

DRG-13706: Cannot use Entity Extraction Policy here

Cause: Using an entity extraction policy

Action: Use a policy created with ctx_ddl.create_policy

DRG-13707: Rule Engine Loading Failed

Cause: A user rule has an error

Action: Fix the user rule with the error

DRG-13708: Dictionary Loading Failed

Cause: The user dictionary has an error

Action: Fix the user dictionary

DRG-13709: Unsupported Language Specified: *string*

Cause: Unsupported Language Specified

Action: Specify a supported language

DRG-13710: Syntax Error in Dictionary

Cause: Syntax error in dictionary

Action: Correct syntax error in dictionary

DRG-13711: Stop Entity Not Found

Cause: Tried to remove a non-existent stop entity

Action: Cannot remove non-existent stop entity

DRG-13712: User Dictionary already loaded

Cause: Tried to load a 2nd user dictionary to a policy

Action: Drop the dictionary, and then load

DRG-13713: No User Dictionary loaded

Cause: No user dictionary loaded for this policy

Action: Cannot drop non-existent dictionary

DRG-13714: Duplicate Stop Entity

Cause: Trying to load a duplicate uncompiled stop entity

Action: Stop entity is already present

DRG-13715: Null name and type for Stop entity

Cause: Trying to load a stop entity with null name and type

Action: Stop entity must have at least one parameter non-null

DRG-13716: Entity Extraction not enabled

Cause: Haven't loaded correct event

Action: Must load correct event and level

DRG-13717: Null entry or alternate form in user dict

Cause: A entry or alternate form has null value

Action: Entries or alternate forms must be non-null

DRG-13718: No entity type given in user dict

Cause: An entry was not given an entity type

Action: All entries must have an entity type

DRG-13719: File and Drop are mutually exclusive

Cause: Tried to run ctxload with file and drop

Action: file and drop are mutually exclusive

DRG-13720: Stop entity already marked for deletion

Cause: Tried to re-drop a stop entity

Action: Only drop this stop entity once

DRG-13721: Duplicate Type on Typelist

Cause: Duplicate type on typelist

Action: Typelist must be unique

DRG-13722: Invalid Backreference

Cause: Backreference not between 1 and 10

Action: Backreferences must be between 1 and 10

DRG-13723: Invalid Attribute: *string*

Cause: Unsupported Attribute

Action: Follow correct syntax for rule or dictionary

DRG-13724: Invalid Attribute Value: *string*

Cause: Unsupported attribute value

Action: Follow correct syntax for rule or dictionary

DRG-13725: Type Name Too Long

Cause: Type name more than 30 bytes

Action: Type must be less than 30 bytes

DRG-13726: Invalid Tag: *string*

Cause: Unsupported Tag

Action: Follow correct syntax for rule or dictionary

DRG-13727: Missing Tag: *string*

Cause: Missing Necessary Tag

Action: Add tag for rule or dictionary

DRG-13728: Missing Attribute: *string*

Cause: Missing Necessary Attribute

Action: Add attribute for rule or dictionary

DRG-13800: MVDATA section *string* does not exist

Cause: The given MVDATA section name does not exist in USER_SECTIONS

Action: Rewrite query with valid MVDATA section name

DRG-13801: literal is not compatible with the data type of the MVDATA section

Cause: The given literal is not compatible with the data type of the specified MVDATA section.

Action: Rewrite query with a compatible literal

DRG-13802: MVDATA operand not compatible with the mvdata section *string*

Cause: failed to convert data

Action: check the format of the data

DRG-13803: Illegal MVDATA value

Cause: failed to convert data

Action: check the format of the data

DRG-13804: ctx_tree.register_index() not run for index *string* and mvdata section *string*

Cause: failed to create data

Action: create the data (trees) first

DRG-13805: Invalid character in node name *string*

Cause: failed to create data

Action: check the format of the data

DRG-13806: Duplicate path '*string*' in CTX_TREE.ADD_NODE()

Cause: The path specified in ctx_tree.add_node() adds the node with the same name in the same tree at the same level

Action: change path

DRG-13807: Node *string* does not exist or is deleted

Cause: failed to lookup input node

Action: check if the path exists

DRG-13808: Empty path passed into *string*

Cause: path is empty

Action: pass in a non-empty and valid path

DRG-13809: Index with MVDATA sections must have big_io turned on

Cause: Big_io option not specified for MVDATA index

Action: turn on big_io for the index

DRG-13810: Index with support_ctx_tree must have atleast one MVDATA section

Cause: MVDATA section not specified for ctx_tree usage

Action: add one MVDATA section for the index

DRG-13811: Invalid path '*string*' in CTX_TREE.ADD_NODE()

Cause: The path specified in ctx_tree.add_node() is invalid.

Action: change path

DRG-13812: Partitioned Index with MVDATA must have index-level big_io

Cause: Index-level big_io was not specified

Action: turn on big_io at index level

DRG-13813: Duplicate values in Filter Section

Cause: Filter Section contains non-unique values

Action: Ensure that Filter Section has unique values for each doc

DRG-13814: More than one Filter Section in Section Group

Cause: Only one Filter Section allowed in a Section Group

Action: Delete existing Filter Section from Section Group

DRG-13815: Index with Filter sections must have big_io turned on

Cause: Big_io option not specified for Filter Section index

Action: turn on big_io for the index

DRG-13900: Auto_Optimize Process is already started

Cause: Auto_Optimize Process is already started

Action: Can't start auto_optimize when it's already running

DRG-13901: Index must have stage_itab

Cause: Auto_Optimize works on indexes with stage_itab

Action: Use an index with stage_itab for auto_optimize

DRG-13902: Index/Partition already added to auto_optimize list

Cause: Index/Partition already added to auto_optimize list

Action: Can't add index/partition to list twice

DRG-13903: Index/Partition not on the auto_optimize list

Cause: Index/Partition not on the auto_optimize list

Action: Can't remove index/partition from list

DRG-13904: Index/Partition has max_rows set to non-zero value

Cause: Index/Partition is using max_rows to merge

Action: Can't set both Auto_optimize and max_rows

DRG-13905: Index/Partition has auto optimization on

Cause: Index/Partition is using auto optimization

Action: Can't set both Auto_optimize and max_rows

DRG-50000: requested size larger than pagesize

Cause: The requested memoery size is larger than page size,

Action: Contact support

DRG-50100: CORE LSF error: *string*

Cause: detect a CORE LSF error

Action: look up the core error and take appropriate action

DRG-50101: CORE LEM error: *string*

Cause: detect a CORE LEM error while reading the error stack

Action: Contact support

DRG-50102: error getting database compatibility

Cause: could not obtain database compatibility setting

Action: Contact support

DRG-50200: Third-party filter internal error

Cause: Third-party filter could not filter this document because of an internal error.

Action: Contact Oracle Support.

DRG-50300: error sending message from server to client

Cause: internal database error or internal Text error

Action: Call customer support

DRG-50301: server error reading request queue

Cause: database error or internal Text error

Action: Call customer support

DRG-50302: server error reading OOB break queue; cannot detect interrupts

Cause: database error or internal Text error

Action: Call customer support

DRG-50303: error in bufout

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50304: error in execute()

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50305: getcmd() called when one of the queue names is NULL

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50400: maximum number of fuzzy match candidates exceeded: *string*

Cause: Internal error, probably result of large number of indexed words

Action: Contact Oracle support

DRG-50401: failed to retrieve fuzzy match candidates from db: *string*

Cause: Internal error

Action: Contact Oracle support

DRG-50402: Index validation failed for one or more tokens

Cause: Index validation generated an error for one or more tokens

Action: Check the ctx log for the detailed errors

DRG-50403: Invalid MVDATA entries exist in the index

Cause: Index validation generated an error for one or more tokens

Action: Check the ctx log for the detailed errors

DRG-50500: only RULE_CLASSIFIER is accepted in this API

Cause: you specified an illegal classifier

Action: use RULE_CLASSIFIER

DRG-50501: classifier preference not specified

Cause: the classifier preference is not specified

Action: specify a classifier preference

DRG-50502: cannot use RULE_CLASSIFIER in this API

Cause: you specified RULE_CLASSIFIER

Action: use a different classifier

DRG-50503: unsupported classification method

Cause: you specified an unsupported classification method

Action: use a different classifier

DRG-50504: invalid column datatype for *string* table

Cause: the column datatype is invalid

Action: specify a different datatype

DRG-50505: invalid sentiment label

Cause: A sentiment label other than 0, 1 or 2 was present in the training table.

Action: Use 0, 1 or 2 as a training label.

DRG-50600: assertion failed

Cause: An internal check-condition has been violated

Action: Contact Oracle support for assistance

DRG-50601: fatal error

Cause: A fatal error has occurred

Action: Contact Oracle support for assistance

DRG-50603: unrecognized operation code *string*

Cause: Bad operation code was encountered (reached switch default:)

Action: check .h files versions

DRG-50607: failed to obtain column info for cid *string*

Cause: internal error, probably a bug

Action: call customer support

DRG-50608: unexpected end of data

Cause: internal error, probably a bug

Action: call customer support

DRG-50609: pipe internal error

Cause: internal error, probably a bug

Action: call customer support

DRG-50610: internal error: *string*

Cause: internal error, probably a bug

Action: call customer support

DRG-50611: Third party lexer internal error: *string*

Cause: internal error from inxight lexer

Action: call customer support

DRG-50612: internal error: you need to call bind first for this insertion mode

Cause: internal error

Action: call customer support

DRG-50613: internal error: model type is not supported in drctrwpf

Cause: internal error

Action: call customer support

DRG-50614: library loading error in *string*

Cause: internal error

Action: call customer support

DRG-50615: Third party lexer timed out

Cause: Third-party auto lexer could not complete tokenization because the lexer timed out.

Action: Increase the value of the TIMEOUT attribute of the auto_lexer and reindex the document. If TIMEOUT is set to 0 and the lexer still hangs context Oracle Support.

DRG-50616: Stop-Optimize List not found

Cause: internal error

Action: call customer support

DRG-50617: Query string too long: *string*

Cause: internal error

Action: Invalid query string provided

DRG-50618: Failed to create XML context

Cause: internal error

Action: Failed to create XML context for XTI conversion from XML text

DRG-50700: unknown command (args=queue, command)

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-50701: error in listener.get_cmd()

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-50702: error in drtlsleep()

Cause: this is an internal error in a testing function

Action: Contact Oracle Support

DRG-50703: listener startup error

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-50704: Net8 listener is not running or cannot start external procedures

Cause: Oracle Text needs to call external code to complete your request, and could not start the extproc agent process.

Action: Start listener if it is configured for external procedures and is not running. If your listener is running, configure it for starting external procedures and restart it. Consult Oracle documentation for details.

DRG-50800: failed to open cursor

Cause: Too many cursors open for internal queries

Action: implement cursor cleanup routine

DRG-50801: failed to parse cursor

Cause: parse error on an internal query

Action: check versions of code

DRG-50802: failed to bind input

Cause: bind error on an internal query

Action: check versions of code

DRG-50803: failed to define output

Cause: define error on an internal query

Action: check versions of code

DRG-50804: failed to exec cursor

Cause: exec error on an internal query

Action: debug code

DRG-50805: failed to close cursor

Cause: cursor close error on an internal query

Action: check versions of code

DRG-50806: failed to rollback

Cause: transaction rollback error

Action: contact support

DRG-50807: failed to commit

Cause: internal error

Action: contact support

DRG-50850: *string*

Cause: This is an oracle error

Action: See RDBMS documentation

DRG-50851: SQL execute failed

Cause: failed to execute a sql statement

Action: please report this as a bug

DRG-50852: failed to turn SQL trace on

Cause: internal error,

Action: Please contact Oracle support

DRG-50853: fetch error

Cause: fetch error on an internal query

Action: check versions of code

DRG-50855: logoff fail

Cause: Fail to logoff from the database

Action: check versions of code

DRG-50857: oracle error in *string*

Cause: this is an informational message

Action: See error

DRG-50858: OCI error: *string*

Cause: a generic OCI error occurred

Action: Please contact Oracle support

DRG-50859: failed to allocate statement handle

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50860: failed to prepare statement

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50861: failed to obtain type descriptor

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50862: failed to create new Oracle object

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50863: string assignment failed

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50864: number assignment failed

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50865: failed to append to collection

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50866: failed to resize string

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50867: failed to free Oracle object

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50868: failed to free statement handle

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50900: text query parser error on line *string*, column *string*

Cause: bad query

Action: fix query

DRG-50901: text query parser syntax error on line *string*, column *string*

Cause: bad query

Action: fix query

DRG-50902: unexpected character *string*

Cause: bad query

Action: fix query

DRG-50903: invalid weight *string*

Cause: invalid weight

Action: fix query

DRG-50904: weight *string* outside valid range 0.1 to 10.0

Cause: invalid weight

Action: fix query

DRG-50905: invalid score threshold *string*

Cause: invalid score threshold

Action: fix query

DRG-50906: score threshold *string* is not an integer

Cause: invalid score threshold

Action: fix query

DRG-50907: score threshold *string* outside valid range 1 to 100

Cause: invalid score threshold

Action: fix query

DRG-50908: invalid maximum number of documents *string*

Cause: invalid maximum number of documents

Action: fix query

DRG-50909: maximum number of documents *string* is not an integer

Cause: invalid maximum number of documents

Action: fix query

DRG-50910: max documents requested *string* outside valid range 1 to 65535

Cause: invalid maximum number of documents

Action: fix query

DRG-50911: invalid first document number *string*

Cause: invalid first document number

Action: fix query

DRG-50912: first document number *string* is not an integer

Cause: invalid first document number

Action: fix query

DRG-50913: first document requested *string* is not a positive number

Cause: invalid first document number

Action: fix query

DRG-50914: invalid last document number *string*

Cause: invalid last document number

Action: fix query

DRG-50915: last document number *string* is not an integer

Cause: invalid last document number

Action: fix query

DRG-50916: last document *string* is less than first document

Cause: invalid last document number

Action: fix query

DRG-50917: escape on at end of text query string

Cause: unbalanced escape characters

Action: turn escape off

DRG-50918: mismatched close escape character

Cause: no matching open escape character for close escape

Action: match open and close escapes

DRG-50919: NEAR operand not a phrase, equivalence or another NEAR expression

Cause: invalid operand type for NEAR operator

Action: correct operand type

DRG-50920: part of phrase not itself a phrase or equivalence

Cause: invalid type of expression which is part of phrase

Action: fix query

DRG-50921: EQUIV operand not a word or another EQUIV expression

Cause: invalid operand type for EQUIV operator

Action: correct operand type

DRG-50922: PL/SQL execution failed for *string*

Cause: PL/SQL function may not exist or is returning bad value

Action: PL/SQL may not exist or is returning bad value

DRG-50923: could not rewrite PL/SQL for execution

Cause: parser internal

Action: call support

DRG-50924: PL/SQL inside PL/SQL not supported

Cause: PL/SQL function call returned another PL/SQL call

Action: remove recursive PL/SQL

DRG-50925: could not parse return value of PL/SQL

Cause: string returned by PL/SQL function could not be parsed

Action: fix PL/SQL function being called

DRG-50926: invalid text query string

Cause: query string empty or made up of invalid characters

Action: fix query

DRG-50927: parser failed on line *string* on column *string*

Cause: bug

Action: call support

DRG-50928: reserved failure on line *string* on column *string*

Cause: bug

Action: call support

DRG-50929: parser internal on line *string* on column *string*

Cause: bug

Action: call support

DRG-50930: parser memory failure on line *string* on column *string*

Cause: memory allocation or freeing error

Action: call support

DRG-50931: parser not opened

Cause: bug

Action: call support

DRG-50932: parser preference initialization failed

Cause: bug

Action: call support

DRG-50933: parser hash insert failure

Cause: bug

Action: call support

DRG-50934: parser hash create failure

Cause: bug

Action: call support

DRG-50935: parser component failure

Cause: bug

Action: look for other errors

DRG-50936: query word *string* is too complex for index

Cause: bug

Action: look for other errors

DRG-50937: query too complex

Cause: query is too complex for our query evaluator

Action: make query smaller

DRG-50938: parser already bound

Cause: internal coding mistake

Action: call support

DRG-50939: parser not set

Cause: bug

Action: call support

DRG-50940: parser not parsed

Cause: bug

Action: call support

DRG-50941: PL/SQL function *string* cannot be executed

Cause: PL/SQL function may not exist or cannot be executed by user

Action: rewrite PL/SQL function specified in query

DRG-50942: errors: *stringstring*

Cause: PL/SQL function encountered error -- this is the error message

Action: See error message

DRG-50943: query token too long on line *string* on column *string*

Cause: A query token is longer than 256 bytes

Action: Rewrite query

DRG-50944: NEAR operator not supported for theme index

Cause: NEAR operator used in theme index query

Action: Rewrite query without NEAR operator

DRG-50945: Illegal phrase in query for theme index

Cause: Phrase incorrectly defined in theme index query

Action: Rewrite query

DRG-50946: Invalid unary operator for theme index

Cause: Stemming, fuzzy match and soundex not allowed for theme index

Action: Rewrite query

DRG-50947: ABOUT clause not allowed without a theme index

Cause: The query contains an ABOUT clause, but there is no theme index to support it

Action: Rewrite query

DRG-50948: ABOUT clause required in the absence of a text index

Cause: There is no text index, but the query does not contain any about clause. With only a theme index present, each query term must belong to an ABOUT clause

Action: Rewrite query

DRG-50949: too many SQEs

Cause: Too many SQEs to expand

Action: Rewrite query or SQE

DRG-50950: circular SQE found

Cause: Circular SQE reference is found.

Action: Rewrite query or SQE

DRG-50951: Unable to resolve element name for attribute *string*

Cause: XPATH expression such as A/*/@B or A//@B is not supported.

Action: Rewrite query

DRG-50952: Section is not PATH section group

Cause: XPATH expression has section which is not created using PATH section group.

Action: Rewrite query not to use XPATH expression or create the index with PATH section group

DRG-50953: Unable to determine section name

Cause: XPATH expression should not end with . or *

Action: Rewrite the path expression not to use . or * at the end

DRG-50954: Theme index is required for CTXCAT about queries

Cause: There is no theme index, but the catsearch query contains about clause. You must create a theme index before using ABOUT query against CTXCAT index

Action: create theme index

DRG-50955: Missing comma in transform clause *string*

Cause: A transform clause in a query template is missing a comma

Action: Add the comma in the appropriate position

DRG-50956: Theme index is required for THEMES transform queries

Cause: There is no theme index, but the operator TRANSFORM is used with THEMES as its parameter. You must create a theme index before using THEMES in TRANSFORM operator.

Action: create theme index

DRG-50957: Missing *textquery* element in query template *string*

Cause: The *textquery* tag is missing or misspelled in a query template

Action: Correct the missing tag

DRG-50958: Missing quote in transform clause *string*

Cause: A transform clause in a query template is missing a quote

Action: Add the quote in the appropriate position

DRG-50959: Query length exceeds *string* bytes

Cause: the query length exceeds the maximum allowed length

Action: reduce the length of the query

DRG-50960: Mild not operand not a term or phrase

Cause: invalid operand type for MNOT operator

Action: correct operand type

DRG-50961: Missing *string* for *string* clause

Cause: the specified tag is missing from the specified complex query clause

Action: Add missing clause

DRG-50962: Query operators are not allowed in transform input *string*

Cause: You specified an operator (such as wildcard) in the input string for the transform operator

Action: Remove or escape the query operator

DRG-51002: unexpected component failure

Cause: Internal error

Action: Contact Oracle support

DRG-51017: unable to open storage buffer for fuzzy match candidates

Cause: Internal error, probably insufficient memory

Action: Contact Oracle support

DRG-51019: unable to open or illegal format for fuzzy match data file: *string*

Cause: Unable to open OS file containing fuzzy matching information or the file was not of the correct format

Action: Consult the documentation for correct location of the fuzzy match information files and check for file damage

DRG-51020: out of memory in fuzzy matcher

Cause: Cannot allocate more memory

Action: Contact your system administrator

DRG-51021: undefined error in fuzzy matcher

Cause: Internal error

Action: Contact Oracle support

DRG-51022: undefined error in stemmer

Cause: Internal error

Action: Contact Oracle support

DRG-51023: stemmer file cannot be opened

Cause: Unable to open OS file containing stemmer lexicon, or the file contents were not correct

Action: Consult documentation for correct location of the stemmer lexicons and check for file damage

DRG-51024: out of memory in stemmer

Cause: Cannot allocate more memory

Action: Contact your system administrator

DRG-51025: an invalid character was passed to the stemmer

Cause: Invalid character in word input to the stemmer

Action: Remove invalid character from word to be stemmed

DRG-51028: unexpected error in fuzzy match expansion: %(1)

Cause: Internal error

Action: Contact Oracle support

DRG-51029: unexpected error in stemmer expansion: %(1)

Cause: Internal error

Action: Contact Oracle support

DRG-51030: wildcard query expansion resulted in too many terms

Cause: User error

Action: Make wildcard query narrower

DRG-51100: invalid program argument index

Cause: This is an internal error

Action: Contact Oracle Support to report a bug

DRG-51101: argument processing callback failed

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-51200: open keymap failed for index id = *string*

Cause: Failed to initialize the keymap for the column id specified.

Action: Check index ID. Contact support if caused by internal errors

DRG-51201: failed to perform DDL operation: database object *string*

Cause: Textkey mapping service failed on DDL operation

Action: Check Oracle error and take corrective action

DRG-51202: invalid key mapping operation mode : *string*

Cause: invalid keymap mode value found. This is an internal error

Action: Contact Oracle support

DRG-51203: found doc ids without mappings during get maps

Cause: found doc ids without mappings during get mapping by doc ids, the index data and keymap service are out of synch.

Action: Contact Oracle support

DRG-51300: error getting dml Queue lock

Cause: a server must have hung while processing the dml Queue, leaving it locked

Action: Contact Oracle support

DRG-51301: error releasing dml Queue lock

Cause: internal database error, or perhaps someone dropped the lock while we were using it

Action: Contact Oracle support

DRG-51311: DML lock handle previously allocated

Cause: internal error

Action: Contact Oracle support

DRG-51312: DML lock internal error *string*

Cause: internal error

Action: Contact Oracle support

DRG-51313: timeout while waiting for lock

Cause: most likely an internal error

Action: Contact Oracle support

DRG-51314: index is not empty

Cause: you attempted to invoke populate_pending against an index which already has or has had indexed documents.

Action: populate pending manually, or recreate the index NOPOPULATE

DRG-51315: AGGMERGE lock internal error %(1)

Cause: internal error

Action: Contact Oracle support

DRG-51403: New index name not provided by kernel

Cause: this is an internal error

Action: Contact Oracle support

DRG-51801: failed to seek in file: %(1)

Cause: this is an internal error

Action: Contact Oracle support

DRG-51802: failed to read from file: %(1)

Cause: this is an internal error

Action: Contact Oracle support

DRG-51803: failed to open file: %(1)

Cause: this is an internal error

Action: Contact Oracle support

DRG-51804: failed to write to file: %(1)

Cause: this is an internal error

Action: Contact Oracle support

DRG-52100: *string* returned internal error code *string*

Cause: this is an internal error

Action: Contact Oracle support

DRG-52101: an invalid session handle was passed to Oracle Text

Cause: this is an internal error

Action: Contact Oracle support

DRG-52102: an invalid transaction handle was passed to Oracle Text

Cause: this is an internal error

Action: Contact Oracle support

DRG-52103: the Oracle Text environment could not reset

Cause: this is an internal error

Action: Contact Oracle support

DRG-52104: the Oracle Text environment could not initialize

Cause: this is an internal error

Action: Contact Oracle support

DRG-52105: no delete function found

Cause: this is an internal error

Action: Contact Oracle support

DRG-52106: Oracle Text service results could not be committed

Cause: this is an internal error

Action: Contact Oracle support

DRG-52107: ctxkbtc internal error

Cause: this is an internal error

Action: Contact Oracle support

DRG-52108: failed to delete knowledge base user extension

Cause: this is an internal error

Action: check file permissions or contact Oracle support

DRG-52109: error in reading thesaurus

Cause: this is an internal error

Action: Contact Oracle support

DRG-52110: error in writing extended knowledge base

Cause: this is an internal error

Action: Contact Oracle support

DRG-52111: error in knowledge base cache

Cause: this is an internal error

Action: Contact Oracle support

DRG-52112: improper Chinese string *string* of length *number*

Cause: this is an internal error

Action: n/a

DRG-52113: improper Japanese string *string* of length *number*

Cause: this is an internal error

Action: n/a

DRG-52200: invalid state during export

Cause: this is an internal error

Action: Contact Oracle support

DRG-52201: incompatible Oracle Text versions

Cause: attempting to import an incompatible version of Oracle Text data

Action: make sure source and target Oracle Text versions are compatible

DRG-52202: invalid class name: *string*

Cause: the specified class name is not valid

Action: Contact Oracle Support

DRG-52203: invalid object name: *string*

Cause: the specified object name is not valid

Action: Contact Oracle Support

DRG-52204: error while registering index

Cause: this is an internal error

Action: Contact Oracle support

DRG-52205: class *string* and object *string* already exists for this index

Cause: duplicate entry of class and object

Action: Contact Oracle support

DRG-52206: error while registering index object

Cause: this is an internal error

Action: Contact Oracle support

DRG-52207: the specified attribute does not exist: *string*

Cause: This is an internal error

Action: Contact Oracle Support

DRG-52208: the specified attribute already exist: *string*

Cause: This is an internal error

Action: Contact Oracle Support

DRG-52210: error while registering value for attribute: *string*

Cause: This is an internal error

Action: Contact Oracle Support

DRG-52211: error while registering partition

Cause: this is an internal error

Action: Contact Oracle support

DRG-52212: error while registering cdi columns

Cause: this is an internal error

Action: Contact Oracle support

DRG-52300: Index *string.string* does not exist

Cause: The given index does not exist for the current user

Action: Give a valid index name

DRG-52301: Query Stats is already enabled for this index

Cause: attempting to enable the query stats for an index for which it is already enabled

Action: None. No need to enable again

DRG-52302: Query Stats is not enabled for this index

Cause: attempting to disable the query stats for an index for which it is not enabled

Action: None. No need to disable if it is not already enabled

DRG-52303: Option String is full

Cause: Index option string is full

Action: None

DRG-52304: This operation requires Query Stats to be enabled for the index

Cause: attempting to do an operation which required query stats option for the index to be enabled

Action: Enable query stats option for the index using `ctx_output.enable_query_stats()`

DRG-52305: Unknown value, *string*, passed in to *stat_type*

Cause: An invalid value is passed in to the parameter `stat_type`

Action: Give a valid value

DRG-52400: Dictionary *string* already exists

Cause: The specified dictionary already exists

Action: Must drop the dictionary if you want to re-create it.

DRG-52401: Invalid language *string* specified

Cause: Language specified is invalid

Action: Must specify a valid language

DRG-52402: Dictionary name is invalid

Cause: The specified dictionary name is invalid

Action: Must provide valid dictionary name

DRG-52403: Dictionary *string* does not exist

Cause: The specified dictionary does not exist

Action: Retry with the correct dictionary name

DRG-52404: policy_languages requires auto lexer

Cause: policy_languages requires the auto lexer to retrieve language information. The auto lexer was not specified, however.

Action: Specify auto lexer for the policy.

EVM-00001 to EVM-00901

EVM-00001: Cannot write raw events to a terminal

Cause: Attempted to redirect binary events to a terminal.

Action: Use `evmshow` to format events for display.

EVM-00002: Use `evmshow` to format events for display

Cause: Attempted to redirect binary events to a terminal.

Action: Use `evmshow` instead.

EVM-00003: Failed to open file "*string*": *string*

Cause: Filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00004: Failed to open channel config file "*string*"

Cause: Configuration file name, the path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00006: Failed to create temporary file

Cause: The file being used as a temporary file for `evmsort` had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00007: Failed to write to temporary file

Cause: The file being used as a temporary file for `evmsort` had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00008: Failed to read from temporary file

Cause: The file being used as a temporary file for `evmsort` had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00009: Failed to create EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00010: Failed to read from EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00011: Failed to write to EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00012: Failed to create EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00013: Failed to read from EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00014: Failed to write to EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00015: Failed to create EVM service connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00016: Failed to read from EVM service connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00017: Failed to start EVM service "*string*"

Cause: EVM daemon failed to start.

Action: Check log for the EVM daemon.

EVM-00018: Failed to write to output stream

Cause: Failed to write to standard output.

Action: Contact Oracle Customer Support.

EVM-00019: Failed to read event from input stream

Cause: Bad input file for evmshow/evmsort EOF missing.

Action: Check the input file.

EVM-00020: Failed to create event subscription

Cause: Bad network connection between subscriber and EVM daemon.

Action: Check the network connection and filter string.

EVM-00021: Failed to create filter

Cause: Used a null filter string or memory allocation failed.

Action: Use a non null filter string.

EVM-00022: Invalid filter string

Cause: Used a null or invalid filter string.

Action: Contact Oracle Customer Support.

EVM-00023: Filter test operation failed

Cause: Used a null or invalid filter string.

Action: Use a non null filter string. Otherwise contact Oracle Customer Support.

EVM-00024: Lost connection to EVM daemon

Cause: Evmlogger lost connection to evmdaemon.

Action: Check status of evmlogger, evmd daemons and logs.

EVM-00025: Authorization database error

Cause: Not authorized to post/listen for certain events.

Action: Check evm.auth file to ensure the current user is authorized to post/listen for specific events.

EVM-00026: Failed to post event "*string*"

Cause: Evmpost failed to post an event.

Action: Check the status and log for EVM daemon.

EVM-00027: Memory allocation failure

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00029: Event contains invalid values

Cause: Invalid syntax for an event was used.

Action: Use a valid syntax for an event.

EVM-00030: Event name is missing

Cause: Name of the event was missing.

Action: Use a valid syntax for an event.

EVM-00031: Event name has too few components

Cause: Invalid syntax for an event was used.

Action: Use a valid syntax for an event.

EVM-00032: Failed to write event

Cause: Failed to write event to output file.

Action: Check the permissions of the file. Otherwise contact Oracle Customer Support.

EVM-00033: Error in input file "*string*", line *number*

Cause: Failed to parse input file.

Action: Check input file and the line for possible errors. Otherwise contact Oracle Customer Support.

EVM-00034: Error: *string*

Cause: Error Occured.

Action: Look at the error message for details.

EVM-00035: EVM service "*string*" terminated with exit code *number*

Cause: EVM daemon died.

Action: Check the EVM daemon log.

EVM-00036: Host "*string*" is unknown

Cause: Invalid hostname discovered while trying to create a connection to the EVM daemon.

Action: Check the hostname, on which EVM daemon is running. Otherwise contact Oracle Customer Support.

EVM-00037: Failed to connect to EVM daemon on "*string*"

Cause: EVM daemon is dead or is not responding.

Action: Check the status of EVM daemon and logs.

EVM-00038: Failed to create an EVM event

Cause: Failed to create an EVM event.

Action: Check the EVM daemon log.

EVM-00039: Invalid port number in host name "*string*"

Cause: Used an invalid port number.

Action: Use a valid or a different port number.

EVM-00040: Error occurred while reading from "*string*"

Cause: Error occurred when evmshow was reading from an input file.

Action: Check the input file.

EVM-00042: Use "*string -A*" to format events, or pipe output to evmshow

Cause: Invalid use of evmshow command.

Action: Use evmshow command as instructed.

EVM-00043: Attempting to reconnect to the EVM daemon...

Cause: Evmwatch trying to reconnect to the evm daemon.

Action: Not an error message.

EVM-00044: Attempting to reconnect to the EVM daemon on "*string*"...

Cause: Evmwatch trying to reconnect to the evm daemon on this host.

Action: Not an error message.

EVM-00045: EVM connection re-established

Cause: Evmwatch was able to reconnect to the evm daemon.

Action: Not an error message.

EVM-00104: End of file reached unexpectedly

Cause: End of event template file reached unexpectedly.

Action: Check the event template file in evm/admin.

EVM-00105: Missing end-of-group character

Cause: end-of-group character missing in event template file.

Action: Check the event template file in evm/admin.

EVM-00106: Missing end-of-string character

Cause: end-of-string character missing in event template file.

Action: Check the event template file in evm/admin.

EVM-00107: Value "*string*" is not valid

Cause: Invalid value found in the event template file.

Action: Check the event template file in evm/admin.

EVM-00108: Keyword "*string*" is not valid

Cause: Invalid keyword found in the event template file.

Action: Check the event template file in evm/admin.

EVM-00201: Failed to allocate space for application object

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00202: Failed to allocate space for local lock pathname

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00301: Failed to open logger config file "*string*"

Cause: Configuration file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00302: Configuration error - using default configuration

Cause: Configuration file had invalid configuration details

Action: Check the configuration file.

EVM-00303: Keyword "*string*" is invalid in this position

Cause: Valid Keyword was used in an invalid position in configuration file.

Action: Use the correct syntax.

EVM-00304: Configuration error in file *string*, line *number*

Cause: Configuration error in configuration file.

Action: Check the configuration file.

EVM-00305: Memory allocation failure for "*string*"

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00306: Failed to create filter for "*string*"

Cause: Failed to create a filter for events for evmlogger.

Action: Check the availability of memory.

EVM-00307: Filter string invalid for "*string*"

Cause: Used a null filter string or memory allocation failed.

Action: Use a non null filter string.

EVM-00308: Failed to open eventlog "*string*": *string*

Cause: Eventlog file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00309: Failed to write to eventlog "*string*"

Cause: Eventlog had one of the following problems; size or permissions were not valid.

Action: Check the permissions and the size of the eventlog file. Otherwise contact Oracle Customer Support.

EVM-00310: Invalid suppression filter for eventlog "*string*"

Cause: Invalid filter was used.

Action: Use a non null filter. Otherwise contact Oracle Customer Support.

EVM-00311: Invalid entry in eventlog "*string*" (*number events OK*)

Cause: Evmlogger found an invalid entry in eventlog.

Action: Check the eventlog file.

EVM-00312: Eventlog "*string*" disabled

Cause: Events could not be written to the eventlog file.

Action: Check the permissions,max size of the logfile.

EVM-00313: Eventlog "*string*" re-enabled

Cause: Events logging is reenabled.

Action: Not an error message.

EVM-00314: Forwarder "*string*" disabled

Cause: Forwarding is disabled by the evmlogger.

Action: Not an error message.

EVM-00315: Forwarder "*string*" re-enabled

Cause: Forwarding is disabled by the evmlogger.

Action: Not an error message.

EVM-00316: Suppression disabled for "*string*"

Cause: Error message filtering suppression disabled for this string.

Action: Not an error message.

EVM-00317: Suppression re-enabled for "*string*"

Cause: Error message filtering suppression reenabled for this string.

Action: Not an error message.

EVM-00318: Failed to open config info file "*string*"

Cause: Configuration file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00319: Keyword "*string*" is not allowed in a secondary config file

Cause: Invalid Keyword was used.

Action: Use a valid Keyword.

EVM-00323: Config file "*string*" has insecure write permission

Cause: The configuration file had write permissions for the group 'other'.

Action: Change the write permissions for the configuration file

EVM-00324: Config file "*string*" has incorrect ownership

Cause: Configuration file should be owned by root or bin.

Action: Change the owner of configuration file to root or bin.

EVM-00325: Config file "*string*" is not a regular file

Cause: Configuration file is not a regular file.

Action: Check the configuration file.

EVM-00401: Failed to open binary event library file

Cause: Binary event file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00601: Data read from the input stream is not a valid EVM event

Cause: evmshow tried to read an invalid EVM event.

Action: Check the logs for the evm daemon.

EVM-00701: Check that the event is registered and you are authorized to post it

Cause: Not authorized to post for certain events.

Action: Check evm.auth file to ensure the current user is authorized to post the specific event.

EVM-00702: Priority must be an integer in the range 0-*number*

Cause: Used an integer out of the range for priority.

Action: Use a valid integer.

EVM-00801: Missed *number* subscribed-to event(s)

Cause: Missed some events during the connection setup phase.

Action: Not an error message.

EVM-00802: Failed to reconnect within *number* seconds - terminating

Cause: Failed to establish a connection with EVM daemon.

Action: Check the logs for EVM daemon.

EVM-00901: Invalid sort specification "*string*"

Cause: Invalid sort specification used for evmsort.

Action: Use a valid sort specification. Look at documentation for evmsort using evmsort -h.

EXP-00000 to EXP-00114

EXP-00000: Export terminated unsuccessfully

Cause: Export encountered an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual, and take appropriate action.

EXP-00001: data field truncation - column length=*number*, buffer size=*number* actual size=*number*

Cause: Export could not fit a column in the data buffer.

Action: Record the given size parameters and the accompanying messages and report this as an Export internal error to customer support. (Part of the table has been exported. Export will continue with the next table.)

EXP-00002: error in writing to export file

Cause: Export could not write to the export file, probably because of a device error. This message is usually followed by a device message from the operating system.

Action: Take appropriate action to restore the device.

EXP-00003: no storage definition found for segment(*number*, *number*)

Cause: Export could not find the storage definitions for a cluster, index, or table.

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00004: invalid username or password

Cause: An invalid username or password was specified.

Action: Retry with a valid username and password.

EXP-00005: all allowable logon attempts failed

Cause: Attempts were repeatedly made to log on with an invalid username or password.

Action: Shut down the utility, then restart and retry with a valid username and password.

EXP-00006: internal inconsistency error

Cause: Export's data structure was corrupted.

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00007: dictionary shows no columns for *string.string*

Cause: Export failed to gather column information from the data dictionary. The table may have been dropped.

Action: Retry the export and, if this error recurs, report it as an Export internal error to customer support.

EXP-00008: ORACLE error *number* encountered

Cause: Export encountered the referenced Oracle error.

Action: Look up the Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00009: no privilege to export *string*'s table *string*

Cause: An attempt was made to export another user's table. Only a database administrator can export another user's tables.

Action: Ask your database administrator to do the export.

EXP-00010: *string* is not a valid username

Cause: An invalid username was specified.

Action: Shut down the utility, then restart and retry with a valid username.

EXP-00011: *string.string* does not exist

Cause: Export could not find the specified table.

Action: Retry with the correct table name.

EXP-00012: *string* is not a valid export mode

Cause: An invalid export mode was specified.

Action: Retry with a valid export mode.

EXP-00013: respond with either 'Y', 'N', RETURN or '.' to quit

Cause: An invalid response was entered.

Action: Enter any of the responses shown in the message.

EXP-00014: error on row *number* of table *string*\n

Cause: Export encountered an Oracle error while fetching rows.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00015: error on row *number* of table *string*, column *string*, datatype *number*

Cause: Export encountered an error while fetching or writing the column. An accompanying message gives more information.

Action: Correct the error and try again.

EXP-00016: ORACLE error encountered while reading default auditing options

Cause: Export encountered an Oracle error while reading the default auditing options (those for updates, deletes, and so on).

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00017: feature "*string*" is needed, but not present in database

Cause: The command entered requires the specified feature. Either that feature is not installed, or the row describing the feature is missing from table V\$OPTION

Action: Reinstall Oracle with the feature specified in the message.

EXP-00018: datatype (*number*) for column *string*, table *string.string* is not supported

Cause: Export does not support the referenced datatype.

Action: Retry with an acceptable datatype (CHAR, NUMBER, DATE, LONG, or RAW).

EXP-00019: failed to process parameters, type 'EXP HELP=Y' for help

Cause: Invalid command-line parameters were specified.

Action: Check the online help screen for the set of valid parameters, then retry.

EXP-00020: failed to allocate memory of size *number*

Cause: Export failed to allocate the necessary memory.

Action: Decrease the export buffer size so that less memory is required, or increase the runtime memory size for Export.

EXP-00021: can only perform incremental export in Full Database mode

Cause: USER or TABLE mode was specified when doing an incremental export.

Action: Specify FULL database mode (FULL=Y) and retry.

EXP-00022: must be SYS or SYSTEM to do incremental export

Cause: The privileges needed to do an incremental export do not exist. Only a database administrator can do incremental exports.

Action: Ask the database administrator to do the incremental export.

EXP-00023: must be a DBA to do Full Database or Tablespace export

Cause: The privileges needed to do a FULL database export do not exist. Only a database administrator can do a FULL database export.

Action: Ask the database administrator to do the FULL database export.

EXP-00024: Export views not installed, please notify your DBA

Cause: The necessary Export views were not installed.

Action: Ask the database administrator to install the required Export views.

EXP-00025: dictionary shows no column for constraint *string.number*

Cause: Export failed to gather column information about the referenced constraint from the data dictionary. The constraint may have been altered.

Action: Retry the export and, if this error recurs, report it as an Export internal error to customer support.

EXP-00026: conflicting modes specified

Cause: Conflicting export modes were specified.

Action: Specify only one parameter and retry.

EXP-00027: failed to calculate ORACLE block size

Cause: Export failed to calculate the Oracle block size.

Action: Report this as an Export internal error to customer support.

EXP-00028: failed to open *string* for write

Cause: Export failed to open the export file for writing. This message is usually followed by device messages from the operating system.

Action: Take appropriate action to restore the device.

EXP-00029: Incremental export mode and consistent mode are not compatible

Cause: Both consistent and incremental exports were specified.

Action: None. Consistent mode is turned off.

EXP-00030: Unexpected End-Of-File encountered while reading input

Cause: Encountered an End-Of-File while reading the user input.

Action: If input to export is being redirected, check the file for errors.

EXP-00031: Arraysize not in valid range. Using arraysize=*number*

Cause: The arraysize value specified is not in the valid range.

Action: None

EXP-00032: Non-DBAs may not export other users

Cause: Only database administrators can export to other users. A non- database administrator attempted to specify owner=user where exporter is not the user.

Action: Request that this operation be performed by the database administrator.

EXP-00033: Could not find environment character set

Cause: The environment character set is missing or incorrectly specified.

Action: Ensure that the environment character set is correctly specified and is present.

EXP-00034: error on rowid: file# *number* block# *number* slot# *number*

Cause: Identifies the rowid on which an error occurred.

Action: This is an information message. No action is required.

EXP-00035: QUERY parameter valid only for table mode exports

Cause: You specified the QUERY parameter in an export command, but you are not performing a table mode export. The QUERY parameter cannot be used for a user mode export, a full export, nor a point in time recovery export.

Action: If you want to select a subset of rows for a table, you must export the table independently with a table mode export. Issue a table mode export command that specifies the table name and the query you want to execute during export.

EXP-00036: Object *number* non-existent in dictionary

Cause: The specified object could not be found in the dictionary. The object might have been dropped during the export

Action: The object no longer exists; no action is needed.

EXP-00037: Export views not compatible with database version

Cause: The Export utility is at a higher version than the database version and is thereby incompatible.

Action: Use the same version of Export utility as the database.

EXP-00038: Bad Hash cluster id in clu\$

Cause: The function id in clu\$ is not a legal number. Clu\$ has become corrupted.

Action: Contact Worldwide Support

EXP-00039: export file *string* must be on a disk

Cause: On some platforms, export can read files from tape. This message is displayed if the first file in an export file set was on disk and you specified a tape device for a second or subsequent file.

Action: Verify that you have specified the correct file name for the export file. Remember that all export files can be either on disk or all files can be on tape, but not mixed both tape and disk.

EXP-00040: Dump file and log file must be different

Cause: The dump file and log file cannot be the same file.

Action: Specify different file names for the dump file and the log file, then retry the operation.

EXP-00041: INCTYPE parameter is obsolete

Cause: Export encountered the INCTYPE parameter when parsing Export options. Incremental Exports are no longer supported.

Action: Consult the Oracle Backup and Recovery guide. Export will attempt to continue.

EXP-00042: Missing NLS_CHARACTERSET/NLS_NCHAR_CHARACTERSET in props\$

Cause: A value for NLS_CHARACTERSET/NLS_NCHAR_CHARACTERSET was not entered in the props\$ table"

Action: internal error.

EXP-00043: Invalid data dictionary information in the row where column "string" is "string" in table string

Cause: The export utility retrieved invalid data from the data dictionary.

Action: Contact Oracle Worldwide Support.

EXP-00044: must be connected 'AS SYSDBA' to do Point-in-time Recovery or Transportable Tablespace import

Cause: The user must log in 'as SYSDBA' to perform transportable tablespace imports or Point-In-Time Recovery imports.

Action: Ask your database administrator to perform the Transportable Tablespace import or the Tablespace Point-in-time Recovery import.

EXP-00045: Cannot export SYSTEM Tablespace for Point-in-time Recovery or Transportable Tablespace

Cause: SYSTEM tablespace cannot be part of recovery set or transportable tablespace set.

Action: Contact Oracle Worldwide Support.

EXP-00046: Tablespace named string does not exist

Cause: The specified tablespace does not exist in dictionary.

Action: Contact Oracle Worldwide Support.

EXP-00047: Missing tablespace name(s)

Cause: Tablespace name(s) were not supplied

Action: Provide tablespace name(s)

EXP-00048: Cannot export SYSAUX Tablespace for Point-in-time Recovery or Transportable Tablespace

Cause: SYSAUX tablespace cannot be part of recovery set or transportable tablespace set.

Action: Contact Oracle Worldwide Support.

EXP-00049: *string* option is not compatible with Point-in-time Recovery or Transportable Tablespace Export

Cause: An option was specified incompatible with Point-in-time Recovery or Transportable Tablespace Export.

Action: Retry the Export without the displayed option.

EXP-00050: Cannot perform Partition Export "*string*" on non-partitioned table "*string*"

Cause: The table specified in this Partition Export is not a partitioned table.

Action: Use Table mode, or specify a non-partitioned table.

EXP-00051: "*string*" - given partition or subpartition name is not part of "*string*" table

Cause: The specified partition or subpartition name is not in the specified table.

Action: Check if the correct table, partition or subpartition name was specified.

EXP-00052: error on row *number* of partition *string*\n

Cause: Export encountered the referenced Oracle error while fetching rows.

Action: Look up the Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00053: unable to execute QUERY on table *string* because the table has inner nested tables

Cause: You specified the QUERY parameter on a table that has one or more inner nested tables. The QUERY parameter cannot be specified on tables that have inner nested tables.

Action: Export the entire table by omitting the QUERY parameter.

EXP-00054: error on row *number* of subpartition *string*\n

Cause: Export encountered the referenced Oracle error while fetching rows.

Action: Look up the Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00055: *string.string* is marked not exportable

Cause: An object was marked as non-exportable in the NOEXP\$ table.

Action: Consult your database administrator.

EXP-00057: Failure to initialize parameter manager

Cause: The parameter manager failed in initialization.

Action: Record the messages that follow and report this to Oracle Worldwide Support as an Export internal bug.

EXP-00058: Password Verify Function for *string* profile does not exist

Cause: Cannot find the function for the profile.

Action: Check if the profile was created properly.

EXP-00059: error converting an object type's identifier to characters

Cause: An invalid length of an object type identifier prevented its conversion.

Action: Contact Oracle Worldwide Support

EXP-00060: an object type had multiple TYPE BODYs

Cause: More than one TYPE BODY was found for an object type.

Action: Try dropping the TYPE BODY, if that is not successful, contact Oracle Worldwide Support

EXP-00061: unable to find the outer table name of a nested table

Cause: While exporting a bitmap index or posttable action on an inner nested table, the name of the outer table could not be located, using the NTAB\$ table.

Action: Verify the table is properly defined.

EXP-00062: invalid source statements for an object type

Cause: TYPE was not found in the statements in SOURCE\$ for an Object Type

Action: Contact Oracle Worldwide Support.

EXP-00063: error in changing language handle

Cause: Unable to change language handle.

Action: Contact Oracle Worldwide Support.

EXP-00064: *string* is an inner nested table and cannot be exported.

Cause: An attempt was made to export an inner nested table without its parent table.

Action: Export the parent of the inner nested table.

EXP-00065: Error writing lob to the dump file.

Cause: The current LOB could not be written to the dump file.

Action: Identify the cause of the write failure and fix it.

EXP-00066: Object table *string* is missing its object identifier index

Cause: All object tables must have an object identifier index, but the specified table was missing an index on its object identifier column.

Action: Recreate the type table and retry the operation.

EXP-00068: tablespace *string* is offline

Cause: Export failed to export tablespace (tablespace being offline).

Action: Make tablespace online and re export.

EXP-00070: attempt to free unallocated memory

Cause: An attempt was made to free memory that was not allocated.

Action: Contact Oracle Worldwide Support

EXP-00071: QUERY parameter not compatible with Direct Path export

Cause: You specified a value for the QUERY parameter for a direct path export. The QUERY parameter cannot be used with a direct path export.

Action: Re-issue the export command with DIRECT=N or omit the DIRECT parameter from the command line.

EXP-00072: error closing export file *string*

Cause: An error occurred while trying to close the export file.

Action: Contact Oracle Worldwide Support.

EXP-00073: dump file size too small

Cause: You specified either the FILESIZE parameter or the VOLSIZE parameter (if your platform supports it), and the value of the parameter is too small to hold the header information for the export file, plus any data.

Action: Increase the value of the FILESIZE or VOLSIZE parameter.

EXP-00074: rounding VOLSIZE down, new value is *string*

Cause: The VOLSIZE parameter must be a multiple of the RECORDLENGTH, but the value you specified for VOLSIZE does not meet this requirement. The value of VOLSIZE has been rounded down to be a multiple of the RECORDLENGTH used for the dump file.

Action: No action is required. You can adjust the VOLSIZE or RECORDLENGTH parameter to avoid this message. When importing this file, you must specify the VOLSIZE value reported by this message.

EXP-00075: rounding FILESIZE down, new value is *string*

Cause: The FILESIZE parameter must be a multiple of the RECORDLENGTH, but the value you specified for FILESIZE does not meet this requirement. The value of FILESIZE has been rounded down to be a multiple of the RECORDLENGTH used for the dump file.

Action: No action is required. You can adjust the FILESIZE or RECORDLENGTH parameter to avoid this message. When importing this file, you must specify the FILESIZE value reported by this message.

EXP-00076: multiple devices specified for tape output

Cause: You specified multiple file names when doing an export to a tape device. EXPORT uses the same device for writing all files, of the number of tape volumes required. For this reason, export will accept only one value for the FILE parameter when writing to tape.

Action: Reenter the EXPORT command, but specify only one tape device in the FILE parameter.

EXP-00077: multiple output files specified for unbounded export file

Cause: You specified multiple file names when doing an export and you also specified a value of 0 for the FILESIZE parameter. Note that 0 is the value used if FILESIZE is not specified on the command line. Since a value of 0 for FILESIZE means that only one file will be written and there is no size limit for that file, the other files you specified in the FILE parameter can never be used.

Action: If you intended to write multiple files, respecify the command but use the FILESIZE to specify the maximum number of bytes that EXPORT should write to each file. If you intended to write only one file with no limits on its size, reissue the EXPORT command but specify only one file name for the FILE parameter.

EXP-00078: Error exporting metadata for index *string*. Index creation will be skipped

Cause: Domain indexes export private metadata via anonymous PL/SQL blocks prior to the CREATE INDEX statement. Export does this by calling the ODCIIndexGetMetadata method on the implementation type associated with the index. A problem occurred inside this routine. Because the metadata is considered an integral part of the index, the CREATE INDEX statement was not written to the dump file.

Action: Contact the developer of the index's implementation type. If this is an Oracle-supplied index (perhaps via a data cartridge), contact Oracle Worldwide Support.

EXP-00079: Data in table "*string*" is protected. Conventional path may only be exporting partial table.

Cause: User without the execute privilege on DBMS_RLS, the access control package, tries to export a table that has access control. Since table owner is also subjected to access control, the owner may not be able to export all rows in the table, but only the ones he can see. Also, to preserve integrity of the table, user exporting the table should have enough privilege to recreate the table with the security policies at import time. Therefore, it is strongly recommended the database administrator should be handling exporting of this table. Granting the table owner execute privilege would also satisfy this security check, though it might have other security implications. If the table does not have objects, can use direct mode.

Action: Ask the database administrator to export/import this table/view.

EXP-00080: Data in table "*string*" is protected. Using conventional mode.

Cause: User without the execute privilege on DBMS_RLS, the access control package, tries to direct export a table that has access control enabled. Using conventional export mode instead. Note that because of access control, only a partial table may be exported.

Action: Ask the database administrator to export/import this table/view.

EXP-00081: Exporting access control for table/view "*string*" as non-DBA.

Cause: A non-DBA user tries to export table/view and the associated fine grain access control policies. The user may not have enough privilege to recreate the access control policies when importing the table/view. And such an event may cause inconsistency in the security model of the table/view.

Action: Ask the database administrator to export/import this table/view.

EXP-00082: Invalid function name passed to procedural object support: *string*

Cause: Internal inconsistency error: The listed function is not a method on export's procedural object interface specification.

Action: Contact Oracle Worldwide Support

EXP-00083: The previous problem occurred when calling *string.string.string*

Cause: The listed package provides export/import support for procedural actions. The previously listed error occurred while calling the specified function.

Action: Contact Oracle Worldwide Support. Most packages are supplied by Oracle internal cartridge or server development groups. The package name will help Support determine the correct owner of the problem.

EXP-00084: Unexpected DbmsJava error *number* at step *number*

Cause: The error was returned from a call to a DbmsJava procedure.

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00085: The previous problem occurred when calling *string.string.string* for object *number*

Cause: The listed package provides export/import support for procedural objects, i.e, those whose DDL is supplied by stored procedures. The previously listed error occurred while calling the specified function.

Action: Contact Oracle Worldwide Support. Most packages are supplied by Oracle internal cartridge or server development groups. The package name will help Support determine the correct owner of the problem.

EXP-00086: Primary key REFs in table "string" may not be valid on import

Cause: The specified table contains primary key REFs which may not be valid in the import database.

Action: Do not use Export/Import to move Primary key REFs between databases having differing character sets.

EXP-00087: Problem with internal hash table of schema/table names

Cause: Most likely a problem with allocating memory for the hash table entries.

Action: Contact Oracle Worldwide Support

EXP-00089: invalid FILE_FORMAT specification

Cause: The FILE_FORMAT specification did not contain an instance of "%s". This wildcard string must be present.

Action: Correct the error and reenter the EXPORT command.

EXP-00090: cannot pin type "string"."string"

Cause: Export was unable to pin the specified type in the object cache. This is typically caused because a type could not be made valid (for example because of authorization violations in accessing subtypes).

Action: Fix the problem with the offending type until the type can be successfully compiled.

EXP-00091: Exporting questionable statistics.

Cause: Export was able export statistics, but the statistics may not be usable. The statistics are questionable because one or more of the following happened during export: a row error occurred, client character set or NCHARSET does not match with the server, a query clause was specified on export, only certain partitions or subpartitions were exported, or a fatal error occurred while processing a table.

Action: To export non-questionable statistics, change the client character set or NCHARSET to match the server, export with no query clause, export complete tables. If desired, import parameters can be supplied so that only non-questionable statistics will be imported, and all questionable statistics will be recalculated.

EXP-00092: Unable to set NLS_NUMERIC_CHARACTERS to required defaults.

Cause: Export was unable to set NLS_NUMERIC_CHARACTERS to '.,'

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00093: Could not convert to server character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

EXP-00094: Could not convert to server national character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

EXP-00095: Flashback_time and Flashback_scn are not compatible

Cause: Both flashback_time and flashback_scn parameters were specified.

Action: Reissue command with only one flashback parameter.

EXP-00097: Object type "*string*".*string*" is not in a valid state, type will not be exported

Cause: The object type's status is invalid which may be caused by a dependant type's modification (or removal) without cascading the change.

Action: The type must be recompiled using ALTER TYPE COMPILE.

EXP-00098: Data in table has not been upgraded, table will not be exported

Cause: Export is attempting to process a table containing references to a type which has evolved. In order for Export to process the table successfully, all data within each table must be upgraded to the latest revision of each referenced type.

Action: The table must be updated using ALTER TABLE UPGRADE DATA.

EXP-00099: Table "*string*".*string*" is not in a valid state, table will not be exported

Cause: A table or one of its dependant types has modified without cascading the change. This left the table in an INVALID state.

Action: The table must be updated using ALTER TABLE UPDATE.

EXP-00100: error converting an object type's hashcode to characters

Cause: An invalid length of an object type identifier prevented its conversion.

Action: Contact Oracle Worldwide Support

EXP-00101: Version 1 extensible index "*string*".*string*" can not be included in Transportable Tablespace Export

Cause: Transportable Tablespace extensible indexes must be at least version 2.

Action: Upgrade extensible index implementation to version 2 specifications.

EXP-00102: Resumable parameters ignored -- current session not resumable

Cause: Current session is not resumable.

Action: Must specify RESUMABLE=Y to enable resumable session in order for the RESUMABLE_NAME and RESUMABLE_TIMEOUT parameters to take effect.

EXP-00103: The FLASHBACK_TIME parameter was invalid

Cause: FLASHBACK_TIME did not contain a valid timestamp or an expression that yields a valid timestamp.

Action: Specify a timestamp value in the format of YYYY-MM-DD HH24:MI:SS or an expression that evaluates to a valid timestamp.

EXP-00104: datatype (*string*) of column *string* in table *string.string* is not supported, table will not be exported

Cause: The column is of a datatype which does not contain the required support. The table will not be exported.

Action: Use the Data Pump version of Export to export this table.

EXP-00105: parameter *string* is not supported for this user

Cause: The user attempted to specify either CONSISTENT or OBJECT_CONSISTENT when connected as sysdba.

Action: If a consistent export is needed, then connect as another user.

EXP-00106: Invalid Database Link Passwords

Cause: Invalid Encoded Password for Database Link

Action: Please drop the Database Link and recreate it after import.

EXP-00107: Feature (*string*) of column *string* in table *string.string* is not supported. The table will not be exported.

Cause: Export does not contain the required support for this feature. The table will not be exported.

Action: Use the Data Pump version of Export to export this table.

EXP-00108: NULL lob fetched

Cause: Internal error

Action: Contact Oracle Worldwide Support.

EXP-00109: XSL delimiter not found

Cause: Internal error

Action: Contact Oracle Worldwide Support.

EXP-00110: Tablespace *string* is encrypted and will not be exported

Cause: Encrypted Tablespace feature is not supported by classic export

Action: Use DATAPUMP Utility to export this tablespace.

EXP-00111: Table *string* resides in an Encrypted Tablespace *string* and will not be exported

Cause: Encrypted Tablespace feature is not supported by classic export

Action: Use DATAPUMP Utility to export this table.

EXP-00112: Index *string* is of XMLType and could not be exported

Cause: Export does not contain the required support for this feature. The index could not be exported.

Action: Use Oracle Data Pump Utility to export this index.

EXP-00113: Feature *string* is unsupported. *string string.string* could not be exported

Cause: Export does not contain the required support for this feature.

Action: Use Oracle Data Pump Utility

EXP-00114: Length of *string string* is exceeding the maximum limit

Cause: Provided length was more than the maximum limit allowed.

Action: Check the input value and provide the correct value.

GIMR-01001 to GIMR-01007

GIMR-01001: The GIMR schema is incompatible with the application. Call Oracle Support Services.

Cause: A Grid Infrastructure Management Repository (GIMR) operation failed because a schema was incompatible with the operation.

Action: Contact Oracle Support Services.

GIMR-01002: GIMR data is corrupt. Contact Oracle Support Services.

Cause: An attempt to access Grid Infrastructure Management Repository (GIMR) data failed because the data store was corrupt.

Action: Contact Oracle Support Services.

GIMR-01003: The application has experienced an error during a GIMR operation. The accompanying error messages provide detailed failure information.

Cause: A Grid Infrastructure Management Repository (GIMR) operation failed. The accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages, address the issues raised, and retry.

GIMR-01004: The application cannot log in to the GIMR. Use the 'mgmtca' command to reset the user credentials.

Cause: An attempt to log in to the Grid Infrastructure Management Repository (GIMR) failed because user credentials were invalid.

Action: Use the 'mgmtca' command to reset the user credentials.

GIMR-01005: An attempt to connect to the GIMR failed because a connection timed out. Retry the operation.

Cause: An attempt to connect to the Grid Infrastructure Management Repository (GIMR) failed because a connection timed out.

Action: Retry the operation.

GIMR-01006: The application has exhausted the allotted space in the GIMR. Make space available to the application and retry the operation.

Cause: An attempt to write to the Grid Infrastructure Management Repository (GIMR) failed because the data store had no available space.

Action: Make space available to the application and retry the operation.

GIMR-01007: The application is unable to connect to the GIMR because the GIMR network listener is down. Restart the GIMR network listener using the 'srvctl' command.

Cause: The Grid Infrastructure Management Repository (GIMR) network listener was not running when the application attempted to connect to it.

Action: Restart the GIMR network listener using the 'srvctl' command.

GIPC-00000 to GIPC-00020

GIPC-00000: general success.

Cause: The operation succeeded.

Action: No action is required.

GIPC-00001: general failure.

Cause: A GIPC operation failed.

Action: Examine the trace and log files for the specific cause.

GIPC-00002: GIPC needs to be initialized.

Cause: The application failed to initialize GIPC prior to performing an operation.

Action: Initialize GIPC.

GIPC-00014: buffer not large enough to hold data.

Cause: The buffer provided by the application was not big enough to hold the data received.

Action: Use a larger buffer.

GIPC-00016: timeout waiting on request.

Cause: A wait call returned because the time expired.

Action: This error happens normally in most cases. If this error was not expected, examine the trace and log files for the reason.

GIPC-00017: waiting call has been posted.

Cause: A wait was interrupted by another thread posting it.

Action: This error happens normally in most cases. If this error was not expected, examine the trace and log files for the reason.

GIPC-00020: bind address already in use.

Cause: The application attempt to bind an endpoint to an address which has already been bound.

Action: Specify another address.

IMG-00001 to IMG-02014

IMG-00001: unable to initialize Oracle Multimedia environment

Cause: The image processing external procedure initialization process failed.

Action: Contact Oracle Support Services.

IMG-00002: unrecoverable error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00003: exhausted memory while processing image

Cause: Oracle Multimedia exhausted available Java memory during processing.

Action: Increase the JAVA_POOL_SIZE initialization parameter setting.

IMG-00201: unsupported metadata type

Cause: The requested metadata type could not be read from or written to this image format.

Action: Refer to the Oracle Multimedia documentation to select the proper metadata type for this image.

IMG-00202: unsupported character encoding

Cause: The character encoding was not supported for this image format.

Action: Refer to the Oracle Multimedia documentation to select the proper encoding for this image.

IMG-00203: xmlData is invalid

Cause: The XML document was NULL or not schema valid.

Action: Create a schema valid document for input.

IMG-00204: input metadata too long

Cause: The metadata was too long to embed in this image format.

Action: Trim the metadata, or use a different image format.

IMG-00205: cannot add a TIFF directory entry

Cause: No new entries could be added to this directory.

Action: Use a different image format.

IMG-00206: unsupported image format for putMetadata

Cause: Metadata could not be written to this image format.

Action: Use a different image format.

IMG-00207: input parameter is not valid

Cause: The input parameter value contained an invalid value.

Action: Correct the input parameter value.

IMG-00208: metadata format parse error

Cause: The parser detected an error in the embedded metadata.

Action: Verify that the metadata conforms to proper standards.

IMG-00209: error parsing metadata

Cause: There was an internal error while parsing the metadata.

Action: Contact Oracle Support Services.

IMG-00210: unable to get metadata from an empty image

Cause: There was no data in the input image.

Action: Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

IMG-00211: metadataType value "string" is invalid

Cause: The metadataType parameter value was NULL or invalid.

Action: Correct the metadataType parameter value.

IMG-00212: encoding value "string" is invalid

Cause: The encoding parameter value was NULL or invalid.

Action: Correct the encoding parameter value.

IMG-00213: xmlData does not contain an RDF element

Cause: The XML document did not contain an *RDF* element as a child of *xmpMetadata*.

Action: Create a schema valid document with an *RDF* element.

IMG-00502: invalid scale value

Cause: An invalid scale value was found while parsing the parameters for the image process function.

Action: Correct the statement by using a valid scale value. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00505: missing value in CUT rectangle

Cause: An incorrect number of values was used to specify a rectangle.

Action: Use exactly four integer values for the lower-left and upper-right vertices.

IMG-00506: extra value in CUT rectangle

Cause: An incorrect number of values was used to specify a rectangle.

Action: Use exactly four integer values for the lower left and upper right vertices.

IMG-00510: string

Cause: A syntax error was found while parsing the parameters for the image process function.

Action: Correct the statement by using valid parameter values. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00511: *string*

Cause: An error was found while accessing image data.

Action: Contact Oracle Support Services.

IMG-00512: multiple incompatible scaling parameters found

Cause: Multiple incompatible scaling parameters were found in the image process command string. With the exception of XSCALE and YSCALE, which can be used together in a process command string, scaling functions are mutually exclusive and cannot be combined.

Action: Remove scaling functions until only one remains (or two, if they are XSCALE and YSCALE).

IMG-00513: missing value in scaling operation

Cause: An incorrect number of values was used to specify image dimensions. fixedScale and maxScale require exactly two integer values for the X and Y dimensions of the desired image.

Action: Use two values for fixedScale and maxScale.

IMG-00514: extra value in scaling operation

Cause: An incorrect number of values was used to specify image dimensions. fixedScale and maxScale require exactly two integer values for the X and Y dimensions of the desired image.

Action: Use two values for fixedScale and maxScale.

IMG-00515: incorrect number of input channels

Cause: An incorrect number of values was used to specify input channels. InputChannels requires either one or three channels numbers for the gray or red, green, and blue channel assignments.

Action: Use either one or three values to specify the input channels.

IMG-00516: default channel out of range

Cause: An incorrect value was used to specify the default channel selection.

Action: Use a channel number which is less than or equal to the number of bands and greater than zero.

IMG-00517: height or width not present in parameter string

Cause: Height and/or width were not specified in the setProperties parameter string.

Action: Specify both the height and width.

IMG-00518: invalid value for height or width

Cause: Height and/or width were not positive integers"

Action: Specify both the height and width as positive integers"

IMG-00519: illegal combination of parameters

Cause: Other than height, width, dataOffset, and userString no other parameters may be specified in the setProperties parameter string when CCITTG3 or CCITTG4 is used as the compressionFormat.

Action: Supply only the height and width when compressionFormat is either CCITTG3 or CCITTG4. The dataOffset and userString may optionally be supplied as well.

IMG-00520: invalid value for numberOfBands

Cause: NumberOfBands was not a positive integer"

Action: Specify numberOfBands as a positive integer"

IMG-00521: invalid value for dataOffset

Cause: DataOffset was not a positive integer"

Action: Specify dataOffset as a positive integer"

IMG-00522: invalid format for parameter value

Cause: A floating point value was specified where an integer is required, or a character value was specified where a numeric value is required.

Action: Specify the correct type of values for process parameters.

IMG-00523: invalid process verb

Cause: A process verb was specified that is not understood by Oracle Multimedia.

Action: Refer to the Oracle Multimedia documentation for a description of valid process verbs.

IMG-00524: mismatched quotes

Cause: Quotation marks used within a process command string were not matched.

Action: Ensure that quotation marks occur in pairs.

IMG-00525: locale error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00526: error parsing foreign image description

Cause: An internal error occurred while processing a foreign image.

Action: Contact Oracle Support Services.

IMG-00527: invalid deletePages specified

Cause: The specified value for the deletePages parameter was not valid.

Action: See the Oracle Multimedia documentation for reference information about valid values for deletePages parameter.

IMG-00528: invalid movePages specified

Cause: The specified value for the movePages parameter was not valid.

Action: See the Oracle Multimedia documentation for reference information about valid values for movePages parameter.

IMG-00529: invalid combination of TIFF page operations

Cause: The specified TIFF page operations were not valid.

Action: See the Oracle Multimedia documentation for reference information about valid values for TIFF page operations.

IMG-00530: internal error while parsing command

Cause: An internal error occurred while parsing the command passed to the image processing function or the foreign image setProperties function.

Action: Check the command passed to the function. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image

processing command string or the foreign image setproperties function. If you are certain that your command is correct, then contact Oracle Support Services.

IMG-00531: empty or null image processing command

Cause: An empty or null image processing command was passed to the image process function.

Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00540: contentFormat and interleave conflict

Cause: Interleave values were specified using both the contentformat and interleave verbs.

Action: Specify interleave using either contentformat or interleave, but not both.

IMG-00541: invalid contentFormat specified

Cause: The specified contentFormat was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid contentFormat specifications.

IMG-00542: contentFormat includes invalid extra information

Cause: The specified contentFormat included invalid characters at the end of the parameter string.

Action: Refer to the Oracle Multimedia documentation for a description of valid contentFormat specifications.

IMG-00543: invalid compressionFormat specified

Cause: The specified compressionFormat was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid compressionFormat specifications.

IMG-00544: invalid compressionQuality specified

Cause: The specified compressionQuality was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid compressionQuality specifications.

IMG-00545: invalid cut values specified

Cause: An invalid value was found while parsing the parameters for the cut operation.

Action: Correct the statement by specifying values for the cut operation that are not negative. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00546: invalid page number specified

Cause: An invalid page number was specified.

Action: Specify page numbers that are not negative.

IMG-00547: invalid channelOrder specified

Cause: The specified channelOrder was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid channelOrder specifications.

IMG-00548: invalid interleave specified

Cause: The specified interleave was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid interleave specifications.

IMG-00549: invalid pixelOrder specified

Cause: The specified pixelOrder was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid pixelOrder specifications.

IMG-00550: invalid scanlineOrder specified

Cause: The specified scanline order was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid scanlineOrder specifications.

IMG-00551: invalid quantize method specified

Cause: The specified quantization method was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid quantization method specifications.

IMG-00552: invalid inputChannels specified

Cause: An invalid value was specified for the inputChannels verb.

Action: Specify non-negative values for inputChannels. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00553: invalid rotate value

Cause: An invalid value was specified for image rotation. Rotation values must be a floating point number.

Action: Correct the statement by providing a valid rotation value.

IMG-00554: extra value in rotate operation

Cause: Multiple arguments were used to specify image rotation. The rotate operation accepts only a single value.

Action: Provide a single value for the rotate operation.

IMG-00555: invalid value for gamma correction

Cause: An invalid value was specified for gamma correction. Gamma values must be positive.

Action: Correct the statement by providing a positive gamma value.

IMG-00556: incorrect number of gamma values

Cause: An incorrect number of values were used to specify gamma correction. Gamma correction requires either one or three gamma values.

Action: Provide either one or three values to specify the gamma correction.

IMG-00557: invalid value for contrast enhancement

Cause: An invalid value was used to specify contrast enhancement.

Action: To specify contrast enhancement using percentages, provide values between 0 and 100. To specify contrast enhancement using bounds, provide values greater than 0.

IMG-00558: incorrect number of contrast values

Cause: An incorrect number of values were used to specify contrast enhancement. Contrast enhancement requires one, two, three, or six contrast values.

Action: Provide one or three values to specify contrast enhancement using percentages; provide two or six values to specify contrast enhancement using contrast bounds.

IMG-00559: invalid frame number

Cause: An incorrect number was used to specify frame in Dicom image. The number should be greater than 0 and less than total frames in Dicom image.

Action: Provide one number greater than 0 and less than total frames in Dicom image.

IMG-00560: input format does not support page selection

Cause: The page verb was specified for an input format that does not support selecting pages.

Action: Remove the page selection verb. Refer to the Oracle Multimedia documentation for a description of which image formats support page selection.

IMG-00561: input format does not support channel selection

Cause: The inputChannels verb was specified for an input format that does not support selecting channels.

Action: Remove the inputChannels verb. Refer to the Oracle Multimedia documentation for a description of which image formats support input channel selection.

IMG-00577: invalid quantize argument

Cause: A quantize value was specified that accepts an argument, but the argument provided was not valid.

Action: Provide a valid, non-negative argument for the quantize value.

IMG-00578: missing quantize argument

Cause: A quantize value was specified that requires an argument, but no argument was provided.

Action: Provide an argument for the quantize value.

IMG-00579: extra quantize argument

Cause: An extra argument was provided for a quantize value. Some quantize values accept no arguments, while others accept a single argument.

Action: Provide an argument only for quantize values that accept an argument.

IMG-00580: specified format does not support output

Cause: The output format specified by fileFormat does support output.

Action: Change the specified fileFormat to one that supports output. Refer to the Oracle Multimedia documentation for a description of which formats support output.

IMG-00581: output format does not support the specified contentFormat

Cause: The specified contentFormat is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which contentFormat values are supported for each output format.

IMG-00582: output format does not support the specified interleave

Cause: The specified interleave is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which interleave values are supported for each output format.

IMG-00583: output format does not support the specified compressionFormat

Cause: The specified compressionFormat is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which compressionFormat values are supported for each output format.

IMG-00584: output format does not support the specified compressionQuality

Cause: The specified compressionQuality is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which compressionQuality values are supported for each output format.

IMG-00585: output format does not support the specified channelOrder

Cause: The specified channelOrder is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which channelOrder values are supported for each output format.

IMG-00586: output format does not support the specified pixelOrder

Cause: The specified pixelOrder is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which pixelOrder values are supported for each output format.

IMG-00587: output format does not support the specified scanlineOrder

Cause: The specified scanlineOrder is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which scanlineOrder values are supported for each output format.

IMG-00599: internal error

Cause: An internal error has occurred.

Action: Contact Oracle Support Services.

IMG-00601: out of memory while copying image

Cause: Operating system process memory has been exhausted while copying the image.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00602: unable to access image data

Cause: An error occurred while reading or writing image data.

Action: Ensure that the source image can be read from and the destination can be written to.

IMG-00603: unable to access source image data

Cause: The source image SOURCE attribute is invalid.

Action: Ensure that the SOURCE attribute of the source image is populated with image data.

IMG-00604: unable to access destination image data

Cause: The destination image SOURCE attribute is invalid.

Action: Ensure that the SOURCE attribute of the destination image is populated with image data.

IMG-00606: unable to access image data

Cause: An attempt was made to access an invalid image.

Action: Ensure that the SOURCE attribute of the image is populated with image data.

IMG-00607: unable to write to destination image

Cause: The destination image SOURCE attribute is invalid.

Action: Ensure that the SOURCE attribute of the destination image is initialized correctly and that you have sufficient tablespace.

IMG-00609: unable to read image stored in a BFILE

Cause: The image stored in a BFILE cannot be opened for reading.

Action: Ensure that the access privileges of the image file and the image file's directory allow read access.

IMG-00611: unable to access the BLOB for reading

Cause: The BLOB could not be opened for reading.

Action: Contact Oracle Support Services.

IMG-00612: unable to open export destination file

Cause: The file could not be created or opened.

Action: Check that the file does not refer to an existing directory. Check that the file is not locked by another application.

IMG-00613: export destination access denied

Cause: Permission to write to destination file was denied.

Action: Refer to the Oracle Multimedia documentation for information on granting privileges for the export() method.

IMG-00614: I/O error during export

Cause: The export operation failed because of an I/O error.

Action: Check OS logs and contact Oracle Support Services.

IMG-00701: unable to set the properties of an empty image

Cause: There is no data in the image object.

Action: Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

IMG-00702: unable to initialize image processing environment

Cause: The image processing external procedure initialization process failed.

Action: Contact Oracle Support Services.

IMG-00703: unable to read image data

Cause: There is no image data in the image object.

Action: Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

IMG-00704: unable to read image data

Cause: There is no image data in the image object.

Action: Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

IMG-00705: unsupported or corrupted input format

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00706: unsupported or corrupted output format

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00707: unable to access image data

Cause: An error occurred while reading or writing image data.

Action: Contact your system administrator.

IMG-00710: unable to write to destination image

Cause: The destination image is invalid.

Action: Ensure that the SOURCE attribute of the destination image is initialized and that you have sufficient tablespace.

IMG-00711: unable to set properties of destination image

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00712: unable to write to destination image

Cause: The destination image is invalid.

Action: Ensure that the SOURCE attribute of the destination image is initialized and that you have sufficient tablespace. Ensure the row containing the destination image has been locked (this does not apply to temporary BLOBs).

IMG-00713: unsupported destination image format

Cause: A request was made to convert an image to a format that is not supported.

Action: Refer to the Oracle Multimedia Documentation for supported formats.

IMG-00714: internal error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00715: unable to open image stored in a BFILE

Cause: The image stored in a BFILE could not be opened for reading.

Action: Ensure that the access privileges of the image file and the image file's directory allow read access.

IMG-00716: source image format does not support process options

Cause: A request was made to apply a processing option not supported by the source image format.

Action: Refer to the Oracle Multimedia Documentation for a discussion of supported processing options.

IMG-00717: destination image format does not support process options

Cause: A request was made to apply a processing option not supported by the destination image format.

Action: Refer to the Oracle Multimedia Documentation for a discussion of supported processing options.

IMG-00718: the same Temporary LOB cannot be used as both source and destination

Cause: A call was made to processCopy with the same Temporary LOB being specified as both the source and destination.

Action: Specify a different LOB for parameter "dest".

IMG-00719: image processing internal error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00720: image processing internal error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

**IMG-00721: unable to find source plug-in package
ORDPLUGINS.ORDX_string_SOURCE**

Cause: Custom source plug-in for user-specified source type was not found.

Action: Ensure correct source type is specified or proper custom source plug-in package is installed.

IMG-00722: incorrect value of bitsAllocated, bitsStored or highBit for output Dicom image

Cause: incorrect value of bitsAllocated, bitsStored or highBit for output Dicom image.

Action: Ensure correct value of bitsAllocated, bitsStored or highBit for output Dicom image.

IMG-00723: missing value in SHARPEN operation

Cause: An incorrect number of values was used to specify the sharpen parameters.

Action: Use one integer value to specify the kernel type and one float value to specify the gain factor.

IMG-00724: extra value in SHARPEN operation

Cause: An incorrect number of values was used to specify the sharpen parameters.

Action: Use one integer value to specify the kernel type and one float value to specify the gain factor.

IMG-00725: output image will be empty

Cause: The processing commands resulted in an empty output image.

Action: Ensure the resulting output image will not be empty.

IMG-00726: invalid value for the AVI framerate

Cause: An invalid value was used to specify the AVI framerate parameter.

Action: Use a floating-point value to specify the AVI framerate parameter.

IMG-00727: invalid value for the AVI frametime

Cause: An invalid value was used to specify the AVI frametime parameter.

Action: Use a floating-point value to specify the AVI frametime parameter.

IMG-00728: multiple incompatible AVI frame parameters found

Cause: Multiple incompatible AVI frame parameters were found.

Action: Use only one AVI frame parameter.

IMG-00729: output format does not support the specified frame parameters

Cause: The specified frame parameter is not supported by the explicitly or implicitly specified output format.

Action: Specify AVI as the output format in the process command string.

IMG-00730: unable to process empty image

Cause: There is no data in the input image object.

Action: Refer to the Oracle Multimedia documentation for information on how to put image data into the image object.

IMG-00731: specified page could be found in input image

Cause: The specified page does not exist in the input image.

Action: Restrict the value of the page parameter to values specifying pages that exist within the input image object.

IMG-00732: specified inputChannels could not be found in input image

Cause: The specified inputChannel parameter does not exist in the input image.

Action: Restrict the value of the inputChannels parameter to values specifying channels that exist within the input image object.

IMG-00733: invalid watermark property setting

Cause: The specified watermark property setting is not supported by Oracle Multimedia.

Action: See the Oracle Multimedia documentation for a description of valid watermark property settings.

IMG-00734: invalid deflateLevel value

Cause: The specified value for the deflateLevel parameter was not supported by Oracle Multimedia.

Action: See the Oracle Multimedia documentation for a description of the valid values for the deflateLevel parameter.

IMG-00735: incorrect transparencyFillColor values

Cause: The specified value for the transparencyFillColor parameter was not supported by Oracle Multimedia.

Action: See the Oracle Multimedia documentation for a description of the valid values for the transparencyFillColor parameter.

IMG-00800: internal error while parsing attribute string

Cause: An internal error occurred while parsing the attribute string containing the weights of the attributes.

Action: Check the command passed to the function. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the attributes string for image matching. If you are certain that your command is correct, then contact Oracle Support Services.

IMG-00801: cannot extract height and width

Cause: Height and width are not set in the image object.

Action: Set the properties of the image object by calling `setProperties` and then `generateSignature`.

IMG-00802: empty or null attribute string

Cause: An empty or null attributes string was passed to the image matching operators.

Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax of the attributes string.

IMG-00803: invalid attribute value

Cause: An invalid value was found while parsing the attribute string for the image matching operators.

Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the attributes string. The weight values should be between 0.0 and 1.0.

IMG-00804: Syntax error in attribute string

Cause: A syntax error was found while parsing the attribute string for the image matching operators.

Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax of the attributes string.

IMG-00805: SIGNATURE data has been corrupted or is invalid

Cause: The data in the signature is not a valid signature.

Action: Re-create the signature using the `generateSignature` method.

IMG-00806: invalid input image

Cause: The image data is either corrupt or is in an unsupported format.

Action: Repopulate the image object, set properties of the image, and generate the signature.

IMG-00807: no weights specified in weight string

Cause: All weights passed were zero. At least one attribute must be weighted.

Action: Specify a non-zero weight for at least one attribute

IMG-00808: unable to read an empty image

Cause: There is no data in the image object.

Action: Refer to the Oracle Multimedia documentation for information on how to populate the image object with image data.

IMG-00809: usage of IMGSimilar is incorrect

Cause: Syntax error while using IMGSimilar

Action: Refer to the Oracle Multimedia documentation for information on how to use the IMGSimilar operator. Check whether the value returned by IMGSimilar is compared to the value 1.

IMG-00810: boundary queue initialization failed

Cause: Operating system process memory has been exhausted while initializing the boundary queue.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00811: fail queue initialization failed

Cause: Operating system process memory has been exhausted while initializin the fail queue.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00812: merged area queue initialization failed

Cause: Operating system process memory has been exhausted while initializing the merged area queue.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00813: boundary queue free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00814: fail queue free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00815: merged area queue free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00820: area 0 queue clear failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00821: area N queue clear failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00822: area queue reset failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00823: boundary queue pop failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00824: fail queue pop failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00825: merged area queue pop failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00830: boundary queue is full

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00831: boundary queue size exceeds expected size

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00832: fail queue is full

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00833: boundary queue size exceeds expected size

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00834: merged area queue is full

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00835: merged area queue size exceeds expected size

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00836: area queue merge failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00840: image structure allocation failed

Cause: Operating system process memory has been exhausted while initializing the image structure.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00841: image data allocation failed

Cause: Operating system process memory has been exhausted while initializing the image data.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00842: image index allocation failed

Cause: Operating system process memory has been exhausted while initializing the image index.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00843: internal image structure allocation failed

Cause: Operating system process memory has been exhausted while initializing the internal image structure.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00844: internal image data allocation failed

Cause: Operating system process memory has been exhausted while initializing the internal image data.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00845: internal image index allocation failed

Cause: Operating system process memory has been exhausted while initializing the internal image index.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00846: adjacency matrix allocation failed

Cause: Operating system process memory has been exhausted while initializing the adjacency matrix.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00847: area list allocation failed

Cause: Operating system process memory has been exhausted while initializing the area list.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00850: image structure free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00851: image data free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00852: image index free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00853: internal image structure free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00854: internal image data free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00855: internal image index free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00856: adjacency matrix free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00857: area list free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00860: assert failure, number of region exceeds allocated

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00861: assert failure, inconsistency in area merge operation

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00862: assert failure, inconsistency in merged area labels

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00870: unsupported aspect ratio or image size

Cause: Signature generation was attempted on an image smaller than the supported size.

Action: Try scaling the image up to have a larger height and width, the suggested size is greater than 21 pixels each. If signature generation still fails, contact Oracle Support Services with the error number and the image causing this problem.

IMG-00871: unexpected number of seeds

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00872: unsupported image model

Cause: Signature generation was attempted on an image with an image model that Oracle Multimedia is unable to support.

Action: Try scaling the image down. If signature generation still fails, contact Oracle Support Services with the error number and the image causing this problem.

IMG-00899: signature cannot be generated

Cause: generateSignature could not generate the signature.

Action: Verify that the input image is a format supported by Oracle Multimedia.

IMG-00901: VIR signature version mismatch

Cause: Two signatures to be compared have different versions.

Action: Recompute signatures on the same platform and repeat signature comparison.

IMG-00902: VIR signature free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services.

IMG-00910: allocation of basic data structure failed

Cause: Operating system process memory has been exhausted while copying the image.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00911: free basic data structure failed

Cause: Operating system process memory has been exhausted while copying the image.

Action: Contact Oracle Support Services.

IMG-00921: threshold out of range

Cause: Threshold is not between 0 and 100

Action: Use a threshold between 0 and 100 and retry query.

IMG-00922: location specified without feature

Cause: only location was specified.

Action: Specify at least one other parameter (color, texture or shape) along with location. Refer to the Oracle Multimedia documentation for more details.

IMG-00923: signature is empty

Cause: Signature has not been generated.

Action: Generate the signature for the image by calling the generateSignature method.

IMG-00924: Incorrect parameter specification during CREATE INDEX

Cause: There is a spelling error, or duplicate parameter specification, or incorrect specification of parameters while creating an index of type ORDIMAGEINDEX.

Action: Refer to the Oracle Multimedia documentation for correct specification of CREATE INDEX parameters.

IMG-00925: unable to write to the ORDIImageSignature object

Cause: The signature object was not valid and therefore the write operation failed. This problem is commonly caused by an attempt to invoke the generateSignature method on an uninitialized ORDIImageSignature object.

Action: Ensure that the ORDIImageSignature object has been initialized and inserted into a table. Also ensure that the row containing the signature object is locked. (The two previous actions do not apply to signature objects created using temporary BLOBs). Ensure that there is sufficient tablespace to contain the signature.

IMG-00926: tablespace specified during CREATE INDEX is not valid

Cause: A tablespace specified in the parameter string of a CREATE INDEX operation did not exist or the current user did not have sufficient privileges on the tablespace.

Action: Create the tablespace, grant appropriate privileges on the tablespace to the current user, or choose a different tablespace.

IMG-01000: unsupported option string

Cause: The function was invoked with an invalid option string.

Action: Ensure that correct option string is passed to the PL/SQL function. Refer to the Oracle Multimedia documentation for more information.

IMG-01001: not a DICOM object

Cause: The input was not a valid DICOM standalone object.

Action: Use an object that conforms to the DICOM standard. Refer to the Oracle Multimedia documentation for more information.

IMG-01002: unsupported DICOM version

Cause: The object header could not be parsed, possibly because the object header did not conform to the DICOM standard release 2003.

Action: Use an object that conforms to the DICOM standard release 2003. Refer to the Oracle Multimedia documentation for more information.

IMG-01003: unsupported DICOM object type

Cause: The category of DICOM objects is not supported by Oracle Multimedia.

Action: Use a DICOM image is supported by Oracle Multimedia. Oracle Multimedia supports image types defined in the DICOM standard release 2003. Refer to the Oracle Multimedia documentation for more details.

IMG-01004: input DICOM object is not an image

Cause: The DICOM object was not a DICOM image. DICOM object types such as structured reporting are not allowed by this function.

Action: Invoke this function with a DICOM image. Refer to the Oracle Multimedia documentation for more details.

IMG-01005: unsupported DICOM transfer syntax

Cause: The operation failed because the transfer syntax in the DICOM object, which describes the binary encoding of the DICOM object, was not supported by Oracle Multimedia.

Action: Use a DICOM object with a transfer syntax supported by Oracle Multimedia. Refer to the Oracle Multimedia documentation for more details.

IMG-01006: DICOM object cannot be parsed

Cause: The DICOM object could not be parsed by Oracle Multimedia, possibly due to an incorrect format or corrupted object.

Action: Verify that the DICOM object is not corrupted. If the DICOM object is valid, contact Oracle Support Services.

IMG-02001: 2FF01 - incorrect image format

Cause: There was a SQL/MM Still Image exception. Either the supplied image BLOB format did not match the image format or the image format is unsupported.

Action: For supported image formats, specify an input BLOB that has the same format as the image. For unsupported image formats, this method is not supported. Refer to the Oracle Multimedia documentation for more information.

IMG-02002: 2FF02 - incorrect average color feature specification

Cause: There was a SQL/MM Still Image exception. The specified average color value was not a valid SI_Color value.

Action: Specify an average color value that is not null and contains valid SI_Color values. SI_Color attribute values must be integers from 0 to 255. Refer to the Oracle Multimedia documentation for more information on constructing valid SI_Color objects.

IMG-02003: 2FF03 - incorrect color histogram feature specification

Cause: There was a SQL/MM Still Image exception. This exception was caused by one of the following. - The specified color value was null or invalid. - The specified frequency value was null or invalid. - The input color and frequency arrays were not equal in size. - The SI_ColorList array attribute had reached the maximum size.

Action: Ensure that the following are true(as applicable to your case): - The color and frequency values are not null. - The SI_Color attribute values are integers from 0 to 255. - The frequency value is a double precision number from 0 to 100. - The color and frequency arrays are equal in size and the size of the arrays is less than the SI_MaxHistogramLength value listed in the SI_VALUES view in the SI_INFORMTN_SCHEMA. Refer to the Oracle Multimedia documentation for more information on constructing SI_ColorHistogram objects.

IMG-02004: 2FF04 - incorrect feature list specification

Cause: There was a SQL/MM Still Image exception. Either the specified feature values were invalid or the specified feature weights were invalid.

Action: Check the values of feature and featureweight pairs. For a non null feature value, the corresponding feature weight value must be a double precision number greater than 0.0. Refer to the Oracle Multimedia documentation for more information on the SI_FeatureList object type and its methods.

IMG-02005: 2FF05 - incorrect color specification

Cause: There was a SQL/MM Still Image exception. The specified red/green/blue value was null or invalid.

Action: Specify red, green and blue values as integers from 0 to 255.

IMG-02006: 2FF06 - average color feature cannot be determined

Cause: There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the average color feature was not supported by the specified image format

Action: Specify an image with non null image data and a supported format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image formats and image features.

IMG-02007: 2FF07 - positional color feature cannot be determined

Cause: There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the positional color feature was not supported by the specified image format.

Action: Specify an image with non null image data and a supported format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image features and formats.

IMG-02008: 2FF08 - color histogram feature cannot be determined

Cause: There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the color histogram feature was not supported by the specified image format.

Action: Specify an image with non null image data and a supported format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image features and formats.

IMG-02009: 2FF09 - texture feature cannot be determined

Cause: There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the texture feature was not supported by the specified image format.

Action: Specify an image with non null image data and a supported format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image features and formats.

IMG-02010: 2FF10 - illegal image format specification

Cause: There was a SQL/MM Still Image exception. The specified format name was null or invalid.

Action: Specify a format name that is not null. For supported image formats, specify a format name that matches the image BLOB format. For unsupported image formats, specify a format name that is not listed as supported image format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image formats.

IMG-02011: 2FF11 - unsupported image format conversion specified

Cause: There was a SQL/MM Still Image exception. Either the specified target format value was null, the specified image had a null format value, or the conversion from the specified image format to the specified target format was not supported.

Action: Specify an image with a supported image format and specify a target format value that is supported for conversion. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image format conversions.

IMG-02012: 2FF12 - illegal specification for thumbnail generation

Cause: There was a SQL/MM Still Image exception. Either the specified image format did not support thumbnail generation, the specified thumbnail height or width was greater than the image height or width respectively, or the default thumbnail size 80 X 80 was greater than the image height or width respectively.

Action: Specify an image for which thumbnail generation is supported and specify thumbnail height and width values that are less than the image height and width

values. Refer to the `SI_INFORMTN_SCHEMA` views and the Oracle Multimedia documentation for a list of supported thumbnail formats.

IMG-02014: 2202D Data exception - Null image value

Cause: There was a SQL/MM Still Image exception. The function was invoked using a null image value.

Action: Specify an image whose image data is not null. Refer to the Oracle Multimedia documentation for more information on constructing `SI_StillImage` objects.

IMP-00000 to IMP-00403

IMP-00000: Import terminated unsuccessfully

Cause: Import encountered an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual, and take appropriate action.

IMP-00001: respond with either *string*, *string*, RETURN or '!' to quit

Cause: An invalid response was entered.

Action: Enter any of the responses shown in the message.

IMP-00002: failed to open *string* for read

Cause: Import failed to open the export file for reading. This message is usually followed by a device message from the operating system.

Action: Take appropriate action to restore the device.

IMP-00003: ORACLE error *number* encountered

Cause: Import encountered the referenced Oracle error.

Action: Look up the Oracle message in the ORA message chapters of this manual, and take appropriate action.

IMP-00004: invalid username or password

Cause: An invalid username or password was specified.

Action: Retry with a valid username and password.

IMP-00005: all allowable logon attempts failed

Cause: An attempt was repeatedly made to log on with an invalid username or password.

Action: Retry with valid username and password.

IMP-00006: failed to allocate memory of size *number*

Cause: Import failed to allocate the necessary memory.

Action: Decrease the import buffer size so that less memory is required, or increase the runtime memory size for Import.

IMP-00007: must be a DBA to import objects to another user's account

Cause: The privileges needed to import into another user's account do not exist. Only a database administrator can import into another user's account.

Action: Ask the database administrator to do the import.

IMP-00008: unrecognized statement in the export file: \n *string*

Cause: Import did not recognize a statement in the export file. Either the export file was corrupted, or an Import internal error has occurred.

Action: If the export file was corrupted, retry with a new export file. Otherwise, report this as an Import internal error and submit the export file to customer support.

IMP-00009: abnormal end of export file

Cause: The export file is probably from an aborted Export session.

Action: If so, retry the export and import. Otherwise, report this as an Import bug and submit the export file that caused this error to customer support.

IMP-00010: not a valid export file, header failed verification

Cause: Either the file was not generated by Export or it was corrupted.

Action: If the file was indeed generated by Export, report this an Import bug and submit the export file to customer support.

IMP-00011: formatted table data not currently supported

Cause: You tried to import an export file that contains formatted table data. Import only supports export files containing binary table data. wher

Action: Retry using an export file that contains only binary table data.

IMP-00012: invalid export mode (*character*) in header

Cause: The Export mode specified in the export file header is invalid.

Action: Check the export file to see if it was corrupted. If it was not, report this as an Import bug and submit the export file to customer support.

IMP-00013: only a DBA can import a file exported by another DBA

Cause: The privileges needed to Import an export file generated by a database administrator do not exist. Only a database administrator can import such files.

Action: Ask the database administrator to do the import.

IMP-00014: option "*string*" is needed, but not present in database

Cause: The command entered requires the specified option. Either that option is not installed, or the row describing the option is missing from table V\$OPTION

Action: Reinstall Oracle with the option specified by the message.

IMP-00015: following statement failed because the object already exists:

Cause: Import failed to create an object because it already exists.

Action: Specify IGNORE=Y to ignore such errors and import rows even when tables are not created because they already exist.

IMP-00016: required character set conversion (type *number to number*) not supported

Cause: Import could not convert the character format of the export file into the native character format.

Action: Change the user character set by setting the NLS_LANG environment variable to match the character set of the export file.

IMP-00017: following statement failed with ORACLE error *number*:

Cause: Import failed to execute the statement from the export file because of an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

IMP-00018: partial import of previous table completed: *number* rows imported

Cause: A table was only partially imported because of an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

IMP-00019: row rejected due to ORACLE error *number*

Cause: Import encountered the referenced Oracle error while trying to import a row.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

IMP-00020: long column too large for column buffer size (*number*)

Cause: The column buffer is too small. This usually occurs when importing LONG data.

Action: Increase the insert buffer size 10,000 bytes at a time (for example). Use this step-by-step approach because a buffer size that is too large may cause a similar problem.

IMP-00021: INCTYPE parameter is obsolete

Cause: Import encountered the INCTYPE parameter when parsing Import options. Incremental Imports are no longer supported.

Action: Consult the Oracle Backup and Recovery guide. Import will attempt to continue.

IMP-00022: failed to process parameters, type 'IMP HELP=Y' for help

Cause: Invalid command-line parameters were specified.

Action: Check the online help screen for the set of valid parameters, then retry.

IMP-00023: Import views not installed, please notify your DBA

Cause: The necessary Import views were not installed.

Action: Ask your database administrator to install the required Import views.

IMP-00024: Only one mode (TABLES, FROMUSER, or FULL) can be specified

Cause: Parameters were specified that conflict with the import specification FULL=Y.

Action: Retry, making sure not to specify FULL=Y.

IMP-00025: for DBA export files, FROMUSER must be specified with TOUSER option

Cause: When importing a database administrator export file, you specified the TOUSER parameter but not the FROMUSER parameter.

Action: Specify the FROMUSER parameter so that Import knows which user's objects to import.

IMP-00027: failed to rollback partial import of previous table

Cause: Import encountered an Oracle error while trying to roll back a partial import.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action. Then, log on to Oracle and check that the partial import was not committed.

IMP-00028: partial import of previous table rolled back: *number* rows rolled back

Cause: Import encountered an Oracle error while trying to import a table.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action. Then, if necessary, re-import the table.

IMP-00029: cannot qualify table name by owner (*string*), use FROMUSER parameter

Cause: A table name was qualified with the name of its owner, as shown in the following example. This is not allowed. IMP SYSTEM/MANAGER TABLES=(SCOTT.EMP)

Action: Use the FROMUSER parameter to specify the table's owner, as shown in the following example: IMP SYSTEM/MANAGER FROMUSER=SCOTT TABLES=(EMP, DEPT)

IMP-00030: failed to create file *string* for write

Cause: Import was unable to create the specified file with write enabled.

Action: Check the file name and file system for the source of the error.

IMP-00031: Must specify FULL=Y or provide FROMUSER/TOUSER or TABLES arguments

Cause: The database administrator did not specify full or partial import.

Action: The database administrator must specify FROMUSER/TOUSER or table arguments if not a full import.

IMP-00032: SQL statement exceeded buffer length

Cause: The buffer was too small for the SQL statement being read.

Action: Rerun with a larger buffer. This can also be an indication of a corruption in the import datafile.

IMP-00033: Warning: Table "*string*" not found in export file

Cause: A table name was specified that does not exist in export file.

Action: Correct the table specification.

IMP-00034: Warning: FromUser "*string*" not found in export file

Cause: The user specified a FROMUSER name that does not exist in export file.

Action: Correct the FROMUSER specification.

IMP-00035: input file *string* must be on a disk

Cause: On some platforms, import can read files from tape. This message is displayed if the first file in an export file set was on disk and you specified a tape device for a second or subsequent file.

Action: Verify that you have specified the correct file name for the import file. Remember that all input files can be either on disk or all files can be on tape, but not mixed both tape and disk.

IMP-00036: Could not find environment character set

Cause: An environment character set was specified that was not recognized by the Import utility.

Action: Ensure that the spelling of the character set specified in the command line parameter CHARSET (for Release 6 only) or the environment variable NLS_LANG is correct.

IMP-00037: Character set marker unknown

Cause: The export file is corrupted.

Action: Try to obtain an uncorrupted version of the export file. If the export file is not corrupted, report this as an Import internal error and submit the export file to customer support.

IMP-00038: Could not convert to environment character set's handle

Cause: Internal error.

Action: Contact Worldwide Support.

IMP-00039: VOLSIZ does not match the value used for export: *string*

Cause: The value specified for VOLSIZ does not match the value specified during the creation of the export file.

Action: If you believe that the specified VOLSIZ value is correct, verify that you specified the correct file for import. If you specified the correct file but are unsure about the correct value, re-execute the import command but specify VOLSIZ=0.

IMP-00040: FILESIZE does not match the value used for export: *string*

Cause: The value specified for FILESIZE does not match the value specified during the creation of the export file.

Action: If you believe the specified FILESIZE value is correct, verify that you specified the correct file for import. If you specified the correct file but are unsure about the correct value, re-execute the import command but specify FILESIZE=0.

IMP-00041: Warning: object created with compilation warnings

Cause: The object in the SQL statement following this error was created with compilation errors. If this error occurred for a view, it is possible that the base table of the view was missing.

Action: This is a warning. The object may have to be recompiled before being used.

IMP-00042: CHARSET used, but the export file has specific character set

Cause: The user requested that a specific character set be used to process an export file that has a specific embedded character set ID. The ID in the export file is accurate and should be used.

Action: Remove the CHARSET keyword from the command line.

IMP-00043: export file character set inconsistent

Cause: The character set of the export file and the environment character set (or the character set specified with the CHARSET keyword) are inconsistent. One character set is ASCII-based while the other is EBCDIC based.

Action: Specify the correct character set with the CHARSET keyword.

IMP-00044: unable to allocate enough memory for statement

Cause: Import was unable to allocate sufficient memory to read in the specified statement and execute it.

Action: Increase the allocation for database buffers, restart the instance, and reexecute the Import command.

IMP-00045: using VOLSIZ value from export file of *string*

Cause: Either you did not specify the VOLSIZ parameter in your IMPORT command, or you specified VOLSIZ=0 and the export was created with a non-zero value for VOLSIZ. Import will use the value specified in the export file.

Action: None required.

IMP-00046: using FILESIZE value from export file of *string*

Cause: Either you did not specify the FILESIZE parameter in your IMPORT command, or you specified FILESIZE=0 and the export file was created with a non-zero value for FILESIZE. Import will use the value specified in the export file.

Action: None required.

IMP-00047: unexpected file sequence number; expected *number* but found *number*

Cause: The header in the export file contains a sequence number that is used to track the order in which multiple export files are written. The first export file is assigned sequence number one, the second file is assigned sequence number two and so on. This message is displayed when a number other than the expected sequence number is found in the file header

Action: Execute the import command again, but specify the files in the order in which Export wrote them.

IMP-00048: mismatched file header

Cause: During verification of the 2nd or subsequent file in a multi-file export, Import found header fields in the file that did not match values in the first file.

Action: Check the names of the files created by Export and verify that you specified them correctly for the import operation.

IMP-00049: Unknown language specified in CHARSET

Cause: An unknown language was listed in the CHARSET option.

Action: Use a known character set.

IMP-00050: Dump file and log file cannot be identical

Cause: Identical names were given to the dump file and log file.

Action: Specify different names for the dump file and log file and retry the operation.

IMP-00051: Direct path exported dump file contains illegal column length

Cause: An invalid column length was encountered while processing column pieces."

Action: Check to make sure the export file is not corrupted, or else report this to Oracle Worldwide Support as an Import/Export internal bug and submit the export file.

IMP-00052: Warning: Unable to set event for freelist communication with server

Cause: An event could not be set for current the session.

Action: If Import fails, give the Import user ALTER SESSION PRIV and retry the operation.

IMP-00053: Import mode incompatible with Export dump file

Cause: The specified import option is incompatible with point-in-time- recovery dump file.

Action: Generate a proper dump file or use point-in-time-recovery import mode.

IMP-00054: must be connected 'AS SYSDBA' to do Point-in-time Recovery or Transportable Tablespace import

Cause: The user must log in 'as SYSDBA' to perform transportable tablespace imports or Point-In-Time Recovery imports.

Action: Ask your database administrator to perform the Transportable Tablespace import or the Tablespace Point-in-time Recovery import.

IMP-00055: Warning: partition or subpartition "*string*":"*string*" not found in export file

Cause: A partition or subpartition name was specified that does not exist in export file.

Action: Check to make sure the partition or subpartition name belongs to the table.

IMP-00056: multiple devices specified for tape input

Cause: You specified multiple file names when doing an import from a tape device. Import uses the same device for reading all tapes, regardless of the number of tape volumes required. For this reason, export will accept only one value for the FILE parameter when writing to tape.

Action: Reenter the IMPORT command, but specify only one tape device in the FILE parameter.

IMP-00057: Warning: Dump file may not contain data of all partitions of this table

Cause: The dump file used for this Table Import might not contain all of the data belonging to the exported table.

Action: Check to see if the export was done as intended, or try performing a Partition Import.

IMP-00059: Failure to initialize parameter manager

Cause: Parameter manager failed in initialization.

Action: Report this to Oracle Worldwide Support as an Import internal bug.

IMP-00060: Warning: Skipping table "*string*."*string*" because object type "*string*."*string*" does not exist or has different identifier

Cause: An object type needed by the table, either does not exist on the * target system or, if it does exist, it has a different object identifier.

Action: Create the object type on the target system with a valid * identifier.

IMP-00061: Warning: Object type "*string*."*string*" already exists with a different identifier

Cause: An object type cannot be created because it already exists on the * target system, but with a different identifier

Action: Drop the object type from the target system and retry the operation.

IMP-00062: Warning: The identifier on the dump file for object type "*string*."*string*" is invalid

Cause: The character string representing the object type's identifier * could not be converted to an object identifier.

Action: Internal error.

IMP-00063: Warning: Skipping table "string"."string" because object type "string"."string" cannot be created or has different identifier

Cause: An error occurred creating an object type that is used by the * table.

Action: Examine the import log to determine why the object type could not * be created. If the object type already existed, with a * different object identifier, then drop the object type and * retry the import.

IMP-00064: Definition of LOB was truncated by export

Cause: While producing the dump file, Export was unable to write the * entire contents of a LOB. Import is therefore unable to * reconstruct the contents of the LOB. The remainder of the * import of the current table will be skipped.

Action: Delete the offending row in the exported database and retry the * export.

IMP-00065: Import is unable to recreate lobes within objects.

Cause: An error occurred recreating a LOB within an imported object.

Action: Report this to Oracle Worldwide Support as an Import internal error.

IMP-00066: Missing NLS_CHARACTERSET in props\$

Cause: No value for NLS_CHARACTERSET in props\$.

Action: Contact Worldwide support.

IMP-00067: Could not convert to server character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

IMP-00068: Could not find environment national character set

Cause: An environment national character set was specified that was not recognized by the Import utility.

Action: Ensure that the spelling of the national character set specified in the environment variable NLS_NCHAR is correct.

IMP-00069: Could not convert to environment national character set's handle

Cause: Internal error..

Action: Contact Worldwide support.

IMP-00070: Lob definitions in dump file are inconsistent with database.

Cause: The number of LOBS per row in the dump file is different than the * number of LOBS per row in the table being populated.

Action: Modify the table being imported so that it matches the column * attribute layout of the table that was exported.

IMP-00071: Object identifier of imported table mismatches object identifier of existing table

Cause: An attempt was made to import data into a table that was recreated under a different object identifier than the object identifier used for the exported object table. Under this situation, REF's to this table that are contained within the dump file will also be invalid.

Action: Drop the offending object table prior to import.

IMP-00072: Warning: The object table's object identifier is invalid.

Cause: The character string representing the table's object identifier could not be converted to an internal object identifier.

Action: Internal error.

IMP-00073: FILE locator "string" "string" is truncated to "string" "string" in server character set

Cause: The conversion of the specified directory and name strings for a file attribute or column from the export server's character set into the import server's character set exceeded the maximum string lengths allowed within FILE descriptors. The strings will be truncated to the maximum supported lengths.

Action: Rename the directory aliases and external filenames to match the truncated names in the specified FILE column or attribute.

IMP-00074: The constraints flagged by ALL_CONSTRAINTS.BAD will break in 2000 A.D.

Cause: Constraints exist in the data base that specify date values without fully specifying the year. These constraints could break in the year 2000 A.D.

Action: Query ALL_CONSTRAINTS and correct those constraints marked as bad.

IMP-00075: Warning: The nested table may contain partial rows or duplicate rows

Cause: An error occurred inserting data into an outer or inner nested table. If the error occurred in the outer table, rows are still inserted into the inner tables. If the error occurred in an inner table, data is still inserted into the outer table and other inner tables. This can result in duplicate inner table rows or partial logical rows.

Action: Examine the data in the tables. Delete the incorrect rows or drop the entire table and perform the import again.

IMP-00076: Missing NLS_NCHAR_CHARACTERSET in props\$

Cause: No value for NLS_NCHAR_CHARACTERSET in props\$.

Action: Contact Worldwide support.

IMP-00077: Could not convert to server national character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

IMP-00078: Cannot translate FILE locator to "string" "string" in server character set

Cause: (1) The current export dump file was generated using Beta-2 of Oracle8.0 AND (2) there was a File that appeared as an attribute of an ADT within a table's column AND (3) the character set of the export server's database was different than the character set of the import server's database AND (4) when the filename or the aliasname of the File increased in size when it was translated to the character set of the import server. When all of these conditions are true, translation of the strings could yield corruption of the data in the column. Rather than proceeding with the translation, import will leave the character strings in the File in the old character set.

Action: After import completes, rename the directory aliases and external filenames to match the real names used for the target database.

IMP-00079: Warning: National character set data in this table may be incorrect

Cause: Due to a problem in 8.0.2 Export, national character data in NCHAR and NVARCHAR2 columns was incorrectly assumed to be in the export server's data base character set and was converted to the export client's data base character set. This

conversion would only be correct if the export server's data base character set was the same as the export server's national character set and the export client's data base character set was the same as the export client's national character set. All other combinations would likely be incorrect. This export dump file was generated by 8.0.2 Export and the export client and server character sets did not fit that criteria.

Action: Examine the national character data. If incorrect, update the data with correct data.

IMP-00080: Error during character conversion of long column or long command

Cause: During piecewise character conversion of the data in a long column or of a long command, a fatal conversion error occurred. Either character truncation occurred or an invalid character set handle was used.

Action: Retry the import with a different character set.

IMP-00081: attempt to free unallocated memory

Cause: An attempt was made to free memory that was not allocated.

Action: Contact Oracle Worldwide Support

IMP-00082: Error during conversion ROWID from string format to internal

Cause: An error occurred while attempting to convert a ROWID from an export dump file into an internal format.

Action: Report this to Oracle Worldwide Support as an Import internal error.

IMP-00083: dump file does not contain an incremental export

Cause: An incremental import was requested and the dump file specified for the import command is either a user or table export.

Action: Reissue the command import command but specify the name of a dump file containing an incremental export.

IMP-00084: attempt to mix incremental import with user or table import

Cause: An incremental import was requested along with the FROMUSER, TOUSER, or TABLE qualifier. An incremental import cannot be done if any of these other qualifiers are also specified.

Action: Determine whether you want to do an incremental import, full import, user import or table import and reissue the import command with the appropriate qualifiers.

IMP-00085: multiple input files specified for unbounded export file

Cause: You specified multiple file names for the FILE parameter when doing an import, but the header in the export file indicates that the export operation could create only one file. Specifying multiple file names is valid for an import operation only if the export files were created by an export operation in which the user specified a non-zero value for the FILESIZE parameter.

Action: If you believe the export contains multiple files, verify that you have specified the correct files. If you believe the export should be in only one file then try the import operation again, but specify only one value for the FILE parameter.

IMP-00086: TOID "string" not found in export file

Cause: Import did not find the type identification specified in the TOID_NOVALIDATE parameter. The specified type identification does not exist in export file.

Action: Correct or omit the TOID_NOVALIDATE parameter.

IMP-00087: Problem with internal hash table of schema/table names

Cause: Most likely a problem with allocating memory for the hash table entries.

Action: Contact Oracle Worldwide Support

IMP-00088: Problem importing metadata for index *string*. Index creation will be skipped

Cause: Domain indexes import private metadata via anonymous PL/SQL blocks prior to the CREATE INDEX statement. The execution of one of these PL/SQL blocks failed. Because the metadata is considered an integral part of the index, the subsequent CREATE INDEX statement was skipped.

Action: Contact the developer of the index's implementation type. If this is an Oracle-supplied index (perhaps via a data cartridge), contact Oracle Worldwide Support.

IMP-00089: Fine grain policy "*string*" not recreated on table/view "*string*"

Cause: Import user fails to recreate fine grained policies of the table/view being imported. To recreate the policy, the user doing the import needs execute privilege on the package DBMS_RLS for access policies or DBMS_FGA for audit policies.

Action: Ask the database administrator to perform the export/import of this table/view.

IMP-00090: Unexpected DbmsJava error *number* at step *number* while creating *string*

Cause: The error was returned from a call to a DbmsJava procedure.

Action: Record the accompanying messages and report this as an Import internal error to customer support.

IMP-00091: Above error occurred on the following function and object: *string*. Remaining PL/SQL blocks for this object will be skipped.

Cause: An error occurred while executing a PL/SQL block that implements the DDL for the named function and procedural object. A procedural object is one whose DDL is implemented as stored procedures rather than as standard SQL statements.

Action: Contact Oracle Worldwide Support so they may determine the development group responsible for the package that failed.

IMP-00092: Java object "*string*"."*string*" already exists, cannot be created

Cause: Import failed to create the Java source, class or resource object because it already exists.

Action: Drop the object type from the target system and retry the operation.

IMP-00093: Inconsistency between dumpfile constraint definition for table *string* with columns (*string*)

Cause: Import failed to locate a base table for a constraint that was defined in the dump file and statistics were not imported.

Action: Check to see if the table and constraint exist. If the table and constraint exist, then report this to Oracle Support Services as an Import internal error.

IMP-00094: Warning: The identifier on the dump file for object type "*string*"."*string*" is invalid

Cause: The character string representing the object type's identifier * could not be converted.

Action: Contact Oracle Worldwide Support.

IMP-00095: Resumable parameters ignored -- current session not resumable

Cause: Current session is not resumable.

Action: Must specify RESUMABLE=Y to enable resumable session in order for the RESUMABLE_NAME and RESUMABLE_TIMEOUT parameters to take effect.

IMP-00096: Warning: Skipping table "*string*".*string*" because type synonym "*string*".*string*" cannot be created

Cause: An error occurred creating a synonym for a type that is used by the * table.

Action: Examine the import log to determine why the type synonym could * not be created. If the synonym already existed, but is not * needed, then drop the synonym and retry the import. If the * synonym is PUBLIC but the importer does not have the * CREATE PUBLIC SYNONYM system privilege, then the import must * be done by someone possessing that privilege, or the importer * must be granted the privilege.

IMP-00097: \nSTREAMS_CONFIGURATION=Y ignored, only valid with FULL=Y

Cause: STREAMS_CONFIGURATION=Y can only be used * when FULL=Y is present on the command line

Action: Remove conflicting command arguments

IMP-00098: INTERNAL ERROR: *string*

Cause: An INTERNAL error occurred.

Action: Contact Oracle Worldwide Support.

IMP-00099: Warning: The typeid in the dump file for object type "*string*".*string*" is invalid

Cause: The character string representing the object type's identifier * could not be converted.

Action: Contact Oracle Worldwide Support.

IMP-00400: Warning: Object type "*string*".*string*" already exists with a different typeid

Cause: An object type could not be created because it already existed on the * target system, but with a different typeid

Action: Drop the object type from the target system and retry the operation.

IMP-00401: dump file "*string*" may be an Data Pump export dump file

Cause: A dump file was specified for an import operation which appears to have been created using the Data Pump export utility. These dump files cannot be processed by the original import utility.

Action: Try using the Data Pump import utility to process this dump file.

IMP-00402: Invalid parameter "*string*" with data_only mode

Cause: Parameter provided along data_only is invalid.

Action: Remove the invalid parameter from command line.

IMP-00403: \n\nWarning: This import generated a separate SQL file "*string*" which contains DDL that failed due to a privilege issue.\n

Cause: The import failed because the DDL had insufficient privileges.

Action: Connect as SYSDBA and run the SQL file.

INS-00001 to INS-30000

INS-00001: Unknown irrecoverable error

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services

INS-00002: Unhandled exception

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services

INS-00003: Application startup failed

Cause: An unexpected error occurred while loading the application configuration or other startup resources.

Action: Refer to the logs or contact Oracle Support Services

INS-00004: Unable to load help

Cause: One or more help configuration files were not readable or not in the correct format.

Action: Contact Oracle Support Services or refer to the software manual.

INS-00005: Invalid application configuration

Cause: The given application configuration is not compliant to the expected schema.

Action: Contact Oracle Support Services

INS-00006: No resource bundle is associated to the Resource instance

Cause: Specified resource bundle *string* is not found in the classpath.

Action: Ensure that the required libraries are in the classpath.

INS-00007: Help not available for this application

Cause: No additional information available.

Action: Contact Oracle Support Services support or refer software manual.

INS-00008: Help topic not found

Cause: The current user interface do not have help content associated with it.

Action: Contact Oracle Support Services or refer to the software manual.

INS-01001: Failed to create parent directories while copying *string* to *string*

Cause: Unexpected error occurred while creating the nonexistent parent directories of the destination file *string*

Action: Manually verify whether the destination directory is possible to be created.

INS-01002: Copy failed as the source file *string* do not exist

Cause: No additional information available.

Action: Ensure that the source file exist.

INS-01003: Copy failed as the source path *string* do not correspond to a file.

Cause: Copy routine expects a source path, which represents a file.

Action: Ensure that the source is a file and destination is a file or a directory. Note: if the destination is a directory, then the source file will be copied in the same name, under the destination directory.

INS-01004: *string* is not directory.

Cause: The archive extraction routine expects the destination to be a directory.

Action: Ensure that destination is a directory

INS-01005: Failed to copy file from *string* to *string*

Cause: Unexpected error occured while copying the file.

Action: Refer to the logs for more details.

INS-01006: The file *string* cannot be copied onto itself.

Cause: The source file and destination file are same.

Action: Ensure that the destination file is different from the source file.

INS-01007: The directory *string* cannot be copied onto itself

Cause: The source directory and destination directory are same.

Action: Ensure that the destination directory is different from the source directory.

INS-01008: Copy failed as the destination file *string* already exists.

Cause: No additional information available.

Action: Ensure that the destination file do not exist or use overwrite option to overwrite the destination file.

INS-01009: *string* is not valid archive.

Cause: The given archive path, either do not correspond to a file or do not exist.

Action: Ensure that the given source path correspond to a valid archive location.

INS-01010: Unable to save file to the specified location.

Cause: The specified location may not be writable.

Action: Specify a location that is writable.

INS-04001: Invalid command line arguments xml file (*string*). Either application could not detect command line arguments xml file or contains syntactically incorrect information.

Cause: n/a

Action: n/a

INS-04002: Application could not parse command line arguments xml file (*string*). Either XPathExpressionException or IOException occurred while parsing command line arguments xml file.

Cause: n/a

Action: n/a

INS-04003: Invalid argument passed from command line. Specified argument (*string*) is not a supported argument for this application.

Cause: n/a

Action: n/a

INS-04004: Value is not specified for comamnd line argument: *string*. Specify valid value for the mentioned argument. Refer application help for more details.

Cause: n/a

Action: n/a

INS-04005: Invalid argument passed from command line: *string*. Specified argument is not a supported for the current operating system.

Cause: n/a

Action: n/a

INS-04006: Invalid combination of arguments passed from command line. Arguments [*string,string*] cannot be passed together in the same application session.

Cause: n/a

Action: n/a

INS-04007: Invalid argument passed from command line: *string*

Cause: n/a

Action: n/a

INS-04008: Invalid combination of arguments passed from command line. One or more mandatory dependent arguments are not passed for the arugment: *string*

Cause: n/a

Action: n/a

INS-04009: The argument [*string*] passed is not supported for the current context *string*

Cause: n/a

Action: n/a

INS-06001: Failed to perform operation due to internal driver error.

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services

INS-06002: Authentication failed.

Cause: Failed to login into the selected nodes.

Action: Check shared unix password. Locked accounts or accounts with no password are not supported. Contact Administrator or refer logs for more details.

INS-06003: Failed to setup passwordless SSH connectivity with the following node(s): *string*

Cause: It is possible that the failed nodes are running different Operating System or not reachable. If they are reachable and running the same Operating System as the local machine, it is possible that the SSH daemon is not configured on the selected nodes.

Action: Ensure that the failed nodes are reachable, running the same Operating System and have support for SSH connectivity.

INS-06004: File operation on user's .ssh directory is not permitted.

Cause: Write permission not set for either user's home directory or .ssh directory under user's home directory.

Action: Ensure that .ssh directory is either allowed to be created under user's home directory or .ssh directory allows files to be written into it.

INS-06005: Unable to get SSH connectivity details.

Cause: An unexpected error occurred while getting SSH connectivity details across the selected nodes.

Action: Refer to the logs for more details or contact Oracle Support Services.

INS-06006: Passwordless SSH connectivity not set up between the following node(s): *string*.

Cause: Either passwordless SSH connectivity is not setup between specified node(s) or they are not reachable. Refer to the logs for more details.

Action: Refer to the logs for more details or contact Oracle Support Services.

INS-06007: SSH connectivity check operation disabled

Cause: Either the property named 'oracle.install.ssh.setupCheckEnabled' is set to true in Java system properties or the internal driver had disabled this operation.

Action: Try setting 'oracle.install.ssh.setupCheckEnabled=true' as Java system property or contact Oracle Support Services.

INS-06008: SSH connectivity setup operation disabled

Cause: Either the property named 'oracle.install.ssh.setupEnabled' is set to true in Java system properties or the internal driver had disabled this operation.

Action: Try setting 'oracle.install.ssh.setupEnabled=true' as Java system property or contact Oracle Support Services.

INS-06101: IP address of localhost could not be determined

Cause: The localhost is not mapped to a valid IP address in Hosts file (Eg. /etc/hosts in Unix).

Action: Assign a valid IP address for the localhost or set it to loopback IP address (127.0.0.1 in IPv4 or ::1 in IPv6).

INS-07001: Value for property '*string*' not found in the bean store.

Cause: No additional information available.

Action: It is not mandatory that all properties are to be in a given bean store. This error can be ignored if the given property is not expected to be in the bean store.

INS-07002: Unable to get the type definition for property named '*string*' of bean type '*string*'

Cause: No additional information available.

Action: Ensure that the properties in the bean type are correctly defined.

INS-07003: Unexpected error occurred while accessing the bean store

Cause: No additional information available.

Action: Refers logs or contact Oracle Support Services

INS-07004: Invalid bean store

Cause: Either the bean store is corrupt or it does not have access to the underlying data source.

Action: Refers logs or contact Oracle Support Services

INS-07005: The given beans cannot be written because there is no bean store assigned to the bean store writer.

Cause: No additional information available

Action: Refers logs or contact Oracle Support Services

INS-07006: Unable to save the bean store to the given target.

Cause: Either the target is not accessible or an unexpected error occurred while saving the bean store.

Action: Refers logs or contact Oracle Support Services

INS-07007: Failed to open or create a bean store reader.

Cause: Either the bean store is corrupt or it does not have access to the underlying data source.

Action: Refers logs or contact Oracle Support Services

INS-07008: The format of the bean store is not specified

Cause: No additional information available.

Action: Refers logs or contact Oracle Support Services

INS-07009: Unable to load bean store

Cause: Unexpected error while loading the bean store.

Action: Refers logs or contact Oracle Support Services

INS-07010: Invalid argument *string*

Cause: The argument for a given property did not comply with either the specification, schema, or rules.

Action: Ensure that given arguments are of the expected data type or schema

INS-08001: Flow configuration is syntactically incorrect

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08005: View class may not exist or a fully qualified View class name is not given.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08007: Fully qualified Action class name is not given.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08011: Route identifier '*string*' mentioned in the transition may not exist.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08012: Unknown View Identifier '*string*' associated to a state.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08013: Unknown Validator class '*string*' associated to a state.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08014: Fully qualified Condition class name is not given.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08015: No transition specified for condition defined at state '*string*'.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08101: Unexpected error while executing the action at state: '*string*'

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08102: Unexpected error occurred while transitioning from state '*string*'

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08103: Null route returned by state '*string*'.

Cause: The route was not chosen from the current state in order to proceed further.

Action: No additional information available.

INS-08104: Route '*string*' returned by state '*string*' is not found in the flow configuration.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08106: Unexpected error occurred while loading the view '*string*' associated to state '*string*'.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08107: Failed while processing user inputs at state '*string*'.

Cause: Unexpected error occurred while processing the inputs from view '*string*' associated to state '*string*'.

Action: No additional information available.

INS-08108: Failed while localizing the view

Cause: Unexpected error occurred while localizing the view '*string*' associated to state '*string*'.

Action: No additional information available.

INS-08109: Unexpected error occurred while validating inputs at state '*string*'.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08110: Invalid checkpoint file '*string*'.

Cause: Session restoration failed since the given checkpoint file may have been syntactically incorrect or did not exist.

Action: No additional information available.

INS-08801: View class referred by view ID '*string*' not found.

Cause: The given View class was not found in the classpath.

Action: No additional information available.

INS-08802: Unable to instantiate the View class referred by View ID '*string*'.

Cause: The given class do not represent a valid View class or an unexpected error occurred while instantiating it.

Action: No additional information available.

INS-10002: Inventory initialization failed

Cause: Inventory exist, but an unexpected error occurred while initializing it.

Action: Ensure that the inventory is not corrupt. Otherwise contact Oracle Support Services or refer logs.

INS-10006: Scratch path '*string*' is not valid.

Cause: The specified scratch path is either not accessible or do not exist.

Action: Contact Oracle Support Services or refer logs

INS-10008: Session initialization failed

Cause: An unexpected error occurred while initializing the session.

Action: Contact Oracle Support Services or refer logs

INS-10010: Scratch path not defined or set

Cause: Not additional information available

Action: Contact Oracle Support Services

INS-10012: Setup driver initialization failed.

Cause: An unexpected error occurred while initializing the underlying setup driver.

Action: Contact Oracle Support Services or refer logs

INS-10013: The installer has detected that current home is not registered in the central inventory on this system.

Cause: This can happen for the following reasons - either *string* has not been run or script failed to update the inventory.

Action: Run the script as a root user.

INS-10014: The installer has detected that current home is not registered in the central inventory on the node(s): *string*.

Cause: This can happen for the following reasons - either *string* has not been run or script failed to update the inventory.

Action: Run the script as a root user.

INS-10015: Argument (*string*) passed from the command line is invalid.

Cause: n/a

Action: n/a

INS-10016: Installer failed to update the cluster related details, for this Oracle home, in the inventory on all/some of the nodes

Cause: n/a

Action: n/a

INS-10101: The given response file *string* is not found.

Cause: The given response file is either not accessible or do not exist.

Action: Give a correct response file location. (Note: relative path is not supported)

INS-10102: Installer initialization failed.

Cause: An unexpected error occurred while initializing the Installer.

Action: Contact Oracle Support Services or refer logs

INS-10103: Response file is not specified for this session.

Cause: Response file was not specified for this session. A silent session requires input from a response file or from the command line.

Action: Specify the response file and rerun the installer.

INS-10104: The given response file is not accessible.

Cause: Current user may not have read permission.

Action: Ensure that the current user have permission to read the given response file.

INS-10105: The given response file *string* is not valid.

Cause: Syntactically incorrect response file. Either unexpected variables are specified or expected variables are not specified in the response file.

Action: Refer the latest product specific response file template

INS-10106: The format of the given response file is not supported.

Cause: The response file format was incorrect or not supported.

Action: Use response files of type *string*.

INS-10107: Argument `\string\` is not supported for this session.

Cause: Argument `\string\` is specified for this session. This option is supported only in case of silent installation.

Action: Ensure that you have specified correct arguments to the installer.

INS-10108: The given response file name is not valid.

Cause: It contains special characters.

Action: Specify the response file name which does not have special characters.

INS-13001: Environment does not meet minimum requirements.

Cause: Minimum requirements were not met for this environment

Action: Either check the logs for more information or check the supported configurations for this product.

INS-13010: Automatic prerequisite fix up is not supported

Cause: No additional information available

Action: Refer logs and fix up all prerequisites manually.

INS-13011: No automatic prerequisite fix up routine available.

Cause: Automatic fix up is not supported, hence no fix up routine generated.

Action: Refer logs and fix up all prerequisites manually.

INS-13012: Automatic prerequisite fix up is not performed or is incomplete.

Cause: User has either cancelled the operation or did not execute the automatic prerequisite fix up routines.

Action: Run the automatic fix up routines or refer logs and fix up all prerequisites manually.

INS-13013: Target environment does not meet some mandatory requirements.

Cause: Some of the mandatory prerequisites are not met. See logs for details. *string*

Action: Identify the list of failed prerequisite checks from the log: *string*. Then either from the log file or from installation manual find the appropriate configuration to meet the prerequisites and fix it manually.

INS-13014: Target environment does not meet some optional requirements.

Cause: Some of the optional prerequisites are not met. See logs for details. *string*

Action: Identify the list of failed prerequisite checks from the log: *string*. Then either from the log file or from installation manual find the appropriate configuration to meet the prerequisites and fix it manually.

INS-13015: The path *string* provided for cvu_prereq.xml is invalid.

Cause: The path *string* provided for cvu_prereq.xml is invalid.

Action: Provide a valid path of cvu_prereq.xml. It must be specified as an absolute pathname.

INS-13016: You have chosen to ignore some of the prerequisites for this installation. This may impact product configuration.

Cause: You have chosen to ignore failed prerequisites and proceed with the installation.

Action: Ensure that the failed prerequisites are fixed before proceeding.

INS-13017: Installer is unable to run the fixup script.

Cause: This might be because of the incorrect credentials provided for configuration script execution.

Action: Ensure that the correct credentials provided for configuration script execution. Also refer log files for more details.

INS-13018: Installer is unable to run the fixup script.

Cause: An exception occurred while running the fixup script or during fixup script result collection.

Action: Refer log files for more details.

INS-20701: Unexpected internal driver error

Cause: A call to internal Oracle cluster API failed.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-20702: Unexpected internal driver error

Cause: A call to cluster verification utility failed.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-20801: Configuration Assistant '*string*' failed.

Cause: Refer to the logs for additional information.

Action: Refer to the logs or contact Oracle Support Services.

INS-20802: *string* failed.

Cause: The plug-in failed in its perform method

Action: Refer to the logs or contact Oracle Support Services.

INS-20803: The optional tool named '*string*' failed.

Cause: Refer to the logs for additional information.

Action: Refer to the logs or contact Oracle Support Services. As '*string*' is an optional tool, it is safe to ignore this failure and proceed with the installation.

INS-20804: *string* aborted.

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services.

INS-20805: *string* is not activated

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services.

INS-20806: *string* not executed.

Cause: The plug-in was not executed or unavailable

Action: Refer to the logs or contact Oracle Support Services.

INS-20807: *string* is not valid.

Cause: The action of the specified type could not be found in the referred aggregate

Action: Refer to the logs or contact Oracle Support Services.

INS-20808: Action already referenced.

Cause: The action was already referred to by a previous micro step

Action: Refer to the logs or contact Oracle Support Services.

INS-20809: Execution of '*string*' not enabled

Cause: The invocation of plug-in *string* is not active

Action: Refer to the logs or contact Oracle Support Services.

INS-20810: Target or command for '*string*' not valid.

Cause: The specified external command or internal plug-in could not be executed

Action: Refer to the logs or contact Oracle Support Services.

INS-20811: *string* parameters are not initialized

Cause: An argument of plug-in '*string*' referenced an uninitialized Parameter

Action: Refer to the logs or contact Oracle Support Services.

INS-20812: Unexpected error while executing '*string*'

Cause: An unspecified error occurred while attempting to perform the micro step.

Action: Refer to the logs or contact Oracle Support Services.

INS-20813: *string* not found

Cause: The referred aggregate could not be found

Action: Refer to the logs or contact Oracle Support Services.

INS-20814: The aggregate of '*string*' is not activated

Cause: The reference to the referred aggregate is set inactive

Action: Refer to the logs or contact Oracle Support Services.

INS-21001: ORACLE_HOME was not specified for clone.

Cause: n/a

Action: n/a

INS-21002: ORACLE_BASE was not specified for clone.

Cause: n/a

Action: n/a

INS-21003: Installer has detected that an invalid inventory pointer location file was specified.

Cause: Installer has failed to detect the inventory group owner from the inventory pointer location file.

Action: Ensure the Inventory location file oraInst.loc is corrected or specify a valid Inventory Pointer Location file

INS-30001 to INS-35000

INS-30001: The *string* password is empty.

Cause: The *string* password should not be empty.

Action: Provide a non-empty password.

INS-30002: The *string* password and *string* confirm password are not same.

Cause: The *string* password and *string* confirm password should be the same.

Action: Ensure that *string* password and *string* confirm password are the same.

INS-30003: The *string* password length is too long.

Cause: The *string* password length cannot exceed *string* characters.

Action: Provide a password lesser than *string* characters.

INS-30004: The *string* password entered is invalid.

Cause: Passwords may contain only alphanumeric characters from the chosen database character set, underscore (_), dollar sign (\$), or pound sign (#).

Action: Provide a password as per recommendations.

INS-30005: The *string* password entered is missing recommended characters.

Cause: The *string* password entered is missing recommended characters. Oracle recommends that passwords contain at least one *string*.

Action: Provide a password which contains at least one *string*.

INS-30006: The password specified is too short.

Cause: Oracle recommends that the *string* password entered should be at least *string* characters in length.

Action: Provide a password which is at least *string* characters in length.

INS-30007: Unable to get the raw device partition size.

Cause: Unexpected error occurred while trying to get the raw device partition size.

Action: Refer to the logs for more details.

INS-30008: Refer to the logs for more details.

Cause: Unexpected error occurred while trying to get the FS device partition size.

Action: Refer to the logs for more details.

INS-30009: Unable to get the FS partition free space size

Cause: Unable to get the FS partition free space size

Action: Unable to get the FS partition free space size

INS-30010: Unable to get the file system type.

Cause: Unexpected error occurred while trying to get the file system type.

Action: Refer to the logs for more details.

INS-30011: The *string* password entered does not conform to the Oracle recommended standards.

Cause: Oracle recommends that the password entered should be at least *string* characters in length, contain at least 1 uppercase character, 1 lower case character and 1 digit [0-9].

Action: Provide a password that conforms to the Oracle recommended standards.

INS-30013: Unable to check whether the partition is raw.

Cause: Unexpected error occurred while trying to check whether the partition is raw.

Action: Refer to the logs for more details.

INS-30014: Unable to check whether the location specified is on CFS

Cause: The location specified might not have the required permissions.

Action: Provide a location which has the appropriate required permissions.

INS-30015: An error occurred during setting permission.

Cause: Unexpected error occurred during setting permission.

Action: Refer to the logs for more details.

INS-30016: Unable to load the install inventory.

Cause: Unable to lock or read the install inventory.

Action: Check the permissions on the inventory location.

INS-30017: Install inventory does not exist.

Cause: Install inventory does not exist.

Action: Ensure that the install inventory exists.

INS-30018: Unable to get all the previously installed Oracle Home locations.

Cause: Error occurred while retrieving the oracle home locations.

Action: Check if the existing inventory location is accessible.

INS-30020: Unable to get the default oradata location.

Cause: Unexpected error occurred while trying to get the default oradata location.

Action: Refer to the logs for more details.

INS-30021: Unable to get Oracle RAC databases info.

Cause: Unexpected error occurred while trying to get RAC databases info.

Action: Refer to the logs for more details.

INS-30022: Unable to get SIDs and DB Homes on remote nodes.

Cause: Unexpected error occurred while trying to get SIDs and DB Homes on remote nodes.

Action: Refer to the logs for more details.

INS-30023: Unable to get SIDs and DB Homes on node *string*.

Cause: Unexpected error occurred while trying to get SIDs and DB Homes on node *string*.

Action: Refer to the logs for more details.

INS-30042: IO Exception occurred.

Cause: IO Exception occurred.

Action: Refer to the logs for more details.

INS-30043: The Grid Infrastructure home *string* does not exist or is empty.

Cause: Installer has detected Grid Infrastructure home (*string*) registered in the Inventory. But the home location does not exist or is empty.

Action: Check if the location specified is a valid Grid Infrastructure home. If not unregister the home from inventory using deinstall procedures.

INS-30044: Create Install Session Exception.

Cause: Refer to the logs for more details.

Action: Refer to the logs for more details.

INS-30045: Unable to find the specified Oracle Home.

Cause: Refer to the logs for more details.

Action: Refer to the logs for more details.

INS-30046: Unable to find product in Oracle Inventory.

Cause: Refer to the logs for more details.

Action: Refer to the logs for more details.

INS-30047: Multiple versions of the product were found.

Cause: Refer to the logs for more details.

Action: Refer to the logs for more details.

INS-30048: Incorrect format used in the given cluster configuration file.

Cause: The content of cluster configuration file do not conform to the format recommended.

Action: Ensure that the contents of the cluster configuration file conform to the expected format.

INS-30049: The given cluster configuration file could not be read.

Cause: Unexpected error while reading the given cluster configuration file.

Action: Ensure that the given cluster configuration file exists and has the read permissions.

INS-30051: Failed while checking for *string* directory existence on remote node (*string*).

Cause: User equivalence may not be setup between the local node and the remote nodes or sufficient file permissions are not set.

Action: Setup user equivalence or ensure sufficient file permissions are set.

INS-30052: Check for free disk space across nodes failed.

Cause: Unexpected error occurred while trying to check free disk space across nodes.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-30053: Check for shared partitions across nodes failed.

Cause: Unexpected error occurred while trying to get shared partitions across nodes.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-30054: Check for file system type across nodes failed.

Cause: Unexpected error while detecting file system type across nodes.

Action: Refer to the logs or contact Oracle Support Services.

INS-30055: Incorrect node role provided.

Cause: Node role *string* provided on line number *string* of the Cluster Configuration File is not valid.

Action: Specify a valid node role.

INS-30056: Host name contains invalid characters.

Cause: The host name *string* provided on line number *string* of the Cluster Configuration File contains one or more invalid characters.

Action: Ensure that the host name contains only valid characters. Valid characters for host names can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen (-) and dot (.).

INS-30057: Host name cannot be empty.

Cause: The node provided on line number *string* of the Cluster Configuration File does not contain private host name.

Action: Ensure the Cluster Configuration File provided is valid.

INS-30060: Check for group existence failed.

Cause: Unexpected error occurred while trying to check for group existence.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-30070: There are processes running in the currently selected Oracle Home.

Cause: Software is already running from the home selected for the install.

Action: Shutdown the following processes before continuing: *string*

INS-30071: An error occurred while trying to determine the running processes or services.

Cause: A runtime error

Action: Refer to the logs or contact Oracle Support Services.

INS-30072: There are services running from the currently selected Oracle Home.

Cause: Files that need to be reinstalled or upgraded in this home are currently in use by running services.

Action: Please stop the following services before continuing: *string*

INS-30073: There is software running from the currently selected Oracle Home.

Cause: Files that need to be reinstalled or upgraded in this home are currently in use by one or more applications.

Action: Please close any running applications before continuing.

INS-30080: *string* did not resolve to an IP address. Provide alternative name that resolves to an IP address.

Cause: n/a

Action: n/a

INS-30081: *string* could not be resolved using TCP/IP host name lookup. Provide valid name that can be resolvable using TCP/IP host name lookup.

Cause: n/a

Action: n/a

INS-30090: Check for connectivity across all nodes through the interface *string* has failed.

Cause: Unexpected error while checking connectivity of nodes through the interface.

Action: Refer to the logs or contact Oracle Support Services.

INS-30100: Insufficient disk space on the selected location (*string*).

Cause: Specified location is on a volume without enough disk space on nodes: *string*.

Action: Choose a location that has enough space (minimum of *string*MB) or free up space on the existing volume.

INS-30110: Installer has failed to perform status check on Oracle Clusterware configured.

Cause: Unexpected error occurred while trying to perform status check on existing Oracle Clusterware.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-30120: Specified file (*string*) doesnt exist.

Cause: n/a

Action: n/a

INS-30131: Initial setup required for the execution of installer validations failed.

Cause: Failed to access the temporary location.

Action: Ensure that the current user has required permissions to access the temporary location.

INS-30132: Initial setup required for the execution of installer validations failed on nodes: *string*

Cause: Indicated nodes were not reachable, or the user equivalence is not available for those nodes, or the user failed to access the temporary location on the indicated nodes.

Action: Ensure that all the indicated nodes are reachable, user equivalence exists for those nodes and current user has required permissions to access the temporary location on all the indicated nodes.

INS-30140: Client data file not specified.

Cause: n/a

Action: n/a

INS-30141: Client data file is not a valid file.

Cause: n/a

Action: n/a

INS-30142: Specified client data file is not a valid file.

Cause: n/a

Action: n/a

INS-30150: Installer has detected that the specified GNS client data file is invalid.

Cause: n/a

Action: n/a

INS-30151: An unexpected exception occurred while extracting Sub-domain info from GNS client data file

Cause: n/a

Action: n/a

INS-30155: Host name contains invalid characters.

Cause: n/a

Action: n/a

INS-30156: Host name cannot be in IP Address format.

Cause: n/a

Action: n/a

INS-30157: The following nodes cannot be clustered due to user equivalence issue: *string*.

Cause: The user performing this installation is not configured identically on all nodes. This may be due to differences in the user or group IDs, or to SSH configuration issues.

Action: If necessary, refer to the installation guide for information about how to set up user equivalence manually on cluster nodes.

INS-30158: One or more host names you provided are invalid, as they do not resolve to a valid IP address.

Cause: n/a

Action: n/a

INS-30159: Node information was entered for two or more nodes that belonged to different domains.

Cause: n/a

Action: n/a

INS-30160: An unexpected exception occurred while extracting details from ASM client data file

Cause: n/a

Action: n/a

INS-30160: Installer has detected that the nodes *string* specified for addnode operation have uncleaned inventory.

Cause: n/a

Action: n/a

INS-30161: An unexpected exception occurred while extracting ASM Cluster name from ASM client data file

Cause: n/a

Action: n/a

INS-30162: An unexpected exception occurred while extracting ASM client cluster name from ASM client data file

Cause: n/a

Action: n/a

INS-30501: Automatic Storage Management software is not configured on this system.

Cause: Prior to configuring a database to use Automatic Storage Management (ASM), you must install and configure Grid Infrastructure, which includes ASM software.

Action: Grid Infrastructure can be installed from the separate installation media included in your media pack. Alternatively, it can be downloaded separately from Electronic Product Delivery (EPD) or the Oracle Technology Network (OTN). This is typically installed as a separate operating system user than the Oracle database and may have been installed by your system administrator. See the installation guide for more details.

INS-30502: No ASM disk group found.

Cause: There were no disk groups managed by the ASM instance *string*.

Action: Use Automatic Storage Management Configuration Assistant to add disk groups.

INS-30503: Unknown ASM disk group.

Cause: There was no disk groups named *string* managed by ASM instance *string*

Action: Enter a valid existing ASM disk group or use Automatic Storage Management Configuration Assistant to add the desired ASM disk group.

INS-30504: Missing ASM disk group name.

Cause: ASM disk group name was not specified.

Action: Enter a valid ASM disk group name.

INS-30505: Invalid disk group name.

Cause: The disk group name specified was invalid. It must start with an alphabetic character, and consist of up to 30 characters which are alphabetic, numeric, or the characters \$, # and _.

Action: Enter a valid disk group name containing only alphanumeric characters and possibly a few special characters allowed by your platform.

INS-30506: Invalid redundancy level.

Cause: Redundancy level was invalid.

Action: Choose a valid redundancy level: High, Normal or External.

INS-30507: Empty ASM disk group.

Cause: No disks were selected from a managed ASM disk group.

Action: Select appropriate number of disks from a managed ASM disk group.

INS-30508: Invalid ASM disks.

Cause: The disks *string* were not valid.

Action: Please choose or enter valid ASM disks.

INS-30509: Insufficient space available in the selected disk group.

Cause: Insufficient space available in the selected disk group. At least, *string* MB of space is required.

Action: Use Automatic Storage Management Configuration Assistant to add more disks to the selected disk group or create a new disk group with as least *string* MB of space.

INS-30510: Insufficient number of ASM disks selected.

Cause: The number of disks selected were insufficient for the selected redundancy level.

Action: For a disk group with redundancy level '*string*', at least '*string*' disks are recommended.

INS-30511: An older ASM instance was found.

Cause: Automatic Storage Management (ASM) *string* instance is found.

Action: Upgrade the existing ASM instance to version *string*.

INS-30512: Automatic Storage Management software is not configured on this cluster.

Cause: Prior to configuring a cluster database to use Automatic Storage Management (ASM), you must configure ASM software in the Grid Infrastructure home.

Action: Grid Infrastructure installation on this cluster was only configured to run Oracle Clusterware. You will need to go back to the Grid Infrastructure home and configure ASM for storing database. Grid Infrastructure is typically installed as a separate operating system user than the Oracle database and may have been installed by your system administrator. See the installation guide for more details.

INS-30513: ASM instance is not running on one or more nodes in the cluster.

Cause: The following nodes did not have an ASM instance running on them. Node list: *string*

Action: Before creating a database that uses ASM on all of the nodes chosen for this installation, you should extend the ASM cluster of instances using the Add Instance procedure to the desired set of nodes. Node list: *string*

INS-30514: The ASM diskgroup name has exceeded *string* characters.

Cause: n/a

Action: n/a

INS-30515: Insufficient space available in the selected disks.

Cause: Insufficient space available in the selected Disks. At least, *string* MB of free space is required.

Action: Choose additional disks such that the total size should be at least *string* MB.

INS-30516: Please specify unique disk groups.

Cause: Installer has detected that the diskgroup name provided already exists on the system.

Action: Specify different disk group.

INS-30517: Automatic Storage Management software is not configured on this system.

Cause: n/a

Action: n/a

INS-30518: Invalid Disk Discovery Path specified.

Cause: The Disk Discovery Path specified is invalid. Disk Discovery Path must not contain \$, \\ or ? characters.

Action: Ensure Disk Discovery Path provided does not contain \$, \\ or ? characters.

INS-30519: Allocation unit size can only be one of the following value set *string*.

Cause: The allocation unit size (AU Size) is set to an invalid number.

Action: Set the allocation unit size be one of the following value set *string*.

INS-30520: Incorrect Disk Group name specified.

Cause: The Disk Group name specified is incorrect. Disk Group name cannot be a SQL reserved word.

Action: Enter a Disk Group name that is not a SQL reserved word.

INS-30521: The size of disks selected is not the same so as to allow for equal number of *string*MB AU size blocks.

Cause: n/a

Action: n/a

INS-30521: Selected Disk group can not be used as storage location.

Cause: Installer has detected that the value of ASM compatibility attribute of the diskgroup *string* is *string*. The value of the attribute should be atleast *string* to use it as storage location for the database.

Action: Update the value of ASM compatibility attribute of the diskgroup to *string*. Refer to the Storage Administration documentation for further information.

INS-30522: Insufficient space available in the server clusters disk group.

Cause: The selected diskgroup does not have sufficient space. A minimum of *string* MB space is required.

Action: Add new disks to the disk group to meet the space requirement. Alternatively, select a new diskgroup with required space of *string* MB.

INS-30601: File access permissions error encountered.

Cause: n/a

Action: n/a

INS-30602: ASM access denied.

Cause: A connection to the Automatic Storage Management (ASM) instance on this system could not be established.

Action: To ensure a proper connection, the operating system user performing this installation must be a member of the OSDBA group of the ASM instance. See the installation guide for more information on the proper system setup required for running ASM and database instances as separate operating system users. Refer to Oracle error description for ORA-01031 for additional details.

INS-30603: Cluster Ready Services (CRS) is not running on local node.

Cause: n/a

Action: n/a

INS-30604: Required drivers are not found to perform the operation.

Cause: n/a

Action: n/a

INS-30605: The ASM instance is detected to be not running.

Cause: n/a

Action: n/a

INS-30606: Partial installation of ASM home is detected.

Cause: n/a

Action: n/a

INS-30607: No ASM found on the box.

Cause: n/a

Action: n/a

INS-30701: The partition is invalid.

Cause: The partition provided was not available on the system.

Action: Provide a partition that is available on the system.

INS-32001: No value has been given for the Password field.

Cause: A value was not specified for the Password field.

Action: Specify a value for the password field.

INS-32002: Invalid password.

Cause: The password entered in the Confirm password field did not match the password entered in the Password field.

Action: Enter the same password in both Password and Confirm password fields for confirmation purposes.

INS-32008: Oracle base location cant be same as the user home directory.

Cause: The specified Oracle base is same as the user home directory.

Action: Provide an Oracle base location other than the user home directory.

INS-32010: *string* contains invalid characters.

Cause: The specified *string* contained one or more invalid characters.

Action: Choose a *string* containing only alphanumeric characters and a few additional characters that are allowed for your platform.

INS-32011: The *string* that you have specified contains the space character.

Cause: The string you entered contains the space character.

Action: Please choose a string containing only alphanumeric, and a few additional characters that are allowed for your platform.

INS-32012: Unable to create directory: *string*.

Cause: Either proper permissions were not granted to create the directory or there was no space left in the volume.

Action: Check your permission on the selected directory or choose another directory.

INS-32013: The *string* is empty.

Cause: n/a

Action: n/a

INS-32015: The location specified for *string* is invalid.

Cause: The specified location cannot be used for *string*. Either the specified location is not found on the system or is detected to be a file.

Action: Specify a valid location for *string*.

INS-32016: The selected Oracle home contains directories or files.

Cause: n/a

Action: n/a

INS-32017: Invalid path specified for *string*

Cause: Path specified for *string* contains one or more folders which exceeds maximum folder name length.

Action: Specify the location which contains folders name length not more than *string* characters.

INS-32018: The selected Oracle home is outside of Oracle base.

Cause: n/a

Action: n/a

INS-32021: Insufficient disk space on this volume for the selected Oracle home.

Cause: The selected Oracle home was on a volume without enough disk space.

Action: Choose a location for Oracle home that has enough space (minimum of *string*MB) or free up space on the existing volume.

INS-32022: Grid infrastructure software for a cluster installation must not be under an Oracle base directory.

Cause: Grid infrastructure for a cluster installation assigns root ownership to all parent directories of the Grid home location. As a result, ownership of all named directories in the software location path is changed to root, creating permissions errors for all subsequent installations into the same Oracle base.

Action: Specify software location outside of an Oracle base directory for grid infrastructure for a cluster installation.

INS-32024: The specified location for Oracle base is invalid.

Cause: The specified Oracle base location is identical to an existing Oracle home location.

Action: Specify a location for Oracle base which is not an existing Oracle home.

INS-32025: The chosen installation conflicts with software already installed in the given Oracle home.

Cause: n/a

Action: n/a

INS-32026: The Software location specified should not be under Oracle base location.

Cause: Grid Infrastructure for a Cluster installation will assign root ownership to all parent directories of Oracle Clusterware software location. As a result, all named directories in the software location path will acquire root ownership. This may create problems for subsequent installations into the same Oracle base.

Action: Specify software location outside of Oracle base.

INS-32027: The ORACLE_HOME environment variable is currently set and this value is not same as the specified path for software location. This may impact the proper configuration of software.

Cause: n/a

Action: n/a

INS-32030: Invalid location for Central Inventory.

Cause: The Central Inventory location provided was empty.

Action: Provide a valid location for the inventory.

INS-32031: Invalid inventory location.

Cause: n/a

Action: n/a

INS-32033: Central Inventory location is not writable.

Cause: n/a

Action: n/a

INS-32034: Invalid characters specified for the inventory directory.

Cause: The inventory directory contained one or more invalid characters.

Action: The inventory directory can contain only alphanumeric, hyphen, and underscore characters.

INS-32035: Unable to create a new central inventory directory : *string*.

Cause: The central inventory location provided is not empty.

Action: Please provide another location for the inventory, or clean up the current location.

INS-32036: User home directory is not recommended as inventory location

Cause: User home directory has been chosen as inventory directory. Oracle recommends that the inventory directory is not users home directory, because members of inventory group will be given write permission to the inventory directory.

Action: Choose a directory other than users home as inventory location.

INS-32037: The operating system group specified for central inventory (oraInventory) ownership is invalid.

Cause: No value specified for central inventory (oraInventory) ownership group.

Action: Specify an operating system group whose members should have write permission to the central inventory directory (oraInventory).

INS-32038: The operating system group specified for central inventory (oraInventory) ownership is invalid.

Cause: User performing installation is not a member of the operating system group specified for central inventory(oraInventory) ownership.

Action: Specify an operating system group that the installing user is a member of. All the members of this operating system group will have write permission to the central inventory directory (oraInventory).

INS-32039: Inappropriate file permissions for inventory location.

Cause: The current user and current group do not match with the user and group of inventory location.

Action: Ensure that the file user and group are same as the installer user and install group respectively.

INS-32040: The central inventory location provided is not empty on remote nodes *string*.

Cause: n/a

Action: n/a

INS-32041: Unable to create a new central inventory directory : *string*

Cause: The central inventory location provided is not empty or corrupted

Action: Please clean up the inventory location : *string*

INS-32052: Oracle base and Oracle home locations are same.

Cause: n/a

Action: n/a

INS-32053: The specified Oracle home name already exists.

Cause: The Oracle home name specified on the command line corresponded to an existing Oracle home name in the Central Inventory.

Action: Choose another Oracle home name. Abort this installation session and try again.

INS-32054: The Central Inventory *string* is located on a shared file system.

Cause: n/a

Action: n/a

INS-32055: The Central Inventory is located in the Oracle base.

Cause: n/a

Action: n/a

INS-32060: Insufficient permissions granted to create directory *string* on node *string*.

Cause: Insufficient write permissions were granted to create this directory on the specified node.

Action: Ensure that you have the required write permissions. Alternatively, you may want to choose another location.

INS-32061: The selected ASM disk group is invalid.

Cause: An invalid or non-existent ASM disk group has been selected.

Action: Ensure that the selected ASM disk group exists.

INS-32062: Unable to create *string* at the specified location.

Cause: The *string* location provided is not absolute path.

Action: Please provide absolute location for the *string*.

INS-32066: Microsoft Transaction Services (MTS) port is blank or containing non-numeric character.

Cause: The MTS port text field is either empty or containing non-numeric characters

Action: Provide a valid value for MTS port.

INS-32067: The value you have entered for Microsoft Transaction Services (MTS) Port, *string*, is already in use.

Cause: Refer to the error message for details.

Action: Specify a valid port number.

INS-32068: The value specified for Microsoft Transaction Services (MTS) Port number, *string*, is out of valid range.

Cause: The value you have entered for the MTS Port is out of the valid range.

Action: Enter a MTS Port number between 1024 and 65535.

INS-32075: At least one product language need to selected

Cause: No product language selected for installation.

Action: Select at least one product language for installation.

INS-32076: English cannot be removed from the selected languages list.

Cause: An attempt was made to remove English from the selected languages list.

Action: Select English as one of the selected product languages.

INS-32077: The following selected languages are not supported; *string*

Cause: Not all selected product languages are supported.

Action: Refer to the sample response file for more information.

INS-32090: Software installation was unsuccessful.

Cause: Refer the log files for details.

Action: Refer to the logs or contact Oracle Support Services.

INS-32091: Software installation was successful. But some configuration assistants failed, were cancelled or skipped.

Cause: n/a

Action: n/a

INS-32092: User Name is empty.

Cause: A value was not specified for the username field.

Action: Specify a value for the username field.

INS-32094: Specified Oracle Home user has invalid characters.

Cause: You have entered invalid characters in username.

Action: Make sure you specify a username with valid characters.

INS-32095: Specified user has administrative privileges.

Cause: You have selected a user which has administrative privileges to be the Oracle Home user.

Action: Make sure you specify a non-administrative user or revoke the administrative privileges for this user.

INS-32096: n/a

Cause: n/a

Action: n/a

INS-32097: Invalid username or password.

Cause: You have selected an existing user to be the Oracle Home user, however username or password entered are not valid.

Action: Specify a valid username and password combination.

INS-32098: The password field is empty.

Cause: The password should not be empty.

Action: Provide a non-empty password.

INS-32099: The username field is empty.

Cause: The username should not be empty.

Action: Provide a non-empty username.

INS-32100: Specified Oracle Home user is not domain User.

Cause: You have selected a local user to be the Oracle Home user.

Action: Make sure you specify a domain user for Oracle Home user.

INS-32101: Specified Oracle Home user does not exist.

Cause: You have selected an Oracle Home user that does not exist.

Action: Make sure you specify an existing user for Oracle Home user.

INS-32101: My Oracle Support username is empty.

Cause: My Oracle Support username cannot be empty.

Action: Provide a valid My Oracle Support username.

INS-32102: Specified Oracle Home user already exist.

Cause: You have selected an Oracle Home user that already exist.

Action: Make sure you specify a non existing user for Oracle Home user.

INS-32102: My Oracle Support password is empty.

Cause: My Oracle Support password cannot be empty.

Action: Provide a valid My Oracle Support password.

INS-32103: Specified Oracle Home user does not match with existing Home user.

Cause: You have selected an Oracle Home user which is not matching with existing Home user you are trying to upgrade.

Action: Make sure you specify Oracle Home user of Oracle Home that you are trying to upgrade.

INS-32103: Connection to My Oracle Support could not be established.

Cause: Credentials provided may be invalid, or there may be a network connection issue.

Action: Check the My Oracle Support credentials. Also check the proxy setting and the network connection.

INS-32104: Specified Oracle Home user is not the owner of the specified Oracle Base.

Cause: n/a

Action: n/a

INS-32104: The installer is unable to locate the software updates in the specified directory.

Cause: n/a

Action: n/a

INS-32105: Invalid password.

Cause: You have selected a new user to be the Oracle Home user, however password entered cannot be used because of your Windows system policies.

Action: Specify a password which complies with your Windows system policies.

INS-32105: n/a

Cause: n/a

Action: n/a

INS-32106: n/a

Cause: n/a

Action: n/a

INS-32107: n/a

Cause: n/a

Action: n/a

INS-32108: n/a

Cause: n/a

Action: n/a

INS-32109: Failed to retrieve the updates from My Oracle Support.

Cause: The My Oracle Support credentials you provided may not have download privileges, or there may be a network or proxy authentication issue.

Action: Provide credentials with download privileges. Also check the network connection and, if you have a proxy realm, your proxy credentials.

INS-32110: Failed to retrieve the updates from My Oracle Support.

Cause: This may be due to a network connection problem or a missing patch on My Oracle Support.

Action: Check the connection to My Oracle Support or contact Oracle Support Services.

INS-32111: The patch download location provided is empty.

Cause: The patch download location cannot be empty.

Action: Provide the location where the updates have been downloaded.

INS-32112: Unable to retrieve the details from the downloaded metadata.

Cause: The downloaded metadata for software updates is not properly formatted.

Action: Refer to the logs or contact Oracle Support Services.

INS-32113: Unable to read the updates location.

Cause: n/a

Action: n/a

INS-32114: Check the My Oracle Support user name.

Cause: The user name provided is invalid. It either contains invalid characters or does not follow the standard e-mail address format.

Action: Specify an e-mail address that is consistent with RFC 2822 and RFC 2821 format.

INS-32115: Insufficient space in the download location provided.

Cause: The location provided does not have space for downloading all the updates.

Action: Choose a location with enough space or free up space on the existing volume.

INS-32116: The location specified may contain already downloaded software updates. Downloading at this location will overwrite the existing software updates.

Cause: n/a

Action: n/a

INS-32117: My Oracle Support credentials provided does not have download privileges.

Cause: n/a

Action: n/a

INS-32118: Proxy information required for the connection to My Oracle Support is not provided.

Cause: n/a

Action: n/a

INS-32121: Execution of '*string*' script failed.

Cause: Execution of the script failed. This might be due to invalid parameters specified for executing the script.

Action: Review the log file for further details.

INS-32122: Execution of '*string*' script failed.

Cause: Installer is unable to connect to a node for executing the script using specified configuration method.

Action: Review the log file '*string*' for further details.

INS-32123: Execution of '*string*' script failed on nodes: *string*

Cause: Installer has failed to execute the specified script on one or more nodes. This might be because of exception occurred while executing the script on nodes.

Action: Review the log files '*string*' and '*string*' for further details.

INS-32124: Execution of '*string*' script failed.

Cause: Installer has failed to execute the specified script on the local node (first node). This might be because of exception occurred while executing the script on the local node.

Action: Review the log file '*string*' for further details.

INS-32125: Execution of '*string*' script failed.

Cause: Installer has failed to execute the specified script on the last node. This might be because of exception occurred while executing the script on the last node.

Action: Review the log file '*string*' for further details.

INS-32126: Execution of '*string*' script failed.

Cause: Configuration object which is used for executing the script is not initialized.

Action: Review the log file for further details.

INS-32127: '*string*' password is not specified. Specify a valid password.

Cause: n/a

Action: n/a

INS-32128: Installer has failed to login as root user with the specified password. Specify a valid root user password.

Cause: n/a

Action: n/a

INS-32129: Sudo program path is not specified for script execution. Specify a valid Sudo program path.

Cause: n/a

Action: n/a

INS-32130: Specified details for Sudo option are not valid.

Cause: Either Sudo program path or specified user credentials are invalid.

Action: Specify the valid details for Sudo option.

INS-32131: Specified user ('*string*') doesn't have permission to execute configuration script using Sudo option.

Cause: n/a

Action: n/a

INS-32132: Power Broker program path is not specified for script execution. Specify the valid Power Broker program path.

Cause: n/a

Action: n/a

INS-32133: Specified details for Power Broker option are invalid.

Cause: Either Power Broker program path or specified user credentials are invalid.

Action: Specify the valid details for Power Broker option.

INS-32134: Specified user ('*string*') doesn't have permission to execute configuration script using Power Broker option.

Cause: n/a

Action: n/a

INS-32135: Specified Sudo program path is not valid.

Cause: Sudo program path (*'string'*) is not a complete path. (Note: relative path is not supported)

Action: Specify the valid Sudo program path.

INS-32136: Specified Sudo program name in the path is not valid.

Cause: Either Sudo program path (*'string'*) is not a complete path or Sudo program name is invalid.(Note: Sudo program name should be *'string'*)

Action: Specify the valid Sudo program path.

INS-32137: Specified Power Broker program path is not valid.

Cause: Power Broker program path (*'string'*) is not a complete path. (Note: relative path is not supported)

Action: Specify the valid Power Broker program path.

INS-32138: root user password is not specified. Specify a valid password.

Cause: n/a

Action: n/a

INS-32139: User name is not specified for Sudo option. Specify the existing user who has privilege to run the configuration scripts using Sudo program.

Cause: n/a

Action: n/a

INS-32140: Specified Sudo user name (*'string'*) doesnt exist on one or more nodes. Specify the existing user who has privilege to run the configuration scripts using Sudo program.

Cause: n/a

Action: n/a

INS-32141: User name is not specified for Sudo option. Specify the existing user who has privilege to run the configuration scripts using Power Broker program.

Cause: n/a

Action: n/a

INS-32142: Specified Power Broker user name (*'string'*) doesnt exist on one or more nodes. Specify the existing user who has privilege to run the configuration scripts using Power Broker program.

Cause: User doesnt have Power Broker permission to execute configuration scripts.

Action: Either select different configuration option or provide Power Broker permission for the user.

INS-32143: Execution of *'string'* script failed on nodes: *string*

Cause: Installer has failed to execute the specified script on one or more nodes. This might be because of either some of the nodes (*string*) require a reboot to complete the configuration, or an exception occurred while executing the script on nodes.

Action: Reboot the specified nodes and then rerun the script. Refer to the documentation for information about completing the configuration after node(s) reboot. Or review the log files *'string'* and *'string'* for further details on failure.

INS-32144: Execution of '*string*' script failed on one or more nodes (*string*). These nodes require a reboot to complete the configuration.

Cause: n/a

Action: n/a

INS-32145: '*string*' password is not specified. Passwordless sudo configuration is supported only for current install user (*string*).

Cause: n/a

Action: n/a

INS-32146: Execution of '*string*' script failed on nodes: *string*.

Cause: n/a

Action: n/a

INS-32147: Execution of '*string*' script failed on nodes: *string*. Following nodes require a reboot before proceeding: *string*.

Cause: n/a

Action: n/a

INS-32148: Execution of '*string*' script failed on nodes: *string*

Cause: n/a

Action: n/a

INS-32149: Following nodes require a reboot before proceeding: *string*.

Cause: n/a

Action: n/a

INS-32151: CLUSTER_NEW_NODES parameter was not specified for performing addnode operation.

Cause: n/a

Action: n/a

INS-32152: Clusterware is not running on the local node.

Cause: Local node does not have Clusterware running for performing addnode.

Action: Ensure that the Clusterware is configured and is running on local node before performing the addnode.

INS-32153: Public Hostname of node was not specified for performing addnode operation.

Cause: n/a

Action: n/a

INS-32154: Installing user cannot perform the addnode operation.

Cause: The addnode wizard detects that the existing oracle home was not installed or cloned using the current user id: *string*.

Action: Either restart the addnode wizard as the user account that was used previously to configure the Oracle home, or re-clone the Oracle home using the current user account.

INS-32166: The current Oracle home is not registered in the central inventory on the following nodes: *string*

Cause: The wizard does not find this Oracle home to be registered with the central inventory on some or all of the nodes specified.

Action: Register the Oracle home on the specified nodes with the central inventory, either by using a cloning operation, or by using an attach-home operation. Restart the wizard after fixing this issue.

INS-32167: The Oracle home is inconsistent on the following nodes: *string*

Cause: The wizard detects that the Oracle home is inconsistent on some or all of the nodes specified. Review the log file for further details.

Action: Ensure that the Oracle home is consistent on all nodes.

INS-32181: The local node was not specified in CLUSTER_NODES parameter for clone.

Cause: n/a

Action: n/a

INS-32182: The nodes *string* specified in CLUSTER_NODES parameter for cloning are not valid.

Cause: n/a

Action: n/a

INS-32196: The script *string* was not executed on the following nodes *string*.

Cause: n/a

Action: n/a

INS-35505: You have selected a non-secure installation and configuration of Oracle software on Windows. Starting with 12c version of Oracle Database, it is recommended to create a named user to be the owner of the Oracle Home.

Cause: n/a

Action: n/a

INS-35001 to INS-40000

INS-32120: The current install user is not part of ORA_ASMADMIN group.

Cause: n/a

Action: n/a

INS-32121: The current install user is not part of ORA_ASMDBA group.

Cause: n/a

Action: n/a

INS-35011: E-mail address cannot be empty.

Cause: E-mail address for database management using e-mail notifications was empty.

Action: Specify an e-mail address for notification functions.

INS-35012: Outgoing main (SMTP) server cannot be empty.

Cause: The value for the outgoing main (SMTP) server is empty. You must provide a SMTP server to enable database management with e-mail notifications.

Action: Specify an outgoing main (SMTP) server for e-mail notifications.

INS-35013: Check e-mail address.

Cause: Either the e-mail address provided contains invalid characters, or it does not follow the standard e-mail address format.

Action: Specify an e-mail address that is consistent with RFC 2822 and RFC 2821 format.

INS-35014: Outgoing mail (SMTP) server is invalid.

Cause: The provided outgoing mail (SMTP) server was not valid. You must specify a valid SMTP server to enable database management with e-mail notifications.

Action: Specify an outgoing mail (SMTP) server for e-mail notifications.

INS-35015: Recovery location cannot be empty.

Cause: The database recovery backup location was empty.

Action: Specify a path for the database recovery backup location.

INS-35016: User name cannot be empty.

Cause: The database recovery user name text field was empty.

Action: Provide the user name permitted to perform database recovery.

INS-35017: Password cannot be empty.

Cause: The database recovery password was empty.

Action: Enter a password for database recovery.

INS-35019: Invalid value specified for Management Service field.

Cause: The installer was unable to detect an agent home corresponding to the URL in the Management Service field.

Action: Specify a valid URL for Management Service field that has a corresponding agent configured on the host.

INS-35020: Invalid value specified for Management Service field.

Cause: No value specified for Management Service field.

Action: Specify a valid Management service URL.

INS-35021: The recovery location is on a file system that is not shared across the cluster.

Cause: The database recovery area is not located on a shared file system.

Action: Enter a recovery area that is located on a shared file system.

INS-35022: Shared file system is not supported on windows for recovery area.

Cause: n/a

Action: n/a

INS-35022: Empty value provided for OMS Host.

Cause: n/a

Action: n/a

INS-35023: Empty value provided for Enterprise Manager Admin user.

Cause: n/a

Action: n/a

INS-35024: Empty value provided for Enterprise Manager Admin password.

Cause: n/a

Action: n/a

INS-35025: Empty value provided for OMS Port.

Cause: n/a

Action: n/a

INS-35026: Unable to connect to Enterprise Manager Cloud Control.

Cause: Invalid connection information specified.

Action: Specify valid connection information.

INS-35027: Selected storage type is not valid.

Cause: You cannot use file system storage for backup and recovery files, with Standard Edition Oracle Real Application Clusters databases.

Action: Choose Oracle Automatic Storage Management for database backup and recovery files.

INS-35071: Global database name cannot be left blank.

Cause: The Global database name was left blank.

Action: Specify a value for the Global database name.

INS-35072: The SID cannot be left blank.

Cause: The Oracle system identifier (SID) was left blank.

Action: Specify a value for Oracle system identifier (SID).

INS-35073: Invalid global database name.

Cause: The value given for the name portion of Global database name exceeds 30 characters. The maximum length is 30 characters.

Action: Enter a legal Global database name not exceeding 30 characters.

INS-35074: The specified SID is already in use.

Cause: The specified SID was already registered in the oratab file (*string*) on the server. The oratab file is used by Oracle products to detect existing database instances.

Action: Specify a unique Oracle system identifier (SID).

INS-35075: A database instance with the specified identifier already exists.

Cause: n/a

Action: n/a

INS-35076: The specified SID exceeds the number of characters allowed.

Cause: The length of the Oracle system identifier (SID) on Linux and UNIX platforms either exceeded 12 characters for single-instance installations or 8 characters for Oracle RAC installations.

Action: Specify an Oracle system identifier (SID) shorter than 12 characters for single-instance installation or 8 characters for Oracle RAC installation.

INS-35077: The specified SID exceeds the number of characters allowed.

Cause: The length of the Oracle system identifier (SID) on Windows platforms either exceeded *string* characters for single-instance installations or *string* characters for Oracle RAC installations.

Action: Specify a Windows Oracle system identifier (SID) shorter than *string* characters for a single-instance installation or *string* characters for an Oracle RAC installation.

INS-35081: The ORACLE_HOME environment variable is currently set.

Cause: The ORACLE_HOME environment variable was already set. This prevents proper use of multiple Oracle homes and, as it is not required for any Oracle products to function, it will be unset in your environment.

Action: The ORACLE_HOME environment variable will be unset automatically.

INS-35082: Global database name did not begin with an alphabetic character.

Cause: The global database name began with a character that was not an alphabetic character.

Action: Specify a global database name that begins with an alphabetic character.

INS-35083: The specified domain of the Global database name exceeds 128 characters.

Cause: The domain portion entered for Global database name exceeded 128 characters.

Action: Specify a domain for the Global database name that is less than 128 characters in length.

INS-35084: The specified global database name contains invalid characters.

Cause: The specified domain portion of the global database name contained invalid characters.

Action: Specify a global database name that contains only alphanumeric, underscore (_), pound (#) and period (.) characters.

INS-35085: Invalid value specified for *string*.

Cause: The *string* derived from *string* contains one or more invalid characters.

Action: Remove the invalid characters (*string*) from the *string* or select Advanced install flow to be able to specify different *string*

INS-35086: Invalid value specified for Global database name.

Cause: Database name cannot be empty.

Action: Enter a legal Global database name not exceeding 30 characters.

INS-35087: Invalid value specified for SID

Cause: The system identifier (SID) that you entered begins with a non-alphabetic character.

Action: Enter a SID that begins with an alphabetic character.

INS-35088: The specified Global database name exceeds *string* characters.

Cause: The name and domain portion entered for Global database name exceeded *string* characters.

Action: Specify the Global database name that is less than *string* characters in length.

INS-35089: The specified domain of the Global database name exceeds *string* characters.

Cause: The domain portion entered for Global database name exceeded *string* characters.

Action: Specify a domain for the Global database name that is less than *string* characters in length.

INS-35090: The service name provided for RAC One is empty.

Cause: n/a

Action: n/a

INS-35091: The service name provided for RAC One did not begin with an alphabetic character.

Cause: The service name provided for RAC One began with a character that was not an alphabetic character.

Action: Provide a service name which begins with an alphabetic character.

INS-35092: The service name provided for RAC One cannot be the same as the global database name.

Cause: n/a

Action: n/a

INS-35093: Invalid value provided for the RAC One service name.

Cause: The service name provided for RAC One may contain invalid characters.

Action: Provide a service name that consists of alphanumeric or underscore (_) characters.

INS-35094: Invalid value provided for Oracle RAC One service name.

Cause: The domain portion in the Oracle RAC One service name may contain invalid characters.

Action: Provide a service name whose network domain consists of alphanumeric characters or _ or \$ or #.

INS-35095: The specified domain of the Oracle RAC One service name exceeds 128 characters.

Cause: The domain portion entered for Oracle RAC One service name exceeded 128 characters.

Action: Specify a domain for the Oracle RAC One service name that is less than 128 characters in length.

INS-35096: The pluggable database name did not begin with an alphabetic character.

Cause: n/a

Action: n/a

INS-35097: The pluggable database name cannot be left blank.

Cause: n/a

Action: n/a

INS-35098: Invalid pluggable database name.

Cause: The value provided for pluggable database name exceeds *string* characters.

Action: Provide a value for pluggable database name not exceeding *string* characters.

INS-35099: The pluggable database name provided is same as the container database name.

Cause: n/a

Action: n/a

INS-35100: The Oracle home location contains directories or files on following remote nodes:*string*.

Cause: n/a

Action: n/a

INS-35101: Installer has detected that an Oracle Real Application Cluster (RAC) database with the given Global Database name (*string*) is already configured on this server.

Cause: n/a

Action: n/a

INS-35102: Invalid value specified for Pluggable Database name.

Cause: The Specified Pluggable Database name is same as RAC One database service name.

Action: Specify an unique Pluggable Database name.

INS-35171: Target database memory (*string*MB) exceeds at least one of the selected nodes available shared memory (*string*MB).

Cause: The total available shared memory on at least one of the selected nodes (*string*MB) was less than the chosen target database memory (*string*MB).

Action: Enter a value for the target database memory less than *string*MB.

INS-35172: Target database memory (*string*MB) exceeds available shared memory (*string*MB) on the system.

Cause: The total available shared memory (*string*MB) on the system was less than the chosen target database memory (*string*MB).

Action: Enter a value for target database memory that is less than *string*MB.

INS-35173: Invalid value for allocated memory.

Cause: The allocated memory specified was greater than or equal to the total memory available on the system.

Action: Enter a value less than the total available memory on the system for target database memory.

INS-35174: A minimum of *string*MB (*string*% of total physical memory) is required.

Cause: Allocated memory was less than the required memory.

Action: Enter a memory value larger than *string*MB.

INS-35175: No value given for the allocated memory of the database.

Cause: A value was not specified for the allocated memory of the database.

Action: Specify a value for the allocated memory of the database. This corresponds to the `oracle.install.db.config.starterdb.memoryLimit` variable in the response file.

INS-35176: Invalid value for allocated memory.

Cause: The allocated memory specified was greater than 3GB.

Action: Enter a value less than 3GB for target database memory.

INS-35205: Specified data file storage location is invalid.

Cause: The data file storage location for Oracle Real Application Clusters was not on a shared file system.

Action: Specify a location on a shared file system to place the data files.

INS-35206: Directory is already in use.

Cause: The specified directory for the database files was already in use by the Global database name that was provided.

Action: Specify a different location or go to the previous screen and change the Global database name.

INS-35207: The location *string* you selected is on an Oracle ASM Cluster File System (ACFS).

Cause: Oracle does not recommend placing Oracle Database files on ACFS. Oracle recommends that you place database files directly on the underlying Oracle ASM disk groups, as this provides optimal database performance.

Action: Specify a location that is not on ACFS.

INS-35208: The location *string* you selected is on an Oracle ASM Cluster File System (ACFS).

Cause: You cannot use ACFS as shared storage for Oracle RAC.

Action: Specify an ASM diskgroup or any other supported shared storage location.

INS-35209: Selected storage type is not valid.

Cause: You cannot use file system storage with Standard Edition Oracle Real Application Clusters databases.

Action: Choose Oracle Automatic Storage Management for database storage.

INS-35210: Installing a database with storage on Oracle Automatic Storage Management (Oracle ASM) is not supported on this system.

Cause: Oracle Database 11g Release 2 and later supports Oracle ASM only on 64-bit Windows operating systems.

Action: Place database-related files on a supported file system.

INS-35211: Selected storage type is not valid.

Cause: n/a

Action: n/a

INS-35255: Invalid password.

Cause: One of the Database Administrative account password was either CHANGE_ON_INSTALL or MANAGER or DBSNMP or SYSMAN or PDBADMIN.

Action: Enter a password that is not a former default password for these administrative users, such as CHANGE_ON_INSTALL, MANAGER, DBSNMP or SYSMAN or PDBADMIN.

INS-35256: The password for account *string* is not allowed to be *string*.

Cause: The administrative account password you entered was *string* which is not allowed for *string* user.

Action: Enter a password that is not a former default password for the *string* administrative user account.

INS-35341: The installation user is not a member of the following groups: *string*

Cause: The installation user account must be a member of all groups required for installation.

Action: Ensure that the installation user is a member of the system privileges operating system groups you selected.

INS-35342: The specified group for *string* may not be defined in the system.

Cause: The OS group you specified as *string* may not be configured on the server, or in the Network Information Service (NIS).

Action: Check the group name you selected, and specify a different group, or create the group on the server or in the Network Information Service.

INS-35343: Invalid value specified for *string*.

Cause: OS group *string* specified for *string* contains one or more invalid characters.

Action: Remove the invalid characters (*string*) from *string* or select an existing OS Group for *string*.

INS-35344: The value is not specified for *string*.

Cause: n/a

Action: n/a

INS-35351: Inconsistent versions detected.

Cause: The active version of Oracle Clusterware detected on the system (*string*) was lower than the version of Oracle Database that you were attempting to install(*string*). This is not supported.

Action: Upgrade Oracle Clusterware to version *string* or later.

INS-35352: There are no disk groups selected for storage and backup.

Cause: n/a

Action: n/a

INS-35354: The system on which you are attempting to install Oracle *string* is not part of a valid cluster.

Cause: Before you can install Oracle *string*, you must install Oracle Grid Infrastructure (Oracle Clusterware and Oracle ASM) on all servers to create a cluster.

Action: Oracle Grid Infrastructure for Clusterware is not installed. Install it either from the separate installation media included in your media pack, or install it by downloading it from Electronic Product Delivery (EPD) or the Oracle Technology Network (OTN). Oracle Grid Infrastructure normally is installed by a different operating system user than the one used for Oracle Database. It may need to be installed by your system administrator. See the installation guide for more details.

INS-35355: The node *string* specified in response file is not part of the Oracle Clusterware detected.

Cause: The node list for the Oracle RAC database specified in the response file does not match the configuration stored in the OCR.

Action: Please specify a valid node or add this node *string* to the cluster.

INS-35356: Oracle recommends that you install the database on all nodes that are part of the Oracle Grid Infrastructure cluster.

Cause: All Oracle Grid Infrastructure nodes were not selected for installing Oracle RAC.

Action: Oracle recommends that you deploy Oracle Real Application Clusters across all Oracle Grid Infrastructure cluster nodes.

INS-35357: Oracle RAC is not supported on this system.

Cause: Oracle Database 11g Release 2 and later supports Oracle RAC only on 64-bit Windows operating systems.

Action: Choose the option to install a single instance database on this system.

INS-35358: Oracle RAC is not supported on this system.

Cause: Oracle Database 11g Release 2 and later supports Oracle RAC only on 64-bit Windows operating systems.

Action: Migrate your existing Oracle RAC installation to a 64-bit Windows platform before upgrading it.

INS-35359: Only one node is selected for database creation.

Cause: Only one node is selected for database creation. To protect a database against node or instance failure, at least two nodes should be selected.

Action: Provide at least two nodes for database creation.

INS-35360: No nodes are specified for RAC One Node install.

Cause: n/a

Action: n/a

INS-35361: One or more selected nodes are down.

Cause: One or more selected nodes cannot be reached

Action: Ensure that all the nodes selected for operation are reachable.

INS-35362: Admin managed database can not be installed on following set of nodes: *string*

Cause: Admin managed database can be created only on HUB nodes.

Action: Select only HUB nodes to create admin managed database. HUB nodes detected in your setup are as follows: *string*

INS-35371: Oracle RAC databases not detected.

Cause: The installer could not detect any Oracle Real Application Clusters databases that could be upgraded.

Action: None

INS-35372: Oracle RAC databases not detected.

Cause: The installer could not detect any Oracle Real Application Clusters databases that could be upgraded on the selected nodes.

Action: None

INS-35373: Single-instance database not detected

Cause: The installer could not detect a single-instance database that could be upgraded.

Action: None

INS-35375: The installer detects an older version of Oracle ASM on the system. If you intend to upgrade a database using Oracle ASM for storage, then you must first upgrade Oracle ASM. Refer to Oracle Grid Infrastructure Installation Guide for further information.

Cause: An earlier release version of Oracle Automatic Storage Management (Oracle ASM) is detected on the server.

Action: To upgrade Oracle ASM, refer to installation guides for information about Oracle Grid Infrastructure upgrade.

INS-35376: Password cannot be empty for the ASMSNMP user.

Cause: The ASMSNMP user password was not specified.

Action: Provide a password for the ASMSNMP user in the password field.

INS-35377: An earlier release version of Oracle Automatic Storage Management (Oracle ASM) exists on this system. If you intend to upgrade an earlier release database that uses Oracle ASM to Oracle Database 11g Release 2, then the upgrade will fail on 32-bit systems.

Cause: Oracle Database 11g Release 2 and later supports Oracle ASM only on 64-bit Windows operating systems.

Action: Migrate database storage from Oracle ASM to a file system before upgrading, or migrate earlier release databases versions that use Oracle ASM storage to 64-bit Windows systems. See the upgrade guide for additional information.

INS-35378: The installer has detected that the configured Oracle Restart software is a release version earlier than the database release you want to install. Oracle Restart must be the same release or a later release than Oracle Database.

Cause: The active Oracle Restart release detected on the system (*string*) is an earlier release than the Oracle Database release to which you want to upgrade (*string*).

Action: Upgrade Oracle Restart software to version *string* or later.

INS-35379: The installer has detected that configured Oracle Restart software is not upgraded to current install version.

Cause: The active version of Oracle Restart detected on the system (*string*) is earlier than the version of Oracle Database that you are attempting to upgrade to (*string*).

Action: Upgrade Oracle Restart software to version *string* or later.

INS-35380: Installer has detected one or more policy managed databases eligible for upgrade. If you wish to upgrade one of these policy managed databases, it is recommended that you select all the nodes of the Clusterware. This will ensure the database software availability on all the nodes.

Cause: n/a

Action: n/a

INS-35421: This option installs a single-instance database only.

Cause: You have chosen to perform a Desktop class install on a cluster. This option will not install Oracle RAC.

Action: If you want to install Oracle RAC, then choose to perform a Server class install.

INS-35422: The installer has detected that configured Oracle Restart software is not upgraded to current install version. This database installation does not register the database with lower version of High Availability service.

Cause: The active version of Oracle Restart detected on the system(*string*) is lower than the version of Oracle Database that you are attempting to install to (*string*).

Action: Upgrade Oracle Restart software to version *string* or later.

INS-35423: The installer has detected that Oracle Clusterware is not running on local node.

Cause: You have chosen to install Oracle RAC when Oracle Clusterware stack is not running on the local node.

Action: Start the Oracle Clusterware stack by running the following command as the root user from the Oracle Clusterware home (Grid home) : /bin/crsctl start crs. When the Oracle Clusterware stack is running, restart the installer and continue with the Oracle RAC installation.

INS-35431: Invalid Location Specified for Oracle home.

Cause: The installer detects that the location you specified for the Oracle home is under an Oracle ASM Cluster File System (ACFS) mount point that is not registered with Oracle Grid Infrastructure on this server.

Action: Oracle Database homes can only be placed on ACFS locations registered with Oracle Grid Infrastructure software. Specify a different location for the Oracle home, or register this location with Oracle Grid Infrastructure software.

INS-35432: The installer has detected that the software location you have specified contains Oracle Database software version *string*. Oracle recommends that when

upgrading to *string*, you perform an installation of the software into a new Oracle home and then upgrade the database using the new software binaries.

Cause: n/a

Action: n/a

INS-35433: The installer has detected that the specified location *string* is on an Oracle ASM Cluster File System that is not registered as a resource in Oracle Grid Infrastructure.

Cause: The specified location *string* is on an Oracle ASM Cluster File System that is not registered as a resource in Oracle Grid Infrastructure.

Action: Register the Oracle ASM Cluster File System location that you want to use with Oracle Grid Infrastructure.

INS-35434: Oracle Home cannot be on Oracle Cluster File System.

Cause: Oracle Home provided was detected to be on Oracle Cluster File System.

Action: Provide a Oracle Home location which is not on Oracle Cluster File System.

INS-35435: Oracle home of the Policy managed database on a Flex Cluster cannot be on ASM Cluster File System.

Cause: Oracle home location specified was detected to be on ASM Cluster File System.

Action: Specify an Oracle home location which is not on ASM Cluster File System.

INS-35436: Oracle home of a Software Only database installation cannot be on ASM Cluster File System when LEAF type nodes are chosen for the installation.

Cause: Oracle home location specified was detected to be on ASM Cluster File System and LEAF type nodes were chosen for the installation.

Action: Specify an Oracle home location which is not on ASM Cluster File System or remove LEAF type nodes from the selected list of nodes.

INS-35437: Invalid location specified for Oracle home.

Cause: Installer has detected that the location specified for Oracle home is a sub directory under an Automatic Cluster File System(ACFS) mount point that does not provide permissions to your user id.

Action: Provide a different location for Oracle home or update the Access Control List (ACL) of the ACFS mount point.

INS-35438: The specified software location is found to be on ASM Cluster File System (ACFS) configured to be available only on one node (*string*). Oracle RAC software can not be installed on a single-node ACFS.

Cause: n/a

Action: n/a

INS-35439: The specified base location is found to be on ASM Cluster File System (ACFS) on node (*string*) and LEAF nodes were selected. Oracle RAC base location can not be installed on ACFS when LEAF nodes are selected.

Cause: n/a

Action: n/a

INS-35461: Standard Edition One (SE One) is not supported for this installation.

Cause: Standard Edition One (SE One) is not supported for Oracle Real Application Clusters database installation.

Action: Select a different Install Edition.

INS-35462: Personal Edition is not supported for this installation.

Cause: You selected an Install Edition that is not supported for UNIX or Linux operating systems, and for Oracle RAC installations.

Action: Select a different Install Edition.

INS-35463: This option is not supported on Exadata configuration.

Cause: n/a

Action: n/a

INS-35464: The installer does not support installing the *string* of Oracle Database.

Cause: n/a

Action: n/a

INS-35481: Server pool name is not specified.

Cause: You have not specified a valid name for the server pool.

Action: Specify a valid name for server pool.

INS-35482: Server pool cardinality is invalid.

Cause: Server pool cardinality should be a number between *string* and *string*

Action: Specify a valid number as Server pool cardinality.

INS-35483: Server pool name is invalid.

Cause: The specified Server pool name contains an invalid character.

Action: Specify a name for server pool that contains only alphabets, numbers, or the `_`, `#`, `.`, `$` characters.

INS-35491: There are no Hub nodes detected in this cluster

Cause: Admin-managed Real Application Cluster database can be deployed only on Hub nodes.

Action: Choose Policy-managed Real Application Cluster database option if there are no Hub nodes in the cluster

INS-35492: Local node is not a Hub node

Cause: Local Node has to be a Hub node in order to deploy a Admin-managed Real Application Cluster database.

Action: n/a

INS-35501: Nodes *string* specified for addnode are not part of the Clusterware yet. Ensure that the configuration scripts from the Grid Infrastructure home are executed after the database addnode is performed.

Cause: n/a

Action: n/a

INS-35502: Cluster nodes *string* are already having a database software in the same location as local node.

Cause: Nodes are already having a database software.

Action: Specify `-noCopy` option to `addnode` to have the configuration done without the software copy to these nodes.

INS-35503: Nodes *string* are dublicately specified for `addnode` operation.

Cause: n/a

Action: n/a

INS-35504: Node name cannot be left unfilled.

Cause: n/a

Action: n/a

INS-35505: Oracle RAC software location can not be installed on ASM Cluster File System (ACFS) when LEAF nodes are selected. You have selected following LEAF nodes:*string*

Cause: n/a

Action: n/a

INS-35506: Oracle RAC software location can only be installed on ASM Cluster File System (ACFS) on HUB nodes. You have selected following nodes that are not detected to be configured as HUB nodes:*string*

Cause: n/a

Action: n/a

INS-35810: You have selected to use Built-in Account for installation and configuration of Oracle Home. Oracle recommends that you specify a Windows User Account with limited privilege to install and configure a secure Oracle Home.

Cause: n/a

Action: n/a

INS-35850: The installer has detected that you are trying to install a cluster database from a leaf node of a Flex cluster.

Cause: n/a

Action: n/a

INS-40001 to INS-45000

INS-40102: Specified Grid home is invalid

Cause: The Oracle Grid Infrastructure for a cluster home (Grid home) was placed in the installation owners home directory.

Action: Oracle recommends that you do not place the Grid home in a user home directory, because ownership of the path to that directory is changed to root.

INS-40103: The installer has detected that the software location specified is on an OCFS2 partition.

Cause: Configuration of an Oracle Grid Infrastructure for a cluster Grid home is not supported on OCFS2 partitions.

Action: Specify a Grid home location that is not an OCFS2 partition.

INS-40104: The installer has detected that the software location specified is on an OCFS2 partition.

Cause: Configuration of an Oracle Grid Infrastructure for a cluster Grid home is not supported on OCFS2 partitions.

Action: Specify a Grid home location that is not an OCFS2 partition.

INS-40105: The location specified for Oracle Base is invalid.

Cause: The installer detects that you have configured Oracle Grid Infrastructure software on this server, and that the Oracle base you provided for this install is not the same as the existing Oracle Grid Infrastructure software Oracle base.

Action: Provide the same Oracle base location for this Oracle Grid Infrastructure installation that is used for the existing Oracle Grid Infrastructure.

INS-40106: Invalid location specified for Grid home.

Cause: The installer detects that the Oracle home location you provided is on an Oracle ASM Cluster File System (ACFS) mountpoint. You cannot place Oracle Grid Infrastructure binaries on an ACFS mount point.

Action: Specify a Grid home location that is on a location other than an ACFS mount point.

INS-40107: It is recommended that you choose a location with sufficient disk space to accommodate installation of future patches.

Cause: The selected Oracle home was on a volume without enough disk space for future patching.

Action: Choose a location for Oracle home that has enough space (minimum of *string*MB) or free up space on the existing volume.

INS-40108: The installer has detected that the software location specified is on an temporary file system.

Cause: Configuration of an Oracle Grid Infrastructure for a cluster Grid home should not be done on temporary file system .

Action: Specify a Grid home location that is not an temporary file system.

INS-40401: The Installer has detected a configured Oracle Clusterware home on the system.

Cause: The Installer has detected the presence of Oracle Clusterware software configured on the node.

Action: You can have only one instance of Oracle Clusterware software configured on a node that is part of an existing cluster.

INS-40404: The installer has detected a configured instance of Oracle grid infrastructure software on the server.

Cause: You selected to install and configure a new Oracle grid infrastructure installation (Oracle Clusterware and Oracle ASM). However, only one installation of Oracle Clusterware and Oracle ASM can be configured on a server at the same time.

Action: Deconfigure the existing Oracle Grid Infrastructure software before installing and configuring a new instance of Oracle Grid Infrastructure software.

INS-40405: The installer has detected a configured instance of Oracle Grid Infrastructure software on the system.

Cause: You selected to install and configure a new Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM). However, only one installation of Oracle Clusterware and Oracle ASM can be configured on a server at the same time.

Action: Deconfigure the existing Oracle Grid Infrastructure software before installing and configuring a new instance of Oracle Grid Infrastructure software.

INS-40406: The Installer has not detected an existing Oracle Grid Infrastructure software on the system.

Cause: The installer is unable to detect any existing Oracle Clusterware or Oracle ASM installation to upgrade.

Action: You can choose either to install a new Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM) on this node and add the node to an existing cluster, or you can install a new Oracle Grid Infrastructure installation and make the node part of a new cluster. If you want to add the node to an existing cluster, then review Oracle Clusterware Administration and Deployment Guide and follow the addnode procedure. If you want to create a new cluster, then select the option for a new installation.

INS-40407: The installer has detected an Oracle ASM instance is already configured on the computer.

Cause: You can have only one Oracle ASM instance configured on the node.

Action: Select the Software Only installation of Oracle Grid Infrastructure into a new home, and configure Oracle ASM in the new home after installation.

INS-40409: The installer has detected local Cluster Synchronization Services (CSS) configured on this host. Local CSS is running from: *string*.

Cause: You selected to install and configure an Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM). However, Oracle Clusterware cannot be installed on a server with a configured CSS daemon.

Action: Deconfigure and delete the existing local CSS daemon, and then restart the installer.

INS-40410: The installer has detected a configured instance of Oracle Grid Infrastructure software on the system.

Cause: You selected to install and configure a new Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM). However, only one installation of Oracle Clusterware and Oracle ASM can be configured on a server at the same time.

Action: Deconfigure the existing Oracle Grid Infrastructure software before installing and configuring a new instance of Oracle Grid Infrastructure software.

INS-40412: This server does not meet network requirements to install and configure this product.

Cause: None of the network interfaces detected on this system supports IPv4 protocol.

Action: Configure at least one of the public interfaces available on this system to support IPv4.

INS-40413: Existing Oracle ASM instance detected.

Cause: The installer has detected that an earlier version of Oracle ASM is configured on the server.

Action: If you intend to upgrade Oracle ASM as part of this installation, then you must shut down the Oracle ASM instance before proceeding. Shut down any database instances using Oracle ASM before shutting down the Oracle ASM instance.

INS-40414: The installer has detected an unused Oracle Cluster Registry (OCR) location pointer file (*string*) on the system.

Cause: OCR location pointer file (*string*) is left behind from a previous installation.

Action: Delete the OCR location pointer file (*string*) and restart the installer.

INS-40415: Upgrade database instances using Oracle Automatic Storage Management (Oracle ASM).

Cause: The installer has detected the presence of Oracle Database release *string* instances.

Action: If you intend to upgrade Oracle ASM as part of this upgrade, then you must upgrade Oracle Database instances using Oracle ASM to release *string* or later before proceeding with upgrading Oracle ASM.

INS-40416: The installer has detected that the version of the configured instance of Grid Infrastructure is not compatible for upgrading to this release of Grid Infrastructure.

Cause: Oracle Clusterware or Oracle ASM release *string* or above is needed to upgrade to Oracle Grid Infrastructure.

Action: Install the patchset to upgrade the configured instance of Grid Infrastructure to version *string* or higher.

INS-40417: The installer has detected an unused Oracle Cluster Registry (OCR) location registry key (*string*) on the system.

Cause: OCR location registry key (*string*) is left behind from a previous installation.

Action: Delete the OCR location registry key (*string*) and restart the installer.

INS-40418: The installer has detected that Oracle Clusterware is not running on local node.

Cause: The installer has detected that the Oracle Clusterware stack on the local node is not running.

Action: Either run the Installer on the node where Oracle Clusterware stack is running or open a terminal, log in as root or Administrator, change directory to the Oracle Clusterware home (Grid home), and start Oracle Clusterware by entering this command: `crsctl start crs`

INS-40419: The installer detects that the configured Oracle Automatic Storage Management (Oracle ASM) release is earlier than the Oracle Grid Infrastructure release.

Cause: Installer has detected that configured version of Automatic Storage Management software is lower than the Grid Infrastructure software version.

Action: Open a terminal, log in as the Grid Infrastructure installation owner, change directory to the Grid home, and run ASMCA to upgrade Oracle ASM.

INS-40420: The current installation user is not the same as the installation owner of the existing Oracle Grid Infrastructure software.

Cause: The installer detects that the current installation user (*string*) is not the same as the existing Oracle Grid Infrastructure software user (*string*). To upgrade the existing software, run the installer as the user owning the Oracle Grid Infrastructure home.

Action: Restart the installation as the user that owns the existing Grid home.

INS-40421: The installer cannot detect the owner of the existing Oracle Grid Infrastructure home (Grid home).

Cause: The installer is unable to detect the owner of the existing Grid home. To upgrade the software, you must run the installer as the user owning the Grid home.

Action: Run the installer as the user owning the existing Grid home.

INS-40422: The installer has detected that the configured instance of Grid Infrastructure is not compatible for upgrading to this release of Grid Infrastructure.

Cause: Patchset for the bug *string* is not installed on the configured instance of the Grid Infrastructure home.

Action: Install the patchset for the bug *string* on all the nodes to upgrade the configured instance of Grid Infrastructure to current version.

INS-40423: The Oracle Cluster Registry and the Voting disk are located on a Oracle Cluster File System.

Cause: n/a

Action: n/a

INS-40424: Installer has detected that the Oracle Cluster Registry (OCR) locations of existing clusterware configuration are on a block or character storage device. The OCR locations cannot be on a block or character storage device during upgrade.

Cause: n/a

Action: n/a

INS-40425: Installer has detected that the Oracle Cluster Registry (OCR) is not managed through Automatic Storage management (ASM).

Cause: n/a

Action: n/a

INS-40426: Grid installation option has not been specified.

Cause: n/a

Action: n/a

INS-40427: The installer has detected that you are trying to upgrade from a leaf node of a Flex cluster.

Cause: The upgrade action of a Flex cluster is not allowed from a leaf node.

Action: Please upgrade from a hub node of this Flex cluster.

INS-40601: The Intelligent Platform Management Interface (IPMI) driver is not installed on one or more of the following nodes: *string*.

Cause: The installer detected that Intelligent Platform Management Interface (IPMI) drivers were not installed on all the nodes that you indicated should be part of the cluster. Cluster Synchronization Service (CSS) requires this driver, as it interacts with the IPMI driver to ensure cluster integrity.

Action: Download the IPMI driver from the hardware vendor website, and ensure that the driver is installed and configured on all the nodes, so that installation can continue.

INS-40602: Baseboard Management Controller (BMC) user name text field cannot be left blank.

Cause: The BMC user name text field was blank.

Action: You have selected Intelligent Platform Management Interface (IPMI) to use for failure isolation support. The installer requires the Baseboard Management Controller (BMC) user name to proceed with configuration. Enter the BMC user name that has privileges to interact with the IPMI-compliant hardware.

INS-40603: Invalid characters in User Name.

Cause: Invalid characters were specified in the user name.

Action: Enter a valid BMC user name. The Baseboard Management Controller (BMC) user name can only contain lower or uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), period(.) and underscore(_).

INS-40604: Password field is blank.

Cause: n/a

Action: n/a

INS-40701: Invalid characters in Grid Naming Service (GNS) subdomain.

Cause: The specified value for the GNS subdomain contained one or more invalid characters.

Action: Enter a valid GNS subdomain name. Valid characters for the GNS subdomain can be any combination of lower or uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.).

INS-40702: Specify a value for Grid Naming Service (GNS) subdomain.

Cause: n/a

Action: n/a

INS-40704: GNS subdomain cannot be resolved.

Cause: The GNS subdomain could not be resolved using TCP/IP host name lookup.

Action: Specify a subdomain that can be resolved.

INS-40705: Invalid characters in Grid Naming Service (GNS) Virtual IP Address.

Cause: The specified value for the GNS virtual IP address contained one or more invalid characters.

Action: Enter a valid value for the GNS virtual IP Address. Valid characters for GNS virtual IP addresses can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.).

INS-40706: Grid Naming Service (GNS) Virtual IP Address is blank.

Cause: n/a

Action: n/a

INS-40707: Grid Naming Service (GNS) Virtual IP Address *string* cannot be resolved.

Cause: The GNS virtual IP address could not be resolved using TCP/IP host name lookup.

Action: Specify a valid GNS virtual IP address.

INS-40708: Grid Naming Service (GNS) Virtual IP Address *string* already assigned to another system.

Cause: The specified GNS virtual host name could not be resolved to an IP address. This may occur if the IP address is in use on another cluster, or the IP address has not been registered to this name in the Domain Name System (DNS).

Action: Ensure that you have entered a virtual host name that is not in use. If you continue to receive an error, then contact your network administrator for assistance.

INS-40709: Cluster name: *string* contains invalid characters.

Cause: The specified value for the cluster name contained one or more invalid characters.

Action: Provide a valid value for the cluster name. Valid characters can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen(-).

INS-40710: Cluster name:*string* does not start with a letter.

Cause: The cluster name did not start with a letter.

Action: Provide a value for the cluster name that starts with a letter

INS-40711: Cluster Name is blank.

Cause: The Cluster name text field was blank.

Action: Provide a valid value for the cluster name.

INS-40712: Cluster Name:*string* is too long.

Cause: The specified cluster name was too long.

Action: Provide a cluster name that is 15 or fewer characters in length.

INS-40713: Installer will use "*string*" as cluster name.

Cause: The cluster name cannot be longer than *string* characters. With the Typical install type, the host portion of the SCAN is used as the cluster name. If that portion is longer than *string* characters, then the installer truncates the cluster name to *string* characters.

Action: If you want to use a specific name for the cluster, then provide a name no greater than *string* characters, or select the Advanced installation type.

INS-40714: Single Client Access Name (SCAN) Name: *string* contains invalid characters.

Cause: The name you provided as the SCAN contained one or more invalid characters.

Action: Enter a valid name for the SCAN. Valid characters can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.).

INS-40715: Single Client Access Name (SCAN) Name: *string* contains invalid characters.

Cause: The name you provided as the SCAN contained one or more invalid characters. For the Typical installation type, invalid characters include those that are invalid for a cluster name, because the cluster name is derived from SCAN.

Action: Enter a valid name for the SCAN and for the cluster name. Valid characters can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.).

INS-40716: Single Client Access Name (SCAN) Name:*string* does not start with a letter.

Cause: The SCAN did not start with an alphabetic character.

Action: Provide a value for the SCAN that starts with an alphabetic character.

INS-40717: Single Client Access Name (SCAN) is unfilled.

Cause: No name was provided as the SCAN.

Action: Provide a valid name to use for the SCAN.

INS-40718: Single Client Access Name (SCAN):*string* could not be resolved.

Cause: The name you provided as the SCAN could not be resolved using TCP/IP host name lookup.

Action: Provide name to use for the SCAN for which the domain can be resolved.

INS-40719: IP address configured for Single Client Access Name (SCAN): *string* is already assigned to another system.

Cause: The installer could not find the IP addresses you selected as SCAN addresses. This may be because they are assigned to another system, or because the IP addresses are not listed in the DNS or hosts files as assigned to this domain name.

Action: Enter resolvable IP addresses to use as SCAN addresses.

INS-40720: Single Client Access Name (SCAN):*string* is not associated with any IP address.

Cause: The name configured as the SCAN was not associated with an IP address.

Action: Ensure the names you provide as SCANS are associated with IP addresses.

INS-40721: Single Client Access Name (SCAN) port is blank.

Cause: The SCAN port text field was empty.

Action: Provide a valid value for the SCAN port.

INS-40722: Single Client Access Name (SCAN) port: *string* contains non-numeric characters.

Cause: The value entered for the SCAN port contained one or more invalid characters. A valid SCAN port is a number.

Action: Enter a valid numeric value for the SCAN port.

INS-40723: Invalid Single Client Access Name (SCAN) port number:*string*.

Cause: The value entered for the SCAN Port was out of the valid range.

Action: Enter a SCAN port number between 1024 and 65535.

INS-40724: No locally defined network interface matches the SCAN subnet.

Cause: None of the locally defined network interfaces has a subnet matching the SCAN subnet.

Action: Define a public interface with a subnet matching the one you want to use for the SCAN.

INS-40725: Unable to determine the existence of an interface with a subnet matching the SCAN subnet.

Cause: No interface was found with a subnet matching the subnet designated as the SCAN subnet.

Action: Define a public interface with a subnet matching the one you want to use for the SCAN.

INS-40726: Single Client Access Name (SCAN):*string* is not in the GNS subdomain *string*.

Cause: The name you provided as the SCAN is not in the GNS subdomain.

Action: Ensure the name you provide as the SCAN is in the same domain as the GNS subdomain.

INS-40727: Single Client Access Name (SCAN):*string* is already associated with an IP address.

Cause: The name for the configured SCAN is already associated with an IP address.

Action: If you intend to use GNS resolution for your cluster, then ensure the names you provide for SCANS are not associated with IP addresses that are already in use.

INS-40728: Invalid Single Client Access Name (SCAN) port number:*string*.

Cause: The installer detects that the SCAN port number you provided is already in use. This can occur if Oracle9i RAC is installed on the server, and it is using the port.

Action: Provide a different SCAN port number in the range 1024 and 65535.

INS-40729: Invalid Single Client Access Name (SCAN) specified:[*string*].

Cause: Single Client Access Name (SCAN) cannot have a domain name suffix when configuring cluster to use shared GNS

Action: Remove the period("\.") and any following text from the specified Single Client Access Name (SCAN)

INS-40729: GNS Client data file not specified.

Cause: To configure Shared GNS, a GNS Client data file has to be specified.

Action: Specify a valid GNS Client data file to configure shared GNS.

INS-40730: Hostname portion of the specified Single Client Access Name (SCAN) Name: *string* is longer than 63 characters.

Cause: n/a

Action: n/a

INS-40730: File name specified as GNS Client data file is not a valid file.

Cause: Installer has detected that the specified GNS Client data file is not a valid file, or does not exist, or is not a readable file.

Action: Specify a valid GNS Client data file to configure shared GNS.

INS-40731: You have not chosen to configure Grid Naming Service(GNS).

Cause: Configuring Grid Naming Service(GNS) is mandatory to configure Flex Cluster.

Action: Choose to configure GNS to have configure Flex Cluster.

INS-40732: Configuring Grid Infrastructure with shared GNS option is currently not supported.

Cause: n/a

Action: n/a

INS-40733: Configuring Grid Infrastructure with shared GNS option for big cluster is not supported.

Cause: n/a

Action: n/a

INS-40734: Configure DHCP option is not supported for IPV6 GNS VIP

Cause: The specified value for the GNS virtual IP address is IPV6, for which DHCP is not supported.

Action: Ensure that the option to Configure DHCP assigned Virtual IPs to the nodes is deselected.

INS-40735: Specified Grid Naming Service (GNS) subdomain is not valid. It does not follow the standard domain name format.

Cause: n/a

Action: n/a

INS-40736: The provided GNS Client data file location is not supported.

Cause: The GNS Client data file location should not be a UNC path.

Action: Provide the GNS Client data file location which is not on a UNC path.

INS-40737: Installer was unable to verify the GNS client data file.

Cause: n/a

Action: n/a

INS-40901: The cluster node information table is unfilled.

Cause: Values in the cluster node information table are unfilled.

Action: Provide valid data in the cluster node information table.

INS-40902: Missing entries in the node Information table.

Cause: Some fields were left blank in the cluster node information table.

Action: Ensure that all information in the table is filled in.

INS-40903: Host name contains invalid characters.

Cause: The name you provided as the host name contains one or more invalid characters.

Action: Ensure that the host name contains valid characters. Valid characters for host names can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen (-).

INS-40904: ORACLE_HOSTNAME does not resolve to a valid host name.

Cause: The value provided for ORACLE_HOSTNAME does not resolve to a valid host name.

Action: Provide a valid host name for ORACLE_HOSTNAME, and restart the installer.

INS-40905: Unresolved host IP addresses.

Cause: One or more IP addresses do not resolve to valid host names.

Action: You must enter valid IP addresses that resolve to hostnames before installation can continue.

INS-40906: Duplicate host name *string* found in the node information table for Oracle Clusterware install.

Cause: Duplicate entries have been made in the node information table for Oracle Clusterware installation.

Action: Remove duplicate entries in the Oracle Clusterware node information table.

INS-40907: Local node not included in the list of host names for grid installation.

Cause: The local node (the node where you are running the installer) was missing from the list of host names you provided.

Action: Include the local node in the list of host names for grid installation.

INS-40908: Invalid host names.

Cause: One or more host names you provided are invalid, as they do not resolve to a valid IP address.

Action: Enter valid host names.

INS-40909: Host names from multiple domains entered.

Cause: Node information was entered for two or more nodes that belonged to different domains.

Action: Enter host names belonging to the same domain.

INS-40910: Virtual IP: *string* entered is invalid.

Cause: The Virtual IP did not resolve to an IP address.

Action: Enter a valid name for the virtual IP that resolves to an IP address.

INS-40911: Some public node names could not be resolved.

Cause: Some public nodes either were unreachable, or they belonged to a different subnet.

Action: Ensure that nodes in the list are up and reachable, and ensure that the node addresses are all in the same subnet.

INS-40912: Virtual host name: *string* is assigned to another system on the network.

Cause: One or more virtual host names appeared to be assigned to another system on the network.

Action: Ensure that the virtual host names assigned to each of the nodes in the cluster are not currently in use, and the IP addresses are registered to the domain name you want to use as the virtual host name.

INS-40913: The following nodes cannot be clustered due to user equivalence issue: *string*.

Cause: The user performing this installation is not configured identically on all nodes. This may be due to differences in the user or group IDs, or to SSH configuration issues.

Action: If necessary, refer to the installation guide for information about how to set up user equivalence manually on cluster nodes.

INS-40914: The installer has detected the presence of Oracle9i RAC on the remote node, *string*.

Cause: An Oracle9i RAC installation was present on remote node *string*, but not on the local node.

Action: To install on a set of nodes on which the Oracle9i release of Oracle RAC has been configured, start the installer on the node where Oracle9i RAC is installed so that the installer can upgrade the existing installation.

INS-40915: The installer has detected the presence of Oracle Clusterware on the following nodes: *string*.

Cause: Either Oracle Clusterware is running on the listed nodes, or previous installations of Oracle Clusterware are not completely deinstalled.

Action: For each node listed, ensure that existing Oracle Clusterware is completely deinstalled. You can also choose not to include these nodes in this installation.

INS-40916: Single-instance versions of Cluster Synchronization Services (CSS) are detected.

Cause: The installer detected single-instance versions of Cluster Synchronization Services (CSS) on the following nodes in the cluster:*string*

Action: Before proceeding with the installation, you must deconfigure CSS, shut down any Oracle Automatic Storage Management (Oracle ASM) instances, and shut down all databases that use Oracle ASM for storage on all of the listed nodes. Oracle Clusterware installation starts a cluster-wide version of CSS. After Oracle Clusterware installation is complete, you may start up any databases and Oracle ASM instances that previously used CSS. When they are brought back up, Oracle Clusterware provides CSS.

INS-40917: Host name cannot be in IP Address format.

Cause: n/a

Action: n/a

INS-40918: Virtual IP name: *string* cannot be in IP Address format.

Cause: Virtual IP name cannot be in IP address format.

Action: Provide a valid virtual IP name.

INS-40919: Hostname cannot be left unfilled.

Cause: You did not provide a hostname for the node.

Action: Enter a valid hostname.

INS-40920: No name was provided as the virtual IP name.

Cause: You did not enter a name for the virtual IP address.

Action: Enter a valid virtual IP name.

INS-40921: Virtual IP name contains invalid characters.

Cause: The name you provided for the virtual IP name contains one or more invalid characters.

Action: Provide a name to use for the virtual IP name that contains valid characters. Valid characters for virtual IP name can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen(-).

INS-40922: Invalid SCAN - unresolvable to an IP address.

Cause: SCAN provided does not resolve to an IP address.

Action: Ensure that the SCAN is valid, and that it is resolvable to an IP address.

INS-40923: Unable to match a local interface or subnet with the SCAN.

Cause: No local network interface was found with an address matching the subnet for the SCAN.

Action: Ensure that the SCAN subnet matches the subnet configured on an existing local network interface.

INS-40924: Failure while initializing search for common interface or subnets across cluster nodes.

Cause: Unable to locate common interfaces or subnets on all cluster member nodes.

Action: Ensure that the local node has valid network interfaces, with valid subnets that are the same on all cluster member nodes.

INS-40925: One or more nodes have interfaces not configured with a subnet that is common across all cluster nodes.

Cause: One or more nodes have network interfaces configured with a subnet that is not common to all nodes in the cluster.

Action: Ensure all cluster nodes have a public interface that is defined with the same subnet, and accessible by all nodes in the cluster.

INS-40926: Cluster node interfaces are configured in subnets different from the SCAN subnet.

Cause: One or more nodes have interfaces configured with subnets that are different than the SCAN subnet.

Action: Ensure all nodes have a public interface configured with a subnet that matches the SCAN subnet.

INS-40927: Interfaces with common subnets have different names on different nodes.

Cause: The following nodes have interfaces in common subnets that have different interface names: *string*

Action: Ensure that the names of interfaces defined on common subnets are the same on all cluster member nodes.

INS-40928: An unknown interface error occurred during validation of cluster member nodes.

Cause: An unknown error occurred during validation of addresses or subnets on cluster member nodes.

Action: Ensure network interfaces are configured correctly, and that subnets are available on all nodes of the cluster. Ensure all nodes have at least one public interface on a subnet available on all nodes, and ensure all nodes have one public interface on the same subnet.

INS-40929: Installer has detected that the Oracle 9i Global Services Daemon (GSD) is running on the following nodes: *string*

Cause: Oracle 9i Global Services Daemon (GSD) processes are detected on some or all of the nodes specified.

Action: To allow Oracle Clusterware to serve Oracle9i RAC databases, on each cluster member node you must shut down the Oracle9i Database GSD, and shut down any Oracle RAC databases. The installer will configure a GSD to run in the new grid Oracle home. After installation, you may restart all Oracle9i databases.

INS-40930: The following nodes were not resolvable during host IP address lookup: *string*.

Cause: One or more node VIPs could not be resolved to a valid IP address.

Action: Be sure all node VIPs are resolvable to a valid IP address.

INS-40931: The following nodes have interfaces that are configured on a subnet that is different from the SCAN subnet: *string*.

Cause: Some node VIPs are on subnets that are different from the SCAN subnet.

Action: For each cluster member node, ensure that the VIP is configured with the SCAN subnet.

INS-40932: An unknown error has occurred while validating Node Virtual IPs: *string*

Cause: Unknown errors were encountered while validating Node VIPs.

Action: Ensure all node VIPs resolve to a valid IP address.

INS-40933: Interface collection failed on node *string*.

Cause: Interface information collection failed.

Action: Be sure all nodes are accessible and have valid network interfaces defined.

INS-40934: A remote directory operation failed on node *string*: Message: *string*

Cause: n/a

Action: n/a

INS-40935: A cluster operation (For example, copy file, file exists, or other operation) failed on node *string*: Message: *string*

Cause: n/a

Action: n/a

INS-40936: A command tool operation failed on node *string*: Message: *string*

Cause: A cluster operation (for example, list interfaces) failed.

Action: Ensure that all cluster member nodes are accessible on the network.

INS-40937: The following hostnames are invalid:*string*

Cause: The hostname or names listed are invalid.

Action: Ensure that you are not providing aliases, and that the hostnames you provide are valid.

INS-40938: The installer has detected that some or all cluster member nodes of the Oracle 9i RAC database are not included in the selected list of nodes.

Cause: Some of the nodes that are cluster members of the Oracle9i RAC database are not among the nodes you selected.

Action: In the list of nodes, specify all the cluster member nodes of the Oracle9i RAC database.

INS-40939: Some of the nodes you selected are not members of the vendor cluster that is on the local server.

Cause: The installer detects that this node is a member of a vendor cluster, and that some of the nodes you selected to make members of the Oracle Clusterware cluster are not members of the vendor cluster.

Action: If you install Oracle Clusterware on a node that is a member of a vendor cluster, then all nodes that you select to be Oracle Clusterware nodes must also be members of the vendor cluster.

INS-40940: Nodes : *string* are not in the domain : *string*

Cause: Nodes are not configured on the same domain.

Action: Ensure that all nodes are configured on the same domain

INS-40941: Unable to retrieve domain information on one or more nodes.

Cause: The installer cannot collect domain information from one or more nodes you selected.

Action: Before proceeding with the installation, ensure that all selected nodes are configured on the same domain.

INS-40942: Invalid value specified for Target Hub node size.

Cause: Target Hub node size for a cluster should be an integer value between *string* and *string*.

Action: Specify a valid value for Target Hub node size.

INS-40943: No Hub nodes/Auto nodes specified.

Cause: A Flex Cluster type Oracle Clusterware can be configured only if there is at least one Hub node or Auto Node.

Action: Add a Hub node or Auto node to the configuration.

INS-40944: The length of upper bound and lower bound of ranges is not same.

Cause: n/a

Action: n/a

INS-40945: The value of upper bound is lesser than or equal to lower bound.

Cause: n/a

Action: n/a

INS-40946: The vip suffix provided has invalid characters.

Cause: The value provided for vip suffix has one or more invalid characters.

Action: Provide a value for the virtual IP suffix that contains valid characters. Valid characters for virtual IP suffix can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen(-).

INS-40947: No value was provided as the virtual IP suffix.

Cause: You did not enter a value for virtual IP suffix.

Action: Enter a valid virtual IP suffix for the node range.

INS-40949: Host Prefix cannot be left unfilled.

Cause: You did not provide a host prefix for the node range.

Action: Enter a valid host prefix.

INS-40950: Host prefix contains invalid characters.

Cause: Host prefix provided contains one or more invalid characters.

Action: Ensure that the host prefix contains valid characters. Valid characters for host prefix can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen (-).

INS-40951: The lower or upper bound of the range cannot be empty.

Cause: Either the lower or the upper bound of the node range is blank.

Action: Provide valid lower and upper bound of the node range you wish to configure.

INS-40952: The lower or upper bound of the range contain invalid characters.

Cause: The lower or the upper bound of the node range contain one or more invalid characters.

Action: Ensure that the lower and upper bound of the node range contain valid numbers.

INS-40953: Local node cannot be a Leaf node.

Cause: n/a

Action: n/a

INS-40954: Local node *string* did not resolve to an IP address. Provide alternative name that resolves to an IP address.

Cause: n/a

Action: n/a

INS-40955: Local node *string* could not be resolved using TCP/IP host name lookup. It is recommended that the local node is resolvable using TCP/IP lookup. This may avoid configuration failures at a later stage.

Cause: n/a

Action: n/a

INS-40956: The specified public host *string* did not resolve to an IP address. Provide alternative name that resolves to an IP address.

Cause: n/a

Action: n/a

INS-40957: The specified public host *string* could not be resolved using TCP/IP host name lookup. It is recommended that the public host name is resolvable using TCP/IP lookup. This may avoid configuration failures at a later stage.

Cause: n/a

Action: n/a

INS-40958: Installer has detected that specified *string* (*string*) is configured with the dual stack addresses.

Cause: The specified *string* is configured with both ipv4 and ipv6 addresses.

Action: Be sure to specify a *string* which is configured with single IP address family.

INS-41101: The specified interface information is incorrect.

Cause: Either the format of the information entered was incorrect, or the interface name or subnet information was incorrect.

Action: Enter the correct interface information before proceeding

INS-41102: No public interface designated.

Cause: None of the network interfaces were designated as public.

Action: Designate at least one interface as a public interface.

INS-41103: Interface *string* has multiple subnets associated with it.

Cause: Interface *string* has been marked as both Public and Private.

Action: Designate interface *string* either as Public or Private, but not both Public and Private.

INS-41104: No Private Interface designated.

Cause: There is no interface marked as Private.

Action: Ensure that at least one interface is designated as Private.

INS-41105: *string* on subnet *string* chosen as public does not match subnet of SCAN VIP.

Cause: The chosen public interface is not on the same subnet as the SCAN VIP.

Action: Ensure the chosen public interface is on the same subnet as the SCAN VIP subnet, and that the same subnet is configured for SCAN VIPs on all cluster nodes.

INS-41106: Invalid choice for public/private interface.

Cause: The chosen public or private interface subnet is not identical on all nodes.

Action: Ensure that the subnets configured for public and private interfaces are identical on all cluster nodes.

INS-41107: The interface (*string*) chosen as Public or Private is not on a shared subnet. Nodes not defining are: *string*

Cause: The Public or Private interface on the nodes indicated are on a different subnet than the ones used on other nodes.

Action: Ensure that the specified Public or Private interface share the same subnet across the nodes.

INS-41108: *string* on subnet *string* chosen as public does not match subnet of Grid Naming Service (GNS) VIP.

Cause: The chosen public interface is not on the same subnet as the GNS VIP.

Action: Be sure that the chosen public interface is on a subnet which matches the GNS VIP subnet and is common across all cluster nodes.

INS-41109: Configured network mask *string* for the interface *string* is not same across all cluster nodes.

Cause: Installer has detected that interface *string* does not have the same netmask *string* configured on all cluster nodes.

Action: Ensure that the chosen interface has been configured with same netmask across all cluster nodes.

INS-41110: Installer has transferred the provided interface list to following format: *string*. This might be because either the Installer has detected hybrid interface configuration (both IPv4 and IPv6 configuration present) on the cluster nodes, or

different interface names are configured for particular subnet on the cluster nodes. In the latter case, Installer will not consider interface names during Grid Infrastructure configuration.

Cause: n/a

Action: n/a

INS-41111: The installer has detected that multiple interfaces configured on a subnet (*string*).

Cause: You have specified generic name for the interface configured on the subnet (*string*). But installer detected that multiple interfaces configured on this subnet.

Action: Ensure that you have specified interface name appropriately.

INS-41112: Specified network interface doesn't maintain connectivity across cluster nodes.

Cause: Installer has detected that network interface *string* does not maintain connectivity on all cluster nodes.

Action: Ensure that the chosen interface has been configured across all cluster nodes.

INS-41113: Specified public and private interfaces are configured on the same subnet: *string*

Cause: Installer has detected that both public and private interfaces are configured on the same subnet.

Action: Ensure that the public and private interfaces are configured on different subnets.

INS-41114: Interface selected as Private (cluster interconnect) (*string*) is not configured with Internet Protocol version 4 (IPv4).

Cause: Installer has detected that the interface (*string*) is not configured with Internet Protocol version 4 (IPv4). Only those interfaces which are configured with Internet Protocol version 4 (IPv4) can be specified as Private(cluster interconnect) interface.

Action: Ensure that the interface selected for Private(cluster interconnect) is configured with IPv4.

INS-41115: The number of selected Private and ASM & Private interfaces (*string*) exceeds the limit.

Cause: There are more than *string* Private and ASM & Private interfaces selected.

Action: Ensure that the number of selected Private and ASM & Private interfaces does not exceed *string*.

INS-41170: You have chosen not to configure the Grid Infrastructure Management Repository. Not configuring the Grid Infrastructure Management Repository will permanently disable the Cluster Health Monitor, QoS Management, Memory Guard, and Rapid Home Provisioning features. Enabling of these features will require reinstallation of the Grid Infrastructure.

Cause: n/a

Action: n/a

INS-41204: No shared partition are available between nodes.

Cause: The specified nodes did not have at least one shared partition.

Action: Provide nodes that have at least one shared partition before proceeding with the installation.

INS-41205: Client ASM data file not specified.

Cause: To configure storage on a client ASM, a valid client data file has to be specified.

Action: Specify a valid client ASM data file to configure client ASM.

INS-41206: File name specified as client ASM data file is not a valid file.

Cause: Installer has detected that the specified client ASM data file is not a valid file, or does not exist, or is not a readable file.

Action: Specify a valid client ASM data file to configure shared ASM.

INS-41208: None of the available network subnets is marked for use by Oracle Automatic Storage Management (ASM)

Cause: At least one of the available network subnets should be configured for use by Oracle Automatic Storage Management (ASM).

Action: Configure one of the available network subnets for Oracle Automatic Storage Management (ASM) use if you intend to configure Near Oracle ASM or Client Oracle ASM

INS-41210: One of the available network subnets is marked for use by Automatic Storage Management(ASM).

Cause: This storage option does not require configuring a network subnet for use by ASM.

Action: None of the interfaces should be marked for ASM usage if you want to store OCR on shared file system or Local ASM.

INS-41212: Specified ASM client data file is invalid.

Cause: The cluster name in the ASM client data file doesnt match with the cluster name specified for this installation.

Action: The cluster name retrieved from the specified ASM client data file should match the cluster name of the client cluster. Specify the correct ASM client data file.

INS-41213: Oracle Cluster File system is not supported on windows.

Cause: n/a

Action: n/a

INS-41214: Disk group name not specified.

Cause: n/a

Action: n/a

INS-41215: No Disk groups detected on remote cluster.

Cause: Installer has not detected any diskgroups configured on the remote cluster.

Action: To configure the cluster to store OCR and Voting Disk on remote cluster, a disk group available on the remote cluster should be specified.

INS-41216: Specified disk group is not found on the remote cluster

Cause: n/a

Action: n/a

INS-41302: Normal redundancy requires three locations for the Oracle Cluster Registry.

Cause: Fewer than three locations were provided for the Oracle Cluster Registry.

Action: Specify three locations for the Oracle Cluster Registry.

INS-41303: External redundancy requires a location for the Oracle Cluster Registry.

Cause: A location for the Oracle Cluster Registry was not specified.

Action: Specify a location for the Oracle Cluster Registry.

INS-41305: Invalid characters in one or more Oracle Cluster Registry (OCR) locations.

Cause: One or more Oracle Cluster Registry (OCR) locations contained bad characters.

Action: Provide an OCR location that uses valid characters in the path.

INS-41306: Invalid Oracle Cluster Registry (OCR) Locations.

Cause: One or more Oracle Cluster Registry (OCR) locations are not valid.

Action: Provide valid OCR locations.

INS-41307: Insufficient space in shared file system for Oracle Cluster Registry (OCR).

Cause: Insufficient free space was available in the file system. Oracle Cluster Registry requires a minimum of *string* MB of free space in the file system.

Action: Enter a shared file system that has at least *string* MBs of free space.

INS-41309: The Oracle Cluster Registry (OCR) cannot be placed on a block or character device.

Cause: The Oracle Cluster Registry (OCR) location you provided is on a block or character device.

Action: Select one of the following supported locations: OCFS2 partition, or a shared NFS partition. If you intend to use block or character device, choose Oracle Automatic Storage Management (Oracle ASM) as storage option for install.

INS-41310: More than one Oracle Cluster Registry is in the same partition.

Cause: The Oracle Cluster Registry was located more than once on the same partition. For normal redundancy, Oracle recommends that you specify three locations on separate partitions for the Oracle Cluster Registry.

Action: Select separate partitions for each Oracle Cluster Registry.

INS-41311: One or more Oracle Cluster Registry (OCR) locations specified are in an existing OCR directory.

Cause: One or more Oracle Cluster Registry (OCR) locations specified were in directories with existing OCR files.

Action: Specify locations for Oracle Cluster Registry that are not in use.

INS-41312: One or more locations specified for the Oracle Cluster Registry (OCR) cannot be used.

Cause: One or more Oracle Cluster Registry (OCR) locations specified did not have proper permissions or ownership for the installation to proceed.

Action: Specify a location for Oracle Cluster Registry locations where the installation owner and oraInventory group members have read and write permissions

INS-41313: Duplicate entries found in one or more Oracle Cluster Registry (OCR) locations.

Cause: One or more Oracle Cluster Registry locations specified were duplications.

Action: Specify a unique location for each Oracle Cluster Registry location.

INS-41314: File *string* already exists. The installer will make an attempt to replace this file.

Cause: The specified OCR file already exists.

Action: You may choose a different location or let the installer replace this file. Replacing it will overwrite its current contents.

INS-41315: File *string* already exists.

Cause: The specified OCR file already exists.

Action: Ensure that the OCR file you have specify is a nonexistent file.

INS-41316: Unable to delete file *string*

Cause: The attempt to delete the file was not successful.

Action: Ensure that the user account running the installation has the permissions to replace the file.

INS-41317: Invalid Oracle Cluster Registry (OCR) locations.

Cause: One or more Oracle Cluster Registry (OCR) locations were not valid.

Action: Provide valid OCR locations.

INS-41318: One or more files *string* already exist. The installer will attempt to replace existing files.

Cause: One or more specified files already exist.

Action: Either choose a different storage location, or allow the installer to overwrite this location and remove any existing files.

INS-41319: File(s) *string* already exist(s).

Cause: The specified shared location is in use.

Action: Ensure that the location you provided is not already in use, and that any past Oracle Clusterware configuration is completely removed from the partition.

INS-41320: Unable to delete one or more files *string*.

Cause: The attempt to delete files was unsuccessful.

Action: Ensure that the user account running the installation has the permissions to replace files.

INS-41321: Invalid Oracle Cluster Registry (OCR) location.

Cause: The installer detects that the storage type of the location (*string*) is not supported for Oracle Cluster Registry.

Action: Provide a supported storage location for the Oracle Cluster Registry.

INS-41322: The provided OCR Location (*string*) can not be configured.

Cause: *string* name is reserved for the backup locations for OCR.

Action: Provide the OCR location name other than week.ocr,data.ocr,backup00.ocr,backup01.ocr,backup02.ocr.

INS-41502: Insufficient number of voting disk locations provided for normal redundancy configuration.

Cause: You did not provide enough separate locations for voting disk files. To provide normal redundancy, you must specify three separate locations for voting disk files.

Action: Specify three separate locations for voting disk files for normal redundancy.

INS-41503: Missing voting disk file locations for external redundancy configuration.

Cause: A voting disk file location was not specified. For external redundancy, you must specify a location for the voting disk file.

Action: Specify one voting disk file location for external redundancy.

INS-41505: The voting disk file locations contain one or more invalid characters.

Cause: n/a

Action: n/a

INS-41506: One or more voting disk file locations are not valid.

Cause: One or more voting disk file locations were not placed in an existing directory.

Action: Provide valid voting disk file locations.

INS-41508: More than one voting disk file is located on the same partition.

Cause: Normal redundancy for voting disk files requires that each file is placed on a different partition, to avoid a single point of failure.

Action: Specify three locations on separate physical partitions to configure normal redundancy for voting disk files.

INS-41509: Duplicate locations used for one or more voting disk file locations.

Cause: One or more voting disk file locations you provide are duplicate. Each voting disk location must be on separate devices.

Action: Specify a location on separate devices for each voting disk file.

INS-41510: One or more voting disk file locations are the same as an OCR location.

Cause: One or more voting disk file locations you provided are the same as an OCR location. Voting disk files cannot be on the same location as Oracle Cluster Registry (OCR) locations.

Action: Specify voting disk file locations that are different from Oracle Cluster Registry (OCR) locations.

INS-41511: One or more of the locations you specified for voting disk files are the same as an Oracle 9i quorum location.

Cause: Oracle 9i quorum disks are located on one or more of the locations you specified for voting disk files.

Action: Provide new locations for voting disk files. You cannot reuse an Oracle9i quorum disk location.

INS-41512: Voting disk files cannot be located on block or character devices.

Cause: The voting disk file location you provided is on a block or character device.

Action: Select one of the following supported locations: Oracle Automatic Storage Management, an OCFS2 partition, or a shared NFS partition.

INS-41513: Voting disk file locations cannot be in a directory with existing voting disks.

Cause: One or more voting disk file locations you provided have an existing voting disk file.

Action: Specify a new voting disk file location.

INS-41514: One or more locations you specified for voting disk files cannot be used.

Cause: One or more locations you specified for placing voting disk files did not have proper permissions or ownership for installation to proceed.

Action: Specify voting disk file locations where the user account running the installation and oraInventory group members have read and write privileges.

INS-41515: Insufficient space in shared file system for voting disk file.

Cause: Insufficient space was available in the storage location for a voting disk file. Voting disk files require a minimum of *string* MB of free space.

Action: Enter a shared storage location that has at least *string* MB of free space.

INS-41516: File *string* already exists. The installer will make an attempt to replace this file.

Cause: The specified voting disk file already exists.

Action: You may choose a different location or let the installer replace this file. Replacing it will overwrite its current contents.

INS-41517: File *string* already exists.

Cause: The specified voting disk file already exists.

Action: Ensure that the location you specify for a voting disk file does not already have a voting disk file in that location.

INS-41518: Unable to delete file *string*

Cause: The attempt to delete the file was not successful.

Action: Ensure that the user account running this installation has proper permissions in this storage area to replace the file.

INS-41519: One or more voting disk file locations are not valid.

Cause: One or more voting disk file locations may not be shared on all nodes.

Action: Provide valid voting disk file locations on shared paths and directories.

INS-41520: For high availability, Oracle recommends that you have this storage mirrored at the hardware level. Alternatively, you can select \"Normal Redundancy\" option and specify three locations that are on different disks.

Cause: n/a

Action: n/a

INS-41521: Invalid Voting Disk location.

Cause: The installer detects that the storage type of the location (*string*) is not supported for voting disk files.

Action: Provide a supported storage location for the voting disk file.

INS-41702: No nodes selected for upgrade.

Cause: Node selection was blank.

Action: Select a list of nodes to upgrade with the local node.

INS-41703: The local node is not selected as one of the nodes for upgrade.

Cause: The nodes selected for upgrade did not include the local node.

Action: Select the local node (the node from which you are running the installer) as one of the nodes to upgrade.

INS-41704: Selected nodes should be members of the same cluster. The following nodes are not in the cluster: *string*.

Cause: One of more nodes selected were not in the same cluster.

Action: Select nodes from the same cluster, or exclude the following nodes:*string*

INS-41705: The installer has detected that one or more nodes (*string*) that are part of the cluster are down.

Cause: n/a

Action: n/a

INS-41706: Only subset of nodes selected for upgrade.

Cause: You have chosen a subset of the cluster nodes for the upgrade.

Action: During installation, the software will be copied to all cluster nodes. However, during installation setup, you are prompted to run the rootupgrade script only on the nodes you selected for upgrade. To complete the upgrade, run the rootupgrade script on the remaining nodes. You do not need to start the installer again to upgrade the remaining nodes.

INS-41707: Not all cluster member nodes are selected for upgrade.

Cause: The installer detects that this server has an earlier release of Oracle Grid Infrastructure software installed on this system. However, you have selected to upgrade a subset of the cluster nodes.

Action: To complete the upgrade, select all the nodes that are part of the Oracle Grid Infrastructure cluster.

INS-41708: Oracle Automatic Storage Management (Oracle ASM) is not selected for upgrade.

Cause: The installer detects that an earlier release of Oracle ASM is installed on this server. Oracle ASM needs to be upgraded as part of this installation.

Action: Select Oracle ASM upgrade option to complete the installation.

INS-41709: Oracle Automatic Storage Management (Oracle ASM) is not installed on this server.

Cause: You selected to upgrade Oracle ASM. However, the installer does not detect Oracle ASM on this server.

Action: To continue with the installation, deselect the option to upgrade Oracle ASM.

INS-41710: Oracle Automatic Storage Management (Oracle ASM) configured in your cluster cannot be upgraded in a rolling manner. During the upgrade process, any databases using the active Oracle ASM will be forcibly shutdown.

Cause: The installer has detected that the version of the configured instance of Oracle ASM is not compatible for rolling upgrade to this release of Oracle Grid Infrastructure.

Action: All the databases using the active Oracle ASM will go down during this installation. Plan for databases to be unavailable during the time when the installer is running configuration tools.

INS-41711: The upgrade process upgrades the stack one node at a time, even though you selected to upgrade all nodes. Database service will be disrupted for any database that uses Oracle Automatic Storage Management (Oracle ASM), and that is not managed by Oracle Clusterware, or that uses Oracle Clusterware manual management policy. All other databases and services should not be affected, and

should continue to function. If this is not desirable, then before proceeding with the upgrade, ensure that Oracle Clusterware manages databases using Oracle ASM, and set the automatic management policy on databases managed by Oracle Clusterware.

Cause: n/a

Action: n/a

INS-41712: Installer has detected that the Oracle Clusterware software on this cluster is not functioning properly on the following nodes *string*.

Cause: The Oracle Clusterware software configured on the system is not in a suitable state to upgrade.

Action: Ensure that the Oracle Clusterware software is in a consistent state to perform an upgrade.

INS-41713: The installer has detected that one or more nodes (*string*) that are part of the cluster are down. Installer will perform upgrade of Grid Infrastructure only on the nodes that are up. The remaining nodes can be upgraded later, following the manual steps as detailed in the documentation.

Cause: n/a

Action: n/a

INS-41714: The installer has detected that you are performing a non-rolling upgrade. Oracle recommends that you perform rolling upgrade of Oracle Grid Infrastructure operated in Flex Cluster Mode.

Cause: n/a

Action: n/a

INS-41802: Unable to determine release of Oracle Automatic Storage Management running from home *string*.

Cause: An Oracle Automatic Storage Management (Oracle ASM) home was found, but the Oracle ASM instance was down. The installer was unable to determine the Oracle ASM release.

Action: Ensure that the Oracle ASM instance installed in home *string* is up, and then retry the installation.

INS-41803: An entry for Oracle ASM is found in the system registry or oratab, but it is not associated with a software home location.

Cause: An Oracle ASM entry was listed in the system registry or oratab, but Oracle ASM home *string* was missing.

Action: Ensure that either the oratab or the system registry is correct, or that the inventory is not corrupted.

INS-41804: An instance of a prior release Oracle ASM is running.

Cause: There is an Oracle ASM instance already running on the server.

Action: Upgrade the existing Oracle ASM instance to the current release.

INS-41806: Virtual IP name cannot be the same as the Single Client Access Name (SCAN): *string*

Cause: The name you provided for the virtual IP name is the same name used as the SCAN.

Action: Enter a name for the virtual IP that is different from the name you entered for the SCAN.

INS-41807: The installer has detected that Oracle Clusterware is not running on the following nodes: *string*.

Cause: Either there was an error in starting the Oracle Clusterware stack on the specified nodes, or the root scripts on the specified nodes were not run.

Action: Run the root scripts on the nodes listed. If root scripts have already been run on these nodes, then examine the log file *string* on each failed node to determine the reason for the Oracle Clusterware stack not starting

INS-41808: Possible invalid choice for OSASM Group.

Cause: The name of the group you selected for the OSASM group is commonly used to grant other system privileges (For example: asmdba, asmoper, dba, oper).

Action: Oracle recommends that you designate asmadmin as the OSASM group.

INS-41809: Possible invalid choice for OSDBA Group.

Cause: The group name you selected as the OSDBA for ASM group is commonly used for Oracle Database administrator privileges.

Action: Oracle recommends that you designate asmdba as the OSDBA for ASM group, and that the group should not be the same group as an Oracle Database OSDBA group.

INS-41810: Possible invalid choice for OSOPER Group.

Cause: The group name you selected as the OSOPER for ASM group is commonly used for Oracle Database administrator privileges.

Action: Oracle recommends that you designate asmoper as the OSOPER for ASM group, and that the group should not be the same group as an Oracle Database OSOPER group.

INS-41811: OSDBA for ASM and OSOPER for ASM groups are the same OS group.

Cause: The groups you selected granting the OSDBA for ASM and OSOPER for ASM system privileges are the same group.

Action: Oracle recommends that you designate different OS groups to grant the OSDBA for ASM and OSOPER for ASM system privileges.

INS-41812: *string* and OSASM are the same OS group.

Cause: The chosen values for *string* group and the chosen value for OSASM group are the same.

Action: Select an OS group that is unique for ASM administrators. The OSASM group should not be the same as the OS groups that grant privileges for Oracle ASM access, or for database administration.

INS-41813: OSDBA for ASM, OSOPER for ASM, and OSASM are the same OS group.

Cause: The group you selected for granting the OSDBA for ASM group for database access, and the OSOPER for ASM group for startup and shutdown of Oracle ASM, is the same group as the OSASM group, whose members have SYSASM privileges on Oracle ASM.

Action: Choose different groups as the OSASM, OSDBA for ASM, and OSOPER for ASM groups.

INS-41814: The installer has detected that some of the services of Oracle Grid Infrastructure are not running on this system.

Cause: There may have been an error in starting the Oracle Grid Infrastructure services, or you may not have run the root scripts starting these services on this server.

Action: Confirm that you have run the root scripts on this server. If the root scripts have been run, then examine the log file *string* to determine the reason for the services failing to start.

INS-41815: The installer has detected that Oracle Clusterware is not upgraded to *string* version.

Cause: Either there was an error in starting the Oracle Clusterware stack on some of the nodes, or the root scripts on some nodes were not run. If the Clusterware is upgraded from earlier versions, root upgrade script might not be run successfully on the specified nodes.

Action: Run the root scripts on the nodes listed. If root scripts have already been run on these nodes, then examine the log file *string* on each failed node to determine the reason for the Oracle Clusterware stack not starting.

INS-41816: The installer has detected that Oracle Clusterware is not upgraded to *string* version.

Cause: There might be an error in starting the Oracle Clusterware stack on the some of the nodes or there might be unreachable node(s) which are part of Oracle Clusterware.

Action: Examine the log file *string* on each failed node to determine the reason for the Oracle Clusterware stack not upgraded to current release version. The unreachable nodes can be upgraded by following the manual steps as detailed in the documentation.

INS-41817: The installer has detected that Oracle Clusterware is not running on the following nodes: *string*.

Cause: There may have been an error in starting the Oracle Clusterware stack on the specified nodes.

Action: Examine the log file *string* on each failed node to determine the reason for the Oracle Clusterware stack not starting.

INS-41818: The installer has detected that some of the services of Oracle Grid Infrastructure are not running on this system.

Cause: There may have been an error in starting the Oracle Grid Infrastructure services.

Action: Examine the log file *string* to determine the reason for the services failing to start.

INS-41871: The user account you are using to install the software is not a member of the following OS groups: *string*

Cause: The installation user account must be a member of all groups required for installation.

Action: Change the installation users group memberships to include the required OS system privileges groups, or select system privileges OS groups in which the installation owner is a member.

INS-41872: The OS group you selected as the ASM Administration Operator Group (ASMOPER) may not exist on the server.

Cause: The installer cannot find the group you selected to be the ASMOPER group in the groups defined on the server, or in the Network Information Service (NIS).

Action: Confirm that the group you want to use as the ASMOPER group exists on the server, or in NIS. Create or specify another group if it does not exist.

INS-41873: Invalid value specified for OSOPER Group.

Cause: OS group *string* specified for OSOPER Group contains one or more invalid characters.

Action: Remove the invalid characters (*string*) from *string* or select an existing OS Group for OSOPER Group.

INS-41874: Oracle ASM Administrator (OSASM) Group specified is same as the inventory group.

Cause: Operating system group *string* specified for OSASM Group is same as the inventory group.

Action: It is not recommended to have OSASM group same as inventory group. Select any of the group other than the inventory group to avoid incorrect configuration.

INS-41875: Oracle ASM Administrator (OSASM) Group specified is same as the users primary group.

Cause: Operating system group *string* specified for OSASM Group is same as the users primary group.

Action: It is not recommended to have OSASM group same as primary group of user as it becomes the inventory group. Select any of the group other than the primary group to avoid misconfiguration.

INS-41876: The node listener user name provided cannot be root.

Cause: n/a

Action: n/a

INS-41877: The node listener user name provided cannot be same as the installing user.

Cause: n/a

Action: n/a

INS-41878: The node listener user ('*string*') provided does not exist on nodes which are provided for cluster configuration.

Cause: n/a

Action: n/a

INS-41879: User name for node listener was not provided for clusterware configuration.

Cause: n/a

Action: n/a

INS-41880: User for node listener cannot be a member of Oracle ASM Administrator (OSASM) group.

Cause: n/a

Action: n/a

INS-41881: Installer has detected that the group specified for *string* is not same as the group retrieved from the current configuration of grid software. The upgrade operation may not be successful if the same group name is not selected.

Cause: n/a

Action: n/a

INS-41882: The node listener user name provided cannot be nobody.

Cause: n/a

Action: n/a

INS-41901: The Oracle Grid Infrastructure Typical installation cannot be performed on this system.

Cause: The installer has detected the existence of vendor-specific clusterware. The typical Oracle Grid Infrastructure installation is a simplified configuration that is not designed to co-exist with clusterware other than Oracle Clusterware.

Action: Select Advanced Installation for Oracle Grid Infrastructure. This option allows you to specify configuration information required for Oracle Clusterware to operate with other vendor clusterware.

INS-41902: The Oracle Grid Infrastructure Typical installation cannot be performed on this system.

Cause: The installer has detected the existence of Oracle RAC 9i release 9.x on this server. The Oracle Grid Infrastructure Typical installation is a simplified configuration that is not designed to support older versions of Oracle RAC.

Action: Select Advanced Installation for Oracle Grid Infrastructure. This option allows you to specify configuration information required for Oracle Clusterware to operate with Oracle RAC release 9.x.

INS-42001: The same drive letter *string* cannot be assigned to more than one partition

Cause: n/a

Action: n/a

INS-42002: The specified partition cannot be used.

Cause: The specified partition was selected for storing the software binaries.

Action: Instead, choose a location that is formatted for storing data files.

INS-42003: No partitions selected

Cause: No partitions were selected or partition details provided were incomplete.

Action: Specify one or more partitions. For each partition, select the format option and drive letter you want to have assigned to that partition.

INS-42004: No free drive letters available

Cause: The local server did not have any available drive letters to assign to partitions.

Action: Make drive letters available on the server, and then restart the installer.

INS-42005: The drive letter is not assigned to one or more partitions

Cause: Each partition you select must have an assigned drive letter.

Action: Ensure all partitions you want to use are configured with drive letters.

INS-42006: Selected drive letter (*string*) is invalid or not available for usage.

Cause: Either the drive letter is invalid, or it is already assigned to an existing partition.

Action: Select a valid drive letter.

INS-42011: The operating system group specified for oraInventory group is invalid.

Cause: The user account running the installation must have the oraInventory group as its primary group.

Action: Change the oraInventory group to the primary group of the installation owner account, or change the installation owner groups so that the group you want to use for the oraInventory group is the primary group of the installation owner.

INS-42012: The current Grid home is not registered in the central inventory on this host.

Cause: The wizard finds that this Grid home is not registered in the central inventory.

Action: Register the Grid home in the central inventory by using a cloning operation, or by using an attach-home operation.

INS-42013: Installation user cannot configure the Grid home.

Cause: The wizard detects that the existing Grid home was not installed or cloned using the current user id: *string*.

Action: Either restart the wizard as the user account that was used previously to install the Grid home, or re-clone the Grid home using the current user account.

INS-42014: Oracle Grid Infrastructure cannot be configured.

Cause: The wizard detects that Oracle Grid Infrastructure is already configured on this server.

Action: Before you can proceed, you must completely remove the configured instance.

INS-42015: File missing from Grid home: *string*

Cause: The installer cannot find the specified file in the Grid home. The wizard requires this file to be present in the Grid home before it can proceed.

Action: Restore the home by re-cloning the home, or re-install the software from installation media.

INS-42016: The current Grid home is not registered in the central inventory on the following nodes: *string*

Cause: The wizard does not find this Grid home to be registered with the central inventory on some or all of the nodes specified.

Action: Register the Grid home on the specified nodes with the central inventory, either by using a cloning operation, or by using an attach-home operation. Restart the wizard after fixing this issue.

INS-42017: The Grid home is inconsistent on the following nodes: *string*

Cause: The wizard detects that the Grid home is inconsistent on some or all of the nodes specified. Review the log file for further details.

Action: Ensure that the Grid home is consistent on all nodes.

INS-42018: Specified disk group is invalid.

Cause: The installer detects that the specified disk group is not on the discovery path you provided.

Action: For the selected disks, specify a valid disk group name, to which these disk previously were assigned. Also ensure that the discovery path you provide includes the disks.

INS-42019: The wizard is unable to detect a configured prior release instance of Oracle Grid Infrastructure for a cluster or Cluster Ready Services.

Cause: You can only use Oracle Grid Infrastructure Configuration Wizard to upgrade earlier releases of Oracle Grid Infrastructure for a cluster or Cluster Ready Services.

Action: Ensure Oracle Grid Infrastructure for a cluster or Cluster Ready Services is configured properly before using the configuration wizard. To perform any other upgrade, use the Oracle Grid Infrastructure installer, or run root configuration scripts directly.

INS-42020: The Wizard is unable to detect the user of Grid home.

Cause: The wizard is not able to detect the user of the existing Grid home. This might be because configuration file (*string*) is modified/corrupted in the Grid home.

Action: Verify the correctness of the configuration file. If the file is corrupted, either restore the home by re-cloning the home or re-install the software from installation media.

INS-42021: Multibyte characters in SCAN Name

Cause: In Typical install SCAN Name is also used as Cluster Name. The SCAN name contains multibyte characters which are invalid for Cluster Name.

Action: Ensure that SCAN Name contains valid characters for Cluster Name. Valid characters for Cluster Name can be lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen (-).

INS-42022: Multibyte characters in Cluster Name.

Cause: Multibyte characters are not allowed in Cluster Name.

Action: Ensure the Cluster Name contains valid characters. Valid characters for Cluster Name can be lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen (-).

INS-42023: Invalid option specified for Oracle Grid Infrastructure Wizard.

Cause: The Oracle Grid Infrastructure Wizard only supports Configuring Oracle Grid Infrastructure for a cluster or Upgrading an existing Grid Infrastructure.

Action: Ensure that you select one of the supported options.

INS-42024: Installer has detected that the group configured for *string* privilege in the current home does not match with the group name retrieved (*string*) from the home where earlier version of Oracle Clusterware is configured presently.

Cause: n/a

Action: n/a

INS-42025: Grid Infrastructure Home is not suitable to be configured on this cluster

Cause: The Grid Infrastructure Home is registered with the local user. Configuration cannot continue.

Action: Ensure that the Grid Infrastructure Home is registered with a secure domain user for configuration to continue.

INS-42099: Oracle Service username is not specified.

Cause: For Management Database option its mandatory to specify Oracle Service username.

Action: Specify Oracle Service username.

INS-43001: Cluster type not specified

Cause: Either cluster type is not specified or invalid value is specified

Action: Specify a valid cluster type.

INS-43002: Big Cluster cannot be configured on this host.

Cause: Installer has detected 9i Oracle Real Application Cluster Database on this host. Flex Cluster cannot be configured on a host that has 9i Oracle RAC database configured on it.

Action: You must first configure normal Oracle Clusterware and migrate to Flex Cluster later. Alternatively you can configure Flex cluster after removing 9i Oracle RAC Database.

INS-43003: Big Cluster cannot be configured on this host.

Cause: Installer has detected operating system provided clustering software on this host. Flex Cluster cannot be configured on a host that is managed by operating system provided clustering software.

Action: You can only configure normal Oracle Clusterware on hosts managed by operating system provided clustering software. Alternatively, you can configure Flex Cluster after disabling the operating system provided clustering software.

INS-43004: Big Cluster cannot be configured on this host.

Cause: Installer has detected Oracle Clusterware on this host. Flex Cluster cannot be configured on a host that already has Oracle Clusterware installed.

Action: Remove the existing Oracle Clusterware software before choosing to configure Flex Cluster.

INS-43021: All the nodes (*string*) are down in the last batch.

Cause: Installer has detected that all the nodes specified in the last batch are down. There should be atleast one node up and running to complete the Grid Infrastructure upgrade.

Action: Ensure that atleast one node in the last batch is running to complete the upgrade operation.

INS-43022: You have selected to execute the root script manually. If some of the nodes are not reachable at the time of upgrade root script execution and if you would want to complete the Grid Infrastructure upgrade on the reachable nodes, you may be required to rerun the *string* with -force flag from the last node after you have completed the execution of this script on all the reachable nodes. The remaining unreachable nodes can be upgraded later, following the manual steps as detailed in the documentation.

Cause: n/a

Action: n/a

INS-43023: Specified sudo user name ('*string*') cant be used to execute configuration script(s).

Cause: Only current installation user name is allowed to execute configuration script(s) using sudo option.

Action: Ensure that you specify the sudo user name same as the current installation user name.

INS-43024: n/a

Cause: n/a

Action: n/a

INS-43025: Installer has detected that there are nodes of different role in batch(*string*).

Cause: n/a

Action: n/a

INS-43026: Installer has detected that batch(*string*) contains LEAF nodes and batch(*string*) contains HUB nodes.

Cause: n/a

Action: n/a

INS-43041: CLUSTER_NEW_VIRTUAL_HOSTNAMES parameter was not specified.

Cause: The CLUSTER_NEW_VIRTUAL_HOSTNAMES parameter was not provided for performing addnode operation.

Action: Ensure that CLUSTER_NEW_VIRTUAL_HOSTNAMES parameter is passed. Refer to installation guide for more information on the syntax of passing CLUSTER_NEW_VIRTUAL_HOSTNAMES parameter.

INS-43042: The cluster nodes *string* specified for addnode is already part of a cluster.

Cause: Cluster nodes specified already has clusterware configured.

Action: Ensure that the nodes that do not have clusterware configured are provided for addnode operation.

INS-43043: Parameters specified for addnode operation are missing details for nodes.

Cause: Some of the parameters passed for addnode operation have incomplete details of the node to be added.

Action: Ensure that the nodes details are appropriately specified and each node have the associated details in parameters.

INS-43044: Addnode operation cannot be performed from a Leaf node.

Cause: Leaf node cannot be local node while performing addnode operation.

Action: Ensure that the addnode operation is performed from a Hub node.

INS-43045: *string* parameter was not specified.

Cause: The *string* parameter was not provided for performing addnode operation.

Action: Ensure that *string* parameter is passed. Refer to installation guide for more information on the syntax of passing CLUSTER_NEW_VIRTUAL_HOSTNAMES parameter.

INS-43046: The Oracle home location contains directories or files on following remote nodes:*string*.

Cause: n/a

Action: n/a

INS-43047: Clusterware configured in Auto mode cannot have nodes of type HUB or LEAF.

Cause: n/a

Action: n/a

INS-43048: An Auto node cannot be added to a cluster having only Hub and Leaf nodes.

Cause: n/a

Action: n/a

INS-43049: Hub nodes cannot be added to the cluster as it is already having *string* Hub nodes which is the maximum number of Hub nodes for a big cluster.

Cause: n/a

Action: n/a

INS-43050: Installer has detected that the clusterware configured on the system is not running from the grid home on which addnode is being performed.

Cause: n/a

Action: n/a

INS-43051: Virtual Hostname was not specified for performing addnode operation.

Cause: n/a

Action: n/a

INS-43052: The Oracle home location contains directories or files on following remote nodes:*string*.

Cause: n/a

Action: n/a

INS-43066: The installer has detected that Oracle Clusterware is not running on the following nodes: *string*. Ignore the warning if any policy managed databases software are not extended to new nodes yet.

Cause: Either there was an error in starting the Oracle Clusterware stack on the specified nodes, or the root scripts on the specified nodes were not run.

Action: Run the root scripts on the nodes listed. If root scripts have already been run on these nodes, then examine the log file *string* on each failed node to determine the reason for the Oracle Clusterware stack not starting

INS-43080: Some of the configuration assistants failed, were cancelled or skipped.

Cause: n/a

Action: n/a

INS-43100: Insufficient space available in the ASM diskgroup *string*.

Cause: n/a

Action: n/a

INS-43101: Insufficient space available in shared file system for Oracle Cluster Registry (OCR) Location *string*.

Cause: n/a

Action: n/a

INS-43102: You cannot upgrade Oracle Grid Infrastructure as Built-In Account.

Cause: The installer has detected that the Oracle Home user of the active Oracle Grid Infrastructure home is (*string*). Oracle GI cannot be upgraded using Built-In Account for the current installation.

Action: Specify (*string*) as the Oracle Home User to perform the upgrade.

INS-43103: Oracle Grid Infrastructure Home is not suitable for upgrade.

Cause: The wizard has detected that the Oracle Home user of the active Oracle Grid Infrastructure home is *string*, whereas the Oracle Home user of the current home is Built-In Account.

Action: Re-install the Oracle Grid Infrastructure software using the appropriate Oracle Home User to perform the upgrade.

INS-43104: If you intend to use this Oracle Grid Infrastructure home to upgrade the active instance of Oracle Grid Infrastructure, then the specified user is invalid.

Cause: The installer has detected that the specified Oracle Home user does not match the Oracle Home user of the active Oracle Grid Infrastructure home(*string*).

Action: Specify (*string*) as the Oracle Home User to be able to upgrade the active Oracle GI to this home.

INS-43105: Specified Oracle Home User (*string*) is invalid.

Cause: The installer has detected that the specified Oracle Home user does not match the Oracle Home user of the active Oracle Grid Infrastructure home (*string*).

Action: Specify (*string*) as the Oracle Home User to perform the upgrade.

INS-43106: Oracle Grid Infrastructure Home is not suitable for upgrade

Cause: The wizard has detected that the Oracle Home user of this home (*string*) does not match the Oracle Home user of the active Oracle Grid Infrastructure home (*string*).

Action: Re-install the Oracle Grid Infrastructure software using the appropriate Oracle Home User to perform the upgrade.

INS-43110: Empty value provided for OMS Host.

Cause: n/a

Action: n/a

INS-43111: Empty value provided for Enterprise Manager Admin password.

Cause: n/a

Action: n/a

INS-43112: Empty value provided for Enterprise Manager Admin user.

Cause: n/a

Action: n/a

INS-43113: Empty value provided for OMS Port.

Cause: n/a

Action: n/a

INS-43114: Unable to connect to Enterprise Manager Cloud Control.

Cause: Invalid connection information specified.

Action: Specify valid connection information.

JMS-00101 to JMS-00257

JMS-00101: Invalid delivery mode {0}

Cause: The delivery mode is not supported

Action: The valid delivery mode is `AQjmsConstants.PERSISTENT` or `AQjmsConstants.NON_PERSISTENT`

JMS-00102: Feature not supported {0}

Cause: This feature is not supported in the current release

Action: n/a

JMS-00104: Message Payload must be specified

Cause: The message payload was null

Action: Specify a non-null payload for the message

JMS-00105: Agent must be specified

Cause: `AQjmsAgent` object was null

Action: Specify a valid `AQjmsAgent` representing the remote subscriber

JMS-00106: Cannot have more than one open Session on a JMSConnection

Cause: There is already one open `jms` session on the connection Cannot have more than one open session on a connection

Action: Close the open session and then open a new one

JMS-00107: Operation not allowed on {0}

Cause: The specified operation is not allowed on this object

Action: n/a

JMS-00108: Messages of type {0} not allowed with Destinations containing payload of type {1}

Cause: There was a mismatch between the message type being used and the payload type specified for the destination

Action: Use the message type that maps to the payload specified for the queue table that contains this destination

JMS-00109: Class not found: {0}

Cause: The specified class was not found

Action: Make sure your `CLASSPATH` contains the class

JMS-00110: Property {0} not writeable

Cause: An attempt was made to update a read-only message header field or property

Action: n/a

JMS-00111: Connection must be specified

Cause: The connection object was null

Action: Specify a non-null jdbc connection

JMS-00112: Connection is invalid

Cause: The jdbc connection is invalid

Action: Specify a non-null oracle jdbc connection

JMS-00113: Connection is in stopped state

Cause: An attempt was made to receive messages on a connection that is in stopped state

Action: Start the connection

JMS-00114: Connection is closed

Cause: An attempt was made to use a Connection that has been closed

Action: Create a new connection

JMS-00115: Consumer is closed

Cause: An attempt was made to use a Consumer that has been closed

Action: Create a new Message Consumer

JMS-00116: Subscriber name must be specified

Cause: Subscriber name was null

Action: Specify a non-null subscription name

JMS-00117: Conversion failed - invalid property type

Cause: An error occurred while converting the property to the requested type

Action: Use the method corresponding to the property data type to retrieve it

JMS-00119: Invalid Property value

Cause: The property value specified is invalid

Action: Use an appropriate type of value for the property being set

JMS-00120: Dequeue failed

Cause: An error occurred while receiving the message

Action: See message inside the JMSEException and linked SQLException for more information

JMS-00121: DestinationProperty must be specified

Cause: A null AQjmsDestinationProperty was specified while creating a queue/topic

Action: Specify a non-null AQjmsDestinationProperty for the destination

JMS-00123: Interval must be at least {0} seconds

Cause: An invalid interval was specified

Action: Specify an interval value that is greater than or equal to 1 second

JMS-00124: Invalid Dequeue mode

Cause: Invalid dequeue mode was specified

Action: Valid Dequeue modes are AQConstants.DEQUEUE_BROWSE, AQConstants.DEQUEUE_REMOVE, AQConstants.DEQUEUE_LOCKED, AQConstants.DEQUEUE_REMOVE_NODATA

JMS-00125: Invalid Queue specified

Cause: An invalid Queue object was specified

Action: Specify a valid Queue handle

JMS-00126: Invalid Topic specified

Cause: An invalid Topic object was specified

Action: Specify a valid Topic handle

JMS-00127: Invalid Destination

Cause: An invalid destination object was specified

Action: Specify a valid destination (Queue/Topic) object

JMS-00128: Invalid Navigation mode

Cause: An invalid navigation mode was specified

Action: The valid navigation modes are

AQjmsConstants.NAVIGATION_FIRST_MESSAGE,

AQjmsConstants.NAVIGATION_NEXT_MESSAGE,

AQjmsConstants.NAVIGATION_NEXT_TRANSACTION

JMS-00129: Invalid Payload type

Cause: There was a mismatch between the message type being used and the payload type specified for the destination

Action: Use the message type that maps to the payload specified for the queue table that contains this destination. For ADT messages, use the appropriate CustomDatum/ORADData factory to create the message consumer

JMS-00130: JMS queue cannot be multi-consumer enabled

Cause: An attempt was made to get an AQ multi-consumer queue as a JMS queue

Action: JMS queues cannot be multi-consumer enabled

JMS-00131: Session is closed

Cause: An attempt was made to use a session that has been closed

Action: Open a new session

JMS-00132: Maximum number of properties (100) exceeded, message has {0} properties

Cause: Maximum number of properties (100), including provider-specific properties, for the message has been exceeded

Action: Reduce the number of user defined properties

JMS-00133: Message must be specified

Cause: Message specified was null

Action: Specify a non-null message

JMS-00134: Name must be specified

Cause: Queue or Queue table Name specified was null

Action: Specify a non-null name

JMS-00135: Driver {0} not supported

Cause: The specified driver is not supported

Action: Valid drivers are oci8 and thin. To use the kprb driver get the kprb connection using getDefaultConnection() and use the static createTopicConnection and createQueueConnection methods

JMS-00136: Payload factory can only be specified for destinations with ADT payloads

Cause: A CustomDatumFactory/ORADDataFactory was specified for consumers on destinations not containing ADT payloads

Action: This field must be set to null for destinations containing payloads of type SYS.AQ\$_JMS_TEXT_MESSAGE, SYS.AQ\$_JMS_BYTES_MESSAGE, SYS.AQ\$_JMS_MAP_MESSAGE, SYS.AQ\$_JMS_OBJECT_MESSAGE, SYS.AQ\$_JMS_STREAM_MESSAGE

JMS-00137: Payload factory must be specified for destinations with ADT payloads

Cause: CustomDatumFactory/ORADDataFactory was not specified for destinations containing ADT payloads

Action: For destinations containing ADT messages, a CustomDatumFactory/ORADDataFactory for a java class that maps to the SQL ADT type of the destination must be specified

JMS-00138: Producer is closed

Cause: An attempt was made to use a producer that has been closed

Action: Create a new Message Producer

JMS-00139: Property name must be specified

Cause: Property name was null

Action: Specify a non-null property name

JMS-00140: Invalid System property

Cause: Invalid system property name specified.

Action: Specify one of the valid JMS system properties

JMS-00142: JMS topic must be created in multi-consumer enabled queue tables

Cause: An attempt was made to create a JMS topic in a single-consumer queue table

Action: JMS topics can only be created in queue tables that are multi-consumer enabled

JMS-00143: Queue must be specified

Cause: Null queue was specified

Action: Specify a non-null queue

JMS-00144: JMS queue cannot be created in multi-consumer enabled queue tables

Cause: An attempt was made to create a JMS queue in a multi-consumer queue table

Action: JMS queues can only be created in queue tables that are not multi-consumer enabled

JMS-00145: Invalid recipient list

Cause: The recipient list specified was empty

Action: Specify a recipient list with at least one recipient

JMS-00146: Registration failed

Cause: An error occurred while registering the type in the type map

Action: n/a

JMS-00147: Invalid ReplyTo destination type,

Cause: The ReplyTo destination object is invalid

Action: The ReplyTo destination must be of type AQjmsAgent, or AQjmsDestination. If AQjmsAgent is used, its "name" must not be "JMSReplyTo" (which is considered a reserved name to be used for AQjmsDestination objects). If AQjmsDestination is used, it must be serializable into a string (and vice-versa).

JMS-00148: Property name size exceeded

Cause: The property name is greater than the maximum size allowed

Action: Specify a property name that is less than 100 characters

JMS-00149: Subscriber must be specified

Cause: Subscriber specified was null

Action: Specify a non-null subscriber

JMS-00150: Property not supported

Cause: An attempt was made to use a property that is not supported

Action: n/a

JMS-00151: Topics cannot be of type EXCEPTION

Cause: Topics cannot be of type AQjmsConstants.EXCEPTION

Action: Specify topics to be of type AQjmsConstants.NORMAL

JMS-00153: Invalid System property type

Cause: The type of the value specified does not match the type defined for the system property being set

Action: Use the correct type for the setting the system property

JMS-00154: Invalid value for sequence deviation

Cause: The sequence deviation is invalid

Action: Valid values are AQEnqueueOption.DEVIATION_BEFORE, AQEnqueueOption.DEVIATION_TOP

JMS-00155: AQ Exception {0}

Cause: An error occurred in the AQ java layer

Action: See the message inside the JMSEException and the linked exception for more information

JMS-00156: Invalid Class {0}

Cause: Class specified is invalid

Action: make sure your CLASSPATH has the specified class

JMS-00157: IO Exception {0}

Cause: IO exception

Action: See message is JMSEException for details

JMS-00158: SQL Exception {0}

Cause: SQL Exception

Action: See message inside linked SQLEException for details

JMS-00159: Invalid selector {0}

Cause: The selector specified is either invalid or too long

Action: Check the syntax of the selector

JMS-00160: EOF Exception {0}

Cause: EOF exception occurred while reading the byte stream

Action: n/a

JMS-00161: MessageFormat Exception: {0}

Cause: An error occurred while converting the stream data to specified type

Action: check the type of data expected on the stream and use the appropriate read method

JMS-00162: Message not Readable

Cause: Message is in write-only mode

Action: Call the reset method to make the message readable

JMS-00163: Message not Writeable

Cause: Message is in read-only mode

Action: Use the clearBody method to make the message writeable

JMS-00164: No such element

Cause: Element with specified name was not found in the map message

Action: n/a

JMS-00165: Maximum size of property value exceeded

Cause: The property value exceeded the maximum length allowed

Action: Value for JMS defined properties can have a maximum length of 100, value for User defined properties can have a maximum length of 2000

JMS-00166: Topic must be specified

Cause: Topic specified was null

Action: Specify a non-null topic

JMS-00167: Payload factory or Sql_data_class must be specified

Cause: Payload factory or Sql_data_class not specified for queues containing object payloads

Action: Specify a CustomDatumFactory/ORADDataFactory or the SQLData class of the java object that maps to the ADT type defined for the queue.

JMS-00168: Cannot specify both payload factory and sql_data_class

Cause: Both CustomDatumFactory/ORADDataFactory and SQLData class were specified during dequeue

Action: Specify either the CustomDatumFactory/ORADDataFactory or the SQLData class of the java object that maps to the ADT type defined for the queue.

JMS-00169: Sql_data_class cannot be null

Cause: SQLData class specified is null

Action: Specify the SQLData class that maps to the ADT type defined for the queue

JMS-00171: Message is not defined to contain {0}

Cause: Invalid payload type in message

Action: Check if the queue is defined to contain RAW or OBJECT payloads and use the appropriate payload type in the message

JMS-00172: More than one queue table matches query {0}

Cause: More than one queue table matches the query

Action: Specify both owner and queue table name

JMS-00173: Queue Table {0} not found

Cause: The specified queue table was not found

Action: Specify a valid queue table

JMS-00174: Class must be specified for queues with object payloads\n Use dequeue(deq_option, payload_fact) or dequeue(deq_option, sql_data_cl)

Cause: This dequeue method cannot be used to dequeue from queues with OBJECT payloads

Action: use the either dequeue(deq_option, payload_fact) or dequeue(deq_option, sql_data_cl)

JMS-00175: DequeueOption must be specified

Cause: DequeueOption specified is null

Action: Specify a non-null dequeue option

JMS-00176: EnqueueOption must be specified

Cause: EnqueueOption specified is null

Action: Specify a non-null enqueue option

JMS-00177: Invalid payload type: Use dequeue(deq_option) for raw payload queues

Cause: This method cannot be used to dequeue from queues with RAW payload

Action: use the dequeue(deq_option) method

JMS-00178: Invalid Queue name - {0}

Cause: The queue name specified is null or invalid

Action: Specify a queue name that is not null. The queue name must not be qualified with the schema name. The schema name must be specified as the value of the owner parameter

JMS-00179: Invalid Queue Table name - {0}

Cause: The queue table name specified is null or invalid

Action: Specify a queue table name that is not null. The queue table name must not be qualified with the schema name. The schema name must be specified as the value of the owner parameter

JMS-00180: Invalid Queue Type

Cause: Queue type is invalid

Action: Valid types are AQConstants.NORMAL or AQConstants.EXCEPTION

JMS-00181: Invalid value for wait_time

Cause: Invalid value for wait type

Action: Wait time can be `AQDequeueOption.WAIT_FOREVER`, `AQDequeueOption.WAIT_NONE` or any value greater than 0

JMS-00182: More than one queue matches query

Cause: More than one queue matches query

Action: Specify both the owner and name of the queue

JMS-00183: No AQ driver registered

Cause: No `AQDriver` registered

Action: Make sure that the AQ java driver is registered. Use `Class.forName("oracle.AQ.AQOracleDriver")`

JMS-00184: Queue object is invalid

Cause: The queue object is invalid

Action: The underlying JDBC connection may have been closed. Get the queue handle again

JMS-00185: QueueProperty must be specified

Cause: `AQQueueProperty` specified is null

Action: Specify a non-null `AQQueueProperty`

JMS-00186: QueueTableProperty must be specified

Cause: `QueueTableProperty` specified is null

Action: Specify a non-null `AQQueueTableProperty`

JMS-00187: Queue Table must be specified

Cause: Queue Table specified is null

Action: Specify a non-null queue table

JMS-00188: QueueTable object is invalid

Cause: The queue table object is invalid

Action: The underlying JDBC connection may have been closed. Get the queue table handle again

JMS-00189: Byte array too small

Cause: The byte array given is too small to hold the data requested

Action: Specify a byte array that is large enough to hold the data requested or reduce the length requested

JMS-00190: Queue {0} not found

Cause: The specified queue was not found

Action: Specify a valid queue

JMS-00191: sql_data_cl must be a class that implements SQLData interface

Cause: The class specified does not support the `java.sql.SQLData` interface

Action: n/a

JMS-00192: Invalid Visibility value

Cause: Visibility value specified is invalid

Action: Valid values are `AQConstants.VISIBILITY_ONCOMMIT`, `AQConstants.VISIBILITY_IMMEDIATE`

JMS-00193: JMS queues cannot contain payload of type RAW

Cause: An attempt was made to create a JMS queue with RAW payload

Action: JMS queues/topics cannot contain RAW payload

JMS-00194: Session object is invalid

Cause: Session object is invalid

Action: The underlying JDBC connection may have been closed. Create a new session

JMS-00195: Invalid object type: object must implement CustomDatum/OracleData or SQLData interface

Cause: Invalid object type specified

Action: object must implement CustomDatum/ORADData or SQLData interface

JMS-00196: Cannot have more than one open QueueBrowser for the same destination on a JMS Session

Cause: There is already one open QueueBrowser for this queue on this session

Action: There cannot be more than one queue browser for the same queue in a particular session. Close the existing QueueBrowser and then open a new one

JMS-00197: Agent address must be specified for remote subscriber

Cause: Address field is null for remote subscriber

Action: The address field must contain the fully qualified name of the remote topic

JMS-00199: Registration for asynchronous receipt of messages failed

Cause: Registration with the database for asynchronous receipt of messages for the consumer failed

Action: See error message in linked Exception for details

JMS-00200: Destination must be specified

Cause: Destination is null

Action: Specify a non-null destination

JMS-00201: All Recipients in recipient_list must be specified

Cause: One or more elements in the recipient list are null

Action: All AQjmsAgents in the recipient list must be specified

JMS-00202: Unregister for asynchronous receipt of messages failed

Cause: An error occurred while removing the registration of the consumer with the database for asynchronous receipt

Action: n/a

JMS-00203: Payload Factory must be specified

Cause: Null Payload Factory was specified

Action: n/a

JMS-00204: An error occurred in the AQ JNI layer

Cause: JNI Error

Action: Check error message in linked exception for details

JMS-00205: Naming Exception

Cause: Naming exception

Action: n/a

JMS-00207: JMS Exception {0}

Cause: An error occurred in the JMS layer

Action: See the message inside the linked JMSEException for more information

JMS-00208: XML SQL Exception

Cause: An error occurred in the XML SQL layer

Action: See the message inside the linked AQxmlException for more information

JMS-00209: XML SAX Exception

Cause: An error occurred in the XML SAX layer

Action: See the message inside the linked AQxmlException for more information

JMS-00210: XML Parse Exception

Cause: An error occurred in the XML Parser layer

Action: See the message inside the linked AQxmlException for more information

JMS-00220: Connection no longer available

Cause: Connection to the database no longer available.

Action: n/a

JMS-00221: Free physical database connection unavailable in connection pool

Cause: A free physical database connection was not available in the OCI connection pool in order to perform the specified operation.

Action: Try performing the operation later

JMS-00222: Invalid Payload factory type

Cause: Payload factory should be of CustomDatumFactory or ORADDataFactory type.

Action: Use one of CustomDatumFactory/ORADDataFactory types.

JMS-00223: Payload factory must be null for destinations with Sys.AnyData payload - use typemap instead

Cause: A CustomDatumFactory/ORADDataFactory was specified for consumers on destinations containing SYS.ANYDATA payloads

Action: This field must be set to null for destinations containing payloads of type Sys.AnyData. The ORADDataFactory(s) must be registered in the session's typemap

JMS-00224: Typemap is invalid - must be populated with SQLType/OraDataFactory mappings to receive messages from Sys.AnyData destinations

Cause: The typemap of the session is null or empty. For destinations of type Sys.AnyData, the typemap must contain OraDataFactory objects for all possible types that may be stored in the queue/topic

Action: Use the AQjmsSession.getTypeMap() method get the typemap. Then use the put() method to register SQLType names and their corresponding OraDataFactory objects

JMS-00225: Invalid JDBC driver - OCI driver must be used for this operation

Cause: Operations on Sys.AnyData queues/topics are not supported using this JDBC driver

Action: Use the JDBC OCI driver to receive messages from Sys.AnyData queues/topics

JMS-00226: Header-only Message does not have a body

Cause: Header-only message does not have a body; the body cannot be cleared, changed, or queried.

Action: Do not access or modify the body of a read-only message.

JMS-00227: Illegal attempt to commit on a non transacted JMS Session

Cause: Illegal attempt to invoke the commit method on a non transacted JMS Session

Action: Remove invocation of the commit method on the current JMS Session

JMS-00228: Illegal attempt to rollback on a non transacted JMS Session

Cause: Illegal attempt to invoke the rollback method on a non transacted JMS Session

Action: Remove invocation of the rollback method on the current JMS Session

JMS-00229: {0} must be specified

Cause: The specified parameter was null

Action: Specify a non-null value for the parameter

JMS-00230: Illegal operation on durable subscription with active TopicSubscriber

Cause: Try to unsubscribe, change or create durable subscription while it has an active TopicSubscriber.

Action: Close the active TopicSubscriber and try again.

JMS-00231: Consumers on temporary destination must belong to the same

Cause: The specified parameter was null

Action: Specify a non-null value for the parameter

JMS-00232: An invalid user/password was specified for the JMS connection

Cause: Invalid user/password specified for connection

Action: Specify valid user/password for connection

JMS-00233: The required subscriber information is not available

Cause: Try to retrieve subscriber information from a subscriber which was obtained with getDurableSubscriber method and had no corresponding information in the in-memory map.

Action: Do not retrieve subscriber information from such a subscriber

JMS-00234: This operation is not allowed in the current messaging domain

Cause: Perform an operation that is not allowed in the current messaging domain

Action: Do not perform the operation in the current messaging domain

JMS-00235: Can not link the durable subscriber name with a topic in unsubscribe method.

Cause: OJMS is unable to link the supplied durable subscriber name with a topic. This causes unsubscribe method to fail.

Action: Use other unsubscribe methods which the user can provide topic name.

JMS-00236: OJMS encountered invalid OCI handles.

Cause: OJMS encountered invalid OCI handles when using JDBC OCI driver .

Action: Make sure the underlying JDBC connection is not closed while OJMS is still operating.

JMS-00237: Can not start thread for message listener.

Cause: OJMS is unable to start a new thread for message listener.

Action: Check the thread proxy code if the thread was started by a user provided thread proxy.

JMS-00238: Illegal attempt to recover on a transacted JMS Session

Cause: Illegal attempt to invoke the recover method on a transacted JMS Session

Action: Use rollback method instead of recover method on transacted JMS session.

JMS-00239: Illegal attempt to call {0} method on a XASession.

Cause: Illegal attempt to invoke the commit or rollback method on a XASession

Action: Use JTA to commit or rollback a distributed transaction

JMS-00240: Illegal attempt to call setClientID after other actions.

Cause: Illegal attempt to call Connection.setClientID method after other actions has been taken on this Connection

Action: set client ID before any other action on the Connection

JMS-00241: Illegal attempt to delete temporary destination when there are consumers using it.

Cause: Illegal attempt to delete temporary destination while there are existing consumers still using it.

Action: close the consumers before deleting the temporary destination

JMS-00242: Illegal attempt to enqueue message with both immediate visibility and three phase enqueue process.

Cause: Illegal attempt to enqueue message with both immediate visibility and three phase enqueue process.

Action: turn on the system property oracle.jms.useTemplobsForEnqueue

JMS-00243: Topic {0} not found

Cause: The specified topic was not found

Action: Specify a valid topic

JMS-00244: {0} is an invalid operation with the Sharded Queue.

Cause: The operation is not valid with the Sharded Queue

Action: Specify a valid operation for the Sharded Queue

JMS-00245: JMS Streaming support is available only for Sharded Queues.

Cause: JMS Streaming is supported with Sharded Queues only

Action: Use JMS Streaming APIs with Sharded Queue

JMS-00246: JMS Streaming support is not available for {0} driver.

Cause: JMS Streaming is supported with thin driver only

Action: Use JMS Streaming APIs with thin driver

JMS-00247: NON_PERSISTENT message delivery is not supported with JMS Streaming.

Cause: The NON_PERSISTENT delivery mode is not supported with JMS Streaming

Action: Specify PERSISTENT message delivery mode

JMS-00248: Illegal attempt to use JMS Streaming API when streaming is disabled.

Cause: Illegal attempt to use JMS Streaming API when streaming is disabled

Action: Turn on the system property oracle.jms.useJmsStreaming

JMS-00249: InputStream representing the message data must be specified.

Cause: InputStream is null

Action: Specify a valid InputStream representing the message data

JMS-00250: OutputStream must be specified to write the message data.

Cause: OutputStream is null

Action: Specify a valid OutputStream to write the data from the received message

JMS-00251: Illegal attempt to set message data using both write method(s) and Streaming API.

Cause: Illegal attempt to set message data using both write methods and Streaming API

Action: Specify either an InputStream or write method to set the message data

JMS-00252: Illegal attempt to read the data using {0} when the streaming is used with dequeue.

Cause: Illegal attempt to read the message data using read methods when the dequeue used streaming

Action: Call receiveData() to read the message data

JMS-00253: Operation {0} not allowed on a Message with null JMSMessageID.

Cause: The operation is not allowed on a Message with null JMSMessageID

Action: Use this operation on a Message with valid JMSMessageID

JMS-00254: Streaming is not used with dequeue, please use standard JMS API to read the message data.

Cause: Streaming is not used with dequeue operation

Action: Use standard JMS API to read the message data

JMS-00255: JMS Streaming support is available in a Session with acknowledge mode +

Cause: Invalid acknowledgement mode used with JMS Streaming

Action: Valid acknowledgement modes are Session.CLIENT_ACKNOWLEDGE and Session.SESSION_TRANSACTED

JMS-00256: stop() of javax.jms.Connection timed out.

Cause: stop() of javax.jms.Connection timed out

Action: A default timeout of 10 minutes is set to disable the registrations, and allow the onMessage() to process the message. Set a higher value in milli seconds for this timeout using the system property oracle.jms.notificationTimeout

JMS-00257: receive(long timeout) of javax.jms.MessageConsumer took more time than the network timeout configured at the java.sql.Connection. }

Cause: receive(long timeout) of javax.jms.MessageConsumer timed out.

Action: Please set a higher value in milliseconds for the system property 'oracle.jms.networkTimeout' or disable network timeout on java.sql.Connection by setting system property 'oracle.jms.setNetworkTimeout' to false.

JMS-00400 to JMS-00448

JMS-00400: Destination name must be specified

Cause: A null Destination name was specified

Action: Specify a non-null destination name

JMS-00402: Class not found: {0}

Cause: The specified class was not found

Action: Make sure your CLASSPATH contains the class

JMS-00403: IO Exception {0}

Cause: IO exception

Action: See message is AQxmlException for details

JMS-00404: XML Parse Exception

Cause: An error occurred in the XML Parser layer

Action: See the message inside the linked AQxmlException for more information

JMS-00405: XML SAX Exception

Cause: An error occurred in the XML SAX layer

Action: See the message inside the linked AQxmlException for more information

JMS-00406: JMS Exception {0}

Cause: An error occurred in the JMS layer

Action: See the message inside the linked JMSEException for more information

JMS-00407: Operation not allowed on {0}

Cause: The specified operation is not allowed on this object

Action: n/a

JMS-00408: Conversion failed - invalid property type

Cause: An error occurred while converting the property to the requested type

Action: Use the method corresponding to the property data type to retrieve it

JMS-00409: No such element

Cause: Element with specified name was not found in the map message

Action: n/a

JMS-00410: XML SQL Exception

Cause: An error occurred in the JDBC SQL layer

Action: See the message inside the linked SQLException for more information

JMS-00411: Payload body cannot be null

Cause: An invalid body string or document was specified

Action: Specify a non-null body string or document

JMS-00412: Byte conversion failed

Cause: An invalid username/password was specified

Action: Specify a non-null username and password

JMS-00413: Autocommit not allowed for operation

Cause: The autocommit flag cannot be set for this operation

Action: Do not set the autocommit flag

JMS-00414: Destination owner must be specified

Cause: A null Destination owner was specified

Action: Specify a non-null destination name

JMS-00415: Invalid Visibility value

Cause: Visibility value specified is invalid

Action: Valid values are `AQxmlConstants.VISIBILITY_ONCOMMIT`,
`AQxmlConstants.VISIBILITY_IMMEDIATE`

JMS-00416: Invalid Dequeue mode

Cause: Invalid dequeue mode was specified

Action: Valid Dequeue modes are `AQxmlConstants.DEQUEUE_BROWSE`,
`AQxmlConstants.DEQUEUE_REMOVE`, `AQxmlConstants.DEQUEUE_LOCKED`,
`AQxmlConstants.DEQUEUE_REMOVE_NODATA`

JMS-00417: Invalid Navigation mode

Cause: An invalid navigation mode was specified

Action: The valid navigation modes are
`AQxmlConstants.NAVIGATION_FIRST_MESSAGE`,
`AQxmlConstants.NAVIGATION_NEXT_MESSAGE`,
`AQxmlConstants.NAVIGATION_NEXT_TRANSACTION`

JMS-00418: Invalid value for wait_time

Cause: Invalid value for wait type

Action: Wait time can be `AQDequeueOption.WAIT_FOREVER`,
`AQDequeueOption.WAIT_NONE` or any value greater than 0

JMS-00419: invalid ConnectionPoolDataSource

Cause: A null or invalid ConnectionPoolDataSource was specified

Action: Specify a valid OracleConnectionPoolDataSource object with the correct url
and user/password

JMS-00420: Invalid value for cache_size

Cause: An invalid cache_size was specified

Action: Cache size must be greater than 0

JMS-00421: Invalid value for cache_scheme

Cause: An invalid cache scheme was specified

Action: The valid cache schemes are
OracleConnectionCacheImpl.DYNAMIC_SCHEME
OracleConnectionCacheImpl.FIXED_WAIT_SCHEME

JMS-00422: Invalid tag - {0}

Cause: An invalid tag was encountered in the XML document

Action: Verify that the XML document conforms to the AQ schema

JMS-00423: Invalid value

Cause: An invalid value was specified

Action: Verify that the value specified in the XML document conforms to those specified in the AQ schema

JMS-00424: Invalid message header

Cause: The message header specified is null or invalid

Action: Specify a valid message header

JMS-00425: Property name must be specified

Cause: Property name was null

Action: Specify a non-null property name

JMS-00426: Property does not exist

Cause: Invalid property name specified. The property does not exist

Action: The property does not exist

JMS-00427: Subscriber name must be specified

Cause: Subscriber name was null

Action: Specify a non-null subscription name

JMS-00428: Valid message must be specified

Cause: message was null

Action: Specify a non-null message

JMS-00429: Register Option must be specified

Cause: Register option is null

Action: Specify a non-null Register Option

JMS-00430: Database Link must be specified

Cause: DB Link is null

Action: Specify a non-null Register Option

JMS-00431: Sequence Number must be specified

Cause: Register option is null

Action: Specify a non-null Register Option

JMS-00432: Status must be specified

Cause: status option is null

Action: Specify a non-null Register Option

JMS-00433: User not authenticated

Cause: User is not authenticated

Action: Specify an authenticated user

JMS-00434: Invalid data source

Cause: Data source is null or invalid

Action: Specify a valid data source

JMS-00435: Invalid schema location

Cause: Schema location is null or invalid

Action: Specify a valid URL for the schema

JMS-00436: AQ Exception

Cause: An error occurred in the AQ java layer

Action: See the message inside the AQxmlException and the linked exception for more information

JMS-00437: Invalid Destination

Cause: An invalid destination object was specified

Action: Specify a valid destination (Queue/Topic) object

JMS-00438: AQ agent {0} not mapped to a valid database user

Cause: The AQ agent specified does not map to a database user which has privileges to perform the requested operation

Action: Use dbms_aqadm.enable_db_access to map the agent to a database user with the required queue privileges

JMS-00439: Invalid schema document

Cause: The schema document specified is not valid

Action: Specify a valid URL for the schema document

JMS-00440: Invalid operations - agent {0} maps to more than one database user

Cause: The aq agent mapped to more than one database user in the the same session

Action: Map the aq agent to only one database user Check the aq\$internet_users view for database users that map to this agent

JMS-00441: {0} cannot be null

Cause: The specified parameter was null

Action: Specify a non-null value

JMS-00442: Name and Address for Agent cannot be null

Cause: Both the name and address parameters were specified as null

Action: Specify a non-null value for the name or address

JMS-00443: IMMEDIATE visibility mode not supported for this queue/topic

Cause: IMMEDIATE visibility mode not supported for JMS type queue/topic

Action: Use ON_COMMIT or the default visibility mode for JMS type queue/topic

JMS-00444: This feature is not supported yet

Cause: The requested feature is not yet supported

Action: wait for future releases that support the feature.

JMS-00445: Destination alias must be specified

Cause: A null Destination alias was specified

Action: Specify a non-null destination alias

JMS-00446: Agent alias must be specified

Cause: A null Agent alias was specified

Action: Specify a non-null agent alias

JMS-00447: error in accessing LDAP server

Cause: error in accessing the LDAP server

Action: check the LDAP server is up and the environment parameters provided to the servlet are correct

JMS-00448: Invalid Content-Type

Cause: Invalid Content-Type

Action: Content-Type must be "text/xml" or "application/x-www-form-urlencoded" with parameter name "aqxmldoc"

JZN-00000 to JZN-00330

JZN-00000: Normal, successful completion

Cause: The operation completed successfully.

Action: No action required.

JZN-00001: End of input

Cause: Processing has reached the end of available input.

Action: No action required.

JZN-00002: Invalid argument

Cause: The input argument was not a buffer, file, or stream.

Action: This is a programming error by the caller of the JavaScript Object Notation (JSON) facility. Contact Oracle Support Services.

JZN-00003: Input not specified

Cause: A parse or decode operation was requested without specifying input.

Action: Specify a buffer, file, or stream as input before attempting to parse or decode the input.

JZN-00004: Cannot open input file

Cause: The requested input file could not be found, or was not readable.

Action: Ensure that the file exists and that read permission is available.

JZN-00005: Syntax error

Cause: The JavaScript Object Notation (JSON) parser encountered syntactically invalid JSON.

Action: Correct the JSON input document.

JZN-00006: Invalid escape sequence

Cause: The JavaScript Object Notation (JSON) parser encountered an invalid sequence of characters following a backslash character.

Action: Correct the JSON input and remove or correct the invalid escape sequence.

JZN-00007: Object member key is not unique

Cause: The JavaScript Object Notation (JSON) parser detected a duplicate member key.

Action: Correct the JSON input and remove the duplicate key.

JZN-00008: Parse already in progress

Cause: An attempt was made to begin parsing an input while a parsing operation was already in progress.

Action: Close the previous parsing operation before beginning a new one.

JZN-00009: Unsupported encoding

Cause: The requested character encoding was not supported by JavaScript Object Notation (JSON).

Action: Convert the input to Unicode.

JZN-00010: Invalid byte sequence in character data

Cause: The parser encountered a sequence of bytes that were invalid for the specified character set.

Action: Correct the input source or ensure that the character encoding is correctly specified.

JZN-00011: Error reading input

Cause: An I/O error was encountered while reading input for parsing or decoding.

Action: None

JZN-00012: Premature end of input

Cause: The parser or decoder encountered the end of the input source while still expecting more data.

Action: None

JZN-00013: Stack overflow

Cause: The internal depth limit on the JavaScript Object Notation (JSON) hierarchy of containers (which may be objects, arrays, or both) was exceeded during a Document Object Model (DOM) read or write operation.

Action: None

JZN-00014: Stack underflow

Cause: An event sequence to render the JavaScript Object Notation (JSON) included a closing event for an unknown object or array.

Action: The input source is bad, likely due to a programming error.

JZN-00015: Name too long

Cause: The JavaScript Object Notation (JSON) parser encountered a member key name that exceeded the internal maximum.

Action: Parse the input without duplicate key checks.

JZN-00016: Serializer stream error

Cause: An I/O error was encountered while writing to the output stream.

Action: None

JZN-00017: Serializer buffer error

Cause: The data overflowed the fixed-size output buffer.

Action: Specify a larger output buffer consistent with the input supplied.

JZN-00018: Input to serializer is too large

Cause: The data overflowed the fixed-size output buffer.

Action: Specify a larger output buffer consistent with the input supplied.

JZN-00019: Cannot print without array wrapper

Cause: The result of the JavaScript Object Notation (JSON) expression could not be rendered without an array wrapper.

Action: If the expression results in a sequence of multiple results, the array wrapper option is required.

JZN-00020: Empty result

Cause: The path expression resulted in a null result.

Action: None

JZN-00021: Value to be printed was not scalar

Cause: An operation requested a scalar value, but the selected value was an object, array, or sequence and could not be returned.

Action: None

JZN-00022: Extra data after end of input

Cause: Additional data bytes were encountered after the expected end of input.

Action: None

JZN-00023: Length does not match data

Cause: The binary decoder encountered a data length that exceeded or did not match the actual data value.

Action: The input is corrupt.

JZN-00024: Unrecognized data type or code

Cause: The binary decoder encountered an unrecognized operation code.

Action: The input is corrupt.

JZN-00025: Invalid binary data

Cause: The binary decoder encountered invalid or inconsistent data while reading the input.

Action: The input is corrupt.

JZN-00026: Too many levels of nesting

Cause: The internal depth limit on the JavaScript Object Notation (JSON) hierarchy of containers (which may be objects, arrays, or both) was exceeded.

Action: None

JZN-00027: Internal error

Cause: An internal error occurred in the code.

Action: Contact Oracle Support Services.

JZN-00028: Out of memory

Cause: The operating system ran out of memory.

Action: Increase the memory available to the program.

JZN-00029: Data member too large

Cause: A data value in a Document Object Model (DOM) was too large to be encoded in binary form.

Action: None

JZN-00030: NULL pointer for required context

Cause: A NULL pointer was detected as an internal error condition.

Action: This is a programming error by the caller of the JavaScript Object Notation (JSON) facility. Contact Oracle Support Services.

JZN-00031: Invalid path expression

Cause: The JavaScript Object Notation (JSON) path expression could not be successfully parsed.

Action: Correct the invalid syntax.

JZN-00032: Invalid array position in path expression

Cause: The specified array position was invalid.

Action: Array positions must be non-negative integers.

JZN-00033: Invalid order of array indexes

Cause: In a comma-delimited set of array indexes, the array indexes were in descending order.

Action: Correct the array indexes so that they appear in ascending order.

JZN-00034: Field name too long

Cause: The field name exceeded 256 bytes.

Action: Select a shorter name for the field.

JZN-00035: Total field names too long

Cause: The total length of all field names exceeded the 65536 byte limit.

Action: None

JZN-00036: Array or object position out of bounds

Cause: An attempt was made to access either an element outside of the array bounds, or an object member outside of the list of members.

Action: None

JZN-00037: Invalid number

Cause: The string could not be interpreted as a numeric value.

Action: None

JZN-00038: Invalid date/time

Cause: The string could not be interpreted as a date or date/time.

Action: The data/time string must be in accordance with ISO-8601.

JZN-00039: Size overflow for JSON set encoding

Cause: The total size of the JavaScript Object Notation (JSON) objects exceeded the maximum allowed for JSON set-oriented storage.

Action: None

JZN-00040: Invalid specification

Cause: The Query-By-Example (QBE) specification was invalid.

Action: Correct the specification.

JZN-00041: JSON Patch operation could not be completed

Cause: The JavaScript Object Notation (JSON) Patch operation encountered an infeasible operation and could not be completed.

Action: None

JZN-00042: Modification not allowed on read-only object

Cause: Read-only JavaScript Object Notation (JSON) objects could not be modified by Document Object Model (DOM) operations.

Action: This is a programming error. Correct the error by copying the DOM to a read/write DOM and then executing the modification.

JZN-00043: Feature not implemented

Cause: This feature was not implemented yet.

Action: None

JZN-00044: Type conversion failed

Cause: A type conversion requested for JavaScript Object Notation (JSON) Path output could not be performed.

Action: None

JZN-00045: Invalid sequence of events

Cause: The JavaScript Object Notation (JSON) serializer encountered an incorrect event sequence and could not serialize the result.

Action: This is a programming error by the caller of the JSON facility. Contact Oracle Support Services.

JZN-00046: Requested key does not exist

Cause: An attempt was made to read a key from a Document Object Model (DOM) object node, but the key was not present in the DOM object node.

Action: This is a programming error.

JZN-00047: Cyclic reference to DOM node is not allowed

Cause: A Document Object Model (DOM) node could not be inserted below one of its own descendant nodes.

Action: This is a programming error.

JZN-00048: Multiple references to DOM node are not allowed

Cause: A Document Object Model (DOM) node could not be inserted because it is already present in the document node tree.

Action: This is a programming error.

JZN-00049: Input to JSON parser is empty

Cause: The input provided to the JSON parser was empty.

Action: This is an internal error message not visible to user.

JZN-00050: Character set conversion failed

Cause: The string could not be converted to or from UTF-8.

Action: This is an internal error message not visible to user.

JZN-00051: Invalid regular expression

Cause: The string supplied to 'eq_regex' or 'like_regex' could not be interpreted as a regular expression.

Action: Correct the expression.

JZN-00070: comma not preceded or followed by field or item

Cause: An unexpected or superfluous comma was encountered while parsing an object or array.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00071: missing comma in object or array

Cause: A comma was expected between members of an object, or between items in an array.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00072: object member is missing value

Cause: An object member name and colon was not followed by a member value.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00073: missing colon in member:value pair

Cause: An object member name was not followed by a colon.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00074: member name not enclosed in double quotation marks

Cause: An object member name was not enclosed in double quotation marks, and either contained or started with a character that was not allowed.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00075: string value not enclosed in double quotation marks

Cause: A string value was not enclosed in double quotation marks.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00076: number could not be parsed

Cause: A JavaScript Object Notation (JSON) number was encountered that

Action: This is an error in the JSON input.

JZN-00077: invalid ASCII control character

Cause: An invalid byte value was read from the JavaScript Object Notation (JSON) input. ASCII control characters are not allowed in JSON text.

Action: This is an error in the JSON input.

JZN-00078: Invalid JSON keyword

Cause: A literal value was encountered that could not be interpreted as a JSON literal. Allowed JSON literals are 'true', 'false', and 'null'.

Action: This is an error in the JSON input.

JZN-00079: missing quotation mark in the string

Cause: A member name or string value beginning with a quotation mark did not have a closing quotation mark.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00201: Unquoted punctuation in step

Cause: A path step contained punctuation characters.

Action: Enclose the step in double quotation marks.

JZN-00202: Escape sequence must be in quotation marks

Cause: A backslash escape sequence was not enclosed in quotation marks.

Action: Enclose the string in double quotation marks.

JZN-00203: Invalid escape sequence

Cause: An escape sequence beginning with a backslash contained invalid characters.

Action: Correct the invalid escape sequence.

JZN-00204: Invalid surrogate pair

Cause: The surrogate pair was invalid. A surrogate pair must consist of a high surrogate followed by a low surrogate.

Action: Correct the invalid surrogate pair.

JZN-00205: Array subscript too long

Cause: A subscript within an array step was too long to be interpreted.

Action: Shorten the array step.

JZN-00206: Array subscript invalid range

Cause: An array range subscript had a start position greater than the end position.

Action: Reverse the start and end positions to create a valid range.

JZN-00207: Variable name is invalid

Cause: The variable name was invalid. A variable name must be alphanumeric and cannot start with a number.

Action: Correct the variable name.

JZN-00208: Path must start with a dollar sign (\$) character

Cause: A path did not start with a dollar sign (\$) character.

Action: Start the path with a dollar sign (\$) character.

JZN-00209: Unexpected characters after end of path

Cause: Trailing characters followed the end of the path.

Action: Remove the trailing or corrupted characters.

JZN-00210: Empty array subscript

Cause: An array step was empty.

Action: Specify a subscript, range, or series of entries.

JZN-00211: Invalid array subscript

Cause: The specified array position was invalid.

Action: Array positions must be non-negative integers.

JZN-00212: Array wildcard must be used alone

Cause: The array wildcard (*) character was not specified by itself in an array subscript.

Action: Remove all other parts of the subscript.

JZN-00213: Object key wildcard must be used alone

Cause: The key wildcard (*) character did not appear by itself in a key step.

Action: Remove extraneous characters from the key step.

JZN-00214: Missing square bracket in array step

Cause: An array step had mismatching square bracket ([]) characters.

Action: Add the missing closing square bracket character.

JZN-00215: Array step contains unexpected characters

Cause: An array step contained invalid characters and could not be interpreted.

Action: Array steps must contain numbers, ranges, or comma-delimited numbers and ranges.

JZN-00216: Unclosed quoted step

Cause: A step beginning with a quotation mark did not have a closing quotation mark.

Action: Add the missing quotation mark.

JZN-00217: Key step contains unexpected characters

Cause: A key step contained invalid characters and could not be interpreted.

Action: Unquoted key steps must be alphanumeric and begin with an alphabetic character. Otherwise, enclose the step in quotation marks.

JZN-00218: Invalid JSON literal

Cause: A JavaScript Object Notation (JSON) literal must be 'true', 'false', or 'null'.

Action: None

JZN-00219: Literal contains unexpected characters

Cause: A JavaScript Object Notation (JSON) literal must be 'true', 'false', or 'null'.

Action: None

JZN-00220: Invalid number

Cause: The value could not be interpreted as a number.

Action: None

JZN-00221: Numeric overflow

Cause: The numeric value could not be converted to binary because of an overflow.

Action: None

JZN-00222: Invalid regular expression

Cause: The expression supplied to 'eq_regex' or 'like_regex' was not a valid regular expression.

Action: Correct the expression.

JZN-00223: Unsupported operator

Cause: The 'not_in' operator was specified in an expression.

Action: Use a logical not surrounding an 'in' expression instead.

JZN-00224: Unexpected characters in comparison operator

Cause: Unexpected characters were present in the expression.

Action: Remove the unexpected characters from the expression.

JZN-00225: Comparison with expression must involve a path

Cause: A comparison operation with an expression did not involve a path.

Action: None

JZN-00226: Not operator must be followed by parenthetical expression

Cause: The expression after a not operator was not enclosed in parentheses.

Action: Enclose the expression in parentheses.

JZN-00227: Comparison must be against 'true' or 'false'

Cause: The comparison was not against a JavaScript Object Notation (JSON) 'true' or 'false' literal.

Action: None

JZN-00228: Question mark must be followed by parenthetical expression

Cause: A question mark introduced a filter that was enclosed in parentheses.

Action: Enclose the filter condition in parentheses.

JZN-00229: Missing parenthesis in parenthetical expression

Cause: A parenthetical expression was missing a closing parenthesis.

Action: Append a closing parenthesis to close the expression.

JZN-00230: Unexpected characters in expression

Cause: Unexpected characters were present in the expression.

Action: Remove the unexpected characters from the expression.

JZN-00231: Unquoted Unicode character

Cause: A Unicode character appeared outside of quotation marks.

Action: Surround the path step or value with quotation marks.

JZN-00232: Expected a '.' following step

Cause: After a path step, a '.' separator was expected.

Action: None

JZN-00233: Invalid character at start of step

Cause: The next path step started with an invalid character.

Action: None

JZN-00234: Invalid '@' outside of predicate

Cause: An '@' character appeared in the path outside of a predicate clause.

Action: None

JZN-00235: Invalid '\$' inside of predicate

Cause: A '\$' appeared in the path inside of a predicate clause.

Action: None

JZN-00236: missing or invalid function or operator

Cause: A predicate expression was missing an operator or specified a function that was not valid.

Action: None

JZN-00237: invalid comparison of two path expressions

Cause: A predicate expression contained a path expression on both the left and right sides of the operator.

Action: None

JZN-00238: path expression has more than one predicate

Cause: A path expression had more than one predicate expression at the top level. At most, one predicate expression is allowed at the top level.

Action: None

JZN-00239: predicate expression before final path step

Cause: A path expression contained a predicate expression prior to the final step in the path. If an expression has a predicate at the top level, it must be the final step in the path.

Action: None

JZN-00240: invalid characters in array range subscript

Cause: The specified array range contained invalid characters. Array ranges are specified using the keyword 'to' between the start and end of the range.

Action: Array positions must be non-negative integers.

JZN-00241: invalid Function at the end of path

Cause: The specified function is not valid.

Action: None

JZN-00242: parentheses nested too deeply

Cause: A path expression contained too many levels of nested parentheses.

Action: None

JZN-00250: JSON Patch specification must be an array of operations

Cause: The JavaScript Object Notation (JSON) Patch specification was not an array. A JSON Patch specification must be an array, listing an ordered series of operations to be performed.

Action: Refer to the JSON Patch standard.

JZN-00251: JSON Patch operations must be objects

Cause: The JavaScript Object Notation (JSON) Patch specification array contained some non-object members. Each element of the JavaScript Object Notation (JSON) Patch specification array must be an object describing a patch operation to be performed.

Action: Refer to the JSON Patch standard.

JZN-00252: No 'op' code for patch operation

Cause: An object in a JavaScript Object Notation (JSON) Patch specification was missing an 'op' code.

Action: Refer to the JSON Patch standard.

JZN-00253: Invalid path for patch operation

Cause: The 'path' or 'from' clause in a patch operation could not be parsed.

Action: Refer to the JavaScript Object Notation (JSON) Pointer specification.

JZN-00254: Invalid 'op' code for patch operation

Cause: The 'op' code could not be interpreted.

Action: An 'op' code must be a string and must be one of the standard JavaScript Object Notation (JSON) Patch operators.

JZN-00255: Unknown key name in patch operation

Cause: The operation contained a key that is not specified by JavaScript Object Notation (JSON) Patch.

Action: Remove the invalid key.

JZN-00256: Patch operation requires a path

Cause: The target path for an operation was not specified.

Action: Ensure that all operations have a valid target path.

JZN-00257: 'path' or 'from' key must have a string value

Cause: The path specified for a 'path' or 'from' field was not a string.

Action: Ensure that all operations have a valid target path.

JZN-00258: From path not allowed for operation

Cause: The 'from' path was specified for an operation that does not allow it. 'from' is only allowed in the 'move' and 'copy' operations.

Action: Remove the 'from' path.

JZN-00259: 'value' is not allowed for operation

Cause: A 'value' was specified for an operation that does not allow it. A 'value' is not allowed in 'remove', 'move', and 'copy'.

Action: Remove the 'value' field.

JZN-00260: 'from' path is required for operation

Cause: A 'move' or 'copy' operation was missing a 'from' path.

Action: Specify a 'from' path in those operations.

JZN-00261: 'value' is required for operation

Cause: An 'add', 'replace', or 'test' operation was missing a target value.

Action: Specify a 'value' in those operations.

JZN-00262: Cyclic 'move' requested

Cause: The target 'path' specified is a child of the 'from' path.

Action: Correct the paths.

JZN-00300: Conflicting inclusion or exclusion rules

Cause: The including rule for a parent node conflicted with the explicit rule asserted for a child node. The projection specification is invalid.

Action: Remove the child node, or change the child node to match any sibling nodes.

JZN-00301: Projection specification must be an object

Cause: A projection specification was an array or JavaScript Object

Action: Ensure that the specification root is an object node.

JZN-00302: Include or exclude rule could not be interpreted

Cause: The rule did not use 'true', 'false', 1, 0, "include", or "exclude".

Action: Correct the invalid rule.

JZN-00303: NULL or invalid path

Cause: A path was either invalid or NULL.

Action: None

JZN-00304: Keys must be numbers or strings

Cause: An argument to \$id was not a number or string.

Action: Do not use null, booleans, objects, or arrays in a \$id expression.

JZN-00305: Array of values was empty

Cause: An array of values for \$in, \$all, or \$id did not any values. The array of values must have at least one value.

Action: Do not pass an empty array to the operators.

JZN-00306: Array must contain only scalar values

Cause: An array of values for \$in, \$all, or \$id contained object or array members. The array of values must contain only scalar values.

Action: Do not use objects or arrays within an array of values.

JZN-00307: \$between must have two values in array

Cause: A minimum and maximum value were not specified for the \$between operator. The \$between operator must be given an array with a minimum and a maximum value.

Action: Use a null for the minimum or maximum value to indicate that the range is open on one end. The values must be scalars, and at least one of the two values must not be null.

JZN-00308: Spatial operators must be at the outermost level

Cause: The \$near, \$within, and \$intersect operators were not used at the outermost level of the Query-By-Example (QBE).

Action: None

JZN-00309: Spatial operators must specify \$geometry

Cause: The \$near, \$within, and \$intersect operators were not given a GeoJSON object as the value of the \$geometry key.

Action: None

JZN-00310: \$distance parameter is not allowed

Cause: The \$distance parameter was used with an operator other than \$near. Only the \$near operator may include values for \$distance and \$unit.

Action: None

JZN-00311: \$distance parameter must be numeric

Cause: The \$distance parameter was specified with a value that was not a JavaScript Object Notation (JSON) number.

Action: None

JZN-00312: \$unit parameter must be a string

Cause: The \$unit parameter was not a JavaScript Object Notation (JSON) string. The \$unit parameter should be a string specifying a unit of measure such as 'mile'. It may not be a number or JSON literal, nor an object or array.

Action: None

JZN-00313: Unknown key found in spatial operator

Cause: The spatial operator contained a key that did not match the expected values. All spatial operators must have a \$geometry value, and the \$near operator may have \$distance and \$unit values. Other keys are not allowed.

Action: None

JZN-00314: \$distance parameter is required

Cause: The \$near operator did not specify a value for \$distance.

Action: None

JZN-00315: Empty objects not allowed

Cause: An empty object was found in the filter specification. An empty object is meaningless and not allowed in the filter specification.

Action: None

JZN-00316: Object with at least one field object must follow modifier

Cause: A modifier operator was not followed by an object, or was followed by an object with no fields. Modifiers include \$not, datatype casts such as \$number, simple conversions such as \$type, and structural operators such as \$type.

Action: None

JZN-00317: Target of spatial operation must be an object

Cause: A \$near, \$within, or \$intersect operator was not followed by an object containing the spatial parameters.

Action: None

JZN-00318: Invalid operator within modifier

Cause: A modifier operator (such as \$not) was used around a \$and, \$or, \$nor, \$id, or another modifier operator. Modifiers may not be used around those operators.

Action: None

JZN-00319: Value of string matching operator must be a string

Cause: The value supplied to the \$regex, \$hasSubstring, \$startsWith, or \$like operators was not JavaScript Object Notation (JSON) string.

Action: None

JZN-00320: Value of comparison operator must be a scalar

Cause: The value supplied to an operator was not a JavaScript Object Notation (JSON) scalar value.

Action: Use only strings, numbers, or JSON literals; do not use an object or array.

JZN-00321: Value of the operator must be a string or number

Cause: The value supplied to \$eq, \$ne, or \$exists was not a JavaScript Object Notation (JSON) string or number.

Action: Use only strings or numbers; do not use an object or array, and do not use the JSON literals 'true', 'false', or 'null'.

JZN-00322: Value of set comparison operator must be an array

Cause: The value supplied to \$in, \$all, \$id, or \$between was not an array.

Action: None

JZN-00323: Elements in a conjunction array must be objects

Cause: An element of an array for \$and, \$or, or \$nor was not an object.

Action: None

JZN-00324: \$id operator must be at the outermost level

Cause: The \$id operator supplying document keys was not used at the outermost level of the Query-By-Example (QBE).

Action: None

JZN-00325: Cannot combine sub-expression with other filters

Cause: A downscoped sub-expression was used in the same scope as a normal filter condition.

Action: None

JZN-00326: Values for \$orderby conditions must be integers

Cause: An order by condition did not give an integer value. Objects, arrays, strings, and other literals are not allowed to specify ordering criteria.

Action: Use only positive and negative integer values for the ordering criteria. Use negative values for descending order and positive values for ascending order.

JZN-00327: Query specification must be an object

Cause: The query specification root was an array or scalar. A query specification must be an object.

Action: Ensure that the specification root is an object node.

JZN-00328: Order by specification must be an object or array

Cause: A \$orderby specification was not an object or array. It may not be a JavaScript Object Notation (JSON) scalar.

Action: Ensure that the specification root is an object or array node.

JZN-00329: Order by field must specify a path

Cause: A field of a \$orderby array must specify a path.

Action: Ensure that all field objects in the array specify a path.

JZN-00330: Order by array contained invalid item

Cause: The items in a \$orderby array must be sort field specification objects. The objects must contain only fields for 'path', 'datatype', 'maxLength', and 'order'.

Action: Ensure that all items in the array are valid field specification objects.

KFED-00323 to KFED-00403

KFED-00323: Header for device *[string]* has an invalid block checksum.

Cause: The disk header had corrupted data. The block checksum was invalid.

Action: Contact Oracle Support Services.

KFED-00324: Header for device *[string]* has an invalid label checksum.

Cause: The label block had corrupted data. The label checksum was invalid.

Action: Contact Oracle Support Services.

KFED-00325: Disk *[string]* belongs to disk group *[string]*.

Cause: The disk to be stamped was part of an ASM disk group.

Action: Drop the disk from the disk group or use the `-force` option to overwrite the labels.

KFED-00326: Disk *[string]* has a label *[string]*. Use `-force` to overwrite.

Cause: The disk label was not blank.

Action: Use the `-force` option to overwrite the disk label.

KFED-00327: Disk *[string]* has a site label *[string]*. Use `-force` to overwrite.

Cause: The site label was not blank.

Action: Use the `-force` option to overwrite the site label.

KFED-00328: Disk *[string]* has a fail group label *[string]*. Use `-force` to overwrite.

Cause: The fail group label was not blank.

Action: Use the `-force` option to overwrite the fail group label.

KFED-00329: Specified disk label *[string]* is greater than the maximum size *[number]*.

Cause: The disk label provided was too large.

Action: Provide a shorter disk label.

KFED-00330: The site label *[string]* is invalid.

Cause: An invalid site label was supplied.

Action: Specify a site name which is at least one character but no more than 15 characters in length. A site name consists of alphanumeric characters plus the hyphen character (a..z, A..Z, 0..9, -). It cannot begin with a numeric character. It cannot begin or end with the hyphen (-) character.

KFED-00331: Specified fail group label *[string]* is greater than the maximum size *[number]*.

Cause: The fail group label provided was too large.

Action: Provide a shorter fail group label.

KFED-00332: Device [*string*] is not formatted as an ASM disk.

Cause: The device provided was not recognized as an ASM disk.

Action: Add the disk to the ASM discovery path.

KFED-00333: Device [*string*] is an Exadata disk.

Cause: An attempt was made to stamp an Exadata disk.

Action: Specify a device that is not managed by an Exadata.

KFED-00400: Operating system dependent operation: *string* failed with status: *string*

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFED-00401: Operating system failure message: *string*

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFED-00402: failure occurred at: *string*

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFED-00403: additional information: *string*

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFNDG-00200 to KFNDG-00701

KFNDG-00200: invalid syntax

Cause: Invalid syntax for renamedg was specified.

Action: Try renamedg -help for more information.

KFNDG-00201: invalid arguments

Cause: Invalid key or value was specified for renamedg.

Action: Try renamedg -help for more information.

KFNDG-00202: invalid value (*string*) for parameter phase

Cause: Incorrect value for parameter PHASE was specified.

Action: Valid values for parameter PHASE are ONE, TWO, BOTH. Retry with correct values.

KFNDG-00203: disk group name (*string*) exceeds maximum allowed length *number*

Cause: Invalid disk group name was specified.

Action: Disk group name can be a maximum of 32 characters.

KFNDG-00204: disk group name *string* has invalid characters

Cause: Invalid disk group name was specified.

Action: Disk group name can only contain alphabetic, numeric and the underscore (_) characters.

KFNDG-00205: failed to interpret configuration file name

Cause: Invalid configuration file name was specified.

Action: Verify configuration file name and folder permissions and retry renamedg.

KFNDG-00301: new disk group (*string*) already exists, ignoring renamedg

Cause: disk group specified in NEWDGNAME already exists.

Action: None

KFNDG-00302: disk (*string:string*) does not contain a valid header

Cause: Device header could not be located or corrupt.

Action: Verify if the device mentioned is an ASM disk device.

KFNDG-00303: failed to update disk group name for *string*

Cause: Insufficient privileges or write error in disk.

Action: Verify disk permissions and retry renamedg. Also, see log for additional information.

KFNDG-00304: unable to access heartbeat block of the device *string:string*

Cause: Heartbeat block of the disk was corrupt.

Action: Verify disk header with ASM utilities, retry renamedg.

KFNDG-00305: failed to create configuration file

Cause: Insufficient privileges or invalid path.

Action: Verify folder permissions and retry the command.

KFNDG-00306: unable to write to configuration file

Cause: Insufficient privileges.

Action: Check file permissions and retry renamedg.

KFNDG-00307: unable to read configuration file

Cause: Insufficient privileges or disk read error.

Action: Check file permissions and retry renamedg.

KFNDG-00308: failed to process configuration file entry: *string*

Cause: Configuration file was corrupt.

Action: Check file information and retry renamedg.

KFNDG-00401: allocation unit size conflict (*number, number*)

Cause: Allocation unit size of disk group and the disk did not match.

Action: Verify that the device is not corrupt and retry renamedg.

KFNDG-00402: ASM metadata block size conflict (*number, number*)

Cause: Metadata block size of the disk group and disk did not match.

Action: Verify if the device is not corrupt and retry renamedg.

KFNDG-00403: not all disks of disk group *string* were discovered

Cause: Offline disks were present in the specified disk group.

Action: Refer to Oracle Database Storage Administrator's Guide for more details.

KFNDG-00404: disk group *string* contains offline disks, ignoring renamedg

Cause: Disk group with offline disks could not be renamed.

Action: Refer to Oracle Database Storage Administrator's Guide for more details.

KFNDG-00405: specified disk group *string* appears to be mounted

Cause: Disk group was mounted.

Action: Unmount the disk group and retry renamedg.

KFNDG-00406: disk group (*string*) is in use by CSS

Cause: Cluster Synchronization Service(CSS) was using the disk group to be renamed.

Action: Refer to crsctl command to relocate voting disks from disk group.

KFNDG-00407: Could not find disks for disk group *string*

Cause: No disks were discovered for disk group.

Action: Try renamedg with a different discovery string.

KFNDG-00408: disk (*string:string*) could not be discovered

Cause: Disk was either deleted or moved.

Action: None

KFNDG-00409: disk (*string*) doesn't belong to disk group (*string*)

Cause: Disk is not part of the specified disk group.

Action: None

KFNDG-00410: failed to discover devices in folder *string*

Cause: Insufficient privileges or invalid discovery string.

Action: See log for additional details.

KFNDG-00600: internal error *string*

Cause: An internal error occurred while executing renamedg.

Action: Contact Oracle Support Services.

KFNDG-00601: fatal error *string*

Cause: A fatal error occurred while executing renamedg.

Action: Contact Oracle Support Services.

KFNDG-00603: failed to initialize device discovery

Cause: Error occurred while communicating with generic services layer.

Action: Contact Oracle Support Services.

KFNDG-00700: system dependent error (*number, string, string, string*) occurred

Cause: Internal system error occurred.

Action: Contact Oracle Support Services.

KFNDG-00701: Error *number* while performing I/O

Cause: I/O failure.

Action: Contact Oracle Support Services.

KFOD-00106 to KFOD-00403

KFOD-00106: Option 'cell=true' is only supported on Oracle Exadata.

Cause: An attempt was made to run an operation with an option that is only supported on Oracle Exadata.

Action: Retry the operation without the 'cell=true' option.

KFOD-00302: Error encountered in device access layer: *string*

Cause: The device access layer failed with the included error message.

Action: See the returned error message for details.

KFOD-00316: Error acquiring ASM discovery string: *string*

Cause: Call to the Grid Plug and Play service to request disk discovery string failed.

Action: Ensure that the Grid Plug and Play component of Cluster Ready Services is available. If Grid Plug and Play is operational and command still fails, contact Oracle Support Services.

KFOD-00317: error returned from Patch Query API: *string*

Cause: A call to the Patch Query API returned unsuccessfully.

Action: See the returned error message for details.

KFOD-00318: unable to retrieve error message from Patch Query API: *string*

Cause: A call to the Patch Query API returned unsuccessfully.

Action: See the returned error message for details.

KFOD-00320: Invalid operation or option for this cluster type

Cause: This operation is invalid for this cluster type

Action: Retry the operation with cluster=true

KFOD-00321: failed to read the credential file *string*

Cause: The credential file was not valid.

Action: Verify that the credential file is valid and accessible. Ensure that the user has read access permission on the credential file. Rerun the command.

KFOD-00322: credential file not specified

Cause: The previous 'kfod' command was rejected because it did not include a valid credential file name.

Action: Reexecute the 'kfod' command providing a valid credential file name. Refer to the command line help for information.

KFOD-00323: Member cluster version '*string*' in the credential file does not match software version '*string*'.

Cause: There was a version mismatch between the member cluster version in the credential file and the software version.

Action: Install a version of the member cluster that matches the version in the credential file.

KFOD-00324: The member cluster version '*string*' is incompatible with the storage server version '*string*'.

Cause: The member cluster installation or upgrade was not supported by the storage server configured at the version listed in the message.

Action: Install or upgrade the member cluster to a version that is compatible with the storage server. Refer to the product documentation for information.

KFOD-00325: failed to verify member cluster '*string*'\n*nstring*

Cause: The member cluster installation verification failed. The possible causes are: - A member cluster with the same name was already configured. - A member cluster with the same name was deinstalled, but the member cluster's configuration was not removed at the Storage Server.

Action: Verify if there is already a member cluster with the name listed in the message by executing the 'asmcmd lsc' command on the storage server. If the member cluster is configured and in use, execute the 'asmcmd mkcc' command on the storage server, and provide an unused member cluster name to generate a new credential file. Retry the Grid Infrastructure installation using the new credential file. If the member cluster is configured and not in use, deinstall the existing member cluster. Execute the 'asmcmd rmcc' command on the storage server to delete the member cluster configuration. Retry the Grid Infrastructure installation. If the member cluster is not configured or if the error persists, contact Oracle Support Services.

KFOD-00326: Member cluster(s) '*string*' will be incompatible if the storage server is upgraded to version '*string*'.

Cause: Storage server upgrade to the listed version failed because the listed member cluster will become incompatible.

Action: Upgrade the storage server to a version that is compatible with all of the configured member clusters. If the storage server could not be upgraded to a compatible version, forcibly upgrade the Storage Server using the procedure documented in the product documentation.

KFOD-00327: failed to delete member cluster '*string*'\n*nstring*

Cause: There was a failure in deleting the member cluster configuration. The accompanying error message provides the details.

Action: Examine the accompanying error message, address the reported issue and retry the operation.

KFOD-00328: Member cluster installation or upgrade failed because the storage server is in the 'In Rolling Upgrade' or the 'In Rolling Patch' state.

Cause: The member cluster installation or upgrade was rejected because the storage server was in the 'In Rolling Upgrade' or the 'In Rolling Patch' state.

Action: Retry the installation or upgrade procedure after the Storage Server upgrade or patching has completed.

KFOD-00329: no cluster name specified

Cause: The previous 'kfod' command was rejected because it did not include a cluster name.

Action: Reexecute the 'kfod' command providing a valid cluster name. Refer to the command line help for information.

KFOD-00330: invalid cluster name '*string*' specified

Cause: An invalid cluster name was supplied to the 'kfod' utility.

Action: Specify a cluster name which is at least one character but no more than 15 characters in length. The cluster name must be alphanumeric, it cannot begin with a numeric character, and it may contain hyphen (-) characters. However, it cannot end with a hyphen (-) character.

KFOD-00331: forcibly deleted member cluster '*string*'

Cause: The configuration for the member cluster listed in the message was forcibly deleted.

Action: The member cluster listed in the message will no longer be able to access the storage server. Follow the steps to enable access from the member cluster. - Delete all the Oracle Clusterware files in the '+<diskgroup_name>/<client_cluster_name>/' directory in all disk groups. - Deinstall the member cluster. - Install the member cluster.

KFOD-00334: failed to list the configured member clusters*nstring*

Cause: A failure occurred while attempting to display the member cluster configuration. The accompanying error message provides the details.

Action: Examine the accompanying error message, address the reported issue and retry the operation.

KFOD-00335: command not supported

Cause: An attempt was made to run an operation that is not supported by the configured cluster.

Action: Refer to the command line help for usage.

KFOD-00336: failed to enable Oracle Flex ASM*nstring*

Cause: There was a failure in enabling the Oracle Flex ASM configuration. The accompanying error message provides the details.

Action: Examine the accompanying error message, address the reported issue and retry the operation.

KFOD-00337: failed to create member cluster '*string*'*nstring*

Cause: There was a failure in creating the member cluster configuration. The accompanying error message provides the details.

Action: Examine the accompanying error message, address the reported issue and retry the operation.

KFOD-00338: failed to get OS user; failing function: '*string*'*n*

Cause: There was an error retrieving the operating system user. The named function did not succeed.

Action: Contact Oracle Support Services

KFOD-00340: incompatible input arguments '*string*' and '*string*'

Cause: A command line argument was specified that was incompatible either with another argument or with the current cluster type.

Action: Refer to the command line help for usage.

KFOD-00341: Oracle ASM File Security operation failed

Cause: This is an internal error.

Action: Contact Oracle Support Services.

KFOD-00342: Site GUID for disk '*string*' is invalid.

Cause: This is an internal error.

Action: Examine the Globally Unique Identifier for the site using the command 'cellcli -e list cell attributes siteId'. Contact Oracle Support Services.

KFOD-00343: Rack GUID for disk '*string*' is invalid.

Cause: This is an internal error.

Action: Examine the Globally Unique Identifier for the rack using the command 'cellcli -e list cell attributes rackId'. Contact Oracle Support Services.

KFOD-00344: unable to access credential file '*string*'

Cause: The specified credential file could not be read.

Action: Ensure that the specified credential file can be read.

KFOD-00400: Operating system dependent operation: *string* failed with status: *string*

Cause: Operating system call error.

Action: Contact Oracle Support Services.

KFOD-00401: Operating system failure message: *string*

Cause: Operating system call error.

Action: Contact Oracle Support Services.

KFOD-00402: failure occurred at: *string*

Cause: Operating system call error.

Action: Contact Oracle Support Services.

KFOD-00403: additional information: *string*

Cause: Operating system call error.

Action: Contact Oracle Support Services.

KUP-00552 to KUP-11606

KUP-00552: internal XAD package failed to load

Cause: An error was encountered while attempting to initialize the XAD package.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

KUP-00554: error encountered while parsing access parameters

Cause: The parser detected a syntax error.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

KUP-00561: invalid length for binary integer field *string*\n

Cause: An integer field was specified with an invalid length. The only supported lengths for binary integer fields are 1, 2, 4, and 8.

Action: n/a

KUP-00562: unknown escape sequence\n

Cause: An unknown escape sequence was specified to the parser. An escape sequence is a backslash followed by a character.

Action: Consult documentation for list of allowable control characters.

KUP-00600: internal error, arguments [*string*] [*string*] [*string*] [*string*] [*string*]

Cause: An internal XAD error occurred.

Action: Contact Oracle Support.

KUP-00601: fatal XAD error

Cause: A fatal error has occurred.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

KUP-01006: error signalled during parse of access parameters

Cause: An error was signalled during parsing of the access parameters.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

KUP-01007: at line *number* column *number*

Cause: This is an informational message indicating the line and column where a syntax error was detected.

Action: n/a

KUP-01008: the bad identifier was: *string*

Cause: This is an informational message indicating the identifier token that caused a syntax error.

Action: n/a

KUP-02000: wrong message file version (msg *number* not found)

Cause: The kupxx.msb file is not the correct version.

Action: Check that the installation was done correctly.

KUP-02001: unrecognized punctuation symbol "*string*"

Cause: An illegal punctuation character was encountered.

Action: Remove the illegal character.

KUP-02002: unexpected end of input file reached

Cause: This is probably caused by failure to supply the closing quote for a quoted string.

Action: Correct the input.

KUP-02003: unrecognized character: *string*

Cause: An input character that is neither an alpha, digit, or punctuation was encountered.

Action: Remove the character.

KUP-02004: quoted string too big

Cause: A quoted string longer than 2000 bytes was encountered.

Action: This may be caused by a missing close quote. If so, add the missing quote, otherwise shorten the string.

KUP-02005: token too big

Cause: A token longer than 1000 bytes was encountered

Action: Tokens must be separated by whitespace or punctuation. Either add the missing whitespace or punctuation, or shorten the token.

KUP-02006: script line too long

Cause: a line longer than 500 bytes was encountered

Action: break the line up into shorter lines

KUP-03001: fatal error during library cache pre-loading

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

KUP-03002: end position (*number*) <= start position (*number*) for field: *string*

Cause: Error in specifying position for the specified field in the access parameters."

Action: Check that the specified end position is greater than the specified start position.

KUP-03003: absolute end(*number*) - start(*number*) != fieldlength (*number*) for field *string*

Cause: The number of bytes occupied by the field as specified by the starting offset and ending offset of the field is not the same as the number of bytes specified for the datatype of the field.

Action: Verify the absolute begin/end position(s) specified match the length of the field.

KUP-03004: absolute end (*number*) specified with relative start (*number*) for field *string*

Cause: The position of field was specified with a relative start and an absolute end.

Action: Use relative end with relative start

KUP-03005: relative end (*number*) specified does not match fieldlen(*number*) for field *string*

Cause: The number of bytes specified by the relative end position for the field does not match the number of bytes in the datatype.

Action: Correct either the datatype length or the relative end position.

KUP-03006: error initializing handle for character set *string*

Cause: Error attempting to retrieve information for the character set.

Action: Verify that the character set name is valid.

KUP-03007: end position (*number*) is less than start position (*number*) for range

Cause: A byte range specified a start position that comes after the end position.

Action: Verify the start and end positions are correctly specified.

KUP-03008: OCI error getting column parameters.

Cause: An error occurred while trying to obtain column parameters.

Action: Contact Oracle Support.

KUP-03009: OCI error getting column name.

Cause: An error occurred while trying to obtain column name.

Action: Contact Oracle Support.

KUP-03010: OCI error getting database column type.

Cause: An error occurred while trying to obtain database column type.

Action: Contact Oracle Support.

KUP-03011: OCI error getting database column size.

Cause: An error occurred while trying to obtain database column size.

Action: Contact Oracle Support.

KUP-03012: OCI error getting database column precision.

Cause: An error occurred while trying to obtain database column precision.

Action: Contact Oracle Support.

KUP-03013: OCI error getting database column scale.

Cause: An error occurred while trying to obtain database column scale.

Action: Contact Oracle Support.

KUP-03014: OCI error getting datetime fsprecision.

Cause: An error occurred while trying to obtain a datetime column precision value."

Action: Contact Oracle Support.

KUP-03015: OCI error getting datetime lfpresicion.

Cause: An error occurred while trying to obtain database column precision.

Action: Contact Oracle Support.

KUP-03016: length specified for FIXED records must be greater than 0\n

Cause: A record format of FIXED was specified with a length of 0.

Action: n/a

KUP-03017: length specified for VARIABLE records must be greater than 0\n

Cause: A record format of VARIABLE was specified with a length of 0.

Action: n/a

KUP-03018: invalid date mask "string" specified for column string\n

Cause: The date mask for the specified column is invalid.

Action: n/a

KUP-03019: directory object not specified in LOBFILE clause for field string\n

Cause: A LOBFILE clause was specified for the field, but no directory object was specified. When no directory object is specified, then the default directory specified for the external table is used, but no default directory was specified.

Action: Specify a directory object in the LOBFILE clause or specify a default directory for the external table.

KUP-03020: empty delimiter specified for record\n

Cause: An empty delimiter string was specified for a record delimiter.

Action: Specify the string used to delimiter records.

KUP-03021: clause references unknown field string\n

Cause: A WHEN, NULLIF or DEFAULTIF clause referenced a field that doesn't exist in the data file.

Action: n/a

KUP-03022: lob data could not be found for field string\n

Cause: The field specified in the data source that contains the name of the lob file for the record could not be identified.

Action: n/a

KUP-03023: string for TERMINATED BY or ENCLOSED BY clause for record is longer than maximum number\n

Cause: The string value for a TERMINATED BY or ENCLOSED BY clause is longer than the maximum number of bytes allowed. If the character set of the data file is different than the character set of the database, the string will be converted to the character set of the data file. If the length of the converted string is too large, then this error will also be returned.

Action: Use shorter delimiters in the data file and the access parameters.

KUP-03024: string for TERMINATED BY or ENCLOSED BY clause for column *string* is longer than maximum *number*\n

Cause: The string value for a TERMINATED BY or ENCLOSED BY clause for the columns is longer than the maximum number of bytes allowed. If the character set of the data file is different than the character set of the database, the string will be converted to the character set of the data file. If the length of the converted string is too large, then this error will also be returned.

Action: Use shorter delimiters in the data file and the access parameters.

KUP-03025: For CSV format files, field *string* is not delimited.\n

Cause: The comma-delimited value (CSV) format files did not have all delimited fields. CSV format files must have all delimited fields so that the access driver can process the fields.

Action: Make all of the fields delimited or remove the CSV specification and retry.

KUP-03026: For FIELD NAMES, field *string* is not delimited.\n

Cause: The data files with a FIELD NAMES record did not have all delimited fields. Data files with a FIELD NAMES record must have all delimited fields so that the access driver can process the field names.

Action: Make all of the fields delimited and retry.

KUP-03027: NULLIF at field level not allowed with NO NULLIF for field *string*.\n

Cause: The field had both NULLIF and NO NULLIF specified. You must specify one or the other.

Action: Remove one of the specifications and retry.

KUP-03028: Field name *string* in field list does not match the name of any table column.\n

Cause: The ALL FIELDS OVERRIDE THESE clause was specified and there was a field name in the field list in the access parameters that did not match the name of a column in the table definition. Only names that match the name of columns in the table may be specified in the field list.

Action: Verify that the correct names are used for the columns in the table and for the fields in the field list.

KUP-03029: Invalid value specified for parameter *string*.

Cause: The access parameter contained an invalid value for the parameter specified in the error message.

Action: Update the access parameters to have a valid value.

KUP-03030: Invalid value specified for EXTERNAL MODIFY access parameter.

Cause: An invalid access parameter was specified in the EXTERNAL MODIFY clause.

Action: The only valid values for access parameters in the EXTERNAL MODIFY clause are: logfile, nologfile, badfile, nobadfile, discardfile, nodiscardfile.

KUP-03031: Invalid value specified for EXTERNAL MODIFY access parameter.

Cause: An invalid access parameter was specified in the EXTERNAL MODIFY clause.

Action: The only valid value for access parameters in the EXTERNAL MODIFY clause is "logfile".

KUP-03032: No directory object for a file in the LOB LOCATION SPECIFIER clause.\n

Cause: The directory object was not specified for a file in the LOB LOCATION SPECIFIER clause and the DEFAULT DIRECTORY clause was not specified for the external table.

Action: Ensure that the directory object is specified for all the files in the LOB LOCATION SPECIFIER clause and include the DEFAULT DIRECTORY clause for the external table. Note that the directory object in the DEFAULT DIRECTORY clause is used for all the files that are specified without a directory object and not just the files from the LOB LOCATION SPECIFIER clause.

KUP-03995: LOCAL TIME ZONE not allowed with DATE_FORMAT TIME\n

Cause: LOCAL can only be specified with TIMESTAMP, not with TIME.

Action: Remove LOCAL or change TIME to TIMESTAMP and try the operation again.

KUP-03996: multiple DATE_FORMAT *string* masks specified at table level for table *string*\n

Cause: Multiple date format masks were specified for the listed datetime or interval data type at the table level for the listed table.

Action: Remove one of the datetime mask specifications and try the operation again.

KUP-03997: invalid DATE_FORMAT *string* mask ("*string*") specified for table *string*\n

Cause: The date format mask for listed datetime type for the specified table was invalid.

Action: Fix the mask and try the operation again.

KUP-03998: error *number* formatting KUP message *number*\n

Cause: error occurred while attempting to format a KUP message.

Action: contact Oracle support.

KUP-03999: error occurred while processing a date format: ORA-*number*: *string*

Cause: Error converting a date format string into an internal representation.

Action: Verify that the date format strings specified in the access parameters are valid.

KUP-04000: error initializing I/O state for file *string*\n

Cause: An unexpected error occurred while preparing the file.

Action: Contact Oracle Support Services.

KUP-04001: error opening file *string*\n

Cause: An error occurred while attempting to open the specified file. This message should be followed by another message with more information about the error.

Action: See the error that follows to determine the action to be taken.

KUP-04002: error getting file size for file *string*\n

Cause: An error occurred while retrieving the number of bytes in the specified file.

Action: See the error that follows to determine the action to be taken.

KUP-04003: error while closing file *string*\n

Cause: An error occurred while closing the specified file.

Action: See the error that follows to determine the action to be taken.

KUP-04004: error while reading file *string*\n

Cause: An error occurred while reading the specified file.

Action: See the error that follows to determine the action to be taken.

KUP-04017: OS message: *string*\n

Cause: An error occurred. This message contains the message associated with this error that was returned by the operating system. The message displayed before this one should indicate the operation that failed.

Action: n/a

KUP-04018: partial record at end of file *string*\n

Cause: An incomplete record was found at the end of the file.

Action: Verify the file is not corrupt or missing data.

KUP-04019: illegal length found for VAR record in file *string*\n

Cause: A record in a VAR file has an length field with either no numeric characters in it or with non numeric characters in it.

Action: Verify the records in the file have the correct length specified for them.

KUP-04020: found record longer than buffer size supported, *number*, in *string* (offset=*number*)\n

Cause: a record in the data source was longer than the maximum data size supported. The number reported is the maximum supported size of a record.

Action: n/a

KUP-04021: field formatting error for field *string*\n

Cause: There was an error trying to find the contents of the specified field in a record.

Action: This message should be followed by another message containing more specific information about the cause of the error.

KUP-04022: field start is before start of record\n

Cause: The position of the start of a field is before the start of a record. This can occur if a negative number is used to indicate the relative start of a field.

Action: Verify that the definition of the layout of fields in the data file is correct.

KUP-04023: field start is after end of record\n

Cause: This can happen when specifying either absolute or relative positioning for a field.

Action: Verify that the definition of the layout of fields in the data file is correct. If it is valid for fields at the end of the record to be missing, use the MISSING FIELD VALUES ARE NULL clause in the access parameters.

KUP-04024: field end is before field start\n

Cause: The end of the field comes after the start of the field. This can happen if the field is defined with a relative start position and an absolute end position.

Action: Verify that the definition of the layout of fields in the data file is correct.

KUP-04025: field extends beyond end of record\n

Cause: This can happen when specifying either absolute or relative positioning for a field.

Action: Verify that the definition of the layout of fields in the data file is correct.

KUP-04026: field too long for datatype\n

Cause: The character field in the record is larger than the maximum length specified.

Action: Make sure the definition of the layout of the fields in the data file is correct. Also make sure the correct maximum size was specified for a character datatype.

KUP-04027: file name check failed: *string*\n

Cause: The check of the filename failed. These checks are platform specific, but they can include verifying that there are no hard links in the file path, the file is not a soft link, the file specification includes a parent reference ("../" on Unix), or the file was modified between the time the check was made and the file was opened.

Action: Use a file location that does not violate any of the checks.

KUP-04028: conversion of character length to a number failed\n

Cause: The character length portion of the field could not be converted to a number. This message is followed by another message with information on why the conversion failed.

Action: Make sure the data is correct. Also verify the datatypes specified for the fields are correct.

KUP-04029: numeric field overflowed\n

Cause: An attempt to convert a character string to number failed because the value of the number in the string was too large.

Action: n/a

KUP-04030: invalid numeric data\n

Cause: An attempt to convert a character string to a number failed because non-numeric characters were found.

Action: n/a

KUP-04031: empty filename specified for LOB file in column *string*\n

Cause: The field in the data file that was supposed to contain the name of a LOB file was empty.

Action: Correct the data so that it contains a valid file name.

KUP-04032: internal error *string* while parsing field *string*:\n

Cause: An internal error occurred while parsing a field.

Action: Contact Oracle support.

KUP-04035: beginning enclosing delimiter not found\n

Cause: The beginning enclosure was not found for a field that is enclosed by delimiters.

Action: Verify that the data is correct. Also verify that the correct enclosing delimiters were specified and whether the enclosing delimiter should be optional.

KUP-04037: terminator not found\n

Cause: The terminator for the field is missing.

Action: Verify that the records are formatted correctly.

KUP-04038: internal error: *string*\n

Cause: an unexpected error condition was detected.

Action: contact Oracle customer support

KUP-04039: unexpected error while trying to find file *string* in *string*\n

Cause: An error occurred while trying to find path containing the file.

Action: This message should be followed by another message with more information about the error.

KUP-04040: file *string* in *string* not found\n

Cause: The file was not found in the directory specified

Action: Verify the correct file and directory names were specified.

KUP-04041: error generating full file name for *string* in *string*\n

Cause: Unexpected error occurred while trying to form a file name.

Action: n/a

KUP-04043: table column not found in external source: *string*\n

Cause: A column in the external table was not found in the access parameters that define the contents of the data source.

Action: Verify that the external table is defined correctly and that the access parameters are also correct.

KUP-04044: error positioning file *string*\n

Cause: An attempt to position a file to an absolute file offset failed.

Action: See messages that follow for more information.

KUP-04045: unexpected OCI status *string*

Cause: An OCI call returned a status that cannot be handled.

Action: Contact Oracle support.

KUP-04047: error parsing record from external data source\n

Cause: An error occurred while trying to extract a record from the data source.

Action: Look in the log file for more messages about the error.

KUP-04048: internal error parsing record from external data source\n

Cause: An unexpected or unhandled error occurred while getting a record from the data source

Action: Contact Oracle support.

KUP-04049: record *number* discarded from file *string*\n

Cause: Informational message displayed whenever the WHEN clause has been satisfied. If a DISCARD file has been specified for the operation, the record will be written to that file.

Action: None

KUP-04050: error while attempting to allocate *number* bytes of memory\n

Cause: An error occurred while trying to allocate memory. This is likely caused by insufficient memory.

Action: Reconnect to the instance and retry the operation.

KUP-04051: error processing column *string* in row *number* for datafile *string*\n

Cause: an error occurred while trying to convert the data from the data file into the type of a column in the external table.

Action: See messages that follow for more details.

KUP-04052: \nerror processing column *string* in a row for datafile *string*\n

Cause: an error occurred while trying to convert the data from the data file into the type of a column in the external table.

Action: See messages that follow for more details.

KUP-04053: record number *number*\n

Cause: This message identifies a record number in a file for a record that had an error. The message preceding this one contains information about the error and the name of the file.

Action: n/a

KUP-04054: internal error: invalid bad row *number* identified for bad column *number*\n

Cause: This is an internal error.

Action: Contact Oracle support.

KUP-04055: column *string* is both a field in the data file and a column transform\n

Cause: The specified column was in the list of fields in the data file and in the list of column transforms. The column should be in one list or the other, but not both.

Action: Determine whether the value for the field in the data file or the value for the field in the column transform should be loaded in to the table. If the value for the data file is to be loaded, then remove the column transform. If the value for the column transform is to be loaded, then rename the field in the data file so that it does not match the name of a field in the table.

KUP-04056: internal error: OCI error while fetching record: *number*\n

Cause: An OCI error occurred while processing the granule.

Action: Contact Oracle support.

KUP-04057: internal error: OCI error while fetching record.\n

Cause: An OCI error occurred while processing the granule.

Action: Contact Oracle support.

KUP-04058: unrecoverable error occurred, operation aborted.\n

Cause: An unrecoverable error occurred during processing.

Action: See preceding error messages for more information.

KUP-04059: found EOF in length portion of VARIABLE record in file *string*\n

Cause: The record parser was looking for the size portion of a file a record format of VARIABLE. It found EOF before finding all the bytes for the length.

Action: Correct the corruption in the file.

KUP-04060: field *string* referenced by lobfile column *string* not found\n

Cause: The LOBFILE transform for the named column referenced a field for either the directory object portion or the name portion of the LOBFILE. However, that field did not exist anywhere in the definition of the data file.

Action: Verify that the LOBFILE clause is specified correctly. Also verify that the field definitions for the data file are correct.

KUP-04061: directory object *string* specified for LOBFILE column *string* is not valid
\n

Cause: The column being loaded from a LOBFILE specified the directory object containing the LOBFILE through another field in the data file. In this case, the LOBFILE clause in the access parameters must specify a list of all directory objects that will be used for this field. This error occurs because a field contains the name of a directory object that is not in this list.

Action: Verify that the data file contains the correct directory object and verify that the list of valid directory objects in the LOBFILE clause for this column is complete.

KUP-04062: no data source specified
\n

Cause: No location for the data source of the external table was specified when the external table was created. An empty string is not valid.

Action: Specify the name of the data source in the LOCATION clause when creating an external table.

KUP-04063: unable to open log file *string*
\n OS error *string*
\n

Cause: An attempt to open the log file failed.

Action: Specify a different log file or use NO LOGFILE to disable logging.

KUP-04064: fatal error during initialization
\n

Cause: An unexpected error occurred while initializing access to an external table.

Action: Contact Oracle support.

KUP-04065: error processing LOBFILE for field *string*
\n

Cause: An error occurred while opening or reading a LOBFILE for a column in a row.

Action: See message in log file for more information about the error.

KUP-04066: error initializing access to external table source
\n

Cause: An error occurred while attempting to retrieve information about a data source.

Action: See messages preceding this one for more information about the error.

KUP-04067: internal error allocating handle type *string*
\n

Cause: An attempt to create an internal object failed.

Action: Contact Oracle support.

KUP-04068: internal error fetching attribute *string*
\n

Cause: An attempt to fetch information about an internal object failed.

Action: Contact Oracle support.

KUP-04069: error fetching data for external table
\n

Cause: An error occurred while attempting to fetch data from an external table.

Action: See messages the precede this one for more information.

KUP-04070: field *string* referenced by column transform *string* not found
\n

Cause: The column transform for the named column references a field that did not exist anywhere in the definition of the data file.

Action: Verify that the column transform clause is specified correctly. Also verify that the field definitions for the data file are correct.

KUP-04071: record discarded from file *string*\n

Cause: Informational message displayed whenever the WHEN clause has been satisfied. If a DISCARD file has been specified for the operation, the record will be written to that file. The record number in the source data file is not known because multiple servers are loading from the file.

Action: n/a

KUP-04072: error writing to file *string*\n

Cause: An error occurred while attempting to write to the named file.

Action: See messages that follow this message for more information about the error.

KUP-04073: record ignored because all referenced fields are null for a record\n

Cause: A record was rejected because all fields in the data file referenced by the query were NULL.

Action: n/a

KUP-04074: no write access to directory object *string*\n

Cause: The user does not have write access to the directory object used for a log, bad or reject file.

Action: n/a

KUP-04075: no read access to directory object *string*\n

Cause: The user does not have read access to the directory object used for a data file.

Action: n/a

KUP-04076: file name cannot contain a path specification: *string*\n

Cause: The name of a data file, log file, bad file or reject file contains a path specification.

Action: Use the name of a directory object to indicate where the file should be stored.

KUP-04077: unknown format specifier in file name *string*\n

Cause: A format specifier is a percent sign followed by a character. The percent sign and character are replaced by a value depending on the character. This error occurs when the character following the percent sign is not defined to have a value.

Action: See the documentation for information on valid format specifiers. If the file to be opened needs to have a percent sign in its name then use two percent signs. They will get replaced by a single percent sign in the resulting file name.

KUP-04078: invalid file name specified: *string*

Cause: Attempt to parse the file name failed.

Action: Specify a valid file name.

KUP-04079: error fetching list of valid directories: *number*\n

Cause: An attempt to retrieve a list of valid directories that can be used by the user to open files failed. The number is an Oracle error code.

Action: Contact Oracle Support Services.

KUP-04080: directory object *string* not found\n

Cause: The directory object specified for an input file or a log, bad or discard file does not exist in the database or the user has no privileges to access this directory.

Action: n/a

KUP-04081: field *string* used in concatenation for column *string* is not a character type

Cause: The specified field was part of a concatenation of strings used to create the value for the names column. However, the field was not of a character datatype. Only character fields may be used as part of concatenating fields.

Action: Verify the correct field was used in the CONCAT clause. Also verify that the correct datatype is specified for the field in the field list.

KUP-04082: error converting field *string* for LOBFILE column *string*

Cause: The LOBFILE column had either its directory object name or filename specified by a field in the data file and that field needed to be converted to the server's character set before it could be used. This message indicates that an attempt to convert the field failed.

Action: Verify that the data file has the correct value for the fields. Also verify that the correct character set was specified for the data file.

KUP-04083: no directory object specified in LOBFILE clause for column *string*

Cause: There was no directory object specified for the LOB files used to populate the named column and no default directory was specified for the external table.

Action: Either specify a directory name, or the name of a data field containing the name of the directory object that contains the files.

KUP-04085: duplicate directory object *string* and file *string* specified for unload

Cause: A CREATE TABLE AS SELECT statement was executed for an external table of type ORACLE_DATAPUMP and the same directory object and filename combination was specified multiple times.

Action: Issue the CREATE TABLE AS SELECT command again but make sure the combination of directory objects and filenames is unique.

KUP-04086: length of file name exceeds platform maximum of *number*

Cause: The length of a filename is longer than the maximum length supported by Oracle on the server platform.

Action: Verify that the name is correct. If so, use a shorter file name.

KUP-04087: no execute access to directory object *string*

Cause: Execute access to the directory object used for a preprocessor file was not granted.

Action: Grant execute privilege on the directory object or specify a different directory which already has execute privilege enabled.

KUP-04088: data sampling is not supported by this access driver

Cause: A query of an external table requested a sample of the data returned. The access driver for the external table does not support sampling.

Action: Do not try to use sampling for this external table.

KUP-04089: column transform *string* is not the name of a table column

Cause: The specified column was in the list of column transforms but a column by that name does not exist in the table

Action: Verify that the correct name was specified in the column transform.

KUP-04090: big endian byte order mark found when little endian expected in *string*
\n

Cause: A big endian byte order mark was found at the beginning of the specified file and either the access parameters specified the data was in little endian order or the byte order mark for a previous file was little endian.

Action: The file needs to be loaded separately. If a byte order was specified in the access parameters, make sure it is changed to be big endian.

KUP-04091: little endian byte order mark found when big endian expected in *string*
\n

Cause: A little endian byte order mark was found at the beginning of the specified file and either the access parameters specified the data was in big endian order or the byte order mark for a previous file was big endian.

Action: The file needs to be loaded separately. If a byte order was specified in the access parameters, make sure it is changed to be little endian.

KUP-04092: attempt to audit directory object *string* returned internal error *number*
\n

Cause: An error occurred while attempting to enable auditing for the specified directory object.

Action: Contact Oracle Support Services.

KUP-04093: error processing the FIELD NAMES record in data file *string*
\n

Cause: An error occurred while processing the FIELD NAMES record for the data file.

Action: See the messages that precede this one for more details. Fix the error and retry the operation.

KUP-04094: not authorized to perform preprocessing with Oracle Database Vault enabled
\n

Cause: The Oracle Database Vault option did not permit the execution a program from an Oracle directory object.

Action: If preprocessing must be performed, then grant PREPROCESSOR authorization to the user in the Oracle Database Vault.

KUP-04095: preprocessor command *string* encountered error "*string*"
\n

Cause: The specified preprocessor command encountered an error during execution.

Action: Verify that the preprocessor command along with any arguments are correct.

KUP-04096: Warning: lobfile column transform ignored with PREPROCESSOR option.
\n

Cause: The specified column was in the list of lobfile column transforms but the PREPROCESSOR option was also specified. The PREPROCESSOR option does not work in conjunction with lobfile column transforms.

Action: Do not use column transforms with the PREPROCESSOR option.

KUP-04097: RECORDS clause specified without a record format
\n

Cause: The RECORDS clause was part of the external table access parameters but no record format type was provided.

Action: If the RECORDS clause is used, then it must be followed by one of the VARIABLE, FIXED, or DELIMITED BY clauses.

KUP-04098: empty field name for field *number* in the FIELD NAMES record in data file\n

Cause: The field name for the listed field number in the FIELD NAMES record was empty.

Action: Specify a valid field name in the data file and retry the operation.

KUP-04099: Missing one or more field names in the FIELD NAMES record in the data file. Found *number* fields, there should be *number* fields.\n

Cause: One or more field names was not listed in the FIELD NAMES record. However, it was listed in the access parameter list for the external table.

Action: Include all field names in the data file and retry the operation.

KUP-04100: record rejected in file *string*\n

Cause: A record in the data file was not loaded into the table because of an error while finding fields in the record. See the previous error for more information. The record will be written to the BAD file, if one is being used. The record number in the source data file is not known because multiple servers are loading from the file.

Action: n/a

KUP-04101: record *number* rejected in file *string*\n

Cause: A record in the data file was not loaded into the table because of an error while finding fields in the record. See the previous error for more information. The record will be written to the BAD file, if one is being used.

Action: n/a

KUP-04102: record *number* discarded from file *string*\n

Cause: Informational message displayed whenever the WHEN clause has been satisfied. If a DISCARD file has been specified for the operation, the record will be written to that file.

Action: n/a

KUP-04103: error converting zoned decimal field to number for *string*\n

Cause: An error occurred converting a zoned decimal number to an Oracle number.

Action: Verify that the zoned decimal number is formatted correctly.

KUP-04104: zoned decimal field has bad values for *string*\n

Cause: A zoned decimal number has an invalid format.

Action: Verify that the zoned decimal number is formatted correctly.

KUP-04105: zoned decimal to number conversion caused overflow for *string*\n

Cause: A zoned decimal number could not be converted to an Oracle number because the number is too big for an oracle number.

Action: Verify that the zoned decimal number is formatted correctly.

KUP-04106: precision for zoned decimal number is too large for *string*\n

Cause: The precision of a zoned decimal number is larger than the precision that can be stored in an Oracle number.

Action: Verify that the zoned decimal number is formatted correctly.

KUP-04107: substring of field *string* for column *string* is not a character type

Cause: A substring was specified for a field that which is not a character datatype. Only character fields may be used when specifying the substring transform.

Action: Verify the correct field was used in the STARTOF clause. Also verify that the correct datatype is specified for the field in the field list.

KUP-04108: unable to reread file *string*

Cause: The query that is executing requires that a data source for an external table be read multiple times. However, the data source is a sequential device that cannot be reread. Examples of this type of data source is a tape or pipe.

Action: There are a few ways around this problem. One is to rewrite the query so that the external table is referenced only once. Another option is to move the data source to a rereadable device such as a disk file. A third option is to load the data for the external table into a temporary table and change the query to reference the temporary table.

KUP-04109: specified path for directory object "*string*" is invalid

Cause: The default directory or a directory object specified for an input data file or an output dump, log, bad or discard file contains an invalid path name.

Action: Specify a valid path name for the directory object.

KUP-04116: Field name *stringstringstring* in the FIELD NAMES record in the data file is too long.

Cause: The field name exceeded the maximum of 128 characters.

Action: Specify at most 128 characters.

KUP-04117: Field name *stringstringstring* was not found in the access parameter field list or table.

Cause: The listed field name in the FIELD NAMES record of the data file was not found in the access parameter field list or in the table columns. The next error message, if any, lists the name of the data file where the error was found.

Action: Verify that the field name in the FIELD NAMES record is correct. If that is correct, verify that the external table is defined correctly and that the access parameter field list is also correct.

KUP-04118: operation "*string*", location "*string*"

Cause: This message provides information about the previous messages.

Action: Refer to the help for the previous message for more information.

KUP-04119: Error *number* opening directory for wild card search: *string*

Cause: An error occurred while trying to open a directory to look for files that match a wild card specification.

Action: See messages that follow for more details.

KUP-04120: Error *number* fetching count of files for wild card search in directory *string*

Cause: An error occurred while trying to retrieve the count of files matching a wild card specification in the directory

Action: See messages that follow for more details.

KUP-04121: Error *number* fetching file names for wild card search in directory *string*\n

Cause: An error occurred while trying to retrieve the names of files matching a wild card specification in the directory

Action: See messages that follow for more details.

KUP-04122: Error *number* finishing wild card search in directory *string*\n

Cause: An error occurred while trying to finish a search for files that match a wild card specification the directory. matching a wild card specification in the directory

Action: See messages that follow for more details.

KUP-04123: ending XML tag *string* was not found before end of file\n

Cause: A corresponding XML end tag was not found before the end of file.

Action: Add the missing XML end tag.

KUP-04124: no file name specified for location *number* in LOCATION clause\n

Cause: An empty string was specified for a file name in the LOCATION clause.

Action: Either specify a valid file name or remove that entry from the LOCATION clause.

KUP-04125: no directory object specified for location *number* in LOCATION clause\n

Cause: An empty string was specified for a directory object in the LOCATION clause and the DEFAULT DIRECTORY clause was not specified.

Action: Either specify the name of a valid directory object or specify the DEFAULT DIRECTORY clause.

KUP-05001: Shift based character sets not supported with CSV format files\n

Cause: CSV is being used with a shift based character set.

Action: Either use a non-shift based character set or do not use CSV format files.

KUP-05002: There are no matching files for any file specification in the LOCATION clause.

Cause: One or more file specifications including wild cards were specified in the LOCATION clause, but none of the files matched any of the specifications.

Action: Check to make sure that the file specifications are correct and that one or more files match the file specifications and then try the operation again.

KUP-05003: Warning: There are no matching files for this specification.\n

Cause: No matching files were found for the LOCATION clause specification listed in the previous error message.

Action: No action is required. However, if you expected the LOCATION clause specification to match one or more files, check the specification and the files in the directory to make sure that they are correct. If needed, try the operation again.

KUP-05004: Warning: Intra source concurrency disabled because parallel select was not requested.\n\n

Cause: Intra source concurrency can only be used when parallel select has been requested.

Action: No action is required this message is informational.

KUP-05005: Warning: Intra source concurrency disabled because a field of type RECNUM exists.\n\n

Cause: Intra source concurrency cannot be used with RECNUM fields.

Action: No action is required this message is informational.

KUP-05006: Warning: Intra source concurrency disabled because a complex terminator string is being used.\n\n

Cause: Intra source concurrency cannot be used with terminators where replicated substrings in the terminator could cause ambiguity during record parsing.\n\n"

Action: No action is required this message is informational.

KUP-05007: Warning: Intra source concurrency disabled because the preprocessor option is being used.\n\n

Cause: Intra source concurrency cannot be used with the PREPROCESSOR option.

Action: No action is required this message is informational.

KUP-05008: Warning: Intra source concurrency disabled because the input data is in DELIMITED record format and the character set is neither fixed width nor UTF8.\n\n

Cause: Intra source concurrency cannot be used with the DELIMITED record format if the character set is neither fixed width or UTF8.

Action: No action is required this message is informational.

KUP-05009: Warning: Intra source concurrency disabled because the input data is in VARIABLE record format.\n\n

Cause: Intra source concurrency cannot be used with the VARIABLE record format.

Action: No action is required this message is informational.

KUP-05010: Warning: Intra source concurrency disabled because the input data is in CSV format with embedded record delimiters/terminators.\n\n

Cause: Intra source concurrency cannot be used with the CSV record format that has embedded record delimiters/terminators.

Action: No action is required this message is informational.

KUP-05011: Size of file *string* in directory *string* has changed from *number* to *number*.\n

Cause: While executing a query against an external table, the size of one of the files changed. Changing the data in a file during execution can cause incorrect or inconsistent results.

Action: Do not modify the data files for an external table while querying the table.

KUP-05012: File *string* in directory *string* is no longer a sequential file.\n

Cause: While executing a query against an external table, the file went from being a sequential file at the beginning of the query to a non-sequential file later in the query.

Action: Do not modify the data files for an external table while querying the table.

KUP-05013: File *string* in directory *string* is now a sequential file.\n

Cause: While executing a query against an external table, the file went from not being a sequential file at the beginning of the query to being a sequential file later in the query.

Action: Do not modify the data files for an external table while querying the table.

KUP-06000: Unable to process LOB Location Specifier field.\n

Cause: The LOB Location Specifier field was not processed correctly.

Action: Make sure the LOB Location Specifier is formatted correctly.

KUP-06001: LOB Location Specifier for column *string* - invalid offset or length.\n

Cause: The LOB Location Specifier contained an invalid offset or length.

Action: The offset must not be a negative value. The length can only be negative if a value of -1 (for a NULL LOB) is specified.

KUP-06002: LOB Location Specifier for column *string* must be loaded into a LOB column.\n

Cause: The destination column for a LOB Location Specifier field was not a LOB data type.

Action: Make sure the destination column is a LOB data type.

KUP-06003: LOB Location Specifier file name cannot contain a directory path.\n

Cause: The file name for a LOB Location Specifier field contained a directory path.

Action: Make sure the file name specified does not contain any forward slash or backslash characters.

KUP-11000: file truncated error\n

Cause: A truncated file was used for the load operation.

Action: Verify unload operation completed successfully.

KUP-11001: files not from the same unload operation\n

Cause: Files used for the load operation were not from the same unload operation.

Action: Verify the files used are from the same unload operation.

KUP-11002: unable to read data chunk *string*\n

Cause: A read or seek to this data chunk was not possible. This chunk may not have existed.

Action: Verify the files used for the load operation are correct.

KUP-11003: bad data encountered while reading from file *string*\n

Cause: There was a datatype conversion error while attempting to convert the data in the data file to match the datatype of a column in the external table. The message that follows this one displays the name of the column and the start of the data for the column that could not be converted. The row containing the bad data is rejected and not included as a row in the external table.

Action: If the row containing the bad data should not be filtered out, then modify the definition of the external table so that the datatypes of the columns match the datatypes of the fields in the data file.

KUP-11004: requested version *string* not supported by ORACLE_DATAPUMP\n

Cause: This database version (defaulted to COMPATIBLE if not user-specified) was not supported by ORACLE_DATAPUMP external table access driver. Note: Database versions before 9.2 were not supported.

Action: Specify a supported version and rerun the operation.

KUP-11005: error seeking in file: *string*\n

Cause: An attempt to seek to the specified position in file failed.

Action: Review the error message. Resolve the problem and retry the the operation. Contact Oracle Support Services if the problem cannot be resolved.

KUP-11006: file truncated error in *string*\n

Cause: A truncated or incomplete file was used for the load operation.

Action: Verify unload operation completed successfully.

KUP-11007: conversion error loading table *string.string*

Cause: A row could not be loaded into the table because there was a conversion error for one or more columns in a row.

Action: See the message that follows for more information about the row that could not be loaded. To avoid this error, make sure the definition of the table being loaded matches the definition of the table being unloaded.

KUP-11008: conversion error loading table *string.string* partition *string*

Cause: A row could not be loaded into the table because there was a conversion error for one or more columns in a row.

Action: See the message that follows for more information about the row that could not be loaded. To avoid this error, make sure the definition of the table being loaded matches the definition of the table being unloaded.

KUP-11009: data for row: *string* \n

Cause: A conversion error occurred while loading data into a table. The message shows values for the field in the row that had the conversion error.

Action: None. This is only an informational message.

KUP-11010: unable to open at least one dump file for fetch\n

Cause: None of the files in the LOCATION clause can be opened for a fetch on an external table.

Action: A fetch operation on an external table in SQL mode requires that at least one file could be opened. Check that the directory object and file names to the dump files are correct.

KUP-11011: the following file is not valid for this load operation\n

Cause: This file could not be used for this load operation. See the following message for more information.

Action: Verify all the files in the LOCATION clause are from the same unload operation and that the unload was successful.

KUP-11012: file *string* in *string* already exists\n

Cause: The specified file could not be used for this unload because that would mean overwriting an existing file.

Action: Specify a file that does not currently exist.

KUP-11013: internal number in header in file *string* is not valid\n

Cause: The specified file could not be used for this operation because the internal number in the header was not valid.

Action: If the dump files were transferred over, verify the transfer operation was done correctly.

KUP-11014: internal metadata in file *string* is not valid

Cause: The specified file could not be used for this operation because the internal metadata stored in this file does not match the metadata stored in the first file piece set.

Action: Verify all the files in the LOCATION clause are the correct dump files to use.

KUP-11015: error in unloading or loading data

Cause: An error has occurred in a stream unload or load operation.

Action: Contact Oracle Support Services.

KUP-11016: database version in file *string* is not valid

Cause: The specified file could not be used for this fetch because its database version was not compatible with the database version in the other files in the LOCATION clause.

Action: Verify all the files in the LOCATION clause were populated with compatible database versions.

KUP-11017: file *string* not found

Cause: The file was not found.

Action: Verify the correct file (path and file name) was specified.

KUP-11018: file *string* not a valid dump file

Cause: This file did not have the correct file format. It could not be used for an external table fetch operation.

Action: Verify this file is from a SQL mode external table populate operation and that the operation was successful.

KUP-11019: the following file is not valid for this fetch operation

Cause: A file could not be used for this fetch. See the following message for more information.

Action: Verify all the files in the LOCATION clause are from successful populate operations. If the files were generated from various populate operations, then verify that those were done with common attributes such as with the same tables and compatible database versions.

KUP-11020: header in file *string* may not contain correct information

Cause: The header may be corrupted.

Action: Contact Oracle Support Services.

KUP-11021: header in file *string* has an incompatible version number

Cause: A dump file was specified for a load operation whose version number is incompatible with the dump file version currently produced by the Oracle server on the system. Usually this message indicates that the dump file was produced by a newer version of the Oracle server.

Action: Load this dump file using the same version of the Oracle server that created the file.

KUP-11022: specified file name "*string*" is invalid

Cause: The file name specified for a dump or log file was invalid or null.

Action: Specify a valid file name for the dump or log file.

KUP-11023: specified path for directory object "*string*" is invalid

Cause: The default directory or a directory object specified for a dump or log file contained an invalid path name or was null.

Action: Specify a valid path name for the directory object.

KUP-11024: This external table can only be accessed from within a Data Pump job.

Cause: An attempt was made to access a temporary external table that was created by Data Pump to be used internally during the execution of an export or import job.

Action: None

KUP-11025: LOCATION clause is not allowed for ORACLE_HIVE external tables.
\\n

Cause: The LOCATION clause was specified for an ORACLE_HIVE access driver. The ORACLE_HIVE access driver gets LOCATION information from the metadata in the Hive catalog.

Action: Omit the LOCATION clause when creating an external table using the ORACLE_HIVE access driver.

KUP-11026: bad header format at start of granule [*number*] detected

Cause: The granule header was read but did not appear to be formatted correctly. The incorrect format could be due to a dump file corruption.

Action: Contact Oracle Support Services.

KUP-11027: A stream format internal error was detected unloading data "*string*".

Cause: An error occurred in a stream unload operation.

Action: Contact Oracle Support Services.

KUP-11028: Data load operation detected data stream format error *number* for granule *number*.

Cause: The format of the dump file data stream was not correct.

Action: The stream format error may have been caused by a corrupted dump file. If possible, re-create the dump file and try again. If the problem persists, contact Oracle Support Services.

KUP-11502: unexpected error loading Java Virtual Machine

Cause: The external procedure agent for the external table access driver was unable to load the Java Virtual Machine.

Action: Contact Oracle Support Services.

KUP-11503: cannot access cluster

Cause: An attempt was made to access table data in an ORACLE_HIVE or an ORACLE_HDFS external data source.

Action: Contact the database administrator about gaining access to ORACLE_HIVE and ORACLE_HDFS external data sources.

KUP-11504: error from external driver: *string*

Cause: An error occurred while attempting to access data in an ORACLE_HIVE or an ORACLE_HDFS external data source.

Action: Correct the problem as suggested by the error message and retry the operation.

KUP-11505: invalid value "*string*" specified for access parameter "*string*"\n

Cause: A NULL or invalid value was supplied for the access parameter.

Action: Correct the invalid value and retry the operation.

KUP-11506: cannot change cluster in the same session\n

Cause: An attempt was made to change the cluster in the same session. The first access to an Oracle BigData external table within a database session establishes the cluster for that session. This is determined by the cluster specified in the table's access parameters or, if no cluster was specified in the table's access parameters, by the default cluster set in the Oracle Big Data configuration file. Accessing an Oracle BigData external table in a different cluster within the same database session is not allowed.

Action: Establish a new database session and retry the operation.

KUP-11507: missing separator at offset *number* in line "*string*"\n

Cause: Access parameters in an Oracle Big Data external table as well as entries in the Oracle Big Data configuration file were lists of one or more property name or value pairs. In some cases, the property name does not require a value. In other cases where a value must be supplied with the property name, the two must be separated by an equal sign ('=') or a colon (':').

Action: Correct the problem as suggested by the error message and retry the operation.

KUP-11508: invalid character at offset *number* in line "*string*"\n

Cause: An invalid multibyte UTF character was encountered in the access parameters of an Oracle Big Data external table.

Action: Contact Oracle Support Services.

KUP-11509: invalid escape sequence at offset *number* in line "*string*"\n

Cause: An invalid escape sequence was encountered in the access parameters of an Oracle Big Data external table. This may be caused by \unnnn Unicode code point that does not generate a valid Unicode character.

Action: Correct the problem as suggested by the error message and retry the operation.

KUP-11510: missing value at offset *number* in line "*string*"\n

Cause: Access parameters in an Oracle Big Data external table as well as entries in the Oracle Big Data configuration file were lists of one or more property name or value pairs. In some cases, the property name does not require a value. In other cases, where a value must be supplied with the property name, the two must be separated by an equal sign ('=') or a colon (':'). In this instance, a property name and a separator were found without a corresponding value.

Action: Correct the problem as suggested by the error message and retry the operation. Supply a value if the property name requires one. Otherwise, remove the separator and supply only the property name.

KUP-11511: failed to initialize logging in external driver\n

Cause: The external driver code could not initialize a context for logging messages. This usually indicates a problem with the value of the Java classpath used by the external driver.

Action: Contact your system administrator to examine the contents of both the Oracle Big Data configuration file and the Oracle Big Data log4j configuration file to ensure that the entries in these files contain correct information.

KUP-11516: memory allocation error while initializing the Java Virtual Machine

Cause: An error occurred while trying to allocate memory in order to initialize the Java Virtual Machine in the external driver.

Action: Contact your system administrator.

KUP-11521: invalid value when attempting to modify access parameter "string"

Cause: An attempt was made to modify an invalid access parameter.

Action: The only valid access parameters which can be modified are:

"com.oracle.bigdata.log.qc" "com.oracle.bigdata.log.exec" "com.oracle.bigdata.log.opt"
"com.oracle.bigdata.debug" "com.oracle.bigdata.datamode" Correct the invalid access parameter and retry the operation.

KUP-11523: external driver failed with unexpected error: string

Cause: The ORACLE_HIVE or ORACLE_HDFS external driver encountered an unexpected error condition.

Action: Contact Oracle Support Services.

KUP-11524: initialization failure for Java Native Interface (JNI) call

Cause: The external driver encountered an unexpected error while trying to initialize its internal context for calling the Java Native Interface (JNI). This may indicate a classpath problem in the Oracle Big Data configuration file or a problem in the Oracle Big Data log4j configuration file.

Action: Contact your system administrator to examine the contents of both the Oracle Big Data configuration file and the Oracle Big Data log4j configuration file to ensure that the entries in these files contain correct information.

KUP-11525: The external driver was unable to attach to the Java Virtual Machine.

Cause: The external driver encountered an unexpected error while trying to attach a thread to the Java Virtual Machine.

Action: Contact Oracle Support Services.

KUP-11526: memory allocation failure for Java Native Interface (JNI) call

Cause: An error occurred while trying to allocate memory in order to make a Java Native Interface (JNI) call in the external driver.

Action: Contact your system administrator.

KUP-11527: The external driver was unable to attach to shared memory.

Cause: The external driver encountered an unexpected error while trying to attach to a shared memory segment.

Action: Contact Oracle Support Services.

KUP-11528: access to cluster "string" is not properly defined

Cause: Access to an ORACLE_HIVE or ORACLE_HDFS external data source was not defined as documented.

Action: Contact the database administrator.

KUP-11529: class "*string*" is invalid for *string* external tables

Cause: An invalid value was specified for the COM.ORACLE.BIGDATA.CLASS access parameter for an ORACLE_HIVE or ORACLE_HDFS external table access driver. The ORACLE_HIVE and ORACLE_HDFS access drivers use a built-in class in order to access their data source.

Action: Omit the COM.ORACLE.BIGDATA.CLASS access parameter when creating an external table using the ORACLE_HIVE or ORACLE_HDFS access driver. Alternatively, the builtin class names, COM.ORACLE.BIGDATA.AD.HIVE and COM.ORACLE.BIGDATA.AD.HDFS, may be used when creating an external table using the ORACLE_HIVE or ORACLE_HDFS access driver.

KUP-11530: value for com.oracle.bigdata.buffersize larger than maximum allowed value *number*

Cause: The com.oracle.bigdata.buffersize was specified for the external table and the value specified was larger than the maximum allowed value.

Action: Change the value specified for com.oracle.bigdata.buffersize to be smaller than the maximum value reported in the message.

KUP-11531: missing mandatory property "*string*" in the Oracle Big Data configuration file

Cause: A mandatory property was not found in the Oracle Big Data configuration file.

Action: Contact your system administrator to modify the Oracle Big Data configuration file so that it contains all of the required information.

KUP-11532: duplicate property "*string*" in the Oracle Big Data configuration file

Cause: A duplicate property was found in the Oracle Big Data configuration file.

Action: Contact your system administrator to remove all duplicate properties from the Oracle Big Data configuration file.

KUP-11533: error collecting JVM information: *string*

Cause: The ORACLE_HIVE or ORACLE_HDFS external driver encountered an unexpected error while trying to collect information such as memory usage from the Java Virtual Machine (JVM).

Action: Contact your system administrator.

KUP-11534: external driver JNI initialization failure: *string*

Cause: The ORACLE_HIVE or ORACLE_HDFS external driver encountered an unexpected error while trying to initialize its internal context for calling the Java Native Interface (JNI). This may indicate a classpath problem in the Oracle Big Data configuration file or a problem in the Oracle Big Data log4j configuration file.

Action: Contact your system administrator.

KUP-11535: XAD version "*string*" incompatible with JXADProvider version "*string*"

Cause: A version mismatch between the ORACLE_HIVE or ORACLE_HDFS access driver and the external driver Java components has been detected.

Action: Contact your system administrator.

KUP-11536: external driver MTA initialization failure: *string*

Cause: The ORACLE_HIVE or ORACLE_HDFS multithreaded external agent encountered an initialization failure that prevented it from starting.

Action: Contact your system administrator.

KUP-11542: error initializing dynamic-link librarian: *string*\n

Cause: An error occurred while trying to initialize the dynamic-link librarian needed to access the Java Virtual Machine library.

Action: Contact Oracle Support Services.

KUP-11543: error accessing the Java Virtual Machine library: *string*\n

Cause: An error occurred while trying to open the Java Virtual Machine library in the external driver.

Action: Contact your system administrator.

KUP-11544: error locating symbol address in the Java Virtual Machine library: *string*\n

Cause: An error occurred while trying to locate a symbol address in the Java Virtual Machine library.

Action: Contact your system administrator.

KUP-11545: unable to set NLS *string* to required value *string*

Cause: An error occurred while the ORACLE_HIVE or ORACLE_HDFS external agent was trying to set up its NLS environment.

Action: Contact Oracle Support Services.

KUP-11546: external driver unable to attach to shared memory: [*string*] [*string*] [*string*] [*string*] [*string*] [*string*]\n

Cause: The ORACLE_HIVE or ORACLE_HDFS external driver encountered an unexpected error while trying to attach to a shared memory segment.

Action: Contact Oracle Support Services.

KUP-11547: external driver unable to detach from shared memory: [*string*] [*string*] [*string*] [*string*] [*string*]\n

Cause: The ORACLE_HIVE or ORACLE_HDFS external driver encountered an unexpected error while trying to detach from a shared memory segment.

Action: Contact Oracle Support Services.

KUP-11548: error encountered creating shared memory: [*string*] [*string*] [*string*] [*string*] [*string*] [*string*]\n

Cause: The ORACLE_HIVE or ORACLE_HDFS access driver encountered an unexpected error while trying to create a shared memory segment.

Action: Contact Oracle Support Services.

KUP-11549: error encountered destroying shared memory: [*string*] [*string*] [*string*] [*string*] [*string*] [*string*]\n

Cause: The ORACLE_HIVE or ORACLE_HDFS access driver encountered an unexpected error while trying to destroy a shared memory segment.

Action: Contact Oracle Support Services.

KUP-11550: invalid JNI version "*string*" encountered while initializing the Java Virtual Machine\n

Cause: A Java Native Interface (JNI) version error occurred while trying to create and initialize the Java Virtual Machine in the external agent.

Action: Contact your system administrator.

KUP-11551: error generating file name for file "*string*" in directory "*string*": *string*\n

Cause: An error occurred while trying to generate a full file name specification.

Action: Contact your system administrator.

KUP-11552: error initializing the Java Virtual Machine: *string*\n

Cause: An error occurred while trying to create and initialize the Java Virtual Machine in the external agent.

Action: Contact your system administrator.

KUP-11553: The Oracle Big Data configuration file "*string*" is empty.\n

Cause: There was no content in the Oracle Big Data configuration file.

Action: Contact your system administrator to correct the configuration files for the Hadoop cluster.

KUP-11554: error accessing the Oracle Big Data configuration file "*string*": *string*\n

Cause: A file I/O error occurred while attempting to access the Oracle Big Data configuration file.

Action: Contact your system administrator to correct the configuration files for the Hadoop cluster.

KUP-11555: error opening the Oracle Big Data configuration file "*string*": *string*\n

Cause: A file I/O error occurred while trying to open the Oracle Big Data configuration file.

Action: Contact your system administrator to correct the configuration files for the Hadoop cluster.

KUP-11556: error reading the Oracle Big Data configuration file "*string*": *string*\n

Cause: A file I/O error occurred while trying to read from the Oracle Big Data configuration file.

Action: Contact your system administrator to correct the configuration files for the Hadoop cluster.

KUP-11557: error closing the Oracle Big Data configuration file "*string*": *string*\n

Cause: A file I/O error occurred while trying to close the Oracle Big Data configuration file.

Action: Contact your system administrator to correct the configuration files for the Hadoop cluster.

KUP-11558: invalid cluster name "*string*"\n

Cause: An invalid cluster name was specified for the external table in the com.oracle.bigdata.cluster access parameter. The name must contain only alphanumeric characters or the underscore character. In Oracle Database 12c release 12.1.0.2, the cluster name is limited to 15 bytes. In Oracle Database 12c release 12.2 and higher, the cluster name is limited to 113 bytes.

Action: Correct the cluster name for the external table and retry the operation.

KUP-11559: invalid default cluster name "*string*"\n

Cause: An invalid cluster name was specified for the bigdata.cluster.default property in the Oracle Big Data configuration file. The name must contain only alphanumeric characters, the hyphen or underscore character. In Oracle Database 12c release

12.1.0.2, the cluster name is limited to 15 bytes. In Oracle Database 12c release 12.2 and higher, the cluster name is limited to 113 bytes.

Action: Contact your system administrator to correct the value of the `bigdata.cluster.default` property in the Oracle Big Data configuration file and retry the operation.

KUP-11560: error accessing the Oracle Big Data cluster directory "*string*": *string*\n

Cause: A file I/O error occurred while attempting to access the Oracle Big Data cluster directory file.

Action: Contact your system administrator to correct the configuration files for the Hadoop cluster.

KUP-11561: error while attempting to allocate Java memory: *string*\n

Cause: An error occurred while trying to allocate Java memory to the external driver.

Action: Examine the accompanying text in the error message and contact your system administrator.

KUP-11562: error while attempting to allocate *string* bytes of native memory\n

Cause: An error occurred while trying to allocate native memory to the external driver.

Action: Contact your system administrator.

KUP-11600: unable to find first record in a split with I/O buffer size of *number* kilobytes\n

Cause: The access driver was unable to find the first record in the split for a Hadoop Distributed File System (HDFS) file.

Action: The access driver requires that the size of records in the file are not larger than the size of the I/O buffers. Try increasing the size of the I/O buffers with the access parameter `com.oracle.bigdata.fieldmode.buffersize`.

KUP-11601: record exceeded the maximum record size of *number* kilobytes\n

Cause: The access driver found a record in a Hadoop Distributed File System (HDFS) file that is longer than the largest size allowed for this table.

Action: The access driver requires that the size of records in the file are not larger than the size of the I/O buffers. Try increasing the size of the I/O buffers with the access parameter `com.oracle.bigdata.fieldmode.buffersize`.

KUP-11602: conversion error for column *string* in column array row *number*\n

Cause: There was a data type conversion error while attempting to convert the data in the data file to match the data type of a column in the external table.

Action: Make sure the data is correct. Also, verify that the data types specified for the fields are correct.

KUP-11603: no directory object specified for bad file\n

Cause: The file name in the `BADFILE` clause was specified without a directory object and the `DEFAULT DIRECTORY` clause was not specified for the external table.

Action: Either specify a directory object as part of the `BADFILE` clause or specify the `DEFAULT DIRECTORY` clause.

KUP-11604: no directory object specified for log file\n

Cause: A log file for an external table did not have a directory object.

Action: Either specify a directory object as part of the log file name in the ACCESS PARAMETERS or query, or specify the DEFAULT DIRECTORY clause in the ACCESS PARAMETERS or query. ORACLE_LOADER and ORACLE_DATAPUMP access drivers will create a log file by default. If you do not want a log file, then use the NOLOG clause in the access parameters.

KUP-11605: no directory object specified for discard file\n

Cause: The file name in the DISCARDFILE clause was specified without a directory object and the DEFAULT DIRECTORY clause was not specified for the external table.

Action: Either specify a directory object as part of the DISCARDFILE clause or specify the DEFAULT DIRECTORY clause.

KUP-11606: no directory object specified for PREPROCESSOR file\n

Cause: The file name in the PREPROCESSOR clause was specified without a directory object and the DEFAULT DIRECTORY clause was not specified for the external table.

Action: Either specify a directory object as part of the PREPROCESSOR clause or specify the DEFAULT DIRECTORY clause.

LCD-00100 to LCD-00219

LCD-00100: internal error, argument [*number*]

Cause: An internal error has occurred

Action: Report it to your System Administrator immediately

LCD-00111: value not in legal range [*string*]

Cause: The value of the parameter is outside bounds

Action: Refer to the manual for the bounds on the parameter

LCD-00112: illegal integer radix specification [*string*]

Cause: Self Explanatory

Action: valid characters are 'd', 'h', 'D' and 'H'

LCD-00113: integer conversion error or negative integer [*string*]

Cause: A bad or negative integer was assigned to an integer parameter

Action: Self explanatory

LCD-00114: illegal boolean response [*string*]

Cause: You a value than TRUE or FALSE to a boolean parameter

Action: Boolean parameters only take TRUE or FALSE

LCD-00122: unrecognized keyword [*string*]

Cause: You have misspelled the parameter name

Action: Spell the parameter name correctly

LCD-00128: invalid positional parameter value [*string*]

Cause: An invalid positional parameter value has been entered

Action: Remove the invalid positional parameter

LCD-00161: ORACLE error (possible syntax error) parameter [*string*]

Cause: Possible syntax error. Additional messages follow.

Action: Correct the parameter in error.

LCD-00201: could not open specified filename [*string*]

Cause: The file specified does not exist

Action: Create an appropriate parameter file

LCD-00203: missing keyword [*string*]

Cause: A keyword is expected but none was found

Action: Add a keyword followed by an '=' sign and a parameter value

LCD-00204: left parenth and no parameter specified [*string*]

Cause: A parameter list was started but no parameter was specified

Action: Add an appropriate list of values and close the parameter list

LCD-00205: unbalanced parentheses [*string*]

Cause: Self explanatory

Action: Balance the parentheses

LCD-00206: positional parameter entered after keyword [*string*]

Cause: An '=' sign is missing

Action: All keywords must be followed by '=' signs

LCD-00207: nested parentheses encountered [*string*]

Cause: Only one set of parentheses is permitted

Action: Remove the nested parentheses

LCD-00208: unexpected keyword in value list [*string*]

Cause: A keyword was found instead of a value

Action: Insert an appropriate value for the given parameter

LCD-00209: missing value for keyword at end of string [*string*]

Cause: A keyword is specified with no value

Action: Specify a valid value for the keyword

LCD-00210: illegal assignment operator [*string*]

Cause: You used a sign other than '=' to assign a keyword a value

Action: Use only the '=' sign

LCD-00211: unexpected delimiter [*string*]

Cause: An invalid delimiter was found between values

Action: A comma or a space is a valid delimiter

LCD-00212: runaway quoted string [*string*]

Cause: The parameter value was quoted on the left side but not on the right

Action: Quote the parameter value on both sides

LCD-00215: parameter files nested too deep [*string*]

Cause: Too many levels of indirection of file parameters. Maximum is 3.

Action: Reduce the level of indirection to less than 3

LCD-00217: failure while processing file parameter [*string*]

Cause: An error occurred while processing the specified file parameter

Action: Specific details will appear in other messages

LCD-00218: error in file [*string*]

Cause: An error occurred in the particular file.

Action: Refer to the other messages for the specific error.

LCD-00219: nested include file [*string*] is too large

Cause: There is a limit on the size of a parameter file, and it was exceeded. This limit is now 8192 bytes.

Action: Remove characters from the file to make it smaller, or use another level of nesting.

LFI-00002 to LFI-01525

LFI-00002: Out of memory. *string*

Cause: The File IO package failed in trying to dynamically allocate memory. function name is used for additional comments to indicate where, when and why the error occurred.

Action: Perform whatever actions necessary to make more memory available to the executing program.

LFI-00003: Internal exception code. icode = [*string*], [*string*].

Cause: Unknown - indicated by parameters. The first '%s' gives the internal exception code; the second is for any other additional comments.

Action: Report to the appropriate development group

LFI-00004: Call to *string* failed.

Cause: A function call has failed. This error is a generic message to show that the exception has occurred in a particular function function name. This allows the client to know the trace runtime calling sequence by examining the exception stack.

Action: See the accompanying error messages for more information.

LFI-00005: Free some memory failed in *string*.

Cause: A call to free some memory in function function name has failed.

Action: See the accompanying error messages for more information and contact Oracle Worldwide Support immediately.

LFI-00006: Invalid parameter to function *string*.

Cause: The function was called with an invalid parameter.

Action: Check the function call to make sure that the correct parameters are being passed.

LFI-00007: NLSRTL's call failed. *string*.

Cause: LX calls return failure

Action: Check if our parameters are correct. Contact the appropriate group immediately if we parameters are valid.

LFI-00008: SLTS's initializing/terminating mutex failed for *string*.

Cause: SLTS's call return failure in function '%s'.

Action: Contact the appropriate development group.

LFI-00100: Unable to perform operation, file not opened in *string*.

Cause: The file has not been successfully opened at the time the operation is attempted.

Action: Check to make sure that the file exists (for read) or that the program has access to the write a file (for write). It is also possible that the file was just never opened

LFI-00101: Write failed, file cannot be written to.

Cause: The buffer write operation failed. Possibly due to incorrect parameters being passed in.

Action: Check the underlying error for more information.

LFI-00102: Unable to seek in sequentially accessed file.

Cause: The file was opened with the flag `LFILFA_SEQ` for sequential file operations. Use seek only on files that are opened with the `LFILFA_RANDOM` flag for random access.

Action: Check to see how the file is being opened and accessed and make the two operations consistent (that is, make them both operations either sequential or random).

LFI-00103: Seek operation failed.

Cause: The buffer seek operation failed. Probably due to incorrect parameters or flags.

Action: Check syntax of the seek command and retry the operation.

LFI-00104: Read operation failed.

Cause: The buffer read operation failed. Probably due to incorrect parameters or flags.

Action: Check syntax of the read command and retry the operation.

LFI-00105: Unable to add path.

Cause: One of the following might have caused the error: the current path might not be in the proper format the directory might not be in the proper format the name object might not have been initialized properly

Action: Check the format of the current path and the new directory; check that the name object was initialized properly.

LFI-00106: Path object holds more than one path.

Cause: The path object passed to `lfippth()` holds more than one path.

Action: Make sure that the path object used in `lfippth()` holds only one path.

LFI-00107: Open does not expect the file *[string][string]* to exist.

Cause: The flags specified for the open indicate that the file does not exist. However, the file does exist.

Action: Check to make sure that the options that were specified for the file are correct and that you do not expect that the file should exist. If so then find out why the file does exist.

LFI-00108: Open expect the file *[string][string]* to exist.

Cause: The flags specified for the open indicate that the file the file to exist and it does not.

Action: Check to make sure that the options that were specified for the file are correct and that you expect that the file should exist. If so then find out why the file doesn't.

LFI-00109: Unable to open file *[string][string]. string*.

Cause: Either: the process does not have the proper access rights to open the file the file is already open

Action: Check to make sure the proper access permissions are assigned. If they are and the file still cannot be opened, then contact Oracle Worldwide Support.

LFI-00110: Unable to initialize the Buffer Manager.

Cause: The Buffer Manager initialization routine failed; probably because memory was exhausted.

Action: See the accompanying error messages for more information.

LFI-00111: No other flags allowed in fixed length format.

Cause: The function lfigfo() was called with an invalid File ID Descriptor. The valid File ID Descriptors are LFISTDIN, LFISTDOUT, and LFISTDERR.

Action: Check the call to lfigfo() to make sure it is correct.

LFI-00113: Unable to initialize the Standard File object *string*.

Cause: The call to open the standard file object failed.

Action: Check the underlying errors for more information.

LFI-00114: Append is not allowed with *string*.

Cause: Attempting to append using certain options.

Action: Check the flag options to verify its usage.

LFI-00115: Buffer free failed.

Cause: Probably do to the buffer flush failing.

Action: See the accompanying error messages for more information.

LFI-00116: Unable to close file in operation *string*.

Cause: The file close operation failed.

Action: See the accompanying error messages for more information.

LFI-00117: Unable to rename file.

Cause: The rename operation failed. Rename is called when we are protecting a file by operating on a temp file.

Action: Check to make sure that the process has the correct access rights to perform a rename.

LFI-00118: Unable to change type to Unknown.

Cause: The function lfichty() was called to change the file extension to LFIEXUNK (Unknown). This is not a valid operation.

Action: Check why you are doing this. If the extension is already unknown then you do not need to do this. If you just want no extension then use the extension type LFIEXNONE.

LFI-00119: Unable to Abort an Unprotected file.

Cause: The Abort function lfiabt() was called on a file that was not opened as a protected file. As such the abort operation is not valid.

Action: Check to see if you intended to open the file as a protected file.

LFI-00120: Unable to parse root filename *string*.

Cause: The root filename that was given to lfimknam() is not in a format that this platform understands.

Action: Check the format of the filename and retry the operation.

LFI-00121: Only one of REPLACE, or PROT allowed for opty.

Cause: Two or more of the following open type options were specified for the `lfini()` function: `LFILOPTY_REPLACE`, or `LFILOPTY_PROT`.

Action: Remove one or more the of options such that you are only passing in one of the three.

LFI-00122: Can only delete a file if we create it.

Cause: The delete file flag was specified for a file that was not created by this file operation. The ability to delete a file is not portable. As such the only deletion that is allowed by this package is if we know we want to delete the file when we create it.

Action: You can only delete a file that you create. If you need to delete a file that you do not create then you will have to find another means of doing so.

LFI-00123: Cannot access file Sequentially and Randomly.

Cause: Both the `LFILFA_SEQ` (sequential) and `LFILFA_RANDOM` (random) flags were specified during the file object creation. This is not allowed. Only one of the two may be specified.

Action: Choose how you wish to access the file. If you choose random you can still access sequentially by just not using the repositioning functions.

LFI-00124: No access mode was specified, default is sequential.

Cause: Neither `LFILFA_SEQ` (sequential) or `LFILFA_RANDOM` (random) were specified during file object creation.

Action: The default is sequential but this should be explicitly set.

LFI-00125: Random access only allowed on fixed length record files.

Cause: The `LFILFA_RANDOM` flag was specified on a file that was not organized into fixed-length records. Random access is only allowed on fixed-length record files.

Action: Determine if the organization of your data needs to be in variable-length records and if you need to have random access to the file. If both conditions are true then you might need to buffer the entire file or enough of it to remove your need for random access. Another option is to close and rescan the file although this is not the optimal solution.

LFI-00126: Record format can only be one of Fixed or Variable.

Cause: Both `LFILRF_FIXED` (fixed) and `LFILRF_VAR` (variable) were specified during file object creation. Only one of the two is allowed for a given file.

Action: Determine how the file is organized and choose the option that matches.

LFI-00127: No Record Format was specified, default is variable.

Cause: Neither `LFILRF_FIXED` (fixed) or `LFILRF_VAR` (variable) were specified for record format. One of the two must be specified for each file.

Action: The default is `LFILRF_VAR`, but this should be explicitly set during file object creation.

LFI-00128: Carriage Control is only valid for Standard file objects.

Cause: The Carriage Control option is only valid for the standard file objects (`LFISTDIN`, `LFISTDOUT`, `LFISTDERR`). You may not specify this option for any other type of file.

Action: Choose between `LFILRF_FIXED` and `LFILRF_VAR` for the record format.

LFI-00129: Invalid option *string* were specified on an input only file.

Cause: The file was opened as input only but the output mode option LFILRF_WR_ASIS or delete option LFLOPTY_DELETE was specified.

Action: Check to see how you intend to open this file and make the necessary changes.

LFI-00130: Input option specified on output only file.

Cause: The file was opened as output only but one of the input mode options (LFILRF_READ_NL or LFILRF_FORCE_NL) or was specified.

Action: Check to see how you intend to open this file and make the necessary changes.

LFI-00131: No open type specified.

Cause: The file object was created without an open type (that is, LFILOPTY_INPUT, LFILOPTY_OUTPUT, etc.).

Action: Decide how the file should be accessed and specify one of the open types.

LFI-00132: Record length *string* is greater than max length of *string*.

Cause: The record length specified for the file is greater than the max supported by this platform.

Action: Decrease the record length.

LFI-00133: Trying to create file *string* that already exists.

Cause: The file object was initialized with LFILOPTY_OUTPUT and without LFILOPTY_REPLACE and yet a file by this name already exists.

Action: Check to make sure that you are creating the right file. If you intend to overwrite the file if it exists that specify the replace option LFILOPTY_REPLACE when initializing the file object.

LFI-00134: Unable to protect a file for an append operation.

Cause: The LFILOPTY_APPEND and LFILOPTY_PROT options were both specified for the file. This is currently not allowed because it would require copying the entire file at open time.

Action: Decide if you really need to protect the file for append. If so then think about making a copy of it before appending.

LFI-00135: Unable to remove temporary file.

Cause: A temporary file was created to protect a file and when the the tempfile was nolonger needed it LFI attempted to remove it and was unable to do so.

Action: Check the permissions and where the temp files are being created.

LFI-00136: Unable to change type of open file.

Cause: The function lfichty() was called on an opened file.

Action: This is a bug in the client code. lfichty() cannot be used in this case.

LFI-00137: Unable to perform *string* on a file object that is *string*.

Cause: Unable to perform an LFI operation on a file object for the given reason.

Action: Take the appropriate corrective measure. For example if a file is supposed to be opened before the operation can be performed, client code will need to open the file first.

LFI-00138: Unable to perform *string* on a name object that is *string*.

Cause: Unable to perform an LFI operation on a name object for the given reason.

Action: Take the appropriate corrective measure.

LFI-00139: Option *string* cannot be used with option *string* in calling *string*.

Cause: First option cannot be used with second option in such a function call.

Action: Re-examine code to determine which option is needed.

LFI-00140: Invalid option *string* were specified on input-output file.

Cause: The file was opened as input-output and one of the mode options (LFIOPTY_DELETE or non-LFIOPTY_RANDOM) was specified.

Action: Check to see how you intend to open this file and make the necessary changes.

LFI-00141: Unable to abort file in operation *string*.

Cause: The abort operation failed.

Action: Check the underlying errors for more information.

LFI-00142: Unable to delete an existing file [*string*][*string*] not owned by Oracle.

Cause: The file was not created by Oracle.

Action: Change owner of file to Oracle or give Oracle access privileges to delete it.

LFI-00143: Unable to delete non-existent file *string*.

Cause: The file to be deleted does not exist.

Action: Check the underlying errors for more information.

LFI-00144: File [*string*][*string*] does not exist

Cause: The file does not exist.

Action: Check to make sure the file exists and retry the operation.

LFI-00145: User buffer too short.

Cause: The buffer that was passed is not large enough.

Action: Allocate a larger buffer and retry the operation.

LFI-00146: copy does not expect the file *string.string* to exist

Cause: We are expecting the destination file not to exist and it does.

Action: Find out why the file does exist.

LFI-00147: File *string.string* does not exist

Cause: The file does not exist.

Action: Check to make sure the file exists and retry the operation.

LFI-00148: *string* can be called only on files opened in byte mode

Cause: A routine that should be used only for files in byte mode was called for a file that was opened in record mode

Action: In order to use this function, the file should be opened in byte mode.

LFI-00149: Error on destroying hash table in function *string*

Cause: We were expecting the cache path object and it does not.

Action: In order to use this function, the path object should be cache path object.

LFI-00150: Error on creating hash table in function *string*

Cause: routine failed to create path object hash table

Action: make sure that startsize <= LHTQMAXSLOTS

LFI-00151: Error on inserting into hash table in function *string*

Cause: routine failed to insert into hash table

Action: make sure there is enough memory for allocation and that the hash table exists.

LFI-00152: Read operation (byte mode) failed.

Cause: Byte mode read operation failed. Probably due to incorrect parameters or flags, or trying to read beyond end of file.

Action: Check syntax of the read command and size of file.

LFI-01000: Unable to write line to file.

Cause: The file being written to may no longer be open or we may have reached the end of the file.

Action: Examine underlying errors for more information.

LFI-01001: Unable to write *string* bytes to file.

Cause: The file being written to may no longer be open or we may have reached the end of the file.

Action: Examine underlying errors for more information.

LFI-01002: Unable to read line from file.

Cause: The file being read from may no longer be open.

Action: Examine underlying errors for more information.

LFI-01003: Unable to read *string* bytes from file.

Cause: The file being read from may no longer be open.

Action: See the accompanying error messages for more information.

LFI-01004: Unable to empty buffer.

Cause: The buffer manager is probably unable to write to the underlying file.

Action: Examine underlying errors for more information.

LFI-01005: Unable to fill buffer.

Cause: The buffer manager is probably unable to read from the underlying file.

Action: See the accompanying error messages for more information.

LFI-01006: File ends in partial character in *string*.

Cause: A line ends in a partial character.

Action: Examine underlying errors for more information.

LFI-01007: Line is too long; encountered in function *string*.

Cause: The length of the line exceeds the maximum length.

Action: Examine underlying errors for more information.

LFI-01500: Error condition on call to OSD function *string*.

Cause: An error condition arises in calling an OSD function. This message occurs if calls to malloc or free functions failed.

Action: Contact Oracle Worldwide Support.

LFI-01501: tmpnam() fails to generate temporary file name.

Cause: Operating system was unable to create temporary file name.

Action: Contact the development organization.

LFI-01502: Base filename does not exist.

Cause: The filename that was parsed had no base file. It was either all path or extension.

Action: Check the filename being passed in to make sure it is correct.

LFI-01503: Max filename size exceeded generating filename.

Cause: While building a filename we exceeded the buffer allocated to hold the new filename.

Action: Contact the development organization.

LFI-01504: fseek() failed(OSD return value = *string*) in *string*.

Cause: The function fseek() returned an error condition.

Action: Contact Oracle Worldwide Support.

LFI-01505: fclose() failed(OSD return value = *string*) in *string*.

Cause: The function fclose() returned an error condition.

Action: Contact Oracle Worldwide Support.

LFI-01506: fflush() failed(OSD return value = *string*).

Cause: The function fflush() returned an error condition.

Action: Contact the development organization.

LFI-01507: fwrite() failed(OSD return value = *string*) in *string*.

Cause: File pointer may be null or may not be opened for write.

Action: Contact the development organization.

LFI-01508: access() failed.

Cause: Call to access() failed.

Action: Contact the development organization.

LFI-01509: fopen() failed(OSD return value = *string*).

Cause: Call to fopen() failed.

Action: Contact Oracle Worldwide Support.

LFI-01510: fread() failed(OSD return value = *string*) in *string*.

Cause: Call to fread() failed.

Action: Contact Oracle Worldwide Support.

LFI-01511: unlink() failed(OSD errno = *string*) in *string*.

Cause: Call to unlink() failed.

Action: Contact the development organization.

LFI-01512: stat() failed

Cause: Call to stat() failed.

Action: Contact Oracle Worldwide Support.

LFI-01514: ftell() failed in *string*

Cause: The ftell() function returned an error.

Action: Contact Oracle Worldwide Support.

LFI-01515: truncate() failed.

Cause: The function truncate() returned an error condition.

Action: Contact the development organization.

LFI-01516: read() failed (OSD return value = *string*) in *string*.

Cause: Call to read() failed.

Action: Contact the development organization.

LFI-01517: open() failed(OSD return value = *string*).

Cause: Call to open() failed.

Action: Contact the development organization.

LFI-01518: write() failed(OSD return value = *string*) in *string*.

Cause: Call to write() failed.

Action: Contact the development organization.

LFI-01519: lseek() failed(OSD return value = *string*) in *string*.

Cause: The lseek() function returned an error.

Action: Contact Oracle Worldwide Support.

LFI-01520: close() failed(OSD return value = *string*) in *string*.

Cause: The function close() returned an error condition.

Action: Contact the development organization.

LFI-01521: fsync() failed(OSD return value = *string*) in *string*.

Cause: The function fsync() returned an error condition.

Action: Contact the development organization.

LFI-01522: opendir() failed.

Cause: The function opendir() returned an error condition.

Action: Contact the development organization.

LFI-01523: rename() failed.

Cause: The function rename() returned an error condition.

Action: Contact the development organization.

LFI-01524: fdopen() failed(OSD return value = *string*).

Cause: Call to fdopen() failed.

Action: Contact the development organization.

LFI-01525: setvbuf() failed.

Cause: A call to lfcstd() had failed.

Action: Contact development service

LPX-00000 to LPX-01160

LPX-00000: normal, successful completion

Cause: Normal exit

Action: No action required.

LPX-00001: NULL pointer

Cause: A NULL pointer was detected as an internal error condition.

Action: This is a programming error by the caller of the XML parser. Please contact someone who can fix the problem.

LPX-00002: out of memory

Cause: The operating system has run out of memory.

Action: Make more memory available to the program.

LPX-00003: duplicate entry in hash table

Cause: An internal error has occurred (a key was requested to be placed in a hash table but was already there).

Action: Contact Oracle Support Services and report the error.

LPX-00004: internal error "~s"

Cause: An internal error has occurred.

Action: Contact Oracle Support Services and report the error.

LPX-00005: ~1s buffer overflow, maximum size is ~2u bytes

Cause: A name, quoted string, URL, or other document component was too long.

Action: Restrict the component to the maximum size shown.

LPX-00006: invalid child type for parent node

Cause: An attempt was made to add an invalid node-type to a parent node.

Action: Correct the code.

LPX-00007: unexpected end-of-file encountered

Cause: The document ended unexpectedly, perhaps due to truncation.

Action: Verify that the document is complete.

LPX-00008: invalid memory callback

Cause: The memory callback structure passed to xmlinit was missing the allocate or free functions (or both).

Action: Provide both functions in the callback structure.

LPX-00011: In line ~1u of ~2s [general entity ~3S]:

Cause: Error message prefixes, not errors themselves. These are the possible banner messages which appear before an XML error to describe the position (line#) and source (buffer or URI) in which the error occurred, as well as the entity's name (if the source is an entity). Parameter entity banner must be at +1 to non-entity banner, general entity at +2 (see lpxerr.c).

Action: No action required. This is not an error message.

LPX-00012: Unicode data alignment error

Cause: An input Unicode (UCS2) datum was not aligned properly.

Action: UCS2 data consists of an array of shorts (ub2) which must be aligned on an even-byte boundary.

LPX-00013: wrong node type

Cause: The wrong node type was given as argument to a DOM call.

Action: Review the failing function call, consult the documentation, and make sure the node types passed as correct.

LPX-00014: context is not clean

Cause: An operation was performed on a context that has already been used (so is not "clean").

Action: Some functions must be performed on a newly initialized context before being used for parsing. For example, setting a shared DTD. Change the code and do the call before parsing.

LPX-00017: ~1snodeName: <~2S>

Cause: More error message boilerplate.

Action: No action required. This is not an error message.

LPX-00018: internal error "nested open strings"

Cause: An internal error has occurred.

Action: Contact Oracle Support Services and report the error.

LPX-00019: property "~s" unknown

Cause: An unexpected error has occurred in a subsystem used by XML. Subcode is the error code returned by that failing subsystem.

Action: Contact Oracle Support Services and report the error and subcode.

LPX-00050: initialization error: NLS mismatch

Cause: A language ID was specified without the matching global area.

Action: Internal error, contact Oracle Support Services and report the error.

LPX-00051: NLS initialization failed

Cause: The NLS (National Language Support) package initialization failed.

Action: Internal error, contact Oracle Support Services and report the error.

LPX-00052: LEH initialization failed

Cause: The LEH (Library Exception Handling) package initialization failed.

Action: Internal error, contact Oracle Support Services and report the error.

LPX-00053: LML initialization failed

Cause: The LML (Low-Level Memory manager) package initialization failed.

Action: Internal error, contact Oracle Support Services and report the error.

LPX-00054: LPU initialization failed, error ~u

Cause: The LPU (URL Parser/Loader) package initialization failed.

Action: Internal error, contact Oracle Support Services and report the error.

LPX-00100: root element "~1S" does not match DTD root "~2S"

Cause: Validity Constraint 2.8 failed: "The Name in the document type declaration must match the element type of the root element." *Example: <?xml version="1.0"?><!DOCTYPE greeting [<!ELEMENT greeting (#PCDATA)>]> *salutation*Hello!/*salutation* *Explanation: The document's root element, *salutation*, does not match the root element declared in the DTD (*greeting*).

Action: Correct the document.

LPX-00101: parameter-entity markup cannot be split up

Cause: Validity Constraint 2.8 failed: "Parameter-entity replacement text must be properly nested with markup declarations." *Example: <?xml version="1.0"?><!DOCTYPE greeting [<!ENTITY % e "<!ELEMENT "> %e; greeting (#PCDATA)>]> *greeting*Hello!/*greeting* *Explanation: The parameter entity 'e' contains markup which may not be split up; the entire ELEMENT (or ATTLIST or ENTITY) definition must be present in one piece.

Action: Correct the document.

LPX-00102: standalone document declaration should be "no"

Cause: Validity Constraint 2.9 failed: "Standalone document declaration must have the value 'no' if any external markup declarations contain declarations of: * attributes with default values - or - * entities - or - * attributes with values subject to normalization - or - * element types with element content"

Action: Correct the document.

LPX-00103: document structure does not match DTD

Cause: Validity Constraint 3 failed: "An element is valid if there is a declaration matching elementdecl where the Name matches the element type, and one of the following holds: * The declaration matches EMPTY and the element has no content * The declaration matches children and the sequence of child elements belongs to the language generated by the regular expression in the content model, with optional white space (characters matching the nonterminal S) between each pair of child elements. * The declaration matches Mixed and the content consists of character data and child elements whose types match names in the content model. * The declaration matches ANY, and the types of any child elements have been declared."

Action: Correct the document.

LPX-00104: element "~S" is not declared in the DTD

Cause: Validity Constraint 3 failed: The named element has no matching elementdecl in the DTD

Action: Correct the document.

LPX-00105: element "~S" is not empty as required by the DTD

Cause: Validity Constraint 3 failed: The named element is declared as EMPTY in the DTD but contains sub-elements in the document.

Action: Correct the document.

LPX-00106: attribute "~1S" of element "~2S" is undefined

Cause: Validity Constraint 3.1 failed:

Action: Correct the document.

LPX-00107: element "~S" has multiple declarations

Cause: Validity Constraint 3.2 failed: "No element type may be declared more than once."

Action: Correct the DTD.

LPX-00108: parameter-entity parenthetical cannot be split up

Cause: Validity Constraint 3.2.1 failed: "Parameter-entity replacement text must be properly nested with parenthesized groups. For interoperability, if a parameter-entity reference appears in a choice, seq, or Mixed construct, its replacement text should not be empty, and neither the first nor last non-blank character of the replacement text should be a connector (| or ,). *Example: <?xml version="1.0"?> <!DOCTYPE foo [<!ELEMENT greeting (#PCDATA)> <!ENTITY % e "(#PCDATA | "> <!ELEMENT foo %e; greeting)>]> *greeting*Hello!*greeting* *Explanation: The parenthetical content of the 'e' entity may not be split up into sections: both open and close parentheses must be in the same declaration.

Action: Correct the DTD.

LPX-00109: duplicate name "~S" in mixed-content declaration

Cause: Validity Constraint 3.2.2 failed: "The same name must not appear more than once in a single mixed-content declaration." *Example: <!ELEMENT p (#PCDATA | a | b | c | d | a)> *Explanation: 'a' occurs more than once in the mixed-content declaration.

Action: Correct the DTD.

LPX-00110: invalid ~1s "~2S" (not a Name)

Cause: Validity Constraint 3.3.1 failed: Given thing is not a Name

Action: Correct the document.

LPX-00111: invalid ~1s "~2S" (not a Nmtoken)

Cause: Validity Constraint 3.3.1 failed: Given thing is not a Nmtoken

Action: Correct the document.

LPX-00112: element "~S" has multiple ID attributes

Cause: Validity Constraint 3.3.1 failed: "No element type may have more than one ID attribute specified."

Action: Correct the document.

LPX-00113: element "~1S" ID attribute "~2S" must be #IMPLIED or #REQUIRED

Cause: Validity Constraint 3.3.1 failed: "An ID attribute must have a declared default of #IMPLIED or #REQUIRED."

Action: Correct the document.

LPX-00114: element "~1S" attribute "~2S" has invalid enumeration value "~3S"

Cause: Validity Constraint 3.3.1 failed: "Values of this type must match one of the Nmtoken tokens in the declaration."

Action: Correct the document.

LPX-00115: element "~1S" is missing required attribute "~2S"

Cause: Validity Constraint 3.3.2 failed: "If the default declaration is the keyword #REQUIRED, then the attribute must be specified for all elements of the type in the attribute-list declaration."

Action: Correct the document.

LPX-00116: element "~1S" attribute "~2S" has invalid value "~3S", must be "~4S"

Cause: Validity Constraint 3.3.2 failed: "If an attribute has a default value declared with the #FIXED keyword, instances of that attribute must match the default value."

Action: Correct the document.

LPX-00118: undefined entity "~S"

Cause: Validity Constraint 4.1 failed: "In a document with an external subset or external parameter entities with "standalone='no'", the Name given in the entity reference must match that in an entity declaration."

Action: Correct the document.

LPX-00119: element "~1S" attribute "~2S" must be an unparsed entity

Cause: The attribute value must be an unparsed entity.

Action: Correct the document.

LPX-00120: entity "~1S" NDATA (notation) "~2S" is undefined

Cause: Entity's NDATA (notation) is undefined

Action: Correct the document.

LPX-00121: undefined notation "~S"

Cause: Notation is not known.

Action: Correct the document.

LPX-00122: undefined ID "~S" in IDREF

Cause: Validity Constraint 3.3.1 failed: "A name must not appear more than once in an XML document as a value of this type; i.e., ID values must uniquely identify the elements which bear them."

Action: Correct the document.

LPX-00123: duplicate ID "~S"

Cause: An ID was used twice, they must be unique.

Action: Correct the document.

LPX-00124: attribute value should be one or more tokens

Cause: An attribute with tokenized type (IDREFS, ENTITIES, NMTOKENS) did not contain any tokens.

Action: Value must contain one or more tokens, separated by spaces.

LPX-00125: duplicate entity "~S" (ignored)

Cause: Warning returned by XmlDocumentGetDecl when original document did not contain an XMLDecl

Action: This is a warning, not an error. The value XMLERR_NO_DECL is used by the programmer to detect whether a document had an XMLDecl or not. It does not indicate a problem.

LPX-00200: could not convert from encoding ~1s to ~2s

Cause: The conversion cannot be made between the specified encodings.

Action: Choose a data encoding which can represent all expected input encoding (such as a Unicode-based encoding, UTF-8 or UTF-16).

LPX-00201: unknown encoding "~s"

Cause: The specified encoding was not known. It should be an IANA or Oracle encoding name.

Action: Use an appropriate encoding.

LPX-00202: could not open "~s" (error ~u)

Cause: The named input (file, URL, etc) does not exist.

Action: Make sure the named input is available and can be opened.

LPX-00203: could not read from "~s" (error ~u)

Cause: Data could not be read from the named input.

Action: Take appropriate action to allow data to be read.

LPX-00204: syntax error

Cause: A syntax error was found.

Action: Check the XML document line and correct it.

LPX-00205: expected "<!--" at the start of comment

Cause: Bad syntax detected when processing a comment.

Action: Fix the comment syntax.

LPX-00206: invalid CDATA section

Cause: Bad syntax detected when processing CDATA. Proper format is '<![CDATA[data]]>'.
Action: Correct the CDATA syntax.

LPX-00207: expected "[" at the start of conditional section

Cause: Bad syntax detected when processing a conditional section.

Action: Fix the conditional section syntax.

LPX-00208: unknown DTD keyword "~s"

Cause: An unknown keyword was found in the DTD.

Action: Use a proper keyword.

LPX-00209: PI names starting with XML are reserved

Cause: Processing instruction starting with XML was found.

Action: Use another name for the processing instruction.

LPX-00210: expected '~1c' instead of '~2c'

Cause: A syntax error was detected.

Action: Use proper syntax.

LPX-00211: attribute default must be REQUIRED, IMPLIED, or FIXED

Cause: Attribute default was invalid.

Action: Default must be REQUIRED, IMPLIED, or FIXED.

LPX-00212: comment must not contain "--"

Cause: A syntax error was detected in the comment.

Action: Use '--' only when specifying the end of the comment.

LPX-00213: comment did not end in "-->"

Cause: A syntax error was detected in the comment.

Action: Be sure to end the comment with '-->'.

LPX-00214: CDATA section did not end in "]]>"

Cause: A syntax error was detected in the CDATA section.

Action: Be sure to end the CDATA section with ']]>'.

LPX-00215: processing instruction did not end in "?>"

Cause: A syntax error was detected in the PI section.

Action: Be sure to end the PI with '?>'.

LPX-00216: invalid character ~1u (~2X)

Cause: An invalid multibyte character was found.

Action: Use only characters allowed by the XML specification.

LPX-00217: invalid character ~1u (~2x)

Cause: An invalid Unicode character was found.

Action: Use only characters allowed by the XML specification.

LPX-00218: invalid character ~1u ('~2c')

Cause: An invalid native (ASCII/EBCDIC) character was found.

Action: Use only characters allowed by the XML specification.

LPX-00219: invalid digit '~c' in character reference

Cause: An invalid digit was found in a character reference.

Action: Character references are either &#DDD; where D's are decimal digits, or &#xHHH; where H's are hexadecimal digits.

LPX-00220: the string "]]>" cannot occur in character data

Cause: Found ']]>' in character data.

Action: Do not use ']]>' in character data.

LPX-00221: the character "<" cannot occur in attribute values

Cause: Found '<' in an attribute value.

Action: Do not use '<' in attribute values.

LPX-00222: error received from SAX callback function

Cause: An error was received from the SAX callback function.

Action: Examine the additional error messages and take corrective action.

LPX-00223: external entity "~s" found in an attribute value

Cause: An external entity reference was found in an attribute value.

Action: Use only references to internal or character entities in attribute values.

LPX-00224: multiple occurrences of attribute "~S" found

Cause: An attribute occurred multiple times in the same start-tag or empty-element tag.

Action: Make sure that the attributes are unique.

LPX-00225: end-element tag "~1S" does not match start-element tag "~2S"

Cause: An element tag was not ended properly.

Action: Make sure that the correct end element tag is used.

LPX-00226: entity "~S" is not declared

Cause: An entity is not declared.

Action: Declare the entity before referencing it.

LPX-00227: entity "~S" is not a parsed entity

Cause: An entity reference contained the name of an unparsed entity.

Action: Only reference parsed entities.

LPX-00228: entity reference "~S" refers to itself

Cause: An entity reference contains a recursive reference to itself.

Action: Modify the contents of the entity reference to remove this recursion.

LPX-00229: input source is empty

Cause: An XML input file has no contents.

Action: The XML file representing a document must contain at least one element.

LPX-00230: invalid character ~1u (~2x) found in a Name or Nmtoken

Cause: An invalid character was found in a NAME or NMTOKEN.

Action: Use only the characters allowed for NAMES and NMTOKENS by the XML specification.

LPX-00231: invalid character ~1u (~2c') found in a Name or Nmtoken

Cause: An invalid character was found in a NAME or NMTOKEN.

Action: Use only the characters allowed for NAMES and NMTOKENS by the XML specification.

LPX-00232: invalid use of a parameter entity reference

Cause: A parameter entity reference was found in an improper location in the internal DTD subset.

Action: Use a parameter entity reference only where markup declarations can occur in the internal DTD subset, in the external DTD subset, or in an external entity.

LPX-00233: namespace prefixes starting with "xml" are reserved

Cause: Namespace prefix starting with XML was found.

Action: Use another name for the namespace prefix.

LPX-00234: namespace prefix "~S" is not declared

Cause: Namespace prefix is not declared.

Action: Declare the prefix in an attribute list.

LPX-00235: invalid XML version, must be 1.0 or 1.1

Cause: An invalid XML version was specified. Only version 1.0 of the XML specification is supported. Version 1.1 may be specified but will be treated as version 1.0.

Action: Use the 1.0 or 1.1 specification and set the version number accordingly.

LPX-00236: invalid character ~1u (~2c') found in public identifier

Cause: An invalid character was found in a public identifier.

Action: Use only the characters allowed for public identifiers by the XML specification.

LPX-00237: invalid condition section keyword, must be INCLUDE or IGNORE

Cause: A conditional section <![keyword [markup]]> had invalid keyword, must be either "IGNORE" or "INCLUDE"

Action: Correct condition section usage in document.

LPX-00238: unterminated conditional section

Cause: A conditional section was not properly terminated with]>.

Action: Verify conditional nesting in document and correct.

LPX-00239: invalid attribute type "~s"

Cause: The attribute type is not valid. Options are CDATA, ID, IDREF, IDREFS, ENTITY, ENTITIES, NMTOKEN, or NMTOKENS.

Action: Check and correct attribute declaration.

LPX-00240: element-start tag is not well formed

Cause: A start-element tag was improperly formed.

Action: Check and correct the start-element syntax.

LPX-00241: entity reference is not well formed

Cause: An entity reference (general or parameter) was not formed properly.

Action: Form entity reference correctly as "&name;" or "%name;".

LPX-00242: invalid use of ampersand ('&') character (use &)

Cause: The ampersand character is used only to start entity or character references.

Action: To include an ampersand character as data, use the built-in & general entity.

LPX-00243: element attribute value must be enclosed in quotes

Cause: An attribute defined in an element's start-tag must be enclosed in single (") or double (") quotes.

Action: Enclose the attribute value in quotes.

LPX-00244: invalid use of less-than ('<') character (use <)

Cause: The less-than character ('<') is not permitted as data.

Action: Use the built-in entity < instead. Check for mismatched quotes (") in case the '<' is part of subsequent markup.

LPX-00245: extra data after end of document

Cause: After the close of the top-level element, more data was found.

Action: The end-element tag for the top-level element must be the last thing in the document.

LPX-00246: missing system ID after public ID

Cause: In an external ID declaration, the public ID literal was not followed by the system ID literal as required.

Action: Provide with public **and** system IDs for 'PUBLIC' type.

LPX-00247: invalid Document Type Declaration (DTD)

Cause: Problems were encountered in the DTD declaration.

Action: Review the DTD and correct the problems.

LPX-00248: invalid entity declaration

Cause: Problems were encountered parsing an entity declaration.

Action: Check and correct the declaration syntax.

LPX-00249: invalid external ID declaration

Cause: Problems were encountered parsing an external ID declaration.

Action: Check and correct the declaration syntax.

LPX-00250: invalid attribute declaration

Cause: Problems were encountered parsing an attribute declaration.

Action: Check and correct the declaration syntax.

LPX-00251: conditional sections are valid only in external DTDs

Cause: A condition section is not permitted in internal DTDs.

Action: Remove the condition section.

LPX-00252: invalid entity replacement-text nesting

Cause: Markup included from an entity must nest/group properly. That is, open/close markup must occur within the same entity. For example, `<!DOCTYPE doc [<!ENTITY e "/foofoo">]> docfoo&e;/foo/doc` Is invalid since foo's start-tag occurs in the top-level document, but the close-tag is provided by the "e" entity. Both start and end must be provided by the same source.

Action: Examples, such as the ones above, are not permitted.

LPX-00253: missing required version number in XML declaration

Cause: An XML declaration was missing the required version#.

Action: Always provide a version#, which must come first in the declaration. XML is case sensitive, so only "version" (not "Version", and so on) is valid.

LPX-00254: invalid XML declaration

Cause: Problems were encountered parsing an XML declaration.

Action: Check and correct the declaration syntax.

LPX-00255: XML standalone declaration must be "yes" or "no"

Cause: The "standalone" parameter in the XML declaration had an invalid value.

Action: standalone must be set to either "yes" or "no". Case is sensitive, so "Yes", "YES", and so on, are invalid.

LPX-00256: invalid element declaration

Cause: Problems were encountered parsing an element declaration.

Action: Check and correct the declaration.

LPX-00257: invalid children specification in element declaration

Cause: The 'children' specification in an element declaration was invalid.

Action: Check and correct the declaration.

LPX-00258: invalid "Mixed" specification in element declaration

Cause: The 'Mixed' specification in an element declaration was invalid.

Action: Check and correct the declaration.

LPX-00259: invalid notation declaration

Cause: Problems were encountered parsing a notation declaration.

Action: Check and correct the declaration syntax.

LPX-00260: invalid xml:space attribute declaration

Cause: The xml:space attribute must be declared as an enumeration with choices "default" and "preserve". For example, <!ATTLIST foo xml:space (default | preserve) 'preserve').

Action: Declare the special attribute as above.

LPX-00261: invalid URL ~s

Cause: The specified URL was invalid and could not be parsed.

Action: Correct the URL; consult RFC-2396.

LPX-00262: unsupported protocol ~s

Cause: An URL was encountered which requested a protocol not supported by the XML parser. Only HTTP and file are currently allowed.

Action: Make the data available through the filesystem or HTTP.

LPX-00263: couldn't connect to host ~s port ~d

Cause: A TCP connection couldn't be opened to the named host.

Action: Verify the hostname and connectivity to the host.

LPX-00264: send failed to host ~s

Cause: An error occurred trying to send data over a TCP connection.

Action: Verify network connectivity, and so on.

LPX-00265: read failed from to host ~s

Cause: An error occurred trying to read data from a TCP connection.

Action: Verify network connectivity, and so on.

LPX-00266: invalid language specification ~s

Cause: The given language specification was invalid.

Action: Language specification has the format *language_territory.character set*. For example, "French_France".

LPX-00267: could not resolve relative URL ~s

Cause: The named relative URL couldn't be resolved against its parent.

Action: Make sure the relative makes sense in relation to its parent URL; see RFC-2396 sections 4, 5, and appendix C.

LPX-00268: invalid access method ~1d, must be 0 to ~2d

Cause: The provided access code was not in the valid range.

Action: The code should be one of the XMLACCESS_XXX codes defined in oraxml.h, in the range shown in the error message.

LPX-00269: all three access functions (open/close/read) must be provided

Cause: An attempt was made to set the access method callbacks, but all three functions were not provided.

Action: All three callback functions (open, close, and read) are required. They must all be provided, even if they are stub functions which do nothing.

LPX-00270: FTP error: ~s

Cause: An error was returned from the FTP server while trying to retrieve a file. See the specific message for details.

Action: Corrective action depends on the error.

LPX-00271: FTP login failed: ~s

Cause: The username/password combination was invalid for FTP login.

Action: Specify a valid pair.

LPX-00272: FTP server unavailable: ~s

Cause: The FTP server is unavailable for use.

Action: No action is possible from the client side. See server's error message.

LPX-00273: failed to initialize TCP/IP

Cause: The TCP/IP package could not be initialized.

Action: Check with system administrator to see if this is a configuration problem or a connectivity problem.

LPX-00274: can't import node type

Cause: Some node types (DOCUMENT_NODE & DOCUMENT_TYPE_NODE) cannot be imported with importNode().

Action: No action required.

LPX-00275: can't set output/data encoding AFTER parsing

Cause: Output/data encoding must be set after initialization but BEFORE any parsing has taken place.

Action: Set encoding before parsing any documents.

LPX-00276: bad HTTP/Mime header

Cause: An HTTP reply contained an invalid Mime header.

Action: Verify HTTP reply for accuracy. See RFC 2616.

LPX-00277: no closing quote was seen

Cause: A quoted string was started but not finished.

Action: Put a closing quote in the proper location.

LPX-00278: invalid ~s proxy "~s"

Cause: The proxy specification for the given protocol was invalid.

Action: Check and correct the proxy specification. For HTTP, this is the environment variable "http_proxy".

LPX-00279: invalid no_proxy "~s"

Cause: The no_proxy specification was invalid.

Action: Check and correct it. no_proxy is a comma- or space-separated list of machine or domain names, with an optional port part. If no port part is present, then it applies to all ports on that domain.

LPX-00280: HTTP error ~s

Cause: An HTTP protocol error occurred.

Action: Corrective action depends on the error..

LPX-00281: unsupported encoding "~s"

Cause: The specified encoding is known but not supported by the parser.

Action: Try a different encoding.

LPX-00282: document cannot have both internal/external and shared DTDs

Cause: A parser context which had a shared DTD set was used to parse a document which also contained a DTD. You cannot use both a shared DTD and an internal/external one.

Action: If a shared DTD is to be used, then the documents parsed must not contain or reference a DTD.

LPX-00283: document encoding is ~s-based but default input encoding is not

Cause: The input document was detected to be ASCII (or EBCDIC) based, but no encoding was specified in the XMLDecl and the default input coding was not ASCII (or EBCDIC) based, so could not be applied.

Action: Add an explicit encoding specification to the XMLDecl so the default input encoding is not needed, or pick a default encoding which matches the input document.

LPX-00284: namespace prefix to NULL URI is not allowed

Cause: An element's namespace prefix declarations was for a NULL URI, e.g. <foo xmlns:bar="" /> This is illegal presently in XML 1.0, but will be legal in XML 1.1

Action: Remove erroneous prefix definition.

LPX-00285: invalid Unicode surrogate ~X ~X

Cause: A Unicode document contained an invalid surrogate. If the first (high) surrogate is in the correct range 0xD800 to 0xDBFF, then the second (low) surrogate must be in the range 0xDC00 to 0xDFFF.

Action: Correct the document.

LPX-00286: Exceeded max depth for recursion

Cause: The depth of embedded elements in the document exceeded the limit of 2000.

Action: Correct the document.

LPX-00287: Max limit of ~1d exceeded for ~s

Cause: Max limit exceeded

Action: Correct the document.

LPX-00288: CDATA-section-close delimiter is prohibited in element content

Cause: Element content contained CDATA-section-close delimiter.

Action: Correct the document.

LPX-00289: invalid redefinition of xmlns URI

Cause: The XML namespace Uniform Resource Identifier 'http://www.w3.org/2000/xmlns/' must not be assigned a prefix.

Action: Correct the document.

LPX-00290: invalid use of xmlns as a prefix

Cause: The prefix 'xmlns' was reserved and could not be used as a prefix.

Action: Correct the document.

LPX-00300: no name in attribute set

Cause: The name attribute was not found in the attribute-set element.

Action: Add a name attribute for this element.

LPX-00301: error in XPATH evaluation

Cause: The XPATH evaluation returns an error.

Action: Check specified XPATH expression to determine the error.

LPX-00302: Incorrect stylesheet. The node is not valid.

Cause: The child node is of invalid type or has invalid name for this particular location in stylesheet, rendering the stylesheet as invalid XSLT.

Action: Fix the stylesheet by using valid nodes only.

LPX-00303: attribute value "~S" not expected for ~S

Cause: Attribute is found but its value is not the expected value.

Action: Set the attribute value to the correct value.

LPX-00304: input parameter to function is null

Cause: An input parameter passed into this function is null when it is not supposed to.

Action: Make sure the caller function is not passing null for this parameter.

LPX-00305: missing token

Cause: An expected token is not found.

Action: Check the input string to make sure the expected token is present.

LPX-00306: input string ended with no corresponding closing '}'

Cause: A closing '}' is expected.

Action: Add the closing '}' to the input string or remove the extra opening '{'.

LPX-00307: namespace prefix ~S used but not declared

Cause: Namespace prefix is used but not declared.

Action: Either declare the namespace or don't use this namespace prefix.

LPX-00308: attribute ~S not found in ~S

Cause: The expected attribute for this node is not found.

Action: Need to add this attribute to the node.

LPX-00309: cannot initialize XPATH

Cause: XPATH context could not be initialized.

Action: Check the initialization function LpxsutInitXPathCtx().

LPX-00310: element ~S not found in ~S

Cause: The expected element is not found.

Action: Check the initialization function LpxsutInitXPathCtx().

LPX-00311: unsupported feature: ~s

Cause: This feature is not supported.

Action: Do not use this feature.

LPX-00312: cannot construct XML PI with content: ~S

Cause: The content of XML PI node might be invalid.

Action: Make necessary changes to make the node valid according to spec.

LPX-00313: cannot construct XML comment with content: ~S

Cause: The content of XML comment node might be invalid.

Action: Make necessary changes to make the node valid according to spec.

LPX-00314: an internal failure occurred

Cause: An internal error occurred in the code.

Action: Contact appropriate developer.

LPX-00315: extension function ~S not supported

Cause: This extension function is not supported.

Action: Either contact appropriate developer for more information or don't use this extension function.

LPX-00316: invalid value ~S for ~S attribute ~S

Cause: The value for the specified attribute is invalid.

Action: Consult the XSL spec, use only legal values.

LPX-00317: undefined decimal-format "~S"

Cause: The named decimal-format is undefined (the name "#default" means the default format).

Action: Define the desired decimal-format before trying to use it.

LPX-00318: duplicate xsl:decimal-format "~S"

Cause: The named decimal-format was declared more than once.

Action: Make sure there is only a single declaration.

LPX-00319: The node specified is not valid

Cause: The node specified is not of expected type.

Action: Use only the nodes of legal type.

LPX-00320: No more attributes can be added to a non empty element

Cause: The element to which an attribute was being added is non empty and hence can not add anymore attributes to it.

Action: Modify the XSLT stylesheet so that all the attributes are added to an element before anything else is added to it. If you absolutely can not do that then select your output method to be DOM based rather than a stream or SAX based output which you are using presently.

LPX-00321: None of the output method (DOM, SAX, Stream) is selected

Cause: User is trying to process an XML file with out selecting any mechanism for output.

Action: User must select one of the output mechanisms (SAX/DOM/Stream) before attempting to process the XML file.

LPX-00322: A doc referred by XSLT stylesheet could not be opened : ~s

Cause: Either an import,include or document() function tried to open a document and failed.

Action: Make sure that document is present and can be opened.

LPX-00323: illegal apply-imports because of no current template: ~s

Cause: apply-imports was used even when there was no current template possibly with in for-each.

Action: Make sure that apply-imports are invoked only if there is a current template and it is not in a xsl:for-each.

LPX-00324: "~S" is not a valid value for the lang attribute of xsl:sort

Cause: An invalid language name was specified for sorting.

Action: Provide a valid value for the lang attribute of xsl:sort.

LPX-00327: unknown or undefined parameter for style sheet

Cause: A named parameter supplied to a style sheet did not match any parameters defined for the style sheet.

Action: This is a warning, not an error. Omit the parameter or use a correct name for the parameter.

LPX-00328: style sheet parameter was previously set

Cause: A style sheet parameter was previously set and already had a value; the value cannot be changed.

Action: This is a warning, not an error. The previous value will be used. Avoid setting the parameter multiple times.

LPX-00400: an internal error has occurred in XPATH

Cause: An internal error has occurred in XPATH.

Action: Contact the appropriate developer.

LPX-00401: invalid QName in the XSL file

Cause: An invalid QName was passed to the XPATH parser.

Action: See whether there are any invalid QNames in the XSL file.

LPX-00402: invalid axisname in the XSL file

Cause: An invalid axis name was passed to the XPATH parser.

Action: See whether all axis names in the XSL file are correct.

LPX-00403: unmatched quote in the XSL file

Cause: An unmatched quote was found in the XSL file.

Action: Check for unmatched quotes in the XSL file.

LPX-00404: unable to resolve namespace URI

Cause: The namespace URI may not be valid.

Action: Make sure that the name space URIs are valid.

LPX-00405: unable to allocate memory

Cause: May be out of memory.

Action: Try increasing virtual memory.

LPX-00406: object of incorrect type passed to the function

Cause: An object of incorrect type was passed to the XPATH/XSL function.

Action: Do the required conversion before passing in an object of type which is different from the expected type.

LPX-00407: right square bracket missing in the XSL file

Cause: Right square bracket missing in the XSL file.

Action: Check for unmatched square bracket in the XSL file.

LPX-00408: right parenthesis missing in the XSL file

Cause: Right parenthesis missing in the XSL file.

Action: Check for unmatched parenthesis in the XSL file.

LPX-00409: incorrect token encountered while parsing

Cause: An unexpected token encountered while parsing the expression/ pattern.

Action: Check the syntax of the expressions/patterns.

LPX-00410: unable to resolve the variable reference

Cause: Variable reference may not be valid.

Action: Check whether the variable references are valid.

LPX-00411: unknown function name encountered

Cause: The function is not supported at this time or the name is invalid.

Action: Check the function names. If valid and this error occurs, then avoid using them at this time.

LPX-00413: loss of precision due to excessively large numerical constant

Cause: The numerical constant in the XPath expression is too big.

Action: n/a

LPX-00601: Invalid token in: '~S'

Cause: Invalid token in XPath expression.

Action: Check the expression.

LPX-00602: Invalid child element '~1S' of element '~2S'.

Cause: Invalid child element in this stylesheet context.

Action: Check the stylesheet.

LPX-00603: Invalid attribute value '~1S': {element '~2S', attribute '~3S'}.

Cause: Invalid attribute value in this stylesheet context.

Action: Check the stylesheet.

LPX-00604: Invalid attribute value '~1S', for attribute '~2s'.

Cause: Invalid attribute value for this attribute.

Action: Check the stylesheet.

LPX-00605: Invalid attribute '~1S' in element '~2S'.

Cause: Invalid attribute for this element.

Action: Check the stylesheet.

LPX-00606: Missing attribute '~1s' in element '~2S'.

Cause: Missing attribute for this element.

Action: Check the stylesheet.

LPX-00607: Invalid reference: '~S'.

Cause: Invalid variable or parameter or template reference.

Action: Check the stylesheet.

LPX-00608: Repeated declaration of '~1S' in element '~2S'.

Cause: Only one declaration is allowed at this level.

Action: Check the stylesheet.

LPX-00609: Function call with invalid number of arguments in '~1S'.

Cause: Invalid number of arguments.

Action: Check the function signature.

LPX-00651: VM Stack overflow.

Cause: The XML data is too large.

Action: Increase the size of VM stacks in XmlXslVMCreate().

LPX-00652: SAX callback returns with error.

Cause: SAX callback returns an error.

Action: Check the callback function.

LPX-00653: Output attribute '~S' doesn't have a parent element.

Cause: Attribute is generated in a wrong context.

Action: Check the XSLT stylesheet.

LPX-00654: Output namespace attribute '~S' doesn't have a parent element.

Cause: Attribute generated in the wrong context.

Action: Check the XSLT stylesheet.

LPX-00655: Invalid output comment '~S'.

Cause: Invalid comment node.

Action: Check the XSLT stylesheet.

LPX-00656: XSLTVM terminate.

Cause: VM terminates.

Action: No action.

LPX-00657: Invalid output PI '~S'.

Cause: Invalid PI node.

Action: Check the XSLT stylesheet.

LPX-00658: Invalid XSLT object type.

Cause: Invalid object type in XPath evaluation.

Action: Check the XSLT stylesheet.

LPX-00659: Output write failed.

Cause: Write operation failed.

Action: Check the write method.

LPX-00660: Not a well-formed document or external entity.

Cause: The generated document is not well-formed.

Action: Check the XSLT stylesheet.

LPX-00661: Failed to load: '~s'.

Cause: Failed to load a document.

Action: Check the XSLT stylesheet.

LPX-00662: Invalid encoding.

Cause: Invalid encoding specified.

Action: Check the encoding string.

LPX-00663: VM String-Stack overflow.

Cause: The string data is too large.

Action: Increase the size of VM StringStack in XmlXslVMCreate().

LPX-00664: VM Node-Stack overflow.

Cause: Too many XML nodes.

Action: Increase the size of VM NodeStack in XmlXslVMCreate().

LPX-00690: Invalid argument.

Cause: Invalid or missing argument.

Action: Check the function signature.

LPX-00700: invalid SOAP context

Cause: The SOAP context passed to an XmlSoap function was invalid.

Action: Make sure the context passed is an xmlsoapctx and is still valid (has not been destroyed).

LPX-00701: invalid SOAP role

Cause: An invalid SOAP role was specified.

Action: Only xmlsoaprole enum values should be used (see xml.h).

LPX-00702: invalid SOAP connection binding

Cause: An invalid SOAP connection binding was specified.

Action: Only xmlsoapbind enum values should be used (see xml.h).

LPX-00703: SOAP POST failed

Cause: A SOAP message sent with an HTTP binding failed.

Action: See the returned HTTP error to determine the problem.

LPX-00704: elem has no mustUnderstand

Cause: Header block does not have a mustUnderstand attribute.

Action: This is legal, no action required.

LPX-00705: elem has no role

Cause: Header block does not have a role attribute.

Action: This is legal, no action required.

LPX-00706: message has no fault

Cause: Message body has no Fault child.

Action: This is legal, no action required.

LPX-00707: no Fault reason w/given language

Cause: Fault element does not have a reason with given language.

Action: This is legal, no action required.

LPX-00708: SOAP failed to make HTTP connection

Cause: SOAP failed to make an HTTP connection to the given URL.

Action: Possible cause is invalid URL or memory exhaustion.

LPX-00709: SOAP reply not valid XML

Cause: The reply to a SOAP call was not a valid XML document.

Action: Check the calling URL for validity; otherwise the problem is likely to be on the reply side.

LPX-00711: invalid SOAP version

Cause: The version string specified at SOAP creation time was invalid.

Action: Specify a valid version string, either '1.1' or '1.2'.

LPX-00712: failed to set HTTP header

Cause: Connection does not exist, or header is badly formed, or maximum number of headers is exceeded.

Action: Check that connection exists, header has ':', decrease number of headers.

LPX-00713: body has more than one fault

Cause: Message body has multiple Fault children.

Action: Most likely bug in the server.

LPX-00714: fault is not a single child

Cause: Message body has additional children besides Fault.

Action: Most likely bug in the server.

LPX-00715: badly formed fault element

Cause: Fault element does not have one of mandatory children or has children, which are not allowed.

Action: Most likely bug in the server.

LPX-00716: badly formed Text subelement

Cause: Mandatory text child is missing from the requested message subelement.

Action: Most likely bug in the server.

LPX-00717: badly formed Value subelement

Cause: Mandatory Value child of the Code child of the Fault badly formed or absent.

Action: Most likely bug in the server.

LPX-00718: message has no envelope

Cause: The message has no envelope element child.

Action: Most likely bug in the server.

LPX-00719: prefix too long

Cause: The maximum size of encoded namespace attribute name is 1022.

Action: Use shorter prefix.

LPX-00720: envelope has no header

Cause: The message envelope does not have header.

Action: This is legal, no action required

LPX-00721: envelope has no body

Cause: The message envelope does not have body.

Action: Most likely bug in the server.

LPX-00722: elem has no relay

Cause: Header block does not have a relay attribute.

Action: This is legal, no action required.

LPX-00723: no such element

Cause: The element with requested namespace name and local part does not exist.

Action: This is legal, no action required.

LPX-00750: arguments "~1s" to function "~2s" are null

Cause: Input arguments passed into this function are null when it is not supposed to.

Action: Make sure the caller function is not passing null for this parameter.

LPX-00751: arguments "~s" are exclusive

Cause: Input arguments passed into this function are exclusive. Specify only one of them.

Action: Specify only one of the exclusive arguments.

LPX-00752: invalid ~1s, must be ~2s

Cause: Invalid value was specified for attribute.

Action: Correct the value with one of the suggested values.

LPX-00753: invalid proxy "~s"

Cause: The proxy specification for the given protocol was invalid.

Action: Check and correct the proxy specification. For HTTP, this is the environment variable "http_proxy".

LPX-00754: invalid no_proxy "~s"

Cause: The no_proxy specification was invalid.

Action: Check and correct the specification. no_proxy is a comma- or space-separated list of machine or domain names, with an optional port part. If no port part is present, then it applies to all ports on that domain.

LPX-00755: missing required argument "~s"

Cause: A required argument was missing.

Action: Provide the missing argument to the function.

LPX-00756: Etags and tokens must be either all tagged or all untagged

Cause: The list of condition factors need to be either all tagged with absoluteURI's or all untagged with absoluteURI's.

Action: If all condition factors were applied to the resource receiving the request, make them all untagged. Otherwise, make them all tagged with appropriate resource's URI's.

LPX-00757: maximum XML document size (~s bytes) exceeded

Cause: The input XML document's size exceeded the limit set by "max_xml_size" attribute set in XmlDavCreate().

Action: Raise the value set for max_xml_size attribute in XmlDavCreate() if this does not create problems with security.

LPX-00758: user-provided callback returns null

Cause: Null was returned from user-provided callback function.

Action: Check error(s) encountered within the callback function.

LPX-00759: failed to initialize TCP/IP

Cause: The TCP/IP package could not be initialized.

Action: Check with your system administrator to see if this is a configuration problem or a connectivity problem.

LPX-00760: couldn't connect to host ~s port ~u

Cause: A TCP connection couldn't be opened to the named host.

Action: Verify the hostname and connectivity to the host.

LPX-00761: send failed to host ~s

Cause: An error occurred trying to send data over a TCP connection.

Action: Verify network connectivity.

LPX-00762: read failed from host ~s

Cause: An error occurred trying to read data from a TCP connection.

Action: Verify network connectivity.

LPX-00763: exceeded maximum TCP connections

Cause: The maximum allowable number of TCP connections were exceeded. This happens only if too many pending HTTP responses have not been properly ended or destroyed.

Action: End a pending response session or destroy response objects that have been processed.

LPX-00764: TCP connection was broken

Cause: Either the server terminated the TCP connection or the TCP connection is in a bad state.

Action: Analyze the error. After cleanup, retry the method.

LPX-00765: HTTP error ~s

Cause: An HTTP protocol error occurred.

Action: Corrective action depends on the error.

LPX-00766: unsupported transfer-coding values: ~s

Cause: Only "chunked" and "identity" transfer-coding values are supported.

Action: This is WebDAV implementation's shortfall. There is no workaround for this problem.

LPX-00767: not a text media type

Cause: A text media type was expected. But other media types were found.

Action: Since this data cannot be read as a text type, use another routine to read it.

LPX-00768: no entity body found

Cause: No entity body was found when it was read.

Action: Check the HTTP status code and headers to see why the entity body was not found.

LPX-00769: not xml media type

Cause: An XML media type was expected. But other media types were found.

Action: Since this data cannot be read as an XML type, use another routine to read it.

LPX-00770: missing lock token in lock refresh request

Cause: A LOCK request to refresh a lock had no lock token header specified.

Action: Use XmlDavUpdResDesc to set a lock token in the resource

LPX-00771: missing lock token in UNLOCK request

Cause: An UNLOCK request to remove a lock had no lock token header specified.

Action: Use XmlDavUpdResDesc to set a lock token in the resource

LPX-00772: wrong object type

Cause: The wrong object type was given as argument to a WebDAV call.

Action: Review the failing function call, consult the documentation, and make sure the object types pass as correct.

LPX-00773: protocol violation: ~s

Cause: The entity body sent by the server in Chunked Transfer Encoding violated protocol.

Action: Either this is an internal implementation error or a server implementation error. Users should file a bug against either the server's or the client's implementation.

LPX-00800: XQuery invalid token

Cause: Invalid XQuery query.

Action: Correct the query.

LPX-00801: XQuery syntax error at

Cause: Invalid XQuery query.

Action: Correct the query.

LPX-00802: Too many arguments

Cause: Invalid XQuery query.

Action: Correct the query.

LPX-00803: Too few arguments

Cause: Invalid XQuery query.

Action: Correct the query.

LPX-00804: Invalid token: '~S'

Cause: Invalid program.

Action: Correct the program.

LPX-00805: Syntax error at '~S'

Cause: Invalid program.

Action: Correct the program.

LPX-00806: Invalid token in the pattern

Cause: The program was invalid.

Action: Correct the program.

LPX-00807: Invalid range

Cause: The program was invalid.

Action: Correct the program.

LPX-00808: internal error, invalid OPCODE

Cause: An internal error has occurred.

Action: Contact Oracle Support Services and report the error.

LPX-00809: Invalid subexpression reference

Cause: The replacement string was invalid.

Action: Correct the replacement string.

LPX-00825: Can't compile the element:

Cause: XSLT Stylesheet can't be compiled to XQuery query.

Action: Correct the the stylesheet.

LPX-00826: Can't compile the attribute:

Cause: XSLT Stylesheet can't be compiled to XQuery query.

Action: Correct the the stylesheet.

LPX-00827: Namespace conflict for prefix:

Cause: XSLT Stylesheet can't be compiled to XQuery query.

Action: Correct the the stylesheet.

LPX-00903: Invalid flags specified for XmlDiff or XmlPatch

Cause: Invalid value supplied to flags parameter for XmlDiff or XmlPatch functions.

Action: Specify valid flags (see xmldf.h).

LPX-00904: Invalid inputs were supplied to XmlDiff or XmlPatch

Cause: Data could not be read from inputs to XmlDiff or XmlPatch functions.

Action: Specify valid inputs (see xmldf.h).

LPX-00910: The root nodes in input documents to XmlDiff did not match

Cause: The root nodes in input documents do not match.

Action: Make sure the root nodes have same qualified name in both input documents. XmlDiff can be called only if the root nodes are same in input documents.

LPX-00913: XmlPatch could not process the XML PI oracle-xmldiff

Cause: The diff document either did not specify the XML Processing Instruction "oracle-xmldiff" or did not specify all data required by XmlPatch. The PI should be the first child of the top-level xdiff element. This error is also thrown when the output-model is 'snapshot' and operations-in-docorder is 'false'.

Action: Specify the "oracle-xmldiff" PI correctly. See documentation for XmlPatch C function in xmldf.h.

LPX-00918: XmlPatch encountered an error in translating XPATH using XmlXVM

Cause: XmlPatch encountered an invalid XPATH in the diff document.

Action: If you handcoded the diff document, make sure all the XPATHs in the diff document are valid.

LPX-00950: JSON path processing error

Cause: The JavaScript Object Notation (JSON) path engine encountered a fatal condition.

Action: Contact Oracle Support Services and report the error.

LPX-01001: [XPST0001] Static context component '~S' has no value

Cause: It is a static error if analysis of an expression relies on some component of the static context that has not been assigned a value.

Action: n/a

LPX-01002: [XPDY0002] Dynamic context component '~S' has no value

Cause: It is a dynamic error if evaluation of an expression relies on some// part of the dynamic context that has not been assigned a value.

Action: n/a

LPX-01003: [XPST0003] Syntax error at '~s'

Cause: It is a static error if an expression is not a valid instance of the grammar defined in A.1 EBNF

Action: n/a

LPX-01004: [XPTY0004] Expression type does not match a required type

Cause: It is a type error if, during the static analysis phase, an expression is found to have a static type that is not appropriate for the context in which the expression occurs, or during the dynamic evaluation phase, the dynamic type of a value does not match a required type as specified by the matching rules in 2.5.4 SequenceType Matching.

Action: Check the expression type.

LPX-01005: [XPST0005] Invalid empty-sequence() expression

Cause: During the analysis phase, it is a static error if the static type assigned to an expression other than the expression () or data(()) is empty-sequence().

Action: n/a

LPX-01006: [XPTY0006]

Cause: Not currently used.

Action: n/a

LPX-01007: [XPTY0007]

Cause: Not currently used.

Action: n/a

LPX-01008: [XPST0008] Invalid reference

Cause: It is a static error if an expression refers to an element name, attribute name, schema type name, namespace prefix, or variable name that is not defined in the static context, except for an ElementName in an ElementTest or an AttributeName in an AttributeTest.

Action: n/a

LPX-01009: [XQST0009] Schema Import Feature not supported

Cause: An implementation that does not support the Schema Import Feature must raise a static error if a Prolog contains a schema import.

Action: n/a

LPX-01010: [XPST0010] Axis '~S' not supported

Cause: An implementation must raise a static error if it encounters a reference to an axis that it does not support.

Action: n/a

LPX-01012: [XQST0012] Invalid XML schema

Cause: It is a static error if the set of definitions contained in all schemas imported by a Prolog do not satisfy the conditions for schema validity specified in Sections 3 and 5 of [XMLSchema] Part 1 i.e., each definition must be valid, complete, and unique

Action: n/a

LPX-01013: [XQST0013] Invalid pragma content

Cause: It is a static error if an implementation recognizes a pragma but determines that its content is invalid.

Action: n/a

LPX-01014: [XPTY0014] Too many levels of nesting

Cause: An expression contained too many levels of nested parentheses.

Action: n/a

LPX-01015: [XQST0015]

Cause: Not currently used.

Action: n/a

LPX-01016: [XQST0016] Module Feature not supported

Cause: An implementation that does not support the Module Feature raises a static error if it encounters a module declaration or a module import.

Action: n/a

LPX-01017: [XPST0017] Invalid function call

Cause: It is a static error if the expanded QName and number of arguments in a function call do not match the name and arity of a function signature in the static context.

Action: n/a

LPX-01018: [XPTY0018] Path last step contains both nodes and atomic values

Cause: It is a type error if the result of the last step in a path expression contains both nodes and atomic values.

Action: n/a

LPX-01019: [XPTY0019] Path step contains atomic values

Cause: It is a type error if the result of a step (other than the last step) in a path expression contains an atomic value.

Action: n/a

LPX-01020: [XPTY0020] The path step context item is not a node

Cause: It is a type error if, in an axis step, the context item is not a node.

Action: n/a

LPX-01021: [XPDY0021]

Cause: Not currently used.

Action: n/a

LPX-01022: [XQST0022] The value of a namespace must be a URILiteral.

Cause: It is a static error if the value of a namespace declaration attribute is not a URILiteral.

Action: n/a

LPX-01023: [XPDY0023]

Cause: Not currently used.

Action: n/a

LPX-01024: [XQTY0024] Attribute node out of context

Cause: It is a type error if the content sequence in an element constructor contains an attribute node following a node that is not an attribute node.

Action: n/a

LPX-01025: [XQDY0025] Repeated attribute name

Cause: It is a dynamic error if any attribute of a constructed element does not have a name that is distinct from the names of all other attributes of the constructed element.

Action: n/a

LPX-01026: [XQDY0026] Processing instruction content contains '?>'

Cause: It is a dynamic error if the result of the content expression of a computed processing instruction constructor contains the string '?>'.
'?>'

Action: n/a

LPX-01027: [XQDY0027] Invalid PSVI validity property of the root element

Cause: In a validate expression, it is a dynamic error if the root element information item in the PSVI resulting from validation does not have the expected validity

property: valid if validation mode is strict, or either valid or notKnown if validation mode is lax.

Action: n/a

LPX-01028: [XQDY0028]

Cause: Not currently used

Action: n/a

LPX-01029: [XQDY0029]

Cause: Not currently used

Action: n/a

LPX-01030: [XQTY0030] Expression should evaluate to exactly one node

Cause: It is a type error if the argument of a validate expression does not evaluate to exactly one document or element node.

Action: n/a

LPX-01031: [XQST0031] Version not supported by the implementation

Cause: It is a static error if the version number specified in a version declaration is not supported by the implementation.

Action: n/a

LPX-01032: [XQST0032] Repeated base URI declaration

Cause: A static error is raised if a Prolog contains more than one base URI declaration.

Action: n/a

LPX-01033: [XQST0033] Multiple bindings for the namespace prefix '~s'

Cause: It is a static error if a module contains multiple bindings for the same namespace prefix.

Action: n/a

LPX-01034: [XQST0034] Repeated function declaration

Cause: It is a static error if multiple functions declared or imported by a module have the number of arguments and their expanded QNames are equal (as defined by the eq operator).

Action: n/a

LPX-01035: [XQST0035] Repeated schema components

Cause: It is a static error to import two schema components that both define the same name in the same symbol space and in the same scope.

Action: n/a

LPX-01036: [XQST0036] Importing module should import schema '~s'

Cause: It is a static error to import a module if the importing module's in-scope schema types do not include definitions for the schema type names that appear in the declarations of variables and functions (whether in an argument type or return type) that are present in the imported module and are referenced in the importing module.

Action: n/a

LPX-01037: [XQST0037]

Cause: Not currently used

Action: n/a

LPX-01038: [XQST0038] Invalid collation

Cause: It is a static error if a Prolog contains more than one default collation declaration, or the value specified by a default collation declaration is not present in statically known collations.

Action: n/a

LPX-01039: [XQST0039] Repeated parameter name

Cause: It is a static error for a function declaration to have more than one parameter with the same name.

Action: n/a

LPX-01040: [XQST0040] Repeated attribute name

Cause: It is a static error if the attributes specified by a direct element constructor do not have distinct expanded QNames.

Action: n/a

LPX-01041: [XQDY0041] Expression can't be cast to the type xs:NCName

Cause: It is a dynamic error if the value of the name expression in a computed processing instruction constructor cannot be cast to the type xs:NCName.

Action: n/a

LPX-01042: [XQST0042]

Cause: Not currently used.

Action: n/a

LPX-01043: [XQST0043]

Cause: Not currently used.

Action: n/a

LPX-01044: [XQDY0044] Invalid attribute namespace

Cause: It is a dynamic error if the node-name property of the node constructed by a computed attribute constructor is in the namespace <http://www.w3.org/2000/xmlns/> (corresponding to namespace prefix `xmlns`), or is in no namespace and has local name `xmlns`.

Action: n/a

LPX-01045: [XQST0045] Invalid function namespace

Cause: It is a static error if the function name in a function declaration is in one of the following namespaces: <http://www.w3.org/XML/1998/namespace>, <http://www.w3.org/2001/XMLSchema>, <http://www.w3.org/2001/XMLSchema-instance>, <http://www.w3.org/2005/xpath-functions>.

Action: n/a

LPX-01046: [XQST0046] Invalid URILiteral

Cause: An implementation MAY raise a static error if the value of a URILiteral is of nonzero length and is not in the lexical space of `xs:anyURI`.

Action: n/a

LPX-01047: [XQST0047] Repeated import module target namespace

Cause: It is a static error if multiple module imports in the same Prolog specify the same target namespace.

Action: n/a

LPX-01048: [XQST0048] Namespace should be as the module target namespace

Cause: It is a static error if a function or variable declared in a library module is not in the target namespace of the library module.

Action: n/a

LPX-01049: [XQST0049] Repeated variable declaration

Cause: It is a static error if two or more variables declared or imported by a module have equal expanded QNames (as defined by the eq operator.)

Action: n/a

LPX-01050: [XPDY0050] Invalid dynamic type

Cause: It is a dynamic error if the dynamic type of the operand of a treat expression does not match the sequence type specified by the treat expression. This error might also be raised by a path expression beginning with "/" or "/" if the context node is not in a tree that is rooted at a document node. This is because a leading "/" or "/" in a path expression is an abbreviation for an initial step that includes the clause treat as document-node().

Action: n/a

LPX-01051: [XPST0051] AtomicType not defined

Cause: It is a static error if a QName that is used as an AtomicType in a SequenceType is not defined in the in-scope schema types as an atomic type.

Action: n/a

LPX-01052: [XQDY0052]

Cause: Not currently used.

Action: n/a

LPX-01053: [XQDY0053]

Cause: Not currently used.

Action: n/a

LPX-01054: [XQST0054] The variable depends on itself

Cause: It is a static error if a variable depends on itself.

Action: n/a

LPX-01055: [XQST0055] Repeated copy-namespaces declaration

Cause: It is a static error if a Prolog contains more than one copy-namespaces declaration.

Action: n/a

LPX-01056: [XQST0056]

Cause: Not currently used.

Action: n/a

LPX-01057: [XQST0057] Missing schema import target namespace

Cause: It is a static error if a schema import binds a namespace prefix but does not specify a target namespace other than a zero-length string.

Action: n/a

LPX-01058: [XQST0058] Repeated schema import target namespace

Cause: It is a static error if multiple schema imports specify the same target namespace.

Action: n/a

LPX-01059: [XQST0059] Can't find schema or module with namespace '~s'

Cause: It is a static error if an implementation is unable to process a schema or module import by finding a schema or module with the specified target namespace.

Action: n/a

LPX-01060: [XQST0060] Function name should have a namespace

Cause: It is a static error if the name of a function in a function declaration is not in a namespace (expanded QName has a null namespace URI).

Action: n/a

LPX-01061: [XQDY0061] Invalid document node

Cause: It is a dynamic error if the operand of a validate expression is a document node whose children do not consist of exactly one element node and zero or more comment and processing instruction nodes, in any order.

Action: n/a

LPX-01062: [XQDY0062]

Cause: Not currently used.

Action: n/a

LPX-01063: [XQST0063]

Cause: Not currently used.

Action: n/a

LPX-01064: [XQDY0064] Processing instruction name contains 'XML'

Cause: It is a dynamic error if the value of the name expression in a computed processing instruction constructor is equal to "XML" (in any combination of upper and lower case).

Action: n/a

LPX-01065: [XQST0065] Repeated ordering mode declaration

Cause: A static error is raised if a Prolog contains more than one ordering mode declaration.

Action: n/a

LPX-01066: [XQST0066] Repeated default declaration

Cause: A static error is raised if a Prolog contains more than one default element/type namespace declaration, or more than one default function namespace declaration.

Action: n/a

LPX-01067: [XQST0067] Repeated construction declaration

Cause: A static error is raised if a Prolog contains more than one construction declaration.

Action: n/a

LPX-01068: [XQST0068] Repeated boundary-space declaration

Cause: A static error is raised if a Prolog contains more than one boundary-space declaration.

Action: n/a

LPX-01069: [XQST0069] Repeated empty order declaration

Cause: A static error is raised if a Prolog contains more than one empty order declaration.

Action: n/a

LPX-01070: [XQST0070] Invalid (prefix, URI) combination

Cause: A static error is raised if a namespace URI is bound to the predefined prefix xmlns, or if a namespace URI other than http://www.w3.org/XML/1998/namespace is bound to the prefix xml, or if the prefix xml is bound to a namespace URI other than http://www.w3.org/XML/1998/namespace.

Action: n/a

LPX-01071: [XQST0071] Repeated namespace attribute

Cause: A static error is raised if the namespace declaration attributes of a direct element constructor do not have distinct names.

Action: n/a

LPX-01072: [XQDY0072] Element content contains invalid hyphens combination

Cause: It is a dynamic error if the result of the content expression of a computed comment constructor contains two adjacent hyphens or ends with a hyphen.

Action: n/a

LPX-01073: [XQST0073] Cyclic import sequence

Cause: It is a static error if the graph of module imports contains a cycle (that is, if there exists a sequence of modules M1 ... Mn such that each Mi imports Mi+1 and Mn imports M1), unless all the modules in the cycle share a common namespace.

Action: n/a

LPX-01074: [XQDY0074] Invalid element or attribute QName

Cause: It is a dynamic error if the value of the name expression in a computed element or attribute constructor cannot be converted to an expanded QName (for example, because it contains a namespace prefix not found in statically known namespaces.)

Action: n/a

LPX-01075: [XQST0075] Validate expression not supported

Cause: An implementation that does not support the Validation Feature must raise a static error if it encounters a validate expression.

Action: n/a

LPX-01076: [XQST0076] Invalid collation

Cause: It is a static error if a collation subclause in an order by clause of a FLWOR expression does not identify a collation that is present in statically known collations.

Action: n/a

LPX-01077: [XQST0077]

Cause: Not currently used.

Action: n/a

LPX-01078: [XQST0078]

Cause: Not currently used.

Action: n/a

LPX-01079: [XQST0079] Invalid extension expression

Cause: It is a static error if an extension expression contains neither a pragma that is recognized by the implementation nor an expression enclosed in curly braces.

Action: n/a

LPX-01080: [XPST0080] Invalid target type

Cause: It is a static error if the target type of a cast or castable expression is xs:NOTATION or xs:anyAtomicType.

Action: n/a

LPX-01081: [XPST0081] Invalid prefix

Cause: It is a static error if a QName used in a query contains a namespace prefix that cannot be expanded into a namespace URI by using the statically known namespaces.

Action: n/a

LPX-01082: [XQST0082]

Cause: Not currently used.

Action: n/a

LPX-01083: [XQST0083]

Cause: Not currently used.

Action: n/a

LPX-01084: [XQDY0084] Missing top-level element declaration

Cause: It is a dynamic error if the element validated by a validate statement does not have a top-level element declaration in the in-scope element declarations, if validation mode is strict.

Action: n/a

LPX-01085: [XQST0085] The namespace URI shouldn't be a zero-length string

Cause: It is a static error if the namespace URI in a namespace declaration attribute is a zero-length string, and the implementation does not support [XML Names 1.1].

Action: n/a

LPX-01086: [XQTY0086] No-preserve mode conflict

Cause: It is a type error if the typed value of a copied element or attribute node is namespace-sensitive when construction mode is preserve and copy-namespaces mode is no-preserve.

Action: n/a

LPX-01087: [XQST0087] Invalid encoding

Cause: It is a static error if the encoding specified in a Version Declaration does not conform to the definition of EncName specified in [XML 1.0].

Action: n/a

LPX-01088: [XQST0088] Target namespace string shouldn't be of zero length

Cause: It is a static error if the literal that specifies the target namespace in a module import or a module declaration is of zero length.

Action: n/a

LPX-01089: [XQST0089] Repeated variable name

Cause: It is a static error if a variable bound in a for clause of a FLWOR expression, and its associated positional variable, do not have distinct names (expanded QNames).

Action: n/a

LPX-01090: [XQST0090] Invalid character reference

Cause: It is a static error if a character reference does not identify a valid character in the version of XML that is in use.

Action: n/a

LPX-01091: [XQDY0091] Invalid xml:id

Cause: An implementation MAY raise a dynamic error if an xml:id error, as defined in [XML ID], is encountered during construction of an attribute named xml:id.

Action: n/a

LPX-01092: [XQDY0092] Invalid xml:space value

Cause: An implementation MAY raise a dynamic error if a constructed attribute named xml:space has a value other than preserve or default.

Action: n/a

LPX-01093: [XQST0093] Module depends on itself

Cause: It is a static error to import a module M1 if there exists a sequence of modules M1 ... Mi ... M1 such that each module directly depends on the next module in the sequence (informally, if M1 depends on itself through some chain of module dependencies.)

Action: n/a

LPX-01094: [FORG0003] fn:zero-or-one called with a sequence containing more than one item

Cause: It is a dynamic error if fn:zero-or-one is called with a sequence containing more than one item

Action: n/a

LPX-01095: [FORG0004] fn:one-or-more called with a sequence containing no items

Cause: It is a dynamic error if fn:one-or-more is called with a sequence containing no items

Action: n/a

LPX-01096: [FORG0005] fn:exactly-one called with a sequence containing zero or more than one item

Cause: It is a dynamic error if fn:exactly-one is called with a sequence containing zero or more than one item

Action: n/a

LPX-01097: [FORG0006] Invalid argument type

Cause: It is a dynamic error if an XQuery F&O is called with wrong argument type.

Action: n/a

LPX-01098: [FOCA0002] Invalid lexical value

Cause: It is a dynamic error if an XQuery F&O is called with wrong argument value.

Action: n/a

LPX-01099: [FOCA0001] Input value too large for decimal

Cause: It is a dynamic error if the Input value too large for decimal

Action: n/a

LPX-01100: [FOCA0003] Input value too large for integer

Cause: It is a dynamic error if the Input value too large for integer

Action: n/a

LPX-01101: External Error '~s' occurs

Cause: An error occurred during the processing of the XQuery expression.

Action: Check the detailed error message for the possible causes.

LPX-01102: [FORG0008] both arguments to fn:dateTime have a specified timezone

Cause: It is an error to pass arguments to fn:dateTime having a specified timezone

Action: n/a

LPX-01105: [FOAR0001] Division by zero

Cause: It is an error to divide by zero

Action: n/a

LPX-01106: [FOAR0002] Numeric operation overflow/underflow

Cause: Numeric operations causes overflow/underflow

Action: n/a

LPX-01107: [FORG0002] invalid argument to fn:resolve-uri()

Cause: Wrong argument to fn:resolve-uri() function

Action: n/a

LPX-01108: [FORG0009] error in resolving a relative URI against a base URI in fn:resolve-uri()

Cause: Error resolving relative URI in fn:resolve-uri() function

Action: n/a

LPX-01109: [FOCA0005] NaN supplied as float/double value

Cause: NaN supplied as float/double value

Action: n/a

LPX-01110: [FOCA0006] String to be cast to decimal has too many digits of precision

Cause: String to be cast to decimal has too many digits of precision

Action: n/a

LPX-01111: [FOCH0002] Unsupported collation

Cause: Unsupported collation

Action: n/a

LPX-01112: [FOCH0003] Unsupported normalization form

Cause: Unsupported normalization form

Action: n/a

LPX-01113: [FOCH0004] Collation does not support collation units

Cause: Collation does not support collation units

Action: n/a

LPX-01114: [FODC0001] No context document

Cause: No context document

Action: n/a

LPX-01115: [FODC0002] Error retrieving resource

Cause: Error retrieving resource

Action: n/a

LPX-01116: [FODC0003]

Cause: Function stability not defined

Action: Function stability not defined

LPX-01117: [FODC0004] Invalid argument to fn:collection

Cause: Invalid argument to fn:collection

Action: n/a

LPX-01118: [FODC0005] Invalid argument to fn:doc or fn:doc-available

Cause: Invalid argument to fn:doc or fn:doc-available

Action: n/a

LPX-01119: [FODT0001] Overflow/underflow in date/time operation

Cause: Overflow/underflow in date/time operation

Action: n/a

LPX-01120: [FODT0002] Overflow/underflow in duration operation

Cause: Overflow/underflow in duration operation

Action: n/a

LPX-01121: [FODT0003] Invalid timezone value

Cause: Invalid timezone value

Action: n/a

LPX-01122: [FONS0005] Base-uri not defined in the static context

Cause: Base-uri not defined in the static context

Action: n/a

LPX-01123: [FORG0001] Invalid value for cast/constructor

Cause: Invalid value for cast/constructor

Action: n/a

LPX-01124: [FORX0001] Invalid regular expression flags

Cause: Invalid regular expression flags

Action: n/a

LPX-01125: [FORX0002] Invalid regular expression

Cause: Invalid regular expression

Action: n/a

LPX-01126: [FORX0003] Regular expression matches zero-length string

Cause: Regular expression matches zero-length string

Action: n/a

LPX-01127: [FORX0004] Invalid replacement string

Cause: Invalid replacement string

Action: n/a

LPX-01128: [FOTY0012] Argument node does not have a typed value

Cause: Argument node does not have a typed value

Action: n/a

LPX-01129: [XUST0001] Updating expression in a wrong position

Cause: It is a static error if an updating expression is used in any position other than one of the following: 1. The topmost expression in the body of a query. 2. The modify clause of a transform expression. 3. The return clause of a FLWOR expression. 4. The return clauses of a typeswitch expression in which every return clause contains an updating expression, an empty expression (), or a call to the fn:error function. 5. The then and else clauses of a conditional statement in which both the then and else clauses contain either an updating expression, an empty expression (), or a call to the fn:error function. 6. An operand of a comma expression in which each operand is either an updating expression, an empty expression (), or a call to the fn:error function. 7. The content of a parenthesized expression. 8. The body of a function declaration in which the keyword updating is specified.

Action: n/a

LPX-01130: [XUST0002] Non-updating expression in a wrong position

Cause: It is a static error if a non-updating expression other than an empty expression () or a call to the fn:error function is used in one of the following positions: 1. The modify clause of a transform expression. 2. The top-level expression in the body of a function declaration in which the keyword updating is specified.

Action: n/a

LPX-01131: [XUST0003] Repeated revalidation declaration

Cause: It is a static error if a Prolog contains more than one revalidation declaration.

Action: n/a

LPX-01132: [XUTY0004] Invalid attribute node in the insertion sequence

Cause: It is a type error if the insertion sequence of an insert expression contains an attribute node following a node that is not an attribute node.

Action: n/a

LPX-01133: [XUTY0005] Invalid target expression for 'insert'

Cause: In an insert expression where into, as first into, or as last into is specified, it is a type error if the target expression returns a non-empty result that does not consist of a single element or document node.

Action: n/a

LPX-01134: [XUTY0006] Invalid target expression for 'insert'

Cause: In an insert expression where before or after is specified, it is a type error if the target expression returns a non-empty result that does not consist of a single element, text, comment, or processing instruction node.

Action: n/a

LPX-01135: [XUTY0007] Invalid target expression for 'delete'

Cause: It is a type error if the target expression of a delete expression does not return a sequence of zero or more nodes.

Action: n/a

LPX-01136: [XUTY0008] Invalid target expression for 'replace'

Cause: In a replace expression, it is a type error if the target expression returns a non-empty result that does not consist of a single element, attribute, text, comment, or processing instruction node.

Action: n/a

LPX-01137: [XUDY0009] Invalid target expression for 'replace'

Cause: In a replace expression where value of is not specified, it is a dynamic error if the node returned by the target expression does not have a parent.

Action: n/a

LPX-01138: [XUTY0010] Invalid replacement sequence for 'replace'

Cause: In a replace expression where value of is not specified and the target is an element, text, comment, or processing instruction node, it is a type error if the replacement sequence does not consist of zero or more element, text, comment, or processing instruction nodes.

Action: n/a

LPX-01139: [XUTY0011] Invalid replacement sequence for 'replace'

Cause: In a replace expression where value of is not specified and the target is an attribute node, it is a type error if the replacement sequence does not consist of zero or more attribute nodes.

Action: n/a

LPX-01140: [XUTY0012] Invalid target expression for 'rename'

Cause: In a rename expression, it is a type error if the target expression returns a non-empty result that does not consist of a single element, attribute, or processing instruction node.

Action: n/a

LPX-01141: [XUTY0013] Invalid copy expression for transform

Cause: In a transform expression, it is a type error if a source expression in the copy clause does not return a single node.

Action: n/a

LPX-01142: [XUDY0014] Modified node was not created by the copy clause

Cause: In a transform expression, it is a dynamic error if the modify clause modifies any node that was not created by the copy clause.

Action: n/a

LPX-01143: [XUDY0015] Duplicate 'rename' for the same target node

Cause: It is a dynamic error if any node is the target of more than one rename expression within the same query.

Action: n/a

LPX-01144: [XUDY0016] Duplicate 'replace' for the same target node

Cause: It is a dynamic error if any node is the target of more than one replace expression (without value of being specified) within the same query.

Action: n/a

LPX-01145: [XUDY0017] Duplicate 'replace' for the same target node

Cause: It is a dynamic error if any node is the target of more than one replace value of expression within the same query.

Action: n/a

LPX-01146: [XUDY0018] External not updating function returns an updated value

Cause: It is a dynamic error if a function that was declared to be external but not updating returns a non-empty pending update list.

Action: n/a

LPX-01147: [XUDY0019] External updating function returns an invalid value

Cause: It is a dynamic error if a function that was declared to be both external and updating returns a non-empty data model instance.

Action: n/a

LPX-01148: [XUDY0020] Deleted node has no parent

Cause: An implementation may (but is not required to) raise a dynamic error if a node is deleted that had no parent before execution of the query began.

Action: n/a

LPX-01149: [XUDY0021] The result XDM instance violates XDM constraints

Cause: It is a dynamic error if the XDM instance that would result from applying all the updates in a query violates any constraint specified in [XQuery/XPath Data Model (XDM)]. In this case, none of the updates in the query are made effective.

Action: n/a

LPX-01150: [XUTY0022] Invalid attribute insertion into a document node

Cause: It is a type error if an insert expression specifies the insertion of an attribute node into a document node.

Action: n/a

LPX-01151: [XUDY0023] Updating expression introduces a namespace conflict

Cause: It is a dynamic error if an insert, replace, or rename expression affects an element node by introducing a new namespace binding that conflicts with one of its existing namespace bindings.

Action: n/a

LPX-01152: [XUDY0024] Updating expression introduces a namespace conflict

Cause: It is a dynamic error if the effect of a set of updating expressions is to introduce conflicting namespace bindings into an element node.

Action: n/a

LPX-01153: [XUDY0025] Invalid QName for processing instruction rename

Cause: It is a dynamic error if the target of a rename expression is a processing instruction node, and the new name expression returns a QName with a non-empty namespace prefix.

Action: n/a

LPX-01154: [XUST0026] Revalidation mode '~s' is not supported

Cause: It is a static error if a revalidation declaration in a Prolog specifies a revalidation mode that is not supported by the current implementation.

Action: n/a

LPX-01155: [XUDY0027] Invalid target expression

Cause: It is a dynamic error if the target expression of an insert, replace, or rename expression evaluates to an empty sequence.

Action: n/a

LPX-01156: [XUST0028] Updating function should not have a return type

Cause: It is a static error if a function declaration specifies both updating and a return type.

Action: n/a

LPX-01157: [XUDY0029] Insert expression target node doesn't have a parent

Cause: In an insert expression where before or after is specified, it is a dynamic error if node returned by the target expression does not have a parent.

Action: n/a

LPX-01158: [XUDY0030] Invalid insertion of an attribute node

Cause: It is a dynamic error if an insert expression specifies the insertion of an attribute node before or after a child of a document node.

Action: n/a

LPX-01159: [FOUP0001] Invalid 'fn:put' first operand

Cause: It is a dynamic error if the first operand of fn:put is not a node of a supported kind.

Action: n/a

LPX-01160: [FOUP0002] Invalid 'fn:put' second operand

Cause: It is a dynamic error if the second operand of fn:put is not a valid lexical representation of the xs:anyURI type.

Action: n/a

LRM-00100 to LRM-00123

LRM-00100: internal error [*number*]

Cause: An internal error has occurred.

Action: Contact Oracle Support Services and report the error.

LRM-00101: unknown parameter name '*string*'

Cause: The parameter name was misspelled.

Action: Spell the parameter name correctly.

LRM-00102: '*string*' is not in the legal range for '*string*'

Cause: The value of the parameter is not within the legal range.

Action: Refer to the manual for the allowable values for this parameter.

LRM-00103: '*string*' contains an illegal integer radix for '*string*'

Cause: An illegal integer radix specification was found.

Action: Only 'd', 'h', 'D', and 'H' may be used as radix specifications.

LRM-00104: '*string*' is not a legal integer for '*string*'

Cause: The value is not a valid integer.

Action: Specify only valid integers for this parameter.

LRM-00105: '*string*' is not a legal Boolean for '*string*'

Cause: The value is not a valid Boolean.

Action: Refer to the manual for allowable Boolean values.

LRM-00106: out of memory

Cause: The operating system has run out of memory.

Action: Take action to make more memory available to the program.

LRM-00107: parameter name abbreviation '*string*' is not unique

Cause: The given abbreviation was not unique.

Action: Use a longer abbreviation to make the parameter name unique.

LRM-00108: invalid positional parameter value '*string*'

Cause: An invalid positional parameter value has been entered.

Action: Remove the invalid positional parameter.

LRM-00109: could not open parameter file '*string*'

Cause: The parameter file does not exist.

Action: Create an appropriate parameter file.

LRM-00110: syntax error at '*string*'

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00111: no closing quote for value '*string*'

Cause: A quoted string was started but not finished.

Action: Put a closing quote in the proper location.

LRM-00112: multiple values not allowed for parameter '*string*'

Cause: An attempt was made to specify multiple values for a parameter which can take only one value.

Action: Do not specify more than one value for this parameter.

LRM-00113: error when processing file '*string*'

Cause: A problem occurred when processing this file.

Action: Examine the additional error messages and correct the problem.

LRM-00114: error when processing from command line

Cause: A problem occurred when processing the command line.

Action: Examine the additional error messages and correct the problem.

LRM-00115: error when processing an environment variable

Cause: A problem occurred when processing an environment variable.

Action: Examine the additional error messages and correct the problem.

LRM-00116: syntax error at '*string*' following '*string*'

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00117: syntax error at '*string*' at the start of input

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00118: syntax error at '*string*' at the end of input

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00119: unable to obtain a valid value for '*string*'

Cause: No valid value was obtained for this parameter.

Action: Rerun the application and enter a valid value.

LRM-00120: '*string*' is not a legal Oracle number for '*string*'

Cause: The value is not a valid Oracle number.

Action: Refer to the manual for allowable Oracle number values.

LRM-00121: '*string*' is not an allowable value for '*string*'

Cause: The value is not a legal value for this parameter.

Action: Refer to the manual for allowable values.

LRM-00122: value '*string*' for '*string*' must be between '*number*' and '*number*'

Cause: The value of the parameter is not within the legal range.

Action: Specify a value that is within the legal range.

LRM-00123: invalid character *number* found in the input file

Cause: A character that is invalid was found in the input file.

Action: Specify an input file that contains only valid characters.

LSX-00001 to LSX-00347

LSX-00001: NULL pointer

Cause: A NULL pointer was detected as an internal error condition.

Action: This is a programming error by the caller of the Schema processor. Contact someone who can fix the problem.

LSX-00002: root element is not *schema*

Cause: The top-level element of an XML Schema must be *schema*.

Action: Correct the Schema; consult the Schema specification.

LSX-00003: invalid attribute "~1S" for element "~2S"

Cause: The named Schema element had an invalid attribute.

Action: Correct the Schema; consult the Schema specification.

LSX-00004: unexpected XML node type

Cause: Schema contains an XML node other than element, text (or CDATA),

Action: Other node types are not permitted; remove them.

LSX-00008: feature "~s" is not implemented

Cause: An attempt was made to use a feature that is not yet implemented.

Action: Make an enhancement request for the feature.

LSX-00009: data missing for type "~S"

Cause: Data is missing for an element or attribute of a simple type.

Action: Add data in the element or attribute.

LSX-00010: extra element(s) at end of "~S"

Cause: Extra elements exist at the end of schema component declarations.

Action: Remove the extra elements.

LSX-00011: internal error: ~s\n

Cause: Implementation error.

Action: File a bug.

LSX-00013: element "~S" not from Schema of Schemas

Cause: Bogus element exists in the schema file. Its name is not from Schema of Schemas.

Action: Remove the bogus element.

LSX-00014: empty instance document

Cause: Instance document to be Schema validated was empty (no top-level element).

Action: Provide a complete XML instance document.

LSX-00015: failed to parse document

Cause: Failed to parse the schema document using the given URI.

Action: Provide the correct URI and make sure that the schema document is valid.

LSX-00016: schema and instance document have incompatible character sets

Cause: Parsed schema components were in a simple-type character set while the parsed instance document data was not. A simple-type character set is single-byte, not shift sensitive, and has no linguistic specials in use.

Action: Reinitialize the schema global context with appropriate parser context settings, i.e. pass a parser context with its output encoding set to be a multibyte or Unicode character set.

LSX-00018: invalid schema context

Cause: An invalid schema context was provided to the processor. Multiple schema documents were loaded and assembled into the schema context. At least one of them is not fully valid with respect to a schema corresponding to the Schema for Schemas.

Action: Check the errors reported when schema documents were loaded, mapped, or validated. Correct errors found in the identified schema documents and reload them into a new schema context. Then provide the new schema context to the processor.

LSX-00020: unknown type "~S"

Cause: A specified type was unknown (not defined in any loaded Schemas).

Action: Make sure the type was defined and that the type usage referenced the correct Schema.

LSX-00021: undefined element "~S"

Cause: Element is undefined in the specified namespace.

Action: If the element name is misspelled, correct the spelling.

LSX-00022: unknown namespace prefix "~S"

Cause: Prefix in a QName is undefined in the current scope.

Action: Correct the prefix name if it's misspelled.

LSX-00023: unknown namespace URI "~S"

Cause: Namespace URI is unknown to the schema processor.

Action: Correct the namespace URI if it's misspelled.

LSX-00024: unknown attribute group "~S"

Cause: The name of attribute group is unknown to the schema processor in the current scope.

Action: Correct the name of attribute group if it's misspelled.

LSX-00025: unknown group "~S"

Cause: The name of group is unknown to the schema processor in the current scope.

Action: Correct the name of group if it's misspelled.

LSX-00026: unknown attribute "~S"

Cause: The name of attribute is unknown to the schema processor in the current scope.

Action: Correct the name of attribute if it's misspelled.

LSX-00027: property "~s" unknown

Cause: The named validation property was unknown.

Action: Refer to the documentation for the complete list of validation properties.

LSX-00102: duplicate element "~S"

Cause: Element declaration is not unique within its scope.

Action: Rename the element.

LSX-00103: duplicate group "~S"

Cause: Group declaration is not unique within its scope.

Action: Rename the group.

LSX-00104: duplicate type "~S"

Cause: Type definition is not unique within its scope.

Action: Rename the type.

LSX-00105: duplicate attribute group "~S"

Cause: Attribute group declaration is not unique within its scope.

Action: Rename the attribute group.

LSX-00106: duplicate attribute "~S"

Cause: Attribute declaration is not unique within its scope.

Action: Rename the attribute.

LSX-00110: facet "~S" should have single value attribute

Cause: A facet declaration did not have a value attribute.

Action: Each facet declaration must contain one and only one value attribute.

LSX-00111: type "~S" contains invalid facets

Cause: A specified facet was invalid for a type. Each datatype has a different set of facets which may apply.

Action: Use only applicable facets for the type.

LSX-00112: facet "~S" duplicated

Cause: A facet (other than "enumeration") was specified more than once.

Action: Only the enumeration facet may be used more than once for a type.

LSX-00113: facet "~1S" has invalid value "~2S"

Cause: Facet value contained illegal characters or its value was out of range.

Action: Remove illegal characters.

LSX-00114: facet "~S" not in schema namespace

Cause: Facets are not defined in the XMLSchema namespace.

Action: Remove illegal facet declarations.

LSX-00116: mutually exclusive facets are not allowed

Cause: Mutual exclusiveness violations were found for facets. For example, both "length" and either "minLength" or "maxLength" are not allowed to be facets.

Action: Remove the facets that are at fault.

LSX-00117: "minLength" should not be greater than "maxLength"

Cause: The value of "minLength" must be less than or equal to the value of "maxLength".

Action: Correct either "minLength" or "maxLength".

LSX-00118: fixed facet value cannot be changed

Cause: The value of a fixed facet in the base type definition should remain the same.

Action: Remove the fixed facet specification in the parent's type for the erroneous facet component.

LSX-00119: value is not valid restriction of parent's minLength

Cause: There was an error in that minLength was among the members of {facets} of {base type definition} and {value} was less than the {value} of the parent minLength.

Action: Increase the {value} of minLength.

LSX-00120: value is not valid restriction of parent's maxLength

Cause: There was an error in that maxLength was among the members of {facets} of {base type definition} and {value} was greater than the {value} of the parent maxLength.

Action: Increase the {value} of maxLength.

LSX-00121: value is not valid restriction of parent's length

Cause: There was an error in that length was among the members of {facets} of {base type definition} and {value} was not equal to the {value} of the parent length.

Action: Make {value} the same as parent's.

LSX-00122: value is not valid restriction of parent's whiteSpace

Cause: There was an error in that whiteSpace was among the members of {facets} of {base type definition} and at least one of the following conditions was true: 1 {value} is replace or preserve and {value} of the parent whiteSpace is collapse 2 {value} is preserve and the {value} of the parent whiteSpace is replace

Action: Change the {value} of whiteSpace.

LSX-00123: base type is required

Cause: Missing base type declaration in the type definition.

Action: Define a base type.

LSX-00124: "list" element is improperly defined

Cause: A "list" element either must have its "itemType" attribute set or have one of its children be a "simpleType" element, but both conditions cannot exist.

Action: Remove the erroneous condition.

LSX-00125: "restriction" element is improperly defined

Cause: A "restriction" element either must have its "base" attribute set or have one of its children be a "simpleType" element, but both conditions cannot exist.

Action: Remove the erroneous condition.

LSX-00126: facet "~1S" has invalid value "~u"

Cause: Facet value contained illegal characters or its value was out of range.

Action: Remove illegal characters.

LSX-00127: totalDigits must be greater than or equal to fractionDigits

Cause: The value of the facet totalDigits is less than the value of the facet fractionDigits.

Action: Ensure that totalDigits is greater than or equal to fractionDigits.

LSX-00128: facet "~1S" has invalid value "~s"

Cause: Facet value contained illegal characters or its value was out of range.

Action: Remove illegal characters.

LSX-00130: attribute "processContents" has invalid value "~S"

Cause: Attribute "processContents" in the "any" element or "anyAttribute" declaration has an invalid value.

Action: Specify one of the following values: lax, skip, or strict.

LSX-00132: attribute "~1S" has invalid occurrences value "~2S"

Cause: A minOccurs or maxOccurs attribute had an invalid value (not a integer or less than zero).

Action: Use a legal "occurs" value.

LSX-00133: attribute "use" has invalid value "~S"

Cause: A "use" attribute had an invalid value. Choices for "use" are "default", "fixed", "optional", "prohibited", or "required".

Action: Change the attribute to one of the above values.

LSX-00134: attribute "~1S" has invalid qualification "~2S"

Cause: An attribute that specifies qualification (form, attributeFormDefault, elementFormDefault) was invalid; it must be one of "qualified" or "unqualified".

Action: Change the attribute to one of the above values.

LSX-00135: invalid min/max Occurs for *all* element, must be 0/1

Cause: "minOccurs" has a value other than 0/1 or "maxOccurs" has a value other than 1.

Action: Specify 0/1 for "minOccurs" or "maxOccurs".

LSX-00136: "maxOccurs" is less than "minOccurs"

Cause: The value of the "maxOccurs" specification is less than the value of the "minOccurs" specification.

Action: Correct "minOccurs" or "maxOccurs".

LSX-00141: ID type may only be used in attributes

Cause: For backward compatibility with DTD, ID type may only be used in attributes.

Action: Remove the ID type.

LSX-00142: invalid sub-element "~1S" for element "~2S"

Cause: There was an invalid sub-element in the content of either the attribute or the element declaration. This was because the sub-element was either at the wrong position or out of context.

Action: Remove the sub-element or move it to the correct position.

LSX-00143: element "~S" must have type or ref

Cause: A Schema element was declared but was neither type or reference.

Action: One of type or reference must be specified.

LSX-00144: attribute "~1S" invalid derivation-restriction value "~2S"

Cause: An attribute which specifies a derivation-restriction setting (block, content, final) had an invalid value. Choices are "#all", "extension", or "restriction".

Action: Change the attribute to one of the above values.

LSX-00145: attribute "~1S" invalid derived value "~2S"

Cause: A derivedBy attribute had an invalid value. Choices are "extension" or "restriction".

Action: Change the attribute to one of the above values.

LSX-00146: element or attribute is improperly defined

Cause: An element or attribute definition must have either its "type" attribute set or must have one of its children be a "simpleType" or "complexType" element but both conditions cannot exist.

Action: Remove the erroneous condition.

LSX-00147: "~1S" cannot contain "~2S"

Cause: An invalid schema component exists in the current declaration.

Action: Remove the schema component.

LSX-00148: annotation must come first in "~S"

Cause: "annotation" element must be the first in the content.

Action: Make "annotation" the first element.

LSX-00149: duplicated ID specified in "~S"

Cause: An attempt was made to specify two distinct members of {attribute uses} with {attribute declaration}s, both of whose {type definition}s are from ID or are derived from ID.

Action: Declare only one member of the {attribute uses} whose {type definition} is from ID or will be derived from ID.

LSX-00150: attributeGroup reference shouldn't have children

Cause: A reference-to-attributeGroup element has children. It is suppose to be empty except for annotations.

Action: Remove the children.

LSX-00151: invalid combination of attributes "ref" and "name"

Cause: If the item's parent is not *schema*, then either the "ref" or the "name" attribute must be present, but not both. Top-level elements or attributes must have a name.

Action: Specify either the "ref" or "name" attribute.

LSX-00152: only "minOccurs", "maxOccurs", or "id" is allowed

Cause: If the item's parent is not *schema* and "ref" is present, then "complexType", "simpleType", "key", "keyref", "unique", "nillable", "default", "fixed", "form", "block", and "type" must be absent.

Action: Remove the prohibited attribute.

LSX-00153: invalid combination of default and fixed attributes

Cause: It is an error for a declaration to contain both fixed and default attributes.

Action: Remove either the default or the fixed attributes.

LSX-00154: attribute "use" must have its value set to "optional"

Cause: If "default" and "use" are both present, use must have its value set to "optional".

Action: Remove the default attribute or change the value of the "use" attribute.

LSX-00155: invalid use of attribute "ref"

Cause: If the item's parent is not *schema* and the attribute "ref" is present, then the element "simpleType" and the attributes "form" and "type" must be absent.

Action: Remove the prohibited items.

LSX-00156: type is final and no derivations are allowed

Cause: Derivation from a type that is declared to be final occurred.

Action: Remove the final declaration from the base type.

LSX-00157: "~S" is abstract and cannot be used in an instance document

Cause: The element declaration or the type definition was abstract.

Action: When an element is declared to be abstract, a member of that element's substitution group must appear in the instance document. When an element's corresponding type definition is declared as abstract, all instances of that element must use `xsi:type` to indicate a derived type that is not abstract.

LSX-00158: base type of "~S" must be simple type or primitive datatype

Cause: The derivation constraint was violated.

Action: Use `complexType` instead of `simpleType`.

LSX-00159: list content of multiple simple types is not allowed

Cause: Two or more simple types were specified within the list content .

Action: Specify only one simple type.

LSX-00160: invalid substitution group affiliation between "~S" and "~S"

Cause: There was an error in that {substitution group exclusions} prevented substitution group affiliation by type restriction or type extension.

Action: Remove the offending deriving method from the {substitution group exclusions} list.

LSX-00161: disallowed type substitution between "~S" and "~S"

Cause: There was a substituted type whose deriving method falls in the union of the {disallowed substitutions} and the {type definition}'s {prohibited substitutions}.

Action: Remove the offending deriving method from the element's {disallowed substitutions} list or the {type definition}'s {prohibited substitutions} list.

LSX-00162: string "~S" is an invalid default for the complex type

Cause: If the {content type} is a simple type definition, then the string must be valid with regard to the simple type definition as defined by String Valid (3.14.4). If the {content type} is mixed, then the {content type}'s particle must be empty as defined by Particle Emptyable (3.9.6). However, one of these conditions was not met, resulting in this error.

Action: Make the default string a valid default with regard to the complex type definition.

LSX-00163: duplicated content specification in "~S"

Cause: There was a duplicate content specification in the children of complexType.

Action: Remove the duplicate content specification.

LSX-00164: no content specified in "~S"

Cause: In a simpleContent specification, either "restriction" or "extension" was not specified as a child.

Action: Add either a "restriction" or an "extension" element information item.

LSX-00165: content type of "~S" must be simple type

Cause: The content type of the type definition was not a simple type definition.

Action: Use complexContent instead of simpleContent .

LSX-00166: both content types must be mixed or both must be element-only

Cause: If the content types of the derived type and base type are not the same simple type definition and the content type of the base type is not empty, then both content types must be mixed or both must be element-only. This was not the case, resulting in this error.

Action: Add attribute mixed="true" or remove it.

LSX-00167: defining form of "~S" must occur at the top level

Cause: The defining form did not occur at the top level of a schema.

Action: Move attributeGroup or group definition to the top level of the schema.

LSX-00168: referring form of "~S" must NOT occur at the top level

Cause: The referring form did not occur within a complex type definition or an attribute group definition.

Action: Move the attributeGroup definition to within a complex type definition or an attribute group definition. Or, move the group definition to within a complex type, restriction, extension, choice, or sequence.

LSX-00169: circular group reference is disallowed outside *redefine*

Cause: There was a circular group reference.

Action: One of the group references needs to be changed to a group definition.

LSX-00170: union must have memberTypes attribute or some simpleType children

Cause: There was no member type definition for the union declaration.

Action: Add memberTypes attribute or simpleType children.

LSX-00171: missing required sub-element "~S"

Cause: The sub-element specified in the error message was required.

Action: Add the required sub-element.

LSX-00172: "~S" is not a valid restriction of "~S"

Cause: The schema component constraint, Derivation Valid (Restriction, Complex) or Particle Valid (Restriction), was violated.

Action: Modify the base type (particle) or the restricted type (particle) definition.

LSX-00173: ~S of ~S type is not a valid restriction of ~S of ~S type

Cause: The schema component constraint, Particle Restriction OK (Elt:Elt -- NameAndTypeOK), was violated.

Action: Modify either or both element declaration particles.

LSX-00174: "~S" is not a valid derivation of "~S"

Cause: The schema component constraint, Derivation Valid (Restriction, simple), (Restriction, complex) or (Extension), was violated.

Action: Modify the base type or the derived type definition.

LSX-00175: a complex base within "simpleContent" must have simple content

Cause: A complex base within "simpleContent" was not restricted to contain only simple content.

Action: Modify the base type or the derived type definition.

LSX-00176: circular reference detected in schema component named "~S"

Cause: An attempt was made to use a circular reference. This is not allowed. For example, it is not possible to return to an element declaration by repeatedly following the {substitution group affiliation} property. Or, within the {particles} of a group there must not be at any depth a particle whose {term} is the group itself.

Action: Modify one of the schema components in the loop.

LSX-00200: element "~S" not empty

Cause: Content of the element must be empty.

Action: Remove any schema components in the content.

LSX-00201: contents of "~S" should be elements only

Cause: Node with type other than "element", "processing instruction", or "comment" exists in the content of the violating element.

Action: Remove the offending nodes.

LSX-00202: contents of "~S" should be text only

Cause: Node with type other than "text", "processing instruction", or "comment" exists in the content of the violating element.

Action: Remove the offending nodes.

LSX-00204: extra data at end of complex element

Cause: Extra nodes exist at the end of an element with a complex type definition.

Action: Remove the offending nodes or check the definition of the complex type.

LSX-00205: element "~1S" value "~2S" is wrong (must be "~3S")

Cause: The element had a value other than its fixed value.

Action: Use the fixed value as its value.

LSX-00206: substitution for element "~S" is disallowed

Cause: An attempt was made to substitute an element that violated a constraint.

Action: Change to a valid new element that can be substituted for the headElement.

LSX-00207: empty list is disallowed

Cause: An empty list was supplied where at least one value is required.

Action: Specify at least one valid list item.

LSX-00208: circular type reference disallowed

Cause: A type referenced itself as a member type, either directly or indirectly using other types.

Action: Remove the circular type dependency.

LSX-00209: fixed or default not allowed on ID-based type

Cause: A type derived from the ID type specified a fixed value or a default value.

Action: Remove the fixed or default value from the type.

LSX-00210: value "~1S" out of range for type "~2S"

Cause: Value is out of range for the data with a specific type.

Action: Fix the value.

LSX-00211: value "~1S" whose fractional digits exceeds ~2d

Cause: Too many fractional digits after the decimal point.

Action: Remove the extra fractional digits.

LSX-00212: value "~1s" whose total digits exceeds ~2d

Cause: Too many digits in the decimal data.

Action: Remove the extra digits.

LSX-00213: only ~1d occurrences of particle "~2S", minimum is ~3d

Cause: Too few occurrences of particles in the node.

Action: Specify more particles.

LSX-00214: too many occurrences of particle "~1S", maximum is ~2d

Cause: Too many occurrences of particles in the node.

Action: Remove extra ones.

LSX-00215: value "~1S" whose total digits exceeds ~2d

Cause: There were too many digits in the decimal data.

Action: Remove the extra digits.

LSX-00220: "~1S" is wrong length, should be ~2d

Cause: Data of simple type has invalid length.

Action: Fix the length of the data.

LSX-00221: "~1S" is too short (minimum length is ~2d)

Cause: The length of the data is too short.

Action: Prepend extra characters (such as zeros or blank characters) to make the data longer.

LSX-00222: "~1S" is too long (maximum length is ~2d)

Cause: The length of the data is too long.

Action: Remove extra characters from the data.

LSX-00229: item type is not a valid type for a list simple type

Cause: The specified item type must not itself be a list type, and must be one of the types identified in [XML Schemas: Datatypes] as a suitable item type for a list simple type.

Action: Change the list schema component's declaration.

LSX-00230: invalid integer "~S"

Cause: Illegal characters exist in the "integer" or its derivative type declarations.

Action: Remove illegal characters.

LSX-00231: invalid unsigned integer "~S"

Cause: Illegal characters exist in the "unsignedLong", "unsignedInt", "unsignedShort", or "unsignedByte" declarations.

Action: Remove illegal characters.

LSX-00232: invalid unsigned long "~S"

Cause: Illegal characters exist in the "unsignedLong" declaration.

Action: Remove illegal characters.

LSX-00233: invalid long "~S"

Cause: Illegal characters exist in the "long" declaration.

Action: Remove illegal characters.

LSX-00234: invalid decimal "~S"

Cause: Illegal characters exist in the "decimal" declaration.

Action: Remove illegal characters.

LSX-00235: invalid URI "~S"

Cause: Invalid URI specification for data of "anyURI" type.

Action: Remove illegal characters.

LSX-00237: invalid Name "~S"

Cause: Invalid XML name.

Action: Remove illegal characters.

LSX-00238: invalid Nmtoken "~S"

Cause: Invalid Nmtoken.

Action: Remove illegal characters.

LSX-00240: bad float "~S"

Cause: Invalid value for "float" type data.

Action: Remove illegal characters.

LSX-00241: bad double "~S"

Cause: Invalid value for "double" type data.

Action: Remove illegal characters.

LSX-00242: bad Boolean "~S"

Cause: Boolean data must have a value from the following set: "1", "0", "true", or "false".

Action: Specify one of "1", "0", "true", or "false".

LSX-00243: invalid date "~S"

Cause: Invalid value for data of "date" type.

Action: Remove illegal characters.

LSX-00244: invalid NCName "~S"

Cause: Invalid value for data of "NCName" type.

Action: Remove illegal characters.

LSX-00245: invalid ID "~S"

Cause: Data specified is not of "NCName" type.

Action: Remove illegal characters.

LSX-00246: invalid QName "~S"

Cause: Invalid value for data of "QName" type.

Action: Remove illegal characters.

LSX-00247: invalid language specification "~S"

Cause: Invalid value for data of "language" type.

Action: Remove illegal characters.

LSX-00248: invalid duration "~S"

Cause: Invalid value for data of "duration" type.

Action: Remove illegal characters.

LSX-00249: invalid date or time "~S"

Cause: Invalid value for data of "dateTime", "time", "gYearMonth", "gYear", "gMonthDay", "gDay", or "gMonth" type.

Action: Remove illegal characters.

LSX-00250: invalid normalizedString "~S"

Cause: Invalid value for data of "normalizedString" type.

Action: Remove illegal characters.

LSX-00251: invalid token "~S"

Cause: Invalid value for data of "token" type.

Action: Remove illegal characters.

LSX-00252: invalid union "~S"

Cause: Data of simple type is not one of the union type.

Action: Use one of the union type as its type.

LSX-00253: branch is empty

Cause: The pattern specification "branch1 | branch2" has either "branch1" or "branch2" missing.

Action: Remove '|' or add either "branch1" or "branch2".

LSX-00255: mismatched parentheses

Cause: ")" found without a matching "(" in a pattern specification.

Action: Add "(" to the pattern specification.

LSX-00256: empty character class expression

Cause: "[]" found when processing a character class expression.

Action: Specify the character group within the brackets.

LSX-00257: atom specification is missing

Cause: A quantifier was found without an atom specification.

Action: Add an atom specification in front of the quantifier.

LSX-00258: invalid escape character

Cause: "x" in "\x" is not a valid escape character.

Action: Change "x" to a valid escape character.

LSX-00259: invalid character found in the pattern

Cause: An unexpected character was found in the pattern.

Action: Fix the pattern.

LSX-00260: unexpected end of pattern

Cause: Something is missing at the end of the pattern.

Action: Fix the pattern.

LSX-00261: invalid character property

Cause: An error occurred when processing the character property. For example, "{" is missing after "\p" or "\P".

Action: Fix the character property.

LSX-00262: attribute "~1S" cannot have complex type "~2S"

Cause: The type of the attribute is "complex".

Action: Specify the type of the attribute to be "simple".

LSX-00263: undefined attribute "~S"

Cause: Violating attribute is not defined in the current scope.

Action: Correct the attribute name if it's misspelled.

LSX-00264: attribute "~S" is prohibited (may not occur)

Cause: Global declarations cannot contain the attributes "ref", "minOccurs", or "maxOccurs", or the use of this attribute is explicitly declared as "prohibited" by the schema.

Action: Remove the attribute.

LSX-00265: attribute "~1S" value "~2S" is wrong (must be "~3S")

Cause: Attribute has a value other than its fixed value.

Action: Use fixed value as its value.

LSX-00266: missing required attribute "~S"

Cause: A required attribute is missing.

Action: Add the required attribute.

LSX-00270: hex-encoded binary has odd length

Cause: Data of "hexBinary" type has odd number of digits.

Action: Add missing digits as appropriate.

LSX-00271: invalid character "~c" in hex-encoded binary

Cause: Data of "hexBinary" type has invalid characters.

Action: Remove illegal characters.

LSX-00272: BASE64-encoded binary grouped improperly (not 4's)

Cause: Number of digits is not a multiple of four.

Action: Add missing digits as appropriate.

LSX-00273: invalid character "~c" in base64-encoded binary

Cause: Data of "base64Binary" type has invalid characters.

Action: Remove illegal characters.

LSX-00274: invalid padding in base64-encoded binary

Cause: Invalid padding characters at the end of data.

Action: Use "=" as the padding characters.

LSX-00280: duplicate ID "~S"

Cause: ID name is not unique within the schema scope.

Action: Rename the ID.

LSX-00281: referenced ID "~S" is not defined

Cause: Referenced ID name is not defined within the schema scope.

Action: Define the ID.

LSX-00282: duplicate notation name "~S"

Cause: The name of the "notation" element is not unique within the schema scope.

Action: Rename the element.

LSX-00283: referenced notation "~S" is not defined

Cause: Referenced notation name is not defined within the schema scope.

Action: Define the element.

LSX-00284: duplicate constraint name "~S"

Cause: Each constraint declaration has a name which exists in a single symbol space for constraints.

Action: Choose a different name.

LSX-00285: referenced key "~S" is not defined

Cause: Referenced key name is not defined within the schema scope.

Action: Define the key.

LSX-00286: duplicate key "~S" for {"~S"}~S"

Cause: The key value was not unique within its scope.

Action: Change the key value.

LSX-00287: duplicate key "~S"

Cause: The key value was not unique within its scope.

Action: Change the key value.

LSX-00290: invalid enumeration choice "~S"

Cause: The value of the data is not one of the enumeration choice.

Action: Select one of the enumeration choice as its value.

LSX-00291: value "~1S" is less than minimum "~2S" (~3S)

Cause: Data has a value less than required minimum.

Action: Increase the value.

LSX-00292: value "~1S" is greater than maximum "~2S" (~3S)

Cause: Data has a value greater than maximum.

Action: Decrease the value.

LSX-00293: missing one or more fields from element "~S"

Cause: The required fields were missing from the content of the element.

Action: Add the fields.

LSX-00294: field "~S" produced multiple hits

Cause: XPath expressions relative to each element selected by a {selector} are specified by {fields}. These XPath expressions must identify a single node (element or attribute) whose content or value was used in the constraint. This content or value must be of a simple type.

Action: Remove duplicate elements or attributes.

LSX-00295: field element "~S" is not a simple type

Cause: The field element evaluated to a node-set with a member that was not a simple type.

Action: Change the field element's type.

LSX-00296: field value "~S" could not be compared to facet

Cause: The value of the data could not be compared to the facet value because one value had a time zone while the other did not.

Action: Correct the data to add the necessary time zone or to remove the unnecessary time zone.

LSX-00300: group must have name or ref but not both

Cause: "ref" or "name" attributes are either both missing or have both been specified.

Action: Specify either "ref", "name", but not both.

LSX-00310: local element or attribute should be namespace qualified

Cause: Element or attribute name is not namespace qualified.

Action: Add prefix or default namespace URI declaration.

LSX-00311: local element or attribute shouldn't be namespace qualified

Cause: Element or attribute name is namespace qualified.

Action: Remove prefix or default namespace URI declaration from itself or ancestors.

LSX-00320: missing required elements in *all*

Cause: Some required elements in "all" particle are missing.

Action: Add the missing elements.

LSX-00330: missing range start character

Cause: Missing range start character in a character range specification.

Action: Add the missing characters.

LSX-00331: missing comma

Cause: A comma is missing in a range specification.

Action: Add the missing characters.

LSX-00332: bad decimal digits in a quantifier specification

Cause: Quantifier has invalid characters.

Action: Remove illegal characters.

LSX-00333: literal "~S" is not valid with respect to the pattern

Cause: Literal is not valid with respect to the pattern.

Action: Choose correct characters in the literal.

LSX-00340: improper namespace value for the imported element

Cause: If the namespace attribute is present, then its actual value must not match the actual value of the enclosing schema's targetNamespace attribute. If the namespace attribute is not present, then the enclosing schema must have a targetNamespace attribute.

Action: Match namespace value.

LSX-00341: ENTITY or ENTITIES type may only be used in attributes

Cause: For compatibility, ENTITY or ENTITIES should be used only on attributes.

Action: Remove the ENTITY or ENTITIES.

LSX-00342: value of attribute "base" must be a complex type definition

Cause: If the "complexContent" alternative is chosen, then the type definition resolved to by the actual value of the attribute "base" must be a complex type definition.

Action: Choose a complex type definition as its base type.

LSX-00343: "~S" is not nillable

Cause: Attribute nillable was set to be "false" in element's declaration.

Action: Remove attribute xsi:nil from the instance document.

LSX-00344: namespace values "~1S" and "~2S" differ

Cause: The targetNamespace specified in the schema document differed from either:
a) the value of the enclosing schema's namespace attribute, or b) the value of the namespace attribute identified in the import element information item.

Action: Match the namespace value to the enclosing schema's targetNamespace attribute or the actual value of the namespace attribute identified in the import element information item.

LSX-00345: Element ("~1S") from "~2S" namespace is unexpected. Expecting element from "~3S" namespace

Cause: The namespace of the Xml Node in the instance document does not match with the expected element definition namespace

Action: n/a

LSX-00346: pattern too long or complex

Cause: The pattern facet was too long or too complex and exceeded the maximum size allowed after compilation as a regular expression.

Action: Simplify the pattern expression.

LSX-00347: search of pattern contains too many branches

Cause: Evaluation of the string value versus the pattern resulted in too many branches and was prematurely terminated.

Action: Simplify the pattern expression.

MGTCA-01001 to MGTCA-01198

MGTCA-01001: clusterware stack did not respond

Cause: A wallet operation was requested when the Oracle Clusterware stack was down.

Action: Contact Oracle Support Services.

MGTCA-01002: clusterware stack did not respond to wallet operation

Cause: User attributes could not be read because the Grid Infrastructure Management Repository wallet location was not accessible.

Action: Contact Oracle Support Services.

MGTCA-01003: wallet access denied

Cause: An attempt to access the wallet was denied because the user does not have the required permissions.

Action: Contact Oracle Support Services.

MGTCA-01004: clusterware wallet internal error

Cause: An invalid wallet operation was performed or Oracle Cluster Registry storage for wallet was not present.

Action: Contact Oracle Support Services.

MGTCA-01005: SQL operation on Grid Infrastructure Management Repository failed.\n{0}

Cause: An attempt to perform a SQL operation against the Grid Infrastructure Management Repository (GMIR) failed because a connection could not be established to the repository. Additional failure information is provided by the accompanying messages.

Action: Contact Oracle Support Services.

MGTCA-01006: could not change user credentials for Grid Infrastructure Management Repository

Cause: SQL execute query failed.

Action: Contact Oracle Support Services.

MGTCA-01007: Grid Infrastructure Management Repository is not running on this node

Cause: During the execution of 'mgmtca', no running instance of the Grid Infrastructure Management Repository was found on the node.

Action: Run 'mgmtca' on the node having Grid Infrastructure Management Repository.

MGTCA-01108: An internal error occurred while querying for the node running Grid Infrastructure Management Repository

Cause: During the execution of 'mgmtca', an internal error occurred while querying for the node running Grid Infrastructure Management Repository.

Action: Contact Oracle Support Services.

MGTCA-01100: This utility is used to configure the Grid Infrastructure Management Repository.
Usage: mgmtca [*verb options*]
Following are the supported verbs on the Domain Services Cluster:
createRepos - creates a repository and credentials for the local cluster or a member cluster.
removeRepos - removes the repository and credentials for a member cluster.
queryRepos - lists the member clusters that are currently serviced by the Domain Services Cluster.
configRepos - configures the repository for the local cluster or a member cluster.
setpasswd - sets the password for a set of users in the local cluster.
Following are the supported verbs on the member cluster:
createRepos - creates a schema in the repository for the member cluster.
configRepos - configures the repository for the member cluster. Type 'mgmtca *verb* -h' to get help on a specific mgmtca verb.

Cause: None

Action: None

MGTCA-01101: failure in Oracle Grid Infrastructure Management Repository operation

Cause: A SQL request to the Oracle Grid Infrastructure Management Repository encountered an error.

Action: Contact Oracle Support Services

MGTCA-01102: failure in performing database operation to retrieve the name of the Pluggable Database in the Oracle Grid Infrastructure Management Repository

Cause: An attempt to retrieve the name of the Pluggable Database in Oracle Grid Infrastructure Management Repository failed.

Action: Contact Oracle Support Services

MGTCA-01103: failure in performing database operation to unlock the user of Oracle Grid Infrastructure Management Database

Cause: The user account to be unlocked did not exist.

Action: Contact Oracle Support Services

MGTCA-01104: An internal error occurred during the remote execution of 'mgmtca' on the node running the Grid Infrastructure Management Repository.

Cause: During the execution of 'mgmtca', an internal error occurred while remotely executing the operation of the node running the Grid Infrastructure Management Repository.

Action: Contact Oracle Support Services.

MGTCA-01105: Grid Infrastructure Management Repository is not running in the cluster.

Cause: The execution of 'mgmtca' could not complete because the Grid Infrastructure Management Repository was not running in the cluster.

Action: Contact Oracle Support Services.

MGTCA-01106: An internal error occurred while querying the state of the Grid Infrastructure Management Repository.

Cause: During the execution of 'mgmtca', an internal error occurred while querying the state of the Grid Infrastructure Management Repository.

Action: Contact Oracle Support Services.

MGTCA-01107: The resource for the Grid Infrastructure Management Repository does not exist.

Cause: The execution of 'mgmtca' could not complete because the resource for the Grid Infrastructure Management Repository did not exist.

Action: Contact Oracle Support Services.

MGTCA-01108: failed to determine CRS Home location

Cause: Execution of 'mgmtca' to retrieve the CRS Home location failed. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01109: failed to determine Oracle Base location

Cause: Execution of 'mgmtca' to retrieve the Oracle Base location failed. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01110: An internal error occurred while querying the state of the Grid Infrastructure Management Repository during reconfiguration.

Cause: The execution of 'mgmtca' could not complete because an internal error occurred while querying the state of the Grid Infrastructure Management Repository during reconfiguration.

Action: Contact Oracle Support Services.

MGTCA-01111: An internal error occurred while stopping the existing instance of the Grid Infrastructure Management Repository during reconfiguration.

Cause: The execution of 'mgmtca' could not complete because an internal error occurred while stopping the existing instance of the Grid Infrastructure Management Repository during reconfiguration.

Action: Contact Oracle Support Services.

MGTCA-01112: An internal error occurred while removing the existing instance of the Grid Infrastructure Management Repository during reconfiguration.

Cause: The execution of 'mgmtca' could not complete because an internal error occurred while removing the existing instance of the Grid Infrastructure Management Repository during reconfiguration.

Action: Contact Oracle Support Services.

MGTCA-01113: The reconfigure operation for the Grid Infrastructure Management Repository could not complete because there was already an instance running on the cluster.

Cause: The reconfigure operation for the Grid Infrastructure Management Repository could not complete because there was already an instance running on the cluster.

Action: Contact Oracle Support Services.

MGTCA-01114: An internal error occurred while creating the Grid Infrastructure Management Repository during reconfiguration.

Cause: The execution of 'mgmtca' could not complete because an internal error occurred while creating the Grid Infrastructure Management Repository during reconfiguration.

Action: Contact Oracle Support Services.

MGTCA-01115: An internal error occurred while starting the resource for the Grid Infrastructure Management Repository during reconfiguration.

Cause: The execution of 'mgmtca' could not complete because an internal error occurred while starting the resource for the Grid Infrastructure Management Repository during reconfiguration.

Action: Contact Oracle Support Services.

MGTCA-01116: The syntax of the 'mgmtca' command is incorrect.

Cause: The 'mgmtca' command was rejected because the syntax as entered was incorrect.

Action: Reenter the 'mgmtca' command with the correct syntax. Enter 'mgmtca -h' to display usage.

MGTCA-01117: The user name specified in the 'mgmtca' command is invalid.

Cause: The 'mgmtca' command was rejected because the user name specified in the command had invalid content.

Action: Provide a valid user name for the 'mgmtca' command.

MGTCA-01118: A credential store operation failed.

Cause: The 'mgmtca' command did not complete because a credential store operation failed.

Action: Contact Oracle Support Services.

MGTCA-01119: Trace file configuration failed.

Cause: The 'mgmtca' command did not complete because trace file configuration failed.

Action: Contact Oracle Support Services.

MGTCA-01120: command not supported on a member cluster

Cause: An attempt to execute the command 'mgmtca' was rejected because it was not supported on a member cluster.

Action: Run the command on the Domain Services Cluster where the Grid Infrastructure Management Repository is hosted. Export the credentials from the Domain Services Cluster and import them on the member cluster.

MGTCA-01121: failed to determine cluster name

Cause: Execution of 'mgmtca' to retrieve cluster name failed. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01122: The credential store operation to retrieve the Grid Infrastructure Management Repository domain failed.

Cause: Execution of 'mgmtca' failed because the credential store operation to retrieve the Grid Infrastructure Management Repository domain failed.

Action: Contact Oracle Support Services.

MGTCA-01123: A credential store operation failed while initializing the connection to the credential store.

Cause: Execution of 'mgmtca' failed because a credential store operation failed while initializing the connection to the credential store.

Action: Contact Oracle Support Services.

MGTCA-01124: A credential store operation failed while terminating the connection to the credential store.

Cause: Execution of 'mgmtca' failed because a credential store operation failed while terminating the connection to the credential store.

Action: Contact Oracle Support Services.

MGTCA-01125: A credential store operation failed while importing the Cluster Manifest File.

Cause: An attempt to execute the command 'mgmtca' failed while importing the Cluster Manifest File because credentials could not be stored.

Action: Contact Oracle Support Services.

MGTCA-01126: A credential store operation failed while exporting the Cluster Manifest File.

Cause: Execution of 'mgmtca' failed because a credential store operation failed while exporting the Cluster Manifest File.

Action: Contact Oracle Support Services.

MGTCA-01127: The credential store operation to retrieve a user domain failed.

Cause: Execution of 'mgmtca' failed because the credential store operation to retrieve the user domain failed.

Action: Contact Oracle Support Services.

MGTCA-01128: The credential store operation to retrieve the credential set for a user failed.

Cause: Execution of 'mgmtca' failed because the credential store operation to retrieve the credential set for a user failed.

Action: Contact Oracle Support Services.

MGTCA-01129: The credential store operation to retrieve the domain representing the member cluster failed.

Cause: Execution of 'mgmtca' failed because the credential store operation to retrieve the domain representing the member cluster failed.

Action: Contact Oracle Support Services.

MGTCA-01130: The credential store operation to retrieve the domain representing the Domain Services Cluster failed.

Cause: Execution of 'mgmtca' failed because the credential store operation to retrieve the domain representing the Domain Services Cluster failed.

Action: Contact Oracle Support Services.

MGTCA-01131: Cluster Manifest File specified in the command did not exist at the specified location.

Cause: Execution of 'mgmtca' failed because the Cluster Manifest File specified in the command did not exist at the specified location.

Action: Re-execute the command with the correct path to the Cluster Manifest File.

MGTCA-01132: failed to retrieve SCAN information for the cluster

Cause: Execution of 'mgmtca' to retrieve the SCAN information failed. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01133: failed to initialize connection to the credential store

Cause: Execution of 'mgmtca' failed because the connection to the credential store could not be initialized.

Action: Contact Oracle Support Services.

MGTCA-01135: failed to determine type of cluster

Cause: Execution of 'mgmtca' to retrieve the type of cluster failed. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01136: failed to create a repository for the member cluster

Cause: An attempt to execute 'mgmtca' to create a repository for a member cluster encountered an internal error.

Action: Contact Oracle Support Services.

MGTCA-01137: failed to remove the repository for the member cluster

Cause: An attempt to execute 'mgmtca' to create a repository for a member cluster encountered an internal error.

Action: Contact Oracle Support Services.

MGTCA-01138: failed to plug in the repository for the member cluster

Cause: An attempt to execute 'mgmtca' to create a repository for a member cluster encountered an internal error.

Action: Contact Oracle Support Services.

MGTCA-01139: failed to unplug the repository for the member cluster

Cause: An attempt to execute 'mgmtca' to create a repository for a member cluster encountered an internal error.

Action: Contact Oracle Support Services.

MGTCA-01140: failed to migrate the Rapid Home Provisioning schema

Cause: Execution of 'mgmtca' to migrate the Rapid Home Provisioning schema failed.

Action: Contact Oracle Support Services.

MGTCA-01141: cannot run command as root

Cause: An attempt to run 'mgmtca' as the OS root user was rejected.

Action: Run the command 'mgmtca' as the Grid Infrastructure user.

MGTCA-01142: When run on the Domain Services Cluster, this command creates a repository and credentials for the local cluster or a member cluster.
Usage:
`mgmtca createRepos [-manifest <manifest_file_location> -member <member_cluster_name> -version <member_cluster_version>] \n -manifest <manifest_file_location> - absolute file path of the Cluster Manifest File where the credentials are to be exported. \n -member <member_cluster_name> - name of the member cluster for which the repository is to be created. \n -version`

<member_cluster_version> - version of the member cluster for which the repository is to be created.

Cause: None

Action: None

MGTCA-01143: When run on the Domain Services Cluster, this command removes the repository and credentials for a member cluster.\nUsage: mgmtca removeRepos -member <member_cluster_name>\n -member <member_cluster_name> - name of the member cluster whose repository and credentials are to be removed.\nThis command is not supported on a member cluster.

Cause: None

Action: None

MGTCA-01144: When run on the Domain Services Cluster, this command plugs in a repository for a member cluster.\nUsage: mgmtca plugRepos -manifest <manifest_file_location> -member <member_cluster_name> -pdbBackupFile <backup_file_location> -pdbMetadataFile <metadata_file_location>\n -manifest <manifest_file_location> - absolute file path of the Cluster Manifest File where the credentials are to be exported.\n -member <member_cluster_name> - name of the member cluster whose repository is to be plugged in.\n -pdbBackupFile <backup_file_location> - absolute file path for the backup file for the repository that is to be plugged in.\n -pdbMetadataFile <metadata_file_location> - absolute file path of the metadata file for the repository that is to be plugged in.\nThis command is not supported on a member cluster.

Cause: None

Action: None

MGTCA-01145: When run on the Domain Services Cluster, this command unplugs the repository for a member cluster.\nUsage:mgmtca unplugRepos -member <member_cluster_name> -pdbBackupFile <backup_file_location> -pdbMetadataFile <metadata_file_location>\n -member <member_cluster_name> - name of the member cluster whose repository is to be unplugged.\n -pdbBackupFile <backup_file_location> - absolute file path for the backup file for the repository that is to be unplugged.\n -pdbMetadataFile <metadata_file_location> - absolute file path of the metadata file for the repository that is to be unplugged.\nThis command is not supported on a member cluster.

Cause: None

Action: None

MGTCA-01146: When run on the Domain Services Cluster, this command configures the repository for the local cluster or a member cluster.\nUsage: mgmtca configRepos [exportCred -manifest <manifest_file_location> -member <member_cluster_name> | setpasswd -member <member_cluster_name> -user <user_ID>[,...] | -allusers]\n exportCred - exports the credentials for all the users to the Cluster Manifest File for the local cluster or a member cluster.\n -manifest <manifest_file_location> - absolute file path of the Cluster Manifest File where the credentials are to be exported.\n -member <member_cluster_name> - name of the member cluster whose credentials is to be exported.\n setpasswd - automatically generates and sets the password for a set of users for the local cluster or a member cluster.\n -member <member_cluster_name> - name of the member cluster whose credentials are to be exported.\n -user *userID* [,...] - comma-separated list of user IDs (CHMOS, CHA, CALOG, QOS, GRIDHOME) whose password is to automatically generated and set.\n -allusers - automatically generate and set

password for all users.\nWhen run on a member cluster, this command configures the repository for the member cluster.\nUsage: mgmtca configRepos importCred - manifest <manifest_file_location>\n importCred - imports credentials for all the users from the Cluster Manifest File for a member cluster.\n -manifest <manifest_file_location> absolute file path of the Cluster Manifest File from where credentials are to be imported.

Cause: None

Action: None

MGTCA-01147: When run on the Domain Services Cluster, this command sets the password for a set of users in the local cluster.\nUsage: mgmtca setpasswd -user <user_IDs>[,...] | -allusers]\n -user <user_ID>[,...] - comma-separated list of user IDs (CHMOS, CHA, CALOG, QOS, GRIDHOME) whose password is to automatically generated and set.\n -allusers - automatically generate and set passwords for all users.\nThis command is not supported on a member cluster.

Cause: None

Action: None

MGTCA-01148: member cluster name specified in the Cluster Manifest File is invalid.

Cause: An attempt to import the Cluster Manifest File for the member cluster failed because the cluster name in the Cluster Manifest File did not match the name of the member cluster on which the mgmtca command was issued.

Action: Run 'mgmtca createRepos -manifest <manifest_file_location> -member <member_cluster_name>' on the Domain Services Cluster with a valid member cluster name.

MGTCA-01149: member cluster '{0}' already exists.

Cause: An attempt to add a member cluster was rejected because the specified member cluster is already a member of this Cluster Domain.

Action: Specify a unique member cluster name that is not already a member of this Domain Services Cluster.

MGTCA-01150: member cluster '{0}' does not exist.

Cause: An attempt to remove the member cluster was rejected because the specified member cluster is not a member of this Domain Services Cluster.

Action: Specify a valid member cluster name that is a member of this Domain Services Cluster.

MGTCA-01151: There are no members for the Domain Services Cluster

Cause: Status Message

Action: None

MGTCA-01152: member cluster '{0}' cannot be removed.

Cause: An attempt to remove the member cluster was rejected because the specified member cluster was the Domain Services Cluster.

Action: Specify a valid member cluster name that is a member of this Cluster Domain.

MGTCA-01153: member cluster '{0}' cannot be removed.

Cause: An attempt to remove the member cluster was rejected because there were active sessions connected to the repository for the specified member cluster."

Action: Shut down and deconfigure the member cluster.

MGTCA-01154: When run on the Domain Services Cluster, this command lists the member clusters that are serviced by the Domain Services Cluster.\nUsage: `mgmtca queryRepos [-member <member_cluster_name>]`\n -member <member_cluster_name> - name of the member cluster which needs to be queried. If this parameter is not specified the query returns all the members serviced by the Domain Services Cluster.\nThis command is not supported on a member cluster.

Cause: None

Action: None

MGTCA-01155: Unable to retrieve the Domain Services Cluster for member cluster {0}

Cause: An attempt to identify the Domain Services Cluster for the indicated member cluster failed.

Action: Re-export the credentials on the Domain Services Cluster using the command '`mgmtca configRepos exportCred -member <member_cluster_name> -manifest <manifest_file_location>`' and import them on the member cluster.

MGTCA-01156: command not supported on a Domain Services Cluster

Cause: Execution of 'mgmtca' failed because the command was not supported on a Domain Services Cluster.

Action: Run the command on a member cluster.

MGTCA-01157: failed to retrieve the member cluster Globally Unique Identifier (GUID) from the Cluster Manifest File

Cause: An attempt to retrieve the member cluster Globally Unique Identifier (GUID) from the Cluster Manifest File failed or an incorrect Cluster Manifest File was supplied.

Action: Recreate the Cluster Manifest File on the Domain Services Cluster, copy the Cluster Manifest File to the member cluster or specify the correct Cluster Manifest File and retry the operation.

MGTCA-01158: failed to generate a Globally Unique Identifier (GUID) for the member cluster

Cause: An attempt to configure the Grid Infrastructure Management Repository (GIMR) for the member cluster using the 'createRepos' command failed because of a failure to generate a Globally Unique Identifier (GUID).

Action: Examine the accompanying error messages for details and retry after addressing the issues reported.

MGTCA-01159: failed to add the member cluster Globally Unique Identifier (GUID) to the Cluster Manifest File

Cause: An attempt to configure the Grid Infrastructure Management Repository (GIMR) for the member cluster using the 'createRepos' command failed because of a failure to add the Globally Unique Identifier (GUID) to the credentials file.

Action: Examine the accompanying error messages for details and retry after addressing the issues reported.

MGTCA-01160: failed to retrieve the name of the Grid Infrastructure Management Repository Server

Cause: Execution of 'mgmtca' to retrieve the name of the Grid Infrastructure Management Repository Server failed.

Action: Examine the accompanying error messages for details and retry after addressing the issues reported.

MGTCA-01161: failed to validate the provided Cluster Manifest File

Cause: Execution of 'mgmtca' to validate the provided Cluster Manifest File failed. The accompanying messages provide detailed failure information.

Action: Examine the accompanying error messages for details and retry after addressing the issues reported.

MGTCA-01162: failed to add a property to the provided Cluster Manifest File

Cause: Execution of 'mgmtca' to add a property to the provided Cluster Manifest File failed. The accompanying messages provide detailed failure information.

Action: Examine the accompanying error messages for details and retry after addressing the issues reported.

MGTCA-01163: The Globally Unique Identifier (GUID) present in the credential file is {0}.

Cause: None

Action: None

MGTCA-01164: Credential file does not contain a Globally Unique Identifier (GUID).

Cause: None

Action: None

MGTCA-01165: An error occurred during the remote execution of 'mgmtca' on the node running the Grid Infrastructure Management Repository.

Cause: During the execution of 'mgmtca', an error occurred while remotely executing the operation of the node running the Grid Infrastructure Management Repository. Accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages for details and retry after addressing the issues reported if possible.

MGTCA-01166: An error occurred while querying for the node running Grid Infrastructure Management Repository.

Cause: During the execution of 'mgmtca', an error occurred while querying for the node running Grid Infrastructure Management Repository. Accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages for details and retry after addressing the issues reported if possible. Make sure that the Grid Infrastructure Management Repository has been configured and running.

MGTCA-01167: The Grid Infrastructure Management Repository is in an invalid state

Cause: The execution of the createRepos operation failed because the repository for the Domain Services Cluster was not present. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01168: failed to create a Repository as an additional {0} MB of space is required in the Disk Group

Cause: The execution of the createRepos operation failed because the Disk Group did not contain the space required to create a repository.

Action: Add disks to the disk group that is used by the Grid Infrastructure

MGTCA-01169: Cluster Manifest File is valid

Cause: Status Message.

Action: None

MGTCA-01170: Cluster Manifest File is invalid

Cause: Execution of 'mgmtca' to validate the provided Cluster Manifest File failed. The structure of the provided Cluster Manifest File is invalid. The accompanying messages provide detailed failure information.

Action: Examine the accompanying messages and follow the action recommended there.

MGTCA-01171: Cluster Manifest File is invalid

Cause: Execution of 'mgmtca' to validate the provided Cluster Manifest File failed. The connection endpoints specified in the Cluster Manifest File are invalid. The accompanying messages provide detailed failure information.

Action: Examine the accompanying messages and follow the action recommended there.

MGTCA-01172: failed to get CHA instance for the cluster

Cause: Execution of 'mgmtca' failed to get CHA instance. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01173: failed to deploy CHA models for the cluster with error \n{0}

Cause: Execution of 'mgmtca' to deploy CHA models failed. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01174: failed to start CHA resource \n{0}

Cause: An attempt to start the CHA resource failed. This may be a transient error.

Action: Retry 'srvctl start cha' to see whether the CHA resource starts. If it continues to fail, contact Oracle Support Services.

MGTCA-01175: failed to create CHA resource \n{0}

Cause: Execution of 'mgmtca' failed to create CHA resource. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01176: An error occurred while marking the Cluster Manifest File as expired.

Cause: During the execution of 'mgmtca', an error occurred while marking the Cluster Manifest File as expired. Accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages for details and retry after addressing the issues reported.

MGTCA-01177: An error occurred while checking the expiration status of the Cluster Manifest File.

Cause: During the execution of 'mgmtca', an error occurred while checking the expiration status of the Cluster Manifest File. Accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages for details and retry after addressing the issues reported.

MGTCA-01178: The cluster name of the Domain Services Cluster is the same as the member cluster specified in the command.

Cause: An attempt to add a member cluster was rejected because the specified member cluster name is the same as that of the Domain Services Cluster.

Action: Specify a unique member cluster name that is not the name of the Domain Services Cluster.

MGTCA-01179: failed to create the cluster repository for the member cluster '{0}' because the Cluster Manifest File '{1}' has already been used

Cause: An attempt to add a member cluster was rejected because the Cluster Manifest File had already been used.

Action: Create a repository for the member cluster using a Cluster Manifest that has not expired.

MGTCA-01180: cannot create a repository for a member cluster on a Standalone cluster

Cause: An attempt to add a member cluster was rejected because the command was issued on a Standalone cluster.

Action: The command 'mgmtca createRepos' is not supported on a Standalone Cluster.

MGTCA-01181: command cannot be executed by current user

Cause: An attempt to run 'mgmtca' was rejected because the current user was not the Grid Infrastructure user.

Action: Run the command 'mgmtca' as the Grid Infrastructure user.

MGTCA-01182: failed to retrieve cluster classification for current cluster

Cause: An attempt to run 'mgmtca' was rejected because of a failure to retrieve the cluster classification.

Action: Examine the accompanying error messages for details and retry after addressing the issues reported.

MGTCA-01183: incorrect arguments passed to the Cluster Manifest File validation API

Cause: An attempt to validate the Cluster Manifest File was rejected because an incorrect number of arguments were passed.

Action: Reissue the command passing the location to the Cluster Manifest File and name of the member cluster to be validated.

MGTCA-01184: The credential store operation to retrieve the password from a credset failed.

Cause: Execution of 'mgmtca' failed because the credential store operation to retrieve the password from a credset failed. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01185: The execution of the 'mgmtca' command completed successfully.

Cause: None

Action: None

MGTCA-01186: Not used

Cause: None

Action: None

MGTCA-01187: An error occurred while locking the PCMRADMIN account.\n{0}

Cause: An attempt to perform a SQL operation against the Grid Infrastructure Management Repository (GIMR) failed. Additional failure information is provided by the accompanying messages. This may be an internal error.

Action: Examine the accompanying messages and if the resolution is not clear, contact Oracle Support Services.

MGTCA-01188: An error occurred while unlocking the PCMRADMIN account.\n{0}

Cause: An attempt to perform a SQL operation against the Grid Infrastructure Management Repository (GIMR) failed. Additional failure information is provided by the accompanying messages. This may be an internal error.

Action: Examine the accompanying messages and if the resolution is not clear, contact Oracle Support Services.

MGTCA-01189: An error occurred while applying the patch.\n{0}

Cause: An attempt to apply a patch failed. Additional failure information is provided by the accompanying messages. This may be an internal error.

Action: Examine the accompanying messages and if the resolution is not clear, contact Oracle Support Services.

MGTCA-01190: The cluster name specified in the 'mgmtca' command is invalid.

Cause: An attempt to create a Grid Infrastructure Management Repository (GIMR) for a cluster was rejected because the cluster name specified was invalid.

Action: Retry the operation providing a valid cluster name.

MGTCA-01191: The operation to create a repository for the member cluster failed.

Cause: An attempt to create a repository for the member cluster failed because of insufficient disk space in the ASM disk groups configured for the Grid Infrastructure Management Repository (GIMR).

Action: Retry the operation after adding disks to the ASM disk groups configured for the GIMR.

MGTCA-01192: The operation to create a repository for the member cluster failed.

Cause: An attempt to create a repository for the member cluster failed because the query to estimate the size required for creating the repository failed.

Action: Examine the accompanying messages and if the resolution is not clear, contact Oracle Support Services.

MGTCA-01193: The operation to create a repository for the member cluster failed.

Cause: An attempt to create a repository for the member cluster failed because the operation to resize the Grid Infrastructure Management repository failed.

Action: Examine the accompanying messages and if the resolution is not clear, contact Oracle Support Services.

MGTCA-01194: The operation to create a repository for the member cluster failed.

Cause: An attempt to create a repository for the member cluster failed because the operation to restart the Grid Infrastructure Management repository failed.

Action: Examine the accompanying messages and if the resolution is not clear, contact Oracle Support Services.

MGTCA-01195: An error occurred while querying the value of the initialization parameter in the Grid Infrastructure Management Repository.

Cause: An attempt to query the value of the initialization parameter in the Grid Infrastructure Management Repository failed. Additional failure information is provided by the accompanying messages.

Action: Examine the accompanying messages and if the resolution is not clear, contact Oracle Support Services.

MGTCA-01196: An error occurred while setting the value of the initialization parameter in the Grid Infrastructure Management Repository.

Cause: An attempt to set the value of the initialization parameter in the Grid Infrastructure Management Repository failed. Additional failure information is provided by the accompanying messages.

Action: Examine the accompanying messages and if the resolution is not clear, contact Oracle Support Services.

MGTCA-01197: An error occurred while querying the classification of the cluster.

Cause: An attempt to query the classification of the cluster failed. Additional failure information is provided by the accompanying messages.

Action: Examine the accompanying messages and if the resolution is not clear, contact Oracle Support Services.

MGTCA-01198: The cluster version specified in the 'mgmtca' command is invalid.

Cause: An attempt to run the 'mgmtca' command was rejected because the cluster version specified in the command was invalid.

Action: Retry the 'mgmtca' command, providing a valid cluster version.

NCR-00001 to NCR-04028

NCR-00001: NCR: Could not allocate memory

Cause: Insufficient swap space or system memory.

Action: Increase swap space or system memory.

NCR-00002: NCR: Invalid usage

Cause: Bad function parameter.

Action: Check function call.

NCR-00003: NCR: Initialization failure

Cause: Usually insufficient swap space or system memory.

Action: Increase swap space or system memory.

NCR-01003: NCRS: Read error.

Cause: Failed to read data from an input device.

Action: Check the input device driver return code for further information.

NCR-01004: NCRS: Write error.

Cause: Failed to write data to an output device.

Action: Check the output device driver return code for further information.

NCR-01005: NCRS: Failed to flush the output buffer.

Cause: Failed to write data in the output buffer to an output device.

Action: Check the output device driver return code for further information.

NCR-01006: NCRS: Data buffer overflow.

Cause: An attempt to read or write data outside of a given data buffer.

Action: Check data buffer size.

NCR-01007: NCRS: Operation is not supported in a given mode.

Cause: Attempt to perform an operation which is not supported for the current mode.

Action: See documentation for a list of work modes and supported operations.

NCR-01008: NCRS: Failed to obtain transport parameters.

Cause: Could not identify transport layer parameters.

Action: Check the transport layer return code for further information.

NCR-01009: NCRS: Record handling error.

Cause: Encountered an invalid record or an attempt to read beyond last record.

Action: See documentation for description of record handling methods.

NCR-01010: NCRS: Invalid network address length.

Cause: Network address size is set to 0.

Action: See documentation for valid network address sizes.

NCR-01011: NCRS: Send message failure.

Cause: Failed to send a message over network.

Action: Check the network interface return code for further information.

NCR-01012: NCRS: Receive message failure.

Cause: Failed to receive a network message.

Action: Check the network interface return code for further information.

NCR-01013: NCRS: Unvalid connection type.

Cause: Connection type is other than stream or message.

Action: See documentation for description of connection types.

NCR-01018: NCRS: Encryption failure.

Cause: Can not do the encryption for the data.

Action: See the SNS documentation for more information.

NCR-01019: NCRS: Checksumming failure.

Cause: Can not add the checksumming for the data.

Action: See the SNS documentation for more information.

NCR-01020: NCRS: Operation would block.

Cause: An I/O operation returned with no data read/written because the transport connection is "non-blocking" and, to succeed, the operation would have needed to block.

Action: This is a soft error; retry the operation.

NCR-02003: NCRF: Invalid type passed to format interpreter.

Cause: The format interpreter was given a data type it did not recognize.

Action: Check the types returned to the interpreter from either the type callback routine or from the type context structure.

NCR-02004: NCRF: Invalid format interpreter type context

Cause: The format interpreter was given an invalid type context.

Action: This error usually happens due to an improperly described aggregate. For example, declaring NCRF_END_STRUCT_DATA_TYPE within a context, without a complementary NCRF_STRUCT_DATA_TYPE, is invalid.

NCR-02005: NCRF: Invalid session mode

Cause: The data format layer received a session mode other than GET,PUT or FREE.

Action: None

NCR-02006: NCRF: Invalid floating point representation received

Cause: The data format layer received a floating point representation it did not recognize.

Action: Check incoming format descriptor for errors.

NCR-02007: NCRF: Invalid format descriptor received

Cause: The data format layer received an improperly formed format descriptor. Subsequent data could not be formatted.

Action: Check for data integrity on receipt from remote host.

NCR-02008: NCRF: Error within stream processing in format interpreter

Cause: An error occurred while the interpreter was processing an NCRF_STREAM_DATA_TYPE.

Action: Check for data integrity, or for stream existence.

NCR-02009: NCRF: Unable to open trace file

Cause: Failure to open tracing file.

Action: Make sure that this is a legal file name and that the user has write access.

NCR-02010: NCRF: Call context is not available

Cause: Call context not passed to format context.

Action: Make sure that create call context has been called.

NCR-02011: NCRF: Exceeded maximum number of rfids.

Cause: Exceeded maximum number of rfids.

Action: Call Oracle Support.

NCR-03002: NCRO: Maximum number of contexts has been reached

Cause: An attempt to create either a call context or a service context has failed because all context slots are in use.

Action: Free-up context slots by destroying those contexts no longer required, or, reconfigure NCRO with more context slots.

NCR-03003: NCRO: Unexpected message

Cause: Message read from service connection is not of the expected type.

Action: Application error - debug and fix.

NCR-03004: NCRO: Unknown message

Cause: Message read from service connection is of unknown type.

Action: Internal error - contact customer support.

NCR-03005: NCRO: Orphan message

Cause: Message read from service connection is for a call context that no longer exists.

Action: Application error - debug and fix.

NCR-03006: NCRO: Invalid operation

Cause: Attempted operation over call context is invalid. For example, attempting to send IN args for a procedure which is defined to have none.

Action: Application error - debug and fix.

NCR-03007: NCRO: Context is busy

Cause: Attempted operation failed because service/call context is busy performing a previous operation.

Action: Application error - debug and fix.

NCR-03008: NCRO: Call rejected

Cause: An attempt to execute a remote procedure has failed because the server has rejected the procedure id.

Action: If wrong procedure id, send the correct one. If wrong server was contacted, then contact the right one.

NCR-03009: NCRO: Protocol version mismatch

Cause: Client and server NCRO layers are at incompatible versions levels.

Action: Upgrade to latest NCRO version.

NCR-03010: NCRO: Transfer callback error

Cause: Application transfer callback function has returned a "FAILED" status.

Action: Debug the transfer callback function.

NCR-03012: NCRO: Invalid session mode

Cause: Attempted operation has failed because the session context is in an invalid state.

Action: Internal error - contact customer support.

NCR-03013: NCRO: Operation not supported

Cause: Attempted operation is not supported on this service connection because it is incompatible with the NCRO version level of the remote application.

Action: Link remote application with latest NCR library.

NCR-03014: NCRO: Bad transport address

Cause: A service context cannot be created because the transport address descriptor (contained in the binding context) is invalid.

Action: Application error - initialize the transport address descriptor correctly.

NCR-03015: NCRO: No transport address

Cause: A service context cannot be created because no transport address was provided (in the binding context) and the transport protocol uses datagrams.

Action: Application error - provide a transport address.

NCR-03016: NCRO: Message has bad address

Cause: Message read from service connection has bad address information.

Action: Internal error - contact customer support.

NCR-03017: NCRO: Transport type RSLV not supported

Cause: Support for transport type RSLV has not been built.

Action: Re-compile NCR library with NCR_USE_RSLV defined.

NCR-03018: NCRO: Failed to make RSLV connection

Cause: Failure to make RSLV connection usually means that the name resolution failed or the resolved TNS address is bad.

Action: Make sure that the name is in TNSNAMES.ORA and that it is set to the correct TNS address.

NCR-03019: NCRO: Unable to initialize thread support

Cause: Attempt to initialize the Core thread package has failed.

Action: Internal error - contact customer support.

NCR-03020: NCRO: Invalid call context

Cause: The call context is not an valid call context.

Action: Call context was destroyed, probably because the Break was received

NCR-03021: NCRO: Reset the in-band line

Cause: Our parnter is asking to reset the in-band line, after receiving a break

Action: The in-band line is required to be reset

NCR-03022: NCRO: Cannot send the break

Cause: There is an error occur when sending the break using the side-band channel

Action: Read the documentation regarding to side-band break support issues

NCR-03023: NCRO: Cannot receive the break

Cause: There is an error occur when receiving the break using the side-band channel

Action: Read the documentation regarding to side-band break support issues

NCR-03024: NCRO: Transport type LIST not supported

Cause: Support for transport type LIST has not been built.

Action: Re-compile NCR library with NCR_USE_LIST defined.

NCR-03025: NCRO: Failed to make LIST connection(s)

Cause: Failure to make LIST connection(s) usually means one of two things: (1)

Address list syntax error, (2) Could not connect with supplied addresses

Action: Check address list syntax and make sure that there is a 'listener' process for each (or some) of the supplied addresses.

NCR-03026: NCRO: The result buffer has overflowed

Cause: The result buffer for holding the pickling result is too small.

Action: Please enlarge the result buffer and try again.

NCR-03027: NCRO: No remote service session set up yet.

Cause: Sender-makes-right needs the remote FID.

Action: Please set up the remote session before using the Send Make's Right option.

NCR-03028: NCRO: Partner refused request for sender-makes-right.

Cause: Sender-makes-right was requested by the current side, yet refused by the server.

Action: Check the server side to see why it refused SMR.

NCR-04002: NCRR: Invalid interface descriptor

Cause: An attempt to register an interface has failed because of an invalid interface descriptor.

Action: Check interface descriptor passed into the nccrri_register_interface call.

NCR-04003: NCRR: Interface exists

Cause: An attempt to register an interface has failed because an interface already exists.

Action: Application error - register a new interface, destroy the old one, or indicate that the old one must be replaced.

NCR-04004: NCRR: Invalid interface instance handle

Cause: A service registration API call has failed because of an invalid instance handle.

Action: Application error - debug and fix.

NCR-04005: NCRR: Invalid procedure handle

Cause: A procedure/object registration has failed because of an invalid procedural handle.

Action: Application error - debug and fix.

NCR-04006: NCRR: Invalid argument descriptor

Cause: A procedure registration has failed because of an invalid argument descriptor.

Action: Application error - debug and fix.

NCR-04007: NCRR: Invalid object handle

Cause: A service registration API call failed because of an invalid object handle, for example, one that does not exist.

Action: Application error - debug and fix.

NCR-04008: NCRR: Procedure exists

Cause: An attempt to register a remote procedure has failed because the procedure already exists in this interface.

Action: Application error - register a new procedure, destroy the old one, or indicate that the old one must be replaced.

NCR-04009: NCRR: Object exists

Cause: An attempt to register an object has failed because the object already exists in this interface.

Action: Application error - register a new object, destroy the old one, or indicate that the old one must be replaced.

NCR-04010: NCRR: Unable to contact Oracle Internet Directory Server

Cause: Service export or import failed to contact Oracle Internet Directory Server.

Action: Ensure Oracle Internet Directory configuration is correct. Otherwise, turn on tracing and/or contact customer support.

NCR-04011: NCRR: Oracle Internet Directory error

Cause: Service export or import failed during interaction with Oracle Internet Directory Server.

Action: Either wrong parameters with respect to the Remote Operations Service Registration Schema were passed in and/or the Oracle Internet Directory server refused to perform the requested operation. Refer the Remote Operations Service Registration Schema and/or turn on Oracle Internet Directory tracing and/or contact customer support.

NCR-04012: NCRR: Invalid address descriptor

Cause: An `ncrrei_export_interface` call failed because of an invalid address descriptor.

Action: Application error - debug and fix.

NCR-04013: NCRR: Insufficient authorization

Cause: Attempted Oracle Internet Directory Server operation has failed because of insufficient authorization.

Action: Contact customer support.

NCR-04014: NCRR: Invalid instance name

Cause: Service export or import failed because of an invalid instance name

Action: Application error - debug and fix.

NCR-04015: NCRR: Invalid interface name

Cause: Service export or import failed because of an invalid interface name

Action: Application error - debug and fix.

NCR-04016: NCRR: Last interface instance handle

Cause: The instance handle passed in is the last instance handle in the list.

Action: Not an error - means reaching the end of the list.

NCR-04017: NCRR: Unable to find the interface instance handle

Cause: The instance handle corresponding to the instance name was not found.

Action: Application error - debug and fix.

NCR-04018: NCRR: Unable to create the TNS address list

Cause: Unable to create the TNS address list from the interface instance list.

Action: Application error - debug and fix.

NCR-04019: NCRR: Interface or instance name already exists

Cause: Service export failed because the name already exists with the Oracle Internet Directory server

Action: Application error - debug and fix.

NCR-04020: NCRR: Interface or instance name does not exist

Cause: Service expunge/query failed because the name does not exist with the Oracle Internet Directory server

Action: Use Oracle Internet Directory tools on the relevant Oracle Internet Directory instance to verify the same. Otherwise turn on tracing and/or contact customer support

NCR-04021: NCRR: Pickler errors

Cause: Service export/query failed because of pickler errors

Action: Contact customer support

NCR-04022: NCRR: Invalid procedure descriptor

Cause: A procedure registration has failed because of an invalid procedural descriptor.

Action: Application error - debug and fix.

NCR-04023: NCRR: Invalid object descriptor

Cause: An object registration has failed because of an invalid object descriptor.

Action: Application error - debug and fix.

NCR-04024: NCRR: Maximum number of procedures reached

Cause: A procedure registration has failed because the procedures array is filled up.

Action: Re-register the interface increasing the maximum # of procedures.

NCR-04025: NCRR: Operation timed out

Cause: An operation for the Oracle Internet Directory server failed because it exceeded the timeout period.

Action: Retry the operation and/or turn on Oracle Internet Directory tracing.

NCR-04026: NCRR: Operation not supported

Cause: An operation for the Oracle Internet Directory server failed because it met with a server referral to another instance.

Action: Unify the Remote Ops registration entries into the Oracle Internet Directory instance and/or turn on Oracle Internet Directory tracing.

NCR-04027: NCRR: Operation failed

Cause: An operation for the Oracle Internet Directory server failed because the Service Registration interfaces met with invalid parameters.

Action: Contact customer support.

NCR-04028: NCRR: Operation failed

Cause: An operation for the Oracle Internet Directory server failed because the data involved exceeds the maximum allowed size.

Action: Check the entries in the Oracle Internet Directory instance with tools available from Oracle Internet Directory and/or turn on Oracle Internet Directory tracing.

NDFN-00020 to NDFN-00025

NDFN-00020: missing IPMI userid

Cause: Required user name argument was not specified.

Action: Reissue command with correct arguments.

NDFN-00021: missing node list

Cause: Required node list was not supplied.

Action: Re-issue command with correct arguments.

NDFN-00022: unrecognized command option: '*string*'

Cause: Operation type missing or mis-spelled.

Action: Re-issue command with correct arguments.

NDFN-00023: no password read. Re-issue request

Cause: Required administrator password was not read in response to the password prompt before finding end-of-line.

Action: Re-issue command and be sure to type the password immediately following the prompt.

NDFN-00024: caught I/O exception: *string*

Cause: Unexpected I/O exception was encountered while attempting to read the password. Exception string should indicate the precise cause.

Action: Re-issue command after repairing root cause.

NDFN-00025: *string* failed for node *string*

Cause: The indicated operation could not be completed for the specified node. The lower-level error messages attached should indicate the root cause.

Action: Re-issue command after repairing the condition indicated.

NID-00001 to NID-00604

NID-00001: Illegal command line syntax - parse error = (*number*)

Cause: Illegal operand on command line.

Action: Remove illegal operand.

NID-00002: Parse error: *string*

Cause: An error was encountered while parsing the command line.

Action: Remove offending operand.

NID-00010: Password:

Cause: Password was not specified in command line.

Action: Type password at this prompt.

NID-00100: Cannot open datafile "*string*"

Cause: The specified datafile could not be opened.

Action: Ensure that the specified datafile exists and is writable.

NID-00101: LOGFILE (*string*) not accessible

Cause: The specified log file could not be opened.

Action: Specify a log file that is writable.

NID-00102: Garbled target string

Cause: The supplied connect string could not be parsed. The connect string does not have the correct format.

Action: Refer to Oracle9i Database Concepts.

NID-00103: Missing password in connect string "*string*"

Cause: Could not find the password in the supplied connect string. The connect string does not have the correct format.

Action: Refer to Oracle9i Database Concepts.

NID-00104: Need to specify TARGET connection parameter in command line

Cause: The mandatory parameter TARGET was not specified.

Action: Specify TARGET=*username/password* when invoking this utility.

NID-00105: Need to specify "LOGFILE=*logfile*" when using APPEND=YES option

Cause: The APPEND parameter was specified without a LOGFILE.

Action: Specify APPEND=YES only when LOGFILE is also specified.

NID-00106: LOGIN to target database failed with Oracle error:\n*string*

Cause: An Oracle error was reported while attempting to log in to the target database.

Action: Follow the actions for the specified Oracle error.

NID-00107: File I/O error on datafile "*string*" during *string* operation (*number*/*string*)

Cause: An operating system error was reported while performing the specified operation in the specified file.

Action: Verify the datafile and check for operating system errors.

NID-00109: DBNAME string length *number* exceeds maximum length of *number*

Cause: The specified new database name exceeded the maximum size.

Action: Specify a shorter, valid name.

NID-00110: Cannot use REVERT and specify a database name at the same time

Cause: Conflicting options were specified in the command line.

Action: Choose only one of the options.

NID-00111: Oracle error reported from target database while executing \nstring \nstring

Cause: An Oracle error was reported when executing an OCI operation.

Action: Follow the actions for the specified Oracle error.

NID-00112: unsupported connection mode

Cause: A mode different than SYSDBA or SYSBACKUP was specified for the connection to the target.

Action: Specify only AS SYSDBA or AS SYSBACKUP.

NID-00113: Error reading answer - aborting

Cause: Response caused an error.

Action: Retry the operation.

NID-00114: Must specify new database name when SETNAME is used

Cause: SETNAME=YES was specified but no DBNAME was provided.

Action: Specify DBNAME or remove the SETNAME=YES option.

NID-00115: Database should be mounted

Cause: The database was not mounted.

Action: Mount the database.

NID-00116: The Oracle Pluggable Database option specified is invalid.

Cause: The Oracle Pluggable Database option specified was not valid.

Action: Remove the Oracle Pluggable Database option, or specify ALL or NONE options.

NID-00120: Database should be mounted exclusively

Cause: The database was started in parallel mode. To change the DBID, the database must be mounted exclusively.

Action: Shut down the database and start it in exclusive mode.

NID-00121: Database should not be open

Cause: The database was open. To change the DBID, the database must be mounted exclusively.

Action: Shutdown the database and mount it in exclusive mode.

NID-00122: Database should have no offline immediate datafiles

Cause: The database has one or more datafiles that are in OFFLINE IMMEDIATE mode.

Action: Drop the datafiles or recover them and bring them online.

NID-00123: Magic number for datafile "*string*" is incorrect

Cause: Block 0 header has an incorrect magic number for the specified datafile.

Action: Verify that the datafile is correct and retry the operation.

NID-00124: Mismatched dbid for datafile *string*, expected *number*, found *number*

Cause: The dbid of the datafile does not match the 'old' DBID or the 'new' DBID.

Action: Verify that this datafile belongs to the database. You may need to restore a backup of the datafile.

NID-00125: Database should have no disabled datafiles

Cause: The database has one or more datafiles that are disabled.

Action: Drop the datafiles or recover them and bring them online.

NID-00126: Database should have no datafiles in unknown state

Cause: The database has one or more datafiles that are in an unknown state.

Action: Drop the datafiles or recover them and bring them online.

NID-00127: All online files in the database must have the same checkpoint SCN

Cause: The database has one or more datafiles that have a checkpoint SCN that does not match the database checkpoint SCN.

Action: Restart the database and shut it down cleanly, then retry the operation.

NID-00128: Cannot revert change of database, change not in progress

Cause: The REVERT option was used, but the control file does not show that a change of DBID was in progress.

Action: Do not use the REVERT option, or possibly restore the control file that was in place when the utility was started.

NID-00129: Invalid DBID for datafile "*string*", expecting *number*, found *number*

Cause: A datafile header shows a different DBID from the rest of the database files.

Action: Ensure that the file belongs to this database.

NID-00130: Mismatched CHECKPOINT_CHANGE# in datafile "*string*", expecting *string*, found *string*

Cause: The datafile header does not match information in the control file.

Action: Revert the change, open the database, and verify that all datafiles are consistent. Then, shut down the database and retry the operation.

NID-00131: Control file is not current

Cause: A non-current control file is currently mounted.

Action: Perform necessary actions to make the control file current and retry.

NID-00132: CHECKPOINT_CHANGE# in datafile "*string*": *string* in the future of controlfile: *string*

Cause: The checkpoint in the datafile header is ahead of the checkpoint in the control file.

Action: Make the database consistent and retry.

NID-00133: Database should have only consistent datafiles

Cause: The database has one or more datafiles that are marked FUZZY in the control file.

Action: Restart the database and shut down consistently, then retry the operation.

NID-00134: Datafile "*string*" is not consistent

Cause: The datafile is marked as fuzzy in its header.

Action: Restart the database and shut down cleanly, then retry the operation.

NID-00135: There are *number* active threads

Cause: There are active threads in the database. The most likely cause is that the database crashed the last time it was shut down.

Action: Ensure that all threads are closed before retrying the operation. Start and open the database to perform crash recovery, then shut down with the NORMAL or IMMEDIATE options to close it cleanly. Finally, try running the utility again.

NID-00137: All datafiles that are not dropped should be readable

Cause: The database had one or more files that could not be read.

Action: Restore the missing files and retry the operation.

NID-00138: Block verification failed for datafile *string* (*number*)

Cause: Block header checksum yields a nonzero value for the specified datafile.

Action: Verify that the datafile is correct and retry the operation.

NID-00139: Mismatched dbname for datafile *string*, expected *string*, found *string*

Cause: The dbname of the datafile does not match the 'old' dbname or the 'new' dbname.

Action: Verify that this datafile belongs to the database. You may need to restore a backup of the datafile.

NID-00140: Specified database name *string* does not match previous name used *string*

Cause: This is a continuation of a failed attempt. However in the failed attempt, the database name is different than the one used in the last attempt.

Action: Retry the command using the original database name.

NID-00141: No database name specified, previous attempt used *string*

Cause: This is a continuation of a failed attempt. However, in the failed attempt, a database name was provided.

Action: Retry the command using the original database name.

NID-00142: Only changing database name, previous attempt changed dbid to *number*

Cause: This is a continuation of a failed attempt. However, in the failed attempt, the database id was also being changed.

Action: Retry the command removing SETNAME=YES.

NID-00143: Mismatched controlfile *string*

Cause: A controlfile did not have the correct status.

Action: Shutdown the database, remove the mismatched controlfile, mount the database, and retry the operation.

NID-00144: New name for database *string* is the same as current name *string*

Cause: The specified name is the same as the current name of the database.

Action: Specify a different name or do not use the DBNAME option.

NID-00145: nls subsystem initialization failure for product=*string*, facility=*string*

Cause: The NLS product/facility error message file could not be located or properly initialized.

Action: Check that the error message directory and file(s) have been properly installed.

NID-00300: Connected to database *string* (DBID=*number*)

Cause: Informational message.

Action: No action required.

NID-00301: Datafile *string* - dbid changed, wrote new name

Cause: Informational message.

Action: No action required.

NID-00302: Datafile *string* - dbid changed

Cause: Informational message.

Action: No action required.

NID-00303: Datafile *string* - wrote new name

Cause: Informational message.

Action: No action required.

NID-00304: Datafile *string* - reverted

Cause: Informational message.

Action: No action required.

NID-00305: Datafile *string* - already changed

Cause: Informational message.

Action: No action required.

NID-00306: Datafile *string* - no revert needed

Cause: Informational message.

Action: No action required.

NID-00307: Control File *string* - dbid changed, wrote new name

Cause: Informational message.

Action: No action required.

NID-00308: Control File *string* - dbid changed

Cause: Informational message.

Action: No action required.

NID-00309: Control File *string* - wrote new name

Cause: Informational message.

Action: No action required.

NID-00310: Control File *string* - reverted

Cause: Informational message.

Action: No action required.

NID-00311: Control File *string* - modified

Cause: Informational message.

Action: No action required.

NID-00312: Connected to server version *string*

Cause: Informational message.

Action: No action required.

NID-00315: Operation already in progress, continuing

Cause: Informational message.

Action: No action required.

NID-00320: Operation cancelled at user request

Cause: Informational message.

Action: No action required.

NID-00321: Proceeding with operation

Cause: Informational message.

Action: No action required.

NID-00330: The following datafiles are offline immediate:

Cause: Informational message.

Action: No action required.

NID-00331: The following datafiles are disabled:

Cause: Informational message.

Action: No action required.

NID-00332: The following datafiles are in unknown state:

Cause: Informational message.

Action: No action required.

NID-00333: Cannot read the header of the following datafiles:

Cause: Informational message.

Action: No action required.

NID-00334: The following datafiles are not checkpointed to *string*:

Cause: Informational message.

Action: No action required.

NID-00335: The following datafiles are not consistent:

Cause: Informational message.

Action: No action required.

NID-00336: The following datafiles are offline clean:

Cause: Informational message.

Action: No action required.

NID-00337: The following datafiles are read-only:

Cause: Informational message.

Action: No action required.

NID-00338: Control Files in database:

Cause: Informational message.

Action: No action required.

NID-00350: *string (number) string*

Cause: Informational message.

Action: No action required.

NID-00351: *string (number)*

Cause: Informational message.

Action: No action required.

NID-00352: *string (number), error: number*

Cause: Informational message.

Action: No action required.

NID-00353: *string*

Cause: Informational message.

Action: No action required.

NID-00354: Instance shut down

Cause: Informational message.

Action: No action required.

NID-00370: Change database ID of database *string*? (Y/[N]) =>

Cause: Informational message.

Action: No action required.

NID-00371: Change database name of database *string* to *string*? (Y/[N]) =>

Cause: Informational message.

Action: No action required.

NID-00372: Change database ID and database name *string* to *string*? (Y/[N]) =>

Cause: Informational message.

Action: No action required.

NID-00373: Revert changes for database *string* (Y/[N]) =>

Cause: Informational message.

Action: No action required.

NID-00390: These files must be writable by this utility.

Cause: Informational message.

Action: No action required.

NID-00395: Reverting database name from *string* to *string*

Cause: Informational message.

Action: No action required.

NID-00396: Reverting database ID from *number* to *number*

Cause: Informational message.

Action: No action required.

NID-00397: Changing database name from *string* to *string*

Cause: Informational message.

Action: No action required.

NID-00398: Changing database ID from *number* to *number*

Cause: Informational message.

Action: No action required.

NID-00400: DBNEWID - Completed with errors.

Cause: Informational message.

Action: No action required.

NID-00401: Must finish REVERT changes before attempting any database operation.

Cause: Informational message.

Action: No action required.

NID-00402: Must finish change or REVERT changes before attempting any database operation.

Cause: Informational message.

Action: No action required.

NID-00403: DBNEWID - Completed with validation errors.

Cause: Informational message.

Action: No action required.

NID-00404: DBNEWID - Completed successfully.

Cause: Informational message.

Action: No action required.

NID-00405: Reversion of database name and database ID failed.

Cause: Informational message.

Action: No action required.

NID-00406: Reversion of database name failed.

Cause: Informational message.

Action: No action required.

NID-00407: Reversion of database ID failed.

Cause: Informational message.

Action: No action required.

NID-00410: Reversion of database changes failed during validation - database is intact.

Cause: Informational message.

Action: No action required.

NID-00415: Change of database name and database ID failed.

Cause: Informational message.

Action: No action required.

NID-00416: Change of database name failed.

Cause: Informational message.

Action: No action required.

NID-00417: Change of database ID failed.

Cause: Informational message.

Action: No action required.

NID-00420: Change of database name and ID failed during validation - database is intact.

Cause: Informational message.

Action: No action required.

NID-00421: Change of database name failed during validation - database is intact.

Cause: Informational message.

Action: No action required.

NID-00422: Change of database ID failed during validation - database is intact.

Cause: Informational message.

Action: No action required.

NID-00425: Database name restored to *string*.

Cause: Informational message.

Action: No action required.

NID-00426: Database ID for database *string* restored to *number*.

Cause: Informational message.

Action: No action required.

NID-00430: Database is ready to be open or shut down.

Cause: Informational message.

Action: No action required.

NID-00431: DBNEWID - Reversion completed.

Cause: Informational message.

Action: No action required.

NID-00435: Database name changed to *string*.

Cause: Informational message.

Action: No action required.

NID-00436: Modify parameter file and generate a new password file before restarting.

Cause: Informational message.

Action: No action required.

NID-00440: Database ID for database *string* changed to *number*.

Cause: Informational message.

Action: No action required.

NID-00441: All previous backups and archived redo logs for this database are unusable.

Cause: Informational message.

Action: No action required.

NID-00442: Database has been shutdown, open database with RESETLOGS option.

Cause: Informational message.

Action: No action required.

NID-00450: Successfully changed database name and ID.

Cause: Informational message.

Action: No action required.

NID-00451: Successfully changed database name.

Cause: Informational message.

Action: No action required.

NID-00452: Successfully changed database ID.

Cause: Informational message.

Action: No action required.

NID-00480: Database is intact - database is ready to be open or shut down.

Cause: Informational message.

Action: No action required.

NID-00481: DBNEWID - Cancelled.

Cause: Informational message.

Action: No action required.

NID-00482: Database is not aware of previous backups and archived logs in Recovery Area.

Cause: Because the database id was changed, previous backups and archived redo logs in recovery area are not managed by this database.

Action: This is the informational message only.

NID-00490: LOG being redirected to STDERR due to errors.

Cause: Could no write message to log file.

Action: None

NID-00500: Keyword Description (Default)

Cause: Informational message.

Action: No action required.

NID-00501: -----

Cause: Informational message.

Action: No action required.

NID-00502: TARGET Username/Password (NONE)

Cause: Informational message.

Action: No action required.

NID-00503: DBNAME New database name (NONE)

Cause: Informational message.

Action: No action required.

NID-00504: LOGFILE Output Log (NONE)

Cause: Informational message.

Action: No action required.

NID-00505: REVERT Revert failed change NO

Cause: Informational message.

Action: No action required.

NID-00506: SETNAME Set a new database name only NO

Cause: Informational message.

Action: No action required.

NID-00507: APPEND Append to output log NO

Cause: Informational message.

Action: No action required.

NID-00508: HELP Displays these messages NO

Cause: Informational message.

Action: No action required.

NID-00600: Internal Error - [number] [number] [number] [number]

Cause: This is the generic internal error number for program exceptions. This indicates that the program has encountered an exceptional condition.

Action: Report as a bug - the first argument is the internal error number

NID-00601: Internal Error - [number] [string] [number] [number]

Cause: This is the generic internal error number for program exceptions. This indicates that the program has encountered an exceptional condition.

Action: Report as a bug - the first argument is the internal error number

NID-00602: Could not allocate number bytes for "string"

Cause: Memory allocation failed.

Action: Free memory at the operating system level and retry operation.

NID-00603: No datafiles found in database

Cause: Controlfile has not datafiles recorded

Action: Report as a bug - the first argument is the internal error number

NID-00604: No control files found in database

Cause: Instance has no control files recorded

Action: Report as a bug - the first argument is the internal error number

NMP-00001 to NMP-00011

NMP-00001: value too big

Cause: The SNMP program interface received a value too large for it to process. This error is usually displayed underneath an error which describes in more detail the value which caused the problem.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NMP-00002: no such SNMP variable name

Cause: An SNMP request was not processed because the one or more of the variable names in the request does not exist. This error is not normally visible to the user except in a trace file, where it is usually part of a "soft" error condition which is normal.

Action: The error may indicate that a managed server does not support an operation requested by its control program, perhaps because of version incompatibility. For further details, turn on tracing and re-execute the failing operation. If the error persists, and does not occur as part of a "soft" error condition as noted in the trace file, contact Worldwide Customer Support.

NMP-00003: bad SNMP variable value

Cause: The SNMP program interface received a variable value which has an unsupported data type. This error may occur if a standard SNMP network monitor is sending requests to an Oracle service through an SNMP-to-TNS gateway, and that service cannot understand the requests.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, and occurs when an Oracle control program sends requests to an Oracle service, contact Worldwide Customer Support.

NMP-00004: SNMP variable is read only

Cause: The user attempted to change a variable value at a remote server, and that variable is read-only. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Read-only variables may never be modified.

NMP-00005: general SNMP error

Cause: an SNMP error occurred which did not fall under the heading of any other more specific error condition. This error may occur if a standard SNMP network monitor is sending requests to an Oracle service through an SNMP-to-TNS gateway, and that service cannot understand the requests.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, and occurs when an Oracle control program sends requests to an Oracle service, contact Worldwide Customer Support.

NMP-00006: uninitialized SNMP context

Cause: An internal function attempted to use an uninitialized SNMP handle.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NMP-00007: I/O failure

Cause: The SNMP program interface attempted to send or receive an SNMP request and was unable to do so because of a network failure of some sort. This error is usually displayed underneath an error which describes the problem in more detail. The problem typically occurs when a control program is attempting to communicate with a service and either that service has unexpectedly terminated or the network path between the control program and the service has been interrupted.

Action: n/a

NMP-00008: SNMP message has incorrect version, version 0 is required

Cause: The SNMP program interface received a protocol request with an illegal version number. This error may occur if a standard SNMP network monitor is sending malformed requests to an Oracle service through an SNMP-to-TNS gateway.

Action: Ensure that the management platform in question is sending SNMP requests with the correct version number. If the error persists, and occurs when an Oracle control program sends requests to an Oracle service, contact Worldwide Customer Support.

NMP-00009: SNMP initialization failure

Cause: The SNMP program interface could not be initialized, either because its error message file could not be found, or because there is a malformed snmp.communities parameter value in the parameter table.

Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations. Turn on tracing and look for parameter table load errors.

NMP-00010: memory exhausted

Cause: The program interface has run out of memory.

Action: Add more memory or run fewer processes.

NMP-00011: internal SNMP program interface error

Cause: An internal error occurred inside the SNMP program interface. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00001 to NNC-00501

NNC-00001: maximum number of connections already open

Cause: All available name service connections are handling requests.

Action: If the problem occurs when running a name server, increase the values of `names.max_open_connections`. If the problem occurs in a client program, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00002: error listening on stream *string*

Cause: The name server was asked to listen on the specified address, and failed, probably because the address is malformed, or because it uses a SQL*Net protocol adaptor which has not been installed.

Action: Make sure the address is properly formed, and that it uses a protocol adaptor which has been installed on your system.

NNC-00003: error opening stream *string*

Cause: A name server or client program attempted to open a connection to another server and failed, either because the server is down, or because the network path to that server is not working. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Make sure that the server being connected to is listening on the address used, and that there is network connectivity between the two end-points.

NNC-00004: connection is broken

Cause: The connection from a name server or client program to another server has been broken, either because that server has shut down, or because the network path to the server has stopped working. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Make sure that the server being connected to is running and listening on the address used, and that there is network connectivity between the two end-points.

NNC-00005: cannot initialization stream subsystem

Cause: The name service stream subsystem could not be started, probably because of a missing TNS error message file.

Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations.

NNC-00050: message format error

Cause: A corrupted name server message was received by a name server or the name server program interface.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00051: message content error

Cause: A corrupted name server message was received by a name server or the name server program interface.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00052: client and server protocol versions are incompatible

Cause: A name server message with an incompatible protocol version was received by a name server or the name server program interface. This problem will occur when there are clients and servers with widely varying protocol versions that are trying to communicate.

Action: upgrade older client and server software so it is compatible with newer software.

NNC-00053: ASN.1 error encountered while sending or receiving message

Cause: The name server or the name server program interface attempted to send or receive a message and failed because of an ASN.1 error.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00400: memory exhausted

Cause: The program interface has run out of memory.

Action: Add more memory or run fewer processes.

NNC-00401: program interface initialization failed

Cause: The name server program interface could not be initialised, probably because of a missing TNS or name server error message file.

Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations.

NNC-00402: program interface de-initialization failed

Cause: An internal error occurred while the name server program interface was being de-initialised by an internal function.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00403: program interface has not been initialised

Cause: An internal function has attempted to de-initialise the name service program interface when it has not yet been initialised.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00404: supplied buffer of size *string* is smaller than minimum size *string*

Cause: A caller supplied the name server program interface with a memory buffer too small for the interface's requirements. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00405: network failure

Cause: The network connection between the client program and the name server has failed, either because the server has shut down, or because the network path to the server has stopped working. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Contact your name server administrator to make sure that the server being connected to is running and listening on the address used, and that there is network connectivity between the two end-points.

NNC-00406: name "*string*" does not exist

Cause: The user asked for information associated with a global name that does not exist.

Action: Re-try the failing operation with a global name that exists.

NNC-00407: alias loop in name request

Cause: The name service detected an "alias loop" when trying to retrieve information associated with a global name. An alias loop occurs when an alias name X points to another alias name Y, which in turn points back to X, rather than eventually to a global name which contains data.

Action: Contact your name server administrator to have the alias loop investigated and fixed.

NNC-00408: name "*string*" exists but desired data does not

Cause: The user asked for information associated with a global name. The name in question exists, but does not contain the desired type of information.

Action: Re-try the failing operation with a type which the desired name does contain.

NNC-00409: temporary name service failure

Cause: There are no name servers available to handle a client request, or a name server was temporarily unable to handle a client request. This situation is almost always temporary, and occurs when the program interface has issued a name server request and not received a timely response from any of its preferred servers. Such delays can occur due to transient network or name server outages or heavy load.

Action: Re-try the failing operation. If the error persists, make sure there is network connectivity between the client and its preferred name servers, and contact your name server administrator to make sure that those name servers are running.

NNC-00410: invalid preferred server address list

Cause: The names.preferred_servers parameter in sqlnet.ora is malformed.

Action: Make sure the address list is properly formatted.

NNC-00411: invalid default domain name "*string*"

Cause: The names.default_domain parameter in sqlnet.ora is invalid.

Action: Make sure the parameter value is a valid global name. See your documentation for the characters which may be used in a global name.

NNC-00412: invalid name "*string*"

Cause: The name server program interface was given an invalid global name to process.

Action: Supply a valid domain name. If the error is caused by an internal function, contact Worldwide Customer Support.

NNC-00413: general failure

Cause: A name server program interface error occurred which did not fall under the heading of any other more specific error condition. The error will usually be followed by more specific lower-level information.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00414: invalid name-value binding string "*string*"

Cause: A caller provided the name server program interface with an invalid name-value binding string value.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid name-value binding string argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00415: section identifier *string* is invalid, must be between *string* and *string*

Cause: An internal function has called the name server program interface with illegal arguments.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00416: user callback function returned error number *string*

Cause: An internal function has called the name server program interface with illegal arguments.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00417: name "*string*" already exists

Cause: A caller has attempted to create a new global name, and that name already exists.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a name that does not already exist. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00418: name "*string*" cannot be modified because it has children

Cause: A caller has attempted to delete or rename a global name, and that name cannot be modified because it has child names underneath it in the name space.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a name that is a leaf node. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00419: authoritative server is unreachable

Cause: A name server request cannot be processed because the server which received the operation does not own the name specified in the request and cannot locate the server which does own the name. The error is almost always transient, and occurs either because the path between the server receiving the request and the request's final destination has been interrupted, or because the final destination is down.

Action: Not normally visible to the user, except when using the name server control program. Because the error is typically a transient one, retrying the failing operation will usually work. If the failure persists, the name server which is allowed to process the failing operation is probably shut down or unreachable. Contact your name server administrator to make sure that your site's name servers are running, and are properly configured.

NNC-00420: operation not allowed

Cause: A name server request cannot be processed because the server which received the operation is not allowed to process it. The problem typically occurs when an administrator has disabled request processing at a particular server for some reason.

Action: Contact your name server administrator to determine why server request processing has been disabled.

NNC-00421: invalid modification directive *string*, must be between *string* and *string*

Cause: An internal function has called the name server program interface with illegal arguments.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00422: invalid data type name "*string*"

Cause: A caller has provided an invalid data type name to the name server program interface.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid type name. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00423: invalid data item syntax code *string*

Cause: A caller has provided an invalid data type code to the name server program interface.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid type name. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00424: invalid address "*string*"

Cause: A caller provided the name server program interface with an invalid address value.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid address argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00425: meta-data violation

Cause: A caller issued a name server modification request and that request cannot be processed because it would violate data type meta-data constraints.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, examine the meta-data constraints for the data type being operated upon and don't violate them. Examples of typical constraint violations are attempts to add a new data item to a name which already contains alias information, or attempts to add alias information to a name which already contains other data, or attempts to replace a data item with another item that has the wrong syntax. If the error occurs outside the control program, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00426: no such data type

Cause: A caller attempted to create a data item, and could not because the data item's type does not exist.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the operation with an existent data type. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00427: server does not support this version of the protocol

Cause: A name server message with an incompatible protocol version was received by a name server or the name server program interface. This problem will occur when there are clients and servers with widely varying protocol versions that are trying to communicate.

Action: upgrade older client and server software so it is compatible with newer software.

NNC-00428: invalid meta-data data item

Cause: A caller provided the name server program interface with an invalid meta-data data item.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid meta-data argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00429: invalid octet string literal "string"

Cause: A caller provided the name server program interface with an invalid octet string string value.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid octet string argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00430: Database not accessible

Cause: When a database is used for consistency between different nameservers, any modify operation should not only modify the cache but also the database. And if the database is not accessible, this error occurs.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, make sure database is available and then re-execute the operation. If error persists, contact Worldwide Customer Support.

NNC-00431: NS address does not match any of the current addresses

Cause: When delegating a domain, the address of the Nameserver is provided by the client. If the nameserver already exists, then it already has address(es) associated with it. So, the address supplied by the client must match one of them. Otherwise, this error occurs.

Action: Not normally visible to the user, except when using name server control program. If the error occurs when using the control program, either provide an one of the existing addresses of the name server or delegate the domain to a new nameserver.

NNC-00500: warning: "string" parameter value is illegal, setting to *string*

Cause: The named parameter value is invalid.

Action: Make sure the parameter value is formatted correctly. Valid choices for boolean parameter values are TRUE, FALSE, YES, NO, ON, and OFF.

NNC-00501: warning: "string" parameter value must be between *number* and *number*, setting to *number*

Cause: The named parameter value is invalid or outside legal boundary values.

Action: Make sure the parameter value is a number, and falls between valid minimum and maximum values, as specified in the error text.

NNF-00001 to NNF-04009

NNF-00001: Not a TNS address

Cause: While asking to read an address the name service returned a record which was not an address.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-00002: Invalid value passed to function call

Cause: An invalid value was passed to an interface function.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-00003: Naming adapter *string* does not exist

Cause: The requested name service adapter was not found in the current adapter table.

Action: Check the spelling of the adapter requested. Verify that the adapter runs on this platform, and the adapter is compiled into the adapter table linked into the executable.

NNF-00004: Operation not supported in *string*

Cause: The operation requested is not supported under this adapter.

Action: Verify that the operation being performed is not under restriction, such as writing to read-only name service. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-00005: Functionality not implemented

Cause: The operation requested is not supported in this implementation.

Action: If this is retrieved from a production release, contact Worldwide Customer Support. Otherwise, check the release notes as to the restrictions in this release.

NNF-00110: no values exist

Cause: Test program help text.

Action: None

NNF-00540: Failed to insert name: *string*

Cause: Failed to insert name into the native service.

Action: Verify that the name is not already in the native namespace and the appropriate access permissions are set for the namespace.

NNF-01001: ds_initialize: workspace initialization failed

Cause: The DCE workspace as setup by ds_initialize() failed to initialize.

Action: Verify that conditions necessary for a successful ds_initialize() call are present on this platform (e.g is there enough memory?). Check that there is not another workspace user in this program. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-01002: DCE could not open configuration file

Cause: A DCE call returned an error that it could not access its configuration file.

Action: Check that the DCE configuration file for this platform is present, and accessible. On Unix this file is dce_cf.db. Check if a simple call to dce_cf_get_cell_name() succeeds.

NNF-01003: DCE could not find cell name

Cause: A DCE call returned an error that it could not find the cell name in its configuration file.

Action: Check that this machine has been configured for a DCE cell. Check that the DCE configuration file is not corrupted. On Unix, this file is dce_cf.db. Check if a simple call to dce_cf_get_cell_name() succeeds.

NNF-01004: DCE returned unspecified error *string*

Cause: A DCE call returned a status that was not in this implementation's list of possible status values for this DCE call.

Action: Verify that this platform's DCE release is not beyond those supported by this Oracle application. If the error persists, contact Worldwide Customer Support.

NNF-01005: Internal XOM class violation

Cause: A DCE XOM call returned statuses inconsistent with the class definitions in the DCE documentation.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-01006: Attribute *string* not available

Cause: A insertion call attempted to use an attribute which did not have a translation to a DCE attribute.

Action: Use another attribute, or insert the translation into DCE.

NNF-01007: DCE long strings are not supported

Cause: A query returned a object which has a XOM OM_S_LONG_STRING. The current implementation does not support such objects.

Action: For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-01008: XDS attribute syntax *string* incorrect for Oracle Names syntax *string*

Cause: The syntax as specified in the XDS object is different than that which is expected for the given Oracle names syntax.

Action: For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-02001: NIS client error string: *string*

Cause: A call to an NIS (YP) function failed. This message contains the text of the NIS error code returned.

Action: Should only be visible when returned as part of another error. If the error persists, contact Worldwide Customer Support.

NNF-02002: NIS value does not conform to adapter schema: *string*

Cause: The values in the maps used by the NIS adapter must conform to a specific set of internal formatting rules. This value returned did not conform to those rules.

Action: Should not be visible, unless you are attempting to create your own maps. If the error persists, contact Worldwide Customer Support.

NNF-02003: Unknown NIS error code: *string*

Cause: An error code returned by a NIS (YP) function was not in the list expected by this program.

Action: Verify that the error is generated by the YP functions on this platform. Notify Worldwide Customer Support of the error.

NNF-02004: NIS map *string* does not exist

Cause: The requested attribute does not exist.

Action: For an unused attribute, no action is required, as this is the expected error. Otherwise, add the attribute and reload the NIS (YP) maps.

NNF-02005: NIS key *string* does not exist in map *string*

Cause: The requested name was not found.

Action: For an unused name, no action is required, as this is the expected error. Otherwise, add the name to the map and reload the NIS (YP) maps.

NNF-03002: Unknown BIND error code: *string*

Cause: The return code in the BIND (DNS) query response did not conform to those values listed in RFC 1035.

Action: Verify that the error is generated by the BIND functions on this platform. Notify Worldwide Customer Support of the error.

NNF-03003: Format error parsing server response

Cause: The query response packet returned from the BIND (DNS) API did not conform to the format listed in RFC 1035.

Action: Verify that the error is generated by the BIND functions on this platform. Notify Worldwide Customer Support of the error.

NNF-03004: DNS Class mismatch (*string*)

Cause: The query response packet returned a class different from the ones expected by the interface.

Action: Verify that the error is generated by the BIND functions on this platform. Notify Worldwide Customer Support of the error.

NNF-04000: File successfully converted

Cause: The requested conversion is performed.

Action: Normal condition, no action necessary.

NNF-04001: Error converting input file

Cause: The input file contains lines that cannot be converted by the conversion program.

Action: Check that the syntax of the input file is correct.

NNF-04002: Outputfile already exists

Cause: An old output file already exists in the current directory

Action: Remove the existing file, and restart the conversion tool

NNF-04003: Entry in inputfile is too long

Cause: The makedbm program, limits entries in mapfiles to 1017 characters. Therefore, the conversion tool will not process TNS addresses which are longer than 1017 characters.

Action: Shorten the offending entry.

NNF-04004: Invalid string in inputfile

Cause: the input file contains invalid lines.

Action: Check that the syntax of the input file is correct.

NNF-04005: Cannot open inputfile

Cause: The specified input file could not be found.

Action: restart the conversion tool with the correct input file.

NNF-04006: Could not create outputfile

Cause: An output file could not be created in the current working directory

Action: Change the permissions of the current directory and restart the conversion tool.

NNF-04007: Error reading input file

Cause: A problem while reading the input file. This could be caused by an unexpected end of file in the input file.

Action: Check that the file is intact and that the syntax of the input file is correct.

NNF-04008: Error writing outputfile

Cause: An error occurred while writing to the output file.

Action: Check available disk space. If the error persists, contact Worldwide Customer Support.

NNF-04009: Usage: tns2nis filename

Cause: The conversion tool was not invoked properly. The filename should either be tnsnames.ora or native.ora

Action: Restart the conversion tool with the proper parameter.

NNL-00001 to NNL-01078

NNL-00001: request argument "string" is invalid

Cause: The user entered an invalid request command argument.

Action: Supply a valid argument.

NNL-00002: request argument "string" is not allowed with this operation

Cause: The user entered a request command argument which is not valid with the particular request command.

Action: Supply a valid argument.

NNL-00003: memory exhausted

Cause: The program has run out of memory

Action: Check the amount of available memory on your machine to ensure that there is enough memory to run this executable. If necessary, free up memory by running fewer programs, then try again.

NNL-00004: invalid command argument "string"

Cause: The user entered an invalid command argument.

Action: Supply a valid argument.

NNL-00005: no server has been set. Use the "SET SERVER" command first

Cause: The user attempted to issue a command which requires that a default managed Oracle Names server be set first.

Action: Use the SET SERVER command to set your default server, then reissue the command. Alternatively, if the command allows, re-issue it with a specific server name so the control program does not need to use the default.

NNL-00006: timeout, server is not responding

Cause: The control program issued a request to an Oracle Names server and no response arrived in a timely fashion. The network connection between the control program and the server may be faulty, the server may be very heavily loaded, or there may be substantial network delays between the control program and the server. The latter is especially true for WAN links.

Action: Reissue the command; if it continues to fail, check to see that the server being managed is running correctly and that the network connection between the server and the control program is working correctly.

NNL-00007: server responded with an error

Cause: The control program issued a request to an Oracle Names server and the server responded with an error.

Action: For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNL-00008: request not understood by server

Cause: The control program issued a request to an Oracle Names server and the server did not understand the request.

Action: If the server and the control program have different versions, they may be unable to communicate. Check your documentation for version compatibility constraints. If the server and control program are compatible, turn on tracing for further details, and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNL-00009: encryption of server password failed

Cause: The control program attempted and failed to encrypt a server password, supplied either through the SET PASSWORD command or the namesctl.server_password configuration parameter.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNL-00010: error getting address for server "*string*"

Cause: The control program attempted to translate a server name to its corresponding address, and failed. There are a large number of possible causes for the failure. The control program's SQLNET.ORA file must exist in the correct system-specific location, and must be readable by the control program. The file must contain a names.preferred_servers entry with valid name server addresses. If the user has changed managed servers with the SET SERVER command, the new server must be running, and must be able to resolve the address or forward the request to another server which can resolve the address. Alternatively, a TNSNAMES.ORA file with valid name server names and addresses must exist in the correct system-specific location.

Action: For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNL-00011: no server with name "*string*" exists

Cause: The user issued a SET SERVER request and the current managed Oracle Names server was unable to translate that name into an address. Alternatively, the user issued a control program request to a specific server, and that server's name could not be translated into an address. Both problems are almost always caused by mis-typing the server name.

Action: Re-issue the request with a valid server name.

NNL-00012: invalid "*string*" value "*string*"

Cause: The first argument is a data type, the second is a value. The user supplied an invalid data value of the specified type.

Action: Re-issue the failing operation with correct data.

NNL-00013: not performed, permission denied for supplied password

Cause: The user issued a request to an Oracle Names server, and the password supplied with the request was incorrect.

Action: Check to see that the password sent by the control program to the server is correct for that server. You can set a new password with the SET PASSWORD control program command.

NNL-00014: unknown data type "string"

Cause: The user issued a name server request which contained an unknown data type.

Action: It is possible that the server had no information on the type, but automatically fetched it in response to the failing request. Re-issue the failing request; if the server has in the meantime fetched the appropriate data type information, the error will go away. If the error persists, the data type is probably invalid.

NNL-00015: type "string" has "string" syntax, which has no textual representation

Cause: Not all data type syntaxes can be represented as text. This message indicates that the user issued a name server request for a type with a non-textual representation.

Action: Re-issue the operation with a data type that has a syntax with a textual representation.

NNL-00016: cannot start server, error getting program directory's name

Cause: The user issued a STARTUP request, but the control program was unable to start the server because it was unable to find the name of the directory where the server executable resides.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNL-00017: cannot start server, program "string" does not exist

Cause: The user issued a STARTUP request, but the control program was unable to start the server because it was unable to find the server executable.

Action: Make sure that a copy of the server executable exists in your system's oracle executable directory.

NNL-00018: warning: could not contact default name server

Cause: The control program was unable to contact its default name server during startup. There are a number of possible causes for this error. The control program's SQLNET.ORA file must exist in the correct system-specific location, and must be readable by the control program. The file must contain a names.preferred_servers entry with valid name server addresses. The first server in the preferred-server list must be running, and there must be network connectivity between the control program and that server.

Action: Check to see that all of the above are true. If the control program is still unable to contact its default server, turn on tracing and restart the control program. If the error persists, contact Worldwide Customer Support.

NNL-00019: warning: server either changed or ignored your request

Cause: The user issued a request to an Oracle Names server and that request was altered in some way. Typically the user specified an invalid argument of some sort, and the server either ignored the request, or replaced the invalid argument with a reasonable default.

Action: Use the control program to check the current state of the value that you attempted to change. The server's log file may also contain information about the exact cause of the problem. Re-issue the operation with correct arguments.

NNL-00020: warning: no TNSNAMES.ORA file and no preferred name servers in SQLNET.ORA

Cause: The control program was unable to find a TNSNAMES.ORA file and was unable to find a default name server in SQLNET.ORA. The control program will operate in this state, but will be unable to resolve any names until a default server has been set, and that server must be set using its raw TNS address.

Action: The control program's SQLNET.ORA file must exist in the correct system-specific location, and must be readable by the control program. The file must contain a names.preferred_servers entry with valid name server addresses. The first server in the preferred-server list must be running, and there must be network connectivity between the control program and that server. Alternatively, a TNSNAMES.ORA file with valid name server information must exist in the correct system-specific location.

NNL-00022: error changing trace level from *string* to *string*, level change ignored

Cause: The user attempted to change the control program's local trace level, and the program encountered an error while changing the level. Usually the problem is that tracing was enabled for the first time (by changing the trace level from OFF to something else) and the trace file is not writeable by the control program.

Action: Check to see that the trace file is writeable. Your documentation will tell you the name of the trace file.

NNL-00023: SET command is missing an argument

Cause: The user attempted to issue a SET command with no argument.

Action: Supply a valid argument to the SET command.

NNL-00024: warning: no preferred name servers in SQLNET.ORA

Cause: The control program was unable to find any preferred name servers in SQLNET.ORA, and will therefore not connect to a default server.

Action: Make sure that the SQLNET.ORA file contains a valid names.preferred_servers entry.

NNL-00035: File *string* or nested IFILEs not found.

Cause: Error in loading from the tnsfile.

Action: None

NNL-00036: No records loaded

Cause: No loadable data.

Action: None

NNL-00037: Error *number* while sequencing through parameter table.

Cause: The NL Parameter system reported an error while retrieving the next name from the table.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNL-00038: Distinguished Name syntax error

Cause: Distinguished Name incorrectly specified.

Action: Supply a valid DN.

NNL-00039: no RRs

Cause: Object has no relevant RRs to be mapped to LDAP objects.

Action: None

NNL-00040: Distinguished Name exceeds buffer length: *string*

Cause: Distinguished Name derived from Domain Name is too long.

Action: Either move the object to a domain whose name is shorter or manually update the LDAP object.

NNL-00041: Object *string* not in domain *string*

Cause: Object has no relevant RRs to be mapped to LDAP objects.

Action: None

NNL-00042: LDAP bind failure: *number, string*

Cause: Call to ldap_bind failed with return set to given number.

Action: Correct user/pwd parameters or definitions.

NNL-00043: LDAP open failure

Cause: LDAP server could not be contacted.

Action: Correct connect info or server unavailability.

NNL-00044: Unsupported data type *string* not mapped

Cause: ONames data type could not be mapped to LDAP attributes

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNL-00045: No host given for LDAP server

Cause: LDAP open will dump core without a host.

Action: Provide appropriate host with '-h' option.

NNL-00046: Name *string* exceeds DN template depth

Cause: There are more domains in the name than are specified in the DN template.

Action: Add fields to the template or migrate subdomains with separate dump operations.

NNL-00047: LDAP modify returned error: *0xnumber, string*

Cause: LDAP failed with the return code shown.

Action: Refer to LDAP documentation for the meaning of the error.

NNL-00048: Error opening file: *string*

Cause: Named file cannot be opened.

Action: Provide for access to file.

NNL-00049: Output in *string* cannot be renamed to *string*

Cause: The given file cannot be created.

Action: Insure that the file specified can be created before running the command. Or use the temporary file itself.

NNL-00201: Shutdown occurs in *string*

Cause: Control program general message.

Action: None

NNL-00202: No shutdown currently scheduled

Cause: Control program general message.

Action: None

NNL-00500: Shows information on domains served by this server

Cause: Control program help text.

Action: None

NNL-00501: set | show log_stats_interval [*seconds*] [<server_list>] : \nset | show the server's statistic counter logging interval

Cause: Control program help text.

Action: None

NNL-00502: Shows, sets, or cancels when the server next dumps its statistic counters

Cause: Control program help text.

Action: None

NNL-00503: repeat *number command* [*args*] : repeat a command *number* times

Cause: Control program help text.

Action: None

NNL-00505: log_stats [<server_list>] : write Names server statistics to the log file

Cause: Control program help text.

Action: None

NNL-00506: reset_stats [<server_list>] : reset Names server statistics

Cause: Control program help text.

Action: None

NNL-00507: Shows, sets, or cancels the time when an auto-refresh query is next issued

Cause: Control program help text.

Action: None

NNL-00508: show system_queries [<server_list>] : show system query information

Cause: Control program help text.

Action: None

NNL-00509: set | show cache_checkpoint_interval [*seconds*] [<server_list>] : \nset | show the server's cache checkpoint interval

Cause: Control program help text.

Action: None

NNL-00510: Adds a data record to an existing name

Cause: Control program help text.

Action: None

NNL-00511: Shows or sets the server's system query authority requirements

Cause: Control program help text.

Action: None

NNL-00512: Shows or sets the server's auto-refresh expiration period

Cause: Control program help text.

Action: None

NNL-00513: Shows or sets the server's auto-refresh failure retry interval

Cause: Control program help text.

Action: None

NNL-00514: Creates a new name with a default TTL

Cause: Control program help text.

Action: None

NNL-00515: Deletes a name and its data

Cause: Control program help text.

Action: None

NNL-00516: Displays complete server status

Cause: Control program help text.

Action: None

NNL-00517: Insert-replaces a data item under an existing name

Cause: Control program help text.

Action: None

NNL-00518: Shows or sets the maximum number of times a server can reforward a request

Cause: Control program help text.

Action: None

NNL-00519: Shows, enables, or disables modification request processing

Cause: Control program help text.

Action: None

NNL-00520: Changes an existing name's TTL

Cause: Control program help text.

Action: None

NNL-00521: Shows or sets the server's system query forwarding requirements

Cause: Control program help text.

Action: None

NNL-00522: Removes a data item from a name by value or by type

Cause: Control program help text.

Action: None

NNL-00523: Renames an existing name

Cause: Control program help text.

Action: None

NNL-00524: Replaces a data item with another data item

Cause: Control program help text.

Action: None

NNL-00525: Shows or sets the server's default-forwarding status

Cause: Control program help text.

Action: None

NNL-00526: Starts a server using a non-standard executable and optional arguments

Cause: Control program help text.

Action: None

NNL-00527: Shows, sets, or cancels the time when the server next checkpoints its cache

Cause: Control program help text.

Action: None

NNL-00528: [set] password *password* : set the password for subsequent calls

Cause: Control program help text.

Action: None

NNL-00529: set | show default_domain [<domain_name>] : set | show the current default domain

Cause: Control program help text.

Action: None

NNL-00530: quit | exit : exit the names control program

Cause: Control program help text.

Action: None

NNL-00531: flush_name *name* : \nremoves a name from caches along a route to an authoritative server

Cause: Control program help text.

Action: None

NNL-00532: set | show forwarding_available [<on | off>] [<server_list>] : \nenable, disable or show server request forwarding

Cause: Control program help text.

Action: None

NNL-00533: ping [<server_list>] : ping one or more Names servers

Cause: Control program help text.

Action: None

NNL-00534: query name [type] : query for a desired name and RR type

Cause: Control program help text.

Action: None

NNL-00535: reload [<server_list>] : reload server cache data if there are changes

Cause: Control program help text.

Action: None

NNL-00536: set | show requests_enabled [<on | off>] [<server_list>] : \nenable, disable or show server request processing

Cause: Control program help text.

Action: None

NNL-00537: set | show server [<server_name>] : set | show the currently managed server

Cause: Control program help text.

Action: None

NNL-00538: stop | shutdown [<server_list>] : stop one or more Names servers

Cause: Control program help text.

Action: None

NNL-00539: start | startup [args] : start the Names server with optional arguments

Cause: Control program help text.

Action: None

NNL-00540: [show] status [<server_list>] : display server status summary

Cause: Control program help text.

Action: None

NNL-00541: set | show trace_level [level] [<server_list>] : \nset | show the server's tracing level

Cause: Control program help text.

Action: None

NNL-00542: restart [<server_list>] : restart one or more Names servers

Cause: Control program help text.

Action: None

NNL-00543: [show] version [<server_list>] : \nshow the name and version of one or more Names servers

Cause: Control program help text.

Cause: Failed to access/create named file or its backup File due to incorrect permissions

Action: Provide correct access to file.

NNO-00050 to NNO-00854

NNO-00050: serious errors in configuration data, server cannot run

Cause: The server's configuration data has a problem of some sort which prevents the server from starting.

Action: Previous error messages in the log file will specify the exact problems leading to the shutdown. The problem most frequently occurs when the network is broken up into multiple administrative regions and the delegation points are incorrect. Read the Oracle Names documentation sections on region delegation and ensure that their directions are being followed correctly.

NNO-00051: domain count *number* exceeds maximum of *number*, first *number* will be loaded

Cause: The server's configuration contains more domains than the server can support.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00052: invalid domain description list

Cause: The server's configuration contains an invalid domain description list.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00053: duplicate domain description for domain "*string*"

Cause: The server's configuration contains duplicate domain descriptions in the domain description list.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00054: invalid domain name "*string*"

Cause: The server's configuration contains a domain description with an invalid name.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00055: invalid domain minimum TTL "*string*"

Cause: The server's configuration contains a domain description with an invalid minimum TTL.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00056: warning: domain minimum TTL must be between *number* and *number*, set to *number* seconds

Cause: The server's configuration contains a domain description with an invalid minimum TTL. This error is not fatal; the server will automatically set the TTL to a default value which is suitable for most uses.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00057: loading and verifying topology data

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00058: cannot load topology data from configuration database

Cause: An error was encountered while trying to load the server's topology data from the configuration database. If more information is available, it will appear under this error. This error will cause the server to shut down.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00059: cannot construct topology checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00060: loading server topology from checkpoint file "*string*"

Cause: An informational message written to the log file when the server has been forced to load from its most recent topology checkpoint file, by setting the names.no_region_database parameter to TRUE.

Action: None

NNO-00061: loading data for domain "*string*"

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00062: cannot load domain data from configuration database

Cause: An error was encountered while trying to load the server's domain data from the configuration database. If more information is available, it will appear under this error. This error will cause the server to shut down.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00063: cannot construct domain checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00064: loading domain data from checkpoint file "*string*"

Cause: An informational message written to the log file when the server has been forced to load from its most recent domain checkpoint file, by setting the `names.no_region_database` parameter to TRUE.

Action: None

NNO-00065: loading cached data from checkpoint file "*string*"

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00066: server will perform reload check of administrative region in *number* seconds

Cause: An informational message written to the log file whenever the Oracle Network Manager or the Oracle Names control program send a reload request to the server.

Action: None

NNO-00067: server reload check countdown aborted

Cause: An informational message written to the log file whenever the Oracle Names control program halts a reload request previously sent to the server

Action: None

NNO-00068: warning: administrative region check failed, next check in *number* seconds

Cause: this warning is issued whenever the server fails to connect to the configuration database to see if any configuration data has changed. The server will automatically begin reissuing reload checks more frequently, and will eventually give up if connections fail continuously for three days.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database.

NNO-00069: warning: too many administrative region check failures, checking disabled

Cause: a warning issued whenever the server has continuously failed for three days in its attempts to connect to the configuration database. The server disables reload checking. Reload checking can later be re-enabled from the Oracle Network Manager or the Oracle Names control program.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the `names.no_region_database` parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00070: administrative region has changed, reloading domain data

Cause: An informational message written to the log file whenever the server's configuration has changed, and the server is reloading the new configuration from the configuration database.

Action: None

NNO-00071: cannot construct cache checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00072: loading from region database

Cause: normal

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00073: loading server config from region database

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00074: downloading region from server *string*

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00080: domain "*string*" cannot be delegated because its parent is already delegated

Cause: an internal delegation error has occurred. Delegation is controlled by the Oracle Network Manager, which enforces correct delegation rules.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00081: domain "*string*" has no name servers

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00082: domain "*string*" is missing my name "*string*" as a name server

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00083: domain "*string*" server "*string*" has no addresses

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00084: domain "*string*" is not in the authoritative domain list

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00104: line *string*: syntax error, data ignored

Cause: the server found a syntax error its domain data. This message will also appear if the server's internal checkpoint files become corrupted. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00105: line *string*: invalid name "*string*", data ignored

Cause: the server found an invalid global name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00106: line *string*: invalid TTL "*string*", data ignored

Cause: the server found an invalid TTL in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00107: line *string*: ignoring stale checkpoint data

Cause: an informational message which appears during server startup when the server detects out-of-date cached data in its cache checkpoint file. The message is part of normal server startup.

Action: None

NNO-00108: line *number*: TTL of *number* seconds below domain minimum *number*, using minimum

Cause: the server found an invalid TTL value in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00109: line *string*: invalid data type name "*string*", data ignored

Cause: the server found an invalid data type name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00110: line *string*: unknown data type "*string*", data ignored

Cause: the server found an unknown data type in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00111: line *string*: data type "*string*" has syntax "*string*", should be "*string*", data ignored

Cause: the server found an invalid data type syntax in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00112: line *string*: ignored duplicate data of type "*string*"

Cause: the server found a duplicate record in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00113: line *string*: alias data already exists, all other data ignored

Cause: the server found a alias and non-alias data with the same global name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00114: line *string*: other data exists, alias data ignored

Cause: the server found a alias and non-alias data with the same global name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00115: line *string*: single-value data type "*string*", other instances ignored

Cause: the server found more than one record with the same name and type, when the type allows only a single record with a particular name. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00116: warning: data type "*string*" in *string* load

Cause: the server found a record with an invalid data type in its domain data.

Action: No action required; adjustments to data will eliminate warning.

NNO-00117: line *string*: missing data type, data ignored

Cause: the server found a record with a missing data type in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00118: line *string*: data length *string* exceeds maximum of *string*, data ignored

Cause: the server found a record whose length exceeds an internal limit. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00119: line *string*: server not authoritative for name "*string*", data ignored

Cause: the server found a global name in its domain data for which it is not authoritative. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00120: line *string*: topology name "*string*" not allowed here

Cause: the server found an invalid record in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00121: LDIF file *string* open failed: error = *number*

Cause: the server found an invalid record in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00122: invalid name, data ignored: entry:\n*string*

Cause: the server found an invalid global name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00123: node "*string*" has no authoritative parent, data ignored

Cause: an object in the domain data is apparently not in the domain(s) which the server is authoritative for. The record in question is not loaded, but the server continues to load data.

Action: Check for inconsistencies in the data and correct any errors in topology definition or domain data outside of authoritative domains.

NNO-00150: warning: invalid hint list, no hints loaded

Cause: The server's configuration contains an invalid hint description list. The server will continue to run, but will not load any hints.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00151: warning: ignoring hint for domain "*string*", server is authoritative

Cause: the server's configuration contained a hint for a domain in the server's administrative region. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00152: warning: hint count *number* exceeds maximum of *number*, first *number* will be loaded

Cause: There are too many hints in the server's hint list. The server will load a specified maximum number of hints, ignore the rest, and continue running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00153: warning: hint domain *number* has invalid name "*string*", hint domain ignored

Cause: The server's configuration contains a hint domain with an invalid name. The domain is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00154: warning: hint *number* has invalid server name "*string*", hint ignored

Cause: The server's configuration contains a hint with an invalid server name. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00155: warning: hint *number* has missing address, hint ignored

Cause: The server's configuration contains a hint with no server address. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00156: warning: hint *number* address length *number* exceeds maximum of *number*, hint ignored

Cause: The server's configuration contains a hint whose address length exceeds an internal limit. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00157: warning: hint *number* has invalid address, hint ignored

Cause: The server's configuration contains a hint with an invalid address. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00158: warning: hint domain count *number* exceeds maximum of *number*, first *number* will be loaded

Cause: The server's hint domain list is too long. The server will load a specified maximum number of hint domains, ignore the rest, and continue running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00159: warning: ignoring duplicate hint domain *number* name "*string*"

Cause: The server's hint domain list contains a duplicate domain. The duplicate is ignored and the server continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00160: warning: ignoring duplicate hint server "*string*"

Cause: The server's hint server list contains a duplicate server. The duplicate is ignored and the server continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00250: invalid administrative region description

Cause: The server encountered an invalid administrative region description during startup. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

Action: Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00251: missing administrative region parameter *string*

Cause: The server's administrative region description is missing a required parameter. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

Action: Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00252: invalid administrative region parameter *string* value "*string*"

Cause: The server encountered an invalid administrative region parameter. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

Action: Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00253: administrative region parameter *string* length *string* exceeds maximum of *string*

Cause: The server encountered an administrative region parameter whose length exceeds an internal limit. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

Action: Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00254: warning: parameter *string* value must be between *number* and *number*, set to *number* seconds

Cause: The server encountered an administrative region parameter with an invalid value. The value is set to a default suitable for most applications, and the server continues running. The administrative region description is stored in the server's names.ora configuration file.

Action: Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00255: cannot initialize ROS

Cause: The server was unable to initialize ROS during startup. The error prevents the server from running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00256: using administrative region "*string*"

Cause: an informational message which appears during server startup, and notes the name of the administrative region for future diagnostic use by administrators. The message is part of normal server startup.

Action: None

NNO-00257: warning: cannot get serial number from region store

Cause: The server encountered an error while trying to get the configuration database's serial number. The error occurs almost always because time the server is unable to access the configuration database. If the error occurs during server startup, the server will shut down. If the error occurs during server operation (the server checks the serial number periodically to see if it should reload itself), then the server assumes a transient failure has occurred and repeats the operation a short while later. If the repetitions continue to fail for three days, the server will log another error and stop issuing the serial number load operation.

Action: First make sure that the Netadmin program has exported a server configuration for this name server. Next, make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. If the error occurs during server startup, you can force startup anyway, with checkpoint data, by starting the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00258: cannot load configuration from configuration database

Cause: An error was encountered while trying to load the server's configuration from the configuration database. If more information is available, it will appear under this error. This error will cause the server to shut down.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00259: configuration tables have not been installed or are inaccessible

Cause: The configuration database has not been properly installed.

Action: Make sure the Oracle Network Manager and its database have been properly installed

NNO-00260: loading configuration data from checkpoint file "*string*"

Cause: An informational message written to the log file when the server has been forced to load from its most recent configuration checkpoint file, by setting the names.no_region_database parameter to TRUE.

Action: None

NNO-00261: cannot construct configuration checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00262: warning: cannot write checkpoint file "*string*"

Cause: the server was unable to write the named checkpoint file. This problem is typically due to the file system's protection settings. The error is not fatal; it simply means the server will not create any checkpoint data. Note, however, that if the configuration database is ever unavailable during a future server startup, the lack of checkpoint data means you will be unable to force a startup from checkpoint data with the names.no_region_database parameter.

Action: Check to see that the server has permission to write the file named in the error message.

NNO-00263: error from configuration database

Cause: the server encountered an error while accessing the configuration database. The error can occur when the database is unavailable, or SQL*Net connectivity to the database is interrupted.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00264: configuration database query returned no data

Cause: the server attempted to fetch data from the configuration database and no data was found.

Action: The error generally appears underneath a more specific error which will tell you the exact nature of the problem.

NNO-00265: warning: cannot load data from checkpoint file

Cause: the server was started using checkpoint data, and was unable to read that data. The remaining errors below this one on the error stack provide more specific information about the problem.

Action: Check to see that the named file exists and that the server has permission to read it.

NNO-00266: cannot find document "*string*" in configuration database

Cause: The server encountered an error while trying to get its configuration ID from the configuration database. The error can occur any time the server is unable to access the configuration database. This error will cause the server to shut down.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00267: warning: configuration database contains no data for server "*string*"

Cause: the server successfully contacted the configuration database, but was unable to find any configuration information associated with the server's name. The name is specified in the server's names.ora configuration file. The error occurs almost always because the server configuration has not been exported from the Netadmin program.

Action: Make sure that the Netadmin program has exported a server configuration for this name server.

NNO-00268: warning: configuration database is not used, using checkpoint data instead

Cause: An informational message indicating that the server has been started with the names.no_region_database parameter set to TRUE, and that it will use checkpoint data rather than attempting to contact the configuration database.

Action: None

NNO-00269: configuration database is version *string*, server requires at least version *string*

Cause: The server cannot use the specified configuration database because it is of an incorrect version.

Action: Run the document conversion utility supplied with the Network Manager and re-export your network. The conversion utility will upgrade old documents to a version which can be understood by the name server.

NNO-00270: ORACLE error *string*

Cause: An ORACLE error was encountered while accessing the configuration database. The error can occur when the database is unavailable, or SQL*Net connectivity to the database is interrupted.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00271: warning: names.ora region is version *string*, network definition is version *string*

Cause: The region description in names.ora is out of synch with the network definition.

Action: No action is required unless the name server cannot run with the network definition. To be safe names.ora should be updated with one which is consistent with the network definition.

NNO-00272: line *string*; invalid DIT/DN

Cause: There is a syntax error in the DIT/DN provided in the region description.

Action: Correct the error and restart the server.

NNO-00300: no listen addresses specified, at least one is required

Cause: the server's configuration is missing addresses on which to listen.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00301: server will shut down in *number* seconds

Cause: An informational message written to the log file when the server receives a shutdown request from the Oracle Names control program.

Action: None

NNO-00302: server stopped

Cause: An informational message written to the log file when the server shuts down.

Action: None

NNO-00303: server "*string*" started with process ID *number*

Cause: An informational message written to the log file when the server successfully starts up.

Action: None

NNO-00304: listen address *string* length *string* exceeds maximum of *string*

Cause: the length of one of the server's listen addresses exceeds an internal limit.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00305: trace level changed from *number* to *number*

Cause: An informational message written to the log file when the server changes its trace level in response to a request from the Oracle Names control program.

Action: None

NNO-00306: server shutdown countdown aborted

Cause: An informational message written to the log file whenever the Oracle Names control program halts a shutdown request previously sent to the server

Action: None

NNO-00307: invalid server name "*string*"

Cause: the server's name is invalid. The name is specified in the server's names.ora configuration file.

Action: Make sure that the names.server_name parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00308: server will restart in *number* seconds

Cause: An informational message written to the log file when the server receives a restart request from the Oracle Names control program.

Action: None

NNO-00309: server restarting

Cause: An informational message written to the log file when the server restarts.

Action: None

NNO-00310: server restart countdown aborted

Cause: An informational message written to the log file whenever the Oracle Names control program halts a restart request previously sent to the server

Action: None

NNO-00311: invalid listen address list

Cause: the server's configuration contains an invalid listen address list.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00312: listen address *string* is invalid

Cause: the server's configuration contains an invalid listen address.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00313: server password length *string* exceeds maximum of *string*

Cause: the server's password length exceeds an internal limit.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00314: error changing trace level from *number* to *number*, level change ignored

Cause: the server encountered an error while changing its trace level in response to a request from the Oracle Names control program.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00315: server is listening on address *string*

Cause: An informational message written to the log file during server startup.

Action: None

NNO-00316: statistic counter reset disabled

Cause: An informational message written to the log file when the server disables statistic counter resetting in response to a request from the Oracle Names control program.

Action: None

NNO-00317: statistic counter reset interval changed to *number* seconds

Cause: An informational message written to the log file when the server changes its statistic counter reset interval in response to a request from the Oracle Names control program.

Action: None

NNO-00318: overriding next statistic counter reset, resetting in *number* seconds

Cause: An informational message written to the log file when the server resets its statistic counters in response to a request from the Oracle Names control program.

Action: None

NNO-00320: missing server name parameter

Cause: the server could not find a names.server_name parameter. The name is specified in the server's names.ora configuration file.

Action: Make sure that the names.server_name parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00321: statistic counter dump disabled

Cause: An informational message written to the log file when the server disables statistics dumping in response to a request from the Oracle Names control program.

Action: None

NNO-00322: statistic counter dump interval changed to *number* seconds

Cause: An informational message written to the log file when the server changes its statistic dump interval in response to a request from the Oracle Names control program.

Action: None

NNO-00323: overriding next statistic counter dump, dumping in *number* seconds

Cause: An informational message written to the log file when the server dumps its statistic counters in response to a request from the Oracle Names control program.

Action: None

NNO-00326: server statistic counter dump follows

Cause: An informational message written to the log file at the beginning of a statistic dump. The message is followed by a set of server statistics, and ends with another informational message indicating the dump has finished.

Action: None

NNO-00327: server statistic counter dump ends

Cause: An informational message written to the log file at the end of a statistic dump. The message is preceded by a set of server statistics.

Action: None

NNO-00328: server has reset statistic counters to zero

Cause: An informational message written to the log file when the server resets its statistic counters to zero in response to a request from the Oracle Names control program.

Action: None

NNO-00329: server will save the config file in *number* seconds

Cause: An informational message written to the log file when the server saves the config to config file in response to a request from the Oracle Names control program.

Action: None

NNO-00330: server saved the config file "*string*".

Cause: An informational message written to the log file when the server saves the config to config file in response to a request from the Oracle Names control program.

Action: None

NNO-00331: error saving new value *string* of *string* to the save config table.

Cause: An informational message written to the log file when the a set operation is performed and the change cannot be saved in the save config ptable, but should be.

Action: None

NNO-00332: warning: region store serial number reduced from *number* to *number*

Cause: An informational message written to the log file when the server finds the region database has its serial number set lower than it was when the server previously loaded the region data. This is an unnatural condition- every update to the region should increment the serial number so a reduction of the serial number might reflect tampering or accidental manual alteration this and possibly other region tables.

Action: Administrators should find out how/why the serial number decreased.

NNO-00333: warning: ROS admin_region types obsolete; using SQL

Cause: the value set in names.admin_region is an obsolete ROS type

Action: No action is necessary; administrators should set the value to the correct type- probably SQL, possibly LDAP or LDIF

NNO-00334: region load failure: ROS admin_region type *number* unsupported

Cause: the value set in names.admin_region is an obsolete ROS type

Action: No action is necessary; administrators should set the value to the correct type- probably SQL, possibly LDAP or LDIF

NNO-00600: warning: forwarder count *number* exceeds maximum of *number*, first *number* will be loaded

Cause: the server's configuration contains too many default forwarders. The server loads a specified maximum number of forwarders, ignores the rest, and continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00601: warning: no forwarders, DEFAULT-FORWARDERS-ONLY mode ignored

Cause: the server's configuration enables DEFAULT-FORWARDERS-ONLY mode but the configuration contains no default forwarders. The server ignores the request and continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00602: warning: forwarder *number* has invalid address, forwarder ignored

Cause: One of the forwarders in the default forwarder list has an invalid address. The forwarder definition is ignored and the server continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00603: enabling all request processing

Cause: An informational message written to the log file when the server enables request processing in response to a request from the Oracle Names control program.

Action: None

NNO-00604: disabling all request processing

Cause: An informational message written to the log file when the server disables request processing in response to a request from the Oracle Names control program.

Action: None

NNO-00605: enabling modification requests

Cause: An informational message written to the log file when the server enables modification-request processing in response to a request from the Oracle Names control program.

Action: None

NNO-00606: disabling modification requests

Cause: An informational message written to the log file when the server disables modification-request processing in response to a request from the Oracle Names control program.

Action: None

NNO-00607: server will forward to default forwarders only

Cause: An informational message written to the log file when the server's configuration enables DEFAULT-FORWARDERS-ONLY mode.

Action: None

NNO-00608: received corrupted message

Cause: The server received a corrupted request. The request is ignored.

Action: corrupted requests are usually caused by transient network problems. If many corrupted messages are received, turn on tracing for further information. If the errors persist, contact Worldwide Customer Support.

NNO-00609: warning: forwarder *number* address length *number* exceeds maximum of *number*, ignored

Cause: the server's configuration contains a forwarder address whose length exceeds an internal limit.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00610: detected possible alias loop involving name "*string*"

Cause: the server detected an alias loop involving the specified name. An alias loop occurs when an alias "X" points to another alias "Y", which points back to "X" rather than to an address or other name server data. The loop can contain more hops but the basic idea remains the same. Loops occur when administrators mis-enter network data, particularly when an alias in one administrative region points to data in another administrative region.

Action: Use the Oracle Names control program to query for the specified name. The control program will describe the alias path, and you can use that information to find which names are incorrect and what administrative regions the incorrect data belongs to.

NNO-00611: disabling request forwarding

Cause: An informational message written to the log file when the server disables request forwarding in response to a request from the Oracle Names control program.

Action: None

NNO-00612: enabling request forwarding

Cause: An informational message written to the log file when the server enables request forwarding in response to a request from the Oracle Names control program.

Action: None

NNO-00613: disabling FORWARDING-DESIRED on system queries

Cause: An informational message written to the log file when the server disables the FORWARDING-DESIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.

Action: None

NNO-00614: enabling FORWARDING-DESIRED on system queries

Cause: An informational message written to the log file when the server enables the FORWARDING-DESIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.

Action: None

NNO-00615: disabling DEFAULT-FORWARDERS-ONLY mode

Cause: An informational message written to the log file when the server disables DEFAULT-FORWARDERS-ONLY mode in response to a request from the Oracle Names control program.

Action: None

NNO-00616: enabling DEFAULT-FORWARDERS-ONLY mode

Cause: An informational message written to the log file when the server enables DEFAULT-FORWARDERS-ONLY mode in response to a request from the Oracle Names control program.

Action: None

NNO-00617: enabling AUTHORITY-REQUIRED on system queries

Cause: An informational message written to the log file when the server enables the AUTHORITY-REQUIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.

Action: None

NNO-00618: disabling AUTHORITY-REQUIRED on system queries

Cause: An informational message written to the log file when the server disables the AUTHORITY-REQUIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.

Action: None

NNO-00622: warning: too many auto-refresh failures for name "*string*", query expired

Cause: If an auto-refresh query is issued and continuously returns an error for three days, the query is removed from the auto-refresh queue and a warning logged. The query can be restarted from the Oracle Names control program.

Action: this message will be preceded by numerous warnings that the query in question is failing. Use the Oracle Names control program to describe the failing query. Make sure the server being queried is running and that there is network connectivity between the querying server and the server being queried.

NNO-00623: setting auto-refresh retry interval to *number* seconds

Cause: An informational message written to the log file when the server changes its auto-refresh retry interval in response to a request from the Oracle Names control program.

Action: None

NNO-00624: setting auto-refresh expiration period to *number* seconds

Cause: An informational message written to the log file when the server changes its auto-refresh expiration period in response to a request from the Oracle Names control program.

Action: None

NNO-00625: overriding auto-refresh of name "*string*", type "*string*", refresh in *number* seconds

Cause: An informational message written to the log file when the server changes the time when an auto-refresh query is next issued. The message comes in response to a request from the Oracle Names control program.

Action: None

NNO-00626: cannot enable DEFAULT-FORWARDERS-ONLY mode, no default forwarders exist

Cause: the Oracle Names control program issued a request to enable DEFAULT-FORWARDERS-ONLY mode, and the request was ignored because the server has no default forwarders.

Action: None

NNO-00627: cancelling auto-refresh of name "*string*", type "*string*"

Cause: An informational message written to the log file when the server removes a query from the auto-refresh queue in response to a request from the Oracle Names control program.

Action: None

NNO-00628: setting maximum reforward per query to *number*

Cause: An informational message written to the log file when the server changes its maximum-reforward count in response to a request from the Oracle Names control program.

Action: None

NNO-00629: warning: invalid forwarder list, no default forwarders loaded

Cause: The server's configuration contains an invalid forwarder description list.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00630: setting request-processing delay to *number* seconds

Cause: An informational message written to the log file when the server sets an artificial request-processing delay in response to a request from the Oracle Names control program.

Action: None

NNO-00631: warning: forwarder *number* has invalid name "*string*", forwarder ignored

Cause: The server's configuration contains a forwarder description with an invalid server name.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00632: warning: forwarder *number* has missing address, forwarder ignored

Cause: The server's configuration contains a forwarder description with a missing address.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00633: detected fatal delegation loop involving server "*string*"

Cause: the server detected a fatal delegation loop while forwarding a request. A loop occurs when the server's topology data indicates that it should forward a request to itself. The server immediately shuts down in response to this error.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00634: received authoritative name "*string*" when we are its authority

Cause: a server "X" received authoritative data from another server "Y" when server "X" is also authoritative for the data. Such situations should never arise because if server "X" is authoritative for the requested data, it should never forward the request to another server.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00635: warning: ignoring duplicate forwarder "*string*"

Cause: The server's default forwarder list contains a duplicate server. The duplicate is ignored and the server continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00700: warning: cannot checkpoint the cache, trying again in *number* seconds

Cause: The server was unable to perform its normal periodic cache checkpointing, typically because the cache checkpoint file could not be written. The cache checkpoint file name appears as an informational message during server startup.

Action: Check to see that the server has permission to write the cache checkpoint file, and that there is sufficient disk space for the file to be written.

NNO-00701: warning: cannot construct checkpoint file name, checkpointing disabled

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00702: cache checkpointing disabled

Cause: An informational message written to the log file when the server disables cache checkpointing in response to a request from the Oracle Names control program.

Action: None

NNO-00703: checkpoint interval changed to *number* seconds

Cause: An informational message written to the log file when the server changes its cache checkpoint interval in response to a request from the Oracle Names control program.

Action: None

NNO-00705: warning: cannot open checkpoint file "*string*", checkpointing disabled

Cause: the server was unable to open the named checkpoint file for writing. This problem is typically due to the file system's protection settings. The error is not fatal; it simply means the server will not checkpoint its cache.

Action: Check to see that the server has permission to write the file named in the error message.

NNO-00706: overriding next cache checkpoint, checking in *number* seconds

Cause: An informational message written to the log file when the server checkpoints its cache in response to a request from the Oracle Names control program.

Action: None

NNO-00707: server's cache will be flushed in *number* seconds

Cause: An informational message written to the log file when the server flushes its cache in response to a request from the Oracle Names control program.

Action: None

NNO-00708: cache flush countdown aborted

Cause: An informational message written to the log file whenever the Oracle Names control program halts a cache flush request previously sent to the server

Action: None

NNO-00709: failed delete of cache checkpoint file "*string*", cache flush may not work

Cause: the server attempted to flush its cache, which also deletes the cache checkpoint file. The file deletion failed, although the rest of the cache flush succeeded. Succeeding errors describe the reason for the deletion failure.

Action: This error typically occurs when two cache-flush operations are issued in succession without an intervening cache checkpoint operation (which would recreate the file). The first deletes the cache file, the second attempts to do so, but fails since the file has already been deleted. In such cases, the message is harmless and can be ignored. If, however, the error occurs because the server lacks permission to delete the file, then you must change the file system permissions so the server is allowed to delete the file.

NNO-00710: server's cache will be dumped to the trace file in *number* seconds

Cause: An informational message written to the log file when the server dumps its cache to the trace file in response to a request from the Oracle Names control program.

Action: None

NNO-00711: cache dump countdown aborted

Cause: An informational message written to the log file whenever the Oracle Names control program halts a cache dump request previously sent to the server

Action: None

NNO-00712: warning: group *string* cache checkpoint failed

Cause: The server was unable to perform its normal periodic cache checkpointing, typically because the cache checkpoint file could not be written. The cache checkpoint file name appears as an informational message during server startup.

Action: Check to see that the server has permission to write the cache checkpoint file, and that there is sufficient disk space for the file to be written.

NNO-00800: Error: cannot read version from config database

Cause: The query for the region database version failed. The database may be shut down, or the tables may not exist in the schema specified in names.ora.

Action: Correct any access problems accordingly.

NNO-00801: Error: OCI_SUCCESS_WITH_INFO: *string*

Cause: Diagnostic information was returned from OCI during region database access.

Action: None

NNO-00802: Error: OCI_NEED_DATA

Cause: The server did not provide sufficient data to the OCI interface while accessing the region database.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00803: Error: OCI_INVALID_HANDLE

Cause: The server called OCI with an invalid handle while accessing the region database.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00804: Error: OCI_STILL_EXECUTE

Cause: An OCI operation between the server and the database is still in progress.

Action: None

NNO-00805: Error: OCI_CONTINUE

Cause: Not possible.

Action: None

NNO-00806: Error: OCI_ERROR: *string*

Cause: An OCI occurred accessing the region database. More specific details will be written to the log file.

Action: Find the appropriate entry in the log file and correct the cause of the failure if possible. Otherwise contact Worldwide Customer Support.

NNO-00807: End of Fetch: OCI_NO_DATA

Cause: All rows have been returned from the region table.

Action: None

NNO-00808: Error connecting to region database

Cause: Not possible.

Action: None

NNO-00809: Unknown OCI error: *number*

Cause: Not possible.

Action: None

NNO-00850: Error: LDAP query returns *string*

Cause: The LDAP API returned an error. More specific details will be written to the log file.

Action: Find the appropriate entry in the log file and correct the cause of the failure if possible. Otherwise contact Worldwide Customer Support.

NNO-00851: LDAP open/bind failed: error = *number*

Cause: the server failed to connect to the LDAP directory.

Action: Find the cause of the error and correct it and restart the server.

NNO-00852: failed to get LDAP entry: error = *number*

Cause: the server could not retrieve query entries from the LDAP API.

Action: Find the cause of the error and correct it and restart the server.

NNO-00853: failed to get LDAP attribute/value: error = *number*

Cause: the server failed to connect to the LDAP directory.

Action: Find the cause of the error and correct it and restart the server.

NNO-00854: error unbinding LDAP: error = *number*

Cause: the server failed to connect to the LDAP directory.

Action: Find the cause of the error and correct it and restart the server.

NPL-00100 to NPL-00420

NPL-00100: cannot initialize ASN.1 context

Cause: The ASN.1 program interface could not be initialized, probably because its error message file could not be found.

Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations.

NPL-00101: uninitialized ASN.1 context

Cause: The ASN.1 program interface received an uninitialized ASN.1 handle.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00102: missing stream functions in ASN.1 context initialization

Cause: An internal function improperly attempted to initialize an ASN.1 handle.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00103: unusable ASN.1 context

Cause: The ASN.1 program interface received an unusable ASN.1 handle.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00300: maximum ASN.1 element nesting depth *string* exceeded on read

Cause: An ASN.1 construct is too complex for the program interface to read.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00301: maximum ASN.1 element nesting depth *string* exceeded on write

Cause: An ASN.1 construct is too complex for the program interface to write.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00302: ASN.1 type tag is greater than maximum of 16383

Cause: An internal function attempted to create an illegal ASN.1 construct

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00303: uninitialized ASN.1 class attribute

Cause: An internal function attempted to create an illegal ASN.1 construct

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00304: uninitialized ASN.1 tag attribute

Cause: An internal function attempted to create an illegal ASN.1 construct

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00305: unsupported ASN.1 "UNIV" type *string*

Cause: An internal function attempted to create an illegal ASN.1 construct

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00307: ASN.1 sequence has already been ended on write

Cause: An internal function attempted to end an ASN.1 construct prematurely.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00308: requested ASN.1 class *string* does not match received class *string*

Cause: An internal function requested an ASN.1 construct different from that received by the ASN.1 protocol engine.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00309: requested ASN.1 type tag *string* does not match received type tag *string*

Cause: An internal function requested an ASN.1 construct different from that received by the ASN.1 protocol engine.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00310: ASN.1 sequence has already been ended on read

Cause: An internal function attempted to finish reading an ASN.1 construct which has already been completely read.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00311: cannot end constructed ASN.1 encoding, *string* encoding octets unread

Cause: An internal function attempted to finish reading an ASN.1 construct prematurely.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00312: attempt to put ASN.1 "UNIV" type with illegal tag *string*

Cause: An internal function attempted to create an illegal ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00313: requested form *string* does not match actual form *string*

Cause: An internal function received an ASN.1 construct different from that expected.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00410: incoming ASN.1 value too large (*string* octets) to store locally

Cause: The ASN.1 protocol engine was unable to translate an ASN.1 construct to its host representation because the construct was too big.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00411: incoming ASN.1 NULL encoding has nonzero length of *string*

Cause: The ASN.1 protocol engine received a corrupted ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00412: incoming ASN.1 BOOLEAN encoding has incorrect length of *string*

Cause: The ASN.1 protocol engine received a corrupted ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00413: incoming ASN.1 encoding has length *string*, maximum allowed is *string*

Cause: The ASN.1 protocol engine received an ASN.1 construct too large for it to process.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00414: incoming ASN.1 type tag is greater than maximum of 16383

Cause: The ASN.1 protocol engine received an illegal ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00415: received unsupported ASN.1 INDEFINITE-LENGTH encoding

Cause: The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00416: received illegal ASN.1 encoding length of *string*

Cause: The ASN.1 protocol engine received a corrupted ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00417: received ASN.1 length octet count greater than maximum of *string*

Cause: The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it..

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00418: received malformed ASN.1 object identifier

Cause: The ASN.1 protocol engine received a corrupted ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00419: received ASN.1 object identifier with sub-identifier that is too large

Cause: The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00420: received ASN.1 object identifier with more than 256 sub-identifiers

Cause: The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NZE-28750 to NZE-29249

NZE-28750: unknown error

Cause: An Oracle Security Server error of an unspecified type occurred.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28751: memory allocation failure

Cause: The allocation of memory failed due to insufficient system memory.

Action: Terminate other processes to free up memory or add memory to the system.

NZE-28752: data source initialization failure

Cause: A data source failed to initialize. Frequently, this error is caused by insufficient system resources.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28753: failure to terminate use of data source

Cause: The system failed to terminate its use of a data source. This error may have been caused by memory or disk corruption, among other things.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28755: object retrieval failure

Cause: The system failed to retrieve information from a file or a database.

Action: Check if the data source exists, or check to ensure that the correct information exists.

NZE-28756: callback failure to allocate memory

Cause: A function supplied by the caller failed to allocate memory. This error could have been caused by system memory exhaustion.

Action: Terminate other processes to free up memory or add memory to the system.

NZE-28757: system attempt to allocate 0 bytes of memory

Cause: The system attempted to allocate 0 bytes of memory because there was no available memory left to allocate. This error could have been caused by insufficient system memory.

Action: Terminate other processes to free up memory or add memory to the system.

NZE-28758: memory release failure

Cause: The release of a memory fragment failed. This may be due to memory corruption either within the application or in the Oracle Security Server library.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28759: failure to open file

Cause: The system could not open the specified file.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28763: Invalid parameter type found in configuration file.

Cause: A parameter in the sqlnet.ora file may have been specified incorrectly.

Action: Check the sqlnet.ora file for this parameter value.

NZE-28764: failure to retrieve a configuration parameter

Cause: The system failed to retrieve a configuration parameter from the sqlnet.ora file. This error may have occurred because a necessary configuration parameter was not specified in the sqlnet.ora file.

Action: Supply the needed configuration parameter in the sqlnet.ora file.

NZE-28766: failure to terminate use of data source

Cause: The system failed to terminate its use of a data source. This error may have been caused by memory or disk corruption, or a system error.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28767: invalid version number

Cause: Version number of the wallet was incorrect. A corrupt wallet or an incompatible wallet was provided.

Action: Ensure that proper wallet is being used.

NZE-28768: bad magic number

Cause: An invalid magic number was specified in a data file. This could have been caused by a corrupted disk or by some other process overwriting the file.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28769: Specified method does not exist.

Cause: The data access method that was specified in the configuration file is not supported.

Action: Specify a supported method. Consult the Oracle Security Server documentation to determine the supported types.

NZE-28770: Data source is already initialized.

Cause: The caller attempted to initialize a data source which was already initialized.

Action: This is a programming error. An application should not attempt to initialize a data source more than once.

NZE-28771: Data source is not yet initialized.

Cause: The caller attempted to use a data source which had not yet been initialized.

Action: This is a programming error. The application must always initialize the data source before it can be used.

NZE-28773: failure to write magic and version numbers

Cause: Both the magic and version numbers failed to write. This usually occurs because of insufficient disk space.

Action: Delete unnecessary files to free up disk space or add disk space to the system.

NZE-28774: file cannot write to disk

Cause: The output of a file failed. This error usually occurs because of insufficient disk space.

Action: Delete unnecessary files to free up disk space or add disk space to the system.

NZE-28775: file cannot close

Cause: Failed to close a file which is used by a data access method. This error usually indicates memory corruption or a system error.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28776: Output buffer supplied is too small.

Cause: The data returned by a function was too large for the supplied buffer.

Action: Call the routine again with a larger buffer.

NZE-28777: binding creation failure

Cause: Failed to create a binding for use in the parsing of a parameter value. This error can be caused by the parameter value being in an incorrect format, such as a right parenthesis was not supplied where expected, or due to insufficient system memory.

Action: Make sure that the parameter is specified in the correct format. If the format is correct, free up system memory by terminating processes or adding more memory.

NZE-28778: Configuration parameter is not specified in the proper format.

Cause: The configuration parameter was not specified in the proper format.

Action: Consult the Oracle Security Server documentation for a description of the proper format for this parameter.

NZE-28779: no data access method specified in parameter

Cause: No method for data access was specified in the parameter value.

Action: Specify a method for data access in the parameter. Consult the Oracle Security Server documentation for the supported data access methods for this data type.

NZE-28780: invalid data access method specified by the parameter

Cause: The data access method specified by the parameter value is not supported.

Action: Specify a supported data access method. Consult the Oracle Security Server documentation for the supported data access methods for this data data type.

NZE-28781: No data for the access method is specified in the parameter.

Cause: No data was specified in the parameter for use with the specified access method.

Action: Consult the Oracle Security Server documentation for the data that must be specified for the access method.

NZE-28782: data source is not allocated

Cause: No memory was allocated for a data source.

Action: Ensure that the application calls in the data source initialization function.

NZE-28783: invalid parameter

Cause: There was no match for the parameter name that was used in the configuration file.

Action: Check your sqlnet.ora file for the correct parameter name.

NZE-28784: file name translation failure

Cause: The translation of a file name from Oracle format to native format has failed.

Action: Specify a correct file name. Consult your Oracle documentation for the correct file name format.

NZE-28785: parameter does not exist

Cause: A necessary configuration parameter was not found in the parameter file.

Action: Supply the required parameter.

NZE-28786: decryption of encrypted private key failure

Cause: An incorrect password was used to decrypt an encrypted private key.

Action: Enter the correct password.

NZE-28787: private key encryption failure

Cause: This may have been caused by an error in the mkwallet parameter of the sqlnet.ora file.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28788: user provided invalid information, or an unknown error

Cause: User may have responded to a prompt with unexpected input, or an unknown error occurred.

Action: Enter correct input, or enable tracing to check the trace file for errors.

NZE-28790: NLS string open failure

Cause: The opening of a string for use by the NLS subsystem failed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28791: certificate verification failure

Cause: Verification of the certificate, which the user supplied, failed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28794: data type attribute did not initialize

Cause: The initialization of the attribute data type failed. This error may be due to insufficient system resources.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28795: data type attribute did not terminate

Cause: The termination of the use of the attribute data type subsystem failed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28796: access method is not supported

Cause: The method specified to access data is not supported.

Action: Use a supported access method. Consult your Oracle documentation to determine which access methods are supported.

NZE-28797: invalid key data type

Cause: The type specified for a key is not supported.

Action: Correct the key type. Consult your Oracle documentation to determine which key types are supported.

NZE-28800: data source failed to open

Cause: A data source (a file or a database) failed to open.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28802: invalid mode or data source in configuration file

Cause: An invalid mode or data source has been specified in the configuration file (sqlnet.ora).

Action: Check the method parameter in the sqlnet.ora file. If the parameter value is correct, then enable tracing to determine the exact error.

NZE-28803: I/O operation failure

Cause: The system or application failed to access a data source (file or database).

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28804: Data source cannot close.

Cause: The data source, which could be either a file or a database, failed to close.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28805: Cannot retrieve information from the data source.

Cause: The system or application failed to retrieve information from the data source (file or database).

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28806: Cannot write to the data source.

Cause: The system or application failed to write to the data source (file or database).

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28807: Cannot update the data source.

Cause: The system or application failed to update the data source (file or database).

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28808: Cannot retrieve method information from the configuration file.

Cause: The system or application failed to retrieve method information from the sqlnet.ora configuration file.

Action: Check the method configuration parameters in the sqlnet.ora file. If the method configuration parameters are correct, then enable tracing to determine the exact error.

NZE-28809: Cannot delete information from the data source.

Cause: The system or application failed to delete information from the data source (file or database).

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28810: Cannot create key descriptor.

Cause: The system failed to create a key descriptor.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28814: Cannot convert a number in Oracle format to native format.

Cause: Failed to convert a number from Oracle format to native format.

Action: This is an internal programming exception. Enable tracing to try and reproduce the problem. Contact Oracle customer support and supply the trace file.

NZE-28815: Cannot convert a number in native format to Oracle format.

Cause: Failed to convert a number from native format to Oracle portable format failed.

Action: This is an internal programming exception. Enable tracing to try and reproduce the problem. Contact Oracle customer support and supply the trace file.

NZE-28818: No package context provided.

Cause: The context that holds the state of the security package was not passed to a function or procedure that was expecting it.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28836: Wallet is not open.

Cause: The wallet to be used has not yet been opened.

Action: Call the function that opens the wallet.

NZE-28840: Wallet is already open.

Cause: An attempt was made to open a wallet that was already open.

Action: This is a programming error. A wallet should only be opened once.

NZE-28841: Operation is not supported.

Cause: An attempt was made to perform an operation that is not supported.

Action: This is a programming error. Please refer to Oracle documentation to determine which operations are supported.

NZE-28842: Incorrect file permissions

Cause: The subject file did not have the correct permissions for the operation.

Action: Ensure that the file permissions allow the current operation.

NZE-28843: Operating system error while creating/opening file

Cause: An operating system dependent error occurred while trying to create/ open the file or while trying to set the appropriate permissions on the file.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28844: No wallet present

Cause: There was no wallet in the location specified.

Action: Check to ensure that the wallet is in the correct directory location.

NZE-28845: No certificate

Cause: Either there is no certificate or the system cannot find it.

Action: Check to ensure that the certificate is in the specified wallet.

NZE-28846: No private key

Cause: Either there is no private key or the system cannot find it.

Action: Check to ensure that the private key is in the specified wallet.

NZE-28847: No clear private key file

Cause: Failed to retrieve private key from SSO wallet

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28848: No encrypted private key file

Cause: Failed to retrieve private key from the wallet

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28849: No Trustpoints

Cause: The wallet does not have any trusted certificates

Action: Ensure that the wallet/keystore has trusted certificates.

NZE-28853: Initialization failure

Cause: Either initialization or module loading has failed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28854: Memory allocation failure

Cause: The allocation of memory failed due to insufficient system memory.

Action: Terminate other processes to free up memory or add memory to the system.

NZE-28855: Unsupported SSL operation

Cause: An unsupported operation was attempted, for example, an attempt was made to select a mode of operation that is not allowed.

Action: Refer to the SSL chapter in the product's documentation.

NZE-28857: Unknown SSL error

Cause: An unknown SSL error occurred.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28858: SSL protocol error

Cause: An error occurred while negotiating the SSL handshake between two processes.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28859: SSL negotiation failure

Cause: An error occurred during negotiation between two processes as part of the SSL protocol. This error will occur if the two sides to the connection do not support a common cipher suite.

Action: Configure each process so they support a common cipher suite. Then attempt the connection again. If error occurs again, enable tracing and retry the connection. Then contact Oracle customer support with the trace output.

NZE-28860: Fatal SSL error

Cause: An error occurred during the SSL connection to the peer. It is likely that this side sent data which the peer rejected.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28861: SSL connection would block

Cause: This error is informational. It should never be communicated to the user.

Action: Enable tracing and retry the connection to determine the exact cause of the error. Contact Oracle customer support if needed.

NZE-28862: SSL connection failed

Cause: This error occurred because the peer closed the connection.

Action: Enable tracing on both sides and examine the trace output. Contact Oracle Customer support with the trace output.

NZE-28863: SSL session not found

Cause: This error is informational. It indicates that a specified session does not exist.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-28864: SSL connection closed gracefully

Cause: This error is informational. It indicates that the connection closed without error.

Action: This error is not normally visible to the user. Enable tracing and retry the connection. If the error persists, contact Oracle customer support.

NZE-28865: SSL connection closed

Cause: The SSL connection closed because of an error in the underlying transport or because the peer process quit unexpectedly.

Action: Enable tracing and retry the connection. The trace output should indicate how the failure occurred.

NZE-28866: Invalid peer certificate encoding

Cause: A field from a certificate in the peer's certificate chain could not be recognized.

Action: Refer to Oracle Wallet Manager documentation to find out how to obtain the peer's certificate. Then contact Oracle customer support with the peer's certificate chain.

NZE-28867: Integer value is too big.

Cause: The certificate presented had an integer field whose value was too large.

Action: Refer to Oracle Wallet Manager documentation to find out how to obtain the peer's certificate. Then contact Oracle customer support with the peer's certificate chain.

NZE-28868: Peer certificate chain check failed.

Cause: The check of the certificate list presented by the peer failed. Possible causes include: 1. the expiration of one of the certificates; 2. a certificate authority in a certificate was not recognized as a trust point; 3. the signature in a certificate could not be verified.

Action: Refer to Oracle Wallet Manager documentation to find out how to open your wallet and ensure that: 1. all of the certificates installed in your wallet are current 2. a certificate authority's certificate from your peer's certificate chain is added as a trusted certificate in your wallet

NZE-28869: Peer's certificate is expired.

Cause: The certificate being used to authenticate a client or server has expired.

Action: Obtain a new certificate, which is unexpired, and attempt the connection again.

NZE-28870: Name comparison failure

Cause: A comparison of the names contained in two certificates failed.

Action: This error is not normally visible to the user. Enable tracing and retry the connection. If the error persists, contact Oracle customer support.

NZE-28871: Peer certificate chain is incomplete.

Cause: The peer certificate chain presented was incomplete because it did not end with a self-signed root certificate.

Action: Refer to Oracle Wallet Manager documentation to find out how to open your wallet and ensure that: 1. the certificate authority's root certificate is self-signed. 2. a certificate authority's certificate from your peer's certificate chain is added as a trusted certificate in your wallet

NZE-28872: Invalid peer certificate format

Cause: The peer certificate does not conform to the X.509v3 standard.

Action: Refer to Oracle Wallet Manager documentation to find out how to get the peer certificate. Then contact Oracle customer support with the peer's certificate.

NZE-28874: SSL: I/O closed - override goodbye kiss

Cause: This error is informational. It indicates that the connection closed without error.

Action: This error is not normally visible to the user. Enable tracing and retry the connection. If the error persists, contact Oracle customer support.

NZE-28875: SSL: use server-gated cryptographic suites

Cause: This is used as a internal status indicator and not really an error.

Action: This message is not normally visible to the user. Enable tracing and retry the connection. If the error persists, contact Oracle customer support.

NZE-28884: invalid cipher suite

Cause: An invalid cipher suite string has been specified in the product's configuration file.

Action: Refer to the product documentation for information about supported cipher suites.

NZE-28885: No certificate with the required key usage found.

Cause: Certificate not created with the appropriate X509v3 key usage extension.

Action: Refer to Oracle Wallet Manager documentation to find out the supported key usages.

NZE-28890: Entrust Login Failed

Cause: An application failed to log in to an Entrust Profile. Possible causes include: 1. Entrust Admin/Authority was not online. 2. Invalid password for Entrust profile was specified. 3. Invalid path to Entrust profile was specified 4. Invalid Entrust initialization file was specified. 5. Entrust Server Login program was not executed (server-side only).

Action: Make sure that: 1. Entrust Authority is online; 2. Password for Entrust profile is specified correctly; 3. Path to Entrust profile is specified correctly; 4. A valid Entrust initialization file is provided; 5. Entrust Server Login program is run before the database startup. For more information, enable tracing and examine the trace output to get exact the Entrust failure codes.

NZE-29000: Certificate not installed

Cause: Trying to delete a certificate which has not been installed.

Action: Refer to the Oracle Wallet Manager documentation for information about delete option.

NZE-29002: SSL transport detected invalid or obsolete server certificate.

Cause: The client detected a mismatch between the server's distinguished name specified on the server's certificate and the server's SID or service name.

Action: Refer to the SSL chapter in Oracle Advanced Security Administrator's Guide for information about enabling server distinguished name matching. Contact your administrator to perform the appropriate action.

NZE-29003: SSL transport detected mismatched server certificate.

Cause: The client detected a mismatch between the server's distinguished name specified on the server's certificate and the server's SID or service name.

Action: Refer to the SSL chapter in Oracle Advanced Security Administrator's Guide for information about enabling server distinguished name matching. Contact your administrator to perform the appropriate action.

NZE-29005: The certificate is invalid.

Cause: The peer certificate encoding is invalid when using SSL 2.0.

Action: Refer to Oracle Wallet Manager documentation to find out how to obtain the peer's certificate. Then contact Oracle customer support with the peer's certificate chain.

NZE-29006: The certificate request message is invalid when using SSL 2.0.

Cause: There is an error processing the SSL 2.0 REQUEST-CERTIFICATE message.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29007: Bad Clear Key Length when using SSL 2.0

Cause: The clear key length of an SSL 2.0 Client Master key handshake message is invalid.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29008: Bad DH Param key length

Cause: The length of the Diffie-Hellman params exceeds export restrictions.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29009: Bad encrypted key length when using SSL 2.0

Cause: The encrypted key length of an SSL 2.0 Client Master key handshake message is invalid.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29010: Export key length does not meet export restrictions.

Cause: The server sent a ServerKeyExchange message with an export key which does not meet export restrictions. For RSA, the export key must be exactly 512 bits.

Action: Obtain a certificate with the appropriate key length.

NZE-29011: Finished message is incorrect.

Cause: The FINISHED message data verification failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29012: Bad key argument length when using SSL 2.0

Cause: The key argument length of an SSL 2.0 Client Master Key handshake message is invalid.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29013: SSL MAC verification failure

Cause: Verification of SSL Record MAC failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29014: Maximum fragment length extension is incorrect.

Cause: The maximum fragment length extension specified is incorrect.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29015: incorrect message length

Cause: The message length is not correct.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29016: inadequate PKCS1 message padding

Cause: The message was not properly padded before encryption.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29017: The premaster secret length is incorrect.

Cause: The premaster secret sent by the peer has an incorrect length.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29018: The premaster secret contains an incorrect version number.

Cause: The premaster secret must contain the same version number as the ClientHello. The version sent by the client was incorrect.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29019: The protocol version is incorrect.

Cause: There is a protocol version mismatch between the two peers.

Action: Specify the correct protocol version in the product's configuration file.

NZE-29020: The handshake record length is too long.

Cause: The handshake record length exceeds the maximum that is allowed by the SSL specification.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29021: Secret key length is incorrect when using SSL 2.0.

Cause: The length of the decrypted ENCRYPTED-KEY is incorrect.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29022: Operation is being attempted on the wrong side of the client/server connection.

Cause: The SSL network layer has detected that the operation has been attempted on the wrong side of the client/server connection.

Action: Select the protocol side (of this protocol) to be the same as the one selected with a previous protocol.

NZE-29023: The buffers are not empty.

Cause: Trying to free buffers that are not empty.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29024: Certificate validation failure

Cause: The certificate sent by the other side could not be validated. This may occur if the certificate has expired, has been revoked, or is invalid for another reason.

Action: Check the certificate to determine whether it is valid. Obtain a new certificate, alert the sender that the certificate has failed, or resend.

NZE-29025: Error found in certificate check callback.

Cause: The application callback failed during additional certificate validation. Additional checks include CRL validation and extension checking.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29026: Decryption failure

Cause: SSL record decryption failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29027: Error in entropy collection

Cause: The internal entropy collection failed to generate enough seed data.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29028: Server verification failure when using SSL 2.0

Cause: Processing of an SSL 2.0 SERVER-VERIFY message failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29029: SSL handshake already completed

Cause: The system is trying to initiate a handshake when it has already been completed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29030: SSL handshake is requested.

Cause: The peer sends this message if it wishes to renegotiate. The application can either proceed with the renegotiation or reject the request.

Action: This is not an error. To find out more details enable tracing and retry the connection. Contact Oracle customer support with the trace output.

NZE-29031: SSL handshake is required.

Cause: Renegotiation cannot proceed before the SSL handshake is completed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29032: The given identity is not complete.

Cause: The certificate list does not contain both private key and certificate.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29034: Correct cipher suite or client authentication is needed.

Cause: Before installing a private key, a cipher suite or client authentication suite using the same key exchange algorithm must be installed first. This has not been done.

Action: Install a cipher suite or client authentication suite that uses the same key exchange algorithm as the private key before re-installing the private key.

NZE-29036: This feature is not supported

Cause: Operation is not supported by the current connection parameters.

Action: Check the Oracle documentation to determine the appropriate connection parameters required for this operation.

NZE-29037: No certificate is present

Cause: The other client or server sent a certificate message that contained no certificates.

Action: Check the other side (client or server) to ensure they have appropriate credentials.

NZE-29038: There are no matching certificates.

Cause: The other client or server sent a certificate message that contained a certificate which was not signed by a trusted certificate authority (CA).

Action: Check to ensure that the other client or server sends a certificate which is signed by a CA that is in your trusted list. Or, include the CA certificate for the other client or server's certificate as a trustpoint in your wallet.

NZE-29039: There are no matching cipher suites.

Cause: Neither end of the handshake can agree on a cipher suite.

Action: Check to ensure that both sides of the handshake select cipher suites that are supported.

NZE-29040: There are no supported cipher suites.

Cause: This end of the handshake cannot support any cipher suites. This connection and the peer have some matching cipher suites, however, these cipher suites cannot be negotiated because they cannot be supported by the connection.

Action: Check to ensure that both sides of the handshake select cipher suites that are supported by the connection. Refer to Oracle documentation for supported cipher suites.

NZE-29043: Read is required.

Cause: Renegotiation with the peer has not yet started. There is application data which must be processed before the handshake can proceed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29044: Renegotiation has already been requested.

Cause: Renegotiation has already been requested.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29045: Renegotiation request has been refused.

Cause: A renegotiated handshake has been refused by the peer.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29046: Session is resumable.

Cause: Server is trying to resume a session with different session parameters.

Action: Server should resume the session with the correct session parameters.

NZE-29047: Mismatch in Transport Layer Security extension

Cause: Neither side can agree on a TLS extension.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29048: Unexpected message received.

Cause: An unexpected message has been received.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29049: Unknown record

Cause: The record type is unknown.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29050: Installed client authentication mode is not supported.

Cause: The enabled client authentication mode(s) cannot be used within the selected cipher suite.

Action: Enable a client authentication mode that can be used within the selected cipher suite.

NZE-29051: The given public key type is not supported.

Cause: The public key in the first certificate is not supported.

Action: Check to ensure that the certificate complies with the X.509v3 standard.

NZE-29052: Write buffer is not empty.

Cause: There is an attempt to free a write buffer that is not empty.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29084: The parameter specified is illegal.

Cause: The parameter is not correct. For example, it could be bad input, or an invalid message.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29095: Index is not correct.

Cause: The instance identified by the index parameter doesn't exist.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29096: The given length is incorrect.

Cause: The specified length is too small or is invalid.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29100: Cannot create local key ID.

Cause: Creation of local key identifier for the certificate or the private key failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29101: Cannot add private key bag.

Cause: The private key could not be added to the PKCS#12 object. Possible reasons are: (i) A required parameter is NULL (ii) The PKCS#12 construct is not supported (iii) An ASN.1 encoding error occurred in the certificate.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29102: Cannot add certificate bag.

Cause: Creation of certificate bag failed. The application could have run out of memory.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29103: Cannot create PKCS #12 wallet.

Cause: Creation of PKCS#12 wallet failed possibly due to memory allocation failure.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29104: Cannot add certificate request.

Cause: Adding certificate request to the PKCS#12 wallet failed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29105: Cannot export PKCS #12 wallet.

Cause: A required parameter is NULL or the PKCS#12 construct is not supported.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29106: Cannot import PKCS #12 wallet.

Cause: A required parameter is NULL or the BER-encoding is malformed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29107: Cannot create PKCS #12 wallet.

Cause: PKCS#12 wallet creation failed. The application may have run out of memory.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29108: Cannot initialize random object.

Cause: The random object could not be initialized or seeded. Either memory allocation has failed or the pseudo random number generator module has not been installed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29109: Cannot create private key object.

Cause: The private key object could not be created. Memory allocation may have failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29110: Invalid PKCS #12 bag type

Cause: The PKCS #12 bag type is invalid. Either one of the required parameters is NULL or the requested OID is not in the list.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29111: Invalid index

Cause: The index passed for getting the bag type is less than 1.

Action: Check to ensure that the index is greater than 1.

NZE-29112: Cannot access attributes from a PKCS #12 certificate bag.

Cause: The certificate cannot be accessed. One of the required parameters is probably NULL, or the index specified by the application does not contain a certbag, or the certificate could be malformed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29113: Cannot access attributes from a PKCS #12 key bag.

Cause: Retrieval of the private key failed. One of the required parameters is probably NULL or the index specified by the application does not contain a key bag.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29114: Cannot import private key.

Cause: The private key could not be imported. One of the required parameters could be NULL or the encoded private key could be malformed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29115: Cannot export private key.

Cause: The private key could not be exported. Either the application ran out of memory or the key type is not valid.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29116: Cannot get PKCS #12 attributes.

Cause: Retrieval of an attribute failed. One of the required parameters could be NULL.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29117: Cannot add PKCS #12 attributes.

Cause: Could not add an attribute. The attribute parameter could be NULL.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29118: Cannot create PKCS #12 attributes.

Cause: Creation of the attributes failed, possibly due to a memory allocation error.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29119: Cannot import certificate.

Cause: The certificate cannot be imported. One of the required parameters could be NULL or the certificate has an invalid X.509 BER or DER encoding.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29120: Cannot export certificate.

Cause: The certificate cannot be exported. One of the required parameters could be NULL.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29122: could not add pkcs11 info to the pkcs12 wallet

Cause: Failed while adding pkcs11 information into a pkcs12 wallet.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29123: could not get pkcs11 info from the pkcs12 wallet

Cause: An error was encountered while retrieving pkcs11 information from the wallet.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29124: pkcs11 library name already set

Cause: pkcs11 library information was already set in the wallet.

Action: Use a different wallet that does not have this information. If issue persists, enable tracing to determine the exact cause of the error. Contact Oracle customer support if needed.

NZE-29125: pkcs11 token label already set

Cause: pkcs11 token label information was already set in the wallet.

Action: Use a different wallet that does not have this information. If issue persists, enable tracing to determine the exact cause of the error. Contact Oracle customer support if needed.

NZE-29126: pkcs11 token passphrase already set

Cause: The pkcs11 token passphrase can be set only once in the wallet.

Action: Use a different wallet that does not have this information. If issue persists, enable tracing to determine the exact cause of the error. Contact Oracle customer support if needed.

NZE-29127: unknown pkcs11 information

Cause: An unknown pkcs11 information type was encountered. The wallet may have been corrupted due to a system error or memory corruption.

Action: Enable tracing and retry the failed operation. Contact Oracle customer support with the trace output.

NZE-29128: pkcs11 library name not set

Cause: The wallet does not have pkcs11 library information.

Action: Ensure that the wallet was created with valid library location or update the wallet with this information.

NZE-29129: pkcs11 token label not set

Cause: The wallet does not have pkcs11 token label information.

Action: Ensure that the wallet was created with valid token label information or update the wallet with this information.

NZE-29130: pkcs11 token passphrase not set

Cause: The wallet does not have pkcs11 token passphrase.

Action: Ensure that the wallet was created with valid token passphrase information or update the wallet with this information.

NZE-29131: pkcs11 certificate label already set in wallet

Cause: The pkcs11 certificate label was already set in the wallet.

Action: Use an empty wallet (created with orapki).

NZE-29135: Seed generation for Random Number Generator failed.

Cause: Generation of seed for random number generator failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29136: The allocated buffer is too small.

Cause: The output buffer is too small.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29137: The global context is incorrect.

Cause: The global context is incorrectly configured or invalid.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29140: Cannot create certificate object.

Cause: Creation of the certificate object failed. The application could have run out of memory.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29141: Cannot import in the der format.

Cause: Cannot import the certificate into the certificate object. The reason could be a malformed certificate.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29150: DES self-test failure

Cause: DES power up self-test has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29151: 3DES self-test failure

Cause: 3DES power up self-test has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29152: SHA-1 self-test failure

Cause: The SHA-1 power up self-test has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29153: RSA self-test failure

Cause: The RSA power up self-test has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29154: deterministic RNG self-test failure

Cause: The deterministic Random Number Generator power up self-test has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29155: continuous key pair consistency check self-test failure

Cause: The public-private key pair check test failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29156: conditional RNG self-test failure

Cause: Continuous Random Number Generator test, which is needed in FIPS mode, has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29157: Unable to build an absolute path to the library.

Cause: Not able to construct an absolute path to the location of the library.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29158: Unable to open library.

Cause: Opening of the library failed.

Action: Check to ensure that the library is present in the location specified, and that it has the appropriate file permissions.

NZE-29159: Unable to read library.

Cause: Not able to read the library on which the DAC check has to be performed. Read call failed.

Action: Check if the library has the appropriate file permissions.

NZE-29160: NZ library being used is different.

Cause: The NZ library being used at runtime is not the same one on which the digest was computed for the software integrity check.

Action: Check to ensure that the library being used is the same as the one on which the digest was pre-computed.

NZE-29161: software integrity self-test failure

Cause: The software integrity check test on the NZ shared library has failed.

Action: Check to ensure that the library being used is the same as the one on which the digest was pre-computed.

NZE-29162: Non-FIPS cipher suites being used in FIPS mode.

Cause: The cipher suite being used does not contain FIPS-approved algorithms.

Action: Use cipher suites that contain FIPS-approved algorithms.

NZE-29163: Third party PKI vendor is not supported in FIPS mode.

Cause: Third party PKI vendors like Entrust and MCS are not supported in FIPS mode.

Action: Use only Oracle PKI when running in FIPS mode.

NZE-29164: External PKCS #12 wallet is not supported in FIPS mode.

Cause: PKCS #12 wallets created using third party software cannot be used in FIPS mode.

Action: Use only PKCS #12 wallets created by Oracle Wallet Manager when running in FIPS mode.

NZE-29166: Bad key size in FIPS mode.

Cause: User attempted to use a key size that is not allowed in FIPS mode

Action: Ensure that the key size meets FIPS usage requirement. For example, RSA key modulus cannot be less than 1024 bits in FIPS mode.

NZE-29176: CRL signature verification failed

Cause: A CRL is verified before being used. CRL signature cannot be verified.

Action: Get a new CRL from CA

NZE-29177: certificate serial number is not in CRL

Cause: Cert is not revoked

Action: n/a

NZE-29178: certificate serial number is in CRL

Cause: Cert has been revoked

Action: Reject the certificate

NZE-29179: certificate validation check failed

Cause: Could not complete checking certificate status with a CRL.

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29180: Unsupported validation protocol

Cause: The certificate validation protocol is not supported

Action: Make sure a supported certificate validation protocol is specified

NZE-29181: ldap_open failed

Cause: Could not connect to the LDAP server

Action: Ensure that correct LDAP information was provided. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-29182: ldap_bind failed

Cause: Could not log in to the LDAP server

Action: Ensure that correct LDAP credentials were provided. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-29183: ldap_search failed

Cause: Failed to complete search operation in LDAP server

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29184: ldap_result failed

Cause: Failed to retrieve results from LDAP operation

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29185: ldap_first_attribute failed

Cause: Could not get the first attribute from LDAP entry.

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29186: ldap_get_values_len failed

Cause: Failed to retrieve attribute values from LDAP entry

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29187: unsupported validation mechanism

Cause: The validation mechanism specified in OID is not supported

Action: Make sure a supported validation mechanism is set in OID

NZE-29188: ldap_count_entries failed

Cause: Failed to get count of entries from a search result chain.

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29189: No entry found in OID

Cause: CRL not found in OID

Action: Upload the CRL to OID

NZE-29190: Multiple entries in OID

Cause: For a given issuer name there should be only one CRL in OID

Action: Make sure there is only one CRL for a given issuer name in OID

NZE-29191: OID connection information not set

Cause: To connect to OID the connection information must be available

Action: Set the OID connection information.

NZE-29192: Validation mechanism not set in OID

Cause: The validation mechanism to be used is not set in OID

Action: Set validation mechanism to be used in OID at cn=ValidationMechanism, cn=Validation, cn=PKI, cn=Products, cn=OracleContext

NZE-29193: no CRL found using CRLDP mechanism

Cause: A CRL could not be fetched using CRL Distribution point (CRLDP)

Action: Contact the CA

NZE-29194: no CRL found in cache

Cause: CRL not in cache

Action: n/a

NZE-29195: CRL is expired

Cause: CRL nextUpdate time is in the past

Action: Get a new CRL from the CA

NZE-29222: Distinguished name does not match.

Cause: Distinguished name (DN) on certificate doesn't match user.

Action: Create the global user in the database with the DN that matches with the one in the user certificate on the client side.

NZE-29223: Cannot create certificate chain.

Cause: Unable to create a certificate chain with the existing trust points for the certificate that is to be installed.

Action: Install the trust point that signed the certificate.

NZE-29224: Cannot locate matching certificate request.

Cause: No matching certificate request for the certificate was found.

Action: Install the correct certificate.

NZE-29225: Certificate already installed.

Cause: Attempting to install a certificate into a persona which already has it.

Action: Do not install the certificate.

NZE-29226: No matching private key found.

Cause: Could not locate a matching private key in the persona for the given certificate (public key).

Action: n/a

NZE-29227: Certificate is expired.

Cause: Certificate is no longer valid..

Action: Obtain another certificate or renew this certificate.

NZE-29228: Cannot calculate the number of bytes for output.

Cause: The cryptographic engine is confused about the algorithm.

Action: Check the parameters being used with the cryptographic functions.

NZE-29229: the magic number found in the header does not match expected

Cause: The input TDU has either been corrupted or is not being used correctly.

Action: Check that the TDU is being used from the beginning. If possible, compare the size of the TDU upon generation to the size being used.

NZE-29230: the header length is not sufficient for message header

Cause: The input TDU has either been corrupted or it is not being used correctly.

Action: Check that the TDU is being used from the beginning. If possible, compare the size of the TDU upon generation to the size being used.

NZE-29231: the cryptographic engine failed to initialize

Cause: During initialization of the cryptographic engine, some failure occurred. Possible causes include running out of memory and trying to seed the random number generator.

Action: Make sure the executable has been linked with compatible library versions, and that you are not running out of swap space.

NZE-29232: the cryptographic engine key initialization failed

Cause: During initialization of a key for cryptography, some failure occurred. This includes running out of memory and passing illegal arguments.

Action: Make sure the executable has been linked with compatible library versions, and that the correct parameters are being used for the cryptographic functions.

NZE-29233: the key object could not be encoded

Cause: The key object may be corrupted or may be an unsupported type.

Action: Check the key object being passed to the encoding routine.

NZE-29234: a key object was not extracted from encoding

Cause: The encoding may be corrupted or may not be a key object at all.

Action: Check the encoding and parameters passed to decoding routine.

NZE-29235: the key information could not be retrieved

Cause: The key may be corrupted or may be an unsupported type.

Action: Check the parameters being used with the cryptographic functions.

NZE-29236: the random number generator will not accept seed

Cause: The cryptographic engine may have run out of memory.

Action: Make sure the executable has been linked with compatible library versions.

NZE-29237: the cryptographic engine could not finish the algorithm

Cause: The cryptographic engine does not have enough information to correctly finish applying the algorithm.

Action: Check the parameters being used with the cryptographic functions.

NZE-29238: the cryptographic engine could not apply the algorithm

Cause: The cryptographic engine does not have enough information to correctly apply the algorithm.

Action: Check the parameters being used with the cryptographic functions.

NZE-29239: the cryptographic engine could not initialize the algorithm

Cause: The cryptographic engine does not have enough information to correctly initialize the algorithm.

Action: Check the parameters being used with the cryptographic functions.

NZE-29240: the cryptographic engine does not recognize the algorithm

Cause: The application may be passing wrong parameters.

Action: Check the parameters being used with the cryptographic functions.

NZE-29241: a buffer block needs more space but its length is fixed

Cause: The application has preallocated an output buffer that is too short for the operation and has specified that the buffer should not grow as needed.

Action: Either preallocate a larger buffer or allow the toolkit to grow the output buffer as needed.

NZE-29242: the asymmetric key is too short to be used with the data.

Cause: An asymmetric key must be at least 11 bytes longer than the data it is being used to encrypt.

Action: Use an asymmetric key with more bits or break the data into smaller pieces.

NZE-29243: the toolkit does not recognize the type of key being used

Cause: The application may be passing wrong parameters.

Action: Check the parameters being used with the toolkit functions.

NZE-29245: the toolkit does not recognize the function being used

Cause: The application is probably passing the wrong parameters.

Action: Check the parameters being used with the toolkit functions.

NZE-29246: the toolkit could not parse the tdu

Cause: The TDU could be corrupted.

Action: Check the parameters being used with the toolkit functions.

NZE-29247: an unopen toolkit object was used before it was opened

Cause: Some toolkit objects must be opened before they can be used.

Action: Check the parameters being used with the toolkit functions.

NZE-29248: an unrecognized WRL was used to open a wallet

Cause: WRL's have a specific set of types and must be formatted correctly.

Action: Check the parameters being used with the toolkit functions.

NZE-29249: an unrecognized state was passed to a cryptographic function

Cause: The application is probably passing the wrong parameters.

Action: Check the parameters being used with the toolkit functions.

NZE-43000 to NZE-43084

NZE-43000: pkcs11 library not found

Cause: The PKCS11 library could not be found.

Action: Make sure that the pkcs11 library is at the location specified in the wallet.

NZE-43001: pkcs11 token not found

Cause: The PKCS11 token could not be found.

Action: Make sure that a token with correct label is present in slot.

NZE-43002: pkcs11 passphrase is wrong

Cause: The PKCS11 passphrase is wrong.

Action: Make sure that the token passphrase specified is correct.

NZE-43005: pkcs11: No tokens present

Cause: a token is not present in the slot

Action: Place a pkcs11 token in the slot

NZE-43011: pkcs11: Token login failed

Cause: To login to the pkcs11 token a correct passphrase is needed

Action: Check the token passphrase.

NZE-43014: pkcs11: finding private key on token error

Cause: error occurred while finding private key on token

Action: Make sure the private key corresponding to the certificate in wallet is on the token. Check trace message

NZE-43015: pkcs11: key pair gen error

Cause: error occurred while generating key pair using HSM

Action: Check trace message

NZE-43017: pkcs11: No certificate found on the smart card/HSM

Cause: No certificate was found on the smart card/HSM.

Action: Follow smart card/HSM vendor documentation to populate the smart card/HSM with certificate.

NZE-43018: pkcs11: No user certificate found on the smart card/HSM

Cause: No user certificate was found on the smart card/HSM.

Action: Follow smart card/HSM vendor documentation to populate the smart card/HSM with certificate and private key.

NZE-43019: pkcs11: No certificate found on smart card/HSM label with given cert label

Cause: There were no certificate labels on the smart card/HSM that matched the certificate label specified in the wallet.

Action: Follow smart card/HSM vendor documentation to set certificate label in smart card/HSM.

NZE-43020: pkcs11: Multiple certificates found on smart card/HSM with given cert label

Cause: Certificates with identical labels were found in the smart card/HSM.

Action: Follow smart card/HSM vendor documentation to assign unique certificate labels to certificates.

NZE-43021: pkcs11: Certificate with given cert label is not a user cert

Cause: The certificate with the specified certificate label did not have a matching private key in the smart card/HSM.

Action: Follow smart card/HSM vendor instructions to create credentials (certificate/private key) in smart card/HSM.

NZE-43084: Certificate is using forbidden or unsupported signature algorithm.

Cause: Certificate may be using MD2 or MD5 signature algorithm.

Action: Review wallet content and remove or replace certificates using obsolete algorithms.

O2F-00301 to O2F-00341

O2F-00301: Error attempting to read from the INTYPE file

Cause: An operating system error occurred while attempting to read from the INTYPE file.

Action: Try opening the INTYPE file with an editor to make sure you are able to access the file.

O2F-00302: Unable to allocate memory

Cause: OTT was unable to allocate memory.

Action: Contact ORACLE customer support.

O2F-00303: No INTYPE file was specified

Cause: The required option INTYPE was not specified.

Action: Set the INTYPE option to the name of the file containing names of types for OTT to translate. The INTYPE option may be specified on the command line or in a CONFIG file.

O2F-00304: Invalid filename for the INTYPE file

Cause: The filename specified for the INTYPE file is not syntactically correct.

Action: Make sure you spelled the filename of the INTYPE file correctly.

O2F-00305: Error opening the INTYPE file for reading

Cause: An operating system error occurred while attempting to open the INTYPE file.

Action: Make sure you spelled the filename of the INTYPE file correctly. Try opening the INTYPE file with an editor to make sure you have access to the file.

O2F-00306: Unable to close the INTYPE file

Cause: An operating system error occurred while attempting to close the INTYPE file.

Action: Try opening the INTYPE file with an editor to make sure you are able to access the file.

O2F-00307: Unable to read the INTYPE file

Cause: The first token of the INTYPE file was not read. Either an operating system error occurred while attempting to read from the INTYPE file, or all lines of the INTYPE file are blank lines or comment lines.

Action: Try opening the INTYPE file with an editor to make sure you are able to access the file. Make sure the INTYPE file contains one or more type specifications.

O2F-00308: No type specifications were seen in the INTYPE file

Cause: Either there are no type specifications in the INTYPE file, or the first type specification could not be read due to a previously reported error.

Action: Fix any previously reported errors. Make sure there are one or more type specifications in the INTYPE file.

O2F-00309: Name of user-defined type is illegal or missing

Cause: The name of a user-defined type is expected following the keyword TYPE at the beginning of a type specification. No legal type name was seen.

Action: Make sure that the type specification is syntactically correct, and that the type name is spelled correctly.

O2F-00310: Illegal or missing identifier name

Cause: A legal C or C++ identifier was expected following AS, but was not seen.

Action: Use a legal C or C++ identifier, consisting of letters, digits, and underscores not beginning with a digit.

O2F-00311: Illegal or missing file name

Cause: A legal file name was expected, but was not seen.

Action: Make sure your TYPE file syntax is correct. Use a correct file name.

O2F-00312: Illegal or missing type version string

Cause: A type version name was expected, but was not seen.

Action: Make sure your TYPE file syntax is correct. Use a correct version name.

O2F-00313: Illegal or missing attribute name

Cause: An attribute name was expected in the INTYPE file, but was not seen.

Action: Make sure your TYPE file syntax is correct. Use a correct attribute name.

O2F-00314: AS expected but not seen in the INTYPE file

Cause: Incorrect syntax in the INTYPE file.

Action: Make sure your TYPE file syntax is correct.

O2F-00315: An attribute of a type is listed twice in a type specification

Cause: An attribute of a user-defined type is listed twice in a type specification in the INTYPE file. The second occurrence is ignored.

Action: Remove one of the two occurrences of the attribute.

O2F-00316: An unexpected token was seen at the end of a type specification

Cause: There is a syntax error in the INTYPE file.

Action: Check your documentation to make sure the type specifications in the INTYPE file are syntactically correct. Check your documentation to make sure the type specifications

O2F-00317: Error opening the ERRTYPE file for writing

Cause: An operating system error occurred while attempting to open the ERRTYPE file for writing.

Action: Make sure you spelled the ERRTYPE filename correctly. Try creating or modifying the ERRTYPE file to make sure you have write access to the file.

O2F-00318: Error writing to the OUTTYPE file

Cause: An operating system error occurred when attempting to write to the OUTTYPE file.

Action: Make sure you have operating system permission to write to the file. Also, make sure disk space is available.

O2F-00319: No OUTTYPE file specified

Cause: The required option OUTTYPE was not specified.

Action: Set the OUTTYPE option to the name of the file to which the TYPE file produced by OTT should be written. The OUTTYPE option may be specified on the command line or in a CONFIG file.

O2F-00320: Invalid filename for the OUTTYPE file

Cause: The filename specified for the OUTTYPE file is not syntactically correct.

Action: Make sure you spelled the filename of the OUTTYPE file correctly.

O2F-00321: Error opening the OUTTYPE file for writing

Cause: An operating system error occurred while attempting to open the OUTTYPE file.

Action: Make sure you spelled the filename of the OUTTYPE file correctly. Make sure you have operating system permission to open the the file.

O2F-00322: Unable to close the OUTTYPE file

Cause: An operating system error occurred while attempting to close the OUTTYPE file.

Action: Try opening the OUTTYPE file with an editor to make sure you are able to access the file.

O2F-00323: Internal error in OTT facility O2F

Cause: An internal OTT error occurred in the O2F component of OTT.

Action: Contact ORACLE customer support.

O2F-00324: Unable to convert from the database character set to the compiler character set

Cause: The name of a type, attribute, or method cannot be converted from the client character set in effect when OTT was invoked to the compiler character set (typically ASCII or EBCDIC).

Action: A name is translated first from the database character set to the client character set, and then from the client character set to the compiler character set. The client character set is specified in a platform-dependent manner (On UNIX platforms, the client character set is specified by setting the NLS_LANG environment variable). Use a client character set that can be translated to the compiler character set. The compiler character set itself is one such character set. Specify synonyms in the INTYPE file for any names of database objects that cannot be successfully translated to the client character set.

O2F-00325: None of the characters in a name were legal identifier characters

Cause: None of the characters in the name of a database entity could be translated to a character that may begin a C or C++ identifier, such as a letter or an underscore.

Action: Specify an explicit translation for the name in the INTYPE file.

O2F-00326: Some characters in this name were not legal identifier characters

Cause: One or more characters in the name of a database entity could not be translated to a character that may appear in a C or C++ identifier, such as a letter, an underscore, or a digit. The characters that could not be translated were replaced with underscores.

Action: Make sure that the name is spelled correctly, and that it is terminated by a blank, the end of a line, or an equals sign ("="). You may use the translated name with added underscores, or you may specify an explicit translation for the name in the INTYPE file.

O2F-00327: CASE option has an illegal value

Cause: The value given for the CASE option in the INTYPE file is not legal.

Action: Change the value given for the CASE option to one of the following legal values: SAME, LOWER, UPPER, or OPPOSITE.

O2F-00328: Illegal INITFUNC name

Cause: The function name given for the INITFUNC option in the INTYPE file is not a legal C or C++ identifier.

Action: Specify the name of the INITFUNC function as a legal C or C++ identifier. This name can be given in the INTYPE file, given on the command line, or derived from the INITFILE name.

O2F-00329: Type or option specification expected

Cause: A type or option specification was expected in the INTYPE file, but was not seen.

Action: Check the INTYPE file for syntax errors. Supply a type or option specification. A type specification begins with the word TYPE. An option specification begins with the word CASE, INITFILE, or INITFUNC.

O2F-00330: Name exceeds 265 bytes in length

Cause: A name seen in the INTYPE file exceeds 265 bytes in length.

Action: Choose a shorter name.

O2F-00331: A syntactically illegal name was seen in the INTYPE file

Cause: A syntax error occurred in a name used in the INTYPE file.

Action: If the name is quoted, make sure that the quotes are at the beginning and at the end of the name. If a period (which separates a schema name from a type name) appears, make sure that the schema name and the type name are both present.

O2F-00332: A database link may not appear in the name of a user-defined type

Cause: A database link was seen in the name of a user-defined type. This feature is not yet supported.

Action: Declare the user-defined type in the database to which OTT connects.

O2F-00333: An unexpected token appeared where a keyword was expected in the INTYPE file

Cause: A keyword such as TYPE was expected in the INTYPE file, but an incorrect or misspelled keyword was seen.

Action: Verify that your TYPE specification obeys the syntax described in your documentation. Verify that your keyword is spelled correctly.

O2F-00334: A user-defined type is listed more than once in the INTYPE file

Cause: The same name of a user-defined type appears in more than one type specification. The duplicate specifications of the type name will be ignored.

Action: Put all of the information about the type, including all type name and attribute name translations, in a single TYPE specification, and eliminate the duplicate TYPE specifications.

O2F-00335: Internal error in O2F component of OTT

Cause: A request was made that all types in the database schema are to database.

Action: List the types to be processed in an INTYPE file. Contact ORACLE customer support.

O2F-00336: Error reported by subsystem:\n

Cause: A request was made to generate declarations for all the types in a database schema. An error occurred in a subsystem when accessing the database.

Action: Examine the error message reported by the subsystem to determine its cause. List the types to be processed in an INTYPE file.

O2F-00337: Schema not found, or no types found in schema

Cause: A request was made to generate declarations for all the types in a database schema. Either the schema was not found, no user-declared types were found in the schema, or unable to connect to Oracle.

Action: Ensure that a login/password string was specified for OTT and that the Oracle database can be accessed with it. Ensure that the USER_TYPES table contains at least one row.

O2F-00338: Illegal or missing package name

Cause: A legal Java package name was expected following IN or PACKAGE or IN PACKAGE, but was not seen.

Action: Use a legal Java package name.

O2F-00339: CODE option has an illegal value

Cause: The value given for the CODE option in the INTYPE file is not legal.

Action: Change the value given for the CODE option to one of the following legal values: C, ANSI_C, KR_C, JAVA, NATIVE_JAVA, ORACLE_JAVA.

O2F-00340: Name was null

Cause: A name had a length of 0 characters.

Action: This error should never be reported to the user. Contact ORACLE customer support.

O2F-00341: An error occurred for which no message is available

Cause: The cause of this error was not reported.

Action: Contact ORACLE customer support.

O2I-00101 to O2I-00133

O2I-00101: Invalid value for the USERID parameter

Cause: The value supplied for the USERID parameter is not a legal *username/password[@databasename]* string.

Action: Set the USERID option to the correct *username/password* or *username/password@databasename* combination to use when connecting to the database. If you have an OPS\$ account, you may instead omit the USERID option, in which case OTT will attempt to connect to the database using the userid OPS\$*username*. The USERID option may be specified on the command line or in a CONFIG file.

O2I-00102: Unable to connect to Oracle

Cause: OTT could not connect to Oracle with the username, password, and, if applicable, database link that was supplied. Either the USERID option value was incorrect, or, if the USERID was not supplied, the userid OPS\$*username* was not accepted.

Action: Check that the username and password are current and correct. Run another program that connects to Oracle to verify that you can connect using that username and password.

O2I-00103: Two file names refer to the same HFILE file in the INTYPE file

Cause: Two different file names have been used in the INTYPE file to refer to the same HFILE file, or different file names have been used to refer to the same HFILE file on the command line and in the INTYPE file.

Action: Consistently refer to each HFILE file using the same file name.

O2I-00110: Internal error in OTT component O2I

Cause: An internal OTT error occurred in the O2I component of OTT.

Action: Contact ORACLE customer support.

O2I-00111: Unable to allocate memory

Cause: OTT was unable to allocate memory.

Action: Contact ORACLE customer support.

O2I-00112: Unable to write to the HFILE file

Cause: An operating system error occurred when attempting to write to the HFILE file.

Action: Make sure you have operating system permission to write to the file. Also, make sure disk space is available.

O2I-00113: No HFILE specified

Cause: The HFILE file to which C declarations generated by OTT are written was not specified.

Action: Specify the global HFILE option on the command line or in a CONFIG file. You may choose a different HFILE for a particular type by specifying a different HFILE in the INTYPE file entry describing the type. If every INTYPE file entry specifies an HFILE, and if none of the types in the HFILE require declarations of types not mentioned there, the global HFILE option may be omitted. An INTYPE file generated by a previous invocation of OTT satisfies these conditions.

O2I-00114: Invalid HFILE file name

Cause: An HFILE file name was specified that is not syntactically correct.

Action: Make sure the HFILE filename is spelled correctly.

O2I-00115: Error opening the HFILE file

Cause: An operating system error occurred while attempting to open the HFILE file for writing.

Action: Make sure the HFILE filename is spelled correctly. Try creating or modifying the HFILE to make sure you have write access to the file.

O2I-00116: Unable to close the HFILE file

Cause: An operating system error occurred while attempting to close the HFILE file.

Action: Try creating or modifying the HFILE file to make sure you are able to access the file.

O2I-00117: Internal error: No message file for component O2U

Cause: The message file for the internal OTT component O2U was not found. OTT may not be correctly installed.

Action: Contact ORACLE customer support.

O2I-00118: This user-defined type was not found in the database

Cause: A user-defined type specified in the INTYPE file was not found in the database.

Action: Make sure the name of the type is spelled correctly. Make sure the type is actually declared in the database.

O2I-00119: Warning reported by subsystem:\n

Cause: A subsystem invoked by OTT reported a warning. This warning immediately follows the "Warning reported by subsystem" message.

Action: Examine the warning reported by the subsystem to determine its cause.

O2I-00120: Error reported by subsystem:\n

Cause: A subsystem invoked by OTT reported an error. This error immediately follows the "Error reported by subsystem" message.

Action: Examine the error message reported by the subsystem to determine its cause.

O2I-00121: No value was specified for the CODE option

Cause: The required CODE option was not specified on the command line or in a configuration file.

Action: Specify the CODE option on the command line or in a configuration file. Currently, the following values of the CODE option are supported: CODE=ANSI_C, CODE=KR_C, CODE=C

O2I-00122: Invalid filename for the INITFILE file

Cause: The filename specified for the INITFILE file is not syntactically correct.

Action: Make sure the filename of the INITFILE file is spelled correctly.

O2I-00123: Unable to close the INITFILE file

Cause: An operating system error occurred while attempting to close the INITFILE file.

Action: Try opening the INITFILE file with an editor to make sure the file can be accessed.

O2I-00124: Error opening the INITFILE file for writing

Cause: An operating system error occurred while attempting to open the INITFILE file for writing.

Action: Make sure the INITFILE filename is spelled correctly. Try creating or modifying the INITFILE file to make sure you have write access to the file.

O2I-00125: Error writing to the INITFILE file

Cause: An operating system error occurred when attempting to write to the INITFILE file.

Action: Make sure you have operating system permission to write to the file. Also, make sure disk space is available.

O2I-00126: You must specify an INTYPE file with SCHEMA_NAMES=FROM_INTYPE

Cause: The option SCHEMA_NAMES=FROM_INTYPE requests that schema names be written to the OUTTYPE file as given in the INTYPE file. However, an INTYPE file was not specified.

Action: Either supply the name of an INTYPE file, or specify the SCHEMA_NAMES option ALWAYS or IF_NEEDED.

O2I-00127: Illegal INITFUNC name

Cause: The name of the INITFUNC function is not a legal C or C++ identifier.

Action: Specify the name of the INITFUNC function as a legal C or C++ identifier. This name may be given in the INTYPE file, given on the command line, or derived from the INITFILE name.

O2I-00128: Unable to write to the Java file

Cause: An operating system error occurred when attempting to write to a Java source file.

Action: Make sure you have operating system permission to write to the file. Also, make sure disk space is available.

O2I-00129: No Java file specified

Cause: The file to which Java declarations generated by OTT are written was not specified.

Action: This message should never be seen, because Java files are named after the classes declared within them. Contact ORACLE customer support.

O2I-00130: Invalid Java file name

Cause: A Java file name was specified that is not syntactically correct.

Action: Make sure the Java filename is spelled correctly.

O2I-00131: Error opening a Java file

Cause: An operating system error occurred while attempting to open a Java file for writing.

Action: Make sure the filename is spelled correctly. Try creating or modifying the file to make sure you have write access to the file.

O2I-00132: Unable to close a Java file

Cause: An operating system error occurred while attempting to close a Java file.

Action: Try creating or modifying the Java file to make sure you are able to access the file.

O2I-00133: An error occurred for which no message is available

Cause: The cause of this error was not reported.

Action: Contact ORACLE customer support.

O2U-00200 to O2U-00212

O2U-00200: Internal error in OTT facility O2U

Cause: An internal OTT error occurred in the O2U facility of OTT.

Action: Contact ORACLE customer support.

O2U-00201: Illegal arguments to function o2upt()

Cause: Illegal arguments were passed to the function o2upt(). This is an internal error that should not be encountered by an end user.

Action: Contact ORACLE customer support.

O2U-00202: Invalid data passed to function

Cause: Arguments with incorrect values were passed to the function o2upt(). This is an internal error that should not be encountered by the end user.

Action: Contact ORACLE customer support.

O2U-00203: Type to be declared must be an object type or a named collection type

Cause: You have asked OTT to generate code for a type it does not support. When generating Java code, OTT will only generate code for object types. When generating C declarations, OTT will only generate declarations for object types and named collection types.

Action: You are probably asking OTT to declare a built-in type, or, if you are generating Java code, a named collection type. Do not ask OTT to generate a declaration for this type.

O2U-00204: Unable to convert from the database character set to the compiler character set

Cause: The name of a type, attribute, or method cannot be converted from the client character set in effect when OTT was invoked to the compiler character set (typically ASCII or EBCDIC).

Action: A name is translated first from the database character set to the client character set, and then from the client character set to the compiler character set. The client character set is specified in a platform-dependent manner (On UNIX platforms, the client character set is specified by setting the NLS_LANG environment variable.) Use a client character set that includes the character set of the INTYPE file and can be translated to the compiler character set. The database character set is one such character set. Specify synonyms in the INTYPE file for any names of database objects that cannot be successfully translated to the client character set.

O2U-00205: None of the characters in a type name were legal identifier characters

Cause: None of the characters in the name of a user-defined type could be translated to a character that can begin a C or C++ identifier, such as a letter or an underscore.

Action: Specify an explicit translation for the type name in the INTYPE file.

O2U-00206: Some characters in a type name were not legal identifier characters

Cause: One or more characters in the name of a user-define type could not be translated to a character that can appear in a C or C++ identifier, such as a letter, an underscore, or a digit. The characters that could not be translated were replaced with underscores.

Action: Specify an explicit translation for the type name in the INTYPE file, or just use the translated type name with added underscores.

O2U-00207: None of the characters in an attribute name were legal identifier characters

Cause: None of the characters in the name of an attribute of a type could be translated to a character that can begin a C or C++ identifier, such as a letter or an underscore. To find the affected attribute, look in the declaration generated for this type for data member names that are obviously incorrect.

Action: Specify an explicit translation for the attribute name in the INTYPE file.

O2U-00208: One or more characters in an attribute name were not legal identifier characters

Cause: If an attribute name contains one or more characters that can not be translated to a legal C or C++ identifier character, the characters that can not be translated are replaced with underscores. To find the affected attribute or attributes, look in the declaration generated for this type for data member names that have extra underscores not present in the original attribute names.

Action: Specify explicit translations for the affected attribute names in the INTYPE file, or just use the translated attribute names with added underscores.

O2U-00209: Attribute or function name to be translated was not found

Cause: This name, for which a translation was requested, is not the name of an attribute or a function of the current type.

Action: Make sure that the name is spelled correctly, and is the name of an attribute or function defined in the current type.

O2U-00210: Unable to allocate memory

Cause: OTT was unable to allocate memory.

Action: Contact ORACLE customer support.

O2U-00211: A type without attributes was translated

Cause: OTT translated a type without attributes. The corresponding C-type will be a struct without any components, which is not legal C. The empty type in the database may be the result of an error during type creation. Additionally, incomplete types may be used temporarily in the creation of types that reference one another.

Action: Re-create a full version of the type in the database and then re-run OTT.

O2U-00212: An error occurred for which no message is available

Cause: The cause of this error was not reported.

Action: Contact ORACLE customer support.

OCI-00601 to OCI-64495

OCI-00601: cleanup lock conflict

Cause: PMON process runs into lock conflict trying to recover processes.

Action: This is trapped internally, no action necessary.

OCI-00602: internal programming exception

Cause: Internal programming exception.

Action: Report as a bug. Caution: The following error code is not relocatable.

OCI-00972: identifier is too long

Cause: An identifier with more than 30 characters was specified.

Action: Specify at most 30 characters.

OCI-01841: (full) year must be between -4713 and +9999, and not be 0

Cause: Illegal year entered

Action: Input year in the specified range

OCI-01854: julian date must be between 1 and 5373484

Cause: An invalid Julian date was entered.

Action: Enter a valid Julian date between 1 and 5373484.

OCI-01858: a non-numeric character was found where a numeric was expected

Cause: The input data to be converted using a date format model was incorrect. The input data did not contain a number where a number was required by the format model.

Action: Fix the input data or the date format model to make sure the elements match in number and type. Then retry the operation.

OCI-01859: a non-alphabetic character was found where an alphabetic was expected

Cause: The input data to be converted using a date format model was incorrect. The input data did not contain a letter where a letter was required by the format model.

Action: Fix the input data or the date format model to make sure the elements match in number and type. Then retry the operation.

OCI-01861: literal does not match format string

Cause: Literals in the input must be the same length as literals in the format string (with the exception of leading whitespace). If the "FX" modifier has been toggled on, the literal must match exactly, with no extra whitespace.

Action: Correct the format string to match the literal.

OCI-01862: wrong number of digits for this format item

Cause: The number of digits used for this format item is not equal to the number necessary for this format when specifying Format eXact ("FX") for this item.

Action: Fill out this format item with leading zeros to the number necessary for this format. (This is generally the number of characters in the format code--DD needs 2 digits, for example. The exceptions are HH24 & HH12, which both need 2, and J, which needs 9.)

OCI-01864: the date is out of range for the current calendar

Cause: Your calendar doesn't extend to the specified date.

Action: Specify a date which is legal for this calendar.

OCI-01865: not a valid era

Cause: Era input does not match a known era.

Action: Provide a valid era on input.

OCI-01867: the interval was invalid

Cause: The character string you specified is not a valid interval.

Action: Please specify a valid interval.

OCI-01868: the leading precision of the interval was too small

Cause: The leading precision of the interval is too small to store the specified interval.

Action: Increase the leading precision of the interval or specify an interval with a smaller leading precision.

OCI-01870: the intervals or datetimes were not mutually comparable

Cause: The intervals or datetimes are not mutually comparable.

Action: Specify a pair of intervals or datetimes that are mutually comparable.

OCI-01871: the number of seconds must be less than 60

Cause: The number of seconds specified was greater than 59.

Action: Specify a value for seconds that is 59 or smaller.

OCI-01873: the leading precision of the interval was too small

Cause: The leading precision of the interval is too small to store the specified interval.

Action: Increase the leading precision of the interval or specify an interval with a smaller leading precision.

OCI-01874: time zone hour must be between -12 and 14

Cause: The time zone hour specified was not in the valid range.

Action: Specify a time zone hour between -12 and 14.

OCI-01875: time zone minute must be between -59 and 59

Cause: The time zone minute specified was not in the valid range.

Action: Specify a time zone minute between -59 and 59.

OCI-01876: year must be at least -4713

Cause: The specified year was not in range.

Action: Specify a year that is greater than or equal to -4713.

OCI-01878: specified field not found in datetime or interval

Cause: The specified field was not found in the datetime or interval.

Action: Make sure that the specified field is in the datetime or interval.

OCI-01879: the hh25 field must be between 0 and 24

Cause: The specified hh25 field was not in the valid range.

Action: Specify an hh25 field between 0 and 24.

OCI-01880: the fractional seconds must be between 0 and 999999999

Cause: The specified fractional seconds were not in the valid range.

Action: Specify a value for fractional seconds between 0 and 999999999.

OCI-01881: time zone region ID is invalid

Cause: The region ID referenced an invalid region.

Action: Contact Oracle Support Services.

OCI-01882: time zone region not found

Cause: The specified region name was not found.

Action: Contact Oracle Support Services.

OCI-01883: overlap was disabled during a region transition

Cause: The region was changing state and the overlap flag was disabled.

Action: Contact Oracle Support Services.

OCI-01884: divisor is equal to zero

Cause: An attempt was made to divide by zero.

Action: Avoid zero divisor.

OCI-01890: NLS error detected

Cause: An NLS error was detected.

Action: Look for additional error messages and take appropriate action. If there are no additional errors, call Oracle Support Services.

OCI-01898: too many precision specifiers

Cause: While trying to truncate or round dates, extra data was found in the date format picture

Action: Check the syntax of the date format picture and retry.

OCI-02083: database name has illegal character '*string*'

Cause: Supplied database name can contain only A-Z, 0-9, '_', '#', '\$', '!' and '@' characters.

Action: n/a

OCI-02084: database name is missing a component

Cause: Supplied database name cannot contain a leading '.', trailing '.' or '@', or two '.' or '@' in a row.

Action: n/a

OCI-04020: deadlock detected while trying to lock object

stringstringstringstringstring

Cause: While trying to lock a library object, a deadlock is detected.

Action: Retry the operation later.

OCI-04021: timeout occurred while waiting to lock object

stringstringstringstringstring

Cause: While waiting to lock a library object, a timeout is occurred.

Action: Retry the operation later.

OCI-04022: nowait requested, but had to wait to lock dictionary object

Cause: Had to wait to lock a library object during a nowait request.

Action: Retry the operation later.

OCI-04028: cannot generate diana for object *stringstringstringstringstring*

Cause: Cannot generate diana for an object because of lock conflict.

Action: Please report this error to your support representative.

OCI-04029: error ORA-*string* occurred when querying *stringstringstring*

Cause: The table or view being queried might be missing. The error number indicates the error.

Action: Fix the error.

OCI-04030: out of process memory when trying to allocate *string* bytes (*string,string*)

Cause: Operating system process private memory has been exhausted

Action: n/a

OCI-04031: unable to allocate *string* bytes of shared memory (*"string","string","string"*)

Cause: More shared memory is needed than was allocated in the shared pool.

Action: Either use the `dbms_shared_pool` package to pin large packages, reduce your use of shared memory, or increase the amount of available shared memory by increasing the value of the `init.ora` parameter `"shared_pool_size"`.

OCI-04054: database link *string* does not exist

Cause: During compilation of a PL/SQL block, an attempt was made to use a non-existent database link.

Action: Either use a different database link or create the database link.

OCI-04060: insufficient privileges to execute *string*

Cause: Attempt to execute a stored procedure without sufficient privileges.

Action: Get necessary privileges.

OCI-04061: existing state of *string* has been invalidated

Cause: Attempt to resume the execution of a stored procedure using the existing state which has become invalid or inconsistent with the stored procedure because the procedure has been altered or dropped.

Action: Try again; this error should have caused the existing state of all packages to be re-initialized.

OCI-04062: timestamp of *string* has been changed

Cause: Attempt to execute a stored procedure to serve an RPC stub which specifies a timestamp that is different from the current timestamp of the procedure.

Action: Recompile the caller in order to pick up the new timestamp.

OCI-04063: *string* has errors

Cause: Attempt to execute a stored procedure or use a view that has errors. For stored procedures, the problem could be syntax errors or references to other, non-existent procedures. For views, the problem could be a reference in the view's defining query to a non-existent table.

Action: Fix the errors and/or create referenced objects as necessary.

OCI-04064: not executed, invalidated *string*

Cause: Attempt to execute a stored procedure that has been invalidated.

Action: Recompile it.

OCI-04065: not executed, altered or dropped *string*

Cause: Attempt to execute a stored procedure that has been altered or dropped thus making it not callable from the calling procedure.

Action: Recompile its dependents.

OCI-04066: non-executable object, *string*

Cause: Attempt to execute a non-procedure.

Action: Make sure that a correct name is given.

OCI-04067: not executed, *string* does not exist

Cause: Attempt to execute a non-existent stored procedure.

Action: Make sure that a correct name is given.

OCI-04068: existing state of packages*stringstringstring* has been discarded

Cause: One of errors 4060 - 4067 when attempt to execute a stored procedure.

Action: Try again after proper re-initialization of any application's state.

OCI-19200: Invalid column specification

Cause: All input arguments must be valid columns

Action: Specify a valid list of columns

OCI-19201: Datatype not supported

Cause: The particular datatype is not supported in the XMLGEN operator

Action: Specify only supported datatypes as arguments to the XMLGEN operator

OCI-19202: Error occurred in XML processing*string*

Cause: An error occurred when processing the XML function

Action: Check the given error message and fix the appropriate problem

OCI-19203: Error occurred in DBMS_XMLGEN processing*string*

Cause: An error occurred when processing the DBMS_XMLGEN functions

Action: Check the given error message and fix the appropriate problem

OCI-19204: Non-scalar value '*string*' is marked as XML attribute

Cause: Only scalar values (i.e. values which are not of object or collection type) can be marked as XML attribute, i.e. is prefixed by '@'. In this case, a non-scalar value was prefixed with '@'

Action: Remove the '@' sign, or make the value a scalar.

OCI-19205: Attribute '*string*' qualifies a non-scalar value in the select list

Cause: The attribute immediately follows a value of object or collection type in the select list or type definition.

Action: Remove the '@' sign, or make the previous value a scalar.

OCI-19206: Invalid value for query or REF CURSOR parameter

Cause: The queryString argument passed to DBMS_XMLGEN.newContext was not a valid query, or REF CURSOR.

Action: Rewrite the query so that the queryString argument is a valid query or REF CURSOR.

OCI-19207: scalar parameter *string* of XMLELEMENT cannot have an alias.

Cause: The scalar parameter to XMLELEMENT has been qualified with an alias.

Action: Remove the AS clause of the scalar element.

OCI-19208: parameter *string* of function *string* must be aliased

Cause: The indicated parameter of the XML generation function has not been aliased, although it is an expression.

Action: Specify an alias for the expression using the AS clause.

OCI-19209: invalid or unsupported formatting argument

Cause: An invalid or unsupported formatting argument was supplied

Action: Change the formatting argument to legal supported values

OCI-19210: column '*string*', specified to be a key or update column for DBMS_XMLSTORE, does not exist in table '*string*'

Cause: The column specified using setKeyColumn()/setUpdateColumn() did not exist in the table.

Action: Change the column specified to be a column in the table

OCI-19211: column '*string*', specified as key using DBMS_XMLSTORE.setKeyColumn() , must be of scalar type

Cause: The column specified using setKeyColumn() was a non-scalar type column.

Action: Change the column specified to be a scalar column in the table

OCI-19212: no key columns specified before call to DBMS_XMLSTORE.updateXML()

Cause: No columns were specified as key columns before the call to DBMS_XMLSTORE.updateXML.

Action: Use DBMS_XMLSTORE.setKeyColumn() to specify key columns

OCI-21300: objects option not installed

Cause: The objects option is not installed at this site. Object types and other object features are, therefore, unavailable.

Action: Install the objects option. The objects option is not part of the Oracle Server product and must be purchased separately. Contact an Oracle sales representative if the objects option needs to be purchased.

OCI-21301: not initialized in object mode

Cause: This function requires the oci process to be initialized in object mode.

Action: Specify OCI_OBJECT mode when calling OCIInitialize().

OCI-21500: internal error code, arguments: [string], [string], [string], [string], [string], [string], [string], [string]

Cause: This is the generic error number for the OCI environment (client-side) internal errors. This indicates that the OCI environment has encountered an exceptional condition.

Action: Report as a bug - the first argument is the internal error number.

OCI-21501: program could not allocate memory

Cause: The operating system has run out of memory.

Action: Take action to make more memory available to the program.

OCI-21503: program terminated by fatal error

Cause: A program is in an unrecoverable error state.

Action: Report as a bug.

OCI-21520: database server driver not installed

Cause: User attempted to access a database server through an object-mode OCI environment but the necessary driver for supporting such access to the database server is not installed or linked in.

Action: Check if the driver corresponding to the database server has been installed/linked in and entered in the server driver table.

OCI-21521: exceeded maximum number of connections in OCI (object mode only)

Cause: User exceeded the maximum number of connections (255) that can be supported by an OCI environment in object mode.

Action: Close some of existing and unused connections before opening more connections.

OCI-21522: attempted to use an invalid connection in OCI (object mode only)

Cause: User attempted to use an invalid connection or a connection that has been terminated in an OCI environment (object mode), or user attempted to dereference a REF obtained from a connection which has been terminated.

Action: Ensure that the connection exists and is still valid.

OCI-21523: functionality not supported by the server (object mode only)

Cause: User attempted to use a functionality that the server does not support.

Action: Upgrade the server

OCI-21524: object type mismatch

Cause: The object type of the object is different from what is specified.

Action: Check the type of the object and correct it.

OCI-21525: attribute number (or collection element at index) *string* violated its constraints

Cause: Attribute value or collection element value violated its constraint.

Action: Change the value of the attribute or collection element such that it meets its constraints. The constraints are specified as part of the attribute or collection element's schema information.

OCI-21526: initialization failed

Cause: The initialization sequence failed. This can happen, for example, if an environment variable such as NLS_DATE_FORMAT is set to an invalid value.

Action: Check that all NLS environment variables are well-formed.

OCI-21527: internal OMS driver error

Cause: A process has encountered an exceptional condition. This is the generic internal error number for Oracle object management services exceptions.

Action: Report this as a bug to Oracle Support Services.

OCI-21560: argument *string* is null, invalid, or out of range

Cause: The argument is expecting a non-null, valid value but the argument value passed in is null, invalid, or out of range. Examples include when the LOB/FILE positional or size argument has a value outside the range 1 through (4GB - 1), or when an invalid open mode is used to open a file, etc.

Action: Check your program and correct the caller of the routine to not pass a null, invalid or out-of-range argument value.

OCI-21562: column *string* has unsupported data type *string*

Cause: A data type was specified which is currently unsupported.

Action: Choose another data type which is supported.

OCI-21563: Error *string* while calling *string* for column *string* with datatype *string*

Cause: OCI Error encountered while performing data type conversion.

Action: Check the OCI Error code

OCI-21570: current *string* LCR has unreceived chunk data

Cause: The client did not receive all the chunk data for the current LCR.

Action: If OCIXStreamOutLCRCallbackReceive is used in your program then modify your callback functions to return OCI_CONTINUE while OCI_XSTREAM_MORE_ROW_DATA flag is set; otherwise, modify your program to call OCIXStreamOutChunkReceive until all the chunks are received (that is, the flag returned by OCIXStreamOutChunkReceive API does not have OCI_XSTREAM_MORE_ROW_DATA bit set).

OCI-21571: must provide a LOB WRITE, LOB TRIM or LOB ERASE LCR in *string* call (input LCR=*string*)

Cause: An attempt was made to invoke the specified function without providing a piece-wise LOB LCR (for example, LOB WRITE, LOB TRIM or LOB ERASE LCR).

Action: Correct the 'row_lcrp' argument in the call.

OCI-21572: Invalid LCR type (*string*) in *string* call

Cause: An attempt was made to invoke the specified function with an incorrect logical change record (LCR) type.

Action: Provide an LCR of the correct type.

OCI-21573: Invalid command type (*string*) when sending a chunk.

Cause: An attempt was made to send a chunk when the command type for the current LCR was not INSERT, UPDATE, or LOB WRITE.

Action: Check your program and provide an LCR with a valid command type to OCIXStreamInChunkSend call or to OCICallbackXStreamInChunkCreate callback.

OCI-21574: Invalid data type (*string*) specified for LOB chunk.

Cause: Invalid data type specified for LOB chunk in OCIXStreamInChunkSend call.

Action: Check your program and provide either SQLT_CHR or SQLT_BIN for 'coldty' argument to OCIXStreamInChunkSend call.

OCI-21577: Input *string* LCR has no LOB column.

Cause: An attempt was made to invoke OCILCRlobInfoGet call with an LCR that had no LOB column.

Action: Replace the input LCR to OCILCRlobInfoGet call.

OCI-21578: Only one LOB column allowed per *string* LCR.

Cause: An attempt was made to set multiple LOB columns on a piece-wise LOB LCR.

Action: Check your program and make sure OCIXStreamInChunkSend is called for only one column per piece-wise LOB LCR.

OCI-21579: Input LCR must have at least one old or new column.

Cause: An attempt was made to call OCIXStreamInChunkSend with an LCR that had empty column lists.

Action: Use OCILCRRowColumnInfoSet to add one or more columns to the input LCR before calling OCIXStreamInChunkSend.

OCI-21580: The LOB operation length (value=*string*) for column (*string*) must be an even number of bytes.

Cause: An attempt was made to call OCIXStreamInChunkSend with an odd number of bytes for a column flagged as AL16UTF16 or NCLOB.

Action: Correct either the LOB column length or 'column_flag' argument to OCIXStreamInChunkSend call.

OCI-21583: invalid XStream server name '*string*'

Cause: An attempt was made to attach to an XStream server with a nonexistent server name.

Action: Correct the server name in the attach call.

OCI-21600: path expression too long

Cause: The path expression that is supplied by the user is too long. The path expression is used to specify the position of an attribute in an object. This error occurs when one of the intermediate elements in the path expression refers to an attribute of a built-in type. Thus, the OCI function cannot proceed on to process the rest of the elements in the path expression.

Action: User should pass in the correct path expression to locate the attribute.

OCI-21601: attribute is not an object

Cause: The user attempts to perform an operation (that is valid only for an object) to an attribute of a built-in type. An example of such an illegal operation is to dynamically set a null structure to an attribute of a built-in type.

Action: User should avoid performing such operation to an attribute of built-in type.

OCI-21602: operation does not support the specified typecode

Cause: The user attempts to perform an operation that does not support the specified typecode.

Action: User should use the range of valid typecodes that are supported by this operation.

OCI-21603: property id [*string*] is invalid

Cause: The specified property id is invalid.

Action: User should specify a valid property id. Valid property ids are enumerated by OCIObjectPropId.

OCI-21604: property [*string*] is not a property of transient or value instances

Cause: Trying to get a property which applies only to persistent objects.

Action: User should check the lifetime and only get this property for persistent objects.

OCI-21605: property [*string*] is not a property of value instances

Cause: Trying to get a property which applies only to persistent and transient objects.

Action: User should check the lifetime and only get this property for persistent and transient objects.

OCI-21606: can not free this object

Cause: Trying to free an object that is persistent and dirty and the OCI_OBJECTFREE_FORCE flag is not specified.

Action: Either flush the persistent object or set the flag to OCI_OBJECTFREE_FORCE

OCI-21607: memory cartridge service handle not initialized

Cause: Attempt to use the handle without initializing it.

Action: Initialize the memory cartridge service handle.

OCI-21608: duration is invalid for this function

Cause: Attempt to use a duration not valid for this function.

Action: Use a valid duration - a previously created user duration or OCI_DURATION_STATEMENT or OCI_DURATION_SESSION. For callout duration or external procedure duration, use OCIExtProcAllocCallMemory.

OCI-21609: memory being resized without being allocated first

Cause: Attempt to resize memory without allocating it first.

Action: Allocate the memory first before resizing it.

OCI-21610: size [*string*] is invalid

Cause: Attempt to resize memory with invalid size.

Action: Pass in a valid size (must be a positive integer).

OCI-21611: key length [*string*] is invalid

Cause: Attempt to use an invalid key length.

Action: Key length is invalid and valid range is 0 to 64

OCI-21612: key is already being used

Cause: Attempt to use a key that is already used.

Action: Use a new key that is not yet being used.

OCI-21613: key does not exist

Cause: Attempt to use a non-existent key

Action: Use a key that already exists.

OCI-21700: object does not exist or is marked for delete

Cause: User attempted to perform an inappropriate operation to an object that is non-existent or marked for delete. Operations such as pinning, deleting and updating cannot be applied to an object that is non-existent or marked for delete.

Action: User needs to re-initialize the reference to reference an existent object or the user needs to unmark the object.

OCI-21701: attempt to flush objects to different servers

Cause: User attempted to flush objects to different servers in one function call. These objects are obtained by calling a callback functions provided by the program.

Action: User should avoid performing such operation.

OCI-21702: object is not instantiated or has been de-instantiated in cache

Cause: User attempted to perform an inappropriate operation to a transient object that is not instantiated in the object cache. Operations that cannot be applied to a not-instantiated transient object include deleting or pinning such an object.

Action: User should check their code to see if they are performing such an operation without instantiating the object first, or performing such an operation after the allocation duration of the object has expired.

OCI-21703: cannot flush an object that is not modified

Cause: See the error message.

Action: The object should not be flushed.

OCI-21704: cannot terminate cache or connection without flushing first

Cause: See the error message.

Action: The transaction should be aborted or committed before terminating the cache or connection.

OCI-21705: service context is invalid

Cause: The service context that is supplied by the user is not valid.

Action: User needs to establish the service context.

OCI-21706: duration does not exist or is invalid

Cause: The duration number that is supplied by the user is not valid.

Action: User needs to establish the duration or use a correct predefined duration.

OCI-21707: pin duration is longer than allocation duration

Cause: The pin duration supplied by the user is longer than the allocation duration. This affects operations such as pinning and setting default parameters.

Action: User should use a shorter pin duration or use the null duration.

OCI-21708: inappropriate operation on a transient object

Cause: User attempted to perform an inappropriate operation on a transient object. Operations that cannot be applied to a transient object include flushing and locking.

Action: User should avoid performing such operation on a transient object.

OCI-21709: cannot refresh an object that has been modified

Cause: User attempted to refresh an object that has been marked for delete, update or insert (new).

Action: User should unmark the object before refreshing it.

OCI-21710: argument is expecting a valid memory address of an object

Cause: The object memory address that is supplied by the user is invalid. The user may have passed in a bad memory address to a function that is expecting a valid memory address of an object.

Action: User should pass in a valid memory address of an object to the function.

OCI-21779: duration not active

Cause: User is trying to use a duration that has been terminated.

Action: User should avoid performing such operation.

OCI-22053: overflow error

Cause: This operation's result is above the range of Oracle number.

Action: Decrease the input value(s) so that the result is in the range of Oracle number.

OCI-22054: underflow error

Cause: This operation's result is below the range of Oracle number.

Action: Increase the input value(s) so that the result is in the range of Oracle number.

OCI-22055: unknown sign flag value [*string*]

Cause: Signed flag used is not OCI_NUMBER_SIGNED or OCI_NUMBER_UNSIGNED.

Action: Use either OCI_NUMBER_SIGNED or OCI_NUMBER_UNSIGNED as sign flag.

OCI-22056: value [*string*] is divided by zero

Cause: Given value is divided by zero.

Action: Modify divisor value to be non-zero.

OCI-22057: bad integer length [*string*]

Cause: The length of the integer (ie number of bytes) to be converted to or from an Oracle number is invalid.

Action: Use integer length 1, 2, 4 or 8 bytes only.

OCI-22059: buffer size [*string*] is too small - [*string*] is needed

Cause: The buffer to hold the resulting text string is too small.

Action: Provide a buffer of the required size.

OCI-22060: argument [*string*] is an invalid or uninitialized number

Cause: An invalid or uninitialized number is passed in.

Action: Use a valid number. To initialize number call OCINumberSetZero().

OCI-22061: invalid format text [*string*]

Cause: The numeric format string for converting characters to or from an Oracle number is invalid.

Action: Use valid format string as documented in OCI Programmer's Guide.

OCI-22062: invalid input string [*string*]

Cause: The text string for converting to numbers is invalid.

Action: Use a valid input string as documented in OCI Programmer's Guide.

OCI-22063: reading negative value [*string*] as unsigned

Cause: Attempt to convert a negative number to an unsigned integer.

Action: Use the sign flag ORLTSB to convert a signed number.

OCI-22064: invalid NLS parameter string [*string*]

Cause: The NLS parameter string for converting characters to or from an Oracle number is invalid.

Action: Use valid format string as documented in OCI Programmer's Guide.

OCI-22065: number to text translation for the given format causes overflow

Cause: Rounding done due to the given string format causes overflow.

Action: Change the format such that overflow does not occur.

OCI-22130: buffer size [*string*] is less than the required size [*string*]

Cause: The size of the buffer into which the hexadecimal REF string is to be written is too small.

Action: Provide a buffer of the required size.

OCI-22131: hexadecimal string length is zero

Cause: The given hexadecimal string length must be greater than zero.

Action: Specify a length greater than zero.

OCI-22132: hexadecimal string does not correspond to a valid REF

Cause: The given hexadecimal string is invalid.

Action: Provide a valid hexadecimal string which was previously returned by a call to OCISRefToHex().

OCI-22140: given size [*string*] must be in the range of 0 to [*string*]

Cause: The given resize size is invalid.

Action: Ensure that the given size is in the required range.

OCI-22141: given size [*string*] must be even in UTF-16 environment

Cause: The given resize size is odd. In a UTF-16 environment, all characters are 2 bytes in length.

Action: Ensure that the given size is even.

OCI-22150: variable-length array has not been initialized

Cause: An un-initialized variable-length array is being operated upon.

Action: Initialize the variable-length array prior to calling this function.

OCI-22151: cannot resize non-zero variable-length array to zero elements

Cause: Trying to resize a non-zero variable-length array to 0 elements.

Action: Specify a non-zero size.

OCI-22152: destination variable-length array is not initialized

Cause: The variable-length array on the right-hand-side of an assignment or the destination array of an append is not initialized.

Action: Initialize the destination variable-length array prior to calling this function.

OCI-22153: source variable-length array is not initialized

Cause: The variable-length array on the left-hand-side of an assignment or the source array of an append is not initialized.

Action: Initialize the destination variable-length array prior to calling this function.

OCI-22160: element at index [*string*] does not exist

Cause: Collection element at the given index does not exist.

Action: Specify the index of an element which exists.

OCI-22161: type code [*string*] is not valid

Cause: Given type code is not valid.

Action: Use one of the typecodes enumerated in OCITypeCode.

OCI-22162: element at index [*string*] has been previously deleted

Cause: Trying to delete a non-existent collection element.

Action: Check for the existence of the element prior to calling this function.

OCI-22163: left hand and right hand side collections are not of same type

Cause: Left hand and right side collections are not of same type.

Action: Ensure that the same collection type is passed for both left hand and right hand side of this function.

OCI-22164: delete element operation is not allowed for variable-length array

Cause: Trying to delete an element of a variable-length array.

Action: Ensure that the collection is not a variable-length array prior to calling this function.

OCI-22165: given index [*string*] must be in the range of [*string*] to [*string*]

Cause: Given index is not in the required range.

Action: Ensure that the given index is in the required range.

OCI-22166: collection is empty

Cause: Given collection is empty.

Action: Test if collection is empty prior to invoking this function.

OCI-22167: given trim size [*string*] must be less than or equal to [*string*]

Cause: Given trim size is greater than the current collection size.

Action: Ensure that the given size is less than or equal to the collection size prior to calling this function.

OCI-22275: invalid LOB locator specified

Cause: There are several causes: (1) the LOB locator was never initialized; (2) the locator is for a BFILE and the routine expects a BLOB/CLOB/NCLOB locator; (3) the locator is for a BLOB/CLOB/NCLOB and the routine expects a BFILE locator; (4) trying to update the LOB in a trigger body -- LOBs in trigger bodies are read only.

Action: For (1), initialize the LOB locator by selecting into the locator variable or by setting the LOB locator to empty. For (2) and (3), pass the correct type of locator into the routine. For (4), remove the trigger body code that updates the LOB value.

OCI-22276: invalid locator for LOB buffering

Cause: There are several causes: (1) the locator was never enabled for buffering (2) it is not an updated locator but is being used for a write/flush operation

Action: For (1) enable the locator for buffering; (2) ensure that only an updated locator is used for a LOB update operation

OCI-22277: cannot use two different locators to modify the same LOB

Cause: LOB buffering is enabled and an attempt was made to modify the LOB using two different LOB locators.

Action: When using LOB buffering, modify the LOB through one LOB locator only.

OCI-22278: must update the LOB only through the LOB buffers

Cause: LOB buffering is enabled for this LOB and there are buffers for this LOB in the buffer pool. Thus, updating the LOB through means other than the LOB buffers is not allowed.

Action: Update the LOB through the LOB buffers using the locator that has LOB buffering enabled. If this operation is required, buffers associated with this LOB should either be flushed as necessary or buffering should be disabled. Once this is done, reissue the command.

OCI-22279: cannot perform operation with LOB buffering enabled

Cause: The operation attempted is not allowed when LOB buffering is enabled.

Action: If the operation is required, LOB buffering should not be used. In this case, flush buffers associated with the input LOB locator as necessary, disable buffering on the input LOB locator and reissue the command.

OCI-22280: no more buffers available for operation

Cause: There are two causes: (1) All buffers in the buffer pool have been used up by previous operations (2) Attempt to flush a LOB without any previous buffered update operations.

Action: For (1), flush the LOB(s) through the locator that is being used to update the LOB. For (2), write to the LOB through a locator enabled for buffering before attempting to flush buffers.

OCI-22281: cannot perform operation with an updated locator

Cause: The input locator has buffering enabled and was used to update the LOB value through the LOB buffering subsystem. The modified buffer has not been flushed since the write that was performed by the the input locator; thus, the input locator is considered an updated locator. Updated locators cannot be the source of a copy operation. Only one locator per LOB may be used to modify the LOB value through the LOB buffering subsystem.

Action: Depending on whether the modifications made through the input locator to the LOB buffering subsystem should be written to the server, either flush the buffer to write the modifications, or, disable buffering on the locator to discard the modifications. Then, reissue the command.

OCI-22282: non-contiguous append to a buffering enabled LOB not allowed

Cause: The buffered write operation has an input offset value more than one byte or character past the end of the LOB.

Action: Specify an input offset value which is exactly one character or byte greater than the length of the LOB that you are attempting to update through a buffered write operation.

OCI-22285: non-existent directory or file for *string* operation

Cause: Attempted to access a directory that does not exist, or attempted to access a file in a directory that does not exist.

Action: Ensure that a system object corresponding to the specified directory exists in the database dictionary, or make sure the name is correct.

OCI-22286: insufficient privileges on directory or file to perform *string* operation

Cause: The user does not have the necessary access privileges on the directory alias and/or the file for the operation.

Action: Ask the database/system administrator to grant the required privileges on the directory alias and/or the file.

OCI-22287: invalid or modified directory occurred during *string* operation

Cause: The directory alias used for the current operation is not valid if being accessed for the first time, or has been modified by the DBA since the last access.

Action: If you are accessing this directory for the first time, provide a valid directory name. If you have been already successful in opening a file under this directory before this error occurred, then close the file and retry the operation with a valid directory alias as modified by your DBA. Oracle recommends that directories should be modified only during quiescent periods.

OCI-22288: file operation *string* failed\n*nstring*

Cause: The operation attempted on the file failed.

Action: See the next error message for more detailed information. Also, verify that the file exists and that the necessary privileges are set for the specified operation. If the error still persists, report the error to the DBA.

OCI-22289: cannot perform *string* operation on an unopened file

Cause: The file is not open for the required operation to be performed.

Action: Check that the current operation is preceded by a successful file open operation.

OCI-22290: operation would exceed the maximum number of opened files

Cause: The number of open files has reached the maximum limit.

Action: Close some of the opened files and retry the operation.

OCI-22303: type "*string*"."*string*" not found

Cause: The user is trying to obtain information for a type that cannot be found.

Action: Check that the schema is correct and that the type has been created correctly.

OCI-22305: attribute/method/parameter "string" not found

Cause: Type element with the given name is not found in the type.

Action: Check to make sure that the type element exists.

OCI-22306: type "string"."string" already exists

Cause: The user is trying to create a type that already exists.

Action: Check to make sure that the type has not been created prior to this.

OCI-22307: type to alter is not a user-defined type

Cause: The user is trying to alter a built-in type.

Action: Check to make sure that only user-defined types are being altered.

OCI-22309: attribute with name "string" already exists

Cause: The user is attempting to create an object type where more than one attributes have the same name.

Action: Check to make sure that all attribute names are unique.

OCI-22311: type for attribute "string" does not exist

Cause: The type of the attribute does not exist.

Action: No types were created/modified for this DDL transaction. Redo the DDL transaction and add the creation of the attribute's type in the DDL transaction.

OCI-22313: cannot use two versions of the same type "string"

Cause: The version of this type conflicts with the version of this type used by another library that was linked in with the application. An application may only use one version of a type.

Action: Check that the libraries being linked with this application and use the same versions of the type.

OCI-22314: method information mismatch in ALTER TYPE

Cause: The number of methods or the method signature do not match that of the original type declaration. This is not supported.

Action: Make sure the method signature stay identical for the previously declared method. Do not drop existing methods.

OCI-22315: type "string" does not contain a map or order function

Cause: The input type does not contain a map or order function so one cannot be returned.

Action: Add a map or order function to the type or catch this error.

OCI-22316: input type is not a collection type

Cause: The user is trying to obtain information for collection types on a non-named collection type.

Action: Use a named collection type for the function.

OCI-22317: typecode *number* is not legal as a number type

Cause: The user is trying to use a number typecode that is not valid.

Action: Use only OCI_TYPECODE_SMALLINT, OCI_TYPECODE_INTEGER, OCI_TYPECODE_REAL, OCI_TYPECODE_DOUBLE, OCI_TYPECODE_FLOAT, OCI_TYPECODE_NUMBER, or OCI_TYPECODE_DECIMAL.

OCI-22318: input type is not an array type

Cause: The user is trying to obtain the number of elements for a non-array type.

Action: Pass in only a named collection type which is an array.

OCI-22319: type attribute information altered in ALTER TYPE

Cause: The type attribute information does not match that of the original type declaration when altering type. Attributes cannot be altered during ALTER TYPE. Only new methods can be added.

Action: Check that all type alterations are legal.

OCI-22321: method does not return any result

Cause: OCITypeResult() was called on a method that does not return any results.

Action: Check that you are passing in the correct method descriptor, or that your method creation was done correctly.

OCI-22337: the type of accessed object has been evolved

Cause: The type of the accessed object has been altered and the client's object is based on an earlier type definition.

Action: The user needs to exit application and modify application to accommodate the type change. From SQL/PLUS, reconnect and resubmit statement.

OCI-22351: This API is not supported by the ORACLE server.

Cause: An attempt was made to call an API which is not supported by the Oracle server.

Action: Do not call the unsupported API when connected to this Oracle server.

OCI-22352: Type is unsupported or contains an unsupported attribute or element.

Cause: A PL/SQL package type was not supported on the client or contained an attribute or element that was not supported on the client. Unsupported types include index by VARCHAR2 collections, remote types and MLSLABELs.

Action: Do not attempt to use unsupported PL/SQL package types or types that contain unsupported attributes or elements on the client.

OCI-22369: invalid parameter encountered in method *string*

Cause: An invalid parameter is being passed to this method of SYS.RowType or SYS.RowSet.

Action: Check the parameters being passed to this method and make sure that the parameters are allowed.

OCI-22370: incorrect usage of method *string*

Cause: This method of SYS.RowType or SYS.RowSet is being used inappropriately.

Action: Check the documentation for correct usage.

OCI-22600: encountered 8.0.2 (Beta) VARRAY data that cannot be processed

Cause: Production Oracle8 (8.0.3 and beyond) encounters some VARRAY data which was created and stored by Oracle8 8.0.2 (Beta 2). Production Oracle8 cannot understand or process such VARRAY data.

Action: Delete the VARRAY data from the table by dropping the table, deleting the rows, or nulling out the VARRAY columns, and then re-insert the VARRAY data. There is no provided script or tool to help automate this conversion.

OCI-22601: pickler TDS context [*string*] is not initialized

Cause: Attempt to use the pickler TDS context without initializing it.

Action: Use OCIPicklerTdsCtxInit to initialize the context.

OCI-22602: pickler TDS handle [*string*] is not well-formed

Cause: Attempt to use the pickler TDS handle without initializing/ constructing it.

Action: Use OCIPicklerTdsInit to initialize the handle before it is constructed. Use OCIPicklerTdsGenerate to generate the TDS before its attributes can be accessed.

OCI-22603: cannot add an attribute to the already generated TDS handle

Cause: Attempt to add an attribute to the already constructed TDS.

Action: Use a TDS handle that is initialized but not yet constructed.

OCI-22604: TDS handle already generated

Cause: Attempt to generate TDS that is already generated.

Action: Use a TDS handle that is initialized but not yet generated.

OCI-22605: FDO handle [*string*] is not initialized

Cause: Attempt to use an uninitialized FDO handle.

Action: Use OCIPicklerFdoInit to initialize FDO handle".

OCI-22606: pickler image handle [*string*] is not well-formed

Cause: Attempt to use the image handle without initializing/ constructing it.

Action: Use OCIPicklerImageInit to initialize the handle before it is constructed. Use OCIPicklerImageGenerate to generate the image before its attributes can be accessed.

OCI-22607: image handle already generated

Cause: Attempt to generate image that is already generated.

Action: Use a image handle that is initialized but not yet generated.

OCI-22608: cannot add an attribute to the already generated image handle

Cause: Attempt to add an attribute to the already constructed image.

Action: Use an image handle that is initialized but not yet constructed.

OCI-22609: error *string* during initialization of FDO

Cause: Error during FDO initialization.

Action: Take an action based on the specified error.

OCI-22626: Type Mismatch while constructing or accessing OCIAnyData

Cause: Type supplied is not matching the type of the AnyData. If piece wise construction or access is being attempted, the type supplied is not matching the type of the current attribute.

Action: Make sure the type supplied matches the type of object to to be constructed or accessed.

OCI-22975: cannot create a PRIMARY KEY-based REF to this object view

Cause: The object view specified in the MAKE_REF function does not have a PRIMARY KEY-based object identifier. A PRIMARY KEY-based REF cannot be created for such a view.

Action: Specify an object view that has a PRIMARY KEY-based object identifier in the MAKE_REF function.

OCI-22976: incorrect number of arguments to MAKE_REF

Cause: Number of arguments for MAKE_REF is different from the number of PRIMARY KEY attributes of the object view.

Action: Specify all the necessary arguments for MAKE_REF.

OCI-29783: GPnP attribute SET failed with error [*string*]

Cause: An attempt to set the Grid Plug and Play (GPnP) attribute failed. See the brackets for the reason.

Action: Resolve the problem in the included message and retry the request.

OCI-29785: GPnP attribute GET failed with error [*string*]

Cause: An attempt to get the Grid Plug and Play (GPnP) attribute failed. See the brackets for the reason.

Action: Resolve the problem in the included message and retry the request.

OCI-29786: SIHA attribute GET failed with error [*string*]

Cause: An attempt to get the Single-Instance High Availability (SIHA) attribute failed. See the brackets for the reason.

Action: Resolve the problem in the included message and retry the request.

OCI-29787: SIHA attribute SET failed with error [*string*]

Cause: An attempt to set the Single-Instance High Availability (SIHA) attribute failed. See the brackets for the reason.

Action: Resolve the problem in the included message and retry the request.

OCI-30100: internal error [*number*]

Cause: An internal error has occurred.

Action: Contact Oracle Worldwide Support and report the error.

OCI-30101: unknown parameter name '*string*'

Cause: You have misspelled the parameter name.

Action: Spell the parameter name correctly.

OCI-30102: '*string*' is not in the legal range for '*string*'

Cause: The value of the parameter is not within the legal range.

Action: Refer to the manual for the allowable values for this parameter.

OCI-30103: '*string*' contains an illegal integer radix for '*string*'

Cause: An illegal integer radix specification was found.

Action: Only 'd', 'h', 'D', and 'H' may be used as radix specifications.

OCI-30104: '*string*' is not a legal integer for '*string*'

Cause: The value is not a valid integer.

Action: Specify only valid integers for this parameter.

OCI-30105: '*string*' is not a legal boolean for '*string*'

Cause: The value is not a valid boolean.

Action: Refer to the manual for allowable boolean values.

OCI-30106: reserved for future use

Cause: None.

Action: None

OCI-30107: parameter name abbreviation '*string*' is not unique

Cause: The abbreviation given was not unique.

Action: Use a longer abbreviation to make the parameter name unique.

OCI-30108: invalid positional parameter value '*string*'

Cause: An invalid positional parameter value has been entered.

Action: Remove the invalid positional parameter.

OCI-30109: could not open parameter file '*string*'

Cause: The parameter file does not exist.

Action: Create an appropriate parameter file.

OCI-30110: syntax error at '*string*'

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

OCI-30111: no closing quote for value '*string*'

Cause: A quoted string was begun but not finished.

Action: Put a closing quote in the proper location.

OCI-30112: multiple values not allowed for parameter '*string*'

Cause: You attempted to specify multiple values for a parameter which can take only one value.

Action: Do not specify more than one value for this parameter.

OCI-30113: error when processing file '*string*'

Cause: A problem occurred when processing this file.

Action: Examine the additional error messages and correct the problem.

OCI-30114: error when processing from command line

Cause: A problem occurred when processing the command line.

Action: Examine the additional error messages and correct the problem.

OCI-30115: error when processing an environment variable

Cause: A problem occurred when processing an environment variable.

Action: Examine the additional error messages and correct the problem.

OCI-30116: syntax error at '*string*' following '*string*'

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

OCI-30117: syntax error at '*string*' at the start of input

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

OCI-30118: syntax error at '*string*' at the end of input

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

OCI-30119: unable to obtain a valid value for '*string*'

Cause: No valid value was obtained for this parameter.

Action: Rerun the application and enter a valid value.

OCI-30120: '*string*' is not a legal oracle number for '*string*'

Cause: The value is not a valid oracle number.

Action: Refer to the manual for allowable oracle number values.

OCI-30121: '*string*' is not an allowable value for '*string*'

Cause: The value is not a legal value for this parameter.

Action: Refer to the manual for allowable values.

OCI-30122: value '*string*' for '*string*' must be between '*number*' and '*number*'

Cause: The value of the parameter is not within the legal range.

Action: Specify a value that is within the legal range.

OCI-30129: invalid function argument received

Cause: A function received an invalid argument

Action: Check function calls, make sure correct arguments are being passed.

OCI-30130: invalid parameter key type received

Cause: A function received an invalid parameter key type

Action: Check parameter key types in function calls

OCI-30131: number of keys being set exceeds allocation

Cause: Number of parameter keys being set exceeds allocation

Action: Reduce the number of keys being set or increase allocation

OCI-30132: invalid key index supplied

Cause: The key index specified was not within bounds

Action: Change key index to ensure it lies within bounds

OCI-30133: reserved for future use

Cause: None.

Action: None

OCI-30134: reserved for future use

Cause: None.

Action: None

OCI-30135: OCI Thread operation fails

Cause: An OCI Thread function call has failed.

Action: Check the function call to make sure that the correct parameters are being passed and take the appropriate action.

OCI-30150: Invalid argument passed to OCIFile function

Cause: An invalid argument is passed to the OCIFile function. The most common cause is that a NULL pointer is passed where a non-NULL pointer is expected.

Action: Make sure that the values passed as arguments are valid. Esp check for NULL pointers.

OCI-30151: File already exists

Cause: Tried to open a file with OCI_FILE_EXCL flag and the file already exists.

Action: OCIFile is supposed throw this exception in this case.

OCI-30152: File does not exist

Cause: The OCIFile function requires the file to exist, but it does not.

Action: Make sure that the file exists.

OCI-30153: An invalid File Object is passed to the OCIFile function

Cause: An invalid File Object is passed to the OCIFile function.

Action: Make sure that the file object is a valid one. Create a new file object by calling OCIFileOpen if needed.

OCI-30154: The memory address given as buffer for OCIFileRead/Write is invalid

Cause: An invalid memory address is given as the buffer pointer for OCIFileRead/Write.

Action: Make sure that the required memory is allocated and pass a valid memory address as buffer pointer.

OCI-30155: An I/O Error occured during an OCIFile function call
